

# CISFO:PAGENUMBER2

The CISFO:PAGENUMBER2 control represents the running number of the page within the PDF document. You typically place the page number within the header and/or footer of the document. By default, the control also shows the total number of pages. Use the property `withtotalpagenumber` to suppress the total page number.

---

## Properties

Basic			
<code>withtotalpagenumber</code>	By default this control outputs - besides the running page number - the total page number. Use this attribute to control the output of the total page number. Default is TRUE.	Optional	true false
<code>textid</code>	Textid for the multi language management.	Optional	
<code>separator</code>	By default this control outputs - besides the running page number - the total page number. Use this attribute to separate the two figures. Example: a value of " / " outputs "2 / 16". Use attribute <code>TEXTID</code> in order to have language dependent separator ("2 of 16").	Optional
