<b>Explanation</b>	The specific external backup or restore action failed due to an internal reason. Please view the output file indicated by the error message for the problem.
<b>Action</b>	Analyze the problem in the error file.
<b>INORBW4015</b>	<b>The space size will be increased by size MB</b>
<b>Explanation</b>	The container size specified during create is not sufficient. Tamino is automatically extending the container to accommodate the data.
<b>Action</b>	No action required.
<b>INORBW4803</b>	<b>Database identification could not be changed</b>
<b>Explanation</b>	The database identification could not be changed.
<b>Action</b>	Ensure that the database identification of the new database is correct.
<b>INORBW4805</b>	<b>Waiting for database restart</b>
<b>Explanation</b>	The operation is waiting for the restart of the database (due to its abnormal termination).
<b>Action</b>	Start the database.
<b>INORBW4806</b>	<b>Block block number ignored, run verify and repair function for doctype doctypes</b>
<b>Explanation</b>	During backup a corrupt index block was found which will not be backed up to the backup copy.
<b>Action</b>	Recreate the index of specified doctype and rerun the backup function.

<b>INOSAE7351</b>	<b>Duplicate attribute not allowed in element context</b>
<b>Explanation</b>	The result element will contain multiple attributes of the same name. This is not allowed in XML.
<b>Action</b>	Please verify your query for attribute construction.
<b>INOSAE7352</b>	<b>No serialization for attributes without element context</b>
<b>Explanation</b>	A serialization of attributes without element context was requested but is undefined.
<b>Action</b>	Please verify that the attribute construction belong to an element context.
<b>INOSAE7353</b>	<b>ino:document serialization supports only one document in serialization</b>
<b>Explanation</b>	The ino:document serialization supports only the serialization of a single document.
<b>Action</b>	The query returns more than one document. Correct the query and rerun.
<b>INOSAE7354</b>	<b>ino:serialization supports only the serialization of document nodes</b>
<b>Explanation</b>	The ino:document serialization supports only the serialization of document nodes.
<b>Action</b>	Verify that the query returns only nodes of type document.
<b>INOSAE7356</b>	<b>ino:document serialization has no Query Result</b>
<b>Explanation</b>	The query returned no matching document.
<b>Action</b>	Correct the query so that it delivers one single document node.
<b>INOSAI7355</b>	<b>Internal error</b>
<b>Explanation</b>	During the serialization an internal error occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOSXE6704</b>	<b>Invalid character 'character' in name for compiler settings</b>
<b>Explanation</b>	Names for compiler settings must start with a letter and may be followed by letters or digits.
<b>Action</b>	Use a name that obeys this rule.
<b>INOSXE6705</b>	<b>Settings for default parameter must not be changed</b>
<b>Explanation</b>	The name 'default' is reserved for the compiler settings defined by the Tamino installation.
<b>Action</b>	Use a name other than 'default' to save these compiler settings.

---

<b>INOSXE6706</b>	<b>No configuration parameters found for compiler 'compiler'</b>
<b>Explanation</b>	The current compiler for Direct X-Tension projects is currently set to the compiler indicated; however, one or all of its configuration parameter files have been deleted.
<b>Action</b>	Use the default compiler as your current compiler; check your Tamino installation.
<b>INOSXE6707</b>	<b>X-Tension: COM initialization failed</b>
<b>Explanation</b>	During X-Tension initialization the initialization of the COM library failed. No COM-based extension functions are available during this server session.
<b>Action</b>	If COM-based server extension functions are required, fix the COM problem and start the Tamino server again.
<b>INOSXE6709</b>	<b>Invalid usage entry: 'value'</b>
<b>Explanation</b>	The Usage entry found in file 'Install.xml' could not be recognized.
<b>Action</b>	Check the documentation for valid values.
<b>INOSXE6710</b>	<b>Function 'function' not usable as 'usage'</b>
<b>Explanation</b>	This function cannot be used as the function type indicated. The function's parameter count or parameter datatypes do not correspond to the specified function type.
<b>Action</b>	Please check the 'Usage' entry in file 'Install.xml' as well as the parameter specification of the current function. See the documentation for the parameters required for the given Usage.  It is strongly recommended to use the X-Tension development tools to define new X-Tension functions.
<b>INOSXE6711</b>	<b>Value missing for Init Function 'func'</b>
<b>Explanation</b>	The X-Tension function indicated has been declared as Init Function. However, values are missing for one or more of its parameters.
<b>Action</b>	Use the X-Tension tools to create the X-Tension function and be careful editing the file Install.xml.
<b>INOSXE6712</b>	<b>The server extension crashed or threw an unknown exception</b>
<b>Explanation</b>	Either the server extension has crashed or it threw an exception that could not be caught by the Tamino Server.
<b>Action</b>	Please contact the vendor of the server extension.

<b>INOSXE6713</b>	<b>Extension tried to open message box. Message: 'message'.</b>
<b>Explanation</b>	It is not allowed to display message boxes in a server extension. This terminates the current server extension function.
<b>Action</b>	Please check the server extension code carefully. Maybe the C/C++ runtime system tried to open an assertion box because of programming errors in the server extension.
<b>INOSXE6714</b>	<b>Value is not of the selected data type 'type'</b>
<b>Explanation</b>	The value entered cannot be converted to the data type selected in the 'Add Param' box.
<b>Action</b>	Please check the value entered and the data type selected in the 'Add Param' box. See the documentation of Tamino X-Tension for more details on allowed values.
<b>INOSXE6715</b>	<b>Extension function 'func': Value of parameter 'param' is not of selected data type type</b>
<b>Explanation</b>	The value entered cannot be converted to the data type specified for this parameter.
<b>Action</b>	Please check the value entered and the data type specified for this parameter. See the documentation of Tamino X-Tension for more details on allowed values.  Use the Tamino X-Tension tools to specify parameter values!
<b>INOSXE6716</b>	<b>Unexpected error during callback function 'function'</b>
<b>Explanation</b>	An unexpected error occurred during a call of a callback function. Probably it has been called with one or more incorrect parameters.
<b>Action</b>	Check the documentation and your server extension code for the correct use of this callback function.
<b>INOSXE6717</b>	<b>Server extension function not found</b>
<b>Explanation</b>	The desired function name was not found in the SXS repository. Maybe the function name is incorrect, or the function is not installed or was deinstalled.
<b>Action</b>	Check and correct the function name or server extension installation.
<b>INOSXE6725</b>	<b>Callback not allowed in init function</b>
<b>Explanation</b>	An Sxs SetProperty callback is not allowed from a server extension init function.
<b>Action</b>	Remove the Sxs SetProperty callback from your server extension init function and retry the operation.

---

<b>INOSXE7000</b>	<b>Java server extension must have a package name</b>
<b>Explanation</b>	The package name for a Java server extension must not be empty.
<b>Action</b>	Define a package name, e.g. "package com.softwareag.mysxs".
<b>INOSXE7001</b>	<b>File name 'file.sxp' may not be changed</b>
<b>Explanation</b>	Only the directory may be selected; the file name must remain unchanged.
<b>Action</b>	Select a directory.
<b>INOSXE7006</b>	<b>XML callback failed. Transaction was rolled back.</b>
<b>Explanation</b>	No more information.
<b>Action</b>	Try with a modified XML request.
<b>INOSXE7009</b>	<b>Tamino X-Tension not available</b>
<b>Explanation</b>	It is not possible to call a Tamino server extension because either X-Tension is not licensed or the X-Tension feature is not available on this platform.
<b>Action</b>	If possible, buy a license for Tamino X-Tension.
<b>INOSXE7010</b>	<b>Project must be rebuilt before packing. Reason: 'reason'.</b>
<b>Explanation</b>	The project must be rebuilt. See 'reason' for more information.
<b>Action</b>	Call Build / Build <project name> in the Developer Studio before packing.
<b>INOSXE7014</b>	<b>Main class file cannot be removed</b>
<b>Explanation</b>	In the Packaging Dialogue of the X-Tension Builder, the class file is about to be removed that contains the main class of the current server extension.
<b>Action</b>	Do not remove this class file from the list or select a jar file containing this class.
<b>INOSXE7015</b>	<b>Callback not allowed in event function</b>
<b>Explanation</b>	From Tamino server event functions, XML and ODBC callback are not allowed.
<b>Action</b>	Remove the callback call from your server extension code.
<b>INOSXE7016</b>	<b>Illegal database command in callback</b>
<b>Explanation</b>	A database command that is not allowed in callbacks was called in a callback.
<b>Action</b>	Remove the database command from the callback and try again.

<b>INOSXE7017</b>	<b>Tamino server error when calling callback</b>
<b>Explanation</b>	An error occurred in the Tamino server when processing the callback, perhaps an XML or query syntax error.
<b>Action</b>	Method SXJBase.SXSGetInoMsgNo ( ) gives the error code of the Tamino server.
<b>INOSXE7018</b>	<b>Not enough memory for callback</b>
<b>Explanation</b>	The Tamino server could not allocate enough memory to process the callback.
<b>Action</b>	Try to repeat your query when the Tamino server is less loaded.
<b>INOSXE7019</b>	<b>SQL error when calling ODBC callback</b>
<b>Explanation</b>	An SQL error occurred while processing an ODBC callback, perhaps due to an SQL syntax error.
<b>Action</b>	Method SXJBase.SXSGetSQLMsgNo ( ) gives the SQL error code.
<b>INOSXE7020</b>	<b>Illegal handle type for ODBC callback</b>
<b>Explanation</b>	The ODBC callback methods SxsSQLAllocHandle and SxsSQLFreeHandle are only allowed for statement handles of type SQL_HANDLE_STMT.
<b>Action</b>	We recommend that you use the constant SXJBase.SQL_HANDLE_STMT as the parameter handle type.
<b>INOSXE7021</b>	<b>Commit and rollback are not allowed in callbacks</b>
<b>Explanation</b>	You must not use the database commands "commit" or "rollback" in your server extensions.
<b>Action</b>	Remove these commands from the server extension and try again.
<b>INOSXE7022</b>	<b>Result buffer for callback not initialized</b>
<b>Explanation</b>	Result buffers for callbacks must not be null, but should be initialized with an empty string.
<b>Action</b>	Ensure that all result buffers are initialized.
<b>INOSXE7023</b>	<b>Function 'name' failed, because XML callback failed with error 'no'</b>
<b>Explanation</b>	An XML callback failed while trying to perform a write operation. To avoid inconsistencies, the extension function must return with an error.
<b>Action</b>	Check the error caused by the XML callback and fix the problem that caused it to fail.

---

<b>INOSXE7024</b>	<b>COM error when calling callback</b>
<b>Explanation</b>	A COM error occurred during a callback.
<b>Action</b>	Consult your COM documentation.
<b>INOSXE7025</b>	<b>Another server extension deinstallation is running</b>
<b>Explanation</b>	Only one server extension can be deinstalled at any given time.
<b>Action</b>	Wait until the other deinstallation procedure has finished.
<b>INOSXE7026</b>	<b>Deinstallation timed out. The server extension is in use.</b>
<b>Explanation</b>	A server extension cannot be deinstalled as long as an instance of it is in use. The deinstallation procedure has timed out.
<b>Action</b>	Try it later. If there is a very long running instance of the server extension, try to stop it.
<b>INOSXE7027</b>	<b>The function cannot be executed. The server extension is being deinstalled.</b>
<b>Explanation</b>	This function belongs to a server extension that is just being deinstalled.
<b>Action</b>	The function cannot not be called again. If you need to, contact the database administrator.
<b>INOSXE7032</b>	<b>Cannot create directory 'dir'</b>
<b>Explanation</b>	This directory cannot be created. Maybe the disk drive is unavailable or write protected.
<b>Action</b>	Check the given path and your disk drive.
<b>INOSXE7034</b>	<b>Server extension 'source' threw exception 'errnr', 'errtext'</b>
<b>Explanation</b>	The server extension threw an exception. The number and message of the exception are delivered.
<b>Action</b>	See the documentation of the server extension in question for more information.
<b>INOSXE7040</b>	<b>Extension function name too long: 'name'</b>
<b>Explanation</b>	The complete extension function name, consisting of the extension's name plus the function name plus a dot, must not exceed the length of 80 characters.
<b>Action</b>	Select a shorter name.

<b>INOSXE7041</b>	<b>Wrong character in field: 'char'</b>
<b>Explanation</b>	Some special characters (ampersand, "less than", "greater than") are not allowed in comment fields for a server extension. This affects the "Short description" fields and the "Author" field.
<b>Action</b>	Avoid these characters.
<b>INOSXE7045</b>	<b>X-Tension Trace failed. Transaction was rolled back.</b>
<b>Explanation</b>	An internal server error occurred while X-Tension Trace information was written to the Tamino server.
<b>Action</b>	Deactivate X-Tension Trace
<b>INOSXE7046</b>	<b>XML Callback failed in user session. Transaction must be rolled back.</b>
<b>Explanation</b>	A writing XML call from a server extension failed. The current transaction should be rolled back for consistency reasons.
<b>Action</b>	Perform a rollback request.
<b>INOSXE7047</b>	<b>X-Tension Trace failed in user session. Transaction must be rolled back.</b>
<b>Explanation</b>	An internal server error occurred. The current transaction should be rolled back for consistency reasons.
<b>Action</b>	Deactivate X-Tension Trace
<b>INOSXE7048</b>	<b>Error starting help browser. Reason: 'reason'.</b>
<b>Explanation</b>	The currently configured help browser could not be started. See "reason" for more details.
<b>Action</b>	Use the function "Help/Configure Help Browser" to change your current help browser.
<b>INOSXE7049</b>	<b>'execfile' execution failed: rc = rc</b>
<b>Explanation</b>	The external program 'Program name' was successfully started but it returned with error.
<b>Action</b>	See the context of this error message for more information.
<b>INOSXE7051</b>	<b>COM error 'errno' occurred: 'errtext'</b>
<b>Explanation</b>	A COM error occurred. The COM error number of type HRESULT is delivered.
<b>Action</b>	Consult the COM documentation for more information.

---

<b>INOSXE7052</b>	<b>COM error 'errno' calling 'dllname': 'errtext'</b>
<b>Explanation</b>	A COM error occurred. The COM error code of type HRESULT and the name of the Tamino server extension DLL which was called is delivered.
<b>Action</b>	Consult the COM documentation for more information.
<b>INOSXE7053</b>	<b>Error 'errno' calling data map: 'errtext'</b>
<b>Explanation</b>	An error occurred when the Tamino server extension part of the data map was accessed. The error number and message received from the Tamino data map is delivered.
<b>Action</b>	Look up the delivered error number and see the action described there.
<b>INOSXE7054</b>	<b>X-Tension system function cannot be deleted</b>
<b>Explanation</b>	An attempt was made to delete a function which is needed for the X-Tension administration.
<b>Action</b>	No action required.
<b>INOSXE7055</b>	<b>The server extension threw exception 'errtext'.</b>
<b>Explanation</b>	The server extension threw an exception. The message and occasionally the number of the exception are delivered.
<b>Action</b>	See the documentation of the server extension in question for more information.
<b>INOSXE7056</b>	<b>X-Tension caller: Not enough memory</b>
<b>Explanation</b>	There was not enough memory for execution of the server extension function.
<b>Action</b>	Close some applications and try again.
<b>INOSXE7057</b>	<b>X-Tension caller: internal error</b>
<b>Explanation</b>	Internal errors occurred within the X-Tension administration structure.
<b>Action</b>	Please contact your software supplier.
<b>INOSXE7058</b>	<b>X-Tension caller: got no spinlock. Reason: 'retval'.</b>
<b>Explanation</b>	An error occurred within the thread synchronization. A server extension could not be locked. The return value received from the thread administration is delivered.
<b>Action</b>	Please contact your software supplier.

<b>INOSXE7059</b>	<b>X-Tension caller: could not get data map information</b>
<b>Explanation</b>	The X-Tension caller was unable to get any data map information.
<b>Action</b>	Please contact your software supplier.
<b>INOSXE7060</b>	<b>Mapping function 'n': Wrong number of parameters implemented. Expected: 'm'.</b>
<b>Explanation</b>	A Tamino server extension mapping function does not support the number of parameters needed for this function type.
<b>Action</b>	Install a correctly implemented server extension.
<b>INOSXE7061</b>	<b>Extension function 'n': Wrong type of parameter 'm' implemented</b>
<b>Explanation</b>	A mapping function does not support the correct parameter types.
<b>Action</b>	Compare the parameter type for this type of extension function as described in the manual with the parameter type supported by the extension function (found using Tamino Manager). Install a correctly implemented extension function.
<b>INOSXE7062</b>	<b>X-Tension caller: initialization failed</b>
<b>Explanation</b>	The X-Tension caller was not initialized when the Tamino server was started. It is impossible to call any extension function, maybe because server extension libraries could not be loaded.
<b>Action</b>	Check your Tamino installation.
<b>INOSXE7063</b>	<b>X-Tension caller: 'No' server event calls failed</b>
<b>Explanation</b>	A server event call to some server extensions failed. The number of failures is delivered.
<b>Action</b>	Please contact your software supplier.
<b>INOSXE7064</b>	<b>Unexpected end of file encountered before end of source</b>
<b>Explanation</b>	During the parsing of the X-Tension installation file, IDL file or one of the server extension source files, an unexpected end of file was found.
<b>Action</b>	Check the syntax of the file(s).
<b>INOSXE7065</b>	<b>Syntax error. Token: 'Token'.</b>
<b>Explanation</b>	An unspecified error was encountered during parsing near or at the place specified by 'Token'.
<b>Action</b>	Check the syntax of the X-Tension installation file.

---

<b>INOSXE7066</b>	<b>Unbalanced tag / end tag: 'tag1' / ' tag2'</b>
<b>Explanation</b>	In the X-Tension installation file, the names of begin-tag and end-tag are different.
<b>Action</b>	Check the syntax of the X-Tension installation file.
<b>INOSXE7067</b>	<b>Tag 'tagname' not found</b>
<b>Explanation</b>	The specified mandatory tag was not found in the X-Tension installation file.
<b>Action</b>	Check the syntax of the X-Tension installation file.
<b>INOSXE7068</b>	<b>Tag 'tagname' is not a value</b>
<b>Explanation</b>	A simple value was expected for the specified tag, but a node has been found.
<b>Action</b>	Check the syntax of the X-Tension installation file.
<b>INOSXE7069</b>	<b>Tag 'tagname' is not a node</b>
<b>Explanation</b>	A node was expected for the specified tag, but a simple value has been found.
<b>Action</b>	Check the syntax of the X-Tension installation file.
<b>INOSXE7070</b>	<b>Duplicate name: 'name'</b>
<b>Explanation</b>	The specified tag name was found twice in the X-Tension installation file.
<b>Action</b>	Check the syntax of the X-Tension installation file.
<b>INOSXE7071</b>	<b>Error 'character' expected</b>
<b>Explanation</b>	The specified character was expected but not found in the X-Tension installation file or one of the server extension source files.
<b>Action</b>	Check the syntax of the X-Tension installation file and the server extension source files.
<b>INOSXE7072</b>	<b>Error 'character' expected, eof found</b>
<b>Explanation</b>	The specified character was expected, but an end of file was found in the X-Tension installation file or one of the server extension source files.
<b>Action</b>	Check the syntax of the X-Tension installation file and the server extension source files.

<b>INOSXE7073</b>	<b>IDL file 'segment name' is corrupt</b>
<b>Explanation</b>	A syntax error was found in the IDL file for the definition of the server extension interface at or near the specified keyword.
<b>Action</b>	Check the syntax of the IDL file.
<b>INOSXE7074</b>	<b>'SXF' not defined in interface</b>
<b>Explanation</b>	The specified function has been defined in the X-Tension installation file but it had not been entered into the IDL file for the server extension interface.
<b>Action</b>	Remove the function definition from the X-Tension installation file and use the X-Tension Developer Studio add-in to define a new one.
<b>INOSXE7075</b>	<b>Return type must be HRESULT, not 'type'</b>
<b>Explanation</b>	A COM server extension must always return HRESULT.
<b>Action</b>	Use the [retval] attribute for the last parameter as a return value of the server extension function.
<b>INOSXE7076</b>	<b>Method 'method': Different parameter names: 'param1' / 'param2'</b>
<b>Explanation</b>	The parameter name of the indicated server extension function in the X-Tension installation file is different from that defined in the IDL file.
<b>Action</b>	Check the implementation of the server extension function; use the X-Tension Developer Studio add-in to define a server extension function.
<b>INOSXE7077</b>	<b>Too many parameters: 'SXF'</b>
<b>Explanation</b>	The specified server extension function has been implemented with more parameters than are defined in the X-Tension installation file.
<b>Action</b>	Check the implementation of the server extension function; use the X-Tension Developer Studio add-in to define a server extension function.
<b>INOSXE7078</b>	<b>Cannot map parameter type</b>
<b>Explanation</b>	A parameter type is used in the COM interface that cannot be used for server extension function parameters.
<b>Action</b>	Use the X-Tension Developer Studio add-in to define a server extension function.

---

<b>INOSXE7079</b>	<b>Server extension implementation file could not be found</b>
<b>Explanation</b>	The X-Tension Developer Studio add-in could not find the file with the implementation of the class for the server extension.
<b>Action</b>	Use the X-Tension development tool to create a server extension.
<b>INOSXE7080</b>	<b>Unknown XML data type: 'type'</b>
<b>Explanation</b>	The specification of the XML data type for a server extension function parameter is wrong. See the documentation for allowed data types.
<b>Action</b>	Use the X-Tension Developer Studio add-in to define a new server extension function.
<b>INOSXE7081</b>	<b>Unknown programming language data type: 'type'</b>
<b>Explanation</b>	The function implementation uses a data type for one of its parameters that is not supported when using this function as a server extension function. See the documentation for the allowed data types in this programming language
<b>Action</b>	Use the X-Tension development tools to define a server extension function.
<b>INOSXE7082</b>	<b>Unknown execution mode: 'mode'</b>
<b>Explanation</b>	The specified server extension execution mode is wrong. Allowed modes are: COM-INPROC, COM-LOCAL.
<b>Action</b>	Use the Tamino Manager to change this mode.
<b>INOSXE7083</b>	<b>Wrong numeric value: 'val'</b>
<b>Explanation</b>	The value was expected to be numeric but the given value is not numeric.
<b>Action</b>	Enter a numeric value here.
<b>INOSXE7084</b>	<b>Wrong parameter position</b>
<b>Explanation</b>	The parameter position in the X-Tension installation file must start at 1.
<b>Action</b>	Check the parameter position values. Use X-Tension Developer Studio add-in to define a new server extension function.
<b>INOSXE7085</b>	<b>Cannot open file 'name'</b>
<b>Explanation</b>	The specified file could not be opened.
<b>Action</b>	Check if this file really exists, or if it is locked by another process.

<b>INOSXE7086</b>	<b>Wrong version format: 'string'</b>
<b>Explanation</b>	The server extension version is supposed to be of the form major.minor
<b>Action</b>	Check the server extension version.
<b>INOSXE7087</b>	<b>Event function 'function' not found</b>
<b>Explanation</b>	An event function has been specified in the SXS-EVENT-FUNCTION tag of the X-Tension installation file, but it could not be found in an SXS-FUNCTION tag.
<b>Action</b>	Delete the event function specification tag and use the X-Tension Developer Studio add-in to specify a new one.
<b>INOSXE7088</b>	<b>Wrong document type for X-Tension administration: 'type'</b>
<b>Explanation</b>	The document type (second level tag) of the X-Tension administration file is wrong. Allowed types are: SXS-INSTALL, SXS-DELETE, SXS-SHOW, SXS-RETURN.
<b>Action</b>	For a server extension installation, only SXS-INSTALL is valid.
<b>INOSXE7089</b>	<b>Missing XML attribute 'attribute' for SXS-SHOW</b>
<b>Explanation</b>	No attribute is given for the X-Tension administration type tag SXS-SHOW.
<b>Action</b>	One of the attributes list, object, function, permission, document must be given for the SXS-SHOW tag.
<b>INOSXE7090</b>	<b>Wrong XML attribute: 'attribute'</b>
<b>Explanation</b>	A wrong attribute is given for the X-Tension administration type tag SXS-SHOW.
<b>Action</b>	One of the attributes list, object, function, permission, document must be given for the SXS-SHOW tag.
<b>INOSXE7091</b>	<b>Wrong parameter attribute: 'attribute'</b>
<b>Explanation</b>	A wrong parameter attribute has been specified in the X-Tension installation file. Allowed attributes are: input, output, inout, retval.
<b>Action</b>	Use the X-Tension Developer Studio add-in to define a new server extension function.
<b>INOSXE7092</b>	<b>No current project</b>
<b>Explanation</b>	There is no project open in Developer Studio. The X-Tension add-in will not work.
<b>Action</b>	Open a server extension project first.

---

<b>INOSXE7093</b>	<b>This is not a C/C++ project</b>
<b>Explanation</b>	The X-Tension add-in will not work for Java or Visual Basic projects.
<b>Action</b>	Open a C/C++ project.
<b>INOSXE7094</b>	<b>This is not an X-Tension project</b>
<b>Explanation</b>	The current project has not been created by an X-Tension development tool.
<b>Action</b>	Use the X-Tension development tool to create a server extension.
<b>INOSXE7095</b>	<b>File 'filename' is read-only</b>
<b>Explanation</b>	The specified file is read-only. Therefore, the X-Tension Developer Studio add-in cannot add the specifications for the new server extension function to it.
<b>Action</b>	Change the ReadOnly parameter of the specified file.
<b>INOSXE7096</b>	<b>System error: 'errtext'</b>
<b>Explanation</b>	An operating system error occurred in the X-Tension Developer Studio add-in.
<b>Action</b>	Check the operating system documentation for further details.
<b>INOSXE7099</b>	<b>Cannot write to file 'filename'</b>
<b>Explanation</b>	The file has been opened, but a write operation failed. Possibly the disk is full.
<b>Action</b>	Check your hard disk space.
<b>INOSXE7100</b>	<b>Wrong package file: 'filename'</b>
<b>Explanation</b>	The file specified is not an output file of the X-Tension Developer Studio add-in package function.
<b>Action</b>	Only use package files created by the X-Tension Developer Studio add-in.
<b>INOSXE7101</b>	<b>Could not get XML session status. Server extension function rolled back at request end.</b>
<b>Explanation</b>	The X-Tension caller could not determine whether there was a regular or an anonymous XML session. So the Tamino server event 'rollback' was sent to all server extensions.
<b>Action</b>	No action required.

<b>INOSXE7102</b>	<b>Initialization of server extensions: server events not activated</b>
<b>Explanation</b>	The Tamino server events could not be activated when the Tamino server was started. Server extensions are not initialized and will not work.
<b>Action</b>	Restart the Tamino server. If this does not give the desired result, please contact your software supplier.
<b>INOSXE7103</b>	<b>Developer Studio automation error 'errno' (errtext)</b>
<b>Explanation</b>	The add-in caused an error when executing a Developer Studio command.
<b>Action</b>	Consult the Developer Studio documentation for further information.
<b>INOSXE7104</b>	<b>Method 'method' could not be found in file 'objfile'</b>
<b>Explanation</b>	The method indicated is not defined in the current server extension object file (Java class file or DLL/Shared Object), or another severe error occurred when accessing the server extension object file.
<b>Action</b>	Check the server extension project for the desired method.  Use the X-Tension development tools for developing server extensions!
<b>INOSXE7105</b>	<b>Project must be rebuilt before packing: 'file' is newer</b>
<b>Explanation</b>	One of the project sources is newer than the resulting server extension package.
<b>Action</b>	Call Build / Build <project name> in the Developer Studio before packing.
<b>INOSXE7106</b>	<b>One or more input fields are empty</b>
<b>Explanation</b>	All fields of this form must be set, but at least one field is empty.
<b>Action</b>	Make sure that all fields are correctly set.
<b>INOSXE7107</b>	<b>'name' is not a valid identifier</b>
<b>Explanation</b>	The name entered does not match C/C++ naming conventions.
<b>Action</b>	Check the name for proper syntax.
<b>INOSXE7108</b>	<b>Value for 'valuename' of a server extension not found in data map</b>
<b>Explanation</b>	A value for the specified name of a server extension was expected in the data map but is not present. The problem occurs due to problems at installation or in the repository. Here, the specified name is the name of an expected value.
<b>Action</b>	Re-install the server extension.

---

<b>INOSXE7109</b>	<b>Memory allocation failed</b>
<b>Explanation</b>	Memory allocation failed.
<b>Action</b>	Please contact your software supplier.
<b>INOSXE7110</b>	<b>Character conversion failed; error code = 'errcode'</b>
<b>Explanation</b>	An internal character conversion failed.
<b>Action</b>	See the Tamino documentation for the given error code. Check if Tamino is properly installed.
<b>INOSXE7113</b>	<b>Cannot find function 'funcname' in library 'libname'</b>
<b>Explanation</b>	The specified function name could not be found in the library. Maybe there is a version problem.
<b>Action</b>	Check your Tamino installation.
<b>INOSXE7114</b>	<b>Java error: Errtext: 'errtext'. Stacktrace: 'trace'.</b>
<b>Explanation</b>	A Java error occurred. See "Errtext" for more specific details. "Stacktrace" is the exception stack trace.
<b>Action</b>	See "Errtext" for more specific details and correct the code accordingly.
<b>INOSXE7115</b>	<b>Cannot create Java virtual machine; error 'errcode'</b>
<b>Explanation</b>	The Java virtual machine could not be started.
<b>Action</b>	Check the Java documentation for the given error code.
<b>INOSXE7116</b>	<b>Function 'sxfname' not found in server extension 'sxsname'</b>
<b>Explanation</b>	The function could not be found in the server extension. Probably the server extension implementation has been changed after installation.
<b>Action</b>	Try to re-install the server extension.
<b>INOSXE7117</b>	<b>Illegal call for Java method 'methodname' in class 'classname'</b>
<b>Explanation</b>	An error occurred during a call for a Java method. Probably the parameter count or the type(s) of at least one parameter is incorrect. For a server extension function, its implementation may have changed since the last installation.
<b>Action</b>	Re-install this server extension.

<b>INOSXE7118</b>	<b>'package' not available on this platform</b>
<b>Explanation</b>	The package specified (COM, Java or Direct) is not available on this platform. Server extensions based on this package cannot be executed.
<b>Action</b>	No action possible. This server extension cannot be run.
<b>INOSXE7119</b>	<b>'package' not installed on this platform</b>
<b>Explanation</b>	The package specified (COM or Java) is not installed on this platform.
<b>Action</b>	To run server extensions based on this package, install the specified package.
<b>INOSXE7120</b>	<b>X-Tension caller: parameter overflow, function 'name' parameter number 'no'</b>
<b>Explanation</b>	The input value was too small or too big.
<b>Action</b>	Change the input value and try again.
<b>INOSXE7121</b>	<b>XQL query function 'n': Wrong number of parameters. Required: 'm'.</b>
<b>Explanation</b>	The user passed a wrong number of parameters to a function called from within an XQL query.
<b>Action</b>	Repeat the call with the correct number of parameters.
<b>INOSXE7122</b>	<b>XQL query function 'n': Wrong type of parameter 'm'</b>
<b>Explanation</b>	The user input is of the wrong data type.
<b>Action</b>	Get information about parameter types of called functions (see the Tamino Manager or the third party manual for the corresponding server extension) and repeat the call with the correct input.
<b>INOSXE7123</b>	<b>Java error during initialization of Java server extension: 'errtext'</b>
<b>Explanation</b>	The error text gives detailed information about the error.
<b>Action</b>	Correct the fault and try again.
<b>INOSXE7124</b>	<b>Java error during call: 'errtext'</b>
<b>Explanation</b>	The error text gives detailed information about the error.
<b>Action</b>	Correct the fault and try again.

---

<b>INOSXE7125</b>	<b>Java error during server extension function parameter handling: 'errtext'</b>
<b>Explanation</b>	The error text gives detailed information about the error.
<b>Action</b>	Correct the fault and try again.
<b>INOSXE7126</b>	<b>Server extension failed</b>
<b>Explanation</b>	An error occurred when a Tamino server extension was called. The message is followed by another more detailed message.
<b>Action</b>	Analyze the detailed message and act accordingly.
<b>INOSXE7127</b>	<b>X-Tension : Java initialization failed</b>
<b>Explanation</b>	During X-Tension initialization the initialization of the Java virtual machine failed. No Java-based extension functions are available during this server session.
<b>Action</b>	If Java-based server extension functions are required, fix the Java problem (e.g. paths and internal configuration store entries) and start the Tamino server again.
<b>INOSXE7129</b>	<b>'location': Got no spinlock. Reason: 'retval'.</b>
<b>Explanation</b>	There is no lock available for your thread.
<b>Action</b>	Try again later.
<b>INOSXE7130</b>	<b>Internal error when 'location'</b>
<b>Explanation</b>	An unknown internal error occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOSXE7132</b>	<b>'unusedinfrastructur' infrastructure is not available or currently disabled</b>
<b>Explanation</b>	The X-Tension infrastructure specified is either not available in this environment or is currently configured as disabled in the Tamino server parameters.
<b>Action</b>	If the required infrastructure is available in this environment, turn on the appropriate switch of the Tamino server parameters and restart the Tamino server to activate it. If the infrastructure is not available, the relevant server extension code attempting to use it should be modified to utilise a supported infrastructure.
<b>INOSXE7136</b>	<b>Wrong command line for the server extension wrapper tool: 'arg'</b>
<b>Explanation</b>	The command line for the server extension wrapper tool has incorrect syntax.
<b>Action</b>	Please check the documentation for the command line syntax of the server extension wrapper tool or use the server extension development tools to set up a direct server extension project.

<b>INOSXE7137</b>	<b>Duplicate option 'c'</b>
<b>Explanation</b>	The given option may not occur more than once in the command line for the server extension wrapper tool.
<b>Action</b>	Please check the documentation for the command line syntax of the server extension wrapper tool or use the server extension development tools to set up a direct server extension project.
<b>INOSXE7138</b>	<b>Wrong option 'c'</b>
<b>Explanation</b>	The given option is invalid in the command line for the server extension wrapper tool.
<b>Action</b>	Please check the documentation for the command line syntax of the server extension wrapper tool or use the server extension development tools to set up a direct server extension project.
<b>INOSXE7140</b>	<b>No valid JVM, install valid JVM or switch X-Tension Java Usage to 'NO'</b>
<b>Explanation</b>	Error detected when loading a JVM for current Tamino version
<b>Action</b>	Check if JVM is installed, if a valid JVM Version is installed or switch X-Tension Java Usage to 'NO'.
<b>INOSXE7141</b>	<b>Server extension 'name' already locked</b>
<b>Explanation</b>	The server extension is locked by another operation.
<b>Action</b>	Retry the requested operation when the lock has been removed.
<b>INOSXE7142</b>	<b>Server extension 'name' is active</b>
<b>Explanation</b>	The server extension is in use.
<b>Action</b>	Retry the requested operation when the server extension has finished.
<b>INOSXE7143</b>	<b>Server extension 'name' not found</b>
<b>Explanation</b>	The server extension does not exist.
<b>Action</b>	Correct the server extension name and retry the operation.
<b>INOSXE7144</b>	<b>Server extension function 'name' not found</b>
<b>Explanation</b>	The server extension function does not exist.
<b>Action</b>	Correct the function name and retry the operation.

---

<b>INOSXE7145</b>	<b>Wrong modification operation 'type'</b>
<b>Explanation</b>	The requested modification operation is not implemented.
<b>Action</b>	Correct the modification operation type and retry the operation.
<b>INOSXE7146</b>	<b>Wrong execution mode 'mode'</b>
<b>Explanation</b>	The requested execution mode is not allowed.
<b>Action</b>	Correct the execution mode and retry the operation.
<b>INOSXE7147</b>	<b>Files for server extension 'name' not restored</b>
<b>Explanation</b>	Some files of the server extension have not been restored.
<b>Action</b>	Ensure that the Tamino server has write access to the file system and retry the operation.
<b>INOSXE7148</b>	<b>Files for server extension 'name' not removed</b>
<b>Explanation</b>	Some files of the server extension have not been removed.
<b>Action</b>	Ensure that the files are not locked by another action and retry the operation.
<b>INOSXE7149</b>	<b>Files for server extension 'name' not stored</b>
<b>Explanation</b>	Some files of the server extension have not been stored.
<b>Action</b>	Ensure that the files are not locked by another action and retry the operation.
<b>INOSXE7150</b>	<b>Installation document for server extension 'name' not stored</b>
<b>Explanation</b>	The installation document of the server extension has not been stored.
<b>Action</b>	Ensure that the installation document is not locked by another action and retry the operation.
<b>INOSXE7151</b>	<b>Event Function call failed for server extension: a, Event: b</b>
<b>Explanation</b>	Event functions are for cleaning up server extension data after commit, rollback, session end and so on. See the X-Tension manual (server extension Functions/Server Event Functions), for information about which event failed.
<b>Action</b>	Analyze the cause of failure. If necessary, ask the programmer or vendor of the server extension. Check the data that was written outside the Tamino server by the failed extension for consistency.

<b>INOSXE7152</b>	<b>Attribute 'hidden' cannot be assigned to or removed from this parameter</b>
<b>Explanation</b>	An attempt was made to assign or remove the 'hidden' attribute. This operation is only successful if the parameter has the 'input' direction (for assignment) or the parameter is 'hidden' (for removal).
<b>Action</b>	Check the server extension function and its parameters and read the documentation.
<b>INOSXE7153</b>	<b>This parameter cannot be assigned a default value</b>
<b>Explanation</b>	To assign a default value to a parameter, this parameter must have the 'input' direction.
<b>Action</b>	Check the current server extension function and its parameters.
<b>INOSXE7154</b>	<b>Wrong position for optional / hidden parameter</b>
<b>Explanation</b>	The order for parameters must be: mandatory - optional - hidden - return value.
<b>Action</b>	Please check the order of the server extension function's parameters and their usage.
<b>INOSXE7158</b>	<b>Server extension function parameter 'name' not found</b>
<b>Explanation</b>	The server extension function parameter does not exist.
<b>Action</b>	Correct the parameter name and retry the operation.
<b>INOSXE7160</b>	<b>Duplicate occurrence of 'functiontype'</b>
<b>Explanation</b>	Only one event function or init function may be defined within a server extension.
<b>Action</b>	Check your server extension and delete one of the functions that is superfluous, or use the X-Tension development tools to create and edit the server extension.
<b>INOSXE7161</b>	<b>Invalid input for field: field</b>
<b>Explanation</b>	The user input for the specified field is invalid. Either invalid characters have been used or the format of the characters used is incorrect.
<b>Action</b>	Please correct the specified field.
<b>INOSXE7162</b>	<b>Document not found for specified ino:id/docname</b>
<b>Explanation</b>	A document could not be found using the specified ino:id or docname.
<b>Action</b>	Please specify a valid ino:id or docname.

---

<b>INOSXE7255</b>	<b>Java Exception</b>
<b>Explanation</b>	Specified Java exception occurred
<b>Action</b>	Resolve the specified Java exception
<b>INOSXF6718</b>	<b>Timeout during execution of server extension function</b>
<b>Explanation</b>	Possible reasons are: 1) There is an endless loop in the server extension function. 2) A server extension function is executed with endless recursion.
<b>Action</b>	Check the server extension carefully. For example, calling the callback SxsXmlProcess will result in an endless recursion if the collection name is the same as the current server extension function is assigned to.
<b>INOSXF6719</b>	<b>Process 'exefile' (for Direct Local) has stopped with rc = rc</b>
<b>Explanation</b>	The external process for X-Tension direct infrastructure (local mode) has aborted. See error for more details.
<b>Action</b>	Check your server extension. Probably it killed the external process for local mode.
<b>INOSXF6720</b>	<b>Stack overflow in server extension function</b>
<b>Explanation</b>	A stack overflow occurred during call of a server extension function.
<b>Action</b>	Check your server extension. Perhaps it has endless recursion.
<b>INOSXF7028</b>	<b>Illegal call of Connect/Disconnect</b>
<b>Explanation</b>	This error may occur in a Visual Basic or Natural implementation of a server extension. Reasons for this error may be: The Connect and Disconnect methods of the InoCallback interface have been called outside ISXSConn_Connect or ISXSConn_Disconnect or have been called there more than once.
<b>Action</b>	Implement ISXSConn_Connect and ISXSConn_Disconnect exactly as shown in the documentation. Do not call the Connect and Disconnect methods of InoCallback outside ISXSConn_Connect and ISXSConn_Disconnect.
<b>INOSXF7030</b>	<b>'tool' does not support server extensions of type 'type'</b>
<b>Explanation</b>	The X-Tension Builder tried to open a COM server extension.
<b>Action</b>	With the X-Tension Builder, open Java or Direct server extensions only.

<b>INOSXF7033</b>	<b>Server extension 'sxsname' not properly installed. Reason: 'reason'.</b>
<b>Explanation</b>	One or more installation steps for this server extension have been skipped or failed. See 'Reason' for more information.
<b>Action</b>	Use the X-Tension Administration of the Tamino Manager to install the server extension.
<b>INOSXF7035</b>	<b>Cannot load library sxcall</b>
<b>Explanation</b>	The library sxcall necessary for Tamino X-Tension cannot be loaded. Therefore no server extensions can be executed in this Tamino installation.
<b>Action</b>	Check your Tamino installation.
<b>INOSXF7036</b>	<b>Cannot load a function in library sxcall</b>
<b>Explanation</b>	Not all functions necessary to run Tamino X-Tension can be found in library sxcall. Therefore no server extensions can be executed in this Tamino installation. Probably there is a version mismatch between the library sxcall and the rest of Tamino.
<b>Action</b>	Check your Tamino installation.
<b>INOSXF7037</b>	<b>Internal configuration store entry not found</b>
<b>Explanation</b>	An internal configuration store entry necessary to initialize Tamino X-Tension or one of the Tamino X-Tension components cannot be found. If this error occurs during Tamino startup, no server extensions can be executed in this Tamino installation.
<b>Action</b>	Check your Tamino installation.
<b>INOSXF7038</b>	<b>Cannot find current version in internal configuration store</b>
<b>Explanation</b>	The 'current version' entry in the internal configuration store that is necessary to initialize Tamino X-Tension or one of the Tamino X-Tension components cannot be found. If this error occurs during Tamino startup, no server extensions can be executed in this Tamino installation.
<b>Action</b>	Check your Tamino installation.
<b>INOSXF7039</b>	<b>Cannot load jvm library</b>
<b>Explanation</b>	The jvm library (libraries) necessary to run Java server extensions cannot be loaded. Therefore no server extensions can be executed in this Tamino installation.
<b>Action</b>	Check your Tamino installation as well as your Java installation. Look if \$LD_LIBRARY_PATH on UNIX (or %PATH% on Windows) includes all required JDK directories.

---

<b>INOSXF7042</b>	<b>Cannot find executable file 'execfile'</b>
<b>Explanation</b>	The indicated file could not be found in any of the directories listed in PATH.
<b>Action</b>	Check installation(s) on your computer and check your PATH setting.
<b>INOSXF7043</b>	<b>Tamino X-Tension not properly installed. Reason: 'reason'.</b>
<b>Explanation</b>	The X-Tension development tool cannot create a new server extension project because Tamino X-Tension component is not properly installed on your computer.
<b>Action</b>	Use the Install Tool for a correct installation of Tamino X-Tension.
<b>INOSXF7044</b>	<b>Error calling 'execfile'. Reason: 'reason'.</b>
<b>Explanation</b>	An error occurred while trying to start an external process with the indicated file. See the additional text for more details.
<b>Action</b>	Check the given file for correctness.
<b>INOSXF7097</b>	<b>Tamino X-Tension not properly installed</b>
<b>Explanation</b>	The X-Tension development tool cannot create a new server extension project because Tamino X-Tension component is not properly installed on your computer.
<b>Action</b>	Use the Install Tool for a correct installation of Tamino X-Tension.
<b>INOSXF7098</b>	<b>Fatal error</b>
<b>Explanation</b>	An unspecified error occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOSXF7111</b>	<b>Server extension 'xsxname' not properly installed</b>
<b>Explanation</b>	One or more installation steps for this server extension have been skipped or failed.
<b>Action</b>	Use the X-Tension Administration of the Tamino Manager to install a server extension.
<b>INOSXF7112</b>	<b>Cannot load library 'libname': error 'rc'</b>
<b>Explanation</b>	The specified library could not be loaded. Maybe it has been moved from its original location, or environment variables or internal configuration store entries have been changed since the last Tamino installation.
<b>Action</b>	Check your PATH and your Tamino installation.

<b>INOSXF7133</b>	<b>No class has been found that can be used as a direct server extension class.</b>
<b>Explanation</b>	Either there is no class defined in the given header file or none of the classes defined here can be used as a direct server extension.
<b>Action</b>	Please check the documentation about requirements for direct Server Extension classes or use the X-Tension development tools to create a Server Extension.
<b>INOSXF7134</b>	<b>There are at least two classes ('class1', 'class2') that can be used as direct server extensions</b>
<b>Explanation</b>	A header file that should be processed by the direct server extension wrapper tool may define only one class that can be used as a direct server extension.
<b>Action</b>	Please check the documentation on how to mark C++ classes for use as direct server extensions or move all class definitions except the direct server extension class to a different header file.
<b>INOSXF7155</b>	<b>Internal error: 'id'</b>
<b>Explanation</b>	A severe internal error occurred.
<b>Action</b>	Please note the value of the internal error and contact your software supplier.
<b>INOSXF7156</b>	<b>Cannot start process 'exefile' for X-Tension direct infrastructure (local mode)</b>
<b>Explanation</b>	The system cannot start a new process for X-Tension direct infrastructure (local mode).
<b>Action</b>	Check the existence of the file indicated. It should be located in directory Tamino/<version>/bin.
<b>INOSXF7157</b>	<b>Process 'exefile' (for Direct Local) is not running</b>
<b>Explanation</b>	The external process for X-Tension direct infrastructure (local mode) has aborted or is not running for other reason.
<b>Action</b>	Check your server extension. Perhaps it killed the external process for local mode.
<b>INOSXF7251</b>	<b>Thread could not be attached to JVM, return code 'rc'</b>
<b>Explanation</b>	The current XML worker thread could not be attached to the Java virtual machine. Tamino server extensions were not initialized. The return code is the return value of the JNI call "AttachCurrentThread()".
<b>Action</b>	Analyze why the Java call failed and solve the cause of the problem. Then start Tamino server again.

<b>INOSXF7252</b>	<b>Metadata update failed: id</b>
<b>Explanation</b>	Metadata update has failed.
<b>Action</b>	<p>In the case of CentraSite database startup failure indicated by the production of the console message: "INOSXF7252: Metadata update failed" the following information is essential to analyse the problem.</p> <p>The most useful file in these circumstances is the "inosrv.txt" file. This is normally called something like AABinosrv.HH-MM-SS.txt and would normally be present in the same directory as the actual database data files.</p> <pre>inoadmin set CentraSite "request log" "full" norestart</pre> <pre>inoadmin set CentraSite "X-Tension Java Options" "\$-Dlog4j.configuration=file://{full path to log4j.properties}" restart</pre> <pre>log4j.rootLogger=WARN, file</pre> <pre>log4j.logger.com.centrasite.centrasite.onstartup=DEBUG</pre> <pre>log4j.appender.file=org.apache.log4j.FileAppender</pre> <pre>log4j.appender.file.layout=org.apache.log4j.PatternLayout</pre> <pre>log4j.appender.file.layout.ConversionPattern=%d %8r [%t]%-5p %c{3} %x - %m%n</pre> <pre>log4j.appender.file.File={full path to log file}</pre>
<b>INOSXI6708</b>	<b>X-Tension usage is currently disabled</b>
<b>Explanation</b>	All of the X-Tension infrastructures (COM, Java and Direct) are currently disabled.
<b>Action</b>	Turn on the appropriate switch of the Tamino server parameters and restart the Tamino server.
<b>INOSXI6723</b>	<b>JVM started with user options 'jvm_options'</b>
<b>Explanation</b>	The JVM was started with the specified additional user options.
<b>Action</b>	No action required.
<b>INOSXI7029</b>	<b>Finished searching the file</b>
<b>Explanation</b>	The 'Find What' string has not been found after (Direction <i>Down</i> ) or before (Direction <i>Up</i> ) the current position.
<b>Action</b>	Deselect 'Match case' or select another string.

