WAIT

Description

Suspend processing of a procedure file until the user presses a command button in the dialog box.

The message (string and variable) may be up to 72 characters long.

Syntax

```
WAIT [{string|variable}...]
```

Examples

- Suspend processing without issuing a message:

  ```
  WAIT
  ```

- Suspend processing and issue the message that the file name defined in the #FILESPEC variable cannot be found:

  ```
  WAIT 'File' #FILESPEC 'was not found'
  ```

- Suspend processing and issue the message that procedure file completed successfully:

  ```
  WAIT 'Procedure file completed successfully'
  ```

Procedure File Example

Parms.ncp
