## Error Messages and Codes

---

This document describes the error messages and codes of webMethods EntireX. The messages are arranged by message class. Most of the messages below have the following format: *ccccnnn[n|s]*

where *cccc* is the message class

*nnnn* is the message number in the range 0000-9999, or

*nnns* is the message number in the range 000-999 and severity of the error:

E: error; function cannot be performed

I: information

W: warning; potential problem exists

Within an error message, ":n:" is a placeholder for variable text. For example: "Connection to :1: failed: :2:". Here ":1:" and ":2:" will be replaced by meaningful text depending on the context of the error.

This document is organized as follows:

- [List of Message Classes](#)
- [Prefixes](#)
- [Abbreviations](#)

See also [Component Return Codes in EntireX](#) | [Broker Command and Information Services Error Codes](#) | [EXXMSG - Command-line Tool for Displaying Error Messages](#) | [Administration Service Messages](#).

### List of Message Classes

<a href="#">00000000</a>	Successful Response
<a href="#">0001nnnn</a>	RPC C Runtime
<a href="#">0002nnnn</a>	EntireX ACI - User does not Exist
<a href="#">0003nnnn</a>	EntireX ACI - Conversation Ended
<a href="#">0007nnnn</a>	EntireX ACI - Service not Registered
<a href="#">0008nnnn</a>	EntireX ACI - Security Error
<a href="#">0010nnnn</a>	EntireX ACI - Commands to Server
<a href="#">0013nnnn</a>	EntireX Java
<a href="#">0014nnnn</a>	EntireX ACI - Broker Stub Version 1
<a href="#">0015nnnn</a>	Designer
<a href="#">0020nnnn</a>	EntireX ACI - User Error in the API

0021nnnn	EntireX ACI - Configuration Error in the Attribute File
0022nnnn	EntireX ACI - Translation and Conversion Errors
0036nnnn	EntireX ACI - Broker Busy
0037nnnn	EntireX ACI - Broker Resource Shortage
0074nnnn	EntireX ACI - No request or Message Available
0078nnnn	EntireX ACI - Error from Broker
0079nnnn	EntireX ACI - Error in Broker Stub
0196nnnn	EntireX ACI - Disconnected due to new Location
0215nnnn	EntireX ACI - Connection Error
0217nnnn	EntireX ACI - Transactionality
0300nnnn	Broker Command Service
0301nnnn	Broker Information Service
0302nnnn	Configuring and Controlling Service
0400nnnn	Direct RPC
0800nnnn	webMethods EntireX Adapter for Integration Server
1000nnnn	RPC C Runtime System
1001nnnn	RPC Protocol
1002nnnn	User-definable Server
1003nnnn	Conversion
1004nnnn	IDL Compiler
1005nnnn	RPC Server
1006nnnn	DCOM Wrapper
1008nnnn	EntireX License
1011nnnn	User-definable SAGTRPC Conversion Exit
1012nnnn	Reserved.
1014nnnn	Natural System Errors, see the Natural documentation under NATnnnn. You can display the corresponding Natural System error and explanation if you log on to a Natural Session and enter HELPnnnn in the command line.
1015nnnn	Reserved for EntireX RPC Server for Java
1016nnnn	EntireX RPC Service Messages
1017nnnn	EntireX RPC Online Maintenance Facility
1018nnnn	EntireX RPC-ACI Bridge
1020nnnn	IDL Extractor for Natural
1021nnnn	EntireX RPC Server Mapping Deployment
1022nnnn	RPC Server for CICS User Exit Messages
2000nnnn	XML/SOAP Runtime
2001nnnn	IDL Parser
2002nnnn	.NET Wrapper

<i>2003nnnn</i>	PL/I Wrapper
<i>2004nnnn</i>	COBOL Wrapper
<i>2005nnnn</i>	Software AG IDL Extractor Generic Messages
<i>2006nnnn</i>	IDL Extractor for COBOL
<i>2007nnnn</i>	IDL Extractor for PL/I
<i>2008nnnn</i>	Software AG RPC Extractor Service
<i>2010nnnn</i>	RPC Server and Listener for IBM® MQ
<i>2011nnnn</i>	Connections to IMS Connect
<i>2012nnnn</i>	Connections to CICS ECI
<i>2013nnnn</i>	Deployment to XML RPC Server
<i>2014nnnn</i>	COBOL Converter
<i>2015nnnn</i>	AS/400
<i>2016nnnn</i>	CICS Socket Listener
<i>2023nnnn</i>	Connections to ApplinX
<i>3000nnnn</i>	NetWeaver XI Adapter
<i>4000nnnn</i>	EntireX Process Extractor
<i>8000nnnn - 8999nnnn</i>	User-definable ACI Messages
<i>ADASnn</i>	Adabas SVC System Messages. These messages occur only when using XCOM communicator under z/OS or z/VSE.
<i>ADASIPnn</i>	Adabas SVC Installation
<i>ETBDnnnn</i>	Broker Log and Console - Diagnostic Messages
<i>ETBEnnnn</i>	Broker Log and Console - Error Messages
<i>ETBMnnnn</i>	Broker Log and Console - Informational Messages
<i>ETBWnnnn</i>	Broker Log and Console - Unit of Work/Persistence Messages
<i>EXXn</i>	EntireX CICS ABEND Codes
<i>MLCnn</i>	Software AG Licensing Messages. These Messages are produced by Software AG mainframe license processing or when using the license utility, LICUTIL.
<i>SAGTOKnn</i>	EntireX SAGTOKEN Messages
<i>SECxnnn</i>	EntireX Broker Security Server for BS2000
<i>XCOnnns</i>	X-COM Console Messages

### Prefixes

Some error messages include a prefix that tells you where the problem occurred:

Prefix	Location of the Problem
API	ACI (the EntireX Broker API)
ATTR	Broker Attribute File
NET	Entire Net-Work or EntireX Broker Engine
PSI	Persistent Store
TRANS	Translation Services
STUB	EntireX Broker Link Routine

### Abbreviations

Error messages may contain one or more of the following abbreviations:

Abbreviation	Meaning
Adabas RB	Adabas Record Buffer
Adabas VB	Adabas Value Buffer
BCT	Broker Control Table
CCB	Conversation Control Block
COM	Communication Manager
MQ/OMB	Message Queue/Output Message Block
PCB	Participant (user) Control Block
PCBEXT	PCB Extension
SCB	Service Control Block
SCBEXT	SCB Extension
SPFX	Stub Prefix
SSL	Secure Sockets Layer/Transport Layer Security
STUB	EntireX Broker environment-dependent link routine
TFE	Trace Filter Entry
TOM	Timeout Manager
TOQ	Timeout Queue
TRE	Translation Request Entry
UOW	Unit Of Work
WQE	Work Queue Entry
XPE	Expel Entry (in participant blacklist)

# 1 About this Documentation

---

▪ Document Conventions .....	2
▪ Online Information and Support .....	2
▪ Data Protection .....	3

## Document Conventions

---

Convention	Description
<b>Bold</b>	Identifies elements on a screen.
Monospace font	Identifies service names and locations in the format <code>folder.subfolder.service</code> , APIs, Java classes, methods, properties.
<i>Italic</i>	Identifies:  Variables for which you must supply values specific to your own situation or environment. New terms the first time they occur in the text. References to other documentation sources.
Monospace font	Identifies:  Text you must type in. Messages displayed by the system. Program code.
{ }	Indicates a set of choices from which you must choose one. Type only the information inside the curly braces. Do not type the { } symbols.
	Separates two mutually exclusive choices in a syntax line. Type one of these choices. Do not type the   symbol.
[ ]	Indicates one or more options. Type only the information inside the square brackets. Do not type the [ ] symbols.
...	Indicates that you can type multiple options of the same type. Type only the information. Do not type the ellipsis (...).

## Online Information and Support

---

### Product Documentation

You can find the product documentation on our documentation website at <https://documentation.softwareag.com>.

In addition, you can also access the cloud product documentation via <https://www.software-ag.cloud>. Navigate to the desired product and then, depending on your solution, go to “Developer Center”, “User Center” or “Documentation”.

### Product Training

You can find helpful product training material on our Learning Portal at <https://knowledge.softwareag.com>.

## Tech Community

You can collaborate with Software AG experts on our Tech Community website at <https://tech-community.softwareag.com>. From here you can, for example:

- Browse through our vast knowledge base.
- Ask questions and find answers in our discussion forums.
- Get the latest Software AG news and announcements.
- Explore our communities.
- Go to our public GitHub and Docker repositories at <https://github.com/softwareag> and <https://hub.docker.com/publishers/softwareag> and discover additional Software AG resources.

## Product Support

Support for Software AG products is provided to licensed customers via our Empower Portal at <https://empower.softwareag.com>. Many services on this portal require that you have an account. If you do not yet have one, you can request it at <https://empower.softwareag.com/register>. Once you have an account, you can, for example:

- Download products, updates and fixes.
- Search the Knowledge Center for technical information and tips.
- Subscribe to early warnings and critical alerts.
- Open and update support incidents.
- Add product feature requests.

## Data Protection

---

Software AG products provide functionality with respect to processing of personal data according to the EU General Data Protection Regulation (GDPR). Where applicable, appropriate steps are documented in the respective administration documentation.

---

## 2 Message Class 0000 - Successful Response

---

This message class is returned if the EntireX function has been performed successfully. No special action is required.

<b>00000000</b>	<b>Successful response</b>
<b>Explanation</b>	The action has completed successfully.
<b>Action</b>	None.

---

# 3

## Message Class 0001 - RPC C Runtime

---

This page describes messages with message class 0001. These messages have the format:

0001*nnnn*

where 0001 is the message class and

*nnnn* is the message number in the range 0000 - 9999.

This message class is returned if an error has occurred in the RPC C runtime layer.

**00010001**            **No Communication**

**Explanation**        Denotes an inconsistency within the EntireX RPC Runtime.

**Action**                Contact Software AG Support.

**00010003**            **Unknown medium**

**Explanation**        The EntireX RPC Runtime detected an invalid server address.

**Action**                When using the C API `erx.h`:  
The `ERX_SERVER_ADDRESS` structure of the EntireX RPC Runtime is not correct or was not correctly initialized. The medium must be `ERX_TM_BROKER`, `ERX_TM_BROKER_LIBRARY` or `ERX_TM_CONNECTION`.

**00010004**            **Invalid control block**

**Explanation**        The EntireX RPC Runtime API was called with an invalid connection or `CallId`.

**Action**                When using the C API `erx.h`:  
Check the program and correct the error.

<b>00010005</b>	<b>Out of memory</b>
<b>Explanation</b>	The operating system could not satisfy a memory request.
<b>Action</b>	Increase your memory resources and retry.
<b>00010006</b>	<b>No more registrations</b>
<b>Explanation</b>	An <code>ERXRegister</code> API call can register a maximum of 256 threads at a time with the EntireX RPC Runtime within one process.
<b>Action</b>	When using the C API <code>erx.h</code> : Check the program and correct the error.
<b>00010007</b>	<b>Already registered</b>
<b>Explanation</b>	An <code>ERXRegister</code> API call is attempting to register a thread with the EntireX RPC Runtime twice.
<b>Action</b>	When using the C API <code>erx.h</code> : It is not necessary to register a thread multiple times. However, it is required to register a thread once. We recommend having the number of <code>ERXRegister/ERXUnregister</code> calls occurring in pairs. If you insist on registering a thread twice, ignore this error. Check the program and correct the error.
<b>00010008</b>	<b>Not registered in ERX Runtime</b>
<b>Explanation</b>	Before a thread/process can use an EntireX RPC Runtime API function, the thread/process must be registered with the EntireX RPC <code>ERXRegister</code> API call.
<b>Action</b>	<ul style="list-style-type: none"><li>■ When using the C API <code>erx.h</code>: Check the program and correct the error.</li><li>■ When using the DCOM Wrapper: Contact Software AG Support.</li></ul>
<b>00010009</b>	<b>Parameter error. Location of wrong parameter is n</b>
<b>Explanation</b>	An EntireX RPC Runtime API function was called with an invalid address or inconsistent parameter. The number <code>n</code> denotes the position of the inconsistent parameter within the API.
<b>Action</b>	When using the C API <code>erx.h</code> : Check the program and correct the error.

<b>00010010</b>	<b>Control block not found</b>
<b>Explanation</b>	An EntireX RPC Runtime API function with corrupt memory was called. The internal data structures were not found.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ When using the C API <code>erx.h</code>: <ul style="list-style-type: none"> <li>Check the program and correct the error.</li> </ul> </li> <li>■ When using the DCOM Wrapper: <ul style="list-style-type: none"> <li>Contact Software AG Support.</li> </ul> </li> </ul>
<b>00010011</b>	<b>Pending call</b>
<b>Explanation</b>	During a conversational Remote Procedure Call there was a failure and another EntireX RPC Runtime <code>ERXCall</code> API call was issued.
<b>Action</b>	<p>When using the C API <code>erx.h</code>:  Close the Connection with the EntireX <code>ERXDisconnect</code> API function call.</p>
<b>00010018</b>	<b>Invalid memory</b>
<b>Explanation</b>	<p>One of the following occurred:</p> <ol style="list-style-type: none"> <li>1. The memory area supplied for the EntireX RPC Runtime API is invalid. It could not be read from or written to.</li> <li>2. An <code>ERX_VDATA</code> handle is corrupt.</li> </ol>
<b>Action</b>	<ul style="list-style-type: none"> <li>■ When using the C API <code>erx.h</code>: <ul style="list-style-type: none"> <li>Check the program and correct the error.</li> </ul> </li> <li>■ When using the DCOM Wrapper: <ul style="list-style-type: none"> <li>Contact Software AG Support.</li> </ul> </li> </ul>
<b>00010019</b>	<b>Invalid Call ID</b>
<b>Explanation</b>	The <code>CallId</code> for the EntireX RPC Runtime API function is invalid or corrupt.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ When using the C API <code>erx.h</code>: <ul style="list-style-type: none"> <li>Check the program and correct the error.</li> </ul> </li> <li>■ When using the DCOM Wrapper: <ul style="list-style-type: none"> <li>Contact Software AG Support.</li> </ul> </li> </ul>

- 00010028**            **Illegal type**
- Explanation**        The EntireX RPC Runtime API received an invalid parameter. There is an inconsistency between the template files, the header file `erx.h` or the EntireX RPC Runtime. The type of parameter is not supported.
- Action**              ■ When using the C API `erx.h`:
- Re-generate the client proxy or server stubs with the correct template file `client.tpl` and `server.tpl` and compile and link it with the header file `erx.h` from the same EntireX RPC version.
- When using the DCOM Wrapper:
- Re-generate the DCOM server, using the correct template files.
- 
- 00010032**            **Too many indices**
- Explanation**        The EntireX RPC Runtime API call received an invalid parameter. There is an inconsistency between the template files, the header file `erx.h` or the EntireX RPC Runtime.
- Action**              The EntireX RPC Runtime is binary backward compatible. It must have the same or a higher EntireX version as the template and header files used.
- When using the C API `erx.h`:
- Re-generate the client proxy or server stubs with the correct template file `client.tpl` and `server.tpl` and compile and link it with the header file `erx.h` from the same EntireX RPC version.
- When using the DCOM Wrapper:
- Re-generate the DCOM server, using the correct template files.
- 
- 00010034**            **No pending call**
- Explanation**        An EntireX RPC Runtime API `ERXWait` call was issued and no RPC request was pending.
- Action**              Check the program and correct the error.
- 
- 00010036**            **Parameters values not ascending**
- Explanation**        The EntireX RPC Runtime API call received an invalid parameter. There is an inconsistency between the template files, the header file `erx.h` or the EntireX RPC Runtime. One of the following applies:
- The size of the first dimension of an array parameter must not be less than the size of the second dimension.
- The size of the second dimension of an array parameter must not be less than the size of the third dimension.

<b>Action</b>	<p>The EntireX RPC Runtime is binary backward compatible. It must have the same or a higher EntireX version as the template and header files used.</p> <ul style="list-style-type: none"> <li>■ When using the C API <code>erx.h</code>:           <p>Re-generate the client proxy or server stubs with the correct template file <code>client.tpl</code> and <code>server.tpl</code> and compile and link it with the header file <code>erx.h</code> from the same EntireX RPC version.</p> </li> </ul>
<b>00010037</b>	<b>Invalid timeout</b>
<b>Explanation</b>	The timeout value must not be zero.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ When using the C API <code>erx.h</code>:           <p>The <code>ERX_SERVER_ADDRESS</code> structure of the EntireX RPC Runtime is not correct or was not correctly initialized. Check the program and correct the error.</p> </li> <li>■ When using the DCOM Wrapper:           <p>Provide a valid timeout for the property <code>TimeOut</code>.</p> </li> </ul>
<b>00010038</b>	<b>Version not supported</b>
<b>Explanation</b>	The EntireX RPC Runtime API <code>ERXRegister</code> call was issued with an invalid version.
<b>Action</b>	<p>The EntireX RPC Runtime is binary backward compatible. It must have the same or a higher EntireX version as the template and header files used.</p> <ul style="list-style-type: none"> <li>■ When using the C API <code>erx.h</code>:           <p>Use the appropriate <code>ERX_Vnnn</code> macro defined in the <code>erx.h</code> header file. Re-generate the client proxy or server stubs with the correct template file <code>client.tpl</code> and <code>server.tpl</code> and compile and link it with the header file <code>erx.h</code> from the same EntireX RPC version.</p> </li> <li>■ When using the DCOM Wrapper:           <p>Re-generate the DCOM server, using the correct template files.</p> </li> </ul>
<b>00010039</b>	<b>Cyclic parameter</b>
<b>Explanation</b>	The EntireX RPC Runtime API call received an invalid parameter. There is an inconsistency between the template files, the header file <code>erx.h</code> or the EntireX RPC Runtime. The offending parameter (or one of its parents) is its own parent. The parameter definition is cyclic.
<b>Action</b>	<p>The EntireX RPC Runtime is binary backward compatible. It must have the same or a higher EntireX version as the template and header files used.</p> <ul style="list-style-type: none"> <li>■ When using the C API <code>erx.h</code>:</li> </ul>

Re-generate the client proxy or server stubs with the correct template file *client.tpl* and *server.tpl* and compile and link it with the header file *erx.h* from the same EntireX RPC version.

- When using the DCOM Wrapper:

Re-generate the DCOM server, using the correct template files.

**00010045**

**AT EXIT error**

**Explanation**

An error occurred while establishing the `atexit` function.

**Action**

Contact Software AG Support.

**00010046**

**Initializing trace failed**

**Explanation**

Tracing for the EntireX RPC Runtime could not be switched on. Either no trace destination had been entered, or the trace file could not be opened.

**Action**

Contact your system administrator.

**00010052**

**Library missing**

**Explanation**

No Library name was given.

**Action**

- When using the C API *erx.h*:

The `ERX_SERVER_ADDRESS` structure of the EntireX RPC Runtime is not correct or was not correctly initialized. When using the `ERX_TM_BROKER_LIBRARY` as the medium, `szLibraryName` must also be given. Check program and correct error.

- When using the DCOM Wrapper:

Provide a valid library for the property `Library`.

**00010053**

**User ID missing**

**Explanation**

No User ID was entered.

**Action**

- When using the C API *erx.h*:

The `ERX_CLIENT_IDENTIFICATION` structure of the EntireX RPC Runtime is not correct or was not correctly initialized. Check program and correct error.

- When using the DCOM Wrapper:

Provide a valid user ID for the property `UserID`.

<b>00010054</b>	<b>Password missing</b>
<b>Explanation</b>	No Password was entered.
<b>Action</b>	<p>1. When using the C API <code>erx.h</code>:</p> <p style="padding-left: 40px;">The <code>ERX_CLIENT_IDENTIFICATION</code> structure of the EntireX RPC Runtime is not correct or was not correctly initialized. Check program and correct error.</p> <p>2. When using the DCOM Wrapper:</p> <p style="padding-left: 40px;">Provide a valid password for the property <code>PassWord</code>.</p>
<b>00010055</b>	<b>BCD overflow</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Support.
<b>00010056</b>	<b>BCD division by zero</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Support.
<b>00010058</b>	<b>Invalid direction</b>
<b>Explanation</b>	The EntireX RPC Runtime API call received an invalid parameter. The direction specification must be one of the following: <code>ERX_IN_PARM</code> , <code>ERX_OUT_PARM</code> or <code>ERX_INOUT_PARM</code> .
<b>Action</b>	<p>The EntireX RPC Runtime is binary backward compatible. It must have the same or a higher EntireX version as the template and header files used.</p> <ul style="list-style-type: none"> <li>■ When using the C API <code>erx.h</code>: Re-generate the Client proxy or Server stubs with the correct template file <code>client.tpl</code> and <code>server.tpl</code> and compile and link it with the header file <code>erx.h</code> of the same EntireX RPC version.</li> <li>■ When using the DCOM Wrapper: <ul style="list-style-type: none"> <li>Re-generate the DCOM server, using the correct template files.</li> </ul> </li> </ul>
<b>00010060</b>	<b>Response &lt;response&gt; from(Command/Info Service)</b>
<b>Explanation</b>	A response was retrieved from the broker's Command/Info Service interface while an EntireX RPC API function <code>ERXTerminateServer</code> was executed.
<b>Action</b>	See <a href="#">Broker Command and Information Services Error Codes</a> .

<b>00010061</b>	<b>Server not found (Command/Info Service)</b>
<b>Explanation</b>	This is an informational message of the EntireX RPC Runtime.
<b>Action</b>	Contact Software AG Support.
<b>00010063</b>	<b>Invalid Parameter Definition Version</b>
<b>Explanation</b>	The EntireX RPC parameter definition is not consistent to the EntireX version registered with the EntireX RPC API <code>ERXRegister</code> function.  There is an inconsistency between the template files, the header file <code>erx.h</code> or the EntireX RPC Runtime.
<b>Action</b>	<ul style="list-style-type: none"><li>■ When using the C API <code>erx.h</code>:  For all versions prior to <code>ERX_V530</code>, <code>ERX_PARAMETER_DEFINITION</code> (defined in <code>erx.h</code> of related version) must be used. For <code>ERX_V530</code> and above <code>ERX_PARAMETER_DEFINITION_V2</code> (defined in <code>erx.h</code> of related version) must be used. Re-generate the client proxy or server stubs with the correct template file <code>client.tpl</code> and <code>server.tpl</code> and compile and link it with the header file <code>erx.h</code> of the same EntireX RPC version.</li><li>■ When using the DCOM Wrapper:  Re-generate the DCOM server, using the correct template files.</li></ul>
<b>00010064</b>	<b>Internal error</b>
<b>Explanation</b>	This is an internal, informational message of the EntireX RPC Runtime.
<b>Action</b>	Contact Software AG Support.
<b>00010065</b>	<b>No more VData Instances to free</b>
<b>Explanation</b>	This is an internal, informational message of the EntireX RPC Server.
<b>Action</b>	Contact Software AG Support.
<b>00010066</b>	<b>Cache item not found</b>
<b>Explanation</b>	This is an internal, informational message of the EntireX RPC Runtime.
<b>Action</b>	Contact Software AG Support.

<b>00010067</b>	<b>Success pending call</b>
<b>Explanation</b>	This can be a result of a <code>ERX_CC_PEEK</code> command of the EntireX RPC Runtime API function <code>ERXControl</code> .
<b>Action</b>	Program dependent.
<b>00010068</b>	<b>Not yet implemented</b>
<b>Explanation</b>	This is an internal, informational message of the EntireX RPC Runtime.
<b>Action</b>	Contact Software AG Support.
<b>00010069</b>	<b>Invalid string buffer</b>
<b>Explanation</b>	While examining the string buffer, an error occurred within the EntireX RPC Runtime. The partner did not adhere to the metastructure <code>&lt;keyword&gt;=&lt;length&gt;,&lt;value&gt;</code> .
<b>Action</b>	Contact Software AG Support.
<b>00010070</b>	<b>Parse error</b>
<b>Explanation</b>	This is an internal, informational message of the EntireX RPC Runtime.
<b>Action</b>	Contact Software AG Support.
<b>00010071</b>	<b>Server replied with different compression</b>
<b>Explanation</b>	Your EntireX/Natural RPC server does not reply correctly to the EntireX RPC request.
<b>Action</b>	Contact Software AG Support.
<b>00010072</b>	<b>Return Code &lt;return-code&gt; &lt;cb-return-code&gt;from Broker Stub</b>
<b>Explanation</b>	The EntireX Broker Stub replied with the specified return codes, where <code>&lt;return-code&gt;</code> is the stub's function return code and <code>&lt;cb-return-code&gt;</code> is from the ACI field return code.
<b>Action</b>	Check your configuration and correct the error.
<b>00010075</b>	<b>No RPC protocol version received by INQUIRE Call</b>
<b>Explanation</b>	The EntireX/Natural RPC server does not reply correctly to the <code>INQUIRE</code> call.
<b>Action</b>	Contact Software AG Support.

- 00010076**            **Server does not support RPC protocol version needed for the request**
- Explanation**        The request issued by the RPC client cannot be processed. Required functionality is missing in target *RPC-based Components* or *EntireX Broker*.
- Action**             ■ If you are using one of the following codepages or codepage styles:
- *Arabic Shaping* (IBM-420, windows-1256)
  - *Hebrew Codepage 803*
  - codepage style *EBCDIC Stateful Codepages*
  - *Multibyte or Double-byte Codepages* (e.g. UTF8)
- Check the version of the EntireX Broker and the RPC server in use. Upgrade the EntireX Broker and the RPC server to the latest version available.
- If you are not using one of the codepages or codepage styles listed above:
- Check the version of the RPC server in use. Upgrade the RPC server to the latest version available.
- See also *Supported RPC Protocols* in the EntireX RPC Programming documentation.
- 
- 00010077**            **Broker API Version 2 needed**
- Explanation**        Your EntireX Broker middleware (stub or kernel) does not support the Broker API version needed.
- Action**             If possible, upgrade your EntireX Broker Middleware (Stub and Kernel) at least to ETB211.
- 
- 00010078**            **Parameter maximum length or array bounds overflow**
- Explanation**        There was an overflow of an unbounded array. The maximum array boundaries are determined in the Software AG IDL file.
- Action**             Check the program and correct the error.
- 
- 00010079**            **Invalid unbounded array**
- Explanation**        Accessing an unbounded array has caused an error. This can happen during marshalling/unmarshalling within the EntireX RPC Runtime or when accessing the `erxArray...` functions directly.
- Action**             Either:
1. The unbounded array was destroyed by your program because of memory overwrites. Correct your program.
- or
2. An internal error occurred in the EntireX RPC Runtime. Contact Software AG Support.

<b>00010080</b>	<b>No more unbounded arrays to free</b>
<b>Explanation</b>	This is an internal, informational message of the EntireX RPC Server.
<b>Action</b>	Contact Software AG Support.
<b>00010081</b>	<b>Indices not correct</b>
<b>Explanation</b>	The ERX_PARAMETER_DEFINITION_Vx contains incorrect data in the usAttributes and usType fields.
<b>Action</b>	Re-generate, compile and link your client stub.
<b>00010082</b>	<b>Unbounded array does not match the IDL file</b>
<b>Explanation</b>	The data type and attributes of the unbounded array built with erxArrayAlloc do not match the data type, length, dimensions or attributes determined in the Software AG IDL file.
<b>Action</b>	Re-generate your client stub or create the unbounded array with the correct type, length, dimensions and attributes using erxArrayAlloc.
<b>00010083</b>	<b>Parameter not within value range</b>
<b>Explanation</b>	In the Software AG IDL file value ranges are defined for data types. The value you are trying to send is outside of the defined range. For example, it is not possible to send <ul style="list-style-type: none"> <li>■ a negative value with data type NU or PU</li> <li>■ a value greater than 127 and less than -128 with I1</li> <li>■ a value greater than 32767 and less than -32768 with I2</li> <li>■ a value greater than 2147483647 and less than -2147483648 with I4.</li> </ul>
<b>Action</b>	Check the program and correct the error.
<b>00010084</b>	<b>Unbounded array indices out of bounds</b>
<b>Explanation</b>	The indices you provided to access the unbounded array are out of bounds.
<b>Action</b>	Check the program and correct the error.
<b>00010085</b>	<b>Invalid data for unbounded array</b>
<b>Explanation</b>	The data provided for the unbounded array function does not conform to the rules of the data type. For example, the data provided for a data type P is not packed.
<b>Action</b>	Check the program and correct the error.

<b>00010086</b>	<b>Invalid preserve flag for unbounded array</b>
<b>Explanation</b>	The parameter preserve flag provided for the unbounded array function is invalid.
<b>Action</b>	Check the program and correct the error.
<b>00010087</b>	<b>Invalid dimension for unbounded array</b>
<b>Explanation</b>	The parameter dimension provided for the unbounded array function is invalid.
<b>Action</b>	Check the program and correct the error.
<b>00010088</b>	<b>Unbounded array parameter error</b>
<b>Explanation</b>	The parameter provided for the unbounded array function is invalid.
<b>Action</b>	Check the program and correct the error.
<b>00010089</b>	<b>Stub parameter definition error</b>
<b>Explanation</b>	The parameter definition within the client stub is incorrect.
<b>Action</b>	Re-generate your client stub with the IDL Compiler or EntireX DCOM Wrapper.
<b>00010090</b>	<b>SSL parameter initialization failed</b>
<b>Explanation</b>	Initialization failed because EntireX Broker stub does not support SSL.
<b>Action</b>	Use a stub which supports SSL or configure a transport method supported by the stub used.
<b>00010091</b>	<b>Broker API Version 6 needed</b>
<b>Explanation</b>	Your EntireX Broker middleware (Stub or Kernel) does not support the Broker API version needed.
<b>Action</b>	If possible, upgrade your EntireX Broker middleware (Stub and Kernel).
<b>00010094</b>	<b>Broker Stub could not be loaded</b>
<b>Explanation</b>	The EntireX Broker stub could not be found in the environment.
<b>Action</b>	Try again to install EntireX.
<b>00010095</b>	<b>Cannot open or read File=&lt;file name&gt;</b>
<b>Explanation</b>	An invalid configuration file name or a wrong file type was used to start the RPC server.
<b>Action</b>	Restart the server with correct configuration file.

<b>00010096</b>	<b>Error code for reply error missing</b>
<b>Explanation</b>	This is an internal error of the RPC runtime and RPC server.
<b>Action</b>	Contact Software AG Support.
<b>00010097</b>	<b>Password change not supported by RPC server</b>
<b>Explanation</b>	The RPC server you are using does not support alteration of the RPC password. Altering RPC passwords is supported by Natural RPC Server only. EntireX RPC servers do not support alteration of RPC passwords.
<b>Action</b>	Contact Software AG Support to check whether a newer version of the Natural RPC Server may support the feature.
<b>00010100</b>	<b>ICONV Open error for Unicode conversions</b>
<b>Explanation</b>	The RPC Runtime uses the iconv interface for converting Unicode encodings under UNIX. The iconv interface returned an error (-1) during open of the conversion descriptor. Either the source or target Unicode encoding are not supported.
<b>Action</b>	The Unicode encoding UTF-16BE is always needed. Depending on the used Unicode encoding of your environment, one of the following additional encodings are required: UTF-32BE UTF-32LE or UTF-16LE. See your UNIX documentation for more information on the iconv interface, especially the iconv open call. Check if the above encodings are available in your UNIX environment.
<b>00010101</b>	<b>ICONV target buffer for Unicode conversions too small</b>
<b>Explanation</b>	The RPC Runtime uses the iconv interface for converting Unicode encodings under UNIX. The iconv interface returned errno E2BIG. This error is an internal error of the RPC Runtime.
<b>Action</b>	See your UNIX documentation for more information on the iconv interface and error E2BIG. Contact Software AG Support.
<b>00010102</b>	<b>ICONV Invalid descriptor</b>
<b>Explanation</b>	The RPC Runtime uses the iconv interface for converting Unicode encodings under UNIX. The iconv interface returned errno EBADF. This error is an internal error of the RPC Runtime.
<b>Action</b>	See your UNIX documentation for more information on the iconv interface and error EBADF. Contact Software AG Support.

- 00010103**            **ICONV Invalid Character or Shift Sequence**  
**Explanation**        The RPC Runtime uses the iconv interface for converting Unicode encodings under UNIX. The iconv interface returned errno EILSEQ. This is a user error.  
**Action**              Check your data if valid Unicode characters being sent/received. See your UNIX documentation for more information on the iconv interface and error EILSEQ.
- 00010104**            **ICONV Incomplete Character or Shift Sequence**  
**Explanation**        The RPC Runtime uses the iconv interface for converting Unicode encodings under UNIX. The iconv interface returned errno EINVAL. This is a user error.  
**Action**              Check your data to see whether valid Unicode characters are being sent/received. See your UNIX documentation for more information on the iconv interface and error EINVAL.
- 00010105**            **ICONV Failed**  
**Explanation**        The RPC Runtime uses the iconv interface for converting Unicode encodings under UNIX. The iconv interface returned an undefined error.  
**Action**              See your UNIX documentation for more information on the iconv interface. Contact Software AG Support.
- 00010106**            **Illegal parameter direction**  
**Explanation**        Reliable RPC allows only IN parameters.  
**Action**              Remove any other OUT and INOUT parameters from this message.
- 00010107**            **Invalid packet type for Reliable RPC**  
**Explanation**        The packet type shipped with the RPC protocol is not valid for the use of Reliable RPC.  
**Action**              Contact Software AG Support.
- 00010108**            **Inconsistent Reliable RPC message**  
**Explanation**        The string buffer item "REL" is missing or invalid.  
**Action**              Contact Software AG Support.

00010109      **Reserved for internal use**

00010110      **Reserved for internal use**

00010200      **Parameter Error: data not unsigned numeric. <direction> of IDL field  
[<parameter-name>] (<type-length>), location=<location>**

**Explanation**

An application parameter cannot be processed because its content does not match the expected format unsigned numeric (NU). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The message provides additional information such as <direction>, <parameter-name>, <type-length> and <location>, where

- <direction> is either 'Request' if the error was detected before the RPC server was executed, or 'Reply' for the answer, that is, if the RPC server was already executed.
- <parameter-name> is available for target programming language C only
- <type-length> matches the IDL data type; see *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation
- <location> contains the hierarchy of IDL nodes, separated by a colon. If an IDL node is an array, its indexes are given in parentheses.

Example: Reply of IDL field (NU14.0), location=3.2(I=5).1.

The IDL below was used for the RPC call. The location is interpreted as follows:

- third field on level 1 is 'G-parameter-3-on-level-1'
- second parameter on level 2 is the array 'G-parameter-32-on-level-2' and (I=5) means the fifth occurrence
- first field on level 3, which is 'G-parameter-322-on-level-3', produced the error.

```

. . .
define data parameter
1 G-parameter-1-on-level-1      (A10) In
1 G-parameter-2-on-level-1                In
1 G-parameter-3-on-level-1                Out
    2 G-parameter-31-on-level-2
        3 G-parameter-311-on-level-3 (A5)
        3 G-parameter-312-on-level-3 (N8)
        3 G-parameter-313-on-level-3 (NU4)
    2 G-parameter-32-on-level-2      (/25)
        3 G-parameter-322-on-level-3 (NU14)
        3 G-parameter-321-on-level-3 (A5)
1 G-parameter-4-on-level-1      (A64)
. . .
end-define

```

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010201** **Parameter Error: data not signed numeric. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format signed numeric (N). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010202** **Parameter Error: data not numeric. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format unsigned numeric (NU) or signed numeric (N). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010203** **Parameter Error: data not unsigned packed. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format unsigned packed (PU). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010204** **Parameter Error: data not signed packed. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format signed packed (P). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010205** **Parameter Error: data not packed. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format unsigned packed (PU) or signed packed (P). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010206** **Parameter Error: I1 < MIN. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type I1 cannot be processed because its content is less than the allowed minimum (-128) for I1. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010207** **Parameter Error: I1 > MAX. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type I1 cannot be processed because its content is greater than the allowed maximum (+127) for I1. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010208** **Parameter Error: I2 < MIN. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type I2 cannot be processed because its content is less than the allowed minimum (-32768) for I2. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010209** **Parameter Error: I2 > MAX. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type I2 cannot be processed because its content is greater than the allowed maximum (+32767) for I2. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010210** **Parameter Error: I4 < MIN. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type I4 cannot be processed because its content is less than the allowed minimum (-2147483648) for I4. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010211** **Parameter Error: I4 > MAX. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type I2 cannot be processed because its content is greater than the allowed maximum (+2147483647) for I2. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010212** **Parameter Error: float < MIN. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type F4 cannot be processed because its content is less than the allowed minimum (1.175494351e-38F) for F4. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

<b>Action</b>	Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.
<b>00010213</b>	<b>Parameter Error: float &gt; MAX. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type F4 cannot be processed because its content is greater than the allowed maximum (3.402823466e+38F) for F4. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.  The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.
<b>Action</b>	Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.
<b>00010215</b>	<b>Parameter Error: float HUGE_VAL. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type F4 cannot be processed because of conversation error HUGE_VAL. See C library strtod() for more information.  The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.
<b>Action</b>	Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.
<b>00010216</b>	<b>Parameter Error: double &lt; MIN. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type F8 cannot be processed because its content is less than the allowed minimum (2.2250738585072014e-308) for F8. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.  The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.
<b>Action</b>	Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.
<b>00010217</b>	<b>Parameter Error: double &gt; MAX. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type F8 cannot be processed because its content is greater than the allowed maximum (1.7976931348623158e+308) for F8. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.  The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010218** **Parameter Error: double exponent over-, underflow. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type F4 or F8 cannot be processed because of exponent over- or underflow. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010219** **Parameter Error: bad vdata provided. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type AV, BV, KV or UV cannot be processed because incorrect data was applied, see *Using Variable-length Data Types AV, BV, KV and UV* under *Writing Advanced Applications with the C Wrapper*.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

**00010220** **Parameter Error: bounds exceeds maximum. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An index of an application parameter for an IDL unbounded array (see *array-definition* under *Software AG IDL Grammar* in the IDL Editor documentation) cannot be processed because its value exceeds the maximum for upper bound.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 00010200.

**Action** Make sure the IDL file, generated client interface objects and your client application are consistent. Check your client application for parameter integrity.

# 4 Message Class 0002 - EntireX ACI - User does not Exist

---

This page describes messages with message class 0002. The messages have the format:

0002*nnnn*

where *0002* is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

The user has not interacted with EntireX Broker during the time determined either by `SERVER-NONACT` or `CLIENT-NONACT`. When the determined time has passed, all resources allocated to the user are released. All conversations are lost.

**00020002**

**User Does Not Exist**

**Explanation**

The user cannot be found. Users are added to EntireX Broker's internal structures when the first `REGISTER` (for servers) or the first `SEND` operation (for clients) is executed. This response is returned when:

1. The time determined in the attribute file for `CLIENT-NONACT` or `SERVER-NONACT` has elapsed since the last call of the user.
2. A server has not issued a `REGISTER` call as the first action.
3. A client has not started a conversation (`SEND` with `CONV-ID=NEW`) or a non-conversational request (`SEND` with `CONV-ID=NONE`) as the first action.

**Action**

For situation 1, contact the administrator to check the values supplied for `CLIENT-NONACT` or `SERVER-NONACT`. They may have to be increased. However, be sure not to supply too high a value, as this can lead to resources being used for a long period of time.

Situations 2 and 3 are user errors. Check the program and correct the error.

# 5

## Message Class 0003 - EntireX ACI - Conversation Ended

---

This page describes messages with message class 0003. The messages have the format:

0003*nnnn*

where *0003* is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

This message class indicates the conversation has ended for the following reasons:

1. The partner issued an EOC or a Deregister operation.
2. A timeout occurred for the partner (defined by either CLIENT-NONACT or SERVER-NONACT) or the conversation (defined by CONV-NONACT). All resources allocated for the conversation are released.

**00030003**

### **No Matching Conversation Found**

#### **Explanation**

The conversation cannot be found, or no request is available for processing. This response is returned when:

1. The wrong conversation ID is specified.
2. A server issued a non-blocked RECEIVE with CONV-ID=NEW/ANY and no conversation or request is available for processing.
3. Neither the client nor the server has accessed the conversation for the specified timeout period. The conversation is timed out and does not exist anymore (if a conversation timeout occurs while users are waiting, they are informed with error code 0073). For the Broker, timeout is specified by the CONV-NONACT parameter in the attribute file.

#### **Action**

Situation 1 is a user error. Check the program and correct the error.

For situation 2, contact the administrator and check the value supplied for CONV-NONACT. It may have to be increased. However, be sure not to supply too high a value as this can lead to resources being used for a long period of time.

For situation 3, this is an information-type message. How the program continues depends on the application.

**00030005**

**Partner finished the conversation**

**Explanation**

The partner has ended the conversation by either an EOC or DEREGISTER with OPTION=IMMED. This response is returned when:

1. The user has retrieved all the data/messages sent by the partner with RECEIVE calls and has attempted to get further data/message with a RECEIVE using the OPTION=NEXT. No more messages are available from the partner.
2. A function other than RECEIVE is issued and the partner has already ended the conversation.

**Action**

This is an informational message. How the program continues depends on the application. Messages from the partner not yet received can be received with subsequent RECEIVE calls, that is, when the conversation end is detected by a call other than RECEIVE, it is possible that messages from the partner exist.

**00030010**

**EOC due to DEREGISTER of partner**

**Explanation**

This error comes as the result of a receive function. The particular conversation is already closed because the partner application has DEREGISTERed. This information is intended to tell an application the reason for an EOC:

DEREGISTER of the partner,  
LOGOFF of the partner, or  
EOC with cancel of the partner

**Action**

If possible, back out all actions taken for that conversation, since the end does not appear to be graceful.

**00030011**

**Partner cancelled the conversation**

**Explanation**

The partner marked the conversation as cancelled with the EOC operation.

**Action**

If possible, back out all actions taken for the conversation.

**00030012**

**EOC due to LOGOFF of partner**

**Explanation**

This error results from an attempted receive on a conversation that is already closed because the partner application performed a LOGOFF.

**Action**

If possible, back out all actions taken for the conversation.

<b>00030067</b>	<b>Partner timeout occurred</b>
<b>Explanation</b>	The partner for the conversation is no longer active. All conversations with this partner are terminated. This occurs when the partner has not issued a call to EntireX Broker for the time defined by either <code>CLIENT-NONACT</code> or <code>SERVER-NONACT</code> . Error code 0002 is returned to the partner when it attempts to access any of its previous conversations.
<b>Action</b>	If this happens repeatedly, contact the administrator and check the value supplied for <code>CLIENT-NONACT</code> or <code>SERVER-NONACT</code> . It may need to be increased. However, do not supply too high a value, as this can lead to resources being used for a long period of time.
<b>00030073</b>	<b>Conversation timeout occurred</b>
<b>Explanation</b>	The timeout defined for the conversation has elapsed without the partner issuing a Broker call against the conversation, and therefore the conversation has ended. For the Broker, timeout is specified by the <code>CONV-NONACT</code> value for the service in the attribute file.
<b>Action</b>	Check the following causes: <ul style="list-style-type: none"> <li>■ Ensure that the partner is working correctly.</li> <li>■ Contact the administrator and check the settings of the non-activity timeout. You may need to increase the timeout value. Do not supply too high a value, however, as this can lead to resources being used for a long period of time.</li> </ul>
<b>00030522</b>	<b>Shutdown conversation was issued</b>
<b>Explanation</b>	The conversation was stopped with command <code>SHUTDOWN</code> of the Command and Info services.
<b>Action</b>	None.

# 6 Message Class 0007 - EntireX ACI - Service not Registered

---

This page describes messages with message class 0007. The messages have the format:

0007nnnn

where 0007 is the message class, and

nnnn is the message number in the range 0000 - 9999.

This message class is returned if no server is available offering the desired service. Servers providing the requested service have either not been started, stopped, timed out or cancelled. This situation is possible only in client programs and occurs when all active servers have deregistered their services with the DEREGISTER operation using the option QUIESCE.

## 00070007 Service Not Registered

### Explanation

The requested service is not available. This response is returned when:

1. A user tried to initiate a communication (SEND with CONV-ID=NEW) with a service currently not available. All servers providing the requested service have not been started or have been stopped, timed out or cancelled. The response is also returned when the server issues a DEREGISTER with OPTION QUIESCE.
2. In response to a DEREGISTER/RECEIVE call: the user has not registered the service.
3. In response to an EOC call with CONV-ID=ANY: the given service could not be found.

### Action

For situation 1, start an appropriate server process. For situations 2 or 3, register the service or ensure that the service has been registered correctly.

**Note:** For ACI version 9 and above, the error text associated with error number 00070007 will include the service name in the text. SC=class SN=server SV=service not registered.

# 7 Message Class 0008 - EntireX ACI - Security Error

---

- EntireX Security Messages ..... 36
- Security Return Code ..... 41

The following messages are returned by EntireX Broker after a security violation is detected by EntireX Security or a user-defined security exit. This message class indicates that the security system rejected the intended action. The specific error is given as the message number in the last four bytes of the message code. The messages have the format:

0008*nnnn*

where 0008 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

This document covers the following topics:

## EntireX Security Messages

---

<b>00080001</b>	<b>Access denied ext. security not active</b>
<b>Explanation</b>	Security system not active: no authorization could be determined. Access denied.
<b>Action</b>	Contact administrator of SAF security system.
<b>00080002</b>	<b>Access denied user profile not defined</b>
<b>Explanation</b>	User profile not defined to security system: access denied.
<b>00080003</b>	<b>Access denied password not authorized</b>
<b>Explanation</b>	User has supplied incorrect password: access denied.
<b>00080004</b>	<b>Access denied password expired</b>
<b>Explanation</b>	User's password has expired.
<b>Action</b>	Supply existing and new password. Successful access will result in password change.
<b>00080005</b>	<b>Access denied, new password invalid</b>
<b>Explanation</b>	User has supplied an invalid new password: access denied.
<b>Action</b>	Consult your site-specific rules governing passwords.

<b>00080006</b>	<b>Access denied, rejected by inst. exit</b>
<b>Explanation</b>	User access rejected by installation exit: access denied.
<b>Action</b>	Determine whether your site specifies security rules.
<b>00080007</b>	<b>Access denied, user ID revoked</b>
<b>Explanation</b>	User's access has been revoked - possibly because of too many unsuccessful attempts: access denied.
<b>Action</b>	Request user ID to be reset.
<b>00080008</b>	<b>Access denied at this time date</b>
<b>Explanation</b>	User is denied access at this time/date: access denied.
<b>Action</b>	Contact security administrator to ensure that correct privileges are defined.
<b>00080009</b>	<b>Access denied resource not allowed</b>
<b>Explanation</b>	User is not permitted access to this resource: access denied.
<b>Action</b>	Contact security administrator to ensure that correct privileges are defined.
<b>00080010</b>	<b>Access denied resource not defined</b>
<b>Explanation</b>	Resource not defined to security system: access denied.
<b>Action</b>	Contact security administrator to ensure that correct privileges are defined.
<b>00080011</b>	<b>Access denied, IP address not allowed</b>
<b>Explanation</b>	Users are not permitted to execute the application at the IP address where they is currently located. This applies only where IP address authorization is enabled.
<b>Action</b>	Contact security administrator to ensure that correct privileges are defined.
<b>00080012</b>	<b>Access denied, IP address not defined</b>
<b>Explanation</b>	The IP address where the user is currently located is not defined to the security system. This applies only where IP address authorization is enabled.
<b>Action</b>	Contact security administrator to ensure that correct privileges are defined.

- 00080013**            **Access Denied to application (APPL)**  
**Explanation**        The user is not authorized to use the application that was defined with security-specific broker attribute APPLICATION-NAME. See APPLICATION-NAME under *Security-specific Broker Attributes*.  
**Action**                Ask your security administrator for permission to access the broker.
- 00080024**            **ETBUPRE: Unresolved V-CON**  
**Explanation**        The security function in the Broker stub was unable to locate the SAFCFG module for processing security settings.  
**Action**                Assemble and link the SAFCFG module as described in the z/OS installation documentation. See *Installing EntireX Security for Applications using Broker Stubs*.
- 00080043**            **Unable to initialize**  
**Explanation**        Internal error occurred.  
**Action**                Contact Software AG Support.
- 00080044**            **Invalid ENCRYPTION-LEVEL value**  
**Explanation**        Application must supply values 0 | 1 | 2 in ACI field ENCRYPTION-LEVEL.  
**Action**                Correct the application.  
  
**Note:** For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See *SSL/TLS, HTTP(S), and Certificates with EntireX* in the platform-independent Administration documentation.
- 00080045**            **Invalid CREDENTIALS-TYPE value**  
**Explanation**        The application has supplied an incorrect value in ACI field CREDENTIALS-TYPE.  
**Action**                Correct the application.
- 00080048**            **Access denied, invalid credentials**  
**Explanation**        User credentials are invalid.  
**Action**                Correct the user credentials.

<b>00080049</b>	<b>Invalid SECURITY-SYSTEM value</b>
<b>Explanation</b>	The value of this parameter supplied in the Broker attribute file is incorrect. Valid values are <code>OS</code> (authentication is performed against local operating system) and <code>ldapUrl</code> (authentication is performed against LDAP repository).
<b>Action</b>	Correct the attribute file parameter <code>SECURITY-SYSTEM</code> under <i>Security-specific Broker Attributes</i> . (This attribute was called <code>AUTHENTICATION-TYPE</code> in EntireX version 9.10 and below.)
<b>00080254</b>	<b>Access denied SAF returns: :1:</b>
<b>Explanation</b>	SAF returns RACROUTE error codes: SSSSSSSS.
<b>Action</b>	Determine cause of error using information listed below.
<b>00080255</b>	<b>Access denied SAF interface error xx(yy)</b>
<b>Explanation</b>	Security returns error code xx(yy).
<b>Action</b>	Contact Software AG Support
<b>00080350</b>	<b>Bad user ID detected, access denied</b>
<b>Explanation</b>	Either the user has not been defined, or the password does not match.
<b>Action</b>	Verify the specified user ID/password for the <code>LOGON</code> command
<b>00080351</b>	<b>Access Denied RPC lib/pgm not converted</b>
<b>Explanation</b>	Internal error occurred performing client RPC authorization.
<b>Action</b>	Contact Software AG Support.
<b>00080352</b>	<b>Access Denied Reconnect requires UID/PWD</b>
<b>Explanation</b>	Application has attempted to transfer control to a different thread, or process, without correctly transferring the necessary values of <code>USER-ID</code> , <code>TOKEN</code> and <code>STOKEN</code> .
<b>Action</b>	The application transferring control must make values of <code>USER-ID</code> , <code>TOKEN</code> and <code>STOKEN</code> available to the application which is delegated to continue thread of execution.
<b>00080353</b>	<b>Access Denied Bad STOKEN: UID/PWD needed</b>
<b>Explanation</b>	Application has not correctly maintained the value of security token ( <code>STOKEN</code> ) in the EntireX Broker control block structure.
<b>Action</b>	The application must maintain the value of <code>STOKEN</code> in order to securely communicate with Broker kernel without sending <code>PASSWORD</code> with each command.

- 00080400            Unable to load library exxauthr**  
**Explanation**        If EntireX Security is enabled and the default user exit library `usrsec` is used, the additional library `exxauthr` must also be enabled.  
**Action**                Check your installation.
- 00080401            Service not defined, access denied**  
**Explanation**        The resource is not defined. Access to service is rejected.  
**Action**                See information provided under *Request Authorization* under *Configuration Options for Broker* in the EntireX Security documentation for z/OS.
- 00080402            User not authorized for this service**  
**Explanation**        The user is not authorized to send a request to the specified service.  
**Action**                Check the list of defined users for this service (mainframe: EntireX SAF-based Security; UNIX/Windows: see *Authorization Rules* in the platform-independent Administration documentation).
- 00080404            Broker Security Server not running**  
**Explanation**        The Broker Security Server for BS2000 is not started.  
**Action**                Start the Broker Security Server.
- 00080405            Broker Security Server not ready**  
**Explanation**        EntireX Broker could connect to the EntireX BS2000 Security Server, but found the Server in status inactive.  
**Action**                Verify whether the Security Server task started correctly.
- 00080406            Broker Security Server timeout**  
**Explanation**        The Broker Security Server did not respond.  
**Action**                Verify whether the Security Server task started correctly. A Security Server trace may help to identify the problem.
- 00080407            Authentication failed**  
**Explanation**        Either the user ID is not defined or the password does not match.  
**Action**                Supply a valid user ID and password. A Security Server trace may be turned on to identify the exact reason why the authentication failed.

**00080408            Access denied, invalid credentials**

**Explanation**        User credentials are invalid.

**Action**                Correct the user credentials.

**00080409            Invalid AUTHENTICATION-TYPE value**

**Explanation**        The value of this parameter supplied in the Broker attribute file is incorrect.

**Action**                Correct the attribute file parameter AUTHENTICATION-TYPE.

**00080604            STUB: Snd length too long for encryption**

**Explanation**        The Assembler-written stubs support encryption only where the send buffer is less than approximately 32 KB of data. If encryption is requested and the send length is greater than 32 KB, the command cannot be processed by the stub and a response is given.

**Action**                Do not specify encryption where the length of the send buffer is greater than 32 KB.

**Note:** For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See *SSL/TLS, HTTP(S), and Certificates with EntireX* in the platform-independent Administration documentation.

## Security Return Code

ACI error code 00080254 returned to the application indicates an unexpected response from SAF. This information is also shown in the Broker kernel trace when the appropriate trace level settings are applied. This message will contain the following bytes. *SSSSSSSS* in the documentation.

The hexadecimal return/reason code structure contains the following information:

Position within Message Code	Information Content
Byte: 1	SAF return code
Byte: 2	Not used
Byte: 3	Return code from security system, for example RACF
Byte: 4	Reason code from security system, for example RACF

# 8

## Message Class 0010 - EntireX ACI - Commands to Server

---

This class is valid for servers only and indicates that the server received a command. These messages have the format:

0010*nnnn*

where 0010 is the message class, and

*nnnn* is the message number in the range 0000-9999.

**00100022            Attach Service required**

**Explanation**        This is not an error, but a notification that an attach service is required. In order to distinguish between a normal RECEIVE (including user data and the like) and an attach manager notification, the latter does not end with a 00000000 return code. In addition to the error code, a data structure in the receive buffer provides more information, for instance, which server to start.

**Action**                No user action is required, the attach manager has to start a server.

**00100050            Shutdown IMMED required**

**Explanation**        The administrator has requested an immediate shutdown, the only operation permitted is DEREGISTER with the option IMMEDIATE.

**Action**                No user action is required; the shutdown IMMED response means that the server no longer exists.

**00100051            Shutdown QUIESCE required**

**Explanation**        The administrator has requested this server to be shut down, the only operation permitted is DEREGISTER with the option QUIESCE.

**Action**                Perform a DEREGISTER with option QUIESCE.

# 9

## Message Class 0013 - EntireX Java

---

This page describes messages with message class 0013. The messages have the format:

0013*nnnn*

where 0013 is the message class, and

*nnnn* are the error numbers grouped as follows:

01*nn* EntireX Java ACI Errors

02*nn* EntireX Java RPC Errors

03*nn* Errors in the Transport Layer

04*nn* SSL Errors

09*nn* Errors for Broker Agent

**00130100**            **Register/RegisterAttach invalid for generic Service**

**Explanation**        Register or RegisterAttach has been called for a generic service (server address contains at least one asterisk). These methods are applicable to real services only.

**Action**                Correct your application.

**00130101**            **Send invalid for generic service**

**Explanation**        A send using a generic service was attempted.

**Action**                Correct your application.

<b>00130102</b>	<b>SendReceive invalid for generic service</b>
<b>Explanation</b>	A <code>sendReceive</code> using a generic service was attempted.
<b>Action</b>	Correct your application.
<b>00130103</b>	<b>Service.receive: Service returned by Broker not found</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130104</b>	<b>Service.receive: found old conversation</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130105</b>	<b>Service.receive: found wrong conversation</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130106</b>	<b>Service.receive: got UnitofWork</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130107</b>	<b>addConv: convID already found</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130108</b>	<b>delConv: convID not found</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130109</b>	<b>findUnitofWork: no UnitofWork</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.

<b>00130110</b>	<b>findConversation: no Conversation</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130111</b>	<b>endConversation: no conversation</b>
<b>Explanation</b>	The <code>endConversation</code> method has been called on either a newly created conversation or an already closed conversation.
<b>Action</b>	Correct your application.
<b>00130112</b>	<b>undo: no conversation</b>
<b>Explanation</b>	The <code>undo</code> method has been called on either a newly created conversation or an already closed conversation.
<b>Action</b>	Correct your application.
<b>00130113</b>	<b>send/sendReceive: got wrong convID, expected=:1;,received=:2:</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130114</b>	<b>receive: got wrong convID, expected=:1;,received=:2:</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130115</b>	<b>:1:: no running UnitofWork</b>
<b>Explanation</b>	The specified <code>UnitofWork</code> method (first parameter) has been called on a non-active <code>UnitofWork</code> .
<b>Action</b>	Correct your application.
<b>00130116</b>	<b>Codepage support for Broker :1: requires version 5.2 or higher</b>
<b>Explanation</b>	Codepage support has been requested for an EntireX Broker version 5.1 or lower.
<b>Action</b>	Disable codepage support for previous versions of EntireX Broker or use a Broker version 5.2 or higher.

- 00130117**            **Requested call invalid for attach server**  
**Explanation**        A method different from `receiveAttachInfo` has been called on an attach server.  
**Action**                Only the `receiveAttachInfo` method can be used for an attach server.
- 00130118**            **Encryption level support for Broker :1: requires version 6.1 or higher**  
**Explanation**        Encryption level support has been requested for an EntireX Broker version 5.3 or lower.  
**Action**                Do not use encryption level for previous versions of EntireX Broker or use Broker version 6.1 or higher.  
  
**Note:** For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See *SSL/TLS, HTTP(S), and Certificates with EntireX* in the platform-independent Administration documentation.
- 00130119**            **Security object already set**  
**Explanation**        For a Broker object, you are only allowed to set the security object once.  
**Action**                Correct your application.
- 00130120**            **Data compression support for Broker broker ID requires version 7.1 or higher**  
**Explanation**        The broker in use does not support data compression. For data compression you need a broker version 7.1 or higher.  
**Action**                Check your compression level settings or upgrade the broker.
- 00130121**            **Encoding encoding name not supported**  
**Explanation**        The Java Runtime Environment in use does not support this encoding.  
**Action**                Check your Java Runtime Environment for the supported character encodings.
- 00130200**            **rpcCall: length of SendBuffer is :1: instead of :2:**  
**Explanation**        An internal inconsistency in the Java RPC has been detected.  
**Action**                Contact Software AG Support.
- 00130201**            **rpcCall: unexpected end of conversation**  
**Explanation**        The RPC server returns an end of conversation indication which is unexpected by the client.  
**Action**                Check the conversation logic of your RPC client application.

<b>00130202</b>	<b>rpcCall: length of received buffer too small, length = :1:</b>
<b>Explanation</b>	The RPC server returned a reply with an illegal length.
<b>Action</b>	Check that your application is communicating with an RPC server. If the problem is reproducible, contact Software AG Support.
<b>00130203</b>	<b>rpcCall: wrong RPC version returned = :1:</b>
<b>Explanation</b>	The reply returned from the RPC server uses a different RPC protocol version.
<b>Action</b>	Check that the RPC server can handle the same protocol version the client requests. Possible reasons could be that your client requests compression or Natural Security and the RPC server does not support these functionalities.
<b>00130204</b>	<b>rpcCall: error returned from RPC server: :1:</b>
<b>Explanation</b>	The RPC server returned the indicated error response.
<b>Action</b>	Depends on the error response. Check the RPC server's log for more information.
<b>00130205</b>	<b>rpcCall: program :1: not found in library :2:</b>
<b>Explanation</b>	The RPC server could not locate the requested (remote) program in the specified library.
<b>Action</b>	Check the location of the remote program.
<b>00130206</b>	<b>rpcCall: internal error :1:</b>
<b>Explanation</b>	The RPC server returned an error response for an internal error.
<b>Action</b>	Depends on the error response. Check the RPC server's log for more information.
<b>00130207</b>	<b>rpcCall: error returned from server application for program :6:: number = :1: in line :2: of program :3: status=:4:, level=:5:</b>
<b>Explanation</b>	This error usually indicates a problem in the Natural server application. If the error is in the range 6970 to 6979 it is a problem in the Natural RPC Server.
<b>Action</b>	Check your server application.
<b>00130208</b>	<b>rpcCall: receive length :1: does not match expected length :2:</b>
<b>Explanation</b>	The data which has been received from the RPC server caused an internal inconsistency in the Java RPC.
<b>Action</b>	Check if your application is communicating with an EntireX/Natural RPC Server. If the problem is reproducible, contact Software AG Support.

- 00130209**            **rpcCall: numeric value :1: does not fit in :2:..3:**  
**Explanation**        The value of a N/P parameter exceeds the format specification. For example, the value is 123.12 and the format is N2.2.  
**Action**                Application problem.
- 00130210**            **rpcCall: Natural Security requires non blank UserId, Password and Library**  
**Explanation**        When Natural Logon is enabled, non-blank values for `Library`, `UserId`, and `Password` have to be provided.  
**Action**                Provide all necessary data in the RPC client application.
- 00130211**            **rpcCall: ISO 8859\_1 codepage not available**  
**Explanation**        Conversion from a Java String to a byte array based on the codepage ISO 8859\_1 failed.  
**Action**                Check your Java installation. The standard codepage ISO 8859\_1 should be supported.
- 00130212**            **rpcCall: exponent of floating-point number :1: greater than 99**  
**Explanation**        The exponent of a floating-point number used as input to an RPC request is greater than 99. This is not supported by EntireX RPC.  
**Action**                Application problem.
- 00130213**            **rpcCall: server does not support required version :1:**  
**Explanation**        The request issued by the RPC client cannot be processed. Required functionality is missing in target *RPC-based Components* or *EntireX Broker*.  
**Action**
  - If you are using one of the following codepages or codepage styles:
    - *Arabic Shaping* (IBM-420, windows-1256)
    - *Hebrew Codepage 803*
    - codepage style *EBCDIC Stateful Codepages*
    - *Multibyte or Double-byte Codepages* (e.g. UTF8)

Check the version of the EntireX Broker and the RPC server in use. Upgrade the EntireX Broker and the RPC server to the latest version available.

  - If you are not using one of the codepages or codepage styles listed above:

Check the version of the RPC server in use. Upgrade the RPC server to the latest version available.

See also *Supported RPC Protocols* in the EntireX RPC Programming documentation.

<b>00130214</b>	<b>rpcCall: error:1: returned from server application for program :2: in library :3:</b>
<b>Explanation</b>	This error usually indicates a problem in the server application.
<b>Action</b>	Check your server application.
<b>00130215</b>	<b>No Broker instance or server address specified</b>
<b>Explanation</b>	The generated proxy has been instantiated without a Broker instance or server address specified. This necessary information was not supplied before calling a method of the proxy.
<b>Action</b>	Use the <code>setBroker</code> and <code>setServerAddress</code> methods to specify the missing information.
<b>00130216</b>	<b>Attempt to change the Broker instance or the server address during a conversation</b>
<b>Explanation</b>	Either the method <code>setBroker</code> or <code>setServerAddress</code> has been called during a conversation, which is not possible.
<b>Action</b>	Correct your application.
<b>00130217</b>	<b>rpcCall: malformed string buffer, offset=&lt;offset&gt;, length=&lt;length&gt;</b>
<b>Explanation</b>	The RPC response from the server is not well formed. This may happen when RPC client and RPC server are not compatible.
<b>Action</b>	Contact Software AG Support.
<b>00130218</b>	<b>rpcCall: invalid length in buffer: &lt;part of buffer&gt;, length: &lt;length&gt;, digits: &lt;number of digits&gt;</b>
<b>Explanation</b>	The RPC response from the server is not well formed. This may happen when RPC client and RPC server are not compatible. The <i>&lt;part of buffer&gt;</i> contains the part of the buffer that should be a length, <i>&lt;length&gt;</i> is the length computed from the buffer part, <i>&lt;number of digits&gt;</i> is the number of digits parsed for the length.
<b>Action</b>	Contact Software AG Support.
<b>00130219</b>	<b>rpcCall: Failed to create change password message</b>
<b>Explanation</b>	The Java Runtime was unable to create a message for the RPC password change. This is used for Natural RPC Servers running with Natural Security.
<b>Action</b>	Contact Software AG Support.

- 00130220**            **rpcCall: Failed to create change password message: <exception detail>**  
**Explanation**        The Java Runtime was unable to create a message for the RPC password change. This is used for Natural RPC Servers running with Natural Security. See *<exception detail>* for the reason.  
**Action**                Contact Software AG Support.
- 00130221**            **rpcCall: Reliable RPC supports only IN parameters. INOUT <inout-length>, OUT <out-length>**  
**Explanation**        Reliable RPC allows only IDL direction IN parameters. The length of all INOUT parameters sent is given in *<inout-length>*. The length of all OUT parameters sent is given in *<out-length>*.  
**Action**                Update your IDL, that is, remove any OUT and INOUT parameters, possibly re-generate your interface object and/or update your application, then retry the RPC call.
- 00130222**            **rpcCall: No item found in mixed password cache for <item> where one is expected**  
**Explanation**        An internal inconsistency in the Java RPC has been detected.  
**Action**                Contact Software AG Support.
- 00130223**            **rpcCall: client runtime does not support required version :1: (client runtime version is :2:)**  
**Explanation**        The request issued by the RPC client cannot be processed because the RPC client runtime does not support the required RPC functionality.  
**Action**                Check the version of the RPC client runtime in use. Upgrade the RPC client runtime to the latest version available. See also *Supported RPC Protocols* in the EntireX RPC Programming documentation.
- 00130300**            **Unknown character set, value for left brace=:1:**  
**Explanation**        The EntireX Java ACI was unable to determine the native character set on the machine where it is running.  
**Action**                Contact Software AG Support.
- 00130301**            **Unknown character set, value for blank=:1:**  
**Explanation**        The EntireX Java ACI was unable to determine the native character set on the machine where it is running.  
**Action**                Contact Software AG Support.

<b>00130302</b>	<b>Invalid ETB reply, length=:1:</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Check if your application is communicating with an EntireX broker. If the problem is reproducible, contact Software AG Support.
<b>00130303</b>	<b>Reply signature (*ANS) not found</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Check if your application is communicating with an EntireX broker. If the problem is reproducible, contact Software AG Support.
<b>00130304</b>	<b>No API string returned from BROKER length={}</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Check if your application is communicating with an EntireX broker. If the problem is reproducible, contact Software AG Support.
<b>00130305</b>	<b>BROKER return length (:1:) differs from communication layer length(:2:)</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Check if your application is communicating with an EntireX broker. If the problem is reproducible, contact Software AG Support.
<b>00130306</b>	<b>Unknown ACI binary key :1:</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Contact Software AG Support.
<b>00130307</b>	<b>Unknown ACI string keyword :1:</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Contact Software AG Support.

<b>00130308</b>	<b>Wrong length for TEXT: :1:</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Contact Software AG Support.
<b>00130309</b>	<b>Broker call: uniqueId must be a 28 byte array, actual length=:1:</b>
<b>Explanation</b>	An internal inconsistency in the EntireX Java ACI has been detected.
<b>Action</b>	Contact Software AG Support.
<b>00130310</b>	<b>Broker call failed: Invalid TCP header received, length = :1:</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Check if your application is communicating with an EntireX broker. If the problem is reproducible, contact Software AG Support.
<b>00130311</b>	<b>Connection to :1: failed: :2:</b>
<b>Explanation</b>	An exception occurred when trying to establish a network connection to an EntireX broker.
<b>Action</b>	Check the error message returned from the Java networking class.
<b>00130312</b>	<b>Socket connect failed due to Java security restrictions for :1:::2: (:3:)</b>
<b>Explanation</b>	A security exception occurred during the open of a socket connection to an EntireX broker. A Java security manager is active which refused to open this socket connection.
<b>Action</b>	The most common reason for this exception is that a Java applet is trying to establish a connection to a Broker which is running on a machine which is not the same as the Web server the applet has been downloaded from. Your Broker has to run on the Web server machine or you have to use the Broker Agent. To get the correct IP address of the Web server machine use the <code>getCodeBase().getHost()</code> method call from the applet class.
<b>00130313</b>	<b>Send/receive failed for :1: (:2:)</b>
<b>Explanation</b>	An exception occurred during the transfer of data to an EntireX broker through a network connection.
<b>Action</b>	Check the error message returned from the Java networking class.

<b>00130314</b>	<b>Socket connect failed: :1: unknown (:2:)</b>
<b>Explanation</b>	The specified Broker ID could not be resolved to an IP address.
<b>Action</b>	Specify a valid Broker ID. Non-numeric IDs must be registered with the Domain Name System (DNS).
<b>00130315</b>	<b>Socket connect failed for :1:::2: (:3:)</b>
<b>Explanation</b>	Connection to the EntireX Broker failed. This means that the remote host could be reached, but is not responding.
<b>Action</b>	Check if a Broker is running on the specified machine and is listening on the specified port.
<b>00130316</b>	<b>Transport Timeout exceeded (:1:)</b>
<b>Explanation</b>	The timeout specified in the <code>entirex.timeout</code> property has elapsed. It is also possible that this error is caused by an interruption of the Java thread which is executing the Broker call. Check the additional error message for details.
<b>Action</b>	Check availability of the EntireX Broker in case of a timeout. Expected behavior in case of an interrupt.
<b>00130317</b>	<b>Invalid Transport Timeout &lt;value of <code>entirex.timeout</code>&gt;</b>
<b>Explanation</b>	An invalid value for the <code>entirex.timeout</code> property has been specified.
<b>Action</b>	Use 0 for an infinite timeout or a value of 1 or above for a finite timeout in seconds.
<b>00130318</b>	<b>Socket connect failed: :1:::2: unreachable (:3:)</b>
<b>Explanation</b>	The socket could not be connected to the remote host because the host could not be contacted. This means that some link in the network between the local machine and the remote host is down, or that the host is behind a firewall.
<b>Action</b>	Check your network configuration and status.
<b>00130319</b>	<b>TCP Reply signature (EBCF) not found</b>
<b>Explanation</b>	The data which has been received from the Broker caused an internal inconsistency in the EntireX Java ACI.
<b>Action</b>	Contact Software AG Support.

- 00130320**            **Broker HTTP(S) Agent returned Error: :1:**  
**Explanation**        Either the Web server or the Broker HTTP(S) Agent returned the indicated error response.  
**Action**                If an HTTP error is returned, the most likely reason is that the Web server or the Broker HTTP(S) Agent is not configured correctly. Otherwise, the connection from the Broker HTTP(S) Agent to the EntireX Broker could have failed.  
  
                         **Note:** Broker HTTP(S) Agent was formerly referred to as "Tunnel Servlet".
- 00130321**            **Call to :1: failed: :2:**  
**Explanation**        An `IOException` occurred when calling EntireX via the Broker HTTP(S) Agent.  
**Action**                Check the error message.
- 00130322**            **EntireX Broker returned an illegal physical user ID: ":1:"**  
**Explanation**        The data which has been received from the broker caused an internal inconsistency in the EntireX Java ACL.  
**Action**                Contact Software AG Support.
- 00130323**            **EntireX communication error: :1:**  
**Explanation**        Either the EntireX Broker, the Broker Agent, or the Broker HTTP(S) Agent returned an unexpected communication error.  
**Action**                Contact Software AG Support.
- 00130324**            **HTTP Server returned response code :1:**  
**Explanation**        The HTTP server which serves the request to the EntireX Broker HTTP(S) Agent returned an HTTP response code that is different from HTTP response code 200.  
**Action**                Check the error code and error message. Verify that the URL specified is correct and addresses the Broker HTTP(S) Agent. Verify that both the Web server and the servlet machine are up and running. Access to the Broker HTTP(S) Agent can be also be checked using a Web browser.
- 00130325**            **Java Runtime does not support https (:1:)**  
**Explanation**        The Java Runtime does not support the HTTPS protocol. HTTPS implementations are available with the Java plug-in and the Java Secure Socket Extension (JSSE).  
**Action**                Check if an HTTPS implementation is installed. Using an HTTPS implementation might require you to set the `java.protocol.handler.pkgs` system property.

<b>00130326</b>	<b>EntireX Broker returned communicator error: :1:</b>
<b>Explanation</b>	The EntireX Broker returned a low-level communication error. Typical reasons include memory allocation problems in the EntireX Broker.
<b>Action</b>	Check the error message. Additional information might be obtained by checking the log files of the communicator component of the EntireX Broker. See error codes 02150126, 02150128, 02150129. The Broker issued one of these error codes depending on the detailed error text.
<b>00130327</b>	<b>EntireX Broker HTTP(S) Agent returned error: :1:</b>
<b>Explanation</b>	The Broker HTTP(S) Agent returned an error. Typical reasons include unavailability of the EntireX Broker.
<b>Action</b>	Check the error message. Additional information might be obtained by checking the diagnostic output of the Broker HTTP(S) Agent.
<b>00130328</b>	<b>EntireX BrokerAgent returned error: :1:</b>
<b>Explanation</b>	The EntireX Broker Agent returned an error. Typical reasons include unavailability of the EntireX Broker.
<b>Action</b>	Check the error message. Additional information might be obtained by checking the diagnostic output of the Broker Agent.
<b>00130331</b>	<b>Error compressing send data: &lt;detailed description&gt;</b>
<b>Explanation</b>	An exception is thrown while compressing data before send.
<b>Action</b>	Contact Software AG Support with detailed description.
<b>00130332</b>	<b>Error decompressing received data: &lt;detailed description&gt;</b>
<b>Explanation</b>	An exception is thrown while decompressing data after receive or the decompression is incomplete and results in inconsistent data.
<b>Action</b>	Contact Software AG Support with detailed description.
<b>00130333</b>	<b>All sockets in socket pool for &lt;Broker ID&gt; are in use (size: &lt;n&gt; sockets)</b>
<b>Explanation</b>	All sockets in the socket pool for the given Broker ID are in use. <i>n</i> is the maximum number of sockets in this pool.
<b>Action</b>	Check size of socket pool and check connection to the Broker.

**00130334**            **Broker returned <returned number> bytes, more than RETL = <expected number> specifies**

**Explanation**        An internal inconsistency in the response from the EntireX Broker has been detected. The Broker returned a larger payload than expected. <returned number> is the number of bytes in the payload. <expected number> is the number of bytes expected (return length).

**Action**              Contact Software AG Support.

**00130400**            **Error processing SSL KeyStore or TrustStore :1:**

**Explanation**        The Java keystore that was specified by the `trust_store` or `key_store` parameter is invalid or corrupt.

**Action**              Check the specified keystore. See also *SSL/TLS Parameters for SSL Clients*.

**00130401**            **Error during SSL handshake :1:**

**Explanation**        An SSL exception occurred during the SSL handshake between the SSL client and the SSL server. The most common case is an “untrusted server certificate chain” error.

**Action**              Check the error message for details. In case of an “untrusted server certificate chain” error, specify using the `trust_store` parameter a keystore that contains a trusted certificate entry for the issuer of the SSL server's certificate. See also *SSL/TLS Parameters for SSL Clients*.

**00130402**            **Server certificate issued for ":1:" instead of ":2:"**

**Explanation**        The certificate received from the SSL server contains a common name that is different from the hostname specified in the `BrokerID`. This is an indication that the SSL client is not communicating with the right SSL server. This error can only appear when `verify_server=yes` has been specified.

**Action**              Check that the host name matches the name in the server's certificate. See also *SSL/TLS Parameters for SSL Clients*.

**00130403**            **Invalid server certificate :1:**

**Explanation**        The certificate received from the SSL server is syntactically invalid.

**Action**              Check the server's certificate. See also *SSL/TLS Parameters for SSL Clients*.

**00130404**            **SSL Transport could not be instantiated: :1:**

**Explanation**        The constructor of the SSL implementation class has thrown an exception.

**Action**              Check the error message for details.

<b>00130405</b>	<b>SSL Transport could not be loaded: :1:</b>
<b>Explanation</b>	A Java class used by the SSL implementation does not exist.
<b>Action</b>	Check your Java SSL installation.
<b>00130406</b>	<b>SSL Transport class :1: not found</b>
<b>Explanation</b>	The EntireX Java SSL implementation class does not exist.
<b>Action</b>	Check that the named class exists and can be loaded via the classpath.
<b>00130407</b>	<b>SSL Transport class could not be loaded: :1:</b>
<b>Explanation</b>	Something is wrong with the SSL implementation class.
<b>Action</b>	Check that the named class is correct.
<b>00130408</b>	<b>Class :1: is not an SSL Transport class</b>
<b>Explanation</b>	The named class is not recognized by EntireX Java as an SSL transport class.
<b>Action</b>	Check your installation. If the Java system property <code>entirex.ssltransport</code> has been specified, verify that it references an EntireX Java SSL transport class.
<b>00130900</b>	<b>Call rejected, BrokerAgent is shutting down</b>
<b>Explanation</b>	New connections are not accepted by the Broker Agent during shutdown processing.
<b>Action</b>	Restart Broker Agent.
<b>00130901</b>	<b>BrokerAgent: create socket failed: :1:</b>
<b>Explanation</b>	An exception occurred when opening a socket connection to an EntireX Broker.
<b>Action</b>	Check the error message returned from the Java socket class.
<b>00130902</b>	<b>BrokerAgent: read/write failed: :1:</b>
<b>Explanation</b>	An exception occurred during the transfer of data to an EntireX broker through a socket connection.
<b>Action</b>	Check the error message returned from the Java socket class.
<b>00130903</b>	<b>BrokerAgent: unknown :1:::2:</b>
<b>Explanation</b>	The Broker Agent received a request for a Broker ID it is not serving.
<b>Action</b>	Check configuration of the Broker Agent(s).

**00130904**

**BrokerAgent: invalid request format**

**Explanation**

The Broker Agent received a request in an invalid format.

**Action**

Check the application which is using the Broker Agent. If the problem is reproducible, contact Software AG Support.

# 10 Message Class 0014 - EntireX ACI - Broker Stub Version 1

---

This page describes messages with message class 0014: Error in Broker Stub Version 1. The messages have the format:

0014 $nnnn$

where 0014 is the message class, and

$nnnn$  is the message number in the range 0000 - 9999

This message class indicates a problem in the Broker stub being used. Examine the specific error message for the error number and make the correction. You should then be able to restart the application.

**00140213            Insufficient Memory For Stub**

**Explanation**        The Broker stub cannot allocate the storage needed to process the request.

**Action**                If you are using a Natural application in a mainframe environment, try to reduce or remove Natural buffers from the Natural space management. See the appropriate *Natural Operations* documentation for valid Natural buffer profile parameters such as ASIZE, CSIZE, DSIZE. When issuing the first call from any mainframe Natural platform, a buffer of 33 KB must be available within Natural space management.

**00140969            STUB: Cannot create callback logger**

**Explanation**        Stublog cannot be created.

**Action**                Contact Software AG Support.

**00140971**            **STUB: Cannot obtain global context**  
**Explanation**        Global stub context does not exist and cannot be obtained.  
**Action**                Contact Software AG Support.

# 11 Message Class 0015 - Designer

---

The messages have the format:

0015*nnnn*

where 0015 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>00151100</b>	<b>General error in command-line interface for DCOM Wrapper</b>
<b>Explanation</b>	An unspecified error has occurred in the command-line interface. The error was in response to a request to run the DCOM Wrapper.
<b>Action</b>	Contact Software AG Support.
<b>00151101</b>	<b>Reserved</b>
<b>Explanation</b>	none
<b>Action</b>	none
<b>00151102</b>	<b>I/O error in command-line interface for DCOM Wrapper</b>
<b>Explanation</b>	An I/O error has occurred in the command-line interface. The error was in response to a request to run the DCOM Wrapper.
<b>Action</b>	Make sure that the input IDL file is readable. Make sure that the output directory exists and has write access. Make sure that the generated files are accessible.

<b>00151103</b>	<b>Command syntax error in command-line interface for DCOM Wrapper</b>
<b>Explanation</b>	The command-line argument <code>dcom:generate</code> was misspelled.
<b>Action</b>	Reenter the command-line argument correctly.
<b>00151104</b>	<b>Command option syntax error in command-line interface for DCOM Wrapper</b>
<b>Explanation</b>	An unknown command option was entered, or the command options <code>nt</code> or <code>os</code> were misspelled.
<b>Action</b>	Reenter the command-line argument correctly.
<b>00151110</b>	<b>General error in DCOM MIDL execution</b>
<b>Explanation</b>	An error occurred in the MIDL execution of the DCOM Wrapper. MIDL is called inside the generated DCOM batch script.
<b>Action</b>	Make sure the <code>ntd daemon</code> is running. Check the generated DCOM batch script and the availability of the MIDL input files.
<b>00151111</b>	<b>General error in DCOM batch script execution</b>
<b>Explanation</b>	An error occurred in a subprocess in the DCOM batch script, for example in the IDL Compiler calls.
<b>Action</b>	Check the generated DCOM batch script and the availability of the input files.
<b>00151200</b>	<b>General error in command-line interface for Java Wrapper</b>
<b>Explanation</b>	An unspecified error has occurred in the command-line interface. The error was in response to a request to run the Java Wrapper.
<b>Action</b>	Contact Software AG Support
<b>00151300</b>	<b>General error in command-line interface for XML/SOAP Wrapper</b>
<b>Explanation</b>	An unspecified error has occurred in the command-line interface. The error was in response to a request to run the XML/SOAP Wrapper.
<b>Action</b>	Contact Software AG Support.
<b>00151301</b>	<b>No IDL libraries found in specified Software AG IDL file</b>
<b>Explanation</b>	The specified IDL file is invalid or contains no IDL libraries. The error was in response to a request to run the XML/SOAP Wrapper.
<b>Action</b>	Correct the IDL file.

<b>00151302</b>	<b>I/O error in command-line interface for XML/SOAP Wrapper</b>
<b>Explanation</b>	An I/O error has occurred in the command-line interface. The error was in response to a request to run the XML/SOAP Wrapper.
<b>Action</b>	Make sure that the input IDL file is readable. Make sure that the output directory exists and has write access. Make sure that the XML mapping file is accessible.
<b>00151500</b>	<b>General error in command-line interface for plug-ins</b>
<b>Explanation</b>	An unspecified error has occurred in the command-line interface. The error was in response to a request to run a plug-in.
<b>Action</b>	Contact Software AG Support.
<b>00151700</b>	<b>Missing import source name in command-line interface for XML to IDL Generators</b>
<b>Explanation</b>	A misspelled command-line argument was issued to the command-line interface, because no import source name was entered.
<b>Action</b>	Enter an accessible and readable import source file name.
<b>00151701</b>	<b>Warning in command-line interface for XML to IDL Generators</b>
<b>Explanation</b>	A warning has occurred in the command-line interface.
<b>Action</b>	Follow the additional text of the warning.
<b>00151702</b>	<b>Error in command-line interface for XML to IDL Generators</b>
<b>Explanation</b>	An error has occurred in the command-line interface.
<b>Action</b>	Follow the additional text of the error.
<b>00152000</b>	<b>General command parsing error in command-line interface</b>
<b>Explanation</b>	An unspecified command parsing error has occurred in the command-line interface.
<b>Action</b>	Contact Software AG Support.
<b>00152001</b>	<b>Reserved</b>
<b>Explanation</b>	none
<b>Action</b>	none

<b>00152002</b>	<b>I/O error in command-line interface</b>
<b>Explanation</b>	An I/O error has occurred in the command-line interface.
<b>Action</b>	Make sure that the input IDL file and its properties file are accessible and readable.
<b>00152003</b>	<b>Reserved</b>
<b>Explanation</b>	none
<b>Action</b>	none
<b>00152004</b>	<b>IDL parser error in command-line interface</b>
<b>Explanation</b>	The specified IDL file is invalid.
<b>Action</b>	Correct the contents of the Software AG IDL file.
<b>00152010</b>	<b>Unknown command-line argument</b>
<b>Explanation</b>	An unknown or misspelled command-line argument was issued to the command-line interface.
<b>Action</b>	Check and correct the command-line argument.

# 12

## Message Class 0020 - EntireX ACI - User Error in the API

---

This message class is returned when invalid arguments are specified in the API (ACI) or invalid EntireX Broker function sequences are issued. It is usually an error made by the application programmer. The situation can be examined using the error number returned. The messages have the format:

0020*nnnn*

where 0020 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

**00200004**                    **API: No Function Possible After EOC**

**Explanation**                The user has tried to access a conversation after finishing it with a previous EOC call.

**Action**                        This is a user error. Perhaps an invalid conversation ID was specified. Check the program and correct the error.

**00200006**                    **API: Last Message Not Found**

**Explanation**                This response is given to a RECEIVE call with OPTION=LAST when no data/messages have yet been received. It is not possible to look at the last message if you have not read the first one.

**Action**                        This is a user error. Check the program and correct the error.

<b>00200031</b>	<b>API: Invalid value for :1:</b>
<b>Explanation</b>	This response is given when invalid values for the <code>WAIT</code> or <code>UWTIME</code> or <code>UWSTATP-ADDER</code> fields of the API are specified (for example, non-digits are given or the last character is not one of the valid time units S,M,H).
<b>Action</b>	This is a user error. Check the value for the field in the API of your program.
<b>00200044</b>	<b>API: Invalid error buffer ptr or length</b>
<b>Explanation</b>	The user has set the <code>errtext_length</code> in the Broker control block but has not provided an error buffer.
<b>Action</b>	This is a user error. The user should either provide an error buffer or set the <code>errtext_length</code> to 0.
<b>00200047</b>	<b>API: QUIESCE invalid for Attach Manager</b>
<b>Explanation</b>	Because a service registered with the option <code>ATTACH</code> does not run normal conversations, the <code>DEREGISTER</code> cannot wait for them to finish. In fact, the attachable service is no longer attachable after the <code>DEREGISTER</code> .
<b>Action</b>	Do not use the <code>DEREGISTER</code> option <code>QUIESCE</code> for services that are registered as attach manager (option <code>ATTACH</code> ).
<b>00200048</b>	<b>API: Already registered with ATTACH</b>
<b>Explanation</b>	An application can register a service either with the option <code>ATTACH</code> or as a normal server (without option <code>ATTACH</code> ). The error occurs when an application attempts to do both.
<b>Action</b>	Do not try to register a single server as an attach manager and as a normal server simultaneously.
<b>00200052</b>	<b>API: Already registered without ATTACH</b>
<b>Explanation</b>	An application can register a service either with the option <code>ATTACH</code> , or as a normal server (without option <code>ATTACH</code> ). The error occurs when an application attempts to do both.
<b>Action</b>	Do not try to register a single server as a normal service and as an attach manager simultaneously.
<b>00200070</b>	<b>Unknown host</b>
<b>Explanation</b>	<code>BROKER-ID</code> contains an unknown host.
<b>Action</b>	Enter valid host in <code>BROKER-ID</code> .

<b>00200094</b>	<b>API: MSG Truncated To Fit Receive-Buffer</b>
<b>Explanation</b>	The data/message retrieved is larger than the supplied receive buffer. The data/message has been truncated to the actual length given in RECEIVE-LENGTH field of the API if API version 2 or above is used.
<b>Action</b>	See <i>Error Cases</i> under <i>Writing Client and Server Applications</i> in the ACI Programming documentation for information on how to respond to this error code.
<b>00200098</b>	<b>API: Function not possible if LOGON only</b>
<b>Explanation</b>	The performed function is not valid if only a LOGON call has been performed. This applies to a RECEIVE, DEREGISTER or EOC function. They are not allowed right after a LOGON call.
<b>Action</b>	Do not perform the listed function right after a LOGON. Perform a REGISTER before running the DEREGISTER, perform a SEND or a RECEIVE before running an EOC and accept or establish a conversation before running a RECEIVE.
<b>00200134</b>	<b>LOGON required</b>
<b>Explanation</b>	If AUTOLOGON=NO is defined in the attribute file, all participant applications must perform a LOGON call as the very first Broker call and a LOGOFF call when they have finished communicating with the Broker. If the user is using UOW, clients and servers must do a LOGON. If AUTOLOGON=YES and a LOGON is not done, this error will occur when a SEND with OPTION=SYNC is done. See AUTOLOGON under <i>Broker-specific Broker Attributes</i> .
<b>Action</b>	Make LOGON the very first call and LOGOFF the last call. If necessary, define the attribute AUTOLOGON=YES in order to support automatic LOGON. However, the recommended definition is to force an explicit LOGON call.
<b>00200149</b>	<b>No Error Text</b>
<b>Explanation</b>	The broker stub was unable to initialize the environment. <ul style="list-style-type: none"> <li>■ Under z/OS, the EXX load library was not concatenated to the STEPLIB chain.</li> <li>■ Under BS2000, the EXX load library was not assigned to LINK-NAME ETBLIB.</li> </ul>
<b>Action</b>	Depends on the operating system: <ul style="list-style-type: none"> <li>■ z/OS: Make sure the EXX load library is concatenated to the STEPLIB chain. See <i>Step 4: Authorize the Broker STEPLIB Data Sets</i> in the z/OS Installation documentation.</li> <li>■ BS2000: Make sure the EXX load library is assigned to LINK-NAME ETBLIB. See <i>Linking the Stubs</i> in the BS2000 Administration documentation.</li> </ul>

<b>00200181</b>	<b>API: Invalid User-ID</b>
<b>Explanation</b>	The value for the USER-ID field of the API is missing. The USER-ID is a mandatory parameter.
<b>Action</b>	This is a user error. Check the value for the USER-ID field in the API of your program.
<b>00200182</b>	<b>API: Invalid Function</b>
<b>Explanation</b>	The value for the FUNCTION field of the API is invalid.
<b>Action</b>	This is a user error. Check the value for the FUNCTION field in the API of your program.
<b>00200183</b>	<b>API: Invalid CLASS/NAME/SERVICE</b>
<b>Explanation</b>	The service is missing or invalid in a broker call that requires a service, that is, a REGISTER/DEREGISTER or a SEND/RECEIVE/EOC call with no CONV-ID specified.
<b>Action</b>	This is a user error. Make sure that at least one of the following fields has been provided: SERVER-CLASS, SERVER-NAME or SERVICE. Together, these fields define the service.
<b>00200184</b>	<b>API: Invalid SEND-LENGTH</b>
<b>Explanation</b>	The value for the SEND-LENGTH field of the API is missing.
<b>Action</b>	This is a user error. A SEND call always requires a send-length. Check the program and correct the error.
<b>00200185</b>	<b>API: Invalid FUNCTION/CONVID Combination</b>
<b>Explanation</b>	The value for the CONV-ID field of the API is invalid, missing, or invalid in combination with the desired function.
<b>Action</b>	This is a user error. A SEND/RECEIVE/EOC/UNDO call requires a valid value for the CONV-ID (CID) field. Check the program and correct the error.
<b>00200186</b>	<b>API: Char '.' or ',' not allowed in ACI CB</b>
<b>Explanation</b>	The character fields within the EntireX Broker ACI must not contain the metacharacter '.' or ','. These characters are used as special characters in the communication protocol between the Broker stub and the Broker.
<b>Action</b>	Correct the wrong character in the EntireX Broker ACI.

- 00200187**                    **API: Invalid FUNCTION/OPTION Combination**  
**Explanation**                The FUNCTION / OPTION combination is invalid.  
**Action**                        This is a user error. Check the value for the OPTION field in conjunction with the FUNCTION field in the API of your program and correct the error.
- 00200188**                    **API: Invalid Option**  
**Explanation**                The OPTION field of the API contains an unknown value.  
**Action**                        This is a user error. Check the value for the OPTION field in the API of your program and correct the error.
- 00200189**                    **API: Invalid RECEIVE-LENGTH**  
**Explanation**                The value for the RECEIVE-LENGTH field of the API is missing. RECEIVE calls and blocked SEND calls always require a valid RECEIVE-LENGTH.  
**Action**                        This is a user error. Check the program and correct the error.
- 00200190**                    **API: Invalid Cmd/Info Services Version**  
**Explanation**                The EntireX Broker kernel does not recognize the Command and Information Services API version requested.  
**Action**                        This is a user error. Check the following:
- If you are using ETBINFO, ETBCMD or any other Software AG-provided Command and Information Services application: Check that the version of ETBINFO or ETBCMD is the same or earlier than the version of the Broker kernel.
  - If you are using your own Command and Information Services application: verify that the Command and Information Services API version will work with the version of EntireX. The following table shows the maximum CIS API version for the respective version of EntireX:

Broker/EntireX Version	Max. CIS API Version
ETB 1 or ETB 2	1
EXX 3, 4, 5, 6	2
EXX 7.1	3
EXX 7.2	4
EXX 7.3	5
EXX 8.0 or 8.1	6
EXX 8.2	7
EXX 9.0, 9.5, 9.6, 9.7, 9.9	8
EXX 9.10, 9.12	9
EXX 10.1, 10.3	10

Broker/EntireX Version	Max. CIS API Version
EXX 10.5	11
EXX 10.7, 10.8	12

- A possible cause for this error is a SEND-LENGTH that is too short. Increase this value if necessary.

**00200191**

**API: Invalid OPTION/CONV-ID Combination**

**Explanation**

The OPTION / CONV - ID combination in the API is invalid. For example, a SEND was issued with OPTION=EOC and CONV - ID=NONE, or a RECEIVE with OPTION=LAST and no specific conversation ID (CONV - ID) was given.

**Action**

This is a user error. Check the program and correct the error.

**00200192**

**API: Invalid parameter count**

**Explanation**

More than four pointers have been supplied in the parameter list used to call the broker stub.

**Action**

Correct the program. A maximum of four pointers can be supplied.

**00200193**

**API: Invalid FUNCTION/WAIT Combination**

**Explanation**

The FUNCTION / WAIT combination in the API is invalid. A WAIT value in the API can be specified for the SEND, RECEIVE and RECEIVE\_PUBLICATION functions only.

**Action**

This is a user error. Check the program and correct the error.

**00200194**

**API: Invalid OPTION/WAIT Combination**

**Explanation**

The OPTION / WAIT combination in the API is invalid, that is, a SEND with OPTION=EOC, HOLD or SYNC, or a RECEIVE with OPTION=LAST was issued.

**Action**

This is a user error. Check the program and correct the error.

**00200195**

**API: Deregister not allowed from clients**

**Explanation**

This response is given when a client tries to issue a deregister call to EntireX Broker.

**Action**

Do not issue a DEREGISTER call for clients. Check the program and correct the error.

<b>00200199</b>	<b>API: Receive/CID=ANY Invalid For Clients</b>
<b>Explanation</b>	A client issued a RECEIVE call for new conversations.
<b>Action</b>	This is a user error. Clients cannot issue a RECEIVE with CONV - ID=ANY because a RECEIVE with CONV - ID=ANY must be preceded by a REGISTER call. Check the program and correct the error.
<b>00200200</b>	<b>API: RECEIVE/CID=NEW Invalid For Clients</b>
<b>Explanation</b>	A client has issued a RECEIVE call for new conversations.
<b>Action</b>	This is a user error. Clients cannot issue a RECEIVE with CONV - ID=NEW because a RECEIVE with CONV - ID=NEW must be preceded by a REGISTER call. Check the program and correct the error.
<b>00200203</b>	<b>API: No RECEIVE -BUFFER Address</b>
<b>Explanation</b>	The address of the receive buffer is missing for the Broker call. That is, a RECEIVE or a blocked SEND was issued without the receive buffer address.
<b>Action</b>	This is a user error. Check the program and correct the error.
<b>00200208</b>	<b>API: Invalid version number</b>
<b>Explanation</b>	One of the following errors occurred: Invalid API - TYPE or API - VERSION supplied by user when calling the broker stub. Invalid version supplied by user in internal control blocks when calling the broker stub. Broker detected an invalid or unsupported prefix version specified by stub. Broker does not support the API - VERSION supplied by user.
<b>Action</b>	This is a user error. Check version of broker stubs and broker kernel. Determine the stub version by using function FCT_VERSION. Determine the kernel version by using function FCT_KERNELVERS. Correct API - TYPE or API - VERSION in the Broker control block.
<b>00200210</b>	<b>API: No Send Buffer Address</b>
<b>Explanation</b>	A SEND was issued without the send buffer address. Therefore, no address is given to the broker stub as the second parameter.
<b>Action</b>	This is a user error. Check the program and correct the error.
<b>00200211</b>	<b>API: No API Control Block Address</b>
<b>Explanation</b>	The ACI control block is missing for the call. No address is given to the broker stub as the first parameter.
<b>Action</b>	This is a user error. Check the program and correct the error.

<b>00200212</b>	<b>API: (*) In SN/SC/SV Invalid For Function</b>
<b>Explanation</b>	The FUNCTION / SERVICE combination provided by the SERVER-CLASS, SERVER-NAME, and SERVICE fields of the API is invalid. That is, a SEND function is used with an asterisk (*) in any of the SERVICE fields.
<b>Action</b>	This is a user error. Check the program and correct the error.
<b>00200216</b>	<b>API: Invalid BROKER-ID</b>
<b>Explanation</b>	The BROKER-ID field in the API does not contain a valid numeric node ID.
<b>Action</b>	The BROKER-ID in the API should be the same as the BROKER-ID in the Broker attribute file.
<b>00200218</b>	<b>SEND/RCV-LEN :1: exceeds max (:2:)</b>
<b>Explanation</b>	<p>The maximum length possible for the send buffer/receive buffer depends on the Broker API version and the transport method (TCP/IP or Entire Net-Work) used, and on the configuration of the EntireX Broker.</p> <ul style="list-style-type: none"><li>■ :1: is replaced by the current message length requested in bytes.</li><li>■ :2: is replaced by an extended reason description for the length. See Action below for list of reasons.</li></ul>
<b>Action</b>	<p>Check the API version and the transport method (TCP/IP or Entire Net-Work) used, and the possible maximum length of send buffer/receive buffer for the transport method. See the field SEND-LENGTH of the Broker ACI control block. See SEND-LENGTH under <i>Broker ACI Fields</i>. Additional actions depend on the extended reason description:</p> <ul style="list-style-type: none"><li>■ 'MAX-MESSAGE-LENGTH exceeded': Check the Broker attribute MAX-MESSAGE-LENGTH. See MAX-MESSAGE-LENGTH under <i>Broker-specific Broker Attributes</i>.</li><li>■ 'IUBL or NABS exceeded': Check the Broker attributes NABS and IUBL. See NABS and IUBL under <i>NET-specific Broker Attributes</i>.</li><li>■ 'No ACBX support': Check the Broker attribute EXTENDED-ACB-SUPPORT is set to 'YES' to allow buffers greater than 32 KB to be transmitted. See EXTENDED-ACB-SUPPORT under <i>NET-specific Broker Attributes</i>.</li><li>■ 'APIV1 max 32K': API version 1 does not support messages greater than 32 KB. Use a higher ACI API.</li></ul>

<b>00200226</b>	<b>API Invalid STATUS</b>
<b>Explanation</b>	The Broker has returned an invalid status.
<b>Action</b>	Contact Software AG Support.
<b>00200228</b>	<b>API Invalid CONV-STAT</b>
<b>Explanation</b>	The Broker has returned an invalid conversation status.
<b>Action</b>	Contact Software AG Support.
<b>00200229</b>	<b>API Invalid value for STORE</b>
<b>Explanation</b>	There are two possible error sources: <ol style="list-style-type: none"> <li>1. The application has supplied an invalid value for STORE in the Broker ACI control block. See STORE under <i>Broker ACI Fields</i>.</li> <li>2. The Broker has returned an invalid value for STORE from the kernel.</li> </ol>
<b>Action</b>	In situation 1, ensure that the application assigns only a valid value to the field.  In situation 2, contact Software AG Support.
<b>00200252</b>	<b>CID=NONE required for this service</b>
<b>Explanation</b>	The application tried to start a conversation when issuing an EntireX Broker command operation. The internal service should be used in non-conversational mode only (CID=NONE).
<b>Action</b>	Change your code.
<b>00200267</b>	<b>API: CID=NEW required for this service</b>
<b>Explanation</b>	An INFO service request has been started with CID not equal NEW. Because INFO services are conversational, a new conversation must be started with every initial SEND command. The returning information can be spread across several messages which must be received separately.
<b>Action</b>	Always send INFO requests with CID=NEW.
<b>00200268</b>	<b>API: REGISTER internal service rejected</b>
<b>Explanation</b>	The service that you specified is already registered as an internal service. All service definitions with the class SAG are reserved.
<b>Action</b>	Choose another service name

<b>00200302</b>	<b>EOC error: must back out unit of work</b>
<b>Explanation</b>	EOC commands are not allowed while a UOW is being built.
<b>Action</b>	Do not issue an EOC command before a UOW is committed. This message is for diagnostic purposes only.
<b>00200311</b>	<b>API: Invalid Numeric Field</b>
<b>Explanation</b>	The API field must be numeric.
<b>Action</b>	Correct the field value.
<b>00200312</b>	<b>API: Out of Range</b>
<b>Explanation</b>	The value of a field is incorrect.
<b>Action</b>	Correct the field value.
<b>00200314</b>	<b>API: UOW status invalid</b>
<b>Explanation</b>	Returned status of UOW is not valid.
<b>Action</b>	Check the CONVID and UOWID in the Broker control block.
<b>00200335</b>	<b>No Mixed Message with UOW on the Same CONVID</b>
<b>Explanation</b>	You cannot have UOW and non-UOW messages in the same conversation, that is, the same CONVID.
<b>Action</b>	Check the application and correct the error.
<b>00200336</b>	<b>No Mixed UOW with MSG on the Same CONVID</b>
<b>Explanation</b>	You cannot have UOW and non-UOW messages in the same conversation, that is, the same CONVID.
<b>Action</b>	Check the application and correct the error.
<b>00200362</b>	<b>API: Broker Stub De-Initialized</b>
<b>Explanation</b>	The Broker stub was initialized but had to be de-initialized because none of the shared library pointers (TCP or ADALNK) was available.
<b>Action</b>	Check for any serious errors that may have caused library cleanup.

<b>00200371</b>	<b>API: Cannot Specify arch w/o codepage</b>
<b>Explanation</b>	You cannot specify a DATA-ARCH to which a codepage applies without also specifying the codepage itself, using LOCALE-STRING.
<b>Action</b>	Check the application and correct the error.
<b>00200372</b>	<b>API: Error converting locale to codepage</b>
<b>Explanation</b>	The locale string sent by a client/server component could not be mapped to a codepage by the broker's built-in locale string mapping. See <i>Broker's Built-in Locale String Mapping</i> .
<b>Action</b>	Identify the locale string that could not be mapped to a codepage. The value of the LS keyword ( <i>LS=locale-string</i> ) in the broker trace may be helpful in identifying the erroneous locale string. Use a valid locale string or define a new mapping in the broker attribute file. See the relevant attribute under <i>locale-string</i> for information on how to customize the mapping of locale strings to codepages.
<b>00200377</b>	<b>API: Character Conversion Overflow</b>
<b>Explanation</b>	The data/message retrieved after character conversion is larger than the supplied receive buffer. Conversion can increase the amount of your data. No data is provided in the receive buffer. The minimum buffer length required to receive the converted data is returned in the RETURN-LENGTH field of the API if API version 2 or above is used. The client or server should reread the message using a larger buffer with the required length.
<b>Action</b>	For RPC components, the error can be ignored because the reread of the message is handled inside the RPC layer. Exception: for older Natural RPC versions you may need to increase the MAX-BUFF parameter.  For ACI programming, see <i>Error Cases</i> under <i>Writing Client and Server Applications</i> in the ACI Programming documentation for information on how to respond to this error code.
<b>00200379</b>	<b>API: Inconsistent security installation</b>
<b>Explanation</b>	The setting for security in the Broker kernel is different from the settings in one or more of the Broker stubs. Either the Broker kernel and all stubs must be configured to operate with security, or the kernel and all stubs must be configured to operate without security.  For ACI version 8 and above, this error can be caused by an application not setting the correct value of KERNELSECURITY in the EntireX Broker control block field; see KERNELSECURITY under <i>Broker ACI Fields</i> . The correct value is set automatically by the KERNELVERS command and this value must be maintained in the EntireX Broker control block field. If the application is unable or unwilling to perform the KERNELVERS command, configure the stub so that the security setting is consistent with the Broker kernel. See KERNELVERS under <i>Broker ACI Functions</i> and also <i>EntireX Security</i> .
<b>Action</b>	Ensure the security settings are consistent for Broker kernel and all the stubs.

**00200380**                    **Some Characters Could not Be Converted**

**Explanation**            When receiving a message, the Broker's `CONVERSION` exit determined that at least one character in the incoming message had no equivalent in the receiver's character set. The possibilities for this incomplete conversion:

- The sender's message contained a data value with no corresponding character in the sender's character set.
- All the sender's characters are valid, but at least one of them has no corresponding character in the receiver's character set.

If this condition occurs, the application should consider the received data to be potentially incomplete or missing.

**Action**                    Ensure that both sender and receiver are using the correct locale string and that all character values being sent have a corresponding character in the receiver's character set.

**00200400**                    **Invalid SSL parameter specified**

**Explanation**            The Broker ACI call `FCT_SETSSLPARMS` failed due to invalid specifications.

**Action**                    Check the 2nd parameter of this broker call and the length specified in the Broker ACI control block.

**00200401**                    **Invalid value specified for EL**

**Explanation**            Only values of 0, 1 or 2 are valid encryption levels.

**Action**                    Correct the setting in the Broker ACI control block.

**Note:** For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See *SSL/TLS, HTTP(S), and Certificates with EntireX* in the platform-independent Administration documentation.

**00200419**                    **Mismatch of EL and current encryption**

**Explanation**            An inconsistency has been detected. The actual security setting to encrypt the payload buffer does not match the specification of the `EL` parameter in the current broker call.

**Action**                    Verify the `EL` parameter in the Broker ACI control block and/or verify the correct installation of the security exit.

**Note:** For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See *SSL/TLS, HTTP(S), and Certificates with EntireX* in the platform-independent Administration documentation.

<b>00200420</b>	<b>Mismatch of client encryption and ATTR</b>
<b>Explanation</b>	The encryption settings of the EntireX client program do not match the settings in the Broker attribute file.
<b>Action</b>	<p>Check the <code>ENCRYPTION-LEVEL</code> specification in the Broker attribute file and adapt the settings to your client program (with respect to the security setting and/or the <code>EL</code> parameter).</p> <p><b>Note:</b> For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.</p>
<b>00200421</b>	<b>Mismatch of server encryption and ATTR</b>
<b>Explanation</b>	For servers with API version below 6, a mismatch was found between the current security settings and the <code>ENCRYPTION-LEVEL</code> specification in the Broker attribute file.
<b>Action</b>	<p>Change the security settings:</p> <ul style="list-style-type: none"> <li>■ Activate / deactivate the security exit on the server side, or</li> <li>■ Amend the <code>ENCRYPTION-LEVEL</code> specification for this service in the Broker attribute file.</li> </ul> <p><b>Note:</b> For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.</p>
<b>00200422</b>	<b>Server EL and ATTR not identical</b>
<b>Explanation</b>	For servers with API version 6 or above, the setting of <code>EL</code> and the specification for <code>ENCRYPTION-LEVEL</code> in the Broker attribute file is not identical.
<b>Action</b>	<p>Either</p> <ul style="list-style-type: none"> <li>■ Correct the <code>EL</code> parameter (and security setting) in the server program, or</li> <li>■ Change the <code>ENCRYPTION-LEVEL</code> for this service in the Broker attribute file.</li> </ul> <p><b>Note:</b> For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.</p>
<b>00200424</b>	<b>SETSSLPARMS only valid for transport=SSL</b>
<b>Explanation</b>	ACI function <code>FCT_SETSSLPARMS</code> was set for a non-SSL Broker connection.
<b>Action</b>	Either change the <code>BROKER-ID</code> to use SSL or do not issue the ACI function <code>FCT_SETSSLPARMS</code> .

<b>00200449</b>	<b>API: Invalid Compress option</b>
<b>Explanation</b>	Compression is supported, but an invalid option was specified.
<b>Action</b>	Correct the compress option.
<b>00200450</b>	<b>Error during data compression</b>
<b>Explanation</b>	Compression of the data was attempted, but resulting size was equal to or greater than original data.
<b>Action</b>	The compress option is turned OFF for this transmission of data; data will not be compressed.
<b>00200451</b>	<b>Error during data decompression</b>
<b>Explanation</b>	Failure occurred during a decompress operation. The most likely cause is insufficient memory for the process.
<b>Action</b>	Increase available memory for process, if possible.
<b>00200452</b>	<b>Unexpected error during comp/decomp</b>
<b>Explanation</b>	Error resulted from a compress or decompress operation, and is not accounted for by errors 0450 or 0451.
<b>Action</b>	Save trace information. Contact Software AG Support.
<b>00200453</b>	<b>Decompressed data corrupt</b>
<b>Explanation</b>	When decompressing a compressed data stream, the integrity of the data was compromised.
<b>Action</b>	Save trace and data. Contact Software AG Support.
<b>00200454</b>	<b>API: Compression is not available</b>
<b>Explanation</b>	Compression was requested but is not available
<b>Action</b>	Retry the operation without compression.
<b>00200478</b>	<b>EOC Error: Still Unread Unit of Work</b>
<b>Explanation</b>	Participant issues the function EOC, but unprocessed UOWs exist for the conversation. The EOC request is rejected.
<b>Action</b>	Read the unprocessed UOWs first and issue function EOC afterwards.

<b>00200482</b>	<b>API: CONV-ID NONE not supported</b>
<b>Explanation</b>	Value NONE is not supported for the requested EntireX Broker function.
<b>Action</b>	Correct application.
<b>00200505</b>	<b>Illegal operation due to wrong UOW type</b>
<b>Explanation</b>	The specified UOWID does not contain a unit of work
<b>Action</b>	Correct the UOWID.
<b>00200532</b>	<b>API: Error code missing in REPLY-ERROR</b>
<b>Explanation</b>	Stub application did not provide a numeric value in the ERROR-CODE field in Broker control block while making a REPLY_ERROR function call.
<b>Action</b>	Send a valid numeric value in the ERROR-CODE field of the Broker control block.
<b>00200533</b>	<b>API: Invalid error code in REPLY-ERROR</b>
<b>Explanation</b>	Stub application provided an invalid error code in the Broker control block, while making REPLY_ERROR function call. User-defined error codes should not begin with number 8, and should contain only numeric values.
<b>Action</b>	Make sure that error code in the Broker control block does not start with '8' and contains only numerals.
<b>00200538</b>	<b>API: Specify locale to do CONVERSION</b>
<b>Explanation</b>	Receiving application did not provide its codepage information in LOCALE-STRING field of the Broker control block.
<b>Action</b>	Supply codepage information in the LOCALE-STRING field of the Broker control block. If you want the Broker to supply default codepage information, specify MAP=YES in CONVERSION attribute. See CONVERSION under <i>Service-specific Broker Attributes</i> .
<b>00200539</b>	<b>API: Sender did not specify locale info</b>
<b>Explanation</b>	Sender application did not provide codepage information in LOCALE-STRING field of the Broker control block.
<b>Action</b>	Supply codepage information in the LOCALE-STRING field of the Broker control block. If you want the Broker to supply default codepage information, specify MAP=YES in CONVERSION attribute. See CONVERSION under <i>Service-specific Broker Attributes</i> .

<b>00200540</b>	<b>API: :1: value truncated</b>
<b>Explanation</b>	The value for RETURN-LENGTH was truncated. This occurs if the value is greater than 99,999,999 and ACI version 8 or below is used.
<b>Action</b>	Upgrade to ACI version 9 or above.
<b>00200563</b>	<b>DEREGISTER not completed due to UOWs</b>
<b>Explanation</b>	There are still open units of work that have not been committed, cancelled, or backed out yet. The ACI function DEREGISTER was not completed successfully.
<b>Action</b>	Finish the open units of work first before calling DEREGISTER.
<b>00200566</b>	<b>API: Invalid value for COMPRESSION TYPE</b>
<b>Explanation</b>	The supplied value is invalid. Broker supports compression types GZIP and ZLIB.
<b>Action</b>	Correct the program to supply a valid value.
<b>00200573</b>	<b>API: Invalid EXTENSION-SEND-LENGTH</b>
<b>Explanation</b>	An invalid extension send length was specified.
<b>Action</b>	Enter a valid extension send length value.
<b>00200574</b>	<b>API: Invalid EXTENSION-RECEIVE-LENGTH</b>
<b>Explanation</b>	An invalid extension receive length was specified.
<b>Action</b>	Enter a valid extension receive length value.
<b>00200613</b>	<b>API: Filter already active</b>
<b>Explanation</b>	Command and Information Services were unable to add a command log filter as the specified filter was already active.
<b>Action</b>	Specify a filter that is not already active.
<b>00200614</b>	<b>API: Filter not found</b>
<b>Explanation</b>	Command and Information Services were unable to delete a command log filter as the specified filter did not exist.
<b>Action</b>	Specify a filter that does exist.

<b>00200639</b>	<b>API: Protected UOWID has been specified</b>
<b>Explanation</b>	An application has specified a protected unit of work ID in an API request. Protected unit of work IDs are 0000000000000000 and 0000000000000001.
<b>Action</b>	Specify a non-protected unit of work ID.
<b>00200781</b>	<b>&lt;sc/sn/sv&gt; already registered with CONVERSION=SAGTRPC</b>
<b>Explanation</b>	A mixture of ACI and RPC communication using the same broker service (CLASS, SERVER and SERVICE) was detected.
<b>Action</b>	Use either <i>RPC-based Components</i> or <i>ACI-based Programming</i> .
<b>00200782</b>	<b>&lt;sc/sn/sv&gt; already registered with CONVERSION=SAGTCHA.</b>
<b>Explanation</b>	A mixture of ACI and RPC communication using the same broker service (CLASS, SERVER and SERVICE) was detected.
<b>Action</b>	Use either <i>RPC-based Components</i> or <i>ACI-based Programming</i> .
<b>00200786</b>	<b>CONVERSION=SAGTRPC ignored. CONVERSION=SAGTCHA used.</b>
<b>Explanation</b>	An incorrect character conversion configuration for a broker service (CLASS, SERVER and SERVICE) was detected and corrected. The broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .
<b>00200787</b>	<b>CONVERSION=SAGTCHA ignored. CONVERSION=SAGTRPC used.</b>
<b>Explanation</b>	An incorrect character conversion configuration for a broker service (CLASS, SERVER and SERVICE) was detected and corrected. The broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .
<b>00200788</b>	<b>CONVERSION=NO,TRANSLATION=NO ignored. CONVERSION=SAGTRPC used.</b>
<b>Explanation</b>	An incorrect character conversion configuration for a broker service (CLASS, SERVER and SERVICE) was detected and corrected. The broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .

- 00200789**            **TRANSLATION=SAGTCHA ignored. CONVERSION=SAGTRPC used.**  
**Explanation**        An incorrect character conversion configuration for a broker service (CLASS, SERVER and SERVICE) was detected and corrected. The broker service is logged in the preceding message.  
**Action**                Correct the Broker attribute file. See *Broker's Mechanism for Choosing the Character Conversion Approach* under *Introduction to Internationalization*.
- 00200790**            **TRANSLATION=SAGTCHA ignored. CONVERSION=SAGTCHA used.**  
**Explanation**        An incorrect character conversion configuration for a broker service (CLASS, SERVER and SERVICE) was detected and corrected. The broker service is logged in the preceding message.  
**Action**                Correct the Broker attribute file. See *Broker's Mechanism for Choosing the Character Conversion Approach* under *Introduction to Internationalization*.
- 00200801**            **Unsecure shutdown broker not allowed**  
**Explanation**        The user is not authorized to shut down EntireX Broker.  
**Action**                A security violation has occurred. This message and the related user ID are written to the Broker log.
- 00200816**            **API: Invalid Data Collector Call**  
**Explanation**        The stub was unable to issue the send request to the data collector.  
**Action**                Rerun the application with stub log and check the messages when this error is raised. If the cause cannot be determined, contact Software AG Support.
- 00200901**            **User did not request SINGLE-CONV-MODE**  
**Explanation**        A mismatch was detected between settings of service and user regarding the mode chosen to send or receive ARF data. The single conversation mode (one conversation per service) has to be requested by the user before sending or receiving ARF data. It is not possible to change the mode if there are still conversations active that have been created with the old mode.  
**Action**                ARF can be configured to use or not to use the ETBSCONV feature (single conversation mode). We strongly recommend using this feature, but it requires a service without any conversations created with the old mode. If the ETBSCONV feature was specified and conversations still exist, these conversations have to be consumed before you change to single conversation mode.

<b>00200906</b>	<b>Value starts with an invalid character</b>
<b>Explanation</b>	A blank has been detected as the first character of SERVER-CLASS, SERVER-NAME or SERVICE.
<b>Action</b>	Correct the value and retry.
<b>00200908</b>	<b>ARF SOURCE/TARGET Same USER- ID and TOKEN</b>
<b>Explanation</b>	This indicates a configuration problem with ARF. Adabas Event Replication provides parameters DETBUSERID and DETBTOKEN to define USER- ID/TOKEN of the source side and parameters IQETBUSERID and IQETBTOKEN to define USER- ID/TOKEN of the target side. The source side of the Adabas Event Replication is using the same USER-ID/TOKEN pair as the target side, but source and target side must use different and unique USER- ID/TOKEN pairs.
<b>Action</b>	Define different USER- ID/TOKEN pairs for the source and the target side of the Adabas Event Replication.
<b>00200911</b>	<b>ARF SEND Mismatching USER- ID and TOKEN</b>
<b>Explanation</b>	This indicates a configuration problem with ARF. Adabas Event Replication provides parameters DETBUSERID and DETBTOKEN to define USER- ID/TOKEN of the source side. This source side of the Replication is using a new USER- ID/TOKEN pair now but this is not allowed as long as an active conversation exists.
<b>Action</b>	Revert the configuration to the previously defined values of USER- ID/TOKEN.
<b>00200912</b>	<b>ARF RECV Mismatching USER- ID and TOKEN</b>
<b>Explanation</b>	This indicates a configuration problem with ARF. Adabas Event Replication provides parameters IQETBUSERID and IQETBTOKEN to define USER- ID/TOKEN of the target side. This target side of the Replication is using a new USER- ID/TOKEN pair now but this is not allowed as long as an active conversation exists.
<b>Action</b>	Revert the configuration to the previously defined values of USER- ID/TOKEN.
<b>00200924</b>	<b>STUB: TCB mode required</b>
<b>Explanation</b>	The stub is running in SRB mode but needs to execute functionality that requires TCB mode.
<b>Action</b>	Contact Software AG Support.

<b>00200941</b>	<b>STUB: TCP/IP not permitted</b>
<b>Explanation</b>	The stub does not support the requested TCP/IP transport.
<b>Action</b>	Change transport type to NET.
<b>00209400</b>	<b>FUNCTION NOT SUPPORTED</b>
<b>Explanation</b>	An unsupported function (UNDO or DELETE) has been issued.
<b>Action</b>	Check the program and correct the error.
<b>00209401</b>	<b>CONV-ID VALUE NOT SUPPORTED</b>
<b>Explanation</b>	An unsupported value has been specified for the CONV - ID field.
<b>Action</b>	This is a user error. Check the program and correct the error.
<b>00209402</b>	<b>WAIT VALUE NOT SUPPORTED</b>
<b>Explanation</b>	An unsupported value has been specified for the WAIT operand.
<b>Action</b>	This is a user error. Check the program and correct the error.
<b>00209403</b>	<b>OPTION NOT SUPPORTED</b>
<b>Explanation</b>	An unsupported value has been specified for the OPTION field.
<b>Action</b>	This is a user error. Check the program and correct the error.
<b>00209404</b>	<b>:1: - ADAPTER ERROR</b>
<b>Explanation</b>	An error has occurred in the EntireX Broker Services protocol adapter. Depending on the protocol in use, it may be an SNA sense code or an MQM reason code.
<b>Action</b>	Obtain the error code from the first 8 bytes of the error message (:1:) or the ADAPTER - ERROR field. Then refer to the appropriate SNA or MQM documentation to determine the actual error.
<b>00209405</b>	<b>INVALID BROKER API REQUEST</b>
<b>Explanation</b>	An unsupported value has been specified for CLASS or SERVICE, e.g., APPC is not specified for CLASS.
<b>Action</b>	This is a user error. Check the program and correct the error.
<b>Action</b>	No action is required.

<b>00209406</b>	<b>CONV-ID REQUIRED FOR DEREGISTER</b>
<b>Explanation</b>	No CONV - ID, or an incorrect CONV - ID, was specified for the DEREGISTER function.
<b>Action</b>	This is a user error. Check the program and correct the error.
<b>00209407</b>	<b>INVALID REMOTE ATTACH FUNCTION</b>
<b>Explanation</b>	OPTION=ATTACH was specified for a function that is not a REGISTER, DEREGISTER, or RECEIVE function.
<b>Action</b>	Check the program and correct the error.
<b>00209410</b>	<b>NO ATTACH REQUESTS AVAILABLE</b>
<b>Explanation</b>	A Remote Attach Manager program has issued a non-blocked RECEIVE request with WAIT=NO, but there are no pending attach requests.
<b>Action</b>	This is an informational message.
<b>00209413</b>	<b>CONV-ID REQUIRED FOR RECEIVE</b>
<b>Explanation</b>	An ACI RECEIVE request has been issued without a valid CONV - ID value. All ACI RECEIVE requests must specify a CONV - ID value.
<b>Action</b>	Check the program and correct the error.
<b>00209416</b>	<b>MODELQ REQUIRES SPECIFIC CONV-ID=</b>
<b>Explanation</b>	An ACI RECEIVE request has been issued by a client program that specified CONVID=OLD or ANY while an MQI MODEL queue was in use.
<b>Action</b>	Change the program to use a specific, existing CONVID, or remove the REPLYTOQ specification from the directory entry.
<b>00209417</b>	<b>INVALID MSGTYPE=, WAIT= COMBINATION</b>
<b>Explanation</b>	A SEND request has been issued with an invalid combination of MSGTYPE=, WAIT= and CONFIRMATION operands. For example, specifying WAIT=YES when sending a DATAGRAM or a REPLY type message is invalid.
<b>Action</b>	Correct the program logic.
<b>00209418</b>	<b>SERVER CANNOT ISSUE SEND CONVID=NONE</b>
<b>Explanation</b>	A server program attempted to issue a SEND request with CONVID=NONE, which is not allowed. Server programs must use a specific CONVID when issuing a SEND.
<b>Action</b>	Correct the program logic.

- 00209419**                    **INVALID MESSAGE TYPE FOR SERVER SEND**
- Explanation**            A server program attempted to issue a SEND request with MSGTYPE=DATAGRAM or REQUEST, which is not allowed. Server programs are allowed to issue SEND MSGTYPE=REPLY only.
- Action**                    Correct the program logic.
- 
- 00209420**                    **INVALID MESSAGE TYPE FOR CLIENT SEND**
- Explanation**            A client program attempted to issue a SEND request with MSGTYPE=REPLY, which is not allowed. Client programs are allowed to issue SEND MSGTYPE=REQUEST or DATAGRAM only.
- Action**                    Correct the program logic.
- 
- 00209421**                    **OPT=SYNC INVALID WITH SEND WAIT=**
- Explanation**            A request was issued with OPTION=SYNC and WAIT=YES. It is not possible to issue a "blocking" request (WAIT=YES) within a unit of work.
- Action**                    Correct the program logic.
- 
- 00209422**                    **SYNCPOINT REQUIRES OPTION=COMMIT/BACKOUT**
- Explanation**            A SYNCPOINT request was issued without a valid OPTION= specification. Either OPTION=COMMIT or OPTION=BACKOUT must be specified with the SYNCPOINT function.
- Action**                    Correct the program logic.
- 
- 00209423**                    **MSGID REQUIRED WITH CONVID=ANY/NEW/NONE**
- Explanation**            A client program must use a specific MSGID when issuing a RECEIVE request with CONVID=ANY, NEW, or NONE.
- Action**                    Correct the program logic.
- 
- 00209424**                    **UNIT FIELD OF WORK NOT SUPPORTED**
- Explanation**            An ACI request was received that has specified a value for one of the unit-of-work fields.
- Action**                    Programmer: Ensure no unit-of-work fields have been specified in the ACI request. If API Version=3 has been specified in the Broker control block (ETBCDEF.H), ensure that the unit-of-work fields have all been cleared.

<b>00209450</b>	<b>INTERNAL ERROR - GETMAIN FAILED</b>
<b>Explanation</b>	An internal buffer shortage has occurred that prevents the function from executing.
<b>Action</b>	Review the JES JOBLOG and external trace for error messages that might give additional information on the problem.
<b>00209451</b>	<b>RECEIVE FAILED - tpname NOT REGISTERED</b>
<b>Explanation</b>	A Remote Attach Manager has issued a RECEIVE request for a TP that is not currently REGISTERED to its SERVICE- ID.
<b>Action</b>	Modify the Remote Attach Manager program to REGISTER this <i>tpname</i> .
<b>00209452</b>	<b>REGISTER REJECTED - function ACTIVE</b>
<b>Explanation</b>	A Remote Attach Manager has issued a REGISTER request for a TPNAME that already issued a REGISTER.
<b>Action</b>	A TPNAME must be unique and can be registered under one and only one SERVICE- ID.
<b>00209453</b>	<b>UNKNOWN FUNCTION REQUESTED function</b>
<b>Explanation</b>	A request was received using the ATTACH-MANAGER DDM, but the request was not a REGISTER, RECEIVE, or DEREGISTER.
<b>Action</b>	Correct the Remote Attach Manager program and retry. The external trace may contain additional information for debugging.
<b>00209454</b>	<b>ENTIREX BROKER SERVICES TERMINATED BY OPERATOR</b>
<b>Explanation</b>	EntireX Broker Services have been shut down by the computer operator.
<b>Action</b>	No action required; normal processing continues.
<b>00209455</b>	<b>function REJECTED, MISSING value</b>
<b>Explanation</b>	A Remote Attach Manager has issued a verb that is invalid.
<b>Action</b>	The message text will contain the function and missing value. Correct the request and retry.
<b>00209456</b>	<b>tpname NOT DEFINED VIA CONTROL OPERATOR</b>
<b>Explanation</b>	A REGISTER request from a Remote Attach Manager is being rejected because of conflicts with Control Operator Interface definitions (RESTRICT-PARTNERS=PROFILE has been specified).
<b>Action</b>	Add the TPNAME in the message to the appropriate local LU definitions and retry the Remote Attach Manager program.

00209457

**servername STOPPED BY OPERATOR COMMAND**

**Explanation**

An Attach Manager `RECEIVE` was issued, but the specified `servername` has been stopped by an operator command. The message contains the actual server name.

**Action**

The Remote Attach Manager Dispatcher program may be restarted after using the `RESUME, D6 servername` operator command to reactivate the `servername`.

# 13

## Message Class 0021 - EntireX ACI - Configuration Error in the Attribute File

---

This message class is given in case of invalid or missing information in the Broker attribute file. This is mostly a configuration error. The situation can be examined using the error number returned and after correction, the applications can be restarted. The messages have the format:

0021*nnnn*

where 0021 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

### 00210013

#### Value For Keyword Too Long

#### Explanation

The specified value for a correct keyword in a configuration file (for instance the Broker attribute file) has too many characters. This response arises in the following situations:

1. During broker startup when the global resources defined in the section DEFAULTS=BROKER are read, a wrong value length is detected within this section. The Broker cannot be started.
2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, a wrong value length is detected within this service definition. The service cannot be registered.

#### Action

Correct the value assigned to the keyword in the configuration file.

<b>00210014</b>	<b>Class def missing or invalid</b>
<b>Explanation</b>	The definition of a server class is either missing or invalid.
<b>Action</b>	Either specify a class definition or use the correct values to specify one.
<b>00210015</b>	<b>Max Possible NUM-CLIENT Reached</b>
<b>Explanation</b>	This is a temporary resource shortage. The maximum number of EntireX Broker clients that can be active at one time is reached. A new client cannot be handled until client resources are available again by user timeouts.
<b>Action</b>	Increase NUM-CLIENT (or if CLIENT-NONACT has too high a value, decrease it) in the Broker attribute file.
<b>00210016</b>	<b>Signed number as value not supported</b>
<b>Explanation</b>	Value in attribute file with leading '-' or '+' character. This syntax is not supported.
<b>Action</b>	Enter a correct value.
<b>00210017</b>	<b>Value is not an integral number</b>
<b>Explanation</b>	Wrong numeric value in attribute file detected. Value contains comma or decimal point.
<b>Action</b>	Enter a correct value.
<b>00210018</b>	<b>Max Possible NUM-SERVER Reached</b>
<b>Explanation</b>	This is a temporary resource shortage. The maximum number of EntireX Broker servers that can be active at one time is reached. New servers are not accepted until server resources are available again, either by deregistrations or user timeouts.
<b>Action</b>	Try to register the server to EntireX Broker later. If the error occurs frequently, increase NUM-SERVER (or if SERVER-NONACT has too high a value for some services, decrease it) in the Broker attribute file.
<b>00210023</b>	<b>Unknown Keyword</b>
<b>Explanation</b>	A given keyword in the attribute file is not known by the Broker. This response arises in the following situations:  <ol style="list-style-type: none"><li>1. During Broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, a wrong keyword is detected within this section. The Broker cannot be started.</li><li>2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, a wrong keyword is detected within this service definition. The service cannot be registered.</li></ol>
<b>Action</b>	Correct or remove the keyword in the configuration file as appropriate.

<b>00210024</b>	<b>CONV-LIMIT may not be UNLIM</b>
<b>Explanation</b>	The service-specific CONV - LIMIT value is specified with UNLIM. In this special configuration, this is not allowed because the global NUM - CONVERSATION attribute is set to AUTO. See also <i>Broker Resource Allocation</i> .
<b>Action</b>	Either change the global NUM - CONVERSATION parameter to a defined value, or change the specific CONV - LIMIT value to a particular value.
<b>00210025</b>	<b>CONV-DEFAULT not spec or UNLIM</b>
<b>Explanation</b>	The global CONV_DEFAULT attribute is either specified as UNLIMIT or not specified at all. The error occurs in situations where EntireX Broker cannot calculate the number of conversations needed. This situation occurs if <ul style="list-style-type: none"> <li>■ NUM - CONVERSATION= AUTO and CONV - DEFAULT= UNLIM and there is at least one service that does not assign CONV - LIMIT, or</li> <li>■ NUM - CONVERSATION= AUTO and CONV - DEFAULT is undefined and there is at least one service that does not assign CONV - LIMIT.</li> </ul>
<b>Action</b>	Correct the error in the attribute file. Define NUM - CONVERSATION with a particular value or define CONV - DEFAULT with a particular value or use the CONV - LIMIT attribute for every single service definition.
<b>00210026</b>	<b>Zero Value For Keyword Not Allowed</b>
<b>Explanation</b>	The specified value for a correct keyword a configuration file (for instance the Broker attribute file) must not be zero or null value. This response arises in the following situations: <ol style="list-style-type: none"> <li>1. During broker startup, when the global resources defined in the section DEFAULTS= BROKER are read, a value of zero or null is detected for a value within this section. The Broker cannot be started.</li> <li>2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS= SERVICE section is read, a value of zero or null is detected within this service definition. The service cannot be registered.</li> </ol>
<b>Action</b>	Correct the value assigned to the keyword in the configuration file.
<b>00210027</b>	<b>Value For Keyword Out Of Range</b>
<b>Explanation</b>	The specified value for a correct keyword in a configuration file (for instance the Broker attribute file) is out of range. This response arises in the following situations: <ol style="list-style-type: none"> <li>1. During broker startup when the global resources defined in the section DEFAULTS= BROKER are read, the wrong value is detected for a value within this section. The Broker cannot be started.</li> </ol>

2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, a wrong value is detected within this service definition. The service cannot be registered.

**Action** Correct the value assigned to the keyword in the configuration file.

**00210028 Invalid Value For Keyword**

**Explanation** The specified value for a correct keyword in a configuration file (for instance the Broker attribute file) is wrong. This response arises in the following situations:

1. During broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, a wrong value is detected for a value within this section. The Broker cannot be started.
2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, a wrong value is detected within this service definition. The service cannot be registered.

**Action** Correct the value assigned to the keyword in the configuration file.

**00210029 SHORT-BUFF-LIMIT may not be UNLIM**

**Explanation** The service-specific SHORT - BUFF - LIMIT value is specified with UNLIM. In this special configuration this is not allowed because the global NUM - SHORT - BUFFER attribute is set to AUTO. See also *Broker Resource Allocation* in the platform-independent Administration documentation.

**Action** Either change the global NUM - SHORT - BUFFER parameter to a defined value, or change the specific SHORT - BUFF - LIMIT value to a particular value.

**00210030 SHORT-BUFF-DEF not spec or UNLIM**

**Explanation** The global SHORT - BUFF - DEF attribute is either specified as UNLIMIT or not specified at all. The error occurs in situation where EntireX Broker cannot calculate the number of short buffers needed. This situation occurs if:

- NUM - SHORT - BUFFER= AUTO and NUM - SHORT - DEF= UNLIM and there is at least one service that does not assign SHORT - BUFF - LIMIT, or
- NUM - SHORT - BUFFER= AUTO and NUM - SHORT - DEF is undefined and there is at least one service that does not assign SHORT - BUFF - LIMIT.

**Action** Correct the error in the attribute file. Define NUM - SHORT - BUFFER with a particular value or define NUM - SHORT - DEF with a particular value or use the SHORT - BUFF - LIMIT attribute for every single service definition.

<b>00210032</b>	<b>LONG-BUFF-LIMIT may not be UNLIM</b>
<b>Explanation</b>	The service-specific LONG-BUFF-LIMIT value is specified with UNLIM. In this special configuration, this is not allowed because the global NUM-LONG-BUFFER attribute is set to AUTO.
<b>Action</b>	Either change the global NUM-LONG-BUFFER parameter to a defined value, or change the specific SHORT-LONG-LIMIT value to a particular value.
<b>00210033</b>	<b>LONG-BUFF-DEF not spec or UNLIM</b>
<b>Explanation</b>	The global LONG-BUFF-DEF attribute is either specified as UNLIM or not specified at all. The error occurs in situation where EntireX Broker cannot calculate the number of long buffers needed. This situation occurs if: <ul style="list-style-type: none"> <li>■ NUM-LONG-BUFFER=AUTO and NUM-LONG-DEF=UNLIM and there is at least one service that does not assign LONG-BUFF-LIMIT, or</li> <li>■ NUM-LONG-BUFFER=AUTO and NUM-LONG-DEF is undefined and there is at least one service that does not assign LONG-BUFF-LIMIT</li> </ul>
<b>Action</b>	Correct the error in the attribute file. Define NUM-LONG-BUFFER with a particular value or define NUM-LONG-DEF with a particular value or use the LONG-BUFF-LIMIT attribute for every single service definition.
<b>00210034</b>	<b>SERVICE Section missing</b>
<b>Explanation</b>	The DEFAULTS=SERVICE section in the attribute file could not be found.
<b>Action</b>	Correct the attribute file and provide a valid DEFAULTS=SERVICE section. See <i>Service-specific Attributes</i> .
<b>00210035</b>	<b>Duplicate Value Found</b>
<b>Explanation</b>	A duplicate keyword has been detected in a configuration file (for example the broker attribute file). This response arises in the following situations: <ol style="list-style-type: none"> <li>1. During broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, duplicate keywords are detected within this section. The broker cannot be started.</li> <li>2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, duplicate keywords are detected within this service definition. The REGISTER request is refused.</li> </ol>
<b>Action</b>	Eliminate the duplicate keyword in the broker attribute file.

**00210036            Unknown service attribute**

**Explanation**        An unknown attribute definition was found. Please refer to the entry in a configuration file (for instance the Broker attribute file) in order to find the line and the column where this error occurred.

**Action**              Correct the broker attribute file and provide valid attribute definitions. See *Service-specific Attributes*.

**00210037            Value must be YES or NO**

**Explanation**        The valid values for this attribute are YES or NO only. Refer to the entry in the log file to find the line and the column where the error happened.

**Action**              Correct the attribute file and select either YES or NO for the attribute where the error happened

**00210038            Error During Open Of File**

**Explanation**        A configuration file (for instance the Broker attribute file) cannot be accessed. This response arises in the following situations:

1. During broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, the Broker cannot be started.
2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, this service cannot be used.

**Action**              Contact administrator or check for the following causes:

1. No configuration file is allocated to the Broker.
2. The specified configuration file does not exist.
3. EntireX Broker has no access to the configuration file, for example for security reasons, or the configuration file is enqueued by another process.
4. The configuration file has an invalid format for the platform used. Refer to the appropriate Installation documentation.

**00210040            Error During Close Of File**

**Explanation**        A configuration file (for instance the Broker attribute file) cannot be accessed. This response arises in the following situations:

1. During broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, the Broker cannot be started.
2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, this service cannot be used.

<b>Action</b>	Check all causes listed under error 0038, and then the following: Ensure that no other process has changed the file characteristics of the configuration file.
<b>00210043</b>	<b>Service Definition Not Found</b>
<b>Explanation</b>	EntireX Broker did not find the service definition within the attribute file when a service attempted to register.
<b>Action</b>	Check the service specified in the <code>CLASS</code> , <code>SERVER</code> and <code>SERVICE</code> fields in the API, or make sure the service definition in the Broker attribute file is valid.
<b>00210045</b>	<b>Value for %s must be numeric</b>
<b>Explanation</b>	The specified value for this keyword in the Broker attribute file is wrong, that is, not numeric. This response arises in the following situations:  <ol style="list-style-type: none"><li>1. During broker startup, when the global resources defined in the section <code>DEFAULTS=BROKER</code> are read, a wrong value is detected for a value within this section. The Broker cannot be started.</li><li>2. When a server tries to register with EntireX Broker and the service definition from the <code>DEFAULTS=SERVICE</code> section is read, a wrong value is detected within this service definition. The service cannot be registered.</li></ol>
<b>Action</b>	Correct the value assigned to the keyword in the Broker attribute file.
<b>00210059</b>	<b>Maximum of 16 rules exceeded</b>
<b>Explanation</b>	More than 16 occurrences of this attribute were detected.
<b>Action</b>	Reduce number of occurrences to 16.
<b>00210080</b>	<b>Invalid port number</b>
<b>Explanation</b>	The specified port is not a numeric or outside of range 1-65535.
<b>Action</b>	Enter a valid port number.
<b>00210096</b>	<b>Max Possible NUM-SERVICE Reached</b>
<b>Explanation</b>	The maximum number of EntireX Broker services that can be active at one time is reached. A subsequent service register request is not accepted.
<b>Action</b>	Try again later. If this error occurs frequently, increase the <code>NUM-SERVICE</code> attribute in the section <code>DEFAULTS=BROKER</code> in the Broker attribute file.

<b>00210269</b>	<b>PSTORE required</b>
<b>Explanation</b>	An EntireX Broker call involving PSTORE is requested but EntireX Broker runs with setting PSTORE=NO. Any PSTORE operation is prohibited.
<b>Action</b>	Contact your Broker Administrator.
<b>00210368</b>	<b>No host:port value specified</b>
<b>Explanation</b>	The value for the COLLECTOR-BROKER-ID value was not correctly specified.
<b>Action</b>	Enter correct value host:port for COLLECTOR-BROKER-ID. See COLLECTOR-BROKER-ID under <i>Application Monitoring-specific Broker Attributes</i> .
<b>00210402</b>	<b>SECURITY/ENCRYPTION-LEVEL mismatch</b>
<b>Explanation</b>	A mismatch in the Broker attribute file has been detected: If an ENCRYPTION-LEVEL is specified, then SECURITY must be set to YES.
<b>Action</b>	Verify that the security exit is present and set SECURITY=YES to enable ENCRYPTION-LEVEL processing.
	<b>Note:</b>
	<ol style="list-style-type: none"><li>1. The Broker attribute setting SECURITY=NO cannot be used with any encryption level not equal to 0 (= zero); otherwise the 00210402 error condition will occur when application issues registration command.</li><li>2. For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.</li></ol>
<b>00210423</b>	<b>AUTO/Catch-All Service mismatch</b>
<b>Explanation</b>	A mismatch in the broker attribute file has been detected: if the catch-all service has been defined (CLASS= *, SERVER= *, SERVICE = *) then the value of AUTO is not allowed for the NUM-CONVERSATION, NUM-LONG-BUFFER or NUM-SHORT-BUFFER attributes.
<b>Action</b>	If the catch-all service is defined, make sure the attributes NUM-CONVERSATION, NUM-LONG-BUFFER and NUM-SHORT-BUFFER all have specified values.
<b>00210431</b>	<b>Error during read of file</b>
<b>Explanation</b>	A configuration file (for instance the Broker attribute file) cannot be read.
<b>Action</b>	Make sure that the configuration file is readable and not corrupt.

<b>00210446</b>	<b>ATTR: SERVER-LIMIT may not be UNLIM</b>
<b>Explanation</b>	The service-specific <code>SERVER-LIMIT</code> value is specified with <code>UNLIM</code> . In this special configuration, this is not allowed because the global <code>NUM-SERVER</code> attribute is set to <code>AUTO</code> . See also <i>Broker Resource Allocation</i> .
<b>Action</b>	Either change the global <code>NUM-SERVER</code> parameter to a defined value, or change the specific <code>SERVER-LIMIT</code> value to a particular value.
<b>00210447</b>	<b>ATTR: SERVER-DEFAULT not spec or UNLIM</b>
<b>Explanation</b>	The global <code>SERVER-DEFAULT</code> attribute is either specified as <code>UNLIM</code> or not specified at all. The error occurs in situations where EntireX Broker cannot calculate the number of servers needed. This situation occurs if <ul style="list-style-type: none"><li>■ <code>NUM-SERVER=AUTO</code> and <code>SERVER-DEFAULT=UNLIM</code> and there is at least one service that does not assign <code>SERVER-LIMIT</code>, or</li><li>■ <code>NUM-SERVER=AUTO</code> and <code>SERVER-DEFAULT</code> is undefined and there is at least one service that does not assign <code>SERVER-LIMIT</code>.</li></ul>
<b>Action</b>	Correct the error in the attribute file. Define <code>NUM-SERVER</code> with a particular value or define <code>SERVER-DEFAULT</code> with a particular value or use the <code>SERVER-LIMIT</code> attribute for every single service definition.
<b>00210501</b>	<b>TCP-PORT numbers not unique</b>
<b>Explanation</b>	You cannot specify the same <code>PORT</code> number twice for the same <code>HOST</code> .
<b>Action</b>	Specify a different <code>PORT</code> number.
<b>00210547</b>	<b>Max num AUTHORIZATION-RULE reached</b>
<b>Explanation</b>	The maximum number of <code>AUTHORIZATION-RULE</code> entries in the attribute file has been reached. The current maximum number is 16 authorization rules.
<b>Action</b>	Reduce the number of <code>AUTHORIZATION-RULE</code> entries.
<b>00210548</b>	<b>Max num HOST entries reached</b>
<b>Explanation</b>	You cannot specify more than five <code>HOST</code> entries per section.
<b>Action</b>	Reduce number of <code>HOST</code> entries.

<b>00210549</b>	<b>Max num PORT entries reached</b>
<b>Explanation</b>	You cannot specify more than five PORT entries per section.
<b>Action</b>	Reduce number of PORT entries.
<b>00210559</b>	<b>ATTR: TRANSPORT = NET and NUM-CCOM = 0</b>
<b>Explanation</b>	The minimum value NUM-CCOM=1 is required if you want to run the Entire Net-Work communicator on UNIX.
<b>Action</b>	Set NUM-CCOM=1, or higher.
<b>00210564</b>	<b>SSL-PORT numbers not unique</b>
<b>Explanation</b>	You cannot specify the same PORT number twice for the same HOST.
<b>Action</b>	Specify a different PORT number.
<b>00210568</b>	<b>Max num STACK-NAME entries reached</b>
<b>Explanation</b>	You cannot specify more than five STACK-NAME entries per section.
<b>Action</b>	Reduce number of STACK-NAME entries.
<b>00210591</b>	<b>DEFAULTS section missing</b>
<b>Explanation</b>	The broker attribute file is missing a DEFAULTS section. Additional error information will display the section name.
<b>Action</b>	Consult the additional error text and take appropriate action.
<b>00210594</b>	<b>ATTR: Variable not expanded</b>
<b>Explanation</b>	A variable in a configuration file (for instance the Broker attribute file) could not be expanded. Additional error information will display the variable name.
<b>Action</b>	Consult the additional error text and take appropriate action.
<b>00210622</b>	<b>Transport type not supported</b>
<b>Explanation</b>	Transport types SSL or TCP are supported for Broker attribute PARTNER-CLUSTER-ADDRESS.
<b>Action</b>	Adjust the PARTNER-CLUSTER-ADDRESS to use a supported transport type.

<b>00210628</b>	<b>Expect PSTORE=HOT in STANDBY mode</b>
<b>Explanation</b>	The Standby Broker instance must use PSTORE=HOT in order to perform a PSTORE takeover if necessary.
<b>Action</b>	Define PSTORE=HOT for your Standby Broker.
<b>00210629</b>	<b>Expect PSTORE=COLD in LOAD mode</b>
<b>Explanation</b>	The Load Broker (RUN-MODE=PSTORE-LOAD) must use PSTORE=COLD in order to create a new persistent store.
	<b>Note:</b> RUN-MODE options PSTORE-LOAD and PSTORE-UNLOAD are deprecated and will not be supported in the next version of EntireX.
<b>Action</b>	Define PSTORE=COLD for your Load Broker.
<b>00210630</b>	<b>Expect PSTORE=HOT in UNLOAD mode</b>
<b>Explanation</b>	The Unload Broker must use PSTORE=HOT in order to migrate a persistent store.
<b>Action</b>	Define PSTORE=HOT for your Unload Broker.
<b>00210652</b>	<b>Invalid keyword in TRANSLATION parms</b>
<b>Explanation</b>	The attribute TRANSLATION contains an invalid parameter.
<b>Action</b>	Correct the attribute file. See TRANSLATION under <i>Service-specific Broker Attributes</i> .
<b>00210703</b>	<b>Missing attribute TRUST-STORE</b>
<b>Explanation</b>	Attribute TRUST-STORE in the SSL section is missing.
<b>Action</b>	Define attribute TRUST-STORE. See TRUST-STORE under <i>SSL-specific Broker Attributes</i> .
<b>00210704</b>	<b>TRUST-STORE does not exist</b>
<b>Explanation</b>	The specified file for TRUST-STORE does not exist.
<b>Action</b>	Correct the file name. See TRUST-STORE under <i>SSL-specific Broker Attributes</i> .
<b>00210705</b>	<b>Missing attribute KEY-STORE</b>
<b>Explanation</b>	Attribute KEY-STORE in the SSL section is missing.
<b>Action</b>	Define attribute KEY-STORE. See KEY-STORE under <i>SSL-specific Broker Attributes</i> .

<b>00210706</b>	<b>KEY-STORE does not exist</b>
<b>Explanation</b>	The specified file for KEY - STORE does not exist.
<b>Action</b>	Correct the file name. See KEY - STORE under <i>SSL-specific Broker Attributes</i> .
<b>00210707</b>	<b>Missing attribute KEY-FILE</b>
<b>Explanation</b>	Attribute KEY - FILE in the SSL section is missing.
<b>Action</b>	Define attribute KEY - FILE. See KEY - FILE under <i>SSL-specific Broker Attributes</i> .
<b>00210708</b>	<b>KEY-FILE does not exist</b>
<b>Explanation</b>	The specified file for KEY - FILE does not exist.
<b>Action</b>	Correct the file name. See KEY - FILE under <i>SSL-specific Broker Attributes</i> .
<b>00210709</b>	<b>KEY-FILE specified but no KEY-PASSWD</b>
<b>Explanation</b>	No KEY - PASSWD has been specified.
<b>Action</b>	Define attribute KEY - PASSWD with the password used for the KEY - FILE.  <b>Note:</b> KEY - PASSWD is deprecated. We recommend using KEY - PASSWD - ENCRYPTED instead. See KEY - PASSWD - ENCRYPTED under <i>SSL-specific Broker Attributes</i> .
<b>00210710</b>	<b>VERIFY-CLIENT=YES but no TRUST-STORE</b>
<b>Explanation</b>	VERIFY - CLIENT = YES was specified but TRUST - STORE was not defined in the SSL section of the attribute file.
<b>Action</b>	Define attribute TRUST - STORE. See TRUST - STORE under <i>SSL-specific Broker Attributes</i> .
<b>00210713</b>	<b>Dynamic Worker Management not running</b>
<b>Explanation</b>	An operator command was issued to turn on/off the Dynamic Worker Management, but it was not enabled in the attribute file.
<b>Action</b>	Specify attribute DYNAMIC - WORKER - MANAGEMENT = YES and restart Broker. See DYNAMIC - WORKER - MANAGEMENT under <i>Broker-specific Broker Attributes</i> .
<b>00210714</b>	<b>Dynamic Worker Mgmt already enabled</b>
<b>Explanation</b>	An operator command was issued to turn on the Dynamic Worker Management but it was already enabled.
<b>Action</b>	None.

<b>00210715</b>	<b>Dynamic Worker Mgmt already disabled</b>
<b>Explanation</b>	An operator command was issued to turn off the Dynamic Worker Management but it was already disabled.
<b>Action</b>	None.
<b>00210722</b>	<b>DIV: STORE not specified</b>
<b>Explanation</b>	Attribute STORE in section DEFAULTS=DIV was not specified.
<b>Action</b>	Enter attribute STORE. See STORE under <i>DIV-specific Broker Attributes</i> .
<b>00210723</b>	<b>DIV: DDNAME not specified</b>
<b>Explanation</b>	Attribute DDNAME in section DEFAULTS=DIV was not specified.
<b>Action</b>	Enter attribute DDNAME and add the corresponding DD statement to the JCL of Broker. See DDNAME under <i>DIV-specific Broker Attributes</i> .
<b>00210727</b>	<b>c-tree PATH does not exist</b>
<b>Explanation</b>	The directory specified as value of PATH does not exist.
<b>Action</b>	Enter a valid directory. See PATH under <i>c-tree-specific Attributes</i> .
<b>00210740</b>	<b>PSTORE requires higher PSTORE-VERSION</b>
<b>Explanation</b>	The value of PSTORE-VERSION does not match the version of PSTORE.
<b>Action</b>	Change the value of PSTORE-VERSION to the effective version or rerun Broker with PSTORE=COLD. See PSTORE-VERSION and PSTORE-TYPE under <i>Broker-specific Broker Attributes</i> .
<b>00210741</b>	<b>PSTORE requires lower PSTORE-VERSION</b>
<b>Explanation</b>	The value of PSTORE-VERSION does not match the version of PSTORE.
<b>Action</b>	Change the value of PSTORE-VERSION to the effective version or rerun Broker with PSTORE=COLD. See PSTORE-VERSION and PSTORE-TYPE under <i>Broker-specific Broker Attributes</i> .
<b>00210760</b>	<b>PARTNER-CLUSTER-ADDRESS mismatch</b>
<b>Explanation</b>	The PARTNER-CLUSTER-ADDRESS defined in the Standard Broker does not match any of the TCP or SSL transport entries defined in the Standby Broker.
<b>Action</b>	Either adjust PARTNER-CLUSTER-ADDRESS in Standard Broker or start Standby Broker with a matching transport entry. See PARTNER-CLUSTER-ADDRESS under <i>Broker-specific Broker Attributes</i>

<b>00210761</b>	<b>PARTNER-CLUSTER-ADDRESS missing</b>
<b>Explanation</b>	There is no PARTNER-CLUSTER-ADDRESS definition in the Standard Broker.
<b>Action</b>	Define PARTNER-CLUSTER-ADDRESS in the Standard Broker to allow running a Standby Broker. See PARTNER-CLUSTER-ADDRESS under <i>Broker-specific Broker Attributes</i> .
<b>00210762</b>	<b>PSTORE-TYPE mismatch</b>
<b>Explanation</b>	The persistent store defined in Standard Broker and Standby Broker must be exactly the same.
<b>Action</b>	Adjust the attributes for PSTORE - TYPE and the PSTORE specific sections in each Broker attribute file so both Broker instances match. See PSTORE - TYPE under <i>Broker-specific Broker Attributes</i> .
<b>00210763</b>	<b>PSTORE-TYPE missing</b>
<b>Explanation</b>	There is no PSTORE defined in the partner Broker instance. See PSTORE - TYPE under <i>Broker-specific Broker Attributes</i> .
<b>Action</b>	Run the partner Broker with matching persistent store attributes.
<b>00210764</b>	<b>Same PSTORE for UNLOAD and LOAD</b>
<b>Explanation</b>	The persistent stores defined in Load Broker and Unload Broker must be different.
<b>Action</b>	Adjust the attributes for PSTORE - TYPE and the PSTORE specific sections for both Broker instances. Make sure the Load Broker is assigned to a new persistent store, and our Unload Broker is assigned to the persistent store you wish to unload.
<b>00210796</b>	<b>Adabas SVC number must be supplied</b>
<b>Explanation</b>	Attribute SVC was not specified in the DEFAULTS=ADABAS section. Adabas PSTORE cannot be reached.
<b>Action</b>	Specify <i>SVC=svc_number</i> used by the Adabas PSTORE database.
<b>00210797</b>	<b>ADABAS DBID and FNR must be supplied</b>
<b>Explanation</b>	Attributes DBID and FNR in section DEFAULTS=ADABAS are not supplied.
<b>Action</b>	Enter attributes DBID and FNR. See DBID and FNR under <i>Adabas-specific Broker Attributes</i> .

<b>00210798</b>	<b>Invalid BLKSIZE (range 126-20000 bytes)</b>
<b>Explanation</b>	The value of attribute BLKSIZE in section DEFAULTS=ADABAS is invalid.
<b>Action</b>	Enter valid value (range 126-20000 bytes) for attribute BLKSIZE. See BLKSIZE under <i>Adabas-specific Broker Attributes</i> .
<b>00210827</b>	<b>LDAP: Missing LDAP-AUTHORIZATION-URL</b>
<b>Explanation</b>	Security attributes SECURITY - SYSTEM=LDAP and SECURITY - LEVEL=AUTHORIZATION have been defined but no URL was specified to access the LDAP server.
<b>Action</b>	Enter attribute LDAP - AUTHORIZATION - URL. See LDAP - AUTHORIZATION - URL under <i>Security-specific Broker Attributes</i> .
<b>00210829</b>	<b>PSTORE: Max MU 191 exceeded</b>
<b>Explanation</b>	For PSTORE - TYPE=ADABAS and PSTORE - VERSION 4 or below: Limit of 191 multiple fields was exceeded.
<b>Action</b>	Allocate the Adabas PSTORE file with the delivered JCL member.
<b>00210832</b>	<b>PSTORE: Cannot load ADABAS link module</b>
<b>Explanation</b>	The Adabas PSTORE handler was unable to load the Adabas link routine.
<b>Action</b>	Assign the Adabas load library.
<b>00210834</b>	<b>PSTORE: MAXSCAN value exceeded</b>
<b>Explanation</b>	The value for Adabas PSTORE attribute MAXSCAN exceeded.
<b>Action</b>	Increase attribute MAXSCAN.
<b>00210835</b>	<b>PSTORE: Mismatching ADABAS FDT</b>
<b>Explanation</b>	The Adabas PSTORE handler detected a mismatch between required and effective field descriptor table (FDT).
<b>Action</b>	Recreate the Adabas PSTORE file.
<b>00210837</b>	<b>ACI-CONVERSION requires ICU</b>
<b>Explanation</b>	Attribute ACI - CONVERSION=YES requires attribute ICU - CONVERSION=YES.
<b>Action</b>	Correct the Broker attribute file. See ACI - CONVERSION and ICU - CONVERSION under <i>Broker-specific Broker Attributes</i> .

- 00210838**            **ACI-CONVERSION invalid CODEPAGE section**  
**Explanation**        Attribute ACI-CONVERSION=YES requires a section DEFAULTS=CODEPAGE.  
**Action**                Correct the Broker attribute file. See ACI-CONVERSION under *Broker-specific Broker Attributes* and DEFAULTS=CODEPAGE.
- 00210839**            **ACI-CONVERSION failed, using translation**  
**Explanation**        The conversion failed due to an error. The translation is used to convert the data.  
**Action**                Check the subsequent error messages and correct the error.
- 00210840**            **PSTORE-VERSION 4 or above required**  
**Explanation**        The DIV PSTORE requires PSTORE-VERSION 4 or above.  
**Action**                Allocate a DIV PSTORE with following attributes:  
  
                        PSTORE=COLD  
                        PSTORE-TYPE=DIV  
                        PSTORE-VERSION=5
- 00210843**            **PSTORE: No records. Restart HOT failed**  
**Explanation**        No records in Adabas PSTORE.  
**Action**                Define PSTORE=COLD instead of PSTORE=HOT if this is the correct Adabas database and file.
- 00210845**            **PSTORE: Wrong platform detected**  
**Explanation**        The platform ID in the master record is wrong. This is probably a wrong database or the PSTORE of a different Broker.  
**Action**                Check the DEFAULTS=ADABAS settings.
- 00210846**            **PSTORE: Mismatching BROKER-ID in PSTORE**  
**Explanation**        The BROKER-ID in the master record does not match the BROKER-ID. This is probably a wrong database or the PSTORE of a different Broker.  
**Action**                Check the DEFAULTS=ADABAS settings.
- 00210847**            **PSTORE: Invalid BLKSIZE**  
**Explanation**        Attribute BLKSIZE does not match the Adabas file BLKSIZE of the cold start.  
**Action**                Enter the correct BLKSIZE attribute value or rerun a cold start.

# 14 Message Class 0022 - EntireX ACI - Translation and Conversion Errors

---

This message class is given in case of errors in user exits, e.g. translation routines. The situation can be examined via the error number returned, and after correction, the applications can be re-started. The messages have the format:

0022*nnnn*

where 0022 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

**00220046            TRANS: User Error Returned By Routine**

**Explanation**        The translation routine for the service (specified in the service section of the Broker attribute file) has returned an error to EntireX Broker.

**Action**                Check for the translation routine in use. This is a user error if customer specific translation routines are in use. Contact Software AG Support if the translation routine delivered by Software AG is in use.

**00220075            TRANS: Failed To Load Routine**

**Explanation**        The user exit that performs translation services could not be loaded. The translation routine for the service is specified by the `TRANSLATION` parameter for the service in the attribute file. The routine is loaded during `RECEIVE` calls to the Broker.

**Action**                Check the log data set for further load failure messages. Possible causes for the failure are:

1. An incorrect name for the translation routine is specified.
2. The translation routine is linked incorrectly.
3. The translation routine does not reside in a library accessible by the Broker.

- 00220081**                    **TRANS: Return Len > User Receive-length**  
**Explanation**            The return length of the translated string set by the translation routine is greater than the receive length specified in the API by the receiver. Check the translation routine used. The return length given from the translation routine to EntireX Broker must not be set to a value greater than the receive length of the receiver. Check the program and correct the error.  
**Action**                    Contact the person who is responsible for the translation routine.
- 00220085**                    **TRANS: Return Length < 0**  
**Explanation**            The return length of the translated string set by the translation routine is less than zero. Check the translation routine used. The return length given from the translation routine to EntireX Broker must not be less than zero. Check the program and correct the error.  
**Action**                    Contact the person who is responsible for the translation routine.
- 00220223**                    **Error from CONVERSION Routine**  
**Explanation**            This message is written to the application if the user translation routine has an error.  
**Action**                    This is a user error. Check the program and correct the error.
- 00220437**                    **Some chars inconvertible to target CP**  
**Explanation**            Some characters in the sender's message do not exist in the receiver's encoding. Check locale information of the sender of the message.  
**Action**                    Contact Software AG Support and provide locale information of sender and receiver.
- 00220438**                    **Chars to convert undefined in source CP**  
**Explanation**            Some of the characters to be converted are not defined in the source codepage. The data that the participant is sending and the conversion codepage do not correspond.  
**Action**                    Correct the data being sent.
- 00220531**                    **Converter Obj may be missing in ICUDATA**  
**Explanation**            The converter name cannot be recognized.  
**Action**                    Ensure that the ICU data library (libicudataexx.so on UNIX, icudt32.dll on Windows or IXMI32DA on z/OS) is loadable or contact Software AG Support.

# 15

## Message Class 0036 - EntireX ACI - Broker Busy

---

This message class occurs when EntireX Broker is busy and the operation demanded from the Broker is temporarily unavailable. However, no conversations are lost. The operation can be retried. The messages have the format:

0036*nnnn*

where 0036 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>00360329</b>	<b>Cannot Generate New ID</b>
<b>Explanation</b>	The Broker kernel cannot generate a proper physical ID.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360363</b>	<b>Unable to get lock for SAT creation</b>
<b>Explanation</b>	The service attribute table must be locked to create a new entry. The task did not succeed in getting this lock. Since this is a very short time window, it is unlikely to get the error response.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360381</b>	<b>Unable to get lock for PCB creation</b>
<b>Explanation</b>	The Broker is busy and the internal resources needed to satisfy the call are currently not available (due to concurrent attempts to serialize the process of creating a user, a block occurs and the user cannot get logged on).
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.

<b>00360476</b>	<b>Cannot generate new CONVID</b>
<b>Explanation</b>	The Broker kernel cannot generate a proper conversation ID.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360477</b>	<b>Cannot generate new UOWID</b>
<b>Explanation</b>	The Broker kernel cannot generate a proper unit of work ID.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360880</b>	<b>Failed to get BCT lock</b>
<b>Explanation</b>	The Broker Control Table cannot be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360881</b>	<b>Failed to get CCB lock</b>
<b>Explanation</b>	Conversation Control Block cannot be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360882</b>	<b>Failed to get CCB pair lock</b>
<b>Explanation</b>	Conversation Control Block cannot be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360883</b>	<b>Failed to get CMDLOG CONTROL lock</b>
<b>Explanation</b>	This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360884</b>	<b>Failed to get PCB lock</b>
<b>Explanation</b>	Participant (user) Control Block could not be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.

<b>00360885</b>	<b>Failed to get SCB lock</b>
<b>Explanation</b>	Service Control Block could not be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360887</b>	<b>Failed to get TFE lock</b>
<b>Explanation</b>	Trace Filter Entry could not be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360888</b>	<b>Failed to get TOQ lock</b>
<b>Explanation</b>	Timeout Queue Entry could not be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360889</b>	<b>Failed to get UOW lock</b>
<b>Explanation</b>	Unit of Work could not be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360890</b>	<b>Failed to get WQE lock</b>
<b>Explanation</b>	Work Queue Element could not be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00360891</b>	<b>Failed to get XPE lock</b>
<b>Explanation</b>	Expel entry (in participant blacklist) could not be locked. This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.

# 16 Message Class 0037 - EntireX ACI - Broker Resource

## Shortage

---

This message class is returned when resources to satisfy the EntireX Broker operation are temporarily unavailable. The resource for which the shortage occurred must be determined by examining the error number returned. This situation is also reported in the Broker's log data set. However, no conversations are lost. On the client side, after a reasonable time, the Broker function can be retried. Ensure that no loop has been programmed. The messages have the format:

0037*nnnn*

where 0037 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

**00370041 CONV-LIMIT for service reached**

**Explanation** All resources reserved for that particular service are already in use. No additional resources can be assigned.

**Action** Wait a while and try again - the resource shortage may have been resolved. If this happens frequently for a particular service, the assigned resources are not sufficient. Add additional resources (conversations) to this service.

**00370042 BUFFER-LIMIT for service reached**

**Explanation** All resources reserved for that particular service are already in use. No additional resources can be assigned.

**Action** Wait a while and try again - the resource shortage may have been resolved. If this happens frequently, for a particular service, the assigned resources are not sufficient. Add additional resources (short or long buffers) to this service.

- 00370057**            **ATTR: Shortage For NUM-SHORT-BUFFERS**
- Explanation**        This is a resource shortage. Currently, no short message containers are available. Short message containers are used for data/messages shorter than or equal to 2048 bytes.
- Action**                Because this is a temporary resource shortage, it makes sense to try the SEND call later in hope that the resource shortage is over. Be careful not to have a loop programmed in this situation. If this occurs frequently, increase the number of short message containers defined in the section DEFAULTS=BROKER with the keyword NUM-SHORT-BUFFER.
- 
- 00370061**            **ATTR: Shortage For NUM-LONG-BUFFER**
- Explanation**        This is a resource shortage. Currently, no long message containers are available. Long message containers are used for data/messages longer than 2048 bytes.
- Action**                Because this is a temporary resource shortage, it makes sense to try the SEND call later in hope that the resource shortage is over. Be careful not to have a loop programmed in this situation. If this occurs frequently, increase the number of long message containers defined in the section DEFAULTS=BROKER with the keyword NUM-LONG-BUFFER.
- 
- 00370099**            **No free timeout queue entry**
- Explanation**        EntireX Broker detected an error while searching for a free TOQ (Timeout Queue) entry. There is no TOQ entry for usage.
- Action**                Contact Software AG Support.
- 
- 00370108**            **No free postponed queue entry**
- Explanation**        The UOW delivery cannot be postponed. The number of free postponed queue entries is exhausted.
- Action**                Contact Software AG Support.
- 
- 00370165**            **Participant locked by Timeout manager**
- Explanation**        The timeout manager is currently using the participant control block to do a cleanup. Therefore, the resource is temporarily locked.
- Action**                Retry the call to EntireX Broker.
- 
- 00370197**            **Reconnect Rejected - User Busy**
- Explanation**        This situation occurs only when working with the TOKEN parameter in the API; that is, the user is identified by USER-ID/TOKEN instead of USER-ID/Internal ID. If the user changes the physical location between EntireX Broker calls (e.g. a new session from another terminal), and a call to EntireX Broker from the old session is in progress, the new session retrieves this response. The new session is not accepted.

<b>Action</b>	Retry the call to EntireX Broker later. To avoid confusion, however, do not have several concurrent sessions with the same <code>TOKEN</code> parameter in the API.
<b>00370230</b>	<b>Max NUM-CONVERSATION Reached</b>
<b>Explanation</b>	This is a temporary resource shortage. The maximum number of EntireX Broker conversations that can be active at any one time has been reached. New conversations will not be accepted until existing ones are ended by EOC calls or timeouts.
<b>Action</b>	Increase <code>NUM-CONVERSATION</code> in the Broker attribute file or check that the timeout settings for <code>CONV-NONACT</code> for the services are not too high.
<b>00370364</b>	<b>Participant Already Active</b>
<b>Explanation</b>	A request was issued while another request was already actively being processed for the same <code>USER-ID/TOKEN</code> combination.
<b>Action</b>	Ensure that there are not two or more active applications specifying the same <code>USER-ID/TOKEN</code> value.
<b>00370365</b>	<b>Service Currently Created</b>
<b>Explanation</b>	The attempt to create a service control block with the same identification at the same time is rejected. Since this is a very short time window, it is unlikely to get the error response.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>00370366</b>	<b>Participant Currently Created</b>
<b>Explanation</b>	The attempt to create a participant control block with the same identification at the same time is rejected. Since this is a very short time window, it is unlikely to get the error response.
<b>Action</b>	Ensure that there are not two or more active applications specifying the same <code>USER-ID/TOKEN</code> value.
<b>00370417</b>	<b>PSI: New publications are not allowed</b>
<b>Explanation</b>	This is a resource shortage. Currently, new publications are not allowed. This situation can occur when the Broker administrator has issued the CIS command <code>FORBID-NEWUOWMSGs</code> to disallow new UOW and publication messages or the Broker was started with the <code>NEW-UOW-MESSAGES=NO</code> .
<b>Action</b>	Since this is a resource shortage, it may be take some time before new publication messages are allowed again by the Broker administrator. Be careful not to have a loop programmed in this situation. Retry the call to EntireX Broker later after the Broker administrator has issued the command <code>ALLOW-NEWUOWMSGs</code> to allow new UOW and publication messages.

<b>00370445</b>	<b>PSI: New UOW messages are not allowed</b>
<b>Explanation</b>	This is a resource shortage. Currently, new UOW messages are not allowed. This situation can occur when the Broker administrator has issued the CIS command FORBID-NEWUOWMSGS to disallow new UOW messages or the Broker was started with attribute NEW-UOW-MESSAGES=NO. See FORBID-NEWUOWMSGS under <i>Broker CIS Data Structures</i> in the ACI Programming documentation and NEW-UOW-MESSAGES=NO under <i>Broker-specific Broker Attributes</i> .
<b>Action</b>	Since this is a resource shortage, it may take some time before new UOW messages are allowed again by the Broker administrator. Be careful not to have a loop programmed in this situation. Retry the call to EntireX Broker later after the Broker administrator has issued the CIS command ALLOW-NEWUOWMSGS to allow new UOW messages. See ALLOW-NEWUOWMSGS.
<b>00370448</b>	<b>SERVER-LIMIT for Service reached</b>
<b>Explanation</b>	All servers reserved for that particular service are already in use. No additional servers can be assigned.
<b>Action</b>	Wait a while and try again; the resource shortage may have been resolved. If this happens frequently for a particular service, the assigned resources are not sufficient. Add additional resources (servers) to this service.
<b>00370620</b>	<b>Heap overflow</b>
<b>Explanation</b>	The internal heap is exceeded.
<b>Action</b>	Increase the HEAP-SIZE and restart Broker.
<b>00370656</b>	<b>Dynamic pool management not enabled</b>
<b>Explanation</b>	Existing memory pool is full. Dynamic pool management is not enabled.
<b>Action</b>	Request is rejected due to insufficient resources.
<b>00370669</b>	<b>Allocation size is out of range</b>
<b>Explanation</b>	The number of slots for the memory pool exceeds the address space limit.
<b>Action</b>	Change the attribute value. Contact Software AG Support if you are not sure about the responsible attribute.
<b>00370670</b>	<b>Slot size is greater than entire pool</b>
<b>Explanation</b>	The requested slot size exceeds the total capacity of the memory pool. The request is rejected due to insufficient resources. This error usually occurs if a broker message exceeds the size of the long message buffer.

**Action** Define an appropriate size for the memory pool to handle such a large buffer. Make sure that  
 NUM-LONG is at least MAX-MESSAGE-LENGTH / 4096, and  
 NUM-COMBUF is at least MAX-MESSAGE-LENGTH / 16384.

**00370671 Requested allocation exceeds MAX-MEMORY**

**Explanation** The allocation of this pool will exceed MAX-MEMORY and is rejected.

**Action** Increase value of Broker-specific attribute MAX-MEMORY, or no action if maximum value was defined correctly. See MAX-MEMORY under *Broker-specific Broker Attributes*.

**00370833 PSTORE: Cannot allocate record buffer**

**Explanation** The Adabas PSTORE handler was unable to allocate heap storage for the Adabas record buffer. This is 31-bit heap storage on z/OS.

**Action** Change the runtime settings to increase the size of the runtime heap.

**00370836 PSTORE: Cannot perform COLD start**

**Explanation** The Adabas PSTORE handler cannot perform a COLD start.

**Action** Check the Broker log for additional information.

**00370849 PSTORE: Memory allocation failed**

**Explanation** Broker was unable to allocate heap storage for persistent store handler. This is 31-bit heap storage on z/OS.

**Action** Change the runtime settings to increase the size of the runtime heap.

**00370990 All %d sockets in socket pool in use**

**Explanation** The Broker request cannot be executed. All available TCP/IP connections are currently in use.

**Action** Wait until a connection is available again or reconfigure size and timeout of the socket pool with environment variables ETB\_POOLSIZ and ETB\_POOLTIMEOUT.

# 17

## Message Class 0074 - EntireX ACI - No request or Message Available

---

This message class is returned when no request or data/message is available for processing. However, no conversations are lost. It occurs only in `SEND` or `RECEIVE` operations in the following situations:

1. The `WAIT` time specified in the ACI has elapsed in blocked operations.
2. A non-blocked operation was issued and no request or data/message was available.

With clients in conversational mode, this response can be followed by a `RECEIVE` operation. We do not recommend retrying too often as the counterpart could be having problems, and so a loop is produced. When a new conversation is started with `SEND` and `CONV-ID=NEW` and this response is retrieved, the service requesting side (client) has a conversation, even if there is no server available. In this case, a `RECEIVE` or an `EOC` operation should follow. In non-conversational mode, the `SEND` operation can be retried, but ensure that no loop is programmed.

For servers retrieving this response is a normal situation when issuing a `RECEIVE` operation for incoming request/conversations. Usually the operation is retried, after reporting a “living message” in the server's log. We do not recommended waiting too long for a specific or old conversation, as the counterpart could be having problems, and servers should not be blocked too long by old conversations.

The messages have the format:

`0074nnnn`

where `0074` is the message class, and

`nnnn` is the message number in the range 0000 - 9999

**00740009            Conversation Found - No Message**

**Explanation**        The user polled for data/messages within an existing conversation (non-blocked RECEIVE with CONV - ID=*n*) and no data/message is available. However, the conversation still exists.

**Action**                This is an informational message. How the program continues depends on the application.

**00740074            Wait Timeout Occurred**

**Explanation**        The period specified by the WAIT field in the API has elapsed without any reply or request arriving to satisfy the Broker call. The conversation still exists and can continue.

**Action**                Check the following situations:

1. In a RECEIVE for servers, this is an information message when not waiting for a specific conversation. No request is available for processing. The RECEIVE is normally issued again.
2. When this occurs for a specific conversation, a RECEIVE can be issued to wait again for the data/message, or the conversation can be aborted with an EOC call.
3. When this occurs in a client in non-conversational mode, the call can be retried.
4. Check if the partner is working correctly.

**00740110            Postponed queue is empty**

**Explanation**        Broker cannot find the corresponding postpone queue entry for the UOW. The UOW status cannot be changed.

**Action**                Contact Software AG Support.

**00740114            Postponed UOW not found**

**Explanation**        Broker cannot find the corresponding UOW for the postpone queue entry. The UOW status cannot be changed.

**Action**                Contact Software AG Support.

**00740116            Postponed queue is not permitted**

**Explanation**        Any postpone queue is prohibited due to attribute POSTPONED - QUEUE=NO.

**Action**                Set attribute POSTPONED - QUEUE=YES. See POSTPONED - QUEUE under *Service-specific Broker Attributes* and also *Postponing Units of Work* under *Using Persistence and Units of Work* in the platform-independent Administration documentation.

<b>00740300</b>	<b>Conversation found no units of work</b>
<b>Explanation</b>	There is no unit of work available to be received in this conversation.
<b>Action</b>	This message is for diagnostic purposes only. Make sure that the sender sends and commits at least one unit of work in this conversation.
<b>00740301</b>	<b>Conversation found end of unit of work</b>
<b>Explanation</b>	The end of the unit of work was reached for this conversation prior to the last <code>RECEIVE</code> . Usually this means that an extra <code>RECEIVE</code> command was issued.
<b>Action</b>	This message is for diagnostic purposes only. Check ACI field <code>UOWSTATUS</code> to see if it indicates that the last <code>RECEIVE</code> for the UOW was processed. See <code>UOWSTATUS</code> under <i>Broker ACI Fields</i> .
<b>00740345</b>	<b>Service MAX-UOWS Reached</b>
<b>Explanation</b>	You are attempting to send a UOW to a service that already has queued to it the maximum number of UOWs allowed, as specified by the <code>MAX-UOWS</code> attribute.
<b>Action</b>	Increase the server's <code>MAX-UOWS</code> attribute or investigate why the server is not receiving and processing UOWs. If you increase the <code>MAX-UOWS</code> attribute, you may need to increase other attributes as well, for example <code>NUM-CONVERSATION</code> , <code>NUM-LONG-BUFFER</code> , <code>NUM-SHORT-BUFFER</code> .
<b>00740346</b>	<b>Service Does Not Support UOW</b>
<b>Explanation</b>	You are attempting to send a UOW to a service that does not accept UOWs, as indicated by <code>MAX-UOWS=0</code> in the server's attribute definition.
<b>Action</b>	If the server is to handle UOWs, set its <code>MAX-UOWS</code> attribute to an appropriate non-zero value.
<b>00740347</b>	<b>Max. Number of Messages per UOW Reached</b>
<b>Explanation</b>	You are attempting to send a UOW that contains more messages than are allowed by the <code>MAX-MESSAGES-IN-UOW</code> attribute.
<b>Action</b>	If you increase the <code>MAX-MESSAGES-IN-UOW</code> attribute, you may also need to increase other attributes as well, for example <code>NUM-LONG-BUFFER</code> or <code>NUM-SHORT-BUFFER</code> .
<b>00740399</b>	<b>Max messages per publication reached</b>
<b>Explanation</b>	You are attempting to send a publication that contains more messages than are allowed by the <code>MAX-MESSAGES-IN-PUBLICATION</code> attribute.
<b>Action</b>	If you increase the <code>MAX-MESSAGES-IN-PUBLICATION</code> attribute, you may also need to increase other attributes as well, for example <code>NUM-LONG-BUFFER</code> or <code>NUM-SHORT-BUFFER</code> .

- 00740480**            **Publication found: end of data**  
**Explanation**        All messages for the current publication have been received: there is no more data  
**Action**                Ensure messages belonging to publication have been processed and issue  
                              CONTROL\_PUBLICATION command, OPTION=COMMIT.
- 00740481**            **Publication found: no data**  
**Explanation**        The user polled for data/messages within an existing publication (non-blocked  
                              RECEIVE with PUBLICATION-ID=*n*) and no data/message is available. However, the  
                              publication still exists.  
**Action**                This is an informational message. How the program continues depends on the  
                              application.
- 00749460**            **POSITIVE CONFIRMATION RECEIVED**  
**Explanation**        CONFIRMATION=COA or COD was specified in the Directory Entry for this server, and  
                              a positive confirmation to a previous SEND has been received.
- 00749461**            **EXPIRATION REPORT RECEIVED**  
**Explanation**        EXPIRATION= specified in the Directory Entry for this server, and a message was sent,  
                              but has expired before being delivered to the server.

# 18

## Message Class 0078 - EntireX ACI - Error from Broker

---

This message class is returned when EntireX Broker detects an error situation. The situation should be examined using the error number returned and after correction, the applications can be restarted. The messages have the format:

0078*nnnn*

where 0078 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>00780008</b>	<b>No Related Text For Error Number</b>
<b>Explanation</b>	EntireX Broker has tried to return an error number that it cannot find in the table of known messages.
<b>Action</b>	Contact Software AG Support.
<b>00780055</b>	<b>TRE Entry Not Active</b>
<b>Explanation</b>	The translation routine cannot be loaded (in <code>RECEIVE</code> function) because the translation routine control block was not created correctly when the service was registered.
<b>Action</b>	Contact Software AG Support.
<b>00780058</b>	<b>Failed to get memory from OS</b>
<b>Explanation</b>	Broker could not get enough memory during initialization.
<b>Action</b>	Reduce the resource requirements in the attribute file OR increase the memory available to your broker job, if possible.

**00780093 MQ Store Pointer Is Null**

**Explanation** EntireX Broker detected an error during release of storage.

**Action** Contact Software AG Support.

**00780198 No Related SCBEXT Entry For PCB**

**Explanation** A server issued a DEREGISTER call with option QUIESCE while a user was still active (conversations were active), and a REGISTER call was issued. In this situation, EntireX Broker detected an error.

**Action** Contact Software AG Support.

**00780221 SPFX Translation Code Error**

**Explanation** This is a problem with the Broker stub used by the application. The stub did not send the EntireX Broker call in the correct internal format.

**Action** Ensure that the correct version of the EntireX Broker stub is being used. Check the log data set for an image of the internal format. Examine this string for the user issuing the call.

**00780224 POST/WAIT error occurred**

**Explanation** The internal communication of Broker failed due to an operating system error.

**Action** Contact Software AG Support.

**00780232 PSI: Query release failed**

**Explanation** Resources obtained for a Command and Infor Services query cannot be released.

**Action** Contact Software AG Support.

**00780238 PSTORE is currently disconnected**

**Explanation** Currently, PSTORE is disconnected. Any active operation involving PSTORE is currently prohibited. This situation can occur when the Broker administrator has issued the CIS command DISCONNECT-PSTORE.

**Action** It may take some time before PSTORE is connected again. Be careful not to have a loop programmed in this situation. Retry the call to EntireX Broker after the Broker administrator has issued the command CONNECT-PSTORE.

<b>00780239</b>	<b>Invalid length in format string</b>
<b>Explanation</b>	EntireX Broker has detected an internal inconsistency during info or command processing. The internal field length description is corrupted.
<b>Action</b>	Contact Software AG Support.
<b>00780241</b>	<b>No free service extension entry</b>
<b>Explanation</b>	EntireX Broker has detected an error while searching for a free SCB extension entry. There is no SCB extension entry available.
<b>Action</b>	This error should not occur with DYNAMIC-MEMORY-MANAGEMENT set to "YES" unless the maximum amount of memory has already been reached.  With DYNAMIC-MEMORY-MANAGEMENT set to "NO", the broker-specific attribute NUM-SERVICE-EXTENSION can be used to increase the number of service extension control blocks.  You may retrieve the allocated number of service extensions by using the program ETBINFO. Object ETB_INFO_RESOURCE_USAGE (CIS version 7 and above) returns all data about service extensions. See value of field nServiceExtensionEntriesAllocated.
<b>00780244</b>	<b>No free translation entry</b>
<b>Explanation</b>	The Broker has detected an error while searching for a free TRE entry. There is no TRE entry available.
<b>Action</b>	Contact Software AG Support.
<b>00780245</b>	<b>No related service entry for client</b>
<b>Explanation</b>	The Broker has detected an error while searching for the client SCB entry. There is no SCB entry for the client.
<b>Action</b>	Contact Software AG Support.
<b>00780254</b>	<b>Invalid type in format string</b>
<b>Explanation</b>	The Broker has detected an internal inconsistency during info or command processing. The internal description of the field type is corrupted.
<b>Action</b>	Contact Software AG Support.

<b>00780258</b>	<b>Pointer to next segment is null</b>
<b>Explanation</b>	Internal error during assembly of the Info return buffer.
<b>Action</b>	Contact Software AG Support.
<b>00780259</b>	<b>No related timeout queue entry</b>
<b>Explanation</b>	EntireX Broker has detected an error in TOQ structures.
<b>Action</b>	Contact Software AG Support.
<b>00780260</b>	<b>Pointer to Info structure is null</b>
<b>Explanation</b>	Internal error during inquiry of Info services.
<b>Action</b>	Contact Software AG Support.
<b>00780261</b>	<b>No free participant entry</b>
<b>Explanation</b>	The Broker has detected an error while searching for a free PCB entry. There is no PCB entry available.
<b>Action</b>	Increase NUM-SERVER and/or NUM-CLIENT.
<b>00780262</b>	<b>No free participant extension entry</b>
<b>Explanation</b>	The Broker has detected an error while searching for a free PCB extension entry. There is no PCB extension entry available.
<b>Action</b>	If you are <i>not</i> using dynamic memory management (Broker attribute DYNAMIC-MEMORY-MANAGEMENT), define an appropriate value for attribute NUM-PARTICIPANT-EXTENSION (NUM-SERVER * NUM-SERVICE + NUM-CLIENT).
<b>00780265</b>	<b>No free service entry</b>
<b>Explanation</b>	The Broker has detected an error while searching for a free SCB (Service Control Block) entry. There is no SCB entry available. The number of SCBs is set based upon the number of clients, servers, and services. When this error is returned, it means that all of the SCBs are in use. The current formula for the number of SCBs is: NUM-CLIENTS + NUM-SERVERS + NUM-SERVICES + 5.
<b>Action</b>	Recommendations: <ul style="list-style-type: none"><li>■ Increase NUM-SERVICE.</li><li>■ Increase NUM-SERVER.</li><li>■ Increase NUM-CLIENTS.</li></ul> Increasing the values will increase the total number of SCBs. To free up the idle SCBs sooner: <ul style="list-style-type: none"><li>■ Decrease CLIENT-NONACT.</li></ul>

- Decrease CONV-NONACT.
- Set SERVER-NONACT.

Decreasing the non-activity timers will cause the inactive resources to be made available to other users.

If DYNAMIC-MEMORY-MANAGEMENT is set to YES, this error should no longer occur.

<b>00780266</b>	<b>Inconsistency at start Info/Cmd-Service</b>
<b>Explanation</b>	An inconsistency occurred during the start of internal Info or Command Services.
<b>Action</b>	Contact Software AG Support.
<b>00780277</b>	<b>PSI: Replace operation failed</b>
<b>Explanation</b>	The PSTORE operation to replace the contents of a unit of work failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780299</b>	<b>Only supported for messages (no UOWs)</b>
<b>Explanation</b>	An EntireX Broker function for a conversation with no units of work is requested, but the specified conversation contains units of work. The function is rejected.
<b>Action</b>	Check the supplied conversation ID.
<b>00780304</b>	<b>No free UOW control block</b>
<b>Explanation</b>	The Broker detected an error while searching for a free UWCB entry. No UWCB entry is available.
<b>Action</b>	Contact Software AG Support.
<b>00780305</b>	<b>No matching UOW found</b>
<b>Explanation</b>	A client issued a SEND, RECEIVE, EOC, or SYNCPOINT call and the specified UOW does not exist.
<b>Action</b>	This is a user error. Clients must ensure that the UOWs exist before any request is made.

- 00780306**            **UOWs not found for UOWID=BOTH**  
**Explanation**      A client issued a SYNCPOINT OPTION=COMMIT call specifying UOWID=BOTH and two UOWs in the correct status could not be found.  
**Action**            This is a user error. Clients must ensure that the UOWs to be operated on exist and are in the correct status.
- 00780307**            **UOW is not in correct status**  
**Explanation**      A client issued a SEND, RECEIVE, EOC, or SYNCPOINT call and the specified UOW is not in the correct status for the requested operation.  
**Action**            This is a user error. Clients must ensure that the UOWs are in the correct status.
- 00780308**            **UOW was not created by caller**  
**Explanation**      A client issued a SYNCPOINT call with OPTION=QUERY or OPTION=DELETE, and the specified UOW was not created by the caller of SYNCPOINT.  
**Action**            This is a user error. Only the creator of a UOW can QUERY or DELETE a UOW. Use the Command and Information Services to accomplish these operations on a UOW not created by the caller.
- 00780309**            **Error updating UOW status**  
**Explanation**      An error occurred while updating the persistent status of a UOW. The error is in the persistent store facility.  
**Action**            Examine the Broker log file to determine the type of error encountered. Contact Software AG Support if necessary.
- 00780310**            **Mismatched UOWs Store Type**  
**Explanation**      The store type specified with a SEND function is not the same as the store type specified with the first SEND for that UOW.  
**Action**            Do not change the store type after the first SEND for a UOW has been issued.
- 00780319**            **PSI: WRITE failed**  
**Explanation**      An attempt to write data to the persistent store has failed.  
**Action**            Examine the Broker log file for more information and contact Software AG Support if necessary.

<b>00780320</b>	<b>PSI: READ control data failed</b>
<b>Explanation</b>	An attempt to read control data from the persistent store has failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780321</b>	<b>PSI: READ message data failed</b>
<b>Explanation</b>	An attempt to read message data from the persistent store has failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780322</b>	<b>PSI: UPDATE failed</b>
<b>Explanation</b>	An attempt to update the persistent store has failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780323</b>	<b>PSI: WRITE both failed</b>
<b>Explanation</b>	An attempt to write two data items to the persistent store has failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780326</b>	<b>PSI: PURGE failed</b>
<b>Explanation</b>	An attempt to delete data from the persistent store has failed.
<b>Action</b>	Examine the Broker log file for more information of UOWIDn and contact Software AG Support if necessary.
<b>00780328</b>	<b>PSI: Scan operation failed</b>
<b>Explanation</b>	An attempt to scan for selected data on the persistent store has failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780337</b>	<b>Duplicate UOWID found</b>
<b>Explanation</b>	Two UOWs with the same ID, on the same conversation, were encountered during restart. The Broker will not initialize.
<b>Action</b>	It will be necessary to delete one or both of the UOWs before restarting. Contact Software AG Support if necessary.

<b>00780338</b>	<b>Exit attempted to change message size</b>
<b>Explanation</b>	An encryption or decryption security exit attempted to change the size of a message.
<b>Action</b>	Correct the user exit so that message sizes are not changed.  <b>Note:</b> For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.
<b>00780350</b>	<b>UOW operations not allowed</b>
<b>Explanation</b>	A request has specified a unit of work (UOW) operation. But because the broker-specific attribute <code>MAX-UOWS</code> is set to 0 (zero), unit of work operations are not allowed. See <code>MAX-UOWS</code> .
<b>Action</b>	Ensure that the request is directed to the correct Broker and that the Broker supports UOWs.
<b>00780351</b>	<b>UOWID required for COMMIT/BACKOUT/CANCEL</b>
<b>Explanation</b>	A UOWID is required for a <code>SYNCPPOINT</code> function that specifies a <code>COMMIT</code> , <code>BACKOUT</code> , or <code>CANCEL</code> option.
<b>Action</b>	Provide a UOWID whenever you want to commit, back out, or cancel a UOW.
<b>00780352</b>	<b>Invalid message length</b>
<b>Explanation</b>	The message allocator is getting a request to obtain space for a message lower than or equal to zero. The request is rejected.
<b>Action</b>	Contact Software AG Support.
<b>00780356</b>	<b>Error Updating Receiver Data</b>
<b>Explanation</b>	An error occurred while updating the receiver data of a UOW in the persistent store.
<b>Action</b>	Examine the Broker log file to determine the type of error encountered. Contact Software AG Support if necessary.
<b>00780357</b>	<b>Message Queue Inconsistent</b>
<b>Explanation</b>	Broker keeps track of the sequence for sent and received non-persistent messages. The expected message number on receive does not match with the message number in the message queue control block. This indicates inconsistent data in the Broker memory pool. Broker will issue an error message and return this response code in the ACI.
<b>Action</b>	Contact Software AG Support.

<b>00780358</b>	<b>PSI: Query operation failed</b>
<b>Explanation</b>	The PSTORE operation to run a query is failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780375</b>	<b>No storage for Translation Buffer</b>
<b>Explanation</b>	The Broker could not allocate enough memory for a buffer into which the message to be character-converted should be copied.
<b>Action</b>	As a short-term measure try reducing the number of worker tasks (NUM-WORKER in the Broker attribute file) since each worker task maintains a separate Translation buffer.
<b>00780386</b>	<b>No free conversation accounting entry</b>
<b>Explanation</b>	This message indicates a shortage of accounting control blocks.
<b>Action</b>	Increase NUM-CONVERSATION.
<b>00780388</b>	<b>PSI: UOWs can NOT be persisted</b>
<b>Explanation</b>	A request for a UOW to be persisted (STORE=BROKER) cannot be accomplished, since at startup, the Broker attributes specify no persistent store (PSTORE=NO).
<b>Action</b>	Review Broker attribute settings related to the persistent store.
<b>00780389</b>	<b>PSI: UOW status can NOT be persisted</b>
<b>Explanation</b>	A request for a UOW status to be persisted cannot be accomplished, since at startup, the Broker attributes specify no persistent store (PSTORE=NO).
<b>Action</b>	Review Broker attribute settings related to the persistent store.
<b>00780405</b>	<b>PSI: UOW Index initialization failed</b>
<b>Explanation</b>	EntireX Broker tried to create an internal index for every unit of work. This operation failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.

<b>00780406</b>	<b>PSI: Add entry to UOW Index failed</b>
<b>Explanation</b>	EntireX Broker tried to add an entry to the internal index for units of work. This operation failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780407</b>	<b>PSI: Logical read failed</b>
<b>Explanation</b>	The logical read operation through the Adabas PSTORE returned an error.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780409</b>	<b>PSI: Delete entry from UOW Index failed</b>
<b>Explanation</b>	EntireX Broker tried to delete an entry from the internal index for units of work. This operation failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780410</b>	<b>PSI: Close UOW Index failed</b>
<b>Explanation</b>	EntireX Broker tried to close the internal index for units of work. This operation failed.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>00780575</b>	<b>PSI: Set Trace Level failed</b>
<b>Explanation</b>	Unable to set the persistent store-specific trace level.
<b>Action</b>	Contact Software AG Support.
<b>00780615</b>	<b>No free filter entry</b>
<b>Explanation</b>	An attempt to add a command log filter failed as there were no free command log filter entries.
<b>Action</b>	Delete an existing command log filter or specify an increased value for the broker NUM-CMDLOG-FILTER attribute and restart the broker kernel.

<b>00780617</b>	<b>Broker is waiting for operational PSTORE</b>
<b>Explanation</b>	Broker was started with <code>WAIT-FOR-ACTIVE-PSTORE=YES</code> but the persistent store is not active yet.
<b>Action</b>	As soon as the persistent store is accessible, this temporary problem will no longer exist. Check that the assigned persistent store is in the process of starting.
<b>00780621</b>	<b>No free proxy queue entry</b>
<b>Explanation</b>	EntireX Broker has detected an error while searching for a free proxy queue entry. There is no proxy queue entry available.
<b>Action</b>	Contact Software AG Support.
<b>00780623</b>	<b>No free TCP connection entry</b>
<b>Explanation</b>	The maximum number of TCP/IP connections is derived from the number of available file descriptors. This maximum has been reached.
<b>Action</b>	Increase the number of file descriptors.
<b>00780624</b>	<b>Broker not operational for user requests</b>
<b>Explanation</b>	The Broker is not available for user requests. The <code>BROKER-ID</code> used for the current request does not address a Broker with <code>RUN-MODE=STANDARD</code> .
<b>Action</b>	Change the <code>BROKER-ID</code> to address a Broker with <code>RUN-MODE=STANDARD</code> .
<b>00780626</b>	<b>No free node control block</b>
<b>Explanation</b>	EntireX Broker has detected an error while searching for a free node control block. There is no node control block available.
<b>Action</b>	Contact Software AG Support.
<b>00780627</b>	<b>Transport proxy not active</b>
<b>Explanation</b>	The proxy component of the requested communicator is not active and cannot be used to contact the partner Broker.
<b>Action</b>	Check the output files for error messages issued by the communicator.
<b>00780655</b>	<b>Pool order failure</b>
<b>Explanation</b>	The internal communication path between the task ordering a pool allocation and the task executing the order received an error.
<b>Action</b>	Broker log provides more detailed diagnostics about the reason not being able to perform post and wait between Broker threads.

<b>00780726</b>	<b>PSTORE load already running</b>
<b>Explanation</b>	There is an out of band request by the partner Broker to issue another handshake while the load procedure of the persistent store migration is already running.
<b>Action</b>	Restart Load and Unload Broker to repeat the PSTORE migration.
<b>00780765</b>	<b>Broker version mismatch</b>
<b>Explanation</b>	A validation is performed by the Partner Brokers according to the Broker version number. This version information does not match.
<b>Action</b>	Adjust the Broker environments so that the version of the Partner Brokers is the same.
<b>00780766</b>	<b>Broker version missing</b>
<b>Explanation</b>	A validation is performed by the Partner Brokers according to the Broker version number. This version information has not been sent by the partner.
<b>Action</b>	Contact Software AG Support.
<b>00780767</b>	<b>Broker architecture mismatch</b>
<b>Explanation</b>	A validation is performed by the Partner Brokers according to the platform architecture type. This type information does not match.
<b>Action</b>	Adjust the Broker environments so that the partner Brokers are running on the same level and type of architecture.
<b>00780768</b>	<b>Broker architecture missing</b>
<b>Explanation</b>	A validation is performed by the Partner Brokers according to the platform architecture type. This type information has not been sent by the partner.
<b>Action</b>	Contact Software AG Support.
<b>00780769</b>	<b>Broker security mismatch</b>
<b>Explanation</b>	A validation is performed by the Partner Brokers according to the security setting. This security setting does not match.
<b>Action</b>	Adjust the Broker environments so that the partner brokers are using the same security settings.

<b>00780770</b>	<b>Broker security missing</b>
<b>Explanation</b>	A validation is performed by the Partner Brokers according to the security setting. This security setting has not been sent by the partner.
<b>Action</b>	Contact Software AG Support.
<b>00780777</b>	<b>Request has abended</b>
<b>Explanation</b>	The current request caused an abnormal exception in the Broker.
<b>Action</b>	Contact your Administrator to send the diagnostic information of the Broker to Software AG Support.
<b>00780778</b>	<b>Request not finished yet</b>
<b>Explanation</b>	The Broker-to-Broker request has not finished yet. Broker is still waiting for the response of the partner Broker.
<b>Action</b>	None.
<b>00780779</b>	<b>Request rejected</b>
<b>Explanation</b>	User error loop was detected before and participant is currently not permitted to issue any Broker request.
<b>Action</b>	Wait until participant is unlocked.
<b>00780798</b>	<b>Invalid data</b>
<b>Explanation</b>	The Load Broker detected an inconsistency in the sent data. The expected end-of-data signature has not been sent.
<b>Action</b>	Contact Software AG Support.
<b>00780844</b>	<b>PSTORE: Wrong master record</b>
<b>Explanation</b>	UOW master record missing when reading UOW from Adabas PSTORE database. Indicates a corrupted or inconsistent Adabas PSTORE database.
<b>Action</b>	Running with PSTORE=COLD and FORCE-COLD=YES fixes the problem by resetting the PSTORE database. Contact Software AG Support if the recommended fix is not an option for your situation.

<b>00780848</b>	<b>PSTORE: ADABAS error occurred</b>
<b>Explanation</b>	A call to the Adabas database returned an error response.
<b>Action</b>	Check the Adabas response code for more details.
<b>00780852</b>	<b>PSTORE: Invalid control data length</b>
<b>Explanation</b>	The unit of work in the c-tree PSTORE contains incorrect data or an I/O error occurred.
<b>Action</b>	Check if a wrong <code>PSTORE-VERSION</code> has been defined in the attribute file.
<b>00370853</b>	<b>PSTORE: Persistent Store is full</b>
<b>Explanation</b>	The space for the c-tree PSTORE is exhausted.
<b>Action</b>	Move the PSTORE files to a location with more disk space and adjust the c-tree-specific <code>PATH</code> attribute accordingly.
<b>00780854</b>	<b>PSTORE: Cannot set ADABAS USER- ID</b>
<b>Explanation</b>	The request to set the Adabas user ID was not successful.
<b>Action</b>	Check the Adabas configuration.
<b>00780855</b>	<b>PSTORE: Requested data out of range</b>
<b>Explanation</b>	This error indicates a data inconsistency.
<b>Action</b>	Contact Software AG Support.
<b>00780857</b>	<b>Unexpected API function triggered by RCB</b>
<b>Explanation</b>	An internal error occurred in the processing of the receive function.
<b>Action</b>	Rerun Broker with <code>TRACE-LEVEL=4</code> . Contact Software AG Support and provide the Broker log.
<b>00780858</b>	<b>Cannot create RCB. malloc failed</b>
<b>Explanation</b>	The runtime heap is too small. Broker was unable to allocate an RCB (Receive Control Block).
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.

# 19

## Message Class 0079 - EntireX ACI - Error in Broker Stub

---

This message class indicates a problem in the Broker stub being used and may be reported by the stub or Broker. Examine the error number and make a correction. Then restart the application. The messages have the format:

0079*nnnn*

where 0079 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>00790072</b>	<b>STUB: Missing API Terminator Char(.)</b>
<b>Explanation</b>	This is a problem with the Broker stub used by the application. The stub did not send the Broker call in the correct internal format.
<b>Action</b>	Ensure that the correct version of the Broker stub is being used. Check the log data set for an image of the internal format. Examine this string for the user issuing the call.
<b>00790122</b>	<b>STUB: Invalid :1: value</b>
<b>Explanation</b>	An invalid value is provided in the ACI field :1:.
<b>Action</b>	Correct the value supplied in ACI field :1:.
<b>00790105</b>	<b>STUB: Invalid extension data offset</b>
<b>Explanation</b>	The address of send buffer plus send buffer length is out of range.
<b>Action</b>	Correct data for Broker call.

<b>00790124</b>	<b>STUB: Invalid :1: size</b>
<b>Explanation</b>	The size of ACI field :1: is out of range. This might indicate a transport problem.
<b>Action</b>	Check the value supplied in ACI field :1:. Contact Software AG Support if needed.
<b>00790130</b>	<b>STUB: Invalid size of REQ STRING value</b>
<b>Explanation</b>	An internal protocol error has occurred between ACI and EntireX Broker or transmission has been corrupted.
<b>Action</b>	Contact Software AG Support.
<b>00790131</b>	<b>STUB: Invalid size of REQ STRING key</b>
<b>Explanation</b>	An internal protocol error has occurred between ACI and EntireX Broker or transmission has been corrupted.
<b>Action</b>	Contact Software AG Support.
<b>00790175</b>	<b>STUB: Must utilize Natural Version &gt;= 4</b>
<b>Explanation</b>	The mainframe Assembler stub supports only Natural Version 4 and above.
<b>Action</b>	Use Natural Version 4 or above.
<b>00790202</b>	<b>STUB: Error in SPFX Length</b>
<b>Explanation</b>	This is a problem with the Broker stub used by the application. The stub has not sent the EntireX Broker call in the correct internal format.
<b>Action</b>	Ensure that the version of the Broker stub being used matches the version of the Broker you are accessing. Check the log data set for an image of the internal format. Examine this string for the user issuing the call.
<b>00790170</b>	<b>STUB: Received data greater than RETL</b>
<b>Explanation</b>	An internal inconsistency in the response from the EntireX Broker has been detected: the size of the received data is greater than the return length, that is, the length of the data returned from the application.
<b>Action</b>	Contact Software AG Support.
<b>00790204</b>	<b>STUB: Broker response not recognized</b>
<b>Explanation</b>	The stub received a reply that indicates an invalid sender. The received data is rejected.
<b>Action</b>	The BROKER- ID is probably invalid. The addressee does not support the communication protocol of the Broker.

<b>00790205</b>	<b>STUB: Invalid SPFX Offsets</b>
<b>Explanation</b>	This is a problem with the Broker stub used by the application. The stub did not send the EntireX Broker call in the correct internal format.
<b>Action</b>	Ensure that the Broker stub being used is the correct one. Check the log data set for an image of the internal format. Examine this string for the user issuing the call.
<b>00790206</b>	<b>STUB: Offset Does not Point to Data</b>
<b>Explanation</b>	This is a problem with the Broker stub used by the application. The stub did not send the EntireX Broker call in the correct internal format.
<b>Action</b>	Check that the Broker stub being used is the correct one. Check the log data set for an image of the internal format. Examine this string for the user issuing the call.
<b>00790207</b>	<b>STUB: No request or reply buffer</b>
<b>Explanation</b>	This is a problem with the Broker stub used by the application. The stub did not send the EntireX Broker call in the correct internal format.
<b>Action</b>	Check that the Broker stub being used is the correct one. Check the log data set for an image of the internal format. Examine this string for the user issuing the call.
<b>00790209</b>	<b>STUB: Nothing Returned From Broker</b>
<b>Explanation</b>	The Broker returned an invalid internal format to the caller. The length of the returned string is not positive.
<b>Action</b>	Contact Software AG Support.
<b>00790214</b>	<b>STUB: Work Space Allocation Failed</b>
<b>Explanation</b>	The EntireX Broker stub cannot allocate the storage needed as a work area.
<b>Action</b>	If you are using a Natural application in a mainframe environment, try to reduce or remove Natural buffers from the Natural space management. Refer to the appropriate Natural Operations documentation for valid Natural buffer profile parameters such as ASIZE, CSIZE, DSIZE. When issuing the first call from any mainframe Natural platform, a buffer of 33K must be available within Natural space management.
<b>00790219</b>	<b>EXEC CICS LINK PGM=pgm_name RESP=resp/resp2</b>
<b>Explanation</b>	Under CICS, the broker stub received a CICS error=RESP/RESP2 while calling the CICS routine pgm_name (normally ADACICS).
<b>Action</b>	Check the CICS documentation for the meaning of the response codes.

<b>00790225</b>	<b>SPFX Reply Buffer Overflow</b>
<b>Explanation</b>	The reply string could not be generated due to an internal buffer overflow.
<b>Action</b>	Contact Software AG Support.
<b>00790227</b>	<b>SPFX Unknown Binary field</b>
<b>Explanation</b>	The Broker kernel has received a command string that contains unknown binary field extensions.
<b>Action</b>	Contact Software AG Support.
<b>00790233</b>	<b>STUB: problem with SPFX total length</b>
<b>Explanation</b>	The message from EntireX Broker does not contain the necessary protocol information.
<b>Action</b>	Contact Software AG Support.
<b>00790234</b>	<b>Invalid binary field length</b>
<b>Explanation</b>	EntireX Broker received a request with invalid binary protocol parts.
<b>Action</b>	Contact Software AG Support.
<b>00790341</b>	<b>STUB: Transport cannot be initialized</b>
<b>Explanation</b>	The components (e.g. OpenSSL libraries for SSL transport) are not fully available. Therefore, the desired transport in the Broker stub cannot be initialized. Under z/OS, the most likely causes of this are:  <ol style="list-style-type: none"><li>1. The application is running on a version of z/OS below z/OS 1.6.</li><li>2. The Language Environment POSIX runtime option has the value OFF.</li></ol>
<b>Action</b>	Use an alternative transport mechanism or make the missing components available.
<b>00790382</b>	<b>STUB: Unable to load or call Broker Stub</b>
<b>Explanation</b>	Broker stub could not be loaded.
<b>Action</b>	Check environment variable ETBLNK. It should specify the full path name of the broker stub.

<b>00790571</b>	<b>STUB: Invalid IBM LE version</b>
<b>Explanation</b>	The stub requires a higher z/OS version.
<b>Action</b>	See <i>z/OS Prerequisites</i> for supported versions.
<b>00790819</b>	<b>STUB: C-Stub Module could not be loaded</b>
<b>Explanation</b>	z/VSE: Module BROKERB could not be loaded.
<b>Action</b>	Check assignment of EXX library.
<b>00790820</b>	<b>STUB: LE Initialization failed</b>
<b>Explanation</b>	z/VSE: IBM Language Environment initialization failed.
<b>Action</b>	Check LE messages.
<b>00790821</b>	<b>STUB: LE Termination failed</b>
<b>Explanation</b>	z/VSE: IBM Language Environment termination failed.
<b>Action</b>	Check LE messages.
<b>00790822</b>	<b>STUB: BPX1SDD (set_dub_default) failed</b>
<b>Explanation</b>	z/OS: Execution of BPX1SDD failed. The BPX1SDD is used to make subtasks processes.
<b>Action</b>	Check additional return code and reason code. See <i>z/OS UNIX System Services Messages and Codes</i> for a detailed description.
<b>00790823</b>	<b>STUB: Unable to load ADABAS link routine</b>
<b>Explanation</b>	BS2000, z/OS, z/VSE: The Adabas link routine is loaded dynamically. However, the stub was unable to load the Adabas link routine.
<b>Action</b>	Assign the Adabas load library.
<b>00790824</b>	<b>STUB: ADABAS entry unresolved</b>
<b>Explanation</b>	Under z/OS, the Adabas link routine is loaded dynamically. However, the stub was unable to load the Adabas link routine.
<b>Action</b>	Assign the Adabas load library to the STEPLIB chain.

- 00790825**            **STUB: Cannot call BROKER2. Check STEPLIB**
- Explanation**        The stub BROKER cannot load module BROKER2.
- Action**                Add the EXX load library with module BROKER2 to the STEPLIB chain and rerun the application.
- 
- 00790910**            **PSTORE: UOW already exists**
- Explanation**        The PSTORE write operation cannot write a unit of work because this UOW already exists.
- Action**                Turn on Broker log level 4 and rerun the application. Send the resulting Broker log to Software AG Support.

# 20

## Message Class 0196 - EntireX ACI - Disconnected due to new Location

---

This message class need only be handled when working with the `TOKEN` parameter in the ACI, that is, users are identified by `USER-ID/TOKEN` instead of `USER-ID/internal ID`. When the user changes the physical location while issuing EntireX Broker operations (a new session from another terminal) the old session retrieves this message class. The new session takes over all conversations from the old session.

**01960196**

### **Disconnected Due To New Location**

#### **Explanation**

This situation occurs whenever a user calls the Broker even though a request of this user is already active.

A user is identified by `USER-ID` and `TOKEN`, or if `TOKEN` was omitted, identified by `USER-ID` and an internal ID.

This situation may occur when working with the `TOKEN` parameter in the API. If the user changes the physical location between EntireX Broker calls (e.g., a new session from another terminal), the old session retrieves this response. The new session takes all conversations of the old session.

The situation may also occur with or without the `TOKEN` parameter if a Broker request was stopped by transport timeout (see `ETB_TIMEOUT`) and the old request was still active in Broker.

#### **Action**

The program has to be ended.

# 21

## Message Class 0215 - EntireX ACI - Connection Error

---

This message class is returned when EntireX Broker is not available or the data/message transport to EntireX Broker is currently interrupted. Also, configuration problems in EntireX Broker or the communication methods involved can cause this message class. The situation can be examined using the message code returned. See *Adabas Messages and Codes* or the *Entire Net-Work Messages and Codes* documentation. The messages have the format:

0215nnnn

where 0215 is the message class, and

nnnn is the message number in the range 0000 - 9999

**02150126**            **Error during RECEIVE request**

**Explanation**        The request received by Broker does not contain the required transport data. It may be caused by requests not intended for Broker.

**Action**                The request is rejected.

**02150128**            **Work queue full or alloc XWQE failed**

**Explanation**        There is no entry available to process the received user request. This message is issued if the maximum number of work queue elements is reached (see value of NUM-WQE attribute).

**Action**                Increase the value of parameter NUM-WQE.

<b>02150129</b>	<b>Not enough space for COMMUNICATION POOL</b>
<b>Explanation</b>	Communication pool is too small.
<b>Action</b>	Increase size of the communication buffer (NUM-COMBUF) and retry.
<b>02150148</b>	<b>EntireX Broker not active : (or Transport-Specific Error Text)</b>
<b>Explanation</b>	The requested Broker specified in BROKER-ID is not reachable.
<b>Action</b>	Check the BROKER-ID. If it is correct, check if ETB_TRANSPORT environment variable is defined and if defined, it should point to the desired transport method. If problem persists, contact your network administrator.
<b>02150149</b>	<b>Various Error Text</b>
<b>Explanation</b>	The broker stub was unable to initialize the environment.
<b>Action</b>	The error text describes the problem situation. The necessary action depends on the actual problem description.
<b>02150151</b>	<b>Adabas command queue overflow</b>
<b>Explanation</b>	Adabas command queue overflow.
<b>Action</b>	Increase the size of the NCQE parameter.
<b>02150152</b>	<b>IUBL is too low</b>
<b>Explanation</b>	IUBL is too low and must be increased. Due to the increase of IUBL, it may be necessary to increase NABS, too.
	<b>Note:</b> In other environments, IUBL is also known as LU Size or TRANSFER_UNIT Size.
<b>Action</b>	Increase IUBL.
<b>02150215</b>	<b>NET: Connection Error</b>
<b>Explanation</b>	The same as the Adabas 254 response code. The Adabas documentation states:  One of the following has occurred: <ul style="list-style-type: none"><li>■ An internal error occurred during processing of an attached buffer (buffer overflow).</li><li>■ The CT parameter limit was exceeded. Message ADAM93 (or a similar message) is printed or displayed on the console.</li></ul> If you were running with Entire Net-Work, the leftmost two bytes of the additions 2 field contain the ID of the Entire Net-Work node that issued this response code.
	<b>Note:</b> The Adabas CT parameter corresponds to the EntireX startup parameter TIME.
<b>Action</b>	Consider increasing the EntireX TIME parameter, or otherwise increase resources.

<b>02150255</b>	<b>NET: Connection Error</b>
<b>Explanation</b>	The same as the Adabas 255 response code. The Adabas documentation states:  All attached buffers were allocated at the time the command was processed. Buffer allocation (NAB) "high water marks" may not reflect this condition when no buffer allocation occurs. If you were running with Entire Net-Work, the leftmost two bytes of the additions 2 field contain the ID of the Entire Net-Work node that issued this response code.
<b>02150278</b>	<b>User Buffer Too Small</b>
<b>Explanation</b>	Settings for Broker attribute NUM-COMBUF possibly too low. See NUM-COMBUF under <i>Broker-specific Broker Attributes</i> .
<b>Action</b>	Consider increasing the value of NUM-COMBUF. If the problem persists, contact Software AG Support.
<b>02150373</b>	<b>Transport Timeout exceeded</b>
<b>Explanation</b>	Connection error. A timeout occurred, based on the value specified in the TRANSPORT-TIMEOUT environment variable (ETB_TIMEOUT) and/or any client-specified wait time. Refer to that variable for more information.
<b>Action</b>	Identify the cause of the timeout and correct it. If the problem remains, contact Software AG Support.
<b>02150403</b>	<b>Certificate expired or invalid</b>
<b>Explanation</b>	OpenSSL handshake failed. Certificate is expired or invalid.
<b>Action</b>	Generate a new certificate.
<b>02150546</b>	<b>No SSL parameters set for this broker ID</b>
<b>Explanation</b>	ACI function FCT_SETSSLPARMS was not set, The necessary SSL parameters were not issued, and an SSL connection to the Broker was requested.
<b>Action</b>	Issue missing ACI function FCT_SETSSLPARMS, or change the BROKER-ID to not use SSL.
<b>02150572</b>	<b>Remote certificate name mismatch</b>
<b>Explanation</b>	The DN field in the SSL certificate supplied by the broker kernel does not match the hostname part of the broker ID.
<b>Action</b>	Ensure that the broker kernel is configured to use the correct SSL certificate.

<b>02150586</b>	<b>Connection error: work queue exhausted</b>
<b>Explanation</b>	There is no entry available to process the received user request. This message is issued if the maximum number of work queue elements is reached (see value of NUM-WQE attribute).
<b>Action</b>	Increase the value of parameter NUM-WQE.
<b>02150587</b>	<b>Connection error: prefix length invalid</b>
<b>Explanation</b>	Connection error. Broker command prefix length is invalid (internal error).
<b>Action</b>	Contact Software AG Support.
<b>02150588</b>	<b>Connection error: API offset invalid</b>
<b>Explanation</b>	Connection error. Broker command API offset is invalid (internal error).
<b>Action</b>	Contact Software AG Support.
<b>02150599</b>	<b>::NET: ADALNK unresolved</b>
<b>Explanation</b>	ADALNK or ADAUSER is not linked to the Broker stub. The stub cannot perform the transport call to the Broker kernel.
<b>Action</b>	Link ADAUSER to the stub. See BROKER under <i>Administering Broker Stubs</i> in the z/OS Administration documentation.
<b>02150610</b>	<b>Error during receive of response</b>
<b>Explanation</b>	An internal error occurred while receiving an API request.
<b>Action</b>	Contact Software AG Support.
<b>02150949</b>	<b>Skipped Data Collector Call</b>
<b>Explanation</b>	The data collector cannot be reached. The call is skipped.
<b>Action</b>	Analyze the error reported for the data collector call and fix it.
<b>02159408</b>	<b>various error texts</b>
<b>Explanation</b>	A local program has committed an error. The error text field contains specific error information.
<b>Action</b>	Check the program and correct the error.

<b>02159409</b>	<b>various error texts</b>
<b>Explanation</b>	A remote program has committed an error. The error-text field contains specific error information.
<b>Action</b>	Check the program and correct the error.
<b>02159411</b>	<b>NOTHING TO DEREGISTER</b>
<b>Explanation</b>	A Remote Attach DEREGISTER request has been issued, but either the TPNAME specified in the SERVICE field was not previously registered, or a DEREGISTER was issued with a blank TPNAME and the Remote Attach Manager currently has no TPNAMEs registered.
<b>Action</b>	None.

# 22

## Message Class 0217 - EntireX ACI - Transactionality

---

The messages have the format:

0217*nnnn*

where 0217 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

**02179999**

**The shared library for the transactionality feature could not be loaded**

**Explanation**

The specifications in the Broker control block have triggered the transactionality feature, but the appropriate shared library could not be loaded.

**Action**

Check the fields in the Broker control block or verify that the transactionality library is properly installed.

---

# 23

## Message Class 0300 - Broker Command Service

---

The messages have the format:

0300*nnnn*

where 0300 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

**03000000**

**Command Service successfully completed**

**Explanation**

Command service has completed successfully.

**Action**

None required.

**03000002**

**Invalid VERSION**

**Explanation**

This response is given when a CIS command request includes an invalid VERSION number in the Command Request Structure.

**Action**

This is a program error. Contact the owner of the program.

**03000003**

**OBJECT-TYPE missing**

**Explanation**

This response is given when a CIS command request missing a valid OBJECT-TYPE in the Command Request Structure.

**Action**

This is a program error. Contact the owner of the program.

<b>03000005</b>	<b>Invalid OBJECT-TYPE</b>
<b>Explanation</b>	This response is given when a CIS command request includes an invalid OBJECT-TYPE in the Command Request Structure.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000020</b>	<b>The user is not authorized to issue Broker commands</b>
<b>Explanation</b>	User is not permitted access to Command Services: access denied.
<b>Action</b>	Contact security administrator to ensure that correct privileges are defined.
<b>03000021</b>	<b>Invalid COMMAND</b>
<b>Explanation</b>	This response is given when a CIS command request includes an invalid COMMAND in the Command Request Structure.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000022</b>	<b>Invalid OPTION</b>
<b>Explanation</b>	This response is given when a CIS command request includes an invalid OPTION in the Command Request Structure.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000023</b>	<b>Shutdown possible for servers only</b>
<b>Explanation</b>	Only participants registered as servers can be shut down.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000024</b>	<b>Participant not found</b>
<b>Explanation</b>	This response is given when a CIS command request includes an invalid participant in the Command Request Structure.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000025</b>	<b>Purge unit of work failed</b>
<b>Explanation</b>	This response is given when a specified unit of work cannot be purged. The unit of work may not exist or may be in an incorrect state.
<b>Action</b>	This is a program error. Contact the owner of the program.

<b>03000026</b>	<b>User specification must be unique</b>
<b>Explanation</b>	The user (user ID and token or user ID and physical user ID) must be unique.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000027</b>	<b>Topic name must be unique</b>
<b>Explanation</b>	The topic name must be unique.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000028</b>	<b>Add subscription failed</b>
<b>Explanation</b>	This response is given when a subscription cannot be added.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000029</b>	<b>Remove subscription failed</b>
<b>Explanation</b>	This response is given when a subscription cannot be removed.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000030</b>	<b>User must be specified</b>
<b>Explanation</b>	Specify the user in the Command Request Structure. The command cannot be completed without the user argument.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000031</b>	<b>Class/Server/Service must be unique</b>
<b>Explanation</b>	The triplet Class, Server and Service must be unique.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000032</b>	<b>Class and Topic cannot both specified</b>
<b>Explanation</b>	Specify Class or Topic in the Command Request Structure. Do not specify both fields.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000033</b>	<b>Class, Topic or User must be specified</b>
<b>Explanation</b>	The Class, Topic or User must be specified in the Command Request Structure.
<b>Action</b>	This is a program error. Contact the owner of the program.

<b>03000034</b>	<b>Set command log filter failed</b>
<b>Explanation</b>	This response is given when a command log filter cannot be set.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000035</b>	<b>Clear command log filter failed</b>
<b>Explanation</b>	This response is given when a command log filter cannot be cleared.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000036</b>	<b>Enable command log filter failed</b>
<b>Explanation</b>	This response is given when a command log filter cannot be enabled.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000037</b>	<b>Disable command log filter failed</b>
<b>Explanation</b>	This response is given when a command log filter cannot be disabled.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000038</b>	<b>Switch command log files failed</b>
<b>Explanation</b>	This response is given when the command log output files cannot be switched.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000039</b>	<b>Set security trace level failed</b>
<b>Explanation</b>	This response is given when the security trace level cannot be set.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000040</b>	<b>Set PSF trace level failed</b>
<b>Explanation</b>	This response is given when the persistent store trace level cannot be set.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000041</b>	<b>Enable command logging failed</b>
<b>Explanation</b>	This response is given when command logging cannot be enabled.
<b>Action</b>	This is a program error. Contact the owner of the program.

<b>03000042</b>	<b>Disable command logging failed</b>
<b>Explanation</b>	This response is given when command logging cannot be disabled.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000043</b>	<b>Connect PSTORE failed</b>
<b>Explanation</b>	This response is given when the persistent store cannot be connected.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000044</b>	<b>Disconnect PSTORE failed</b>
<b>Explanation</b>	This response is given when the persistent store cannot be disconnected.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000045</b>	<b>Allow new UOW messages failed</b>
<b>Explanation</b>	This response is given when new unit of work messages cannot be allowed.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000046</b>	<b>Forbid new UOW messages failed</b>
<b>Explanation</b>	This response is given when new unit of work messages cannot be forbidden.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000047</b>	<b>Enable accounting failed</b>
<b>Explanation</b>	This response is given when accounting cannot be enabled.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000048</b>	<b>Disable accounting failed</b>
<b>Explanation</b>	This response is given when accounting cannot be disabled.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03000049</b>	<b>Reset user failed</b>
<b>Explanation</b>	CIS command CMD_RESET_USER failed. Broker kernel is not running with Security.
<b>Action</b>	No action required.

<b>03000050</b>	<b>Command refused in current RUN-MODE</b>
<b>Explanation</b>	CIS command refused. Broker is running with special RUN-MODE that prohibits the execution of the specified command.
<b>Action</b>	No action required.
<b>03000051</b>	<b>Service must be specified</b>
<b>Explanation</b>	CIS command requires SERVER-CLASS, SERVER-NAME and SERVICE as parameters, but these are not specified.
<b>Action</b>	Specify SERVER-CLASS, SERVER-NAME and SERVICE as parameters for the CIS command.
<b>03000052</b>	<b>Service not found</b>
<b>Explanation</b>	The selected service could not be found. The CIS command could not be executed successfully.
<b>Action</b>	Check the specified parameters SERVER-CLASS, SERVER-NAME and SERVICE.
<b>03000053</b>	<b>CONVID must be specified</b>
<b>Explanation</b>	CIS command requires a CONVID as parameter, but this was not specified.
<b>Action</b>	Specify CONVID as parameter for the CIS command.
<b>03000054</b>	<b>Conversation not found</b>
<b>Explanation</b>	The selected conversation could not be found. The CIS command could not be executed successfully.
<b>Action</b>	Check the specified parameter CONVID.
<b>03000056</b>	<b>Only supported for messages</b>
<b>Explanation</b>	The specified conversation contains UOWs. The CIS command could not be executed successfully.
<b>Action</b>	No action possible.
<b>03000057</b>	<b>Cannot lock Conversation</b>
<b>Explanation</b>	The specified conversation could not be locked to process the CIS command.
<b>Action</b>	Enter the CIS command again.

<b>03000058</b>	<b>Not for currently running Conversation</b>
<b>Explanation</b>	The conversation that has to be shut down is the conversation carrying the CIS command. This is not permitted; the conversation cannot shut itself down.
<b>Action</b>	No action required.
<b>03000059</b>	<b>Security violation detected</b>
<b>Explanation</b>	The user does not have the permission to shut down the specified service.
<b>Action</b>	Consult your Administrator.
<b>03000060</b>	<b>Invalid transport ID.</b>
<b>Explanation</b>	The supplied transport ID is invalid.
<b>Action</b>	Correct the transport ID. The following values are supported: COM, NET, SSL, TCP, S00, S01, S02, S03, S04, T00, T01, T02, T03, T04.
<b>03000061</b>	<b>Cannot execute command</b>
<b>Explanation</b>	Specified transport ID does not represent a communicator thread in Broker.
<b>Action</b>	Correct the transport ID. The following values are supported but may not be active in Broker: COM, NET, SSL, TCP, S00, S01, S02, S03, S04, T00, T01, T02, T03, T04.
<b>03000062</b>	<b>Command ignored. Only one Communicator left</b>
<b>Explanation</b>	The command is rejected because no other transport communicator is running. This would make the Broker unusable.
<b>Action</b>	No action.
<b>03000063</b>	<b>Command ignored. Cannot stop all Communicators</b>
<b>Explanation</b>	The command to stop a transport communicator must provide a unique identification of the transport instance. Transport IDs COM or SSL or TCP are not unique, but transport ID T00, for example, is unique.
<b>Action</b>	Correct the transport ID value.

<b>03000064</b>	<b>Communicator currently not suspended</b>
<b>Explanation</b>	The transport communicator cannot be resumed because it wasn't suspended before.
<b>Action</b>	No action required.
<b>03000065</b>	<b>Communicator currently not stopped</b>
<b>Explanation</b>	The transport communicator cannot be started because it wasn't stopped before.
<b>Action</b>	No action required.
<b>03000066</b>	<b>Communicator currently not active</b>
<b>Explanation</b>	The transport communicator cannot be stopped because it is not active.
<b>Action</b>	No action required.
<b>03000067</b>	<b>Enable Dynamic Worker Management failed</b>
<b>Explanation</b>	Broker cannot enable the dynamic worker management because it wasn't disabled before.
<b>Action</b>	No action required.
<b>03000068</b>	<b>Disable Dynamic Worker Management failed</b>
<b>Explanation</b>	Broker cannot disable the dynamic worker management because it wasn't enabled before.
<b>Action</b>	No action required.
<b>03000070</b>	<b>TRACE-FLUSH failed</b>
<b>Explanation</b>	Command TRACE - FLUSH was issued but did return an error.
<b>Action</b>	Check the Broker log for additional error messages.
<b>03000071</b>	<b>Still active conversations for Service</b>
<b>Explanation</b>	Adabas Event Replicator issued command SINGLE - CONVERSATION - MODE to turn on the single conversation mode in Broker. The command can be accepted only if there are no active conversations available for the requested service.
<b>Action</b>	Adabas Event Replicator must run in multi-conversation mode until all active conversations have been consumed. You can issue the command SINGLE - CONVERSATION - MODE again only if no more active conversations exist for the service.

<b>03000072</b>	<b>Verification of attribute file failed</b>
<b>Explanation</b>	The verification of the supplied attribute file buffer detected an error.
<b>Action</b>	The contents of the attribute file buffer must be corrected.
<b>03000073</b>	<b>Cannot delete deferred service with UOW</b>
<b>Explanation</b>	Command SHUTDOWN SERVICE has been issued to delete a service that was defined as DEFERRED=YES and still contains active conversations with units of work (UOW). These units of work must be consumed before the service can be shut down.
<b>Action</b>	No action required.
<b>03000074</b>	<b>Cannot set UOW status</b>
<b>Explanation</b>	Command SET-UOW-STATUS was issued to change the status of postponed units of work. Most likely the postponed queue does not exist.
<b>Action</b>	No action required.
<b>03000075</b>	<b>Cannot add service to SCM record</b>
<b>Explanation</b>	Adabas Event Replicator issued command SINGLE-CONVERSATION-MODE to turn on the single conversation mode in Broker. There was a problem adding this service to the single conversation mode record in the persistent store.
<b>Action</b>	Check the Broker log for additional error messages.
<b>03000076</b>	<b>Update SCM record failed</b>
<b>Explanation</b>	Command ACTIVATE-SCM-FOR-SERVICE was issued to activate the single conversation mode for the specified service. This error is described in more detail by the error number in return field EtbErrorCode.
<b>Action</b>	Check the error number in field EtbErrorCode.
<b>03000077</b>	<b>Conversation contains unprocessed UOWs</b>
<b>Explanation</b>	Command SHUTDOWN CONVERSATION was issued, but the selected conversation still contains unprocessed persistent data.
<b>Action</b>	Consume or purge the units of work of the specified conversation and repeat the command.

- 03000078**            **Missing TOKEN**
- Explanation**        Command SINGLE-CONVERSATION-MODE was issued, but the requesting user logged on with USER-ID only; TOKEN was missing. This is not allowed. Adabas Event Replication provides parameter DETBTOKEN to define a TOKEN for the source side and parameter IQETBTOKEN to define a TOKEN for the target side.
- Action**                Specify a TOKEN and restart the application.
- 
- 03000079**            **Missing collector Broker ID**
- Explanation**        CIS command SET-COLLECTOR was issued without specifying a COLLECTOR-BROKER-ID.
- Action**                Repeat the command with a COLLECTOR-BROKER-ID. See SET-COLLECTOR under *Broker Command and Information Services* in the EntireX Broker documentation and COLLECTOR-BROKER-ID under *Application Monitoring-specific Broker Attributes*.
- 
- 03000080**            **Cannot persist new APPMON value**
- Explanation**        CIS command APPMON-OFF or APPMON-ON was issued. See *ETBCMD: Executable Command Requests* in the EntireX Broker documentation. The change of the Broker runtime setting was successful, but the attribute change could not be written to the attribute file.
- Action**                Analyze preceding error messages in the Broker log file.
- 
- 03000081**            **Cannot persist new COLLECTOR-BROKER-ID**
- Explanation**        CIS command SET-COLLECTOR was issued. The change of the Broker runtime setting was successful, but the attribute change could not be written to the attribute file. See SET-COLLECTOR under *Broker Command and Information Services* in the EntireX Broker documentation.
- Action**                Analyze preceding error messages in the Broker log file.

# 24

## Message Class 0301 - Broker Information Service

---

The messages have the format:

0301*nnnn*

where 0301 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>03010000</b>	<b>Information Service successfully completed</b>
<b>Explanation</b>	Information service has completed successfully
<b>Action</b>	None required.
<b>03010001</b>	<b>Invalid BLOCK-LENGTH</b>
<b>Explanation</b>	This response is given when a CIS information request includes an invalid BLOCK-LENGTH in the Information Request Structure.
<b>Action</b>	This is a program error. Contact the owner of the program.
<b>03010002</b>	<b>Invalid VERSION</b>
<b>Explanation</b>	This response is given when a CIS information request includes an invalid VERSION in the Information Request Structure.
<b>Action</b>	This is a program error. Contact the owner of the program.

<b>03010003</b>	<b>OBJECT - TYPE is missing</b>
<b>Explanation</b>	This response is given when a CIS information request does not include a valid OBJECT - TYPE in the Information Request Structure.
<b>Action</b>	This is a program error. Inform the owner of the program.
<b>03010004</b>	<b>Nothing was found for this request</b>
<b>Explanation</b>	No data found for this request.
<b>Action</b>	None required.
<b>03010005</b>	<b>Invalid OBJECT - TYPE</b>
<b>Explanation</b>	This response is given when a CIS information request includes an invalid OBJECT - TYPE in the Information Request Structure.
<b>Action</b>	This is a program error. Inform the owner of the program.
<b>03010006</b>	<b>Invalid INFO - LEVEL</b>
<b>Explanation</b>	This response is given when a CIS information request includes an invalid INFO - LEVEL in the Information Request Structure.
<b>Action</b>	This is a program error. Inform the owner of the program.
<b>03010007</b>	<b>BLOCK - LENGTH too short for OBJECT - TYPE</b>
<b>Explanation</b>	This response is given when a CIS information request includes a too short BLOCK - LENGTH for the object specified in OBJECT - TYPE.
<b>Action</b>	This is a program error. Inform the owner of the program.
<b>03010008</b>	<b>User selection must be unique</b>
<b>Explanation</b>	The user (user ID and token or user ID and physical user ID) selection must be unique.
<b>Action</b>	This is a program error. Inform the owner of the program.
<b>03010009</b>	<b>Service selection must be unique</b>
<b>Explanation</b>	The service selection must be unique.
<b>Action</b>	This is a program error. Inform the owner of the program.

<b>03010010</b>	<b>Topic selection must be unique</b>
<b>Explanation</b>	The topic selection must be unique.
<b>Action</b>	This is a program error. Inform the owner of the program.

# 25

## Message Class 0302 - Configuring and Controlling Service

---

The messages have the format:

0302*nnnn*

where 0302 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

Messages of class 0302 are caused by the Administration Service or related components. The messages can appear in the log file of the Administration Service.

Messages of class 0302 can result, for example, from `etbsrv` or in programs generated with Command and Information Services IDLs.

<b>03020000</b>	<b>Administration Service successfully executed</b>
<b>Explanation</b>	The Administration Service action has completed successfully.
<b>Action</b>	None.
<b>03020001</b>	<b>Invalid arguments</b>
<b>Explanation</b>	The Administration Service has detected invalid or missing arguments.
<b>Action</b>	Contact Software AG Support.

<b>03020013</b>	<b>Broker does not exist</b>
<b>Explanation</b>	The configuration data of the requested broker is missing.
<b>Action</b>	None. This message is for information purposes only.
<b>03020014</b>	<b>Broker already exists</b>
<b>Explanation</b>	The configuration data of the requested broker does already exist.
<b>Action</b>	None. This message is for information purposes only.
<b>03020015</b>	<b>Broker name wrong or missing</b>
<b>Explanation</b>	The name of the broker is missing or contains illegal character(s).
<b>Action</b>	Repeat the last action with a valid broker name.
<b>03020016</b>	<b>TCP port duplicate or wrong value</b>
<b>Explanation</b>	The name of the TCP port is duplicate or is invalid.
<b>Action</b>	Check and correct the arguments of the program call.
<b>03020017</b>	<b>SSL port duplicate or wrong value</b>
<b>Explanation</b>	The name of the SSL port is duplicate or is invalid.
<b>Action</b>	Check and correct the arguments of the program call.
<b>03020019</b>	<b>Missing port number</b>
<b>Explanation</b>	The port number is missing or is invalid.
<b>Action</b>	Repeat the last action with a valid port number.
<b>03020029</b>	<b>Not yet implemented</b>
<b>Explanation</b>	The function that was called has not yet been implemented.
<b>Action</b>	Contact Software AG Support.
<b>03020046</b>	<b>Invalid command</b>
<b>Explanation</b>	An invalid command was detected.
<b>Action</b>	None. This message is for information purposes only.

<b>03020049</b>	<b>BROKER-ID wrong or missing</b>
<b>Explanation</b>	No broker ID or an invalid ID was passed to the Administration Service.
<b>Action</b>	Reenter the Broker ID in the used application; do not use special characters.
<b>03020050</b>	<b>CIS Information service request failed</b>
<b>Explanation</b>	A broker CIS information request failed.
<b>Action</b>	If the target broker has started, check its log file. For detailed information you may need to increase the trace level.
<b>03020053</b>	<b>Invalid credentials</b>
<b>Explanation</b>	Invalid credentials were used to access the Administration Service or a specific broker. This message can be given after a change of password.
<b>Action</b>	Log on required in the used application.
<b>03020058</b>	<b>SSL certificate or key file not found</b>
<b>Explanation</b>	The SSL certificates could not be found in the EntireX directory <i>config/etb</i> .
<b>Action</b>	Create your own SSL certificates and make available in the EntireX directory <i>config/etb</i> .
<b>03020063</b>	<b>Missing attribute file</b>
<b>Explanation</b>	No suitable attribute file could be found when creating the thread context.
<b>Action</b>	None. This message is for information purposes only.
<b>03020064</b>	<b>Missing broker API version</b>
<b>Explanation</b>	The broker API version could not be detected.
<b>Action</b>	None. This message is for information purposes only.
<b>03020068</b>	<b>Invalid attribute file</b>
<b>Explanation</b>	The contents of the attribute file are invalid. This error can occur when a broker attribute file is being migrated, or when a broker or service is to be added with command <code>etbsrv BROKER SERVICE CREATE &lt;name&gt; &lt;attribute file name&gt;</code> using an existing attribute file.
<b>Action</b>	Correct the attribute file.

<b>03020073</b>	<b>Request timeout occurred</b>
<b>Explanation</b>	A request to start, stop or restart a broker could not be performed within a defined period. This error can occur if a broker process is stopped immediately due to an error in the broker attribute file.
<b>Action</b>	Check the broker log file.
<b>03020075</b>	<b>Instance "EntireX Broker <i>brokerId</i>" is not reachable or not running</b>
<b>Explanation</b>	EntireX Broker is not available or stopped.
<b>Action</b>	Try to start the EntireX Broker.
<b>03020076</b>	<b>Instance "EntireX RPC Server for <i>serverType serverId</i>" is not reachable or not running</b>
<b>Explanation</b>	EntireX RPC Server is not available or stopped.
<b>Action</b>	Try to start The EntireX RPC Server.
<b>03020077</b>	<b>Administration port number of instance "EntireX RPC Server for <i>serverType serverId</i>" is invalid</b>
<b>Explanation</b>	Administration port number of the EntireX RPC Server is empty or invalid.
<b>Action</b>	Open the Command Central server configuration of the RPC Server and insert a valid administration port number.
<b>03020079</b>	<b>Administration port number &lt;<i>port number</i>&gt; is invalid. Administration port number is in use for instance &lt;<i>InstanceId</i>&gt;</b>
<b>Explanation</b>	Administration port number is in use for another RPC server instance.
<b>Action</b>	Enter a valid administration port number that is not in use by another RPC server instance.
<b>03020080</b>	<b>EntireX RPC Server for .NET is only available for Windows operating systems</b>
<b>Explanation</b>	EntireX RPC Server for .NET is only available for Windows operating systems.
<b>Action</b>	None. This message is for information purposes only.
<b>03020081</b>	<b>Program <i>rpcserver.exe</i> is not available</b>
<b>Explanation</b>	Program <i>rpcserver.exe</i> could not be found in the <i>EntireX/bin</i> directory.
<b>Action</b>	Check the EntireX installation and make sure that the program <i>rpcserver.exe</i> is available in the <i>EntireX/bin</i> directory.

<b>03020082</b>	<b>&lt;Function&gt; not available for this Broker version (Broker version = X.X, requires Broker version Y.Y)</b>
<b>Explanation</b>	The selected function in Command Central, for example <b>UOW statistics</b> , is not available for the Broker connected.
<b>Action</b>	None. This message is for information purposes only.

# 26

## Message Class 0400 - Direct RPC

---

This message class contains messages that can occur with Direct RPC. The messages have the format:

0400*nnnn*

where 0400 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>04000001</b>	<b>Exception during processing call: &lt;exception text&gt;</b>
<b>Explanation</b>	An unexpected error occurred during processing of a call from an RPC client or server.
<b>Action</b>	Check the exception text for details.
<b>4000002</b>	<b>Transport session not active</b>
<b>Explanation</b>	A call happens on an adapter connection although this connection instance is disabled.
<b>Action</b>	Contact Software AG Support.
<b>04000003</b>	<b>Invalid usage of Direct RPC (&lt;class/server/service&gt;)</b>
<b>Explanation</b>	An RPC client sends a request to an RPC server using Direct RPC. This is not supported.
<b>Action</b>	Change your application setup so that <ol style="list-style-type: none"><li>1. an RPC client sends a request to a Direct RPC listener, or</li><li>2. a Direct RPC adapter service sends a request to an RPC server.</li></ol>

<b>04000004</b>	<b>Invalid register: replicate from different transport (&lt;class/server/service&gt;)</b>
<b>Explanation</b>	Both a listener and an RPC server try to register using the same class/server/service name. This is not supported.
<b>Action</b>	Change your application so that only listeners or RPC servers register for the same class/server/service name.
<b>04000005</b>	<b>Send with wait not possible for servers (&lt;class/server/service&gt;)</b>
<b>Explanation</b>	An RPC server issues a synchronous send command, which is not supported.
<b>Action</b>	Check your configuration: for example, an ACI server might be using Direct RPC.
<b>04000006</b>	<b>Send with no wait not possible for clients (&lt;class/server/service&gt;)</b>
<b>Explanation</b>	An RPC client issues an asynchronous send command, which is not supported.
<b>Action</b>	Check your configuration: for example, an ACI client might be using Direct RPC.
<b>04000007</b>	<b>Receive not possible for clients (&lt;class/server/service&gt;)</b>
<b>Explanation</b>	An RPC client issues a receive command, which is not supported.
<b>Action</b>	Check your configuration: for example, an ACI client might be using Direct RPC.
<b>04000008</b>	<b>Direct RPC not started</b>
<b>Explanation</b>	An adapter service or a listener issues a call using Direct RPC, but the Direct RPC component is not started.
<b>Action</b>	Start the Direct RPC component, or ignore error if stopping of Direct RPC is intended.
<b>04000009</b>	<b>Information Service error: &lt;detailed message&gt;</b>
<b>Explanation</b>	An error occurred while processing an Information Service request.
<b>Action</b>	See error message for details.
<b>04000010</b>	<b>Command Service error: &lt;detailed message&gt;</b>
<b>Explanation</b>	An error occurred while processing a Command Service request.
<b>Action</b>	See error message for details.

<b>04000011</b>	<b>Compression not supported</b>
<b>Explanation</b>	The compression feature is not supported.
<b>Action</b>	Disable compression (use value "NO_COMPRESSION") on the RPC client or RPC server.
<b>04000012</b>	<b>Publish and Subscribe not supported</b>
<b>Explanation</b>	The Publish and Subscribe functionality is not supported.
<b>Action</b>	Change your application.
<b>04000013</b>	<b>Character set for &lt;character set type&gt; not available</b>
<b>Explanation</b>	No character set is available for an RPC call.
<b>Action</b>	Contact Software AG Support.
<b>04000014</b>	<b>Encoding LS=&lt;char set name&gt; not supported</b>
<b>Explanation</b>	The specified character set is not available. Only character sets supported by the Java JVM can be used.
<b>Action</b>	Change the configuration of the RPC client or server.
<b>04000015</b>	<b>&lt;error message&gt;</b>
<b>Explanation</b>	An error during character set conversion.
<b>Action</b>	See error message for details.
<b>04000017</b>	<b>Send with wait not possible for UOWs (&lt;service&gt;)</b>
<b>Explanation</b>	UOWs can be sent only asynchronously.
<b>Action</b>	Check your configuration: for example, an ACI server might be using Direct RPC.
<b>04000018</b>	<b>Unable to load/store SCM conversation data: &lt;detailed message&gt;</b>
<b>Explanation</b>	An error occurred while loading or storing conversation data.
<b>Action</b>	See error message for details.
<b>04000019</b>	<b>Invalid usage of convid: &lt;detailed message&gt;</b>
<b>Explanation</b>	A conversation ID has been used in an invalid context.
<b>Action</b>	See error message for details.

<b>04000020</b>	<b>No listener enabled for &lt;service&gt;</b>
<b>Explanation</b>	Either no listener exists or is not enabled for the specified service.
<b>Action</b>	Create or enable a listener for this service or use a different service.
<b>04000021</b>	<b>UOW Processor not available</b>
<b>Explanation</b>	Commit of a UOW fails.
<b>Action</b>	Contact Software AG Support.
<b>04001000</b>	<b>Notification not processed</b>
<b>Explanation</b>	Processing the notification in the Integration Server fails.
<b>Action</b>	Check the server log for errors.
<b>04001001</b>	<b>Notification processing cancelled: &lt;detailed message&gt;</b>
<b>Explanation</b>	Processing the notification in the Integration Server has been cancelled.
<b>Action</b>	See error message for details.

# 27 Message Class 0800 - webMethods EntireX Adapter for Integration Server

---

Messages are logged with message class 0800. In the Administrator, section **Settings > Logging** you find the logging settings in the tree for Adapters. See the *webMethods Integration Server Administrator's Guide* for changing the logging settings.

The messages have the format:

0800nnnn

where 0800 is the message class, and

nnnn is the message number in the range 0000 - 9999

**08000211** <error detail>

**Explanation** An error occurred during the execution of an adapter service. The error message contains a detailed description of the error.

**Action** Use error detail to fix.

**08000212** **WmEntireX: exception during register: <exception detail>**

**Explanation** An error occurred during REGISTER call. This can happen when an adapter listener starts.

**Action** Use exception detail to fix. This is typically a configuration issue.

<b>08000213</b>	<b>WmEntireX: exception during receive: &lt;exception detail&gt;</b>
<b>Explanation</b>	An error occurred during RECEIVE call in an adapter listener.
<b>Action</b>	Use exception detail to fix.
<b>08000215</b>	<b>WmEntireX: connection: unknown resourceDomainName: &lt;name&gt;</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Contact Software AG Support.
<b>08000219</b>	<b>WmEntireX: connection.receive: unknown server command &lt;actual command&gt;</b>
<b>Explanation</b>	<actual command> was sent to the adapter listener. This is unknown and cannot be handled.
<b>Action</b>	Change command. The only known command is PING.
<b>08000220</b>	<b>WmEntireX: connection.receive: conversational call &lt;actual packet type&gt; rejected</b>
<b>Explanation</b>	The adapter listener does not support conversational RPC.
<b>Action</b>	Use non-conversational calls.
<b>08000221</b>	<b>WmEntireX: connection.receive: illegal packet type &lt;actual packet type&gt;</b>
<b>Explanation</b>	The adapter listener received an illegal packet type.
<b>Action</b>	Change your RPC client to send valid packet types.
<b>08000228</b>	<b>WmEntireX: exception during resource domain lookup: &lt;exception detail&gt;</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Contact Software AG Support.
<b>08000229</b>	<b>WmEntireX: unsupported RPC protocol version: &lt;actual protocol version&gt;</b>
<b>Explanation</b>	The RPC client is sending an old protocol version that is not supported by the adapter listener.
<b>Action</b>	Update your RPC client.
<b>08000231</b>	<b>WmEntireX: Asynchronous Listener Notification can only be used with a Reliable RPC Listener Connection</b>
<b>Explanation</b>	An asynchronous adapter listener notification cannot be used with an RPC Listener connection which is not reliable. This error can only occur if an adapter notification is created manually.
<b>Action</b>	Use a Reliable RPC Listener connection for the adapter notification.

<b>08000234</b>	<b>WmEntireX: connection.receive: illegal call for Reliable RPC rejected</b>
<b>Explanation</b>	A reliable RPC listener received a non-reliable call from an RPC client.
<b>Action</b>	Configure the RPC client to use Reliable RPC.
<b>08000236</b>	<b>WmEntireX: connection.receive: illegal call for non Reliable RPC rejected</b>
<b>Explanation</b>	An RPC listener received a reliable call from an RPC client.
<b>Action</b>	Configure the RPC client not to use Reliable RPC.
<b>08000250</b>	<b>WmEntireX: exception in createManagedConnectionObject: &lt;exception detail&gt;</b>
<b>Explanation</b>	An error occurred when creating an adapter connection. The error message contains a detailed description of the error.
<b>Action</b>	Use exception detail to fix.
<b>08000301</b>	<b>WmEntireX: exception during listener startup: &lt;exception detail&gt;</b>
<b>Explanation</b>	An error occurred while starting a listener. The error message contains a detailed description of the error.
<b>Action</b>	Use exception detail to fix.
<b>08000310</b>	<b>WmEntireX: listener.processNotificationResults error: &lt;error details&gt;</b>
<b>Explanation</b>	The Integration Server runtime reported an error during notification.
<b>Action</b>	Use exception details to fix.
<b>08000311</b>	<b>WmEntireX: listener.waitForData (listener for Reliable RPC) error: &lt;exception detail&gt;</b>
<b>Explanation</b>	An error occurred during processing of an RPC request in a reliable listener. The error message contains a detailed description of the error.
<b>Action</b>	Use exception detail to fix.
<b>08000315</b>	<b>WmEntireX: invalid userid password combination</b>
<b>Explanation</b>	A listener is configured to execute the service with client credentials. Either no credentials (user ID and password) were passed in the RPC call, or an invalid user ID or password was specified (for example the user does not exist in the Integration Server).
<b>Action</b>	Configure the RPC client to send a valid user ID/password combination.

<b>08000333</b>	<b>WmEntireX: exception during syncListener.runNotification: &lt;exception details&gt;</b>
<b>Explanation</b>	The adapter listener trapped into an exception while processing a notification event.
<b>Action</b>	Use exception details to fix.
<b>08000342</b>	<b>WmEntireX: listener &lt;entry or exit&gt; handler &lt;service name&gt; throws exception &lt;exception detail&gt;</b>
<b>Explanation</b>	An error occurred in a listener during the call of an entry or exit handler. The error message contains a detailed description of the error.
<b>Action</b>	Use exception detail to fix.
<b>08000343</b>	<b>WmEntireX: listener &lt;entry or exit&gt; handler &lt;service name&gt; is not a service</b>
<b>Explanation</b>	Either a service with the given name does not exist or there is an Integration Server object with the same name which is not a service.
<b>Action</b>	Specify a valid entry or exit handler service in the listener configuration.
<b>08000362</b>	<b>WmEntireX: exception during listener.runAsyncNotification: &lt;exception detail&gt;</b>
<b>Explanation</b>	An error occurred during the processing of a notification in a reliable listener. The error message contains a detailed description of the error.
<b>Action</b>	Use exception detail to fix.
<b>08000500</b>	<b>WmEntireX: exception while executing service: &lt;exception detail&gt;</b>
<b>Explanation</b>	An error occurred during the processing of an adapter service. The error message contains a detailed description of the error.
<b>Action</b>	Use exception detail to fix.
<b>08000603</b>	<b>Error in transaction handling(&lt;connection id&gt;): &lt;exception detail&gt;</b>
<b>Explanation</b>	An error occurred in the transactional logic of an adapter service. The error message contains a detailed description of the error.
<b>Action</b>	Use exception detail to fix.

# 28

## Message Class 1000 - RPC C Runtime System

---

This message class is returned if an error occurred in the RPC C runtime system layer. Messages of this class have the format:

1000*nnnn*

where 1000 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

<b>10000001</b>	<b>Error</b>
<b>Explanation</b>	System error.
<b>Action</b>	Check system log to find out which error occurred.
<b>10000002</b>	<b>Service not implemented</b>
<b>Explanation</b>	A service call was requested for a platform not implemented.
<b>Action</b>	Contact Software AG Support.
<b>10000003</b>	<b>A non-C file was found</b>
<b>Explanation</b>	A load library has found a module that is not a shared library. This message is useful in a CICS/COBOL environment to distinguish between C (shared) libraries and COBOL native programs.
<b>Action</b>	Call as COBOL program.

<b>10000004</b>	<b>System Services not initialized</b>
<b>Explanation</b>	Initialize some System Services logic: tracing, error boxes.
<b>Action</b>	Code <code>SS_INIT()</code> if above functionalities are required.
<b>10000005</b>	<b>Resource temporarily unavailable</b>
<b>Explanation</b>	Indicates system shortage, especially when starting new threads.
<b>Action</b>	Try later or terminate some other task(s), if applicable.
<b>10000006</b>	<b>Permission denied</b>
<b>Explanation</b>	<ol style="list-style-type: none"><li>1. Windows: System request <code>WaitForSingleObject()</code> or <code>GetExitCodeThread()</code> failed.</li><li>2. CICS: <code>EXEC CICS LOAD PROGRAM(MAPNAME) failed with NOTAUTH.</code></li></ol>
<b>Action</b>	<ol style="list-style-type: none"><li>1. Restart Windows.</li><li>2. Contact your system administrator.</li></ol>
<b>10000007</b>	<b>Not enough memory</b>
<b>Explanation</b>	A system request returned with <code>ENOMEM</code> (UNIX).
<b>Action</b>	Try to locate the reason for this shortage and remove it from your system.
<b>10000008</b>	<b>Thread doesn't exist</b>
<b>Explanation</b>	A system request returned with <code>ESRCH</code> (UNIX) or <code>CreateThread()/GetExitCodeThread()</code> (Windows) failed.
<b>Action</b>	<ol style="list-style-type: none"><li>1. If this error is returned for system requests such as <code>pthread_create()</code> or <code>CreateThread()</code>, it indicates system shortage. Close unnecessary applications.</li><li>2. For wait requests such as <code>pthread_join()</code> or <code>GetExitCodeThread()</code> this indicates that the thread already has terminated.</li></ol>
<b>10000009</b>	<b>Deadlock detected</b>
<b>Explanation</b>	A system request has been cancelled with <code>EDEADLK</code> ( <code>EDEADLOCK</code> ).
<b>Action</b>	Correct your program logic. If the error is caused by an EntireX RPC server operation, contact Software AG Support.

<b>10000010</b>	<b>Invalid Argument(s) supplied</b>
<b>Explanation</b>	A system request has been cancelled with EINVAL (UNIX) or INVREQ (CICS).
<b>Action</b>	Correct your program logic. If the error is caused by an EntireX RPC server operation, contact Software AG Support.
<b>10000011</b>	<b>Thread cancelled</b>
<b>Explanation</b>	A thread has been cancelled by the operating system.
<b>Action</b>	Check system resources.
<b>10000012</b>	<b>Interrupted</b>
<b>Explanation</b>	One of the pthread_cond_ functions is in EINTR condition. This return code normally will be handled in a DO-WHILE loop.
<b>Action</b>	Re-issue request.
<b>10000013</b>	<b>Timeout</b>
<b>Explanation</b>	A wait for an event finished with a timeout.
<b>Action</b>	None.
<b>10000014</b>	<b>Unknown error</b>
<b>Explanation</b>	The RPC Server for CICS returns this code for CICS error codes.
<b>Action</b>	Check the system log for the kind of error.
<b>10000015</b>	<b>Cannot load shared library</b>
<b>Explanation</b>	Loading a shared library failed. The library name can be found in accompanying messages.
<b>Action</b>	Check that the shared library is in the server's PATH.
<b>10000016</b>	<b>Cannot load function</b>
<b>Explanation</b>	A shared library has been found but it did not contain the function name. Library name and function name can be found in accompanying messages.
<b>Action</b>	Check proper shared library in the server's PATH.

<b>10000017</b>	<b>CICS length error</b>
<b>Explanation</b>	A CICS LINK request failed with CICS RESP LENGERR.
<b>Action</b>	More detailed information (RESP, RESP2) will be written to the trace output.
<b>10000018</b>	<b>Reserved</b>
<b>10000019</b>	<b>Invalid arguments supplied</b>
<b>Explanation</b>	This code is returned by the RPC Server for CICS when WAIT/POST functions are failing.
<b>Action</b>	If part of RPC server errors, contact Software AG Support.
<b>10000020</b>	<b>File not found</b>
<b>Explanation</b>	Loading a file failed. The file name can be found in accompanying messages. This return code will be used by RPC Server for CICS to first test if the file is of type Shared Library or COBOL.
<b>Action</b>	Check if the named file is in the server's DFHRPL steplib.
<b>10000021</b>	<b>Not authorized</b>
<b>Explanation</b>	An RPC Server for CICS has tried to start a (user)task with the user ID of the client, but CICS rejected with USERIDERR. The client user ID can be found in accompanying messages.
<b>Action</b>	Contact your system administrator.
<b>10000022</b>	<b>Thread has abended</b>
<b>Explanation</b>	A user server program under CICS has terminated abnormally. The RPC server will continue to process.
<b>Action</b>	Correct your server program.
<b>10000024</b>	<b>Process could not be started/does not exist</b>
<b>Explanation</b>	A request to start a new server process returned with error. This kind of error will occur in environments where a server process can be started from an RPC Online Maintenance Facility tool.
<b>Action</b>	Check to see if a process already exists. Otherwise check system messages.

<b>10000025</b>	<b>Read from console failed</b>
<b>Explanation</b>	Input for RPC Online Maintenance Facility tools is not possible. Note: An RPC Online Maintenance Facility is not supported on every platform.
<b>Action</b>	For CICS: Check the MAPSET definition for ERXMAPS.
<b>10000026</b>	<b>Write to console failed</b>
<b>Explanation</b>	Output for the RPC Online Maintenance Facility is not possible. Note: An RPC Online Maintenance Facility is not supported on every platform.
<b>Action</b>	For CICS: Check the MAPSET definition for ERXMAPS.
<b>10000027</b>	<b>Shared memory already exists</b>
<b>Explanation</b>	This message is used internally.
<b>Action</b>	None.
<b>10000029</b>	<b>Error in DISEI - RC : nnnnnnnn</b>
<b>Explanation</b>	An error in the RPC Server eventing routines occurred. <i>nnnnnnnn</i> contains the return code from a DISEI macro.
<b>Action</b>	Contact Software AG Support.
<b>10000030</b>	<b>Error in ENAEI - RC : nnnnnnnn</b>
<b>Explanation</b>	An error within the RPC Server eventing routines occurred. <i>nnnnnnnn</i> contains the return code from an ENAEI macro.
<b>Action</b>	Contact Software AG Support.
<b>10000031</b>	<b>Failed to execute worker task</b>
<b>Explanation</b>	An error occurred while establishing an RPC server worker task. This error messages occurs in conjunction with message 10000032, which will contain a reason code.
<b>Action</b>	See message 10000032.
<b>10000032</b>	<b>Reason Code : n</b>
<b>Explanation</b>	Contains the reason code of a previous 10000031 message.
<b>Action</b>	Action depends on the reason code <i>n</i> : <ul style="list-style-type: none"> <li>1 The SDF variable ENTERPARM in S-procedure START-RPC-SERVER is not set up. Correct the job control and rerun the job.</li> <li>2 An error occurred while a PUTVAR macro is executed. Contact Software AG Support.</li> <li>3 The SDF variable ENTERPARM in S-procedure START-RPC-SERVER is not set up correctly. Correct the job control and rerun the job.</li> </ul>

- 4 An error occurred during execution of a REQM macro. Contact Software AG Support.
- 5 An error occurred during execution of a RELM macro. Contact Software AG Support.
- 6 The SDF variable ENTERPARM in S-procedure START-RPC-SERVER is not set up correctly. The placeholder WORKER-PARAMETER could not be found. Correct the job control and rerun the job.

**1000033 Worker task successfully connected to shared memory**

**Explanation** Informational message.

**Action** None.

**1000034 SDF variable MAIN-TASK-TSN could not be read - GETVAR RC : nnnnnnnn**

**Explanation** An error in macro GETVAR occurred. The SDF variable MAIN-TASK-TSN in S-procedure START-RPC-SERVER could not be read. *nnnnnnnn* contains the GETVAR return code.

**Action** Make sure that MAIN-TASK-TSN is contained in the parameter declaration section of START-RPC-SERVER. Correct the job control and rerun the job.

**1000035 Server main task is initializing**

**Explanation** Informational message.

**Action** None.

**1000036 Server worker task is initializing**

**Explanation** Informational message.

**Action** None.

**1000037 ENAMP failed while initializing the main task - ENAMP RC : nnnnnnnn**

**Explanation** An error within the RPC Server main task initialization routine occurred. *nnnnnnnn* contains the return code from an ENAMP macro.

**Action** Contact Software AG Support.

**1000038 ENAMP failed while connecting the worker task - ENAMP RC : nnnnnnnn**

**Explanation** An error within the RPC Server worker task initialization routine occurred. *nnnnnnnn* contains the return code from an ENAMP macro.

**Action** Contact Software AG Support.

<b>10000039</b>	<b>SDF variable CURRENT-TSN could not be read - GETVAR RC : nnnnnnnn</b>
<b>Explanation</b>	An error in macro GETVAR occurred. The SDF variable CURRENT-TSN in S-procedure START-RPC-SERVER could not be read. <i>nnnnnnnn</i> contains the GETVAR return code.
<b>Action</b>	Make sure that CURRENT-TSN is set up correctly. Correct the job control and rerun the job.
<b>10000040</b>	<b>Request memory failed - REQMP RC : nnnnnnnn</b>
<b>Explanation</b>	An error within the RPC Server initialization routine occurred. <i>nnnnnnnn</i> contains the return code from a REQMP macro.
<b>Action</b>	Contact Software AG Support.
<b>10000041</b>	<b>Main task shared memory enabled successfully</b>
<b>Explanation</b>	Informational message.
<b>Action</b>	None.
<b>10000042</b>	<b>ENAMP failed - invalid pool address</b>
<b>Explanation</b>	An error within the RPC Server initialization routine occurred.
<b>Action</b>	Contact Software AG Support.
<b>10000043</b>	<b>Error in POSSIG - RC : nnnnnnnn</b>
<b>Explanation</b>	An error within the RPC Server eventing routines occurred. <i>nnnnnnnn</i> contains the return code from a POSSIG macro.
<b>Action</b>	Contact Software AG Support.
<b>10000044</b>	<b>Error in SOLSIG - RC : nnnnnnnn</b>
<b>Explanation</b>	An error within the RPC Server eventing routines occurred. <i>nnnnnnnn</i> contains the return code from a SOLSIG macro.
<b>Action</b>	Contact Software AG Support.
<b>10000045</b>	<b>Error in DISMP - RC : nnnnnnnn</b>
<b>Explanation</b>	An error within the RPC Server termination routine occurred. <i>nnnnnnnn</i> contains the return code from a DISMP macro.
<b>Action</b>	Contact Software AG Support.

<b>10000046</b>	<b>Shared memory disabled</b>
<b>Explanation</b>	Informational message.
<b>Action</b>	None.
<b>10000047</b>	<b>Disconnected from shared memory</b>
<b>Explanation</b>	Informational message.
<b>Action</b>	None.
<b>10000048</b>	<b>RPC Server task ended</b>
<b>Explanation</b>	Informational message.
<b>Action</b>	None.
<b>10000049</b>	<b>Failed to load User Exit</b>
<b>Explanation</b>	Either the initialization user exit or the termination user exit, specified in the RPC server configuration file, could not be loaded.
<b>Action</b>	Make sure that server parameters INIT_EXIT and TERM_EXIT are set up correctly and that the library containing the exit(s) has been included into the BLSLIB chain of the RPC server startup job control.
<b>10000050</b>	<b>Call Initialization User Exit</b>
<b>Explanation</b>	Informational message.
<b>Action</b>	None.
<b>10000051</b>	<b>Call Termination User Exit</b>
<b>Explanation</b>	Informational message.
<b>Action</b>	None.
<b>10000052</b>	<b>SINF failed while retrieving system information - SINF RC : nnnnnnnn</b>
<b>Explanation</b>	An error within the RPC Server initialization routine occurred. <i>nnnnnnnn</i> contains the return code from a SINF macro.
<b>Action</b>	Contact Software AG Support.

<b>1000053</b>	<b>View already exists</b>
<b>Explanation</b>	This message is used internally.
<b>Action</b>	None.
<b>1000054</b>	<b>Cannot open file</b>
<b>Explanation</b>	A request to open a file was not successful.
<b>Action</b>	This message is accompanied by other messages. The RPC server could not open a required file, (e.g the server-side mapping container, see <i>Server-side Mapping Files</i> in the RPC server documentation for z/OS (CICS, Batch, IMS)   BS2000. The RPC server might stop.
<b>1000055</b>	<b>CICS Container error</b>
<b>Explanation</b>	A CICS PUT/GET CHANNEL or STARTBROWS/GETNEXT/ENDBROWSE CONTAINER request failed.
<b>Action</b>	More detailed information (RESP, RESP2) will be written to the trace output.
<b>1000056</b>	<b>Process stop</b>
<b>Explanation</b>	This message is used internally.
<b>Action</b>	None.
<b>1000057</b>	<b>Trace synchronization table overflow</b>
<b>Explanation</b>	Informational message.
<b>Action</b>	None.
<b>1000058</b>	<b>Fork-child</b>
<b>Explanation</b>	This message is used internally.
<b>Action</b>	None.

# 29

## Message Class 1001 - RPC Protocol

---

This class indicates an error occurred in the RPC Protocol. Messages of this class have the format:

1001*nnnn*

where 1001 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

<b>10010004</b>	<b>Not enough memory to receive request</b>
<b>Explanation</b>	The RPC server does not have enough memory to receive the client request.
<b>Action</b>	If your server is a Natural RPC Server, increase the <code>MAXBUFF</code> memory parameter.
<b>10010005</b>	<b>Out of memory</b>
<b>Explanation</b>	The RPC server is unable to allocate enough memory to fulfill the request.
<b>Action</b>	Increase the memory resources of your RPC server.
<b>10010007</b>	<b>Internal error [Response &lt;number&gt; from RPC Server]</b>
<b>Explanation</b>	The RPC server returned an internal error. A more specific error <number> may follow.
<b>Action</b>	<ol style="list-style-type: none"><li>1. See the trace on the server and/or client side and contact Software AG Support.</li><li>2. See under error &lt;number&gt; for an explanation and action to take.</li></ol>

<b>10010008</b>	<b>Unknown version</b>
<b>Explanation</b>	This error message is returned in the following situations: <ol style="list-style-type: none"><li>1. The RPC protocol version you requested is not supported by your RPC server.</li><li>2. The server command is not known.</li><li>3. There is an error in the RPC protocol header.</li></ol>
<b>Action</b>	Depending on the situation above, for <ol style="list-style-type: none"><li>1. If possible, upgrade your RPC server or use only those data types supported by your RPC server in the IDL file.</li><li>2. See the trace on the server and/or client side and contact Software AG Support.</li></ol>
<b>10010009</b>	<b>Invalid format buffer</b>
<b>Explanation</b>	The format buffer within the RPC protocol could not be parsed.
<b>Action</b>	Contact Software AG Support.
<b>10010010</b>	<b>Invalid value buffer</b>
<b>Explanation</b>	The value buffer within the RPC protocol could not be parsed.
<b>Action</b>	Contact Software AG Support.
<b>10010011</b>	<b>Invalid packet type</b>
<b>Explanation</b>	The packet type shipped with the RPC protocol is not valid.
<b>Action</b>	Contact Software AG Support.
<b>10010012</b>	<b>Authorization or initialization failed</b>
<b>Explanation</b>	One of the following occurred on the RPC server side: <ol style="list-style-type: none"><li>1. A Natural RPC Server secured by Natural Security denied access because the Natural RPC Security ticket could not be evaluated correctly or is missing.</li><li>2. Initialization of a Natural RPC Server failed.</li><li>3. An EntireX RPC Server for z/OS CICS® secured by CICS security denied the user's request.</li></ol>
<b>Action</b>	Depending on the situation described above, check your security configuration on the server side.

<b>10010013</b>	<b>No match with pattern</b>
<b>Explanation</b>	Natural RPC Server message.
<b>Action</b>	Contact Software AG Support.
<b>10010014</b>	<b>Wrong Version of SYSRPC</b>
<b>Explanation</b>	Natural RPC Server message.
<b>Action</b>	Contact Software AG Support.
<b>10010015</b>	<b>Recursive RPC tried</b>
<b>Explanation</b>	Natural RPC Server message.
<b>Action</b>	Contact Software AG Support.
<b>10010016</b>	<b>Callee not found. [&lt;Software AG IDL File Information&gt;] [&lt;RPC Server Message Appendix&gt;]</b>
<b>Explanation</b>	<p>The RPC server did not find the target customer server program. This message can be appended optionally by IDL information and an RPC Server Message Appendix, where</p> <p>&lt;Software AG IDL File Information&gt; is either</p> <ul style="list-style-type: none"> <li>■ Library=&lt;Library&gt; see library-definition under <i>Software AG IDL Grammar</i> in the IDL Editor documentation</li> <li>or</li> <li>■ Library=&lt;Library&gt;, Program=&lt;Program&gt; see program-definition under <i>Software AG IDL Grammar</i> in the IDL Editor documentation</li> </ul> <p>&lt;RPC Server Message Appendix&gt; depends on the target RPC server, for example:</p> <ul style="list-style-type: none"> <li>■ <b>CICS</b> For the <i>RPC Server for CICS</i>: <ul style="list-style-type: none"> <li>■ RPC Server: CICS program &lt;program&gt; not found.</li> </ul> </li> <li>■ <b>COBOL</b> For the <i>RPC Server for Batch (z/OS   BS2000)</i> if configured for COBOL<sup>(1)</sup>, or <i>RPC Server for IMS</i> if configured for COBOL<sup>(2)</sup>: <ul style="list-style-type: none"> <li>■ RPC Server: COBOL program &lt;program&gt; not found.</li> </ul> </li> <li>■ <b>PL/I</b> For the <i>RPC Server for Batch (z/OS)</i> if configured for PL/I<sup>(1)</sup> or <i>RPC Server for IMS</i> if configured for PL/I<sup>(2)</sup>: <ul style="list-style-type: none"> <li>■ RPC Server: PL/I program &lt;program&gt; not found.</li> </ul> </li> </ul>

- **Java**

For the *RPC Server for Java*:

- RPC Server: java.lang.ClassNotFoundException: <class>
- RPC Server: Method <method> not found in class <class> (java.lang.NoSuchMethodException: <class>.<method>())
- etc.

- **C**

For the *RPC Server for Batch (BS2000)* if configured for C<sup>(1)</sup>, or *RPC Server for C*:

- RPC Server: Library <library> not found.
- RPC Server: Function (Entry Point) <function> not found.
- RPC Server: Interface Object (Library <library> not found.
- RPC Server: Interface Object (Entry Point) <function> not found.
- etc.

**Action**

Depends on the target RPC server:

- **CICS**

For the *RPC Server for CICS*: see *Locating and Calling the Target Server* in the *RPC Server for CICS* documentation on how to make the RPC server customer code available.

- **COBOL**

For the *RPC Server for Batch (z/OS | BS2000)* if configured for COBOL<sup>(1)</sup>, or *RPC Server for IMS* if configured for COBOL<sup>(2)</sup>: see *Locating and Calling the Target Server* in the *z/OS | BS2000 RPC Server* documentation on how to make the RPC server customer code available.

- **PL/I**

For the *RPC Server for Batch (z/OS)* if configured for PL/I<sup>(1)</sup>, or *RPC Server for IMS* if configured for PL/I<sup>(2)</sup>: see *Locating and Calling the Target Server* in the *Batch | IMS RPC Server* documentation on how to make the RPC server customer code available.

- **Java**

The action depends on the <RPC Server Message Appendix> returned. See *Generating a Java Server Interface Object* under *Using the Java Wrapper* and `entirex.server.packagename` in the *RPC Server for Java* documentation for information.

- **C**

For the *RPC Server for Batch (z/OS)* if configured for C<sup>(1)</sup>, or *RPC Server for C*: the action depends on the <RPC Server Message Appendix> returned. See *Locating and Calling the Target Server* in the respective RPC server documentation on how to make the RPC server customer code available.

- etc.

**Note:**

1. See `marshalling` parameter for the *RPC Server for Batch (z/OS | BS2000)*.

2. See `marshalling` parameter IMS RPC Server

**10010017**            **Reserved for internal use**

**10010018**            **Abnormal termination during program execution. Lib=<Library>, Pgm=<Program>[,<Natural Error Info>]**

**Explanation**        The stub or the program/method called by the RPC server ended abnormally. This message can be appended by Natural error information:

```
[,(Natural Error Info: Program=<NAT Pgm>,Error=<NAT Error>,
                               Line=<NAT Line>,Status=<NAT Status>,Level=<NAT Level>)]
<NAT Pgm>            The Natural Program name which caused the error.
<NAT Error>         The Natural Error number.
<NAT Line>          The Line number within the erroneous program which caused the error.
<NAT Status>        See the Natural documentation.
<NAT Level>         See the Natural documentation.
```

**Action**             Correct the program/method called by the RPC server.

**10010019**            **Response from user program out of range**

**Explanation**        The program/method called by the RPC server can return application errors within the range 1 - 9999. The user error is outside of this range.

**Action**             Check your program/method called by the RPC server and correct the error.

**10010020**            **Reserved for internal use**

**10010021**            **Invalid header**

**Explanation**        The header within the RPC protocol is invalid.

**Action**             See the trace on the server and/or client side and contact Software AG Support.

**10010022**            **Unknown server command**

**Explanation**        The RPC protocol contains an unknown server command.

**Action**             Contact Software AG Support.

<b>10010023</b>	<b>Stub parameter definition error</b>
<b>Explanation</b>	The parameter definitions within the stub called by the RPC server are different. This error code is typical if clients send data using an older RPC protocol. The code will be detected by the RPC server to adjust its call information.
<b>Action</b>	When working with the UNIX or Windows RPC server, no action is required if the error message appears just once per call. Multiple appearances indicate a general problem: re-generate your stubs with the template file <code>server.tpl</code> , compile and link them. If the error persists, contact Software AG Support.
<b>10010024</b>	<b>Parameter out of value range</b>
<b>Explanation</b>	The value range for a parameter is outside the defined range. Example: An I1 data type is mapped to a 2-byte integer type in a programming language environment where there is no 1-byte integer type. The range is defined in the interface specification, that is, the IDL file. See <i>Software AG IDL File</i> in the IDL Editor documentation. For I1 it is from -127 to 128. The mapping to a 2-byte integer permits a program to set values less than -127 or greater than 128 which is not allowed for I1.
<b>Action</b>	Check the program and correct the error.
<b>10010025</b>	<b>Parameter max len or array bound required</b>
<b>Explanation</b>	This error message is returned in the following situations: <ol style="list-style-type: none"><li>1. The RPC server cannot handle variable-length data types such as AV, BV and KV without maximum lengths.</li><li>2. The RPC server cannot handle arrays with variable bounds without maximum upper bounds.</li></ol>
<b>Action</b>	Depending on the situation above, for <ol style="list-style-type: none"><li>1. Specify maximum values for the variable-length data types in the IDL file. See <i>Software AG IDL File</i> in the IDL Editor documentation.</li><li>2. Specify maximum values for the upper bounds of the array in the IDL file.</li></ol>
<b>10010026</b>	<b>Invalid string buffer</b>
<b>Explanation</b>	Internal error in the string buffer of the RPC protocol.
<b>Action</b>	Contact Software AG Support.

<b>10010027</b>	<b>Parse error</b>
<b>Explanation</b>	The RPC server cannot parse the RPC protocol.
<b>Action</b>	Contact Software AG Support.
<b>10010028</b>	<b>Library not found</b>
<b>Explanation</b>	The RPC server did not find the library or class given in the RPC protocol.
<b>Action</b>	Check your configuration, server programs and stubs and the library name sent by the client.
<b>10010029</b>	<b>Invalid eyecatcher</b>
<b>Explanation</b>	The header of the RPC protocol contains an invalid eyecatcher.
<b>Action</b>	Contact Software AG Support.
<b>10010030</b>	<b>Parameter array bounds overflow</b>
<b>Explanation</b>	An overflow occurs with an unbounded array whose maximum array bounds are determined in the IDL file. See <i>Software AG IDL File</i> in the IDL Editor documentation.
<b>Action</b>	Check the program and correct the error.
<b>10010031</b>	<b>String buffer item overflow of the RPC protocol</b>
<b>Explanation</b>	Internal error in string buffer.
<b>Action</b>	Contact Software AG Support.
<b>10010032</b>	<b>Reserved for internal use</b>
<b>10010033</b>	<b>Invalid unbounded array</b>
<b>Explanation</b>	During marshalling/unmarshalling on the server side an error occurred when accessing the unbounded array.
<b>Action</b>	One of the following may apply: <ol style="list-style-type: none"> <li>1. The unbounded array was destroyed by your server program. Check the program and correct the error.</li> <li>2. An internal error occurred in the RPC server. Contact Software AG Support.</li> </ol>

<b>10010034</b>	<b>Unbounded array does not match IDL file</b>
<b>Explanation</b>	The data type and attributes of the unbounded array sent to the server do not match the data type or attributes of the unbounded array within the server stub.
<b>Action</b>	Re-generate, compile and link your server stub using the same IDL file as on the client side.
<b>10010035</b>	<b>Conversation already open</b>
<b>Explanation</b>	The client application issues an open conversation RPC request having the conversation already opened.
<b>Action</b>	Contact Software AG Support.
<b>10010036</b>	<b>Conversation already closed</b>
<b>Explanation</b>	The client application issues a close conversation, close conversation commit or conversational RPC request without having any open conversation.
<b>Action</b>	Contact Software AG Support.
<b>10010037</b>	<b>Non-conv call within open conversation</b>
<b>Explanation</b>	The client application issues a non-conversational RPC request while having an open conversation.
<b>Action</b>	Contact Software AG Support.
<b>10010038</b>	<b>Reserved for internal use</b>
<b>10010039</b>	<b>Error code converted to &lt;encoding&gt;, error code is &lt;error code&gt;</b>
<b>Explanation</b>	The RPC server does not reply in the correct encoding. <ul style="list-style-type: none"><li>■ &lt;encoding&gt; ASCII when the RPC server answers in ASCII but EBCDIC is expected</li><li>■ EBCDIC when the RPC server answers in EBCDIC but ASCII is expected</li><li>■ &lt;error code&gt; The error code replied by the Server.</li></ul>
<b>Action</b>	Check that character conversion is correctly configured for the broker. See <i>Internationalization with EntireX</i> .

<b>10010040</b>	<b>Error code cannot be decoded</b>
<b>Explanation</b>	The receiver of an RPC message (client or server) is not able to understand (decode) the message. Possible causes: <ul style="list-style-type: none"> <li>■ character conversion issues</li> <li>■ communicating with an incompatible partner (RPC client to ACI)</li> <li>■ the message is damaged for whatever reason</li> <li>■ etc.</li> </ul> <p>Except for character conversion issues, the broker is not the cause of this error.</p>
<b>Action</b>	<ul style="list-style-type: none"> <li>■ Check that character conversion is correctly configured for the broker and the associated components. See <i>Internationalization with EntireX</i>.</li> <li>■ Check that the server you are communicating with is an RPC server and not, for example, an ACI server.</li> </ul> <p>If the error occurs sporadically, contact Software AG Support.</p>
<b>10010041</b>	<b>Optional parameters not supported by RPC server</b>
<b>Explanation</b>	The RPC server does not support optional parameters. Optional parameters are supported by a Natural RPC Server. EntireX RPC servers do not support optional parameters.
<b>Action</b>	Contact Software AG Support to check whether a newer version of the Natural RPC Server may support the feature.
<b>10010042</b>	<b>Maximum supported depth for Group levels is &lt;level&gt;</b>
<b>Explanation</b>	The maximum level for groups is 99.
<b>Action</b>	Correct your application.
<b>10010043</b>	<b>Change Password not supported by RPC server</b>
<b>Explanation</b>	You tried to use the Change Password feature of the RPC protocol with an RPC server that does not support this feature.
<b>Action</b>	Do not try to change the password with this RPC server.
<b>10010044</b>	<b>Natural RPC client interface object required</b>
<b>Explanation</b>	The IDL you are using contains features which require a Natural client interface object.
<b>Action</b>	Generate a Natural client interface object out of the <i>Software AG IDL File</i> in the IDL Editor documentation and use it with the RPC client. See <i>Using the Natural Wrapper for the Client Side</i> in the Natural Wrapper documentation.

- 10010045**                    **CICS ABEND <myabend> was issued**
- Explanation**                This error indicates an application error code. Application error codes enable the RPC server to return customer-invented errors back to the RPC client in a standardized way without defining an error code field in the IDL.
- Here the RPC Server for CICS received a CICS ABEND code forced by the application server program using the EXEC CICS ABEND ABCODE(*myabend*). The ABEND starts with a letter other than "A" and follows the rules for CICS user ABEND codes. The ABEND code (*myabend*) can be used in the RPC client to gain information about specific application error situations of the server.
- For more information see *Returning Application Errors*.
- Action**                        The error code can be used in RPC clients to test for specific application error codes.
- 
- 10010046**                    **Inconsistent RPC request or Reliable RPC message**
- Explanation**                The string buffer item "REL" shipped with the RPC protocol is not valid with RPC request.
- Action**                        Contact Software AG Support.
- 
- 10010047**                    **Invalid value area**
- Explanation**                The value area in the server mapping file could not be parsed. A server mapping file is a Designer file with extension .cvm. See *Server Mapping Files for COBOL* in the Designer documentation.
- Action**                        Contact Software AG Support.
- 
- 10010048**                    **Inconsistent Reliable RPC message**
- Explanation**                The string buffer item "REL" is missing or invalid.
- Action**                        Contact Software AG Support.
- 
- 10010049**                    **Invalid packet type for Reliable RPC**
- Explanation**                The packet type shipped with the RPC protocol is not valid for the use of reliable RPC. The string buffer item "REL" is not valid for the packet type.
- Action**                        Contact Software AG Support.

<b>10010050</b>	<b>Illegal parameter direction</b>
<b>Explanation</b>	Reliable RPC allows only IDL direction IN parameters.
<b>Action</b>	Update your IDL, i.e. remove any OUT and INOUT parameters, possibly re-generate your interface object and/or update your application, then retry the RPC call.
<b>10010051</b>	<b>RPC request aborted by application program</b>
<b>Explanation</b>	The RPC client communicates with an RPC Server for CICS. The RPC server programmer used EXEC CICS ABEND CANCEL together with RPCUEX01 to abort the RPC server customer code. See <i>Using EXEC CICS ABEND CANCEL</i> under <i>Scenarios and Programmer Information</i> in the RPC Server for CICS documentation.
<b>Action</b>	This is an informational message. How the program continues depends on the application.
<b>10010052</b>	<b>Server mapping not supported by RPC server [ Library &lt;library&gt;, program &lt;program&gt;. ]</b>
<b>Explanation</b>	The RPC server does not support server mapping files (Designer files with extension .cvm). A wrong RPC server was used to execute the RPC request. For <library> see <i>library-definition</i> under <i>Software AG IDL Grammar</i> in the IDL Editor documentation and for <program> see <i>program-definition</i> under <i>Software AG IDL Grammar</i> in the IDL Editor documentation. The following RPC servers support server mapping files: <ul style="list-style-type: none"> <li>■ COBOL RPC servers: RPC Server for z/OS (CICS, Batch, IMS)   BS2000   CICS ECI   AS/400   IMS Connect   CICS Socket Listener. See <i>Server Mapping Files for COBOL</i> in the Designer documentation for more information.</li> <li>■ Natural RPC server. See <i>Server Mapping Files for Natural</i> in the Designer documentation for more information.</li> </ul>
<b>Action</b>	Use an RPC server that supports client-side server mapping files.
<b>10010053</b>	<b>Programming language &lt;language&gt; in server mapping not supported by RPC server. [ Library &lt;library&gt;, program &lt;program&gt;. ]</b>
<b>Explanation</b>	The RPC server does not support the programming language (Natural, COBOL etc.) in the server mapping file (Designer file with extension .cvm). For <library> see <i>library-definition</i> under <i>Software AG IDL Grammar</i> in the IDL Editor documentation and for <program> see <i>program-definition</i> under <i>Software AG IDL Grammar</i> in the IDL Editor documentation. One of the following situations occurred: <ol style="list-style-type: none"> <li>1. At design time with the Designer, a server mapping file containing COBOL mapping was created with COBOL plug-in IDL Extractor for COBOL or COBOL Wrapper (Generate RPC Server). See also <i>Server Mapping Files for COBOL</i> in the Designer documentation. At runtime, however, the RPC server used was not a COBOL RPC server.</li> </ol>

2. At design time with the Designer, a server mapping file containing Natural mapping was created with Natural plug-in IDL Extractor for Natural or Natural Wrapper (Generate RPC Server). See also *Server Mapping Files for Natural* in the Designer documentation.

At runtime, however, the RPC server used was not a Natural RPC server.

**Action**

- For situation 1, use one of the following COBOL RPC servers: RPC Server for z/OS (CICS, Batch, IMS) | BS2000 | CICS ECI | AS/400 | IMS Connect | CICS Socket Listener.
- For situation 2, use a Natural RPC server.

10010054

**Interface type <interface-type> in server mapping not supported by RPC server. [ Library <library>, program <program>. ]**

**Explanation**

The interface type in the server mapping (Batch, DFHCOMMAREA, IMS MPP (IMS Connect) etc.) is not supported by the EntireX Adapter or RPC server and/or the platform the RPC server is running on. For <library> see *library-definition* under *Software AG IDL Grammar* in the IDL Editor documentation and for <program> see *program-definition* under *Software AG IDL Grammar* in the IDL Editor documentation.

At design time with the Designer, a server mapping file (Designer file with extension .cvm) for COBOL with a specific interface type was created with a COBOL plug-in: IDL Extractor for COBOL or COBOL Wrapper (Generate RPC Server).

To call your server program successfully, the target RPC runtime component used must support the interface type. The table below gives an overview of possible combinations of an interface type and RPC server.

Interface Type of your Server Program	z/OS			UNIX/Windows			IBM i	BS2000
	CICS	Batch	IMS	CICS ECI	CICS Socket Listener	IMS Connect	AS/400	Batch
CICS with DFHCOMMAREA Calling Convention	x			x	x			
CICS with DFHCOMMAREA Large Buffer Interface	x				x			
CICS with Channel Container Calling Convention	x				x			
Batch with Standard Linkage Calling Convention		x	x				x	x

Interface Type of your Server Program	z/OS			UNIX/Windows			IBM i	BS2000
	CICS	Batch	IMS	CICS ECI	CICS Socket Listener	IMS Connect	AS/400	Batch
IMS BMP with Standard Linkage Calling Convention			x					
IMS MPP Message Interface (IMS Connect)						x		
COBOL Converter								

**Action** Probably a user error. For example, a CICS interface type was used with an RPC Server for Batch.

**10010055** Sent IDL type N/NU/P/PU too long, RPC server supports <number-of-digits> digits max

**Explanation** The length of a numeric IDL type, one of N/NU/P/PU sent by the RPC client is too long for the target programming language and environment where the RPC server is running.

**Action** Update your IDL. Re-generate your interface object and/or update your application, then retry the RPC call.

**10010056** Configuration issue: For program <program> library <library> the RPC server has a server-side mapping and received a conflicting client-side mapping from the RPC client

**Explanation** The RPC client sent a client-side mapping file (Designer file with extension .cvm), but a server-side mapping file (.svm) also still exists in the server mapping container for <library> see library-definition under *Software AG IDL Grammar* in the IDL Editor documentation and for <program> see program-definition under *Software AG IDL Grammar* in the IDL Editor documentation. See *Server-side Mapping Files* in the RPC server documentation for z/OS (CICS, Batch, IMS) | CICS ECI | IMS Connect | BS2000. Usage of server mapping files is mutually exclusive.

**Action** If you migrate server-side mapping files to client side mapping files, you may have forgotten *Step 2: Remove the Server-side Mapping Files on Target RPC Server*. See *Migrating Server Mapping Files* under *Server Mapping Files for COBOL* in the Designer documentation.

**10010057**      **Version mismatch: For program <program> (library <library>) the RPC server found the unsupported version <cvm-version> in the server mapping**

**Explanation**      The server mapping for the IDL library and IDL program contained a server mapping version not supported by the RPC server. A server mapping file is a Designer file with extension .cvm. See *Server Mapping Files for COBOL* in the Designer documentation.

**Action**      Contact Software AG Support for RPC server upgrade.

**10010150**      **Format Buffer Check: direction does not match. Request of IDL field (<type-length>), location=<location>**

**Explanation**      The EntireX RPC server detected an inconsistency between the deployed server-side mapping (see *Server Mapping Files for COBOL* in the Designer documentation) and the IDL file with which the RPC client was built. The *direction-attribute* (IN, OUT, INOUT) of a parameter (see *attribute-list* under *Software AG IDL Grammar* in the IDL Editor documentation) defined in the IDL file is different to the *direction-attribute* in the related server-side mapping.

Possible causes:

- You are calling an existing COBOL server and have reextracted the IDL and server-side mapping without redeploying the server-side mapping file. See Scenario *Calling an Existing COBOL Server* under *z/OS (CICS, Batch, IMS) | BS2000* in the respective RPC Server documentation, and *Server Mapping Deployment Wizard* in the Designer documentation.
- You are writing a new COBOL server and have rebuilt the RPC server with a modified IDL file using the COBOL Wrapper, which updates the server-side mapping file, but the updated server-side mapping file is not redeployed. See Scenario *Writing a New COBOL Server* in the respective RPC Server documentation, and *Server Mapping Deployment Wizard* in the Designer documentation.
- etc.

The message provides additional information such as <type-length> and <location>, where

- <type-length> matches the IDL data type; see *IDL Data Types*
- <location> contains the hierarchy of IDL nodes, separated by a colon

Example: IDL field (NU14.0), location=3.2.1.

The IDL below was used for the RPC call. The location is interpreted as follows:

- third field on level 1 is 'G-parameter-3-on-level-1'
- second parameter on level 2 is the array 'G-parameter-32-on-level-2'
- first field on level 3, which is 'G-parameter-322-on-level-3', produced the error

```

. . .
define data parameter
1 G-parameter-1-on-level-1      (A10) In
1 G-parameter-2-on-level-1      In
1 G-parameter-3-on-level-1      Out
    2 G-parameter-31-on-level-2
        3 G-parameter-311-on-level-3 (A5)
        3 G-parameter-312-on-level-3 (N8)
        3 G-parameter-313-on-level-3 (NU4)
    2 G-parameter-32-on-level-2  (/25)
        3 G-parameter-322-on-level-3 (NU14)
        3 G-parameter-321-on-level-3 (A5)
1 G-parameter-4-on-level-1      (A64)
. . .
end-define

```

**Action** Make sure the IDL file and the deployed server-side mapping file are consistent. Possibly redeploy the server-side mapping file. If the problem persists, reextract or rewrap and then redeploy.

**10010151** **Format Buffer Check: data type does not match. Request of IDL field (<type-length>), location=<location>**

**Explanation** The EntireX RPC server detected an inconsistency between the deployed server-side mapping (see *Server Mapping Files for COBOL* in the Designer documentation) and the IDL file with which the RPC client was built. The sequence of IDL data types (see *IDL Data Types* in the IDL Editor documentation) defined in the IDL file is different to the sequence in the related server-side mapping. See error message 10010150 for possible causes of this situation and additional information for <type-length> and <location>.

**Action** Make sure the IDL file and the deployed server-side mapping file are consistent. Possibly redeploy the server-side mapping file. If the problem persists, reextract or rewrap and then redeploy.

**10010152** **Format Buffer Check: length is not equal. Request of IDL field (<type-length>), location=<location>**

**Explanation** The EntireX RPC server detected an inconsistency between the deployed server-side mapping (see *Server Mapping Files for COBOL* in the Designer documentation) and the IDL file with which the RPC client was built. The length definition of a parameter (see *simple-parameter-definition* under *Software AG IDL Grammar* in the IDL Editor documentation) defined in the IDL file is different to the length definition in the related server-side mapping. See error message 10010150 for possible causes of this situation and additional information for <type-length> and <location>.

**Action** Make sure the IDL file and the deployed server-side mapping file are consistent. Possibly redeploy the server-side mapping file. If the problem persists, reextract or rewrap and then redeploy.

**10010153**            **Format Buffer Check: attributes not matching. Request of IDL field (<type-length>), location=<location>**

**Explanation**        The EntireX RPC server detected an inconsistency between the deployed server-side mapping (see *Server Mapping Files for COBOL* in the Designer documentation) and the IDL file with which the RPC client was built. The attributes of a parameter (see *attribute-list* under *Software AG IDL Grammar* in the IDL Editor documentation) defined in the IDL file are different to the attributes in the related server-side mapping. See error message 10010150 for possible causes of this situation and additional information for <type-length> and <location>.

**Action**              Make sure the IDL file and the deployed server-side mapping file are consistent. Possibly redeploy the server-side mapping file. If the problem persists, reextract or rewrap and then redeploy.

**10010154**            **Format Buffer Check: indices not matching. Request of IDL field (<type-length>), location=<location>**

**Explanation**        The EntireX RPC server detected an inconsistency between the deployed server-side mapping (see *Server Mapping Files for COBOL* in the Designer documentation) and the IDL file with which the RPC client was built. Either the number of dimensions (one-, two- three-dimensional) or the upper bounds (see *array-definition* under *Software AG IDL Grammar* in the IDL Editor documentation) do not match. See error message 10010150 for possible causes of this situation and additional information for <type-length> and <location>.

**Action**              Make sure the IDL file and the deployed server-side mapping file are consistent. Possibly redeploy the server-side mapping file. If the problem persists, reextract or rewrap and then redeploy.

**10010200**            **RPC Parameter Error: data not unsigned numeric. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation**        An application parameter cannot be processed because its content does not match the expected format unsigned numeric (NU). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The message provides additional information such as <direction>, <parameter-name>, <type-length> and <location>, where

- <direction> is either 'Request' if the error was detected before the RPC server was executed, or 'Reply' for the answer, that is, if the RPC server was already executed.
- <parameter-name> is available for target programming language C only
- <type-length> matches the IDL data type; see *IDL Data Types*
- <location> contains the hierarchy of IDL nodes, separated by a colon. If an IDL node is an array, its indexes are given in parentheses.

**Example:** Reply of IDL field (NU14.0), location=3.2(I=5).1.

The IDL below was used for the RPC call. The location is interpreted as follows:

- third field on level 1 is 'G-parameter-3-on-level-1'
- second parameter on level 2 is the array 'G-parameter-32-on-level-2' and (I=5) means the fifth occurrence
- first field on level 3, which is 'G-parameter-322-on-level-3', produced the error

```

. . .
define data parameter
1 G-parameter-1-on-level-1      (A10) In
1 G-parameter-2-on-level-1      In
1 G-parameter-3-on-level-1      Out
    2 G-parameter-31-on-level-2
        3 G-parameter-311-on-level-3 (A5)
        3 G-parameter-312-on-level-3 (N8)
        3 G-parameter-313-on-level-3 (NU4)
    2 G-parameter-32-on-level-2  (/25)
        3 G-parameter-322-on-level-3 (NU14)
        3 G-parameter-321-on-level-3 (A5)
1 G-parameter-4-on-level-1      (A64)
. . .
end-define

```

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

**10010201** **RPC Parameter Error: data not signed numeric. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format signed numeric (N). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

**10010202** **RPC Parameter Error: data not numeric. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format unsigned numeric (NU) or signed numeric (N). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

**10010203** **RPC Parameter Error: data not unsigned packed. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format unsigned packed (PU). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

**10010204** **RPC Parameter Error: data not signed packed. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format signed packed (P). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

**10010205** **RPC Parameter Error: data not packed. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**

**Explanation** An application parameter cannot be processed because its content does not match the expected format unsigned packed (PU) or signed packed (P). See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

<b>10010206</b>	<b>RPC Parameter Error: I1 &lt; MIN. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type I1 cannot be processed because its content is less than the allowed minimum (-128) for I1. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.
	The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
<b>Action</b>	Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See <i>Server Mapping Files for COBOL</i> in the Designer documentation. Check your application for parameter integrity.
<b>10010207</b>	<b>RPC Parameter Error: I1 &gt; MAX. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type I1 cannot be processed because its content is greater than the allowed maximum (+127) for I1. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.
	The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
<b>Action</b>	Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See <i>Server Mapping Files for COBOL</i> in the Designer documentation. Check your application for parameter integrity.
<b>10010208</b>	<b>RPC Parameter Error: I2 &lt; MIN. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type I2 cannot be processed because its content is less than the allowed minimum (-32768) for I2. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.
	The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
<b>Action</b>	Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See <i>Server Mapping Files for COBOL</i> in the Designer documentation. Check your application for parameter integrity.
<b>10010209</b>	<b>RPC Parameter Error: I2 &gt; MAX. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type I2 cannot be processed because its content is greater than the allowed maximum (+32767) for I2. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.
	The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

**10010210** **RPC Parameter Error: I4 < MIN. <direction> of IDL field [<parameter-name> (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type I4 cannot be processed because its content is less than the allowed minimum (-2147483648) for I4. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

**10010211** **RPC Parameter Error: I4 > MAX. <direction> of IDL field [<parameter-name> (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type I2 cannot be processed because its content is greater than the allowed maximum (+2147483647) for I2. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

**10010212** **RPC Parameter Error: float < MIN. <direction> of IDL field [<parameter-name> (<type-length>), location=<location>**

**Explanation** An application parameter of IDL type F4 cannot be processed because its content is less than the allowed minimum (1.175494351e-38F) for F4. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.

The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

**Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

<b>10010213</b>	<b>RPC Parameter Error: float &gt; MAX. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type F4 cannot be processed because its content is greater than the allowed maximum (3.402823466e+38F) for F4. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.
	The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
<b>Action</b>	Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See <i>Server Mapping Files for COBOL</i> in the Designer documentation. Check your application for parameter integrity.
<b>10010215</b>	<b>RPC Parameter Error: float HUGE_VAL. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type F4 cannot be processed because of conversation error HUGE_VAL (see C library strtod() for more information). The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
<b>Action</b>	Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See <i>Server Mapping Files for COBOL</i> in the Designer documentation. Check your application for parameter integrity.
<b>10010216</b>	<b>RPC Parameter Error: double &lt; MIN. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type F8 cannot be processed because its content is less than the allowed minimum (2.2250738585072014e-308) for F8. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.
	The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
<b>Action</b>	Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See <i>Server Mapping Files for COBOL</i> in the Designer documentation. Check your application for parameter integrity.
<b>10010217</b>	<b>RPC Parameter Error: double &gt; MAX. &lt;direction&gt; of IDL field [&lt;parameter-name&gt;] (&lt;type-length&gt;), location=&lt;location&gt;</b>
<b>Explanation</b>	An application parameter of IDL type F8 cannot be processed because its content is greater than the allowed maximum (1.7976931348623158e+308) for F8. See <i>IDL Data Types</i> under <i>Software AG IDL File</i> in the IDL Editor documentation.
	The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.

- Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.
- 10010218**      **RPC Parameter Error: double exponent over-, underflow. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**
- Explanation** An application parameter of IDL type F4 or F8 cannot be processed because of exponent over- or underflow. See *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.
- The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
- Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.
- 10010219**      **RPC Parameter Error: bad vdata provided. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**
- Explanation** An application parameter of IDL type AV, BV, KV or UV cannot be processed because incorrect data was applied, see *Using Variable-length Data Types AV, BV, KV and UV* under *Writing Advanced Applications with the C Wrapper*.
- The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
- Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.
- 10010220**      **RPC Parameter Error: bounds exceeds maximum. <direction> of IDL field [<parameter-name>] (<type-length>), location=<location>**
- Explanation** An index of an application parameter for an IDL unbounded-array (see *array-definition* under *Software AG IDL Grammar* in the IDL Editor documentation) cannot be processed because its value exceeds the maximum for upper bound The additional information <direction>, <parameter-name>, <type-length> and <location> is explained under error message 10010200.
- Action** Make sure the IDL file and, if it exists, the server-side mapping file and your server application are consistent. See *Server Mapping Files for COBOL* in the Designer documentation. Check your application for parameter integrity.

# 30

## Message Class 1002 - User-definable Server

---

The messages have the format:

1002 $nnnn$

where 1002 is the message class, and

$nnnn$  is the message number in the range 0000 - 9999.

Error messages in class 1002 are reserved for customer use. The messages are given by customer RPC server implementations. See for example *Returning Application Errors*.

# 31

## Message Class 1003 - Conversion

---

This message class is returned if an error has occurred within Conversion. The messages have the format:

1003 $nnnn$

where 1003 is the message class, and  
 $nnnn$  is the message number in the range 0000 - 9999.

<b>10030001</b>	<b>Error <math>number</math> returned by RPCTRANS</b>
<b>Explanation</b>	The error indicated by $number$ has occurred within an internal conversion routine.
<b>Action</b>	Configure trace level 3 for the service-specific attribute CONVERSION and provide a trace to Software AG Support.
<b>10030002</b>	<b>Buffer too small. Requires <math>length</math> bytes</b>
<b>Explanation</b>	The length of the receive buffer given by the receiver is too small. Depending on the version of EntireX Broker, EntireX and Natural components in use: <ul style="list-style-type: none"><li>■ The situation is handled inside the EntireX Broker, that is, conversion is called a second time by the EntireX Broker with a buffer that is large enough.</li><li>■ The EntireX Broker passes this error as error 00200377 to the client or server.</li></ul>
<b>Action</b>	The error can be ignored. See error 00200377 for more information if the EntireX Broker passes 00200377 to the client or server.

<b>10030003</b>	<b>No Input Buffer Length</b>
<b>Explanation</b>	An error has occurred in the interface between EntireX Broker kernel and the conversion routine.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030004</b>	<b>No Input Buffer</b>
<b>Explanation</b>	An error has occurred in the interface between EntireX Broker kernel and the conversion routine.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030005</b>	<b>No Output Buffer Length</b>
<b>Explanation</b>	An error has occurred in the interface between EntireX Broker kernel and the conversion routine.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030006</b>	<b>No Output Buffer</b>
<b>Explanation</b>	An error has occurred in the interface between EntireX Broker kernel and the conversion routine.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030007</b>	<b>Internal Error</b>
<b>Explanation</b>	An internal error has occurred inside the conversion routine.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030008</b>	<b>Error <i>number</i> returned by ECS initialize</b>
<b>Explanation</b>	Error <i>number</i> has occurred during ECS initialization.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

<b>10030009</b>	<b>Error <i>number</i> returned by ECS conversion</b>
<b>Explanation</b>	Error <i>number</i> has occurred during ECS conversion.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030010</b>	<b>Error converting binary/numeric fields</b>
<b>Explanation</b>	The length of the data (of numeric and binary data types such as Nm.n, Pm.n, NUm.n, PUm.n, L, B, F4, F8, I1, I2, I4, D, T ) contained in an IDL parameter has increased/decreased, but the data must keep its length when converted.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030011</b>	<b>No free entries in preallocated list</b>
<b>Explanation</b>	An internal error occurred in the conversion routine.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030012</b>	<b>Out of Memory</b>
<b>Explanation</b>	The conversion routine is out of memory.
<b>Action</b>	<p>Try the following:</p> <ul style="list-style-type: none"> <li>■ Increase the memory resources available for EntireX Broker.</li> <li>■ If the error persists:</li> </ul> <p style="padding-left: 40px;">Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</p>
<b>10030013</b>	<b>RPC Protocol Version error</b>
<b>Explanation</b>	An invalid RPC payload was sent. The conversion routine detected an inconsistent RPC protocol.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

- 10030014**                    **RPC Protocol Version not supported**
- Explanation**                The RPC protocol is not supported by the conversion routine.
- Action**                      Try the following:
- Check if an older version of the EntireX Broker and/or conversion routine is in effect.
  - Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute `CONVERSION`.
  - If the error persists:  
  
Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.
- 
- 10030015**                    **RPC Protocol Compression 1 not supported**
- Explanation**                The conversion routine supports “RPC compression 2” and “no RPC compression”. “RPC compression 1” is not supported.
- Action**                      Try the following:
- Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute `CONVERSION`.
  - Do not use “RPC compression 1” when RPC conversion SAGTRPC is involved. Use “RPC compression 2” in your RPC client.
  - If the error persists:  
  
Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.
- 
- 10030016**                    **RPC protocol error parsing format buffer**
- Explanation**                The RPC protocol sent by the client or server is invalid.
- Action**                      Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.
- 
- 10030017**                    **Digit/Character not found**
- Explanation**                The RPC protocol sent by the client or server is invalid.
- Action**                      Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.

<b>10030018</b>	<b>Unexpected end During Scan</b>
<b>Explanation</b>	The RPC protocol sent by the client or server is invalid.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030019</b>	<b>Codepage attribute has bad format</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030020</b>	<b>Codepage attribute contains no data</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030021</b>	<b>Some chars inconvertible to target CP</b>
<b>Explanation</b>	Some of the characters to be converted have no equivalent in the target ICU converter.
<b>Action</b>	<p>Try the following:</p> <ul style="list-style-type: none"> <li>■ Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute <code>CONVERSION</code>.</li> <li>■ Use an ICU converter where all needed characters are defined (see <i>ICU Resources and Codepage Requirements for RPC Data Stream Conversions</i>). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See <i>Introduction to Internationalization</i>.</li> <li>■ If possible for the scenario, you can replace the inconvertible characters with a codepage-dependent substitution character. See <i>OPTION Values for Conversion</i> under <i>Service-specific Attributes</i> in the platform-independent Administration documentation.</li> <li>■ If the error persists: <p style="margin-left: 2em;">Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</p> </li> </ul>

<b>10030022</b>	<b>Chars to convert undefined in source CP</b>
<b>Explanation</b>	Some of the characters to be converted are not defined in the source ICU converter of the sender. The payload and the ICU converter of the sender do not match.
<b>Action</b>	Try the following: <ul style="list-style-type: none"><li>■ Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute <code>CONVERSION</code>.</li><li>■ Use an ICU converter where all needed characters are defined (see <i>ICU Resources and Codepage Requirements for RPC Data Stream Conversions</i>). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See <i>Introduction to Internationalization</i>.</li><li>■ If possible for the scenario, you can replace the inconvertible characters with a codepage-dependent substitution character. See <i>OPTION Values for Conversion</i> under <i>Service-specific Attributes</i> in the platform-independent Administration documentation.</li><li>■ If the error persists:<p>Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</p></li></ul>
<b>10030023</b>	<b>Internal attribute table overflow</b>
<b>Explanation</b>	An internal table overflow occurred.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030024</b>	<b>Error <i>error</i> returned by ECS free handle</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030025</b>	<b>Error <i>error</i> returned by ECS get handle</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

---

<b>10030026</b>	<b>Error <i>error</i> returned by ECS get attributes</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030027</b>	<b>Error <i>error</i> from user exit out of range</b>
<b>Explanation</b>	The valid range of errors returned by the SAGTRPC user exit is 1-9999. For more information see <i>Writing SAGTRPC User Exits</i> under <i>Configuring Broker for Internationalization</i> in the platform-specific Administration documentation.
<b>Action</b>	Check your SAGTRPC user exit and correct the error.
<b>10030028</b>	<b>String Buffer missing</b>
<b>Explanation</b>	An invalid RPC payload was sent. A string buffer is required for the RPC protocol but could not be detected.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030029</b>	<b>Format Buffer missing</b>
<b>Explanation</b>	An invalid RPC payload was sent. A format buffer is required for the RPC protocol but could not be detected.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030030</b>	<b>Attribute end tag missing</b>
<b>Explanation</b>	An invalid RPC payload was sent. An attribute start tag was detected but the corresponding end tag is missing.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030031</b>	<b>Attribute error</b>
<b>Explanation</b>	An invalid RPC payload was sent. An invalid attribute was detected.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

<b>10030032</b>	<b>Value Buffer parse error</b>
<b>Explanation</b>	An invalid RPC payload was sent. This error occurs in the following situations: <ol style="list-style-type: none"><li>1. An unexpected end of the value buffer occurred.</li><li>2. The indices of an unbounded array cannot be parsed correctly.</li></ol>
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030033</b>	<b>Error update addresses/length in header</b>
<b>Explanation</b>	An error occurred when updating new offsets and length in the RPC protocol header after decrease/increase of buffers.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030034</b>	<b>Output Buffer overflow</b>
<b>Explanation</b>	This is an internal message.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030035</b>	<b>Format Buffer length change occurred</b>
<b>Explanation</b>	During conversion the format buffer has increased or decreased, but the format buffer must keep its length when converted.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030036</b>	<b>String Buffer parse error</b>
<b>Explanation</b>	An invalid RPC payload was sent. An unexpected end of the string buffer occurred.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030037</b>	<b>Delimiter missing</b>
<b>Explanation</b>	An invalid RPC payload was sent. The delimiter between keyword and value in the string buffer is missing.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

<b>10030038</b>	<b>Variable Length Data parse error</b>
<b>Explanation</b>	An invalid RPC payload was sent. This error occurs in the following situations: <ol style="list-style-type: none"> <li>1. An unexpected end of the value buffer occurred.</li> <li>2. An error occurred when parsing the value buffer for the actual length of AV, BV and KV data types.</li> </ol>
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030039</b>	<b>Group end without corresponding start</b>
<b>Explanation</b>	An invalid RPC payload was sent. A group end was detected without a group start tag.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030040</b>	<b>Group end missing</b>
<b>Explanation</b>	An invalid RPC payload was sent. A group was detected without a corresponding group end.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030041</b>	<b>No Group start tag</b>
<b>Explanation</b>	An invalid payload was sent. A group was detected with an invalid group start indicator.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030042</b>	<b>Error <i>number</i> returned by ECS create binding</b>
<b>Explanation</b>	The error indicated by <i>number</i> has occurred during ECS binding of codepages.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030043</b>	<b>DBCS Space missing for modal codepage</b>
<b>Explanation</b>	For an EBCDIC stateful codepage (encoded with escape technique, that is, SI/SO bytes) there is no DBCS space defined.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

- 10030044**            **K or KV Field must have even length**
- Explanation**      If IDL K fields are used with EBCDIC stateful codepages (encoded with escape technique, that is, SI/SO bytes) the fields must have even length. For more information see *EBCDIC Stateful Codepages* under *Introduction* in the Internationalization documentation.
- Action**             Try the following:
- For fixed-length IDL K fields, define the field in your IDL with even length. For variable-length KV fields, make sure to send your data with even length. For more information see *IDL Data Types* under *Software AG IDL File* in the IDL Editor documentation.
  - If the error persists:  
  
    Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.
- 
- 10030045**            **DBCS Space less or more than 2 bytes**
- Explanation**      The length of DBCS space is not as expected.
- Action**             Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.
- 
- 10030046**            **Single Space more than 1 byte**
- Explanation**      The length of space is not as expected.
- Action**             Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.
- 
- 10030047**            **Space missing for codepage**
- Explanation**      There is no space defined.
- Action**             Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.
- 
- 10030048**            **SAGTRPC Load error *number***
- Explanation**      The error indicated by *number* has occurred during load of the conversion routine by your SAGTRPC user exit. For *number* refer to your operating system documentation.
- Action**             Where applicable check the following possibilities:
- Under UNIX and Windows, check that the link step of SAGTRPC user exit is correct and all required libraries are linked to your SAGTRPC user exit.  
  
    See *Writing SAGTRPC User Exits* under *Configuring Broker for Internationalization* in the platform-specific Administration documentation.

- Under UNIX, check that *libsagtrpc.so* is accessible by the broker. If it is not accessible, reinstall EntireX.
- Under Windows, check that *libsagtrpc.dll* is accessible by the broker. If it is not accessible, reinstall EntireX.
- Under all other operating systems and if the error persists:  
 Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.

<b>10030049</b>	<b>User exit missing</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030050</b>	<b>Invalid Conversion Method</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030051</b>	<b>Invalid Trap Function</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030052</b>	<b>Invalid Direction</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030053</b>	<b>ICU Error <i>error</i> occurred</b>
<b>Explanation</b>	The error indicated by <i>error</i> has occurred during execution of an ICU function. Possible errors are:  <code>U_FILE_ACCESS_ERROR</code> - This error indicates a missing ICU converter or a missing mapping from ICU alias name to the real ICU converter name. The ICU converter can be accessed with any name (alias name or real name).
<b>Action</b>	Depending on the error situation:

- `U_FILE_ACCESS_ERROR` - Examine the broker's trace for the name used to locate the ICU converter. For information on available ICU converters and their alias names, see *ICU Converter Explorer*. There are the following possibilities:
  - If the client or server component uses a valid codepage for its environment but sends a name which is not a valid ICU alias, you can define an ICU alias to ICU Converter name mapping in the EntireX Broker attribute file. See *Codepage-specific Attributes*.
  - Reconfigure the client or server component to use a codepage valid in its own environment and available as an ICU converter. See *ICU Conversion*.
- For all other errors:

Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.

<b>10030054</b>	<b>SAGTRPC Get EP error <i>number</i></b>
<b>Explanation</b>	The error indicated by <i>number</i> has occurred during load of the conversion routine by your SAGTRPC user exit. For <i>number</i> refer to your operating system documentation.
<b>Action</b>	Contact Software AG Support.
<b>10030055</b>	<b>Option conflicts with Method</b>
<b>Explanation</b>	The option defined with the service-specific attribute <code>CONVERSION</code> cannot be used together with the defined conversion.
<b>Action</b>	Define an option supported by the defined conversion. See <i>OPTION Values for Conversion</i> .
<b>10030056</b>	<b>Padding occurred for K field and modal CP</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030057</b>	<b>Invalid Unicode Byte Sequence</b>
<b>Explanation</b>	An invalid RPC payload was sent. The sender's data was not correctly converted to the intermediate Unicode encoding of the RPC protocol.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

<b>10030058</b>	<b>SAGTRPC ICU Wrapper Load error</b> <i>number</i>
<b>Explanation</b>	The error indicated by <i>number</i> has occurred during load of a module required by the conversion. For <i>number</i> refer to your operating system documentation.
<b>Action</b>	<p>Where applicable, check the following possibilities:</p> <ul style="list-style-type: none"> <li>■ Under z/OS, check that EXXICU is accessible by the broker. If it is not accessible, reinstall EntireX.</li> <li>■ Under UNIX, check that <i>libsagtrpcicu.so</i> is accessible by the broker. If it is not accessible, reinstall EntireX.</li> <li>■ Under Windows, check that <i>sagtrpcicu.dll</i> is accessible by the broker. If it is not accessible, reinstall EntireX.</li> </ul> <p>If the error persists:</p> <p>Configure trace level 3 for the service-specific attribute CONVERSION and provide a trace to Software AG Support.</p> <p>If your EntireX Broker is running under z/OS, also provide the module report. Refer to DDNAME ETBMREP under <i>Step 2: Edit the Broker Startup Procedure</i> in the z/OS installation documentation.</p>
<b>10030059</b>	<b>SAGTRPC ICU Wrapper Get EP error</b> <i>number</i>
<b>Explanation</b>	The error indicated by <i>number</i> has occurred during load of a module required by the conversion. For <i>number</i> refer to your operating system.
<b>Action</b>	<p>Where applicable, check the following possibilities:</p> <ul style="list-style-type: none"> <li>■ Under z/OS, check that EXXICU is accessible by the broker. If it is not accessible, reinstall EntireX.</li> <li>■ Under UNIX, check that <i>libsagtrpcicu.so</i> is accessible by the broker. If it is not accessible, reinstall EntireX.</li> <li>■ Under Windows, check that <i>sagtrpcicu.dll</i> is accessible by the broker. If it is not accessible, reinstall EntireX.</li> </ul> <p>If the error persists:</p> <p>Configure trace level 3 for the service-specific attribute CONVERSION and provide a trace to Software AG Support.</p> <p>If your EntireX Broker is running under z/OS, also provide the module report. Refer to DDNAME ETBMREP under <i>Step 2: Edit the Broker Startup Procedure</i> in the z/OS installation documentation.</p>

<b>10030060</b>	<b>Unconvertible Chars in B,I,D,.. Field</b>
<b>Explanation</b>	Unconvertible characters were detected in RPC binary, integer or date fields. The ICU converter used by the receiver does not support characters required by the RPC protocol. The ICU converter of the receiver cannot be used with RPC calls.
<b>Action</b>	<p>Try the following:</p> <ul style="list-style-type: none"> <li>■ Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute <code>CONVERSION</code>.</li> <li>■ Use an ICU converter where all needed characters are defined (see <i>ICU Resources and Codepage Requirements for RPC Data Stream Conversions</i>). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See <i>Introduction to Internationalization</i>.</li> <li>■ If the error persists: <ul style="list-style-type: none"> <li>Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</li> </ul> </li> </ul>
<b>10030061</b>	<b>Unconvertible Chars in Metadata</b>
<b>Explanation</b>	Unconvertible characters were detected in RPC metadata. The ICU converter used by the receiver does not support characters required by the RPC protocol. The ICU converter of the receiver cannot be used with RPC calls.
<b>Action</b>	<p>Try the following:</p> <ul style="list-style-type: none"> <li>■ Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute <code>CONVERSION</code>.</li> <li>■ Use an ICU converter where all needed characters are defined (see <i>ICU Resources and Codepage Requirements for RPC Data Stream Conversions</i>). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See <i>Introduction to Internationalization</i>.</li> <li>■ If the error persists: <ul style="list-style-type: none"> <li>Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</li> </ul> </li> </ul>
<b>10030062</b>	<b>Invalid Source Chars in B,I,D,.. Field</b>
<b>Explanation</b>	An invalid RPC payload was sent. Invalid characters where detected in IDL binary, integer or date fields of the sender. The payload and the ICU converter of the sender do not match or the payload that was sent is not a valid RPC protocol.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

---

<b>10030063</b>	<b>Invalid Source Chars in Metadata</b>
<b>Explanation</b>	An invalid RPC payload was sent. Invalid characters were detected in RPC metadata of the sender. The payload and the ICU converter of the sender do not match, or the payload that was sent is not a valid RPC protocol.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030064</b>	<b>Substitution character length error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030065</b>	<b>Error <i>error</i> returned by ICU free handle</b>
<b>Explanation</b>	Closing an ICU handle returned an error.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030066</b>	<b>Bad access to memory</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030067</b>	<b>No support for ECS</b>
<b>Explanation</b>	ECS Conversion is no longer supported.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030068</b>	<b>Length changed during uppercase conversion</b>
<b>Explanation</b>	For the Hebrew codepage CP803, lowercase metadata is converted to uppercase. An error occurred during this. For more information see <i>Hebrew Codepage 803</i> .
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

**10030069**      **Missing Unicode character *char* in target ICU Converter *converter***

**Explanation**      The payload of the sender could not be converted to the encoding of the receiver. The given Unicode character is not contained in the ICU converter of the receiver.

**Action**      Try the following:

- For *RPC-based Components*:
  - Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute `CONVERSION`.
  - Use an ICU converter where all needed characters are defined (see *ICU Resources and Codepage Requirements for RPC Data Stream Conversions*). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See *Introduction to Internationalization*.
- If possible for the scenario, you can replace the inconvertible characters with a codepage-dependent substitution character. See *OPTION Values for Conversion* under *Service-specific Attributes* in the platform-independent Administration documentation.
- If the error persists:

Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.

**10030070**      **No character at codepoint *codepoint* in source ICU Converter *converter***

**Explanation**      An invalid payload was sent. The payload and the ICU converter of the sender do not match. There is no character defined in the ICU converter at the given codepoint.

**Action**      Try the following:

- For *RPC-based Components*:
  - Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute `CONVERSION`.
  - Use an ICU converter where all needed characters are defined (see *ICU Resources and Codepage Requirements for RPC Data Stream Conversions*). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See *Introduction to Internationalization*.
- Check that the data sent is correct.
- If possible for the scenario, you can replace the inconvertible characters with a codepage-dependent substitution character. See *OPTION Values for Conversion* under *Service-specific Attributes* in the platform-independent Administration documentation.
- If the error persists:

Configure trace level 3 for the service-specific attribute `CONVERSION` and provide a trace to Software AG Support.

<b>10030071</b>	<b>Missing Unicode character <i>char</i> in broker ICU Converter <i>converter</i></b>
<b>Explanation</b>	The EntireX Broker's ICU converter is required to parse the RPC payload of the sender. The given Unicode character is missing in the defined EntireX Broker's ICU converter.
<b>Action</b>	<p>Try the following:</p> <ul style="list-style-type: none"> <li>■ Check if the ICU converter of the EntireX Broker is the correct one. If not, reconfigure the EntireX Broker.</li> <li>■ If the error persists: <ul style="list-style-type: none"> <li>Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</li> </ul> </li> </ul>
<b>10030072</b>	<b>No character at codepoint <i>codepoint</i> in broker ICU Converter <i>converter</i> defined</b>
<b>Explanation</b>	The EntireX Broker's ICU converter is required to parse the RPC payload of the sender. There is no character defined at the given codepoint in the ICU converter.
<b>Action</b>	<p>Try the following:</p> <ul style="list-style-type: none"> <li>■ Check if the ICU converter of the EntireX Broker is the correct one. If not, reconfigure the EntireX Broker.</li> <li>■ If the error persists: <ul style="list-style-type: none"> <li>Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</li> </ul> </li> </ul>
<b>10030073</b>	<b>Missing Unicode character <i>char</i> in ICU Converter <i>converter</i></b>
<b>Explanation</b>	In some situations it is necessary to use an additional ICU converter for conversion (for example the old Hebrew codepage CP803). The error occurred using this additional converter. The given Unicode character is not contained in the given ICU converter.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030074</b>	<b>No character at codepoint <i>codepoint</i> in ICU Converter <i>converter</i> defined</b>
<b>Explanation</b>	In some situations it is necessary to use an additional ICU converter for conversion (for example the old Hebrew codepage CP803). The error occurred using this additional converter. No character is defined in the given ICU converter at the given codepoint.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.

<b>10030075</b>	<b>No character at codepoint <i>codepoint</i> in ICU Converter <i>converter</i> defined for integer or binary data</b>
<b>Explanation</b>	An invalid RPC payload was sent. Invalid characters were detected in integer or binary data of the sender. The payload and the ICU converter of the sender do not match, that is, there is no character defined in the given ICU converter at the given codepoint, or the payload that was sent is not a valid RPC protocol.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030076</b>	<b>No character at codepoint <i>codepoint</i> in ICU Converter <i>converter</i> defined for metadata</b>
<b>Explanation</b>	An invalid RPC payload was sent. Invalid characters were detected in metadata of the sender. The payload and the ICU converter of the sender do not match, that is, there is no character defined in the given ICU converter at the given codepoint, or the payload that was sent is not a valid RPC protocol.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030077</b>	<b>No character at codepoint <i>codepoint</i> in ICU Converter <i>converter</i> defined for string buffer item</b>
<b>Explanation</b>	An invalid RPC payload was sent. Invalid characters were detected in string buffer items of the sender. The payload and the ICU converter of the sender do not match, that is, there is no character defined in the given ICU converter at the given codepoint, or the payload sent is not a valid RPC protocol.
<b>Action</b>	Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.
<b>10030078</b>	<b>Missing Unicode character <i>char</i> in target ICU Converter <i>converter</i> for integer or binary data</b>
<b>Explanation</b>	Integer or binary data of the RPC payload of the sender could not be converted into the encoding of the receiver. The given Unicode character is not contained in the given ICU converter.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute <code>CONVERSION</code>.</li> <li>■ Use an ICU converter where all needed characters are defined (see <i>ICU Resources and Codepage Requirements for RPC Data Stream Conversions</i>). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See <i>Introduction to Internationalization</i>.</li> <li>■ If the error persists: <ul style="list-style-type: none"> <li>Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</li> </ul> </li> </ul>

---

<b>10030079</b>	<b>Missing Unicode character <i>char</i> in target ICU Converter <i>converter</i> for metadata</b>
<b>Explanation</b>	Metadata of the RPC payload of the sender could not be converted into the encoding of the receiver. The given Unicode character is not contained in the given ICU converter.
<b>Action</b>	<ul style="list-style-type: none"><li>■ Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute <code>CONVERSION</code>.</li><li>■ Use an ICU converter where all needed characters are defined (see <i>ICU Resources</i> and <i>Codepage Requirements for RPC Data Stream Conversions</i>). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See <i>Introduction to Internationalization</i>.</li><li>■ If the error persists:  Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</li></ul>
<b>10030080</b>	<b>Missing Unicode character <i>char</i> in target ICU Converter <i>converter</i> for string buffer</b>
<b>Explanation</b>	The RPC string buffer of the RPC payload of the sender could not be converted into the encoding of the receiver. The given Unicode character is not contained in the given ICU converter.
<b>Action</b>	<ul style="list-style-type: none"><li>■ Determine the component (RPC client or RPC server) sending the RPC payload. To find out the IDL library and IDL program where the error occurred, configure trace level 2 for the service-specific attribute <code>CONVERSION</code>.</li><li>■ Use an ICU converter where all needed characters are defined (see <i>ICU Resources</i> and <i>Codepage Requirements for RPC Data Stream Conversions</i>). Check if the ICU converter is the correct one. If not, reconfigure the RPC component. See <i>Introduction to Internationalization</i>.</li><li>■ If the error persists:  Configure trace level 3 for the service-specific attribute <code>CONVERSION</code> and provide a trace to Software AG Support.</li></ul>

# 32

## Message Class 1004 - IDL Compiler

---

This message class is returned if an error occurred concerning the Software AG IDL Compiler. Messages of this class have the format:

1004*nnnn*

where 1004 is the message class, and  
*nnnn* is the message number in the range 0000 - 9999.

**10040001**      **No template file given**

**Explanation**      A template file is mandatory to run the Software AG IDL Compiler.

**Action**      Specify a template file using the -t option.

**10040002**      **Template file <file-name> open failed**

**Explanation**      The template file specified could not be opened for one of the following reasons:

1. The path or template file does not have read access.
2. The template file is missing.

**Action**      Depending on the situation above, provide the template file and grant read access to the IDL Compiler.

- 10040003**            **Template file <file-name> is too large (Max. 1MB)**  
**Explanation**        The maximum size for the template file has been exceeded.  
**Action**                1. For customer-written template files:  
                              Create several smaller files from your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.
- 10040004**            **#endif expected in template**  
**Explanation**        When parsing the template file, the following error was detected: An expected #endif  
preprocessor statement was not found in the template file.  
**Action**                1. For customer-written template files:  
                              Correct your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.
- 10040005**            **Premature end of template file occurred**  
**Explanation**        When parsing the template file, an unexpected end-of-file condition occurred.  
**Action**                1. For customer-written template files:  
                              Correct your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.
- 10040006**            **Illegal opcode in template**  
**Explanation**        When running the template file an illegal operation code was detected.  
**Action**                Contact Software AG Support.
- 10040007**            **Illegal number**  
**Explanation**        When running the template file, an illegal number was found in a template variable.  
**Action**                1. For customer-written template files:  
                              Correct your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.

---

<b>10040008</b>	<b>Illegal character occurred in code: '&lt;code&gt;'</b>
<b>Explanation</b>	When parsing the template file, an illegal character was detected.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040009</b>	<b>%block without block</b>
<b>Explanation</b>	When parsing the template file, the following error was detected: A block was missing.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040010</b>	<b>%library{ } must not be an inner loop</b>
<b>Explanation</b>	When parsing the template file, the following error was detected: A library loop could not be placed within another library loop.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040011</b>	<b>%program{ }-loop must be embedded in %library{ }-loop</b>
<b>Explanation</b>	When parsing the template file, the following error was detected: A program loop must be placed within a library loop.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>

**10040012            %name{ }-loop must be embedded in %program or %x\_struct { }-loop**

**Explanation**        When parsing the template file, the following error was detected:  
A name loop must be placed within a program or x\_struct loop.

- Action**
1. For customer-written template files:  
    Correct your template file and rerun the IDL Compiler.
  2. For template files delivered by Software AG:  
    Contact Software AG Support.

**10040013            %x\_struct{ }-loop must be embedded in %library{ }-loop**

**Explanation**        When parsing the template file, the following error was detected:  
An x\_struct loop must be placed within a library loop.

- Action**
1. For customer-written template files:  
    Correct your template file and rerun the IDL Compiler.
  2. For template files delivered by Software AG:  
    Contact Software AG Support.

**10040014            Illegal environment variable syntax**

**Explanation**        When parsing the template file, the following error was detected:  
The syntax for environment variables is incorrect.  
Environment variables must be surrounded by parentheses: '(' and ')'.

- Action**
1. For customer-written template files:  
    Correct your template file and rerun the IDL Compiler.
  2. For template files delivered by Software AG:  
    Contact Software AG Support.

**10040015            Illegal numeric variable: '%compute'**

**Explanation**        When parsing or running the template file, an illegal numeric variable was found in  
a template variable.

- Action**
1. For customer-written template files:  
    Correct your template file and rerun the IDL Compiler.
  2. For template files delivered by Software AG:  
    Contact Software AG Support.

<b>10040016</b>	<b>Illegal string variable &lt;variable&gt;: '%assign'</b>
<b>Explanation</b>	When parsing or running the template file, an illegal string was detected in a template variable.
<b>Action</b>	<ol style="list-style-type: none"> <li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li> <li>2. For template files delivered by Software AG: Contact Software AG Support.</li> </ol>
<b>10040017</b>	<b>Illegal closing brackets of array string variable &lt;variable&gt;: '%assign'</b>
<b>Explanation</b>	When parsing or running the template file, an array string variable could not be determined correctly.
<b>Action</b>	<ol style="list-style-type: none"> <li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li> <li>2. For template files delivered by Software AG: Contact Software AG Support.</li> </ol>
<b>10040018</b>	<b>Illegal opening brackets of array string variable &lt;variable&gt;: '%assign'</b>
<b>Explanation</b>	When parsing or running the template file, an array string variable could not be determined correctly.
<b>Action</b>	<ol style="list-style-type: none"> <li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li> <li>2. For template files delivered by Software AG: Contact Software AG Support.</li> </ol>
<b>10040019</b>	<b>Array string variable out of bounds</b>
<b>Explanation</b>	When running the template file, an array string variable could not be determined correctly. Array variables must be in the range 0 - 8.
<b>Action</b>	<ol style="list-style-type: none"> <li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li> <li>2. For template files delivered by Software AG: Contact Software AG Support.</li> </ol>

- 10040020**            **%Sanitize<flag> is unknown**  
**Explanation**        When parsing the template file, an illegal statement was detected.  
**Action**                1. For customer-written template files:  
                              Correct your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.
- 10040021**            **%using I must have specified 1, 2 or 4**  
**Explanation**        When parsing the template file, an illegal length for the data type integer was detected.  
**Action**                1. For customer-written template files:  
                              Correct your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.
- 10040022**            **%using F must have specified 4 or 8**  
**Explanation**        When parsing the template file, an illegal length for the data type float was detected.  
**Action**                1. For customer-written template files:  
                              Correct your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.
- 10040023**            **Illegal character occurred in %using <type>: '<char>' (0x%.2X)**  
**Explanation**        When parsing the template file, an illegal data type was detected.  
**Action**                1. For customer-written template files:  
                              Correct your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.
- 10040024**            **Recursive type specification, <output-statement> used in %u clause**  
**Explanation**        When parsing the template file, an error was detected.  
**Action**                1. For customer-written template files:  
                              Correct your template file and rerun the IDL Compiler.  
                              2. For template files delivered by Software AG:  
                              Contact Software AG Support.

---

<b>10040025</b>	<b>Illegal %-specification '&lt;char&gt;'</b>
<b>Explanation</b>	When parsing the template file, an illegal statement was detected.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040026</b>	<b>} without block</b>
<b>Explanation</b>	When parsing the template file, a closing brace was detected without the corresponding opening one.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040027</b>	<b>Unsupported %-format: &lt;char&gt;</b>
<b>Explanation</b>	When running the template file, an unsupported format was detected.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040028</b>	<b>&lt;statement&gt; is unknown</b>
<b>Explanation</b>	An incorrect <statement> was found in the template file.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040029</b>	<b>Illegal string</b>
<b>Explanation</b>	When parsing the template file, a string could not be determined correctly.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>

<b>10040030</b>	<b>String continues on next line</b>
<b>Explanation</b>	When parsing the template file, a string could not be determined correctly. A string must not continue on the next line.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040031</b>	<b>String missing: &lt;string&gt;</b>
<b>Explanation</b>	When parsing the template file, a string was expected but did not occur.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040032</b>	<b>Missing ')' in expression</b>
<b>Explanation</b>	When running the template file, an illegal expression was detected.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040033</b>	<b>Bad expression (read '&lt;expression&gt;')</b>
<b>Explanation</b>	When running the template file, an illegal expression was detected.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040034</b>	<b>Level nesting exceeded</b>
<b>Explanation</b>	When running the template file, the maximum number of levels was exceeded.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>

---

<b>10040035</b>	<b>Recursion too deep</b>
<b>Explanation</b>	When parsing the template file, an error was detected.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040036</b>	<b>&lt;statement&gt; blocks exceeded, maximum is &lt;number&gt;</b>
<b>Explanation</b>	When parsing the template file, the maximum number of nested blocks for statement <statement> of <number> was exceeded.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040037</b>	<b>Internal error</b>
<b>Explanation</b>	An unexpected error occurred when running the Software AG IDL Compiler.
<b>Action</b>	Contact Software AG Support.
<b>10040038</b>	<b>Can access &lt;output-statement&gt; only in &lt;control-statement&gt;-loop</b>
<b>Explanation</b>	When running the template file, a statement was executed which was not placed in its proper loop statement.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040039</b>	<b>Premature EOF within preprocessor block in template</b>
<b>Explanation</b>	When parsing the template file, an unexpected end-of-file condition occurred.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>

**10040040           Unknown preprocessor command <command> in template**

**Explanation**       When parsing the template file, an unknown statement was detected.

- Action**
1. For customer-written template files:  
    Correct your template file and rerun the IDL Compiler.
  2. For template files delivered by Software AG:  
    Contact Software AG Support.

**10040041           #endif found without #ifdef in template**

**Explanation**       When parsing the template file, an `#endif` was found without a corresponding `#ifdef` preprocessor statement.

- Action**
1. For customer-written template files:  
    Correct your template file and rerun the IDL Compiler.
  2. For template files delivered by Software AG:  
    Contact Software AG Support.

**10040042           #else found without #ifdef in template**

**Explanation**       When parsing the template file, an `#else` was found without a corresponding `#ifdef` preprocessor statement.

- Action**
1. For customer-written template files:  
    Correct your template file and rerun the IDL Compiler.
  2. For template files delivered by Software AG:  
    Contact Software AG Support.

**10040043           #elif found without #ifdef in template**

**Explanation**       When parsing the template file, an `#elif` was found without a corresponding `#ifdef` preprocessor statement.

- Action**
1. For customer-written template files:  
    Correct your template file and rerun the IDL Compiler.
  2. For template files delivered by Software AG:  
    Contact Software AG Support.

---

<b>10040044</b>	<b>#elif found after #else in template</b>
<b>Explanation</b>	When parsing the template file, an <code>#elif</code> was found after a corresponding <code>#else</code> preprocessor statement.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040045</b>	<b>#ifdef found before #endif in template</b>
<b>Explanation</b>	When parsing the template file, an <code>#ifdef</code> was found before an <code>#endif</code> preprocessor statement.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040046</b>	<b>&lt;statement&gt; found without DEFINITION in template</b>
<b>Explanation</b>	An incorrect <code>&lt;statement&gt;</code> was found in the template file.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040047</b>	<b>Software AG IDL file &lt;file-name&gt; open failed</b>
<b>Explanation</b>	The Software AG IDL file specified could not be opened for one of the following reasons:  <ol style="list-style-type: none"><li>1. The path or Software AG IDL file does not have read access.</li><li>2. An incorrect name was given for the IDL file or it is missing.</li></ol>
<b>Action</b>	Depending on the situation above, provide the Software AG IDL file and/or give read access to the IDL Compiler.

<b>10040048</b>	<b>Software AG IDL file parse error</b>
<b>Explanation</b>	When parsing the Software AG IDL file, an error occurred.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040049</b>	<b>Usage error</b>
<b>Explanation</b>	The Software AG IDL Compiler was called with an incorrect template file, IDL file or option settings.
<b>Action</b>	Supply the IDL Compiler with correct parameters.
<b>10040050</b>	<b>Out of memory</b>
<b>Explanation</b>	A memory request by the IDL Compiler could not be fulfilled by the operating system.
<b>Action</b>	Increase your memory resources and rerun the IDL Compiler.
<b>10040051</b>	<b>Pushback character limit reached</b>
<b>Explanation</b>	The maximum number of pushback characters was reached by the operating system.
<b>Action</b>	Contact Software AG Support.
<b>10040052</b>	<b>Label table overflow</b>
<b>Explanation</b>	The maximum number of labels was reached by the operating system.
<b>Action</b>	Contact Software AG Support.
<b>10040053</b>	<b>Output buffer overflow</b>
<b>Explanation</b>	An overflow of the output buffer occurred.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040054</b>	<b>Library name is too long</b>
<b>Explanation</b>	A library name specified in the IDL file is too long. The maximum number of characters is 128.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.

---

<b>10040055</b>	<b>Library name is empty</b>
<b>Explanation</b>	A library name specified in the IDL file contains no characters.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040056</b>	<b>Library alias name is too long</b>
<b>Explanation</b>	A library alias name specified in the IDL file is too long. The maximum number of characters is 128.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040057</b>	<b>Library alias name is empty</b>
<b>Explanation</b>	A library alias name specified in the IDL file contains no characters.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040058</b>	<b>Program &lt;program-name&gt; already defined</b>
<b>Explanation</b>	A program with the same name has already been defined in the IDL file.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040059</b>	<b>Program alias &lt;alias-name&gt; already defined</b>
<b>Explanation</b>	A program alias with the same name has already been defined in the IDL file.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040060</b>	<b>Program name is too long</b>
<b>Explanation</b>	A program name specified in the IDL file is too long. The maximum number of characters is 128.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040061</b>	<b>Program name is empty</b>
<b>Explanation</b>	A program name specified in the IDL file contains no characters.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040062</b>	<b>Program alias name is too long</b>
<b>Explanation</b>	A program alias name specified in the IDL file is too long. The maximum number of characters is 128.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.

<b>10040063</b>	<b>Program alias name is empty</b>
<b>Explanation</b>	A program alias name specified in the IDL file contains no characters.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040064</b>	<b>Structure &lt;structure-name&gt; already defined</b>
<b>Explanation</b>	A structure with the same name has already been defined in the IDL file.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040065</b>	<b>Structure name is too long</b>
<b>Explanation</b>	A structure name specified in the IDL file is too long. The maximum number of characters is 128.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040066</b>	<b>Structure name is empty</b>
<b>Explanation</b>	A structure name specified in the IDL file contains no characters.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040067</b>	<b>Structure &lt;structure-name&gt; not defined</b>
<b>Explanation</b>	An structure not defined in the IDL file was referenced.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040068</b>	<b>Level must be at least &lt;level-number&gt;</b>
<b>Explanation</b>	An incorrect level for parameters is specified in the IDL file.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040069</b>	<b>Level must be &lt;level-number&gt;</b>
<b>Explanation</b>	An incorrect level for parameters is specified in the IDL file.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040070</b>	<b>Parameter name is too long</b>
<b>Explanation</b>	A parameter name specified in the IDL file is too long. The maximum number of characters is 31.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.

---

<b>10040071</b>	<b>Maximum level is &lt;level-number&gt;</b>
<b>Explanation</b>	An incorrect level for parameters is specified in the IDL file.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040072</b>	<b>Index bound is too high</b>
<b>Explanation</b>	A dimension specification for a parameter in the IDL file was too high. The maximum limit for upper bounds is 1073741824.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040073</b>	<b>Invalid dimension specification</b>
<b>Explanation</b>	The specification of a dimension for a parameter in the IDL file was incorrect.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040074</b>	<b>Errors in the IDL file &lt;file-name&gt; detected</b>
<b>Explanation</b>	Errors in the IDL file were detected - generation failed.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040075</b>	<b>Recursion of parameter detected - invalid IDL file</b>
<b>Explanation</b>	A parameter recursion occurred in the IDL file.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040076</b>	<b>Group parameter '&lt;parameter-name&gt;' has no members</b>
<b>Explanation</b>	A group defined in the IDL file has no members.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040077</b>	<b>No output file open</b>
<b>Explanation</b>	When running the template file, an output statement was supposed to be executed but no file was open.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>

<b>10040078</b>	<b>Could not open %f file &lt;file-name&gt;</b>
<b>Explanation</b>	An output file could not be opened for one of the following reasons:  <ol style="list-style-type: none"><li>1. The path or file does not have write access.</li><li>2. The file name is incorrect.</li></ol>
<b>Action</b>	Depending on the situation above, provide write access to the IDL Compiler or correct the file name.
<b>10040079</b>	<b>-P Option is limited to 32 characters</b>
<b>Explanation</b>	The IDL Compiler was called with incorrect parameter -P. The length of an option is limited to 32 characters.
<b>Action</b>	Supply the IDL Compiler with correct parameters.
<b>10040080</b>	<b>Max. -P options = &lt;max-number&gt;</b>
<b>Explanation</b>	The IDL Compiler was called with too many options. The maximum possible number of options is <max-number>.
<b>Action</b>	Supply the IDL Compiler with correct parameters.
<b>10040083</b>	<b>Illegal option - &lt;option&gt;</b>
<b>Explanation</b>	The IDL Compiler was called with incorrect parameters.
<b>Action</b>	Supply the IDL Compiler with correct parameters.
<b>10040084</b>	<b>Option must be followed by whitespace - &lt;option&gt;</b>
<b>Explanation</b>	The IDL Compiler was called with incorrect parameters. All options must be followed by whitespace.
<b>Action</b>	Supply the IDL Compiler with correct parameters.
<b>10040085</b>	<b>Option requires an argument - &lt;option&gt;</b>
<b>Explanation</b>	The IDL Compiler was called with incorrect parameters. The given option requires an argument.
<b>Action</b>	Supply the IDL Compiler with correct parameters.

---

<b>10040086</b>	<b>Option must not be clustered - &lt;option&gt;</b>
<b>Explanation</b>	The IDL Compiler was called with incorrect parameters. Options must not be clustered.
<b>Action</b>	Supply the IDL Compiler with correct parameters.
<b>10040087</b>	<b>Recursion for structure &lt;structure-name&gt; detected - Invalid IDL file</b>
<b>Explanation</b>	A structure recursion occurred in the IDL file.
<b>Action</b>	Correct your IDL file and rerun the IDL Compiler.
<b>10040088</b>	<b>Syntax error in %execute statement</b>
<b>Explanation</b>	When parsing the template file, an illegal %execute statement was detected.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Correct your template file and rerun the IDL Compiler.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040089</b>	<b>Parameter &lt;parameter name&gt; has the wrong type in return statement</b>
<b>Explanation</b>	When parsing the template file, a wrong parameter type was detected in the return declaration of the %execute statement.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Check the return declaration of the %execute statement and the parameter of the %return statement. The parameter types must match.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>
<b>10040090</b>	<b>Count of parameter is wrong in return statement</b>
<b>Explanation</b>	When parsing the template file, the wrong number of parameters was detected in the return declaration of the %execute statement.
<b>Action</b>	<ol style="list-style-type: none"><li>1. For customer-written template files: Check the return declaration of the %execute statement and the parameter of the %return statement. The count of parameters must match.</li><li>2. For template files delivered by Software AG: Contact Software AG Support.</li></ol>

- 10040091**            **Parser exception occurred in template file <template file name>**
- Explanation**        When parsing the template file, a wrong statement or a syntax error has been detected by the template parser.
- Action**              1. For customer-written template files:  
                          Correct your template file and rerun the IDL Compiler.
2. For template files delivered by Software AG:  
                          Contact Software AG Support.
- 
- 10040092**            **%UnsupportedProgram statement must be embedded in %program or %name loop**
- Explanation**        %UnsupportedProgram statement needs a %library { %program { }} loop.
- Action**              1. For customer-written template files:  
                          Create several smaller files from your template file and rerun the IDL Compiler.
2. For template files delivered by Software AG:  
                          Contact Software AG Support.
- 
- 10040093**            **%UnsupportedProgram statement cannot be used if an output file is open**
- Explanation**        %UnsupportedProgram must be used before an output file is opened.
- Action**              1. For customer-written template files:  
                          Create several smaller files from your template file and rerun the IDL Compiler.
2. For template files delivered by Software AG:  
                          Contact Software AG Support.

# 33

## Message Class 1005 - RPC Server

---

If you are communicating with an EntireX RPC server, this class is returned if an error occurred in the RPC server.

If you are communicating with a Natural RPC Server and you receive errors in the range 10050001 - 10059999 on the client side, make a note of the last 4 digits of the error number and refer to the Natural error code documentation to determine the cause of the error instead here. For example, if you receive error number 10050082, Natural error 0082 has occurred on the server side.

Messages of this class have the format:

1005*nnnn*

where 1005 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

**10050000**            **Reserved**

**10050001**            **Cannot open or read File=<file name>**

**Explanation**        An invalid configuration file name or a wrong file type was used to start the RPC server.

**Action**              Restart the server with correct configuration file.

<b>10050002</b>	<b>Cannot open or read File=&lt;file name&gt;</b>
<b>Explanation</b>	Configuration problem.
<b>Action</b>	Contact Software AG Support
<b>10050003</b>	<b>Bad configuration: endworkers set to timeout</b>
<b>Explanation</b>	RPC server was started with an incomplete configuration file: Parameter <code>endworkers</code> has been set to timeout.
<b>Action</b>	Restart server with desired definition.
<b>10050004</b>	<b>Bad configuration: MinWorkers set to &lt;number&gt;</b>
<b>Explanation</b>	RPC server was started with an inconsistent configuration file: Parameter <code>minworkers</code> was either less than 1 or greater than the available thread entries.
<b>Action</b>	Restart server with desired definition.
<b>10050005</b>	<b>Bad configuration: MaxWorkers set to &lt;number&gt;</b>
<b>Explanation</b>	RPC server was started with an inconsistent configuration file: Parameter <code>maxworkers</code> was either greater than the available thread entries or (if <code>endworkers=never</code> was not specified) was less than 2.
<b>Action</b>	Restart server with desired definition.
<b>10050006</b>	<b>MaxWorkers must not be less than MinWorkers</b>
<b>Explanation</b>	RPC server was started with an inconsistent configuration file: Parameter <code>minworkers</code> was greater than <code>maxworkers</code> .
<b>Action</b>	Restart server with desired definition.
<b>10050007</b>	<b>ERXInit() failed</b>
<b>Explanation</b>	Initialization of ERX Runtime failed. This message is accompanied by an ERX Runtime error message.
<b>Action</b>	Check ERX Runtime error message for further action.
<b>10050008</b>	<b>Create Instance failed</b>
<b>Explanation</b>	A new thread could not be established. This message is accompanied by message 10050009.
<b>Action</b>	See message 10050009 for further action.

<b>10050009</b>	<b>Search for free entry in Thread table failed</b>
<b>Explanation</b>	The predefined thread table is full. This table normally is 256 entries long, under CICS there are 38 entries located in the ERX main control block. With ENDW=USER, each user thread requires an additional entry.
<b>Action</b>	Check reason of the overflow: if a thread abnormally terminates (abends), the thread entry might be marked as UNUSABLE. If there are too many abnormal terminations during the lifetime of the RPC server, the table might be shortened. In other cases, contact Software AG Support.
<b>10050010</b>	<b>Get Server status failed</b>
<b>Explanation</b>	Internal function failed. This message follows a genuine error message.
<b>Action</b>	Check original ERX error message for further action.
<b>10050011</b>	<b>Set Server status failed</b>
<b>Explanation</b>	Internal function failed. This message follows a genuine error message.
<b>Action</b>	Check original ERX error message for further action.
<b>10050012</b>	<b>Follow Worker creation failed</b>
<b>Explanation</b>	Internal function failed. This message follows a genuine error message.
<b>Action</b>	Check original ERX error message for further action.
<b>10050013</b>	<b>ERXRegister() failed</b>
<b>Explanation</b>	Register call to ERX Runtime failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original ERX error message for further action.
<b>10050014</b>	<b>ERXLogon() failed</b>
<b>Explanation</b>	Logon call to ERX Runtime (logon to Broker) failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original ERX error message for further action.
<b>10050015</b>	<b>ERXLogoff() failed</b>
<b>Explanation</b>	Logoff call to ERX Runtime (logoff from Broker) failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original ERX error message for further action.

<b>10050016</b>	<b>ERXUnregister() failed</b>
<b>Explanation</b>	Unregister call to ERX Runtime failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original ERX error message for further action.
<b>10050017</b>	<b>Server Statistics:</b>
<b>Explanation</b>	Informational. This message is the header of the statistic messages 10050018 - 10050023 which will be printed when RPC server terminates.
<b>Action</b>	None.
<b>10050018</b>	<b>Conversations successful ..... &lt;number&gt;</b>
<b>Explanation</b>	Informational. Prints the number of conversational and non-conversational calls.
<b>Action</b>	None.
<b>10050019</b>	<b>Workers successful ..... &lt;number&gt;</b>
<b>Explanation</b>	Informational. Prints the number of worker threads with normal end.
<b>Action</b>	None.
<b>10050021</b>	<b>Workers failed in executing ..... &lt;number&gt;</b>
<b>Explanation</b>	Informational. Prints the number of worker threads with abnormal end.
<b>Action</b>	None.
<b>10050022</b>	<b>Workers maximum parallel active .... &lt;number&gt;</b>
<b>Explanation</b>	Informational. Prints the maximum number of concurrently active worker threads.
<b>Action</b>	None.
<b>10050023</b>	<b>Workers failed in starting ..... &lt;number&gt;</b>
<b>Explanation</b>	Informational. Prints the number of failing worker threads.
<b>Action</b>	None.
<b>10050024</b>	<b>ERXEndServing() failed</b>
<b>Explanation</b>	EndServing call to ERX Runtime ( Broker DEREGISTER) failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.

<b>10050025</b>	<b>Check Worker creation failed</b>
<b>Explanation</b>	Internal function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050026</b>	<b>Create Worker failed</b>
<b>Explanation</b>	Internal function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050027</b>	<b>Set Worker status failed</b>
<b>Explanation</b>	Internal function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050028</b>	<b>Check for Worker stop failed</b>
<b>Explanation</b>	Internal function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050029</b>	<b>Check for new Worker to create failed</b>
<b>Explanation</b>	Internal function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050030</b>	<b>ERXDynamicParmGeneration() failed</b>
<b>Explanation</b>	Internal function to prepare the data conversation failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050031</b>	<b>ERXUnmarshal() failed for &lt;library&gt; &lt;program&gt;</b>
<b>Explanation</b>	Internal function for data conversation failed, <library>= <i>requested Library</i> , <program>= <i>requested Program</i> . This message is accompanied by a genuine error message.
<b>Action</b>	Verify that the data received from client is correct. You may need to reproduce the error while tracing is on.

<b>10050032</b>	<b>ERXMarshal() failed for &lt;library&gt; &lt;program&gt;</b>
<b>Explanation</b>	Internal function for data conversation failed, <library>= <i>requested Library</i> , <program>= <i>requested Program</i> . This message is accompanied by a genuine error message.
<b>Action</b>	Verify that the data sent by a server subroutine is correct. It may be necessary to reproduce the error while tracing is on.
<b>10050033</b>	<b>Could not resolve RPC call for &lt;library&gt; &lt;program&gt;</b>
<b>Explanation</b>	A client request could <i>not</i> be answered successfully. The client is notified with the appropriate protocol error, depending on the genuine error. This message is accompanied by a genuine error message.
<b>Action</b>	Check original messages for possible errors.
<b>10050034</b>	<b>Exception Type=&lt;type&gt; received!</b>
<b>Explanation</b>	SignalHandler indicates critical error. Depending on the operating system, dump information will be provided. Message 10050060 provides information about the program that is involved in this abend.
<b>Action</b>	Check message 10050060 for more information.
<b>10050035</b>	<b>ERXBeginServing() failed</b>
<b>Explanation</b>	BeginServing call to ERX Runtime (Broker REGISTER) failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050036</b>	<b>SAG EntireX RPC server &lt;Runtime platform&gt;</b>
<b>Explanation</b>	Informational. This message is the header of the information messages 10050037 - 10050042 and 10050051 - 10050052 which are printed when RPC server is started.
<b>Action</b>	None.
<b>10050037</b>	<b>Minworkers (free for new conversation) &lt;number&gt;</b>
<b>Explanation</b>	Informational. Prints <code>minworkers</code> startup parameters.
<b>Action</b>	None.

<b>10050038</b>	<b>Maxworkers (max parallel active) ..... &lt;number&gt;</b>
<b>Explanation</b>	Informational. Prints <code>maxworkers</code> startup parameters.
<b>Action</b>	None.
<b>10050039</b>	<b>Endworkers (criteria when to stop) ... &lt;number&gt;</b>
<b>Explanation</b>	Informational. Prints <code>endworkers</code> startup parameters.
<b>Action</b>	None.
<b>10050040</b>	<b>Timeout (in seconds for Broker) ... &lt;seconds&gt;</b>
<b>Explanation</b>	Informational. Prints <code>timeout</code> startup parameters.
<b>Action</b>	None.
<b>10050041</b>	<b>API used (for Broker) ..... &lt;api-version&gt;</b>
<b>Explanation</b>	Informational. Prints <code>ETB_APIVERS</code> startup parameters.
<b>Action</b>	None.
<b>10050042</b>	<b>Codepage (for data conversion) ..... &lt;CodePage&gt;</b>
<b>Explanation</b>	Informational. Prints <code>CODEPAGE</code> startup parameters.
<b>Action</b>	None.
<b>10050043</b>	<b>Invalid Thread Status</b>
<b>Explanation</b>	Internal check has detected an error in thread status logic. The reason might be system shortages. The thread might be flagged unusable.
<b>Action</b>	Check if the server can still continue working. If not, restart server. If problem persists, contact Software AG Support.
<b>10050044</b>	<b>ERXDynDispatch() failed</b>
<b>Explanation</b>	Dispatcher call to ERX Runtime (Broker <code>RECEIVE</code> ) failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.

<b>10050045</b>	<b>SERVER</b>
<b>Explanation</b>	Informational. This token is used to identify the originator thread of a message.
<b>Action</b>	None.
<b>10050046</b>	<b>Worker</b>
<b>Explanation</b>	Informational. This token is used to identify the original thread of a message.
<b>Action</b>	None.
<b>10050047</b>	<b>Transaction Control Callback failed</b>
<b>Explanation</b>	Internal function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050048</b>	<b>Server Control Callback failed</b>
<b>Explanation</b>	Internal callback function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050049</b>	<b>Client Identification Callback failed</b>
<b>Explanation</b>	Internal callback function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050050</b>	<b>Init Globals failed</b>
<b>Explanation</b>	Internal function failed. This message is accompanied by a genuine error message. CICS: This message will also be used to dynamically initialize a shared memory block within the ERX Main control block.
<b>Action</b>	Check original error message for further action. CICS: Recompile and/or reload ERX Main control block.
<b>10050051</b>	<b>Broker ID (default) ... &lt;BrokerID&gt;</b>
<b>Explanation</b>	Informational. Prints BROKERID startup parameters (entered in the command line or configuration parameter BrokerID).
<b>Action</b>	None.

<b>10050052</b>	<b>Service Name (default) .....</b> <ClassName><ServerName><Service>
<b>Explanation</b>	Informational. Prints CLASS SERVER SERVICE startup parameters (entered in the command line or configuration parameter Class, ServerName and Server).
<b>Action</b>	None.
<b>10050053</b>	<b>Load of Memory &lt;MapName&gt; failed</b>
<b>Explanation</b>	CICS only: ERX Main control block could not be loaded.
<b>Action</b>	Check CICS resource definitions and if module exist in DFHRPL load library.
<b>10050054</b>	<b>Invalid Memory Version=&lt;version&gt; found in &lt;MapName&gt;</b>
<b>Explanation</b>	CICS only: Invalid version detected in ERX Main control block. Either the version is out of support or (most likely) the control is corrupt.
<b>Action</b>	Recompile ERX Main control block with updated ERXMAIN macro.
<b>10050055</b>	<b>Read of Memory &lt;MapName&gt; failed</b>
<b>Explanation</b>	The message indicates an error with ERX Main control block. This message is accompanied by a genuine error message.
<b>Action</b>	Check original messages for possible errors.
<b>10050056</b>	<b>Usage : &lt;SeverName&gt; Broker@Server/Class/Service [-Option]</b> or : <b>&lt;SeverName&gt; Broker Class Server Service [-Option]</b> or : <b>&lt;SeverName&gt; CFG=ConfigFile.cfg [-Option]</b>
<b>Explanation</b>	Usage error. The correct syntax will be displayed. The server will terminate.
<b>Action</b>	Start server again with correct syntax.
<b>10050057</b>	<b>or : &lt;ServerName&gt; MEM=memory</b>
<b>Explanation</b>	Operating system-dependent usage message, part of message 10050056.
<b>Action</b>	Start server again with correct syntax.
<b>10050058</b>	<b>Option : -s[ilent] suppresses input from STDIN Default: &lt;ServerName&gt; ETB001 RPC SRV1 CALLNAT</b>
<b>Explanation</b>	Operating system-dependent usage message, part of message 10050056.
<b>Action</b>	Start server again with correct syntax.

<b>10050059</b>	<b>Press Return key to continue.</b>
<b>Explanation</b>	Part of message 10050056.
<b>Action</b>	Confirm usage messages and start server again with correct syntax.
<b>10050060</b>	<b>Program program-name abended with exception= exception-code</b>
<b>Explanation</b>	(Customer) server subroutine <program-name> has abended. Depending on the operating system, dump information will be provided. The server will continue running. The thread in which the abend occurred will be terminated or (if not possible) will be marked as UNUSABLE.
<b>Action</b>	Correct the malfunctioning subroutine.
<b>10050061</b>	<b>Not yet implemented</b>
<b>Explanation</b>	Informational message.
<b>Action</b>	None.
<b>10050062</b>	<b>ERXTerminateServer() failed</b>
<b>Explanation</b>	The complex function <code>ERXTerminateServer</code> will communicate with the Broker to stop all existing replicas for this server. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050063</b>	<b>Conversations aborted ..... number</b>
<b>Explanation</b>	Informational. Prints the number of "unsuccessful" calls: <ul style="list-style-type: none"><li>■ all calls that return with error because of server subroutine problem and/or data conversations,</li><li>■ Broker (timeout) terminated the call</li><li>■ client terminates during conversation</li><li>■ in conversational mode: the conversation did not finish with <code>DISCONNECT - COMMIT</code>.</li></ul>
<b>Action</b>	None.
<b>10050064</b>	<b>Thread stopped because of major problems</b>
<b>Explanation</b>	Internal error in server. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.

<b>10050065</b>	<b>ERXFreeVData() failed</b>
<b>Explanation</b>	Service function failed. This message is accompanied by a genuine error message.
<b>Action</b>	Check original error message for further action.
<b>10050066</b>	<b>The max. thread entries available ..... number</b>
<b>Explanation</b>	Informational. This message is printed to a trace file. The maximum number of thread entries is 256. Exception: under CICS it is automatically calculated from free memory in the ERX Main control block.
<b>Action</b>	None.
<b>10050067</b>	<b>Server is starting.....</b>
<b>Explanation</b>	Informational. This message is accompanied by a timestamp. The message will be generated after the Broker availability has been successfully tested. See also message 10050069.
<b>Action</b>	none
<b>10050068</b>	<b>Server is stopping.....</b>
<b>Explanation</b>	Informational. This message is accompanied by a timestamp.
<b>Action</b>	none.
<b>10050069</b>	<b>Broker not available, has tried to connect x times</b>
<b>Explanation</b>	The EntireX RPC server detected that the Broker is not available (either during startup or at runtime). Depending on the restartcycles option, the server will try to logon again after a one-minute timeout. If the Broker becomes available during these restart cycles, the server will continue with message 10050067. Otherwise, it will terminate.
<b>Action</b>	Restart Broker, if desirable.
<b>10050074</b>	<b>Broker ID (in use) &lt;BrokerID&gt;</b>
<b>Explanation</b>	Informational. Prints the Broker ID with which a session is requested. This Broker ID can be different from the default Broker ID.
<b>Action</b>	None

<b>10050075</b>	<b>Service (in use) &lt;ClassName&gt;, &lt;ServerName&gt;, &lt;Service&gt;</b>
<b>Explanation</b>	Informational. Prints the class name, server name and service with which a connection is established. The values can be different from the default or the logical service
<b>Action</b>	None
<b>10050076</b>	<b>ERX Runtime version and RPC server not compatible</b>
<b>Explanation</b>	Your EntireX Installation is destroyed.
<b>Action</b>	Reinstall EntireX.
<b>10050077</b>	<b>Response number from RPC server</b>
<b>Explanation</b>	The EntireX RPC server returned an error.
<b>Action</b>	See under error <i>number</i> for further explanation and action to take.
<b>10050082</b>	<b>Callee not found</b>
<b>Explanation</b>	The EntireX/Natural RPC Server did not find the server program.
<b>Action</b>	Depending on the type of your RPC server, one of the following situations may apply: <ol style="list-style-type: none"> <li>1. If the server is an EntireX RPC server on Windows/UNIX:             <ul style="list-style-type: none"> <li>■ The server stub with the name <i>D&lt;library&gt;.dll</i> on Windows or <i>D&lt;library&gt;.so   sl</i> on UNIX must be accessible to the EntireX RPC server. The program called must be available within that library as an export named <i>D&lt;program&gt;</i>.</li> <li>■ The same applies to the server program. A server with the name <i>&lt;library&gt;.dll</i> on Windows or <i>&lt;library&gt;.so   sl</i> on UNIX must be accessible to the EntireX RPC server. The program called must be available within that library as an export named <i>&lt;program&gt;</i>.</li> </ul> <p>Check read/execution access, library names and exports.</p> </li> <li>2. If the server is an EntireX RPC server on CICS:             <ul style="list-style-type: none"> <li>■ A program named <i>&lt;program&gt;</i> must exist in the DFHRPL steplib concatenation.</li> <li>■ The program must be CSD-defined and (depending on CICS version) must be installed.</li> </ul> </li> <li>3. If the server is a Natural RPC Server:             <ul style="list-style-type: none"> <li>■ If Natural Logon is switched on for the request or conversation, the program must be found within the target library (or its steplib concatenation).</li> <li>■ If Natural Logon is switched off for the request or conversation, the program must be found in the initial library (or its steplib concatenation) of the Natural RPC Server.</li> </ul> <p>See also the appropriate Natural documentation.</p> </li> <li>4. If the server is an EntireX RPC Server for XML/SOAP:</li> </ol>

- The server classes must be accessible from the EntireX RPC Server for XML/SOAP.
- Make sure that the path of the server classes is in the classpath.

<b>10050086</b>	<b>Invalid job control - WORKER-PARMS is empty</b>
<b>Explanation</b>	The SDF variable WORKER-PARMS in S-procedure START-RPC-SERVER is not set up correctly. This message will be sent by RPC servers under BS2000 only.
<b>Action</b>	Correct the job control and rerun the job.
<b>10050087</b>	<b>Shared memory could not be established</b>
<b>Explanation</b>	An error occurred while establishing the main or a worker task. This message will be sent by RPC servers under BS2000 only.
<b>Action</b>	Contact Software AG Support.
<b>10050088</b>	<b>Abnormal termination during program execution</b>
<b>Explanation</b>	The server program called by the EntireX/Natural RPC Server caused an abnormal end.
<b>Action</b>	Check the program and correct the error.
<b>10050089</b>	<b>ERXSetSecurity() failed</b>
<b>Explanation</b>	RPC server was started with option KERNELSECURITY, but failed.  This message is accompanied by a genuine error message.
<b>Action</b>	Correct installation error and restart.
<b>10050090</b>	<b>Broker Kernel-Security..... &lt;level&gt;</b>
<b>Explanation</b>	Informational.  RPC server runs with broker KERNELSECURITY=<level>.
<b>Action</b>	None.
<b>10050091</b>	<b>Authentication failed: user=&lt;userid&gt;, reason=&lt;reason&gt;</b>
<b>Explanation</b>	The host security refused an authentication request.
<b>Action</b>	Inspect reason code. Retry if password mistyped, otherwise contact your security administrator.

<b>10050092</b>	<b>Security could not be initialized, reason=&lt;reason&gt;</b>
<b>Explanation</b>	Internal PC routines could not be installed.
<b>Action</b>	Inspect reason code and contact your system administrator.
<b>10050093</b>	<b>Reserved</b>
<b>Explanation</b>	
<b>Action</b>	
<b>10050094</b>	<b>Cannot reset authentication, reason=&lt;reason&gt;</b>
<b>Explanation</b>	The host security refused to reset a previously performed authentication request.
<b>Action</b>	Inspect reason code and contact your security administrator.
<b>10050095</b>	<b>ERX Runtime not found</b>
<b>Explanation</b>	EntireX RPC server requires the ERX shared library to be available. On Windows this is usually located in directory <drive>:\SoftwareAG\EntireX\bin.
<b>Action</b>	Check EntireX installation. Verify that the <i>erx.dll</i> is in standard installation path.
<b>10050096</b>	<b>PL/I stack level exceeded</b>
<b>Explanation</b>	RPC server received request for target PL/I application but application interface has higher indent level than PL/I supports (32).
<b>Action</b>	Correct RPC client application.
<b>10050098</b>	<b>RPC server does not support RPC protocol version &lt;rpc-version&gt; found in server mapping</b>
<b>Explanation</b>	The server mapping file accessed with IDL library and IDL program for the RPC request contained an RPC protocol version not supported by the RPC server. See <i>Supported RPC Protocols</i> in the EntireX RPC Programming documentation. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.
<b>Action</b>	Contact Software AG Support for RPC server upgrade.
<b>10050099</b>	<b>Server mapping format is invalid</b>
<b>Explanation</b>	The server mapping file accessed with IDL library and IDL program for the RPC request contained an invalid format. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.
<b>Action</b>	Check that you have the latest updates for the Designer installed. Try to produce the server mapping again, see COBOL Wrapper or IDL Extractor for COBOL and retry.

For server mapping files (.cvm), you need to rebuild all RPC clients communicating with this RPC server program. Select the appropriate wrapper (see *EntireX Wrappers*) and re-generate the client interface objects. For RPC connections with the webMethods EntireX Adapter for Integration Server, you need to update your Adapter connection. See *Step 3: Create or Update an Adapter Connection* in the Integration Server Wrapper documentation.

If this fails, contact Software AG Support.

<b>10050100</b>	<b>Reserved</b>
<b>10050101</b>	<b>Server mapping file in use..... Yes</b>
<b>Explanation</b>	If the RPC server uses a server-side mapping container, this message will be printed, otherwise no message. See <i>Server-side Mapping Files</i> in the RPC server documentation for z/OS (CICS, Batch, IMS)   BS2000.
<b>Action</b>	None.
<b>10050102</b>	<b>EXTRACTOR service name reserved for internal use</b>
<b>Explanation</b>	The RPC server did not come up. In the RPC server configuration, EXTRACTOR is specified as the broker service name, but EXTRACTOR is used for internal purposes of the RPC server and is a Software AG reserved service name.
<b>Action</b>	Do not specify EXTRACTOR as the broker service name in the RPC server configuration, and restart the RPC server.
<b>10050103</b>	<b>DEPLOYMENT service name reserved for internal use</b>
<b>Explanation</b>	The RPC server did not come up. In the RPC server configuration DEPLOYMENT is specified as the broker service name, but DEPLOYMENT is used for internal purposes of the RPC server and is a Software AG reserved service name.
<b>Action</b>	Do not specify DEPLOYMENT as the broker service name in the RPC server configuration, and restart the RPC server.
<b>10050104</b>	<b>Deployment service defined but could not open SVM file</b>
<b>Explanation</b>	The RPC server did not come up. In the RPC server configuration, the deployment service is specified (see <i>Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000) in the respective RPC Server documentation), but the server-side mapping container could not be opened.
<b>Action</b>	Check your installation. Possible reasons: <ul style="list-style-type: none"> <li>■ The server-side mapping container is missing. For configuration see <i>Enabling the Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000 in the respective RPC Server documentation.</li> <li>■ The server-side mapping container has mismatched DCB parameter.</li> </ul>

- ....

<b>10050110</b>	<b>Call for CICS DFHCOMMAREA exceeds 32K limit</b>
<b>Explanation</b>	The RPC Server for CICS tried to call an RPC server with an interface of type <i>CICS with DFHCOMMAREA Calling Convention</i> (COBOL Wrapper   Extractor), but the length of the data exceeded the CICS DFHCOMMAREA maximum of 32 KB.
<b>Action</b>	<p>Check the interface type of the target RPC server program called:</p> <ul style="list-style-type: none"> <li>■ If it is <i>not</i> a DFHCOMMAREA interface but a Large Buffer or Channel Container interface, the server mapping file may be missing or is wrong. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li> </ul> <p>For server mapping files (.cvm), you need to rebuild all RPC clients communicating with this RPC server program. Select the appropriate wrapper (see <i>EntireX Wrappers</i>) and re-generate the client interface objects. For RPC connections with the webMethods EntireX Adapter for Integration Server, you need to update your Adapter connection. See <i>Step 3: Create or Update an Adapter Connection</i> in the <i>Integration Server Wrapper</i> documentation.</p> <ul style="list-style-type: none"> <li>■ If it is a DFHCOMMAREA interface, it is not possible to call such an RPC server program. Check if you can migrate the RPC server program to a Large Buffer or Channel Container interface. See <i>Supported COBOL Interface Types</i> under <i>Introduction to the IDL Extractor for COBOL</i> or <i>COBOL Server Interface Types</i> under <i>Introduction to the COBOL Wrapper</i>.</li> </ul>
<b>10050113</b>	<b>Invalid usage of SAG service</b>
<b>Explanation</b>	EntireX services EXTRACTOR or DEPLOYMENT were used other than by broker services EXTRACTOR or DEPLOYMENT.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ For the EntireX RPC client: use broker service EXTRACTOR and broker service DEPLOYMENT respectively.</li> <li>■ For the EntireX RPC server: configure the RPC server with EXTRACTOR=YES and DEPOLOYMENT=YES.</li> <li>■ Allow services EXTRACTOR and DEPLOYMENT in the Broker attribute file.</li> </ul>
<b>10050114</b>	<b>No matching user ID</b>
<b>Explanation</b>	The EntireX RPC server runs with option IMPERSONATION=AUTO , SAME_USER. This requires the client to send both, the EntireX user ID as well as the RPC user ID and the IDs must be equal.
<b>Action</b>	Correct your EntireX client.

<b>10050116</b>	<b>Deployment service not supported in that configuration</b>
<b>Explanation</b>	Deployment service is feasible only when using the programming language COBOL for the server programs (see also configuration parameter MARSHALLING in the respective RPC documentation section).
<b>Action</b>	Check the RPC server configuration options for consistency.
<b>10050118</b>	<b>No SVM file/record found but required</b>
<b>Explanation</b>	The RPC server runs with COBOL support but no server mapping file was found for this particular RPC request, where one is required. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.
<b>Action</b>	For server mapping files (.cvm), you need to rebuild all RPC clients communicating with this RPC server program. Select the appropriate wrapper (see <i>EntireX Wrappers</i> ) and re-generate the client interface objects. For RPC connections with the webMethods EntireX Adapter for Integration Server, you need to update your Adapter connection. See <i>Step 3: Create or Update an Adapter Connection</i> in the Integration Server Wrapper documentation.
<b>10050119</b>	<b>Wrong SVM record type found</b>
<b>Explanation</b>	The server mapping file accessed with IDL library and IDL program is inconsistent and does not match the RPC request. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.
<b>Action</b>	<p>Check you have the latest updates for the Designer installed. Try to produce the server mapping again and retry. See COBOL Wrapper or IDL Extractor for COBOL.</p> <p>For server mapping files (.cvm), you need to rebuild all RPC clients communicating with this RPC server program. Select the appropriate wrapper (see <i>EntireX Wrappers</i>) and re-generate the client interface objects. For RPC connections with the webMethods EntireX Adapter for Integration Server, you need to update your Adapter connection. See <i>Step 3: Create or Update an Adapter Connection</i> in the Integration Server Wrapper documentation.</p> <p>If this fails, contact Software AG Support.</p>
<b>10050120</b>	<b>WARNING! API-area was exceeded! Lib=&lt;Library&gt; Pgm=&lt;program&gt;</b>
<b>Explanation</b>	The RPC server detected a memory override by the called server program behind the provided interface (API).
<b>Action</b>	<ul style="list-style-type: none"> <li>■ COBOL: Check that the <i>Software AG IDL File</i> in the IDL Editor documentation and <i>Server Mapping Files for COBOL</i> match the called server program.</li> <li>■ Other: Check that the <i>Software AG IDL File</i> in the IDL Editor documentation matches the called server program.</li> </ul>

<b>10050122</b>	<b>EntireX RPC server error 122 occurred</b>
<b>Explanation</b>	An error occurred within the RPC Server runtime while deallocating storage during worker task shutdown.
<b>Action</b>	None.
<b>10050123</b>	<b>Invalid transaction ID</b>
<b>Explanation</b>	The (CICS) RPC server was started with transaction ID different to the transaction-id that was specified in ERXMAIN control block.
<b>Action</b>	The transaction IDs must be unique.
<b>10050124</b>	<b>Server already active</b>
<b>Explanation</b>	An attempt was made to start (CICS) RPC server a second time.
<b>Action</b>	This message was issued by the RPC server (see also message 10170004). Only one server instance can be started using the same shared memory block (ERXMAIN control block).
<b>10050125</b>	<b>No free server resources available</b>
<b>Explanation</b>	An attempt was made to start an RPC worker or user task, but the allocated thread table has no more free entries.
<b>Action</b>	Either reduce the MAXW parameter or increase the SIZE parameter. Check also the server log file for errors, because this situation may also be caused by aborting threads.
<b>10050126</b>	<b>RPC Server is initialized</b>
<b>Explanation</b>	Message of RPC server running under z/OS. Informational. Supports process automation.
<b>Action</b>	None.
<b>10050127</b>	<b>RPC in closure</b>
<b>Explanation</b>	Message of RPC server running under z/OS. Informational. Supports process automation.
<b>Action</b>	None.

<b>10050129</b>	<b>Invalid parameter/program search order</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support
<b>10050130</b>	<b>Service not supported. (&lt;service&gt;)</b>
<b>Explanation</b>	The server was configured to use a feature that is not supported under this operating system.
<b>Action</b>	Change server configuration.
<b>10050131</b>	<b>Setting CICS sync point failed (&lt;resp&gt;, &lt;resp2&gt;)</b>
<b>Explanation</b>	RPC server under CICS tried to perform EXEC CICS SYNCPOINT (due to end of conversation) but failed.
<b>Action</b>	Check CICS response codes for this error.
<b>10050132</b>	<b>Server option &lt;option&gt; deprecated</b>
<b>Explanation</b>	At startup, the server found an option that is deprecated.
<b>Action</b>	The message is informational. Normally, the option will still be supported for compatibility reasons, but support may be withdrawn in a future release. See EntireX Release Notes for recommended action.
<b>10050134</b>	<b>Reserved for internal use.</b>
<b>10050135</b>	<b>Reserved for internal use.</b>
<b>10050136</b>	<b>Reserved for internal use.</b>
<b>10050137</b>	<b>Reserved for internal use.</b>
<b>10050138</b>	<b>Reserved for internal use.</b>
<b>10050139</b>	<b>Reserved for internal use.</b>

<b>10050140</b>	<b>Reserved for internal use.</b>
<b>10050141</b>	<b>Broker resources are currently not available &lt;additional info&gt;</b>
<b>Explanation</b>	RPC server received broker status: broker not available (error class 0215) or broker resource shortage (error classes 0036 and 0037). These status codes will be considered as a temporary bottleneck. Depending on RPC server option <code>RESTARTCYCLES</code> , the server will try to reconnect the broker within this restart period.
<b>Action</b>	No action is required if the broker problems are solved within the RPC server restart period. Otherwise check broker job/log for problems.
<b>10050142</b>	<b>RPC Server initialization timeout at worker creation</b>
<b>Explanation</b>	A final step of the server initialization is to launch the configured minimum number of worker tasks. If this does not succeed within 10 seconds, the server aborts the initialization.
<b>Action</b>	Verify server output for additional messages indicating problems with the worker initialization. Verify server trace output for additional error messages.
<b>10050143</b>	<b>Server returned invalid data</b>
<b>Explanation</b>	The RPC server received an area from the called server program with a length less than expected. The RPC call is invalid. This situation can occur in environments that may alter the reply length, such as <i>CICS with DFHCOMMAREA Large Buffer Interface</i> (COBOL Wrapper   Extractor) or <i>CICS with Channel Container Calling Convention</i> (COBOL Wrapper   Extractor).
<b>Action</b>	Check the EntireX RPC environment for consistency. The expected reply length does not match the length provided the called server program. Consider using fixed arrays in a variable manner or optional output. See <i>Set Arrays (Fixed &lt;-&gt; Unbounded)</i> for interface type DFHCOMMAREA (In same as Out, In different to Out)   Large Buffer (In same as Out, In different to Out)   Channel Container   IMS Connect   COBOL Converter (In same as Out, In different to Out)
<b>10056971</b>	<b>EntireX RPC server error 6971 occurred</b>
<b>Explanation</b>	The cause of the error and corrective action depends on the type of your RPC server.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ If the server is an EntireX RPC server, contact Software AG Support because of internal problems within the server.</li> <li>■ If the server is a Natural RPC Server, see the appropriate Natural documentation for error 6971.</li> </ul>

<b>10056974</b>	<b>EntireX RPC server error 6974 occurred</b>
<b>Explanation</b>	The cause of the error and corrective action depends on the type of your RPC server.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ If the server is an EntireX RPC server, increase your memory resources and retry the program because a memory request could not be fulfilled by the operating system.</li> <li>■ If the server is a Natural RPC Server, see the appropriate Natural documentation for error 6974.</li> </ul>
<b>10056977</b>	<b>EntireX RPC server error 6977 occurred</b>
<b>Explanation</b>	The EntireX/Natural RPC request could not be executed.
<b>Action</b>	Examine the log of the EntireX/Natural RPC Server for the cause of the malfunction.
<b>10056978</b>	<b>EntireX RPC server error 6978 occurred</b>
<b>Explanation</b>	The cause of the error and corrective action depends on the type of your RPC server.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ If the server is an EntireX RPC server, the reason could be an invalid compression value.</li> <li>■ If the server is a Natural RPC Server, refer to the appropriate Natural documentation for error 6978.</li> </ul>

# 34

## Message Class 1006 - DCOM Wrapper

---

This message class is returned if an error occurred in the DCOM Wrapper. Messages of this class have the format:

1006*nnnn*

where 1006 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

<b>10060001</b>	<b>User ID - invalid type</b>
<b>Explanation</b>	The method <code>SetInfo()</code> is called with the wrong data type for user ID.
<b>Action</b>	Check access to user ID. The correct data type for user ID is the automation data type BSTR.
<b>10060002</b>	<b>User ID - invalid length (maximum length is 32 characters)</b>
<b>Explanation</b>	The user ID is too long.
<b>Action</b>	Check access to user ID. Maximum length of user ID is 32 characters.
<b>10060003</b>	<b>Password - invalid type</b>
<b>Explanation</b>	The method <code>SetInfo()</code> is called with the wrong data type for password.
<b>Action</b>	Check access to password. The correct data type for password is the automation data type BSTR.

<b>10060004</b>	<b>Password - invalid length (maximum length is 32 characters)</b>
<b>Explanation</b>	The password is too long.
<b>Action</b>	Check access to password. Maximum length of password is 32 characters.
<b>10060005</b>	<b>New password - invalid type</b>
<b>Explanation</b>	The method <code>SetInfo()</code> is called with the wrong data type for new password.
<b>Action</b>	Check access to new password. The correct data type for new password is the automation data type <code>BSTR</code> .
<b>10060006</b>	<b>New Password - maximum length is 32 characters</b>
<b>Explanation</b>	The new password is too long.
<b>Action</b>	Check access to new password. Maximum length of new password is 32 characters.
<b>10060008</b>	<b>RPC user ID - maximum length is 32 characters</b>
<b>Explanation</b>	The RPC user ID is too long.
<b>Action</b>	Check access to RPC user ID. Maximum length of RPC user ID is 32 characters.
<b>10060010</b>	<b>RPC password - maximum length is 32 characters</b>
<b>Explanation</b>	The RPC password is too long.
<b>Action</b>	Check access to RPC password. Maximum length of RPC password is 32 characters.
<b>10060011</b>	<b>Token - invalid type</b>
<b>Explanation</b>	The method <code>SetInfo()</code> is called with the wrong data type for token.
<b>Action</b>	Check access to token. The correct data type for token is the automation data type <code>BSTR</code> .
<b>10060012</b>	<b>Token - maximum length is 16 characters</b>
<b>Explanation</b>	The token is too long.
<b>Action</b>	Check access to token. Maximum length of token is 16 characters.
<b>10060014</b>	<b>Security token - maximum length is 32 bytes</b>
<b>Explanation</b>	The security token is too long.
<b>Action</b>	Check access to security token. Maximum length of security token is 32 bytes.

<b>10060015</b>	<b>Broker ID - invalid type</b>
<b>Explanation</b>	The method <code>SetInfo()</code> is called with the wrong data type for Broker ID.
<b>Action</b>	Check access to server address. The correct data type for Broker ID is the automation data type <code>BSTR</code> .
<b>10060016</b>	<b>Broker ID - maximum length is 32 characters</b>
<b>Explanation</b>	The Broker ID is too long.
<b>Action</b>	Check access to server address. Maximum length of Broker ID is 32.
<b>10060017</b>	<b>Server Class - invalid type</b>
<b>Explanation</b>	The method <code>SetInfo()</code> is called with the wrong data type for server class.
<b>Action</b>	Check access to server address. The correct data type for server class is the automation data type <code>BSTR</code> .
<b>10060018</b>	<b>Server Class - maximum length is 32 characters</b>
<b>Explanation</b>	The server class is too long.
<b>Action</b>	Check access to server address. Maximum length of server class string is 32 characters.
<b>10060019</b>	<b>Server Name - invalid type</b>
<b>Explanation</b>	The method <code>SetInfo()</code> is called with the wrong data type for server name.
<b>Action</b>	Check access to Server Address. The correct data type for server name is the automation data type <code>BSTR</code> .
<b>10060020</b>	<b>Server Name - maximum length is 32 characters</b>
<b>Explanation</b>	The server name string is too long.
<b>Action</b>	Check access to server address. Maximum length of server name string is 32 characters.
<b>10060021</b>	<b>Service Name - invalid type</b>
<b>Explanation</b>	The method <code>SetInfo()</code> is called with the wrong data type for service name.
<b>Action</b>	Check access to server address. The correct data type for service name is the automation data type <code>BSTR</code> .

- 10060022**            **Service Name - maximum length is 32 characters**  
**Explanation**        The service name string is too long.  
**Action**                Check access to server address. Maximum length of service name string is 32 characters.
- 10060023**            **Invalid server address format**  
**Explanation**        The format of server address is invalid.  
**Action**                Check access to server address. The correct format is <brokerID>[:<port>]@server class/server name/service name.
- 10060024**            **Invalid server address**  
**Explanation**        The server address string is invalid.  
**Action**                Check access to server address. The correct format is <brokerID>[:<port>]@server class/server name/service name.
- 10060026**            **Library name - maximum length is 8 characters**  
**Explanation**        The library name is too long.  
**Action**                Check access to Library. Maximum length of library name is 8 characters.
- 10060027**            **Natural Logon - invalid type**  
**Explanation**        The method `SetInfo()` is called with the wrong data type for Natural Logon.  
**Action**                Check access to Natural Logon. The correct data type for Natural Logon is the automation data type `BSTR`.
- 10060028**            **Natural Logon - invalid length**  
**Explanation**        The Natural Logon consists of more than one character.  
**Action**                Check access to Natural Logon. Values for Natural Logon are 'N' or 'Y', or use the definition in `ERX.H` `ERX_NATURAL_LOGON_NO` or `ERX_NATURAL_LOGON_YES`, respectively.
- 10060029**            **Compression - invalid type**  
**Explanation**        The method `SetInfo()` is called with the wrong data type for compression.  
**Action**                Check access to compression. The correct data type for compression is the automation data type `BSTR`.

<b>10060030</b>	<b>Compression - invalid length</b>
<b>Explanation</b>	The Compression consists of more than one character.
<b>Action</b>	Check access to compression. Values are '1' or '2', or use the definition in ERX.H ERX_COMPRESSION_NO or ERX_COMPRESSION_YES, respectively.
<b>10060031</b>	<b>Timeout - invalid type</b>
<b>Explanation</b>	The method SetInfo() is called with the wrong data type for timeout.
<b>Action</b>	Check access to timeout. The correct data type for timeout is the automation data type LONG.
<b>10060033</b>	<b>Force Logon - invalid type</b>
<b>Explanation</b>	Wrong data type for ForceLogon attribute.
<b>Action</b>	Check access to ForceLogon. The correct data type for ForceLogon is the automation data type BSTR.
<b>10060034</b>	<b>Force Logon - invalid length</b>
<b>Explanation</b>	Wrong length of ForceLogon attribute.
<b>Action</b>	Check access to ForceLogon. Maximum length of ForceLogon is 1 character.
<b>10060035</b>	<b>Encryption Level - invalid type</b>
<b>Explanation</b>	Wrong data type for EncryptionLevel attribute.
<b>Action</b>	Check access to EncryptionLevel. The correct data type for EncryptionLevel is the automation data type BSTR.
	<b>Note:</b> For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.
<b>10060036</b>	<b>Encryption Level - invalid length</b>
<b>Explanation</b>	Wrong length of EncryptionLevel attribute.
<b>Action</b>	Check access to EncryptionLevel. Maximum length of EncryptionLevel is 1 character.
	<b>Note:</b> For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.

<b>10060037</b>	<b>SSL String - invalid type</b>
<b>Explanation</b>	Wrong data type for SSL string
<b>Action</b>	Check access to SSL string. The correct data type for SSL string is the automation data type BSTR.
<b>10060039</b>	<b>Property: string too long</b>
<b>Explanation</b>	The string is longer than determined in the IDL file.
<b>Action</b>	Check access to attributes inside a group definition.
<b>10060040</b>	<b>Property: get invalid array</b>
<b>Explanation</b>	An attempt is made to set a property for an array which contains at least one corrupt element.
<b>Action</b>	Check and correct the application.
<b>10060041</b>	<b>Property: get null pointer</b>
<b>Explanation</b>	The property is accessed with a null pointer.
<b>Action</b>	Check and correct the application.
<b>10060042</b>	<b>Date format is invalid</b>
<b>Explanation</b>	Wrong data type for date attribute.
<b>Action</b>	Check variables used in method call. The automation data type for date is double.
<b>10060043</b>	<b>Time format is invalid</b>
<b>Explanation</b>	Wrong data type for time attribute.
<b>Action</b>	Check variables used in method call. The automation data type for time is double.
<b>10060044</b>	<b>Sign found that is not in first position of alpha-string</b>
<b>Explanation</b>	The alpha-string to be converted to a Natural data type Packed or Non-packed contains a sign character on first position of the alpha string.
<b>Action</b>	Check and correct the application.

<b>10060045</b>	<b>Alpha string with multiple signs found</b>
<b>Explanation</b>	The number string contains more than one sign.
<b>Action</b>	Check and correct the application.
<b>10060046</b>	<b>Alpha string with multiple precisions found</b>
<b>Explanation</b>	The number string contains more than one decimal point.
<b>Action</b>	Check and correct the application.
<b>10060047</b>	<b>Alpha string contains invalid character</b>
<b>Explanation</b>	The number string contains unexpected characters.
<b>Action</b>	Check and correct the application.
<b>10060048</b>	<b>Alpha string with more digits than defined</b>
<b>Explanation</b>	The number format is invalid, the number string has more digits than expected.
<b>Action</b>	Correct the application.
<b>10060050</b>	<b>More digits before decimal point than defined</b>
<b>Explanation</b>	The format of number is invalid, the number has more digits before the decimal point than expected.
<b>Action</b>	Correct the application.
<b>10060051</b>	<b>More digits after decimal point than defined</b>
<b>Explanation</b>	The format of the number is invalid, the number has more digits after the decimal point than expected.
<b>Action</b>	Correct the application.
<b>10060052</b>	<b>Loss of precision during conversion</b>
<b>Explanation</b>	A value of N/P data type is cut or rounded during conversion.
<b>Action</b>	Check your N/P data types. Resize these data types in the Software AG IDL file or change the feature setting.

<b>10060053</b>	<b>Number/string is too long</b>
<b>Explanation</b>	A value is cut or rounded during conversion.
<b>Action</b>	Check your values. Correct values in your application or change feature setting.
<b>10060054</b>	<b>Parameter out of range</b>
<b>Explanation</b>	A numeric data type is used with a value which exceeds the valid range.
<b>Action</b>	Correct values in your application.
<b>10060055</b>	<b>Length of K data type must be an even number for the current codepage</b>
<b>Explanation</b>	A K data type is not correctly specified in the IDL file for the used codepage.
<b>Action</b>	Check the K data type in the IDL file. Change the length of the K data type in the IDL file to an even number and re-generate the object.
<b>10060057</b>	<b>Conversion from Numeric to Alpha failed</b>
<b>Explanation</b>	The conversion from Natural data type Packed or Non-packed failed.
<b>Action</b>	Check the values of the attributes with N or P declaration in the IDL file.
<b>10060058</b>	<b>Conversion from Alpha to Numeric failed</b>
<b>Explanation</b>	The conversion from a string to Natural data type Packed or Non-packed failed.
<b>Action</b>	Check the values of the attributes with N or P declaration in the IDL file.
<b>10060059</b>	<b>MultiByte to WideCharacter conversion failed</b>
<b>Explanation</b>	The conversion from local character set to wide character set failed.
<b>Action</b>	Internal or user error. Retry method call.
<b>10060060</b>	<b>WideCharacter to MultiByte conversion failed</b>
<b>Explanation</b>	<ol style="list-style-type: none"><li>1. Converted string is longer than size of data type specified in the IDL file.</li><li>2. Conversation method cannot convert the input wide-character string to multibyte-character string. The input string may have invalid characters.</li><li>3. The codepage used does not exist.</li></ol>
<b>Action</b>	<ol style="list-style-type: none"><li>1. Check the length of the input string.</li><li>2. Check the input string.</li><li>3. Check the codepage number entered in the <code>CodePage</code> property.</li></ol>

<b>10060061</b>	<b>String allocation failed</b>
<b>Explanation</b>	The automation server cannot allocate a string.
<b>Action</b>	Increase your free memory, for example by closing another application.
<b>10060062</b>	<b>String reallocation failed</b>
<b>Explanation</b>	The automation server cannot reallocate a string.
<b>Action</b>	Increase your free memory, for example by closing another application.
<b>10060063</b>	<b>Corrupt pointer</b>
<b>Explanation</b>	The conversion method received a null pointer and cannot handle this situation.
<b>Action</b>	Check and initialize this pointer with a valid value.
<b>10060064</b>	<b>Memory allocation failed</b>
<b>Explanation</b>	The automation server cannot allocate the required memory.
<b>Action</b>	Increase your free memory, for example by closing another application.
<b>10060065</b>	<b>Wrong dimension of array</b>
<b>Explanation</b>	The array has an at least one unexpected dimension.
<b>Action</b>	Correct your program.
<b>10060066</b>	<b>Invalid array</b>
<b>Explanation</b>	An array is corrupt.
<b>Action</b>	Correct your program.
<b>10060067</b>	<b>Access to array failed</b>
<b>Explanation</b>	An array has at least one corrupt element.
<b>Action</b>	Check and correct your program.
<b>10060068</b>	<b>Invalid group array</b>
<b>Explanation</b>	The array or one of its elements is corrupt.
<b>Action</b>	Correct your program.

<b>10060069</b>	<b>Registration failed</b>
<b>Explanation</b>	Something went wrong during the registration of the ERX Runtime.
<b>Action</b>	Make sure that the ERX Runtime and the DCOM Wrapper template have the same version.
<b>10060070</b>	<b>Unexpected method call</b>
<b>Explanation</b>	User has tried to redim a fixed-size array or the dimension of the accessed array is wrong.
<b>Action</b>	Check and correct the application.
<b>10060071</b>	<b>A scalar value is used as array</b>
<b>Explanation</b>	A scalar data type was used, where an array was expected.
<b>Action</b>	Check and correct the application.
<b>10060072</b>	<b>Illegal attempt to redim a fixed-size array</b>
<b>Explanation</b>	User has tried to redim a fixed-size array
<b>Action</b>	Check and correct the application.
<b>10060073</b>	<b>Property put to an index number out of range</b>
<b>Explanation</b>	Property put was attempted to an index number out of range.
<b>Action</b>	Check and correct the application.
<b>10060074</b>	<b>Bad array index</b>
<b>Explanation</b>	The array received from the server does not fit into the array data structure defined on the client side.
<b>Action</b>	Check if client and server use the same data structures.
<b>10060080</b>	<b>Variable-size array contains substructure with wrong dimension</b>
<b>Explanation</b>	User has tried to redim an array in an undefined dimension.
<b>Action</b>	Check and correct the application.

<b>10060081</b>	<b>Variable-size array exceeded the maximum for one dimension</b>
<b>Explanation</b>	User has tried to redim an array and the new size exceeds the defined size.
<b>Action</b>	Check the maximum size allowed in the IDL file and correct the application.
<b>10060082</b>	<b>Null pointer exception</b>
<b>Explanation</b>	The variable array is not defined or not accessible.
<b>Action</b>	Internal or user error. Retry method call.
<b>10060083</b>	<b>Access of variable-size array with bad index</b>
<b>Explanation</b>	The index of the array is not defined or not accessible.
<b>Action</b>	Check and correct the application.
<b>10060084</b>	<b>Number of dimensions of a variable-size array too small</b>
<b>Explanation</b>	The accessed dimension of the array does not exist.
<b>Action</b>	Check and correct the application.
<b>10060085</b>	<b>Variable-size array has an element with unexpected type</b>
<b>Explanation</b>	The variable is not an array or the type of the array is not correct.
<b>Action</b>	Check and correct the application.
<b>10060086</b>	<b>Variable-size array</b>
<b>Explanation</b>	The accessed variable is not an array
<b>Action</b>	Check and correct the application.
<b>10060090</b>	<b>Wrong usage of redimension method</b>
<b>Explanation</b>	The accessed dimension of the array does not exist.
<b>Action</b>	Redim the 1st dimension of the array first.
<b>10060091</b>	<b>Out of bounds exception</b>
<b>Explanation</b>	The accessed dimension of the array does not exist
<b>Action</b>	Internal or user error. Retry method call.

<b>10060092</b>	<b>Null pointer exception</b>
<b>Explanation</b>	The array is not defined or not accessible.
<b>Action</b>	Internal or user error. Retry method call.
<b>10060093</b>	<b>Index exceeded maximum value</b>
<b>Explanation</b>	The accessed index of the array exceeds the upper bound.
<b>Action</b>	Check and correct the application.
<b>10060096</b>	<b>Access of a structure with null pointer</b>
<b>Explanation</b>	The accessed structure does not exist.
<b>Action</b>	Check and correct the application.
<b>10060097</b>	<b>Illegal index of required structure</b>
<b>Explanation</b>	The accessed index of the structure does not exist.
<b>Action</b>	Check and correct the application.
<b>10060100</b>	<b>RPC runtime is not available</b>
<b>Explanation</b>	The ERX.DLL does not exist in the EntireX installation.
<b>Action</b>	Check if the EntireX RPC Runtime was installed correctly.
<b>10060101</b>	<b>IDL data type &lt;data type&gt; not supported: &lt;text&gt;</b>
<b>Explanation</b>	The data type is not supported by the DCOM Wrapper. Programs with this data type will be ignored.
<b>Action</b>	No action required.
<b>10061001</b>	<b>Unhandled exception caught. &lt;text&gt;</b>
<b>Explanation</b>	There was an unexpected exception caught. The exception might be reported by any used runtime component of EntireX or Microsoft Visual Studio. The <text> provides detailed information about the reason for this problem.
<b>Action</b>	See the generated log file for detailed information. The log will be automatically generated into your Microsoft Visual Studio environment. Contact Software AG Support.

---

<b>10061002</b>	<b>Unsupported wizard type</b>
<b>Explanation</b>	The Microsoft Visual Studio tries to uses an unsupported wizard type. The EntireX DCOM Wrapper Microsoft Visual Studio Wizard supports only the following wizard types: "Create New Solution" and "Add to Solution".
<b>Action</b>	Refer to the Microsoft Visual Studio documentation. Select supported wizard type and retry.
<b>10061003</b>	<b>EntireX installation was not found</b>
<b>Explanation</b>	The EntireX DCOM Wrapper Microsoft Visual Studio Wizard requires an EntireX installation to work.
<b>Action</b>	Install EntireX and retry.
<b>10061004</b>	<b>Java Runtime not found</b>
<b>Explanation</b>	The EntireX DCOM Wrapper Microsoft Visual Studio Wizard requires a Java Runtime installation to work. Typically a Java Runtime will be installed together with the EntireX installation.
<b>Action</b>	Check your EntireX installation or install Java Runtime and retry.
<b>10061005</b>	<b>Software AG IDL file not found</b>
<b>Explanation</b>	The chosen IDL file in the EntireX DCOM Wrapper Microsoft Visual Studio Wizard main panel does not exist.
<b>Action</b>	Check the IDL file name and choose a valid file name.
<b>10061006</b>	<b>Cancel execute, because no IDL file is chosen</b>
<b>Explanation</b>	The input field for the IDL file in the EntireX DCOM Wrapper Microsoft Visual Studio Wizard main panel is empty.
<b>Action</b>	Check the IDL file name and choose a valid file name.
<b>10061007</b>	<b>Generation of a DCOM Wrapper object has failed</b>
<b>Explanation</b>	The generated DCOM Wrapper object could not be found after generation the object.
<b>Action</b>	Check the DCOM Wrapper object file.

- 10061008**            **Problem while adding a reference to the project. <text>**
- Explanation**        The generated DCOM Wrapper object could not be added to the project references. See the <text> for detailed information about the reason for this problem.
- Action**                See the generated log file for detailed information. The log will be automatically generated into your Microsoft Visual Studio environment. Contact Software AG Support.
- 
- 10061009**            **Problem reading template file. <text>**
- Explanation**        The project source code template file could not be added to the project. See the <text> for detailed information about the reason for this problem.
- Action**                See the generated log file for detailed information. The log will be automatically generated into your Microsoft Visual Studio environment. Contact Software AG Support.
- 
- 10061010**            **Problem writing template file. <text>**
- Explanation**        The project source code template file could not be copied into the project directory. See the <text> for detailed information about the reason of this problem.
- Action**                See the generated log file for detailed information. The log will be automatically generated into your Microsoft Visual Studio environment. Contact Software AG Support.
- 
- 10061011**            **Problem to create a new project file from template. <text>**
- Explanation**        The Visual Studio project file could not be created. See the <text> for detailed information about the reason of this problem.
- Action**                See the generated log file for detailed information. The log will be automatically generated into your Microsoft Visual Studio environment. Contact Software AG Support.
- 
- 10061012**            **Problem to create a new solution. <text>**
- Explanation**        The Visual Studio solution file could not be created. See the <text> for detailed information about the reason of this problem.
- Action**                See the generated log file for detailed information. The log will be automatically generated into your Microsoft Visual Studio environment. Contact Software AG Support.

<b>10061013</b>	<b>Problem to generate DCOM Wrapper Object. &lt;text&gt;</b>
<b>Explanation</b>	The generation of the DCOM Wrapper object could not be completed. The selected IDL file might be not valid.
<b>Action</b>	Check the IDL file.
<b>10061014</b>	<b>Internal Problem! Please see log file for more details</b>
<b>Explanation</b>	The EntireX DCOM Wrapper Microsoft Visual Studio Wizard has detected an internal problem. The reason for this problem will be added to the log file.
<b>Action</b>	See the generated log file for detailed information. The log will be automatically generated into your Microsoft Visual Studio environment. Contact Software AG Support.
<b>10061015</b>	<b>IDL program has a client-side mapping (CVM). DCOM RPC clients not supported: &lt;library&gt;/&lt;program&gt;</b>
<b>Explanation</b>	RPC clients generated with the DCOM Wrapper do not support server mapping files (.cvm). The appendix of the message gives you the IDL library and IDL program name causing the error.
<b>Action</b>	None.
<b>10061016</b>	<b>IDL types N/NU/P/PU with more than 29 digits are not supported: &lt;library&gt;/&lt;program&gt;/&lt;parameter&gt;</b>
<b>Explanation</b>	The DCOM Wrapper does not support IDL N/NU/P/PU data types with more than 29 digits (before and after decimal point). The appendix of the message gives you the IDL library, IDL program name and IDL parameter causing the error.
<b>Action</b>	None.
<b>10061017</b>	<b>IDL types N/NU/P/PU with more than 7 digits after decimal point are not supported: &lt;library&gt;/&lt;program&gt;/&lt;parameter&gt;</b>
<b>Explanation</b>	The DCOM Wrapper does not support IDL N/NU/P/PU data types with more than seven digits after decimal point. The appendix of the message gives you the IDL library, IDL program name and IDL parameter causing the error.
<b>Action</b>	None.

# 35

## Message Class 1008 - EntireX License

---

This class indicates an error occurred in the evaluation of the EntireX license file. Messages of this class have the format:

1008*nnnn*

where 1008 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

**10080001            EntireX license file :1: not found**

**Explanation**        The EntireX XML license key file was not found.

**Action**                Check the filename :1:. Check that the EntireX component has read access to the EntireX license file. On UNIX, check the environment variable \$EXXDIR. If this is correct, contact Software AG Support.

**10080002            The EntireX license has expired**

**Explanation**        Your EntireX license has expired.

**Action**                Enter a valid license file on the EntireX Installation **Preferences** page or contact Software AG Support.

**10080003            EntireX is not licensed for your operating system**

**Explanation**        Your EntireX license is not valid for your operating system.

**Action**                Enter a valid license file on the EntireX Installation **Preferences** page or contact Software AG Support.

- 10080004**            **EntireX license file does not contain a valid key**  
**Explanation**        Your EntireX XML license key file is incorrect and thus invalid.  
**Action**                Enter a valid license file on the EntireX Installation **Preferences** page or contact Software AG Support.
- 10080005**            **EntireX license file has been changed or is corrupt**  
**Explanation**        Your EntireX XML license key file is incorrect and thus invalid.  
**Action**                Enter a valid license file on the EntireX Installation **Preferences** page or contact Software AG Support.
- 10080006**            **Internal error :1: in Software AG license interface**  
**Explanation**        An internal error occurred during the EntireX license check.  
**Action**                Contact Software AG Support.
- 10080007**            **EntireX license file does not contain EntireX Broker**  
**Explanation**        Your EntireX XML license key file is incorrect and thus invalid.  
**Action**                Enter a valid license file on the EntireX Installation **Preferences** page or contact Software AG Support.
- 10080008**            **Invalid subcomponent :1: in component :2:**  
**Explanation**        The license file does not contain the required subcomponent :1: in the section :2:.  
**Action**                Enter a valid license file on the EntireX Installation **Preferences** page or contact Software AG Support.
- 10080009**            **EntireX license: memory allocation error**  
**Explanation**        The operating system could not satisfy a memory request.  
**Action**                Increase your memory resources if possible, or contact Software AG Support.
- 10080010**            **Unable to determine SAG\_COMMON**  
**Explanation**        The environment variable \$SAG is missing. The installation would appear to be incorrect.  
**Action**                Make sure that the product you are using was installed correctly. Otherwise contact Software AG Support.

<b>10080011</b>	<b>PATH length exceeded for license key file</b>
<b>Explanation</b>	The maximum path length is 255 characters. The absolute path (path and file name) of the license file exceeds this maximum length.
<b>Action</b>	If possible, reinstall EntireX on a file system location with a shorter path length. Otherwise contact Software AG Support.
<b>10080012</b>	<b>EntireX license file has no entry for Version :1:</b>
<b>Explanation</b>	The license file does not contain the required version information.
<b>Action</b>	Enter a valid license file on the EntireX Installation <b>Preferences</b> page or contact Software AG Support.
<b>10080013</b>	<b>Price unit value of EntireX license file is not valid</b>
<b>Explanation</b>	z/OS: Your EntireX XML license key file is incorrect and thus invalid.
<b>Action</b>	Contact Software AG Support.
<b>10080014</b>	<b>Error from QVS interface</b>
<b>Explanation</b>	z/OS: The query interface returned a bad return code.
<b>Action</b>	No action required.
<b>10080015</b>	<b>CPUID :1: is not defined in EntireX license file</b>
<b>Explanation</b>	z/OS: Your EntireX XML license key file does not contain the CPUID :1:.
<b>Action</b>	Contact Software AG Support.
<b>10080016</b>	<b>LPAR name :1: is not defined in EntireX license file</b>
<b>Explanation</b>	z/OS: Your EntireX XML license key file does not contain the LPAR name :1:.
<b>Action</b>	Contact Software AG Support.
<b>10080017</b>	<b>LPAR name is not accepted with CPU-based pricing model</b>
<b>Explanation</b>	z/OS: Your EntireX XML license key file is incorrect.
<b>Action</b>	The error is currently ignored.

<b>10080018</b>	<b>Machine capacity higher than MSU in EntireX license file</b>
<b>Explanation</b>	z/OS: Your EntireX XML license key file is incorrect.
<b>Action</b>	The error is currently ignored.
<b>10080019</b>	<b>Please check licensed MSU value :1: with SCRT Report</b>
<b>Explanation</b>	z/OS: Your EntireX XML license key file is incorrect.
<b>Action</b>	The error is currently ignored.
<b>10080020</b>	<b>High Availability PStore (RUN-MODE=STANDBY) not licensed</b>
<b>Explanation</b>	This license option for this feature is missing.
<b>Action</b>	Contact Software AG Support.
<b>10080021</b>	<b>CPUID :1: is not defined in EntireX license file. It is therefore assumed that you are running in a Disaster Recovery environment</b>
<b>Explanation</b>	z/OS: Your EntireX XML license key file does not contain the CPUID :1:.
<b>Action</b>	Contact Software AG Support.
<b>10080022</b>	<b>Not running in a VM</b>
<b>Explanation</b>	EntireX is not running in a virtual machine.
<b>Action</b>	Request a new license to run EntireX in a non-VM environment.
<b>10080023</b>	<b>Error during VM determination</b>
<b>Explanation</b>	An internal error occurred during determination of virtual machine.
<b>Action</b>	Contact Software AG Support.
<b>10080024</b>	<b>Present CPU is in a higher performance bucket than licensed</b>
<b>Explanation</b>	The performance bucket in the license key file does not match the CPU of the machine.
<b>Action</b>	Contact Software AG Support to request an upgrade of the license key file.
<b>10080025</b>	<b>Error during determination of bucket</b>
<b>Explanation</b>	An internal error occurred during determination of the bucket.
<b>Action</b>	Contact Software AG Support.

<b>10080026</b>	<b>Error during determination of CPU model</b>
<b>Explanation</b>	An internal error occurred during determination of the CPU model.
<b>Action</b>	Contact Software AG Support.
<b>10080027</b>	<b>Provided buffer is too small</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Contact Software AG Support.
<b>10080028</b>	<b>File read error (fread)</b>
<b>Explanation</b>	The license key file could not be read.
<b>Action</b>	Check if the license key file can be read.
<b>10080029</b>	<b>Trial License Key file must not be write-protected</b>
<b>Explanation</b>	The license key file cannot be modified.
<b>Action</b>	Check the file attributes of the license key file. Set it to writable.
<b>10080030</b>	<b>ASCII-to-EBCDIC (or vice versa) conversion error occurred</b>
<b>Explanation</b>	An internal error occurred during conversion of the license data.
<b>Action</b>	Check if the correct license file was used.
<b>10080031</b>	<b>UTF Conversion Source exhausted</b>
<b>Explanation</b>	An internal error occurred during conversion of the license data.
<b>Action</b>	Contact Software AG Support.
<b>10080032</b>	<b>UTF Conversion Target exhausted</b>
<b>Explanation</b>	An internal error occurred during conversion of the license data.
<b>Action</b>	Contact Software AG Support.
<b>10080033</b>	<b>File write error (fwrite)</b>
<b>Explanation</b>	The license key file cannot be modified.
<b>Action</b>	Check if write permission is missing or if no space is available.

<b>10080034</b>	<b>GetVersion() failed</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Contact Software AG Support.
<b>10080035</b>	<b>File read error (fseek)</b>
<b>Explanation</b>	The license key file is corrupted and cannot be read.
<b>Action</b>	Contact Software AG Support.
<b>10080036</b>	<b>Number of physical CPUs present exceeded</b>
<b>Explanation</b>	The license key file does not reflect the actual number of physical CPUs.
<b>Action</b>	Contact Software AG Support to request an upgrade of the license key file.
<b>10080037</b>	<b>Determination of number of CPUs failed</b>
<b>Explanation</b>	An internal error occurred during determination of the number of CPUs.
<b>Action</b>	Contact Software AG Support.
<b>10080038</b>	<b>Virtualized environment not included in your product license</b>
<b>Explanation</b>	EntireX is running in a virtual machine without being licensed.
<b>Action</b>	Request a new license to run EntireX in a VM environment.
<b>10080041</b>	<b>Cannot load library :1:</b>
<b>Explanation</b>	The library :1: is not found.
<b>Action</b>	Check if library is missing or has wrong permission. Contact Software AG Support.
<b>10080042</b>	<b>Cannot find entry point :1: in :2:</b>
<b>Explanation</b>	An internal error. May happen if a license library of a wrong version is used.
<b>Action</b>	Contact Software AG Support.
<b>10080043</b>	<b>The Java system property entirex.license.location is not set</b>
<b>Explanation</b>	The Java system property <code>entirex.license.location</code> should point to the location of your EntireX license file.
<b>Action</b>	Check that the Java system property <code>entirex.license.location</code> is set and points to a valid EntireX license file.

<b>10080044</b>	<b>Licensed major version :1: differs from installed version :2:</b>
<b>Explanation</b>	The licensed major version is different from the installed version. License file is only valid for the provided major version.
<b>Action</b>	Enter a valid license file on the EntireX Installation <b>Preferences</b> page or contact Software AG Support.
<b>10080045</b>	<b>Expiration date is missing</b>
<b>Explanation</b>	The expiration date is missing although license key requires an expiration date.
<b>Action</b>	Enter a valid license file on the EntireX Installation <b>Preferences</b> page or contact Software AG Support.
<b>10080081</b>	<b>The EntireX Adapter license key file does not contain a license for connections to IMS Connect</b>
<b>Explanation</b>	This license option for this feature is missing.
<b>Action</b>	Enter a valid license file on the EntireX Installation <b>Preferences</b> page or contact Software AG Support.
<b>10080082</b>	<b>The EntireX Adapter license key file does not contain a license for connections to CICS ECI</b>
<b>Explanation</b>	This license option for this feature is missing.
<b>Action</b>	Enter a valid license file on the EntireX Installation <b>Preferences</b> page or contact Software AG Support.
<b>10080083</b>	<b>The EntireX Adapter license key file does not contain a license for connections to Direct RPC</b>
<b>Explanation</b>	This license option for this feature is missing.
<b>Action</b>	Enter a valid license file on the EntireX Installation <b>Preferences</b> page or contact Software AG Support.
<b>10080099</b>	<b>Component EntireXBroker without Broker Yes</b>
<b>Explanation</b>	Broker is not authorized to run. Only the Administration Service with RUN-MODE=ADMIN can be started with this license file.
<b>Action</b>	If you want to run a broker other than the Administration Service, contact Software AG Support.

# 36 Message Class 1011 - User-definable SAGTRPC

## Conversion Exit

---

This class indicates errors returned from the SAGTRPC user exit. This class represents errors which can be defined by the developer of the SAGTRPC user exit. The errors documented here occur in the delivered SAGTRPC user exit example and it is not recommended to change the meaning of the errors in your own implementation of the SAGTRPC user exit. The meaning of the error 10119999 must not be changed because the broker checks for it. If you change the meaning of the errors, refer to your implementation of the SAGTRPC user exit. Messages of this class have the format:

1011*nnnn*

where 1011 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

**10110001 Invalid Function**

**Explanation** The function code passed from EntireX to the SAGTRPC user exit is invalid.

**Action** If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.

**10110002 Unsupported Function**

**Explanation** The function code passed from EntireX to the SAGTRPC user exit is not supported by your SAGTRPC user exit.

**Action** If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.

<b>10110003</b>	<b>Invalid Direction</b>
<b>Explanation</b>	The direction indicator passed from EntireX to the SAGTRPC user exit is invalid.
<b>Action</b>	If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.
<b>10110004</b>	<b>Invalid Length</b>
<b>Explanation</b>	The length of the input buffer is invalid (zero).
<b>Action</b>	If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.
<b>10110005</b>	<b>Codepage not supported</b>
<b>Explanation</b>	The codepage passed from EntireX to the SAGTRPC user exit is not supported.
<b>Action</b>	If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.
<b>10110006</b>	<b>UECB missing</b>
<b>Explanation</b>	The user exit control block passed to the SAGTRPC user exit is missing.
<b>Action</b>	If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.
<b>1010007</b>	<b>Invalid InputBuffer</b>
<b>Explanation</b>	The input buffer passed to the SAGTRPC user exit is missing.
<b>Action</b>	If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.
<b>10110008</b>	<b>Invalid OutputBuffer</b>
<b>Explanation</b>	Output buffer is invalid.
<b>Action</b>	If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.
<b>10110009</b>	<b>No Codepages defined</b>
<b>Explanation</b>	There are no codepages defined within the SAGTRPC user exit.
<b>Action</b>	If you not have changed the original meaning of the error message, contact Software AG Support. Otherwise check your SAGTRPC user exit.

**10119999**

**Output Buffer overflow**

**Explanation**

This SAGTRPC user exit error signals an overflow of the output buffer during conversion from the SAGTRPC user exit to the broker. The meaning of this error must not be changed because the broker checks for it and, for the receiving application, tries to reread the payload with broker function `RECEIVE,OP=LAST`.

**Action**

None.

# 37

## Message Class 1016 - EntireX RPC Service Messages

---

This class is used for messages issued by an EntireX RPC Service. Messages of this class have the format:

1016*nnnn*

where 1016 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

<b>10161000</b>	<b>EntireX RPC Service successfully installed</b>
<b>Explanation</b>	Informational. The Service was successfully installed to Windows Service Manager.
<b>Action</b>	None.
<b>10161001</b>	<b>EntireX RPC Service failed to install: Windows component - error code</b>
<b>Explanation</b>	The service could not be installed, see Windows component and error code for failure details.
<b>Action</b>	Check with your system administrator to determine whether the failure is an installation problem. Otherwise contact Software AG Support.
<b>10161002</b>	<b>EntireX RPC Service: Deprecated option = &lt;option&gt;</b>
<b>Explanation</b>	Warning. A deprecated option was encountered during installation of the service.
<b>Action</b>	The installation of the service will continue. You may wish to remove the named option from the install script.

<b>10162000</b>	<b>EntireX RPC Service successfully removed</b>
<b>Explanation</b>	Informational. The service was successfully removed from Windows Service Manager.
<b>Action</b>	None
<b>10162001</b>	<b>EntireX RPC Service failed to remove: Windows component - error code</b>
<b>Explanation</b>	The service could not be removed, see Windows component and error code for failure details.
<b>Action</b>	Check with your system administrator to determine whether the failure is an installation problem. Otherwise contact Software AG Support.
<b>10163000</b>	<b>EntireX RPC Service successfully started</b>
<b>Explanation</b>	Informational. The service successfully launched an EntireX RPC Server.
<b>Action</b>	None
<b>10163001</b>	<b>EntireX RPC Service failed to start: Windows component - error code</b>
<b>Explanation</b>	The service could not be started, see Windows component and error code for failure details.
<b>Action</b>	Check with your system administrator to determine whether the failure is an installation problem. Otherwise contact Software AG Support.
<b>10164000</b>	<b>EntireX RPC Service successfully stopped</b>
<b>Explanation</b>	Informational. The service successfully performed EntireX RPC Server stop operation.
<b>Action</b>	None
<b>10164001</b>	<b>EntireX RPC Service failed to stop: Component - reason code</b>
<b>Explanation</b>	The service could not be stopped, see component and reason code for further details.
<b>Action</b>	Check the component and reason code for failure. If it cannot be solved by installation change, contact Software AG Support.
<b>10164002</b>	<b>Warning. EntireX RPC server has unexpectedly stopped with rc=error code</b>
<b>Explanation</b>	The RPC server stopped for a reason other than Window Service STOP command. The exit code of the DOS command shell will be added for analysis.
<b>Action</b>	Check the reason code to determine whether this is an installation error or a runtime error. For more information install the service with the trace option and analyze the trace files.

# 38

## Message Class 1017 - EntireX RPC Online Maintenance

### Facility

---

Messages have the format:

1017*nnnn*

where 1017 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

**10170000**            **Reserved**

**Explanation**        N.A.

**Action**                N.A.

**10170001**            **Invalid arg= argument**

**Explanation**        EntireX RPC Online Maintenance Facility was started with an invalid argument. The Online Maintenance Facility could not be started.

**Action**                Check documentation for valid arguments and start EntireX RPC Online Maintenance Facility again.

**10170002**            **Input command invalid command**

**Explanation**        An invalid command was entered. The command was ignored.

**Action**                Check documentation for valid commands and syntax and issue again. The RPC Online Maintenance Facility will continue to run.

- 10170003**            **Server already active**
- Explanation**        An attempt was made to start an RPC server although a server instance is already running. Multiple server instances cannot use the same shared memory block at the same time.
- Action**              Check reasons:
1. An instance may be running by mistake: cancel this instance (CICS: with CEMT INQUIRE TASK, force, reload the shared memory).
  2. If more than 1 instance is required, generate a new shared memory block (ERXMAIN) and restart with the new block.
- 
- 10170004**            **A server instance is already running with this control block**
- Explanation**        There was an attempt to change the content of a shared memory block which is used by a running server instance. The change has been rejected.
- Action**              If the changes are required for the current shared memory block, stop the associated server first.
- If the changes are meant for a different server (different shared memory block), first switch to the other memory block.
- 
- 10170005**            **Cannot start RPC server: Reason= reason-code**
- Explanation**        The request to start an RPC server failed for a reason other than "1017 0003 Server already active". The (system-dependent) reason code will be added to this error message.
- Action**              See reason code.
- 
- 10170006**            **Cannot load member**
- Explanation**        Either the RPC Online Maintenance Facility was started with an invalid memory control block (default: MEM=ERXMAIN) or an invalid command (MEM=) was issued that refers to an unknown memory block.
- Action**              1. If the message is displayed during the start of the RPC Online Maintenance Facility, check if the memory control block can be accessed.
2. If the message is displayed after a MEM= command, check for typing errors and if the target control block is available.

<b>10170007</b>	<b>No resources: resource</b>
<b>Explanation</b>	This is a collecting message for system resource problems. The type of resource problems will be added into this message.
<b>Action</b>	Check <i>resource</i> for more information.
<b>10170008</b>	<b>RPC server termination in progress</b>
<b>Explanation</b>	For information purposes. The RPC server received a shutdown command, either issued via the RPC Online Maintenance Facility or some external control facility.
<b>Action</b>	None. The server terminates.
<b>10170009</b>	<b>Invalid ERX control block found: &lt;Name of control block&gt;</b>
<b>Explanation</b>	For some unknown reasons, the EntireX RPC Online Maintenance Facility received an invalid control block. The RPC Online Maintenance Facility terminates.
<b>Action</b>	Contact Software AG Support.
<b>10170010</b>	<b>Server successfully launched</b>
<b>Explanation</b>	Informational. The user requested to start an RPC server instance.
<b>Action</b>	None. Check launch process if RPC server starts successfully.

# 39

## Message Class 1018 - EntireX RPC-ACI Bridge

---

Messages have the format:

1018*nnnn*

where 1018 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

### 10180000

**Explanation**

This error can occur if the ACI server sends an invalid message. The ACI server is not able to return an error code. It can only send a valid message or quit the Broker communication.

**Action**

Correct the ACI server.

### 10180001

**Process request and reply: illegal action <number indicating action>**

**Explanation**

During request/reply processing the next action is illegal in the current state.

**Action**

Contact Software AG Support.

### 10180002

**<Broker Exception with detailed message>**

**Explanation**

An exception with the Broker for ACI occurred during SEND.

**Action**

See message class and message code of the Broker exception and follow detailed message.

<b>10180003</b>	<b>&lt;Broker Exception with detailed message&gt;</b>
<b>Explanation</b>	An exception with the Broker for ACI occurred during RECEIVE.
<b>Action</b>	See message class and message code of the Broker exception and follow detailed message.
<b>10180004</b>	<b>&lt;Broker Exception with detailed message&gt;</b>
<b>Explanation</b>	An exception with the Broker for ACI occurred during shutdown and logoff.
<b>Action</b>	See message class and message code of the Broker exception and follow detailed message.
<b>10180009</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	An exception occurred while formatting the message. In most cases, the reason is an inconsistency in the metadata.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>10180010</b>	<b>Compression=off not possible</b>
<b>Explanation</b>	An RPC with compression 0 is not supported.
<b>Action</b>	Change compression to 1 or 2.
<b>10180011</b>	<b>Type of marshalling not allowed or Unsupported call type &lt;number of call type&gt;</b>
<b>Explanation</b>	There are two reasons for this error code.  1. For the marshalling property, values 'cobol', 'natural', and '' are allowed. Reason: The value of the property may be invalid. or: The RPC from the client is in the wrong marshalling.  2. The RPC call type is wrong.
<b>Action</b>	Check configuration and client.
<b>10180012</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message and contact Software AG Support.

<b>10180013</b>	<p><b>Preparing message failed, see log for details</b>  <b>or:</b>  <b>Message received from server does not fit buffer</b></p>
<b>Explanation</b>	<p>There are two reasons for this error code:</p> <ol style="list-style-type: none"> <li>1. Marshalling of message failed before sending to CICS ECI.</li> <li>2. The received message does not have the expected layout and the values cannot be unmarshalled from it.</li> </ol>
<b>Action</b>	<p>Check the following metadata for consistency or contact Software AG Support:</p> <ul style="list-style-type: none"> <li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li> <li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li> <li>■ Adapter connections.</li> </ul> <p>Details can be found in wmentirex.log with trace level 2.</p>
<b>10180015</b>	<p><b>Transformation error on request: &lt;Exception with detailed message&gt;</b></p>
<b>Explanation</b>	<p>This exception occurs in message processing.</p>
<b>Action</b>	<p>See detailed message or contact Software AG Support.</p>
<b>10180022</b>	<p><b>Unsupported command &lt;command&gt;</b>  <b>or</b>  <b>Exception: &lt;Exception with detailed message&gt;</b></p>
<b>Explanation</b>	<p>There are two reasons for this error code:</p> <ol style="list-style-type: none"> <li>1. An unknown internal command is used.</li> <li>2. An exception occurred during action processing.</li> </ol> <p>The log files contain a stack trace.</p>
<b>Action</b>	<p>See detailed message and log files or contact Software AG Support.</p>

---

# 40

## Message Class 1020 - IDL Extractor for Natural

---

Messages have the format:

1020*nnnn*

where 1020 is the message class, and

*nnnn* are the error numbers grouped as follows:

0001-1999: reserved for Natural SYSIDL Server Application (library SYSIDL)

2000-3999: Communication with Natural and Software AG IDL file handling

4000-5999: Natural data parameter definition parser

6000-9999: not yet allocated

**10200001**                    **Data already retrieved - wrong usage**

**Explanation**            This is an internal error.

**Action**                    Contact Software AG Support.

**10200002**                    **Invalid Parameter FCT**

**Explanation**            This is an internal error.

**Action**                    Contact Software AG Support.

**10200003**                    **Error <number> in <name> occurred**

**Explanation**            This is an internal error, whereby <number> is the error given by a module with the name <name>.

**Action**                    Contact Software AG Support.

<b>10200004</b>	<b>Invalid Parameter FTYPE</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Support.
<b>10200007</b>	<b>Buffer for Parameters too small</b>
<b>Explanation</b>	The maximum number of parameters that can be extracted from a CALLNAT object is restricted.
<b>Action</b>	Contact Software AG Support.
<b>10200008</b>	<b>&lt;text&gt;</b>
<b>Explanation</b>	This is an internal error. See <i>&lt;text&gt;</i> for more information.
<b>Action</b>	Contact Software AG Support.
<b>10200009</b>	<b>Functionality not supported</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Support.
<b>10200010</b>	<b>Internal Error</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Support.
<b>10200011</b>	<b>Data Area &lt;data-area-name&gt; not found</b>
<b>Explanation</b>	The data area (PDA with the name <i>&lt;data-area-name&gt;</i> ) referenced in a CALLNAT source was not found in the library of the CALLNAT source and current steplibs.
<b>Action</b>	Check if the data areas referenced in the CALLNAT source are located in the library of the CALLNAT source and current steplibs.
<b>10200012</b>	<b>Steplib table overflow</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Support.

<b>10200013</b>	<b>Unsupported X-Array Lower Bound: &lt;natural-data-type&gt;</b>
<b>Explanation</b>	Natural X-Arrays with variable lower bounds cannot be mapped to Software AG IDL's Unbounded Arrays. <natural-data-type> is the original Natural data type which could not be mapped.
	Examples: (A100/*:10) (I4/*:5) (A/*:100) DYNAMIC
<b>Action</b>	Whenever possible, try to use X-Arrays with variable upper bounds.
<b>10200014</b>	<b>Program &lt;program-name&gt; not found</b>
<b>Explanation</b>	The program with the name <program-name> was not found.
<b>Action</b>	Check if the program exists in the current library.
<b>10200015</b>	<b>&lt;text&gt;</b>
<b>Explanation</b>	1. If the replied error text is "Unable to load/locate symbol table", either <ul style="list-style-type: none"> <li>■ no object was found or</li> <li>■ an object cataloged under Natural version x was accessed with Natural version y, whereby x &gt; y. You will receive this error message if, for example, you catalog a subprogram under Natural version 4.2, move it afterwards to a Natural 4.1 environment and try to extract the IDL.</li> </ul> 2. For all other situations, refer to <text> for more information.
<b>Action</b>	For situation 1 you have probably mistyped the object or library name in the command-line interface.  For situation 2, contact Software AG Support.
<b>10200016</b>	<b>SYSSEC&lt;syssec-error-number&gt; &lt;syssec-error-text&gt;</b>
<b>Explanation</b>	A Natural SYSSEC Application error with the error number <syssec-error-number> <syssec-error-text> occurred.
<b>Action</b>	You can display the corresponding SYSSEC Application error and explanation if you log on to library SYSSEC in a Natural Session and enter HELP U<syssec-error-number> in the command line.

<b>10200017</b>	<b>Program not found</b>
<b>Explanation</b>	The program to extract from does not exist. If you are extracting from a remote source, it is possible that it was deleted by a different user in parallel on the remote side.
<b>Action</b>	Restart the extraction from the beginning.
<b>10200018</b>	<b>Reserved</b>
<b>Explanation</b>	None.
<b>Action</b>	None.
<b>10200019</b>	<b>Unsupported V-array: &lt;original-natural-syntax&gt;</b>
<b>Explanation</b>	Natural 1:V arrays cannot be extracted with this version of EntireX. The term <i>&lt;original-natural-syntax&gt;</i> contains the original Natural definition.
<b>Action</b>	Extract using EntireX 8.1.2 or later, where Natural 1:V arrays are supported.
<b>10200020</b>	<b>Subprogram does not contain any parameters</b>
<b>Explanation</b>	You cannot extract from a program without any parameters.
<b>Action</b>	None.
<b>10200021</b>	<b>Object not found</b>
<b>Explanation</b>	<ol style="list-style-type: none"><li>1. If you are extracting from a mainframe (z/OS, BS2000, z/VSE) remote side, the symbol table cannot be found or the object (program) cannot be loaded.</li><li>2. If you are extracting from a UNIX or Windows remote side, the object (program) does not exist. It is possible it was deleted by a different user in parallel on the remote side.</li></ol>
<b>Action</b>	For situation 1: contact Software AG Support. For situation 2: none.
<b>10200022</b>	<b>No library given</b>
<b>Explanation</b>	You tried to generate a Natural RPC client and set the option to save or stow on the remote side, but no Natural library was specified in which to save or stow it.
<b>Action</b>	Provide a Natural library name.

<b>10200023</b>	<b>No STOW/SAVE in SYS libraries</b>
<b>Explanation</b>	You tried to generate a Natural RPC client and set the option to save or stow on the remote side in a Natural system (prefix SYS*) library. This is not possible.
<b>Action</b>	Provide a Natural library name for user programs.
<b>10200024</b>	<b>Generation error. &lt;details&gt;</b>
<b>Explanation</b>	You tried to generate a Natural RPC client and a generation error occurred.
<b>Action</b>	Refer to <details> within the message for more information.
<b>10200025</b>	<b>Error &lt;error-number&gt; from RPCI-MSG</b>
<b>Explanation</b>	You tried to generate a Natural RPC client and an error occurred during access to the message collector interface. The term <error-number> contains the error occurred.
<b>Action</b>	Contact Software AG Support.
<b>10200026</b>	<b>Error during CAT/STOW</b>
<b>Explanation</b>	You tried to generate a Natural RPC client and set the option <code>stow</code> . This may happen if the Natural program is re-generated (a second time) and is currently being edited. This might be in a different session by another user.
<b>Action</b>	Close the editor or try again later.
<b>10200027</b>	<b>Unsupported array: &lt;original-natural-syntax&gt;</b>
<b>Explanation</b>	You cannot extract from Natural arrays with fixed and variable dimensions, for example: <ul style="list-style-type: none"> <li>■ 1 mixed-v-array (A100/10,1:V)</li> <li>■ 1 mixed-x-array (A100/10,1:*)</li> </ul> <p>These forms are not supported with Software AG RPC technology. The term &lt;original-natural-syntax&gt; contains the original Natural definition.</p>
<b>Action</b>	None.
<b>10200028</b>	<b>Natural objects already exist. Mark overwrite to generate. Interface: &lt;idl-program&gt;</b>
<b>Explanation</b>	You tried to re-generate a Natural RPC client (a second time) for the interface defined by the <idl-program> and a previous generated version exists.
<b>Action</b>	Mark to overwrite the previous generated version and retry.

<b>10200029</b>	<b>Information &lt;details&gt; Interface: &lt;idl-program&gt;</b>
<b>Explanation</b>	You tried to generate a Natural RPC client for the interface defined by the <idl-program>.
<b>Action</b>	None. Refer to <details> within the message for more information.
<b>10200030</b>	<b>Error (reason &lt;reason-code&gt;): &lt;reason-text&gt;</b>
<b>Explanation</b>	You tried to generate a Natural RPC client or server and an error occurred during generation.
<b>Action</b>	Refer to (<reason-code> and <reason-text>) within the message for more information.
<b>10200031</b>	<b>Unsupported data type &lt;original-natural-syntax&gt;</b>
<b>Explanation</b>	You cannot extract, for example, if the Natural data type C (control variable) is within the interface. The data type <original-natural-syntax> is not supported with Software AG RPC technology. The term <original-natural-syntax> contains the original Natural definition.
<b>Action</b>	None.
<b>10202001</b>	<b>The expected version of the Natural SYSIDL is out of range</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Support.
<b>10202004</b>	<b>Natural RPC server does not support Natural client interface object generation. Upgrade Required. &lt;server-version-details&gt;</b>
<b>Explanation</b>	The Natural RPC server does not support the required functionality. Refer to <server-version-details> for the current installed Natural version.
<b>Action</b>	Upgrade Natural RPC server to the latest version.
<b>10202005</b>	<b>Natural RPC server does not support Natural client interface object generation with CVM files. Upgrade Required. &lt;server-version-details&gt;</b>
<b>Explanation</b>	The Natural RPC server does not support server mapping files (.cvm). Refer to <server-version-details> for the Natural version currently installed.
<b>Action</b>	Upgrade Natural RPC server to the latest version.

<b>10202006</b>	<b>Natural RPC server does not support Natural server generation. Upgrade Required. &lt;server-version-details&gt;</b>
<b>Explanation</b>	The Natural RPC server does not support the required functionality. Refer to <i>&lt;server-version-details&gt;</i> for the Natural version currently installed.
<b>Action</b>	Upgrade Natural RPC server to the latest version.
<b>10204001</b>	<b>Parse exception encountered at line &lt;line&gt;, column &lt;column&gt;</b>
<b>Explanation</b>	A Natural source code statement was recognized, but the use of this statement at this line and position is not allowed.
<b>Action</b>	Check the Natural source code for an invalid statement at the line and column indicated.
<b>10204002</b>	<b>Lexical error at line &lt;line&gt;, column &lt;column&gt;. &lt;detail information&gt;</b>
<b>Explanation</b>	Statement in the Natural source code is not supported by the Natural Extractor. See <i>&lt;detail information&gt;</i> for explanation.
<b>Action</b>	Check the Natural source code for an invalid statement at the line and column indicated.
<b>10204003</b>	<b>&lt;text&gt;</b>
<b>Explanation</b>	A Natural source code statement leads to an exception. See <i>&lt;text&gt;</i> for detailed explanation.
<b>Action</b>	Contact Software AG Support.
<b>10204004</b>	<b>Subprogram does not contain any parameters</b>
<b>Explanation</b>	You cannot extract from a program without any parameters.
<b>Action</b>	None.
<b>10204008</b>	<b>Direction OUT and Natural V-Array in conflict</b>
<b>Explanation</b>	A <i>/* out</i> comment inside your Natural server is forcing IDL direction <i>out</i> . Natural V-arrays (syntax <i>... \1:V</i> ) cannot be used with direction <i>out</i> , because they cannot be created (instantiated) inside a Natural server. See <i>Extracting Natural Arrays, Groups, X-Arrays and Variable Arrays</i> in the IDL Extractor for Natural documentation.
<b>Action</b>	Remove the <i>/* out</i> comment in your program or change it to <i>/* in</i> or <i>/* inout</i> .

# 41 Message Class 1021 - EntireX RPC Server Mapping

## Deployment

---

This page describes messages with message class 1021. These messages have the format:

1021 $nnnn$

where 1021 is the message class and

$nnnn$  is the message number in the range 0000 - 9999.

These messages are returned by the Server Mapping Deployment Wizard See *Server Mapping Deployment Wizard* in the Designer documentation.

**10210001**      **Entry does not exist**

**Explanation**      The server mapping accessed by the deployment service does not exist in the server mapping file.

**Action**      None.

**10210002**      **Entry already exists**

**Explanation**      If available in your environment, use the overwrite option and retry.

**Action**      Resubmit with 'update' option.

<b>10210003</b>	<b>Entry replaced</b>
<b>Explanation</b>	An existing server mapping entry was altered.
<b>Action</b>	None.
<b>10210004</b>	<b>No matching entry</b>
<b>Explanation</b>	A LIST request to the deployment service returned without matching entries.
<b>Action</b>	None.
<b>10210005</b>	<b>Invalid record</b>
<b>Explanation</b>	The deployment service received a server mapping file of an unknown format. The request was rejected.
<b>Action</b>	Probably version conflict. Check your installation.
<b>10210006</b>	<b>Open file error: &lt;reason&gt;</b>
<b>Explanation</b>	The <i>Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000 in the respective RPC Server documentation could not open the server-side mapping container. See <reason> and refer to platform documentation for more information.
<b>Action</b>	Check your installation. For configuration, see <i>Enabling the Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000 in the respective RPC Server documentation.
<b>10210007</b>	<b>Write Error: &lt;reason&gt;</b>
<b>Explanation</b>	The <i>Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000 in the respective RPC Server documentation could not open the server-side mapping container. See <reason> and refer to platform documentation for more information.
<b>Action</b>	Check status and/or authorization of the server-side mapping container. For configuration, see <i>Enabling the Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000 in the respective RPC Server documentation.
<b>10210008</b>	<b>Read Error: &lt;reason&gt;</b>
<b>Explanation</b>	The <i>Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000 in the respective RPC Server documentation could not read from the server-side mapping container. See <reason> and refer to platform documentation for more information.
<b>Action</b>	Check status and/or authorization of the server-side mapping container. For configuration, see <i>Enabling the Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000 in the respective RPC Server documentation.

<b>10210009</b>	<b>Delete Error: &lt;reason&gt;</b>
<b>Explanation</b>	The <i>Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000) in the respective RPC Server documentation could not access the server-side mapping container. See <reason> and refer to platform documentation for more information.
<b>Action</b>	Check status and/or authorization of the server-side mapping container. For configuration, see <i>Enabling the Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000 in the respective RPC Server documentation.
<b>10210010</b>	<b>Resource problem: &lt;reason&gt;</b>
<b>Explanation</b>	Resource problem with server deployment service, probably lack of storage. See <reason> and refer to platform documentation for more information.
<b>Action</b>	Try again later.
<b>10210011</b>	<b>DEPLOYMENT service not active</b>
<b>Explanation</b>	The RPC server was invoked, but the deployment service itself was not activated, see RPC server option DEPLOYMENT=YES   NO.
<b>Action</b>	Ask your system programmer.
<b>10210012</b>	<b>Invalid usage of DEPLOYMENT service</b>
<b>Explanation</b>	The RPC server received a request for the <i>Deployment Service</i> for z/OS (CICS, Batch, IMS)   BS2000) in the respective RPC Server documentation for a broker service other than DEPLOYMENT.
<b>Action</b>	Use DEPLOYMENT as the broker service name in the deployment environment. See <i>Step 3b: Define the Connection to the Deployment Service and Undeploy</i> in the Designer documentation and SERVICE under <i>Service-specific Broker Attributes</i> .

# 42

## Message Class 1022 - RPC Server for CICS User Exit

### Messages

---

This page describes messages with message class 1022. These messages have the format:

*1022nnnn*

where 1022 is the message class and

*nnnn* is the message number in the range 0000 - 9999.

Error messages of this class are reserved for customer use. The messages are given by the RPC Server for CICS user exit implementations. See User Exit COBUEX02.

# 43

## Message Class 2000 - XML/SOAP Runtime

---

The messages have the format:

2000*nnnn*

where 2000 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20000001</b>	<b>Broker Exception: :1:</b>
<b>Explanation</b>	Information on the <code>BrokerException</code> is contained in the error message ( <code>ErrorClass</code> , <code>ErrorNumber</code> and <code>ErrorText</code> ).
<b>Action</b>	Look up the error class/number for the <code>BrokerException</code> and follow the instructions.
<b>20000002</b>	<b>Server Exception: :1:</b>
<b>Explanation</b>	Information on the <code>ServerException</code> is contained in the error message ( <code>ErrorClass</code> , <code>ErrorNumber</code> and <code>ErrorText</code> ).
<b>Action</b>	Look up the error class/number for the <code>ServerException</code> and follow the instructions.
<b>20000003</b>	<b>External Parser Exception</b>
<b>Explanation</b>	The external parser throws an exception.
<b>Action</b>	<ul style="list-style-type: none"><li>■ Check if the JAR files of the parser are located in <code>CLASSPATH</code>.</li><li>■ Check if the incoming document is well-formed.</li></ul>

<b>20000004</b>	<b>Internal Error: Java IO Exception</b>
<b>Explanation</b>	Either the XML/SOAP Wrapper cannot find a file or the RPC Server for XML/SOAP does not connect to the Web server.
<b>Action</b>	<ul style="list-style-type: none"><li>■ XML/SOAP Wrapper: Check your path settings. If they are correct, contact Software AG Support.</li><li>■ RPC Server for XML/SOAP: Check the URI of the Web server. If it is correct, contact Software AG Support.</li></ul>
<b>20000005</b>	<b>Internal Error: Java Exception</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support.
<b>20000006</b>	<b>Incoming SOAP document is invalid</b>
<b>Explanation</b>	The incoming XML document is invalid.
<b>Action</b>	Check the incoming document.
<b>20000007</b>	<b>Incoming XML document is invalid</b>
<b>Explanation</b>	The incoming XML document is invalid.
<b>Action</b>	Check the incoming document.
<b>20000021</b>	<b>XML Parser not found</b>
<b>Explanation</b>	The XML parser could not be found because the JAR files of the parser were not found in CLASSPATH.
<b>Action</b>	Correct CLASSPATH specifications.
<b>20000025</b>	<b>Mapping Error: Path cannot be resolved</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support.
<b>20000026</b>	<b>Mapping Error: Mapping of one item fails</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support. Required information: the IDL-XML mapping file (XMM).

<b>20000027</b>	<b>Mapping Error: Invalid mapping path</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support. Required information: the IDL-XML mapping file (XMM).
<b>20000031</b>	<b>Mapping Error: Value cannot be mapped</b>
<b>Explanation</b>	The document contains a value that cannot be mapped.
<b>Action</b>	Contact Software AG Support. Required information: the IDL-XML mapping file (XMM).
<b>20000043</b>	<b>Invalid Configuration File</b>
<b>Explanation</b>	The configuration file contains an invalid definition. See details of error message for more information.
<b>Action</b>	Correct the configuration file.
<b>20000060</b>	<b>Incoming Document: Invalid base64 format</b>
<b>Explanation</b>	The binary data has an invalid base64 format.  The incoming document contains binary data in base64 format. For at least one data item the base64 format is invalid.
<b>Action</b>	Check the application of the sender.
<b>20000062</b>	<b>Problem with JAXP: ParserFactory not found</b>
<b>Explanation</b>	The <code>XMLRuntime</code> cannot find the factory class of XML parser.
<b>Action</b>	Check JAXP setting and classpath.
<b>20000064</b>	<b>Marshalling failed: Unexpected number of array elements</b>
<b>Explanation</b>	An array contains more elements than the maximum definition.
<b>Action</b>	Check your IDL-XML mapping and the documents used.
<b>20000070</b>	<b>Repository Error: Inconsistent data loaded</b>
<b>Explanation</b>	At least one loaded XMM file contains corrupt or conflicting data.
<b>Action</b>	<ul style="list-style-type: none"> <li>■ Check the XMM file(s).</li> <li>■ Check if you are using the RPC Server for XML/SOAP configuration file.</li> </ul>

<b>20000072</b>	<b>Version mismatch</b>
<b>Explanation</b>	An EntireX server does not understand the required protocol version.
<b>Action</b>	Check IDL definition. It must be suitable for client and server applications.
<b>20000075</b>	<b>Parameter not set</b>
<b>Explanation</b>	A data stream for reading or writing is null (using Java API).
<b>Action</b>	Check your application.
<b>20000077</b>	<b>Unknown document, XML/SOAP Runtime cannot interpret the incoming document</b>
<b>Explanation</b>	The incoming document was not found in the internal repository.
<b>Action</b>	No suitable mapping was found. Check if <ol style="list-style-type: none"><li>1. the XMM file is contained in the configuration.</li><li>2. the namespaces in the document and the XMM file match.</li></ol>
<b>20000078</b>	<b>Invalid XMM file</b>
<b>Explanation</b>	The XMM file has an error.
<b>Action</b>	Save the XMM file again. If the problem is permanent, contact Software AG Support.
<b>20000079</b>	<b>Transport error</b>
<b>Explanation</b>	The HTTP transport of data failed, for example because the proxy setting is missing or the target service is not available.
<b>Action</b>	<ol style="list-style-type: none"><li>1. Check proxy settings.<ul style="list-style-type: none"><li>■ If a firewall is in use, define the required proxy settings.</li><li>■ If you are using a proxy setting and connecting to localhost, add the following definition: <pre>-Dhttp.nonProxyHosts=localhost</pre></li></ul></li><li>2. Check the URL of the target service. To get more information, start the RPC Server for XML/SOAP with enabled trace.</li></ol>

<b>20000080</b>	<b>Writing document failed</b>
<b>Explanation</b>	Writing an outgoing XML document failed, caused by unsupported encoding or an internal error.
<b>Action</b>	Verify the encoding used and/or contact Software AG Support.
<b>20000081</b>	<b>Unsupported transport medium</b>
<b>Explanation</b>	The configuration file of the RPC Server for XML/SOAP contains a transport medium that is not supported by the XML/SOAP Runtime.
<b>Action</b>	Check your configuration file.
<b>20000082</b>	<b>Unknown RPC program</b>
<b>Explanation</b>	The XML Runtime did not find a description for the RPC program called.
<b>Action</b>	Check your configuration file for missing or conflicting definitions.
<b>20000084</b>	<b>Unknown data type</b>
<b>Explanation</b>	The required data type cannot be marshalled with the protocol used, or the XMM file used has a corrupt entry.
<b>Action</b>	Check IDL-XML mapping and check application for any server that does not support the data type used.
<b>20000086</b>	<b>Received unexpected document (faulty document)</b>
<b>Explanation</b>	An XML client sent a faulty document.
<b>Action</b>	Check your application.
<b>20000087</b>	<b>Internal error</b>
<b>Explanation</b>	The internal processing terminates abnormally with an error.
<b>Action</b>	Check the details of error information. If this information does not help you resolve the problem, contact Software AG Support.
<b>20000088</b>	<b>Value does not match type definition</b>
<b>Explanation</b>	The value of the parameter does not match the type definition. For example, a parameter for a numeric field does not contain a numeric value.
<b>Action</b>	The error message contains the name and value of invalid parameter. Correct the inconsistency in your application, that is, check the data type.

<b>20000089</b>	<b>Format exception: Date or time parameter does not match format definition</b>
<b>Explanation</b>	The format definition of a date or time parameter does not match format set by user or default format.
<b>Action</b>	Check IDL-XML mapping and the documents used.
<b>20000100</b>	<b>Syntax error in IDL-XML mapping file</b>
<b>Explanation</b>	The IDL-XML mapping file contains an unexpected tag.
<b>Action</b>	Contact Software AG Support.
<b>20000101</b>	<b>Invalid IDL-XML mapping File</b>
<b>Explanation</b>	The IDL-XML mapping file is not well-formed or is unreadable.
<b>Action</b>	If using FTP to move mapping file, check that binary mode is set. Otherwise contact Software AG Support.
<b>20000103</b>	<b>Configuration error: IDL-XML mapping file conflict in library/program name</b>
<b>Explanation</b>	A name clash of library/program is found.
<b>Action</b>	Check your IDL-XML mapping files.
<b>20000104</b>	<b>IDL-XML Mapping File contains non-supported Natural/COBOL redefine settings in library/program</b>
<b>Explanation</b>	The specified XMM contains Natural/COBOL redefine information, which is not supported.
<b>Action</b>	Remove the program listed in the error message from the mapping file.
<b>20000110</b>	<b>Configuration Error</b>
<b>Explanation</b>	Reading the configuration terminates with an error message probably because of an invalid classpath, an invalid configuration or an inconsistent value assignment within the configuration.
<b>Action</b>	Check configuration file and CLASSPATH.
<b>20000120</b>	<b>Document does not fulfill SOAP 1.1 specification</b>
<b>Explanation</b>	The document contains a description not compliant with the SOAP 1.1 specification.
<b>Action</b>	Check the document for compliance with the SOAP 1.1 specification.

<b>20000130</b>	<b>Document does not fulfill SOAP 1.2 specification</b>
<b>Explanation</b>	The document contains a description not compliant with the SOAP 1.2 specification.
<b>Action</b>	Check document for compliance with the SOAP 1.2 specification.
<b>20000140</b>	<b>HTTP header contains invalid value</b>
<b>Explanation</b>	The HTTP header contains an invalid value for the session ID or the conversation.
<b>Action</b>	Read fault document and check the application.
<b>20000141</b>	<b>HTTP message contains invalid value</b>
<b>Explanation</b>	The HTTP message (header or payload) contains an invalid value.
<b>Action</b>	Read fault document and check the application.
<b>20000250</b>	<b>Program should have INPUT parameters only</b>
<b>Explanation</b>	An asynchronous call with INOUT or OUT parameter was made.
<b>Action</b>	Check application and IDL definition.

# 44

## Message Class 2001 - Software AG IDL Parser

---

The messages have the format:

2001*nnnn*

where 2001 is the message class, and

*nnnn* is the message number in the range 0000-9999.

**20010020**            **No library found**

**Explanation**        IDL file does not contain any libraries.

**Action**                Define at least one library.

**20010021**            **Missing program with non-IMS parameter**

**Explanation**        Existing libraries contain only programs with IMS parameters, but IMS is not supported.

**Action**                Define at least one library with a program that contains non-IMS parameters.

**20010022**            **Empty library**

**Explanation**        Library "<*name*>" does not contain any programs.

**Action**                Add at least one program to the empty library.

**20010023**            **Library name conflict**  
**Explanation**        Library or library alias "<name>" (line *line\_no*) has same name as another library or library alias "<name>" (line *line\_no*). Library name and alias must be unique.  
**Action**                Change name of conflicting library or library alias to be unique.

**20010024**            **Empty program**  
**Explanation**        Program "<name>" does not contain any parameters.  
**Action**                Add at least one parameter to the empty program.

**20010025**            **Program name conflict**  
**Explanation**        Program or program alias "<name>" (line *line\_no*) has same name as another program or program alias "<name>" (line *line\_no*). Program name and alias must be unique.  
**Action**                Change name of conflicting program or program alias to be unique.

**20010026**            **Undefined structure**  
**Explanation**        Parameter declaration is referring to undefined structure "<name>".  
**Action**                Change parameter declaration to use a defined structure or define the missing structure.

**20010027**            **Structure name conflict**  
**Explanation**        Structure "<name>" (line *line\_no*) has same name as another structure "<name>" (line *line\_no*). Structure name must be unique.  
**Action**                Change name of conflicting structure to be unique and update its references.

**20010028**            **Self-referencing structure definition**  
**Explanation**        Structure "<name>" is referenced by itself or another structure referenced by "<name>". This is not supported.  
**Action**                Resolve self-referencing so that structure "<name>" does not reference itself.

**Example 1 (resolved with list):**

```
struct 'linkedList'
  01 value (AV)
  01 link ('linkedList')
```

can be resolved:

```
struct 'linkedList'
  01 value (AV/V)
```

**Example 2 (resolved with substructure):**

```
struct 'name'
  01 firstname (AV)
  01 lastname (AV)

struct 'person'
  01 myname ('name')
  01 partner ('person')
  01 children ('person'/V)
```

can be resolved:

```
struct 'name'
  01 firstname (AV)
  01 lastname (AV)

struct 'person'
  01 myname ('name')
  01 partner ('person')
  01 children (/V)
  02 myname ('name')
  02 partner ('person')
  02 children (/V)
  03 myname ('name')
  03 partner ('person')
  03 children (/V)
  04 myname ('name')
  04 partner ('person')
```

<b>20010029</b>	<b>Parameter name conflict</b>
<b>Explanation</b>	Parameter "<name>" (line <i>line_no</i> ) has same name as another parameter "<name>" (line <i>line_no</i> ). Parameter name must be unique.
<b>Action</b>	Change name of conflicting parameter to be unique.
<b>20010030</b>	<b>Wrong parameter level</b>
<b>Explanation</b>	Actual level "<level>" is different from expected level "<level>".
<b>Action</b>	Change level from actual level "<level>" to expected level "<level>".

<b>20010031</b>	<b>Empty group</b>
<b>Explanation</b>	Group "<name>" does not contain any parameters. Empty groups are not supported.
<b>Action</b>	Add at least one parameter to the empty group.
<b>20010032</b>	<b>Illegal token</b>
<b>Explanation</b>	Found illegal token "<token>".
<b>Action</b>	Remove the illegal token.
<b>20010033</b>	<b>Unexpected token</b>
<b>Explanation</b>	Found "<token>", where "<token>" is expected.
<b>Action</b>	Replace found token with expected token.
<b>20010034</b>	<b>Illegal type</b>
<b>Explanation</b>	Type "<type>" is not a valid IDL type.
<b>Action</b>	Change parameter declaration to use a valid IDL type [A (alphanumeric), B (binary), D (date), F (floating point), I (integer), K (kanji), L (logical), N (decimal), P (packed decimal), T (time), U (Unicode)].
<b>20010035</b>	<b>Type length not allowed</b>
<b>Explanation</b>	Data type "<type>" does not allow length specification.
<b>Action</b>	Remove length specification.
<b>20010036</b>	<b>Illegal decimal type length</b>
<b>Explanation</b>	Decimal length specification for IDL type "<type>" has invalid format (<number>.<number>).
<b>Action</b>	Change decimal length specification of IDL type "<type>" according to: <ul style="list-style-type: none"> <li>1. &lt;type&gt;X.Y with <math>X+Y \geq 1</math></li> <li>2. &lt;type&gt;X.Y with <math>X+Y \leq 99</math></li> </ul>
<b>20010037</b>	<b>Negative type length</b>
<b>Explanation</b>	Length specification must not contain negative length.
<b>Action</b>	Remove character "-" from length specification.

<b>20010038</b>	<b>Invalid array dimensions</b>
<b>Explanation</b>	Array dimension contains invalid character "<character>".
<b>Action</b>	Change array dimension according to <ul style="list-style-type: none"> <li>■ bounded: (lower-bound: )upper-bound, e.g. A1/3:5, A/1:5 or A1/7</li> <li>■ unbounded: (1: )V, e.g. A1/V, A1/1:V</li> </ul>
<b>20010039</b>	<b>Invalid use of decimal delimiter</b>
<b>Explanation</b>	IDL Type "<type>" is not a decimal type.
<b>Action</b>	Remove "." from length definition or use a valid decimal type such as "N" or "P".
<b>20010040</b>	<b>Type length required</b>
<b>Explanation</b>	IDL Type "<type>" requires a length specification but has none.
<b>Action</b>	Add a length specification for type "<type>". The Designer provides specific instructions depending on the IDL type.
<b>20010041</b>	<b>Invalid type length</b>
<b>Explanation</b>	IDL type "<type>" requires specific length format.
<b>Action</b>	Change length format of IDL type "<type>". The Designer provides specific instructions depending on the IDL type.
<b>20010042</b>	<b>Invalid structure reference</b>
<b>Explanation</b>	Empty string ("") is not a valid structure reference.
<b>Action</b>	Enter a valid structure name by changing " to "<type-reference>", where "<type-reference>" is a valid structure.
<b>20010043</b>	<b>Invalid type declaration</b>
<b>Explanation</b>	Found single "" in type declaration. Structure reference must be enclosed by "".
<b>Action</b>	Enter a valid type declaration. Either use a self-defined structure as type with ("<self-defined>") or a standard IDL type.

<b>20010044</b>	<b>Parsing error</b>
<b>Explanation</b>	An exception occurred when parsing an IDL file.
<b>Action</b>	See exception message.
<b>20010045</b>	<b>Invalid array definition</b>
<b>Explanation</b>	Mixed array definitions (fixed and unbounded length) are not supported.
<b>Action</b>	Correct the array definition so that all array upper bounds are defined as fixed length, or all array upper bounds are defined as unbounded length.
<b>20010046</b>	<b>Unsupported data type</b>
<b>Explanation</b>	When generating the IDL file, the IDL Extractor could not automatically handle the parameter at line <i>line_no</i> .
<b>Action</b>	See the inline comment at the line indicated and change the type definition accordingly.
<b>20010047</b>	<b>Maximum level of 99 exceeded</b>
<b>Explanation</b>	Parameter levels above "99" are not allowed.
<b>Action</b>	Change parameter definition to level "99" or lower.
<b>20010048</b>	<b>The length specification of this data type must be even</b>
<b>Explanation</b>	Type "K" needs an even value for its length specification.
<b>Action</b>	Change length specification to be even.
<b>20010050</b>	<b>Unexpected CHOICE token</b>
<b>Explanation</b>	CHOICE token can be used <i>only</i> for IDL with GROUP type and Out parameter.
<b>Action</b>	Remove CHOICE token or change IDL parameter to GROUP or direction to Out.

# 45

## Message Class 2002 - .NET Wrapper

---

The messages have the format:

2002*nnnn*

where 2002 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20020000</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support.
<b>20020001</b>	<b>Unsupported functionality &lt;additional text&gt;</b>
<b>Explanation</b>	See additional message text for more information.
<b>Action</b>	Check documentation for information on the given functionality.
<b>20020002</b>	<b>Invalid SSL parameter</b>
<b>Explanation</b>	The format of the SSL Broker URL is invalid.
<b>Action</b>	Check and correct the SSL URL.
<b>20020003</b>	<b>Data marshalling error</b>
<b>Explanation</b>	Data marshalling error.
<b>Action</b>	Contact Software AG Support.

<b>20020004</b>	<b>Data unmarshalling error</b>
<b>Explanation</b>	Data unmarshalling error.
<b>Action</b>	Contact Software AG Support.
<b>20020005</b>	<b>Missing SendAs Attribute</b>
<b>Explanation</b>	In the generated wrapper code there is a missing SendAs attribute.
<b>Action</b>	Contact Software AG Support.
<b>20020006</b>	<b>Unsupported data type</b>
<b>Explanation</b>	Unsupported data type.
<b>Action</b>	Contact Software AG Support.
<b>20020007</b>	<b>Invalid encryptionLevel value</b>
<b>Explanation</b>	Invalid encryptionLevel value.
<b>Action</b>	Correct the encryptionLevel value. For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.
<b>20020008</b>	<b>Invalid compressionLevel value</b>
<b>Explanation</b>	Invalid compressionLevel value.
<b>Action</b>	Correct the compressionLevel value.
<b>20020010</b>	<b>erx.dll in folder :1: missing</b>
<b>Explanation</b>	The file <i>erx.dll</i> is not in the folder :1:.
<b>Action</b>	Contact Software AG Support.
<b>20020011</b>	<b>Cannot load erx.dll</b>
<b>Explanation</b>	Cannot load <i>erx.dll</i> .
<b>Action</b>	Check whether EntireX has been installed correctly.

<b>20020012</b>	<b>Cannot open a new conversation within a conversation</b>
<b>Explanation</b>	Cannot open a new conversation within a conversation.
<b>Action</b>	Correct your application code.
<b>20020013</b>	<b>Missing library name. Please use Service (libraryName) constructor</b>
<b>Explanation</b>	Missing library name. Use Service (libraryName) constructor.
<b>Action</b>	Correct your application code to call the Service (libraryName) constructor.
<b>20020014</b>	<b>Array dimension(s) out of bounds</b>
<b>Explanation</b>	The size of one or more dimensions of the user data exceeds the size defined in the IDL parameter.
<b>Action</b>	Correct your application code.
<b>20020015</b>	<b>Unsupported object type</b>
<b>Explanation</b>	Unsupported object type.
<b>Action</b>	Contact Software AG Support.
<b>20020016</b>	<b>Cannot set RPC password; no RPC user defined</b>
<b>Explanation</b>	Cannot set RPC password; no RPC user defined for a Service class instance.
<b>Action</b>	Define an RPC user before setting the RPC password.
<b>20020017</b>	<b>Invalid ServerAddress</b>
<b>Explanation</b>	Invalid ServerAddress.
<b>Action</b>	Correct the format of ServerAddress.
<b>20020018</b>	<b>NU/PU are unsigned types</b>
<b>Explanation</b>	Error in the transferred data.
<b>Action</b>	Contact Software AG Support.
<b>20020019</b>	<b>Error unmarshalling N(U)/P(U)</b>
<b>Explanation</b>	Error in the transferred data.
<b>Action</b>	Contact Software AG Support.

<b>20020020</b>	<b>Cannot load library, invalid server library</b>
<b>Explanation</b>	DLL with the required library name does not contain an object with the <code>LibraryAttribute</code> .
<b>Action</b>	Correct your server implementation.
<b>20020021</b>	<b>Cannot locate library in file</b>
<b>Explanation</b>	Error in the server DLL.
<b>Action</b>	Contact Software AG Support.
<b>20020022</b>	<b>Program/Method not found</b>
<b>Explanation</b>	Server DLL does not contain the required program/method.
<b>Action</b>	Correct your server implementation or client request.
<b>20020023</b>	<b>User error in server library</b>
<b>Explanation</b>	There was an uncaught exception in the user's server implementation.
<b>Action</b>	Correct the server implementation.
<b>20020024</b>	<b>Invalid unbounded array</b>
<b>Explanation</b>	Error in the definition of an unbounded array.
<b>Action</b>	Contact Software AG Support.
<b>20020025</b>	<b>Cannot set Broker during a conversation</b>
<b>Explanation</b>	You cannot change the broker within a conversation.
<b>Action</b>	Correct your client implementation.
<b>20020027</b>	<b>SoftwareAG.EntireX.NETWrapper.Runtime.dll not found</b>
<b>Explanation</b>	The DLL was not found in the appropriate place.
<b>Action</b>	See <i>.NET Framework Configuration</i> in the RPC Server for .NET documentation and follow the rules defined there.
<b>20020029</b>	<b>Invalid BrokerSecurity value</b>
<b>Explanation</b>	The value for the <code>BrokerSecurity</code> is invalid.
<b>Action</b>	Correct the value in your implementation.

<b>20020030</b>	<b>Cannot create CALL_INFORMATION_BLOCK</b>
<b>Explanation</b>	The creation of the CALL_INFORMATION_BLOCK failed
<b>Action</b>	Contact Software AG Support.
<b>20020031</b>	<b>Invalid index :1: for field :2:::3:</b>
<b>Explanation</b>	The index :1: of field :3: in group/struct :2: is wrong.
<b>Action</b>	Contact Software AG Support.
<b>20020032</b>	<b>State for reliable messaging not set</b>
<b>Explanation</b>	User error in the implementation of reliable messaging.
<b>Action</b>	Correct the implementation.
<b>20020033</b>	<b>Unexpected error</b>
<b>Explanation</b>	There is an unexpected error running with reliable messaging.
<b>Action</b>	Contact Software AG Support.
<b>20020034</b>	<b>SERVER_ADDRESS for reliable messaging not set</b>
<b>Explanation</b>	The SERVER_ADDRESS for the request is missing.
<b>Action</b>	Contact Software AG Support.
<b>20020035</b>	<b>Numeric value of :1: does not fit in :2::3:::4:</b>
<b>Explanation</b>	The value of parameter :1: exceeds the range of the numeric field :2::3:::4:.
<b>Action</b>	Inspect the user implementation.
<b>20020036</b>	<b>Internal error in method :1:</b>
<b>Explanation</b>	An internal error in method :1: occurred.
<b>Action</b>	Contact Software AG Support.
<b>20020038</b>	<b>Length of byte array :1: does not fit the definition</b>
<b>Explanation</b>	The length of the byte array exceeds the length defined in the IDL.
<b>Action</b>	Correct your client or server implementation.

