[6.0 Support](#)

1.0 Critical Information

The following list describes the critical issues that were known when this readme was published. For critical information found later, go to the Knowledge Center portion of the [Empower Product Support Web site](#).

- None.

2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the Knowledge Center section of the [Empower Product Support Web site](#).

- None.

3.0 Usage Notes

- **TA1 limitation with regard to not reflecting group errors**
TA1 mandates that some errors on nested groups should be reflected. For example, if a critical error occurs at the Group level, TA105 should accept a 024 code and the TA1 should be rejected. A TA1 should be created when the Interchange is handled and before getting to the Group level. With the current implementation, it is not possible to reflect Group errors on a TA1.
- **Support for non-ASCII data**
HIPAA Link Module 7.1 FCS can only be installed in an English environment running ASCII data. The module was not tested with non-English configurations and non-ASCII data.

4.0 Enhancements and Fixes

This section describes the enhancements and fixes included in HIPAA Link Module 7.1.

4.1 Fixes and Service Packs Included in This Release

- None.

4.2 Resolved Issues

- None.

4.3 Enhancements

- None.

4.4 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

- A new guide, *webMethods HIPAA Link Module Installation and User's Guide*, describes how to install and use HIPAA Link Module.
- A documentation supplement, *webMethods HIPAA Link Module 7.1 Sample Package User's Guide*, describes how to use the HIPAA Link Module Sample Package.

4.5 Terminology Changes

None.

4.6 Deprecated Items

None.

4.7 Added, Removed, Deprecated, or Changed Built-in Services

None.

4.8 Added, Removed, Deprecated, or Changed APIs

None.
