# webMethods Adapter for MongoDB

## *Release Notes*

---

## webMethods Adapter for MongoDB Version 9.12

Software AG is pleased to introduce webMethods Adapter for MongoDB Version 9.12. This adapter helps your organization to seamlessly integrate with MongoDB, a general purpose, document-based, distributed database using the native MongoDB Java Client APIs. The webMethods Adapter for MongoDB provides a graphical interface to develop services for CRUD and query operations without the need for coding. In addition, the adapter allows you to monitor operations on database or collection.

---

## Release Highlights

### *Template Based Integrations*

webMethods Adapter for MongoDB provides service templates and listener notification templates for interactions with MongoDB. These templates help in developing the flow services to interact with MongoDB without typing the MongoDB constructs. The service templates and the notification templates represent specific tasks within MongoDB.

**Service Templates**

| Template | Description |
|---|---|
| Select Document | Selects document from collection |
| Insert Document | Inserts a document into collection |
| Update Document | Updates document from collection |
| Delete Document | Deletes document from collection |
| Dynamic Query Executor | Executes MongoDB Commands |
| Aggregate Query | Executes aggregate operations |

**Listener Notification Templates**

| Template | Description |
|---|---|
| Insert Notification | Monitors Insert operation |
| Update Notification | Monitors Update operation |
| Delete Notification | Monitors Delete operation |
| Replace Notification | Monitors Replace operation |
| Rename Collection Notification | Monitors Rename Collection operation |
| Drop Collection Notification | Monitors Drop Collection operation |

| | |
|---|---|
| Invalidate Notification | Monitors invalid Database/Collection operation |

**Security**

webMethods Adapter for Mongo DB provides SSL support for secured connections.

---

## Platform Support

For the most up to date information about the software and operating systems that the adapter supports, see the *webMethods Adapters System Requirements* document, available from the webMethods area of the Software AG Documentation website (http://documentation.softwareag.com/).