- 20020039**            **Index :1: for field :2:..:3: is missing**  
**Explanation**        Field :3: at index :1: in group/struct :2: is missing.  
**Action**                Contact Software AG Support.
- 20020040**            **SoftwareAG.EntireX.NETWrapper.Runtime.xml is missing**  
**Explanation**        The file `SoftwareAG.EntireX.NETWrapper.Runtime.xml` is not in the same directory as the file `SoftwareAG.EntireX.NETWrapper.Runtime.dll`.  
**Action**                Check the `bin` folder of your EntireX installation and the folder of your client application.
- 20020041**            **Library not configured**  
**Explanation**        The IDL library involved in the client call is not defined in the .NET server's `rpcserver.exe.config` file.  
**Action**                Add the library's key and path to the assembly containing the server implementation to the `rpcserver.exe.config` file (see *.NET Framework Configuration* in the RPC Server for .NET documentation).
- 20020042**            **Invalid :1:**  
**Explanation**        The value of :1: does not meet the requirements.  
**Action**                Correct the value in your implementation.
- 20020043**            **:1: is not a valid BigInteger number**  
**Explanation**        The value of :1: does not meet the requirements for a BigInteger number.  
**Action**                Correct the value in your implementation.
- 20020044**            **Server configuration file not found or EntireX Assemblies section missing**  
**Explanation**        The configuration file for the `rpcserver.exe` was not found or does not contain the "EntireX Assemblies" section.  
**Action**                See *.NET Framework Configuration* in the RPC Server for .NET documentation and follow the rules defined there.

# 46

## Message Class 2003 - PL/I Wrapper

---

The messages have the format:

2003 $nnnn$

where 2003 is the message class, and

$nnnn$  is the message number in the range 0000 - 9999

<b>20030001</b>	<b>Missing option TARGET - (BATCH_ZOS/IMS_ZOS/CICS_ZOS)</b>
<b>Explanation</b>	No option TARGET was specified during generation. TARGET is a required option.
<b>Action</b>	Specify the option TARGET.
<b>20030002</b>	<b>Wrong option <i>target_option</i> for TARGET - (BATCH_ZOS/IMS_ZOS/CICS_ZOS)</b>
<b>Explanation</b>	A wrong option TARGET was specified during generation. Valid targets are BATCH_ZOS, IMS_ZOS and CICS_ZOS.
<b>Action</b>	Specify a correct option TARGET.
<b>20020003</b>	<b>Unbounded arrays not supported: <i>library_name/program_name/parameter_name</i></b>
<b>Explanation</b>	Unbounded arrays are not supported. The appendix of the message gives you the library, program and parameter name of the IDL parameter causing the error.
<b>Action</b>	Adapt your IDL accordingly and re-generate your clients, server, stubs, etc.

**20030004** *idl\_data\_type* **without maxlength not supported:**  
*library\_name/program\_name/parameter\_name*

**Explanation** The following IDL data types are not supported if no maximum length is given:

IDL Data Type	Description
AV	Alphanumeric variable length
KV	Kanji variable length

The appendix of the message gives you the library, program and parameter name of the IDL parameter causing the error.

**Action** Adapt your IDL accordingly and re-generate your clients, server, stubs, etc.

**20030005** **Length for *idl\_data\_type* fields must be even:**  
*library\_name/program\_name/parameter\_name*

**Explanation** The length of the IDL data types below must be even:

IDL Data Type	Description
KV	Kanji variable length
K	Kanji

This is because the resulting PL/I data type graphic is measured in graphics (2 bytes each) and the IDL length for K, KV in bytes. The appendix of the message gives you the library, program and parameter name of the IDL parameter causing the error.

**Action** Adapt your IDL accordingly and re-generate your clients, server, stubs, etc.

**20030006** **IDL data type *idl\_data\_type* not supported:**  
*library\_name/program\_name/parameter\_name*

**Explanation** The following IDL data types are not supported:

IDL Data Type	Description
BV	Binary variable length

**Action** Adapt your IDL accordingly and re-generate your clients, server, stubs, etc.

**20030007** **Maximum length for *idl\_data\_type* usually *idl\_max\_len*:**  
*library\_name/program\_name/parameter\_name*

**Explanation** For the following IDL data types the maximum length of the resulting PL/I data types is usually restricted by the PL/I programming language.

IDL Data Type	IDL Maximum Length	Resulting Length in PL/I
K	32766 bytes	16383 graphics
KV	32766 bytes	16383 graphics
A	32767 bytes	32767 characters
AV	32767 bytes	32767 characters
B	4095 bytes	32760 bits

In this case a warning message is produced, generation of sources continues. However, it is likely that the compilation of the generated sources is not possible. The appendix of the message gives you the library, program and parameter name of the IDL parameter causing the warning message.

**Action** If the compilation process of the generated sources fails, adapt your IDL accordingly and re-generate your clients, server, stubs, etc.

**20030008 Invalid compressionLevel value**

**Explanation** The following IDL data types below are not supported if a maximum length is given:

IDL Data Type	Description
BV	Binary variable length

The appendix of the message gives you the library, program and parameter name of the IDL parameter causing the error.

**Action** Adapt your IDL accordingly and re-generate your clients, server, stubs, etc.

**20030009 Precision for *idl\_data\_type* exceeds 15:  
*library\_name/program\_name/parameter\_name***

**Explanation** For the following IDL data types the maximum precision of the resulting PL/I data types is usually restricted by the PL/I programming language.

IDL Data Type	PL/I Restriction
N	Depending on your compiler, 15 or 31 numeric picture characters in the picture clause.
NU	
P	Depending on your compiler, 15 or 31 digits
PU	

If the precision exceeds 15 a warning message is produced, generation of sources continues. However, depending on your compiler, compilation of the generated sources may not possible. The appendix of the message gives you the library, program and parameter name of the IDL parameter causing the warning message.

**Action** If the compilation process of the generated sources fails, adapt your IDL accordingly and re-generate your clients, server, stubs, etc.

**20030010**            **IDL data type *type* must be ALIGNED:**  
*library\_name/program\_name/parameter\_name*

**Explanation**        The IDL data types below have to be aligned. This applies only for RPC servers in the environment IMS:

IDL Data Type	Description
L	Logical
B	Binary

The appendix of the message gives you the library, program and parameter name of the IDL parameter causing the warning message.

**Action**                Adapt your IDL and re-generate your clients, server, stubs, etc.

**20030011**            **Total number of digits supported is 29:**  
*library\_name/program\_name/parameter\_name*

**Explanation**        For PL/I the total number of digits (*number1+number2*) supported by EntireX is 29, see *Mapping IDL Data Types to PL/I Data Types*.

**Action**                Adapt your IDL and re-generate your clients, server, stubs, etc.

**20030012**            **Maximum digits after decimal point supported is 7:**  
*library\_name/program\_name/parameter\_name*

**Explanation**        For PL/I the digits after decimal point (*number2*) supported by EntireX is 7, see *Mapping IDL Data Types to PL/I Data Types*.

**Action**                Adapt your IDL and re-generate your clients, server, stubs, etc.

**20030101**            **Out of memory**

**Explanation**        The operating system could not satisfy a memory request.

**Action**                Increase your memory resources and retry.

**20030102**            **Error calling broker stub**

**Explanation**        Calling the broker stub by the Generic RPC Services program (xxxSRVI) failed.

**Action**                Check if the broker stub is correctly linked and/or installed in your environment.

<b>20030103</b>	<b>ERXCOM version invalid</b>
<b>Explanation</b>	The field COM_VERSION in the RPC communication area is not correctly assigned. This is checked in the Generic RPC Services program (xxxSRVI) and Specific RPC Functions module (xxxSRVS).
<b>Action</b>	Correctly assign the COM_VERSION field. For information on how to declare and initialize the RPC communication area, see <i>Using the RPC Communication Area</i> under <i>Writing Applications with the PL/I Wrapper</i> .
<b>20030104</b>	<b>ERXCOM size invalid</b>
<b>Explanation</b>	The field COM_SIZE in the RPC communication area is not correctly assigned.
<b>Action</b>	Correctly assign the COM_SIZE field. For information on how to declare and initialize the RPC communication area, see <i>Using the RPC Communication Area</i> under <i>Writing Applications with the PL/I Wrapper</i> .
<b>20030105</b>	<b>Value of IDL PU data type must be positive</b>
<b>Explanation</b>	With a packed-decimal unsigned IDL data type, negative values cannot be sent.
<b>Action</b>	Either use positive values (including zero) or change the IDL data type to P packed decimal.
<b>20030106</b>	<b>Invalid function</b>
<b>Explanation</b>	The Generic RPC Services program (xxxSRVI) was invoked with an invalid function assigned to COM_FUNCTION in the RPC communication area.
<b>Action</b>	Correct your program. For a list of valid functions, refer to COM_FUNCTION.
<b>20030107</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error occurred in a specific RPC functions module (xxxSRVS).
<b>Action</b>	Contact Software AG Support.
<b>20030108</b>	<b>Calling Generic RPC Services (xxxSRVI) failed</b>
<b>Explanation</b>	Calling the Generic RPC Services (xxxSRVI) by the RPC stub from the Specific RPC Functions module (xxxSRVS) failed.
<b>Action</b>	Contact Software AG Support.

<b>20030109</b>	<b>CICS error RESP1/RESP2 <i>resp1/resp2</i> [ - <i>additional_error_text</i> ]</b>
<b>Explanation</b>	CICS returned an error during an EXEC CICS LINK call. RESP1 and RESP2 are CICS return codes. The additional error text gives more information on the program called. Possible programs are: calling Generic RPC Services (xxxSRVI)
<b>Action</b>	Contact Software AG Support.
<b>20030110</b>	<b>CICS PGMIDERR [ - <i>additional_error_text</i> ]</b>
<b>Explanation</b>	CICS did not find the program specified in an EXEC CICS LINK call. The additional error text gives more information on the program called, possible programs are: calling Generic RPC Services (xxxSRVI)
<b>Action</b>	Contact Software AG Support.
<b>20030111</b>	<b>Reserved</b>
<b>Explanation</b>	None.
<b>Action</b>	None.
<b>20030112</b>	<b>User ID missing</b>
<b>Explanation</b>	The required field COM_CLIENT_USERID in the RPC communication area is not given.
<b>Action</b>	Specify a user ID. For information on the required settings in the RPC communication area, see <i>Using the RPC Communication Area</i> under <i>Writing Applications with the PL/I Wrapper</i> .
<b>20030113</b>	<b>Password missing</b>
<b>Explanation</b>	The password is required in the following situations: <ul style="list-style-type: none"> <li>■ If EntireX Security is installed, a password is required in the field COM_CLIENT_PASSWORD. See <i>Step 5: Optional Settings in the RPC Communication Area</i> under <i>Writing Applications with the PL/I Wrapper</i>.</li> <li>■ If the flag COM_CLIENT_NATSECURITY is switched on, a password is required in the field COM_CLIENT_PASSWORD or COM_CLIENT_RPCPASSWORD.</li> </ul>
<b>Action</b>	Depending on the situation, specify a password or see <i>Using the Broker and RPC User ID/Password</i> under <i>Writing Applications with the PL/I Wrapper</i> .

<b>20030114</b>	<b>RPC Protocol reply faulty</b>
<b>Explanation</b>	The reply from the RPC Server is invalid and does not follow the rules of the RPC protocol.
<b>Action</b>	Contact Software AG Support.
<b>20030115</b>	<b>Library missing</b>
<b>Explanation</b>	The field COM_SERVER_LIBRARY in the RPC communication area is not given. The field is required for RPC conversations.
<b>Action</b>	For information on how to work with RPC conversations, see <i>Conversational RPC</i> under <i>Writing Applications with the PL/I Wrapper</i> .
<b>20030116</b>	<b>Last conversation not ended</b>
<b>Explanation</b>	The RPC communication area holds an ongoing RPC conversation which has not been ended. It is not possible to ship in parallel simple non-conversational RPC requests or open another RPC conversation using the same RPC communication area.
<b>Action</b>	For information on how to work with RPC conversations, see <i>Conversational RPC</i> under <i>Writing Applications with the PL/I Wrapper</i> .
<b>20030117</b>	<b>No ongoing conversation</b>
<b>Explanation</b>	The RPC communication area holds an ongoing RPC conversation which has not been ended. It is not possible to ship in parallel simple non-conversational RPC requests or open another RPC conversation using the same RPC communication area.
<b>Action</b>	For information on how to work with RPC conversations, see <i>Conversational RPC</i> under <i>Writing Applications with the PL/I Wrapper</i> .

# 47

## Message Class 2004 - COBOL Wrapper

---

This section describes error messages which can occur in the COBOL Wrapper. All COBOL Wrapper messages are in message class 2004.

The messages have the format:

2004 $nnnn$

where 2004 is the message class, and

$nnnn$  is the message number in the range 0000 - 9999

**20040001**

**Unbounded Arrays without maximum upper bounds not supported:**  
<library>/<program>/< parameter>/<index>

**Explanation**

Unbounded arrays without maximum upper bounds are supported for RPC clients on operating system z/OS with the following interface types:

- *CICS with Standard Linkage Calling Convention*
- *Batch with Standard Linkage Calling Convention*
- *IMS BMP with Standard Linkage Calling Convention*
- *IMS MPP with Standard Linkage Calling Convention*

Code generation for other *Client Interface Types*, other operating systems or RPC servers force this error message.

The appendix of the message gives you the library, program, parameter name and index definition of the IDL parameter causing the error.

**Action**

Try to use a supported interface type and re-generate.

**20040002** <idl-data-type> without maximum length not supported: <library>/<program>/<parameter>

**Explanation** The following IDL data types below are not supported if no maximum length is given:

IDL Data Type	Description
BV	Binary variable length.
AV	Alphanumeric variable length.
KV	Kanji variable length.

The appendix of the message gives you the library, program and parameter name of the IDL parameter causing the error.

**Action** Adapt your IDL accordingly and re-generate.

**20040003** Invalid CSECT name <CSECT-name> for target Compiler <compiler>: <library>/<program>

**Explanation** The program-name or program-alias in the IDL contains characters not allowed for CSECT names. The appendix of the message gives you the library and program of the IDL parameter causing the error.

**Action** Adapt your IDL accordingly and re-generate.

**20040004** IDL data type <idl-data-type> not supported: <library>/<program>/<parameter>

**Explanation** The following IDL data types are not supported:

- UV Unicode variable length
- U Unicode

**Action** Adapt your IDL accordingly and re-generate your client and server interface objects.

**20040005** Missing option TARGET - (BATCH\_ZOS/BATCH\_VSE/BATCH\_BS2000/BATCH\_I5OS/CICS\_ZOS/CICS\_VSE/IMS\_MPP/IMS\_BMP/IDMS\_ZOS)

**Explanation** No option TARGET was specified during generation. TARGET is a required option.

**Action** Specify the option TARGET.

**20040006** Wrong option <target-option> for TARGET - (BATCH\_ZOS/BATCH\_VSE/BATCH\_BS2000/BATCH\_I5OS/CICS\_ZOS/CICS\_VSE/IMS\_MPP/IMS\_BMP/IDMS\_ZOS)

**Explanation** A wrong option TARGET was specified during generation. Valid targets are BATCH\_ZOS, BATCH\_VSE, BATCH\_BS2000, BATCH\_I5OS, CICS\_ZOS, CICS\_VSE, IMS\_MPP and IMS\_BMP.

**Action** Specify a correct option TARGET.

<b>20040007</b>	<b>Wrong option &lt;literal-option&gt; for LITERAL - (QUOTE/APOST)</b>
<b>Explanation</b>	A wrong option LITERAL was specified during generation. Valid values for literal are QUOTE and APOST.
<b>Action</b>	Specify a correct option LITERAL.
<b>20040008</b>	<b>Wrong option &lt;comm-option&gt; for COMM - (LINKAGE/EXTERNAL/COPYBOOK)</b>
<b>Explanation</b>	A wrong option COMM was specified during generation. Valid values for option COMM are LINKAGE, EXTERNAL and COPYBOOK.
<b>Action</b>	Specify a correct option COMM.
<b>20040009</b>	<b>Wrong option &lt;rpc_highest-option&gt; for RPC_HIGHEST - (1110/1120/1130/1140/2000/2020)</b>
<b>Explanation</b>	A wrong option RPC_HIGHEST was specified during generation. Valid values for option RPC_HIGHEST are 1110, 1120, 1130, 1140, 2000 and 2020.
<b>Action</b>	Specify a correct option RPC_HIGHEST.
<b>20040010</b>	<b>K/KV cannot be mapped to PIC G: &lt;library&gt;/&lt;program&gt;/&lt;parameter&gt;</b>
<b>Explanation</b>	The IDL type K or KV (Kanji) was specified with an uneven length. This runs into conflict with COBOL data type GRAPHIC, which requires exactly half the length of IDL type K/KV.  For example, the IDL  <pre>1 MyKanji (K10)</pre> corresponds to the COBOL  <pre>01 MyKanji PIC G(5) DISPLAY-1.</pre>
<b>Action</b>	Correct your Software AG IDL file to contain an even length for IDL types K/KV.
<b>20040011</b>	<b>Wrong option &lt;option&gt; for INTERFACE - (DFHCOMMAREA/DFHLBUFFER/DFHCHANNEL/LINKAGE)</b>
<b>Explanation</b>	A wrong value for the option INTERFACE is specified.
<b>Action</b>	Specify a valid value for the option INTERFACE. See the error message or documentation for valid values.

- 20040012**            **Wrong option combination <interface>/<target> for INTERFACE/TARGET**
- Explanation**        Wrong values for the options INTERFACE and TARGET are specified.
- Action**                Specify a valid combination for the options INTERFACE and TARGET. Refer to *Using the COBOL Wrapper in Command-line Mode* for valid combinations.
- 
- 20040013**            **Server stubs required only for IMS**
- Explanation**        This is an internal error.
- Action**                Contact Software AG Support.
- 
- 20040014**            **Maximum length for CICS container name is 16 characters:**  
**<library>/<program>/<parameter>/<container>[text]**
- Explanation**        Container names are restricted to 16 characters by CICS. An optional text gives more information.
- Action**                Depending on the situation:
- Shorten the structure name representing the container in the IDL to fit to this restriction.
  - If variable number of containers are used with an IDL unbounded array (see *array-definition* under *Software AG IDL Grammar* in the IDL Editor documentation) with maximum, restrict the number of containers.
- See *CICS Channel Container IDL Rules*.
- 
- 20040015**            **IDL not valid for CICS with channel container calling convention:**  
**<library>/<program>/<parameter>[text]**
- Explanation**        The IDL mapped to CICS programs with channel container calling convention may only contain IDL structures and IDL programs with references to this structures. An optional text gives more information.
- See *CICS Channel Container IDL Rules*.
- Action**                Correct your IDL and retry.
- 
- 20040016**            **CICS container <container> already used for <direction> :**  
**<library>/<program>/<parameter>**
- Explanation**        Container for CICS must be unique for input as well as for output. You cannot use them twice. In an IDL program an IDL structure, representing a container, is referenced twice for the same direction.
- Action**                Correct your IDL and retry.

<b>20040017</b>	<b>IDL requires RPC protocol &lt;protocol&gt; - downgrade not possible</b>
<b>Explanation</b>	Depending on the IDL types given in your IDL, a minimum RPC protocol version is required. You can upgrade it but never go beyond this lower limit.
<b>Action</b>	Specify the RPC protocol version <i>&lt;protocol&gt;</i> and re-generate.
<b>20040018</b>	<b>Sent length &lt;length&gt; exceeds 24580 DFHCOMMAREA length: &lt;library&gt;/&lt;program&gt;</b>
<b>Explanation</b>	<p>The client interface object is generated with interface type DFHCOMMAREA Calling Convention. It is called with EXEC CICS LINK from the calling application. This message is a warning issued during generation and tells you that the DFHCOMMAREA of a generated client interface object requires more than 24 KB to send the data (IN and INOUT IDL parameters). Certain restrictions apply depending on how you plan to call the client interface:</p> <ul style="list-style-type: none"> <li>■ <b>Distributed program link (DPL)</b> That is, the calling application program is in a CICS that is different from the client interface object. Refer to the IBM documentation of EXEC CICS LINK for 24 KB limitations. See also IBM's APAR PQ06624.</li> <li>■ <b>Program link within the same CICS</b> The normal upper limit for the length of the CICS COMMAREA is approx. 32 KB.</li> </ul> <p>The appendix of the message gives you the IDL library and IDL program causing the warning.</p>
<b>Action</b>	<p>Depending on the situation:</p> <ul style="list-style-type: none"> <li>■ If the client interface object exceeds 32 KB it is not possible to use the interface type CICS with DFHCOMMAREA. Use the interface type DFHCOMMAREA Calling Convention instead.</li> <li>■ For distributed program links, see your IBM CICS documentation of EXEC CICS LINK for further information.</li> </ul>
<b>20040019</b>	<b>Receive length of &lt;length&gt; exceeds 24580 DFHCOMMAREA length: &lt;library&gt;/&lt;program&gt;</b>
<b>Explanation</b>	<p>The client interface object is generated with interface type DFHCOMMAREA Calling Convention. It is called with EXEC CICS LINK from the calling application. This message is a warning issued during generation and tells you that the DFHCOMMAREA of a generated client interface object requires more than 24 KB to receive the data (OUT and INOUT IDL parameters). Certain restrictions apply depending on how you plan to call the client interface:</p> <ul style="list-style-type: none"> <li>■ <b>Distributed program link (DPL)</b> That is, the calling application program is in a CICS that is different from the client interface object. Refer to the IBM documentation of EXEC CICS LINK for 24 KB limitations. See also IBM's APAR PQ06624.</li> </ul>

■ **Program link within the same CICS**

The normal upper limit for the length of the CICS COMMAREA is approx. 32 KB.

The appendix of the message gives you the IDL library and IDL program causing the warning.

**Action** Depending on the situation:

- If the client interface object exceeds 32 KB it is not possible to use the interface type CICS with DFHCOMMAREA. Use the interface type DFHCOMMAREA Calling Convention instead.
- For distributed program links, see your IBM CICS documentation of EXEC CICS LINK for further information.

**20040020 Valid start level for data items in COPYBOOKS is from 1 thru 49**

**Explanation** The COBOL programming language allows level numbers for data items in the range from 1 thru 49.

**Action** Specify a valid starting level.

**20040021 BS2000 does not support DBCS i.e. K/KV: <library>/<program>/<parameter>**

**Explanation** BS2000 does not support DBCS.

**Action** Try to map the data to IDL B/BV (binary).

**20040022 Wrong option <servercopybooks> for SERVERCOPYBOOKS - (TRUE/FALSE)**

**Explanation** The wrong value for the option was specified.

**Action** Specify TRUE or FALSE.

**20040023 Copybooklevel forced to 01 because of OCCURS DEPENDING ON:  
<library>/<program>**

**Explanation** If the IDL contains unbounded arrays, the copybooklevel cannot be set to greater than 1.

**Action** None.

**20040024 Generation of server not supported for TARGET - (IMS\_MPP/IDMS\_ZOS)**

**Explanation** RPC server for this environment cannot be generated with the COBOL Wrapper.

**Action** None.

<b>20040025</b>	<b>COBOL program name contains more than &lt;number-of-characters&gt; : &lt;library&gt;/&lt;program&gt;</b>
<b>Explanation</b>	COBOL for your environment supports a maximum length of <number-of-characters> characters for user-defined words depending on context (operating system etc.).  The appendix of the message gives you the IDL library and IDL program causing the warning.
<b>Action</b>	Reduce the length of the IDL program name to meet COBOL restrictions.
<b>20040026</b>	<b>IDL program alias contains more than 31 characters : &lt;library&gt;/&lt;program&gt;</b>
<b>Explanation</b>	COBOL supports a maximum length of 31 characters for user defined words.  The appendix of the message gives you the IDL library and IDL program causing the warning.
<b>Action</b>	Reduce the length of the IDL program alias to meet COBOL restrictions.
<b>20040027</b>	<b>IDL program name contains more than 7 characters for option SERVERCOPYBOOKS : &lt;library&gt;/&lt;program&gt;</b>
<b>Explanation</b>	A maximum of 7 characters is supported in this context for COBOL RPC server names.  The appendix of the message gives you the IDL library and IDL program causing the warning.
<b>Action</b>	Reduce the length of the IDL program name to meet the restriction.
<b>20040028</b>	<b>IDL program name contains more than 7 characters : &lt;library&gt;/&lt;program&gt;</b>
<b>Explanation</b>	This is a special purpose message.
<b>Action</b>	Contact Software AG Support.
<b>20040029</b>	<b>Wrong option combination &lt;interface&gt;/&lt;comm&gt; for INTERFACE/COMM</b>
<b>Explanation</b>	Wrong values for the options INTERFACE and COMM are specified.
<b>Action</b>	Specify a valid combination for the options INTERFACE and COMM. See <i>Using the COBOL Wrapper in Command-line Mode</i> for valid combinations.
<b>20040030</b>	<b>Option value &lt;option&gt; too long. A maximum of 32 characters is allowed.</b>
<b>Explanation</b>	The value specified for the option is too long. Options are BROKER, CLASS, SERVER or SERVICE.
<b>Action</b>	Shorten the length for the option and retry generation.

- 20040031**            **Wrong option combination <target>/<comm> for TARGET/COMM**  
**Explanation**        Wrong values have been specified for the options TARGET and COMM.  
**Action**                Specify a valid combination for the options TARGET and COMM. See *Using the COBOL Wrapper in Command-line Mode* for valid combinations.
- 20040032**            **IDL Library name (<library>) too long. A maximum of 127 characters is allowed**  
**Explanation**        The IDL library name is too long to generate a COBOL server.  
**Action**                Shorten the length for the IDL library and retry generation.
- 20040033**            **IDL program name (<library>) too long. A maximum of 127 characters is allowed. IDL Library name is <library>**  
**Explanation**        The IDL program name is too long to generate a COBOL server.  
**Action**                Shorten the length for the IDL program and retry generation.
- 20040034**            **IDL program has a client-side mapping (CVM). COBOL RPC clients not supported: <library>/<program>**  
**Explanation**        RPC clients generated with the COBOL Wrapper do not support server mapping files (.cvm). The appendix of the message gives you the IDL library and IDL program name causing the error.  
**Action**                None.
- 20040035**            **N/NU/P/PU with more than <n> digits not supported for <target-option>: <library>/<program>/< parameter>/<index>**  
**Explanation**        For COBOL, the total number of digits for IDL datatypes N, NU, P and PU depends on the environment. See *Mapping IDL Data Types to COBOL Data Types*. The appendix of the message gives you the library, program, parameter name and index definition of the IDL parameter causing the error.  
**Action**                Reduce the number of digits and re-generate.
- 20040101**            **Function not implemented**  
**Explanation**        Generic RPC function not implemented.  
**Action**                Contact Software AG Support.

<b>20040102</b>	<b>Invalid Argument(s) supplied</b>
<b>Explanation</b>	Invalid Generic RPC function was given.
<b>Action</b>	Correct your program, specify a valid generic RPC function and retry.
<b>20040103</b>	<b>Library missing</b>
<b>Explanation</b>	No Library name was given.
<b>Action</b>	Provide a library in the RPC Communication Area.
<b>20040104</b>	<b>User ID missing</b>
<b>Explanation</b>	No user ID was given.
<b>Action</b>	Provide a user ID in the RPC Communication Area.
<b>20040105</b>	<b>Not in reliable state CLIENT-COMMIT</b>
<b>Explanation</b>	Generic RPC function issued only valid for reliable message(s) started with CLIENT-COMMIT.
<b>Action</b>	Correct your program and retry.
<b>20040106</b>	<b>Invalid reliable state</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Support.
<b>20040107</b>	<b>Conversations mixed with reliable msgs</b>
<b>Explanation</b>	You tried to open a conversation while you are within a reliable message sequence.
<b>Action</b>	Correct your program and retry.
<b>20040108</b>	<b>No active UOWID found</b>
<b>Explanation</b>	You tried to get the reliable state of a UOW, but there is no UOWID in the RPC communication area.
<b>Action</b>	Correct your program and retry.
<b>20040109</b>	<b>COMMAREA length not valid</b>
<b>Explanation</b>	The length of the DFHCOMMAREA defined in the EXEC CICS LINK statement when calling a client interface object of interface type DFHCOMMAREA Calling Convention is too short. See <i>Using the COBOL Wrapper for CICS with DFHCOMMAREA Calling Convention (z/OS and z/VSE)</i> under <i>Using the COBOL Wrapper for the Client Side</i> .
<b>Action</b>	Correct your client CICS application.

- 20040110**            **Unknown CICS error <error> during call to COBSRVI**
- Explanation**        During call of the generic RPC services module (COBSRVI) by your client interface object the CICS error <error> occurred.
- Action**              Refer to your IBM CICS documentation.
- 
- 20040111**            **COBSRVI not found**
- Explanation**        The generic RPC services module (COBSRVI) was not found by your client interface object.
- Action**              Check if the generic RPC service module is available in your environment.
- 
- 20040112**            **Broker stub <stub-name> could not be loaded**
- Explanation**        You dynamically call the broker stub with the COBOL Wrapper, but the broker stub called could not be found in the environment.
- Action**              Check the following possibilities:
- Check if the broker stubs are correctly installed in your target environment and are accessible from your application.
  - Possibly customize the subprogram DOBROKER in the Generic RPC Service module for a valid broker stub name of your target environment.
  - Possibly recompile the Generic RPC Service module and rebuild your application. Proceed as described under *Using the COBOL Wrapper*.
- 
- 20040113**            **Invalid COBOL Wrapper API version**
- Explanation**        The API version for the COBOL Wrapper is wrong.
- Action**              Specify a correct API version in the field COMM-VERSION of the RPC communication area. See *The RPC Communication Area (Reference)*.
- 
- 20040114**            **TRANSFER to <broker-stub> returns with <error-status>**
- Explanation**        The TRANSFER CONTROL within IDMS to the broker stub failed.
- Action**              See <error-status> and refer to the IDMS documentation.
- 
- 20040115**            **Wrong data in parameter <idl-parameter-name>**
- Explanation**        The data contained in the parameter <idl-parameter-name> does not match the COBOL data type.
- Action**              Check the value of the parameter, correct it and rerun the program.

<b>20040116</b>	<b>Upper bound overflow in &lt;occurs-depending-on-index&gt;</b>
<b>Explanation</b>	The actual value provided in an index for an OCCURS DEPENDING ON is higher than the maximum upper bound defined for an IDL unbounded array, see array-definition under <i>Software AG IDL Grammar</i> in the IDL Editor documentation. For the parameter name, see the generated copybook (see <i>IDL Interface Copybooks</i> ) and <occurs-depending-on-index>.
<b>Action</b>	Check the value of the parameter, correct it and rerun the program.
<b>20040117</b>	<b>Negative value in &lt;occurs-depending-on-index&gt;</b>
<b>Explanation</b>	The actual value provided in an index for an OCCURS DEPENDING ON is negative. For the parameter name, see the generated copybook (see <i>IDL Interface Copybooks</i> ) and <occurs-depending-on-index>.
<b>Action</b>	Check the value of the parameter, correct it and rerun the program.
<b>20040118</b>	<b>Natural Security Token length error</b>
<b>Explanation</b>	The COMM-SECURITY-TOKEN-LENGTH variable in the RPC Communication Area contains an invalid length. See <i>The RPC Communication Area (Reference)</i> in the COBOL Wrapper documentation.
<b>Action</b>	Check if the RPC Communication Area is initialized properly. See <i>Step 1: Declare and Initialize the RPC Communication Area</i> under <i>Writing Standard Call Interface Clients</i> in the COBOL Wrapper documentation.
<b>20040119</b>	<b>ODO content is not a rectangle or cuboid</b>
<b>Explanation</b>	In COBOL, all vectors in a dimension must have the same length. A 2-dimensional array forms a rectangle, and a 3-dimensional array forms a cuboid. See <i>Three-dimensional Array with Variable Upper Bounds</i> under <i>Software AG IDL Grammar</i> in the IDL Editor documentation.
<b>Action</b>	Correct your program, IDL and RPC server and retry.
<b>20040120</b>	<b>Memory shortage</b>
<b>Explanation</b>	No storage was assigned with the COBOL ALLOCATE statement. A NULL pointer was returned.
<b>Action</b>	Try to find the cause of the error. If you are executing in Batch, for example, the possible cause could be memory restrictions defined with the job card.

- 20040121**            **ACI Version 10 or higher required**
- Explanation**        The highest possible ACI version possible is determined by the COBOL Wrapper automatically resulting in ACI version less than 10. Features you are using require at least ACI version 10.
- Action**              Check the version of the broker stub used. If you are using broker kernel, check its version. If you are using Direct RPC, check the version of the EntireX Adapter.
- 
- 20040122**            **Broker Password length error (max <maximum>)**
- Explanation**        The Broker password (COMM-ETB-PASSWORD-LENGTH) in the RPC Variable String Area (copybook ERXVSTR) is longer than supported.
- Action**              Correct your program and retry.
- 
- 20040123**            **RPC Library length error (max <maximum>)**
- Explanation**        The RPC library (COMM-RPC-LIBRARY-LENGTH) in the RPC Variable String Area (copybook ERXVSTR) is longer than supported.
- Action**              Correct your program and retry.
- 
- 20040124**            **RPC User ID length error (max <maximum>)**
- Explanation**        The RPC user ID (COMM-RPC-UID-LENGTH) in the RPC Variable String Area (copybook ERXVSTR) is longer than supported.
- Action**              Correct your program and retry.
- 
- 20040125**            **RPC Password length error (max <maximum>)**
- Explanation**        The RPC password (COMM-RPC-PWD-LENGTH) in the RPC Variable String Area (copybook ERXVSTR) is longer than supported.
- Action**              Correct your program and retry.
- 
- 20040126**            **RPC string buffer too small**
- Explanation**        If you are using COMM-VERSION 4000 and the RPC Variable String Area (copybook ERXVSTR), check if the length of the RPC library, RPC user ID and RPC password provided in the RPC Variable String are correct.
- Action**              Correct your program and retry.

# 48

## Message Class 2005 - Generic IDL Extractor Messages

---

This document describes error messages of the common part of the IDL extractors.

The messages have the format:

2005*nnnn*

where 2005 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20050001</b>	<b>Parsing error</b>
<b>Explanation</b>	Parser cannot run the analysis on specified element.
<b>Action</b>	Contact Software AG Support and provide the source to be extracted.
<b>20050002</b>	<b>Syntax error</b>
<b>Explanation</b>	Parser read an unexpected token.
<b>Action</b>	Check and correct specified line.
<b>20050005</b>	<b>No parent element</b>
<b>Explanation</b>	Could not find parent element for specified element.
<b>Action</b>	Check source code above the specified line for correct parameter declaration. Parent/group elements should have a level smaller than their children and no data type declaration.

<b>20050007</b>	<b>No child element</b>
<b>Explanation</b>	Specified group element introduced without any child elements.
<b>Action</b>	Either remove empty group at line above, add new parameter to group at line above or adjust level of parameter at specified line.
<b>20050009</b>	<b>Unexpected object</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support and provide the source to be extracted.
<b>20050016</b>	<b>Linkage section not found</b>
<b>Explanation</b>	The source to be extracted does not include or contain a Linkage Section; therefore the parser cannot generate an IDL file.
<b>Action</b>	Ensure that selected source includes or contains a Linkage Section.
<b>20050020</b>	<b>Referenced file name not found</b>
<b>Explanation</b>	Referenced file could not be loaded.
<b>Action</b>	Check source code for correct file reference or that the referenced file exists on the file system.
<b>20050021</b>	<b>Parsing process failed for a file</b>
<b>Explanation</b>	Exception caught during parsing of specified file.
<b>Action</b>	Check that specified file exists and is valid.
<b>20050030</b>	<b>Nested exception</b>
<b>Explanation</b>	Other component throws an exception.
<b>Action</b>	Check documentation of encapsulated exception.
<b>20050047</b>	<b>Storage is empty</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support and provide the source to be extracted.

# 49

## Message Class 2006 - IDL Extractor for COBOL

---

This document describes error messages of the IDL Extractor for COBOL.

The messages have the format:

2006*nnnn*

where 2006 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20060002</b>	<b>Syntax error</b>
<b>Explanation</b>	Parser read an unexpected token.
<b>Action</b>	Check and correct specified line.
<b>20060004</b>	<b>Invalid COBOL continuation</b>
<b>Explanation</b>	Found COBOL continuation in first line of source code. This is not allowed.
<b>Action</b>	Correct the first line of source code so that it does not contain a continuation line.
<b>20060010</b>	<b>Redefine base not found</b>
<b>Explanation</b>	The redefine base is not well defined for specified redefine path.
<b>Action</b>	Ensure that redefining parameter is referencing an existing parameter.

<b>20060020</b>	<b>Referenced file name not found</b>
<b>Explanation</b>	Referenced file could not be loaded.
<b>Action</b>	Check source code for correct file reference or that the referenced file exists on the file system.
<b>20060030</b>	<b>Nested exception</b>
<b>Explanation</b>	Other component throws an exception.
<b>Action</b>	Check documentation of encapsulated exception.
<b>20060031</b>	<b>IMS file not found</b>
<b>Explanation</b>	Parser could not find referenced IMS file.
<b>Action</b>	Check source code for correct file reference or that the referenced file exists on the file system.
<b>20060041</b>	<b>Procedure does not contain any parameters</b>
<b>Explanation</b>	Specified procedure has no parameters; the Software AG IDL does not support this type of call.
<b>Action</b>	If possible, add a dummy parameter to the procedure in the source code.
<b>20060047</b>	<b>Storage is empty</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support and provide the source to be extracted.
<b>20060048</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Support and provide the source to be extracted.

# 50

## Message Class 2007 - IDL Extractor for PL/I

---

This section describes error messages of the IDL Extractor for PL/I.

The messages have the format:

2007*nnnn*

where 2007 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

**20050009**            **Unexpected object**

**Explanation**        Internal error.

**Action**                Contact Software AG Support and provide the source to be extracted.

**20070030**            **Nested exception**

**Explanation**        Other component throws an exception.

**Action**                Check documentation of encapsulated exception.

**20070031**            **IMS file not found**

**Explanation**        Parser could not find referenced IMS file.

**Action**                Check source code for correct file reference or that the referenced file exists on the file system.

<b>20070032</b>	<b>Attribute is not supported</b>
<b>Explanation</b>	Attribute (VAR)YING is not supported.
<b>Action</b>	Remove the attribute and extract again.
<b>20070033</b>	<b>Size is not supported</b>
<b>Explanation</b>	The specified size of the parameter is not currently supported.
<b>Action</b>	Change the parameter/precision combination and extract again. See <i>Mapping PL/I Data Types to Software AG IDL</i> in the IDL Extractor for PL/I documentation.
<b>20070034</b>	<b>Print character is not supported</b>
<b>Explanation</b>	The print character in a PICTURE data description is not supported.
<b>Action</b>	Change/remove the parameter and extract again.
<b>20070035</b>	<b>Precision is not supported</b>
<b>Explanation</b>	The precision of the parameter is not supported and cannot be mapped to IDL data type.
<b>Action</b>	Change the parameter/precision combination and extract again. See <i>Mapping PL/I Data Types to Software AG IDL</i> in the IDL Extractor for PL/I documentation.
<b>20070036</b>	<b>Precision of fractional digits is not supported</b>
<b>Explanation</b>	The precision of fractional digits of the parameter data type declaration is not supported.
<b>Action</b>	If precision is required, use a parameter with data type PIC X (n) and manually handle conversion from String representation to decimal. If precision is not required, simply remove precision for the fractional digits and the parameter will be mapped to F4/F8. See <i>Mapping PL/I Data Types to Software AG IDL</i> in the IDL Extractor for PL/I documentation.
<b>20070037</b>	<b>No Procedure found</b>
<b>Explanation</b>	IDL Extractor needs a valid procedure to perform extraction.
<b>Action</b>	Ensure that selected source file contains a valid procedure.

<b>20070038</b>	<b>Maximum number of dimensions exceeded</b>
<b>Explanation</b>	Arrays can only be defined with three dimensions.
<b>Action</b>	Reduce dimensions of specified parameter.
<b>20070039</b>	<b>Declaration is not supported</b>
<b>Explanation</b>	Declared data type could not be mapped to IDL data type.
<b>Action</b>	Change the declared data type to a supported one. See <i>Mapping PL/I Data Types to Software AG IDL</i> in the IDL Extractor for PL/I documentation.
<b>20070041</b>	<b>Procedure does not contain any parameters</b>
<b>Explanation</b>	Specified procedure has no parameters; the Software AG IDL does not support this type of call.
<b>Action</b>	If possible, add a dummy parameter to the procedure in the source code.
<b>20070042</b>	<b>Unaligned is not supported</b>
<b>Explanation</b>	The unaligned attribute is unsupported.
<b>Action</b>	See <i>PL/I to IDL Restrictions</i> in the IDL Extractor for PL/I documentation.

# 51 Message Class 2008 - Software AG RPC Extractor Service

---

This section describes error messages which can occur in the RPC Extractor Service. The messages have the format:

2008*nnnn*

where 2008 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20080001</b>	<b>Service not implemented</b>
<b>Explanation</b>	The EXTRACTOR service is not implemented on target platform.
<b>Action</b>	Check installation or contact your system administrator.
<b>20080002</b>	<b>No access to RPC services</b>
<b>Explanation</b>	Service library ERX is not accessible.
<b>Action</b>	Check target installation. Probably module ERX is not in STEPLIB.
<b>20080003</b>	<b>Cannot get memory for &lt;size&gt; bytes</b>
<b>Explanation</b>	EXTRACTOR service failed due to storage shortage on target platform.
<b>Action</b>	Try again later. If still persists, contact your system administrator.

<b>20080004</b>	<b>Cannot open directory: &lt;reason&gt;</b>
<b>Explanation</b>	Open directory failed. If available, a target reason code will be supplied.
<b>Action</b>	Check reason code.
<b>20080005</b>	<b>Empty directory</b>
<b>Explanation</b>	Informational. The directory could be opened but did not contain entries for this request. This may be because the directory itself is empty or member selection (if applied) did not find a matching entry.
<b>Action</b>	None.
<b>20080006</b>	<b>Cannot open file: &lt;reason&gt;</b>
<b>Explanation</b>	Open file failed. If available, a target reason code will be supplied.
<b>Action</b>	Check reason code.
<b>20080007</b>	<b>Empty file</b>
<b>Explanation</b>	Informational. Read file found an empty file.
<b>Action</b>	None.
<b>20080008</b>	<b>Cannot read file: &lt;reason&gt;</b>
<b>Explanation</b>	Open file failed. If available, a target reason code will be supplied.
<b>Action</b>	Check reason code.
<b>20080009</b>	<b>RPC error occurred: &lt;error-number&gt; &lt;error-text&gt;</b>
<b>Explanation</b>	An EntireX RPC error occurred.
<b>Action</b>	Check EntireX RPC number.
<b>20080010</b>	<b>Not authorized: &lt;reason&gt;</b>
<b>Explanation</b>	Userid/Password check failed, a reason code will be supplied
<b>Action</b>	Check reason code.
<b>20080011</b>	<b>Not active</b>
<b>Explanation</b>	The EXTRACTOR service on target platform was not activated.
<b>Action</b>	Check target installation, EXTRACTOR=YES.

**20080012            Invalid usage of EXTRACTOR service**

**Explanation**        The RPC server received a request for the extractor service (using the IDL library SAG) for a broker service other than EXTRACTOR.

**Action**                The IDL library prefix SAG is reserved and must not be used by customer applications. See *Rules for Coding Library, Library Alias, Program, Program Alias and Structure Names*.

**20080200            Broker Communication**

**Explanation**        The communication to the RPC Extractor Service failed.

**Action**                Check communication between the Extractor and RPC Extractor Service.

# 52 Message Class 2010 - RPC Server and Listener for

## IBM® MQ

---

This section describes error messages which can occur in the RPC Server and Listener for IBM® MQ. The messages have the format:

2010*nnnn*

where 2010 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20100001</b>	<b>Process request and reply: invalid action &lt;number indicating action&gt;</b>
<b>Explanation</b>	While processing the request and the reply, an action was to take place which is illegal in the current state.
<b>Action</b>	Contact Software AG Support.
<b>20100009</b>	<b>&lt;Exception with detailed message &gt;</b>
<b>Explanation</b>	An exception occurred while formatting the message. In most cases, the reason is an inconsistency in the metadata.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20100010</b>	<b>Compression=off not possible</b>
<b>Explanation</b>	An RPC with compression 0 is not supported.
<b>Action</b>	Change compression to 1 or 2.

<b>20100012</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message and contact Software AG Support.
<b>20100013</b>	<b>Preparing message failed, see log for details or Message received from server does not fit buffer</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. Marshalling of message failed before sending to CICS ECI.</li><li>2. The received message does not have the expected layout and the values cannot be unmarshalled from it.</li></ol>
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support:  <ul style="list-style-type: none"><li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li><li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li><li>■ Adapter connections.</li></ul> Details can be found in wmentirex.log with trace level 2.
<b>20100015</b>	<b>Transformation error on request: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20100022</b>	<b>Unsupported command &lt;command&gt; or Exception: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. An unknown internal command is used.</li><li>2. An exception occurred during action processing. The log files contain a stack trace.</li></ol>
<b>Action</b>	See detailed message and log files or contact Software AG Support.

<b>20100202</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when sending a message to MQ.
<b>Action</b>	See error code and description and follow detailed message.
<b>20100203</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when doing a commit of an MQ session.
<b>Action</b>	See error code and description and follow detailed message.
<b>20100204</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when doing a backout of an MQ session.
<b>Action</b>	See error code and description and follow detailed message.
<b>20100205</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred during shutdown processing.
<b>Action</b>	See error code and description and follow detailed message.
<b>20100206</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when receiving a message from MQ.
<b>Action</b>	See error code and description and follow detailed message.
<b>20100207</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when opening an MQ queue.
<b>Action</b>	See error code and description and follow detailed message.
<b>20100208</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when connecting to an MQ queue manager.
<b>Action</b>	See error code and description and follow detailed message.
<b>20100209</b>	<b>No input queue opened</b>
<b>Explanation</b>	Receive failed because no input queue was opened.
<b>Action</b>	Specify an input queue in the configuration file.

<b>20100210</b>	<b>No output queue opened</b>
<b>Explanation</b>	Send failed because no output queue was opened.
<b>Action</b>	Define an output queue in the configuration file.
<b>20100211</b>	<b>Neither an input nor an output queue opened</b>
<b>Explanation</b>	RPC Server for IBM MQ cannot start because neither an input nor an output queue was opened.
<b>Action</b>	Specify an input and/or output queue in the configuration file.
<b>20100212</b>	<b>Input queue identical to reply queue</b>
<b>Explanation</b>	Request reply can only be done if the input queue and the output (reply) queue are different.
<b>Action</b>	Specify an input and output queue with different names in the configuration file
<b>20100213</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when calling the <code>beforePut</code> method in the user exit class.
<b>Action</b>	See error description and follow detailed message.
<b>20100214</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when calling the <code>beforeGetMethod</code> in the user exit class.
<b>Action</b>	See error description and follow detailed message.
<b>20100215</b>	<b>Exception with detailed message</b>
<b>Explanation</b>	An exception occurred when calling the <code>afterGetMethod</code> in the user exit class.
<b>Action</b>	See error description and follow detailed message.
<b>20100216</b>	<b>Cannot load user exit class</b>
<b>Explanation</b>	An exception occurred when loading or creating the user exit class.
<b>Action</b>	See error description and follow detailed message.
<b>20100217</b>	<b>Start of Listener for IBM MQ failed</b>
<b>Explanation</b>	An exception occurred when starting the Listener for IBM MQ.
<b>Action</b>	See error description and follow detailed message.

<b>20100218</b>	<b>Field MQEnvironment... error</b>
<b>Explanation</b>	An error occurred when accessing one of the <code>entirex.wmqbridge.environment</code> properties.
<b>Action</b>	See error description and follow detailed message.

# 53

## Message Class 2011 - Connections to IMS Connect

---

This section describes messages that can occur with connections from the webMethods EntireX Adapter for Integration Server to IMS Connect. The messages have the format:

2011*nnnn*

where 2011 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20110001</b>	<b>Process request and reply: illegal action &lt;number indicating action&gt;</b>
<b>Explanation</b>	During request/reply processing the next action is illegal in the current state.
<b>Action</b>	Contact Software AG Support.
<b>20110009</b>	<b>&lt;Exception with detailed message &gt;</b>
<b>Explanation</b>	An exception occurred while formatting the message. In most cases, the reason is an inconsistency in metadata.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20110010</b>	<b>Compression=off not possible</b>
<b>Explanation</b>	An RPC with compression "0" or "off" is not supported.
<b>Action</b>	Change compression to 1 or 2.

<b>20110012</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message and contact Software AG Support.
<b>20110013</b>	<b>Preparing message failed, see log for details or Message received from server does not fit buffer</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. Marshalling of message failed before sending to IMS Connect.</li><li>2. The received message does not have the expected layout and the values cannot be unmarshalled from it.</li></ol>
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support:  <ul style="list-style-type: none"><li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li><li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li><li>■ Adapter connections.</li></ul> Details can be found in wmentirex.log with trace level 2.
<b>20110014</b>	<b>Transformation error on reply: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	The metadata is inconsistent or this data type is not supported.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20110015</b>	<b>Transformation error on request: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This data type is not supported.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20110022</b>	<b>Unsupported command &lt;command&gt; or Exception: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. An unknown internal command is used.</li><li>2. An exception occurred during action processing. The log files contain a stack trace.</li></ol>
<b>Action</b>	See detailed message and log files or contact Software AG Support.

<b>20110023</b>	<b>Preparing message failed, see log for details</b>
<b>Explanation</b>	Marshalling of message failed before sending to IMS Connect.
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support: <ul style="list-style-type: none"> <li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li> <li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li> <li>■ Adapter connections.</li> </ul> <p>Details can be found in wmentirex.log with trace level 2.</p>
<b>20110301</b>	<b>Receive only not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.
<b>20110302</b>	<b>Send only not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.
<b>20110303</b>	<b>&lt;detailed error message from IMS Connect&gt;</b>
<b>Explanation</b>	IMS Connect reported an error, or the configuration is wrong. <p>If IMS Connect returns code 16 and reason code 64, one cause is that the IMS exit is not installed or is not running. The default exit name is HWSSMPL0 (old) or HWSSMPL1 (new). Other configurations may also result in this return code and reason code.</p> <p>If the IMS Connect connection in the EntireX Adapter uses a port which is not related to IMS but to some other application, a call may result in the following message:  Unable to invoke adapter service &lt;service name&gt; [ADA.800.500]  WmEntireX: exception while executing service: 2011 0303  java.io.EOFException</p> <p>If the RPC Server for IMS Connect uses a port which is not related to IMS but to some other application, a call may result in the following message: exception while executing service: 2011 0303 java.io.EOFException</p>
<b>Action</b>	Use the error code from IMS Connect to correct this or correct the configuration.

<b>20110304</b>	<b>Conversations not supported</b>
<b>Explanation</b>	IMS Connect does not support conversational RPC calls.
<b>Action</b>	Use non-conversational calls.

# 54

## Message Class 2012 - Connections to CICS ECI

---

This message class contains messages that can occur with connections to CICS ECI. The messages have the format:

2012*nnnn*

where 2012 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

**20120001**            **Process request and reply: illegal action <number indicating action>.**

**Explanation**        During request/reply processing the next action is illegal in the current state.

**Action**                Contact Software AG Support.

**20120009**            **<Exception with detailed message >**

**Explanation**        An exception occurred while formatting the message. In most cases, the reason is an inconsistency in metadata.

**Action**                See detailed message or contact Software AG Support.

**20120010**            **Compression=off not possible.**

**Explanation**        An RPC with compression "0" ("off") is not supported.

**Action**                Change compression to 1 or 2.

<b>20120012</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message and contact Software AG Support.
<b>20120013</b>	<b>Preparing message failed, see log for details.</b> <b>or</b> <b>Message received from server does not fit buffer</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. Marshalling of message failed before sending to CICS ECI.</li><li>2. The received message does not have the expected layout and the values cannot be unmarshalled from it.</li></ol>
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support:  <ul style="list-style-type: none"><li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li><li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li><li>■ Adapter connections.</li></ul> Details can be found in wmentirex.log with trace level 2.
<b>20120014</b>	<b>Transformation error on reply: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	The metadata is inconsistent or this data type is not supported.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20120015</b>	<b>Transformation error on request: &lt;Exception with detailed message&gt;.</b>
<b>Explanation</b>	This data type is not supported.
<b>Action</b>	See detailed message or Contact Software AG Support.
<b>20120022</b>	<b>Unsupported command &lt;command&gt;.</b> <b>or</b> <b>Exception: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	There are two reasons for this error code. First, an unknown internal command is used. Second, an exception occurred during action processing. The log files contain a stack trace.
<b>Action</b>	See detailed message and log files or contact Software AG Support.

<b>20120023</b>	<b>Preparing message failed, see log for details</b>
<b>Explanation</b>	Marshalling of message failed before sending to CICS ECI.
<b>Action</b>	<p>Check the following metadata for consistency or contact Software AG Support:</p> <ul style="list-style-type: none"> <li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li> <li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li> <li>■ Adapter connections.</li> </ul> <p>Details can be found in wmentirex.log with trace level 2.</p>
<b>20120351</b>	<b>Receive only not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.
<b>20120352</b>	<b>Send only not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.
<b>20120353</b>	<b>&lt;detailed error message from CICS ECI&gt;</b>
<b>Explanation</b>	CICS ECI reported an error, or the configuration is wrong. This error number is also issued if the connection to CICS ECI is lost.
<b>Action</b>	<p>Use the error code from CICS to correct this. The CICS error codes are described in the documentation of CICS from IBM.</p> <p>Possible error codes are (others may occur):</p> <ul style="list-style-type: none"> <li>■ <b>AEI0: PGMIDERR</b> possible reasons: Callee not found - the called program does not exist or is not started.</li> <li>■ <b>ASRA</b> possible reasons: Division by zero.</li> <li>■ <b>4038: Index overwrite</b></li> <li>■ <b>TCII (CICS Abend)</b></li> </ul> <p>A call to CICS ECI can result in an EOF exception because of</p> <ul style="list-style-type: none"> <li>■ Connection to the wrong port. There is some service listening on the port, but not CICS ECI.</li> <li>■ CICS ECI is not correctly configured.</li> </ul>

**20120354**

**Conversations not supported**

**Explanation**

CICS ECI does not support conversational RPC calls.

**Action**

Use non-conversational calls.

# 55

## Message Class 2013 - Deployment to XML RPC Server

---

This message class contains messages that can occur when deploying an XMM file to an XML RPC server. They have the following format:

2013 $nnnn$

where 2013 is the message class, and

$nnnn$  is the message number in the range 0000 - 9999

See *Deployment to RPC Server for XML/SOAP and Dynamic Configuration of RPC Server for XML/SOAP*.

<b>20130001</b>	<b>Unknown configuration method</b>
<b>Explanation</b>	Remote configuration is not supported by this version of the RPC Server for XML/SOAP.
<b>Action</b>	Upgrade to RPC Server for XML/SOAP Version 8.1 or later to use this feature.
<b>20130002</b>	<b>Invalid Call</b>
<b>Explanation</b>	The deployment message size exceeds the maximum message length.
<b>Action</b>	Increase maximum message size in Broker attribute file.
<b>20130005</b>	<b>Permission Denied: No write access</b>
<b>Explanation</b>	RPC Server for XML/SOAP cannot write files.
<b>Action</b>	Modify permission for affected part of file system.

<b>20130007</b>	<b>Permission Denied: No modification access</b>
<b>Explanation</b>	RPC Server for XML/SOAP cannot modify files.
<b>Action</b>	Modify permission for affected part of file system.
<b>20130010</b>	<b>Error during processing operation (Validation fails)</b>
<b>Explanation</b>	The XMM file contains one or more programs that were previously deployed within another XMM file. Multiple XMM files containing the same IDL program should not be deployed to the same server.
<b>Action</b>	Check XMM files to remove conflicts.
<b>20130011</b>	<b>Disabled Deployment for RPC Server for XML/SOAP</b>
<b>Explanation</b>	RPC Server for XML/SOAP supports deployment, but it is disabled in server properties.
<b>Action</b>	Modify the server properties for enabling deployment.

# 56

## Message Class 2014 - COBOL Converter

---

The messages have the format:

2014*nnnn*

where 2014 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20140001</b>	<b>Process request and reply: illegal action &lt;number indicating action&gt;.</b>
<b>Explanation</b>	During request/reply processing the next action is illegal in the current state.
<b>Action</b>	Contact Software AG Support.
<b>20140009</b>	<b>&lt;Exception with detailed message &gt;</b>
<b>Explanation</b>	An exception occurred while formatting the message. In most cases, the reason is an inconsistency in metadata.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20140010</b>	<b>Compression=off not possible.</b>
<b>Explanation</b>	An RPC with compression "0" ("off") is not supported.
<b>Action</b>	Change compression to 1 or 2.

<b>20140012</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message and contact Software AG Support.
<b>20140013</b>	<b>Preparing message failed, see log for details.</b> <b>or</b> <b>Message received from server does not fit buffer</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. Marshalling of message failed before sending to COBOL Converter.</li><li>2. The received message does not have the expected layout and the values cannot be unmarshalled from it.</li></ol>
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support:  <ul style="list-style-type: none"><li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li><li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li><li>■ Adapter connections.</li></ul> Details can be found in wmentirex.log with trace level 2.
<b>20140014</b>	<b>Transformation error on reply: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	The metadata is inconsistent or this data type is not supported.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20140015</b>	<b>Transformation error on request: &lt;Exception with detailed message&gt;.</b>
<b>Explanation</b>	This data type is not supported.
<b>Action</b>	See detailed message or Contact Software AG Support.
<b>20140022</b>	<b>Unsupported command &lt;command&gt;.</b> <b>or</b> <b>Exception: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	There are two reasons for this error code. First, an unknown internal command is used. Second, an exception occurred during action processing. The log files contain a stack trace.
<b>Action</b>	See detailed message and log files or contact Software AG Support.

<b>20140023</b>	<b>Preparing message failed, see log for details</b>
<b>Explanation</b>	Marshalling of message failed before sending to COBOL Converter.
<b>Action</b>	<p>Check the following metadata for consistency or contact Software AG Support:</p> <ul style="list-style-type: none"> <li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li> <li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li> <li>■ Adapter connections.</li> </ul> <p>Details can be found in wmentirex.log with trace level 2.</p>
<b>20140300</b>	<b>Value for cobolInput missing</b>
<b>Explanation</b>	The service parameter <code>cobolInput</code> has either no value or an empty array assigned.
<b>Action</b>	Correct your application and assign a non-empty byte array object to the parameter <code>cobolInput</code> .
<b>20140301</b>	<b>Value for cobolInput is not of type byte[]</b>
<b>Explanation</b>	The service parameter <code>cobolInput</code> is not of type "byte array".
<b>Action</b>	Correct your application and assign a byte array object for the parameter <code>cobolInput</code> .
<b>20140302</b>	<b>Conversations not supported</b>
<b>Explanation</b>	COBOL Converter does not support conversational RPC.
<b>Action</b>	Use non-conversational calls.

# 57

## Message Class 2015 - AS/400

---

The messages have the format:

2015*nnnn*

where 2015 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20150001</b>	<b>Process request and reply: illegal action &lt;number indicating action&gt;.</b>
<b>Explanation</b>	During request/reply processing the next action is illegal in the current state.
<b>Action</b>	Contact Software AG Support.
<b>20150009</b>	<b>&lt;Exception with detailed message &gt;</b>
<b>Explanation</b>	An exception occurred while formatting the message. In most cases, the reason is an inconsistency in metadata.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20150010</b>	<b>Compression=off not possible.</b>
<b>Explanation</b>	An RPC with compression "0" ("off") is not supported.
<b>Action</b>	Change compression to 1 or 2.

<b>20150012</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message and contact Software AG Support.
<b>20150013</b>	<b>Preparing message failed, see log for details.</b> <b>or</b> <b>Message received from server does not fit buffer</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. Marshalling of message failed before sending to AS/400.</li><li>2. The received message does not have the expected layout and the values cannot be unmarshalled from it.</li></ol>
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support:  <ul style="list-style-type: none"><li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li><li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li><li>■ Adapter connections.</li></ul> Details can be found in wmentirex.log with trace level 2.
<b>20150014</b>	<b>Transformation error on reply: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	The metadata is inconsistent or this data type is not supported.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20150015</b>	<b>Transformation error on request: &lt;Exception with detailed message&gt;.</b>
<b>Explanation</b>	This data type is not supported.
<b>Action</b>	See detailed message or Contact Software AG Support.
<b>20150022</b>	<b>Unsupported command &lt;command&gt;.</b> <b>or</b> <b>Exception: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	There are two reasons for this error code. First, an unknown internal command is used. Second, an exception occurred during action processing. The log files contain a stack trace.
<b>Action</b>	See detailed message and log files or contact Software AG Support.

---

<b>20150023</b>	<b>Preparing message failed, see log for details</b>
<b>Explanation</b>	Marshalling of message failed before sending to AS/400.
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support: <ul style="list-style-type: none"><li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li><li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li><li>■ Adapter connections.</li></ul> Details can be found in wmentirex.log with trace level 2.
<b>20150050</b>	<b>&lt;detailed error message from AS/400&gt;</b>
<b>Explanation</b>	The AS/400 system reported an error.
<b>Action</b>	Use the error message from the AS/400 system to correct this.
<b>20150051</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs when calling the AS/400 system.
<b>Action</b>	Use the exception message to correct this..
<b>20150100</b>	<b>Receive only not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.
<b>20150101</b>	<b>Conversations not supported</b>
<b>Explanation</b>	AS/400 does not support conversational RPC calls.
<b>Action</b>	Use non-conversational calls.
<b>20150102</b>	<b>Reliable send not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.

# 58

## Message Class 2016 - Connections to CICS Socket

### Listener

---

The messages have the format:

2016*nnnn*

where 2016 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20160001</b>	<b>Process request and reply: illegal action &lt;number indicating action&gt;</b>
<b>Explanation</b>	During request/reply processing the next action is illegal in the current state.
<b>Action</b>	Contact Software AG Support.
<b>20160009</b>	<b>&lt;Exception with detailed message &gt;</b>
<b>Explanation</b>	An exception occurred while formatting the message. In most cases, the reason is an inconsistency in metadata.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20160010</b>	<b>Compression=off not possible</b>
<b>Explanation</b>	An RPC with compression "0" or "off" is not supported.
<b>Action</b>	Change compression to 1 or 2.

<b>20160012</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message and contact Software AG Support.
<b>20160013</b>	<b>Preparing message failed, see log for details or Message received from server does not fit buffer</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. Marshalling of message failed before sending to CICS.</li><li>2. The received message does not have the expected layout and the values cannot be unmarshalled from it.</li></ol>
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support:  <ul style="list-style-type: none"><li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li><li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li><li>■ Adapter connections.</li></ul> Details can be found in wmentirex.log with trace level 2.
<b>20160014</b>	<b>Transformation error on reply: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	The metadata is inconsistent or this data type is not supported.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20160015</b>	<b>Transformation error on request: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This data type is not supported.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20160022</b>	<b>Unsupported command &lt;command&gt; or Exception: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	There are two reasons for this error code.  <ol style="list-style-type: none"><li>1. An unknown internal command is used.</li><li>2. An exception occurred during action processing. The log files contain a stack trace.</li></ol>
<b>Action</b>	See detailed message and log files or contact Software AG Support.

<b>20160023</b>	<b>Preparing message failed, see log for details</b>
<b>Explanation</b>	Marshalling of message failed before sending to CICS.
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support: <ul style="list-style-type: none"> <li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li> <li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li> <li>■ Adapter connections.</li> </ul> <p>Details can be found in wmentirex.log with trace level 2.</p>
<b>20160100</b>	<b>Receive only not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.
<b>20160101</b>	<b>Invalid program name</b>
<b>Explanation</b>	Program name exceeds the maximum of 8 bytes.
<b>Action</b>	Modify your client.
<b>20160102</b>	<b>Reliable Send not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.
<b>20160103</b>	<b>Send only not supported</b>
<b>Explanation</b>	This type of call is not supported.
<b>Action</b>	Modify your client.
<b>20160104</b>	<b>Invalid encoding &lt;message&gt;</b>
<b>Explanation</b>	The configured encoding is not valid.
<b>Action</b>	Modify your configuration.

<b>20160105</b>	<b>&lt;detailed error message from the socket layer&gt;</b>
<b>Explanation</b>	Communication to the CICS Socket Listener resulted in an error. See the error message for details.
<b>Action</b>	Use the error message from the socket layer to correct this or correct the configuration.
<b>20160106</b>	<b>Create PassTicket error: &lt;error message&gt;</b>
<b>Explanation</b>	Creation of the PassTicket was not possible. Check the error message for details. Typically one of the input parameters (user ID, application name, or secured signon key) is not valid.
<b>Action</b>	Modify the configuration.
<b>20160107</b>	<b>Invalid eyecatcher &lt;message&gt;</b>
<b>Explanation</b>	The response returned from CICS does not contain the expected eyecatcher. Possible reasons include: <ul style="list-style-type: none"><li>■ the configured port is not used by the CICS socket listener but by another application</li><li>■ a wrong encoding has been specified in the configuration</li><li>■ a CICS error occurred during the initial call (e.g. a security issue), check the message for details</li></ul>
<b>Action</b>	Modify the configuration.
<b>20160108</b>	<b>Invalid response length</b>
<b>Explanation</b>	The reply is shorter than the minimum length.
<b>Action</b>	Check the configuration (see <a href="#">20160107</a> ) or contact Software AG Support.
<b>20160109</b>	<b>Not enough memory for response</b>
<b>Explanation</b>	The Java virtual machine does not provide enough memory to process the response.
<b>Action</b>	Check the configuration (see <a href="#">20160107</a> ) or increase the memory of the JVM.
<b>20160110</b>	<b>Internal version mismatch, received %, expected %d</b>
<b>Explanation</b>	The response returned from CICS does not contain the expected version.
<b>Action</b>	Contact Software AG Support.

<b>20161000</b>	<b>RFE Version not supported</b>
<b>Explanation</b>	The UNIX/Windows components and RPC RFE cannot agree to a valid protocol version.
<b>Action</b>	Verify if UNIX/Windows components and RPC RFE run with supported versions.
<b>20161001</b>	<b>Memory allocation failed</b>
<b>Explanation</b>	Cannot allocate memory in CICS region.
<b>Action</b>	Check CICS log for previous errors and for CICS short-on-storage conditions.
<b>20161003</b>	<b>Cannot take socket connection</b>
<b>Explanation</b>	Error from CICS TCP layer.
<b>Action</b>	Check for TCP-related errors in CICS log or contact Software AG Support.
<b>20161004</b>	<b>Cannot create Socket</b>
<b>Explanation</b>	Error from CICS TCP layer.
<b>Action</b>	Check for TCP-related errors in CICS log or contact Software AG Support.
<b>20161005</b>	<b>Cannot bind Socket</b>
<b>Explanation</b>	Error from CICS TCP layer.
<b>Action</b>	Check for TCP-related errors in CICS log or contact Software AG Support.
<b>20161007</b>	<b>Select Socket failed</b>
<b>Explanation</b>	Error from CICS TCP layer.
<b>Action</b>	Check for TCP-related errors in CICS log or contact Software AG Support.
<b>20161008</b>	<b>Communication timeout exceeded</b>
<b>Explanation</b>	The timeout value configured on UNIX/Windows side has been exceeded.
<b>Action</b>	Check timeout value on UNIX/Windows side or contact Software AG Support.
<b>20161009</b>	<b>Recv Socket failed</b>
<b>Explanation</b>	Error from CICS TCP layer.
<b>Action</b>	Check for TCP-related errors in CICS log or contact Software AG Support.

<b>20161010</b>	<b>Partner closed connection</b>
<b>Explanation</b>	This is not an error. It indicates that the UNIX/Windows component closed the connections.
<b>Action</b>	None.
<b>20161013</b>	<b>Invalid request data</b>
<b>Explanation</b>	RPC RFE received data which does not apply to the expected protocol data.
<b>Action</b>	Configure trace level 3 on UNIX/Windows side to display the data in CICS log.
<b>20161014</b>	<b>Internal: missing data in packet</b>
<b>Explanation</b>	RPC RFE received data which does not apply to the expected protocol data.
<b>Action</b>	Contact Software AG Support.
<b>20161015</b>	<b>Unsupported interface type</b>
<b>Explanation</b>	RPC RFE received data which does not apply to the expected protocol data.
<b>Action</b>	Contact Software AG Support.
<b>20161016</b>	<b>Unsupported request type</b>
<b>Explanation</b>	RPC RFE received data which does not apply to the expected protocol data.
<b>Action</b>	Contact Software AG Support.
<b>20161017</b>	<b>Invalid data %s</b>
<b>Explanation</b>	RPC RFE received data which does not apply to the expected protocol data.  ■ <b>Invalid data: CommArea length less than CommArea data or &gt; 32K</b> Internal data error in protocol  ■ <b>Invalid data: modified data outside defined interface</b> Potential reason: commarea definition of the remote program exceeds the interface definition in IDL.
<b>Action</b>	Contact Software AG Support.

<b>20161018</b>	<b>EXEC CICS %s error, resp=%d resp2=%d</b>
<b>Explanation</b>	Error from executing CICS command.
<b>Action</b>	Check CICS documentation for resp/resp2 of the related CICS command or contact Software AG Support.
<b>20161019</b>	<b>Abend %.4s occurred in program %.8s psw=%s</b>
<b>Explanation</b>	Abnormal end occurred.
<b>Action</b>	Check CICS log for a dump and contact Software AG Support.
<b>20161020</b>	<b>CICS VERIFY error: %.200s</b>
<b>Explanation</b>	Error from executing CICS VERIFY command.
<b>Action</b>	Check for conditions in dynamic message text or contact Software AG Support.
<b>20161021</b>	<b>Error from system function %s errno:%d errno2:0x%4.8X</b>
<b>Explanation</b>	Error from z/OS system function.
<b>Action</b>	Check CICS log for extended error information (errno and errno2) and contact Software AG Support.
<b>20161022</b>	<b>Invalid definition of user task %.4s: %s</b>
<b>Explanation</b>	The user task defined in the EntireX Adapter/RPC Server is not correctly defined in CICS.
<b>Action</b>	Define the user task as CICS task with the program EXXRFECU. See <i>User Transaction Support</i> in the EntireX Adapter documentation.
<b>20161023</b>	<b>Cannot give socket connection</b>
<b>Explanation</b>	Error passing the socket to the defined user task.
<b>Action</b>	Run with trace (set in EntireX Adapter/RPC server). The trace output provides additional error information.
	See
	<ul style="list-style-type: none"> <li>■ <i>Changing the Trace Level Temporarily</i> using the Command Central GUI   Command Line and</li> <li>■ <i>Configuring an RPC Server Instance &gt; Trace Level</i> using the Command Central GUI   Command Line in the RPC Server for CICS Socket Listener documentation</li> <li>■ <i>Adapter Settings</i> in the EntireX Adapter documentation</li> </ul>

<b>20161101</b>	<b>CICS program %s call error, resp=%d resp2=%d</b>
<b>Explanation</b>	Error from executing CICS command LINK.
<b>Action</b>	Check CICS documentation for resp/resp2 of the related CICS command or contact Software AG Support.
<b>20161102</b>	<b>CICS Syncpoint error, resp=%d resp2=%d</b>
<b>Explanation</b>	Error from executing CICS command SYNCPOINT.
<b>Action</b>	Check CICS documentation for resp/resp2 of the related CICS command or contact Software AG Support.
<b>20161103</b>	<b>CICS Rollback error, resp=%d resp2=%d</b>
<b>Explanation</b>	Error from executing CICS command SYNCPOINT ROLLBACK.
<b>Action</b>	Check CICS documentation for resp/resp2 of the related CICS command or contact Software AG Support.
<b>20161104</b>	<b>CICS Put Container %s error, resp=%d resp2=%d</b>
<b>Explanation</b>	Error from executing CICS command PUT CHANNEL.
<b>Action</b>	Check CICS documentation for resp/resp2 of the related CICS command or contact Software AG Support.
<b>20161105</b>	<b>CICS Get Container %s error, resp=%d resp2=%d</b>
<b>Explanation</b>	Error from executing CICS command GET CHANNEL.
<b>Action</b>	Check CICS documentation for resp/resp2 of the related CICS command or contact Software AG Support.
<b>20161106</b>	<b>CICS Call Container %s error, resp=%d resp2=%d</b>
<b>Explanation</b>	Error from executing CICS command LINK CHANNEL.
<b>Action</b>	Check CICS documentation for resp/resp2 of the related CICS command or contact Software AG Support.

# 59

## Message Class 2023 - Connections to ApplinX

---

This message class contains messages that can occur with ApplinX Connections in the EntireX Adapter. The messages have the format:

2023*nnnn*

where 2023 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>20230001</b>	<b>Process request and reply: illegal action &lt;number indicating action&gt;.</b>
<b>Explanation</b>	During request/reply processing the next action is illegal in the current state.
<b>Action</b>	Contact Software AG Support.
<b>20230009</b>	<b>&lt;Exception with detailed message &gt;</b>
<b>Explanation</b>	An exception occurred while formatting the message. In most cases, the reason is an inconsistency in metadata.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20230010</b>	<b>Compression=off not possible</b>
<b>Explanation</b>	An RPC with compression "0" ("off") is not supported.
<b>Action</b>	Change compression to 1 or 2.

<b>20230012</b>	<b>&lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	This exception occurs in message processing.
<b>Action</b>	See detailed message and contact Software AG Support.
<b>20230013</b>	<b>Preparing message failed, see log for details or Message received from server does not fit buffer</b>
<b>Explanation</b>	There are two possible reasons for this error code:  <ol style="list-style-type: none"><li>1. Marshalling of message failed before sending to CICS ECI.</li><li>2. The received message does not have the expected layout and the values cannot be unmarshalled from it.</li></ol>
<b>Action</b>	Check the following metadata for consistency or contact Software AG Support:  <ul style="list-style-type: none"><li>■ IDL file, see <i>Software AG IDL File</i> in the IDL Editor documentation in the IDL Editor documentation.</li><li>■ Server mapping file. A server mapping file is a Designer file with extension .cvm. See <i>Server Mapping Files for COBOL</i> in the Designer documentation.</li><li>■ Adapter connections.</li></ul> Details can be found in wmentirex.log with trace level 2.
<b>20230015</b>	<b>Transformation error on request: &lt;Exception with detailed message&gt;.</b>
<b>Explanation</b>	This data type is not supported.
<b>Action</b>	See detailed message or contact Software AG Support.
<b>20230022</b>	<b>Unsupported command &lt;command&gt;. or Exception: &lt;Exception with detailed message&gt;</b>
<b>Explanation</b>	There are two possible reasons for this error code:  <ol style="list-style-type: none"><li>1. An unknown internal command is used.</li><li>2. An exception occurred during action processing. The log files contain a stack trace.</li></ol>
<b>Action</b>	See detailed message and log files or contact Software AG Support.

# 60

## Message Class 3000 - NetWeaver XI Adapter

---

When the sender adapter detects an error situation it returns an RPC message to the RPC client application. All errors returned by the adapter use message class 3000.

The messages have the format:

3000*nnnn*

where 3000 is the message class, and

*nnnn* is the message number in the range 0000 - 9999.

**30000001**

### **Processing RPC request from client failed**

**Explanation**

During the processing of the RPC request from a client an exception occurred. The message text is the text of the exception.

**Action**

Check the error message for details. Typical situations are

1. The RPC request cannot be converted into a PI message, or
2. PI returned an error response.

**30000002**

### **Listening for an RPC request from client failed**

**Explanation**

An exception occurred while the adapter was waiting for an RPC request or while it was analyzing a request received from a client. The message text is the text of the exception.

**Action**

Check the error message for details.

<b>30000003</b>	<b>Multiple channels configured for {program}</b>
<b>Explanation</b>	There are multiple specific channel configurations for the same program name in PI.
<b>Action</b>	Correct the channel configurations in PI.
<b>30000004</b>	<b>Multiple generic channels configured</b>
<b>Explanation</b>	There are multiple generic channel configurations (Processing Type=Process all Programs) for the same RPC server address in PI.
<b>Action</b>	Correct the channel configurations in PI.
<b>30000005</b>	<b>No channel configuration found for {program}</b>
<b>Explanation</b>	No channel configuration can be found for the program name specified in the RPC client request.
<b>Action</b>	Correct the RPC client application or specify a channel configuration in PI for this program.
<b>30000006</b>	<b>XMM file of channel {channel} has no definition for {program}</b>
<b>Explanation</b>	A generic channel configuration is available but the XMM file does not contain an entry for the program name specified in the RPC client request.
<b>Action</b>	Correct the RPC client application or the channel configuration in PI.
<b>30000007</b>	<b>Unknown RPC server command {cmd}</b>
<b>Explanation</b>	The adapter received an unknown server command from the RPC client.
<b>Action</b>	Check the RPC client.
<b>30000008</b>	<b>Invalid RPC call with type {type}</b>
<b>Explanation</b>	The adapter received a request type from the RPC client.
<b>Action</b>	Check the RPC client.
<b>30000009</b>	<b>Conversational RPC not possible</b>
<b>Explanation</b>	The adapter received a conversational RPC request type from the client. The adapter does not support conversational RPC.
<b>Action</b>	Correct your RPC client application so that it does not use conversational RPC.

<b>30000010</b>	<b>Program {programName} in lib {libraryName} cannot be used with QoS {qos}</b>
<b>Explanation</b>	The adapter received an RPC request type from the client which contained OUT or INOUT parameters. Only RPC requests with IN parameters can be processed for Quality of Service "Exactly Once" (EO) or "Exactly Once in Order" (EOIO).
<b>Action</b>	Correct your RPC client application so that it uses only IN parameters. Or reconfigure the Communication Channel with Quality of Service "Best Effort" (BE).
<b>30000011</b>	<b>Duplicate Sender Agreement for program/interface {programName} found</b>
<b>Explanation</b>	More than one Sender Agreement has been found with the same interface name for the mentioned program.
<b>Action</b>	Change the Sender Agreements so that only one Sender Agreement with the same interface name exists for every Communication Channel.
<b>30000012</b>	<b>No Sender Agreement for program/interface {programName} found</b>
<b>Explanation</b>	No Sender Agreement has been found for the mentioned program.
<b>Action</b>	If the parameter Processing Type has the value Process a specific Program, define a Sender Agreement for the Communication Channel. If the parameter has the value Process all Programs, define a Sender Agreement for the mentioned program where the interface name is identical to the program name.
<b>30000013</b>	<b>First parameter has incorrect format for external Message ID: {message}</b>
<b>Explanation</b>	The parameter First Parameter of RPC Program is used as Message ID has been selected in the Communication Channel. This parameter does not have the correct format. For details see the error message. Most likely the first parameter is not declared with the type A36.
<b>Action</b>	Correct the definition of the first parameter or deselect the parameter in the Communication Channel.
<b>30000014</b>	<b>Program {programName} in lib libraryName cannot be used with Reliable RPC</b>
<b>Explanation</b>	The RPC client is sending a Reliable RPC call to a Communication Channel which is using "EntireX RPC" as the message protocol.
<b>Action</b>	Either change the client so it uses standard RPC, or set the message protocol in the Communication Channel to "EntireX Reliable RPC".

**30000015**            **Program {programName} in lib {libraryName} can only be used with Reliable RPC**

**Explanation**        The RPC client is sending a standard RPC call to a Communication Channel which is using "EntireX Reliable RPC" as the message protocol.

**Action**              Either change the client so it uses Reliable RPC, or set the message protocol in the Communication Channel to "EntireX RPC".

# 61 Message Class 4000 - EntireX Process Extractor

---

This message class contains messages that can occur with EntireX Process Extractor. The messages have the format:

4000*nnnn*

where 4000 is the message class, and

*nnnn* is the message number in the range 0000 - 9999

<b>40000001</b>	<b>Exception during processing call: &lt;exception text&gt;</b>
<b>Explanation</b>	An unexpected error occurred during processing of a call from an RPC client or server.
<b>Action</b>	Check the exception text for details.
<b>40000013</b>	<b>Character set for &lt;character set type&gt; not available</b>
<b>Explanation</b>	No character set is available for an RPC call.
<b>Action</b>	Contact Software AG Support.
<b>40000014</b>	<b>Encoding LS=&lt;char set name&gt; not supported</b>
<b>Explanation</b>	The specified character set is not available. Only character sets supported by the Java JVM can be used.
<b>Action</b>	Change the configuration of the RPC client or server.

**40000015**

**<error message>**

**Explanation**

An error during character set conversion.

**Action**

See error message for details.

**40000017**

**<detail message>**

**Explanation**

An error occurred on the connection from EntireX Process Extractor to the broker.

**Action**

See error message for details. Check whether the broker is running and whether the connection from EntireX Process Extractor is available.

# 62 Message Class ETBD - Broker Log and Console - Diagnostic Messages

---

This page explains diagnostic messages from the EntireX Broker Log and Console. These messages have the format:

ETBD $nnnn$

where ETBD is the message class, and

$nnnn$  is the message number in the range 0000-9999

<b>ETBD0280</b>	<b>Function Entered</b>
<b>Explanation</b>	This message is written to the log data set when tracing is set to a trace level greater than 1. An EntireX Broker internal function module is entered.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0281</b>	<b>Cleaned Up:</b>
<b>Explanation</b>	This message is written to the log data set from the TOM task when tracing is set to a trace level greater than 0. Resources used internally (CCBs, PCBs and SCBs) are made available again for reuse.
<b>Action</b>	This message is for diagnostic purposes only.

<b>ETBD0282</b>	<b>SPFX Values:</b>
<b>Explanation</b>	This message is written to the log data set from the worker tasks when tracing is set to any trace level greater than 0. It reports the incoming and outgoing calls to EntireX Broker.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0283</b>	<b>EntireX Broker Memory Pool Allocations:</b>
<b>Explanation</b>	This message is written to the log data set from the EntireX Broker main task for any trace level including level 0. It provides addresses and lengths for all memory pools allocated during Broker initialization processing.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0284</b>	<b>Sizes of Broker Memory Pool</b>
<b>Explanation</b>	This message is written to the log data set from the EntireX Broker for any trace level including level 0. It provides the length of the virtual memory to be allocated during initialization processing and is divided into several parts, each part concerning a Broker-related object such as conversations or messages.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0285</b>	<b>***** NEW REQUEST *****</b>
<b>Explanation</b>	This message is written to the log data set from the worker tasks when tracing is set to any trace level greater than 1. At this point, the trace for a new call to EntireX Broker begins.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0286</b>	<b>Diagnostic Value</b>
<b>Explanation</b>	This message is used as header line for various diagnostic messages.
<b>Action</b>	None.
<b>ETBD0287</b>	<b>EntireX Broker Startup Attributes:</b>
<b>Explanation</b>	This message provides information about the global attributes read from the Broker attribute file. It is written to the log data set from the EntireX Broker for any trace level including Level 0.
<b>Action</b>	This message is for diagnostic purposes only.

<b>ETBD0288</b>	<b>Function completed</b>
<b>Explanation</b>	Diagnostic output.
<b>Action</b>	None.
<b>ETBD0289</b>	<b>%s</b>
<b>Explanation</b>	These are messages of the exception handler and provide information about an abnormal error.
<b>Action</b>	Contact Software AG Support.
<b>ETBD0295</b>	<b>Signal received!</b>
<b>Explanation</b>	An abnormal error has occurred. The process ID and the signal number are written to the Broker error log.
<b>Action</b>	Contact Software AG Support.
<b>ETBD0296</b>	<b>Additional Information</b>
<b>Explanation</b>	This is the first message after error messages that require additional diagnostic data (for example, for any security violations). It is written to the EntireX Broker log file for any trace level including level 0.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0297</b>	<b>ETB_SHUTDOWN semaphore posted</b>
<b>Explanation</b>	The shutdown semaphore has been posted. The broker kernel will shut down.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0298</b>	<b>Exit Message</b>
<b>Explanation</b>	A messages with this number is issued by a user exit, and the meaning of the message depends on the context of the exit that issued it.
<b>Action</b>	Depends on exit that issued the message.
<b>ETBD0303</b>	<b>Command logging file information</b>
<b>Explanation</b>	Information on a z/OS command logging output file is displayed.
<b>Action</b>	This message is for diagnostic purposes only.

<b>ETBD0324</b>	<b>CLOG file 1 is now ready to be copied</b>
<b>Explanation</b>	The first command logging output file (DD:CLOGR1 on z/OS) has been closed and can be copied for examination. The second command logging output file (DD:CLOGR2 on z/OS) is now the active output file.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0325</b>	<b>CLOG file 2 is now ready to be copied</b>
<b>Explanation</b>	The second command logging output file (DD:CLOGR2 on z/OS) has been closed and can be copied for examination. The first command logging output file (DD:CLOGR1 on z/OS) is now the active output file.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0353</b>	<b>Contents of ICU data directory:</b>
<b>Explanation</b>	The contents of the ICU data directory are listed.
<b>Action</b>	None.
<b>ETBD0436</b>	<b>Service attributes</b>
<b>Explanation</b>	This provides information on service attributes and is written to the log when tracing is set to any trace level greater than 4.
<b>Action</b>	None.
<b>ETBD0442</b>	<b>RESTART: Processing starting</b>
<b>Explanation</b>	This informs the Administrator about the start of the persistent store restore processing.
<b>Action</b>	None.
<b>ETBD0443</b>	<b>RESTART: Processing finished</b>
<b>Explanation</b>	This informs the Administrator about the finished restore processing of the persistent store.
<b>Action</b>	None.
<b>ETBD0444</b>	<b>Shutdown Statistics:</b>
<b>Explanation</b>	This message is written to the log data set when the Broker shuts down after a successful execution. Shutdown statistics and other information are written directly following this message in the log.
<b>Action</b>	This message is for diagnostic purposes only.

<b>ETBD0518</b>	<b>EntireX Broker ADABAS Attributes:</b>
<b>Explanation</b>	This message provides information on all DEFAULTS=ADABAS attributes configured for the Adabas PSTORE.
<b>Action</b>	None.
<b>ETBD0519</b>	<b>EntireX Broker c-tree Attributes:</b>
<b>Explanation</b>	This message provides information on all DEFAULTS=CTREE attributes configured for the c-tree PSTORE.
<b>Action</b>	None.
<b>ETBD0520</b>	<b>EntireX Broker DIV Attributes:</b>
<b>Explanation</b>	This message provides information on all DEFAULTS=DIV attributes configured for the DIV PSTORE.
<b>Action</b>	None.
<b>ETBD0552</b>	<b>EntireX Broker SSL Attributes</b>
<b>Explanation</b>	This message provides information on all DEFAULTS=SSL attributes configured for the SSL communicator.
<b>Action</b>	None.
<b>ETBD0553</b>	<b>EntireX Broker NET Attributes:</b>
<b>Explanation</b>	This message provides information on all DEFAULTS=NET attributes configured for the NET communicator.
<b>Action</b>	None.
<b>ETBD0556</b>	<b>Thread [re]started</b>
<b>Explanation</b>	This message informs the Administrator about the start of a Broker thread. This message is written to the log when tracing is set to any trace level greater than 0.
<b>Action</b>	None.
<b>ETBD0557</b>	<b>Thread stopped</b>
<b>Explanation</b>	This message informs the Administrator about the stop of a Broker thread. This message is written to the log when tracing is set to any trace level greater than 0.
<b>Action</b>	None.

<b>ETBD0560</b>	<b>EntireX Broker TCP/IP Attributes</b>
<b>Explanation</b>	This message provides information on all DEFAULTS=TCP attributes configured for the TCP/IP communicator.
<b>Action</b>	None.
<b>ETBD0565</b>	<b>z/VSE operating system information</b>
<b>Explanation</b>	z/VSE operating system information is displayed.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0658</b>	<b>EntireX Broker Memory Pool Settings:</b>
<b>Explanation</b>	This message is written to the log data set from the EntireX Broker main task for any trace level including level 0. It provides a summary of pools scheduled for allocation and the number of slots per pool.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0665</b>	<b>EntireX Broker AUTH-RULES Attributes:</b>
<b>Explanation</b>	This message provides information on AUTHORIZATION-RULES attributes.
<b>Action</b>	None.
<b>ETBD0672</b>	<b>Broker Memory Pool Deallocation:</b>
<b>Explanation</b>	This message is written to the log data set from the EntireX Broker main task for any trace level including level 0. It provides addresses and lengths for all memory pools deallocated during Broker termination processing.
<b>Action</b>	This message is for diagnostic purposes only.
<b>ETBD0677</b>	<b>RESTART: PSTORE rebuild started</b>
<b>Explanation</b>	The persistent store was not properly finalized. The restart procedure detected an inconsistency that needs to be repaired. The rebuild procedure was just started to re-create the affected files.
<b>Action</b>	No action required.
<b>ETBD0678</b>	<b>RESTART: PSTORE rebuild stopped</b>
<b>Explanation</b>	The rebuild procedure was stopped.
<b>Action</b>	No action required.

<b>ETBD0665</b>	<b>EntireX Broker AUTH-RULES Attributes:</b>
<b>Explanation</b>	This message provides information on AUTHORIZATION-RULES attributes.
<b>Action</b>	None.
<b>ETBD0694</b>	<b>EntireX Broker SECURITY Attributes:</b>
<b>Explanation</b>	This message provides information on SECURITY attributes.
<b>Action</b>	None.
<b>ETBD0735</b>	<b>Unload Object</b>
<b>Explanation</b>	This message informs the Administrator about the unload of a persistent store record. This message is written to the log when tracing is set to any trace level greater than 0.
<b>Action</b>	None.
<b>ETBD0736</b>	<b>Upload Object</b>
<b>Explanation</b>	This message informs the Administrator about the upload of a persistent store record. This message is written to the log when tracing is set to any trace level greater than 0.
<b>Action</b>	None.
<b>ETBD0943</b>	<b>AppMon string:</b>
<b>Explanation</b>	The application monitoring data is displayed.
<b>Action</b>	None.

# 63

## Message Class ETBE - Broker Log and Console - Error

### Messages

---

This document explains EntireX Broker Log and Console Messages. These messages have the format:

ETBE $nnnn$

where ETBE is the message class, and

$nnnn$  is the message number in the range 0000-9999

**ETBE0001            SECURITY: Failed to load user exit**

**Explanation**        EntireX broker was unable to load the security exit. Broker tries to load the security exit only if SECURITY=YES is defined in the attribute file.

**Action**                Either do not specify the SECURITY=YES in the attribute file, or make the security exit available.

**ETBE0013            Value For Keyword Too Long**

**Explanation**        The specified value for a correct keyword in a configuration file (for instance the broker attribute file) has too many characters. This response arises in the following situations:

1. During broker startup when the global resources defined in the section DEFAULTS=BROKER are read, a wrong value length is detected within this section. The broker cannot be started.
2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, a wrong value length is detected within this service definition. The service cannot be registered.

**Action**                Correct the value assigned to the keyword in the configuration file.

<b>ETBE0014</b>	<b>Class def missing or invalid</b>
<b>Explanation</b>	The definition of a server class is either missing or invalid.
<b>Action</b>	Either specify a class definition or use the correct values to specify one.
<b>ETBE0015</b>	<b>Max Possible NUM-CLIENT Reached</b>
<b>Explanation</b>	This is a temporary resource shortage. The maximum number of broker clients that can be active at one time is reached. A new client cannot be handled until client resources are available again by user timeouts.
<b>Action</b>	Increase NUM-CLIENT (or if CLIENT-NONACT has too high a value, decrease it) in the broker attribute file.
<b>ETBE0018</b>	<b>Max Possible NUM-SERVER Reached</b>
<b>Explanation</b>	This is a temporary resource shortage. The maximum number of broker servers that can be active at one time is reached. New servers are not accepted until server resources are available again, either by deregistrations or user timeouts.
<b>Action</b>	Try to register the server to the broker later. If the error occurs frequently, increase NUM-SERVER (or if SERVER-NONACT has too high a value for some services, decrease it) in the broker attribute file.
<b>ETBE0019</b>	<b>TRANSLATION Not Specified</b>
<b>ETBE0023</b>	<b>Unknown keyword</b>
<b>Explanation</b>	<p>A given keyword in a configuration file (for instance the broker attribute file) is not known by the broker. This response arises in the following situations:</p> <p>A given keyword in the configuration file is not known by the broker. This response arises in the following situations:</p> <ol style="list-style-type: none"><li>1. During broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, a wrong keyword is detected within this section. The broker cannot be started.</li><li>2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, a wrong keyword is detected within this service definition. The service cannot be registered.</li></ol>
<b>Action</b>	Correct or remove the keyword in the configuration file as appropriate.