<b>INOSXI7050</b>	<b>COM for server extension is deactivated</b>
<b>Explanation</b>	COM for server extension is switched off.
<b>Action</b>	Switch on COM for server extension with Tamino Manager.
<b>INOSXI7128</b>	<b>Java for server extension is deactivated</b>
<b>Explanation</b>	Java for server extensions is switched off
<b>Action</b>	Switch on Java for server extension with the Tamino Manager
<b>INOSXI7131</b>	<b>X-Tension 'unusedinfrastructur' usage is currently disabled</b>
<b>Explanation</b>	The specified X-Tension infrastructure (COM, Java or Direct) is currently disabled.
<b>Action</b>	Turn on the appropriate switch of the Tamino server parameters and restart the Tamino server.
<b>INOSXI7253</b>	<b>Metadata update succeeded: id</b>
<b>Explanation</b>	Metadata update has finished successfully.
<b>Action</b>	None
<b>INOSXI7254</b>	<b>Metadata update started.</b>
<b>Explanation</b>	Metadata update has started. This may be a lengthy operation.
<b>Action</b>	None.
<b>INOSXV6726</b>	<b>COM server extensions are deprecated</b>
<b>Explanation</b>	COM server extensions are deprecated and will not be supported in future.
<b>Action</b>	Plan the replacement of your COM server extensions by using a different server extension infrastructure.
<b>INOSXW6700</b>	<b>'function' can no longer be used as 'functype'</b>
<b>Explanation</b>	One of the parameters has been modified or deleted. Therefore this server extension function can no longer be used as the specified function type.
<b>Action</b>	Check the Tamino server extension documentation for the different function types.

---

<b>INOSXW6701</b>	<b>At least one of the help files does not exist. It will be removed from the list.</b>
<b>Explanation</b>	The Install.xml file for your current X-Tension project has an entry for a help file that no longer exists. It will be removed from your list of help files.
<b>Action</b>	Select a new file.
<b>INOSXW6702</b>	<b>Warning: Settings for compiler 'compiler' already exist and will be overwritten</b>
<b>Explanation</b>	Compiler and linker flags already exist for the compiler specified in this warning. Choosing 'OK' will overwrite these settings.
<b>Action</b>	Choose 'OK' to overwrite these settings or 'Cancel' to stop this action.
<b>INOSXW6703</b>	<b>The path 'path' will be added to the list of executable files of Visual Studio</b>
<b>Explanation</b>	Some libraries residing in Tamino system directories are needed to build a server extension. These directories must be listed in the "Executable files" section of your Visual Studio configuration. If not yet present, sxwizard will add these directories automatically.
<b>Action</b>	Click on OK to accept these changes to your Visual Studio configuration. If you click on Cancel, no changes will be made and sxwizard will be stopped.
<b>INOSXW6721</b>	<b>Project will be moved from platform 'platform1' to 'platform2'</b>
<b>Explanation</b>	This (SXS Direct) project has been created on platform1. It is now opened on a different platform platform2, and a new make file will be created such that it can be compiled on this new platform.
<b>Action</b>	Click OK to generate a new make file, or click cancel if you do not want to have a new make file created. However, this project probably cannot be compiled on this platform.
<b>INOSXW6722</b>	<b>Project will be moved from an older Tamino version to platform 'platform'</b>
<b>Explanation</b>	This (SXS Direct) project has been created by an older version of Tamino. It is now opened by a newer Tamino version on a different platform. A new make file will be created such that it can be compiled in this version and on this new platform.
<b>Action</b>	Click OK to generate a new make file, or click cancel if you do not want to have a new make file created. However, this project probably cannot be compiled in this Tamino version.
<b>INOSXW6724</b>	<b>Unable to start JVM with user options 'jvm_options'. Starting with default options instead.</b>
<b>Explanation</b>	Conflicting or incorrect user options were specified for the JVM, so the JVM could not start. The JVM will be started with the default options.
<b>Action</b>	Correct the user options specified for the JVM and restart the server.

<b>INOSXW6727</b>	<b>The server extension generated a warning.</b>
<b>Explanation</b>	The server extension has invoked the warning XML callback. This will insert a warning into the Tamino response.
<b>Action</b>	The warning message is for informational purposes.
<b>INOSXW6728</b>	<b>Execution failed: command</b>
<b>Explanation</b>	The specified operating system command failed.
<b>Action</b>	Check the SXS installation values for faults.
<b>INOSXW7002</b>	<b>Existing server extension project at 'pathname' will be overwritten</b>
<b>Explanation</b>	A server extension project already exists in the given directory. It will be overwritten if you select "Finish".
<b>Action</b>	Press "OK" to overwrite this project or select another directory.
<b>INOSXW7003</b>	<b>Java initialization failed. Reason: 'errno', 'errtxt'.</b>
<b>Explanation</b>	Tamino was not able to create a Java virtual machine. Java based server extensions will not work.
<b>Action</b>	Make the Java virtual machine available to Tamino and start the Tamino server again or switch the server property X-Tension Java Usage to 'NO'.
<b>INOSXW7004</b>	<b>Java thread initialization failed. Reason: 'errno', 'errtxt'.</b>
<b>Explanation</b>	An XML worker thread could not be attached to the Java virtual machine. Java based server extensions will not work.
<b>Action</b>	Fix the problem of Java initialization and start the Tamino server again.
<b>INOSXW7005</b>	<b>Initialization of COM library failed. Reason: 'errno', 'errtxt'.</b>
<b>Explanation</b>	COM based server extensions will not work.
<b>Action</b>	Make the COM library available to the Tamino server, then start it again.
<b>INOSXW7007</b>	<b>No license for Tamino X-Tension</b>
<b>Explanation</b>	A special license must be bought to use the Tamino X-Tension feature.
<b>Action</b>	Buy a license for Tamino X-Tension.

---

<b>INOSXW7008</b>	<b>Tamino X-Tension not available</b>
<b>Explanation</b>	On this platform the Tamino X-Tension feature is not available.
<b>Action</b>	No action required.
<b>INOSXW7011</b>	<b>This will remove all previously selected files from your package list</b>
<b>Explanation</b>	For a server extension package, either one or more class files or ONE jar file can be used. This warning shows up in one of the following cases: 1) A jar file was selected and a class file will be added to the class file list: The jar file will be removed from the list. 2) One or more class files or another jar file were selected, and a jar file will be added: All recently selected files will be removed.
<b>Action</b>	Choose "OK" to confirm or "Cancel" to cancel the current selection
<b>INOSXW7012</b>	<b>Main Class File for server extension missing</b>
<b>Explanation</b>	For a server extension package, either one or more class files or ONE jar file can be used. This warning shows up when none of the selected class files contains the main class of the server extension.
<b>Action</b>	Add another class file that contains the main class of the server extension.
<b>INOSXW7013</b>	<b>Server extension might not run without these class(es)</b>
<b>Explanation</b>	In the Packaging Dialogue of the X-Tension Builder, one of the selected class files is about to be removed. Without this class file the installation of this server extension will be incomplete.
<b>Action</b>	Check if this class file is really unnecessary for the current server extension.
<b>INOSXW7031</b>	<b>Directory 'dir' does not exist and will be created</b>
<b>Explanation</b>	This directory does not exist and will be created.
<b>Action</b>	Select "OK" to create this directory, select "Cancel" to cancel project creation.
<b>INOSXW7135</b>	<b>The given class contains no server extension function</b>
<b>Explanation</b>	The given class does not contain any method that can be used as a server extension function.
<b>Action</b>	Enter some methods using the direct server extension development tools.

<b>INOSXW7139</b>	<b>No valid JVM, install valid JVM or switch X-Tension Java Usage to 'NO'</b>
<b>Explanation</b>	Error detected when loading a JVM for current Tamino version
<b>Action</b>	Check if JVM is installed, if a valid JVM Version is installed or switch X-Tension Java Usage to 'NO'.
<b>INOSXW7159</b>	<b>Value will be set to empty string</b>
<b>Explanation</b>	A default value or configuration parameter (Init Function) may be set to empty string if data type is charstring.
<b>Action</b>	Please check if in this special case this effect is intended.
<b>INOX2E8000</b>	<b>Usage of distributed transaction processing is not supported on this platform</b>
<b>Explanation</b>	It is not possible to use distributed transaction processing features on the Tamino server platform.
<b>Action</b>	None - the platform does not support distributed transaction processing.
<b>INOX2E8001</b>	<b>Conversion of the distributed transaction processing transaction identifier was not possible</b>
<b>Explanation</b>	The transaction identifier provided does not have a defined method to convert it to the internal format.
<b>Action</b>	Contract your software supplier - this is a software error.
<b>INOX2E8002</b>	<b>An internal error occurred dealing with the transaction identifier in distributed transaction</b>
<b>Explanation</b>	The transaction identifier caused an internal error when being processed.
<b>Action</b>	Contract your software supplier - this is a software error.
<b>INOX2E8003</b>	<b>Server encountered an error while performing a distributed transaction processing action</b>
<b>Explanation</b>	A distributed transaction processing action resulted in the server not being able to complete the action requested.
<b>Action</b>	Contract your software supplier - this is a software error.

---

<b>INOX2E8004</b>	<b>The specified distributed transaction processing identifier is unknown by the server</b>
<b>Explanation</b>	A transaction identifier was specified which is unknown to the server. This can happen if a timeout occurred or if the transaction has not been prepared before a server restart.
<b>Action</b>	This message will be given back by the server to the transaction manager.
<b>INOX2E8005</b>	<b>An invalid argument was detected on a distributed transaction processing call</b>
<b>Explanation</b>	An argument supplied by the transaction manager was invalid.
<b>Action</b>	This message will be given back by the server to the transaction manager.
<b>INOX2E8006</b>	<b>Protocol error - an action requested by the transaction manager was invoked in an improper context</b>
<b>Explanation</b>	The specified action cannot be carried out in the current distributed transaction state.
<b>Action</b>	This message will be given back by the server to the transaction manager.
<b>INOX2E8007</b>	<b>An error has occurred which makes server unavailable to process the transaction manager's action</b>
<b>Explanation</b>	The action requested by the transaction manager cannot be fulfilled by Tamino currently.
<b>Action</b>	This message will be given back by the server to the transaction manager.
<b>INOX2E8008</b>	<b>Duplicate distributed transaction identifier encounter while enlisting in a distributed transaction</b>
<b>Explanation</b>	A duplicate transaction identifier was encountered while enlisting in a distributed transaction.
<b>Action</b>	This is an internal error and should be reported to your software supplier.
<b>INOX2E8010</b>	<b>The specified distributed transaction has been rollback</b>
<b>Explanation</b>	The server has decided that this distributed transaction can only be rolled back.
<b>Action</b>	This message is a reply to a transaction manager request.
<b>INOX2E8011</b>	<b>A communications error has occurred</b>
<b>Explanation</b>	A communications error occurred while attempting a distributed transaction processing action sent by the transaction manager.
<b>Action</b>	This message is a reply to a transaction manager request.

<b>INOX2E8012</b>	<b>The server has detected a deadlock involving the specified distributed transaction</b>
<b>Explanation</b>	A deadlock has been detected for the specified distributed transaction. The transaction has been rolled back.
<b>Action</b>	This message is a reply to a transaction manager request.
<b>INOX2E8013</b>	<b>The server has detected an integrity violation for the resources requested by the specified distributed transaction</b>
<b>Explanation</b>	An integrity violation has been detected for the specified distributed transaction. The transaction has been rolled back.
<b>Action</b>	This message is a reply to a transaction manager request
<b>INOX2E8014</b>	<b>The server has detected an unspecified error for the specified distributed transaction</b>
<b>Explanation</b>	An unspecified has been detected for the specified distributed transaction. The transaction has been rolled back.
<b>Action</b>	This message is a reply to a transaction manager request
<b>INOX2E8015</b>	<b>The server has detected an internal protocol error for the specified distributed transaction</b>
<b>Explanation</b>	An internal protocol error has been detected for the specified distributed transaction.
<b>Action</b>	This message is a reply to a transaction manager request.
<b>INOX2E8016</b>	<b>The server has timed out the specified distributed transaction</b>
<b>Explanation</b>	The server timed out the specified distributed transaction.
<b>Action</b>	This message is a reply to a transaction manager request.
<b>INOX2E8017</b>	<b>The server has detected a transient error for the specified distributed transaction</b>
<b>Explanation</b>	The server has detected a transient error for the specified distributed transaction.
<b>Action</b>	This message is a reply to a transaction manager request.
<b>INOX2E8018</b>	<b>The server has heuristically committed the specified distributed transaction</b>
<b>Explanation</b>	The server had to heuristically commit the specified distributed transaction.
<b>Action</b>	This message is reply to a transaction manager request.

---

<b>INOX2E8019</b>	<b>The server has heuristically rolled back the specified distributed transaction</b>
<b>Explanation</b>	The server had to heuristically roll back the specified distributed transaction.
<b>Action</b>	This is message is reply to a transaction manager request.
<b>INOX2E8020</b>	<b>The server has heuristically completed the distributed transaction. The outcome of the transaction is mixed.</b>
<b>Explanation</b>	The server had to heuristically complete the specified distributed transaction. The outcome is however mixed; this means that part of the transaction was committed and the rest was rolled back.
<b>Action</b>	This message is a reply to a transaction manager request.
<b>INOX2E8021</b>	<b>The specified distributed transaction is read-only</b>
<b>Explanation</b>	There were no modifications made to the server by the specified distributed transaction and therefore the server does not need to receive the commit action from the transaction manager.
<b>Action</b>	This message is a reply to a transaction manager request.
<b>INOX2E8022</b>	<b>An error occurred while issuing a call to the transaction manager</b>
<b>Explanation</b>	The transaction manager rejected a request made by Tamino.
<b>Action</b>	See the extended error messages for the transaction manager's reason for rejecting the call.
<b>INOX2E8023</b>	<b>The command is not allowed while a distributed transaction is active within this session</b>
<b>Explanation</b>	An attempt was made to issue either a <code>_DISCONNECT</code> command before the completion of the distributed transaction or a <code>_COMMIT/_ROLLBACK</code> command in the distributed transaction. These are not allowed.
<b>Action</b>	Complete the two phase commit transaction before issuing the <code>_DISCONNECT</code> command.
<b>INOX2E8024</b>	<b>The current session cannot accept commands while the two phase commit transaction completion protocol is active</b>
<b>Explanation</b>	Issuing Tamino commands to a session that is between phase 1 and phase 2 of a two phase commit transaction completion protocol is not allowed. The two phase commit protocol must complete before the session can be used again.
<b>Action</b>	Do not issue commands while the two phase commit transaction completion protocol is active.

<b>INOX2E8025</b>	<b>The transaction manager specified an invalid recovery action</b>
<b>Explanation</b>	The request action on recovery was invalid.
<b>Action</b>	This is an error sent to the transaction manager. It is internal and if seen should be reported to your software supplier.
<b>INOX2E8027</b>	<b>The outcome of a commit was inconsistent</b>
<b>Explanation</b>	The outcome of a commit was inconsistent: one or more data sources failed to commit.
<b>Action</b>	Check the extended error information for a list of which data sources failed to commit the transaction, then perform appropriate repairs.
<b>INOX2E8028</b>	<b>The outcome of a rollback was inconsistent</b>
<b>Explanation</b>	The outcome of a rollback was inconsistent: one or more data sources failed to roll back.
<b>Action</b>	Check the extended error information for a list of which data sources failed to commit the transaction, then perform appropriate repairs.
<b>INOX2E8030</b>	<b>Invalid transaction token</b>
<b>Explanation</b>	An invalid transaction token was specified.
<b>Action</b>	Provide a valid transaction token with the correct format.
<b>INOX2E8047</b>	<b>Recovery of distributed transactions has found outstanding transactions that are not for the current transaction manager</b>
<b>Explanation</b>	After completion by the transaction manager of recovery for distributed transactions, there are outstanding transactions that do not belong to the transaction manager.
<b>Action</b>	Contact your software supplier for help in resolving the outstanding transactions.
<b>INOX2E8049</b>	<b>An internal error occurred in the distributed transaction processing components of the server.</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	This is an internal error. Please contact your software supplier.
<b>INOX2F8026</b>	<b>Cannot find distributed transaction processing (DTP) library ino2pc</b>
<b>Explanation</b>	The shared library/DLL ino2pc cannot be found.
<b>Action</b>	This is a software installation configuration problem. Contact Software AG support for help

---

<b>INOX2I8046</b>	<b>Distributed transaction transaction_token with resource manager identifier rmid has been manually resolved to the 'state' state</b>
<b>Explanation</b>	This event is generated when someone manually resolves a distributed transaction.
<b>Action</b>	No action required. This message helps to track the progress of the distributed transaction.
<b>INOX2I8048</b>	<b>Server start-up detected pending or heuristically complete distributed transactions</b>
<b>Explanation</b>	On starting the server, it has been detected that there are outstanding distributed transactions. These transactions should normally be resolved by the transaction manager.
<b>Action</b>	Check the transaction manager log to check that all outstanding distributed transactions are resolved. If the transactions are not resolved, then contact your software supplier to get help in resolving them.
<b>INOXCE8100</b>	<b>Internal error: duplicate root element</b>
<b>Explanation</b>	Invalid migrated data records with duplicate root elements were detected.
<b>Action</b>	Please contact your software supplier.
<b>INOXCE8102</b>	<b>Internal error: document stack corrupted</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXCE8103</b>	<b>Memory allocation failed</b>
<b>Explanation</b>	There was not enough main memory available to perform the request.
<b>Action</b>	Possibly the machine is overloaded. Try again later.
<b>INOXCE8104</b>	<b>Internal error during document composition</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXCE8105</b>	<b>Invalid X-Tension response</b>
<b>Explanation</b>	An X-Tension function returned a string that is not well-formed XML.
<b>Action</b>	Correct the implementation of the X-Tension function

<b>INOXCE8106</b>	<b>Internal error: unknown request</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXCE8107</b>	<b>Map to object: illegal document ID encountered.</b>
<b>Explanation</b>	The query attached to a node with map-type=object is of the form "@ino:id=%parent". The document ID found in the parent node is either zero or contains non-digit characters.
<b>Action</b>	The document ID in the parent node is illegal, correct it.
<b>INOXCE8108</b>	<b>Insufficient mapping information, document cannot be composed</b>
<b>Explanation</b>	An XML document could not be created due to insufficient mapping information.
<b>Action</b>	Look at the <ino:messageline> element in the <ino:response> document to find more information about the cause of the problem.
<b>INOXCE8109</b>	<b>Cannot delete externally mapped data</b>
<b>Explanation</b>	Tamino X-Query is not able to delete XML documents that are composed from external data sources like ODBC or Adabas if those documents have not been stored through Tamino. Typically, when displayed, these documents do not have an "ino:id" attribute. Similarly, X-Query cannot delete data from doctypes with "tsd:pure" mapping.
<b>Action</b>	Modify the query that selects the documents to be deleted. In the case of pure mapping, use XQuery update in order to delete documents.
<b>INOXCE8110</b>	<b>Internal error: document data corrupted</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXCE8111</b>	<b>Error in XNode Adabas processing during conversion of Natural date/time value</b>
<b>Explanation</b>	An error occurred while converting a Natural date or time value. The Tamino response contains details about the offending value, as well as an internal error code.
<b>Action</b>	Analyze the error.

---

<b>INOXCE8114</b>	<b>Document ID unknown, mapping type infofield</b>
<b>Explanation</b>	This error message should never occur.
<b>Action</b>	None
<b>INOXCE8117</b>	<b>Internal error:Document not found</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXCE8118</b>	<b>Mapping type object: number of resulting objects too large</b>
<b>Explanation</b>	This message should never occur
<b>Action</b>	None
<b>INOXCE8119</b>	<b>Internal error: structure description too large</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7500</b>	<b>NOTATION must be restricted by an enumeration</b>
<b>Explanation</b>	NOTATION must be restricted by an enumeration.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7501</b>	<b>(a-props-correct.2) default or fixed value is not of declared type</b>
<b>Explanation</b>	If there is a default or fixed value specification, the canonical lexical representation of its value must be valid with respect to the type definition.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7502</b>	<b>(a-props-correct.3) If attributes has type ID or a derived type it must not have a value constraint, i.e. a default or fixed value</b>
<b>Explanation</b>	Attributes of type ID or a derived type must not have a value constraint, i.e. a default or fixed value.
<b>Action</b>	Please modify your XML schema accordingly.

<b>INOXDE7503</b>	<b>(e-props-correct.2) default or fixed value is not of declared type</b>
<b>Explanation</b>	If there is a default or fixed value specification, the canonical lexical representation of its value must be valid with respect to the type definition.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7504</b>	<b>(e-props-correct.4) Elements of type ID or a derived type must not have a value constraint, i.e. a default or fixed value</b>
<b>Explanation</b>	Elements of type ID or a derived type must not have a value constraint, i.e. a default or fixed value.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7505</b>	<b>(ct-props-correct.4) attributes must not have identical names</b>
<b>Explanation</b>	Two distinct attribute declarations in the attribute uses must not have identical names.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7506</b>	<b>(ct-props-correct.5) only one attribute may have type ID or a derived type</b>
<b>Explanation</b>	Two distinct attribute declarations in the attribute uses must not have type ID or a derived type.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7507</b>	<b>(au-props-correct.2) attribute's fixed value does not match declaration's fixed value</b>
<b>Explanation</b>	If the attribute declaration has a fixed value constraint, then if the attribute use itself has a value constraint, it must also be fixed and its value must match that of the attribute declaration's value constraint.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7508</b>	<b>(sch-props-correct.2) name conflict with global declarations</b>
<b>Explanation</b>	Each of the type definitions, element declarations, attribute group definitions, model group definitions and notation declarations must not contain two or more schema components with the same name.
<b>Action</b>	Please modify your XML schema accordingly.

---

<b>INOXDE7509</b>	<b>invalid type of default value</b>
<b>Explanation</b>	If the type definition is a simple type definition, then the string must be valid with respect to that definition.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7510</b>	<b>content type is neither a simple type definition nor mixed</b>
<b>Explanation</b>	If an element declaration specifies a default value and the type definition is a complex type definition, then its content type must be a simple type definition or mixed.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7511</b>	<b>element default value does not match type</b>
<b>Explanation</b>	If an element declaration specifies a default value and the type definition is a complex type definition and its content type is a simple type definition, then the default value must be of declared type.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7512</b>	<b>content type does not allow for default value</b>
<b>Explanation</b>	If an element declaration specifies a default value and the type definition is a complex type definition and its content type is mixed, then the content type's particle must be emptyable.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7513</b>	<b>missing name in type definition</b>
<b>Explanation</b>	If the particles contain, either directly, indirectly or implicitly two or more element declaration particles with the same name, then all their type definitions must be the same top-level definitions.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7514</b>	<b>type definitions have different names</b>
<b>Explanation</b>	If the particles contain, either directly, indirectly or implicitly two or more element declaration particles with the same name, then all their type definitions must be the same top-level definitions.
<b>Action</b>	Please modify your XML schema accordingly.

<b>INOXDE7515</b>	<b>type definitions have different namespaces</b>
<b>Explanation</b>	If the particles contain, either directly, indirectly or implicitly two or more element declaration particles with the same name, then all their type definitions must be the same top-level definitions.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7516</b>	<b>(no-xmlns) attribute name not allowed</b>
<b>Explanation</b>	The name of an attribute declaration must not match xmlns.
<b>Action</b>	Use the targetNamespace attribute of the schema's root node in order to associate the current schema and objects defined therein with a namespace URI. The import element can be used to compose schemas defining objects for different namespaces.
<b>INOXDE7517</b>	<b>Below Attribute there may be only attributeInfo node but no schemaInfo or elementInfo nodes</b>
<b>Explanation</b>	Below Attribute there may be only attributeInfo node but no schemaInfo or elementInfo nodes.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7518</b>	<b>(enumeration-valid-restriction) value of enumeration does not match base type definition</b>
<b>Explanation</b>	The value attribute of an enumeration item must match the definition of the restriction's base type.
<b>Action</b>	Adapt your schema.
<b>INOXDE7519</b>	<b>(notation-defined-restriction) value of enumeration is not defined in a global notation element.</b>
<b>Explanation</b>	An enumeration value being used in a type derived from NOTATION must be defined in a global notation element.
<b>Action</b>	Adapt your schema.
<b>INOXDE7520</b>	<b>invalid index</b>
<b>Explanation</b>	It is not possible to define indices on elements or attributes with type "xs:long", "xs:unsignedLong" or "xs:decimal".
<b>Action</b>	Please modify your XML schema accordingly.

---

<b>INOXDE7521</b>	<b>invalid text index</b>
<b>Explanation</b>	It is not possible to define text indices on elements or attributes with numeric types.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7522</b>	<b>The element pointed to by tsd:refers needs to have a reference index defined for it</b>
<b>Explanation</b>	(mp-valid-refers.5:) The element pointed to by tsd:refers needs to have a reference index defined for it.
<b>Action</b>	Please modify the schema to include a reference index on the element pointed to by tsd:refers and try to define the schema again.
<b>INOXDE7523</b>	<b>Collations can only be defined for string datatypes (derived types of string in W3C XML schema part 2)</b>
<b>Explanation</b>	Collations can only be defined for string datatypes (derived types of string in W3C XML schema part 2).
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7524</b>	<b>(src-single-facet-value) Facet is only permitted to be defined once</b>
<b>Explanation</b>	A facet has been specified more than once. This facet is only permitted to be defined once.
<b>Action</b>	Please modify the XML Schema accordingly.
<b>INOXDE7525</b>	<b>(cos-element-consistent) Element declarations are not consistent</b>
<b>Explanation</b>	If the particles contain, either directly, indirectly or implicitly two or more element declaration particles with the same name, then all their type definitions must be the same top-level definitions.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7526</b>	<b>(maxInclusive-maxExclusive) 'maxInclusive' and 'maxExclusive' facets cannot be used together</b>
<b>Explanation</b>	A simple type restriction, containing both 'maxInclusive' and 'maxExclusive' facets, has been found.
<b>Action</b>	Remove either of the 'maxInclusive' or 'maxExclusive' facets.

<b>INOXDE7527</b>	<b>(minInclusive-minExclusive) 'minInclusive' and 'minExclusive' facets cannot be used together</b>
<b>Explanation</b>	A simple type restriction, containing both 'minInclusive' and 'minExclusive' facets, has been found.
<b>Action</b>	Remove either of the 'minInclusive' or 'minExclusive' facets.
<b>INOXDE7528</b>	<b>Node declarations are not consistent</b>
<b>Explanation</b>	The schema violates a constraint which is a Tamino-specific extension of the (cos-element-consistent) constraint as imposed by XML schema: If there are two attribute or element declarations in the set of complex type definitions being allowed for a given element node due to usage of the xsi:type attribute, then these attributes (or elements) must be consistent. Consistency requirements cover the datatype as well as physical properties (mapping, indexing,...), or logical properties (collation, trigger, ...).
<b>Action</b>	Modify the schema to avoid violation of the constraint. For example it may help to use the 'block' attribute of <xs:element> or <xs:complexType> , or the 'blockDefault' attribute of <xs:schema> in order to control the {prohibited substitutions} with respect to xsi:type. In particular, you may use blockDefault="#all" if you do not need to allow for usage of the xsi:type attribute in your XML documents.
<b>INOXDE7529</b>	<b>(src-resolve.1.1) Global type reference could not be resolved</b>
<b>Explanation</b>	Reference to a global complex or simple type definition could not be resolved.
<b>Action</b>	Check the names of the global type definition and the associated reference.
<b>INOXDE7530</b>	<b>(src-resolve.1.2) The ref attribute of an attribute needs to reference an existing global attribute</b>
<b>Explanation</b>	An attribute defined in the schema uses the 'ref' attribute, however the global attribute with that name cannot be found.
<b>Action</b>	Check that the global attribute is not missing. Also check that the global attribute name and reference have been correctly specified.
<b>INOXDE7531</b>	<b>(minLength-less-than-equal-to-maxLength) 'minLength' facet value must be 'less than or equal to' that of facet 'maxLength'</b>
<b>Explanation</b>	A simple type restriction, where the value of facet 'minLength' is greater than that of 'maxLength', has been found.
<b>Action</b>	Revise the facet values.

<b>INOXDE7532</b>	<b>Invalid pattern facet value found</b>
<b>Explanation</b>	The schema being defined contains a pattern facet which has an invalid value.
<b>Action</b>	Check the schema and consider revising the pattern facet's value.
<b>INOXDE7533</b>	<b>Below Schema there needs to be exactly one appinfo node which defines Tamino mappings</b>
<b>Explanation</b>	Below Schema there needs to be exactly one appinfo node which defines Tamino mappings.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7534</b>	<b>(src-import.1.1) Invalid import element. If the namespace attribute is present, then its value must not match the value of the enclosing schema's targetNamespace attribute.</b>
<b>Explanation</b>	The schema being defined contains an import element. The namespace attribute is present and its value is the same as the targetNamespace of the enclosing schema. This is not allowed.
<b>Action</b>	Revise either the namespace attribute of the import element or the targetNamespace of the schema.
<b>INOXDE7535</b>	<b>(src-import.1.2) Invalid import element. If the namespace attribute is not present, then the enclosing schema must have a targetNamespace attribute.</b>
<b>Explanation</b>	The schema being defined contains an import element. The namespace attribute is not present and the enclosing schema does not specify a targetNamespace. This is disallowed.
<b>Action</b>	Revise the import element and/or the schema element.
<b>INOXDE7536</b>	<b>(src-import.2) Invalid import element. Schema reference could not be resolved.</b>
<b>Explanation</b>	The schema being defined contains an import element. The schema referenced using either a schemaLocation or namespace attribute could not be located.
<b>Action</b>	If referencing using schemaLocation, check the name of the referenced schema (and optionally the collection name also). If referencing using namespace alone, check the targetNamespace of the referenced schema.
<b>INOXDE7537</b>	<b>(src-import.3.1) Invalid import element. If there is a namespace attribute, then its value must be identical to the value of the targetNamespace attribute of the referenced schema.</b>
<b>Explanation</b>	The schema being defined contains an import element. The namespace attribute is different from the targetNamespace of the referenced schema. This is not allowed.
<b>Action</b>	Revise either the namespace attribute of the import element or the targetNamespace of the referenced schema.

**INOXDE7538** (src-import.3.2) **Invalid import element. If there is no namespace attribute, then the referenced schema must have no targetNamespace attribute.**

**Explanation** The schema being defined contains an import element. The namespace attribute is not present, but the referenced schema specifies a targetNamespace. This is not allowed.

**Action** Revise the import element and/or the referenced schema element.

**INOXDE7539** **The value of schema attribute targetNamespace is not allowed if another schema in the same database already imports the corresponding namespace using only the namespace attribute of the import element**

**Explanation** The value of the targetNamespace attribute of the schema that you are trying to define is not allowed. This is because another schema in the same database already imports that namespace, using an import element with namespace alone.

**Action** Revise the schema and/or the other schema importing that namespace. Either change the targetNamespace of the current schema, or change the import element of the referencing schema to also use the schemaLocation attribute.

**INOXDE7540** **Found node with a mapped value which is used to construct index entries**

**Explanation** A node with a mapped value must not be used to construct index entries. This restriction applies for text and standard as well as for the components of a compound index referring to an ancestor of the current node.

**Action** Remove index definition causing this conflict.

**INOXDE7541** **Undefine of schema failed. Schema to be undefined is referenced by other schema(s) in the database.**

**Explanation** The undefine of a specific schema was performed. Other schema(s) in the database still reference this schema.

**Action** Before the schema can be undefined, you must first undefine all referencing schemas.

**INOXDE7542** **Attribute targetNamespace of element schema, if present, must not be empty.**

**Explanation** The schema being defined specifies an empty targetNamespace attribute.

**Action** Revise the schema. Either provide the targetNamespace attribute with a value, or completely remove it.

---

<b>INOXDE7543</b>	<b>Import using namespace attribute alone is forbidden, if more than one schema with the corresponding targetNamespace is already stored in the current database</b>
<b>Explanation</b>	The schema being defined contains an import element with only a namespace attribute. More than one schema stored in the current database already contains a corresponding targetNamespace attribute.
<b>Action</b>	Revise the schema and/or other schemas stored inside the current database. Consider using the schemaLocation attribute of import to clarify exactly which schema was intended.
<b>INOXDE7544</b>	<b>An import element must have attributes</b>
<b>Explanation</b>	The schema being defined specifies an import element without attributes.
<b>Action</b>	Revise the schema. Add either namespace or schemaLocation attributes to the import element, or remove it and consider using Tamino's content element with value open.
<b>INOXDE7545</b>	<b>Cannot define standard index or unique constraint based on a node whose associated datatype has a variety of 'union'</b>
<b>Explanation</b>	It is not supported to define an index or unique constraint based on a node whose datatype has a variety of 'union' or which is derived via <xs:list> with an item type whose variety is 'union'.
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7546</b>	<b>An element defined as a primary key cannot be defined as nillable</b>
<b>Explanation</b>	An element which is defined as a primary key value cannot be defined as nillable.
<b>Action</b>	Revise the schema. Either remove the xsi:nillable attribute or set the value to false.
<b>INOXDE7547</b>	<b>Undefine of collection failed. One or more schemas contained inside the collection to be undefined are referenced by other schema(s), from other collection(s) in the current database.</b>
<b>Explanation</b>	The undefine of a specific collection was performed. Other schema(s) from other collection(s) in the database still reference one or more schemas contained inside the collection to be undefined.
<b>Action</b>	Before the collection can be undefined, you must first undefine all referencing schemas.
<b>INOXDE7548</b>	<b>Cannot define standard index or unique constraint based on this element node with complex content if there is a validly derived complex type with simple content which can be used in an xsi:type attribute on that element node</b>
<b>Explanation</b>	It is not allowed to define a standard index or unique constraint based on an element node whose associated datatype is a complex type with complex content if there is another complex type with simple content which can be validly used in an xsi:type attribute on that element node.

<b>Action</b>	Either remove the index definition or modify type definitions to avoid violation of this constraint.
<b>INOXDE7549</b>	<b>Mapping not allowed for datatype of variety</b>
<b>Explanation</b>	Mapping (ADABAS, SQL and SXS) is not allowed for datatypes derived via xs:list or xs:union.
<b>Action</b>	Please change the datatype and try to define the schema again.
<b>INOXDE7550</b>	<b>ElementInfo node is not allowed with a schema reference to a global element definition</b>
<b>Explanation</b>	Below Element an elementInfo node is only allowed if the element node starts an element definition. An elementInfo is not allowed with a reference to a global element definition.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7551</b>	<b>AttributeInfo node is not allowed with a schema reference to a global attribute definition</b>
<b>Explanation</b>	Below Attribute an attributeInfo node is only allowed if the attribute node starts an attribute definition. An attributeInfo is not allowed with a reference to a global attribute definition.
<b>Action</b>	Please modify your XML schema accordingly.
<b>INOXDE7552</b>	<b>The path contains invalid expressions</b>
<b>Explanation</b>	The path can only consists of named child steps with abbreviated XPath syntax. In particular, it cannot contain *, .., // operators.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7553</b>	<b>The index types of elements and attributes having the same multipath index label must be identical</b>
<b>Explanation</b>	The index types of elements and attributes having the same multipath index label must be identical.
<b>Action</b>	Please change the schema so that multipath definitions with the same label are only used when the index types are identical and then try to define the schema again.

---

<b>INOXDE7554</b>	<b>(src-attribute-group.2) Intentional intersection of namespace constraints is not expressible</b>
<b>Explanation</b>	This may happen e.g. if two attribute wildcards are to be merged due to resolution of a reference to an attributeGroup definition. If those two attribute wildcards both have a namespace constraint ##other, thus referring to different target namespaces, the intentional intersection is not expressible.
<b>Action</b>	Adapt the schema according to XML schema constraint src-attribute-group.2
<b>INOXDE7555</b>	<b>The name attribute of tsd:unique definitions has to be unique within a doctype</b>
<b>Explanation</b>	The name attribute of tsd:unique definitions has to be unique within a doctype.
<b>Action</b>	Please change the duplicate name and try to define the schema again.
<b>INOXDE7556</b>	<b>The elements and attributes pointed to in tsd:unique definitions must have a cardinality of 1</b>
<b>Explanation</b>	The elements and attributes pointed to in tsd:unique definitions must have a cardinality of 1.
<b>Action</b>	Please change the cardinality and try to define the schema again.
<b>INOXDE7557</b>	<b>The path specified the xpath attribute of a field element needs to point to an existing element or attribute</b>
<b>Explanation</b>	The path specified the xpath attribute of a field element needs to point to an existing element or attribute.
<b>Action</b>	Please make sure the specified path is correct and try to define the schema again.
<b>INOXDE7558</b>	<b>multipath index definitions are not allowed in doctypes which have the structureIndex set to none</b>
<b>Explanation</b>	Multipath index definitions are not allowed in doctypes which have the structureIndex set to none.
<b>Action</b>	Please change the structure index to condensed or full and try to define the schema again.
<b>INOXDE7559</b>	<b>The elements and attributes having the same multipath index label must have matching datatypes</b>
<b>Explanation</b>	The elements and attributes having the same multipath index label must have matching datatypes.
<b>Action</b>	Please change the wrong datatype and try to define the schema again.

<b>INOXDE7560</b>	<b>The elements and attributes having the same multipath index label must have matching collations</b>
<b>Explanation</b>	The elements and attributes having the same multipath index label must have matching collations.
<b>Action</b>	Please change the wrong collation and try to define the schema again.
<b>INOXDE7561</b>	<b>The elements and attributes having the same multipath index label must have matching tsd:refers definitions</b>
<b>Explanation</b>	The elements and attributes having the same multipath index label must have matching tsd:refers definitions.
<b>Action</b>	Please change the wrong tsd:refers definition and try to define the schema again.
<b>INOXDE7562</b>	<b>The path defined in tsd:refers has to point to an existing element</b>
<b>Explanation</b>	The path defined in tsd:refers has to point to an existing element.
<b>Action</b>	Please change the path and try to define the schema again.
<b>INOXDE7563</b>	<b>The path defined in tsd:refers has to point to an element which is a predecessor of the element or attribute where it is defined</b>
<b>Explanation</b>	The path defined in tsd:refers has to point to an element which is a predecessor of the element or attribute where it is defined.
<b>Action</b>	Please change the path and try to define the schema again.
<b>INOXDE7564</b>	<b>The path defined in tsd:refers may only point to elements that are locally stored in a Tamino database</b>
<b>Explanation</b>	The path defined in tsd:refers may only point to elements that are locally stored in a Tamino database.
<b>Action</b>	Please change the path and try to define the schema again.
<b>INOXDE7565</b>	<b>The path defined in tsd:refers must point either to the doctype element or to an element for which a tsd:reference is defined</b>
<b>Explanation</b>	The path defined in tsd:refers must point either to the doctype element or to an element for which a tsd:reference is defined.
<b>Action</b>	Please change the path and try to define the schema again.

---

<b>INOXDE7566</b>	<b>The path specified in the xpath attribute of a field element needs to point to an element or attribute that is locally stored in a Tamino database</b>
<b>Explanation</b>	The path specified in the xpath attribute of a field element needs to point to an element or attribute that is locally stored in a Tamino database.
<b>Action</b>	Please change the path and try to define the schema again.
<b>INOXDE7567</b>	<b>The path specified in the xpath attribute of a field element of a compound index definition needs to point to a leaf node (an attribute or element having no children)</b>
<b>Explanation</b>	The path specified in the xpath attribute of a field element of a compound index definition needs to point to a leaf node (an attribute or element having no children).
<b>Action</b>	Please change the path and try to define the schema again.
<b>INOXDE7568</b>	<b>For a uniqueness constraint a certain path may only be defined once</b>
<b>Explanation</b>	For a uniqueness constraint a certain path may only be defined once.
<b>Action</b>	Please change the path and try to define the schema again.
<b>INOXDE7569</b>	<b>A reference index may not be defined for a doctype element</b>
<b>Explanation</b>	A reference index may not be defined for a doctype element.
<b>Action</b>	Please change the reference index value and try to define the schema again.
<b>INOXDE7570</b>	<b>There may only be one tsd:reference index definition per tsd:physical</b>
<b>Explanation</b>	There may only be one tsd:reference index definition per tsd:physical.
<b>Action</b>	Please make sure there is only one tsd:reference index definition per tsd:physical and try to define the schema again.
<b>INOXDE7571</b>	<b>If an index has been defined as a multipath index, there may not be a tsd:refers defined for that same index</b>
<b>Explanation</b>	If an index has been defined as a multipath index, there may not be a tsd:refers defined for that same index.
<b>Action</b>	Please remove either the multipath definition or the tsd:refers and try to define the schema again.

<b>INOXDE7572</b>	<b>For a compound index a certain path may only be defined once</b>
<b>Explanation</b>	For a compound index a certain path may only be defined once.
<b>Action</b>	Please change the schema and try to define it again.
<b>INOXDE7573</b>	<b>(src-resolve.1.4) Reference to an attribute group definition could not be resolved</b>
<b>Explanation</b>	Reference to an attribute group definition could not be resolved.
<b>Action</b>	Check the qualified names of the attribute group definition and the reference.
<b>INOXDE7574</b>	<b>(src-resolve.1.5) Reference to a model group definition could not be resolved</b>
<b>Explanation</b>	Reference to a model group definition could not be resolved.
<b>Action</b>	Check the qualified names of the model group definition and the reference.
<b>INOXDE7575</b>	<b>(src-attribute-group.3) Circular attribute group reference is disallowed</b>
<b>Explanation</b>	A cycle of attribute group references has been found.
<b>Action</b>	Check the attribute group references and remove the circular reference.
<b>INOXDE7576</b>	<b>(mg-props-correct.2) Circular group reference is disallowed</b>
<b>Explanation</b>	Within the particles of a group there must not be at any depth a reference to the group itself.
<b>Action</b>	Check group definition and remove circular reference inside.
<b>INOXDE7577</b>	<b>(src-include.2.1) Target namespace of the including and the included schema do not match.</b>
<b>Explanation</b>	The values of the targetNamespace attributes of the including and the included schema may not differ if both are present.
<b>Action</b>	Check targetNamespace attributes.
<b>INOXDE7578</b>	<b>(src-include.2.2) Included schema has target namespace whereas including has no target namespace.</b>
<b>Explanation</b>	If the including schema has no targetNamespace attribute, the included schema must not have a targetNamespace attribute as well.
<b>Action</b>	Check and adapt the schema documents.

---

<b>INOXDE7579</b>	<b>(src-include.2.3) Target namespace of included schema missing. Tamino does not yet support "chameleon include".</b>
<b>Explanation</b>	This is a current limitation of Tamino.
<b>Action</b>	Define the included schema using the same targetNamespace attribute as the including schema's targetNamespace.
<b>INOXDE7580</b>	<b>(src-include.1) Invalid include element. Schema reference could not be resolved.</b>
<b>Explanation</b>	The schema being defined contains an include element. The schema referenced by the schemaLocation attribute could not be located.
<b>Action</b>	Check the name of the referenced schema and, optionally, the collection name as well.
<b>INOXDE7581</b>	<b>invalid collation language</b>
<b>Explanation</b>	The specified language string is not valid.
<b>Action</b>	Please change the wrong collation language string and try to define the schema again.
<b>INOXDE7583</b>	<b>Invalid open content found in pure X-Node mapped doctype</b>
<b>Explanation</b>	For pure X-Node mapping, no open content is allowed for that doctype. This includes wildcards with processContents being "strict" or "lax" and element nodes with type "xs:anyType" or no type at all.
<b>Action</b>	Ensure that the doctype with the pure X-Node mapping is set to closed content, that any of the doctype's wildcards (xs:any and xs:anyAttribute) in scope have processContents set to "strict", and that all elements in scope have a non-absent type specification different from "xs:anyType".
<b>INOXDE7584</b>	<b>Invalid mixed content found in complex type within a pure X-Node mapped doctype</b>
<b>Explanation</b>	Elements in a pure X-Node mapped doctype must not have a mixed content model.
<b>Action</b>	Set the mixed attribute of the corresponding complex type definition to "false".
<b>INOXDE7585</b>	<b>Invalid mapping found in root element of pure X-Node mapped doctype</b>
<b>Explanation</b>	Currently, only Adabas mapping is allowed for the root node of a pure X-Node mapped doctype.
<b>Action</b>	Check the mapping of the root element.

<b>INOXDE7586</b>	<b>Invalid mapping found in non-root node within pure X-Node mapped doctype</b>
<b>Explanation</b>	All leaf nodes must be mapped corresponding to the mapping type of the root element, e.g. to Adabas fields if the root node is mapped to an Adabas file.
<b>Action</b>	Check the mapping of the node.
<b>INOXDE7587</b>	<b>Found invalid recursion in pure X-Node mapped doctype</b>
<b>Explanation</b>	Within a pure X-Node mapped doctype no recursive structures are permitted.
<b>Action</b>	Remove the recursion.
<b>INOXDE7588</b>	<b>Found empty leaf node in pure X-Node mapped doctype</b>
<b>Explanation</b>	A pure X-Node mapped doctype must not contain empty leaf nodes.
<b>Action</b>	Either remove the node or map to an X-Node data item, i.e. either an Adabas field or an SQL column.
<b>INOXDE7589</b>	<b>Reference index definitions are not allowed in doctypes which have the structureIndex set to none</b>
<b>Explanation</b>	Reference index definitions are not allowed in doctypes which have the structureIndex set to none.
<b>Action</b>	Please correct the schema and try to define it again.
<b>INOXDE7590</b>	<b>Unique index constraints may not be defined on elements or attributes on node of given type</b>
<b>Explanation</b>	Unique index constraints may not be defined on elements or attributes of xs:duration or any data type allowing for an optional timezone indicator, e.g. xs:dateTime.
<b>Action</b>	Please correct the schema and try to define it again.
<b>INOXDE7591</b>	<b>Found xs:include or xs:import referencing current schema</b>
<b>Explanation</b>	An xs:include or xs:import must not reference the current schema.
<b>Action</b>	Adapt the schema.
<b>INOXDE7592</b>	<b>Invalid level of structure index for pure X-Node mapped doctype</b>
<b>Explanation</b>	A pure X-Node mapped doctype must not have a full structure index.
<b>Action</b>	Set the structure index to 'condensed' or 'none'.

