1.0 Critical Information

The following list describes the critical issues that were known when this readme was published. For critical information found later, go to the Knowledge Center portion of the [Empower Product Support Web site](#).

None.

2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the Knowledge Center section of the [Empower Product Support Web site](#).

- JDO-35
The following warning message is displayed in the Integration Server Administrator console when a connection is activated:
WARNING: Failed to add a notification listener for the MBean with name 'jde:instanceName=unknown.<integration_server_hostname>,metricName=jdenet_connection_pool,hostPort=<enterprise_server_port>,metricType=runtime,hostName=<enterprise_server_hostname>', notifications not be handled.
javax.management.InstanceNotFoundException: jde:targetType=jdeAgent
However, there is no impact on functionality and adapter notifications will be processed using the adapter connection.
There is currently no workaround for this issue.
- JDO-36
When using implicit transactions in a flow, services that use connections with LOCAL_TRANSACTION transaction type fail if any preceding service in the flow that uses the same connection throws an error. There is currently no workaround for this issue. Software AG recommends to mark transaction boundaries explicitly.
- JDO-37
When you create a new adapter notification and configure a Z-event, PeopleSoft EnterpriseOne Adapter returns an error while looking up the adapter resource domain values.

3.0 Usage Notes

- For installation instructions for the adapter, see the *webMethods PeopleSoft EnterpriseOne Adapter Installation and Upgrade Documentation Supplement*.
- The reliable event connection compatible with versions 8.9 and 8.10 of the Oracle JD Edwards EnterpriseOne application release is not yet certified.
- Only real time events are certified to work with PeopleSoft EnterpriseOne Adapter. XAPI, Workflow and Z-events are not certified at this time.

4.0 Enhancements and Fixes

This section describes the enhancements and fixes included in webMethods PeopleSoft EnterpriseOne Adapter 8.98.

4.1 Fixes and Service Packs Included in This Release

- PSFT_E1_8.98_Fix1
This fix is released by Oracle for webMethods PeopleSoft EnterpriseOne Adapter version 8.98. The fix contains all the fixes and modifications made to the PeopleSoft EnterpriseOne Adapter 8.98 and released by Oracle by 08-Apr-2009.

Important!

- If you are installing webMethods PeopleSoft EnterpriseOne Adapter 8.98 on Integration Server 7.1 or later for the first time, this fix is included in the adapter.
- If you are migrating from Integration Server 6.5 to Integration Server 7.1 or later, you must re-install the PeopleSoft EnterpriseOne Adapter 8.98 as described in the *webMethods PeopleSoft EnterpriseOne Adapter Installation and Upgrade Documentation Supplement*, in order to have this fix included in the adapter.
- If you are currently using webMethods PeopleSoft EnterpriseOne Adapter 8.98 on Integration Server 6.5, you can obtain this fix from the Knowledge Center section of the [Empower Product Support Web site](#).

4.2 Resolved Issues

None.

4.3 Enhancements

Globally Unique Identifier (GUID) support was added to business function (BSFN) execution and database operations for auditing purposes. The GUID support is added by adding a new “Audit” section to the Inputs of the following adapter service templates:

- Business Function adapter service template
- Insert adapter service template
- Update adapter service template
- Delete adapter service template

The fields in the new “Audit” section are for:

- IP address

- Application ID
- GUID
- Work station name

These audit fields are optional. You can provide values for the audit fields at run time as input to the adapter service. If you do not supply values for the audit fields, the adapter will generate and set values.

4.4 Documentation Changes

None.

4.5 Terminology Changes

None.

4.6 Deprecated Items

None.

4.7 Added, Removed, Deprecated, or Changed Built-in Services

None.

4.8 Added, Removed, Deprecated, or Changed APIs

None.
