Notes:

¹ Red Hat Enterprise Linux Server includes the Base Server and Advanced Platform.

² AppliX and EntireX support additional operating systems. See the product's Release Notes.

³ Also supported on VMWare ESX 5.x.

⁴ Apama Support is very specific: Win2012 is R2 only; Win8 is 8.1 only. Additional OS are also supported. See the product's documentation.

⁵ CentraSite on Solaris SPARC requires Oracle Solaris Version 11.3.25.3.0 (Support Repository Update 25, October 2017) or higher

⁶ Terracotta BigMemory supports these platforms only when used with webMethods products.

⁷ Integration Agent is supported on the same platforms as Integration Server with the exception of Mac OS.

⁸ Zementis also supports Ubuntu 16.04 and Debian 9, as well as other platforms. See the product's documentation.

⁹ API Portal supports version 7.4 of RHEL and CentOS.

¹⁰ Terracotta products support Docker (kernel engine 3.10+) and Kubernetes. See the product's documentation.

¹¹ (UM) Shared memory drivers are currently not supported. See the product's documentation.

Notes:

¹ Application server support applies to Apama dashboards.

² Refers to the supported application server for the JMS Resource Adapter. The Universal Messaging Resource Adapter is explicitly tested and supported on the platforms specified in the table above. Software AG will take support issues on other platforms, but will try to reproduce issues on one of the supported platforms. If the issue is not reproducible, report this to your application server vendor.

³ Support also extends to JBoss/Wildfly versions 8, 9 and 10.

Please refer to "General Info & Disclaimers" on the last page!

General Information and Disclaimers:

This document will be updated whenever additional support becomes available.

Language packs are available for some products on all supported operating systems except macOS.

webMethods products support their database components on all platforms on which the RDBMS vendor supports the RDBMS. Unless otherwise mentioned all webMethods products come with the client component of the DataDirect Connect JDBC 5.1.4 driver.

The JDKs listed on the "Delivered JDKs" page are part of the 10.4 release delivery.

Unless otherwise mentioned all products only support the application server that is included with the suite. For additional application server support please contact your Software AG representative.

Unless otherwise specified in our documentation, we encourage installing the latest service packs, patch-bundles and fixes for the supported operating systems and products if those are recommended by the respective vendor. Please report defects resulting from 3rd party supplied fixes, patches or service packs to the vendor directly.

Except where otherwise specified by a special arrangement, we support our software operation only on the supported Linux distributions mentioned above. Customers may run Software AG products on Linux distributions like Oracle Linux and other Linux distributions that are stated to be compatible with the Linux distributions supported by Software AG products. If they encounter an issue that might be related to Software AG products, Technical Services may ask the customer to reproduce the issue on the Red Hat or SUSE distributions that are supported before analyzing the issue further.

Software AG tests its software against specific versions of operating systems and supported products (RDBMSs, JDKs, browsers, application servers, directory servers) and not specifically against all possible combinations of patches, fixes and hardware that might comprise that platform. Therefore, Software AG may not use the exact same versions of fixes, patches or service packs for operating systems and supported software products, when troubleshooting a customer issue.
