

webMethods EntireX Adapter 7.2 Readme

November 2008

The webMethods EntireX Adapter enables the webMethods Integration Server to consume (IS outbound) as well as provide (IS inbound) EntireX RPC services. EntireX supports bidirectional integration with Natural, COBOL, PL/I, C and other applications on z/OS, z/VSE, BS2000/OSD and other platforms.

This file provides important information you should read before using webMethods EntireX Adapter 7.2. You can find additional information at the following locations:

1.0 Critical Information

The following list describes the critical issues that were known when this readme was published. For critical information found later, go to the [webMethods Advantage Critical Information area](#).

- None

2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the [webMethods Knowledge Base](#).

- None

3.0 Usage Notes

- None

4.0 Enhancements and Fixes

This section lists fixes that were known when this readme was published. For fixes created later, go to Secured Services > Knowledge Center > Fix Explorer in ServLine24. This service is available for registered ServLine24 users under <http://servline24.softwareag.com/>.

4.1 Enhancements

- The Adapter supports reliable RPC calls. The Eclipse plug-in creates Reliable RPC Connections.
- The Eclipse plug-in can use secure connections to the Integration Server using HTTPS.
- The Eclipse plug-in creates all Integration Server nodes needed for listeners for RPC and Reliable RPC.
- The Adapter supports connections to IMS Connect to call MPP-style programs in IMS.
