Table of Contents

1. Installation
2. Changes and Enhancements
3. Restrictions
4. Known Issues
5. Solved Problems

1. Installation

To install the patch release the NEEALLUNIX.SAG file needs to be loaded using the Natural Utility SYSOBJH. This should be loaded over an existing NEE8330 installation.

In addition the libceext.so extract parser needs to be copied to the bin directory of your Natural Engineer installation. This would typically be \$NEEDIR/\$NEEVERS/bin

If you are using the Natural Engineer Web Front End nas server then the nas executable needs to be copied to the NEA bin directory of your Natural Engineer installation. This would typically be \$NEEDIR/\$NEEVERS/nea/nas/bin

2. Changes and Enhancements

n/a

3. Restrictions

n/a

4. Known Issues

n/a

5. Solved Problems

For the list of solved problems, see the file READMEFIX.
