SYSEXV Utility

The utility SYSEXV provides example programs to illustrate new features of current Natural versions. All programs are available as source objects and display a detailed functionality description when they are executed. Example programs for non-current Natural versions are also available.

This chapter covers the following topics:

- Executing Example Programs of Current Versions

- Executing Example Programs of Non-current Versions

- Terminating the SYSEXV Utility

Executing Example Programs of Current Versions

▶ **To execute an example program of a current version**

1. Enter the following system command:

    ```
    SYSEXV
    ```

    Or:
    Log on to the SYSEXV library:

    ```
    LOGON SYSEXV
    ```

    and continue by entering

    ```
    VERSION
    ```

    As a result, a menu is displayed from which you can choose a Natural version.

2. Choose a version from the menu.

    As a result, a commented menu is displayed from which you can choose an example program relevant to the selected version.

3. Choose a program.

    As a result, the program is executed.

Executing Example Programs of Non-current Versions

▶ **To execute an example program of a non-current version**

1. Log on to the SYSEXV library:

   ```
   LOGON SYSEXV
   ```

2. List the text object `A-README`.

   Note:
   Do not modify the text object `A-README`.

   `A-README` lists and comments example programs for non-current versions.

3. Choose a program and execute it.

Terminating the SYSEXV Utility

▶ **To terminate the SYSEXV utility**

- In the SYSEXV utility menu, choose **OK**.
