PAUSE

Description

Suspend processing for a specific period of time; at the most for the entire period, or at least until a response from the host is received.

During the pause, it is checked whether a response from the host has been received. If the response is received before the end of the defined pause, processing of the procedure file is continued.

Syntax

```
PAUSE milliseconds
```

milliseconds can be in the range from 0 through 32000 (i.e. 0 thousands of a second through 32 seconds). The value 1000 is equal to 1 second.

Examples

- Suspend processing for 1 second (1000 milliseconds):

  ```
  PAUSE 1000
  ```

- Suspend processing for the number of seconds that is defined by the variable #CNT1:

  ```
  PAUSE #CNT1
  ```

Procedure File Example

Vars.ncp

Variables Returned

None
