

# **webMethods.io Embed 1.2.4 Readme**

**March 2021**

This file contains important information you must read before using webMethods.io Embed 1.2.4.

Included in this file is information about functionality that has been added, removed, deprecated, or changed for this product. Deprecated functionality continues to work and is supported by Software AG but may be removed in a future release. Software AG recommends against using deprecated functionality in new projects.

## 1.0 Critical Information

This section lists any critical issues for the current release that were known when this readme was published. For critical information found later, go to the Knowledge Center on the [Empower website](#).

## 2.0 Known Issues

This section lists any issues for the current release that were known when this readme was published. For known issues found later, go to the Knowledge Center on the [Empower website](#).

- BIE-2478  
Number of user entries in pagination value do not match the total user count.
- BIE- 1977  
Smartsheet integration execution is failing on demo site.
- BIE-2350  
Unable to add PagerDuty connection.
- BIE-2352  
Receiving 400 console error when solution list is searched with valid/invalid provider.
- BIE- 2560  
Unable to load Trello integration dependent lookup values.
- BIE- 2355  
Specific styling effects applied on solution description are not reflected on demo site.
- BIE- 2562  
Total transactions count is not getting updated for enqueued flows in hold state.

## 3.0 Usage Notes

This section provides any additional information you need to work with the current v1.2 release of webMethods.io Embed.

- webMethods.io Embed is supported on the latest version of Google Chrome web browser (v83 or

later).

- webMethods.io Embed is best experienced when the scale and layout are adjusted to the below settings:

#### Scale and layout

Change the size of text, apps, and other items

[Advanced scaling settings](#)

Resolution

- Information on major releases, hotfixes, and patch releases including the latest statistics on cloud system availability, system performance, and security are available on the Cloud Trust Center at <https://trust.softwareag.com/webmio/status/>.
- After webMethods.io Embed upgrade, the older version browser's cache and cookies are not cleared automatically. This may lead to incorrect display of page content. Ensure that you clear the browser's cache manually after every upgrade, and then log in to webMethods.io Embed.

## 4.0 Other Resolved Issues

This section lists the issues that were resolved in each release but were not part of the fixes listed in the previous section. A release is listed in this section only if changes occurred in that release.

## 5.0 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content. A release is listed in this section only if changes occurred in that release.

### ***Release 1.2.4***

- The Users section describes how you can now manage the accounts and authorizations associated with each user.
- The Users section also describes how you can now activate or deactivate a user workflow.

## ***Release 1.2***

- The Bots section describes how you can create one-way or two-way (interactive bots), integrate them with solutions, and manage them as per your application requirements.
- The updated Solutions section describes how you can now add solutions as commands for webhook-enabled projects or convert existing solutions to commands.
- The updated Developer Tools section describes how you can now set idle session timeout and absolute session timeout for your application and enable OAuth pop-up for OAuth creation process.
- The updated Users section describes how you can delete user instances.
- The updated Solutions section describes the conditions that must be met before deleting a solution from Sandbox environment.

## ***Release 1.1***

- The Alerts section describes how you can enable alerts for your webMethods.io Embed tenants to receive notifications when the tenant credit consumption reaches a certain percentage or in case of overages.
- The updated Metrics section describes how you can get an execution overview for your tenant and how to set up filters to view execution data associated with specific plans, solutions, and users.
- The updated Solutions section describes how you can force delete solution versions (and any deployments associated with it).
- The updated Users section describes how you can add new users, change their plans (individual/group), and delete users (and any associated entities such as workflows, authorizations, triggers, and so on) through the Embed Admin portal.

## ***Release 1.0***

- The webMethods.io Embed documentation describes how to you can leverage webMethods.io Embed to enable integration capabilities for your users from within your product.

## 6.0 Added, Removed, Deprecated, or Changed Items

This section lists features, functionality, controls, portlets, properties, or other items that have been added, removed, deprecated, or changed. An item is listed in this section only if changes have occurred in that release.

### Release 1.2.4 (March 2021)

| Added/Changed Item                 | Description   |
|------------------------------------|---|
| User accounts                      | <p>The Accounts tab has been added under the Users tab to help you manage accounts associated with users.</p> <div></div>               |
| User authorizations                | <p>The Authorizations tab has been added under the Users tab to help you manage authorizations associated with users.</p> <div></div> |
| Provider listing for user accounts | <p>You can now view and manage the provider associated with each user account under the Accounts tab.</p> <div></div>                 |

| Added/Changed Item                       | Description  |
|--|--|
| Provider listing for user authorizations | <p>You can now view and manage the provider associated with each user account under the Accounts tab.</p>  |
| Activate or deactivate user workflows    | <p>You can now enable or disable a user workflow from the Users tab.</p>                                   |

## Release 1.2 (July 2020)

| Added/Changed Item | Description  |
|--------------------|--|
| BOTS tab           | <p>The BOTS tab has been added under Settings menu. This tab allows you to create one-way and two-way (interactive) bots, add solutions to them, and manage them. <b>Note:</b> Execution support for two-way (interactive) bots is not added yet.</p>  |

| Added/Changed Item                     | Description   |
|--|---|
| Create commands                        | <p>You can now add solutions as commands for your webhook-enabled projects. These commands can then be associated with two-way (interactive) bots and deployed to your application.</p>  |
| Convert existing solutions to commands | <p>You can now convert your existing webhook solutions to commands and add them to two-way (interactive) bots.</p>   |
| Set session time outs                  | <p>You can now set idle session timeout and absolute session time out for your application.</p>   |
| Delete user instances                  | <p>You can now delete instance associated with a specific user through the USERS tab under Settings menu.</p>   |

| Added/Changed Item                               | Description  |
|--|--|
| <b>Allow OAuth Pop-up</b>                        | <p>You can now enable OAuth pop-up which will allow you to carry out OAuth creation process through a pop-up window.</p>               |
| <b>Updated conditions for deleting solutions</b> | <p>You cannot delete a solution from Sandbox environment if:</p> <ul style="list-style-type: none"> <li>• It is already deployed on Production environment</li> <li>• It is already added to one or more bots</li> </ul> |

### ***Release 1.1 (April 2020)***

| Added/Changed Item                    | Description   |
|---------------------------------------|---|
| <b>Alerts</b>                         | You can now enable alert notifications to send credit consumption and overage notifications to specific users of your webMethods.io Embed tenant.   |
| <b>Filter-based execution details</b> | You can now set up custom filters to fetch execution data associated with specific solutions, plans, and users.   |
| <b>Force-delete solution versions</b> | You can now force-delete solution versions (and any deployments associated with it) from your webMethods.io Embed Admin portal.   |
| <b>User management</b>                | You can now add new users, modify their previously assigned plan type (individual/group), delete users (along with any associated workflows, triggers, authorizations, and so on), and export their deployments to your local machine through the webMethods.io Embed Admin portal. |
| <b>Execution metrics and logs</b>     | You can now view the execution metrics, execution logs, and execution history in the demo site as well. Earlier, these were only accessible through the webMethods.io Embed Admin portal.   |

| Added/Changed Item | Description  |
|--------------------|--|
| New Connectors     | <p>Added support for the following CloudStreams connectors:</p> <ul style="list-style-type: none"> <li>• Cumulocity</li> <li>• Google PubSub</li> <li>• Amazon SNS</li> <li>• SAP C4C</li> </ul> |

### ***Release 1.0 (February 2020)***

| Added/Changed Item | Description     |
|--------------------|-----------------|
| Initial Release    | Initial Release |
