MSG

Description

Display a message.

The message is displayed in the terminal application's output window.

Syntax

```
MSG {string|variable}...
```

When the message is displayed, there is no space between the operands.

Examples

- Display a message with the current time:

  ```
  MSG 'The time is ' *TIME
  ```

- Display a message, indicating that the file name contained in the #FILESPEC variable was not found:

  ```
  MSG 'File ' #FILESPEC ' was not found'
  ```

Procedure File Example

Findfile.ncp
