

Defaults > Cleanup

The cleanup parameters enable the system administrator to schedule automatic cleanup.

This section covers the following topics:

- Modifying Cleanup Defaults
 - Displaying Cleanup Defaults
-

Modifying Cleanup Defaults

With this function, you can change the system-wide cleanup default settings.

To change the cleanup parameters:

1. Select the System Administration > Defaults > Cleanup node in the object workspace.
2. Invoke the context menu and choose **Open**.
3. The **Cleanup Parameters** are displayed, and you can change them.

The fields are described under *Automatic Cleanup Defaults* in the *System Administration* documentation.

4. When you have finished making changes, choose the **OK** button to save them.

Displaying Cleanup Defaults

With this function, you can view the system-wide cleanup default settings.

To display the cleanup parameters defaults:

1. Select the System Administration > Defaults > Cleanup node in the object workspace.
2. Invoke the context menu and choose **Display**.
3. The cleanup defaults are displayed. The fields are described under *Automatic Cleanup Defaults* in the *System Administration* documentation.
4. Select **Cancel** to close the window.
