

Wizards

The Object Handler provides wizards that determine the processing sequence for the following:

- Unloading data from the Natural system environment into Natural work files.
- Loading data from work files into the Natural system environment.
- Finding objects in your Natural environment.
- Scanning the contents of Natural work files.
- Performing administration functions.

This section provides general information on the wizards and detailed instructions for using the unload and load wizards:

- General Information on Wizards
- Unload Wizard
- Load Wizard

Notes:

1. The unload wizard includes the find function and the load wizard includes the scan.
2. The administration wizard is described in the section *Administration*.
