Defaults > 3GL Interfaces

The 3GL interface can transfer output page by page to Entire Output Management for further processing. The interface consists of a control block, a data field and a work area. Several lists can be transferred to Entire Output Management at the same time, however each list must have its own control block and work area.

For further information, see *3GL Interface* in the *System Administration* documentation.

This section covers the following topics:

- Modifying 3GL Interface Defaults

- Displaying 3GL Interface Defaults

- Deleting 3GL Interface Defaults

- Creating New 3GL Interface Defaults

- Listing All 3GL Interfaces Defaults

Modifying 3GL Interface Defaults

With this function, you can change the 3GL Interface defaults system-wide.

▶ **To change 3GL Interface defaults:**

1. Select an instance of the System Administration > Defaults > 3GL Interface node in the object workspace.

2. Invoke the context menu and choose **Open**.

3. The **3GL Interface Defaults** for the selected instance are displayed, and you can change them.

    The fields are described under *Modifying 3GL Interface Defaults* in the *System Administration* documentation.

4. When you have finished making changes, choose the **OK** button to save them.

Displaying 3GL Interface Defaults

With this function, you can view the system-wide 3GL Interface default settings.

▶ **To display 3GL Interface defaults:**

1. Select an instance of the System Administration > Defaults > 3GL Interface node in the object workspace.

2. Invoke the context menu and choose **Display**.

3. The 3GL Interface defaults are displayed. The fields are described under *3GL Interface* in the *System Administration* documentation.

4. Select **Cancel** to close the window.

Deleting 3GL Interface Defaults

▶ **To delete 3GL Interface defaults:**

1. Select an instance of the System Administration > Defaults > 3GL Interface node in the object workspace.

2. Invoke the context menu and choose **Delete**.

3. Confirm your choice.

For further information, see *3GL Interface Maintenance* in the *System Administration* documentation.

Creating New 3GL Interface Defaults

▶ **To create new 3GL Interface defaults:**

1. Select the **3GL Interface** folder in the object workspace and invoke the context menu.

2. Choose **New**.

3. The **New 3GL Interface Defaults** window opens in the content pane, and you can enter data as described under *Defining Default Parameters for 3GL Interfaces* in the *System Administration* documentation.

4. When you have finished, choose the **OK** button to save your data.

Listing All 3GL Interfaces Defaults

▶ **To list all 3GL Interfaces:**

1. Select the System Administration > Defaults > 3GL Interfaces node in the object workspace.

2. Invoke the context menu and choose **List**.

   A window listing all user-defined interfaces is displayed.
