1.0 Critical Information

This section lists the critical issues that were known when this readme was published. For critical information found later, go to the Knowledge Center portion of the [Empower Product Support Web site](#).

None.

2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the Knowledge Center portion of the [Empower Product Support Web site](#).

None.

3.0 Usage Notes

This section highlights product limitations and changes to product behavior introduced in this release.

- The JMS provider's client libraries could potentially conflict with JNDI properties that are used with other webMethods components running under the Integration Server. If you encounter a JNDI properties conflict, copy your JMS client libraries to the WmJMSAdapter\code\jars directory rather than the IntegrationServer\lib\jars directory. Note: If you copy the JMS client libraries to the adapter package directory, MessageListener notifications will not work in local mode; you must publish documents via a Broker.
As a workaround, associate notifications with services instead.
- Notification documents cannot be published from JMS providers whose messages are not serializable.
As a workaround, associate the notification with a service instead.
- When using the Adapter for JMS 6.1, services that are invoked by a polling notification cannot retrieve information from the fields in the _env structure of the document passed by the polling notification to the service. The _env fields will be empty.
- The webMethods Adapter for JMS 6.1 complies with the requirements of Unicode Standard 3.0 and later.
- This adapter was tested on a Japanese operating system running a Japanese version of a JMS provider and Japanese version of an LDAP server. Because the nature of JMS is to pass message content, character sets are not a concern and the adapter is deemed suitable for use in any locale.

- If you expect to display non-English data in your webMethods tools, make sure an appropriate font is installed in your operating environment. If you see hollow boxes or black squares where you expect to see non-English data, modify your JRE font.properties file to reference the font. For information on modifying your font.properties file, go to Oracle's Java website. For information on the JRE provided with this release, go to:
<http://docs.oracle.com/javase/1.4.2/docs/guide/intl/fontprop.html>
Or refer to the document located at:
http://www.unicode.org/help/display_problems.html.

4.0 Fixes and Enhancements

This section describes the fixes and enhancements included in webMethods Adapter for JMS 6.1.

4.1 Fixes and Service Packs Included in This Release

This section lists the fixes and service packs for previous releases that have been included into the current release. If only some issues in a fix or service pack have been included, that partially included fix or service pack is not listed here, and those issues are listed separately in [Section 4.2 Resolved Issues](#). See the Knowledge Center section of the [Empower Product Support Web site](#) for more information about fixes and service packs.

None.

4.2 Resolved Issues

This section lists issues that were resolved in this release and that are not included in the fixes and service packs listed in [Section 4.1 Fixes and Service Packs Included in This Release](#). These issues might have been resolved in a fix or service pack that was not included in its entirety into this release, or they might have been resolved since the last fix or service pack was released.

None.

4.3 Enhancements

The webMethods Adapter for JMS 6.1 includes the following enhancement:

The Adapter for JMS 6.1 was updated to address an internal API change between Integration Server 6.0 and 6.1, enabling the Adapter for JMS to run on the Integration Server 6.1.

4.4 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

- *webMethods Adapter for JMS Installation and User's Guide 6.1* merges the documentation that was contained in the adapter's former user's guide and installation guide.

- *webMethods Adapter for JMS Installation and User's Guide 6.1* contains information on the installer changes as well as upgrade instructions. This guide is available from the [Software AG Documentation Web site](#) and can also be downloaded as part of the product documentation library from the webMethods Installer.
- Online help for the webMethods Adapter for JMS is available in the Integration Server Administrator by clicking the Help button at the top right corner of each screen. Online help is also available for the adapter in the webMethods Developer through the Help menu and by clicking the Help button from the Adapter Service Editor. Online help is displayed in your default web browser. If you are using Netscape, you need to use version 6.x to ensure that the help documents are displayed properly.

4.5 Terminology Changes

This section lists terminology that has changed since the last full release of the product.

None.

4.6 Deprecated or Removed Items

This section lists product functionality that has been deprecated since the last full release of the product. Deprecated Built-In services and APIs are listed in the relevant sections that follow this one.

None.

4.7 Added, Removed, Deprecated, or Changed Built-In Services

This section lists Built-In services that have been added, removed, deprecated, or changed since the last full release of the product.

None.
