Generating a Process Discovery License .....	13
--	----

# Introduction

License Generator was designed to facilitate the licensing of the [Kryon RPA Platform](#) and [Kryon Process Discovery](#) by Kryon Systems' channel partners. It provides great flexibility in start date timing, license length, and licensed components – making it easy to tailor licenses precisely to fit customer needs.

The license generation and activation process differs slightly for each Kryon product; therefore, a separate chapter of this guide is dedicated to each.

## Audience

This document is intended for use by Kryon Systems' channel partners. Using the License Generator requires no specialized IT expertise nor prior experience with the Kryon RPA Platform or Kryon Process Discovery.

# CHAPTER 1: Kryon RPA Platform

In this chapter:

Two Options for License Generation & Activation .....	5
Generating an RPA License .....	6
Creating a Company Key in Kryon Admin .....	9
Activating a License in Kryon Admin .....	10

## Two Options for License Generation & Activation

There are two options for generating a Kryon RPA Platform license with License Generator. The default option (let's call it [Option A](#)) generates a license that will be later be activated in Kryon Admin via Internet connection to Kryon Systems' licensing server. In general, this is the easiest and most efficient option.

However, when necessary, [Option B](#) allows you to generate a license that does not require Internet activation (by using a customer key created in Kryon Admin). This option requires a little more back-and-forth between you and your customer IT contact, but it can be useful when the server on which Kryon Admin is installed does not have easy access to the Internet.

For detailed information and instructions, see [Generating an RPA License](#).

## Generating an RPA License

When you log in to License Generator (using the link and credentials provided to you by your licensing contact at Kryon), select the **RPA** tab from the main screen:

The screenshot displays the 'New License' form in the Kryon Partner interface. The form is divided into five numbered steps:

- Step 1:** Fields for 'Company Name \*', 'License Type \*' (set to 'POC (30 days)'), and 'Start Date \*' (set to '10/18/2018'). A 'Notes' field is also present.
- Step 2:** Fields for '# of attended robots', '# of Studio users', '# of unattended robots', and '# of Console users'.
- Step 3:** Toggles for 'Wizard Catalog' (checked) and 'Sensor Catalog' (unchecked).
- Step 4:** Radio buttons for 'Activate online' (selected) and 'Activate with a company key:'. A text field below is labeled 'Enter the company key generated in Kryon Admin'.
- Step 5:** A 'Generate License' button.

Follow these steps to generate an RPA license:

- 1 Enter the customer name, select the **LICENSE TYPE** (duration), and enter the **START DATE**
  - For a **CUSTOM** license, provide an **END DATE** (this field will become available upon selection of this license type)

- 2 Enter the number of licenses required for each of the platform components

- 3 Configure **WIZARD CATALOG** and **SENSOR CATALOG** availability  
**Recommended Settings:**

- In an **unattended automation** environment, only the Wizard Catalog should be enabled
- In an **attended and/or hybrid automation** environment, both the Wizard and Sensor Catalogs should be enabled

- 4 **Option A:**

Select **ACTIVATE ONLINE** to generate a license that will be later be activated in Kryon Admin via Internet connection to Kryon Systems' licensing server

- or -

#### Option B:

- Ask your customer IT contact to send you a **COMPANY KEY** generated in Kryon Admin (installed at the customer site). For instructions, see [Creating a Company Key in Kryon Admin](#).
- Select the option to **ACTIVATE WITH A COMPANY KEY** and paste the key provided by your customer into the relevant field

