General Availability

Date when the product is first made publically available on "general release"

3 years technical and engineering support for major (e.g. v10) and minor (e.g. v10.15) versions following the General Availability date

For Innovation Releases, only 6 months technical and engineering support is provided following the General Availability date

Hotfixes and service packs are provided during this period before the End of Maintenance date

End of Maintenance

Date when no further fixes or service packs are created

Hotfixes and service packs are not created following the End of Maintenance date

1 year technical support (no engineering support) following the End of Maintenance date

For Innovation Releases, only 6 months technical support is provided following the End of Maintenance date

End of Sustained Support

Date when any form of Software AG support is no longer available for the product

Self-help support from Empower is made available for versions recently at End of Sustained Support

Exceptions

The Cumulocity IoT Transport Connectivity plug-in is supported for only as long as the equivalent version of Cumulocity IoT is supported

E.g., the Apama 10.15 Cumulocity IoT Transport Connectivity plug-in is supported for as long as Cumulocity IoT 10.15 is supported

Cumulocity IoT support timeframes are different to those for Apama. Refer to Software AG Empower for Cumulocity IoT product version availability:
