webMethods Module 9.5 for AS4 Readme

May 2015

This file contains important information you must read before using webMethods Module 9.5 for AS4. You can find webMethods Module 9.5 for AS4 system requirements and user documentation, including installation and upgrade instructions, on the Documentation website or the TECHcommunity website. At those locations, you can also find the suite-related security and globalization information.

1.0   Critical Information

This section lists the critical issues for the current release that were known when this readme was published. For critical information found later, go to the Knowledge Center on the [Empower website](#).

None.

2.0   Known Issues

This section lists issues that were known for the current release when this readme was published. For known issues found later, go to the Knowledge Center on the [Empower website](#).

▪ In a multi-hop scenario, only user messages can be routed at the intermediary. Routing message fragments is not supported.

3.0   Usage Notes

This section highlights product limitations and changes to product behavior introduced in this release.

▪ When splitting is enabled and the value specified in the *joinInterval* parameter has been exceeded, an error signal is generated only after another fragment is received. There is no automatic timeout.

4.0   Fixes Included in Each Release

This section lists the fixes that have been included in each release. Go to the Knowledge Center on the [Empower website](#) for detailed information about fixes.

Release 9.5

None.

Release 9.0

▪ webMethods Module 9.0 for AS4 Fix 2

▪ webMethods Module 9.0 for AS4 Fix 1

5.0   Other Resolved Issues

This section lists the issues that were resolved in each release but were not part of the fixes listed in the previous section.

Release 9.5

None.

Release 9.0

None.

6.0   Documentation Changes

This section describes significant changes to the documentation in each release, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

Release 9.5

▪   Topics added to provide information and instructions for Selective-Pull, Two-Way/Sync, Two-Way/Push-Pull MEPs, and managing certificates using Trading Networks.

7.0   Terminology Changes

None.

8.0   Added, Removed, Deprecated, or Changed Items

This section lists features, functionality, controls, portlets, properties, or other items that have been added, removed, deprecated, or changed.

Release 9.5

Added Item	Description
as4.message.emptyConversationId	Whether empty conversation IDs are supported or not.
as4.twowaysync.requestTimeOut	The amount of time, in milliseconds, the module waits for responding MSH to submit a reply user message in Two-Way/Sync MEP.

Removed Item	Replacement
Keystore parameter from TPA	User needs to configure the certificates/keystore in the Trading Networks profile.

Deprecated Item	Replacement
None.	

Changed Item	Description
None.	

9.0   Added, Removed, Deprecated, or Changed Built-In Services

Release 9.5

Added Service	Description
wm.ip.estd.as4.msh:userMessageSubmit	Enables the sender to submit a user message to the responding MSH, which packages the payload into a user message and sends it to the initiating MSH.