<b>ETBE0024</b>	<b>CONV-LIMIT may not be UNLIM</b>
<b>Explanation</b>	The service-specific CONV - LIMIT value is specified with UNLIM. In this special configuration, this is not allowed because the global NUM - CONVERSATION attribute is set to AUTO. See also <i>Broker Resource Allocation</i> .
<b>Action</b>	Either change the global NUM - CONVERSATION parameter to a defined value, or change the specific CONV - LIMIT value to a particular value.
<b>ETBE0025</b>	<b>CONV-DEFAULT not spec or UNLIM</b>
<b>Explanation</b>	The global CONV_DEFAULT attribute is either specified as UNLIM or not specified at all. The error occurs in situations where EntireX Broker cannot calculate the number of conversations needed. This situation occurs if <ul style="list-style-type: none"> <li>■ NUM - CONVERSATION= AUTO and CONV - DEFAULT= UNLIM and there is at least one service that does not assign CONV - LIMIT, or</li> <li>■ NUM - CONVERSATION= AUTO and CONV - DEFAULT is undefined and there is at least one service that does not assign CONV - LIMIT.</li> </ul>
<b>Action</b>	Correct the error in the attribute file. Define NUM - CONVERSATION with a particular value or define CONV - DEFAULT with a particular value or use the CONV - LIMIT attribute for every single service definition.
<b>ETBE0026</b>	<b>Zero Value For Keyword Not Allowed</b>
<b>Explanation</b>	The specified value for a correct keyword in a configuration file (for instance the broker attribute file) must not be zero or null value. This response arises in the following situations: <ol style="list-style-type: none"> <li>1. During broker startup, when the global resources defined in the section DEFAULTS= BROKER are read, a value of zero or null is detected for a value within this section. The broker cannot be started.</li> <li>2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS= SERVICE section is read, a value of zero or null is detected within this service definition. The service cannot be registered.</li> </ol>
<b>Action</b>	Correct the value assigned to the keyword in the configuration file.
<b>ETBE0027</b>	<b>Value For Keyword Out Of Range</b>
<b>Explanation</b>	The specified value for a correct keyword in a configuration file (for instance the broker attribute file) is out of range. This response arises in the following situations: <ol style="list-style-type: none"> <li>1. During broker startup when the global resources defined in the section DEFAULTS= BROKER are read, the wrong value is detected for a value within this section. The broker cannot be started.</li> </ol>

2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, a wrong value is detected within this service definition. The service cannot be registered.

**Action** Correct the value assigned to the keyword in the configuration file.

**ETBE0028 Invalid Value For Keyword**

**Explanation** The specified value for a correct keyword in a configuration file (for instance the broker attribute file) is wrong. This response arises in the following situations:

1. During broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, a wrong value is detected for a value within this section. The broker cannot be started.
2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, a wrong value is detected within this service definition. The service cannot be registered.

**Action** Correct the value assigned to the keyword in the configuration file.

**ETBE0029 SHORT-BUFF-LIMIT may not be UNLIM**

**Explanation** The service-specific SHORT - BUFF - LIMIT value is specified with UNLIM. In this special configuration this is not allowed because the global NUM - SHORT - BUFFER attribute is set to AUTO. See also *Broker Resource Allocation*.

**Action** Either change the global NUM - SHORT - BUFFER parameter to a defined value, or change the specific SHORT - BUFF - LIMIT value to a particular value.

**ETBE0030 SHORT-BUFF-DEF not spec or UNLIM**

**Explanation** The global SHORT - BUFF - DEF attribute is either specified as UNLIM or not specified at all. The error occurs in situation where EntireX Broker cannot calculate the number of short buffers needed. This situation occurs if

- NUM - SHORT - BUFFER=AUTO and NUM - SHORT - DEF=UNLIM and there is at least one service that does not assign SHORT - BUFF - LIMIT, or
- NUM - SHORT - BUFFER=AUTO and NUM - SHORT - DEF is undefined and there is at least one service that does not assign SHORT - BUFF - LIMIT.

**Action** Correct the error in the attribute file. Define NUM - SHORT - BUFFER with a particular value or define NUM - SHORT - DEF with a particular value or use the SHORT - BUFF - LIMIT attribute for every single service definition.

<b>ETBE0032</b>	<b>LONG-BUFF-LIMIT may not be UNLIM</b>
<b>Explanation</b>	The service-specific LONG-BUFF-LIMIT value is specified with UNLIM. In this special configuration, this is not allowed because the global NUM-LONG-BUFFER attribute is set to AUTO.
<b>Action</b>	Either change the global NUM-LONG-BUFFER parameter to a defined value, or change the specific SHORT-LONG-LIMIT value to a particular value.
<b>ETBE0033</b>	<b>LONG-BUFF-DEF not spec or UNLIM</b>
<b>Explanation</b>	The global LONG-BUFF-DEF attribute is either specified as UNLIM or not specified at all. The error occurs in situation where EntireX Broker cannot calculate the number of long buffers needed. This situation occurs if <ul style="list-style-type: none"> <li>■ NUM-LONG-BUFFER=AUTO and NUM-LONG-DEF=UNLIM and there is at least one service that does not assign LONG-BUFF-LIMIT, or</li> <li>■ NUM-LONG-BUFFER=AUTO and NUM-LONG-DEF is undefined and there is at least one service that does not assign LONG-BUFF-LIMIT</li> </ul>
<b>Action</b>	Correct the error in the attribute file. Define NUM-LONG-BUFFER with a particular value or define NUM-LONG-DEF with a particular value or use the LONG-BUFF-LIMIT attribute for every single service definition.
<b>ETBE0034</b>	<b>SERVICE</b>
<b>Explanation</b>	The DEFAULTS=SERVICE section in the attribute file could not be found.
<b>Action</b>	Correct the broker attribute file and provide a valid DEFAULTS=SERVICE section. See <i>Service-specific Attributes</i> .
<b>ETBE0035</b>	<b>Duplicate Value Found</b>
<b>Explanation</b>	A duplicate keyword has been detected in a configuration file (for example the broker attribute file). This response arises in the following situations: <ol style="list-style-type: none"> <li>1. During broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, duplicate keywords are detected within this section. The broker cannot be started.</li> <li>2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, duplicate keywords are detected within this service definition. The REGISTER request is refused.</li> </ol>
<b>Action</b>	Eliminate the duplicate keyword in the broker attribute file.

<b>ETBE0036</b>	<b>Unknown service attribute</b>
<b>Explanation</b>	An unknown attribute definition was found. Refer to the entry in the log file to find the line and the column where this error occurred.
<b>Action</b>	Correct the broker attribute file and provide valid attribute definitions. See <i>Service-specific Attributes</i> .
<b>ETBE0037</b>	<b>Value must be YES or NO</b>
<b>Explanation</b>	The valid values for this attribute are YES or NO only. Refer to the entry in the log file to find the line and the column where the error occurred.
<b>Action</b>	Correct the attribute file and select either YES or NO for the attribute where the error happened
<b>ETBE0038</b>	<b>Error During Open Of File</b>
<b>Explanation</b>	A configuration file (for instance the broker attribute file) cannot be accessed. This response arises in the following situations: <ol style="list-style-type: none"><li>1. During broker startup, when the global resources defined in the section DEFAULTS=BROKER are read, the broker cannot be started.</li><li>2. When a server tries to register with EntireX Broker and the service definition from the DEFAULTS=SERVICE section is read, this service cannot be used.</li></ol>
<b>Action</b>	Contact administrator or check for the following causes: <ol style="list-style-type: none"><li>1. No configuration file is allocated to the broker.</li><li>2. The specified configuration file does not exist.</li><li>3. The broker has no access to the configuration file, for example for security reasons, or the configuration file is enqueued by another process.</li><li>4. The configuration file has an invalid format for the platform used. Refer to the appropriate Installation documentation.</li></ol>
<b>ETBE0039</b>	<b>Env Var ETB_ATTR not set</b>
<b>Explanation</b>	This message is issued during broker startup. The environment variable ETB_ATTR is not set. The broker attribute file cannot be accessed.
<b>Action</b>	The environment variable ETB_ATTR must contain the path and file name of the broker attribute file to get startup parameters and the Service definitions. ETB_ATTR is set by the broker startup shell script. Check the assignment of ETB_ATTR.

<b>ETBE0040</b>	<b>Error During Close Of File</b>
<b>Explanation</b>	A configuration file (for instance the broker attribute file) cannot be accessed. This response arises in the following situations: <ol style="list-style-type: none"> <li>1. During broker startup, when the global resources defined in the section <code>DEFAULTS=BROKER</code> are read, the broker cannot be started.</li> <li>2. When a server tries to register with the broker and the service definition from the <code>DEFAULTS=SERVICE</code> section is read, this service cannot be used.</li> </ol>
<b>Action</b>	<ul style="list-style-type: none"> <li>■ Check all causes listed under error ETBE0038.</li> <li>■ Then ensure that no other process has changed the file characteristics of the configuration file.</li> </ul>
<b>ETBE0043</b>	<b>Service Definition Not Found</b>
<b>Explanation</b>	The broker did not find the service definition within the attribute file when a service attempted to register
<b>Action</b>	Check the service specified in the <code>CLASS</code> , <code>SERVER</code> and <code>SERVICE</code> fields in the API, or make sure the service definition in the broker attribute file is valid.
<b>ETBE0045</b>	<b>Keyword Value Must Be Numeric</b>
<b>Explanation</b>	The specified value for a correct keyword in a configuration file (for instance the broker attribute file) is wrong, that is, not alphanumeric. This response arises in the following situations: <ol style="list-style-type: none"> <li>1. During broker startup, when the global resources defined in the section <code>DEFAULTS=BROKER</code> are read, a wrong value is detected for a value within this section. The broker cannot be started.</li> <li>2. When a server tries to register with EntireX Broker and the service definition from the <code>DEFAULTS=SERVICE</code> section is read, a wrong value is detected within this service definition. The service cannot be registered.</li> </ol>
<b>Action</b>	Correct the value assigned to the keyword in the configuration file.
<b>ETBE0053</b>	<b>Global Broker Attribute Missing</b>
<b>Explanation</b>	A mandatory keyword in the broker attribute file is missing. This response arises in the following situation: During broker startup, when the global resources defined in the section <code>DEFAULTS=BROKER</code> are read, a keyword is missing in this section. The broker cannot be started.
<b>Action</b>	Insert the missing keyword in the broker attribute file.

<b>ETBE0054</b>	<b>BROKER section missing</b>
<b>Explanation</b>	During broker startup, the section <code>DEFAULTS=BROKER</code> with the global resources was not found in the broker attribute file. The broker cannot be started.
<b>Action</b>	Define the section <code>DEFAULTS=BROKER</code> in the broker attribute file.
<b>ETBE0056</b>	<b>Parameter processing error</b>
<b>Explanation</b>	During broker startup, an error was detected in a configuration file parameters (for instance in the broker attribute file).
<b>Action</b>	Examine the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0058</b>	<b>Failed To Get Memory From OS</b>
<b>Explanation</b>	The requested store needed by the definitions made along with the attributes in the section <code>DEFAULTS=BROKER</code> in the broker attribute file is not available from the operating system.
<b>Action</b>	Increase the storage available to the EntireX Broker from the operating system or, if possible, decrease the defined resources in the section <code>DEFAULTS=BROKER</code> in the broker attribute file. The amount of storage required is given by message 0284.
<b>ETBE0061</b>	<b>Shortage For NUM-LONG-BUFFER</b>
<b>Explanation</b>	This is a resource shortage. Currently, no long message containers are available. Long message containers are used for data/messages longer than 2048 bytes.
<b>Action</b>	Because this is a temporary resource shortage, it makes sense to try the <code>SEND</code> call later in hope that the resource shortage is over. Be careful not to have a loop programmed in this situation. If this occurs frequently, increase the number of long message containers defined in the section <code>DEFAULTS=BROKER</code> with the keyword <code>NUM-LONG-BUFFER</code> .
<b>ETBE0063</b>	<b>Failed To Start Worker Task</b>
<b>Explanation</b>	The broker dispatcher has failed to start a worker task. This can occur during broker startup. The broker is active if at least one worker task can be started.
<b>Action</b>	Check that the setting of <code>NUM-WORKER</code> in the broker attribute file is not too high for the platform. Examine the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.

<b>ETBE0065</b>	<b>WQEs Lost</b>
<b>Explanation</b>	The broker has problems distributing the work to the worker tasks.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0069</b>	<b>NUM-LONG-BUFFER Available Again</b>
<b>Explanation</b>	This message is issued when the resource shortage in the long message container is over. You may find an ETBE0061 error message in the log data set denoting the start of the resource shortage.
<b>Action</b>	None. This message is informational only.
<b>ETBE0071</b>	<b>NUM-SHORT-BUFFER Available Again</b>
<b>Explanation</b>	This message is issued when the resource shortage in the short message container is over. You may find a 0057; error message in the log data set denoting the start of the resource shortage.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBE0075</b>	<b>TRANS: Failed To Load Routine</b>
<b>Explanation</b>	The user exit that performs translation services could not be loaded. The translation routine for the service is specified by the TRANSLATION parameter for the service in the attribute file. The routine is loaded during RECEIVE calls to the broker.
<b>Action</b>	Check the log data set for further load failure messages. Possible causes for the failure are: <ul style="list-style-type: none"> <li>1. An incorrect name for the translation routine is specified.</li> <li>2. The translation routine is linked incorrectly.</li> <li>3. The translation routine does not reside in a library accessible by the Broker.</li> </ul>
<b>ETBE0076</b>	<b>No Free OMB - Log Messages Lost</b>
<b>Explanation</b>	While writing a message to the log data set, a resource shortage occurred and the output of a log message is not possible.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0077</b>	<b>Unknown Route Code Detected</b>
<b>Explanation</b>	The broker detected an error while writing a message. Messages are normally routed to the COM task for output.
<b>Action</b>	Contact Software AG Support.

<b>ETBE0078</b>	<b>No OMB Available - Broker Failed</b>
<b>Explanation</b>	The broker detected an error while writing a message. The structure for routing messages to the COM task does not exist or is destroyed. The broker is stopped immediately.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0080</b>	<b>SHUTDOWN DUE TO INITIALIZATION ERROR</b>
<b>Explanation</b>	During broker startup, the EntireX Broker detected an initialization error which causes shutdown.
<b>Action</b>	Examine the output referenced by the <code>SYSPRINT DD</code> statement as well as the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0082</b>	<b>Failed To Start Timeout Manager</b>
<b>Explanation</b>	The broker has failed to start the TOM Task. This situation can occur during broker startup. The broker cannot be started.
<b>Action</b>	Examine the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0083</b>	<b>SYSPRINT FAILED TO OPEN</b>
<b>Explanation</b>	During broker startup, an error was detected attempting to open the data set referenced by the <code>SYSPRINT DD</code> statement. The attempted output from the echo of the broker startup parameters, the persistent store parameters, and the broker attribute file parameters to the data set referenced by the <code>SYSPRINT DD</code> statement failed.
<b>Action</b>	Examine the <code>SYSPRINT DD</code> statement, the broker log data set and the Operating System log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0084</b>	<b>Failed to start Common Output Manager</b>
<b>Explanation</b>	The broker dispatcher has failed to start the Common Output Manager.
<b>Action</b>	Examine the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0086</b>	<b>BROKER STARTUP PARAMETER(S) ERROR</b>
<b>Explanation</b>	During broker startup, at least one error was detected in the EntireX Broker startup parameters.
<b>Action</b>	Examine the output referenced by the <code>SYSPRINT DD</code> statement as well as the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.

<b>ETBE0087</b>	<b>Failed To Open Error Log File</b>
<b>Explanation</b>	The broker detected an error while writing messages to the log data set. This message is issued during broker startup. The broker cannot be started.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0088</b>	<b>Failed To Get Lock</b>
<b>Explanation</b>	This situation occurs when EntireX Broker is busy and internal resources needed to satisfy the call are currently not available.
<b>Action</b>	Retry the call to EntireX Broker. If this occurs frequently, contact Software AG Support.
<b>ETBE0089</b>	<b>Failed To Write Error Log File</b>
<b>Explanation</b>	This message applies to z/OS systems only. EntireX Broker detected an error while writing messages to the log data set. This message is issued at EntireX Broker startup time. The broker cannot be started.
<b>Action</b>	Check the JCL for a missing assignment of the <code>SYSTEM DD</code> statement.
<b>ETBE0090</b>	<b>EntireX Broker is not APF-authorized</b>
<b>Explanation</b>	During broker startup, the EntireX Broker detected that the load libraries are not all APF-authorized in z/OS.
<b>Action</b>	Ensure that all the data sets referenced by the <code>STEPLIB DD</code> statement have been APF-authorized in z/OS. Check the spelling of the data set names for accuracy. Correct any error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0091</b>	<b>EntireX Broker not started under TSOS</b>
<b>Explanation</b>	The EntireX Broker on BS2000 was started with global attribute <code>SECURITY=YES</code> and security attribute <code>ACCESS-SECURITY-SERVER=NO</code> . This mode requires Broker running under TSOS in order to execute privileged security checks.
<b>Action</b>	Start Broker under TSOS.
<b>ETBE0092</b>	<b>Communication Manager Not Stopped</b>
<b>Explanation</b>	The broker has detected a shutdown request, and after telling the COM task to terminate, the COM task has not terminated within an acceptable time limit.
<b>Action</b>	Examine the log data set of EntireX Broker and the operating system log. If the cause cannot be determined, contact Software AG Support.

<b>ETBE0095</b>	<b>Invalid WQE Status Detected</b>
<b>Explanation</b>	An error was detected during the return of the user's EntireX Broker call back to the caller.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0096</b>	<b>Max Possible NUM-SERVICE Reached</b>
<b>Explanation</b>	The maximum number of EntireX Broker services that can be active at one time is reached. A subsequent service register request is not accepted.
<b>Action</b>	Try again later. If this error occurs frequently, increase the NUM-SERVICE attribute in the section DEFAULTS=BROKER in the broker attribute file.
<b>ETBE0106</b>	<b>Security Server not accessible</b>
<b>Explanation</b>	The EntireX Broker on BS2000 was started with global attribute SECURITY=YES and security attribute ACCESS-SECURITY-SERVER=YES. This mode requires that the Broker Security Server has already been started.
<b>Action</b>	Start Broker Security Server and then restart the broker.
<b>ETBE0115</b>	<b>NET: NODE attribute missing</b>
<b>Explanation</b>	Attribute NODE in section DEFAULTS=NET is not defined. However, attribute NODE is necessary to identify the DBID that the broker uses to work as an addressable "target". Extracting the DBID from the numeric section of the BROKER-ID is no longer supported.
<b>Action</b>	Set attribute NODE=dbid.
<b>ETBE0116</b>	<b>Allocation of Communicator pool failed</b>
<b>Explanation</b>	During Broker startup, the shared memory for the Communicator instances could not be allocated. The previous message in the broker error log contains detailed information about the allocation problem.
<b>Action</b>	Check the previous error log message to solve the problem. If the shared memory is already allocated, a message "File exists" is written as the previous log message.
<b>ETBE0117</b>	<b>Level AUTHORIZATION not supported</b>
<b>Explanation</b>	Attribute SECURITY-LEVEL=AUTHORIZATION was specified but is not available on BS2000.
<b>Action</b>	Change value of attribute SECURITY-LEVEL. See SECURITY-LEVEL under <i>Security-specific Broker Attributes</i> .

<b>ETBE0120</b>	<b>Broker Startup Failed</b>
<b>Explanation</b>	Broker startup has failed.
<b>Action</b>	Examine the broker log data set and the operating system log and use the information message in the log data set issued at startup to determine the cause of the error. If you cannot determine the cause, contact Software AG Support.
<b>ETBE0128</b>	<b>Work queue full or alloc XWQE failed</b>
<b>Explanation</b>	The broker was unable to successfully allocate a worker queue entry (WQE) because insufficient entries are available.
<b>Action</b>	Increase the parameter NUM-WQE in the broker attribute file.
<b>ETBE0129</b>	<b>Not enough space in Communication buffer</b>
<b>Explanation</b>	Communication buffer is too small.
<b>Action</b>	Increase size of the communication buffer (NUM-COMBUF) and retry.
<b>ETBE0132</b>	<b>PSI: Parameters not specified</b>
<b>Explanation</b>	During broker startup, the EntireX Broker persistent store parameters were not specified. This is caused by not having SYSIN specified in the startup job.
<b>Action</b>	The EntireX Broker persistent store parameters need to be specified in the input data set referenced by the SYSIN DD statement.
<b>ETBE0133</b>	<b>PSI: Parameter processing error</b>
<b>Explanation</b>	During broker startup, an error was detected in the broker persistent store parameters.
<b>Action</b>	Examine the output referenced by the SYSPRINT DD statement as well as the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0135</b>	<b>Failed to release Attached Buffers</b>
<b>Explanation</b>	This is an internal error and occurs if the buffer manager gets inconsistent data structures.
<b>Action</b>	Contact Software AG Support.

<b>ETBE0146</b>	<b>Access denied by Security Facility</b>
<b>Explanation</b>	The security system has returned an error. The user is not authorized to use EntireX Broker.
<b>Action</b>	A security violation has occurred. This message and the related user ID are written to the broker log.
<b>ETBE0147</b>	<b>No authorization for this Service</b>
<b>Explanation</b>	The security system has returned an error. The user is not authorized to use the requested Service.
<b>Action</b>	A security violation has occurred. This message and the related user ID are written into the broker log.
<b>ETBE0150</b>	<b>EntireX Broker Invalid Operator Command</b>
<b>Explanation</b>	The broker has received an invalid command from the operator console.
<b>Action</b>	This is a user error. Check the operator command specified
<b>ETBE0159</b>	<b>Invalid PS_DATA version</b>
<b>Explanation</b>	An invalid version of persistent data has been detected in Broker.
<b>Action</b>	Set TRACE - LEVEL=4 and rerun application. Contact Software AG Support and provide the log file.
<b>ETBE0161</b>	<b>Broker Version vrsn Initialization Failed</b>
<b>Explanation</b>	The EntireX Broker engine could not start the Dispatcher successfully, or the Dispatcher started but has not reached "Ready for work and active". Notation <i>vrsnn</i> refers to the version, release, SM and patch level, for example 61102 if patch 2 is installed.
<b>Action</b>	Examine the broker log data set and the operating system log. Correct the error and restart the broker. If you cannot determine the cause of the problem, contact Software AG Support.
<b>ETBE0168</b>	<b>This instance of BROKER already running</b>
<b>Explanation</b>	You have attempted to start a Broker that is already running.
<b>Action</b>	None. This message is for information purposes only.

**ETBE0172 Failed to get Attached Buffers**

**Explanation** The broker buffer manager could not allocate memory for the RECEIVE buffer. A detailed error message follows this message.

**Action** Check the next error message line in the EntireX broker error log.

**ETBE0190 API: Invalid Cmd/Info Services Version**

**Explanation** The EntireX Broker kernel does not recognize the Command and Information Services API version requested.

**Action** This is a user error. Please check the following:

- If you are using ETBINFO, ETBCMD or any other Software AG-provided Command and Information Services application: Check that the version of ETBINFO or ETBCMD is the same or earlier than the version of the Broker kernel.
- If you are using your own Command and Information Services application: verify that the Command and Information Services API version will work with the version of EntireX. The following table shows the maximum CIS API version for the respective version of EntireX:

Broker/EntireX Version	Max. CIS API Version
ETB 1 or ETB 2	1
EXX 3, 4, 5, 6	2
EXX 7.1	3
EXX 7.2	4
EXX 7.3	5
EXX 8.0 or 8.1	6
EXX 8.2	7
EXX 9.0, 9.5, 9.6, 9.7, 9.9	8
EXX 9.10, 9.12	9
EXX 10.1, 10.3	10
EXX 10.5	11
EXX 10.7, 10.8	12

- A possible cause for this error is a SEND-LENGTH that is too short. Increase this value if necessary.

<b>ETBE0196</b>	<b>Disconnected Due To New Location</b>
<b>Explanation</b>	This situation occurs only when working with the <code>TOKEN</code> parameter in the API; that is, the user is identified by <code>USER - ID/TOKEN</code> instead of <code>USER - ID/Internal ID</code> . If the user changes the physical location between EntireX Broker calls (e.g., a new session from another terminal), the old session retrieves this response. The new session takes all conversations of the old session.
<b>Action</b>	The program has to be ended.
<b>ETBE0207</b>	<b>STUB: No request or reply buffer</b>
<b>Explanation</b>	This is a problem with the broker stub used by the application. The stub did not send the broker call in the correct internal format.
<b>Action</b>	Check that the broker stub being used is the correct one. Check the log data set for an image of the internal format. Examine this string for the user issuing the call.
<b>ETBE0220</b>	<b>Counter gets negative:</b>
<b>Explanation</b>	One of the internal counters describing the number of used short buffers, long buffers, etc. has become negative.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0223</b>	<b>ERROR FROM USER TRANSLATION</b>
<b>Explanation</b>	This message is written if the user translation or conversion routine has an error. The message indicates active <code>class.name.service</code> and name of the relevant translation or conversion routine.
<b>Action</b>	This is a user error. Check the application, locale string assigned and designated translation or conversion exit. Correct the error.
<b>ETBE0224</b>	<b>POST / WAIT error occurred</b>
<b>Explanation</b>	The internal communication between Broker processes has failed. This is a hard error. The previous message line in the broker error log contains additional error information.
<b>Action</b>	The error must be solved to get the broker running properly. A restart of the broker could be required.
<b>ETBE0231</b>	<b>ICULIB: Initialization failed</b>
<b>Explanation</b>	The initialization of ICU failed due to an error.
<b>Action</b>	Check preceding messages for details of the ICU initialization error.

<b>ETBE0232</b>	<b>PSI: Query release failed</b>
<b>Explanation</b>	Resources obtained for a Command and Info Services query cannot be released.
<b>Action</b>	Contact Software AG Support
<b>ETBE0236</b>	<b>ABEND flagged, go down now</b>
<b>Explanation</b>	The broker has terminated abnormally.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0240</b>	<b>Error in ENCRYPTION/DECRYPTION exit</b>
<b>Explanation</b>	An error has occurred within the security exit, either explicitly returned by the exit function, or implicitly by overwriting the buffer maximum length.
<b>Action</b>	Check the implementation of the security exit. Also check whether the application has sufficient permission to perform the desired operation.
	<b>Note:</b> For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.
<b>ETBE0242</b>	<b>Error in LOGOFF exit</b>
<b>Explanation</b>	An error occurred during the invocation of the LOGOFF exit.
<b>Action</b>	Check the behavior of your security exit.
<b>ETBE0261</b>	<b>No free participant entry</b>
<b>Explanation</b>	The broker has detected an error while searching for a free PCB entry. There is no PCB entry available.
<b>Action</b>	Increase NUM-SERVER and/or NUM-CLIENT.
<b>ETBE0265</b>	<b>No free service entry</b>
<b>Explanation</b>	The broker has detected an error while searching for a free SCB (Service Control Block) entry. There is no SCB entry available. The number of SCBs is set based upon the number of clients, servers, and services. When this error is returned, it means that all of the SCBs are in use. The current formula for the number of SCBs is: NUM-CLIENT + NUM-SERVER + NUM-SERVICE + 5.
<b>Action</b>	Recommendations: <ul style="list-style-type: none"> <li>■ Increase NUM-SERVICE.</li> <li>■ Increase NUM-SERVER.</li> <li>■ Increase NUM-CLIENTS.</li> </ul> <p>Increasing the values will increase the total number of SCBs.</p>

To free up the idle SCBs sooner:

- Decrease CLIENT-NONACT.
- Decrease CONV-NONACT.
- Set SERVER-NONACT.

Decreasing the non-activity timers will cause the inactive resources to be made available to other users.

If DYNAMIC-MEMORY-MANAGEMENT is set to YES, this error should no longer occur.

<b>ETBE0269</b>	<b>PSTORE required</b>
<b>Explanation</b>	An EntireX Broker call involving PSTORE is requested but EntireX Broker runs with setting PSTORE=NO. Any PSTORE operation is prohibited.
<b>Action</b>	Contact your Broker Administrator.
<b>ETBE0270</b>	<b>:1:</b>
<b>Explanation</b>	An error occurred while using a semaphore.
<b>Action</b>	Rerun Broker with TRACE-LEVEL=4. Contact Software AG Support and provide the Broker log.
<b>ETBE0277</b>	<b>PSI: Replace operation failed</b>
<b>Explanation</b>	The PSTORE operation to replace the contents of a unit of work failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0313</b>	<b>Broker RESTART failed</b>
<b>Explanation</b>	Restart procedure failed due to errors.
<b>Action</b>	Check preceding error messages for details.
<b>ETBE0315</b>	<b>PSI: SAVE failed</b>
<b>Explanation</b>	Timeout manager attempted to save data to the DIV PSTORE. This operation failed with an error.
<b>Action</b>	Check preceding error messages for details.

<b>ETBE0316</b>	<b>PSTORE: Initialization failed</b>
<b>Explanation</b>	Initialization of the persistent store failed. The broker could not be initialized.
<b>Action</b>	Verify that the persistent store environment is set up properly and restart the broker.
<b>ETBE0319</b>	<b>PSI: WRITE failed</b>
<b>Explanation</b>	An attempt to write data to the persistent store has failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0320</b>	<b>PSI: READ control data failed</b>
<b>Explanation</b>	An attempt to read control data from the persistent store has failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0321</b>	<b>PSI: READ message data failed</b>
<b>Explanation</b>	An attempt to read message data from the persistent store has failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0322</b>	<b>PSI: UPDATE failed</b>
<b>Explanation</b>	An attempt to update the persistent store has failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0323</b>	<b>PSI: WRITE both failed</b>
<b>Explanation</b>	An attempt to write two data items to the persistent store has failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0326</b>	<b>PSI: PURGE failed</b>
<b>Explanation</b>	An attempt to delete data from the persistent store has failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.

<b>ETBE0327</b>	<b>PSI: Dump DIV pool failed</b>
<b>Explanation</b>	Broker cannot print requested DIV data due to exhausted heap. This is 31-bit heap storage on z/OS.
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.
<b>ETBE0328</b>	<b>PSI: Scan operation failed</b>
<b>Explanation</b>	An attempt to scan for selected data on the persistent store has failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0343</b>	<b>ICU data directory does not exist</b>
<b>Explanation</b>	Broker checks ICU-related attribute settings. The directory specified for ICU custom converters does not exist. See attributes <code>ICU-DATA-DIRECTORY</code> and <code>ICU-SET-DATA-DIRECTORY</code> under <i>Broker-specific Broker Attributes</i> .
<b>Action</b>	Correct the path specified as value for attribute <code>ICU-DATA-DIRECTORY</code> .
<b>ETBE0348</b>	<b>License has expired</b>
<b>Explanation</b>	The Broker is running with an emergency license key and will stop after issuing this message.
<b>Action</b>	Get a valid license file.
<b>ETBE0354</b>	<b>EntireX License Key Error</b>
<b>Explanation</b>	An error occurred while processing the EntireX License file. Additional error text will provide more information. The broker kernel will terminate.
<b>Action</b>	Consult the additional error text and take appropriate action.
<b>ETBE0358</b>	<b>PSI: Query operation failed</b>
<b>Explanation</b>	The PSTORE operation to run a query is failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0361</b>	<b>Cannot [un]install Event Code Exit</b>
<b>Explanation</b>	The license exit cannot be installed because the Broker STEPLIB is not APF-authorized.
<b>Action</b>	Ensure that all the data sets referenced by the STEPLIB DD statement have been APF-authorized in z/OS. Check the spelling of the data set names for accuracy. Correct any error and restart the broker. If the cause cannot be determined, contact Software AG Support.

<b>ETBE0368</b>	<b>No host:port value specified</b>
<b>Explanation</b>	The requested value requires a host name and a valid port number.
<b>Action</b>	Repeat the command with valid host port data.
<b>ETBE0378</b>	<b>PSILIB: Library not loadable</b>
<b>Explanation</b>	An error occurred while loading a module for PSTORE.
<b>Action</b>	Check the library path (or steplib value), and make sure that pstore modules are installed. Pstore module names could be BTPSI or ADAPSI. The names vary depending on platform.
<b>ETBE0379</b>	<b>API: Inconsistent security installation</b>
<b>Explanation</b>	The setting for security in the broker kernel is different from the settings in one or more of the broker stubs. Either the broker kernel and all stubs must be configured to operate with security, or the kernel and all stubs must be configured to operate without security. See <i>EntireX Security</i> .
	For ACI version 8 and above, this error can be caused by an application not honoring the returned value of kernel security in the broker control block field.
<b>Action</b>	Ensure the security settings are consistent for broker kernel and all the stubs.
<b>ETBE0381</b>	<b>Unable to get lock for PCB Create</b>
<b>Explanation</b>	The broker is busy and the internal resources needed to satisfy the call are currently not available (due to concurrent attempts to serialize the process of creating a user, a block occurs and the user cannot get logged on).
<b>Action</b>	Retry the call to the broker. If this happens frequently, contact Software AG Support.
<b>ETBE0383</b>	<b>Invalid PSTORE value</b>
<b>Explanation</b>	The value for attribute PSTORE was not specified correctly.
<b>Action</b>	Enter PSTORE=COLD or PSTORE=HOT. See PSTORE under <i>Broker-specific Broker Attributes</i> .
<b>ETBE0388</b>	<b>PSI: UOWs can NOT be persisted</b>
<b>Explanation</b>	A request for a UOW to be persisted (STORE=BROKER) cannot be fulfilled, because at startup the broker attributes specify no persistent store (PSTORE=NO).
<b>Action</b>	Review broker attribute settings related to the persistent store.

<b>ETBE0389</b>	<b>PSI: UOW status can NOT be persisted</b>
<b>Explanation</b>	A request for a UOW status to be persisted cannot be accomplished, since at startup, the broker attributes specify no persistent store (PSTORE=NO).
<b>Action</b>	Review broker attribute settings related to the persistent store.
<b>ETBE0396</b>	<b>Start of SSL Communicator Failed</b>
<b>Explanation</b>	Broker cannot create the thread to run the communication manager for SSL transport. If it is not possible to start at least one communication manager, broker will shut down.
<b>Action</b>	Check previous error messages and contact Software AG Support.
<b>ETBE0402</b>	<b>SECURITY/ENCRYPTION-LEVEL mismatch</b>
<b>Explanation</b>	A mismatch in the broker attribute file has been detected: If an ENCRYPTION-LEVEL is specified, then SECURITY must be set to YES.
<b>Action</b>	Verify that the security exit is present and set SECURITY=YES to enable ENCRYPTION-LEVEL processing.
	<b>Note:</b>
	<ol style="list-style-type: none"><li>1. The broker attribute setting SECURITY=NO cannot be used with any encryption level not equal to 0 (= zero); otherwise the ETBE0402 error condition will occur when application issues registration command.</li><li>2. For encrypted transport we strongly recommend using the Secure Sockets Layer/Transport Layer Security protocol. See <i>SSL/TLS, HTTP(S), and Certificates with EntireX</i> in the platform-independent Administration documentation.</li></ol>
<b>ETBE0405</b>	<b>PSI: UOW Index initialization failed</b>
<b>Explanation</b>	The broker tried to create an internal index for every unit of work. This operation failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0406</b>	<b>PSI: Add entry to UOW Index failed</b>
<b>Explanation</b>	The broker tried to add an entry to the internal index for units of work. This operation failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.

<b>ETBE0407</b>	<b>PSI: Logical read failed</b>
<b>Explanation</b>	The logical read operation through the PSTORE returned an error.
<b>Action</b>	Examine the Broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0408</b>	<b>RESTART failed. Cannot set BACKEDOUT</b>
<b>Explanation</b>	Broker cannot properly back out a UOW. Restart fails and Broker stops.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0409</b>	<b>PSI: Delete entry from UOW Index failed</b>
<b>Explanation</b>	The broker tried to delete an entry from the internal index for units of work. This operation failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0410</b>	<b>PSI: Close UOW Index failed</b>
<b>Explanation</b>	The broker tried to close the internal index for units of work. This operation failed.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support if necessary.
<b>ETBE0411</b>	<b>RESTART failed. Cannot restore UOW</b>
<b>Explanation</b>	Broker cannot properly restore a UOW. Restart fails and Broker stops.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0412</b>	<b>RESTART failed. Cannot set ACCEPTED</b>
<b>Explanation</b>	Broker cannot properly set up a UOW to accepted state. Restart fails and Broker stops.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0423</b>	<b>AUTO/Catch-All Service mismatch</b>
<b>Explanation</b>	A mismatch in the broker attribute file has been detected: if the catch-all service has been defined (CLASS= *, SERVER= *, SERVICE = *) then the value of AUTO is not allowed for the NUM-CONVERSATION, NUM-LONG-BUFFER or NUM-SHORT-BUFFER attributes.
<b>Action</b>	If the catch-all service is defined, make sure the attributes NUM-CONVERSATION, NUM-LONG-BUFFER and NUM-SHORT-BUFFER all have specified values.

<b>ETBE0425</b>	<b>Start of TCP Communicator Failed</b>
<b>Explanation</b>	Broker cannot create the thread to run the communication manager for TCP/IP transport. If it is not possible to start at least one communication manager, Broker will shut down.
<b>Action</b>	Check previous error messages and contact Software AG Support.
<b>ETBE0427</b>	<b>Failed to start Any Communicators</b>
<b>Explanation</b>	Broker is not able to start at least one communication manager and shuts down.
<b>Action</b>	Check previous error messages and contact Software AG Support.
<b>ETBE0430</b>	<b>RESTART failed. Cannot purge UOW</b>
<b>Explanation</b>	A unit of work cannot be removed from persistent store. Restart fails and Broker stops.
<b>Action</b>	Check the preceding error messages for details.
<b>ETBE0431</b>	<b>Error during read of file</b>
<b>Explanation</b>	A configuration file (for instance the broker attribute file) cannot be read.
<b>Action</b>	Make sure that the configuration file is readable and not corrupt.
<b>ETBE0434</b>	<b>PSTORE: Cannot create master record</b>
<b>Explanation</b>	PSTORE=COLD was set to build a new persistent store.
<b>Action</b>	Broker could not write the master record. Check the preceding error messages for details.
<b>ETBE0446</b>	<b>ATTR: SERVER-LIMIT may not be UNLIM</b>
<b>Explanation</b>	The service-specific SERVER-LIMIT value is specified with UNLIM. In this special configuration, this is not allowed because the global NUM-SERVER attribute is set to AUTO. See also <i>Broker Resource Allocation</i> .
<b>Action</b>	Either change the global NUM-SERVER parameter to a defined value, or change the specific SERVER-LIMIT value to a particular value.
<b>ETBE0447</b>	<b>ATTR: SERVER-DEFAULT not spec or UNLIM</b>
<b>Explanation</b>	The global SERVER-DEFAULT attribute is either specified as UNLIM or not specified at all. The error occurs in situations where EntireX Broker cannot calculate the number of servers needed. This situation occurs if
	■ NUM-SERVER=AUTO and SERVER-DEFAULT=UNLIM and there is at least one service that does not assign SERVER-LIMIT, or

- NUM-SERVER=AUTO and SERVER-DEFAULT is undefined and there is at least one service that does not assign SERVER-LIMIT.

**Action** Correct the error in the attribute file. Define NUM-SERVER with a particular value or define SERVER-DEFAULT with a particular value or use the SERVER-LIMIT attribute for every single service definition.

**ETBE0450 Error during data compression**

**Explanation** Compression of the data was attempted, but resulting size was equal to or greater than original data.

**Action** The compress option is turned OFF for this transmission of data; data will not be compressed.

**ETBE0451 Error during data decompression**

**Explanation** During a decompress operation, failure occurred; it is most likely the result of insufficient memory for the process.

**Action** Increase available memory for process, if possible.

**ETBE0452 Unexpected error during comp/decomp**

**Explanation** Error resulted from a compress or decompress operation, and is not accounted for by errors ETBE0450 or ETBE0451.

**Action** Save trace information. Contact Software AG Support.

**ETBE0455 RESTART failed. Master record unreadable**

**Explanation** The restore of the persistent data (PSTORE=HOT) failed. The master record is unreadable.

**Action** Check the preceeding error messages for details.

**ETBE0456 Accounting file did not open; set to off**

**Explanation** The accounting output file on UNIX or Windows failed to open during Broker startup. The accounting function is turned off.

**Action** If accounting is not needed, no action is required. If accounting is needed, ensure that the accounting file to be written to is not in use by another process. After the accounting file is freed, the Broker must be restarted.

<b>ETBE0457</b>	<b>RESTART failed. Invalid master record</b>
<b>Explanation</b>	The restore of the persistent data (PSTORE=HOT) failed. The master record data is invalid.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0469</b>	<b>RESTART failed. Sequential OPEN failed</b>
<b>Explanation</b>	The persistent store cannot be opened for sequential read. Restart fails and Broker stops.
<b>Action</b>	Check the preceeding error messages for details.
<b>ETBE0479</b>	<b>RESTART failed. Cannot set DISCARD</b>
<b>Explanation</b>	Broker cannot properly discard a UOW. Restart fails and Broker stops.
<b>Action</b>	Check the preceeding error messages for details.
<b>ETBE0495</b>	<b>RESTART failed. No master record update</b>
<b>Explanation</b>	The persistent store cannot be initialized correctly. It was not possible to update the master record. Restart fails and Broker stops.
<b>Action</b>	Check the preceeding error messages for details.
<b>ETBE0501</b>	<b>TCP port numbers not unique</b>
<b>Explanation</b>	You cannot specify the same PORT number twice for the same HOST.
<b>Action</b>	Specify a different PORT number.
<b>ETBE0502</b>	<b>Failed to get lock for WQE</b>
<b>Explanation</b>	This message reports a situation where EntireX Broker internal resources are currently not available.
<b>Action</b>	None. This message is for diagnostic purposes only. EntireX Broker recovers the situation internally.
<b>ETBE0509</b>	<b>Neither IPV4 nor IPV6 socket operational</b>
<b>Explanation</b>	The listen socket could not be established for either IPV4 or IPV6. The communicator stops.
<b>Action</b>	Check the subsequent error messages and correct the error.

<b>ETBE0511</b>	<b>Nucleus Startup Failed</b>
<b>Explanation</b>	One nucleus of the transport layer detected an error and will stop now. All supported transports will issue this message on error.
<b>Action</b>	Check the log file for error messages. Contact Software AG Support.
<b>ETBE0514</b>	<b>Transport Initialization Failed</b>
<b>Explanation</b>	An error occurred during initialization of the transport layer. All supported transports will issue this message on error during initialization.
<b>Action</b>	Check the log file for error messages. Contact Software AG Support.
<b>ETBE0534</b>	<b>CONVERSION ignored if ICU-CONVERSION=NO</b>
<b>Explanation</b>	Global attribute ICU-CONVERSION in Broker section is set to NO and one or more service definitions specify CONVERSION METHOD=ICU.
<b>Action</b>	Change broker attribute ICU-CONVERSION to YES.
<b>ETBE0535</b>	<b>PSTORE is not licensed</b>
<b>Explanation</b>	The license does not permit the usage of PSTORE. Usage of PSTORE is disabled.
<b>Action</b>	If PSTORE is needed, request an appropriate license.
<b>ETBE0547</b>	<b>Max num AUTHORIZATION-RULE reached</b>
<b>Explanation</b>	The maximum number of AUTHORIZATION-RULE entries in the attribute file has been reached. The current maximum number is 16 authorization rules.
<b>Action</b>	Reduce the number of AUTHORIZATION-RULE entries.
<b>ETBE0548</b>	<b>Max num HOST entries reached</b>
<b>Explanation</b>	You cannot specify more than five HOST entries per section.
<b>Action</b>	Reduce number of HOST entries.
<b>ETBE0549</b>	<b>Max num PORT entries reached</b>
<b>Explanation</b>	You cannot specify more than five PORT entries per section.
<b>Action</b>	Reduce number of PORT entries.

<b>ETBE0550</b>	<b>DEFAULTS=NET section missing</b>
<b>Explanation</b>	TRANSPORT=NET was specified but the transport-specific section DEFAULTS=NET is missing.
<b>Action</b>	Define the transport-specific attributes in section DEFAULTS=NET.
<b>ETBE0551</b>	<b>DEFAULTS=SSL section missing</b>
<b>Explanation</b>	TRANSPORT=SSL was specified but the transport-specific section DEFAULTS=SSL is missing.
<b>Action</b>	Define the transport-specific attributes in section DEFAULTS=SSL.
<b>ETBE0554</b>	<b>ICULIB: Library not loadable</b>
<b>Explanation</b>	The ICU Converter library (sagtchaicu.so on UNIX; sagtchaicu.dll on Windows; EXXICU on z/OS and BS2000) is not loadable. The broker kernel will terminate.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0555</b>	<b>Program Exception</b>
<b>Explanation</b>	A program exception was detected in Broker. The current request was interrupted with error response 00780777. Further details of the exception will be reported in the broker log.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0558</b>	<b>Signal :1: caught at location :2:</b>
<b>Explanation</b>	Broker received signal :1: at program counter location :2:.
<b>Action</b>	None.
<b>ETBE0561</b>	<b>DEFAULTS=TCP section missing</b>
<b>Explanation</b>	TRANSPORT=TCP was specified but the transport-specific section DEFAULTS=TCP is missing.
<b>Action</b>	Define the transport-specific attributes in section DEFAULTS=TCP.
<b>ETBE0562</b>	<b>Failed to start console task</b>
<b>Explanation</b>	The mainframe console task failed to start. Broker will terminate.
<b>Action</b>	Contact Software AG Support.

<b>ETBE0564</b>	<b>SSL port numbers not unique</b>
<b>Explanation</b>	You cannot specify the same PORT number twice for the same HOST.
<b>Action</b>	Specify a different PORT number.
<b>ETBE0565</b>	<b>Specify two or none command log file(s)</b>
<b>Explanation</b>	Two command log output files are required for command logging.
<b>Action</b>	Specify two command log output files when starting the broker kernel.
<b>ETBE0568</b>	<b>Max num STACK-NAME entries reached</b>
<b>Explanation</b>	You cannot specify more than five STACK-NAME entries per section.
<b>Action</b>	Reduce number of STACK-NAME entries.
<b>ETBE0570</b>	<b>Invalid IBM LE version</b>
<b>Explanation</b>	EntireX Broker requires z/OS version 1.12 or above.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0575</b>	<b>PSI: Set Trace Level failed</b>
<b>Explanation</b>	Unable to set the persistent store-specific trace level.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0577</b>	<b>Worker queue allocation failed</b>
<b>Explanation</b>	Broker could not create the queue entries and semaphores to manage the worker tasks.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0583</b>	<b>Invalid SAF-ID specified</b>
<b>Explanation</b>	An invalid SAF user ID was specified while attempting to reset a user.
<b>Action</b>	Ensure that SAF user ID is correct.
<b>ETBE0584</b>	<b>Failed to retrieve Security Information</b>
<b>Explanation</b>	Command and Information Services were unable to obtain security information. Security information is only available with EntireX Security.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBE0585</b>	<b>broker attribute ACCOUNTING is not on</b>
<b>Explanation</b>	Command and Information Services were unable to enable or disable accounting because the broker ACCOUNTING attribute is not on.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBE0590</b>	<b>Security Initialization failed (see LOG)</b>
<b>Explanation</b>	EntireX Security encountered an error during initialization. Additional error information will describe the problem. The Broker kernel will terminate.
<b>Action</b>	Consult the additional error text and take appropriate action or contact Software AG Support.
<b>ETBE0594</b>	<b>Variable not expanded</b>
<b>Explanation</b>	A variable in a configuration file (for instance the broker attribute file) cannot be read. could not be expanded. Additional error information will display the variable name.
<b>Action</b>	Consult the additional error text and take appropriate action.
<b>ETBE0596</b>	<b>Error in FINALIZATION exit</b>
<b>Explanation</b>	EntireX Security encountered an error during finalization. Additional error information will describe the problem.
<b>Action</b>	Consult the additional error text and take appropriate action or contact Software AG Support.
<b>ETBE0597</b>	<b>Error in INFORMATION exit</b>
<b>Explanation</b>	EntireX Security encountered an error during a Command and Information Services request. Additional error information will describe the problem.
<b>Action</b>	Consult the additional error text and take appropriate action or contact Software AG Support.
<b>ETBE0598</b>	<b>Error in COMMAND exit</b>
<b>Explanation</b>	EntireX Security encountered an error during a Command and Information Services request. Additional error information will describe the problem.
<b>Action</b>	Consult the additional error text and take appropriate action or contact Software AG Support.

<b>ETBE0599</b>	<b>Macro BIND failed with RC :1: for module :2: or Macro VSVI1 failed with RC :1: for entry point :2:</b>
<b>Explanation</b>	An operating system function returned an error.
<b>Action</b>	Determine the real error by checking the macro return code in the BS2000 documentation. For example, Message 'ETBE0599 Macro BIND failed with RC 0C010600 for module BROKER' will be issued if the ETBLIB is not correctly assigned to the load library containing module BROKER.
<b>ETBE0602</b>	<b>Start of TCP/IP Proxy failed</b>
<b>Explanation</b>	The proxy component of the TCP/IP communicator could not be started in order to interact with the partner Broker.
<b>Action</b>	Check the output files for additional error messages issued by the Broker.
<b>ETBE0603</b>	<b>Start of SSL Proxy failed</b>
<b>Explanation</b>	The proxy component of the SSL communicator could not be started in order to interact with the partner Broker.
<b>Action</b>	Check the output files for additional error messages issued by the Broker.
<b>ETBE0611</b>	<b>Failed to open command log file:</b>
<b>Explanation</b>	A command log output file could not be opened. Additional error information will describe the problem. Command logging will be disabled.
<b>Action</b>	Consult the additional error text and take appropriate action or contact Software AG Support.
<b>ETBE0612</b>	<b>broker attribute CMDLOG is not on</b>
<b>Explanation</b>	Command and Information Services were unable to enable or disable command logging, switch command log output files or manipulate command log filters because the broker CMDLOG attribute is not on.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBE0619</b>	<b>Pipe error occurred</b>
<b>Explanation</b>	The internal communication of Broker failed due to an operating system error.
<b>Action</b>	Contact Software AG Support.

<b>ETBE0620</b>	<b>Heap overflow</b>
<b>Explanation</b>	The internal heap is exceeded.
<b>Action</b>	Increase the HEAP-SIZE and restart Broker.
<b>ETBE0623</b>	<b>No free TCP connection entry</b>
<b>Explanation</b>	The maximum number of TCP/IP connections is derived from the number of available file descriptors. This maximum has been reached.
<b>Action</b>	Increase the number of file descriptors.
<b>ETBE0625</b>	<b>Cannot allocate thread control block</b>
<b>Explanation</b>	The number of available thread control blocks is exhausted.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0628</b>	<b>Expect PSTORE=HOT in STANDBY mode</b>
<b>Explanation</b>	The Standby Broker instance must use PSTORE=HOT in order to perform a PSTORE takeover if necessary.
<b>Action</b>	Define PSTORE=HOT for your Standby Broker.
<b>ETBE0629</b>	<b>Expect PSTORE=COLD in LOAD mode</b>
<b>Explanation</b>	The Load Broker (RUN-MODE=PSTORE-LOAD) must use PSTORE=COLD in order to create a new persistent store.  <b>Note:</b> RUN-MODE options PSTORE-LOAD and PSTORE-UNLOAD are deprecated and will not be supported in the next version of EntireX.
<b>Action</b>	Define PSTORE=COLD for your Load Broker.
<b>ETBE0630</b>	<b>Expect PSTORE=HOT in UNLOAD mode</b>
<b>Explanation</b>	The Unload Broker must use PSTORE=HOT in order to migrate a persistent store.
<b>Action</b>	Define PSTORE=HOT for your Unload Broker.
<b>ETBE0631</b>	<b>No assignment for PSTORE report</b>
<b>Explanation</b>	The PSTORE report was requested but there is no assignment to write the actual report data.
<b>Action</b>	The PSTORE report was requested but there is no assignment to write the actual report data.

<b>ETBE0632</b>	<b>Failed to open accounting file:</b>
<b>Explanation</b>	The accounting output file could not be opened. Additional error information will describe the problem. Accounting will be disabled.
<b>Action</b>	Consult the additional error text and take appropriate action or contact Software AG Support.
<b>ETBE0633</b>	<b>Failed to write accounting record:</b>
<b>Explanation</b>	An accounting record could not be written. Additional error information will describe the problem. Accounting will be disabled.
<b>Action</b>	Consult the additional error text and take appropriate action or contact Software AG Support.
<b>ETBE0635</b>	<b>AUTHORIZATION-RULES section missing</b>
<b>Explanation</b>	Broker-specific attribute SECURITY=YES and Security-specific attributes SECURITY - SYSTEM=OS and SECURITY - LEVEL=AUTHORIZATION have been specified, but the section to define authorization rules is missing.
<b>Action</b>	Add section AUTHORIZATION - RULES in the attribute file.
<b>ETBE0637</b>	<b>Failed to open PARSER Report file</b>
<b>Explanation</b>	The PARSER report was requested but the file could not be opened due to a system error.
<b>Action</b>	Fix the error condition reported by the operating system.
<b>ETBE0638</b>	<b>Failed to open PSTORE report file</b>
<b>Explanation</b>	The PSTORE report was requested but the file could not be opened due to a system error.
<b>Action</b>	Fix the error condition reported by the operating system.
<b>ETBE0642</b>	<b>Invalid transport configuration detected</b>
<b>Explanation</b>	No configured transport mechanism successfully initialized. The broker kernel will terminate.
<b>Action</b>	Consult additional error messages and take appropriate action.

<b>ETBE0643</b>	<b>Create thread failed. Check region size</b>
<b>Explanation</b>	z/OS Broker could not create a thread.
<b>Action</b>	Check the subsequent error messages and correct the error. Increase the region size.
<b>ETBE0644</b>	<b>Memory format inconsistency detected</b>
<b>Explanation</b>	An internal memory consistency check failed.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0651</b>	<b>Create semaphore failed</b>
<b>Explanation</b>	Unable to create semaphore.
<b>Action</b>	Contact your system administrator.
<b>ETBE0653</b>	<b>No assignment for accounting file</b>
<b>Explanation</b>	Conversation accounting was requested but the file assignment is missing.
<b>Action</b>	Specify argument -c and the name of the output file to assign the accounting file.
<b>ETBE0654</b>	<b>Unresolved function pointer</b>
<b>Explanation</b>	The broker dispatcher has failed to start a thread due to a missing address constant.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0655</b>	<b>Pool order failure</b>
<b>Explanation</b>	The internal communication path between the task ordering a pool allocation and the task executing the order received an error.
<b>Action</b>	Broker log provides more detailed diagnostics about the reason not being able to perform post and wait between Broker threads.
<b>ETBE0656</b>	<b>Dynamic pool management not enabled</b>
<b>Explanation</b>	Existing memory pool is full. Dynamic pool management is not enabled.
<b>Action</b>	Request is rejected due to insufficient resources.
<b>ETBE0659</b>	<b>No assignment for STORAGE Report</b>
<b>Explanation</b>	Attribute STORAGE-REPORT=YES was defined but no report file was assigned.
<b>Action</b>	Assign storage report file. Refer to Storage Report for details.

<b>ETBE0660</b>	<b>Failed to open STORAGE Report file:</b>
<b>Explanation</b>	Unable to open the storage report file. Check system error for details.
<b>Action</b>	Fix system error and rerun.
<b>ETBE0664</b>	<b>Failed to open LICENSE Report file:</b>
<b>Explanation</b>	Under z/OS and BS2000, the license is printed during broker startup. However, the broker was unable to open the license report output file.
<b>Action</b>	This error is accompanied with additional error text describing the problem. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0666</b>	<b>Failed to load License Check routine</b>
<b>Explanation</b>	Broker was unable to load the license check module.
<b>Action</b>	Check the assignment of the license library and correct the error.
<b>ETBE0670</b>	<b>Slot size is greater than entire pool</b>
<b>Explanation</b>	The requested slot size exceeds the total capacity of the memory pool. The request is rejected due to insufficient resources. This error usually occurs if a broker message exceeds the size of the long message buffer.
<b>Action</b>	Define an appropriate size for the memory pool to handle such a large buffer. Make sure that NUM-LONG is at least MAX-MESSAGE-LENGTH / 4096, and NUM-COMBUF is at least MAX-MESSAGE-LENGTH / 16384.
<b>ETBE0671</b>	<b>Requested allocation exceeds MAX-MEMORY</b>
<b>Explanation</b>	The allocation of this pool will exceed MAX-MEMORY and is rejected.
<b>Action</b>	Increase MAX-MEMORY or no action if maximum value was defined correctly. See Broker-specific attribute MAX-MEMORY.
<b>ETBE0674</b>	<b>Invalid memory pool address detected</b>
<b>Explanation</b>	An inconsistency of memory pool control data was detected.
<b>Action</b>	Contact Software AG Support.

<b>ETBE0675</b>	<b>Unexpected status in buffer header</b>
<b>Explanation</b>	An inconsistency of memory pool control data was detected.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0676</b>	<b>Invalid slot count in buffer header</b>
<b>Explanation</b>	An inconsistency of memory pool control data was detected.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0679</b>	<b>c-tree Plus User Error:</b>
<b>Explanation</b>	An error occurred while performing a persistent store operation.
<b>Action</b>	Depends on the subsequent messages.
<b>ETBE0681</b>	<b>c-tree database already in use</b>
<b>Explanation</b>	This error may occur during Broker startup. c-tree detected PSTORE files still being used by a previous Broker instance. These files are being closed during Broker shutdown. However, this problem most likely occurs if the old instance of the Broker did not yet stop completely and the new instance already tried to initialize the PSTORE.
<b>Action</b>	Wait for the previous Broker instance to shut down completely, then start the new Broker instance.
<b>ETBE0682</b>	<b>PSTORE: Error while reading attributes</b>
<b>Explanation</b>	The broker cannot start because the PSTORE attribute parser has discovered an error in the attribute file.
<b>Action</b>	Correct the broker attribute file.
<b>ETBE0701</b>	<b>Failed to load SSL routine</b>
<b>Explanation</b>	The shared library for SSL could not be loaded.
<b>Action</b>	Check the assignment of the SSL library and correct the error.
<b>ETBE0702</b>	<b>Failed to load crypto routine</b>
<b>Explanation</b>	The shared library for CRYPTO could not be loaded.
<b>Action</b>	Check the assignment of the CRYPTO library and correct the error.

<b>ETBE0725</b>	<b>CONTROL-INTERVAL elapsed - stop Broker</b>
<b>Explanation</b>	The PSTORE migration delayed due to an unexpected error. The procedure will be stopped.
<b>Action</b>	Check error messages reported in the broker log and fix the problem, then restart the migration procedure, by restarting both Brokers.
<b>ETBE0728</b>	<b>PSTORE load failed</b>
<b>Explanation</b>	The PSTORE migration failed due to an error.
<b>Action</b>	Check error messages reported in the broker log and fix the problem, then restart the migration procedure, by restarting both Brokers.
<b>ETBE0737</b>	<b>PSTORE inconsistency detected</b>
<b>Explanation</b>	There was an inconsistency detected while migrating the PSTORE.
<b>Action</b>	Check error messages reported in the broker log and fix the problem, then restart the migration procedure, by restarting both Brokers.
<b>ETBE0738</b>	<b>PSTORE currently in use</b>
<b>Explanation</b>	The original Standard Broker was started again but the Standby Broker performed the takeover and is now the new Standard Broker.
<b>Action</b>	You cannot start the original Standard Broker while Standby Broker is running as the new Standard Broker. The original Standard Broker should be started as the new Standby Broker.
<b>ETBE0741</b>	<b>PSTORE requires lower PSTORE-VERSION</b>
<b>Explanation</b>	The value of PSTORE - VERSION does not match the version of PSTORE.
<b>Action</b>	Change the value of PSTORE - VERSION to the effective version or rerun Broker with PSTORE=COLD. See PSTORE - VERSION and PSTORE - TYPE under <i>Broker-specific Broker Attributes</i> .
<b>ETBE0748</b>	<b>Unrecoverable error during takeover</b>
<b>Explanation</b>	An unrecoverable error occurred while taking over the persistent store. The Standby Broker stops.
<b>Action</b>	Check error messages reported in the broker log and fix the problem.

<b>ETBE0751</b>	<b>Takeover sequence failed</b>
<b>Explanation</b>	A recoverable error occurred while taking over the persistent store. The Standby Broker will perform another attempt after CONTROL-INTERVAL time.
<b>Action</b>	None.
<b>ETBE0752</b>	<b>Max num takeover attempts reached</b>
<b>Explanation</b>	MAX-TAKEOVER-ATTEMPTS has been reached by the Standby Broker without being able to take over the persistent store. The Standby Broker stops.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0755</b>	<b>Request to Partner Broker failed</b>
<b>Explanation</b>	Broker was unable to contact the partner Broker.
<b>Action</b>	Check error messages reported in the broker log and fix the problem.
<b>ETBE0756</b>	<b>Partner Broker is dead</b>
<b>Explanation</b>	The Standard Broker did not respond to Standby Broker's ping. The Standby Broker will initiate the takeover phase.
<b>Action</b>	Check error messages reported in the log of the original Standard Broker and fix the problem.
<b>ETBE0759</b>	<b>Transport error occurred</b>
<b>Explanation</b>	Broker detected a transport error while trying to communicate with the partner Broker.
<b>Action</b>	Check error messages reported in both broker logs and fix the problem.
<b>ETBE0760</b>	<b>PARTNER-CLUSTER-ADDRESS mismatch</b>
<b>Explanation</b>	The PARTNER-CLUSTER-ADDRESS defined in the Standard Broker does not match any of the TCP or SSL transport entries defined in the Standby Broker.
<b>Action</b>	Either adjust PARTNER-CLUSTER-ADDRESS in Standard Broker or start Standby Broker with a matching transport entry.
<b>ETBE0761</b>	<b>PARTNER-CLUSTER-ADDRESS missing</b>
<b>Explanation</b>	There is no PARTNER-CLUSTER-ADDRESS definition in the Standard Broker.
<b>Action</b>	Define PARTNER-CLUSTER-ADDRESS in the Standard Broker to allow running a Standby Broker.

<b>ETBE0762</b>	<b>PSTORE-TYPE mismatch</b>
<b>Explanation</b>	The persistent store defined in Standard Broker and Standby Broker must be exactly the same.
<b>Action</b>	Adjust the attributes for PSTORE-TYPE and the PSTORE-specific sections in each broker attribute file so both Broker instances match.
<b>ETBE0763</b>	<b>PSTORE-TYPE missing</b>
<b>Explanation</b>	There is no PSTORE defined in the partner Broker instance.
<b>Action</b>	Run the partner Broker with matching persistent store attributes.
<b>ETBE0764</b>	<b>Same PSTORE for UNLOAD and LOAD</b>
<b>Explanation</b>	The persistent stores defined in Load Broker and Unload Broker must be different.
<b>Action</b>	Adjust the attributes for PSTORE-TYPE and the PSTORE-specific sections for both Broker instances. Make sure the Load Broker is assigned to a new persistent store, and your Unload Broker is assigned to the persistent store you wish to unload.
<b>ETBE0771</b>	<b>DIV section missing</b>
<b>Explanation</b>	Broker attribute PSTORE-TYPE=DIV requires a section DEFAULTS=DIV with additional attributes. This section is missing.
<b>Action</b>	Enter section DEFAULTS=DIV. See DEFAULTS=DIV under <i>Broker Attributes</i> in the platform-independent Administration documentation
<b>ETBE0772</b>	<b>ADABAS section missing</b>
<b>Explanation</b>	Broker attribute PSTORE-TYPE=ADABAS requires a section DEFAULTS=ADABAS with additional attributes. This section is missing.
<b>Action</b>	Enter section DEFAULTS=ADABAS. See DEFAULTS=ADABAS under <i>Broker Attributes</i> in the platform-independent Administration documentation.
<b>ETBE0780</b>	<b>BROKER ABEND CODE :1: PSW :2:</b>
<b>Explanation</b>	Broker reports an abnormal termination.
<b>Action</b>	Contact Software AG Support.

<b>ETBE0786</b>	<b>CONVERSION=SAGTRPC ignored. CONVERSION=SAGTCHA used</b>
<b>Explanation</b>	An incorrect character conversion configuration for a Broker service (CLASS, SERVER and SERVICE) was detected and corrected. The Broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .
<b>ETBE0787</b>	<b>CONVERSION=SAGTCHA ignored. CONVERSION=SAGTRPC used</b>
<b>Explanation</b>	An incorrect character conversion configuration for a Broker service (CLASS, SERVER and SERVICE) was detected and corrected. The Broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .
<b>ETBE0788</b>	<b>CONVERSION=NO,TRANSLATION=NO ignored. CONVERSION=SAGTRPC used</b>
<b>Explanation</b>	An incorrect character conversion configuration for a Broker service (CLASS, SERVER and SERVICE) was detected and corrected. The Broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .
<b>ETBE0789</b>	<b>TRANSLATION=SAGTCHA ignored. CONVERSION=SAGTRPC used</b>
<b>Explanation</b>	An incorrect character conversion configuration for a Broker service (CLASS, SERVER and SERVICE) was detected and corrected. The Broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .
<b>ETBE0790</b>	<b>TRANSLATION=SAGTCHA ignored. CONVERSION=SAGTCHA used</b>
<b>Explanation</b>	An incorrect character conversion configuration for a Broker service (CLASS, SERVER and SERVICE) was detected and corrected. The Broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .

<b>ETBE0796</b>	<b>Adabas SVC number must be supplied</b>
<b>Explanation</b>	Attribute SVC was not specified in the DEFAULTS=ADABAS section. Adabas PSTORE cannot be reached.
<b>Action</b>	Specify <i>SVC=svc_number</i> used by the Adabas PSTORE database.
<b>ETBE0799</b>	<b>Invalid internal command ignored</b>
<b>Explanation</b>	An internal command was received with an unknown command code. This invalid command was ignored.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0800</b>	<b>Broker internal RPC Server: Load failed</b>
<b>Explanation</b>	A shared library could not be loaded. EntireX Broker detected an error while loading an RPC Command and Information Services shared library.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0802</b>	<b>Broker internal RPC Server: Load failed</b>
<b>Explanation</b>	A shared library could not be loaded. EntireX Broker detected an internal error while loading a Broker-internal RPC shared library.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0803</b>	<b>WORKER-MIN greater than WORKER-MAX</b>
<b>Explanation</b>	The value of global attribute WORKER-MIN is greater than the value of global attribute WORKER-MAX. This error occurs if Broker is running with DYNAMIC-WORKER-MANAGEMENT=YES.
<b>Action</b>	Correct the attributes.
<b>ETBE0808</b>	<b>NUM-WORKER out of range</b>
<b>Explanation</b>	The value of global attribute NUM-WORKER is checked against attributes WORKER-MIN and WORKER-MAX if Broker is running with DYNAMIC-WORKER-MANAGEMENT=YES. NUM-WORKER must be less than or equal to WORKER-MAX and greater than or equal to WORKER-MIN.
<b>Action</b>	Correct the attributes.

<b>ETBE0810</b>	<b>Failed to open CONFIG Report file:</b>
<b>Explanation</b>	The CONFIG report file could not be opened. Additional error information describes the problem.
<b>Action</b>	Consult the additional error text and take appropriate action.
<b>ETBE0812</b>	<b>Failed to open MODULE report file:</b>
<b>Explanation</b>	The MODULE report file could not be opened. Additional error information describes the problem.
<b>Action</b>	Consult the additional error text and take appropriate action.
<b>ETBE0813</b>	<b>Cannot start DIV PSTORE handler</b>
<b>Explanation</b>	EntireX Broker detected that the load libraries are not all APF-authorized in z/OS. The DIV PSTORE handler cannot be started.
<b>Action</b>	Ensure that all the data sets referenced by the STEPLIB DD statement have been APF-authorized in z/OS. Check the spelling of the data set names for accuracy. Correct any error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0814</b>	<b>Transport RETRY-LIMIT exceeded</b>
<b>Explanation</b>	It was not possible to establish a new connection (or reestablish an existing connection after an interruption) for transport method TCP, SSL or NET. The connection was attempted as often as specified under RETRY - LIMIT (with a wait between attempts as specified under RETRY - TIME), but without success.
<b>Action</b>	Check for the correct settings and availability of the appropriate transport.
<b>ETBE0826</b>	<b>Create thread failed</b>
<b>Explanation</b>	Broker could not create a thread.
<b>Action</b>	Check the subsequent error messages and correct the error.
<b>ETBE0830</b>	<b>Invalid transport ID</b>
<b>Explanation</b>	The transport ID in the specified CIS command does not match any configured transport in the Broker.
<b>Action</b>	Check the Broker log file and correct the CIS command.

<b>ETBE0831</b>	<b>Communicator not available</b>
<b>Explanation</b>	The CIS command could not be executed by the Broker communicator.
<b>Action</b>	Check the subsequent error messages and correct the error.
<b>ETBE0839</b>	<b>ACI-CONVERSION failed, using translation</b>
<b>Explanation</b>	Conversion of the ACI request and response string failed. Therefore a fallback to TRANSLATION is used.
	<b>Note:</b> This message is not related to payload conversions, configured with broker attribute CONVERSION.
<b>Action</b>	This is an informational message. Use attribute ACI-CONVERSION to translate ACI requests and responses with an internal translation table without support of national characters.
<b>ETBE0840</b>	<b>PSTORE-VERSION 4 or above required</b>
<b>Explanation</b>	If PSTORE-TYPE=DIV is specified but PSTORE-VERSION is not set to "4", the z/OS broker will stop. A cold start is required when changing to a higher PSTORE-VERSION. See <i>Implementing a DIV Persistent Store</i> under <i>Managing the Broker Persistent Store</i> in the z/OS Administration documentation and PSTORE=COLD under <i>Broker-specific Broker Attributes</i> .
<b>Action</b>	Specify PSTORE-VERSION=4 in the broker attribute file. The default value is 2.
<b>ETBE0841</b>	<b>Module ETBMISC cannot be loaded</b>
<b>Explanation</b>	This message is issued when the module ETBMISC cannot be loaded. The libraries were not assigned correctly. The Broker terminates abnormally with User Abend 841.
<b>Action</b>	Assign the libraries correctly.
<b>ETBE0842</b>	<b>Requested function not found in ETBMISC</b>
<b>Explanation</b>	This message is issued if module ETBMISC cannot localize the requested program function. The Broker terminates abnormally with User Abend 842.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0844</b>	<b>PSTORE: Wrong master record</b>
<b>Explanation</b>	UOW master record missing when reading UOW from Adabas PSTORE database. Indicates a corrupted or inconsistent Adabas PSTORE database.
<b>Action</b>	Running with PSTORE=COLD and FORCE-COLD=YES fixes the problem by resetting the PSTORE database. Contact Software AG Support if the recommended fix is not an option for your situation.

<b>ETBE0850</b>	<b>Cannot obtain TSN of main task</b>
<b>Explanation</b>	The SDF variable MAIN-TASK-TSN is not set at all.
<b>Action</b>	The Broker cannot start. Contact Software AG Support.
<b>ETBE0851</b>	<b>Unable to initialize subtask</b>
<b>Explanation</b>	The subtask was unable to attach to the global shared memory.
<b>Action</b>	This error is accompanied by an additional error text describing the problem. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBE0860</b>	<b>APPLICATION-MONITORING section missing</b>
<b>Explanation</b>	Application monitoring was requested but the section DEFAULTS=APPLICATION-MONITORING is missing.
<b>Action</b>	Add section DEFAULTS=APPLICATION-MONITORING to the Broker attribute file. See DEFAULTS=APPLICATION-MONITORING under <i>Broker Attributes</i> in the platform-independent Administration documentation.
<b>ETBE0863</b>	<b>ATTR COLLECTOR-BROKER-ID not specified</b>
<b>Explanation</b>	Application Monitoring cannot be activated due to the missing COLLECTOR-BROKER-ID.
<b>Action</b>	Define the COLLECTOR-BROKER-ID and retry. See SET-COLLECTOR under <i>Broker Command and Information Services</i> in the EntireX Broker documentation and COLLECTOR= <i>host:port</i> under <i>Operator Commands</i> in the z/OS Administration documentation.
<b>ETBE0865</b>	<b>APPMON: Missing extended receive-buffer</b>
<b>Explanation</b>	An internal error occurred while processing application monitoring data.
<b>Action</b>	Rerun the application and turn on stub log level 4. Contact Software AG Support and provide the stub log.
<b>ETBE0907</b>	<b>Rebuild server UOW. Missing client data</b>
<b>Explanation</b>	Broker cannot restore a unit of work due to incomplete data.
<b>Action</b>	Contact Software AG Support.

<b>ETBE0909</b>	<b>LOCK RECURSION DETECTED</b>
<b>Explanation</b>	Broker tested the mutex lock handling. It was possible to lock a resource which was already locked.
<b>Action</b>	Contact Software AG Support.
<b>ETBE0910</b>	<b>PSTORE: UOW already exists</b>
<b>Explanation</b>	The broker tried to store a unit of work, but the UOW already exists in the PSTORE database.
<b>Action</b>	Examine the broker log file for more information and contact Software AG Support.
<b>ETBE0915</b>	<b>Max %d connections reached</b>
<b>Explanation</b>	The maximum number of connections has been reached.
<b>Action</b>	Do not start any new applications as long as the bottleneck is present.
<b>ETBE0927</b>	<b>Invalid USRSEC interface version</b>
<b>Explanation</b>	The version of the interface to the security exit is out of range.
<b>Action</b>	Correct the security exit.
<b>ETBE0928</b>	<b>SERVER-CLASS incorrectly specified</b>
<b>Explanation</b>	The CLASS attribute in DEFAULTS=AUTHORIZATION-RULES was specified incorrectly.
<b>Action</b>	Enter a valid CLASS attribute. See CLASS under <i>Authorization Rule-specific Broker Attributes</i> .
<b>ETBE0929</b>	<b>No storage for RULE-TRIPLET entry</b>
<b>Explanation</b>	There is not enough heap storage to save AUTHORIZATION-RULES entries.
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.
<b>ETBE0930</b>	<b>No storage for RULE-TRIPLET vector</b>
<b>Explanation</b>	There is not enough heap storage to save AUTHORIZATION-RULES vectors.
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.

<b>ETBE0931</b>	<b>Wrong length for RULE-TRIPLET vector</b>
<b>Explanation</b>	The vector length is invalid.
<b>Action</b>	Set TRACE - LEVEL=4 and rerun Broker. Contact Software AG Support and provide the log file.
<b>ETBE0932</b>	<b>No reallocation of RULE-TRIPLET vector</b>
<b>Explanation</b>	There is not enough heap storage to reallocate AUTHORIZATION - RULES vectors.
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.
<b>ETBE0933</b>	<b>No storage for RULE-NAME entry</b>
<b>Explanation</b>	There is not enough heap storage to save AUTHORIZATION - RULES entries.
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.
<b>ETBE0934</b>	<b>No storage for RULE-NAME vector</b>
<b>Explanation</b>	There is not enough heap storage to save AUTHORIZATION - RULES vectors.
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.
<b>ETBE0935</b>	<b>Wrong length for RULE-NAME vector</b>
<b>Explanation</b>	The vector length is invalid.
<b>Action</b>	Set TRACE - LEVEL=4 and rerun Broker. Contact Software AG Support and provide the log file.
<b>ETBE0936</b>	<b>No reallocation of RULE-NAME vector</b>
<b>Explanation</b>	There is not enough heap storage to reallocate AUTHORIZATION - RULES vectors.
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.
<b>ETBE0937</b>	<b>No memory for RULE-NAME value</b>
<b>Explanation</b>	There is not enough heap storage to copy AUTHORIZATION - RULES values.
<b>Action</b>	Change the runtime settings to increase the size of the runtime heap.
<b>ETBE0938</b>	<b>SERVER-NAME incorrectly specified</b>
<b>Explanation</b>	The SERVER attribute in DEFAULTS=AUTHORIZATION - RULES was specified incorrectly.
<b>Action</b>	Enter a valid SERVER attribute. See SERVER under <i>Authorization Rule-specific Broker Attributes</i> .

<b>ETBE0939</b>	<b>SERVICE incorrectly specified</b>
<b>Explanation</b>	The SERVICE attribute in DEFAULTS=AUTHORIZATION-RULES was specified incorrectly.
<b>Action</b>	Enter a valid SERVICE attribute. See SERVICE under <i>Authorization Rule-specific Broker Attributes</i> .
<b>ETBE0945</b>	<b>Attribute change: Cannot create Reader</b>
<b>Explanation</b>	An internal error occurred during the creation of the reader object. The change of an attribute in the attribute file is cancelled.
<b>Action</b>	Set TRACE-LEVEL=4 and rerun Broker. Contact Software AG Support and provide the log file.
<b>ETBE0946</b>	<b>Attribute change: Cannot create Writer</b>
<b>Explanation</b>	An error occurred while opening the attribute file for write.
<b>Action</b>	Fix the error condition reported by the operating system.
<b>ETBE0948</b>	<b>Failed to open TASK Report file:</b>
<b>Explanation</b>	The TASK report was requested but the file could not be opened due to a system error.
<b>Action</b>	Fix the error condition reported by the operating system.
<b>ETBE0951</b>	<b>Cannot write TASK.REPORT - still in use</b>
<b>Explanation</b>	The TASK report file is still in use by a running process. This instance of Broker is already running.
<b>Action</b>	None.
<b>ETBE0953</b>	<b>Error in CERT UID exit</b>
<b>Explanation</b>	An error occurred when obtaining the user ID for a certificate.
<b>Action</b>	Check the contents of the certificate and the RACF definitions.
<b>ETBE0978</b>	<b>sd :1: failed to use AT-TLS</b>
<b>Explanation</b>	SSL socket descriptor :1: received a connect request. Broker could not retrieve a certificate for this connection. Connection will be closed.
<b>Action</b>	Rerun Broker with TRACE-LEVEL=4. Contact Software AG Support and provide Broker log, the certificate, the AT-TLS configuration and the RACF definitions.

<b>ETBE0981</b>	<b>sd :1: Start handshake failed</b>
<b>Explanation</b>	SSL socket descriptor :1: received a connect request. Broker could not start on an AT-TLS connection. Connection will be closed.
<b>Action</b>	Rerun Broker with TRACE - LEVEL=4. Contact Software AG Support and provide Broker log, the certificate, the AT-TLS configuration and the RACF definitions.
<b>ETBE0982</b>	<b>sd :1: No CERT for connection</b>
<b>Explanation</b>	SSL socket descriptor :1: received a connect request. The AT-TLS handshake has been terminated. Broker did not retrieve a certificate for this connection. Connection will be closed.
<b>Action</b>	Rerun Broker with TRACE - LEVEL=4. Contact Software AG Support and provide Broker log, the certificate, the AT-TLS configuration and the RACF definitions.
<b>ETBE0983</b>	<b>sd :1: No USER ID associated with CERT</b>
<b>Explanation</b>	SSL socket descriptor :1: received a connect request. The AT-TLS handshake has been finished. Broker retrieved a certificate for this connection but no user ID is associated with this certificate. The definitions in the security system are not working properly. Connection will be closed.
<b>Action</b>	Rerun Broker with TRACE - LEVEL=4. Contact Software AG Support and provide Broker log, the certificate, the AT-TLS configuration and the RACF definitions.

# 64 Message Class ETBM - Broker Log and Console - Informational Messages

---

This page explains informational messages from the EntireX Broker Log and Console. These messages have the format:

ETBM $nnnn$

where ETBM is the message class, and

$nnnn$  is the message number in the range 0000-9999

<b>ETBM0020</b>	<b>Failed to inform Attach Manager</b>
<b>Explanation</b>	An Attach Manager is registered for this service, but could not be instructed to start a new replica. This might happen occasionally due to synchronization problems.
<b>Action</b>	If this error happens only rarely, do not worry about it. If it happens more often, or even prevents your automatic startup system from working correctly, contact Software AG Support.
<b>ETBM0068</b>	<b>Parameter processing successful</b>
<b>Explanation</b>	During broker startup, configuration file parameters have been successfully processed for the correct syntax.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0079</b>	<b>Loading kernel security module</b>
<b>Explanation</b>	During startup, the broker kernel loads the kernel security module. <ul style="list-style-type: none"><li>■ If the USRSEC module was not loaded successfully, the following output is displayed: ETBD0286 Diagnostic Values:<ul style="list-style-type: none"><li>■ ErrorText: The specified module could not be found.</li><li>■ ExitName: usrsec.[dll   so   sh ]</li><li>■ EntryPoint: usrsec</li></ul></li></ul>
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0071</b>	<b>NUM-SHORT-BUFFER available again</b>
<b>Explanation</b>	The shortage for NUM-SHORT-BUFFER is solved. Short buffers are available again.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0100</b>	<b>SAG EntireX Broker</b>
<b>Explanation</b>	This message is issued at broker startup time.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0101</b>	<b>Broker Initializing</b>
<b>Explanation</b>	The Broker startup procedure has begun.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0102</b>	<b>Broker Attributes Reading</b>
<b>Explanation</b>	During startup, the Broker is reading the resource definitions in the DEFAULTS=BROKER section of the attribute file.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0103</b>	<b>Allocating KERNEL POOL</b>
<b>Explanation</b>	During startup, the Broker read the attribute file correctly and is now obtaining storage for the resources as defined in the DEFAULTS=BROKER section of the file.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0104</b>	<b>Initializing Structures</b>
<b>Explanation</b>	During startup, the Broker has read the attribute file correctly and obtained the storage needed from the operating system. The Broker is now initializing the internal structures.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0107</b>	<b>Broker Stopped</b>
<b>Explanation</b>	EntireX Broker has shut down, either by shutdown request from the console operator or by an abnormal end.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0109</b>	<b>Starting Worker Tasks</b>
<b>Explanation</b>	During startup, the Broker has read the attribute file, obtained the storage needed from the operating system, initialized the internal structures. This message is issued before any worker task is started.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0111</b>	<b>Starting Timeout Manager</b>
<b>Explanation</b>	During startup, the Broker has read the attribute file, obtained the storage needed from the operating system, initialized the internal structures. This message is issued before the timeout manager is started.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0113</b>	<b>Starting Common Output Manager</b>
<b>Explanation</b>	During startup, the Broker has read the attribute file, obtained the storage needed from the operating system, initialized the internal structures. This message is issued before the common output manager is started.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0121</b>	<b>Common Output Manager stopped</b>
<b>Explanation</b>	The COM task has detected a shutdown request for EntireX Broker. The COM task will shut down immediately.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0123</b>	<b>Timeout Manager Stopped</b>
<b>Explanation</b>	The TOM task has detected a shutdown request for EntireX Broker. The TOM task will shut down immediately.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0129</b>	<b>Not enough space for Reply buffer</b>
<b>Explanation</b>	The EntireX Broker buffer manager could not allocate enough memory for the Reply buffer. The value of startup parameter NUM-COMBUF is responsible for the maximum buffer size.
<b>Action</b>	Try the call again later. Increase the value NUM-COMBUF if the error occurs frequently.
<b>ETBM0136</b>	<b>Common Output Manager started</b>
<b>Explanation</b>	The Broker COM task has started successfully.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0137</b>	<b>Timeout Manager Started</b>
<b>Explanation</b>	The Broker TOM task has started successfully.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0139</b>	<b>Worker Task Started</b>
<b>Explanation</b>	This message is issued for each worker task that is started successfully.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0140</b>	<b>Waiting for Timeout Manager - started</b>
<b>Explanation</b>	Worker task is starting to wait for Timeout Manager to finish processing the current working set.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0141</b>	<b>Waiting for Timeout Manager - stopped</b>
<b>Explanation</b>	Worker task continues after stop waiting for Timeout Manager.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0142</b>	<b>Request processing suspended</b>
<b>Explanation</b>	Task is suspended after getting the FREEZE operator command. See FREEZE under <i>Operator Commands</i> in the z/OS Administration documentation.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0143</b>	<b>Request processing resumed</b>
<b>Explanation</b>	Task is resumed after getting the RUN operator command. See RUN under <i>Operator Commands</i> in the z/OS Administration documentation.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0144</b>	<b>Worker Task Stopped</b>
<b>Explanation</b>	A worker task has detected the shutdown request for EntireX Broker and will stop soon. This message is issued from every worker task.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0160</b>	<b>Broker Version :1: Build :2: :3:</b>
<b>Explanation</b>	Initialization of Broker is started. Version is reported in :1;, Build date and time in :2: and :3:.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0173</b>	<b>EntireX Broker initialization finished</b>
<b>Explanation</b>	All tasks and resources of EntireX Broker are established. The main process waits until the activated processes are finished.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0176</b>	<b>Nucleus has finished initialization</b>
<b>Explanation</b>	The Communicator nucleus has established all processes and resources for the Communicator instances (Receive and Reply tasks).The nucleus returns to the EntireX Broker main task successfully.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0222</b>	<b>Command from Administrator accepted</b>
<b>Explanation</b>	The Broker kernel has received a valid command. The command is logged for statistical purposes.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0235</b>	<b>SHUTDOWN flagged, go down now</b>
<b>Explanation</b>	Shutdown has been requested and the associated indication has been detected.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0330</b>	<b>Subscription license key in use</b>
<b>Explanation</b>	Broker detected a Subscription license key.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0331</b>	<b>Test license key in use</b>
<b>Explanation</b>	Broker detected a Test license key.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0339</b>	<b>License will expire in :1: days</b>
<b>Explanation</b>	The Broker is running with a subscription, emergency or test license key. The license expires in :1: days and Broker will stop.
<b>Action</b>	Get a new license file if license expires soon. If you are using an emergency license, you need to get a new license key.
<b>ETBM0340</b>	<b>Emergency license key in use</b>
<b>Explanation</b>	The Broker is running with an emergency license key.
<b>Action</b>	Get a valid license file.
<b>ETBM0342</b>	<b>ICU data directory not configured</b>
<b>Explanation</b>	Broker checks ICU-related attribute settings. A directory for ICU custom converters was not specified. See attributes ICU-DATA-DIRECTORY and ICU-SET-DATA-DIRECTORY.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0344</b>	<b>Service MAX-UOWS exceeds Broker MAX-UOWS</b>
<b>Explanation</b>	The value of the MAX-UOWS setting for the server exceeds the value of the MAX-UOWS setting for the Broker.
<b>Action</b>	None. This message is for information purposes only. The server's MAX-UOWS value will be reset automatically to the MAX-UOWS value for the Broker.

<b>ETBM0355</b>	<b>Preceding License Key Errors are ignored</b>
<b>Explanation</b>	On z/OS and BS2000, the license check has detected errors. However, these errors will be ignored. Subsequent product-specific license checks may cause a Broker shutdown.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0359</b>	<b>Module EXXLIC used as License Key</b>
<b>Explanation</b>	License module EXXLIC is used for the license check.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0360</b>	<b>License file used as License Key</b>
<b>Explanation</b>	The license file is used for the license check.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0391</b>	<b>ICU Initialization failed</b>
<b>Explanation</b>	Broker was unable to initialize the ICU converter.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0410</b>	<b>X-COM Communicator stopped</b>
<b>Explanation</b>	The XCOM Communicator could not be started.
<b>Action</b>	See the previous error message in the log and correct this problem.
<b>ETBM0428</b>	<b>Windows delayload error</b>
<b>Explanation</b>	A required library is missing or invalid.
<b>Action</b>	A subsequent error message will provide more information.
<b>ETBM0432</b>	<b>Obsolete attribute</b>
<b>Explanation</b>	A configuration file (for instance the Broker attribute file) contains an attribute which is no longer supported.
<b>Action</b>	Edit the configuration file to either delete the obsolete attribute or comment out the attribute.