<b>INOXDE7593</b>	<b>A default function has been defined at an element node with a complex type</b>
<b>Explanation</b>	A default function may only be defined at a node with a simple type.
<b>Action</b>	Modify the schema in an appropriate way.
<b>INOXDE7594</b>	<b>Default function defined for required attribute node</b>
<b>Explanation</b>	If a default function is defined for an attribute, the attribute must be optional.
<b>Action</b>	Check and adapt schema in an appropriate way.
<b>INOXDE7595</b>	<b>Default function defined for a node which has a value constraint</b>
<b>Explanation</b>	An element or attribute node may define either a default function or a value constraint (i.e. a default or fixed value) but not both.
<b>Action</b>	Adapt the schema correspondingly.
<b>INOXDE7596</b>	<b>Too many tsd:elementInfo or tsd:attributeInfo nodes</b>
<b>Explanation</b>	There may be only one tsd:elementInfo or tsd:attributeInfo node per xs:element or xs:attribute node.
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7597</b>	<b>(src-list-itemType-or-simpleType) Definition of simple type via &lt;xs:list&gt; contains both 'itemType' attribute and &lt;xs:simpleType&gt; child.</b>
<b>Explanation</b>	Either the 'itemType' attribute or the <xs:simpleType> child of the <xs:list> element must be present, but not both.
<b>Action</b>	Remove either the 'itemType' attribute or the <xs:simpleType> child.
<b>INOXDE7598</b>	<b>(src-restriction-base-or-simpleType) Definition of simple type via &lt;xs:restriction&gt; must contain either 'base' attribute or &lt;xs:simpleType&gt; child.</b>
<b>Explanation</b>	Either the 'base' attribute or the <xs:simpleType> child of the <xs:restriction> element must be present, but not both.
<b>Action</b>	Remove either 'base' attribute or the <xs:simpleType> child.
<b>INOXDE7599</b>	<b>(src-union-memberTypes-or-simpleTypes) The 'memberTypes' attribute of the &lt;xs:union&gt; element is empty and there is no &lt;xs:simpleType&gt; child.</b>
<b>Explanation</b>	Either the 'memberTypes' attribute of the <xs:union> element must be non-empty or there must be at least one <xs:simpleType> child.
<b>Action</b>	Add either the 'memberTypes' attribute of the <xs:union> element or at least one <xs:simpleType> child.

<b>INOXDE7614</b>	<b>The noConversion option may only be changed for empty doctypes</b>
<b>Explanation</b>	Changing the noConversion option could make the existing data in the doctype invalid, so this option may only be modified for empty doctypes.
<b>Action</b>	Adapt the schema so that the noConversion option is not changed or make sure there are no documents stored in the doctype for which you are trying to modify the schema.
<b>INOXDE7619</b>	<b>Invalid type of parameter for server extension</b>
<b>Explanation</b>	The type of the parameter is invalid in the current context.
<b>Action</b>	Check and modify the type of parameter to be passed to the server extension function. for example, parameters being passed to a trigger function may only have a simple predefined type.
<b>INOXDE7620</b>	<b>Invalid parameter value</b>
<b>Explanation</b>	The value of the parameter is not valid with respect to the declared type.
<b>Action</b>	Modify the type or value in order to create a consistent parameter definition.
<b>INOXDE7621</b>	<b>(cos-st-restricts.1.1) Invalid base type definition of simple type</b>
<b>Explanation</b>	The base type definition must be an atomic simple type definition or a built-in primitive datatype.
<b>Action</b>	Adapt the type definitions or type hierarchy.
<b>INOXDE7622</b>	<b>(cos-st-restricts.1.2) Invalid base type of simple type definition - the 'final' attribute does not permit derivation of another simple type</b>
<b>Explanation</b>	The {final} of the {base type definition} of a simple type definition must not contain restriction.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7623</b>	<b>(cos-st-restricts.2.1) Invalid item type definition of simple type derived via &lt;xs:list&gt;</b>
<b>Explanation</b>	The {item type definition} must have a {variety} of atomic or union (in which case all the {member type definitions} must be atomic).
<b>Action</b>	Adapt the schema according to the constraint.

---

<b>INOXDE7624</b>	<b>(cos-st-restricts.2.3.1.1) Invalid item type definition of simple type derived via &lt;xs:list&gt;</b>
<b>Explanation</b>	The {final} of the {item type definition} must not contain list.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7625</b>	<b>(cos-st-restricts.3.3.2.2) Invalid base type for simple type derived via &lt;xs:restriction&gt;</b>
<b>Explanation</b>	The {final} of the {base type definition} must not contain restriction.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7626</b>	<b>(cos-st-restricts.2.3.2.2) Invalid base type for simple type derived via &lt;xs:restriction&gt;</b>
<b>Explanation</b>	The {final} of the {base type definition} must not contain restriction.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7627</b>	<b>(cos-st-restricts.2.3.2.4) Invalid facet for simple type derived via &lt;xs:list&gt;</b>
<b>Explanation</b>	Only length, minLength, maxLength, whiteSpace, pattern and enumeration facet components are allowed among the {facets}.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7628</b>	<b>(cos-st-restricts.3.1) Invalid member type definition for simple type derived via &lt;xs:union&gt;</b>
<b>Explanation</b>	The {member type definitions} must all have {variety} of atomic or list.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7629</b>	<b>(cos-st-restricts.3.3.1.1) Invalid member type definition for simple type derived via &lt;xs:union&gt;</b>
<b>Explanation</b>	All of the {member type definitions} must have a {final} which does not contain union.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7630</b>	<b>(cos-st-restricts.3.3.2.4) Invalid facet for simple type derived via &lt;xs:union&gt;</b>
<b>Explanation</b>	Only pattern and enumeration facet components are allowed among the {facets}.
<b>Action</b>	Adapt the schema according to the constraint.

<b>INOXDE7631</b>	<b>(a-props-correct.1) Invalid type of attribute declaration - must be a simple type</b>
<b>Explanation</b>	The type definition of an attribute declaration must be a simple type.
<b>Action</b>	Modify the type definition of the attribute declaration.
<b>INOXDE7632</b>	<b>(st-props-correct.2) Invalid or circular type hierarchy of simple type definition</b>
<b>Explanation</b>	All simple type definitions must be derived ultimately from the simple ur-type definition - circular definitions are disallowed.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7633</b>	<b>(ct-props-correct.2) Invalid derivation of complex type with simple base type definition</b>
<b>Explanation</b>	If the {base type definition} is a simple type definition, the {derivation method} must be extension.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7634</b>	<b>(ct-props-correct.3) Invalid or circular type hierarchy of complex type definition</b>
<b>Explanation</b>	Circular definitions are disallowed, except for the ur-type definition. That is, it must be possible to reach the ur-type definition by repeatedly following the {base type definition}.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7635</b>	<b>(no-xsi) Invalid attribute declaration for targetNamespace</b>
<b>Explanation</b>	The {target namespace} of an attribute declaration, whether local or top-level, must not match <a href="http://www.w3.org/2001/XMLSchema-instance">http://www.w3.org/2001/XMLSchema-instance</a> , unless it is one of the four built-in declarations for <code>xsi:type</code> , <code>xsi:nil</code> , <code>xsi:schemaLocation</code> , <code>xsi:noNamespaceSchemaLocation</code> .
<b>Action</b>	Adapt the schema according to constraint. See XML Schema Part 1 for a valid declaration of the four built-in declarations.
<b>INOXDE7636</b>	<b>(src-ct.1) Invalid base type definition of complex type with complex content</b>
<b>Explanation</b>	If the <code>&lt;complexContent&gt;</code> alternative is chosen, the type definition resolved to by the actual value of the 'base' attribute must be a complex type definition.
<b>Action</b>	Adapt the schema according to the constraint.

<b>INOXDE7637</b>	<b>(src-ct.2.1) Invalid base type definition of complex type simple content</b>
<b>Explanation</b>	The type definition resolved to by the actual value of the 'base' attribute must be one of the following: (1) a complex type definition whose {content type} is a simple type definition; (2) only if the <restriction> alternative is also chosen, a complex type definition whose {content type} is mixed and a particle which is emptiable.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7638</b>	<b>(src-ct.2.2) Missing &lt;xs:simpleType&gt; below &lt;xs:restriction&gt; for a complex type with simple content which is derived from a complex type via restriction</b>
<b>Explanation</b>	If the <simpleContent>/<restriction> alternative is chosen with the 'base' attribute resolving to a complex type definition whose {content type} is mixed and a particle which is emptiable, there must be a <simpleType> among the [children] of <restriction>.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7639</b>	<b>(cos-ct-extends.1.1) Invalid base type of complex type derived via &lt;xs:extension&gt;</b>
<b>Explanation</b>	The {final} of the {base type definition} must not contain extension.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7640</b>	<b>(cos-ct-extends.1.4.1) Simple content types of complex type derived via &lt;xs:extension&gt; and the respective base type definition do not match</b>
<b>Explanation</b>	The {content type} of the {base type definition} and the {content type} of the complex type definition itself must be the same simple type definition.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7641</b>	<b>(cos-ct-extends.1.4.2) If the content type of a complex type derived via &lt;xs:extension&gt; is empty, the content type of the respective complex base type definition must be empty as well</b>
<b>Explanation</b>	The {content type} of both the {base type definition} and the complex type definition itself must be empty.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7642</b>	<b>(cos-ct-extends.1.4.3.1) Invalid content type of a complex type definition derived via &lt;xs:extension&gt; given the content type of the complex base type definition</b>
<b>Explanation</b>	The {content type} of the complex type definition itself must specify a particle.
<b>Action</b>	Adapt the schema according to the constraint.

<b>INOXDE7643</b>	<b>(cos-ct-extends.1.4.3.2.2.1) Invalid content type of complex type definition derived via &lt;xs:extension&gt; from complex type definition</b>
<b>Explanation</b>	Both {content type}s must be mixed or both must be element-only.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7644</b>	<b>(cos-ct-extends.2.2) Invalid base type of complex type definition derived via &lt;xs:extension&gt;</b>
<b>Explanation</b>	The {final} of the {base type definition} must not contain extension.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7645</b>	<b>(derivation-ok-restriction.1) Invalid base type definition of complex type derived via &lt;xs:restriction&gt;</b>
<b>Explanation</b>	The {base type definition} must be a complex type definition whose {final} does not contain restriction.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7646</b>	<b>(derivation-ok-restriction.2.1.1) Invalid value of 'use' attribute of attribute in complex type definition derived via &lt;xs:restriction&gt; compared to value of 'use' attribute for respective attribute in complex base type definition.</b>
<b>Explanation</b>	If there is an attribute use in the {attribute uses} of the {base type definition} (call this B) whose {attribute declaration} has the same {name} and {target namespace}, then one of the following must be true: (1) B's {required} is false. (2) the restricted type's {required} is true.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7647</b>	<b>(derivation-ok-restriction.2.1.2) Invalid type of attribute in complex type definition derived via &lt;xs:restriction&gt; compared to type of respective attribute in complex base type definition.</b>
<b>Explanation</b>	If there is an attribute use in the {attribute uses} of the {base type definition} (call this B) whose {attribute declaration} has the same {name} and {target namespace}, then the restricted type's {attribute declaration}'s {type definition} must be validly derived from B's {type definition}.
<b>Action</b>	Adapt the schema according to the constraint.

<b>INOXDE7648</b>	<b>(derivation-ok-restriction.2.1.3) Invalid value constraint of attribute in complex type definition derived via &lt;xs:restriction&gt; compared to value constraint of respective attribute in complex base type definition</b>
<b>Explanation</b>	If there is an attribute use in the {attribute uses} of the {base type definition} (call this B) whose {attribute declaration} has the same {name} and {target namespace}, then one of the following must be true: (1) B's effective value constraint is absent or default. (2) the restricted type's effective value constraint is fixed with the same string as B's.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7649</b>	<b>(derivation-ok-restriction.2.2) Invalid attribute use in complex type definition derived via &lt;xs:restriction&gt;, the complex base type definition neither contains a matching attribute use nor an attribute wildcard.</b>
<b>Explanation</b>	If there is no attribute use in the {attribute uses} of the {base type definition} (call this B) whose {attribute declaration} has the same {name} and {target namespace}, the {base type definition} must have an {attribute wildcard} and the {target namespace} of the restricted type's {attribute declaration} must be valid with respect to that wildcard.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7650</b>	<b>(derivation-ok-restriction.3) Invalid value of 'use' attribute of attribute in complex type definition derived via &lt;xs:restriction&gt; compared to value of 'use' attribute for respective attribute in complex base type definition</b>
<b>Explanation</b>	For each attribute use in the {attribute uses} of the {base type definition} whose {required} is true, there must be an attribute use with an {attribute declaration} with the same {name} and {target namespace} as its {attribute declaration} in the {attribute uses} of the complex type definition itself whose {required} is true.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7651</b>	<b>(derivation-ok-restriction.4.1) Invalid attribute wildcard in complex type definition derived via &lt;xs:restriction&gt;, complex base type definition does not have an attribute wildcard</b>
<b>Explanation</b>	If there is an {attribute wildcard}, the {base type definition} must also have one.
<b>Action</b>	Adapt the schema according to the constraint.
<b>INOXDE7652</b>	<b>(derivation-ok-restriction.4.2) Invalid attribute wildcard in complex type definition derived via &lt;xs:restriction&gt;, its namespace constraint is not a subset of the namespace constraint of the attribute wildcard in the complex base type definition</b>
<b>Explanation</b>	If there is an {attribute wildcard}, the complex type definition's {attribute wildcard}'s {namespace constraint} must be a subset of the {base type definition}'s {attribute wildcard}'s {namespace constraint}.
<b>Action</b>	Adapt the schema according to the constraint.

**INOXDE7653**      **(derivation-ok-restriction.4.3) Invalid 'processContents' of attribute wildcard in complex type definition derived via <xs:restriction> compared to 'processContents' of attribute wildcard in complex base type definition**

**Explanation**      If there is an {attribute wildcard}, and the {base type definition} is not the ur-type definition, the complex type definition's {attribute wildcard}'s {process contents} must be identical to or stronger than the {base type definition}'s {attribute wildcard}'s {process contents}, where strict is stronger than lax is stronger than skip.

**Action**      Adapt the schema according to the constraint.

**INOXDE7654**      **(derivation-ok-restriction.5.1.2) Invalid base type for complex type with simple content derived via <xs:restriction>**

**Explanation**      If the {content type} of the complex type definition is a simple type definition, one of the following must be true: (1) The {content type} of the {base type definition} must be a simple type definition from which the {content type} is validly derived (2) The {base type definition} must be mixed and have a particle which is emptiable

**Action**      Adapt the schema according to the constraint.

**INOXDE7655**      **(derivation-ok-restriction.5.2.2) Invalid base type for complex type with empty content derived via <xs:restriction>**

**Explanation**      If the {content type} of the complex type is empty, one of the following must be true: (1) The {content type} of the {base type definition} must also be empty. (2) The {content type} of the {base type definition} must be elementOnly or mixed and have a particle which is emptiable

**Action**      Adapt the schema according to the constraint.

**INOXDE7656**      **(derivation-ok-restriction.5.3.1) Invalid base type for complex type with neither simple nor empty content derived via <xs:restriction>**

**Explanation**      If the {content type} of the complex type definition is neither a simple type definition nor empty, one of the following must be true: (1) The {content type} of the complex type definition itself must be element-only (2) The {content type} of the complex type definition itself and of the {base type definition} must be mixed.

**Action**      Adapt the schema according to the constraint.

**INOXDE7657**      **(derivation-ok-restriction.5.3.2) The particle of the complex type derived via restriction does not satisfy the "Particle Valid (Restriction)" constraint with respect to the particle of the complex base type**

**Explanation**      If the {content type} of the complex type definition is neither a simple type definition nor empty, the particle of the complex type definition itself must be a valid restriction of the particle of the {content type} of the {base type definition}.

**Action**      Adapt the schema according to the constraint.

---

<b>INOXDE7658</b>	<b>An element's or attribute's shortname definition does not match Adabas field definition</b>
<b>Explanation</b>	A field with the given shortname does not exist in the Adabas file defined for this element.
<b>Action</b>	Adapt the schema to the corresponding Adabas field and file definitions.
<b>INOXDE7659</b>	<b>The element's or attribute's Adabas format definition does not match the Adabas field definition</b>
<b>Explanation</b>	The Adabas format definition cannot be converted to the format defined in the Adabas FDT.
<b>Action</b>	Adapt your schema to the corresponding Adabas field definitions.
<b>INOXDE7660</b>	<b>An element's periodic group definition does not match the Adabas field definition</b>
<b>Explanation</b>	The corresponding Adabas field is not defined as a periodic group in the Adabas FDT.
<b>Action</b>	Adapt your schema corresponding to the Adabas field definition
<b>INOXDE7661</b>	<b>An element's multiple field definition does not match the Adabas field definition</b>
<b>Explanation</b>	The corresponding Adabas field is not defined as multiple field in Adabas.
<b>Action</b>	Adapt your schema definition to the corresponding Adabas definitions.
<b>INOXDE7662</b>	<b>An element nillable definition does not match the Adabas field definition</b>
<b>Explanation</b>	The element defined as xsi:nil is not defined with NC (SQL NULL-Value Representation) -option in the Adabas FDT.
<b>Action</b>	Adapt the schema corresponding to the Adabas field definition.
<b>INOXDE7663</b>	<b>An element's or attribute's format definition xs:date does not match the Adabas field definition</b>
<b>Explanation</b>	An element defined as xs:date must be mapped to an ADABAS field with format P4.
<b>Action</b>	Adapt the schema to the corresponding Adabas definition.
<b>INOXDE7664</b>	<b>An element's or attribute's format definition xs:dateTime does not match the Adabas field definition</b>
<b>Explanation</b>	The element which is defined as xs:dateTime must be mapped to an Adabas field with format P7.
<b>Action</b>	Adapt the schema definition to the corresponding Adabas format.

<b>INOXDE7665</b>	<b>(c-props-correct.1) An &lt;xs:keyref&gt; refers to an unknown &lt;xs:key&gt;</b>
<b>Explanation</b>	The 'refer' attribute of <xs:keyref> must refer to a sibling node of type <xs:key> with a matching value of its 'name' attribute.
<b>Action</b>	Correct the schema document.
<b>INOXDE7666</b>	<b>(c-props-correct.2) Invalid cardinality of &lt;xs:field&gt; child nodes of &lt;xs:keyref&gt;</b>
<b>Explanation</b>	If the {identity-constraint category} is keyref, the cardinality of the {fields} must equal that of the {fields} of the {referenced key}.
<b>Action</b>	Correct the schema document.
<b>INOXDE7667</b>	<b>(e-props-correct.3) The 'substitutionGroup' resolves to an unknown or invalid global element declaration</b>
<b>Explanation</b>	The 'substitutionGroup' attribute of an element declaration, E1, must resolve to a global element, say E2, whose effective 'block' attribute, i.e. the substitution group exclusions do not contain the value "substitution". The {type definition} of E1 must be validly derived from the {type definition} of E2, using a derivation method not given in the effective 'block' attribute.
<b>Action</b>	Adapt the schema to match this constraint.
<b>INOXDE7668</b>	<b>(cos-equiv-derived-ok-rec.1) Invalid relation of types of current element and its substitution group affiliate</b>
<b>Explanation</b>	The derivation method of the type of the current element must be derived from the type of the substitution group affiliate's (i.e. the global element referenced by the 'substitutionGroup' attribute) type. The derivation method must be compatible with the substitution group exclusions defined by the 'block' attribute of the affiliate and the 'blockDefault' attribute of the respective schema node.
<b>Action</b>	Adapt schema to meet this constraint.
<b>INOXDE7669</b>	<b>(e-props-correct.5) Found circular substitution group</b>
<b>Explanation</b>	Circular substitution groups are disallowed. That is, it must not be possible to return to an element declaration by repeatedly following the {substitution group affiliation} property.
<b>Action</b>	Modify the schema to fulfill the constraint.

---

<b>INOXDE7670</b>	<b>The 'final' attribute of a simple or complex type definition is more restrictive in the new schema compared to the old schema</b>
<b>Explanation</b>	The 'final' attribute must not become more restrictive.
<b>Action</b>	Either adapt the value of the 'final' attribute or use instance validation when updating the schema.
<b>INOXDE7671</b>	<b>A type definition has been set to abstract in the new schema</b>
<b>Explanation</b>	When setting a type definition to abstract, this might cause documents to be invalid with respect to the new schema.
<b>Action</b>	Either make the type definition non-abstract as in the old schema or use instance validation when updating the schema.
<b>INOXDE7672</b>	<b>An element declaration has been set to abstract in the new schema</b>
<b>Explanation</b>	When setting an element declaration to abstract, this might cause documents to be invalid with respect to the new schema.
<b>Action</b>	Either make the element declaration non-abstract as in the old schema or use instance validation when updating the schema.
<b>INOXDE7673</b>	<b>A complex type definition's 'block' attribute has been made more restrictive in the new schema</b>
<b>Explanation</b>	When making a complex type definition's 'block' attribute more restrictive, this might cause documents to be invalid with respect to the new schema.
<b>Action</b>	Either set the complex type definition's 'block' attribute as in the old schema or use instance validation when updating the schema.
<b>INOXDE7674</b>	<b>An element declaration's 'block' attribute has been made more restrictive in the new schema</b>
<b>Explanation</b>	When making an element declaration's 'block' attribute more restrictive, this might cause documents to be invalid with respect to the new schema.
<b>Action</b>	Either set the element declaration's 'block' attribute as in the old schema or use instance validation when updating the schema.
<b>INOXDE7675</b>	<b>An element's 'nillable' attribute was set to false in new schema</b>
<b>Explanation</b>	If an element's 'nillable' attribute is set to false during a schema update, existing documents may become invalid.
<b>Action</b>	Either leave the element declaration's 'nillable' attribute unchanged or use instance validation for schema update.

<b>INOXDE7676</b>	<b>Mismatch of identity constraints found during schema update</b>
<b>Explanation</b>	It is not possible to modify existing or add new identity constraints during a schema update without using instance validation.
<b>Action</b>	Either do not add or modify identity constraints during schema update, or use instance validation.
<b>INOXDE7677</b>	<b>An elements 'substitutionGroup' attribute was omitted or modified during schema update.</b>
<b>Explanation</b>	An element's 'substitutionGroup' attribute may not be omitted or modified during schema update unless instance validation is being used.
<b>Action</b>	Either leave the 'substitutionGroup' attribute as is or use instance validation during schema update.
<b>INOXDE7680</b>	<b>(length valid restriction) the length facet has been changed compared to the length facet of the base type</b>
<b>Explanation</b>	It is an error if length is among the members of {facets} of {base type definition} and {value} is not equal to the {value} of the parent length.
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7681</b>	<b>(maxLength valid restriction) the maxLength facet has been increased compared to the maxLength facet of the base type</b>
<b>Explanation</b>	It is an error if maxLength is among the members of {facets} of {base type definition} and {value} is greater than the {value} of the parent maxLength.
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7682</b>	<b>(minLength valid restriction) the minLength facet has been decreased compared to the minLength facet of the base type</b>
<b>Explanation</b>	It is an error if minLength is among the members of {facets} of {base type definition} and {value} is less than the {value} of the parent minLength.
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7683</b>	<b>(totalDigits valid restriction) the totalDigits facet has been increased compared to the totalDigits facet of the base type</b>
<b>Explanation</b>	It is an error if totalDigits is among the members of {facets} of {base type definition} and {value} is greater than the {value} of the parent totalDigits.
<b>Action</b>	Modify the schema accordingly.

---

<b>INOXDE7684</b>	<b>(fractionDigits valid restriction) the fractionDigits facet has been increased compared to the fractionDigits facet of the base type</b>
<b>Explanation</b>	It is an error if fractionDigits is among the members of {facets} of {base type definition} and {value} is greater than the {value} of the parent totalDigits
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7685</b>	<b>(maxExclusive valid restriction) the maxExclusive facet has been increased compared to the maxExclusive facet of the base type</b>
<b>Explanation</b>	It is an error if any of the following conditions is true: 1. maxExclusive is among the members of {facets} of {base type definition} and {value} is greater than the {value} of the parent maxExclusive 2. maxInclusive is among the members of {facets} of {base type definition} and {value} is greater than the {value} of the parent maxInclusive 3. minInclusive is among the members of {facets} of {base type definition} and {value} is less than or equal to the {value} of the parent minInclusive 4. minExclusive is among the members of {facets} of {base type definition} and {value} is less than or equal to the {value} of the parent minExclusive
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7686</b>	<b>(maxInclusive valid restriction) the maxInclusive facet has been increased compared to the maxInclusive facet of the base type</b>
<b>Explanation</b>	It is an error if any of the following conditions is true: 1. maxInclusive is among the members of {facets} of {base type definition} and {value} is greater than the {value} of the parent maxInclusive 2. maxExclusive is among the members of {facets} of {base type definition} and {value} is greater than or equal to the {value} of the parent maxExclusive 3. minInclusive is among the members of {facets} of {base type definition} and {value} is less than the {value} of the parent minInclusive 4. minExclusive is among the members of {facets} of {base type definition} and {value} is less than or equal to the {value} of the parent minExclusive
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7687</b>	<b>(minExclusive valid restriction) the minExclusive facet has been increased compared to the minExclusive facet of the base type</b>
<b>Explanation</b>	It is an error if any of the following conditions is true: 1. minExclusive is among the members of {facets} of {base type definition} and {value} is less than the {value} of the parent minExclusive 2. maxInclusive is among the members of {facets} of {base type definition} and {value} is greater the {value} of the parent maxInclusive 3. minInclusive is among the members of {facets} of {base type definition} and {value} is less than the {value} of the parent minInclusive 4. maxExclusive is among the members of {facets} of {base type definition} and {value} is greater than or equal to the {value} of the parent maxExclusive
<b>Action</b>	Modify the schema accordingly.

**INOXDE7688 (minInclusive valid restriction) the minInclusive facet has been increased compared to the minInclusive facet of the base type**

**Explanation** It is an error if any of the following conditions is true: 1. minInclusive is among the members of {facets} of {base type definition} and {value} is less than the {value} of the parent minInclusive 2. maxInclusive is among the members of {facets} of {base type definition} and {value} is greater the {value} of the parent maxInclusive 3. minExclusive is among the members of {facets} of {base type definition} and {value} is less than or equal to the {value} of the parent minExclusive 4. maxExclusive is among the members of {facets} of {base type definition} and {value} is greater than or equal to the {value} of the parent maxExclusive

**Action** Modify the schema accordingly.

**INOXDE7689 (whiteSpace valid restriction) the whiteSpace facet has been changed to an invalid value compared to the whiteSpace facet of the base type**

**Explanation** It is an error if whiteSpace is among the members of {facets} of {base type definition} and any of the following conditions is true: 1. {value} is replace or preserve and the {value} of the parent whiteSpace is collapse 2. {value} is preserve and the {value} of the parent whiteSpace is replace

**Action** Modify the schema accordingly.

**INOXDE7690 (facet fixed) attempted to specify a different value for a facet which has fixed="true" in the base type definition**

**Explanation** The value of the facet differs from the value of the facet in the base type definition.

**Action** Omit the facet in the derived value or remove fixed="true" from the base type definition.

**INOXDE7696 Invalid change of schema-required property of collection**

**Explanation** A collection must be either schemaless or schemas are required for all documents to be stored. It is not allowed to change the schema-required property.

**Action** Adapt the collection description correspondingly.

**INOXDE7697 Could not create schemaless doctype in collection ino:etc**

**Explanation** It is not possible to have two schemaless doctypes in collection 'ino:etc' with the same lexical QName but different namespace of the root element.

**Action** A workaround is to change the namespace prefix of the root element of the first instance to be inserted in a new implicit doctype.

---

<b>INOXDE7698</b>	<b>(c-selector-xpath) Found invalid value of xpath attribute in definition of selector of identity constraint</b>
<b>Explanation</b>	The xpath attribute of the selector of an identity constraint must adhere to the (c-selector-xpath) constraint.
<b>Action</b>	Fix the value of the xpath attribute: all name tests must use valid QNames, all namespace prefixes must be declared, no attribute steps allowed.
<b>INOXDE7699</b>	<b>(c-fields-xpaths) Found invalid value of xpath attribute in definition of selector of identity constraint</b>
<b>Explanation</b>	The xpath attribute of all fields of an identity constraint must adhere to the (c-fields-xpaths) constraint.
<b>Action</b>	Fix the value of the xpath attribute: all name tests must use valid QNames, all namespace prefixes must be declared, an attribute step is only allowed at the last position.
<b>INOXDE7700</b>	<b>successful document validation</b>
<b>Explanation</b>	The document validated without error.
<b>Action</b>	No action required.
<b>INOXDE7701</b>	<b>memory allocation failed</b>
<b>Explanation</b>	Memory allocation failed during document validation.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7702</b>	<b>internal error</b>
<b>Explanation</b>	An internal processing error occurred during document validation.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7703</b>	<b>validation has detected an error in document</b>
<b>Explanation</b>	The document validation has discovered some invalid document content.
<b>Action</b>	Modify your document.
<b>INOXDE7704</b>	<b>(Parse error): document not well-formed</b>
<b>Explanation</b>	The document content is not well-formed.
<b>Action</b>	Modify your document

<b>INOXDE7705</b>	<b>(Parse error): junk data</b>
<b>Explanation</b>	The document contains junk data after the document content.
<b>Action</b>	Modify your input stream.
<b>INOXDE7706</b>	<b>(Parse error): close element error</b>
<b>Explanation</b>	The document contains a closing tag that does not match opening tag.
<b>Action</b>	Modify your document
<b>INOXDE7707</b>	<b>(Parse error): multiple attr</b>
<b>Explanation</b>	The document contains multiple occurrences of the same attribute.
<b>Action</b>	Modify your document
<b>INOXDE7708</b>	<b>Invalid root error</b>
<b>Explanation</b>	Tamino allows only insertion of documents with root elements whose names correspond to the name of some doctype in the collection where you tried to insert the current document.
<b>Action</b>	Modify your document or schema.
<b>INOXDE7709</b>	<b>Errors detected during document validation</b>
<b>Explanation</b>	Errors were detected during document validation.
<b>Action</b>	Please either modify your XML schema or fix errors in your document(s).
<b>INOXDE7710</b>	<b>(cvc-complex-type.2.1): empty content error</b>
<b>Explanation</b>	The schema requires empty element content but some content was detected.
<b>Action</b>	Modify your document or schema.
<b>INOXDE7711</b>	<b>(cvc-complex-type.2.3): mixed content error</b>
<b>Explanation</b>	The schema does not allow mixed element content but some mixed content was detected.
<b>Action</b>	Modify your document or schema.

---

<b>INOXDE7712</b>	<b>(cvc-complex-type.4): required attribute missing</b>
<b>Explanation</b>	The schema requires an attribute that is not present in document.
<b>Action</b>	Modify your document or schema.
<b>INOXDE7713</b>	<b>(cvc-wildcard.2): undeclared wildcard element</b>
<b>Explanation</b>	Schema contains ANY with processContent = strict but element content's name does not match any globally declared element.
<b>Action</b>	Modify your document or schema.
<b>INOXDE7714</b>	<b>(cvc-id.1): undefined IDREF value</b>
<b>Explanation</b>	The document contains an IDREF value which does not exist as an ID value.
<b>Action</b>	Modify your document.
<b>INOXDE7715</b>	<b>(cvc-id.2): duplicate ID value</b>
<b>Explanation</b>	The document contains multiple copies of the same ID value.
<b>Action</b>	Modify your document.
<b>INOXDE7716</b>	<b>(cvc-assess-attr.1): undeclared attribute</b>
<b>Explanation</b>	No matching declaration can be found in the schema for an attribute, neither as an explicitly named attribute nor as attribute wildcard.
<b>Action</b>	Modify your document.
<b>INOXDE7717</b>	<b>(cvc-type.3.1.1): invalid attribute</b>
<b>Explanation</b>	A simple type description in the schema does not allow attributes here.
<b>Action</b>	Modify your document.
<b>INOXDE7718</b>	<b>(cvc-type.3.1.2): invalid element content</b>
<b>Explanation</b>	A simple type description in the schema does not allow element children here.
<b>Action</b>	Modify your document.
<b>INOXDE7719</b>	<b>(cvc-particle): content of element does not match a particle description</b>
<b>Explanation</b>	Element content cannot be successfully validated against a particle description in schema.
<b>Action</b>	Modify your document.

<b>INOXDE7720</b>	<b>(cvc-particle.1.1): element content missing, minOccurs constraint violation in wildcard declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the minOccurs constraint.
<b>Action</b>	Modify your document.
<b>INOXDE7721</b>	<b>(cvc-particle.1.2): too much element content, minOccurs constraint violation in wildcard declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the minOccurs constraint of the wildcard declaration.
<b>Action</b>	Modify your document.
<b>INOXDE7722</b>	<b>(cvc-particle.2.1): element content missing, minOccurs constraint violation in element declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the minOccurs constraint.
<b>Action</b>	Modify your document.
<b>INOXDE7723</b>	<b>(cvc-particle.2.2): too much element content, minOccurs constraint violation in element declaration</b>
<b>Explanation</b>	The length of the element content sequence does not match the minOccurs constraint for the element declaration.
<b>Action</b>	Modify your document.
<b>INOXDE7724</b>	<b>(cvc-particle.3.1): element content missing, minOccurs constraint violation in all model group declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the minOccurs constraint.
<b>Action</b>	Modify your document.
<b>INOXDE7725</b>	<b>(cvc-particle.3.1): element content missing, minOccurs constraint violation in choice model group declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the minOccurs constraint.
<b>Action</b>	Modify your document.

---

<b>INOXDE7726</b>	<b>(cvc-particle.3.1): element content missing, minOccurs constraint violation in sequence model group declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the minOccurs constraint.
<b>Action</b>	Modify your document.
<b>INOXDE7727</b>	<b>(cvc-particle.3.2): too much element content, maxOccurs constraint violation in all model group declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the maxOccurs constraint of the all model group declaration.
<b>Action</b>	Modify your document.
<b>INOXDE7728</b>	<b>(cvc-particle.3.2): too much element content, maxOccurs constraint violation in choice model group declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the maxOccurs constraint of the choice model group declaration.
<b>Action</b>	Modify your document.
<b>INOXDE7729</b>	<b>(cvc-particle.3.2): too much element content, maxOccurs constraint violation in sequence model group declaration</b>
<b>Explanation</b>	The length of the element content sequence does not satisfy the maxOccurs constraint of the sequence model group declaration.
<b>Action</b>	Modify your document.
<b>INOXDE7730</b>	<b>(cvc-model-group.1):invalid end of sequence</b>
<b>Explanation</b>	A sequence does not contain all required elements. In particular, the sequence ends without containing all required elements.
<b>Action</b>	Modify your document.
<b>INOXDE7731</b>	<b>(cvc-model-group.1):invalid sequence</b>
<b>Explanation</b>	A sequence does not contain all required elements.
<b>Action</b>	Modify your document.

<b>INOXDE7732</b>	<b>(cvc-model-group.2):invalid choice</b>
<b>Explanation</b>	An element's child node does not match any choice in schema.
<b>Action</b>	Modify your document.
<b>INOXDE7733</b>	<b>(cvc-model-group.3):invalid all - missing element</b>
<b>Explanation</b>	An element's child node does not contain all required children of the all model group in the schema.
<b>Action</b>	Modify your document.
<b>INOXDE7734</b>	<b>(cvc-model-group.3):invalid all - undeclared element</b>
<b>Explanation</b>	An element's child node does not match any node declared in the all model group in the schema.
<b>Action</b>	Modify your document.
<b>INOXDE7735</b>	<b>(cvc-model-group.3):invalid all - too many child elements</b>
<b>Explanation</b>	All allowed elements in an all model group already appeared, but there are more illegal child elements.
<b>Action</b>	Modify your document.
<b>INOXDE7736</b>	<b>(cvc-model-group.3):invalid all - repeated occurrence of one element</b>
<b>Explanation</b>	Every child element in an all model group may appear at most once, but here the element appears more often.
<b>Action</b>	Modify your document.
<b>INOXDE7737</b>	<b>(cvc-wildcard-namespace): invalid namespace with respect to namespace constraint of wildcard</b>
<b>Explanation</b>	For namespace="##other" a non-absent namespace is required, which differs from the targetNamespace of the schema. For namespace="##targetNamespace" the namespace must match the current schema's targetNamespace. For namespace="##local" the element or attribute matching vs. the wildcard must not belong to any namespace. If the namespace attribute of the wildcard contains a list of URIs the namespace of the element or attribute matching vs. the wildcard must match one of the URIs in the list.
<b>Action</b>	Modify your document or schema.

---

<b>INOXDE7738</b>	<b>(cvc-wildcard-namespace.2.3): invalid namespace for wildcard with namespace="##other"</b>
<b>Explanation</b>	The namespace of an element or attribute does not differ from the current schema's targetNamespace as required by namespace='##other' specified in a wildcard (xs:any or xs:anyAttribute).
<b>Action</b>	Modify your document.
<b>INOXDE7739</b>	<b>(cvc-wildcard-namespace.3): invalid namespace for wildcard with namespace="##local"</b>
<b>Explanation</b>	An element or attribute belongs to a namespace in contradiction to the namespace="##local" attribute of a wildcard (xs:any or xs:anyAttribute).
<b>Action</b>	Modify your document.
<b>INOXDE7740</b>	<b>(cvc-complex-type.2.4): element child error</b>
<b>Explanation</b>	The list of child elements could not to be partitioned in a way that it becomes valid with respect to the content type's particle.
<b>Action</b>	Modify your document or schema.
<b>INOXDE7741</b>	<b>A namespace prefix conflict was detected when attempting to insert default or fixed value</b>
<b>Explanation</b>	A namespace prefix used in a value constraint for a node whose datatype is xs:QName, xs:NOTATION or a derived type cannot be associated with the intended URI as the document already contains a namespace declaration for that prefix mapped to a different URI. Note that the default namespace is always assumed to be used.
<b>Action</b>	Adapt the document to be stored or the fragment to be inserted to avoid conflict.
<b>INOXDE7742</b>	<b>(cvc-elt.4.3) The local type definition given by the xsi:type attribute is not validly derived from the type definition as of the underlying schema</b>
<b>Explanation</b>	The local type definition given by the xsi:type attribute must be derived from the type definition as of the underlying schema. Derivation methods listed in the attribute named "block" of the element declaration or the associated complex type definition may not be used.
<b>Action</b>	Either modify the schema by changing or removing the "block" attribute of the element declaration or complex type definition, or modify or remove the xsi:type attribute from the document to be stored.

<b>INOXDE7743</b>	<b>(cvc-elt.2) For an element information item to be locally valid with respect to an element declaration the declaration's abstract must be 'false'</b>
<b>Explanation</b>	Found an element declaration which is abstract when attempting to validate an element.
<b>Action</b>	Change the value of the 'abstract' property of the respective element declaration.
<b>INOXDE7744</b>	<b>(cvc-complex-type.1) For an element information item to be locally valid with respect to a complex type definition the type definition's abstract must be 'false'</b>
<b>Explanation</b>	Attempted to validate an element against a complex type definition which is abstract.
<b>Action</b>	Either make the type definition non-abstract, or use the xsi:type attribute in the XML document referring to a non-abstract derived type.
<b>INOXDE7745</b>	<b>(cvc-identity-constraint.3) An &lt;x:field&gt; of an identity constraint caused multiple matching nodes or the respective node does not have a simple type</b>
<b>Explanation</b>	For each node in the target node set of an identity constraint, all of the {fields} for a selected context node evaluate to either an empty node-set or a node-set with exactly one member, which must have a simple type.
<b>Action</b>	Check the XML document or remove the identity constraint from the schema.
<b>INOXDE7746</b>	<b>(cvc-identity-constraint.4.1) Found multiple occurrence of same key-sequence for &lt;x:unique&gt; identity constraint</b>
<b>Explanation</b>	No two members of the qualified node set of an <x:unique> may have key-sequences whose members are pairwise equal.
<b>Action</b>	Check the XML document or remove the identity constraint from the schema.
<b>INOXDE7747</b>	<b>(cvc-identity-constraint.4.2.1) A field of an &lt;x:key&gt; identity constraint evaluates to an empty node-set</b>
<b>Explanation</b>	For <x:key>, all the {fields} must evaluate to a node-set with exactly one member.
<b>Action</b>	Check the XML document or remove the identity constraint from the schema.
<b>INOXDE7748</b>	<b>(cvc-identity-constraint.4.2.2) Found multiple occurrence of same key-sequence for &lt;x:key&gt; identity constraint</b>
<b>Explanation</b>	No two members of the qualified node set of an <x:key> may have key-sequences whose members are pairwise equal.
<b>Action</b>	Check the XML document or remove the identity constraint from the schema.

---

<b>INOXDE7749</b>	<b>(cvc-identity-constraint.4.3) Could not locate matching key sequence in node table of &lt;xs:key&gt; identity constraint referenced by &lt;xs:keyref&gt;</b>
<b>Explanation</b>	For each member of the qualified node set of a <xs:keyref> there must be a corresponding entry in the node table of the referenced <xs:key>.
<b>Action</b>	Check the XML document or remove the identity constraint from the schema.
<b>INOXDE7750</b>	<b>(cvc-elt.3.1) Attribute 'xsi:nil' not allowed if the 'nillable' attribute of the element declaration is not set to 'true'</b>
<b>Explanation</b>	The predefined 'xsi:nil' attribute is only allowed on an element information item if the corresponding element declaration in the schema has its 'nillable' attribute to 'true'.
<b>Action</b>	Check the schema or remove the 'xsi:nil' attribute from the document.
<b>INOXDE7751</b>	<b>(cvc-elt.3.2.1) Found character or element content inside element information item with xsi:nil='true'</b>
<b>Explanation</b>	If an element has the xsi:nil='true' attribute, it must not have any character or element content.
<b>Action</b>	Modify the document accordingly.
<b>INOXDE7752</b>	<b>(cvc-elt.3.2.2) Element declaration corresponding to element information item with xsi:nil='true' attribute has a fixed value constraint</b>
<b>Explanation</b>	For an element information item with xsi:nil='true' attribute the corresponding element declaration in the schema must not have a fixed value constraint.
<b>Action</b>	Remove either the 'nillable' or the 'fixed' attribute from the element declaration in the schema.
<b>INOXDE7753</b>	<b>(cos-equiv-derived-ok-rec.2.1) The effective blocking constraint of the element to be substituted contains 'substitution'</b>
<b>Explanation</b>	The blocking constraint of an element to be substituted during validation must not contain 'substitution'.
<b>Action</b>	Adapt the XML document or modify the 'block' or 'blockDefault' attributes in the schema to become consistent with the constraint.
<b>INOXDE7754</b>	<b>(cos-equiv-derived-ok-rec.2.3) Type derivation between type of element to be substituted and type of the substituting element is blocked by the effective 'block' attribute of the element to be substituted</b>
<b>Explanation</b>	The type of the substituting element must be derived from the type of the element to be substituted by means of restriction and/or extension, unless one of those derivation methods is being blocked by the 'block' attribute (if present) of the element to be substituted, or the 'blockDefault' attribute of the parent schema.

<b>Action</b>	Adapt the XML document or modify the 'block' or 'blockDefault' attributes in the schema to become consistent with the constraint.
<b>INOXDE7761</b>	<b>(cvc-datatype-valid) Overflow detected during validation</b>
<b>Explanation</b>	A value overflow has been detected during validation against the XML schema.
<b>Action</b>	Ensure that the values adhere to datatype specific limits.
<b>INOXDE7762</b>	<b>(cvc-datatype-valid) Value out of range detected during validation</b>
<b>Explanation</b>	A value smaller than the valid minimum or larger than the allowed maximum has been detected during validation against the XML schema.
<b>Action</b>	Ensure that the values adhere to the datatype specific minimum and maximum.
<b>INOXDE7763</b>	<b>(cvc-datatype-valid) An invalid value has been found during validation</b>
<b>Explanation</b>	A value outside the lexical space has been detected during validation against the XML schema.
<b>Action</b>	Ensure that the value adheres to the datatype specific lexical space.
<b>INOXDE7764</b>	<b>(cvc-enumeration-valid) A value not defined in the respective enumeration has been found during validation.</b>
<b>Explanation</b>	A value which is not listed in the respective enumeration has been detected during validation against the XML schema.
<b>Action</b>	Ensure that the value matches one of the enumeration values specified in the XML schema.
<b>INOXDE7765</b>	<b>(cvc-length-valid) Facet 'length' was violated by a value during validation.</b>
<b>Explanation</b>	A value whose length does not match the 'length' facet has been detected during validation against the XML schema.
<b>Action</b>	Ensure that the value's length matches the restriction given by the schema.
<b>INOXDE7766</b>	<b>(cvc-attribute.4): fixed value error</b>
<b>Explanation</b>	An attribute declaration in schema requires a fixed value which is different from given value in document.
<b>Action</b>	Modify your document.

---

<b>INOXDE7767</b>	<b>(cvc-elt.5.2.2.2.1): fixed value error</b>
<b>Explanation</b>	The element declaration in schema requires a fixed value which is different from given value in document.
<b>Action</b>	Modify your document.
<b>INOXDE7768</b>	<b>(cvc-au): fixed value error</b>
<b>Explanation</b>	The attribute use declaration in the schema requires a fixed value which is different from the given value in the document.
<b>Action</b>	Modify your document.
<b>INOXDE7769</b>	<b>(cvc-elt.5.2.2.2.2): fixed value error</b>
<b>Explanation</b>	The element declaration in the schema requires a fixed value which is different from given value in document.
<b>Action</b>	Modify your document.
<b>INOXDE7770</b>	<b>(cvc-minLength-valid) Facet 'minLength' was violated by a value during validation</b>
<b>Explanation</b>	A value whose length is less than the 'minLength' facet has been detected during validation against the XML schema.
<b>Action</b>	Ensure that the value's length matches the restriction given by the schema.
<b>INOXDE7771</b>	<b>(cvc-maxLength-valid) Facet 'maxLength' was violated by a value during validation</b>
<b>Explanation</b>	A value whose length is greater than the 'maxLength' facet has been detected during validation against the XML schema.
<b>Action</b>	Ensure that the value's length matches the restriction given by the schema.
<b>INOXDE7772</b>	<b>(cvc-pattern-valid) Facet 'pattern' was violated by a value during validation</b>
<b>Explanation</b>	A value whose pattern does not match the 'pattern' facet has been detected during validation against the XML schema.
<b>Action</b>	Ensure that the value's pattern matches the restriction given by the schema.
<b>INOXDE7773</b>	<b>(cvc-enumeration-valid) Facet 'enumeration' was violated by a value during validation</b>
<b>Explanation</b>	A value has been found which does not match the valid values specified by the 'enumeration' facet, during validation against the XML schema.
<b>Action</b>	Ensure that the value matches the restriction given by the schema.

<b>INOXDE7774</b>	<b>(cvc-maxInclusive-valid) Facet 'maxInclusive' was violated by a value during validation</b>
<b>Explanation</b>	A value has been found which is greater than the 'maxInclusive' facet, during validation against the XML schema.
<b>Action</b>	Ensure that the value matches the restriction given by the schema.
<b>INOXDE7775</b>	<b>(cvc-maxExclusive-valid) Facet 'maxExclusive' was violated by a value during validation</b>
<b>Explanation</b>	A value has been found which is greater or equal to the 'maxExclusive' facet, during validation against the XML schema.
<b>Action</b>	Ensure that the value matches the restriction given by the schema.
<b>INOXDE7776</b>	<b>(cvc-minInclusive-valid) Facet 'minInclusive' was violated by a value during validation</b>
<b>Explanation</b>	A value has been found which is lower than the 'minInclusive' facet, during validation against the XML schema.
<b>Action</b>	Ensure that the value matches the restriction given by the schema.
<b>INOXDE7777</b>	<b>(cvc-minExclusive-valid) Facet 'minExclusive' was violated by a value during validation</b>
<b>Explanation</b>	A value has been found which is less than or equal to the 'minExclusive' facet, during validation against the XML schema.
<b>Action</b>	Ensure that the value matches the restriction given by the schema.
<b>INOXDE7778</b>	<b>(cvc-totalDigits-valid) Facet 'totalDigits' was violated by a value during validation</b>
<b>Explanation</b>	A numerical value has been found with more digits than specified by the 'totalDigits' facet, during validation against the XML schema.
<b>Action</b>	Ensure that the value matches the restriction given by the schema.
<b>INOXDE7779</b>	<b>(cvc-fractionDigits-valid) Facet 'fractionDigits' was violated by a value during validation</b>
<b>Explanation</b>	A numerical value has been found with more fractional digits (i.e. to the right of the decimal point) than specified by the 'fractionDigits' facet, during validation against the XML schema.
<b>Action</b>	Ensure that the value matches the restriction given by the schema.

