1.0 Critical Information

This section lists the critical issues that were known when this readme was published. For critical information found later, go to the Knowledge Center portion of the [Empower website](#).

None.

2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the Knowledge Center portion of the [Empower website](#).

In a multi-hop scenario, only user messages can be routed at the intermediary. Routing message fragments is not supported.

3.0 Usage Notes

This section highlights product limitations and changes to product behavior introduced in this release.

- During duplicate detection, when a duplicate message is detected at the receiver end, Module for AS4 does not send an error signal to the message sender, nor does it resend the receipt of the original user message. Instead, the module stores the message in Trading Networks with the status "DUPLICATE_RECEIVED".
- When splitting is enabled and the value specified in the *joinInterval* parameter has been exceeded, an error signal is generated only after another fragment is received. There is no automatic timeout.

4.0 Fixes and Enhancements

This section describes the fixes and enhancements included in webMethods Module 9.0 for AS4.

4.1 Fixes and Service Packs Included in This Release

This section lists the fixes and service packs for previous releases that have been included into the current release. If only some issues in a fix or service pack have been included, that partially included fix or service pack is not listed here, and those issues are listed separately in [Section 4.2 Resolved Issues](#). See the Knowledge Center section of the [Empower website](#) for more information about fixes and service packs.

None.

4.2 Resolved Issues

This section lists issues that were resolved in this release and that are not included in the fixes and service packs listed in [Section 4.1 Fixes and Service Packs Included in This Release](#). These issues might have been resolved in a fix or service pack that was not included in its entirety into this release, or they might have been resolved since

the last fix or service pack was released.

None.

4.3 Enhancements

For a detailed list of the enhancements included in webMethods Module 9.0 for AS4, see the Release Notes available on the [Software AG Documentation website](#).

4.4 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

None.

4.5 Terminology Changes

This section lists terminology that has changed since the last full release of the product.

None.

4.6 Added, Removed, Deprecated, or Changed Items

This section lists product functionality that has been added, removed, deprecated, or changed since the last full release of the product. Deprecated Built-In services and APIs are listed in the relevant sections that follow this one.

None.

4.7 Added, Removed, Deprecated, or Changed Built-In Services

This section lists Built-In services that have been added, removed, deprecated, or changed since the last full release of the product.

None.

4.8 Added, Removed, Deprecated, or Changed APIs

This section lists APIs that have been added, removed, deprecated, or changed since the last full release of the product.

None.