- 5 When you have entered and verified all relevant information, click

Generate License

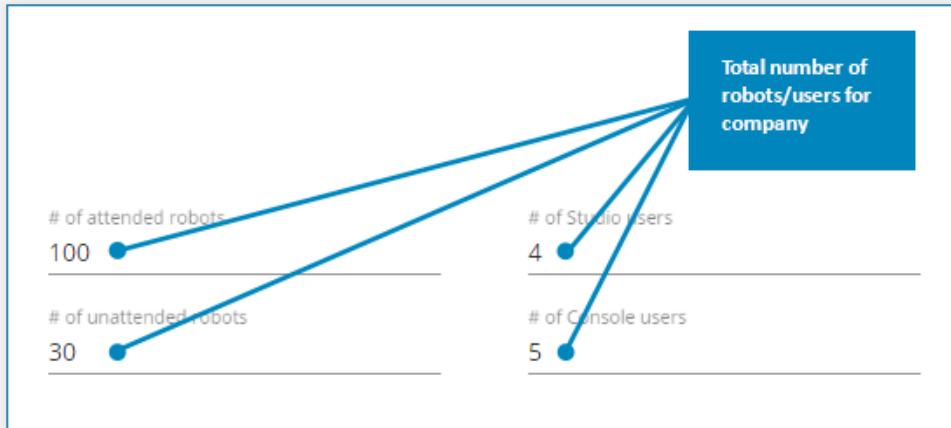

- 6 Once the license has been generated, your organization's Kryon administrator will receive an email (either directly via an automated system or forwarded by your licensing contact at Kryon) containing a summary of the license terms and an attachment named **Kryon License - {Company Name}.ilk**. Forward this email to your customer IT contact so that he or she can activate the license. For license activation instructions, see [Activating a License in Kryon Admin](#).

### NOTE

#### Update or renewal? The new license replaces the old!

When an updated or renewed license is activated in Kryon Admin, the newly generated license overwrites the old. So, in License Generator, when you enter the number of licenses for each of the platform components, be sure to include the **total** number of licenses required – not just the additional ones.

