CD

Description

Change the current directory on the current drive.

Syntax

```
CD {[drive:]\directory\...}
```

Examples

- Change to the directory *SAG* on the current drive:

  ```
  CD \SAG
  ```

- Change to the directory which is determined by the contents of the variables #FILEDRIVE and #FILEPATH:

  ```
  CD #FILEDRIVE ':' #FILEPATH
  ```

- Change to the directory *SAG\PCC* on the current drive:

  ```
  CD \SAG\PCC
  ```

Variables Returned

#RC (SUCCESS if CD was successful. FAILURE if CD was not successful.)