---

<b>INOXDE7780</b>	<b>Divide by zero error</b>
<b>Explanation</b>	An attempt was made to divide by zero. Division by zero is mathematically undefined.
<b>Action</b>	Make sure that no division by zero occurs.
<b>INOXDE7781</b>	<b>Invalid or unsupported attribute found</b>
<b>Explanation</b>	An attribute was found that is not supported by Tamino.
<b>Action</b>	In order to enable xsi:type processing you have to set the server parameter "reject xsi:type" to "no".
<b>INOXDE7782</b>	<b>Namespace prefix is bound to an invalid URI</b>
<b>Explanation</b>	A namespace prefix must be bound to a non-empty URI in a namespace declaration. In addition, some prefixes must be bound to a fixed URI.
<b>Action</b>	Ensure e.g. that the prefix 'xml' is bound to 'http://www.w3.org/XML/1998/namespace', and that 'ino' is bound to 'http://namespaces.softwareag.com/tamino/response2'.
<b>INOXDE7783</b>	<b>The namespace prefix in an element or attribute value is not declared</b>
<b>Explanation</b>	If an element's or attribute's type is xs:QName or xs:NOTATION, the respective prefix must be declared in the schema document.
<b>Action</b>	Add the missing namespace declaration.
<b>INOXDE7784</b>	<b>Invalid namespace prefix</b>
<b>Explanation</b>	A namespace prefix is invalid.
<b>Action</b>	Modify the namespace definition and repeat the request.
<b>INOXDE7785</b>	<b>The datatype referenced by xsi:type is unknown</b>
<b>Explanation</b>	The value of the xsi:type attribute must reference a datatype predefined by XML Schema or a user-defined global datatype.
<b>Action</b>	Check the type reference via xsi:type in XML document.
<b>INOXDE7786</b>	<b>Invalid prefix bound to URI</b>
<b>Explanation</b>	The URI cannot be bound to the given namespace prefix.
<b>Action</b>	Use an appropriate prefix.

<b>INOXDE7787</b>	<b>Invalid value of 'xsi:nil' attribute</b>
<b>Explanation</b>	The value of the 'xsi:nil' attribute must be a valid boolean, i.e. 'true', 'false', '1', or '0'.
<b>Action</b>	Modify the document accordingly.
<b>INOXDE7821</b>	<b>Class not found</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7822</b>	<b>Duplicated class name</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7823</b>	<b>Illegal cast</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7824</b>	<b>Internal API error</b>
<b>Explanation</b>	Tamino schema tree internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7827</b>	<b>No memory</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7828</b>	<b>No such element</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7829</b>	<b>Not implemented</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.

---

<b>INOXDE7830</b>	<b>Too many classes</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7831</b>	<b>XML parser error</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7833</b>	<b>Operation failed</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7856</b>	<b>Buffer size exceeded</b>
<b>Explanation</b>	Tamino schema tree error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7860</b>	<b>Internal error: invalid node type</b>
<b>Explanation</b>	This is a Tamino schema tree error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7861</b>	<b>Index out of range</b>
<b>Explanation</b>	Tamino schema tree error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7862</b>	<b>User abort</b>
<b>Explanation</b>	Tamino schema tree internal error message.
<b>Action</b>	Please contact your system administrator.
<b>INOXDE7865</b>	<b>Schema cache: access denied</b>
<b>Explanation</b>	Schema cache: access denied.
<b>Action</b>	Please contact your software supplier.

<b>INOXDE7867</b>	<b>Internal error: schema not in cache</b>
<b>Explanation</b>	Internal error: schema not in cache.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7868</b>	<b>Internal error: write lock expected</b>
<b>Explanation</b>	Internal error: write lock expected.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7869</b>	<b>Internal error: schema not locked</b>
<b>Explanation</b>	Internal error: schema not locked.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7883</b>	<b>(p-props-correct.2.1) If maxOccurs has a numeric value, then minOccurs must not be greater than maxOccurs</b>
<b>Explanation</b>	If maxOccurs has a numeric value, then minOccurs must not be greater than maxOccurs.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7884</b>	<b>(p-props-correct.2.2) If maxOccurs has a numeric value, then maxOccurs must be greater than or equal to 1</b>
<b>Explanation</b>	If maxOccurs has a numeric value, then maxOccurs must be greater than or equal to 1.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7885</b>	<b>(src-attribute.2) use must have value optional</b>
<b>Explanation</b>	If the attribute's "default" and "use" attributes are both present, then "use" must have the value "optional".
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7886</b>	<b>(src-attribute.4) For attribute the type and simpleType must not both be present</b>
<b>Explanation</b>	For attribute, the type and simpleType must not both be present.
<b>Action</b>	Modify the XML schema accordingly.

---

<b>INOXDE7887</b>	<b>(src-element.1) For element the attributes default and fixed must not both be present</b>
<b>Explanation</b>	For element, the attributes "default" and "fixed" must not both be present.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7888</b>	<b>(src-element.3) For element the attributes type and either simpleType or complex Type are mutually exclusive</b>
<b>Explanation</b>	For element, the attributes "type" and either "simpleType" or "complex Type" are mutually exclusive.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7889</b>	<b>(src-element.2.1) For element either the attribute ref or name must be present, but not both</b>
<b>Explanation</b>	For element, either the attribute ref or name must be present, but not both.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7890</b>	<b>(src-element.2.2) For element if parent is not schema and attribute ref is present, only attributes minOccurs, maxOccurs and id are allowed in addition to ref</b>
<b>Explanation</b>	If the parent of the element is not schema and the attribute ref is present, then all of <xs:complexType>, <xs:simpleType>, <xs:key>, <xs:keyref>, <xs:unique>, nillable, default, fixed, form, block and type must be absent.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7891</b>	<b>(valid-data-types.1) The type of nodes and base attribute of restriction nodes may only be of the supported types</b>
<b>Explanation</b>	The type of nodes and base attribute of restriction nodes may only be of the supported types, namely: date, decimal, double, float, integer, short, SQLNumeric,, SQLVarchar, string, time, timeinstant, ID, IDREF, IDREFS, NMTOKEN, NMTOKENS. No user-defined complexType or simpleType are allowed for type.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7895</b>	<b>(valid-data-types.2) The facet is not valid for the base datatype</b>
<b>Explanation</b>	A facet has been specified which is not supported for the base datatype of a restriction.
<b>Action</b>	Modify the XML schema accordingly.

<b>INOXDE7900</b>	<b>(length and minLength or maxLength) Conflict between length facet and either minLength or maxLength</b>
<b>Explanation</b>	It is an error for both length and either of minLength or maxLength to be members of {facets}, unless they are specified in different derivation steps in which case the following must be true: the {value} of minLength <= the {value} of length <= the {value} of maxLength.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7901</b>	<b>(fractionDigits less than or equal to totalDigits) The value of the fractionDigits facet is greater than the value of totalDigits</b>
<b>Explanation</b>	It is an error for fractionDigits to be greater than totalDigits.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7902</b>	<b>The root node of a doctype has a non-trivial substitution group</b>
<b>Explanation</b>	The root node of a doctype must not have a non-trivial substitution group. The QName of the root element of an XML document stored in a doctype must be identical to the doctype's QName.
<b>Action</b>	Remove the substitutionGroup reference to the root node from the schema.
<b>INOXDE7906</b>	<b>Found illegal logical or physical property for shadowXML doctype</b>
<b>Explanation</b>	It is not allowed to specify certain logical or physical properties, e.g. XNode mapping, for a shadowXML doctype.
<b>Action</b>	Remove the illegal property below <tsd:logical> and <tsd:physical> for the shadowXML doctype.
<b>INOXDE7907</b>	<b>(src-resolve.1.3) The ref attribute of an element needs to reference an existing global element</b>
<b>Explanation</b>	The ref attribute of an element needs to reference an existing global element.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7908</b>	<b>Found logical or physical properties for nonXML doctype</b>
<b>Explanation</b>	It is not allowed to specify logical or physical properties for a nonXML doctype.
<b>Action</b>	Remove <tsd:logical> and <tsd:physical> for the nonXML doctype.

---

<b>INOXDE7909</b>	<b>(cos-nonambig.1) Unique Particle Attribution failure</b>
<b>Explanation</b>	A content model must be formed such that during validation of an element information item sequence, the particle contained directly, indirectly or implicitly therein with which to attempt to validate each item in the sequence in turn can be uniquely determined without examining the content or attributes of that item, and without any information about the items in the remainder of the sequence.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7910</b>	<b>(cos-all-limited.1.2) All group limitation failure</b>
<b>Explanation</b>	The cardinality of an all-model group must be exactly one.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7911</b>	<b>(cos-all-limited.2) All group limitation failure</b>
<b>Explanation</b>	The maximum cardinality of all elements in all-model group must be 0 or 1.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7912</b>	<b>(src-attribute.1) For attribute declarations, their attributes default and fixed must not both be present</b>
<b>Explanation</b>	For attribute declarations, the attributes "default" and "fixed" must not both be present.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7913</b>	<b>(src-attribute.3.1) Either attribute ref or name must be present, but not both</b>
<b>Explanation</b>	Either the attribute "ref" or the attribute "name" must be present, but not both.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7914</b>	<b>(src-attribute.3.2) If attribute's parent is not schema and ref is present, &lt;simpleType&gt;, form and type are not allowed</b>
<b>Explanation</b>	The form or type attribute as well as a simpleType cannot be specified with attribute declarations if the parent is not the schema node and the ref attribute is present.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7915</b>	<b>The doctype name needs to be unique within a collection</b>
<b>Explanation</b>	The doctype name needs to be unique within a collection.
<b>Action</b>	Modify the XML schema accordingly.

<b>INOXDE7916</b>	<b>The given path must exist in the current schema</b>
<b>Explanation</b>	The given path must exist in the current schema.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7917</b>	<b>For each doctype name where the doctype is not of plain non-XML type there must be a matching global element with a matching qualified name</b>
<b>Explanation</b>	For each doctype name where the doctype is not of plain non-XML type there must be a matching global element with a matching qualified name. In particular, for non-XML doctypes with non-XML indexing via a shadow XML document a matching global element must exist.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7918</b>	<b>For each doctype name where the doctype is of type nonXML there must not be a matching global element with the same name</b>
<b>Explanation</b>	For each doctype name where the doctype is of type non-XML there must not be a matching global element with the same name.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7919</b>	<b>For accessOptions at least one of read, insert, update or delete needs to be given, but no duplicate entries of these are allowed</b>
<b>Explanation</b>	For accessOptions at least one of read, insert, update or delete needs to be given, but no duplicate entries of these are allowed.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7920</b>	<b>Invalid node name</b>
<b>Explanation</b>	The name of an element or attribute does not match the repository naming conventions.
<b>Action</b>	Change the name of element or attribute.
<b>INOXDE7921</b>	<b>Attempted to re-use a schema specifying physical properties from a schema belonging to a different collection</b>
<b>Explanation</b>	This constraint has been introduced in order to prevent database inconsistencies. It may vanish in a future version of Tamino.
<b>Action</b>	Change the collection name either of the referenced or the referring schema.

---

<b>INOXDE7922</b>	<b>The given path must exist in the current Schema and lead to the element or attribute for which it is specified</b>
<b>Explanation</b>	The given path must exist in the current schema and lead to the element or attribute for which it is specified.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7923</b>	<b>No XPath expression may occur twice for one node to avoid conflicting mappings</b>
<b>Explanation</b>	No XPath expression may occur twice for one node in order to avoid conflicting mappings (not even if it specifies the same mapping).
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7924</b>	<b>At most one elementInfo or attributeInfo may have only empty or a nonexistent which-element, which is taken as the default mapping</b>
<b>Explanation</b>	At most one elementInfo or attributeInfo may have only empty or a non-existent which element, which is taken as the default mapping (Note: empty which elements are ignored, so an elementInfo which has both empty and filled which elements is interpreted as an elementInfo with filled which elements).
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7925</b>	<b>Below Schema there may only be one appinfo node which defines Tamino mappings</b>
<b>Explanation</b>	Below Schema there may only be one appinfo node which defines Tamino mappings.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7926</b>	<b>Below Schema there must be a schemaInfo node but no elementInfo or attributeInfo nodes</b>
<b>Explanation</b>	Below Schema there must be a schemaInfo node but no elementInfo or attributeInfo nodes.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7927</b>	<b>Below Element there may only be one appinfo node which defines Tamino mappings</b>
<b>Explanation</b>	Below Element there may only be one appinfo node which defines Tamino mappings.
<b>Action</b>	Modify the XML schema accordingly.

<b>INOXDE7928</b>	<b>Below Element there may be only elementInfo node but no schemaInfo or attributeInfo nodes</b>
<b>Explanation</b>	Below Element there may be only elementInfo node but no schemaInfo or attributeInfo nodes.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7929</b>	<b>Below Attribute there may only be one appinfo node which defines Tamino mappings</b>
<b>Explanation</b>	Below Attribute there may only be one appinfo node which defines Tamino mappings.
<b>Action</b>	Modify the XML schema accordingly.
<b>INOXDE7930</b>	<b>internal error</b>
<b>Explanation</b>	While processing a schema document an internal error occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7931</b>	<b>An error occurred while processing a schema document</b>
<b>Explanation</b>	An error occurred during processing of a TSD3 schema document.
<b>Action</b>	Details may be supplied by a secondary error message or can be retrieved using the admin-command <code>ino:CheckSchema(collection-name, schema-name)</code> or <code>ino:CheckSchema()</code> for all schemas in all collections. Correct the schema and update it in the database.
<b>INOXDE7932</b>	<b>Errors occurred when checking constraints for schema document</b>
<b>Explanation</b>	A TSD3 schema document does not adhere to all relevant restrictions.
<b>Action</b>	Check the secondary error message for details.
<b>INOXDE7933</b>	<b>Version mismatch occurred during schema processing</b>
<b>Explanation</b>	An attempt was made to load a TSD3 schema into a TSD2 collection or vice versa.
<b>Action</b>	Ensure that used schema language levels are consistent within a single collection.
<b>INOXDE7934</b>	<b>Invalid schema document</b>
<b>Explanation</b>	The XML document does not contain a valid TSD3 schema.
<b>Action</b>	Ensure that the schema document is consistent with the Tamino schema definition language TSD3.

---

<b>INOXDE7935</b>	<b>Schema not found</b>
<b>Explanation</b>	The referenced schema does not exist.
<b>Action</b>	Check for the existence of the referenced TSD3 schema.
<b>INOXDE7936</b>	<b>Invalid define of system collection</b>
<b>Explanation</b>	The schema to be defined refers to a collection reserved for system usage.
<b>Action</b>	Choose a different collection name.
<b>INOXDE7938</b>	<b>Internal error: invalid or unknown version information</b>
<b>Explanation</b>	Internal error occurred when retrieving or checking version information.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7939</b>	<b>Invalid schema document</b>
<b>Explanation</b>	The schema document contains an invalid or outdated format.
<b>Action</b>	Check the schema document. Possibly you are using TSD2. If so, convert to TSD3 using the Tamino Schema Editor.
<b>INOXDE7940</b>	<b>Invalid modification of doctype: cannot switch between storage of XML, nonXML and indexed nonXML documents</b>
<b>Explanation</b>	An error was detected when updating the schema: an attempt was made to modify between storage of XML, nonXML and indexed nonXML documents.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7941</b>	<b>Must not omit doctype during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: all doctypes defined in the original schema must occur in the new schema.
<b>Action</b>	Check the secondary error message for the context where the error was detected. Either extend the new schema document or undefine the obsolete doctype(s) before the next attempt to update the schema.
<b>INOXDE7942</b>	<b>Cannot switch doctype to closed content via schema update</b>
<b>Explanation</b>	It is not permitted to turn a doctype back to closed content if it had been configured for open content before.
<b>Action</b>	In order to switch a doctype back to closed content mode you have to undefine and re-create the doctype and reload the data.

<b>INOXDE7943</b>	<b>Mismatch of minOccurs attribute during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: the new value of the minOccurs attribute must be less than or equal to the old one.
<b>Action</b>	Check the secondary error message the for context where the error was detected.
<b>INOXDE7944</b>	<b>Mismatch of maxOccurs attribute during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: the new value of the the maxOccurs attribute must be greater than or equal to the old one. If it was previously unbounded, it must not be changed at all.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7945</b>	<b>Mismatch of mapping detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: a path containing mapping information which has been added in the new schema was already valid in the old schema.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7946</b>	<b>Mismatch of element or attribute name detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: names of corresponding elements or attributes in old and new schema are different.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7947</b>	<b>Mismatch of element or attribute type detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: types of corresponding elements or attributes in the old and new schema are different.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7948</b>	<b>Mismatch of content model detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: the content models are not equivalent.
<b>Action</b>	Check the secondary error message for the context where the error was detected.

---

<b>INOXDE7949</b>	<b>Mismatch of content model of sequence detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: the content model inside a sequence of the new schema contains an additional non-optional component.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7950</b>	<b>Mismatch of enumeration detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: it is only possible to add enumeration values in the new schema if there had been at least one enumeration value in the old schema.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7951</b>	<b>Mismatch of fixed attribute detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: the value of the fixed attribute of an element must not be changed.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7952</b>	<b>Mismatch of "default which" detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: no elementInfo or attributeInfo without a which element may be added in the new schema.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7953</b>	<b>Invalid modification of processContents attribute detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: the processContents attribute may only change from "strict" to "lax" to "skip".
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7954</b>	<b>Invalid modification of mixed attribute detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: the mixed attribute may only change from "false" to "true".
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7955</b>	<b>Invalid modification of components of choice detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: choice in the new schema must contain all components of choice in the old schema in arbitrary order. Additional components may be added for closed content. For open content, components may only be removed from the content model.
<b>Action</b>	Check the secondary error message for the context where the error was detected.

<b>INOXDE7956</b>	<b>Invalid modification of components of sequence detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: sequence in the new schema must contain all components of sequence in the old schema in the same order. Additional optional components with minOccurs=0 may be added in the case of closed content of the doctype. For open content, components may only be removed from the content model.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7957</b>	<b>Invalid modification of element's or attribute's simpleType detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: element or attribute may not be defined with simpleType in the old schema and without simpleType in the new schema or vice versa.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7958</b>	<b>Invalid modification of element's complexType detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: element or attribute may not be defined with complexType in the old schema and without complexType in the new schema or vice versa.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7960</b>	<b>Invalid path in schema definition</b>
<b>Explanation</b>	The specified path inside the which element is invalid for this schema.
<b>Action</b>	Check the path and schema definition.
<b>INOXDE7961</b>	<b>Invalid path in schema definition</b>
<b>Explanation</b>	The specified path inside the which element has an invalid syntax.
<b>Action</b>	Check the path value.
<b>INOXDE7962</b>	<b>Invalid modification of attribute list detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: all attributes defined for an element in the old schema must occur in the new schema in arbitrary order. Optional attributes may be added.
<b>Action</b>	Check the secondary error message for the context where the error was detected.

---

<b>INOXDE7963</b>	<b>Additional attribute must be optional during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: all additional attributes must be optional in the case of closed content. For open content, attributes may only be removed.
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7964</b>	<b>Mismatch of use attribute detected during schema update.</b>
<b>Explanation</b>	An error was detected when updating the schema: the use attribute of an xsd:attribute may only be changed from "required" to "optional".
<b>Action</b>	Check the secondary error message for the context where the error was detected.
<b>INOXDE7965</b>	<b>Invalid modification of components of all detected during schema update</b>
<b>Explanation</b>	Invalid modification of components of all detected during schema update. Additional optional components may be added in the case of closed content. For open content, components may only be removed from the content model.
<b>Action</b>	Please modify your XML schema.
<b>INOXDE7966</b>	<b>Mismatch of targetNamespace attribute detected during schema update</b>
<b>Explanation</b>	The targetNamespace attribute may not be changed during a schema update.
<b>Action</b>	Please adapt your schema.
<b>INOXDE7967</b>	<b>Mismatch of namespace declaration detected during schema update</b>
<b>Explanation</b>	Namespace declarations may not be changed during a schema update.
<b>Action</b>	Please adapt your schema.
<b>INOXDE7968</b>	<b>New global element detected during schema update</b>
<b>Explanation</b>	Global elements may not be added during a schema update if there is an <code>&lt;xs:any&gt;</code> element by which they may be referred to implicitly.
<b>Action</b>	Please check your schema.
<b>INOXDE7969</b>	<b>New global attribute detected during schema update</b>
<b>Explanation</b>	Global attributes may not be added during a schema update if there is an <code>&lt;xs:anyAttribute&gt;</code> element they may be referred by implicitly.
<b>Action</b>	Please check your schema.

<b>INOXDE7970</b>	<b>Invalid attempt to remove an attribute wildcard (xs:anyAttribute) during a schema update</b>
<b>Explanation</b>	An attribute wildcard may not be removed during a schema update.
<b>Action</b>	Please check your schema.
<b>INOXDE7971</b>	<b>Removed global element during schema update</b>
<b>Explanation</b>	Global elements may not be removed during a schema update if there is an <code>&lt;xs:any&gt;</code> element they may be referred by implicitly.
<b>Action</b>	Please check your schema.
<b>INOXDE7972</b>	<b>Removed global attribute during schema update</b>
<b>Explanation</b>	Global attributes may not be removed during a schema update if there is an <code>&lt;xs:anyAttribute&gt;</code> element they may be referred by implicitly.
<b>Action</b>	Please check your schema.
<b>INOXDE7973</b>	<b>Facet added during schema update</b>
<b>Explanation</b>	The new schema contains a facet which is not present in the existing schema.
<b>Action</b>	Consider removing the facet from the new schema or use instance validation.
<b>INOXDE7974</b>	<b>Attempted to make value of facet more restrictive during schema update</b>
<b>Explanation</b>	The new schema definition contains a facet with a value more restrictive than in the existing schema. This is not allowed by the restricting facet.
<b>Action</b>	Consider changing the value of the facet in the new schema or use instance validation.
<b>INOXDE7975</b>	<b>Restriction facet's value must not change during schema update</b>
<b>Explanation</b>	The new schema definition contains a facet with a value different from that in the existing schema. This is not allowed by the restricting facet.
<b>Action</b>	Consider changing the value of the facet in the new schema or use instance validation.
<b>INOXDE7976</b>	<b>Mismatch of pattern detected during schema update</b>
<b>Explanation</b>	An error was detected when updating the schema: It is only possible to add pattern values in the new schema if there had been at least one pattern value in the old schema. It is only possible to remove pattern values from the new schema if this results in having no pattern values in the new schema.
<b>Action</b>	Check the secondary error message for the context where the error was detected.

---

<b>INOXDE7978</b>	<b>Mismatch of namespace declarations found during schema update checks</b>
<b>Explanation</b>	An attempt was made to modify the URI associated with a namespace prefix. This is based on namespace declarations in the schema document. Either a namespace declaration was omitted or the URI has been changed. This is not allowed because it would change the semantics of X-Query requests on namespace-clean doctypes.
<b>Action</b>	Modify the schema accordingly.
<b>INOXDE7979</b>	<b>Invalid schema changes found when adding a unique constraint - no other schema changes are permitted</b>
<b>Explanation</b>	When adding a unique constraint no other schema changes are permitted in the same schema update operation. It is also not permitted to add multiple unique constraints in a single schema update.
<b>Action</b>	Either add a single unique constraint or perform other schema changes in separate steps.
<b>INOXDE7980</b>	<b>At least one doctype contains instances with xsi:type attributes. Schema update requires explicit validation.</b>
<b>Explanation</b>	This error may show up e.g. if the set of global types is going to change due to the schema update. Thus, XML instances containing xsi:type attributes require re-validation. Note that this status of the doctype remains set even after the respective XML documents have been deleted.
<b>Action</b>	Perform a schema update with instance validation ( <code>_mode=validate</code> ).
<b>INOXDE7981</b>	<b>Attempted to remove member of substitution group during schema update for doctype with closed content</b>
<b>Explanation</b>	You cannot remove a member of a substitution group during a schema update for a doctype with closed content without instance validation.
<b>Action</b>	Use instance validation during the schema update.
<b>INOXDE7982</b>	<b>Attempted to add member of substitution group during schema update for doctype with open content</b>
<b>Explanation</b>	You cannot add a member of a substitution group during a schema update for a doctype with open content without using instance validation.
<b>Action</b>	Use instance validation during the schema update.

<b>INOXDE7988</b>	<b>Failed to lock schema document.</b>
<b>Explanation</b>	A schema document could not be locked due to a parallel transaction.
<b>Action</b>	Check for parallel transaction using the same schema with a conflicting type of lock. Typically, commands modifying a schema require a write lock for the schema and will conflict with each other, or with other transactions having a read lock on the schema.
<b>INOXDE7989</b>	<b>Cannot define schema in schemaless collection</b>
<b>Explanation</b>	It is not allowed to define a schema if the collection is defined with schema use 'prohibited'.
<b>Action</b>	Use another collection - or just do not define schema at all. Schemaless collections (like ino:etc) allow documents to be stored without defining a schema. You may also change the collection for optional schema usage.
<b>INOXDE7992</b>	<b>Index migration for doctype 'doctype' in collection 'collection' failed with error code errorCode</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXDE7993</b>	<b>Schema operation failed because the same request has doctype already in use</b>
<b>Explanation</b>	Schemas cannot be modified or deleted from a server extension if the calling command has an affected doctype in use.
<b>Action</b>	Change your application.
<b>INOXDE7996</b>	<b>Doctype requires xsi:type migration - schema update requires instance validation</b>
<b>Explanation</b>	The given doctype contains documents with xsi:type attribute(s) that were stored in previous version of Tamino. As the processing of xsi:type was not complete in previous versions of Tamino up to version 4.2, explicit validation of the documents against the schema is required.
<b>Action</b>	Perform a schema update with instance validation ( <code>_MODE=validate</code> ). Depending on the type definitions being referenced by the xsi:type attribute, the original schema may need to be adapted, as the type being referenced by xsi:type must be validly derived from the default type of the respective element as given in the schema.

---

<b>INOXDE7997</b>	<b>Missing 'type' attribute in definition of computed index.</b>
<b>Explanation</b>	The <tsd:computed> elements must have a 'type' attribute if it is not a compound index.
<b>Action</b>	Fix the schema accordingly.
<b>INOXDE7998</b>	<b>Found unexpected 'type' attribute in definition of computed index with multiple components.</b>
<b>Explanation</b>	For a compound computed index, i.e. with multiple components, only the component definitions may have a 'type' attribute.
<b>Action</b>	Fix the schema accordingly.
<b>INOXDE7999</b>	<b>Found component of a computed index which does not have a simple type.</b>
<b>Explanation</b>	The component of a computed index must have a simple type.
<b>Action</b>	Fix the schema accordingly.
<b>INOXDF7601</b>	<b>XML initialization: failed to define collection/doctype, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXDF7613</b>	<b>Unexpected error (rsp,line) occurred during op (parm).</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXDI7582</b>	<b>The path specified in the xpath attribute of a field element may not be empty or start with a slash</b>
<b>Explanation</b>	mp-valid-field.3: The path specified in the xpath attribute of a field element may not be empty or start with a slash.
<b>Action</b>	Please change the schema and try to define it again.
<b>INOXDI7608</b>	<b>Upgrade system collections</b>
<b>Explanation</b>	The system collections need to be upgraded.
<b>Action</b>	No action required.

<b>INOXDI7991</b>	<b>Indexes of doctype 'doctype' in collection 'collection' have been migrated successfully</b>
<b>Explanation</b>	In the given doctype, all indexes marked for migration have been rebuilt successfully.
<b>Action</b>	No action required.
<b>INOXDS7600</b>	<b>Define 'doctype' in collection 'collection'</b>
<b>Explanation</b>	The given system doctype will be defined or upgraded.
<b>Action</b>	No action required.
<b>INOXDS7602</b>	<b>Define collection 'collection'</b>
<b>Explanation</b>	The given system collection will be defined or upgraded.
<b>Action</b>	No action required.
<b>INOXDS7611</b>	<b>Define missing collection objects</b>
<b>Explanation</b>	For all existing collections the respective objects are now being loaded.
<b>Action</b>	No action required.
<b>INOXDW7678</b>	<b>Usage of a non-field element as element or attribute in schema definition</b>
<b>Explanation</b>	Field is defined as phonetic, sub, super or hyper-descriptor in Adabas field definition.
<b>Action</b>	Check your schema definition.
<b>INOXDW7990</b>	<b>Doctype 'doctype' in collection 'collection' requires index migration</b>
<b>Explanation</b>	The referenced doctype contains nodes whose indexes should be newly created.
<b>Action</b>	Refer to the migration related topics in the Tamino documentation.
<b>INOXDW7994</b>	<b>Multipath index 'label' in doctype 'doctype' in collection 'collection' is marked as not available</b>
<b>Explanation</b>	A previous schema update or index repair option could not be finished successfully. The given multipath index is still marked as being not available, and cannot be used for the efficient evaluation of query results.
<b>Action</b>	Update the respective schema in Tamino. This will enforce a rebuild of the respective multipath index.

---

<b>INOXDW7995</b>	<b>Doctype 'doctype' in collection 'collection' requires xsi:type migration</b>
<b>Explanation</b>	The given doctype contains documents with xsi:type attribute(s) that were stored in a previous version of Tamino. As the processing of xsi:type was not complete in previous Tamino versions up to version 4.2, explicit validation of the documents against the schema is required.
<b>Action</b>	Perform a schema update with instance validation (_MODE=validate). Depending on the type definitions being referenced by the xsi:type attribute, the original schema may need to be adapted, as the type being referenced by xsi:type must be validly derived from the default type of the respective element as given in the schema.
<b>INOXHA8259</b>	<b>Start writing XML dump of database, writing to file filename</b>
<b>Explanation</b>	The server has encountered an error situation which causes a crash. In order to enable error analysis, the server writes XML status information to a file in the reserved location.
<b>Action</b>	Report the crash to your software supplier, together with the dump files in the reserved location.
<b>INOXHE8152</b>	<b>Web server ws: specified node host unknown (DNS rsp: rsp).</b>
<b>Explanation</b>	The given web server on the given node is defined as one of the web servers that are allowed to communicate with this Tamino database. Unfortunately the Tamino database is not able to resolve the specified node name.
<b>Action</b>	Check whether the node name is correct. If it is correct, check whether DNS lookups may fail due to network problems. In this case, use the IP address instead of the node name.
<b>INOXHE8153</b>	<b>Insufficient system resources to create thread: thread 'name', error error returned by thread create function</b>
<b>Explanation</b>	There are not enough system resources available to create a new thread.
<b>Action</b>	There are not enough system resources available to create a new thread. The reason is either that the system defined maximum for the number of threads per process is exceeded, or that there is not enough memory available to allocate the necessary thread resources.
<b>INOXHE8201</b>	<b>Cannot connect to server on host host at port port. TCP error code rsp.</b>
<b>Explanation</b>	The web server interface module was not able to connect to the Tamino server.
<b>Action</b>	Check if the Tamino server is active and accessible (e.g. using Telnet).

<b>INOXHE8202</b>	<b>Tamino database unknown</b>
<b>Explanation</b>	The web server interface module was not able to determine the network address (hostname and port number) of the Tamino database server.
<b>Action</b>	Check if the issued URL really points to the desired Tamino database server. If this is OK, check the configuration data of the web server interface module. If this is OK too, please contact your software supplier.
<b>INOXHE8203</b>	<b>Database server and web server interface module not compatible</b>
<b>Explanation</b>	The versions of the Tamino database server and the Tamino web server interface module are not compatible.
<b>Action</b>	Please use compatible versions of the Tamino database server and the Tamino web server interface module.
<b>INOXHE8220</b>	<b>XML initialization:SXS initialization failed: sxsMsg</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8254</b>	<b>Failed to create the Software AG XTS Directory Server entries: why</b>
<b>Explanation</b>	The server failed to create the necessary Software AG XTS Directory Server entries and the server startup failed. The reason for the failure is returned by the XTS layer.
<b>Action</b>	Please check that the service "Software AG XTS Directory Server" is running. If not, please start it. On Windows this can be done using the Control Panel. On UNIX please use the scripts provided (which are normally executed at system start). If the service was running when the error occurred, and the XTS message does not specify enough details to fix the problem, please contact your software supplier.
<b>INOXHE8257</b>	<b>Conversion failed, output encoding enc, error code rsp</b>
<b>Explanation</b>	The conversion into the desired document encoding failed.
<b>Action</b>	Check the desired encoding and correct it.
<b>INOXHE8258</b>	<b>Unable to start request</b>
<b>Explanation</b>	There is a resource shortage on the server.
<b>Action</b>	Increase number of XML work threads. If the problem persists, increase the number of data working threads also.

---

<b>INOXHE8261</b>	<b>XML crash dump file filename could not be created due to operating system error system errno</b>
<b>Explanation</b>	The XML crash dump file needed for error analysis could not be created due to the given reason.
<b>Action</b>	Please consult the manufacturer's manual.
<b>INOXHE8270</b>	<b>XML internal error num: Session sess, Rsp rsp, time</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8278</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8282</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8283</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8284</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8285</b>	<b>Invalid Session ID</b>
<b>Explanation</b>	The specified session does not exist or it is currently executing a different request.
<b>Action</b>	Specify a valid Session ID.
<b>INOXHE8286</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.

<b>INOXHE8295</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8296</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8297</b>	<b>Error occurred in communication with client</b>
<b>Explanation</b>	A communication problem occurred when receiving a request or sending a response to the client.
<b>Action</b>	Please check the web server log files or network configuration for possible reasons.
<b>INOXHE8298</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHE8299</b>	<b>Internal error</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8155</b>	<b>Communication method 'SSL' requires a certificate</b>
<b>Explanation</b>	The server property 'communication method' is set to 'SSL', but the server property 'SSL certificate file' is not set. A certificate is mandatory for encrypted communication.
<b>Action</b>	Specify the location of the certificate that the server should use.
<b>INOXHF8158</b>	<b>Set version failed. Reason: reason. Internal response d.</b>
<b>Explanation</b>	An error occurred during migration.
<b>Action</b>	Please contact your software supplier and provide the server startup logfile.
<b>INOXHF8159</b>	<b>Exception d occurred during server startup: msg</b>
<b>Explanation</b>	The server could not be started.
<b>Action</b>	Please contact your software supplier.

<b>INOXHF8160</b>	<b>Communication method 'SSL' requires a private key</b>
<b>Explanation</b>	The server property 'communication method' is set to 'SSL', but the server property 'SSL key file' is not set. A private key is mandatory for encrypted communication.
<b>Action</b>	Specify the location of the private key that the server should use.
<b>INOXHF8162</b>	<b>Error in SSL cipher list detected.</b>
<b>Explanation</b>	SSL Cipher list provided shows incorrect syntax.
<b>Action</b>	please correct
<b>INOXHF8200</b>	<b>XML thread initialization failed</b>
<b>Explanation</b>	The initialization of X-Machine failed with the mentioned response code. This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8205</b>	<b>XML thread initialization: data map initialization failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8206</b>	<b>XML thread initialization: define of ino:collection failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8207</b>	<b>XML thread initialization: check of ino:collection failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8208</b>	<b>XML thread initialization: check of security collection failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8209</b>	<b>XML thread initialization: insert security collection failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXHF8210</b>	<b>XML thread initialization: insert vocabulary collection failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8211</b>	<b>XML thread initialization: check of vocabulary collection failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8212</b>	<b>XML thread initialization: security initialization failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8213</b>	<b>XML thread initialization: vocabulary initialization failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8214</b>	<b>XML thread initialization: commit failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8215</b>	<b>XML thread initialization: rollback failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8216</b>	<b>XML thread initialization: Memory allocation failed</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8217</b>	<b>XML work thread thid abended</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.

<b>INOXHF8218</b>	<b>XML receive thread thid abended</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8219</b>	<b>XML listen thread accept failed, rsp: tprsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8221</b>	<b>TCP/IP select failed, rsp: tprsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8223</b>	<b>XML connection initialization failed (error error number)</b>
<b>Explanation</b>	The initialization of the XML communication did not work as expected. The server could not be started.
<b>Action</b>	Repeat the action. If it still fails, contact your software supplier.
<b>INOXHF8224</b>	<b>Unexpected receive count: cnt</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8225</b>	<b>XML initialization: data map initialization failed</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8226</b>	<b>XML initialization:security initialization failed</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8227</b>	<b>XML initialization: internal error</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXHF8228</b>	<b>XML thread initialization: creation of anonymous session failed</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8229</b>	<b>XML thread initialization: server extension thread initialization failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8230</b>	<b>XML initialization:TCP/IP startup failed</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8233</b>	<b>XML initialization: gethostname failed</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8234</b>	<b>XML initialization: gethostbyname failed, host: host, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8235</b>	<b>XML initialization: invalid port number "port" found for web server webserver</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8237</b>	<b>XTS Register Server failed for XML: xtmsg</b>
<b>Explanation</b>	The registration of the Tamino XML server via XTS failed.
<b>Action</b>	Check and correct the XTS configuration and/or directory server.
<b>INOXHF8239</b>	<b>XML initialization: failed to define collection/doctype, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.

<b>INOXHF8240</b>	<b>XML thread thread_number has exited due to communication error error_number (text)</b>
<b>Explanation</b>	Either adding the service to the directory server has failed, or registering with the directory server has failed.
<b>Action</b>	Check the XTS configuration.
<b>INOXHF8241</b>	<b>XML thread thread_number has exited due to communication error error_number (text)</b>
<b>Explanation</b>	Either adding the service to the directory has failed, or the registration with the directory server failed.
<b>Action</b>	Check the XTS configuration.
<b>INOXHF8243</b>	<b>XML processing not initialized</b>
<b>Explanation</b>	The initialization of the XML processing did not work as expected. The server could not be started.
<b>Action</b>	Repeat the action. If it still fails, contact your support center.
<b>INOXHF8244</b>	<b>Binding to TCP/IP socket socket number (port type port) has failed</b>
<b>Explanation</b>	The server could not connect to the specified socket. Maybe it is in use.
<b>Action</b>	Check the reason for the error. If the error persists, choose another port number.
<b>INOXHF8255</b>	<b>XML initialization: invalid IP address "ipaddr" found for web server webserver</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8256</b>	<b>XML initialization: Memory allocation failed</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8262</b>	<b>XML thread initialization: initialization of tokenizer failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXHF8263</b>	<b>XML initialization: No license for tok tokenizer</b>
<b>Explanation</b>	No valid license found for the default tokenizer.
<b>Action</b>	Please check the setting of database parameter "default tokenizer" and the used license file. If the problem persists, please contact your software supplier.
<b>INOXHF8264</b>	<b>XML thread initialization: Create failed for obj</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8266</b>	<b>Invalid default tokenizer: tok</b>
<b>Explanation</b>	The value of the parameter "default tokenizer" is invalid.
<b>Action</b>	Use a valid value.
<b>INOXHF8269</b>	<b>XML thread initialization: data map initialization for server extensions failed, rsp: rsp</b>
<b>Explanation</b>	Internal error: Data map entries needed by X-Tension could not be initialized.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8271</b>	<b>XML initialization: invalid/unsupported default encoding 'defEnc'</b>
<b>Explanation</b>	An invalid/unsupported MIME or IANA encoding name is specified for the 'default encoding' database parameter.
<b>Action</b>	Please check the setting of the 'default encoding' database parameter. If the problem persists, please contact your software supplier.
<b>INOXHF8272</b>	<b>XML initialization: Word stemming algorithm initialization failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXHF8273</b>	<b>Failed to attach definition of system collections</b>
<b>Explanation</b>	The shared library containing in particular the meta schema could not be loaded.
<b>Action</b>	Check your installation.

<b>INOXH8279</b>	<b>Necessary allocation of static port failed</b>
<b>Explanation</b>	The allocation of a necessary static port failed.
<b>Action</b>	Please contact your software supplier.
<b>INOXH8151</b>	<b>Communication method: s</b>
<b>Explanation</b>	The given communication method will be used for the server that is starting. See the user documentation for the server property "Communication Method" for more information.
<b>Action</b>	No action required.
<b>INOXH8156</b>	<b>TCP/IP send failed, rsp: rsp, time</b>
<b>Explanation</b>	The Tamino server failed to respond to a request. The communication method used was TCP/IP. The reported response code is the error which the Tamino server got from TCP/IP "send".
<b>Action</b>	Please check the state of TCP/IP.
<b>INOXH8157</b>	<b>XTS send failed, rsp: rsp, time</b>
<b>Explanation</b>	The Tamino server failed to respond to a request. The communication method used was XTS. The reported response code is the error which the Tamino server got from XTS "SendMessageByRT".
<b>Action</b>	Please check the state of XTS.
<b>INOXH8222</b>	<b>TCP/IP receive failed, rsp: rsp</b>
<b>Explanation</b>	Error in the TCP/IP stack.
<b>Action</b>	Please check the state of TCP/IP.
<b>INOXH8242</b>	<b>Define doctype in collection collection</b>
<b>Explanation</b>	A system doctype with given name is being created in the given collection.
<b>Action</b>	No action required
<b>INOXH8247</b>	<b>Dynamic what worker thread created</b>
<b>Explanation</b>	The server increased the number of worker threads to avoid a possible deadlock.
<b>Action</b>	No action required.

---

<b>INOXHI8251</b>	<b>Overwriting Software AG XTS Directory Server entries</b>
<b>Explanation</b>	The Software AG XTS Directory Server entries already existed. They are overwritten.
<b>Action</b>	No action required.
<b>INOXHI8252</b>	<b>type - 'dsentry'</b>
<b>Explanation</b>	This is an informational message.
<b>Action</b>	No action required.
<b>INOXHI8253</b>	<b>Use switch parameter 'param' to force server registration</b>
<b>Explanation</b>	This is an informational message.
<b>Action</b>	No action required.
<b>INOXHI8260</b>	<b>XML crash dump of database finished</b>
<b>Explanation</b>	The XML crash dump is complete.
<b>Action</b>	No action required.
<b>INOXHI8265</b>	<b>Default tokenizer 'tok'</b>
<b>Explanation</b>	This is an informational message.
<b>Action</b>	No action required.
<b>INOXHI8267</b>	<b>User dictionary 'udict'</b>
<b>Explanation</b>	This is an informational message.
<b>Action</b>	No action required.
<b>INOXHI8274</b>	<b>Word stemming index successfully created</b>
<b>Explanation</b>	The database parameter 'stemming index' is enabled and the stemming index for documents with text indices is created.
<b>Action</b>	No action required.
<b>INOXHI8275</b>	<b>Word stemming index successfully dropped</b>
<b>Explanation</b>	The database parameter 'stemming index' is disabled and the stemming index for documents with text indices is removed.
<b>Action</b>	No action required.

<b>INOXHI8276</b>	<b>Web server configuration updated</b>
<b>Explanation</b>	The web server configuration was changed and is now updated in the server.
<b>Action</b>	No action required.
<b>INOXHI8277</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXHR8245</b>	<b>Initializing XML processing</b>
<b>Explanation</b>	This is an informational message.
<b>Action</b>	No action required.
<b>INOXHR8246</b>	<b>Starting XML threads</b>
<b>Explanation</b>	This is an informational message.
<b>Action</b>	No action required.
<b>INOXHV8250</b>	<b>Server is already registered with the Software AG XTS Directory Server</b>
<b>Explanation</b>	When the Tamino server starts it registers with the Software AG XTS Directory Server. It is possible that entries for the server are already present (server already started somewhere else or previous server session failed). If this message comes as a warning message, the entry found exactly matches the one that should be entered. If this message comes as an error message, the entry found did not match the entry that the server wanted to add.
<b>Action</b>	If this message comes as a warning message no action is required. If this message comes as an error message the Software AG XTS Directory Server entry found for the server should be checked and, if no longer necessary, the next server start should be done with the parameter for overwriting the Software AG XTS Directory Server entry activated.
<b>INOXHW8154</b>	<b>TCP connection timed out</b>
<b>Explanation</b>	A violation of Tamino Network Protocol was detected.
<b>Action</b>	Check the client application / network.

<b>INOXHW8161</b>	<b>HTTP connection timed out</b>
<b>Explanation</b>	A violation of Tamino Network Protocol was detected.
<b>Action</b>	Check the client application / network.
<b>INOXHW8204</b>	<b>XML thread initialization: data map initialization for server extension failed, rsp: rsp</b>
<b>Explanation</b>	This is an internal error. Tamino will work as expected unless server extensions are used.
<b>Action</b>	Please contact your software supplier.
<b>INOXHW8231</b>	<b>No license for Tamino XML</b>
<b>Explanation</b>	A special license must be bought to use the Tamino XML feature.
<b>Action</b>	Buy a license for Tamino XML.
<b>INOXHW8232</b>	<b>Only numLic concurrent XML sessions licensed</b>
<b>Explanation</b>	The server parameter "XML maximum sessions" contains a value that is larger than the number of concurrent sessions that is included in the used license.
	Only the number of sessions that is covered by the license used is allowed.
<b>Action</b>	Buy an enhanced license.
<b>INOXHW8236</b>	<b>XML connection refused; current number of connections: totCon</b>
<b>Explanation</b>	Tamino is not able to accept another XML request. The connection attempt is refused.
<b>Action</b>	Increase the number of XML work threads.
<b>INOXHW8238</b>	<b>Unable to free storage.</b>
<b>Explanation</b>	This is an internal error. X-Machine is not able to free all storage during shutdown.
<b>Action</b>	Please contact your software supplier.
<b>INOXHW8248</b>	<b>Maximum number of dynamic what worker threads reached</b>
<b>Explanation</b>	The maximum number of dynamic worker threads is reached. No further threads are created.
<b>Action</b>	The number of worker threads should be increased and the server should be restarted.

<b>INOXHW8249</b>	<b>Creation of dynamic what worker thread failed with response err</b>
<b>Explanation</b>	The server failed to increase the number of worker threads.
<b>Action</b>	No action required.
<b>INOXHW8268</b>	<b>Invalid entry in user dictionary 'tok'</b>
<b>Explanation</b>	The user dictionary contains an invalid entry. It is ignored.
<b>Action</b>	Check the user dictionary contents.
<b>INOXIE8300</b>	<b>No matching document found</b>
<b>Explanation</b>	The specified query did not find any matching documents.
<b>Action</b>	None. This is only an informational error message.
<b>INOXIE8301</b>	<b>Illegal document ID specified</b>
<b>Explanation</b>	The specified document ID is illegal.
<b>Action</b>	Supply a legal document ID.
<b>INOXIE8303</b>	<b>Deleting a document is forbidden</b>
<b>Explanation</b>	A <code>_DELETE</code> operation was issued against a doctype where <code>DELETE</code> is missing in the doctype options as supplied in the schema definition.
<b>Action</b>	Change the doctype options accordingly.
<b>INOXIE8304</b>	<b>Reading a document is forbidden</b>
<b>Explanation</b>	An <code>_XQL</code> operation was issued against a doctype where <code>READ</code> is missing in the doctype options as supplied in the schema definition.
<b>Action</b>	Change the doctype options accordingly.
<b>INOXIE8305</b>	<b>Invalid cursor handle</b>
<b>Explanation</b>	The supplied cursor handle is invalid: either it was never created during the current session, or the corresponding cursor was closed in the meantime.
<b>Action</b>	Supply a correct cursor handle.