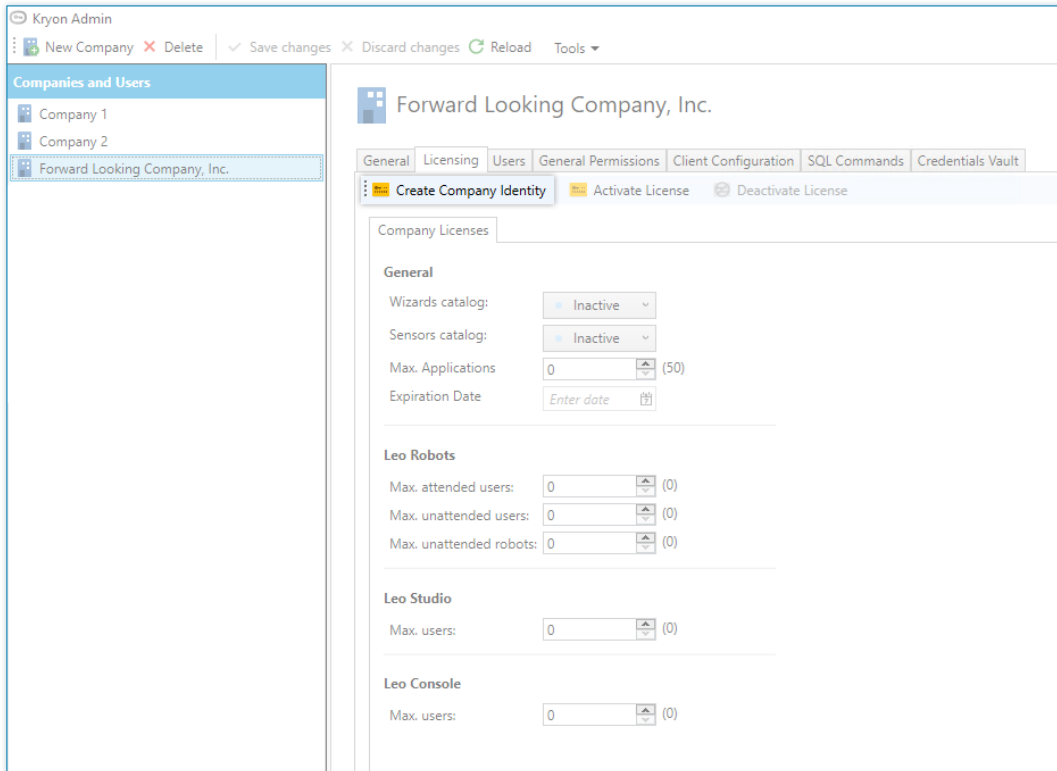

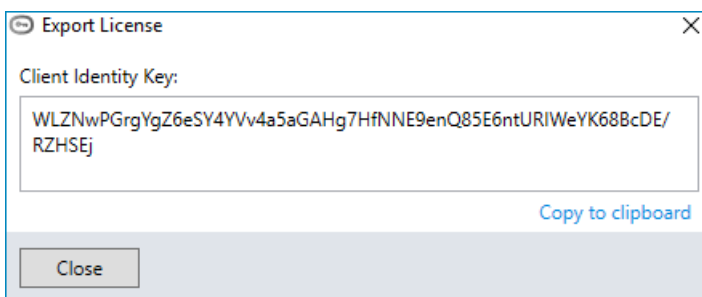

## Creating a Company Key in Kryon Admin

Follow these steps to create a **COMPANY KEY** in Kryon Admin:

1. Select the relevant company from the **COMPANIES AND USERS** pane and click on the **LICENSING TAB**
2. Click **CREATE COMPANY IDENTITY**

