

# SRVUSER - User ID for RPC Server Registry

This Natural profile parameter specifies the user ID needed to register an RPC server on the node specified with the profile parameter SVRNODE.

In case of an EntireX Broker node, SRVUSER is also used to logon to the EntireX Broker. A password is either taken from Natural Security (see \*NSC below) or specified via the application programming interface USR2072N.

SRVUSER is specified on the server side only.

<b>Possible settings</b>	<i>user-ID</i>	Valid user ID, *USER or *NSC. 1 to16 characters.
	*USER	If SRVUSER is set to *USER, the Natural server uses the current Natural user ID (see system variable *USER) to logon to the node.
	*NSC	If SRVUSER is set to *NSC and Natural Security is installed, the Natural server uses the current Natural user ID (see system variable *USER) and the password defined for this user ID in Natural Security to logon to the node.
<b>Default setting</b>	<i>timestamp</i>	If the user ID is omitted, the timestamp will be used.
<b>Dynamic specification</b>	yes	
<b>Specification within session</b>	no	

For further information, see the *Natural Remote Procedure Call (RPC)* documentation.
