

%U - Translate Lower to Upper Case

This command causes Natural to translate lower-case characters to upper-case for alphanumeric input data.

Upper-case translation is in effect by default.

%U influences the interactive input, which is entered, for example, with a Natural `INPUT` statement. It does not, however, influence the input from the stack.

Upper-case translation is not performed if `AD=W` has been specified for the input field (see the section *Field Upper/Lower Case Characteristics* in the description of the session parameter `AD`).

See also the terminal command %L.
