Document Conventions

Convention	Description
Bold	Identifies elements on a screen.
Monospace font	Identifies service names and locations in the format <code>folder.subfolder.service</code> , APIs, Java classes, methods, properties.
<i>Italic</i>	Identifies: Variables for which you must supply values specific to your own situation or environment. New terms the first time they occur in the text. References to other documentation sources.
Monospace font	Identifies: Text you must type in. Messages displayed by the system. Program code.
{ }	Indicates a set of choices from which you must choose one. Type only the information inside the curly braces. Do not type the { } symbols.
	Separates two mutually exclusive choices in a syntax line. Type one of these choices. Do not type the symbol.
[]	Indicates one or more options. Type only the information inside the square brackets. Do not type the [] symbols.
...	Indicates that you can type multiple options of the same type. Type only the information. Do not type the ellipsis (...).

Online Information and Support

Product Documentation

You can find the product documentation on our documentation website at <https://documentation.softwareag.com>.

In addition, you can also access the cloud product documentation via <https://www.software-ag.cloud>. Navigate to the desired product and then, depending on your solution, go to “Developer Center”, “User Center” or “Documentation”.

Product Training

You can find helpful product training material on our Learning Portal at <https://knowledge.softwareag.com>.

Tech Community

You can collaborate with Software AG experts on our Tech Community website at <https://tech-community.softwareag.com>. From here you can, for example:

- Browse through our vast knowledge base.
- Ask questions and find answers in our discussion forums.
- Get the latest Software AG news and announcements.
- Explore our communities.
- Go to our public GitHub and Docker repositories at <https://github.com/softwareag> and <https://hub.docker.com/publishers/softwareag> and discover additional Software AG resources.

Product Support

Support for Software AG products is provided to licensed customers via our Empower Portal at <https://empower.softwareag.com>. Many services on this portal require that you have an account. If you do not yet have one, you can request it at <https://empower.softwareag.com/register>. Once you have an account, you can, for example:

- Download products, updates and fixes.
- Search the Knowledge Center for technical information and tips.
- Subscribe to early warnings and critical alerts.
- Open and update support incidents.
- Add product feature requests.

Data Protection

Software AG products provide functionality with respect to processing of personal data according to the EU General Data Protection Regulation (GDPR). Where applicable, appropriate steps are documented in the respective administration documentation.

2 Release Notes

■ Supported Operating Systems	6
■ Compiler Used to Build Entire Connection	6
■ Important Notes	6

This document describes the new features, changes and enhancements for Entire Connection Version 9.2.1. This is the successor of Entire Connection Version 9.1.4.

Supported Operating Systems

Entire Connection supports the following 64-bit operating system platforms:

- Microsoft Windows 10
- Microsoft Windows 11
- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022

Make sure the machine on which you are going to run the installer contains the latest Windows updates before you start the installation.

Home editions of Microsoft Windows are not supported.

The runtime components of Entire Connection are always 32-bit applications, even on 64-bit platforms.

For further information, see *Prerequisites* in the *Installation* section.

Compiler Used to Build Entire Connection

Entire Connection was built and tested with the following compiler:

- Microsoft Visual Studio 2019

Important Notes

- To address vulnerabilities of previous OpenSSL/TLS versions, this release of Entire Connection includes OpenSSL/TLS 3.0.3.
- To address vulnerabilities of previous SSH2 versions, this release of Entire Connection includes libssh2 1.10.0.
- To address vulnerabilities of previous ICU versions, this release of Entire Connection includes ICU 63.2.0.0.

- To address vulnerabilities of previous zlib versions, this release of Entire Connection includes zlib version 1.2.12.
