1.0 Critical Information

This section lists the critical issues that were known when this readme was published. For critical information found later, go to the Knowledge Center portion of the [Empower Product Support website](#).

None.

2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the Knowledge Center portion of the [Empower Product Support website](#).

None.

3.0 Usage Notes

This section highlights product limitations and changes to product behavior introduced in this release.

None.

4.0 Fixes and Enhancements

This section describes the fixes and enhancements included in webMethods Module 8.2 SP1 for EDIINT.

4.1 Fixes and Service Packs Included in This Release

This section lists the fixes and service packs for previous releases that have been included into the current release. If only some issues in a fix or service pack have been included, that partially included fix or service pack is not listed here, and those issues are listed separately in [Section 4.2 Resolved Issues](#). See the Knowledge Center section of the [Empower Product Support website](#) for more information about fixes and service packs.

- EDI_6.5.2_WmEDIINT_Fix18
- EDI_8.0_SP1_WmEDIINT_Fix8
- EDI_8.2_SP1_WmEDIINT_Fix12

4.2 Resolved Issues

This section lists issues that were resolved in this release and that are not included in the fixes and service packs listed in [Section 4.1 Fixes and Service Packs Included in This Release](#). These issues might have been resolved in a fix or service pack that was not included in its entirety into this release, or they might have been resolved since the last fix or service pack was released.

None.

4.3 Enhancements

For a detailed list of the enhancements included in webMethods Module 8.2 SP1 for EDIINT, see the Release Notes available on the [Software AG Documentation website](#).

4.4 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

- A new chapter, “Error Handling,” describes the logging and exception handling in Module for EDIINT and includes a list of error codes and supporting information.
- The “Concepts” chapter now precedes “Installing webMethods Module for EDIINT.”
- The “Before You Can Transport Documents Using EDIINT” chapter has two new sections: “Configuring Where Payloads Are Persisted” and “Restarting AS2 Message Transmission”.
- The glossary has been removed.

4.5 Terminology Changes

This section lists terminology that has changed since the last full release of the product.

None.

4.6 Deprecated Items

This section lists product functionality that has been deprecated since the last full release of the product. Deprecated Built-In services and APIs are listed in the relevant sections that follow this one.

4.7 Added, Removed, Deprecated, or Changed Built-In Services

This section lists Built-In services or properties that have been added, removed, deprecated, or changed since the last full release of the product.

Added Service

Description

wm.EDIINT:restart

Restarts transmission of an EDIINT AS2 message from where the transmission failed.

wm.EDIINT:purgeFiles

Purges the temporary files used for AS2 restart transactions when they are no longer needed.

wm.EDIINT.doc:migrateRequestSignedReceipt

Migrates the value of Signed MDN field from version 6.5 to the Request Signed Receipt field in the later versions of the module.

wm.EDIINT.doc:migrateCompression

Migrates the value of Compressed field from version 6.5 to the Compression field in the later versions of the module.

Removed Service

None.

Replacement Service (if applicable)

Deprecated Service

None.

Replacement Service (if applicable)

Changed Service

wm.EDIINT:send

Description

Four new input parameters were added to the service:
attachments **Document array** Any attachments to a message
enableAS2Restart **Boolean** Restarts a failed transmission of an AS2 message
enableHTTPChunking **Boolean** Enables HTTP chunking
customHeaders **Document** Defines custom headers

For more information about the new parameters, see *webMethods EDIINT Module Installation and User's Guide*.

wm.EDIINT:receive

A new input parameter was added to the service:
Etag **String** Optional. The unique ID of the ETag header that identifies the transaction to be restarted after AS2 message transmission fails

A new output parameter was added to the service:
bizdoc **Document** The resulting document formatted as an IS document (IData object)

For more information about the new parameters, see *webMethods EDIINT Module Installation and User's Guide*.

4.8 Added, Removed, Deprecated, or Changed APIs

This section lists APIs that have been added, removed, deprecated, or changed since the last full release of the product.

None.
