

webMethods.io Embed 1.1 Release Readme

April 2020

This file contains important information you must read before using webMethods.io Embed 1.1.

Included in this file is information about functionality that has been added, removed, deprecated, or changed for this product. Deprecated functionality continues to work and is supported by Software AG, but may be removed in a future release. Software AG recommends against using deprecated functionality in new projects.

- BIC-3208
Description: Monitor dashboard: Integrations uid of embed demo site appear as project name in the workflow execution table.
- BIC-3926
Description: Receiving API error Bill UID is not found for the generated bill.

3.0 Usage Notes

This section provides any additional information you need to work with the current release of webMethods.io Embed.

- webMethods.io Embed is best experienced using Google Chrome browser or Mozilla Firefox. Some features may not work if you are using Microsoft Internet Explorer 10.0 or earlier versions.
- After webMethods.io Embed upgrade, the older version browser's cache and cookies are not cleared automatically. This may lead to incorrect display of page content. Ensure that you clear the browser's cache manually after every upgrade, and then log in to webMethods.io Embed.

4.0 Other Resolved Issues

This section lists the issues that were resolved in each release but were not part of the fixes listed in the previous section. A release is listed in this section only if changes occurred in that release.

5.0 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content. A release is listed in this section only if changes occurred in that release.

Release 1.1

- The Alerts section describes how you can enable alerts for your webMethods.io Embed tenants to receive notifications when the tenant credit consumption reaches a certain percentage or in case of overages.
- The updated Metrics section describes how you can get an execution overview for your tenant and how to set up filters to view execution data associated with specific plans, solutions, and users.
- The updated Solutions section describes how you can force delete solution versions (and any deployments associated with it).
- The updated Users section describes how you can add new users, change their plans (individual/group), and delete users (and any associated entities such as workflows, authorizations, triggers, and so on) through the Embed Admin portal.

Release 1.0

The webMethods.io Embed documentation describes how you can leverage webMethods.io Embed to enable integration capabilities for your users from within your product.

6.0 Terminology Changes

A release is listed in this section only if changes occurred in that release.

7.0 Added, Removed, Deprecated, or Changed Items

This section lists features, functionality, controls, portlets, properties, or other items that have been added, removed, deprecated, or changed. A release is listed in this section only if changes occurred in that release.

Release 1.1

Added Item	Description
Alerts	You can now enable alert notifications to send credit consumption and overage notifications to specific users of your webMethods.io Embed tenant.
Filter-based Execution Details	You can now set up custom filters to fetch execution data associated with specific solutions, plans, and users.
Force delete solution versions	You can now force delete solution versions (and any deployments associated with it) from your webMethods.io Embed Admin portal.
User management	You can now add new users, modify their previously assigned plan type (individual/group), delete users (along with any associated workflows, triggers, authorizations, and so on), and export their deployments to your local machine through the webMethods.io Embed Admin portal.
Execution Metrics and Logs	You can now view the execution metrics, execution logs, and execution history in the demo site as well. Earlier, these were only accessible through the webMethods.io Embed Admin portal.
New Connectors	Added support for the following CloudStreams connectors: <ul style="list-style-type: none">▪ Cumulocity▪ Google PubSub▪ Amazon SNS▪ SAP C4C▪ Amazon Dynamo DB