---

<b>INOXIE8306</b>	<b>Invalid cursor position</b>
<b>Explanation</b>	The supplied cursor position is invalid: there is no document in the cursor's result set corresponding to the position. In particular, this error will be returned when positioning beyond the end of the cursor result set.
<b>Action</b>	Supply a correct cursor position.
<b>INOXIE8307</b>	<b>Trying to position backwards in a non-scrollable cursor</b>
<b>Explanation</b>	The position supplied with the "fetch cursor" request would result in a backward positioning which is not possible for a non-scrollable cursor.
<b>Action</b>	Supply a correct cursor position.
<b>INOXIE8309</b>	<b>Duplicate in sort key</b>
<b>Explanation</b>	The system cannot handle sort key values which consist of more than a single node.
<b>Action</b>	Change your query expression so that no multiple node is to be sorted.
<b>INOXIE8310</b>	<b>Invalid parameter detected</b>
<b>Explanation</b>	Either the function is unknown or the number of parameters is invalid or the parameter values are invalid.
<b>Action</b>	Please check the function name, the number of parameters and the parameter values and correct them.
<b>INOXIE8312</b>	<b>Version fromVersion is incompatible with Version toVersion</b>
<b>Explanation</b>	The current version of the database is not compatible with the selected version.
<b>Action</b>	Data must be unloaded and loaded into a new database manually.
<b>INOXIE8313</b>	<b>Internal communication error</b>
<b>Explanation</b>	Database cannot be converted because of an internal error.
<b>Action</b>	Check that the database is running.
<b>INOXIE8314</b>	<b>Database's compatibility level is no longer supported</b>
<b>Explanation</b>	Migration from and to this compatibility level is not possible because this compatibility level is no longer supported.
<b>Action</b>	Data must be unloaded and loaded into a new database manually.

<b>INOXIE8315</b>	<b>Duplicate docnames found in ino:collection = 'collection' ino:doctype='doctype'</b>
<b>Explanation</b>	The upgrade has been rejected because because of duplicate docnames.
<b>Action</b>	Use the administration command ino:AdminDocname("check-unique") to get a list of duplicate docnames. Please delete the duplicate docnames and call the administration command ino:AdminDocname("set-unique").
<b>INOXIE8316</b>	<b>Attempted to delete a partial document</b>
<b>Explanation</b>	With _delete, it is only possible to delete complete XML documents.
<b>Action</b>	Supply a query that selects complete documents.
<b>INOXIE8319</b>	<b>Internal error occurred during query processing: unknown request</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8320</b>	<b>Error parsing the XQL query</b>
<b>Explanation</b>	One or more errors occurred while parsing the XQL query.
<b>Action</b>	Correct query appropriately and re-issue
<b>INOXIE8321</b>	<b>Missing end quotation character</b>
<b>Explanation</b>	The end quotation character of a literal was not found. It could also be that the start and end quotation characters do not match.
<b>Action</b>	Correct query appropriately and re-issue.
<b>INOXIE8322</b>	<b>Named axes are not supported</b>
<b>Explanation</b>	The specification of named axes is not supported in Tamino.
<b>Action</b>	No action possible.
<b>INOXIE8331</b>	<b>Failed to set the server parameter</b>
<b>Explanation</b>	Failed to set the server parameter.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXIE8332</b>	<b>The old server parameter could not be deleted</b>
<b>Explanation</b>	The old server parameter could not be deleted.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8333</b>	<b>An old TSD2 collection could not be deleted</b>
<b>Explanation</b>	An old TSD2 collection could not be deleted.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8334</b>	<b>The database contains data which uses lite mapping</b>
<b>Explanation</b>	The version to which the database should be upgraded does not support lite mapping.
<b>Action</b>	Please delete the data which uses lite mapping and start the upgrade again.
<b>INOXIE8335</b>	<b>Upgrade of metaschema failed with following response code RESPONSE.</b>
<b>Explanation</b>	The upgrade of the metaschema which was performed during upgrade of the database has failed with the specified response code.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8336</b>	<b>Upgrade is not supported</b>
<b>Explanation</b>	Upgrade is not supported.
<b>Action</b>	Select another version to upgrade the database.
<b>INOXIE8337</b>	<b>Downgrade is not supported</b>
<b>Explanation</b>	Downgrade to an older Tamino version is not supported.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8338</b>	<b>Data format 'VERSION' found in collection 'COLLECTION' doctype 'DOCTYPE'.</b>
<b>Explanation</b>	The data format found in the user collection is no longer supported.
<b>Action</b>	Please clean up the user collection.
<b>INOXIE8339</b>	<b>Unknown function</b>
<b>Explanation</b>	The provided function name is unknown.
<b>Action</b>	Check if you provided the correct function name and try again.

<b>INOXIE8340</b>	<b>Truncated index detected</b>
<b>Explanation</b>	An index containing truncated entries was detected at query execution time, though the Data Map had no information about truncation available at compile time. This may occur for an index that has been migrated from Tamino version 4.1.4. As a side effect of the failing query, the index has been marked as truncated in the Data Map.
<b>Action</b>	Repeat the query.
<b>INOXIE8341</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8342</b>	<b>Memory allocation failed</b>
<b>Explanation</b>	There was not enough main memory available to perform the request.
<b>Action</b>	Possibly the machine is overloaded. Try again later.
<b>INOXIE8343</b>	<b>Postprocessing not supported for non-XML text search</b>
<b>Explanation</b>	A query that contains a text search operator can be executed on a non-XML doctype only if a text index has been defined for that doctype and the query does not require postprocessing.
<b>Action</b>	Modify your schema definition to contain a non-XML text index or change query to avoid postprocessing.
<b>INOXIE8344</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8345</b>	<b>Illegal parent operator follows sort operator</b>
<b>Explanation</b>	A query contains a parent operator which might be applied to a node which serves as input for a sort operator. This is not allowed.
<b>Action</b>	Please change your query so that no parent operator can be applied to a sort input node.

---

<b>INOXIE8346</b>	<b>Malformed proximity expression</b>
<b>Explanation</b>	A subexpression of the query uses either the "adj" or the "near" operator, but there is no corresponding "~=" operator.
<b>Action</b>	Correct the query.
<b>INOXIE8347</b>	<b>Query not supported</b>
<b>Explanation</b>	The specified query is not supported.
<b>Action</b>	Change the query.
<b>INOXIE8348</b>	<b>Wrong arguments for function</b>
<b>Explanation</b>	The function cannot be applied on the current parm settings, i.e. number or type of arguments that a function is called with is not as expected by the function.
<b>Action</b>	Check either the XPath specification for the proper usage of XPath's built in functions or check the documentation for server extension functions.
<b>INOXIE8349</b>	<b>Maximum word length exceeded</b>
<b>Explanation</b>	Text searches are restricted to a maximum word length of 64 characters.
<b>Action</b>	Reduce the length of the search pattern inside the query.
<b>INOXIE8350</b>	<b>No whitespace search is supported with ~=</b>
<b>Explanation</b>	Whitespaces are ignored by a "~=" search, so searching for a whitespace is not possible.
<b>Action</b>	Use the "=" operator to find whitespaces.
<b>INOXIE8351</b>	<b>Wrong direction of result type</b>
<b>Explanation</b>	The result type must be output.
<b>Action</b>	Uninstall the function, change the signature of the external function, install the function again.
<b>INOXIE8352</b>	<b>Operator used outside a document</b>
<b>Explanation</b>	Some operators can only be used inside a document e.g. before/after.
<b>Action</b>	Do not use the operator outside of a document context.

<b>INOXIE8353</b>	<b>Invalid invocation of ino:fullscan</b>
<b>Explanation</b>	The ino:fullscan function can be used only on query level, it cannot be applied to subexpressions.
<b>Action</b>	Correct ino:fullscan invocation.
<b>INOXIE8354</b>	<b>Invalid invocation of ino:explain</b>
<b>Explanation</b>	The ino:explain function can be used only on query level, it can not be applied to subexpressions.
<b>Action</b>	Correct ino:explain invocation.
<b>INOXIE8355</b>	<b>Too many inter-document sort operators</b>
<b>Explanation</b>	The system can process only a single inter-document sort operator. Please note that a &quot;sortby&quot; applied to a root node is also an inter-document sort operator.
<b>Action</b>	Please change your query.
<b>INOXIE8356</b>	<b>Illegal inter-document sort operators</b>
<b>Explanation</b>	Within a query an inter-document sort operator must not follow an intra-document sort operator.
<b>Action</b>	Please change your query.
<b>INOXIE8357</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8358</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8359</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXIE8360</b>	<b>Nodeset is empty</b>
<b>Explanation</b>	The current-node (.) or parent (..) operator was applied upon an empty nodeset during query evaluation.
<b>Action</b>	A subquery executed prior to the current-node or parent operation yielded an empty result.
<b>INOXIE8361</b>	<b>Invalid type occurred when executing query</b>
<b>Explanation</b>	Some query operations can only be applied upon objects of a specific type, e.g. current-node (.) or parent (..) only make sense when working upon nodes. This error may also occur when calling XPath functions upon a set of arguments they cannot be applied upon.
<b>Action</b>	Check whether . (=current node) or .. (= parent) are used in connection with nodes, and that an XPath function's usage corresponds to its type.
<b>INOXIE8362</b>	<b>Internal Error : Invalid Node</b>
<b>Explanation</b>	An invalid XML node was encountered during the evaluation of an XPath function.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8364</b>	<b>Conversion failed</b>
<b>Explanation</b>	In order to execute a query an invalid conversion was attempted. This happens e.g. if a numerical operation is applied upon data that cannot be converted to a number. This error occurs also if an operator requires two operands of the same type (e.g. between) and the operands are of different types.
<b>Action</b>	Check the operand's types.
<b>INOXIE8366</b>	<b>Wrong arguments for function</b>
<b>Explanation</b>	The function cannot be applied on the current parm settings, i.e. number or type of arguments that a function is called with is not as expected by the function.
<b>Action</b>	Check either the XPath specification for the proper usage of XPath's built in functions or check the documentation for server extension functions.
<b>INOXIE8367</b>	<b>Internal error : Missing root node</b>
<b>Explanation</b>	The query postprocessor encountered a missing node in the XPath parsing tree when evaluating an XPath expression.
<b>Action</b>	Please contact your software supplier.

<b>INOXIE8368</b>	<b>ICU collator definition failed</b>
<b>Explanation</b>	An error was received while opening an ICU collator.
<b>Action</b>	Please contact your software supplier.
<b>INOXIE8369</b>	<b>Right side of ~= must be a single string</b>
<b>Explanation</b>	The match operand requires an operand that evaluates to string on its right side.
<b>Action</b>	Check whether your idea of what match does is correct. It typically looks like list-of-nodes ~= 'pattern' or list-of-nodes ~= 'word' . If the right side of your match is detected dynamically from Tamino data, it does not evaluate to a string as you expected. If the right side of your match is given literally in the query, it might help to add quotes.
<b>INOXIE8371</b>	<b>Invalid comparison operator</b>
<b>Explanation</b>	Within 'adjacent' or 'near' statements, currently only the match comparison operator is allowed.
<b>Action</b>	Replace an equal by a match and a not-equal by a match and the XPath function 'not()'
<b>INOXIE8372</b>	<b>Too many match tokens</b>
<b>Explanation</b>	The right side of a ~= contains a string that gets tokenized in order to check the expression on the left side for the occurrence of these tokens in the given sequence. The tokenization must not lead to more than ten tokens.
<b>Action</b>	Shorten the pattern to avoid tokenization into more than ten tokens.
<b>INOXIE8374</b>	<b>Invalid Match Pattern</b>
<b>Explanation</b>	The string provided as the right side of a match (~=) must contain at least one character that is not a separation character, i.e. quote or comma. The string may contain wildcards (*), but only in the forms *x, x*, x*x, or *x*.
<b>Action</b>	Correct the pattern.
<b>INOXIE8375</b>	<b>Sortkey too long</b>
<b>Explanation</b>	The internally generated sort key is too long.
<b>Action</b>	Reduce the number of sort criteria.

---

<b>INOXIE8376</b>	<b>Duplicate in sort key</b>
<b>Explanation</b>	The system cannot handle sort key values which consist of more than a single node.
<b>Action</b>	Please try to fix your data or your query.
<b>INOXIE8378</b>	<b>Server extension returned binary data without setting media type</b>
<b>Explanation</b>	The media type must be defined when a server extension returns binary data.
<b>Action</b>	Use the method SxsSetProperty() with the property of SX_PROPERTY_RSP_MEDIATYPE to define the media type of the binary data.
<b>INOXIE8379</b>	<b>Internal error occurred during query processing: unknown request</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXII8302</b>	<b>Overflow during sorting</b>
<b>Explanation</b>	internal error
<b>Action</b>	Please contact your software supplier.
<b>INOXII8311</b>	<b>Version fromVersion is compatible with Version toVersion</b>
<b>Explanation</b>	The current version of the database is compatible with the selected version.
<b>Action</b>	None
<b>INOXII8317</b>	<b>Internal error during sorting</b>
<b>Explanation</b>	internal error
<b>Action</b>	Please contact your software supplier.
<b>INOXII8318</b>	<b>Locking conflict</b>
<b>Explanation</b>	internal error
<b>Action</b>	Please contact your software supplier.
<b>INOXII8323</b>	<b>Recreation of all indices started in collection COLLECTION, doctype DOCTYPE</b>
<b>Explanation</b>	The administrative command ino:RecreateIndex was issued.
<b>Action</b>	Be aware that the collection is not accessible until index recreation is completed.

**INOXII8324      Recreation of all indices in collection COLLECTION, doctype DOCTYPE terminated with code CODE**

**Explanation**      The administrative command ino:RecreateIndex terminated.

**Action**      Be aware that if the given return code is not 0, the index recreation has been rolled back.

**INOXII8325      Recreation of all text indices started in collection COLLECTION, doctype DOCTYPE**

**Explanation**      The administrative command ino:RecreateTextIndex was issued.

**Action**      Be aware that access to the collection is constricted until the operation is completed.

**INOXII8326      Recreation of all text indices in collection COLLECTION, doctype DOCTYPE terminated successfully**

**Explanation**      The administrative command ino:RecreateTextIndex completed.

**Action**      The collection is fully usable again.

**INOXII8327      Recreation of all text indices in collection COLLECTION, doctype DOCTYPE terminated with error CODE**

**Explanation**      The administrative command ino:RecreateTextIndex aborted due to the stated error code.

**Action**      Repair the indices via the administrative command ino:RepairIndex().

**INOXII8328      Repair indices started in collection COLLECTION, doctype DOCTYPE, mode MODE**

**Explanation**      The administrative command ino:RepairIndex was issued.

**Action**      Be aware that access to the collection is constricted until the operation is completed.

**INOXII8329      Repair indices in collection COLLECTION, doctype DOCTYPE, mode MODE terminated successfully**

**Explanation**      The administrative command ino:RepairIndex completed successfully.

**Action**      Note that if the mode was "drop", the indices have been dropped from the schema.

**INOXII8330      Repair indices in collection COLLECTION, doctype DOCTYPE, mode MODE terminated with error CODE**

**Explanation**      The administrative command ino:RepairIndex aborted due to the given error.

**Action**      Correct the problem if possible and repeat the command.

---

<b>INOXIW8373</b>	<b>The id() function is not supported</b>
<b>Explanation</b>	XPath describes the result of the id() function as being the node-set containing the elements in the same document as the context node that have a unique ID equal to any of the tokens in the id() function's argument list (see XPath 4.1). As specified in XPath, 5.2.1, a unique ID is the value of the attribute that is declared in the DTD as type ID. Since Tamino currently offers no means to declare attributes as type ID, applying the id() function makes no sense, its result will always be the empty node set.
<b>Action</b>	If some attribute 'att1' has the semantics of an ID, retrieving the node for which this attribute is set to a certain value, e.g. 'val1', is achieved via <code>//*[@att1="val1"]</code> .
<b>INOXIW8399</b>	<b>The required function has not been completely executed</b>
<b>Explanation</b>	See details in the warning line accompanying this message. Possible reasons for this warning are: a sort operation was performed based on an index, and that index contains truncated values. The result is sorted according to the truncated values, and not according to the real values.
<b>Action</b>	No action required, this is a warning only.
<b>INOXME8501</b>	<b>Memory allocation failed</b>
<b>Explanation</b>	Allocation of virtual memory failed.
<b>Action</b>	Either extend the amount of memory resources available for Tamino on your system or reduce resource consumption of Tamino, e.g. by using a smaller buffer pool.
<b>INOXME8502</b>	<b>Internal error: DBMS environment not found</b>
<b>Explanation</b>	The DBMS environment could not be found for X-Node - this is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8503</b>	<b>Invalid or unknown encoding found in input document</b>
<b>Explanation</b>	The encoding of the input document could not be recognized.
<b>Action</b>	Check your input document.
<b>INOXME8504</b>	<b>XML maximum request duration exceeded</b>
<b>Explanation</b>	The request was cancelled because the maximum request duration was exceeded.
<b>Action</b>	Either improve the request performance by tuning the database, or increase the value of the "XML maximum request duration" server parameter.

<b>INOXME8505</b>	<b>ODBC error occurred</b>
<b>Explanation</b>	While issuing a command via ODBC to the SQL system an error occurred.
<b>Action</b>	The text of the external error is provided in the extended message.
<b>INOXME8506</b>	<b>Adabas error occurred</b>
<b>Explanation</b>	An error occurred when accessing an Adabas database via X-Node.
<b>Action</b>	Check the Adabas documentation for the reason for the reported error code.
<b>INOXME8507</b>	<b>Maximum parallel databases for session reached</b>
<b>Explanation</b>	The number of parallel databases allowed for one session has been reached.
<b>Action</b>	No action required.
<b>INOXME8508</b>	<b>X-Node licensing error, insufficient rights</b>
<b>Explanation</b>	An attempt was made to access an X-Node datasource or an Adabas version that has not been licensed.
<b>Action</b>	Check that all datasources defined in the schema are correct, or upgrade the X-Node license.
<b>INOXME8509</b>	<b>X-Node datasource mismatch</b>
<b>Explanation</b>	The datasource DBMS name given (implicitly or explicitly) in the schema does not match that of the DBMS vendor to which this datasource has attempted to connect.
<b>Action</b>	The DBMS name must be the same at execution time as it was at schema creation time.
<b>INOXME8510</b>	<b>Request has been cancelled</b>
<b>Explanation</b>	The request has been cancelled by the operator or accessor.
<b>Action</b>	No action required.
<b>INOXME8511</b>	<b>Internal maximum for parallel ODBC access reached</b>
<b>Explanation</b>	Within one transaction, Tamino keeps track of parallel ODBC access. An internal list reached its maximum.
<b>Action</b>	No action required.

---

<b>INOXME8512</b>	<b>Invalid request ID</b>
<b>Explanation</b>	The given ID is invalid either because the respective request is already terminated or because it is invalid as an accessor-provided unique identifier.
<b>Action</b>	No action required, if the request is already terminated. Otherwise the request ID cannot be used within <code>_admin=ino:Accessor("cancelRequest",...)</code> .
<b>INOXME8513</b>	<b>Cannot create unique text index</b>
<b>Explanation</b>	A unique index cannot be set because duplicate entries are stored in the translated word table.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8514</b>	<b>X-Node SQL column not found or authorization error</b>
<b>Explanation</b>	The specified column was not found in the SQL table or you are not authorized to access the column/table.
<b>Action</b>	Correct the schema.
<b>INOXME8515</b>	<b>X-Node SQL table not found or authorization error</b>
<b>Explanation</b>	The error may occur because: 1. the specified SQL table/schema was not found OR 2. you are not authorized to access the table.
<b>Action</b>	Correct the schema.
<b>INOXME8516</b>	<b>Internal error: cannot lock collection</b>
<b>Explanation</b>	Migration attempted to lock a collection for which it is not possible.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8517</b>	<b>Unlock of collection failed</b>
<b>Explanation</b>	It was not possible to unlock the specified collection.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8518</b>	<b>Unlock of collection failed because the lock is in an incorrect state</b>
<b>Explanation</b>	It was not possible to unlock the specified collection because the lock is in an incorrect state.
<b>Action</b>	Please contact your software supplier.

<b>INOXME8519</b>	<b>Cannot cancel a mass load/unload as a session user</b>
<b>Explanation</b>	Cancelling of a mass load/unload in a session is not possible.
<b>Action</b>	Issue the administration command in an anonymous session.
<b>INOXME8520</b>	<b>Error writing to temporary file during data load</b>
<b>Explanation</b>	An error occurred while writing to a temporary file during a data load request.
<b>Action</b>	Check that temporary directory (\$SAGTMP or \$TMP) is writable and that disk space is available.
<b>INOXME8521</b>	<b>Invalid or unsupported datastore format detected during data load</b>
<b>Explanation</b>	An internal error occurred during data load.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8522</b>	<b>Unsupported datastore descriptor type detected during data load</b>
<b>Explanation</b>	An internal error occurred while data was being loaded.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8523</b>	<b>Unsupported datastore request detected during data load</b>
<b>Explanation</b>	An internal error occurred while data was being loaded.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8524</b>	<b>Value exceeding maximum length detected during data load</b>
<b>Explanation</b>	An internal error occurred while data was being loaded.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8525</b>	<b>Internal error detected in data load module</b>
<b>Explanation</b>	An internal error occurred while data was being loaded.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8527</b>	<b>Data loading/unloading for doctype not supported</b>
<b>Explanation</b>	For data loading: - doctypes of map-type NonXML or Lite are not supported. - doctypes created in Tamino version prior to v2.3 are not supported.  For data unloading: - doc-types of map-type NonXML are not supported
<b>Action</b>	Either migrate your doctype to v2.3 or later or use the XML loaders.

---

<b>INOXME8528</b>	<b>Data loading aborted; cannot create temporary files</b>
<b>Explanation</b>	The data loader was unable to create temporary files.
<b>Action</b>	Using the Tamino Manager or the batch utility "argbatch", check that the settings for the temporary location are correct and that there is space available.
<b>INOXME8529</b>	<b>Data loading into multiple doctypes not supported</b>
<b>Explanation</b>	Data loading is only possible into the collection/doctype given when the data loader is started.
<b>Action</b>	Remove documents from the input file that do not belong to the doctype specified at the start-up of the XML data loader.
<b>INOXME8531</b>	<b>Data load rejected document</b>
<b>Explanation</b>	An error was found while processing the document during a data load operation.
<b>Action</b>	Correct and restart the data loader.
<b>INOXME8536</b>	<b>XML data load recovery of doctype doctype in collection collection was unsuccessful</b>
<b>Explanation</b>	During autorestart, it was detected that a XML data load operation was active in the previous Tamino server session. This message provides information that Tamino could not restore the doctype to the state before the XML data load operation was initiated.
<b>Action</b>	Perform a restore/regenerate of the Tamino database to get it into a consistent state.
<b>INOXME8539</b>	<b>XML data loading failed</b>
<b>Explanation</b>	An XML data load operation was aborted or stopped.
<b>Action</b>	Depending on the reason for the failure, correct and re-process.
<b>INOXME8540</b>	<b>Data loading aborted with rejects</b>
<b>Explanation</b>	Data loading has aborted because a reject was found and the norejects option was chosen.
<b>Action</b>	Either correct the rejected document or load without setting the norejects option.
<b>INOXME8543</b>	<b>Internal error - unexpected response occurred in call to function function, function gave response code(s) codes</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier with the exact message (the function and codes are important).

<b>INOXME8544</b>	<b>Query using "mapping-type=object" cannot be evaluated</b>
<b>Explanation</b>	The query cannot be evaluated because "mapping-type=object" is involved and the post-processor is needed, or because the "mapping-type=object" node is used within a filter.
<b>Action</b>	Supply a correct query.
<b>INOXME8546</b>	<b>Feature not implemented</b>
<b>Explanation</b>	You attempted to use a feature which is not available in the current environment.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8547</b>	<b>Invalid syntax of _XQL command inside _HTMLREQ</b>
<b>Explanation</b>	An error occurred when converting an _HTMLREQ=_XQL request to an _XQL request.
<b>Action</b>	Check the appropriate documentation.
<b>INOXME8548</b>	<b>Invalid syntax of _PROCESS command inside _HTMLREQ</b>
<b>Explanation</b>	An error occurred when converting an _HTMLREQ=_PROCESS request to a _PROCESS request.
<b>Action</b>	Check the appropriate documentation.
<b>INOXME8549</b>	<b>Doctype not found</b>
<b>Explanation</b>	The doctype indicated in the ino:messageline could not be found during an _UNDEFINE request.
<b>Action</b>	Check the specified name.
<b>INOXME8551</b>	<b>Invalid doctype</b>
<b>Explanation</b>	Storing or deleting documents in the collection "ino:collection" is not permitted.
<b>Action</b>	Check the collection name specified in the request.
<b>INOXME8552</b>	<b>Not a valid request</b>
<b>Explanation</b>	The request has been rejected due to invalid or missing parameters.
<b>Action</b>	Check the request parameters using supplementary error diagnostics in other messages.

---

<b>INOXME8554</b>	<b>No message received</b>
<b>Explanation</b>	The request did not specify any supported operation or command.
<b>Action</b>	Check the parameters of the request.
<b>INOXME8555</b>	<b>Session error occurred</b>
<b>Explanation</b>	An error occurred when attempting to establish a session context.
<b>Action</b>	Check the supplementary diagnostic message for a detailed explanation.
<b>INOXME8557</b>	<b>Request rejected because a deprecated feature is used</b>
<b>Explanation</b>	The used feature will not be supported in the next version.
<b>Action</b>	Change the server parameter to allow and log deprecated features.
<b>INOXME8558</b>	<b>Error during commit in user transaction</b>
<b>Explanation</b>	A user transaction received an error during commit processing.
<b>Action</b>	The error has to be handled in your application.
<b>INOXME8559</b>	<b>Error during rollback of user transaction</b>
<b>Explanation</b>	A user transaction has been rolled back due to an error. However, the indicated error occurred.
<b>Action</b>	Please contact your system administrator.
<b>INOXME8560</b>	<b>Failed to allocate SMP key</b>
<b>Explanation</b>	An internal error occurred when attempting to allocate a key for thread local storage.
<b>Action</b>	Please contact your system administrator.
<b>INOXME8561</b>	<b>Failed to deallocate SMP key</b>
<b>Explanation</b>	An internal error occurred when attempting to release a key for thread local storage.
<b>Action</b>	Please contact your system administrator.
<b>INOXME8562</b>	<b>Invalid handle</b>
<b>Explanation</b>	Internal error: an invalid handle was passed to an internal interface.
<b>Action</b>	Please contact your system administrator.

<b>INOXME8563</b>	<b>Invalid parameter</b>
<b>Explanation</b>	Internal error: an invalid parameter was passed to an internal interface.
<b>Action</b>	Please contact your system administrator.
<b>INOXME8564</b>	<b>Illegal load factor</b>
<b>Explanation</b>	An internal error occurred when creating a hash map.
<b>Action</b>	Please contact your system administrator.
<b>INOXME8565</b>	<b>Illegal initial capacity</b>
<b>Explanation</b>	An internal error occurred when creating a hash map.
<b>Action</b>	Please contact your system administrator.
<b>INOXME8566</b>	<b>Duplicate key</b>
<b>Explanation</b>	An attempt was made to store the same key twice in a hash map.
<b>Action</b>	Please contact your system administrator.
<b>INOXME8570</b>	<b>Locking failed during data load operation</b>
<b>Explanation</b>	The specified collection or doctype could not be locked.
<b>Action</b>	Check the parameters of the data load request.
<b>INOXME8596</b>	<b>Internal error in locking</b>
<b>Explanation</b>	An unexpected server status caused a lock operation failure.
<b>Action</b>	Please contact your software supplier.
<b>INOXME8598</b>	<b>Access violation</b>
<b>Explanation</b>	The request was rejected due to insufficient access permissions.
<b>Action</b>	Check if the request was as intended and if so, try to get the required access privileges from the system administrator.
<b>INOXME8599</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXMF8530</b>	<b>Internal error occurred during data loading</b>
<b>Explanation</b>	An internal error was detected while data was being loaded.
<b>Action</b>	Please contact your software supplier.
<b>INOXMI8532</b>	<b>XML data load recovery initiated</b>
<b>Explanation</b>	During autorestart, it was detected that a XML data load operation was active in the previous Tamino server session. This message defines the start of recovery handling for cleaning up anything that was left over after the data load operation.
<b>Action</b>	No action required.
<b>INOXMI8533</b>	<b>XML data load recovery completed</b>
<b>Explanation</b>	During autorestart, it was detected that a XML data load operation was active in the previous Tamino server session. This message defines the completion of recovery handling for cleaning up anything that was left over after the data load operation.
<b>Action</b>	No action required.
<b>INOXMI8534</b>	<b>XML data load recovery initiated for doctype doctype in collection collection</b>
<b>Explanation</b>	During autorestart, it was detected that a XML data load operation was active in the previous Tamino server session. This message provides information about which doctypes are being recovered.
<b>Action</b>	No action required.
<b>INOXMI8535</b>	<b>XML data load recovery of doctype doctype in collection collection completed successfully</b>
<b>Explanation</b>	During autorestart, it was detected that a XML data load operation was active in the previous Tamino server session. This message provides information that Tamino has successfully restored the doctype to the state before the XML data load operation was initiated.
<b>Action</b>	No action required.
<b>INOXMI8537</b>	<b>XML data loading initiated for doctype doctype of collection collection</b>
<b>Explanation</b>	This is an information message to indicate the start of XML data load operation.
<b>Action</b>	No action required.

<b>INOXMI8538</b>	<b>XML data loading completed, number of documents processed docsproc, loaded docsload, rejected docsrejected</b>
<b>Explanation</b>	This is an information message to indicate the end of an XML data load operation.
<b>Action</b>	Depending on if there were documents rejected, these may need to be investigated and re-processed.
<b>INOXMV8550</b>	<b>Deprecated feature used: feature</b>
<b>Explanation</b>	The request uses a feature which is planned to be removed in the next product version.
<b>Action</b>	Do not use the deprecated feature.
<b>INOXMW8526</b>	<b>Failed to write XML request log to path</b>
<b>Explanation</b>	An error occurred when attempting to write the XML request log to given location.
<b>Action</b>	Check the location for possible reasons such as: a non-existing XML request log folder may have been specified, the directory cannot be accessed, or the disk is full.
<b>INOXMW8545</b>	<b>ino:docname uniqueness is not removed in downgrade</b>
<b>Explanation</b>	The downgrade does not allow the uniqueness of ino:docnames to be removed.
<b>Action</b>	No action required.
<b>INOXMW8571</b>	<b>Request logging was switched off dynamically due to IO errors</b>
<b>Explanation</b>	Probably the disk is full.
<b>Action</b>	Check the disk. Except for request logging, the Tamino server continues operation.
<b>INOXPE8700</b>	<b>Internal error: inconsistent document retrieval</b>
<b>Explanation</b>	The database storage of the retrieved document is inconsistent.
<b>Action</b>	Please contact your software supplier.
<b>INOXPE8701</b>	<b>Memory allocation failed</b>
<b>Explanation</b>	There was not enough main memory available to perform the request.
<b>Action</b>	Possibly the machine is overloaded. Try again later.

---

<b>INOXPE8702</b>	<b>Invalid document prolog</b>
<b>Explanation</b>	Invalid document prolog found in the file to be loaded.
<b>Action</b>	Please correct the document prolog.
<b>INOXPE8703</b>	<b>Invalid document declaration or more than one declaration found in the file to be loaded</b>
<b>Explanation</b>	Invalid document declaration or more than one declaration found in the file to be loaded.
<b>Action</b>	Correct the document declaration or remove all declarations except for the first.
<b>INOXPE8704</b>	<b>Unknown encoding found</b>
<b>Explanation</b>	Unknown encoding found.
<b>Action</b>	Please correct the document instance.
<b>INOXPE8705</b>	<b>Incompatible encoding found</b>
<b>Explanation</b>	The given encoding isn't supported yet.
<b>Action</b>	Please use another encoding.
<b>INOXPE8706</b>	<b>Entity found twice</b>
<b>Explanation</b>	An entity with same name was found twice.
<b>Action</b>	Please remove one of these entities.
<b>INOXPE8707</b>	<b>Wrong entity definition</b>
<b>Explanation</b>	The definition of an entity isn't correct.
<b>Action</b>	Please correct the entity definition.
<b>INOXPE8708</b>	<b>Document without content</b>
<b>Explanation</b>	An empty document cannot be loaded.
<b>Action</b>	Please provide the document with contents.
<b>INOXPE8709</b>	<b>Encoding not supported</b>
<b>Explanation</b>	The given encoding isn't supported yet.
<b>Action</b>	Please use another encoding.

<b>INOXPE8710</b>	<b>Invalid token found or document incomplete</b>
<b>Explanation</b>	Invalid token found or the document is incomplete.
<b>Action</b>	Please correct the document.
<b>INOXPE8711</b>	<b>Document not well-formed</b>
<b>Explanation</b>	The document to be loaded isn't well-formed.
<b>Action</b>	Please correct the document.
<b>INOXPE8712</b>	<b>Invalid element name</b>
<b>Explanation</b>	The name of the element is either too long or not correct.
<b>Action</b>	Please correct the document.
<b>INOXPE8713</b>	<b>Invalid attribute name</b>
<b>Explanation</b>	The name of the attribute is either too long or not correct.
<b>Action</b>	Please correct the document.
<b>INOXPE8714</b>	<b>Invalid document ID (ino:id) specified</b>
<b>Explanation</b>	The given document ID (ino:id) is either not numeric or not available.
<b>Action</b>	Please correct the document.
<b>INOXPE8715</b>	<b>Inserting or changing a document is forbidden</b>
<b>Explanation</b>	It isn't permitted when using this doctype to insert or to change documents.
<b>Action</b>	Please contact your system administrator.
<b>INOXPE8716</b>	<b>Inserting a document is forbidden</b>
<b>Explanation</b>	It isn't permitted when using this doctype to insert a new document.
<b>Action</b>	Please contact your system administrator.
<b>INOXPE8717</b>	<b>Changing a document is forbidden</b>
<b>Explanation</b>	It isn't permitted while using this doctype to change a document.
<b>Action</b>	Please contact your system administrator.

---

<b>INOXPE8718</b>	<b>Document incomplete</b>
<b>Explanation</b>	The document to be loaded is incomplete.
<b>Action</b>	Please correct the document.
<b>INOXPE8719</b>	<b>Document contains invalid character reference</b>
<b>Explanation</b>	The document contains an invalid character reference.
<b>Action</b>	Please correct the document.
<b>INOXPE8720</b>	<b>Document contains invalid entity reference</b>
<b>Explanation</b>	The document contains a reference to an entity which wasn't defined before.
<b>Action</b>	Please correct the document.
<b>INOXPE8721</b>	<b>Root element does not match doctype declaration</b>
<b>Explanation</b>	The given root element doesn't correspond to the root element of the used doctype.
<b>Action</b>	Please correct the document.
<b>INOXPE8722</b>	<b>Element with wrong obj-type encountered</b>
<b>Explanation</b>	The given element is defined in the schema as an attribute.
<b>Action</b>	Correct either the document or the accompanying schema.
<b>INOXPE8723</b>	<b>Attribute with wrong obj-type encountered</b>
<b>Explanation</b>	The given attribute is defined in the schema as an element.
<b>Action</b>	Correct either the document or the accompanying schema.
<b>INOXPE8724</b>	<b>Invalid attribute value encountered</b>
<b>Explanation</b>	The value of the attribute contains contents which aren't permitted.
<b>Action</b>	Please correct the document.
<b>INOXPE8725</b>	<b>Attribute was found twice</b>
<b>Explanation</b>	An attribute with same name was found twice.
<b>Action</b>	Please remove one of these attributes.

<b>INOXPE8726</b>	<b>Occurrence count does not match multiplicity option</b>
<b>Explanation</b>	The occurrence count of an element or attribute in an XML instance does not match the multiplicity option specified in the schema.
<b>Action</b>	Please correct the document.
<b>INOXPE8727</b>	<b>Document structure does not match schema definition (choice)</b>
<b>Explanation</b>	The document structure does not match the schema definition for the choice case.
<b>Action</b>	Please correct the document.
<b>INOXPE8728</b>	<b>Internal error: parent object not found</b>
<b>Explanation</b>	Accompanying parent object couldn't be found.
<b>Action</b>	Please contact your system administrator.
<b>INOXPE8729</b>	<b>Unclosed CDATA section detected</b>
<b>Explanation</b>	Unclosed CDATA section detected.
<b>Action</b>	Please correct the document.
<b>INOXPE8730</b>	<b>Required child object not specified</b>
<b>Explanation</b>	An element or an attribute which is defined in the schema as mandatory wasn't specified in the document.
<b>Action</b>	Please correct the document.
<b>INOXPE8731</b>	<b>Internal error: Parse in progress</b>
<b>Explanation</b>	The attempt was made to parse a second document while still parsing the first document.
<b>Action</b>	Please contact your system administrator.
<b>INOXPE8732</b>	<b>Value too long</b>
<b>Explanation</b>	The value of a numeric node or of a node mapped to an external datasource or of a node with search type STANDARD is too long.
<b>Action</b>	Please shorten the corresponding value.

---

<b>INOXPE8733</b>	<b>Value not numeric</b>
<b>Explanation</b>	The value for an object with an numeric datatype is not numeric.
<b>Action</b>	Please correct the document.
<b>INOXPE8734</b>	<b>Numeric value too large</b>
<b>Explanation</b>	The value of an object with a numeric datatype is too large.
<b>Action</b>	Please shorten the corresponding value.
<b>INOXPE8735</b>	<b>Insufficient space to convert data according to encoding</b>
<b>Explanation</b>	The length of data in an attribute/element that is defined to AdaField exceeds the defined length in the schema.
<b>Action</b>	Correct either the XML input data or modify the schema to increase the defined length.
<b>INOXPE8736</b>	<b>Internal error: buffer exceeded</b>
<b>Explanation</b>	For InfoFile mapping, the size of a document or the size of parts of a document that are mapped to any InfoField construct (like InfoArray) is limited to 64KB at the node level where map type InfoFile is specified. If there is no node with an explicit map type of InfoFile, the limit of 64KB applies to the root node.
<b>Action</b>	Reduce the number of nodes that are mapped to InfoField constructs. Use map type Native instead.
<b>INOXPE8737</b>	<b>Invalid document update attempted</b>
<b>Explanation</b>	The request tried to modify the document such that it would have generated an SQL UPDATE statement without a WHERE clause. This is not allowed.
<b>Action</b>	To accomplish this, delete the document and insert a new document instead of updating the document.
<b>INOXPE8738</b>	<b>Only a single document may be processed.</b>
<b>Explanation</b>	If the document name or the document ID is given, only a single document can be processed.
<b>Action</b>	Please remove additional documents.

<b>INOXPE8740</b>	<b>Internal error in document serialization module detected</b>
<b>Explanation</b>	An internal error occurred in the serialization module.
<b>Action</b>	Please contact your software supplier.
<b>INOXPE8741</b>	<b>Internal error in document serialization module detected</b>
<b>Explanation</b>	An internal error occurred in serialization module.
<b>Action</b>	Please contact your software supplier.
<b>INOXPE8742</b>	<b>Recursion of entities detected</b>
<b>Explanation</b>	During the processing of references to entities a recursion was discovered.
<b>Action</b>	Please check the entity definition and correct the document.
<b>INOXPE8743</b>	<b>Entity stack overflow</b>
<b>Explanation</b>	Entity stack overflow.
<b>Action</b>	Please reduce the nested entity references.
<b>INOXPE8744</b>	<b>Internal error in index processing module detected</b>
<b>Explanation</b>	An internal error occurred in the index processing module.
<b>Action</b>	Please contact your software supplier.
<b>INOXPE8745</b>	<b>Internal error in index processing module detected</b>
<b>Explanation</b>	An internal error occurred in the index processing module.
<b>Action</b>	Please contact your software supplier.
<b>INOXPE8746</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error occurred during document processing.
<b>Action</b>	Please contact your software supplier.
<b>INOXPE8747</b>	<b>Internal error in index processing module detected</b>
<b>Explanation</b>	An internal error occurred in the index processing module.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXPE8748</b>	<b>Internal error in document processing module detected</b>
<b>Explanation</b>	Processing aborted due to a server internal error.
<b>Action</b>	Please contact your software supplier.
<b>INOXPE8749</b>	<b>Access to XNODEs / trigger functions during massload is not allowed</b>
<b>Explanation</b>	The access to parts of the schema that specify X-Node or trigger function usage is not allowed when loading data with the Tamino Data Loader.
<b>Action</b>	Set "ignore update" for the X-Node or trigger function parts of the schema or use the concurrentWrite option of the Tamino Data Loader.
<b>INOXPE8750</b>	<b>Tag or attribute name is too long</b>
<b>Explanation</b>	The number of characters of a tag or attribute name exceeds the maximum supported value.
<b>Action</b>	Shorten the name of the tag or attribute in question.
<b>INOXPE8751</b>	<b>Storing an object of this mapping type is not permitted</b>
<b>Explanation</b>	Storing an object which is linked to another object is not permitted.
<b>Action</b>	Please correct the document.
<b>INOXPE8752</b>	<b>Document not found in database</b>
<b>Explanation</b>	A document referenced by the current command was not found in the database, because it was deleted by another concurrent access.
<b>Action</b>	Re-issue the command.
<b>INOXPE8753</b>	<b>The element has contents although it is defined with object type "EMPTY"</b>
<b>Explanation</b>	The element has contents although it is defined with object type "EMPTY".
<b>Action</b>	Please correct either the document instance or the schema definition.
<b>INOXPE8754</b>	<b>Comments are not allowed between documents</b>
<b>Explanation</b>	The input file contains a comment between two documents. This is not allowed.
<b>Action</b>	Remove the comment.

<b>INOXPE8755</b>	<b>Invalid document name (ino:docname) specified</b>
<b>Explanation</b>	The document name given in the attribute ino:docname is empty.
<b>Action</b>	Either provide a document name in the attribute ino:docname or remove the ino:docname attribute.
<b>INOXPE8756</b>	<b>Invalid versioning mode</b>
<b>Explanation</b>	The document could not be stored, because the auto-version mode is invalid or the document is not in the correct versioning state.
<b>Action</b>	Make sure that the document is in the checkout-checkin auto-version mode and that the document is not checked out.
<b>INOXQE6250</b>	<b>Feature not implemented</b>
<b>Explanation</b>	The feature you tried to use is not implemented yet.
<b>Action</b>	Try an other method.
<b>INOXQE6251</b>	<b>internal exception</b>
<b>Explanation</b>	An internal exception has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXQE6252</b>	<b>Type exception: non-atomic type in element/attribute</b>
<b>Explanation</b>	This error occurs if a non-atomizable type is encountered where a simple type is required, e.g. an element node belonging to a type that allows sub-elements is provided as a parameter for a function that expects a string.
<b>Action</b>	Check the operand's types or adopt the schema definition.
<b>INOXQE6253</b>	<b>Type exception: sequence occurred where atomic value required</b>
<b>Explanation</b>	Some functions and operators do not operate on sequences that contain that more than one entry.
<b>Action</b>	Check the operand types.
<b>INOXQE6254</b>	<b>Type can not be compared / sorted</b>
<b>Explanation</b>	Only totally ordered types such as numeric types, string types, boolean, dateTime, date and time can be compared and sorted.
<b>Action</b>	Try to use a totally ordered type or convert into such a type.

---

<b>INOXQE6255</b>	<b>Invalid argument to aggregation function</b>
<b>Explanation</b>	The atomic values in a sequence upon which the avg() or sum() function is applied must have a common super-type that is either numeric or a date/time type.
<b>Action</b>	Check the values in the sequence.
<b>INOXQE6256</b>	<b>Conversion detected an invalid value</b>
<b>Explanation</b>	An invalid value could not be converted.
<b>Action</b>	Check the query and the data.
<b>INOXQE6257</b>	<b>Invalid type denotation for atomic type</b>
<b>Explanation</b>	A string provided as an atomic type denotation, for example with a user-defined function, does not denote a type.
<b>Action</b>	Use proper type denotations, for example xs:integer or xdt:anyAtomicType.
<b>INOXQE6261</b>	<b>Duplicate function definition</b>
<b>Explanation</b>	A query or a module definition contains two definitions of the same function, or an imported module defines a function that is already defined.
<b>Action</b>	Remove the extra function definition.
<b>INOXQE6262</b>	<b>Module not found</b>
<b>Explanation</b>	An XQuery module import directive could not be satisfied, because there is no such module.
<b>Action</b>	Correct the import directive, or load an appropriate module definition.
<b>INOXQE6263</b>	<b>Invalid server extension type detected</b>
<b>Explanation</b>	A server extension function is called that returns or consumes a type that is not supported by the XQuery processor.
<b>Action</b>	Check the signature of the called server extension function.
<b>INOXQE6264</b>	<b>Cyclic module import</b>
<b>Explanation</b>	A module M may not import another module that directly or indirectly imports module M.
<b>Action</b>	Remove the cycle from the module import dependencies.

<b>INOXQE6300</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred in the XQuery execution engine.
<b>Action</b>	Please contact your software supplier.
<b>INOXQE6301</b>	<b>Runtime type exception</b>
<b>Explanation</b>	An invalid type was detected at XQuery execution time.
<b>Action</b>	Correct the query.
<b>INOXQE6302</b>	<b>XQuery feature not implemented</b>
<b>Explanation</b>	The query uses an unimplemented language feature. Please see the documentation and release notes for current product limitations.
<b>Action</b>	Change the query.
<b>INOXQE6303</b>	<b>Invalid position for range</b>
<b>Explanation</b>	The first position parameter for 'range' is negative or zero.
<b>Action</b>	Check the query and data to find the wrong position value.
<b>INOXQE6304</b>	<b>Internal error: buffer overflow</b>
<b>Explanation</b>	An intermediate result is too large.
<b>Action</b>	Please contact your software supplier.
<b>INOXQE6305</b>	<b>Division by zero</b>
<b>Explanation</b>	A division by zero was attempted (not defined mathematically).
<b>Action</b>	Make sure that a divide by zero does not occur.
<b>INOXQE6306</b>	<b>numeric overflow has occurred</b>
<b>Explanation</b>	An arithmetic operation yielded a result which is not representable with the data type.
<b>Action</b>	Make sure that results do not exceed the representable range.
<b>INOXQE6307</b>	<b>duplicate attribute name occurred in element constructor</b>
<b>Explanation</b>	An element constructor contained multiple attributes of the same name.
<b>Action</b>	Make sure that attribute names of constructed elements are unique.

