

# WEBMETHODS API CLOUD: API GATEWAY QUICK START

## User Creation:

- Log on to Integration cloud using the URL `https://<tenantname>.webmethodscloud.<region>/integration/` where *region* is eu for the European region and com for the North America region.
- Navigate to Settings > User section
- Click Add New User.
- Provide the First Name, Last Name, Email, and Username.
- Select one of the predefined access profiles depending on whether the user's role is an administrator or provider of the API Gateway or API Portal.

For more information, see *Integration Cloud documentation*.

*You are all set to access the cloud instance of API Gateway!*

## User Registration :

- Navigate to `http://www.webmethodscloud.com/api/` and select a region, as required.
- Use the API Gateway and API Portal link, received in the email on registration, to log on.

## API Portal destination configuration:

- In API Gateway UI, navigate to Administration > Destinations > API Portal Configuration
- In the Gateway configuration section, provide the credentials; username and password.
- Click Publish.

To navigate to API Portal, you can use the link, Go to API Portal, under *username* > menu options provided in API Gateway user interface.

For more information, see *API Gateway User's Guide*
