1.0 Critical Information

This section lists the critical issues that were known when this readme was published. For critical information found later, go to the Knowledge Center portion of the [Empower Product Support Web site](#).

None.

2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the Knowledge Center portion of the [Empower Product Support Web site](#).

None.

3.0 Usage Notes

This section highlights product limitations and changes to product behavior introduced in this release.

- A TA1 product limitation does not allow HIPAA Link Module to reflect errors at the group level in this acknowledgment. The HIPAA specification mandates that the TA1 acknowledgment support error messages on nested groups. However, in the current implementation, it is not possible to reflect errors at the group level in the TA1. HIPAA Link Module generates the TA1 after processing the interchange, but before processing the group level. Therefore, the TA1 only contains errors at the interchange level.
- Support for non-ASCII data HIPAA Link Module 7.1 SP1 can only be installed in an English environment running ASCII data. HIPAA Link Module does not support non-ASCII data.

4.0 Fixes and Enhancements

This section describes the fixes and enhancements included in HIPAA Link Module 7.1 SP1.

4.1 Fixes and Service Packs Included in This Release

This section lists the fixes and service packs for previous releases that have been included into the current release. If only some issues in a fix or service pack have been included, that partially included fix or service pack is not listed here, and those issues are listed separately in [Section 4.2 Resolved Issues](#). See the Knowledge Center section of the [Empower Product Support Web site](#) for more information about fixes and service packs.

None.

4.2 Resolved Issues

This section lists issues that were resolved in this release and that are not included in the fixes and service packs listed in [Section 4.1 Fixes and Service Packs Included in This Release](#). These issues might have been resolved in a

fix or service pack that was not included in its entirety into this release, or they might have been resolved since the last fix or service pack was released.

None.

4.3 Enhancements

For a detailed list of the enhancements included in HIPAA Link Module 7.1 SP1, see the Release Notes available on the [Software AG Documentation Web site](#).

4.4 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

- *webMethods HIPAA Link Module Installation and User's Guide* contains concept information and installation and upgrade instructions. It also explains how to send and receive HIPAA messages, configure Interchange, Group, and Transaction parameters, and how HIPAA Link Module acknowledgment processing.
- *webMethods HIPAA Link Module 7.1 SP1 Sample Package User's Guide* describes the sample services that you can use as models for creating your own services. The samples package and user's guide is available for download at [Developer Community for webMethods](#) in the Code Samples area.

4.5 Terminology Changes

This section lists terminology that has changed since the last full release of the product.

None.

4.6 Deprecated Items

This section lists product functionality that has been deprecated since the last full release of the product. Deprecated Built-In services and APIs are listed in the relevant sections that follow this one.

None.

4.7 Added, Removed, Deprecated, or Changed Built-In Services

This section lists Built-In services that have been added, removed, deprecated, or changed since the last full release of the product.

None.