---

<b>INOXQE6308</b>	<b>sort utility failed</b>
<b>Explanation</b>	An explicit or implicit invocation of the sorting utility failed. This may occur due to insufficient disk space for temporary files.
<b>Action</b>	Check whether sufficient disk space is available for temporary files.
<b>INOXQE6309</b>	<b>namespace prefix conflict between constructed element and attribute</b>
<b>Explanation</b>	A constructed element contained a conflicting namespace declaration while an attribute was added to it.
<b>Action</b>	Use a different namespace prefix in the attribute's target environment.
<b>INOXQE6310</b>	<b>Processing of data with X-Tension or X-Node mapping is not supported by XQuery</b>
<b>Explanation</b>	Currently no data with X-Tension (server extension) or X-Node mapping can be accessed by an XQuery query.
<b>Action</b>	Formulate your query using Tamino X-Query instead of XQuery.
<b>INOXQE6311</b>	<b>temporary file access failed</b>
<b>Explanation</b>	A problem has occurred while accessing a temporary disk file. This may occur due to insufficient disk space for temporary files.
<b>Action</b>	Check whether sufficient disk space is available for temporary files.
<b>INOXQE6312</b>	<b>Document access error</b>
<b>Explanation</b>	A document did not exist though it was part of a query result. This situation can occur when a query is executed with isolation level "uncommitted document", while another transaction has been rolled back after concurrently inserting the document.
<b>Action</b>	Retry the query or use an isolation level different from "uncommitted document".
<b>INOXQE6313</b>	<b>Runtime type exception: non-atomic type in element/attribute</b>
<b>Explanation</b>	This error occurs if a non-atomizable type is encountered where a simple type is required, e.g. an element node belonging to a type that allows sub-elements is provided as a parameter for a function that expects a string.
<b>Action</b>	Check the operand's types or adopt the schema definition.

<b>INOXQE6314</b>	<b>Value cannot be converted</b>
<b>Explanation</b>	The textual representation of the value does not match the type it is being converted to.
<b>Action</b>	Check the query and the data.
<b>INOXQE6315</b>	<b>Runtime type exception: sequence occurred where atomic value required</b>
<b>Explanation</b>	Some functions and operators do not operate on sequences that contain more than one entry.
<b>Action</b>	Check the operand's types.
<b>INOXQE6316</b>	<b>Run-time encountered non-comparable type</b>
<b>Explanation</b>	Only totally ordered types such as numeric types, string types, boolean, dateTime, date and time can be compared and sorted.
<b>Action</b>	Try to use a totally ordered type or convert into such a type.
<b>INOXQE6317</b>	<b>Run-time encountered invalid argument to aggregation function</b>
<b>Explanation</b>	The atomic values in a sequence upon which the avg() or sum() function is applied must have a common super-type that is either numeric or a date/time type.
<b>Action</b>	Check the values in the sequence.
<b>INOXQE6318</b>	<b>Runtime type exception: empty sequence occurred where atomic value required</b>
<b>Explanation</b>	Some functions and operators do not operate on an empty sequence.
<b>Action</b>	Check the operand's types.
<b>INOXQE6319</b>	<b>Invalid simple type detected</b>
<b>Explanation</b>	In an expression, an invalid simple type was used.
<b>Action</b>	Check the actual type and the expected type with your query.
<b>INOXQE6320</b>	<b>Invalid combination of operand types for an arithmetic operation</b>
<b>Explanation</b>	The type of at least one operand is not valid for an arithmetic operation.
<b>Action</b>	Check where the types can occur in your query and correct it.

---

<b>INOXQE6321</b>	<b>Runtime type exception: invalid node-type</b>
<b>Explanation</b>	Some operations only operate on nodes of certain types.
<b>Action</b>	Check the node's type. Correct the path used to obtain the node.
<b>INOXQE6322</b>	<b>Non-simple type detected</b>
<b>Explanation</b>	A non-simple type was detected where a simple type is required.
<b>Action</b>	Check your query and the data to find a type mismatch.
<b>INOXQE6323</b>	<b>Conversion: facet 'minLength' was violated by a value</b>
<b>Explanation</b>	The value to be converted was too short.
<b>Action</b>	Check the query and the data.
<b>INOXQE6324</b>	<b>Incompatible types for cast operation</b>
<b>Explanation</b>	The source type cannot be cast to the target type.
<b>Action</b>	Check the type of the argument to the cast.
<b>INOXQE6325</b>	<b>Conversion error for comparison</b>
<b>Explanation</b>	During the execution of a comparison, the values must be converted to a common type. This conversion failed, either because of incomparable types or because of invalid data.
<b>Action</b>	Check your query and data to find the mismatch.
<b>INOXQE6326</b>	<b>Comparison undefined</b>
<b>Explanation</b>	Some data types cannot be compared because they are partially ordered.
<b>Action</b>	Check your query and data for undefined comparisons.
<b>INOXQE6327</b>	<b>Invalid last position for range</b>
<b>Explanation</b>	The last position parameter for 'range' is smaller than the first and is not -1.
<b>Action</b>	Check the query and data to find the wrong position value.
<b>INOXQE6328</b>	<b>Value out of range</b>
<b>Explanation</b>	A value could not be converted into the internal representation because it is out of range, for example the allowed range for a month is 1 to 12.
<b>Action</b>	Check your query and/or data.

<b>INOXQE6329</b>	<b>Invalid collation URI exception</b>
<b>Explanation</b>	The specified collation URI is invalid.
<b>Action</b>	Check the collation URI.
<b>INOXQE6330</b>	<b>Invalid collation attributes exception</b>
<b>Explanation</b>	The specified collation attributes are invalid.
<b>Action</b>	Check the collation attributes.
<b>INOXQE6331</b>	<b>Namespace prefix undefined</b>
<b>Explanation</b>	An invalid namespace prefix was detected when casting a string value as a QName at query execution time.
<b>Action</b>	Extend the static namespace context by adding a definition for the missing prefix.
<b>INOXQE6332</b>	<b>Invalid content expression in computed processing instruction</b>
<b>Explanation</b>	The value of the content expression in a computed processing instruction constructor contains the string "?>".
<b>Action</b>	Avoid expressions that may produce strings containing "?>".
<b>INOXQE6333</b>	<b>Invalid name for processing instruction</b>
<b>Explanation</b>	The name of a constructed processing instruction must be different from "XML" (in any combination of upper and lower case).
<b>Action</b>	Avoid expressions that may produce the string "XML".
<b>INOXQE6334</b>	<b>"Treat as" operation has detected two non-matching types during query execution</b>
<b>Explanation</b>	A "Treat as" operation has detected two non-matching types during query execution.
<b>Action</b>	Reformulate your query.
<b>INOXQE6335</b>	<b>Call stack overflow</b>
<b>Explanation</b>	The call stack for user defined functions has exceeded its defined maximum size.
<b>Action</b>	Inspect your XQuery program for potential programming errors, or increase the call stack's maximum size by means of the {?execution?} pragma.

---

<b>INOXQE6336</b>	<b>Memory allocation limit exceeded</b>
<b>Explanation</b>	The memory limit that has been set by an XQuery execution pragma has been exceeded.
<b>Action</b>	Extend the memory limit, or try to reduce the memory requirements by modifying the query.
<b>INOXQE6337</b>	<b>Invalid content expression in computed comment constructor</b>
<b>Explanation</b>	The result of the content expression of a computed comment constructor contains two adjacent hyphens or ends with a hyphen.
<b>Action</b>	Avoid expressions that produce adjacent hyphens or hyphens at the end.
<b>INOXQE6338</b>	<b>Sort buffer overflow</b>
<b>Explanation</b>	An internal sort buffer has overflowed, because the representation of a single tuple did not fit into it.
<b>Action</b>	Modify the query to reduce the size of tuples to be sorted.
<b>INOXQE6339</b>	<b>Multiple element children in document constructor</b>
<b>Explanation</b>	An XQuery document constructor was supplied with more than one element child. This is not supported by the underlying data model.
<b>Action</b>	Correct the query to avoid constructing multiple element children into a document node.
<b>INOXQE6340</b>	<b>XML parsing error while executing fn:parse()</b>
<b>Explanation</b>	An XQuery invoked fn:parse, but the argument could not be parsed successfully as XML.
<b>Action</b>	Provide well-formed XML.
<b>INOXQE6349</b>	<b>fetching result that is not available</b>
<b>Explanation</b>	A non-sensitive cursor pre-calculates a system defined maximum number of result items. A fetch request has tried to access an item that was not pre-calculated.
<b>Action</b>	Please contact your software supplier.
<b>INOXQE6350</b>	<b>Internal error</b>
<b>Explanation</b>	An internal error has occurred in the XQuery compiler.
<b>Action</b>	Please contact your software supplier.

<b>INOXQE6351</b>	<b>XQuery feature not implemented</b>
<b>Explanation</b>	The query uses an unimplemented language feature. Please see the documentation and release notes for current product limitations.
<b>Action</b>	Change the query.
<b>INOXQE6352</b>	<b>XQuery parsing error</b>
<b>Explanation</b>	One or more errors occurred while parsing the query.
<b>Action</b>	Correct the query appropriately and re-issue.
<b>INOXQE6353</b>	<b>End tag does not match start tag</b>
<b>Explanation</b>	The end tag of an element constructor does not match the start tag.
<b>Action</b>	Correct the query.
<b>INOXQE6354</b>	<b>Namespace prefix undefined</b>
<b>Explanation</b>	The namespace declaration is missing.
<b>Action</b>	Include a namespace declaration in the XQuery prolog.
<b>INOXQE6355</b>	<b>Invalid namespace URI specification</b>
<b>Explanation</b>	URIs must be given as string constants.
<b>Action</b>	Declare the URI literally.
<b>INOXQE6356</b>	<b>Attempted to redefine prefix</b>
<b>Explanation</b>	A prefix may only be defined once.
<b>Action</b>	Rename the prefix in subsequent declarations.
<b>INOXQE6357</b>	<b>The prefix 'xml' must be bound to the namespace 'http://www.w3.org/XML/1998/namespace'</b>
<b>Explanation</b>	The prefix 'xml' can only be declared when bound to the XML namespace URL as defined by the W3C.
<b>Action</b>	If your intent was to include the W3C's XML namespace, correct the URL. Otherwise use a different prefix.

---

<b>INOXQE6358</b>	<b>Function unknown</b>
<b>Explanation</b>	This function is unknown. The function name is either misspelt or the wrong prefix is used.
<b>Action</b>	Check the spelling and the function namespace.
<b>INOXQE6359</b>	<b>Variable undefined</b>
<b>Explanation</b>	A variable that is used must be declared in a 'for' or 'let' expression.
<b>Action</b>	Check spelling or add a 'for' or 'let' clause.
<b>INOXQE6360</b>	<b>Unbound path not allowed here</b>
<b>Explanation</b>	Currently access to database data is only allowed via the input() function.
<b>Action</b>	Use the input() function.
<b>INOXQE6361</b>	<b>Type exception: invalid operands for operator</b>
<b>Explanation</b>	Static typing detected invalid operand types for the operator.
<b>Action</b>	Please check the static types for the operator.
<b>INOXQE6362</b>	<b>Invalid path: documents have no parent</b>
<b>Explanation</b>	The path tries to apply the parent axis (or '..') to a document node.
<b>Action</b>	Check the path.
<b>INOXQE6363</b>	<b>Unknown collection</b>
<b>Explanation</b>	The URL refers to a collection that does not exist in the chosen database.
<b>Action</b>	Check the URL.
<b>INOXQE6364</b>	<b>XQuery applied on non-XML doctype</b>
<b>Explanation</b>	XQuery is only applicable to XML data.
<b>Action</b>	Use another tool for querying.
<b>INOXQE6365</b>	<b>XQuery applied on non-namespace-clean doctype:</b>
<b>Explanation</b>	XQuery is only applicable on namespace-clean doctypes.
<b>Action</b>	Apply proper namespace migration to doctype or use X-Query.

<b>INOXQE6366</b>	<b>Type exception: invalid input for function</b>
<b>Explanation</b>	The parameters provided as an input to the function do not have the required type.
<b>Action</b>	Check the correct parameter types in the documentation for the function.
<b>INOXQE6367</b>	<b>Compile time type exception</b>
<b>Explanation</b>	An invalid type has been detected at XQuery compile time
<b>Action</b>	Correct the query.
<b>INOXQE6368</b>	<b>Default element namespaces are not allowed</b>
<b>Explanation</b>	The XQuery draft is still uncertain whether default element namespaces defined in the query prolog or in generated elements pertain to element steps in location paths. To avoid migration problems with subsequent versions of Tamino, the use of default element namespaces is prohibited.
<b>Action</b>	Please use a namespace prefix instead.
<b>INOXQE6369</b>	<b>A prefix must not begin with 'xml'</b>
<b>Explanation</b>	This is stated in the Errata Document for the XML Namespaces Recommendation.
<b>Action</b>	Choose a prefix that does not begin with 'xml'.
<b>INOXQE6370</b>	<b>Processing of data with X-Tension or X-Node mapping is not supported by XQuery</b>
<b>Explanation</b>	Currently no data with X-Tension (server extension) or X-Node mapping can be accessed by an XQuery query.
<b>Action</b>	Formulate your query using Tamino X-Query instead of XQuery.
<b>INOXQE6371</b>	<b>The URI 'http://www.w3.org/XML/1998/namespace' can only be bound to the prefix 'xml'</b>
<b>Explanation</b>	According to "Namespaces in XML Errata, 4 November 2002" ( <a href="http://www.w3.org/XML/xml-names-19990114-errataNE05">http://www.w3.org/XML/xml-names-19990114-errataNE05</a> substantive), the prefix xml is by definition bound to the namespace name <a href="http://www.w3.org/XML/1998/namespace">http://www.w3.org/XML/1998/namespace</a> . It may, but need not, be declared, and must not be bound to any other namespace name. No other prefix may be bound to this namespace name.
<b>Action</b>	Use the prefix 'xml' or a different URI.

---

<b>INOXQE6372</b>	<b>No prefix may be bound to the URI 'http://www.w3.org/2000/xmlns/'</b>
<b>Explanation</b>	This URI is by definition bound to the prefix 'xmlns'. It must not be declared.
<b>Action</b>	Use a different URI.
<b>INOXQE6373</b>	<b>Invalid comparison</b>
<b>Explanation</b>	Items to be compared must be of the same type, or both numeric, or both string or one of the types derived thereof.
<b>Action</b>	Use string comparison via applying the xf:string() function to non-string operands.
<b>INOXQE6374</b>	<b>The prefix xmlns is used only to declare namespace bindings</b>
<b>Explanation</b>	The prefix xmlns cannot be used unless in the form xmlns:prefix="uri" to declare a namespace binding.
<b>Action</b>	Use another prefix.
<b>INOXQE6375</b>	<b>No multiple default collations allowed.</b>
<b>Explanation</b>	Only one default collation can be defined.
<b>Action</b>	To use more than one collation within a single query give the collation's URI explicitly in the comparison function or use the getCollation() function.
<b>INOXQE6376</b>	<b>Collation could not be obtained.</b>
<b>Explanation</b>	The getCollation() function was not applied upon a path that pointed to an appropriate node.
<b>Action</b>	The input to the getCollation() function must be a path that points to an appropriate element or attribute node. A node is appropriate if its corresponding schema definition contains a collation specification.
<b>INOXQE6377</b>	<b>Invalid Collation Identifier</b>
<b>Explanation</b>	This string does not denote a valid collation.
<b>Action</b>	Correct the spelling or make the collection known to the database.
<b>INOXQE6378</b>	<b>Invalid step in path</b>
<b>Explanation</b>	A flat structure, i.e. something that is not a node, cannot be stepped into using any other axis than the self axis.
<b>Action</b>	Either change the object that is stepped into so that it is of type node or node-set, or use only the self axis (or the dot) to refer to the object.

<b>INOXQE6379</b>	<b>Evaluation context undefined</b>
<b>Explanation</b>	Processing of an expression relies on some component of the evaluation context that has not been assigned a value. Many context-sensitive functions like local-name() rely on the context item.
<b>Action</b>	Make sure that expressions relying on the evaluation context are called when an evaluation context is defined as for example within a filter.
<b>INOXQE6382</b>	<b>XQuery cursor request must not specify a serialization method</b>
<b>Explanation</b>	It is not possible to use a serialization method for an XQuery cursor request.
<b>Action</b>	If you want to apply a serialization method to your query result, use a non-cursor query.
<b>INOXQE6383</b>	<b>Type exception: invalid input for internal function</b>
<b>Explanation</b>	The parameters provided as an input to an internal function do not have the required type. Calls to internal functions are, for instance, contained in update queries. This error may thus indicate an invalid update statement.
<b>Action</b>	Reformulate the update statement or check whether the intended update operation is possible at all.
<b>INOXQE6384</b>	<b>Invalid key or value in an optimization pragma.</b>
<b>Explanation</b>	Valid optimization keys are "join" (possible values "default" and "index-only") and "level" (possible values "0" and "1").
<b>Action</b>	Correct the optimization key and/or value.
<b>INOXQE6385</b>	<b>Invalid output handler function detected</b>
<b>Explanation</b>	An invalid output handler has been detected. Please check the signature of the given output handler function.
<b>Action</b>	Please check the signature of the given output handler function.
<b>INOXQE6386</b>	<b>This name must not be local</b>
<b>Explanation</b>	Some names, for example those of user-defined functions, must be in a namespace. They must either be qualified, i.e. consist of a prefix and a local part, or be in a namespace by a default namespace declaration.
<b>Action</b>	Use either a prefix declared in the query or add a default namespace declaration. For user-defined functions the predefined prefix 'local' can be used.

---

<b>INOXQE6387</b>	<b>The prefix 'local' may only be used when declaring a user-defined function.</b>
<b>Explanation</b>	The 'local' prefix is by definition bound to the URI "http://www.w3.org/2003/11/xquery-local-functions" and is reserved for the definition of user-defined, i.e. local, functions.
<b>Action</b>	Use another prefix.
<b>INOXQE6388</b>	<b>The name of a computed node is neither a string nor a QName.</b>
<b>Explanation</b>	The name of a computed node, such as for example element or attribute node, must either be of type string or derived or of type QName.
<b>Action</b>	Ensure that the expression provided as a computed node's name is of an appropriate type.
<b>INOXQE6389</b>	<b>A user-defined function returns a non-matching type</b>
<b>Explanation</b>	If a user-defined function declares a result type, the type of the function's body must match this declaration.
<b>Action</b>	Correct the function's body or delete the result type declaration.
<b>INOXQE6390</b>	<b>The prefix 'xs' must be bound to the namespace 'http://www.w3.org/2001/XMLSchema'</b>
<b>Explanation</b>	The prefix 'xs' can only be declared when bound to the appropriate namespace URL as defined by the W3C's XML Schema spec.
<b>Action</b>	If your intent was to include the W3C's xs namespace, correct the URL. Otherwise use a different prefix.
<b>INOXQE6391</b>	<b>The name of a computed PI node is not an NCName.</b>
<b>Explanation</b>	The name of a computed PI node must be an NCName.
<b>Action</b>	Ensure that the expression provided as a computed PI node's name is of an appropriate type.
<b>INOXQE6392</b>	<b>The content of a generated PI must be a string.</b>
<b>Explanation</b>	The expression provided as the content of a generated PI node must evaluate to a sequence of strings.
<b>Action</b>	Provide suitable content.

<b>INOXQE6393</b>	<b>Pragma not supported in library module</b>
<b>Explanation</b>	An XQuery library module contains a pragma that is valid only in a main module.
<b>Action</b>	Remove the pragma from the library module.
<b>INOXQE6394</b>	<b>Invalid node comparison</b>
<b>Explanation</b>	A node comparison requires that each operand is either a singleton or an empty sequence.
<b>Action</b>	Check the operands. If an operand is possibly a sequence with more than one entry, use round brackets and a [1] filter.
<b>INOXQE6395</b>	<b>Invalid key or value in an serialization pragma.</b>
<b>Explanation</b>	A valid serialization key is "provide-type-information" (possible values "yes" and "no").
<b>Action</b>	Correct the serialization value.
<b>INOXQE6396</b>	<b>Invalid key or value in an execution pragma.</b>
<b>Explanation</b>	Valid execution keys are "memory" (possible values are integers) and "call-stack-depth" (possible values are also integers).
<b>Action</b>	Correct the execution key/value.
<b>INOXQE6397</b>	<b>Duplicate parameter name in user-defined function</b>
<b>Explanation</b>	Each parameter in a user-defined function's parameter list must have a unique name.
<b>Action</b>	Rename one or more parameters.
<b>INOXQE6398</b>	<b>External variable definition does not conform to restricted XQuery syntax</b>
<b>Explanation</b>	An XQuery expression that is supplied to define an external variable is restricted to sequences of constants, type-specific constructor functions and node constructors.
<b>Action</b>	Reformulate the external variable definition to conform to the restrictions.
<b>INOXQE6399</b>	<b>Duplicate import directive</b>
<b>Explanation</b>	Two 'import module' declarations specify the same module namespace.
<b>Action</b>	Remove the extra import directive or replace it by a namespace declaration.

---

<b>INOXQE6400</b>	<b>Duplicate main-module pragma</b>
<b>Explanation</b>	More than a single main-module pragma has been found in an XQuery.
<b>Action</b>	Remove the duplicate pragma.
<b>INOXQE6401</b>	<b>Multiple declarations of element/type default namespace not allowed</b>
<b>Explanation</b>	Only one default namespace for elements/types can be defined.
<b>Action</b>	Delete one of the default namespace declarations.
<b>INOXQE6402</b>	<b>Multiple declarations of function default namespace not allowed</b>
<b>Explanation</b>	Only one default namespace for functions can be defined.
<b>Action</b>	Delete one of the default namespace declarations.
<b>INOXQE6403</b>	<b>Function is in a namespace different from the module's target namespace.</b>
<b>Explanation</b>	The name of every function declared in a library module must have a namespace URI that is the same as the target namespace of the module.
<b>Action</b>	Change the function's namespace or move to another module.
<b>INOXQE6404</b>	<b>A user-defined function is in a forbidden namespace</b>
<b>Explanation</b>	The function name in a function declaration (when expanded) must not be in any of the following namespaces (among others): <a href="http://www.w3.org/XML/1998/namespace">http://www.w3.org/XML/1998/namespace</a> , <a href="http://www.w3.org/2001/XMLSchema">http://www.w3.org/2001/XMLSchema</a> , <a href="http://www.w3.org/2001/XMLSchema-instance">http://www.w3.org/2001/XMLSchema-instance</a> , <a href="http://www.w3.org/2005/04/xpath-functions">http://www.w3.org/2005/04/xpath-functions</a> , <a href="http://www.w3.org/2005/04/xpath-datatypes">http://www.w3.org/2005/04/xpath-datatypes</a> .
<b>Action</b>	Change the user-defined function's namespace by changing the prefix, or the prefix's binding, or the default function namespace.
<b>INOXQE6406</b>	<b>Invalid context for updating function</b>
<b>Explanation</b>	An updating function was invoked in a context where only a non-updating function is permitted.
<b>Action</b>	Modify the query to provide a proper function or context.
<b>INOXQE6407</b>	<b>Invalid context for non-updating function</b>
<b>Explanation</b>	A non-updating function was invoked in a context where only an updating function is permitted.
<b>Action</b>	Modify the query to provide a proper function or context.

<b>INOXQE6408</b>	<b>Invalid name for external variable</b>
<b>Explanation</b>	A qualified name including a prefix is not supported as the name of an external variable.
<b>Action</b>	Use a non-qualified name.
<b>INOXQE6420</b>	<b>Query not found</b>
<b>Explanation</b>	The given handle does not address any prepared query.
<b>Action</b>	Please correct the given query handle.
<b>INOXQE6421</b>	<b>Invalid query handle</b>
<b>Explanation</b>	The format of the given query handle is wrong. The query handle must be an integer.
<b>Action</b>	Correct the query handle.
<b>INOXQE6424</b>	<b>Missing parameter for query execution</b>
<b>Explanation</b>	The prepared query declares external variables. For at least one of these variables, no suitable input parameter was provided.
<b>Action</b>	Provide input parameter.
<b>INOXQE6450</b>	<b>Update results in non-well-formed document</b>
<b>Explanation</b>	The update statement tries a modification that would result in a non-well-formed document, e.g., insert an element into an attribute, or insert a second root element. The error is accompanied by a message that explains the actual reason in more detail.
<b>Action</b>	Correct the update statement.
<b>INOXQE6451</b>	<b>Conflicting update operations</b>
<b>Explanation</b>	An update statement can consist of several atomic update operations. There may be conflicts between those operations, e.g., a subtree cannot be replaced and deleted at the same time.
<b>Action</b>	Correct the update statement.
<b>INOXQE6452</b>	<b>Attempted to insert or modify one of the meta-attributes ino:id or ino:docname</b>
<b>Explanation</b>	Using XQuery update, it is not allowed to modify the meta-attributes ino:id or ino:docname.
<b>Action</b>	Correct your XQuery update statement.

---

<b>INOXQE6453</b>	<b>Attempt to modify a nonxml document</b>
<b>Explanation</b>	It is not possible to modify non-XML documents using an XQuery update statement. Only deletion of complete non-XML documents is allowed by XQuery update.
<b>Action</b>	Use the <code>_process</code> command in order to replace and thus modify a non-XML document.
<b>INOXQE6454</b>	<b>Attempt to update the same XNode-mapped field twice with different values</b>
<b>Explanation</b>	An XNode column/field appears at different paths in the schema, and an XQuery update statement tried to modify at least two paths with different values.
<b>Action</b>	Correct the XQuery update statement.
<b>INOXQE6455</b>	<b>Invalid node type passed to updating function</b>
<b>Explanation</b>	A node was passed to an updating function, but the node type was not suitable for the function. <code>tf:setDocname</code> and <code>tdf:setProperty</code> can be applied to document nodes only, while <code>tf:put</code> can be applied to document or element nodes.
<b>Action</b>	Modify the query to provide a node with a proper node type.
<b>INOXQE6456</b>	<b>Invalid invocation of tdf:setProperty for live property</b>
<b>Explanation</b>	<code>tdf:setProperty</code> was used in an XQuery update on a live property. This is not allowed, live properties cannot be updated this way.
<b>Action</b>	Modify the update statement, removing the invalid invocation of <code>tdf:setProperty</code> .
<b>INOXQE6457</b>	<b>Invalid doctype name</b>
<b>Explanation</b>	The URI used in a call to <code>fn:put</code> contained an invalid doctype name. The provided doctype name was either not a valid QName, or it did not match the root element name of the XML document to be stored.
<b>Action</b>	Provide a valid doctype name in the URI used with <code>fn:put</code> , or omit the doctype name from the URI.
<b>INOXQE6458</b>	<b>XML parsing error while converting nonXML document</b>
<b>Explanation</b>	A nonXML document was passed to <code>fn:put()</code> with a URI indicating an XML doctype. The nonXML content however failed to be parsed successfully as XML.
<b>Action</b>	Provide well-formed XML or store the document into an XML doctype.

<b>INOXQE6459</b>	<b>Cannot update transient node</b>
<b>Explanation</b>	A transient node, i.e. a node resulting from a previous constructor, was detected as the subject of an update operation. XQuery update however can only be applied to persistent nodes.
<b>Action</b>	Modify XQuery update statement to avoid applying update operations to transient nodes.
<b>INOXQW6380</b>	<b>A path expression results in an empty node-set</b>
<b>Explanation</b>	An empty node-set as a result of a path expression might indicate an error in referencing the document structure or in a name spelling.
<b>Action</b>	Ensure that the empty result is not due to a wrong path.
<b>INOXQW6405</b>	<b>Invalid entity or character reference</b>
<b>Explanation</b>	The query contains an invalid entity or a character reference that does not map to a valid character. As a corrective action, the ampersand character has been treated as a literal, not as an entity introducer.
<b>Action</b>	To avoid this warning, correct the query appropriately and re-issue.
<b>INOXQW6423</b>	<b>Execution of prepared query requires recompilation</b>
<b>Explanation</b>	Due to schema, security or structure index changes the compiled query yielded by previous preparation is not longer valid. This requires a recompilation of the prepared query.
<b>Action</b>	Recompile the prepared query.
<b>INOXQW6425</b>	<b>querySearchMode=approximate not applicable for this query</b>
<b>Explanation</b>	This query cannot be executed in a streaming mode, thus the specified request parameter querySearchMode=approximate has no effect.
<b>Action</b>	Do not use this request parameter.
<b>INOXRE8802</b>	<b>Internal error: input parameter error</b>
<b>Explanation</b>	Internal error: Data Map was called with missing or invalid parameters.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXRE8803</b>	<b>Specified name too long</b>
<b>Explanation</b>	The specified name is too long. Length limitations are described in the Tamino documentation.
<b>Action</b>	Modify the schema definition and repeat your request.
<b>INOXRE8805</b>	<b>Invalid collection, element, attribute or server extension name</b>
<b>Explanation</b>	The specified name is not a valid QName. The specified name starts with a colon and/or contains more than one colon.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8806</b>	<b>Collection is currently used by another user</b>
<b>Explanation</b>	The request cannot be executed because at least one of the affected collections is currently held by another user.
<b>Action</b>	Repeat the request.
<b>INOXRE8807</b>	<b>Doctype is currently used by another user</b>
<b>Explanation</b>	There is a persistent lock on a doctype which prevents the current request from continuing.
<b>Action</b>	Repeat the request when the request that has the persistent lock has finished.
<b>INOXRE8808</b>	<b>Index recreation currently not pending on the specified collection</b>
<b>Explanation</b>	There is no index recreation pending to continue or reset. It is not necessary to execute the <code>_admin</code> command.
<b>Action</b>	No action required.
<b>INOXRE8809</b>	<b>Index recreation is pending</b>
<b>Explanation</b>	On the specified doctype an index recreation is pending. The requested action cannot be executed.
<b>Action</b>	Execute the corresponding <code>_admin</code> request to continue or reset the index recreation.
<b>INOXRE8810</b>	<b>Index recreation is running</b>
<b>Explanation</b>	The requested action cannot be executed while an index recreation is running on the specified doctype.
<b>Action</b>	No action required.

<b>INOXRE8811</b>	<b>Collection name not found</b>
<b>Explanation</b>	The specified collection is unknown.
<b>Action</b>	Correct the collection name and repeat the request.
<b>INOXRE8814</b>	<b>Element/attribute name not found</b>
<b>Explanation</b>	The specified element or attribute is unknown.
<b>Action</b>	Correct the element or attribute name and repeat the request.
<b>INOXRE8815</b>	<b>Internal error: mapping already defined</b>
<b>Explanation</b>	Internal error: mapping already defined.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8816</b>	<b>Internal error while inserting an implicit element or attribute</b>
<b>Explanation</b>	An internal error occurred while inserting an implicit element or attribute.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8818</b>	<b>Duplicate collection name</b>
<b>Explanation</b>	There is already a collection with the specified name.
<b>Action</b>	Specify another collection name or undefine the existing collection.
<b>INOXRE8819</b>	<b>Duplicate element/attribute name</b>
<b>Explanation</b>	The element or attribute to be inserted is already defined. It is not allowed to specify a schema containing two or more elements or attributes with the same name and the same parent.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8821</b>	<b>Internal error: invalid parent specification</b>
<b>Explanation</b>	Internal error: invalid parent specification.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8822</b>	<b>Invalid options specification</b>
<b>Explanation</b>	The specified options are incorrect. Either unexpected options are specified or expected options are missing.
<b>Action</b>	Refer to the Tamino documentation, correct your schema definition and repeat the request.

---

<b>INOXRE8823</b>	<b>Internal error: invalid object ID specification</b>
<b>Explanation</b>	Internal error: an invalid ID was specified.
<b>Action</b>	Retry with an increased transaction timeout value. If that doesn't help restart the Tamino database. If the problem still occurs please contact your software supplier.
<b>INOXRE8824</b>	<b>Internal error: invalid collection ID specification</b>
<b>Explanation</b>	Internal error: an invalid ID was specified.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8825</b>	<b>Invalid multiplicity specification</b>
<b>Explanation</b>	The specified multiplicity is invalid. Either the multiplicity does not correspond with the mapping type, or a multiplicity of + or * is specified for attributes, or a multiplicity not equal to blank is specified for the root element.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8826</b>	<b>Invalid search type specification</b>
<b>Explanation</b>	The search type is invalid or does not match the specified mapping type. For an external document summary file the specified shortname may be invalid.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8827</b>	<b>Internal error: invalid index ID specification</b>
<b>Explanation</b>	Internal error: an invalid ID was specified.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8830</b>	<b>Invalid schema structure: missing node definition</b>
<b>Explanation</b>	An attempt was made to specify a node with a mapping type which requires at least one child with a specific other mapping type. This element is missing. (Example: Mapping to an SQL table requires at least one child mapped to an SQL column.)
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8831</b>	<b>Deletion rejected because of depending objects</b>
<b>Explanation</b>	The server extension object could not be deleted because at least one node references a server extensions function of the object to be deleted.
<b>Action</b>	Update the schema definitions containing referencing nodes and repeat the request.

<b>INOXRE8833</b>	<b>Internal error: file structure/schema definition mismatch</b>
<b>Explanation</b>	Internal error: file structure/schema definition mismatch.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8834</b>	<b>Data map record could not be stored</b>
<b>Explanation</b>	A Data Map record could not be stored. The definition of one node is too large.
<b>Action</b>	Modify the schema definition and repeat the request. Please inform your software supplier.
<b>INOXRE8835</b>	<b>Data map record could not be updated</b>
<b>Explanation</b>	A data map record could not be updated. The number of children for one collection or node is too large.
<b>Action</b>	Modify the schema definition and repeat the request. Please inform your software supplier.
<b>INOXRE8836</b>	<b>Modifying or deleting of system collection/doctype rejected</b>
<b>Explanation</b>	Collections and doctypes containing the Tamino namespace may not be modified or deleted.
<b>Action</b>	No action required.
<b>INOXRE8841</b>	<b>Invalid mapping specification: invalid or unexpected primary key definition</b>
<b>Explanation</b>	For a mapped SQL table at least one mapped SQL column must be indicated as the primary key using the keyword ino:sqlprimarykeys.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8842</b>	<b>Invalid mapping specification: invalid or unexpected password specification</b>
<b>Explanation</b>	The specified Adabas password is either too long (maximum length is 8 characters) or unexpected (for nodes not mapped to AdaFile).
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8843</b>	<b>Invalid mapping specification: invalid parent - child relation</b>
<b>Explanation</b>	The relation between parent node and child node is not allowed. This is mostly caused by the object type of either parent or child node.
<b>Action</b>	Correct the schema definition and repeat the request.

---

<b>INOXRE8844</b>	<b>Invalid mapping specification: invalid parent - child relation</b>
<b>Explanation</b>	The relation between parent node and child node is not allowed. This is caused by either an unexpected mapping type of the child node or a node having a multiplicity of + or * between a node mapped to an SQL table or an Adabas file and the corresponding nodes mapped to an SQL column or Adabas field, multiple field or periodic group.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8845</b>	<b>Invalid schema structure: missing elements</b>
<b>Explanation</b>	The mapping of the node is invalid. It requires other mapping in parent nodes. This error is mostly caused by a node mapped to an SQL column without having a corresponding node mapped to an SQL table, or mapped to an Adabas field without having a corresponding node mapped to an Adabas file.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8847</b>	<b>Invalid mapping specification: invalid or unexpected shortname specification</b>
<b>Explanation</b>	The specification of a shortname is not allowed or does not conform to Adabas shortname rules.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8848</b>	<b>Invalid mapping specification: invalid or unexpected Adabas file specification</b>
<b>Explanation</b>	The specification of a database ID and or file number is missing or invalid (Adabas file mapping) or not allowed (other mappings).
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8854</b>	<b>Invalid mapping specification: invalid object reference specification</b>
<b>Explanation</b>	The specified object reference was unexpected or refers to an undefined object. An object reference may only be specified for nodes mapped to another node.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8856</b>	<b>Invalid mapping specification: invalid or unexpected SQL specification</b>
<b>Explanation</b>	For an SQL table mapping the table name was missing or a password was specified without userid. For an SQL column mapping the column was not specified. For other mappings SQL specific keywords are unexpected.
<b>Action</b>	Correct the schema definition and repeat the request.

<b>INOXRE8859</b>	<b>Invalid mapping specification: invalid or unexpected format specification</b>
<b>Explanation</b>	A format specification is either invalid (for Adafield mappings) or unexpected (for other mappings). A list of all valid formats is specified in the Tamino documentation.
<b>Action</b>	Correct the schema and repeat the request.
<b>INOXRE8860</b>	<b>Invalid mapping specification: invalid or unexpected length specification</b>
<b>Explanation</b>	A length specification is either invalid (for Adafield mappings) or unexpected (for other mappings). The length specification must conform to the format specification as defined in Adabas.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8861</b>	<b>Invalid mapping specification: invalid or unexpected precision specification</b>
<b>Explanation</b>	A precision was either specified for a non-SQL column mapping, or is unexpected or out of range for the specified datatype. Dependencies between datatype and precision are described in the Tamino documentation.
<b>Action</b>	Correct the schema and repeat the request.
<b>INOXRE8862</b>	<b>Invalid mapping specification: invalid or unexpected scale specification</b>
<b>Explanation</b>	A scale was either specified for a non-SQL column mapping, or is unexpected or out of range for the specified datatype. Dependencies between datatype, precision and scale are described in the Tamino documentation.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8863</b>	<b>Invalid mapping specification: invalid or unexpected data type specification</b>
<b>Explanation</b>	The specification of a data type is not allowed or does not conform to the list of supported datatypes. Please refer to the Tamino documentation for a list of supported data types.
<b>Action</b>	Correct the schema definition and repeat the request.
<b>INOXRE8865</b>	<b>Invalid mapping specification: invalid or unexpected encoding specification</b>
<b>Explanation</b>	The value for an encoding may only be specified for nodes mapped to an Adabas file or mapped to an Adabas field that has an alphanumeric format. The encoding must be a valid encoding string.
<b>Action</b>	Correct the schema and repeat the request.

---

<b>INOXRE8873</b>	<b>Server extensions: function not found</b>
<b>Explanation</b>	There is no server extension function with the specified function name.
<b>Action</b>	Check the specified function name. Be aware that function names are case sensitive.
<b>INOXRE8887</b>	<b>The request cannot be executed within a session context</b>
<b>Explanation</b>	In a session context it is not possible to recreate indexes for ino:creationDate or ino:lastModified.
<b>Action</b>	Recreate the indexes in a session-less request.
<b>INOXRE8888</b>	<b>Adding a new node definition with the specified attributes is not supported</b>
<b>Explanation</b>	Adding a new node definition with the specified attributes is not supported because of already existing documents.
<b>Action</b>	Remove the affected documents and repeat the request.
<b>INOXRE8889</b>	<b>Modifying an existing node definition with the specified attributes is not supported</b>
<b>Explanation</b>	The requested parameter may not be changed after the schema definition.
<b>Action</b>	Undefine the schema and define the modified schema definition once again.
<b>INOXRE8890</b>	<b>Internal error: unsupported request</b>
<b>Explanation</b>	The internal data map was called for an unsupported request.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8891</b>	<b>Internal error: Data Map function failed</b>
<b>Explanation</b>	The internal data map encountered an unexpected situation.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8892</b>	<b>Internal error: Data Map corrupted</b>
<b>Explanation</b>	The internal data map found insufficient data.
<b>Action</b>	Please contact your software supplier.
<b>INOXRE8893</b>	<b>Internal error: conversion services failed</b>
<b>Explanation</b>	An error occurred while the internal data map used conversion services.
<b>Action</b>	Please contact your software supplier.

<b>INOXRE8894</b>	<b>Internal error: invalid file specification</b>
<b>Explanation</b>	An internal error occurred during access to an Infofile.
<b>Action</b>	Please contact your software supplier.
<b>INOXRF8899</b>	<b>Index recreation could not be finished successfully for doctype DOCTYPE in collection COLLECTION</b>
<b>Explanation</b>	An error occurred while finishing the index recreation. The collection is currently not usable.
<b>Action</b>	Restart the server and execute the <code>_admin</code> command to finish the index recreation.
<b>INOXRI8838</b>	<b>Request to create the unique constraint CONSTRAINT for doctype DOCTYPE in collection COLLECTION has failed and will be backed out</b>
<b>Explanation</b>	A request to create a unique constraint was running during server shutdown. The unique constraint is dropped during server start.
<b>Action</b>	Repeat the request to create the unique constraint.
<b>INOXRW8801</b>	<b>Request to create indexes for doctype DOCTYPE in collection COLLECTION is pending</b>
<b>Explanation</b>	A request to create indexes was aborted with an error or was running during server shutdown.
<b>Action</b>	Start the corresponding admin command to continue or reset the index creation.
<b>INOXSE8903</b>	<b>Memory allocation failed</b>
<b>Explanation</b>	There was not enough main memory available to perform the request.
<b>Action</b>	Possibly the machine is overloaded. Try again later.
<b>INOXSE8905</b>	<b>The combination of index-shortname and the search-type and/or map-type is not valid</b>
<b>Explanation</b>	The node with the search-type and/or map-type cannot contain a definition of index-shortname
<b>Action</b>	Check the map-type and the search-type.

---

<b>INOXSE8906</b>	<b>XML parser failure for schema definition</b>
<b>Explanation</b>	The supplied schema definition is not well-formed XML.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8909</b>	<b>Internal error during schema processing</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXSE8910</b>	<b>Invalid element content in schema definition</b>
<b>Explanation</b>	The schema definition contains elements with mixed content, or the ino:file-format attribute has an illegal value.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8911</b>	<b>The specified mapping parameter(s) (adadsfnr, adadsdbid, adavoc...) can only be specified in a node which has the mapping type AdaFile</b>
<b>Explanation</b>	The specifications such as adadsfnr, adadsdbid, adavoc etc. cannot be used with a mapping type other than AdaFile
<b>Action</b>	Remove the mapping parameters or change the mapping type to AdaFile.
<b>INOXSE8913</b>	<b>Invalid structure of schema definition, hierarchy has to be collection - doctype - node</b>
<b>Explanation</b>	The structure of the schema definition is invalid. It should be defined with the hierarchy collection - doctype - node(s).
<b>Action</b>	Check the schema definition and fix the affected nodes.
<b>INOXSE8914</b>	<b>Internal error: buffer overflow</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXSE8915</b>	<b>The keywords index-shortname, adadsdbid, adadsfnr, adavocdbid and adavocfnr are not supported in the current version</b>
<b>Explanation</b>	These keywords are not supported in the current version.
<b>Action</b>	Remove these keywords from the schema definition.

<b>INOXSE8917</b>	<b>Internal error: doctype without root element</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXSE8918</b>	<b>Internal error: unknown object type</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXSE8920</b>	<b>Internal error: unknown mapping type</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXSE8921</b>	<b>ino:format or ino:length specified with SQL mapping</b>
<b>Explanation</b>	ino:format and ino:length must not be specified with SQL mapping.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8922</b>	<b>Value has to be a number</b>
<b>Explanation</b>	The given value could not be converted to a number.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8923</b>	<b>Specified number larger than allowed maximum</b>
<b>Explanation</b>	The specified number was too large.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8924</b>	<b>Invalid doctype option specified</b>
<b>Explanation</b>	An illegal value was specified for ino:options in the <ino:doctype> element.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8926</b>	<b>Collection name missing or invalid</b>
<b>Explanation</b>	The name supplied in the ino:name attribute of the &lt;ino:collection&gt; element was either illegal or missing.
<b>Action</b>	Check the schema document.

---

<b>INOXSE8927</b>	<b>Doctype name missing or invalid</b>
<b>Explanation</b>	The name supplied in the ino:name attribute of the <ino:doctype> element was either illegal or missing.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8929</b>	<b>The node name specified does not conform to the XML specification</b>
<b>Explanation</b>	The name specified in the ino:name attribute of an <ino:node> element does not conform to the XML specification.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8930</b>	<b>Doctype specified without any nodes</b>
<b>Explanation</b>	Each doctype must have at least a root node.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8931</b>	<b>Node key missing</b>
<b>Explanation</b>	The required ino:key attribute was missing for a <ino:node> element.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8932</b>	<b>Node object type missing</b>
<b>Explanation</b>	The required ino:obj-type attribute was missing for a <ino:node> element.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8933</b>	<b>Node parent missing</b>
<b>Explanation</b>	The required ino:parent attribute was missing for a <ino:node> element.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8934</b>	<b>Doctype contains multiple root nodes</b>
<b>Explanation</b>	Each doctype must contain exactly one root node.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8935</b>	<b>Doctype contains no root nodes</b>
<b>Explanation</b>	Each doctype must contain exactly one root node.
<b>Action</b>	Correct the schema definition.

<b>INOXSE8937</b>	<b>Invalid parent reference</b>
<b>Explanation</b>	The ino:parent attribute of an <ino:node> element did not point to another node.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8938</b>	<b>Invalid node option specified</b>
<b>Explanation</b>	An illegal value was specified for ino:options in an <ino:node> element.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8939</b>	<b>Adabas dbid value too large</b>
<b>Explanation</b>	The value specified for an Adabas database ID was too large.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8940</b>	<b>Adabas fnr value too large</b>
<b>Explanation</b>	The value specified for an Adabas file number was too large.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8941</b>	<b>Length value too large</b>
<b>Explanation</b>	The length value specified for an Adabas field was too large.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8942</b>	<b>Internal error: invalid ID reference</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXSE8943</b>	<b>Internal error: bad query</b>
<b>Explanation</b>	An internal error has occurred.
<b>Action</b>	Please contact your software supplier.
<b>INOXSE8944</b>	<b>Object definition missing in the new schema definition</b>
<b>Explanation</b>	One or more objects are missing in the schema definition although they are already defined in the data map. The current version does not support object deletion.
<b>Action</b>	Complete the schema definition.

---

<b>INOXSE8945</b>	<b>Invalid type change</b>
<b>Explanation</b>	Modification of type is not supported if type is CDATA.
<b>Action</b>	Fix the schema definition.
<b>INOXSE8946</b>	<b>Shortname specified for ADAFile without adadsdbid/fnr</b>
<b>Explanation</b>	Shortname specified for ADAFile without adadsdbid/fnr.
<b>Action</b>	Complete the schema definition.
<b>INOXSE8947</b>	<b>Bad value for structure-index</b>
<b>Explanation</b>	The specified value for structure-index of doctype is not supported.
<b>Action</b>	Fix the schema definition.
<b>INOXSE8948</b>	<b>Attribute already declared</b>
<b>Explanation</b>	An attribute is specified more than once.
<b>Action</b>	Fix the schema definition.
<b>INOXSE8949</b>	<b>Different doctype and root element name</b>
<b>Explanation</b>	The doctype and root element must have the same name.
<b>Action</b>	Fix the schema definition.
<b>INOXSE8950</b>	<b>Too many indexes in schema</b>
<b>Explanation</b>	The schema defines more than the maximum possible number of indexes.
<b>Action</b>	Adapt the schema definition. For example, you may use multipath indexes in order to reduce the number of indexes being created.
<b>INOXSE8951</b>	<b>Too many elements/attributes for "lite" mapping"</b>
<b>Explanation</b>	The schema defines more than the maximum possible number of elements/attributes for "lite" mapping".
<b>Action</b>	Correct the schema definition.
<b>INOXSE8952</b>	<b>No more indexes available</b>
<b>Explanation</b>	Attempted to create too many standard or text indexes in the schema definition.
<b>Action</b>	Remove standard or text indexes or use multi-path indexes where applicable.

