

LOG

Description

Write a message to the log file.

The name of the log file is `<username>.log`. It is stored in the `log/trace` directory. If the file does not yet exist, it is created. If the file does exist, the message is appended to it.

Syntax

```
LOG {string|variable}...
```

When the message is written to the log file, a space is not inserted between the operands.

Examples

- Write the current time to the log file:

```
LOG 'The time is ' *TIME
```

- Write a message to the log file, indicating that file name contained in the `#FILESPEC` variable was not found:

```
LOG 'File ' #FILESPEC ' was not found'
```

Variables Returned

None

Usage

Procedure File:	Yes
Command Line:	No
Key:	No
API:	Yes
