Notes:

¹ AgileApps process modeling is only supported on Mozilla Firefox.

² Cumulocity IoT Edge is fully functional on Internet Explorer 11. However, sometimes layouts might not appear properly. In response to Microsoft announcing the Internet Explorer 11 end of life, 10.15 is the last release of Cumulocity IoT Edge which supports Internet Explorer 11.

For more details, see the "General Information and Disclaimers" section at the end of this document.

Notes:

- ¹ Red Hat Enterprise Linux Server includes the Base Server and Advanced Platform.
- ² Software AG supports macOS 11 on Intel x86_64 and Apple arm64 hardware. For Apple arm64 Hardware, ensure that the software package "com.apple.pkg.RosettaUpdateAuto" is installed. For more information, see the "Machine Requirements" section in the "Using the Software AG Installer" guide.
- ³ ApplinX and EntireX support additional operating systems. For more information, see the product Release Notes.
- ⁴ Ensure that the "libnsl" package is installed.
- ⁵ BigMemory Max supports the listed platforms only when used with webMethods products.
- ⁶ Zementis also supports Ubuntu 16.04, Debian 9, and other platforms. For more information, see the product documentation.
- ⁷ Universal Messaging shared memory drivers are currently not supported. For more information, see the product documentation.
- ⁸ You can install Software AG Platform Manager with Software AG Installer on zLinux, but the installation cannot be managed in Command Central.
- ⁹ Vendor support for the platform ends on 20th of June 2024.

For more details, see the "General Information and Disclaimers" section at the end of this document.

Supported Operating System Platforms for Software AG Designer

Software AG supports all listed operating systems on premise, and the following operating systems in any cloud environment: Windows Server 2012, 2016, and 2019, and Red Hat Linux Enterprise Server 7 and 8.

		Windows Server 2016 Datacenter and Standard Edition	Windows Server 2019 Datacenter and Standard Edition	Windows Server 2022 Datacenter and Standard Edition	Windows 10 Pro and Enterprise	Windows 11 Pro and Enterprise	Suse Linux Enterprise Server	Red Hat Enterprise Linux		macOS

Notes:

¹ Integration Server support does not extend to the base image and any fixes or patches issued by the base Docker image provider.

For more details, see the "General Information and Disclaimers" section at the end of this document.

Orchestration

Any OCI-compliant container runtime should work. If you encounter an issue with your specific OCI runtime, you will be required to reproduce it on one of the supported platforms.

Product Name	Version	Orchestrators					
		Kubernetes	OpenShift	High Availability	Horizontal Scaling	Container upgrade strategy for major releases	Container upgrade strategy for fixes

Supported RDBMSs for On-Premises Software AG Products

Software AG provides updates for the DataDirect Connect JDBC database driver on Software AG Update Manager and Software AG Command Central. Software AG products that support MySQL Community Edition use the MySQL Community Edition database driver to communicate with the RDBMS. For more information, see the "Installing Software AG Products" guide.

webMethods Database Configuration ⁵	10.15	✓	✓	✓		✓	✓	✓
Zementis Server	10.11						✓	

Notes:

¹ MashZone NextGen supports JDBC drivers 11.2.0.2.0 and higher. MashZone NextGen also supports PostgreSQL 11.

² Integration Server and Microservice Runtime also support Amazon Relational Database Service (Amazon RDS).

³ API Portal supports PostgreSQL 12.3 only for standalone installations.

⁴ webMethods Optimize supports PostgreSQL 10.x and Oracle 12c.

⁵ The database connection URL must contain the parameter useSSL=false.

For more details, see the "General Information and Disclaimers" section at the end of this document.

Notes:

¹ Universal Messaging and Terracotta BigMemory support additional JDKs. For more information, see the product documentation.

For more details, see the "General Information and Disclaimers" section at the end of this document.

Supported Application Servers for On-Premises Software AG Products

Additional Application Servers		Apache Tomcat			IBM WebSphere	JBoss/WildFly		Jetty	Oracle BEA Weblogic
Product Name	Version	8.0	8.5 (Software AG Runtime)	9.0	8.5	EAP 7.1	15.1	9.0	12.2
Apama Server ¹	10.11		✓						✓
ApplnX	10.11		✓	✓			(✓) ³		
EntireX	10.8		✓	✓	✓				
BigMemory Max	4.4	✓	✓	✓	✓			✓	✓
Software AG Universal Messaging ²	10.11				✓	✓			
webMethods Broker ⁴	10.15				✓	✓			✓
Zementis Server	10.11	✓	✓	✓	✓				

Notes:

¹ Application server support applies to Apama dashboards.

² Refers to the supported application server for the JMS Resource Adapter. The Universal Messaging Resource Adapter is explicitly tested and supported on the platforms specified in the table above. Software AG will take support issues on other platforms, but will try to reproduce issues on one of the supported platforms. If the issue is not reproducible, report this to your application server vendor.

³ Support also extends to JBoss/Wildfly versions 8, 9 and 10.

⁴ webMethods Broker supports application servers based on Java EE standards by way of the Java EE Connector Architecture (JCA) 1.5 and JMS Application Server Facilities (ASF). webMethods Broker includes a resource adapter that works with JCA 1.5, uses the JMS client library, and integrates well with application servers. You can use webMethods Broker with application servers using either the JCA resource adapter or ASF. webMethods Broker is tested to work with Oracle WebLogic, JBoss enterprise editions, and IBM WebSphere application servers. Software AG Support will handle any issues pertaining to resource adapter operation with JCA 1.5 or ASF. For issues specific to the application server configuration or the JCA container of the application server, report those issues to the respective application server vendors.

For more details, see the "General Information and Disclaimers" section at the end of this document.

General Information and Disclaimers

This document will be updated whenever additional support becomes available.

Language packs are available for some products on all supported operating systems except macOS.

webMethods products support their database components on all platforms on which the RDBMS vendor supports the RDBMS. Unless otherwise stated, all webMethods products include the client component of the DataDirect Connect JDBC 6.0.0 driver.

The JDKs listed in the "Delivered JDKs for On-Premises Software AG Products" section are part of the 10.15 release delivery.

Unless otherwise stated, all products support only the application server that is included with the suite. For additional application server support, please contact your Software AG representative.

Unless otherwise stated in the Software AG product documentation, Software AG encourages installing the latest service packs, patch-bundles, and fixes for the supported operating systems and products, if recommended by the respective vendor. Please report defects resulting from third-party fixes, patches, and service packs directly to the vendor.

Unless stipulated in a special arrangement, Software AG supports software operation only on the supported Linux distributions mentioned in this document. You can run Software AG products on other Linux distributions. If they encounter an issue that might be related to Software AG products, Technical Services might ask the customer to reproduce the issue on the supported Red Hat or SUSE distributions that are supported before analyzing the issue further.

Software AG tests its software against specific versions of operating systems and supported products (RDBMSs, JDKs, browsers, application servers, directory servers) and not specifically against all possible combinations of patches, fixes, and hardware that might comprise a platform. Therefore, Software AG might not use the exact same versions of fixes, patches, and service packs for operating systems and supported software products when troubleshooting a customer issue.