<b>ETBM0433</b>	<b>Attribute invalid on this platform</b>
<b>Explanation</b>	Broker attribute file contains an attribute that is not valid on this platform.
<b>Action</b>	Edit the attribute file to either delete or comment out the invalid attribute.
<b>ETBM0440</b>	<b>New PSTORE in use</b>
<b>Explanation</b>	PSTORE=COLD was recognized. Broker will initialize the new persistent store.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0456</b>	<b>Accounting file did not open; set to off</b>
<b>Explanation</b>	There was an error in creating a file to write accounting records. Accounting will be disabled and broker will continue to initialize.
<b>Action</b>	Check broker log file for more details.
<b>ETBM0458</b>	<b>Opening accounting file</b>
<b>Explanation</b>	Broker has successfully created/opened the accounting file. Name of the accounting file follows this message.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0464</b>	<b>PSTORE framework ready</b>
<b>Explanation</b>	The persistent store framework was successfully initialized.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0465</b>	<b>RESTART: Sequential OPEN completed</b>
<b>Explanation</b>	The persistent store was successfully opened for restore processing.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0466</b>	<b>RESTART: a group of 1000 UOWs restored</b>
<b>Explanation</b>	Broker reports the progress of the restore procedure in steps of 1,000 units of work. Another 1,000 units of work have been successfully restored.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0467</b>	<b>Initialize PSTORE framework</b>
<b>Explanation</b>	The persistent store framework will be initialized now.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0473</b>	<b>Internal service ignored</b>
<b>Explanation</b>	Broker detected an entry corresponding to a reserved internal service name in the broker attribute file.
<b>Action</b>	Remove the offending service definition from the attribute file.
<b>ETBM0498</b>	<b>Invalid Adabas Command Rejected</b>
<b>Explanation</b>	The receiver task of the NET transport detected an unsupported Adabas command. This command will be rejected with error response 02150022. See Adabas Messages and Codes for response code 22. The Adabas client used the database ID of EntireX by mistake.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0499</b>	<b>Wrong Adabas File Number Rejected</b>
<b>Explanation</b>	The NET communicator detected a wrong Adabas file number in the Adabas control block. This command will be rejected with error response 02150017. See Adabas Messages and Codes for response code 17. The Adabas client used the database ID of EntireX and a wrong file number by mistake.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0500</b>	<b>Transport Ready for Communications</b>
<b>Explanation</b>	The Transport layer initialized properly and is ready for communications. All supported transports will issue this message on success.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0507</b>	<b>Communicator Started</b>
<b>Explanation</b>	The Communicator of the Transport layer is started. All supported transports will issue this message on startup.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0508</b>	<b>Communicator Stopped</b>
<b>Explanation</b>	The Communicator of the Transport layer is stopped. All supported transports will issue this message before termination.
<b>Action</b>	Check the log file for error messages. Ignore this message if shutdown was requested.
<b>ETBM0510</b>	<b>IPV4 socket active. IPV6 not in use</b>
<b>Explanation</b>	The listen socket was established for IPV4.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0511</b>	<b>IPV4/IPV6 socket active</b>
<b>Explanation</b>	The listen socket(s) were established for IPV4 and for IPV6.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0512</b>	<b>AT-TLS controlling mode was requested</b>
<b>Explanation</b>	Attribute <code>CERT - AUTHENTICATION=YES</code> was defined for the listen port. This requires a connection in AT-TLS controlling mode. See <code>CERT - AUTHENTICATION</code> under <i>TCP-specific Broker Attributes</i> .
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0513</b>	<b>IPV6 socket active. IPV4 not in use</b>
<b>Explanation</b>	The listen socket was established for IPV6.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0515</b>	<b>Transport Restart Possible</b>
<b>Explanation</b>	The Communication Manager detected the termination of the Communicator. According to the transport-specific response code, it is possible to restart this transport layer again, but it might be forbidden due to the transport-specific attribute file definitions.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0516</b>	<b>Transport Restart Permitted</b>
<b>Explanation</b>	The Communication Manager detected the termination of the Communicator. According to the transport-specific attribute file definitions, it is permitted to run the restart section of the Communication Manager to try to reestablish this specific transport layer.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0527</b>	<b>OP-CMD CHANGE_LOG_LEVEL Received</b>
<b>Explanation</b>	The operator command interface echoes the incoming command request.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0528</b>	<b>OP-CMD PING Received</b>
<b>Explanation</b>	The operator command interface echoes the incoming command request.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0529</b>	<b>OP-CMD SHUTDOWN Received</b>
<b>Explanation</b>	The operator command interface echoes the incoming command request. EntireX will shut down.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0545</b>	<b>EntireX License Status License expiration date is yyyy/mm/dd . License will expire in nn days - or - License expired on yyyy/mm/dd</b>
<b>Explanation</b>	Indicates the expiration date of your EntireX license. If the expiration date is less than 30 days in the future but greater than 0, you are reminded to contact Software AG Support. If the license has expired, you will not be able to restart.
<b>Action</b>	Contact your local Software AG office or distributor to extend your license.
<b>ETBM0559</b>	<b>Broker locks:</b>
<b>Explanation</b>	This is the output of Broker for operator command <code>DISPLAY ,LOCKS</code> .
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0576</b>	<b>Broker tasks:</b>
<b>Explanation</b>	This is the output of Broker for operator command <code>DISPLAY ,TASK</code> .
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0578</b>	<b>Reset ACEE for SAF-ID ..</b>
<b>Explanation</b>	Operator command <code>RESET</code> has been issued to reset the security context for the specified user ID :1:. The command has been successfully performed.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0579</b>	<b>Security statistics</b>
<b>Explanation</b>	Operator command DSECSTAT has been issued to display the Security statistics providing the number of successful and failed Security authentications and Security authorizations. The command has been successfully performed.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0580</b>	<b>Broker statistics</b>
<b>Explanation</b>	Operator command DSTAT has been issued to display the EntireX Broker statistics providing the total number, the number of active elements, and an optional high watermark for services, clients, servers, conversations and message buffers. The command has been successfully performed.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0581</b>	<b>Broker resource usage</b>
<b>Explanation</b>	Operator command DRES has been issued to display the broker's resource usage for conversations, message buffers, participants, services, topics, the timeout queue, units of work, and the work queue. Usage provides the total number, the number of free elements, and the number of used elements. The command has been successfully performed.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0582</b>	<b>Function completed</b>
<b>Explanation</b>	Indicates the end of the console output.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0593</b>	<b>Attribute will be retired</b>
<b>Explanation</b>	Since transport-specific sections have been introduced, the global attribute is no longer necessary. The transport-specific attribute should be used instead.
<b>Action</b>	Delete the reported global attribute and specify the transport-specific attribute instead.
<b>ETBM0600</b>	<b>Transport Proxy started</b>
<b>Explanation</b>	The transport proxy has been successfully started.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0601</b>	<b>Transport Proxy stopped</b>
<b>Explanation</b>	The transport proxy has been stopped.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0608</b>	<b>Command log file opened:</b>
<b>Explanation</b>	The specified command log output file has been opened.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0609</b>	<b>Command log file closed:</b>
<b>Explanation</b>	The specified command log output file has been closed.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0641</b>	<b>EntireX License Data</b>
<b>Explanation</b>	EntireX licensing data is displayed.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0645</b>	<b>License check completed</b>
<b>Explanation</b>	The license check has been finished without detecting an error.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0657</b>	<b>Broker pool usage:</b>
<b>Explanation</b>	This message provides the response to operator command DP00L.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0667</b>	<b>&lt;various messages generated by the operator command interface&gt;</b>
<b>Explanation</b>	The operator issued a command that returns some messages.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0680</b>	<b>Retry allocation with emergency setting</b>
<b>Explanation</b>	Broker was unable to create the initial set of memory pools with the existing configuration and will attempt to repeat with an emergency configuration.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0716</b>	<b>Dynamic Worker Management enabled</b>
<b>Explanation</b>	Broker has enabled the Dynamic Worker Management.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0717</b>	<b>Dynamic Worker Management disabled</b>
<b>Explanation</b>	Broker has disabled the Dynamic Worker Management.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0720</b>	<b>Operator typed in: :1:</b>
<b>Explanation</b>	Broker received command :1: from the operator console.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0729</b>	<b>PSTORE load finished successfully</b>
<b>Explanation</b>	The Load Broker finished the PSTORE migration successfully.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0730</b>	<b>PSTORE unload finished successfully</b>
<b>Explanation</b>	The Unload Broker finished the PSTORE migration successfully.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0731</b>	<b>PSTORE unload started</b>
<b>Explanation</b>	The Unload Broker started the PSTORE migration.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0732</b>	<b>PSTORE unload stopped</b>
<b>Explanation</b>	The Unload Broker stopped the PSTORE migration.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0733</b>	<b>PSTORE load started</b>
<b>Explanation</b>	The Load Broker started the PSTORE migration.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0734</b>	<b>PSTORE load stopped</b>
<b>Explanation</b>	The Load Broker stopped the PSTORE migration.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0742</b>	<b>Broker running in ADMIN mode</b>
<b>Explanation</b>	The broker is running in RUN-MODE=ADMIN.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0743</b>	<b>Broker running in STANDARD mode</b>
<b>Explanation</b>	The broker is running in RUN-MODE=STANDARD. This is the default mode.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0744</b>	<b>Broker running in STANDBY mode</b>
<b>Explanation</b>	The broker is running in RUN-MODE=STANDBY.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0745</b>	<b>Change PSTORE-VERSION or set PSTORE=COLD</b>
<b>Explanation</b>	The value of PSTORE-VERSION does not match the version of PSTORE.
<b>Action</b>	Change the value of PSTORE-VERSION to the effective version or rerun Broker with PSTORE=COLD. See PSTORE and PSTORE-VERSION under <i>Broker-specific Broker Attributes</i> .
<b>ETBM0746</b>	<b>Broker running in PSTORE-LOAD mode</b>
<b>Explanation</b>	The broker is running in RUN-MODE=PSTORE-LOAD.
	<b>Note:</b> RUN-MODE options PSTORE-LOAD and PSTORE-UNLOAD are deprecated and will not be supported in the next version of EntireX.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0747</b>	<b>Broker running in PSTORE-UNLOAD mode</b>
<b>Explanation</b>	The broker is running in RUN-MODE=PSTORE-UNLOAD.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0749</b>	<b>Takeover sequence finished successfully</b>
<b>Explanation</b>	The Standby Broker successfully performed the takeover sequence. It will change to RUN-MODE=STANDARD.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0745</b>	<b>Change PSTORE-VERSION or set PSTORE=COLD</b>
<b>Explanation</b>	The value of PSTORE-VERSION does not match the version of PSTORE.
<b>Action</b>	Change the value of PSTORE-VERSION to the effective version or rerun Broker with PSTORE=COLD. See PSTORE and PSTORE-VERSION under <i>Broker-specific Broker Attributes</i> .  The persistent store must be empty (all units of work consumed) before you can change the PSTORE-VERSION. The PSTORE contains UOWs created with a lower PSTORE-VERSION. This error may occur during upgrade to EntireX version 10.8 or above, as 10.8 and above only support PSTORE-VERSION 5.
<b>ETBM0750</b>	<b>Broker ready for communications</b>
<b>Explanation</b>	Broker is ready.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0753</b>	<b>Check status of partner Broker</b>
<b>Explanation</b>	Standby Broker will check the status of the Standard Broker.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0754</b>	<b>Partner Broker is alive</b>
<b>Explanation</b>	Standby Broker was checking the status of the Standard Broker. The Standard Broker responded to Standby Broker's request. Standard Broker is up and running.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0757</b>	<b>Takeover sequence started</b>
<b>Explanation</b>	The Standby Broker is starting the takeover sequence to restore the persistent store data of the Standard Broker in its own address space.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0758</b>	<b>Takeover sequence stopped</b>
<b>Explanation</b>	The Standby Broker is stopping the takeover sequence.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0793</b>	<b>:1:</b>
<b>Explanation</b>	This is the output of operator command <code>DISPLAY ,APPMON</code> .
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0794</b>	<b>:1:</b>
<b>Explanation</b>	This is the output of operator command <code>DISPLAY ,SIZES</code> .
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0795</b>	<b>Number of requests: :1:</b>
<b>Explanation</b>	This is the output of operator command <code>DISPLAY ,REQ</code> .
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0804</b>	<b>:1: TRACE-LEVEL changed to :2:</b>
<b>Explanation</b>	The value of attribute <code>TRACE-LEVEL</code> was changed to <code>:2:</code> for component <code>:1:</code> by operator command.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0805</b>	<b>TRAP-ERROR changed</b>
<b>Explanation</b>	The value of attribute <code>TRAP-ERROR</code> was changed by operator command.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0900</b>	<b>ARF SINGLE-CONV-MODE %s/%s/%s</b>
<b>Explanation</b>	Adabas Replication Services issued command <code>SINGLE-CONVERSATION-MODE</code> to turn on the single conversation mode in Broker.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0902</b>	<b>MAIN THREAD INITIALIZED</b>
<b>Explanation</b>	The Broker successfully initialized the main thread.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0903</b>	<b>Autodetect ARF %s/%s/%s SINGLE-CONV-MODE</b>
<b>Explanation</b>	Broker detected an ARF instance working in SINGLE-CONV-MODE without setting it explicitly. SINGLE-CONV-MODE will be automatically turned on.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0913</b>	<b>Issue shortage Msg on :1: connections</b>
<b>Explanation</b>	EntireX broker will issue a message if :1: file descriptors are in use. Broker determines the number of available file descriptors during startup. Attribute PERCENTAGE-FOR-CONNECTION-SHORTAGE-MESSAGE defines the percentage of a high watermark. Broker writes this message to the log to inform about this high watermark.  Broker writes warning <a href="#">ETBW0916</a> to the log (and to the console on z/OS and BS2000) when this high watermark has been reached. It is still possible to establish new TCP/IP connections, but there is a risk of running out of available file descriptors. No new TCP/IP connection can be established if the maximum has been reached.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0914</b>	<b>Max %d connections possible</b>
<b>Explanation</b>	This message informs you about the maximum number of possible connections.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0925</b>	<b>Timeout Manager cleanup started</b>
<b>Explanation</b>	The Timeout Manager starts to clean up resources that became obsolete.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0926</b>	<b>Timeout Manager cleanup stopped</b>
<b>Explanation</b>	The Timeout Manager stopped cleaning up resources that became obsolete.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0944</b>	<b>Attribute change: %s=%s</b>
<b>Explanation</b>	The change of a Broker attribute was requested. It will be modified in core and in the attribute file.
<b>Action</b>	None. This message is for information purposes only.

<b>ETBM0950</b>	<b>Enable ETBCOM to manage trace data</b>
<b>Explanation</b>	The ETBCOM task will be started due to attributes TRMODE=WRAP or TRACE-FILE-SIZE. See TRMODE and TRACE-FILE-SIZE under <i>Broker-specific Broker Attributes</i> .
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0979</b>	<b>sd :1: is using AT-TLS</b>
<b>Explanation</b>	SSL socket descriptor :1: received a connect request. The AT-TLS handshake has been finished successfully.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0980</b>	<b>sd :1: ioctl USER ID :2:</b>
<b>Explanation</b>	SSL socket descriptor :1: received a connect request. The AT-TLS handshake has been finished successfully. Broker retrieved a certificate for this connection. Partner user ID :2: is associated with this connection and was returned by ioctl.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBM0984</b>	<b>sd :1: CERT USER ID :2:</b>
<b>Explanation</b>	SSL socket descriptor :1: received a connect request. The AT-TLS handshake has been finished successfully. Broker retrieved a certificate for this connection. User ID :2: is associated with this certificate.
<b>Action</b>	None. This message is for information purposes only.

# 65 Message Class ETBW - Broker Log and Console - Unit of Work/Persistence Messages

---

This page explains unit of work and persistence messages from the EntireX Broker Log and Console. These messages have the format:

ETBWnnnn

where ETBW is the message class, and

*nnnn* is the message number in the range 0000-9999

<b>ETBW0313</b>	<b>Broker RESTART failed</b>
<b>Explanation</b>	During broker startup, an error was detected during the restart processing phase.
<b>Action</b>	Examine the EntireX Broker log. Determine the cause of the error. Correct the error and restart the Broker. If the cause cannot be determined, contact Software AG Support.
<b>ETBW0314</b>	<b>API: UOW status invalid</b>
<b>Explanation</b>	The unit of work status code is not a recognized value.
<b>Action</b>	This is probably an internal EntireX Broker error. Contact Software AG Support.
<b>ETBW0317</b>	<b>PSI: Persistent Store termination failed</b>
<b>Explanation</b>	An attempt to shut down the persistent store failed.
<b>Action</b>	None.

<b>ETBW0354</b>	<b>EntireX License Key Error</b>
<b>Explanation</b>	Your EntireX License has expired.
<b>Action</b>	Contact your local Software AG office or distributor to extend your license.
<b>ETBW0426</b>	<b>Start of ETB_SHUTDOWN thread failed</b>
<b>Explanation</b>	UNIX/Windows only. The "etbnuc" process encountered an error while creating shutdown thread. Broker could not be initialized.
<b>Action</b>	Contact Software AG Support.
<b>ETBW0506</b>	<b>** Communicator not available anymore **</b>
<b>Explanation</b>	The Communication Manager of the transport layer stops due to unrecoverable errors, exceeded retry limit or shutdown.
<b>Action</b>	Check the log file for error messages. Ignore this warning if shutdown was requested.
<b>ETBW0517</b>	<b>Terminate Restart Handling</b>
<b>Explanation</b>	The Communication Manager did not succeed in running the transport-specific Communicator. All attempts to restart the Communicator were not successful.
<b>Action</b>	Check the log file for error messages.
<b>ETBW0521</b>	<b>Unexpected Communicator Nucleus Status</b>
<b>Explanation</b>	A component of the transport layer detected an unexpected status and will stop immediately.
<b>Action</b>	Check the log file for error messages or shutdown.
<b>ETBW0526</b>	<b>Broker kernel not running with Security</b>
<b>Explanation</b>	An operator command was issued that interacts with Broker's security component. However, security was not activated for this Broker.
<b>Action</b>	Do not issue security relevant operator commands without activating security.
<b>ETBW0537</b>	<b>Ambiguous: CONVERSION and TRANSLATION</b>
<b>Explanation</b>	Broker detected that attributes of the indicated service specify both TRANSLATION and CONVERSION parameters. Broker ignores the TRANSLATION parameter and continues with initialization.
<b>Action</b>	For a full migration from TRANSLATION to CONVERSION, edit the Broker attribute file and delete the line containing TRANSLATION= for this service in DEFAULTS=SERVICE.

<b>ETBW0595</b>	<b>This PSTORE-TYPE is not supported</b>
<b>Explanation</b>	This PSTORE -TYPE is not supported on this operating system.
<b>Action</b>	Enter valid PSTORE -TYPE in the Broker attribute file. See PSTORE -TYPE under <i>Broker-specific Broker Attributes</i> .
<b>ETBW0607</b>	<b>Command logging switched off</b>
<b>Explanation</b>	Command logging was requested. However, it is not possible to switch on command logging due to configuration errors.
<b>Action</b>	Fix the problem and switch on command logging.
<b>ETBW0616</b>	<b>CPU limit reached</b>
<b>Explanation</b>	The CPU time of the task is exceeded. Broker received the interrupt from the operating system and will go down.
<b>Action</b>	Specify a TIME=1440 parameter for the JCL EXEC statement of the Broker to run Broker without CPU limit.
<b>ETBW0618</b>	<b>Transport not active</b>
<b>Explanation</b>	The transport-specific operator command cannot be executed. The transport is currently not active.
<b>Action</b>	Issue the operator command when the transport is active.
<b>ETBW0636</b>	<b>No assignment for PARSE Report</b>
<b>Explanation</b>	The PARSE report was requested but the file assignment is missing.
<b>Action</b>	Specify DD name ETBAREP to assign the PARSE report file.
<b>ETBW0640</b>	<b>EntireX License Key Warning</b>
<b>Explanation</b>	A warning occurred while processing the EntireX License file. Additional error test will provide more information.
<b>Action</b>	Consult the additional error text and take appropriate action.
<b>ETBW0663</b>	<b>No assignment for LICENSE Report</b>
<b>Explanation</b>	Under z/OS and BS2000, the license is printed during startup. However, the assignment for the license report output file is missing.
<b>Action</b>	Assign the license report output file.

<b>ETBW0684</b>	<b>Cannot make Broker non-swappable</b>
<b>Explanation</b>	Broker not APF-authorized.
<b>Action</b>	Ensure that all load libraries in the Broker kernel steplib are APF-authorized.
<b>ETBW0686</b>	<b>Requested service(s) not found</b>
<b>Explanation</b>	Shutdown service failed. The service was not used by servers.
<b>Action</b>	None.
<b>ETBW0786</b>	<b>CONVERSION=SAGTRPC ignored. CONVERSION=SAGTCHA used.</b>
<b>Explanation</b>	An incorrect character conversion configuration for a broker service (CLASS, SERVER and SERVICE) was detected and corrected. The broker service is logged in the preceding message.
<b>Action</b>	Correct the Broker attribute file. See <i>Broker's Mechanism for Choosing the Character Conversion Approach</i> under <i>Introduction to Internationalization</i> .
<b>ETBW0809</b>	<b>No assignment for CONFIG Report</b>
<b>Explanation</b>	The CONFIG report was requested but the file assignment is missing.
<b>Action</b>	Specify DD name ETBCREP to assign the CONFIG report file.
<b>ETBW0811</b>	<b>No assignment for MODULE Report</b>
<b>Explanation</b>	The MODULE report was requested but the file assignment is missing.
<b>Action</b>	Specify DD name ETBMREP to assign the MODULE report file.
<b>ETBW0916</b>	<b>:1: of max :2: connections in use</b>
<b>Explanation</b>	The defined percentage value defined with broker attribute PERCENTAGE-FOR-CONNECTION-SHORTAGE-MESSAGE has been reached. :1: represents the number of connections currently in use. :2: displays the maximum number of possible connections.
<b>Action</b>	None. This message is for information purposes only.
<b>ETBW0940</b>	<b>ARF SINGLE-CONV-MODE and PSTORE=NO</b>
<b>Explanation</b>	This may indicate a configuration problem with Broker. Adabas Event Replication usually needs a Broker with a persistent store. However, this Broker is currently running without persistent store.
<b>Action</b>	Stop Broker, configure a persistent store and start Broker with PSTORE=COLD or PSTORE=HOT. Ignore this warning if no persistent store is needed.

**ETBW0947**            **No assignment for TASK Report**

**Explanation**        The TASK report was requested but the file assignment is missing.

**Action**                None.

**ETBW0952**            **TRANSPORT=SSL detected**

**Explanation**        Direct SSL/TLS support (using GSK) inside the Broker under z/OS is no longer supported.

**Action**                Configure the Broker port in AT-TLS instead. See the following sections in the z/OS Administration documentation:

- *Using IBM's Application Transparent Transport Layer Security (AT-TLS)*
- *Migration from Broker's Direct SSL/TLS Support to AT-TLS*

## 66 Message Class 8000-8999 - User-definable ACI Messages

---

The messages have the format:

*8cccnnnn*

where *8ccc* is the message class in the range 8001-8999, and  
*nnnn* is the message number in the range 0000 - 9999

Error messages in classes starting with 8, that is, in the range of 8001*nnnn* through 8999*nnnn*, are reserved for customer use.

These error messages are given by customer applications with the function `REPLY_ERROR`. See `REPLY_ERROR` under *Broker ACI Functions*.

# 67

## EntireX CICS ABEND Codes

---

The abend codes in this chapter may be produced by RPC clients generated with the COBOL Wrapper for interface type CICS with DFHCOMMAREA calling convention. See *Using the COBOL Wrapper for CICS with DFHCOMMAREA Calling Convention (z/OS and z/VSE)* under *Using the COBOL Wrapper for the Client Side*.

<b>EXX1</b>	<b>Wrong LENGTH parameter for EXEC CICS LINK</b>
<b>Explanation</b>	This abend code is raised by client interface objects. See <i>COBOL Client Applications</i> under <i>Introduction to the COBOL Wrapper</i> . The LENGTH parameter provided to CICS in EXEC CICS LINK command when calling a client interface object is wrong.
<b>Action</b>	Correct your program and provide the correct LENGTH parameter. See <i>The RPC Communication Area (Reference)</i> .
<b>EXX2</b>	<b>Wrong LENGTH parameter for EXEC CICS LINK</b>
<b>Explanation</b>	This abend code is raised by the <i>Generic RPC Services Module COBSRVI</i> . The LENGTH parameter provided to CICS in EXEC CICS LINK command when calling the generic RPC service module COBSRVI is wrong.
<b>Action</b>	Depending on the situation: <ul style="list-style-type: none"><li>■ When you call the generic RPC service module COBSRVI in your COBOL client application, for example for Broker logon/logoff (see <i>Logging on Using Long Broker Passwords (z/OS with Call Interface)</i>), provide the LENGTH of the RPC Communication Area.</li><li>■ When you call a client interface object (see <i>COBOL Client Applications</i> under <i>Introduction to the COBOL Wrapper</i>) and receive this error, contact Software AG Support.</li></ul>

# 68

## Adabas SVC Installation Messages (ADASIP)

---

This page describes all Adabas ADASVC messages. Some of these messages may occur during installation of EntireX. Not all messages are applicable to EntireX.

<b>ADASIP01</b>	<b>SUBSID MACRO ERROR</b>
<b>Explanation</b>	ADASIP received a non-zero return code from the operating system.
<b>Action</b>	The VSE operating system release level is too low for installing Adabas. Refer to the Adabas Installation Manual for the minimum allowed VSE levels.
<b>ADASIP02</b>	<b>UNSUPPORTED VSE RELEASE BASED UPON SUBSID</b>
<b>Explanation</b>	An ADASIP validation check indicates an unsupported operating system level.
<b>Action</b>	The VSE operating system release level is too low for installing Adabas. Refer to the Adabas Installation Manual for the minimum allowed VSE levels.
<b>ADASIP03</b>	<b>NO SYSPARM VALUE SPECIFIED FOR SVC</b>
<b>Explanation</b>	ADASIP could not find a SYSPARM input, and a ZAP has not be applied to the specified SVC.
<b>Action</b>	Either provide the SVC with SYSPARM or apply a ZAP to the specified SVC with ADASIP.
<b>ADASIP04</b>	<b>DEFAULT VALUE USED FOR THE SVC</b>
<b>Explanation</b>	No SYSPARM SVC has been used. ADASIP defaults to using the SVC that has a ZAP applied.
<b>Action</b>	This message is for your information only; no error has occurred.

<b>ADASIP05</b>	<b>NON-NUMERIC DATA FOUND IN SYSPARM FIELD</b>
<b>Explanation</b>	Either SYSPARM or the default ADASIP SVC contains a nonnumeric value.
<b>Action</b>	Correct the specified SYSPARM value, or set the default SVC value to 30.
<b>ADASIP06</b>	<b>INVALID RANGE SPECIFIED FOR THE SVC 31-120</b>
<b>Explanation</b>	ADASIP found an SVC outside the allowed range in SYSPARM or the ADASIP default SVC.
<b>Action</b>	Set the SVC to an unused SVC value within the allowed range. SVC ranges and recommended values are described in the Adabas Installation Manual.
<b>ADASIP07</b>	<b>SVC SPECIFIED NOT WITH VALID RANGE - NO UPSI</b>
<b>Explanation</b>	The value specified for the SVC in the VSE SYSPARM with the UPSI option was incorrect. SVC ranges and recommended values are described in the Adabas Installation Manual.
<b>Action</b>	Correct the UPSI or SVC value, as appropriate.
<b>ADASIP08</b>	<b>ADASVC<sub>vv</sub> WAS NOT FOUND IN THE SVA</b>
<b>Explanation</b>	While performing a VSE load, ADASIP found that the specified level ADASVC was not in the SVA.
<b>Action</b>	Issue the SET SDL for ADASVC <sub>vv</sub> . You may need to relink the Adabas SVC with SVA using the PHASE statement if the Adabas SVC is not found in the Adabas library.
<b>ADASIP09</b>	<b>NO MATCH ON ID - INCORRECT ADASVC LOADED</b>
<b>Explanation</b>	ADASIP found an incorrect SVC version while attempting a load operation.
<b>Action</b>	Relink ADASVC <sub>vv</sub> with the correct SVC module.
<b>ADASIP10</b>	<b>NO KEYWORD SPECIFIED FOR NRIDTES</b>
<b>Explanation</b>	ADASIP found an incorrect NRIDTES keyword.
<b>Action</b>	Respecify the keyword parameter as NRIDTES= <i>nn</i> , where " <i>nn</i> " specifies the number of databases to be supported in the ID table.
<b>ADASIP11</b>	<b>NON-NUMERIC DATA SPECIFIED FOR NRIDTES</b>
<b>Explanation</b>	The ADASIP NRIDTES= keyword parameter specified non-numeric data.
<b>Action</b>	Correct the NRIDTES= data, then resubmit ADASIP.

---

<b>ADASIP12</b>	<b>NO OVERRIDING NRIDTES SPECIFIED</b>
<b>Explanation</b>	The default NRIDTES was used. No error has occurred.
<b>Action</b>	None required. This message is for your information only.
<b>ADASIP13</b>	<b>SVC TABLE ENTRY WAS FOUND TO BE INVALID</b>
<b>Explanation</b>	The SVC number provided by SYSPARM is either not valid, or does not represent either the old or new version of the VSE Adabas SVC. This error can occur if the UPSI statement's C parameter specified 0.
<b>Action</b>	Respecify the UPSI statement, or specify another unused SVC value. Rerun ADASIP.
<b>ADASIP14</b>	<b>GETVIS FAILURE FOR IDT IN SVA</b>
<b>Explanation</b>	The GETVIS of the IDT passed a nonzero return code back to ADASIP, meaning the GETVIS size was insufficient.
<b>Action</b>	Increase the SVA GETVIS size, re-IPL the operating system, and rerun ADASIP.
<b>ADASIP15</b>	<b>ROUTER UNABLE TO INITIALIZE IDT</b>
<b>Explanation</b>	ADASIP received a nonzero return code from the 56 call to the SVC.
<b>Action</b>	Contact Software AG Support.
<b>ADASIP17</b>	<b>INCORRECT SVC SUFFIX AFTER COMMA IN SYSPARM</b>
<b>Explanation</b>	An attempt was made to run this program more than once for the current IPL. A second IDT for the program is not required.
<b>Action</b>	Correct the SYSPARM specification for the two-byte SVC suffix, and rerun the job.
<b>ADASIP18</b>	<b>NON-NUMERIC DATA SPECIFIED FOR DMPDBID</b>
<b>Explanation</b>	The ADASIP DMPDBID keyword parameter contains nonnumeric data.
<b>Action</b>	Correct the DMPDBID specification, and rerun the job.
<b>ADASIP19</b>	<b>DBID CANNOT BE FOUND IN IDTE</b>
<b>Explanation</b>	The ADASIP program could not find an entry for the DMPDBID database in the IDT area.
<b>Action</b>	Either correct the DMPDBID specification or start the specified database, then run ADASIP to perform a "snap" dump of the command queue.

<b>ADASIP20</b>	<b>THE IDT AND SVC HAVE BEEN DUMPED TO SYSLST</b>
<b>Explanation</b>	A request to ADASIP to dump the IDT and then SVC via UPSI 80.
<b>Action</b>	This message is for your information only; no error has occurred.
<b>ADASIP21</b>	<b>NO IDT TABLE WAS FOUND FOR SPECIFIED SVC</b>
<b>Explanation</b>	ADASIP found that the SVC has no address for the IDT.
<b>Action</b>	Specify the correct SVC, or initialize with ADASIP first.
<b>ADASIP22</b>	<b>THE SVC HAS ALREADY BEEN INSTALLED</b>
<b>Explanation</b>	ADASIP found that the same program is being run again.
<b>Action</b>	The SVC is not installed and no IDT table is needed. To reinstall the same SVC, you must first perform a SET SDL.
<b>ADASIP23</b>	<b>THE SVC TABLE CANNOT BE LISTED UNDER DOS/MVT</b>
<b>Explanation</b>	The option to display the SVC table is specified under VSE.
<b>Action</b>	None required. This message is for your information only.
<b>ADASIP24</b>	<b>THE IDT HAS BEEN PAGEFIXED BY USER OPTION</b>
<b>Explanation</b>	UPSI (X'20') was selected to pagefix the IDT in the system GETVIS area.
<b>Action</b>	None required. This message is for your information only.
<b>ADASIP27</b>	<b>ADASVC IS RMODE=ANY</b>
<b>Explanation</b>	ADASIP detected that the Adabas SVC is linked RMODE=ANY.
<b>Action</b>	Relink the Adabas SVC RMODE=24.
<b>ADASIP28</b>	<b>ADASIP IS AMODE=31</b>
<b>Explanation</b>	ADASIP detected that it is AMODE=31.
<b>Action</b>	Relink ADASIP AMODE=24.
<b>ADASIP29</b>	<b>PRODID MACRO FAILURE</b>
<b>Explanation</b>	ADASIP received a nonzero response code from the PRODID DEFINE macro.
<b>Action</b>	Investigate the cause of the error. Correct it and rerun the job.

<b>ADASIP30</b>	<b>ADASVCvv svc INSTALLED</b>
<b>Explanation</b>	ADASIP has installed SVC number svc successfully.
<b>Action</b>	None required.
<b>ADASIP31</b>	<b>address=SVC ADDRESS</b>
<b>Explanation</b>	The SVC has been loaded at the indicated address.
<b>Action</b>	None required. This message is for your information only.
<b>ADASIP32</b>	<b>address=IDT ADDRESS</b>
<b>Explanation</b>	The ID table has been allocated at the indicated address.
<b>Action</b>	None required. This message is for your information only.
<b>ADASIP33</b>	<b>address=ALET TABLE ADDRESS</b>
<b>Explanation</b>	The ALET table has been loaded at the indicated address.
<b>Action</b>	None required. This message is for your information only.
<b>ADASIP34</b>	<b>count=MAXIMUM USER/TARGET COMBINATIONS</b>
<b>Explanation</b>	Total number of client/server combinations within the VSE system.
<b>Action</b>	None required. This message is for your information only.
<b>ADASIP36</b>	<b>address=EXTENDED IIBS ADDRESS</b>
<b>Explanation</b>	The extended IIBs have been loaded at the indicated address.
<b>Action</b>	None required. This message is for your information only.
<b>ADASIP40</b>	<b>VSE SVC svc IS status AM=a-mode RM=r-mode AR=reg-mode SVCT=svc-tab-addr MODT=svc-mod-addr</b>
<b>Explanation</b>	This message occurs when the option to list the SVC table is selected, and specifies the following values:

Value	Description
svc	the VSE SVC number
status	USED or UNUSED
a-mode	AMODE of this SVC, if used (24 or ANY)
r-mode	RMODE of this SVC, if used (24 or ANY)
reg-mode	access register mode of this SVC, if used (Y=yes, N=no)
svc-tab-addr	address of the SVC table entry for this SVC

Value	Description
svc-mod-addr	address of the SVC mode table entry for this SVC, if present

**Action** None required. This message is for your information only.

**Note:** Do not use SVC50, even though it is indicated as “unused”.

**ADASIP41 VSE SVC TABLE AUDIT COMPLETED**

**Explanation** ADASIP has completed listing the VSE SVC table.

**Action** None required. This message is for your information only.

**ADASIP50 THE COMMAND QUEUE HAS BEEN DUMPED TO SYSLST**

**Explanation** ADASIP has completed listing the command queue for the specified database.

**Action** None required. This message is for your information only.

**ADASIP60 ONLY 1 CPU CAN BE ACTIVE DURING ADASIP**

**Action** Use SYSDEF TD, STOP=ALL to stop all but one CPU so that ADASIP can run. Then restart your CPUs again.

**ADASIP61 RERUN ADASIP AFTER USING TDSERV TO STOP CPUS**

**Explanation** Occurs in conjunction with ADASIP60.

**ADASIP62 GETVIS FAILED FOR ADASTUB MODULE**

**Explanation** Not enough SVA storage to load ADASTUB.

**Action** Consult with your system programmer.

**ADASIP63 ADASTUB MODULE LOADED AT address**

**Explanation** Information message indicating module load address.

**ADASIP64 NO MATCH ON ID - INCORRECT ADASTUB LOADED**

**Explanation** ADASTUB phase is incorrect.

**Action** Consult with your system programmer, or contact Software AG.

<b>ADASIP65</b>	<b>ADASTUB SVC TABLE NOT FOUND</b>
<b>Explanation</b>	ADASTUB phase is incorrect.
<b>Action</b>	Consult with your system programmer, or contact Software AG.
<b>ADASIP66</b>	<b>ADASTUB SVC TABLE IS FULL</b>
<b>Explanation</b>	You have more than 10 SVCs active on this VSE machine.
<b>Action</b>	Contact Software AG for information about increasing the table size.
<b>ADASIP67</b>	<b>PAGEFIX FOR ADASIP FAILED</b>
<b>Action</b>	Increase the SETPFIX value and rerun.
<b>ADASIP68</b>	<b>PAGEFREE FOR ADASIP FAILED</b>
<b>Action</b>	Consult with your system programmer.
<b>ADASIP69</b>	<b>TURBO DISPATCHER STUB A C T I V E</b>
<b>Explanation</b>	Adabas Turbo support is now active on this VSE machine.
<b>ADASIP70</b>	<b>VSE SUPERVISOR HOOK INSTALL FAILED</b>
<b>Explanation</b>	Either this version of the VSE/ESA 2 supervisor is not supported, or the vendor installation logic for the first-level interrupt handler is incorrect.
<b>Action</b>	Contact Software AG Support and have message ADASIP72 available.
<b>ADASIP71</b>	<b>LOAD OF MODULE ADASTUB FAILED</b>
<b>Explanation</b>	The ADASTUB module was not found in the LIBDEF SEARCH chain.
<b>ADASIP72</b>	<b>CODE IS : xxx</b>
<b>Explanation</b>	Occurs after message ADASIP70.
<b>ADASIP73</b>	<b>ADANCHOR INCORRECT OR NOT FOUND IN SVA</b>
<b>Explanation</b>	The ADANCHOR module was not found in the SVA; no SET SDL has been done.

<b>ADASIP74</b>	<b>INFO : STUB ACTIVATED BY PREVIOUS ADASIP</b>
<b>Explanation</b>	Adabas Turbo STUB has been installed by a previous ADASIP.
<b>Action</b>	None. This message is for information only.
<b>ADASIP75</b>	<b>ADANCHOR AND ADASTUB NOT DUMPED - NOT ACTIVE</b>
<b>Explanation</b>	When attempting to dump Adabas control blocks with ADASIP, the modules were not dumped because Adabas Turbo support is not active.
<b>Action</b>	None. This message is for information only.
<b>ADASIP76</b>	<b>ADABAS TURBO STUB NOT ACTIVATED DUE TO ERROR</b>
<b>Explanation</b>	An error occurred during the installation of the Adabas Turbo stub.
<b>ADASIP77</b>	<b>THIS ADABAS SVC WILL RUN IN NON-TURBO MODE</b>
<b>Explanation</b>	An error occurred during the installation of the Adabas Turbo stub. This SVC will run in non-Turbo mode from now on.
<b>ADASIP78</b>	<b>VSE TURBO DISPATCHER VERSION nn</b>
<b>Explanation</b>	Version of VSE/ESA version 2 Turbo Dispatcher. 00 indicates TD level of pre-version 4.
<b>Action</b>	None. This message is for information only.

# 69

## ADAS\* (Adabas SVC) System Messages

---

**ADAS00**                    **SIRMVS ( {yyyy - mm - dd}, SM={level}, ZAP={zap-number})**  
**Explanation**            ADASIR has executed.

<i>yyyy-mm-dd</i>	the ADASIR assembly date
<i>level</i>	the maintenance (SM) level
<i>zap-number</i>	the highest zap number applied

**ADAS01**                    **{subsysname} enter number of Adabas V{v} ID table entries (1-{nn})**  
**Explanation**            ADASIR found an invalid ID table entry.  
**Action**                    Enter the decimal ID table value. ADASIR operation continues.

**ADAS03**                    **{subsysname} Adabas V{v} ID table for SVC {svc} initialized**  
**Explanation**            ADASIR has installed the Adabas SVC and acquired the necessary storage successfully.

**ADAS04**                    **{subsysname} Adabas V{v} ID table initialization error**  
**Explanation**            ADASIR detected one of the following possible errors:

- IDT GETMAIN failure
- a nonzero return code from ADASVC on the 56 call
- ADASIR did not set the SSCTSUSE
- the operator terminated ADASIR
- ADASIR detected a non-VS1 environment

**Action**                    ADASIR terminates, freeing any resources acquired.

**ADAS05**                    **{subsysname} Adabas V{v} ID table parameter(s) error**  
**Explanation**            ADASIR found an invalid input parameter. The message may be followed by messages requesting reentry of the input parameters.  
**Action**                    Enter the correct parameter or parameters and rerun ADASIR or enter "no" to end ADASIR operation.

**ADAS06**                    **{subsysname} Enter Adabas V{v} ID table subpool (228 or 241) or "NO" to abort ID table initialization**  
**Explanation**            This message occurs after error ADAS05 and requests that you verify the Adabas Vv ID table subpool where v is the version of Adabas.  
**Action**                    Enter either "228" (subpool 228 / fixed CSA), "241" (subpool 241 / pageable CSA) or enter "no" to end ADASIR operation.

**ADAS07**                    **{subsysname} Enter number of Adabas V{v} ID table entries or "NO" to abort ID table initialization**  
**Explanation**            This message occurs after error ADAS05 and requests that you verify the number of IDT entries.  
**Action**                    Enter a value ranging one to four digits representing the IDT entry count or enter "no" to end ADASIR operation.

**ADAS08**                    **{subsysname} Enter Adabas V{v} SVC number (200-255) or "NO" to abort ID table initialization**  
**Explanation**            This message occurs after error ADAS05 and requests that you verify the SVC number for the version of Adabas specified.  
**Action**                    Enter a three-digit SVC value ranging 200-255 or enter "no" to end ADASIR operation.

**ADAS09**                    **{subsysname} Adabas V{v} SVC {svc} table entry at {svc-addr} invalid is {bad-entry bad-entry} should be {good-entry good-entry}**  
**Explanation**            This and any associated ADASnn messages occur when ADASIR finds an incorrect SVC table entry or when message ADAS14 was answered with "p" (prompt option). The variable values in the message have the following meanings:

<i>v</i>	version of Adabas
<i>svc</i>	SVC number
<i>svc-addr</i>	address of the SVC table entry
<i>bad-entry</i>	current SVC table entry value in error
<i>good-entry</i>	desired SVC table entry value

**Action**                    ADASIR follows this message with message ADAS10 asking if the SVC entry in error should be changed to the desired value.

**ADAS10** {subsysname} should SVC table entry be changed ('Y') or should Adabas ID table initialization be aborted ('N')

**Explanation** This message occurs after message ADAS09 and requests that you confirm a change of the SVC table entry in error to a desired value proposed by ADASIR.

**Action** Enter "Y" (yes) to update the SVC entry. Entering any other value leaves the SVC entry as it was.

**ADAS11** {subsysname} Adabas V{v} ID table for SVC {svc} initialized with {cccc} entries  
 IDT:{address} IDTExt:{address} FIIBS:{address} RClass:{class} SSCT:{address}  
 SVC:{address} VRS:{vrs} DATE:{date}

**Explanation** SVC with the number *svc* has been installed and the ID table storage for a count of *cccc* entries was successfully allocated. The addresses of the SVC, major CSA data structures, the SAF class name for authorization and the release and assembly date for the SVC are also provided in the message.

**Action** No action is required for this informational message.

**ADAS12** {subsysname} Adabas V{v} ID table initialization error {n}

**Explanation** ADASIR detected error *n*, where *n* is one of the following:

1	The GETMAIN for the ID table was unsuccessful.
2	The Adabas SVC request to initialize the ID table returned a nonzero return code. Probable cause is that the subsystem name in the IEFSSNxx member of SYS1.PARMLIB does not match the contents of ADASVC + x'28'.
3	The Adabas SVC request to initialize the ID table did not set the correct value in the SSCT. Probable cause is an incorrect SVC number.
4	The operator terminated initialization.
7	The SVC table entry for the Adabas SVC does not contain the address of the Adabas SVC.
10	SVCUPDTE macro failure.
11	The GETMAIN for the FIIBS and IDT extension tables was unsuccessful.

**Action** Correct the error condition and re-IPL (if necessary) or rerun ADASIP.

**ADAS13** {subsysname} leave message ADAS11 or ADAS12 (N or Y)

**Explanation** ADASIR keeps the display of the previous ADAS11 or ADAS12 message on the screen if you specify "Y"; otherwise, the message display is removed and lost.

**Action** Enter "Y" to keep the message display; otherwise, the message is removed.

**ADAS14**                    **{subsysname} prompt operator to update SVC table entry N or P**  
**Explanation**            This message asks whether the operator should be prompted to update the SVC table entry (P) or not (N).  
**Action**                    Enter "P" to prompt the operator for the SVC table entry; messages ADAS09 and ADAS10 occur when "P" is entered. Enter "N" (no prompt) to let ADASIR select the SVC value; message ADAS15 occurs when "N" is entered.

**ADAS15**                    **{subsysname} SVC {svc} table entry changed without prompting operator**  
**Explanation**            SVC *svc* was changed without a prompt being sent to the operator.

**ADAS16**                    **Existing ADASVC {svc} uses subsystem {subsys}**  
**Explanation**            ADASIP is being used to reinstall a copy of the Adabas SVC. Either the specified subsystem is currently being used by another SVC, or the specified SVC currently specifies a different subsystem.  
**Action**                    If the error relates to the specified subsystem, it is followed by user ABEND 435. If the error relates to the specified SVC number it is followed by user ABEND 436. User ABEND 436 may be overridden by the ADASIP FORCE=Y parameter.

**ADAS17**                    **IDT for SVC {svc} has active IDTE for target {target}**  
**Explanation**            ADASIP is being used to reinstall a copy of the Adabas SVC. The IDT being used by the currently installed SVC has a possibly active target as indicated by an active IDTE. There is one message for each such target.  
**Action**                    It is followed by user ABEND 437. This ABEND may be overridden by the ADASIP FORCE=Y parameter.

**ADAS20**                    **At {address}, {length} bytes {action} {area-description}**  
**Explanation**            When ADASIP refreshes an existing Adabas SVC, the common storage area (CSA) associated with the old SVC load module and its associated IDT-related structures is released. If a PLXCB is found, its components are released as well. This message appears for each attempt to release storage:

<i>address</i>	CSA area address, in hexadecimal
<i>length</i>	CSA area length, in hexadecimal
<i>action</i>	One of the following: CSA RELEASED RELEASE FAILED

<i>area-description</i>	One of the following: Replaced SVC IDTH / IDT / IIBS Cluster Segment PLXCB Base PLXCUSER Segment SMP Segment Fat IIBS IDTH / IDTE IDT Extension SVC Fixed Area
-------------------------	--

- ADAS33**      **Security subsystem denied authorization**  
**Security subsystem or APF authorization is required**  
**APF authorization is required**  
**Security subsystem error SAF/Ret/Rsn SAF**  
**{return-code}/{security-subsystem-return-code}/{security-subsystem-reason-code}**
- Explanation**      The nucleus attempted to initialize or access an ADASVC function that required authorization.
- Action**      Provide the appropriate authorization. If the message indicates a security subsystem error, contact your security administrator or your Software AG technical support representative for assistance.
- 
- ADAS34**      **Invalid pointer SAGVT**  
**Invalid pointer to SAGVT at {addr} cleared**  
**{hex-storage-bytes-0-15}**  
**{hex-storage-bytes-16-31}**
- Explanation**      The Software AG Vector Table (SAGVT) is an internal z/OS CSA structure anchored in a CVT-based field assigned by IBM to Software AG. During SVC installation and initialization, Adabas SVC processing found an entry in Software AG's assigned anchor slot that did not point to a valid SAGVT. This may be because another vendor's product is using Software AG's assigned slot or the storage was corrupted.
- The invalid address and 32-bytes of storage at that address are dumped and included in the message to aid in problem determination. The SAGVT anchor slot is cleared. Expect a subsequent [ADAS35](#) message as a new SAGVT is installed.
- This message appears in red on the operator's console and does not scroll off the display.
- Action**      Contact your Software AG technical support representative.

<b>ADAS35</b>	<b>SAGVT {{installed}} {reinstalled}}</b>
<b>Explanation</b>	<p>The Software AG Vector Table (SAGVT) is an internal z/OS CSA structure anchored in a CVT-based field assigned by IBM to Software AG. During SVC installation and initialization, Adabas SVC processing did not find a usable SAGVT.</p> <p>If the IBM-assigned pointer to the SAGVT is zero, a new SAGVT is allocated and installed.</p> <p>If the IBM-assigned pointer to the SAGVT identifies a SAGVT version older than the one known to the installing ADASVC program, the SAGVT is reinstalled, replacing the older one.</p>
<b>Action</b>	No action is required for this informational message.
<b>ADAS36</b>	<b>Service ABTERM resource manager task term cleanup</b>
<b>Explanation</b>	A z/OS resource manager recovery routine was entered after a server address space ABEND to POST any incomplete commands and release the IDTE.
<b>Action</b>	No action is required for this informational message.
<b>ADAS37</b>	<b>ENFReq {Listen   Delete} event 53 return code {rc}</b>
<b>Explanation</b>	A non-zero return code was received from an ENFREQ request to activate or delete a z/OS Event Notification Facility (ENF) exit that detects time zone and leap second changes. The return code ( <i>rc</i> ) is given in the message.
<b>Action</b>	Examine the ENFREQ return code description in IBM documentation. If the cause is not clear, notify your Software AG technical support representative.
<b>ADAS39</b>	<b>ADADSP DBID {dbid} SVC {svc} AbTerm resource manager {AddrSpc term   Task term   cleared ALET}</b>
<b>Explanation</b>	An ADADSP subtask in ADACOM failed such that it did not clean up the IDTH prefix entry for a PLXCB dataspace. The Resource Manager routine attempted recovery at either address space or task termination. If an ALET for this DBID/SVC combination was found in the IDTH prefix entry, the entry is cleared.
<b>Action</b>	Restart the failed ADACOM subtasks and any affected nuclei. Contact your Software AG technical support representative if the reason for the termination is unclear.

# 70

## Software AG Licensing Messages

---

The messages in this document may be produced by Software AG mainframe license processing or when using the license utility, LICUTIL.

**MLC1001**                    **CPU-ID {cpuid} is not defined in your product license**

**Explanation**            The CPU ID listed in the message (*cpuid*) is not defined in your product license. Either your license file is invalid or you have attempted to run the Software AG mainframe product on a machine for which it is not licensed.

**Action**                    Install and run the Software AG product on the machine for which it is licensed. If the problem persists, contact your Software AG sales representative for assistance.

**MLC1002**                    **LPAR name {lparname} is not defined in your product license**

**Explanation**            The LPAR name listed in the message (*lparname*) is not defined in your product license. Either your license file is invalid or you have attempted to run the Software AG mainframe product on a machine for which it is not licensed.

**Action**                    Install and run the Software AG product on the machine for which it is licensed. If the problem persists, contact your Software AG sales representative for assistance.

**MLC1003**                    **Machine capacity {value} higher than MSUs in your product license**

**Explanation**            The machine or the partition capacity (*value*) of the CEC or LPAR respectively on which you have attempted to install and run the Software AG mainframe product exceeds the capacity allowed in your product license. Either your license file is invalid or you have attempted to run the Software AG mainframe product on a machine for which it is not licensed.

**Action**                    Contact your Software AG sales representative for assistance.

<b>MLC1004</b>	<b>The product license will expire on {date}</b>
<b>Explanation</b>	This warning message provides the date (YYYY/MM/DD) when the license will expire for this Software AG mainframe product. The product cannot be started with the current product license after this date. For example, an expiration date of 2018/09/05 indicates that you can still work on 2018/09/05 until 23:59 (local time) but need a new license from the next day (2018/09/06).
<b>Action</b>	No action is required for this warning message. However, you should contact your Software AG sales representative to obtain an updated license soon.
<b>MLC1005</b>	<b>We assume CPU-ID {cpuid} as your DR or DR testing environment</b>
<b>Explanation</b>	The CPU ID listed in the message ( <i>cpuid</i> ) is not defined in your product license. Therefore, we assume that you are running in a disaster recovery environment.
<b>Action</b>	If you are running in a disaster recovery environment, no action is required for this warning message. If you are not running in a disaster recovery environment, contact your Software AG sales representative to obtain an updated license.
<b>MLC2001</b>	<b>The product license is invalid</b>
<b>Explanation</b>	Your product license is invalid.
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC2002</b>	<b>The product license key is invalid</b>
<b>Explanation</b>	The license file for the Software AG mainframe product is invalid.
<b>Action</b>	Verify that the license file was transferred correctly to the mainframe host and that it is still in ASCII format. If the problem persists, contact your Software AG sales representative for assistance.
<b>MLC2003</b>	<b>The product license is not for {value}</b>
<b>Explanation</b>	The license file for the Software AG mainframe product is not for the operating system (OS), product code, or product version listed in the message ( <i>value</i> ).
<b>Action</b>	Use the correct license file. If the problem persists, contact your Software AG sales representative for assistance.
<b>MLC2004</b>	<b>The product license has expired on {date}</b>
<b>Explanation</b>	The product license has expired. The date (YYYY/MM/DD) it expired is given in the message ( <i>date</i> ).
<b>Action</b>	Contact your Software AG sales representative for assistance.

---

<b>MLC2005</b>	<b>Tag missing in product license: {tagname}</b>
<b>Explanation</b>	The tag with the name listed in the message ( <i>tagname</i> ) is missing in your product license.
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC2006</b>	<b>Invalid tag value in product license: {tagname}</b>
<b>Explanation</b>	The value of the tag with the name listed in the message ( <i>tagname</i> ) is invalid in your product license.
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC2007</b>	<b>Current CPU-ID not found for product license check</b>
<b>Explanation</b>	The CPU ID of the CPU on which the product license check was run is not found in the license file.
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC2008</b>	<b>The number of MSU values in the product license is incorrect</b>
<b>Explanation</b>	The machine capacity covered by the product license is incorrect.
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC2009</b>	<b>ExtendedRights setting {value} not allowed under this system</b>
<b>Explanation</b>	The ExtendedRights setting listed in the message ( <i>value</i> ) is not supported by your system.
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC2010</b>	<b>Soft capping is not allowed with ExtendedRights {value}</b>
<b>Explanation</b>	Your product license does not allow soft capping with the ExtendedRights setting listed in the message ( <i>value</i> ).
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC2011</b>	<b>Defined hardware class in the license exceeded {value}</b>
<b>Explanation</b>	The hardware class (PriceQuantity) in your product license is too small for the current machine ( <i>value</i> ).
<b>Action</b>	Contact your Software AG sales representative for assistance.

<b>MLC2012</b>	<b>The number of zIIPs ({value}) exceeds the license definition</b>
<b>Explanation</b>	The number of zIIP processors in the current machine exceeds the number of zIIPs (PriceQuantity) in your product license.
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC2013</b>	<b>The number of zIIP values in the product license is incorrect</b>
<b>Explanation</b>	The number of zIIP values (zIIPs) in your product license does not match with the number of LPAR values (LPARs).
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC3001</b>	<b>Invalid LCPCB length</b>
<b>Explanation</b>	The license check routine has been incorrectly called.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3002</b>	<b>Work area too small</b>
<b>Explanation</b>	The size of the work area for the license check routine is too small.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3003</b>	<b>Invalid function code</b>
<b>Explanation</b>	The license check routine has been incorrectly called.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3004</b>	<b>Invalid operating system</b>
<b>Explanation</b>	The ID of the operating system passed through the license check routine is invalid.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3005</b>	<b>Invalid product code</b>
<b>Explanation</b>	The product code passed through the license check routine is invalid.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3006</b>	<b>Invalid product version</b>
<b>Explanation</b>	The product version passed through the license check routine is not numeric.
<b>Action</b>	Contact your Software AG support representative for assistance.

---

<b>MLC3007</b>	<b>Invalid current date</b>
<b>Explanation</b>	The current date passed through the license check routine is invalid. The date must be in the format <i>yyyy-mm-dd</i> . The dash (-) delimiters are not checked but the numbers must be a valid year, month and day, respectively.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3008</b>	<b>Tag not found</b>
<b>Explanation</b>	The license check routine cannot find the requested XML tag.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3009</b>	<b>Component Id tag not found</b>
<b>Explanation</b>	The license check routine cannot find the XML tag <code>Component Id</code> .
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3010</b>	<b>Invalid search tag</b>
<b>Explanation</b>	The XML search tag requested by the license check routine is invalid.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3011</b>	<b>Insufficient I/O area size</b>
<b>Explanation</b>	The size of the I/O area for the license check routine is too small.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3012</b>	<b>Output record length too small</b>
<b>Explanation</b>	The length of the output record for the license check routine is too small.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC3013</b>	<b>Error message text not found</b>
<b>Explanation</b>	The license check routine cannot find the text that belongs to the requested error message.
<b>Action</b>	Contact your Software AG support representative for assistance.

<b>MLC3014</b>	<b>Too many errors occurred</b>
<b>Explanation</b>	The license check routine detected too many errors. Some messages are lost.
<b>Action</b>	Contact your Software AG support representative for assistance.
<b>MLC9001</b>	<b>License exceeds maximum size of 8000</b>
<b>Explanation</b>	Your license file is too large.
<b>Action</b>	Contact your Software AG sales representative for assistance.
<b>MLC9002</b>	<b>Error opening license file input</b>
<b>Explanation</b>	An error occurred during an attempt to open the license file input.
<b>Action</b>	Investigate the cause of the error, paying special attention to the corresponding error messages produced by the operating system. Contact your Software AG sales or support representative for assistance.
<b>MLC9003</b>	<b>Error reading license file input</b>
<b>Explanation</b>	An error occurred during an attempt to read the license file input.
<b>Action</b>	Investigate the cause of the error, paying special attention to the corresponding error messages produced by the operating system. Contact your Software AG sales or support representative for assistance.
<b>MLC9004</b>	<b>Error opening license file assembler output</b>
<b>Explanation</b>	An error occurred during an attempt to open the license file assembler output.
<b>Action</b>	Investigate the cause of the error, paying special attention to the corresponding error messages produced by the operating system. Contact your Software AG sales or support representative for assistance.
<b>MLC9005</b>	<b>Error writing license file assembler output</b>
<b>Explanation</b>	An error occurred during an attempt to write the license file assembler output.
<b>Action</b>	Investigate the cause of the error, paying special attention to the corresponding error messages produced by the operating system. Contact your Software AG sales or support representative for assistance.

---

<b>MLC9006</b>	<b>License converted to assembler output records written to output file</b>
<b>Explanation</b>	The license file was successfully converted to an assembler source module. Output records were written to the output file.
<b>Action</b>	No action is required for this informational message.
<b>MLC9007</b>	<b>Error loading license module {modulename} {errorcode}</b>
<b>Explanation</b>	The LOADLIC function (z/OS only) tried to load a license module from the load library and received an error ( <i>errorcode</i> ) from the operating system.
<b>Action</b>	Correct the LICUTIL input, removing duplicate LICUTIL function calls. Check that the license module ( <i>modulename</i> ) is in the load library, that the correct library is referenced in the JCL, and that the module name is specified correctly in the LOADLIC statement (case sensitive, a blank between LOADLIC and <i>modulename</i> ).
<b>MLC9010</b>	<b>LOADLIC can only be issued once, before any DISPLAY, CHECK, MAKE or READ</b>
<b>Explanation</b>	The LOADLIC function (z/OS only) can only be performed once per LICUTIL session. LOADLIC must not be preceded by the DISPLAY, CHECK or READ function. These functions can only locate the license module <i>after</i> the LOADLIC.
<b>Action</b>	Correct the LICUTIL input, removing duplicate LICUTIL function calls. Change the call order so that the LOADLIC precedes any DISPLAY, CHECK or READ.

## EntireX SAGTOKEN Messages

---

EntireX Broker includes a stub that supports both the TCP/IP and ADALNK transports and can be used with non-Natural applications in TSO or Batch mode. The SAGTOKEN module that is included allows you to set, delete, or display (locally or globally) variables that are used to:

- Set the stublog number, which is used to control tracing.
- Specify which transport is preferred: TCP-NET means use TCP/IP if possible. NET-TCP means use Entire Net-Work if possible.

The messages described in this section are generated by the SAGTOKEN module and displayed at the operator console.

<b>SAGTOK01</b>	<b>Token :1: set to nnnnnnnnnnnnnnn</b>
<b>Explanation</b>	The identified token has been set to the value shown.
<b>Action</b>	This message is informational only.
<b>SAGTOK02</b>	<b>Token Services Error :1: Returned</b>
<b>Explanation</b>	The identified IBM Token Services error has been returned.
<b>Action</b>	Refer to the appropriate IBM documentation.
<b>SAGTOK03</b>	<b>Invalid Command to Token Services</b>
<b>Explanation</b>	An invalid SAGTOKEN command has been received.
<b>Action</b>	Check the command syntax and correct the error.

<b>SAGTOK04</b>	<b>Token Keyword Exceeds Maximum Length of 12</b>
<b>Explanation</b>	SAGTOKEN keywords can be no longer than 12 characters.
<b>Action</b>	Check the keyword specification and correct the error.
<b>SAGTOK05</b>	<b>Not Properly Authorized for Token Services</b>
<b>Explanation</b>	SAGTOKEN is not being executed from an authorized library.
<b>Action</b>	Verify that all libraries in the STEPLIB concatenation are properly authorized.
<b>SAGTOK06</b>	<b>Command Exceeds Maximum Length of 80 Characters</b>
<b>Explanation</b>	Command can be no longer than 80 characters.
<b>Action</b>	Shorten the command to 80 or less characters and rerun the SAGTOKEN program.
<b>SAGTOK07</b>	<b>Invalid Delimiter between operand 2 and 3</b>
<b>Explanation</b>	The delimiter between the second operand and the third operand was not a comma.
<b>Action</b>	Change the command to use a comma as the delimiter after the second operand and rerun the SAGTOKEN program.

# 72

## EntireX Broker Security Server for BS2000

---

These messages are returned by the EntireX Broker Security Server for BS2000 and have the format `SEC $xnnnn$`

where SEC indicates a security message

$x$  indicates the type of message

I information

E error; function cannot be performed

T trace message

$nnn$  is the message number

**SECI0001**            **Broker Security Server V n.n.n started**

**Explanation**        Broker Security Server start up message.

**Action**                None.

**SECI0002**            **Broker Security Server V n.n.n terminated normally**

**Explanation**        Broker Security Server termination message.

**Action**                None.

**SECI0003**            **Broker Security Server V n.n.n terminated with errors**

**Explanation**        Broker Security Server termination message. This message always appears together with a SECE $nnn$  message.

**Action**                None.

<b>SECI0004</b>	<b>Running with FORCE = YES, the security CMP will be newly initialized</b>
<b>Explanation</b>	If the Broker Security Server was started with FORCE='YES' and the security common memory pool was newly initialised the above message is issued.
<b>Action</b>	None.
<b>SECE0001</b>	<b>Unexpected return code from DISMP</b>
<b>Explanation</b>	Server will terminate with dump and a SECT0008 Return Code: rc is issued.
<b>Action</b>	Contact Software AG Support.
<b>SECE0002</b>	<b>Unexpected return code from SOLSIG</b>
<b>Explanation</b>	Server will terminate with dump and a SECT0008 Return Code: rc is issued.
<b>Action</b>	Contact Software AG Support.
<b>SECE0003</b>	<b>Unexpected return code from ENAEI</b>
<b>Explanation</b>	Server will terminate with dump and a SECT0008 Return Code: rc is issued.
<b>Action</b>	Contact Software AG Support.
<b>SECE0004</b>	<b>Unexpected return code from DISEI</b>
<b>Explanation</b>	Server will terminate with dump and a SECT0008 Return Code: rc is issued.
<b>Action</b>	Contact Software AG Support.
<b>SECE0005</b>	<b>Unexpected return code from ENAMP</b>
<b>Explanation</b>	Server will terminate with dump and a SECT0008 Return Code: rc is issued.
<b>Action</b>	Contact Software AG Support.
<b>SECE0006</b>	<b>Unexpected return code from ENAMP</b>
<b>Explanation</b>	Server will terminate with dump and a SECT0008 Return Code: rc is issued.
<b>Action</b>	Contact Software AG Support.
<b>SECE0007</b>	<b>Unexpected return code from REQMP</b>
<b>Explanation</b>	Server will terminate with dump and a SECT0008 Return Code: rc is issued.
<b>Action</b>	Contact Software AG Support.

<b>SECE0008</b>	<b>Unexpected return code from CLEANUP</b>
<b>Explanation</b>	Server will terminate with dump and a SECT0008 Return Code: rc is issued.
<b>Action</b>	Contact Software AG Support.
<b>SECE0009</b>	<b>Unexpected end of security CMP detected</b>
<b>Explanation</b>	An internal error occurred. The server will terminate with dump and a SECI0003 message is issued.
<b>Action</b>	Contact Software AG Support.
<b>SECE0010</b>	<b>Broker Security Server already active</b>
<b>Explanation</b>	The Broker Security Server found an active security common memory pool in the system. The startup process is suppressed.
<b>Action</b>	If there is no other server active in the system, the FORCE parameter may be used to newly initialize the security common memory pool.
<b>SECT0001</b>	<b>Authentication successful</b>
<b>Explanation</b>	This message follows a SECT0013 USERID user ID message.
<b>Action</b>	None.
<b>SECT0002</b>	<b>Authentication failed, password mismatch</b>
<b>Explanation</b>	The user ID is known, the supplied password does not match. This message follows a SECT0013 USERID user ID message.
<b>Action</b>	None.
<b>SECT0003</b>	<b>Authentication failed, password mismatch</b>
<b>Explanation</b>	The user ID is known, no password exists but there was one supplied. This message follows a SECT0013 USERID user ID message.
<b>Action</b>	None.
<b>SECT0004</b>	<b>Authentication failed, user unknown or server not authorized</b>
<b>Explanation</b>	Either the user ID is unknown or the Broker Security Server has no privileges to access the user catalog, e.g. it does not run under a privileged user ID (TSOS). This message follows a SECT0013 USERID user ID message.
<b>Action</b>	None.

<b>SECT0005</b>	<b>Authentication failed, error from encryption</b>
<b>Explanation</b>	The password could not be encrypted. This message follows a SECT0013 USERID user ID message.
<b>Action</b>	None.
<b>SECT0006</b>	<b>Authentication failed, unsupported crypt algorithm</b>
<b>Explanation</b>	The operating system returned an unexpected encryption mode.
<b>Action</b>	None.
<b>SECT0007</b>	<b>Security CMP established successfully</b>
<b>Explanation</b>	The Security Server common memory pool was established and initialized successfully.
<b>Action</b>	None.
<b>SECT0008</b>	<b>Return Code: rc</b>
<b>Explanation</b>	This message always occurs together with a SECEnnn message where rc contains the return code from the corresponding BS2000 macro or Security Server function, respectively.
<b>Action</b>	None.
<b>SECT0009</b>	<b>Security CMP disabled successfully</b>
<b>Explanation</b>	The Security Server common memory pool was disabled and deleted.
<b>Action</b>	None.
<b>SECT0010</b>	<b>Security CMP disabled successfully, CMP kept</b>
<b>Explanation</b>	The Security Server common memory pool was disabled but could be not deleted due to other BS2000 tasks holding the pool.
<b>Action</b>	None.
<b>SECT0011</b>	<b>Authentication failed, reason is unknown</b>
<b>Explanation</b>	The user authentication failed and the Security Server could not determine a reason for that.
<b>Action</b>	None.

<b>SECT0012</b>	<b>Security CMP cleanup done</b>
<b>Explanation</b>	The Security Server cleaned its request queue from not posted authentication requests.
<b>Action</b>	None.
<b>SECT0013</b>	<b>USERID: userID</b>
<b>Explanation</b>	This message occurs together with one of the following messages SECT0001, SECT0002, SECT0003, SECT0004, SECT0005, SECT0006, where userID is the user for which the authentication was done.
<b>Action</b>	None.
<b>SECT0014</b>	<b>ENAMP done</b>
<b>Explanation</b>	The Security Server common memory pool was enabled successfully. This message follows a SECT0008 Return Code: rc message.
<b>Action</b>	None.

# 73

## Message Class XCO - X-COM Console Messages

---

This page explains the Console Messages, which have the format

*XCOnnnns*

where XCO is the error code

*nnnn* is the message number, and

*s* indicates the severity of the error:

E: error; function cannot be performed

I: information

W: warning; potential problem exists

**XCO0003E            ERROR DURING READ OF STARTUP PARMS.**

**Explanation**        Error occurred while attempting to open the file designated by the PARMS DD.

**Action**                Correct and verify that the PARMS DD is pointing to the file containing the startup parameters. Restart Broker.

**XCO0005E            LOAD FOR MODULE :1: FAILED - ABEND.**

**Explanation**        The loading of module :1: failed.

**Action**                Check and verify whether the module :1: is in the library concatenation. If not, add the appropriate library containing the module :1:. Restart Broker.

<b>XCO0007E</b>	<b>WRONG X-COM PARAMETER :1:.</b>
<b>Explanation</b>	The X-COM parameter :1: is incorrect or not specified.
<b>Action</b>	Add or correct the value for the parameter :1:. Restart Broker.
<b>XCO0008E</b>	<b>ADAMPM - WRONG VERSION FOUND.</b>
<b>Explanation</b>	The verification of ADAMPM failed.
<b>Action</b>	Ensure that the correct version of ADAMPM is contained in the library concatenation. Restart Broker.
<b>XCO0009I</b>	<b>X-COM node is initialized.</b>
<b>Explanation</b>	X-COM has initialized the target and is ready for work.
<b>Action</b>	No action required.
<b>XCO0010W</b>	<b>Wrong ECB found.</b>
<b>Explanation</b>	The type of returned event indicator is not valid and will be ignored. X-COM nucleus continues to wait for requests.
<b>Action</b>	Contact Software AG Support.
<b>XCO0011E</b>	<b>X-COM data error.</b>
<b>Explanation</b>	The routine to check X-COM data has detected an inconsistency. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO0012E</b>	<b>USER RET (R15) error.</b>
<b>Explanation</b>	One of the routines called by X-COM nucleus has returned an error. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO0013E</b>	<b>Delete ECB error.</b>
<b>Explanation</b>	An ECB cannot be removed from the wait list. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.

<b>XCO0014E</b>	<b>No ANSWER entry point.</b>
<b>Explanation</b>	The entry point for the reply handler could not be found. X-COM nucleus cannot process any user replies and terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO0015E</b>	<b>APPL ECB throw away.</b>
<b>Explanation</b>	The X-COM nucleus was posted to send the reply to the user but could find the related X-COM data. X-COM nucleus ignores the post and continues to wait for requests.
<b>Action</b>	No action required.
<b>XCO0016I</b>	<b>Operator typed in: :1:.</b>
<b>Explanation</b>	Message confirming operator input.
<b>Action</b>	No action required.
<b>XCO0019E</b>	<b>X-COM parm list wrong.</b>
<b>Explanation</b>	The request or reply handler has returned inconsistent data. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO0020I</b>	<b>X-COM stopped</b>
<b>Explanation</b>	X-COM nucleus is calling the termination handler for shutdown
<b>Action</b>	No action required
<b>XCO0021W</b>	<b>This X-COM is no longer active</b>
<b>Explanation</b>	X-COM nucleus has successfully executed the termination handler
<b>Action</b>	No action required
<b>XCO0022I</b>	<b>X-COM cancel will proceed</b>
<b>Explanation</b>	The operator command XCANCEL to cancel Entire System Server was entered
<b>Action</b>	No action required

<b>XCO0023I</b>	<b>X-COM halted</b>
<b>Explanation</b>	The operator command XHALT was entered. This means that no more calls are possible, but the Entire System Server task is still available and can be restarted with the XSTART command
<b>Action</b>	No action required
<b>XCO0024I</b>	<b>X-COM started</b>
<b>Explanation</b>	The operator command XSTART was entered. This means that calls are now processed again
<b>Action</b>	No action required
<b>XCO0025I</b>	<b>X-COM end will proceed</b>
<b>Explanation</b>	The operator command XEND to end Entire System Server was entered
<b>Action</b>	No action required
<b>XCO0026E</b>	<b>APPL stop error</b>
<b>Explanation</b>	The shutdown handler has returned an error
<b>Action</b>	Contact Software AG Support.
<b>XCO0027E</b>	<b>Timer error</b>
<b>Explanation</b>	Setup of timer services has failed. X-COM nucleus terminates abnormally
<b>Action</b>	Contact Software AG Support.
<b>XCO0028I</b>	<b>Number of active users = :1:</b>
<b>Explanation</b>	Output of command XUSER reporting the current number of user requests
<b>Action</b>	No action required
<b>XCO0029I</b>	<b>Highest number of active users = :1:</b>
<b>Explanation</b>	Output of command XUSER reporting the highest number of user requests
<b>Action</b>	No action required

<b>XCO0030I</b>	<b>Number of active CQE-S = :1:.</b>
<b>Explanation</b>	Output of command XCQES reporting the current number of user requests.
<b>Action</b>	No action required.
<b>XCO0031I</b>	<b>Highest number of active CQE-S = :1:.</b>
<b>Explanation</b>	Output of command XCQES reporting the highest number of user requests.
<b>Action</b>	No action required.
<b>XCO0032I</b>	<b>Parameters for this session:.</b>
<b>Explanation</b>	Output of command XPARAM.
<b>Action</b>	No action required.
<b>XCO0033I</b>	<b>SVC number = :1:.</b>
<b>Explanation</b>	Output of command XPARAM reporting the used SVC number on z/OS or z/VSE.
<b>Action</b>	No action required.
<b>XCO0034I</b>	<b>Node number = :1:.</b>
<b>Explanation</b>	Output of command XPARAM reporting the ESY node number.
<b>Action</b>	No action required.
<b>XCO0035I</b>	<b>CQE number = :1:.</b>
<b>Explanation</b>	Output of command XPARAM reporting the startup parameter NCQE.
<b>Action</b>	No action required.
<b>XCO0036I</b>	<b>NAB number = :1:.</b>
<b>Explanation</b>	Output of command XPARAM reporting the startup parameter NABS.
<b>Action</b>	No action required.
<b>XCO0037I</b>	<b>User-application = :1:.</b>
<b>Explanation</b>	Output of command XPARAM reporting the name of MAIN function.
<b>Action</b>	No action required.

<b>XCO0039I</b>	<b>Total number of commands = :1:.</b>
<b>Explanation</b>	Output of command XSTAT reporting the accumulated number of received user requests.
<b>Action</b>	No action required.
<b>XCO0041E</b>	<b>Invalid operator command.</b>
<b>Explanation</b>	An invalid operator command was entered.
<b>Action</b>	Correct it.
<b>XCO0043E</b>	<b>Error during request of memory.</b>
<b>Explanation</b>	Not enough memory available. X-COM nucleus terminates abnormally.
<b>Action</b>	Check your environment for available memory.
<b>XCO0044E</b>	<b>Error during release of memory.</b>
<b>Explanation</b>	Error in FREEMAIN/FREEVIS/RELM.
<b>Action</b>	Contact Software AG Support.
<b>XCO0045E</b>	<b>OPER command init error.</b>
<b>Explanation</b>	Adabas operator command interface could not be established. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO0046E</b>	<b>Add CQHAECB error.</b>
<b>Explanation</b>	Adabas could not add the command queue to the ECB wait list. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO0047E</b>	<b>Add user ECB error.</b>
<b>Explanation</b>	Adabas could not add the user ECB to the ECB wait list. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.

<b>XCO0048E</b>	<b>WAIT error.</b>
<b>Explanation</b>	The central wait routine has returned an unrecoverable error. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO0050E</b>	<b>MPM20-error.</b>
<b>Explanation</b>	The Terminate-Target call was unsuccessful. Shutdown will continue.
<b>Action</b>	Contact Software AG Support.
<b>XCO0051W</b>	<b>MPM08-error, user gone.</b>
<b>Explanation</b>	The Get-User-Buffer call was unsuccessful. The user is probably not active any longer. Entire System Server purged this request from the queue.
<b>Action</b>	No action required.
<b>XCO0052W</b>	<b>MPM12-error, user gone.</b>
<b>Explanation</b>	The Post-User call was unsuccessful. The user is probably not active anymore. Entire System Server has purged this reply from the queue.
<b>Action</b>	No action required.
<b>XCO0053W</b>	<b>MPM36-OK, user gone.</b>
<b>Explanation</b>	The timeout call (TIME elapsed) for a user was successful. The user is probably not active anymore. Entire System Server has purged this reply from the queue.
<b>Action</b>	No action required.
<b>XCO0054W</b>	<b>MPM36-error, user not gone.</b>
<b>Explanation</b>	The timeout call (TIME elapsed) for a user was unsuccessful. Entire System Server has tried to purge the user, but the user fetched data back at the last moment.
<b>Action</b>	No action required.
<b>XCO0055I</b>	<b>Node currently :1:.</b>
<b>Explanation</b>	Output of command XSTAT. Possible value for :1: are ACTIVE (normal state) or HALTED (node is halted due to operator command XHALT).
<b>Action</b>	No action required.

<b>XCO0057I</b>	<b>OPERATOR ENTRY :1:.</b>
<b>Explanation</b>	Display operator entry status: active or inactive.
<b>Action</b>	No action required.
<b>XCO0061W</b>	<b>CANNOT LOCATE SUBSYSTEM MODULE :1:.</b>
<b>Explanation</b>	The loading of module :1: failed.
<b>Action</b>	Check and verify whether the module :1: is in the library concatenation. If not, add the appropriate library containing the module :1:. Restart Broker.
<b>XCO0062W</b>	<b>Request for active user found, delete old user.</b>
<b>Explanation</b>	There is already an active request for the user requesting a new call. The old session is queued for logoff and the new request has been assigned to a new session. The X-COM nucleus has removed the old resources used on the transport level.
<b>Action</b>	No action required.
<b>XCO0063E</b>	<b>BAD PARM CARD: :1:.</b>
<b>Explanation</b>	The parameter line :1: being currently processed is invalid.
<b>Action</b>	Correct the parameter line :1:. Restart Broker.
<b>XCO0077I</b>	<b>Attached buffers above 16M line.</b>
<b>Explanation</b>	Adabas Attached Buffers are allocated above the 16 MBytes line.
<b>Action</b>	No action required.
<b>XCO0078E</b>	<b>No space for new user X-COM block.</b>
<b>Explanation</b>	The number of free user X-COM blocks has been exceeded. This number depends on the NCQE parameter. Usually a command queue overflow will occur if the number of parallel user requests is exceeded. X-COM nucleus terminates abnormally due to data inconsistencies.
<b>Action</b>	Contact Software AG Support.
<b>XCO0080E</b>	<b>MPM24-error, environment not established.</b>
<b>Explanation</b>	The Establish-Adabas-Environment call has failed. The Entire System Server terminates abnormally.
<b>Action</b>	Contact Software AG Support.

<b>XCO0081E</b>	<b>MPM00-error, target not initialized.</b>
<b>Explanation</b>	The Initialize-Adabas-Target call has failed. The Entire System Server terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO0082I</b>	<b>:1:</b>
<b>Explanation</b>	TRACE data output.
<b>Action</b>	No action required.
<b>XCO0083W</b>	<b>Duplicate WAIT ECB. User cleaned up.</b>
<b>Explanation</b>	After successful return from request handler: The user was already waiting. The new request is accepted and the old command queue entry is purged. The old ECB is reused for the new request.
<b>Action</b>	No action required.
<b>XCO0084W</b>	<b>Multiple active requests. Delete old.</b>
<b>Explanation</b>	After successful return from reply handler: The command queue element of the user is not unique. Another element has been found with the same cross memory post information (z/OS only). The old request has been purged and the reply for the new request has been initiated. This occurs only if a task has been cancelled and immediately restarted and if the same ASCB has been reused.
<b>Action</b>	No action required.
<b>XCO0085W</b>	<b>Reply handling cancelled. Illegal ECB.</b>
<b>Explanation</b>	After successful return from reply handler: the reply cannot be delivered. The command queue element of the user is not unique. Another element has been found with the same cross-memory post information (z/OS only). The reply currently processed is obsolete and has been purged. This occurs only if a task has been cancelled and immediately restarted and if the same ASCB has been reused.
<b>Action</b>	No action required.
<b>XCO0086I</b>	<b>APPL ECB: :1:</b>
<b>Explanation</b>	This message provides information on the address of an Event Control Block. It is issued only in conjunction with other messages.
<b>Action</b>	No action required.

<b>XCO0087E</b>	<b>MPM12-ERROR, CQE is not active.</b>
<b>Explanation</b>	Attempt to perform MPM12 function, but the command queue element (CQE) is not active.
<b>Action</b>	No action required.
<b>XCO0088I</b>	<b>Dead XCOM block killed.</b>
<b>Explanation</b>	XCOM user has gone away; so skip reply processing.
<b>Action</b>	No action required.
<b>XCO0089E</b>	<b>MPM36 impossible because CQE not active.</b>
<b>Explanation</b>	The MPM36 timeout function is skipped, since the command queue element (CQE) is not active.
<b>Action</b>	No action required.
<b>XCO0091I</b>	<b>SVC NOT SPECIFIED, SO THIS XCOM COMMAND IS NOT ALLOWED.</b>
<b>Explanation</b>	This informational message indicates that the XCOM operator command issued to the Broker is not allowed, since the Adabas SVC number for EntireX Broker access was set to zero in the startup parameters.
<b>Action</b>	No action required.
<b>XCO0095E</b>	<b>NCQE IS LOWER THAN NUM-WQE</b>
<b>Explanation</b>	The number of command queue entries (NCQE) specified is less than the number of work queue entries (NUM-WQE) requested. NCQE defines the number of requests active at one time using the NET transport. NUM-WQE defines the number of requests active at one time for all transports.
<b>Action</b>	Ensure that the value for the number of command queue entries (NCQE) is equal to or greater than the number of work queue entries (NUM-WQE). Restart Broker
<b>XCO2001E</b>	<b>Error during READ of startup parms.</b>
<b>Explanation</b>	Bad file format or I/O error during read of startup parameter file.
<b>Action</b>	Parameter file must be a SAM or an ISAM file with variable or fixed record length.

<b>XCO2002E</b>	<b>More than :1: parameter cards not possible.</b>
<b>Explanation</b>	The maximum number :1: of startup parms is exceeded.
<b>Action</b>	Reduce the number of startup parm cards in your parameter file. Check the default values of the parameters to avoid setting the values explicitly.
<b>XCO2003E</b>	<b>LOAD for module :1: failed - abend.</b>
<b>Explanation</b>	Module :1: could not be found. You need Entire System Server or Adabas libraries with module :1: to start the Entire System Server.
<b>Action</b>	Copy the missing module into your library and start the Entire System Server again. Do not rename modules in the load libraries, e.g. from NAME to NAME.OLD. It could create problems during load.
<b>XCO2004E</b>	<b>X-COM abended.</b>
<b>Explanation</b>	An unrecoverable error has occurred. X-COM terminates abnormally.
<b>Action</b>	Look at the previous error messages of X-COM.
<b>XCO2005E</b>	<b>Wrong X-COM parameter :1:.</b>
<b>Explanation</b>	An invalid value for :1: was specified in startup parameters.
<b>Action</b>	Verify Entire System Server startup parameter :1: and set a proper value.
<b>XCO2006E</b>	<b>ADAMPM - wrong version found.</b>
<b>Explanation</b>	The loaded module ADAMPM has a wrong version.
<b>Action</b>	Check your Adabas library or Contact Software AG Support.
<b>XCO2007E</b>	<b>BS2000 V.2 or above is required.</b>
<b>Explanation</b>	The Entire System Server is compiled for BS2000 Version 2 or above. It cannot run on OSD Version 1 or below.
<b>Action</b>	Upgrade of BS2000 is required.
<b>XCO2008E</b>	<b>MPM12-error, CQE is not active.</b>
<b>Explanation</b>	The Post-User call has been rejected due to bad status of command queue element. The reply cannot be delivered.
<b>Action</b>	No action required.

<b>XCO2009E</b>	<b>MPM36 impossible because CQE not active.</b>
<b>Explanation</b>	The timeout call (TIME elapsed) has been rejected due to bad status of command queue element.
<b>Action</b>	No action required.
<b>XCO2010E</b>	<b>Macro :1: RC :2:.</b>
<b>Explanation</b>	The BS2000 macro :1: has returned an error. :2: contains the return code. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support if return code does not explain the problem.
<b>XCO2011E</b>	<b>MAIN MP - Macro :1: RC :2:.</b>
<b>Explanation</b>	The ESY MAIN memory pool creation has been aborted. The BS2000 macro :1: has returned an error. :2: contains the return code. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support if return code does not explain the problem.
<b>XCO2012E</b>	<b>STACK FAILURE in function :1:.</b>
<b>Explanation</b>	The internal stack is corrupted. :1: identifies the failed function. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO2013E</b>	<b>Incompatible Adabas version detected.</b>
<b>Explanation</b>	This version of Adabas is no longer supported. An XS-enabled library is required to run with Entire System Server. X-COM nucleus terminates abnormally.
<b>Action</b>	Upgrade of Adabas is required.
<b>XCO2014E</b>	<b>MAIN MP - Requested space exceeded.</b>
<b>Explanation</b>	The allocated memory size is not sufficient to contain all required data structures of Entire System Server. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.
<b>XCO2015E</b>	<b>Unrecoverable error in function :1:.</b>
<b>Explanation</b>	A function called by the X-COM nucleus has returned an error response. :1: identifies the called function. X-COM nucleus terminates abnormally.
<b>Action</b>	Contact Software AG Support.

# 74

## Component Return Codes in EntireX

---

This section provides information on codes returned to the operating system by the EntireX Broker job or EntireX RPC Server at shutdown.

<b>01</b>	<b>Return Code</b>
<b>Explanation</b>	During startup, the broker detected a create error when invoking the z/OS Name/Token Services facility. The Broker is immediately shut down.
<b>Action</b>	Ensure that the z/OS Name/Token services facility is available on the version of the z/OS operating system that is running. Also, examine the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>02</b>	<b>Return Code</b>
<b>Explanation</b>	During broker startup an error was detected attempting to open the data set referenced by the <code>SYSPRINT DD</code> statement. The attempted output from the echo of the broker startup parameters, the persistent store parameters, and the broker attribute file parameters to the data set referenced by the <code>SYSPRINT DD</code> statement failed.
<b>Action</b>	Examine the <code>SYSPRINT DD</code> statement, the EntireX Broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>03</b>	<b>Return Code</b>
<b>Explanation</b>	During broker startup, at least one error was detected in the persistent store component.
<b>Action</b>	Examine the output referenced by the <code>SYSPRINT DD</code> statement as well as the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.

<b>04</b>	<b>Return Code</b>
<b>Explanation</b>	During broker startup, at least one error was detected in the broker startup parameters.
<b>Action</b>	Examine the output referenced by the <code>SYSPRINT DD</code> statement as well as the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>05</b>	<b>Return Code</b>
<b>Explanation</b>	During broker startup, the broker persistent store parameters were not specified.
<b>Action</b>	The broker persistent store parameters need to be specified in the input data set referenced by the <code>SYSIN DD</code> statement.
<b>06</b>	<b>Return Code</b>
<b>Explanation</b>	During broker startup, an error was detected in the broker persistent store parameters.
<b>Action</b>	Examine the output referenced by the <code>SYSPRINT DD</code> statement as well as the broker log data set and the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>07</b>	<b>Return Code</b>
<b>Explanation</b>	During broker startup, the broker detected a create error when invoking the z/OS Name/Token Services facility in the persistent store component. The broker is immediately shut down.
<b>Action</b>	Ensure that the z/OS Name/Token services facility is available on the version of the z/OS operating system that is running. Also, examine the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>08</b>	<b>Return Code</b>
<b>Explanation</b>	During startup, the broker detected an initialization error. The broker is immediately shut down.
<b>Action</b>	Examine the broker log data set and the operating system log as well as the output referenced by the <code>SYSPRINT DD</code> statement. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>09</b>	<b>Return Code</b>
<b>Explanation</b>	During startup, the broker detected a storage error in the persistent store component. The broker is immediately shut down.
<b>Action</b>	Examine the output referenced by the <code>SYSPRINT DD</code> statement as well as the broker log data set and the operating system log. Increase the region size for the EntireX Broker job. Correct any errors and restart the broker. If the cause cannot be determined, contact Software AG Support.

<b>10</b>	<b>Return Code</b>
<b>Explanation</b>	During shutdown, the broker detected a delete error when invoking the z/OS Name/Token Services facility. The broker is immediately shut down.
<b>Action</b>	Ensure that the z/OS Name/Token services facility is available on the version of the z/OS operating system that is running. Also, examine the operating system log. Correct the error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>11</b>	<b>Return Code</b>
<b>Explanation</b>	During startup, the broker detected that the load libraries are not all APF-authorized in z/OS.
<b>Action</b>	Ensure that all the data sets referenced by the STEPLIB DD statement have been APF authorized in z/OS. Check the spelling of the data set names for accuracy. Correct any error and restart the broker. If the cause cannot be determined, contact Software AG Support.
<b>0</b>	<b>Return Code</b>
<b>Explanation</b>	RPC server was successful.
<b>1</b>	<b>Return Code</b>
<b>Explanation</b>	Windows specific: one of the required shared libraries (.DLL) could not be found.
<b>4</b>	<b>Return Code</b>
<b>Explanation</b>	<p>Minor Trouble - RPC server continues.</p> <ul style="list-style-type: none"> <li>■ At least 1 worker terminated unsuccessfully because of server (implemented by user and called by RPC server) malfunction.</li> <li>■ Parameters inconsistent - being repaired.</li> </ul>
<b>8</b>	<b>Return Code</b>
<b>Explanation</b>	<p>RPC server stopped.</p> <ul style="list-style-type: none"> <li>■ Not even 1 worker could be started.</li> <li>■ Stopped because EntireX Broker unavailable.</li> <li>■ Problems during shutdown processing.</li> </ul>

**12**

**Return Code**

**Explanation**

Parameter Trouble - RPC server could not be started.

- Inconsistent parameters specified or not found.
- Usage error.

**16**

**Return Code**

**Explanation**

Serious Trouble.

- Problems with underlying operating system.
- Problems with EntireX RPC Runtime.

## Broker Command and Information Services Error Codes

---

▪ Broker Command Service .....	556
▪ Broker Information Services .....	558

This chapter contains error codes for the Command and Information Services of EntireX Broker.

See also *Broker ACI Fields* | *Broker ACI Functions* | *Broker CIS Data Structures* in the ACI Programming documentation.

## Broker Command Service

---

Error Code	Description
0	Successful response.
2	Invalid VERSION.
3	OBJECT-TYPE is missing.
5	Invalid OBJECT-TYPE.
20	The user is not authorized to issue Broker commands.
21	Invalid COMMAND.
22	Invalid OPTION.
23	Shutdown possible for servers only.
24	Participant not found.
25	Purge UOW failed.
26	User specification must be unique.
27	Topic name must be specified.
30	User must be specified.
31	Class/Server/Service must be unique.
33	Class or User must be specified.
34	Set command log filter failed.
35	Clear command log filter failed.
36	Enable command log filter failed.
37	Disable command log filter failed.
38	Switch command log files failed.
39	Set security trace level failed.
40	Set PSTORE (PSF) trace level failed.
41	Enable command logging failed.
42	Disable command logging failed.
43	Connect PSTORE failed.
44	Disconnect PSTORE failed.
45	Allow new UOW messages failed.
46	Forbid new UOW messages failed.

<b>Error Code</b>	<b>Description</b>
47	Enable accounting failed.
48	Disable accounting failed.
49	Reset user failed.
50	Command refused in current RUN-MODE.
51	Service must be specified.
52	Service not found.
53	CONVID must be specified.
54	Conversation not found.
55	Cannot inhibit Conversation.
56	Only supported for messages.
57	Cannot lock Conversation.
58	Not for currently running Conversation.
59	Security violation detected.
60	Invalid transport ID.
61	Cannot execute command.
62	Command ignored. Only one Communicator left.
63	Command ignored. Cannot stop all Communicators.
64	Communicator currently not suspended.
65	Communicator currently not stopped.
66	Communicator currently not active.
67	Enable Dynamic Worker Management failed.
68	Disable Dynamic Worker Management failed.
69	Transport reserved for Broker Service.
70	TRACE-FLUSH failed.

## Broker Information Services

---

Error Code	Description
0	Successful response.
1	Invalid BLOCK-LENGTH.
2	Invalid VERSION.
3	OBJECT-TYPE is missing.
4	Nothing was found for this request.
5	Invalid OBJECT-TYPE.
6	Invalid INFO-LEVEL.
7	BLOCK-LENGTH too short for OBJECT-TYPE.
8	User selection must be unique.
9	Service selection must be unique.
10	Topic name must be specified.
11	PUID not possible with information level SHORT. See level.

# 76

## EXXMSG - Command-line Tool for Displaying Error Messages

---

- Running the EXXMSG Command-line Utility ..... 560

EXXMSG is a command-line tool that displays the text of an EntireX error message for a supplied error number. It is available on all platforms.

## Running the EXXMSG Command-line Utility

---

Under z/OS, command-line utility EXXMSG is located in library EXB108.LOAD. Under UNIX and Windows, the utility is located in the EntireX *bin* directory.

### Command-line Parameters

The only command-line parameter is any 8-digit error code.

### Sample Command

```
exxmsg 02150148
```

### Sample Output

```
Software AG webMethods EntireX 10.8.0 (473) Linux 3.1.10-1.16-desktop  
(c) Copyright 1997 - 2021 Software AG. All rights reserved.
```

```
02150148      EntireX Broker not active : (or Transport-Specific Error Text)  
Explanation  The requested Broker specified in BROKER-ID is not reachable.  
Action       Check the BROKER-ID. If it is correct, check if ETB_TRANSPORT  
              environment variable is defined and if defined, it should point to  
              the desired transport method. If problem persists, contact your  
              network administrator.
```

# 77

## Administration Service Messages

---

Administration Service messages are generated by the Administration Service and are passed to Command Central.

### **Running: unmanaged Broker with restricted access**

**Explanation** A broker was started manually. Its attribute file is not in a working directory under the EntireX directory *config/etb*. Only limited administration is possible on this broker. It is only possible to stop the broker.

### **Timeout: Check remote Broker or remote firewall definitions**

**Explanation** A remote broker is not accessible. The timeout problem occurs, for example, on Windows machines where the port used by the broker has not been opened up in the firewall. If the broker has not been started, the timeout problem does not occur in the case of a port that has been opened up in the firewall. The firewall issues a negative answer to a failed connection attempt.

Alternatively, program *etbnuc* can be defined in the firewall, but then the timeout error occurs if the broker has not been started. The firewall does not send a reply to a failed connection attempt.

### **ETBD0280 Function Entered**

**Explanation** This message is written to the log data set when tracing is set to a trace level greater than 1. An EntireX Broker internal function module is entered.

**Action** This message is for diagnostic purposes only.

**Running with errors: Check log file**

**Explanation** The broker was able to be started successfully, but not all attributes defined in the attribute file could be activated. For example, not all ports defined in attribute file could be activated when the broker was started. The broker log file contains more detailed information on the problem.

**Action** Check the log file.

**Running: Must set user credentials**

**Stopped: Must set user credentials**

**Running: missing credentials, please enter credentials**

**Running: wrong credentials, please enter credentials**

**Explanation** User credentials for a secure broker or a remote broker are not available or they are invalid.

**Action** Enter valid user credentials in Command Central.

**Running: Must set SSL parameters**

**Stopped: Must set SSL parameters**

**Explanation** The SSL parameters of a remote broker are invalid and must be specified. The input field in Command Central contains the default value, which is the certificate from the working directory of the broker.

If the SSL certificate of the remote broker has been exchanged on the remote machine, the corresponding new SSL certificate must also be made available in the local working directory *config/etb/RB.<RemoteBrokerName>*.

**Broker not running or invalid SSL parameters**

**Explanation** This is a status message for a remote broker. Either the broker was not started, or its SSL parameters are invalid.

**Action** Start the broker or specify valid SSL parameters. See also "Running: Must set SSL parameters" or "Stopped: Must set SSL parameters".
