

API GATEWAY QUICK START

Start API Gateway either by:

- Running
C:\APIGateway\Integration Server\instances\default\bin\startup.bat
Or,
- Opening from the Start menu

For more information, see *Integration Server Administrator's Guide*.

Install API Gateway

Start API Gateway

Access API Gateway

You are all set to log on to API Gateway!

Install API Gateway using

Software AG Installer:

- Change installation directory, select API Gateway, and provide license file
- Select default ports for IS, API Gateway, and Event Data Store
- Select embedded database

For more information, see *Installing Software AG Products*.

Access API Gateway UI in one of these ways:

- Navigate to `http://host:port`, where port is the HTTP port of API Gateway configured during installation; the default port being 9072