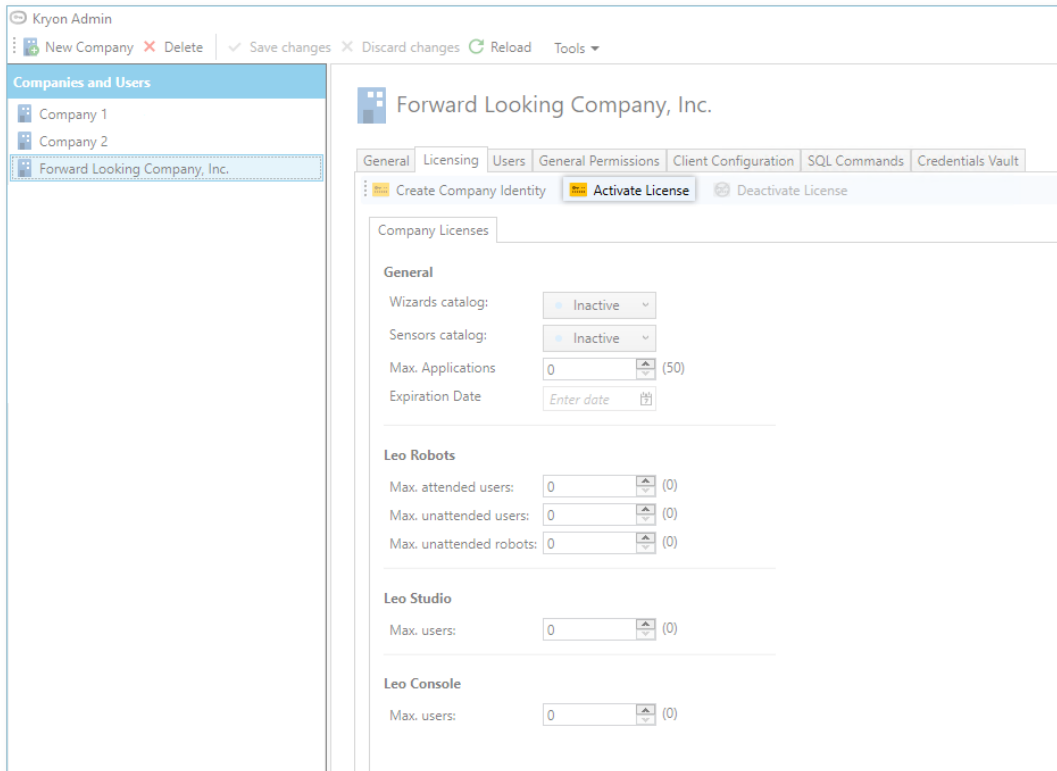

3. From the window that opens, click **COPY TO CLIPBOARD**

## Activating a License in Kryon Admin

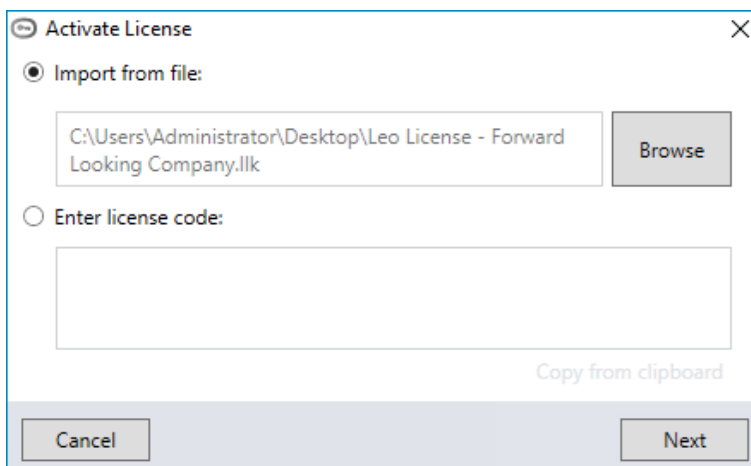

Follow these steps to activate a license in Kryon Admin:

1. Select the relevant company from the **COMPANIES AND USERS** pane and click on the **LICENSING TAB**
2. Click **ACTIVATE LICENSE**

3. From the window that opens, select the option to **IMPORT FROM FILE**, click **Browse** and select the relevant license file (**Kryon License - {Company Name}.ilk**)

Browse

4. Click
5. For licenses generated using the **ACTIVATE ONLINE** option (Option A), you will be prompted to activate the license via the Internet. Ensure that you are connected, then click  .

- or -

For licenses generated using a **CUSTOMER KEY** (Option B), you will be prompted simply to activate (without a required Internet connection). Click  .

6. You will receive a message that activation was successful, and all the relevant details of the license (expiration date, maximum number of users for platform components, etc.) will be automatically populated.

The screenshot displays the 'Company Licenses' configuration page in the Kryon Admin interface. The page title is 'Forward Looking Company, Inc.' and the breadcrumb trail includes 'General', 'Licensing', 'Users', 'General Permissions', 'Client Configuration', 'SQL Commands', and 'Credentials Vault'. The main navigation bar contains 'Create Company Identity', 'Activate License', and 'Deactivate License'. The 'Company Licenses' section is expanded to show the 'General' tab with the following settings:

- Wizards catalog:** Active
- Sensors catalog:** Active
- Max. Applications:** 0 (39)
- Expiration Date:** 12/20/2017

Below the 'General' section, there are three sub-sections for user and robot limits:

- Leo Robots:**
  - Max. attended users: 5 (1)
  - Max. unattended users: 10 (1)
  - Max. unattended robots: 10 (0)
- Leo Studio:**
  - Max. users: 5 (2)
- Leo Console:**
  - Max. users: 5 (1)

# CHAPTER 2: Kryon Process Discovery

In this chapter:

Generating a Process Discovery License .....	13
--	----

## Generating a Process Discovery License

When you log in to License Generator (using the link and credentials provided to you by your licensing contact at Kryon), select the **PROCESS DISCOVERY** tab from the main screen:

The screenshot shows the 'KRYON' logo and 'Kryon Partner' user information at the top. Below is a navigation bar with 'RPA' and 'Process Discovery' tabs. The main content area is titled 'New License' and contains the following fields and actions:

- Step 1:** 'Company Name \*', 'Start Date \*' (10/18/2018), and 'End Date \*'.
- Step 2:** '# of Discovery Robots' (1).
- Step 3:** 'Activate offline (requires server and domain names)', 'Enter server name \*', and 'Enter domain name \*'.
- Step 4:** 'Generate License' button.

Follow these steps to generate a Process Discovery license:

- 1 Enter the customer name and enter the license **END DATE**
  - The license **START DATE** is a read-only field and defaults to the current date
- 2 Enter the number of Discovery Robot licenses required (default = 1)

Ask your customer IT contact to provide you with:

- the machine name of the Discovery Server; and
- the name of the domain on which the Discovery Server will be installed

Enter this data in the relevant fields

When you have entered and verified all relevant information, click

Generate License

Once the license has been generated, your organization's Kryon administrator will receive an email (either directly via an automated system or forwarded by your licensing contact at Kryon Systems) containing a summary of the license terms and a license file attachment. Forward this email to your customer IT contact so that he or she can install the license file to the appropriate location on the Discovery Server and make the required configuration changes.

- For detailed license installation instructions, see the *Kryon Process Discovery Installation & Administration Guide*