<b>INOXSE8953</b>	<b>Invalid node search type specified</b>
<b>Explanation</b>	An illegal value was specified for the ino:search-type attribute.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8954</b>	<b>Scale value too large</b>
<b>Explanation</b>	An illegal value was specified for the ino:scale attribute.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8955</b>	<b>Attribute missing</b>
<b>Explanation</b>	There is a required attribute missing.
<b>Action</b>	Fix a schema definition.
<b>INOXSE8956</b>	<b>Required node attribute missing</b>
<b>Explanation</b>	One of the required attributes for the <ino:node> element is missing.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8957</b>	<b>Required doctype attribute missing</b>
<b>Explanation</b>	One of the required attributes for the <ino:doctype> element is missing.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8958</b>	<b>Required collection attribute missing</b>
<b>Explanation</b>	One of the required attributes for the <ino:collection> element is missing.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8959</b>	<b>Unknown node attribute specified</b>
<b>Explanation</b>	An illegal attribute was specified for an <ino:node> element.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8960</b>	<b>Unknown doctype attribute specified</b>
<b>Explanation</b>	An illegal attribute was specified for the <ino:doctype> element.
<b>Action</b>	Correct the schema definition.

---

<b>INOXSE8961</b>	<b>Unknown collection attribute specified</b>
<b>Explanation</b>	An illegal attribute was specified for the <ino:collection> element.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8962</b>	<b>Invalid or missing dbid parameter</b>
<b>Explanation</b>	The explanation text in the< ino:messageline> element gives more information about the cause of the error.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8963</b>	<b>Invalid format value</b>
<b>Explanation</b>	An illegal value was supplied in the ino:format attribute.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8964</b>	<b>Invalid object type value</b>
<b>Explanation</b>	An illegal value was specified for the ino:obj-type attribute.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8965</b>	<b>Invalid data type value</b>
<b>Explanation</b>	An illegal value was specified for the ino:data-type attribute.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8966</b>	<b>Invalid multiplicity value</b>
<b>Explanation</b>	An illegal value was specified for the ino:multiplicity attribute.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8967</b>	<b>Invalid mapping type value</b>
<b>Explanation</b>	An illegal value was specified for the ino:map-type attribute.
<b>Action</b>	Correct the schema definition
<b>INOXSE8968</b>	<b>Invalid shortname value</b>
<b>Explanation</b>	An illegal value was specified for the ino:shortname attribute.
<b>Action</b>	Correct the schema definition.

<b>INOXSE8969</b>	<b>Unknown element name in schema definition</b>
<b>Explanation</b>	Only <ino:collection>, <ino:doctype>, and <ino:node> are allowed as elements in a schema definition.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8970</b>	<b>Duplicate key value in schema definition</b>
<b>Explanation</b>	The ino:key values must be unique within a schema definition.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8971</b>	<b>Invalid primary key reference in schema definition</b>
<b>Explanation</b>	Every column reference in a primary definition for SQL table mapping needs to be declared as an SQL column mapping for one node in a subtree of the SQL table mapped node.
<b>Action</b>	Correct the schema definition.
<b>INOXSE8978</b>	<b>Bad value for compression</b>
<b>Explanation</b>	The specified value for compression of the doctype is not supported.
<b>Action</b>	Fix the schema definition.
<b>INOXSE8979</b>	<b>Collection is currently used by another user</b>
<b>Explanation</b>	The request cannot be executed because at least one of the affected collections is currently held by another user.
<b>Action</b>	Repeat the request.
<b>INOXSE8980</b>	<b>Server extensions: external name and module name / function name are mutually exclusive</b>
<b>Explanation</b>	Do not specify both external name and module name/function name for a server extension.
<b>Action</b>	Correct the schema definition.
<b>INOXTE7400</b>	<b>Internal error</b>
<b>Explanation</b>	A text retrieval internal error has occurred.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXTE7401</b>	<b>Empty search term</b>
<b>Explanation</b>	An empty-valued search term is specified.
<b>Action</b>	Please specify a non-empty search term in the query.
<b>INOXTE7402</b>	<b>Empty search token(s)</b>
<b>Explanation</b>	One or more empty search tokens are specified.
<b>Action</b>	Please specify non-empty search tokens in the query.
<b>INOXTE7403</b>	<b>Empty search term in word function</b>
<b>Explanation</b>	An empty-valued search term is specified in the word function.
<b>Action</b>	Please specify a non-empty search term in the word function.
<b>INOXTE7404</b>	<b>Invalid search term</b>
<b>Explanation</b>	An invalid search term is specified.
<b>Action</b>	Please specify a valid search term in the query.
<b>INOXTE7405</b>	<b>Invalid search token</b>
<b>Explanation</b>	One or more invalid search tokens are specified.
<b>Action</b>	Please specify valid search tokens in the query.
<b>INOXTE7406</b>	<b>Invalid search term in word function</b>
<b>Explanation</b>	An invalid search term is specified in the word function.
<b>Action</b>	Please specify a valid search term in the word function.
<b>INOXTE7407</b>	<b>Maximum number of search tokens exceeded</b>
<b>Explanation</b>	The derived search tokens from the search term or specified search tokens have exceeded the maximum number allowed.
<b>Action</b>	Please correct your search term/tokens in the query.
<b>INOXTE7408</b>	<b>Invalid wildcard usage</b>
<b>Explanation</b>	Invalid wildcards are specified in the query.
<b>Action</b>	Please refer to Tamino documentation for more details.

<b>INOXTE7409</b>	<b>Word function nesting</b>
<b>Explanation</b>	Nesting of word functions is not allowed.
<b>Action</b>	Please correct the query.
<b>INOXTE7410</b>	<b>Invalid highlighting marker</b>
<b>Explanation</b>	Highlighting marker does not conform to an NCName.
<b>Action</b>	Please correct the marker parameter for the highlighting function.
<b>INOXTE7411</b>	<b>Fragmented document reference</b>
<b>Explanation</b>	Highlighting of document fragments is not supported.
<b>Action</b>	Please correct the query for the highlighting function.
<b>INOXTE7412</b>	<b>Invalid node addressing</b>
<b>Explanation</b>	Invalid node addressing of the document has occurred during the highlighting process.
<b>Action</b>	Please correct the query for the highlighting function.
<b>INOXTE7413</b>	<b>No valid document node</b>
<b>Explanation</b>	No valid document node is found for highlighting.
<b>Action</b>	Please correct the query for the highlighting function.
<b>INOXTE7415</b>	<b>Invalid distance for proximity function</b>
<b>Explanation</b>	The distance for a proximity function must be a positive integer.
<b>Action</b>	Correct the distance and try again.
<b>INOXTE7416</b>	<b>index nonXML tsd:onTextInsert shadow X-Tension function not defined</b>
<b>Explanation</b>	A shadow X-Tension function for the insertion of a non-XML text document was expected in the schema.
<b>Action</b>	Define a shadow X-Tension function tsd:onTextInsert in the schema.
<b>INOXTE7417</b>	<b>index nonXML tsd:onBinaryInsert shadow X-Tension function not defined</b>
<b>Explanation</b>	A shadow X-Tension function for the insertion of a non-XML binary object was expected in the schema.
<b>Action</b>	Define a shadow X-Tension function tsd:onBinaryInsert in the schema.

---

<b>INOXTE7418</b>	<b>illegal phonrule definition</b>
<b>Explanation</b>	The number of replace characters must not be higher than the number of characters to be replaced.
<b>Action</b>	Correct the phonrule(s) in question.
<b>INOXTE7419</b>	<b>illegal stemrule definition</b>
<b>Explanation</b>	The number of replace characters must not be higher than the number of characters to be replaced.
<b>Action</b>	Correct the stemrule(s) in question.
<b>INOXXE8600</b>	<b>The group with name ino:admin may not contain any aclref elements</b>
<b>Explanation</b>	The group with name ino:admin may not contain any aclref elements.
<b>Action</b>	Make sure that the group ino:admin contains no aclref elements and try again.
<b>INOXXE8601</b>	<b>Not enough memory for the requested security operation</b>
<b>Explanation</b>	Not enough memory for the requested security operation.
<b>Action</b>	Free up some memory resources and try executing the operation again.
<b>INOXXE8602</b>	<b>This operation is not allowed for the special 2-Phase-Commit user</b>
<b>Explanation</b>	This operation is not allowed for the special 2-Phase-Commit user.
<b>Action</b>	Make sure you specify a user with the needed privileges for this operation.
<b>INOXXE8603</b>	<b>Namespace prefixes specified in ino:ace paths need to be defined</b>
<b>Explanation</b>	Namespace prefixes specified in ino:ace paths need to be defined.
<b>Action</b>	Please specify a namespace definition for each namespace prefix and try again.
<b>INOXXE8604</b>	<b>The aclref attribute may only reference existing documents</b>
<b>Explanation</b>	The aclref attribute may only reference existing documents.
<b>Action</b>	Please check that only valid references to existing documents are specified in the aclref attribute.

<b>INOXXE8610</b>	<b>Definitions for ino:userid, ino:groupname, and ino:aclname in the collection ino:security need to be unique</b>
<b>Explanation</b>	Definitions for ino:userid, ino:groupname, and ino:aclname in the collection ino:security need to be unique.
<b>Action</b>	First delete the existing entry before loading the new one with the same name into the database.
<b>INOXXE8611</b>	<b>Invalid path specified in an ino:ace element</b>
<b>Explanation</b>	Invalid path specified in an ino:ace element. The path must consist of names that are valid for XML element or attribute names, separated by slashes.
<b>Action</b>	Please correct the path specified in the ino:ace element and try loading the security definitions again.
<b>INOXXE8699</b>	<b>Administration command is not available</b>
<b>Explanation</b>	An administration command is not available.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9002</b>	<b>Internal database error has occurred</b>
<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9003</b>	<b>Internal database error has occurred</b>
<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9004</b>	<b>Internal database error has occurred</b>
<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9005</b>	<b>Internal database error has occurred</b>
<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.

---

<b>INOXYE9006</b>	<b>Internal database error has occurred</b>
<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.

<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9291</b>	<b>Transaction aborted because it has taken too long</b>
<b>Explanation</b>	The duration of the transaction has exceeded the maximum transaction duration. This can be caused by several circumstances: 1) The transaction could have done too much work to complete in the given time frame. 2) The number of transactions running in parallel has caused considerable delays in transaction execution. 3) The transaction might have waited for a resource that was held by another transaction for a very long time. In particular, this can happen if the number of XML work threads is too low. In this case, the transactions waiting for a resource block the XML work threads, and no XML work thread is available for the transaction holding the resource. 4) The transaction had to wait for a free XML work thread for a long time
<b>Action</b>	The maximum transaction duration and the number of XML work threads can be configured using the Tamino Manager.

<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9296</b>	<b>Internal database error has occurred</b>
<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9297</b>	<b>Internal database error has occurred</b>
<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9298</b>	<b>Internal database error has occurred</b>
<b>Explanation</b>	An internal error occurred. This could result in incorrect data.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9484</b>	<b>Marked corrupt index for subsequent repair: collection name = COLL_NAME, node = NODE_PATH</b>
<b>Explanation</b>	A corrupt index has been found and has been marked for index repair. It will not be used for query processing until it has been repaired.
<b>Action</b>	Repair indexes in the corresponding doctype using <code>_admin=ino:RepairIndex()</code> - then retry the operation and recreate the index if necessary.

<b>INOXYE9485</b>	<b>Failed to prepare index marked as corrupt for subsequent repair index: collection name = COLL_NAME, node = NODE_PATH, reason = REASON</b>
<b>Explanation</b>	An error occurred when attempting to prepare a corrupt index for a subsequent index repair.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9486</b>	<b>Failed to mark index as corrupt due to a pending recreate index operation: collection name = COLL_NAME, node = NODE_PATH</b>
<b>Explanation</b>	A corrupt index cannot be marked as corrupt while a recreate index operation or schema update is pending.
<b>Action</b>	Repair the indexes in the corresponding doctype using <code>_admin=ino:RepairIndex()</code> - then retry the operation and recreate the index if necessary.
<b>INOXYE9487</b>	<b>Failed to mark index as corrupt due to recreate index operation in progress: collection name = COLL_NAME, node = NODE_PATH</b>
<b>Explanation</b>	A corrupt index cannot be marked while a recreate index operation or schema update is in progress.
<b>Action</b>	Wait until recreate index operation or schema update on the corresponding doctype is finished, then retry the operation or recreate the index.
<b>INOXYE9488</b>	<b>Error during index or constraint access</b>
<b>Explanation</b>	An index or constraint is corrupted and must be recreated.
<b>Action</b>	Recreate all indexes and constraints of the doctype via <code>ino:RecreateIndex</code> admin command.
<b>INOXYE9489</b>	<b>Error during index or constraint access</b>
<b>Explanation</b>	An index or constraint is corrupted.
<b>Action</b>	Please contact your software supplier.
<b>INOXYE9490</b>	<b>Error during index or constraint access</b>
<b>Explanation</b>	An index or constraint is corrupted and must be recreated.
<b>Action</b>	Recreate the indexes and constraints via the <code>ino:RecreateIndex</code> admin command or update define.

---

<b>INOXYE9491</b>	<b>Transaction aborted due to non-activity timeout</b>
<b>Explanation</b>	The transaction has been aborted because there was no activity for a long time.
<b>Action</b>	The time period for non-activity timeout can be configured using the Tamino Manager (Property "non-activity timeout").
<b>INOXYE9492</b>	<b>Transaction aborted due to administrator action</b>
<b>Explanation</b>	The database administrator has cancelled this transaction.
<b>Action</b>	No action required.
<b>INOXYE9493</b>	<b>Transaction aborted because journal space was too small</b>
<b>Explanation</b>	The journal space could not accommodate all the information that was necessary to back out the update command.
<b>Action</b>	Enlarge the journal space.
<b>INOXYE9494</b>	<b>Request terminated because it tried to modify a replication database</b>
<b>Explanation</b>	The request was sent to a replication database. User requests are not allowed to modify a replication database; only the replication process can do this.
<b>Action</b>	Send your request to the master of this replication database.
<b>INOXYE9495</b>	<b>Request terminated because the replication database is currently not up-to-date</b>
<b>Explanation</b>	The database is set to replication type with 'Simultaneous Query', but the currently replicated log space of the server does not contain additional locking information. Therefore the database cannot process queries while it replicates updates of this log space. Simultaneous query will be enabled, however, when the log space of the current session of the master is replicated.
<b>Action</b>	Wait until the log space of a session is replicated that permits simultaneous queries.  Alternatively, send your request to the master of this replication database.
<b>INOXYE9496</b>	<b>Transaction aborted due to deadlock</b>
<b>Explanation</b>	The lock requests of concurrent transactions have caused a deadlock.
<b>Action</b>	No action required.

<b>INOXYE9497</b>	<b>Transaction terminated because of ongoing replication process</b>
<b>Explanation</b>	There is a replication process in progress that does not allow simultaneous queries.  Because the replication process always has top priority on a replication database, any user transactions that had been active were terminated.
<b>Action</b>	Wait until the replication process has finished or starts another session that allows simultaneous queries.  Alternatively send your request to the master of this replication database.
<b>INOXYE9498</b>	<b>Request terminated due to database shutdown</b>
<b>Explanation</b>	The request has been terminated because the database is being shut down.
<b>Action</b>	No action required.
<b>INOXYE9499</b>	<b>Transaction aborted due to non-activity timeout or administration intervention</b>
<b>Explanation</b>	The transaction has been aborted because there was no activity for a long time or because it was stopped by the database administrator.
<b>Action</b>	The time period for non-activity timeout can be configured using the Tamino Manager (Property "non-activity timeout").
<b>INOXYW9483</b>	<b>Found indexes marked as corrupt which cannot be dropped - subsequent index repair with "continue" option required: collection name = COLL_NAME, doctype = DOCTYPE_NAME</b>
<b>Explanation</b>	A Tamino doctype contains indexes which must not be dropped, e.g. because they are used to implement a unique constraint.
<b>Action</b>	Issue <code>_admin=inoRepairIndex()</code> with the "continue" option for the same doctype in order to fix the corrupt indexes.

# 27

## Trading Network Messages

---

<b>1003</b>	<b>System property {0} is invalid: {1}. To correct the property, go to the TN Properties page of the WmTN package in the Integration Server Administrator, or edit the "packagesWmTNconfigproperties.cnf" file.</b>
<b>Explanation</b>	The system property provided for Trading Networks is invalid.
<b>Action</b>	Correct the property in the Configure Properties page in My webMethods, or edit the 'IntegrationServer_directory\packages\WmTN\config\properties.cnf' file.
<b>1008</b>	<b>"{0}" is required.</b>
<b>Explanation</b>	Required input value is missing.
<b>Action</b>	Provide value for required input fields and try again.
<b>1027</b>	<b>You have attempted to use a feature that is restricted by your license. To be able to use all product features, please contact webMethods or your webMethods OEM solution provider to upgrade to an unrestricted version of Trading Networks.</b>
<b>Explanation</b>	User not allowed to create doctypes, attempt failed.
<b>Action</b>	To be able to use all product features, please contact Software AG Global Support to upgrade to an unrestricted version of Trading Networks.
<b>1035</b>	<b>User Status value(s) {0} already exist.</b>

<b>1046</b>	<b>Error registering TN's XML content handler.</b>
<b>Explanation</b>	Error while registering content handler for "text/xml".
<b>Action</b>	Contact Software AG Global Support.
<b>1119</b>	<b>Encountered error while creating TN document</b>
<b>1157</b>	<b>New verify certificate set not added.</b>
<b>Explanation</b>	In webMethods Trading Networks, if a verify certificate set is not added to a partner, this error shows up.
<b>Action</b>	Add the very certificate set to the partner and try again.
<b>1158</b>	<b>New verify certificate set not updated.</b>
<b>Explanation</b>	In webMethods Trading Networks, if the new verify certificate set for a partner is not updated, this error shows up.
<b>Action</b>	Ensure that the new verify certificcate set for a partner is updated and try again.
<b>1160W</b>	<b>Asset already exists in Trading Networks</b>
<b>Explanation</b>	The asset selected for import already exists in Trading Networks.
<b>Action</b>	To overwrite the existing asset with the one in the imported file, select the "force" option during the import process.
<b>1161E</b>	<b>An error occurred while retrieving package names.</b>
<b>Explanation</b>	My webMethods encountered an error while displaying the names of Integration Server packages.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception and try to perform the action again.
<b>1162W</b>	<b>All processing rules were imported successfully. Processing rules that existed before the import were removed.</b>
<b>Explanation</b>	All the processing rules present in the import file were added to the Trading Networks database. All processing rules that existed before the import process were removed from the database. This happens when the Replace Rule List option is selected during the import of Trading Networks data.

---

1166	<b>Unable to delete doc type. There are some activity logs associated with this doc type. Either delete the associated activity logs or run this service again with "deleteLogs=true" to have them deleted automatically.</b>
<b>Explanation</b>	Unable to delete doc type because there are some activity logs associated with this doc type.
<b>Action</b>	Either delete the associated activity logs or run this service again with "deleteLogs=true" to have them deleted automatically.
1170	<b>Unable to import processing rule {0}. Document type(s) used in the processing rule is not defined.</b>
1171	<b>inserted</b>
1172	<b>updated</b>
1173	<b>deleted</b>
1174	<b>Inserted.</b>
1175	<b>Updated.</b>
1176	<b>Deleted.</b>
1177	<b>Invalid status provided. Provide the proper status.</b>
1178	<b>Manage Export Import</b>
1179	<b>The {0} you are trying to save has been modified by another user. To ensure that you are using the latest version, cancel your changes and reopen the {1}. Modify the latest version and save your changes</b>

**1203E**                    **Error retrieving certificates for keystore alias {0} and key alias {1}. Check the keystore configuration in Integration Server.**

**Explanation**            The keystore was modified or deleted in Integration Server, which caused the keystore mapping in Trading Networks to break.

**Action**                    Check the keystore configuration in Integration Server. If the keystore does not exist in Integration Server, create the keystore. If the keystore mapping in Trading Networks is incorrect, select the correct keystore alias and key name for the certificate.

**1204E**                    **Error retrieving keystore aliases.**

**Explanation**            Trading Networks could not retrieve the keystore from Integration Server.

**Action**                    Check the keystore configuration in Integration Server. If the keystore does not exist in Integration Server, ask the Integration Server administrator to create the keystore.

**1205E**                    **Error retrieving key aliases for the keystore alias {0}.**

**Explanation**            Trading Networks could not retrieve the keystore from Integration Server.

**Action**                    Check the keystore configuration in Integration Server. If the keystore does not exist in Integration Server, ask the Integration Server administrator to create the keystore.

**19000**                    **Invalid facet provided to API - {0}.**

**19001E**                    **Error occurred while initializing Trading Networks charts during initialization of Trading Networks.**

**Explanation**            Trading Networks charts could not be initialized due to an error faced during startup.

**Action**                    Restart Trading Networks.

**19002E**                    **Error occurred while initializing Trading Networks dashboarding store during initialization of Trading Networks.**

**Explanation**            Trading Networks dashboarding store could not be initialized due to an error faced during startup.

**Action**                    Restart Trading Networks.

**19003**                    **Hour value {0} is not in range.**

---

<b>19004</b>	<b>Dashboarding API inputs not valid.</b>
<b>19005E</b>	<b>Error occurred during Analytics API call.</b>
<b>Explanation</b>	An error occurred during Analytics API call.
<b>Action</b>	Check the Trading Networks logs for the cause of the failure and if required, contact your system administrator.
<b>19006E</b>	<b>afterDays parameter cannot be null.</b>
<b>Explanation</b>	afterDays parameter cannot be null.
<b>Action</b>	Supply a value for afterDays parameter.
<b>19007E</b>	<b>afterDays parameter should be a positive integer.</b>
<b>Explanation</b>	afterDays parameter provided is not a positive integer.
<b>Action</b>	Supply a valid value for afterDays parameter. The value must be a positive integer.
<b>19008</b>	<b>batchSize parameter should be a positive integer.</b>
<b>19010</b>	<b>API error</b>
<b>19011</b>	<b>Transaction data {0} written to dashboarding table</b>
<b>2017</b>	<b>Could not delete field definition</b>
<b>2020E</b>	<b>Error occurred while publishing event messages to ERF.</b>
<b>Explanation</b>	An error occurred while publishing event messages to NERV.
<b>Action</b>	Check the Trading Networks logs for the cause of the failure and if required, contact your system administrator.
<b>2021</b>	<b>Successfully published event message of type {0} to ERF.</b>

<b>2023</b>	<b>Error redefining type {0} ({1})</b>
<b>Explanation</b>	Error while updating the document type.
<b>Action</b>	The exception is in the full message. Take appropriate action to resolve the problem described in the exception.
<b>2061</b>	<b>Error initializing type cache.</b>
<b>Explanation</b>	There may have been an SQLException that prevented the initialization of the document type cache.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>2069</b>	<b>Error while defining type {0} ({1}).</b>
<b>Explanation</b>	The error encountered while defining the document type may be due to an SQLException or to a missing mandatory field.
<b>Action</b>	Look at the associated error message or stack trace in the logs and take appropriate action.
<b>2103</b>	<b>MODIFY AND RESUBMIT</b>
<b>2105</b>	<b>Invalid input. Provide a value from the configured list of User Status values.</b>
<b>2120</b>	<b>Error initializing attribute cache.</b>
<b>Explanation</b>	An SQLException may have prevented the attribute cache from being initialized.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>2174</b>	<b>Unable to import init.xml due to exception message: {0}. Manually import init.xml as described in the Installation Guide.</b>
<b>Explanation</b>	An exception occurred while importing init.xml, as described in the message.
<b>Action</b>	Manually import init.xml as described in the Installation Guide.
<b>2200...0</b>	<b>Error encountered while reading USER status from the database. Exception message: {0}.</b>
<b>Explanation</b>	Encountered SQLException while reading user status from database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

---

2262	<b>Processing of invitation failed. {0}</b>
2263	<b>User not created for the partner.</b>
2264	<b>Updating the partner status to Invited has failed.</b>
2265	<b>Error occurred while changing the status of the invitations.</b>
2266	<b>Error occurred while changing the status of the following invitation: {0}.</b>
2267	<b>Error occurred while changing the status of the following archival service: {0}.</b>
2268	<b>Error occurred while changing the status of the archival services.</b>
2269	<b>Error occurred while changing the status of the invitations. The status should be either {0} or {1}.</b>
2270	<b>Error occurred while changing the status of the archival services. The status should be either {0} or {1}.</b>
2271	<b>Error occurred while changing the status of the queues. The status should be either {0}, {1}, {2}, or {3}.</b>
2272	<b>Error occurred while changing the status of the following invitation: {0}. Check the invite and provide all the necessary details.</b>
2303	<b>Exception encountered while getting TN assets dependency.</b>
<b>Explanation</b>	In the webMethods Trading Networks Export Import feature using MWS, when webMethods Trading Networks fails to get the dependency of the asset type during export, this exception is thrown.
<b>Action</b>	You need to select the dependent asset and perform the export again.

<b>2304</b>	<b>Exception encountered while exporting TN assets.The exception message is : {0}.</b>
<b>Explanation</b>	In the webMethods Trading Networks Export Import feature using MWS, when webMethods Trading Networks fails to get the asset data during export, this exception is thrown.
<b>Action</b>	Contact your system administrator.
<b>2305</b>	<b>Exception encountered while importing TN assets.The exception message is : {0}.</b>
<b>Explanation</b>	In the webMethods Trading Networks Import feature using MWS, when webMethods Trading Networks fails to import data, this exception is thrown.
<b>Action</b>	Contact your system administrator.
<b>2306</b>	<b>The import data file name is null or empty.</b>
<b>Explanation</b>	In webMethods Trading Networks, when you try to import data and the import data file name is null or empty, this error is thrown.
<b>Action</b>	Import the data again after adding the import data file.
<b>2307</b>	<b>The import data file {0} does not exist.</b>
<b>Explanation</b>	In webMethods Trading Networks, when you try to import a data file but the file does not exist, this error is thrown.
<b>Action</b>	Ensure that the file is available and try again.
<b>2308</b>	<b>The import file does not contain valid data.</b>
<b>Explanation</b>	In webMethods Trading Networks, when you try to import a file and it does not contain valid data according to the type format, this error is thrown.
<b>Action</b>	Add a file that contains valid data according to the type format and try to import it again.
<b>24001E</b>	<b>Error occurred for the following Document ID while writing to TRANSACTIONSUMMARYDATA table:{0}.</b>
<b>Explanation</b>	Writing to TransactionSummaryData table might fail due to many reasons. One reason is when the Trading Networks database is down.
<b>Action</b>	Check the Integration Server logs for the cause of the failure and if required, contact your system administrator.

- 24002           **Volume value summary data for the following Document ID was successfully written to CUSTOMATTRIBUTEVOLUMEVALUE table: {0}.**
- 24003           **Error occurred for the following Document ID while writing to CUSTOMATTRIBUTEVOLUMEVALUE table:{0}.**
- 24004           **Success and failed transactions summary data for the following Document ID was successfully written to TRANSACTIONSUCCESSFAILEDDATA and SUCCESSFAILEDCHARTDOCIDMAP tables: {0}.**
- 24005           **Error occurred for the following Document ID while writing to TRANSACTIONSUCCESSFAILEDDATA and SUCCESSFAILEDCHARTDOCIDMAP tables:{0}.**
- 24006           **Success and failed transactions summary data for the following Document ID was successfully updated in TRANSACTIONSUCCESSFAILEDDATA and SUCCESSFAILEDCHARTDOCIDMAP tables: {0}.**
- 24007           **Error occurred for the following Document ID while updating TRANSACTIONSUCCESSFAILEDDATA and SUCCESSFAILEDCHARTDOCIDMAP tables:{0}.**
- 24008           **Late FA summary data for the following Document ID was successfully written to TRANSACTIONLATEFADATA table: {0}.**
- 24009           **Error occurred for the following Document ID while writing to TRANSACTIONLATEFADATA table:{0}.**
- 24010           **The following custom class required to filter run-time events of type Document Attribute Added based on event's attribute name was not found in classpath: {0}**
- 24011           **The following error occurred while trying to filter run-time events of type Document Attribute Added: {0}**

- 24500**                    **Exception {0} occurred during execution of event processor {1}**
- 25002W**                    **Error occurred while subscribing to {0} run-time event. The dashboards may not display any data.**
- Explanation**            Event processor did not subscribe to the run-time event type due to one of the following reasons:- Trading Networks NERV custom bundle was not copied to the NERV config bundles location.- Universal Messaging server was not up and running.
- Action**                    Ensure the following:- If you are using Trading Networks NERV custom bundle, ensure to copy the bundle to the NERV config bundles location. Refer to 9.7 webMethods Trading Networks Administrators guide for details.- If you are using Universal Messaging, ensure the server is up and running.
- 25003W**                    **Error occurred while unsubscribing from {0} run-time event.**
- Explanation**            Event processor did not unsubscribe from the run-time event type due to one of the following reasons:- Event processor did not subscribe to the run-time event type successfully.- Universal Messaging server was down after the processor subscribed to the run-time event type.
- Action**                    Ensure the following:- If the event processor subscribed to the run-time event type successfully.- If you are using Universal Messaging, ensure the server is up and running at all times.
- 25500**                    **The following error occurred while suspending or unsuspending document delivery for a partner: {2}. The PartnerId is {0}, and the Id of the schedule is {1}.**
- 25501**                    **Error occurred while adding a delivery suspension schedule.**
- 25502**                    **Error occurred while updating a delivery suspension schedule.**
- 25503**                    **Error occurred while viewing a delivery suspension schedule.**
- 25504**                    **Error occurred while deleting a delivery suspension schedule.**
- 25505**                    **Error occurred while activating a delivery suspension schedule.**

25506	<b>Error occurred while deactivating a delivery suspension schedule.</b>
25507	<b>Error occurred while changing the Suspension Status of a delivery suspension schedule.</b>
25508	<b>Error occurred while checking the validity of a delivery suspension schedule.</b>
25509	<b>Error occurred while checking or unchecking the Suspend Delivery checkbox.</b>
25510	<b>An exception occurred while switching a deliverySuspendData validity to {0}.</b>
25511	<b>An exception occurred while selecting invalid status deliverySuspendData.</b>
25512	<b>An exception occurred while selecting invalid status deliverySuspendData.</b>

26002	<b>Error occurred while viewing a delivery suspension schedule on Integration Server.</b>
26003	<b>Error occurred while cancelling a delivery suspension schedule on Integration Server.</b>
26004	<b>Error occurred on Integration Server while changing the status of a delivery suspension schedule to inactive.</b>
26005	<b>Error occurred on Integration Server while changing the status of a delivery suspension schedule to active.</b>

- 26006            **Successfully added the following delivery suspension schedule to Integration Server: {0}**
  
- 26007            **Successfully updated the following delivery suspension schedule on Integration Server: {0}**
  
- 26008            **Successfully fetched the following delivery suspension schedule from Integration Server: {0}**
  
- 26009            **Successfully cancelled the following delivery suspension schedule on Integration Server: {0}**
  
- 26010            **Successfully suspended the following delivery suspension schedule on Integration Server: {0}**
  
- 26011            **Successfully resumed the following delivery suspension schedule on Integration Server: {0}**
  
- 26012            **Error occurred on Integration Server while checking for the existence of a delivery suspension schedule.**
  
- 26013            **Error occurred while parsing the date and time of a delivery suspension schedule.**
  
- 26014            **Error invoking remote service - {0} for alias - {1}.**
  
- 26015            **Error invoking local service - {0}.**
  
- 26016            **Error occurred retrieving VFS list from ActiveTransfer aliases**
  
- 26017            **ActiveTransfer service is not executable, please check alias - {0} is accessible or not.**

---

26018	<b>Large Document Delivery to remote ActiveTransfer not supported</b>
26019	<b>View Transaction Settings</b>
26020	<b>Edit Transaction Settings</b>
26021	<b>Unable to connect to ActiveTransfer. Contact your System Administrator</b>
3011	<b>(username={0})already exists.No new account created.Mapping done.</b>
<b>Explanation</b>	While creating a partner account, Trading Networks found an existing user with the same name. No new account was created. Mapping was completed..
<b>Action</b>	Provide a unique name and try again.
3012	<b>Encountered error while enabling the {0} package.</b>
<b>Explanation</b>	This error shows up when trying to enable the WmTN package.
<b>Action</b>	Contact your system administrator.
3013	<b>Encountered error while disabling the {0} package.</b>
<b>Explanation</b>	This error shows up while trying to disable the WmTN package.
<b>Action</b>	Contact your system administrator.
3017	<b>An error occurred while trying to insert document (doc id = {0}, sender id = {1}) into the database.</b>
<b>Explanation</b>	Exception occurred during inserting the document into the database, possibly due to a database or usage error.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
3023	<b>No such documents: {0}.</b>
3024	<b>Could not instantiate documents {0}.</b>

- 3025E**            **Error occurred while reinitializing Trading Networks JDBC connection pool in Integration Server.**
- Explanation**    Trading Networks reinitializes the JDBC connection pool when a connection error occurs. This reinitialization disconnects all connections to the Trading Networks database. An error occurred during the reinitialization.
- Action**            Use the Integration Server Administrator JDBC Pools page to reinitialize the Trading Networks JDBC connection pool.
- 
- 3027**            **Exception in finding database specific Class: {0}**
- 
- 3028**            **TPA with id {0} is locked**
- 
- 3068**            **Error while persisting queue. For details check the full stack trace.**
- Explanation**    In webMethods Trading Networks, while registering a queue, if there is any error in scheduling the queue, this error is thrown.
- Action**            Check the full stack trace or contact your system administrator.
- 
- 3069**            **Error occurred while changing the status of the following queue: {0}.**
- 
- 3070**            **Error occurred while changing the status of the queues.**
- 
- 3100**            **Exception occurred while clearing TNASSET\_READTIMEKEEPER table.**
- 
- 3243**            **Cannot process message that is not javax.mail.internet.MimeMessage or javax.mail.internet.MimeBodyPart. Current message is: {0}**
- Explanation**    Cannot parse the message as it is not a javax.mail.internet.MimeMessage or javax.mail.internet.MimeBodyPart.
- Action**            Check the error message and take action as appropriate.
- 
- 4000**            **Successfully saved the {1} delivery suspension schedule to Trading Networks database. The Id of the schedule is {0}.**

---

4001	<b>Successfully updated the {1} delivery suspension schedule on Trading Networks database. The Id of the schedule is {0}.</b>
4002	<b>Successfully fetched the following delivery suspension schedule from Trading Networks database: {0}</b>
4003	<b>Successfully deleted the following delivery suspension schedule from Trading Networks database: {0}</b>
4004	<b>Successfully changed the status of the following delivery suspension schedule to {1} on Trading Networks database: {0}</b>
4005	<b>Successfully changed the suspension status of the following delivery suspension schedule to {1} on Trading Networks database: {0}</b>
4006	<b>Successfully fetched the delivery suspension schedule with PartnerId {0} from Trading Networks database.</b>
4007	<b>A delivery suspension schedule with the following name already exists in Trading Networks database: {0}</b>
4008	<b>Error occured while executing Stored Procedures</b>
4024	<b>Invalid Receiver ID</b>
<b>Explanation</b>	In webMethods Trading Networks, while setting the BizDoc envelope attribute, if the receiver ID is not a valid partner ID, this error is thrown.
<b>Action</b>	Enter a valid partner ID (for a receiver ID) and try again.
4168	<b>Exception encountered while listing all the processing rules.</b>
<b>Explanation</b>	Encountered an exception while getting the list of rules from the cache. Either the cache is not updated with data, or there is some exception in the database.
<b>Action</b>	The details of the exception is in the full message. Take appropriate action to resolve the problem described in the exception message.

<b>4169</b>	<b>Access denied, as the User "{0}" does not have the privilege to {1} {2}.</b>
<b>Explanation</b>	You do not have the required permission to take this action on the processing rule.
<b>Action</b>	Request that the Integration Server administrator assign the required permission.
<b>4170</b>	<b>Error while recognizing the document.</b>
<b>Explanation</b>	Error encountered while recognizing the document. The document may be corrupted.
<b>Action</b>	Check if the document is a valid XML document and not a corrupt document.
<b>4177</b>	<b>{0} contacts deleted with ContactID {1}.</b>
<b>Explanation</b>	Encountered data inconsistency issue while contact deletion. Expected exactly one matching contact.
<b>Action</b>	Contact Software AG Global Support.
<b>4178</b>	<b>{0} addresses deleted with AddressID {1}.</b>
<b>Explanation</b>	Encountered data inconsistency issue while address deletion. Expected exactly one matching address.
<b>Action</b>	Contact Software AG Global Support.
<b>4179</b>	<b>{0} connections deleted with ID {1}.</b>
<b>Explanation</b>	Encountered data inconsistency issue while destination deletion. Expected exactly one matching destination.
<b>Action</b>	Contact Software AG Global Support.
<b>4209</b>	<b>Error encountered while getting the host ID</b>
<b>Explanation</b>	The Trading Networks profile cache might be corrupted.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
<b>4210</b>	<b>Error encountered while getting all the Processing Rule matches for the document.</b>
<b>Explanation</b>	Encountered exception while retrieving rules from cache. The cache might not be updated.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message. Reload the WmTNWeb package.

---

<b>4211</b>	<b>Error encountered while getting all the Delivery Services.</b>
<b>Explanation</b>	Encountered exception while retrieving delivery services from the database.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
<b>4212</b>	<b>Error encountered while getting RuleName with the name - {0}.</b>
<b>Explanation</b>	The rule may have been deleted by someone in a different session.
<b>Action</b>	Refresh the rule cache by executing the search again.
<b>4213</b>	<b>Error encountered while getting Last Change ID.</b>
<b>Explanation</b>	This may be due to an exception while fetching the Last Change ID from the database.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
<b>4214</b>	<b>Error encountered while getting Processing Rule with ID - {0}.</b>
<b>Explanation</b>	The rule may have been deleted by someone in a different session.
<b>Action</b>	Refresh the rule cache by running the search again.
<b>4215</b>	<b>Error encountered while changing the ordinality of the Processing Rule.</b>
<b>Explanation</b>	Changing the ordering of the processing rules in another session might have caused an error while validating or updating the ordinal numbering in the database.
<b>Action</b>	Refresh the rule cache by executing the search again.
<b>4216</b>	<b>Error encountered while deleting the processing rules.</b>
<b>Explanation</b>	The rule might have been deleted by someone in a different session.
<b>Action</b>	Refresh the rule cache by executing the search again.
<b>4217</b>	<b>Error encountered while updating the processing rule with Rule Name - {0}.</b>
<b>Explanation</b>	The rule might have been deleted by someone in a different session.
<b>Action</b>	Refresh the rule cache by executing the search again.

<b>4218</b>	<b>Error encountered while creating the processing rule with Rule Name - {0}.</b>
<b>Explanation</b>	Error encountered while inserting the rule into the database.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
<b>4219</b>	<b>Error encountered while querying the processing rules.</b>
<b>Explanation</b>	The query would have failed while picking the rules. Check the database actions.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
<b>4220</b>	<b>Access denied, as the User "{0}" does not have the permission to {1} processing rule.</b>
<b>Explanation</b>	You do not have the permission to do the necessary action on the processing rule.
<b>Action</b>	Request that the Integration Server administrator assign the required permission.
<b>4221</b>	<b>Access denied, as the User "{0}" does not have the permission to {1} processing rule - "{2}".</b>
<b>Explanation</b>	You do not have the permission to do the necessary action on the processing rule.
<b>Action</b>	Request that the Integration Server administrator assign the required permission.
<b>4228</b>	<b>Exception while changing the processing rule status.</b>
<b>Explanation</b>	The rule might have been deleted by someone in a different session.
<b>Action</b>	Refresh the rule cache by executing the search again.
<b>4237</b>	<b>Error encountered while getting the profiles associated with Profile Group.</b>
<b>Explanation</b>	There might be a database error while retrieving the profile groups.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
<b>4238</b>	<b>Access denied, as the User "{0}" does not have the permission to {1} processing rule - "{2}".</b>
<b>Explanation</b>	You do not have the permission to do the necessary action on the processing rule.
<b>Action</b>	Request that the Integration Server administrator assign the required permission.

---

<b>4241E</b>	<b>Processing rule "{0}" change status failed. Processing rule update collision detected. This rule has been modified by another user. Refresh your rule list and retry this operation.</b>
<b>Explanation</b>	In webMethods Trading Networks, while changing the status of a processing rule, if it is modified by another user, this error is thrown.
<b>Action</b>	Refresh your rule list and try again.
<b>4247E</b>	<b>Exception encountered while moving the processing rule. Invalid Ordinal given in Select Location.</b>
<b>Explanation</b>	In webMethods Trading Networks, while moving the processing rule, if an invalid ordinal location is specified, this error is thrown.
<b>Action</b>	Specify a valid ordinal location and try again.
<b>4258E</b>	<b>Error encountered while creating the processing rule with Rule Name - "{0}". Rule name already exists. Change the name and save again.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a processing rule, if the rule name already exists, this error is thrown.
<b>Action</b>	Ensure to give a unique processing rule name and try again.
<b>4274E</b>	<b>Error encountered while querying for the delivery queues.</b>
<b>Explanation</b>	In webMethods Trading Networks, if any error occurs while retrieving registered queues, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>4305E</b>	<b>The following sender(s) and receiver(s) configured in the processing rule do not exist in the system. Sender(s):"{0}" Receiver(s):"{1}"</b>
<b>Explanation</b>	An error occurred while trying to create or update a processing rule with senders and receivers that do not exist in Trading Networks.
<b>Action</b>	Ensure the senders and receivers are valid.
<b>4306E</b>	<b>The following sender(s) configured in the processing rule do not exist in the system: "{0}"</b>
<b>Explanation</b>	An error occurred while trying to create or update a processing rule with senders that do not exist in Trading Networks.
<b>Action</b>	Ensure the senders are valid.

<b>4307E</b>	<b>The following receiver(s) configured in the processing rule do not exist in the system: "{0}"</b>
<b>Explanation</b>	An error occurred while trying to create or update a processing rule with receivers that do not exist in Trading Networks.
<b>Action</b>	Ensure the receivers are valid.
<b>4415</b>	<b>IS DocType signature (ISDocType ={0}) is invalid. Provide a valid IS DocType signature.</b>
<b>Explanation</b>	Exception encountered while loading the corresponding IS docType.
<b>Action</b>	Check whether the namespace of the corresponding IS docType is correct.
<b>4416</b>	<b>Cannot add extended field definition. Extended field with name "{0}" already exists.</b>
<b>Explanation</b>	Extended field with same name already exists.
<b>Action</b>	Supply different name for extended field.
<b>4417</b>	<b>Cannot update extended field definition. Extended field with name "{0}" already exists.</b>
<b>Explanation</b>	Extended field with same name already exists.
<b>Action</b>	Supply a different name for the extended field.
<b>4422</b>	<b>A problem was encountered deleting the field definition.</b>
<b>4423</b>	<b>Created New Permission "{0}" for role "{1}".</b>
<b>4424</b>	<b>Deleted Permission "{0}" for role "{1}".</b>
<b>4429E</b>	<b>Importing a profile for {0} (id={1}), which is marked as "My Enterprise", but it has different ID than the existing My Enterprise profile for this Trading Network. Cannot change the identity of the My Enterprise profile.</b>
<b>Explanation</b>	You are attempting to import a partner profile marked as "My Enterprise." However, the target Trading Networks server already contains a My Enterprise profile, with a different ID. The existing My Enterprise cannot be overwritten because the IDs are different.
<b>Action</b>	Import the partner data without selecting the "My Enterprise" profile.

---

<b>4430E</b>	<b>Importing a profile for {0} (id={1}), which is marked as "My Enterprise". A "My Enterprise" profile already exists for this Trading Network. If you want to update it, use the Force option.</b>
<b>Explanation</b>	You are attempting to import a partner profile marked as "My Enterprise" without using the "Force import" option; however, the target Trading Networks server already contains a My Enterprise profile.
<b>Action</b>	Import the partner data using the "Force import" option.
<b>4431E</b>	<b>Error encountered while adding DLS artifacts with name {0}. The permissions for role {1} is null or empty.</b>
<b>Explanation</b>	You are attempting to import or add a DLS dataset, but the dataset does not contain any permissions.
<b>Action</b>	If you are adding a DLS dataset, specify the required permissions for the dataset. If you are importing a DLS dataset, make sure that the data is correct.
<b>4432</b>	<b>Error encountered while adding DLS artifacts with name {0}. The role name is null or empty.</b>
<b>Explanation</b>	You are attempting to import or add a DLS dataset, but the dataset does not contain any roles.
<b>Action</b>	If you are adding a DLS dataset, specify the required roles for the dataset. If you are importing a DLS dataset, make sure that the data is correct.
<b>4433E</b>	<b>Error encountered while adding DLS artifacts with name {0}. The partner with name {1} is referenced in DLS data, but this partner does not exist on your Trading Networks system.</b>
<b>Explanation</b>	You are attempting to import or add a DLS dataset, but the partner specified in the dataset is not present in the Trading Networks database.
<b>Action</b>	If this happens while importing a DLS dataset, make sure that the dependent partner profile is also imported along with the DLS dataset.
<b>4434E</b>	<b>Error encountered while adding DLS artifacts with name {0}. The document type with name {1} is referenced in DLS data, but this document type does not exist on your Trading Networks system.</b>
<b>Explanation</b>	You are attempting to import or add a DLS dataset, but the document type specified in the dataset is not present in the Trading Networks database.
<b>Action</b>	If this happens while importing a DLS dataset, make sure that the dependent document type is also imported along with the DLS dataset.

**4435E**                    **Error encountered while adding DLS artifacts with name {0}. The processing rule with name {1} is referenced in DLS data, but this processing rule does not exist on your Trading Networks system.**

**Explanation**            You are attempting to import or add a DLS dataset, but the processing rule specified in the dataset is not present in the Trading Networks database.

**Action**                    If this happens while importing a DLS dataset, make sure that the dependent processing rule is also imported along with the DLS dataset.

**4436W**                    **A deleted profile with the same internal id already exists. Unable to recreate a deleted profile.**

**Explanation**            You are attempting to import a partner. However, the target Trading Networks server already contains a deleted partner with the same ID.

**Action**                    Import the partner using the "Force import" option.

**4461**                    **Profile has errors.**

**Explanation**            In webMethods Trading Networks, while adding a profile information, if the profile has any error, this error message is displayed.

**Action**                    Contact your system administrator.

**4464**                    **Attempt to import extended field "{0}" associated with the fieldgroup "{1}" failed. The extended field "{0}" associated with the fieldgroup "{1}" is not defined on your Trading Networks system.**

**Explanation**            This error occurred because the extended field associated with the fieldgroup is not defined on your Trading Networks system.

**Action**                    Define the extended field associated with the fieldgroup on your Trading Networks system and try again.

**4467**                    **Administering Partner Onboarding**

**4468**                    **The invitation with id "{0}" does not exist.**

**4469**                    **Error occurred while changing the status of the partners.**

---

4470	<b>Error occurred while changing the status of the following partner: {0}.</b>
4471	<b>Partner Delivery Suspended</b>
4472	<b>Partner Delivery Unsuspended</b>
4473	<b>Error encountered deleting contact (contactID={0}).</b>
4474	<b>Error encountered deleting address (addressID={0}).</b>
4500	<b>A database error occurred while deleting a Binary Type.</b>
<b>Explanation</b>	In webMethods Trading Networks, at the time of deleting a binary type, if there is a database error, then this error shows up.
<b>Action</b>	Contact your system administrator.
5030	<b>Exception encountered while adding a new TPA.</b>
<b>Explanation</b>	Encountered an exception while writing the TPA to the database. There might be an SQL Exception while writing to the database or some of the constraints were missed out.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
5031	<b>Exception encountered while updating the TPA.</b>
<b>Explanation</b>	Encountered an exception while writing the TPA to the database. There might be an SQL Exception while writing to the database or some of the constraints were missed out.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
5032	<b>Exception encountered while fetching the TPA.</b>
<b>Explanation</b>	Encountered an exception while fetching the TPA from the database. There might be an SQL Exception while retrieving the TPA from the database or there are TPA caching errors.
<b>Action</b>	The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.

