**Notes:**

Language packs are available for some products on all supported operating systems except Mac OS X.

This document will be updated whenever support for additional operating systems becomes available.

<sup>1</sup> Red Hat Enterprise Linux Server includes the Base Server and Advanced Platform

<sup>2</sup> EntireX and ApplinX support additional operating systems. See the Release Notes of these products.

<sup>3</sup> For information about the webMethods SAP Process Monitoring Agent and webMethods SAP Adapter, which are components of webMethods Optimize for SAP, see the webMethods Adapter System Requirements.

<sup>4</sup> Windows Desktop platforms are supported for server functionality for development environments only.

<sup>5</sup> Also supported on VMWare ESX 5.x.

- <sup>6</sup> - Broker C client library supported for both 32-bit and 64-bit Solaris, HP-UX and AIX
- Broker Server and command line utilities are supported on listed platforms
- Broker C# API is supported on Windows only
- Broker Java/JMS API also supported on Mac OSX

<sup>7</sup> Apama Support is very specific:

- Win2008R2 is SP1 only; Win2012 is R2 only; Win7 is SP1 only; Win8 is 8.1 only,
- RHEL6 is 6.8 or higher,
- Additional OS are also supported. For details please refer to the product's documentation

<sup>8</sup> Please contact your Software AG representative if you plan to install CentraSite on a Solaris CMT system.

<sup>9</sup> The support is specific: Professional version of Windows 7 only and 10.11 version of MacOS

<sup>10</sup> On HP-UX systems, shared memory drivers are currently not supported - for more information see the Universal Messaging installation guide.

<sup>11</sup> Terracotta BigMemory supports the following platforms only for webMethods customers.

<sup>12</sup> webMethods AgileApps Cloud supports also CentOS 7

<sup>13</sup> Integration Agent is supported on the same platforms as Integration Server with the exception of Mac OS.

<sup>14</sup> RHEL6 is supported on 6.8 or higher versions

<sup>15</sup> SPARC T8 Servers are not supported

**Please refer to Disclaimer on last page!**

- Notes:**
- <sup>1</sup> Windows Desktop platforms are supported for webMethods server functionality for development environments only
  - <sup>2</sup> Also supported on VMWare ESX 5.x
  - <sup>3</sup> Eclipse 4.5 officially only supports Windows 7 and 8
  - <sup>4</sup> Eclipse 4.5 officially only supports Mac OS X 10.10
  - <sup>5</sup> Eclipse 4.5 officially only supports SUSE 11 SP2

**Please refer to Disclaimer on last page!**

## Supported RDBMSs

webMethods products support their database components on all platforms on which the RDBMS vendor supports the RDBMS. Unless otherwise mentioned all webMethods products come with the client component of the DataDirect Connect **JDBC 5.1.4** driver.

		Oracle		DB2 LUW	SQL Server	
		11 g (R1 / R2) <sup>*1</sup>	12 c <sup>*1</sup>	10.5	2012	2014
Apama Server <sup>*5</sup>	10.0	(✓) <sup>7</sup>	✓	✓	✓	✓

webMethods Process Engine	10.0	✓	✓	✓	✓	✓
webMethods Trading Networks	10.0	✓	✓	✓	✓	✓

### Notes:

<sup>1</sup> Oracle is also supported when implemented as RAC.

<sup>2</sup> Database connections use the standard JDBC interface. The required JDBC drivers are database-specific and are either part of the database installation or can be acquired from the database manufacturer. Selecting a suitable JDBC driver is not critical as only standard JDBC features are used.

<sup>3</sup> Supported JDBC driver: 11.1.0.6.0 and higher

<sup>4</sup> SQL Server Standard and Enterprise Editions are supported

Supported JDBC driver: 4.0.2206.100 and higher. It is mandatory with Java to use the sqljdbc4.jar driver.

PPM supports SQL Server databases set up for collation Latin1\_General\_BIN. SQL Server databases with other collations are not supported. You can assign the collation at the database level.

If you use MS SQL Server on a single database instance and plan to set up a scaled PPM system with one master server and several sub-servers to connect to that instance, you need to ensure that the individual servers (especially master server and sub-servers) access different databases within the instance.

<sup>5</sup> These products support additional RDBMSs. For details please see the the respective product documentation.

<sup>6</sup> Database connections use the standard JDBC interface. The required JDBC drivers are database-specific and are either part of the database installation or can be acquired from the database manufacturer.

<sup>7</sup> Apama is only supported on Oracle 11g R2, not R1.

<sup>8</sup> webMethods AgileApps Cloud supports Community Edition and Enterprise Edition for MySQL 5.7 for on-premise and Amazon RDS for MySQL.

<sup>9</sup> webMethods Integration Server supports also Amazon Relational Database Service (Amazon RDS)

<sup>10</sup> Supports PostgreSQL 9.1 and MongoDB 3.2

**Please refer to Disclaimer on last page!**

Terracotta Ehcache	10.0	✓	✓	✓	✓	✓	✓		✓	✓	✓	✓	✓	✓	✓
Terracotta Web Sessions	4.3.4	✓	✓	✓	✓	✓	✓		✓	✓	✓	✓	✓	✓	✓
Universal Messaging <sup>*2</sup>	10.0									✓					

### Notes:

<sup>1</sup> Application server support applies to Apama dashboards.

Application servers and client web browsers must be using JRE 8 to access Web Start dashboards.

<sup>2</sup> Refers to the support application server for the JMS Resource Adapter.

The Universal Messaging Resource Adapter is explicitly tested and certified on the platforms specified in the table above, although it should work with other platforms.

Software AG will take support issues on other platforms, but will try to reproduce issues on one of the supported platforms.

If the issue is not reproducible, then the customer should report this to their application server vendor.

EntireX and ApplinX support additional Application Servers.

See the Release Notes of these products.

**Please refer to Disclaimer on last page!**

**Disclaimer:**

Unless otherwise specified in our documentation, we encourage installing the latest service packs, patch-bundles and fixes for the supported operating systems and products if those are recommended by the respective vendor. Please report defects resulting from 3rd party supplied fixes, patches or service packs to the vendor directly.

Except where otherwise specified by a special arrangement, we support our software operation only on the supported Linux distributions mentioned above. Customers may run Software AG products on Linux distributions like Oracle Linux and other Linux distributions that are stated to be compatible with the Linux distributions supported by Software AG products. If they encounter an issue that might be related to Software AG products, Technical Services may ask the customer to reproduce the issue on the Red Hat or SUSE distributions that are supported before analyzing the issue further.

Software AG tests its software against specific versions of operating systems and supported products (RDBMSs, JDKs, browsers, application servers, directory servers) and not specifically against all possible combinations of patches, fixes and hardware that might comprise that platform. Therefore, Software AG may not use the exact same versions of fixes, patches or service packs for operating systems and supported software products, when troubleshooting a customer issue.
