

# UC - Underlining Character

This session parameter determines the character that is used as underlining character for the following:

- column headings generated by DISPLAY statements;
- page titles/trailers produced by WRITE TITLE / WRITE TRAILER statements with UNDERLINED option.

<b>Possible settings</b>	any character	See also Note below.	
	OFF		
<b>Default setting</b>	- (hyphen)		
<b>Specification within session</b>	yes	Applicable Statements:	DISPLAY FORMAT WRITE TITLE WRITE TRAILER
		Applicable Command:	none

## Note:

If you do not wish column headers to be underlined, you have the following options:

- UC= - A blank line will be output instead of underlining.
- UC=OFF - The field values will be output immediately below the heading line, without any blank line in between.

You can specify UC=OFF only at the statement level of a DISPLAY statement; in this case, you cannot make any other UC specifications for individual fields in that statement.

## Examples:

```
FORMAT UC=*
DISPLAY (UC= ) NAME AGE (UC=+)
```

See also *Underlining Character for Titles and Headers - UC Parameter* in the *Programming Guide*.
