

Start Condense Task

Start Condense Task enables you to condense one or more marked archive datasets.

 **To start the Condense task:**

1. Enter 9 on the command line of the System Administration Menu.

A window is displayed.

2. In the window, you specify a date and time for the next condense task.

Fields

Field	Explanation
Scheduled at	This is the next starting date and time.
Reschedule for	The present date and time are displayed here. You can change these values to reschedule the next condense task.
