

TRACE - Define Trace Level for Natural RPC Servers

This Natural profile parameter activates the RPC trace facility and determines the trace level *n* to be used. For further information, see *Using the Server Trace Facility* p.p. in the *Natural Remote Procedure Call (RPC)* documentation.

TRACE is specified on the server side only.

Possible settings	0	Nothing is traced.
	1	Only messages (inclusive Natural errors) are traced.
	(1 , E)	Messages are traced in the event of an error only.
	2	All messages and data from/to client are traced.
	(2 , E)	Messages and data from/to client are traced in the event of an error only.
Default setting	0	
Dynamic specification	yes	
Specification within session	no	

The values 3 – 9 displayed in the selection box of the Configuration Utility are also accepted. These values are for future use and behave like TRACE=2.

For further information see the *Natural Remote Procedure Call (RPC)* documentation.
