Additional Notes

Adapters support only those versions of JVMs, JDKs, and Operating Systems that are certified with the adapter and supported by both, the host Integration Server and the backend applications.

All the adapters should install the latest fix, to avoid any issues which are already fixed.

Datadirect driver:
Adapter for JDBC supports only those Datadirect drivers which are shipped with the Integration Server.
The Datadirect driver documented as supported with the database servers is restricted to the exact driver shipped with the Integration Server. For example, DataDirect driver documented as supported with SQL Server 2014 on IS 9.5 SP1 is the driver shipped only with IS 9.5 SP1.
You must retain the Datadirect drivers in their original installation path. Do not copy or move the Datadirect drivers to the adapter's jars directory.

The following OS platforms on VMWare virtual machines are supported if the adapter is supported on these platforms.
- Microsoft Windows 2008 Server Standard and Enterprise
- Microsoft Windows 2008 R2 Server Standard and Enterprise
- Microsoft Windows 2012 Server Datacenter and Standard
- Microsoft Windows 2012 R2 Server Datacenter and Standard
- Microsoft Windows 2016 Server Datacenter and Standard (x86-64)
- Microsoft Windows Vista
- Microsoft Windows 7
- Microsoft Windows Server 8 Pro and Enterprise Edition (x86-64)
- Microsoft Windows 10 Pro and Enterprise Edition (x86-64)
- Red Hat Enterprise Linux 5 / 6 / 7
- SUSE Linux 11 / 12
- Oracle Solaris 10 / 11

For details about operating system support for a particular version of Integration Server, see the System Requirements document for that particular version on the [Software AG Documentation Web site](#).
