

REGISTER

REGISTER { <i>class-module-name</i> } { * }	[{ <i>library-name</i> }] [{ * }]	[{ ES }] [{ IM }] [{ EM }]
---	--	--

Related command: UNREGISTER.

This command is used to register Natural classes. They are registered for the server ID under which Natural was started.

For further information, see *The REGISTER Command* in the *Adminstrating NaturalX Applications* part of the *Operations* documentation.