- 5033**                    **Exception encountered while deleting the TPA.**
- Explanation**        Encountered an exception while deleting the TPA from the database. This may be because of SQL Exception during writing to database or may be due to removing the TPA from Cache.
- Action**                The details of the exception are in the full message. Take appropriate action to resolve the problem described in the exception message.
- 
- 5034**                    **No initial value created for tpaData.**
- Explanation**        The tpaData parameter was not created. A wrong service output might have caused the issue.
- Action**                Check if the initService defined in the TPA is correct and generates the correct output. The output of the TPA initService must generate an IData for the "tpaData" parameter.
- 
- 5036E**                 **An exception occurred while retrieving TPA names.**
- Explanation**        My webMethods encountered an error while displaying the TPA names.
- Action**                Take appropriate action to resolve the problem described in the exception and try to perform the action again.
- 
- 5037E**                 **An exception occurred while executing the validation service.**
- Explanation**        My webMethods encountered an error while validating TPA data on the Trading Partner Agreement Details page.
- Action**                Take appropriate action to resolve the problem described in the exception and try to perform the action again.
- 
- 5038**                    **No output data was returned by the validation service.**
- Explanation**        The validation service does not conform to the format of the TPA validation service output record "wm.tn.rec:TPAValidateServiceOutput."
- Action**                Correct the service to pass the output in the format described by the output record "wm.tn.rec:TPAValidateServiceOutput."
- 
- 5042**                    **Queue**
- 
- 5043**                    **TPA updated on {0} at {1}**

---

5096	<b>Document delivered via ActiveTransfer. VFS Path: {0} ActiveTransfer Transaction ID: {1}</b>
6006	<b>Export file location not specified</b>
Explanation	Trading Networks is not able to find the export directory location.
Action	Specify the export directory location in the tn.deployer.export.dir TN property
6011	<b>Asset deletion failed - roll back to previous state failed.</b>
Explanation	Trading Networks is not able to delete the asset, because of which rollback to the previous state has failed.
Action	Contact your system administrator.
6013	<b>The binary file is either corrupt or not as expected.</b>
Explanation	The binary file provided for deployment is not valid.
Action	Provide a valid binary file.
6014	<b>The artifact ID is not available in the corresponding artifact properties file.</b>
Explanation	Trading Networks needs the artifact ID for installing the artifacts for deployment. This is missing from the artifact properties file.
Action	Provide the artifact ID in the artifact properties file or recreate the artifact ID.
6015	<b>checkpointId is required.</b>
Explanation	Trading Networks needs the checkpoint ID as input for the execution of the checkpoint service. This is missing.
Action	Add the checkpointId in the checkpoint service.
6016	<b>Delete Archive Schedule failed during rollback.</b>
Explanation	Trading Networks may need to delete the archive schedule during deployment roll back. This deletion of archive schedule has failed during rollback.
Action	Contact your system administrator.

- 6017**                    **Delete Private Queue for Partner failed during rollback.**
- Explanation**        Trading Networks may need to delete the private queue for Partner during deployment roll back. This deletion of private queue has failed during rollback.
- Action**                Contact your system administrator.
- 
- 6018**                    **Delete Public Queue failed during rollback.**
- Explanation**        Trading Networks may need to delete the public queue during deployment roll back. The deletion of public has failed during rollback.
- Action**                Contact your system administrator.
- 
- 6024**                    **The ProductNamespace "{0}" is not specific to Trading Networks.The expected ProductNamespace is "TN".**
- Explanation**        During deployment, a ProductNamespace, which needs to be passed to the service, is required. The expected ProductNamespace specific to Trading Networks that needs to be passed to the service is "TN".
- Action**                Specify the ProductNamespace as TN.
- 
- 6025**                    **The runtime type is not specific to Trading Networks.**
- Explanation**        The Ping service requires type as input. The value of "type" for Trading Networks is TN.
- Action**                Specify type as TN.
- 
- 6026**                    **deploymentId is required.**
- Explanation**        The deleteDeliveredArtifacts and activateArtifacts services need the deploymentId. This is not specified.
- Action**                Specify the deploymentId as the service input.
- 
- 6030**                    **assetIdentifier(s) is required.**
- Explanation**        The Trading Networks assets that are to be deleted has not been provided.
- Action**                Provide the Trading Networks assets.
- 
- 6032**                    **Asset deletion has failed.**
- Explanation**        If the deletion of a Trading Networks asset has failed, this message is displayed.
- Action**                Based on the additional details in the message, you need to fix the issue and try to delete the Trading Networks asset again.

---

<b>6034</b>	<b>Trading Networks is not able to retrieve the asset references for the asset: "{0}" of asset type: "{1}". "{2}"</b>
<b>Explanation</b>	Trading Networks is not able to retrieve the asset references for the specified asset due to an unexpected error.
<b>Action</b>	Try to delete the asset again. If it still does not go through, contact your system administrator.
<b>6056</b>	<b>Access denied. User "{0}" does not have the permission to {1} {2}, for Sender "{3}" and Receiver "{4}".</b>
<b>Explanation</b>	User does not have the permission required to perform the necessary action on the TPA.
<b>Action</b>	Ask the B2B Administrator to assign the user the required permission.
<b>6057</b>	<b>Access denied. User "{0}" does not have the permission to view {1}.</b>
<b>Explanation</b>	User does not have the permission required to view the TPA.
<b>Action</b>	Request the B2B Administrator to assign user the required permission.
<b>7010</b>	<b>{0} is not a valid Trading Networks version. Rerun this program by specifying the supported version of your old Trading Networks.</b>
<b>Explanation</b>	The Trading Networks version selected for migration is not valid.
<b>Action</b>	Rerun this program by specifying the correct version number.
<b>7011</b>	<b>Source Server version is not provided. Rerun this program by specifying the source server version of Trading Networks.</b>
<b>Explanation</b>	The Trading Networks version selected for migration is not provided.
<b>Action</b>	Rerun the migration utility by specifying the version number.
<b>7019</b>	<b>The property file {0} does not exist.</b>
<b>Explanation</b>	The properties.cnf file does not exist.
<b>Action</b>	Add the properties.cnf file to the "IntegrationServer > packages > WmTN > config" location.

<b>7020E</b>	<b>Document Type with name "{0}" already exists. Change the name and save again.</b>
<b>Explanation</b>	Document type with the same name already exists.
<b>Action</b>	Change the document type name and save again.
<b>7021E</b>	<b>Error while changing the status of the doctype.</b>
<b>Explanation</b>	Document type status update operation failed.
<b>Action</b>	See the stack trace and take appropriate action.
<b>7022E</b>	<b>Error while changing the status of the doctype {0}.</b>
<b>Explanation</b>	Document type status update operation failed.
<b>Action</b>	See the stack trace and take appropriate action.
<b>7023</b>	<b>List of doctypes for changing status can not be empty.</b>
<b>Explanation</b>	List of doctypes is a mandatory field.
<b>Action</b>	Configure a list of doctypes while changing the status.
<b>7031</b>	<b>The Trading Networks configuration file was successfully migrated.</b>
<b>7033</b>	<b>The Trading Networks data was successfully migrated.</b>
<b>7034</b>	<b>Started migrating onboarding templates data.</b>
<b>7035</b>	<b>Successfully completed migrating onboarding templates data.</b>
<b>7036</b>	<b>Migrating onboarding templates data failed.</b>

8001E	<code>new String[]{"Cannot process message that is not javax.mail.internet.MimeMessage or javax.mail.internet.MimeBodyPart. Current message is: {0} ","","0"}</code>
<b>Explanation</b>	Message cannot be parsed because it is neither a MimeMessage, nor a MimeBodyPart.
<b>Action</b>	Check the message type before invoking the service.

**8013E**                    **Error encountered while downloading sample csv file. Please see error log for more details, contact your Administrator.**

**Explanation**            In webMethods Trading Networks, in Partner Onboarding, while downloading a sample csv file for uploading a partner, if any error is encountered, this message appears.

**Action**                    Contact your system administrator.

**8050**                    **A template field with this name already exists: {0}.**

**Explanation**            In webMethods Trading Networks, while creating a new template field, if the name is not unique, this error shows up.

**Action**                    Ensure to have a unique template field name and try again.

**8052**                    **An exception occurred while inserting template field (ID = "{0}", Name = "{1}").**

**Explanation**            In webMethods Trading Networks, while adding a template field, if an exception occurs while adding a new template field, this error is thrown.

**Action**                    See the exception stack trace to find out the reason for this error.

**8053**                    **An exception occurred while updating template field (ID = "{0}", Name = "{1}").**

**Explanation**            In webMethods Trading Networks, while updating a template field, if an exception occurs while updating the template field, this error occurs.

**Action**                    Check the exception stack trace to find out the reason for the error.

**8054**                    **An exception occurred while inserting template group (ID = "{0}", Name = "{1}").**

**Explanation**            In webMethods Trading Networks, while inserting a template field group, if an exception occurs while updating the template field, this error occurs.

**Action**                    Check the exception stack trace to find out the reason for the error.

**8055**                    **A group with this name already exists: {0}.**

**Explanation**            In webMethods Trading Networks, while adding a group to a questionnaire template, if the name already exists, this error shows up.

**Action**                    Ensure to use a unique group name and try again.

---

8056	<b>An exception occurred while fetching template fields for group(ID = "{0}", Name = "{1}").</b>
<b>Explanation</b>	In webMethods Trading Networks, while fetching template fields for a group, if an exception occurs, this error shows up.
<b>Action</b>	Check the exception stack trace to find out the reason for the error.
8057	<b>A template with this name already exists: {0}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while adding a questionnaire template, if the name already exists, this error shows up.
<b>Action</b>	Ensure to use a unique questionnaire template name and try again.
8059	<b>The invitation has expired. Contact your administrator.</b>
8060	<b>The invitation is disabled now. Contact your administrator.</b>
8061	<b>An exception occurred while querying templates.</b>

- Action**                    Contact a B2B Administrator for granting the corresponding permissions.
- 
- 9003...0**                **Could not configure Ehcache. Either the SoftwareAG-IS-TN.xml file is missing from the config folder or it is an invalid XML file.**
- 
- 9004**                    **Access denied, as the User "{0}" doesnot have the privilege to view {1}.**
- Explanation**            The corresponding user does not have permissions to view the corresponding Trading Networks asset.
- Action**                    Contact a B2B Administrator for granting the corresponding permissions.
- 
- 9004...0**                **Trading Networks Server startup failed. Error initializing Ehcache manager {0}. Contact your administrator to restore the SoftwareAG-IS-TN.xml file.**
- 
- 9005**                    **Recipient info is not available for the recipientCert**
- 
- 9006E**                    **Primary and secondary certificates already exist for this owner, partner, and usage combination.**
- Explanation**            A maximum of two certificates can be uploaded per unique combination of owner, partner, and usage.
- Action**                    Delete the primary or secondary certificate before uploading an additional certificate.

<b>9007</b>	<b>Error occurred while initializing Ehcache cache manager and accessing cache from it. Error message : {0}.</b>
<b>Explanation</b>	An error occurred while initializing the Ehcache cache manager and accessing cache from it.
<b>Action</b>	Contact your system administrator.
<b>9008</b>	<b>Failed to initialize cache manager for Ehcache. The SoftwareAG_IS_TN.xml file is missing, replaced, or invalid.</b>
<b>Explanation</b>	webMethods Trading Networks failed to initialize the cache manager for Ehcache. The SoftwareAG_IS_TN.xml file is missing, replaced, or invalid.
<b>Action</b>	Add a valid SoftwareAG_IS_TN.xml file in the configurations folder.
<b>9009E</b>	<b>Error occurred while initializing Trading Networks because the following caches are not configured: {0}</b>
<b>Explanation</b>	An error occurred while initializing Trading Networks because one or more caches are not configured.
<b>Action</b>	Check the cache manager SoftwareAG.IS.TN, configure the missing caches, and restart Integration Server.
<b>9010</b>	<b>API error</b>
<b>9012E</b>	<b>Certificate with certificate ID {0} is already the primary certificate.</b>
<b>Explanation</b>	The wm.tn.security:setPrimaryCertificate service was called incorrectly using the certificate ID of a primary certificate.
<b>Action</b>	Specify the certificate ID of the secondary certificate as input to wm.tn.security:setPrimaryCertificate service.
<b>9015</b>	<b>Database error in getting prepared statement or Set proper dequeue strategy map entry</b>
<b>9016</b>	<b>Error encountered in wm.tn.security:setPrimaryCertificate.</b>
<b>TNS.0000.1010E</b>	<b>Error while running archive operation: {0}.</b>
<b>Explanation</b>	Trading Networks encountered an exception while archiving documents.
<b>Action</b>	See the exception in the full message. Take appropriate action to resolve the problem described in the exception.

- TNS.0000.1013**      **{0} could not be completed because another {1} operation was under way or Archive\_WorkTable has contents that were not cleaned up. If there is no archive/deletion service running, cleanup the table to complete the operation.**
- Explanation**      Trading Networks cannot complete the archive or delete operation either because another archive or delete operation is in progress or because the Archive\_WorkTable has contents that need to be cleaned up.
- Action**            If no other archive or delete operation is in progress, clean up the Archive\_WorkTable contents and restart the incomplete archive or delete operation.
- 
- TNS.0000.2004E**    **Cannot save a {0} without a {1}.**
- Explanation**      Trading Networks cannot save the specified profile component because a required field is missing.
- Action**            Enter the value for the required field.
- 
- TNS.0000.2005E**    **Error logging database event.**
- Explanation**      Trading Networks encountered an exception while writing an activity log entry to the database.
- Action**            See the exception written to the server log. Take appropriate action to resolve the problem described in the exception.
- 
- TNS.0000.2006E**    **Error encountered while deleting {0}. {1} rows changed in the database.**
- Explanation**      Instead of deleting exactly one row from a table in the database, Trading Networks deleted the specified number of rows.
- Action**            See the exception written to the server log. Take appropriate action to resolve the problem described in the exception.
- 
- TNS.0000.2008E**    **Table not recognized: {0}.**
- Explanation**      Trading Networks found a profile field in the database that refers to a nonexistent table.
- Action**            Ensure that your query is for an existing profile field.
- 
- TNS.0000.2009E**    **Error while inserting document {0}.**
- Explanation**      Trading Networks encountered an exception while writing a document to the database.
- Action**            See the exception in the full message. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0000.2011E</b>	<b>Error while querying documents: {0}. Original SQL: {1}.</b>
<b>Explanation</b>	Encountered an SQLException while performing a document query.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2012E</b>	<b>Inserting field definition failed.</b>
<b>Explanation</b>	Attempted to add a profile field definition, but the database was unchanged.
<b>Action</b>	Contact webMethods Customer Care.
<b>TNS.0000.2016E</b>	<b>An attempt was made to access the SQL statement {0}, which was not defined in the configuration file.</b>
<b>Explanation</b>	Attempted to execute an SQL statement that is not available in the file of externalized SQL statements (dbops.sql).
<b>Action</b>	If you have modified the dbops.sql file, restore the file to its prior state.
<b>TNS.0000.2026E</b>	<b>An attempt was made to save an extended field with an unsupported data type. Name={0}, Data type={1}.</b>
<b>Explanation</b>	Attempted to save an extended field for a partner, but the field's value is not a supported data type.
<b>Action</b>	Supply a value that is one of the supported data types for an extended field.
<b>TNS.0000.2027D</b>	<b>Could not update type {0} for attribute {1}.</b>
<b>Explanation</b>	Attempted to save a document attribute, but the attribute did not reference a valid document type.
<b>Action</b>	If you are explicitly calling services to save an attribute, ensure that the attribute refers to a valid document type.
<b>TNS.0000.2029E</b>	<b>The database has no version information. Either it has not been initialized, or it has been changed to an invalid state by an external process.</b>
<b>Explanation</b>	The TNModelVersion table is missing. Data from this table was accidentally deleted, the table was dropped, or the database is corrupt.
<b>Action</b>	Restore this table from the most recent backup. If the database is corrupt, work with your DBA to determine the cause. In this case, you will need to restore the entire database to the most recent backup.

<b>TNS.0000.2031S</b>	<b>No model version information was available from the database.</b>
<b>Explanation</b>	The TNModelVersion table is missing. Data from this table was accidentally deleted, the table was dropped, or the database is corrupt.
<b>Action</b>	Restore this table from the most recent backup. If the database is corrupt, work with your DBA to determine the cause. In this case, you will need to restore the entire database to the most recent backup.
<b>TNS.0000.2036E</b>	<b>Unsupported encoding {0} declared in the TN config file (tn.store.encoding).</b>
<b>Explanation</b>	The tn.store.encoding property was set to an invalid value.
<b>Action</b>	Set the tn.store.encoding property to a valid value.
<b>TNS.0000.2037S</b>	<b>The model version specified (tnmv:) seems to be missing from the dbops.sql file in your WmTN package. Check the file and try again.</b>
<b>Explanation</b>	The dbops.sql file must begin with "-- tnmv: x.x", where "x.x" is the current TNModelVersion number. This line has been removed or altered.
<b>Action</b>	Restore the dbops.sql file to the correct state.
<b>TNS.0000.2039S</b>	<b>There was an error while reading the dbops.sql file in your WmTN package. The original error message was: {0}.</b>
<b>Explanation</b>	Encountered an exception while reading the dbops.sql file. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2040E</b>	<b>Error encountered while updating {0}. {1} rows changed in the database.</b>
<b>Explanation</b>	Instead of updating exactly one row in a table in the database, Trading Networks updated the specified number of rows.
<b>Action</b>	Contact webMethods Customer Care.
<b>TNS.0000.2041W</b>	<b>Error while redefining attribute {0} ({1}).</b>
<b>Explanation</b>	Encountered an SQLException while updating a document attribute.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.

<b>TNS.0000.2042E</b>	<b>Error encountered while updating {0}. {1} rows changed in the database for {2}.</b>
<b>Explanation</b>	Instead of updating exactly one row in a table in the database, Trading Networks updated the specified number of rows.
<b>Action</b>	Contact webMethods Customer Care.
<b>TNS.0000.2047E</b>	<b>No extended fields were deleted for group {0} (partnerID={1}).</b>
<b>Explanation</b>	Expected to delete exactly one row in the PartnerProfileField table in the database. Instead, Trading Networks did not delete any rows.
<b>Action</b>	There seems to be an error while deleting. Find out why the row did not get deleted.
<b>TNS.0000.2051E</b>	<b>Unable to insert binary object (partnerID={0}).</b>
<b>Explanation</b>	An INSERT statement was unsuccessful in adding a row to the database.
<b>Action</b>	The exception is in the full message. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2064S</b>	<b>There was an error interpreting the model version specifier (tnmv:) in the dbops.sql file in your WmTN package. The original error message was: {0}.</b>
<b>Explanation</b>	The dbops.sql table must begin with "-- tnmv: x.x", where "x.x" is the current TN Model Version number. This line has been altered.
<b>Action</b>	Restore this line to its correct state.
<b>TNS.0000.2066E</b>	<b>The main connection to the data store has not been initialized. Check the Trading Networks JDBC connection pool.</b>
<b>Explanation</b>	There is no connection to the Trading Networks database.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to test the connection to the Trading Networks database. You may need to adjust the connection pool settings or verify that the database is functioning normally.
<b>TNS.0000.2067E</b>	<b>Extended field (fieldID={0}) not deleted (partnerID={1}).</b>
<b>Explanation</b>	A DELETE statement was unsuccessful in removing a row from the database.
<b>Action</b>	Check the database connection or see the logs for more detailed stack trace information and take appropriate action.

<b>TNS.0000.2079E</b>	<b>More than one extended field (fieldID={0}) removed in a single delete operation (partnerID={1}).</b>
<b>Explanation</b>	Instead of deleting exactly one extended field in the database, Trading Networks deleted the specified number of fields.
<b>Action</b>	Check which other extended fields could have been deleted along with the intended one, then recreate the appropriate extended fields and redo the mapping.
<b>TNS.0000.2085E</b>	<b>Cannot change a {0} without a {1}.</b>
<b>Explanation</b>	Attempting to update a profile component, but a required field is missing.
<b>Action</b>	Supply a value for the missing field.
<b>TNS.0000.2089E</b>	<b>Trading Networks could not retrieve data from your database. Go to the JDBC Pools page in the Integration Server Administrator and make sure your database URL, user name, and password are set correctly. Also make sure you created the Trading Networks database tables as described in the webMethods Installation Guide.</b>
<b>Explanation</b>	The TNModelVersion table is missing from the Trading Networks database. The reason can be one of the following: 1) The Trading Networks database tables have not yet been created. 2) Data from TNModelVersion table was accidentally deleted. 3) The TNModelVersion table was dropped. 4) Your database is corrupt.
<b>Action</b>	Check your database. If the Trading Networks tables have not been created, create them. If the TNModelVersion table is missing or not valid, recreate it. If your database is corrupt, work with your database administrator to determine the cause. You might need to restore your entire database from the most recent backup.
<b>TNS.0000.2096E</b>	<b>Document {0} from this sender was not successfully stored in the data store. The original exception message was: {1}.</b>
<b>Explanation</b>	Encountered an exception while writing a document to the database.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2104E</b>	<b>An attempt was made to access the SQL statement {0} before SQL statements were read from the disk.</b>
<b>Explanation</b>	An SQL statement was used before the SQL statement cache was initialized.
<b>Action</b>	If your package uses Trading Networks facilities, be sure to declare a dependency on the WmTN package in your package's manifest.v3 file.

<b>TNS.0000.2110E</b>	<b>Error decoding type {0}.</b>
<b>Explanation</b>	Encountered an IOException while decoding binary data from the database into a BizDocType object.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2112E</b>	<b>Document type not saved. A document type with the name [{0}] already exists. Cannot have two document types with the same name but different IDs.</b>
<b>Explanation</b>	You cannot have two document types with the same name.
<b>Action</b>	Change the name of the document type and save it again.
<b>TNS.0000.2114E</b>	<b>The system could not load the JDBC driver {0} for connection to the data store. Check the CLASSPATH setting and try again.</b>
<b>Explanation</b>	The driver specified for the Trading Networks functional alias on the JDBC Pools Configuration page of the Integration Server could not be found.
<b>Action</b>	Make sure the driver is in your classpath.
<b>TNS.0000.2119E</b>	<b>Unknown or deleted attribute {0}.</b>
<b>Explanation</b>	The wm.tn.doc:setAttribute service was supplied an invalid attribute ID or name.
<b>Action</b>	Supply a valid attribute ID or name.
<b>TNS.0000.2127E</b>	<b>Error encountered while updating Contact. {0} rows changed in database for {1} {2}.</b>
<b>Explanation</b>	Instead of updating exactly one row in the Contact table in the database, Trading Networks updated the specified number of rows.
<b>Action</b>	Check the affected details and verify whether the data can be recreated.
<b>TNS.0000.2131E</b>	<b>Could not find doc {0}; no document type {1}.</b>
<b>Explanation</b>	Could not create a bizdoc from binary data in the database. The TN document type it references does not exist.
<b>Action</b>	The document type corresponding to the bizdoc may have been deleted, or the associated data may be corrupted. Contact Customer Care.

<b>TNS.0000.2132E</b>	<b>Could not archive documents.</b>
<b>Explanation</b>	Encountered an SQLException while archiving documents.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2133E</b>	<b>Could not delete archived documents.</b>
<b>Explanation</b>	Encountered an SQLException while deleting archived documents.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2134E</b>	<b>Could not delete documents.</b>
<b>Explanation</b>	Encountered an SQLException while deleting documents.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2135E</b>	<b>Could not queue documents.</b>
<b>Explanation</b>	Encountered an SQLException while queuing a document for polling.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2136E</b>	<b>Could not poll documents.</b>
<b>Explanation</b>	Encountered an SQLException while polling for documents.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2137E</b>	<b>Could not accept document.</b>
<b>Explanation</b>	Encountered an SQLException while accepting a polled document.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2138E</b>	<b>Could not query the event table.</b>
<b>Explanation</b>	Encountered an SQLException while querying activity log entries.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0000.2139E</b>	<b>Could not delete the events.</b>
<b>Explanation</b>	Encountered an SQLException while deleting activity log entries.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2140E</b>	<b>Could not instantiate document {0}.</b>
<b>Explanation</b>	Encountered an SQLException while retrieving a document.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2141E</b>	<b>Could not check uniqueness {0}.</b>
<b>Explanation</b>	Encountered an SQLException while querying the database to determine if a document is unique.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2142E</b>	<b>Could not get the user status.</b>
<b>Explanation</b>	Encountered an SQLException while retrieving the user status of a document.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2143E</b>	<b>Could not insert the new document.</b>
<b>Explanation</b>	Encountered an SQLException while saving a new document.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2144E</b>	<b>Could not change status for {0}.</b>
<b>Explanation</b>	Encountered an SQLException while changing the status of a document.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2145E</b>	<b>One of (fromdoc,todoc) must be persisted.</b>
<b>Explanation</b>	Attempted to relate two documents, but neither of them has been saved to the database.
<b>Action</b>	Save one or both of the documents to be related.

<b>TNS.0000.2146E</b>	<b>Could not relate {0} and {1}.</b>
<b>Explanation</b>	Encountered an SQLException while relating two documents.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2147E</b>	<b>Could not get rels: doc={0}, gr={1}.</b>
<b>Explanation</b>	Encountered an SQLException while retrieving related documents.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2148E</b>	<b>The following exceptions occurred:</b>
<b>Explanation</b>	The following exceptions were encountered while retrieving the full set of TN document types.
<b>Action</b>	See each of the following exceptions for details. Take appropriate action to resolve the problem described in each exception.
<b>TNS.0000.2149E</b>	<b>Database error while fetching all types: {0}.</b>
<b>Explanation</b>	Encountered an SQLException while retrieving the full set of TN document types.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2150E</b>	<b>Database error while adding type {0}: {1}.</b>
<b>Explanation</b>	Encountered an SQLException while saving a new TN document type.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2151E</b>	<b>Encoding error while putting type {0}: {1}.</b>
<b>Explanation</b>	Encountered an IOException while saving a new TN document type.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2152E</b>	<b>Database error while updating type {0}: {1}.</b>
<b>Explanation</b>	Encountered an SQLException while updating a TN document type.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0000.2153E</b>	<b>Encoding error while updating type {0}: {1}.</b>
<b>Explanation</b>	Encountered an IOException while saving a new TN document type.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2154E</b>	<b>Cannot aggregate STRING attributes.</b>
<b>Explanation</b>	Attempted to execute an aggregation operation (SUM, AVG, MIN, MAX) on a String attribute.
<b>Action</b>	Do not specify the aggregation operation.
<b>TNS.0000.2160E</b>	<b>Could not queue document for delivery (id={0}).</b>
<b>Explanation</b>	Encountered an SQLException while changing the status of a document to "QUEUED".
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2162E</b>	<b>Trading Networks database pool is not configured. Please configure a database pool for functional alias "TN" and restart the WmTN package.</b>
<b>Explanation</b>	Data required to configure a connection to the database is missing or invalid.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to recreate this data.
<b>TNS.0000.2164E</b>	<b>Error while logging an activity entry to the audit sub system. The exception message is : {0}.</b>
<b>Explanation</b>	Encountered an exception while publishing an activity log entry.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2165E</b>	<b>Error while reading the database configuration. The exception message is : {0}.</b>
<b>Explanation</b>	Trading Networks encountered an exception while reading the database configuration data.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception. You might need to use the JDBC Pools page in the Integration Server Administrator to recreate this data.

**TNS.0000.2168E**      **Trading Networks database pool is not configured properly. Make sure that a valid database pool is assigned for functional alias "TN" and restart the WmTN package.**

**Explanation**      Data required to configure a connection to the database is missing or invalid.

**Action**             Use the Integration Server Administrator JDBC Pools page to recreate this data.

**TNS.0000.2169E**      **Unable to locate the database configuration information. File {0} does not exist.**

**Explanation**      A file required to configure a connection to the database is missing.

**Action**             Use the Integration Server Administrator JDBC Pools page to recreate this data.

**TNS.0000.2170E**      **Trading Networks database pool is not configured properly. Make sure that a valid database pool is assigned to functional alias "TN" and try again.**

**Explanation**      Data required to configure a connection to the database is missing or invalid.

**Action**             Use the Integration Server Administrator JDBC Pools page to recreate this data.

**TNS.0000.2175E**      **The database connection pool associated with TN should allow at least 2 connections. Your TN pool is currently configured with a maximum of {0} connections. Aborting TN startup. Please increase your TN database pool maximum and restart the server.**

**Explanation**      Trading Networks requires at least two connections for its pool. Trading Networks will not initialize with fewer than two connections.

**Action**             Use the Integration Server Administrator JDBC Pools page to increase the number of connections allowed for the Trading Networks database pool. Then restart your server.

**TNS.0000.2180U**      **Database error while deleting document type {0}: {1}.**

**Explanation**      Encountered an SQLException while deleting a document type.

**Action**             The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.

**TNS.0000.2181E**      **A BizDocType with this name already exists: {0}.**

**Explanation**      You cannot have two document types with the same name.

**Action**             Save the document type with a different name.

---

<b>TNS.0000.2184E</b>	<b>The profile field definition "{0}" already exists with a different ID. The field definition was not imported.</b>
<b>Explanation</b>	This error can occur when importing extended profile fields. The most likely cause is that the field was already manually created on the target server.
<b>Action</b>	If you do not intend to import extended field values, this error can be ignored. If you do intend to import extended field values, and no partner yet has a value for this field on your target server, you can change the ID of the field definition to match the one on the source server. Carefully update the ProfileFieldID key in the ProfileField table of the database into which you are importing.
<b>TNS.0000.2185E</b>	<b>An IDType with a key of "{0}" already exists with a different ID description. The IDType "{1}" was not imported. You will need to directly edit the IDType table in your database to correct this problem.</b>
<b>Explanation</b>	The error can occur when importing extended ID types. The most likely cause is that the IDType was already manually created on the target server.
<b>Action</b>	Change the Type column of the IDType table on the target database to match that of the source database.
<b>TNS.0000.2186</b>	<b>Could not update comments for document {0}.</b>
<b>Explanation</b>	Encountered SQLException while updating comments for document.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2199</b>	<b>Error encountered while reading routing status from the database. Exception message: {0}.</b>
<b>Explanation</b>	Encountered SQLException while reading routing status from database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2212</b>	<b>A scheduled archival service with this name already exists.</b>
<b>Explanation</b>	A scheduled archival service with the same name already exists.
<b>Action</b>	Change the name of the scheduled archival service and save again.
<b>TNS.0000.2215</b>	<b>Unable to save scheduled archive service "{0}".</b>
<b>Explanation</b>	Error encountered while updating the archive service.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0000.2221</b>	<b>Interval is not a valid integer.</b>
<b>Explanation</b>	Interval set in the schedule is wrong; it must be a valid integer.
<b>Action</b>	Correct the interval field in the schedule and save the schedule again.
<b>TNS.0000.2222</b>	<b>Interval must be greater than zero.</b>
<b>Explanation</b>	Interval set in the schedule is wrong; it must be greater than zero.
<b>Action</b>	Correct the interval field in the schedule and save the schedule again.
<b>TNS.0000.2223</b>	<b>The scheduled {0} is invalid. Format must be YYYY/MM/DD.</b>
<b>Explanation</b>	Schedule date must be of format YYYY/MM/DD.
<b>Action</b>	Change the schedule according to the format and save it again.
<b>TNS.0000.2224</b>	<b>The scheduled {0} is invalid. Format must be hh:mm:ss.</b>
<b>Explanation</b>	Schedule time must be of format hh:mm:ss.
<b>Action</b>	Change the schedule according to the format and save it again.
<b>TNS.0000.2231</b>	<b>The scheduled delivery date/time is in the past.</b>
<b>Explanation</b>	Schedule delivery date/time set must not be in the past.
<b>Action</b>	Change the delivery schedule with the date/time in the future.
<b>TNS.0000.2232</b>	<b>If an end time is supplied, an end date must also be supplied.</b>
<b>Explanation</b>	End date has to be supplied along with end time.
<b>Action</b>	Set the end date along with the end time, and save the schedule.
<b>TNS.0000.2233</b>	<b>End date/time is in the past.</b>
<b>Explanation</b>	End date/time must not be set in the past.
<b>Action</b>	End date/time should always be later than the start date/time. Correct the end date/time and save the schedule again.
<b>TNS.0000.2234</b>	<b>End date/time is before start date/time.</b>
<b>Explanation</b>	End date/time must not be before the start date/time.
<b>Action</b>	End date/time should always be later than the start date/time. Correct the end date/time and save the schedule again.

<b>TNS.0000.2235</b>	<b>Could not construct a valid timestamp from this schedule. Dates must be in YYYY/MM/DD format and times must be in hh:mm:ss format.</b>
<b>Explanation</b>	Delivery schedule created with an incorrectly formatted date.
<b>Action</b>	Correct the date format and save the delivery schedule.
<b>TNS.0000.2236</b>	<b>Delivery schedule dates must be in the format "YYYY/MM/DD" and times must be in the format "hh:mm:ss".</b>
<b>Explanation</b>	Delivery schedule created with an incorrectly formatted date.
<b>Action</b>	Correct the date format and save the delivery schedule.
<b>TNS.0000.2244</b>	<b>Unable to remove scheduled archival service "{0}".</b>
<b>Explanation</b>	Encountered exception while deleting archival service from database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2246</b>	<b>Unable to update scheduled archival service "{0}".</b>
<b>Explanation</b>	Encountered exception while updating archival service to database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.2301</b>	<b>An exception occurred while listing the document attributes.</b>
<b>Explanation</b>	Encountered exception while getting document attributes from cache or database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.3001E</b>	<b>Persistence Service Failed.</b>
<b>Explanation</b>	Encountered an exception while saving the document to the database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.3002E</b>	<b>An error occurred while trying to insert this document into the database. The original error message was: {0}.</b>
<b>Explanation</b>	Encountered an exception while saving the document to the database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0000.3007E</b>	<b>Non-unique ID(s) detected.</b>
<b>Explanation</b>	This incoming document already exists in the database. This is a duplicate document, based on the unique document criteria.
<b>Action</b>	Notify the document sender that the document sent is a duplicate.
<b>TNS.0000.3008W</b>	<b>This document is not unique. It matched {0} existing documents in the database.</b>
<b>Explanation</b>	This incoming document already exists in the database. This is a duplicate document, based on the unique document criteria.
<b>Action</b>	Notify the document sender that the document sent is a duplicate.
<b>TNS.0000.3015E</b>	<b>Could not get the document bytes.</b>
<b>Explanation</b>	An exception was thrown while adding the document content to the BizDocEnvelope. The document might be corrupt.
<b>Action</b>	Trading Networks wrote the exception to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0000.3016E</b>	<b>No such document: {0}.</b>
<b>Explanation</b>	The wm.tn.doc:view service was passed an invalid internal document ID.
<b>Action</b>	Supply a valid internal document ID to the wm.tn.doc:view service.
<b>TNS.0000.3018E</b>	<b>Invalid duplicate checking service.</b>
<b>Explanation</b>	Custom duplicate check was selected, but either a duplicate check service was not specified or the specified duplicate check service was invalid.
<b>Action</b>	Using My webMethods Server, update the TN document type and/or the processing rule and specify a valid duplicate checking service.
<b>TNS.0000.3019E</b>	<b>The BizDocType refers to a non-existent duplicate checking service: {0}. It may have been renamed, disabled, or deleted.</b>
<b>Explanation</b>	Custom duplicate check was selected, but no duplicate check service was specified or the specified duplicate check service was invalid. This error could also occur when the specified duplicate check service has been renamed, disabled, or deleted.
<b>Action</b>	Using My webMethods Server, update the TN document type and/or the processing rule and specify a valid duplicate checking service.

<b>TNS.0000.3020E</b>	<b>Duplicate document detected.</b>
<b>Explanation</b>	You received a document that failed a custom duplicate document check. The custom duplicate checking service flagged the document as a duplicate.
<b>Action</b>	You can ignore this message, or you can notify the sender of the document that you have received a duplicate.
<b>TNS.0001.1001E</b>	<b>Content Part {0} does not exist in document {1}.</b>
<b>Explanation</b>	The document does not contain the requested content part.
<b>Action</b>	Request a different content part, or request this content part from a different document.
<b>TNS.0001.1002E</b>	<b>Content for Part {0} of document {1} does not exist in TSpace.</b>
<b>Explanation</b>	This is a large document and the requested content part was not found in the temporary storage.
<b>Action</b>	Request a different content part, or request this content part from a different document.
<b>TNS.0001.1003E</b>	<b>Error retrieving content of content part {0} of document {1}. The exception message is : {2}. The stack trace is : {3}</b>
<b>Explanation</b>	An exception was thrown while retrieving the document content.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception message.
<b>TNS.0001.1004E</b>	<b>Unable to find a document type for the given document type name, {0}.</b>
<b>Explanation</b>	Could not find the document type specified for deleting.
<b>Action</b>	Provide a valid TN document type name to the wm.tn.doc:deleteDocuments service.
<b>TNS.0001.1006E</b>	<b>Attempted to update system attributes for the document, but no rows were changed in the database.</b>
<b>Explanation</b>	Trading Networks encountered an error while attempting to update the system attributes of the document.
<b>Action</b>	Retrieve this document from the database and examine it to determine why the error occurred.
<b>TNS.0001.1017</b>	<b>System Attribute update failed.</b>
<b>Explanation</b>	Encountered an exception while updating the system attribute.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0001.1018E</b>	<b>Error when adding large content part named {0} to this document</b>
<b>Explanation</b>	Encountered an exception while adding a large content part to the document.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.1019E</b>	<b>The actual exception is {0}.</b>
<b>Explanation</b>	Encountered an exception while adding a large content part to a document.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.1020E</b>	<b>User{0} is not an administrator and attempted to retrieve a document (docID={1}) that does not belong to him.</b>
<b>Explanation</b>	Users without administrative rights can only retrieve documents that they have either sent or received.
<b>Action</b>	None.
<b>TNS.0001.1021E</b>	<b>You do not have the authority to retrieve this document. Only administrators may access documents that they did not send or receive.</b>
<b>Explanation</b>	Users without administrative rights can only retrieve documents that they have either sent or received.
<b>Action</b>	Request a user with administrative rights to access the document.
<b>TNS.0001.2035E</b>	<b>Recognize: unable to get XML DTD for comparison: {0} {1} {2} {3}</b>
<b>Explanation</b>	The DTD statement in the document may be incorrect.
<b>Action</b>	Check the document that is being processed to ensure that it is structured correctly. If it is not, notify the responsible party about this document.
<b>TNS.0001.2036E</b>	<b>BizDocTypeReg: ERROR invoking recognize for {0}</b>
<b>Explanation</b>	See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.2040E</b>	<b>{0}: No envelope queries specified</b>
<b>Explanation</b>	The TN document type has no envelope queries defined.
<b>Action</b>	Use My webMethods to edit the TN document type and define envelope queries.

---

<b>TNS.0001.2041E</b>	<b>Error filling BizDocTypeStore cache</b>
<b>Explanation</b>	Encountered an error while reading the TN document types from the database and caching them in memory.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database.
<b>TNS.0001.2042E</b>	<b>Doctype info not initialized</b>
<b>Explanation</b>	The BizDocType Registry was not initialized.
<b>Action</b>	Try reloading the WmTN package.
<b>TNS.0001.2043E</b>	<b>Unknown type name: {0}</b>
<b>Explanation</b>	The wm.tn.doctype:view service was passed an invalid TN document type name.
<b>Action</b>	Pass a valid TN document type name to the service.
<b>TNS.0001.2044E</b>	<b>Unknown type id: {0}</b>
<b>Explanation</b>	The wm.tn.doctype:view service was passed an invalid TN document type ID.
<b>Action</b>	Pass a valid TN document type ID to this service.
<b>TNS.0001.2045E</b>	<b>Operation not supported for RecordDocType</b>
<b>Explanation</b>	You cannot create an instance of the RecordDocType.
<b>Action</b>	Creating an instance of the RecordDocType is not allowed.
<b>TNS.0001.2054E</b>	<b>IOException encoding pipeline</b>
<b>Explanation</b>	Encountered an exception while binary-encoding the data for an unknown document type. See the nested exception for details.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.2056E</b>	<b>Query or Transform Failed</b>
<b>Explanation</b>	Encountered an exception while extracting a document attribute and converting its value.
<b>Action</b>	Verify that the attribute extraction query in the TN document type is valid.

<b>TNS.0001.2057E</b>	<b>Transform Failed</b>
<b>Explanation</b>	An error occurred while converting the attribute value.
<b>Action</b>	Use My webMethods to verify that the attribute details about the TN document type are correct. If they are, gather details about the error and contact Software AG Global Support.
<b>TNS.0001.2058E</b>	<b>Error generating query expression</b>
<b>Explanation</b>	Encountered an exception while generating an XML query to extract a document attribute.
<b>Action</b>	Correct the attribute extraction query on the TN document type.
<b>TNS.0001.2059E</b>	<b>No such BizDocType: {0}</b>
<b>Explanation</b>	The wm.tn.doc:createReply service was passed an invalid replyTypeId.
<b>Action</b>	Pass a valid replyTypeId to the service.
<b>TNS.0001.2060E</b>	<b>Doctype info not initialized. BizDocType registry has not been created.</b>
<b>Explanation</b>	The BizDocType Registry was not initialized.
<b>Action</b>	Try reloading the WmTN package.
<b>TNS.0001.2061E</b>	<b>An error occurred when constructing the XML Document object</b>
<b>Explanation</b>	A document object could not be constructed from the XML. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0001.2062E</b>	<b>Recognition failed.</b>
<b>Explanation</b>	Unable to recognize document. See the next message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the next message.
<b>TNS.0001.2063E</b>	<b>There is not enough space on TSpace storage system to store the content of this large document</b>
<b>Explanation</b>	The HDD partition used for temporary storage of large documents is full.
<b>Action</b>	Either change the value of the tn.tspace.location property, or increase the size of the partition.

---

<b>TNS.0001.2065E</b>	<b>Unknown datatype encountered transforming attribute for FFDocType {0}</b>
<b>Explanation</b>	The attribute value supplied in the pipeline for the flat file document is not a String.
<b>Action</b>	Correct the document gateway service that puts this value in the pipeline. The attribute value must be a String.
<b>TNS.0001.2066E</b>	<b>FFDocType {0} encountered an unknown datatype while applying the {1} transformation to the "{2}" attribute.</b>
<b>Explanation</b>	The attribute value supplied in the pipeline for the flat file document is not a String.
<b>Action</b>	Correct the document gateway service that puts this value in the pipeline. The attribute value must be a String.
<b>TNS.0001.2067E</b>	<b>The {0} attribute is required by the {1} doctype. It is missing.</b>
<b>Explanation</b>	The attribute that is required for the flat file TN document type is missing in the pipeline.
<b>Action</b>	Correct the document gateway service that supplies the value for this attribute.
<b>TNS.0001.2068E</b>	<b>FFDocType {0} encountered an error transforming an attribute.</b>
<b>Explanation</b>	The specified flat file document type extracts an attribute. Trading Networks encountered an error while transforming the attribute value.
<b>Action</b>	Use My webMethods to verify that the attribute details for the TN document type are correct. If they are, gather details about the error and contact Software AG Global Support.
<b>TNS.0001.2069E</b>	<b>FFDocType {0} encountered an error while applying the {1} transformation to the "{2}" attribute: {3} : {4}</b>
<b>Explanation</b>	An error occurred while transforming the attribute value.
<b>Action</b>	Use My webMethods to verify that the attribute details for the TN document type are correct. If they are, gather details about the error and contact Software AG Global Support.
<b>TNS.0001.2070E</b>	<b>FFDocType {0} encountered an error reading the document bytes.</b>
<b>Explanation</b>	Encountered a problem while processing the "ffdata" InputStream.
<b>Action</b>	See the entire message for details.

<b>TNS.0001.2071E</b>	<b>FFDocType {0} encountered an error reading the document bytes. {1} : {2}</b>
<b>Explanation</b>	Encountered an exception while reading the "ffdata" InputStream. See the exception message and stack trace for details.
<b>Action</b>	Verify that your document gateway service is not corrupting the "ffdata" InputStream. Resend the document.
<b>TNS.0001.2072E</b>	<b>Cannot unregister a built-in DocType Category: {0}</b>
<b>Explanation</b>	The wm.tn.doctype:unregisterCategory service was passed the name of a built-in TN document type category, such as "XML", or "Flat file".
<b>Action</b>	Do not unregister a built-in category.
<b>TNS.0001.2079E</b>	<b>Could not determine document sender.</b>
<b>Explanation</b>	The TN document type is configured to determine the document sender from the connected user but it could not.
<b>Action</b>	See the entire message for details.
<b>TNS.0001.2080E</b>	<b>Could not determine document sender for doctype "{0}" because there is no connected user.</b>
<b>Explanation</b>	The TN document type is configured to determine the document sender from the connected user but it could not. A possible reason for the error is the lack of a connected user.
<b>Action</b>	Determine why there is not a connected user. Perhaps the document has been submitted by a background thread.
<b>TNS.0001.2081E</b>	<b>Could not get ProfileSummary for sender from connected user "{0}".</b>
<b>Explanation</b>	The TN document type is configured to determine the document sender from the connected user but it could not. There is a connected user, but it does not have a partner profile.
<b>Action</b>	Create a partner profile for the user, or instruct the user to log on the system using a valid partner account.
<b>TNS.0001.2083E</b>	<b>FFDocType {0} encountered an error reading the document bytes. Key "ffdata" is not found in the pipeline</b>
<b>Explanation</b>	The "ffdata" InputStream is missing in the pipeline.
<b>Action</b>	Verify that your document gateway service is not dropping "ffdata" from the pipeline. Resend the document.

---

<b>TNS.0001.2084E</b>	<b>FFDocType {0} encountered an error reading the content of document {1}.</b>
<b>Explanation</b>	This is a large document and Trading Networks encountered an error while reading the document's InputStream from Tspace (hard disk drive space). See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0001.2085E</b>	<b>Error turning stream into bytes (docid={0})</b>
<b>Explanation</b>	The document has an unsupported encoding. See the server log or open this document in Transaction Analysis to see details about the error.
<b>Action</b>	Request the document to be resend using supported encoding.
<b>TNS.0001.2086E</b>	<b>Attribute transformation "{0}" has no data</b>
<b>Explanation</b>	The attribute referenced by this transformation is null.
<b>Action</b>	Gather details about this error, and contact Software AG Global Support.
<b>TNS.0001.2088E</b>	<b>A corrupted document was encountered in recognition: {0}</b>
<b>Explanation</b>	Trading Networks received an XML document that was not structured well.
<b>Action</b>	Correct the original document and resend it.
<b>TNS.0001.2090E</b>	<b>Unable to load the following TN document types because their classes are not found in the classpath: {0}. Either correct the classpath to include the required classes and restart the Server or, if you no longer use these document types, delete them using the wm.tn.doctype:delete service and then restart the Server.</b>
<b>Explanation</b>	There are TN document types in the database that are not available on the classpath.
<b>Action</b>	Correct the classpath to include the required classes and restart the server; or, if you no longer use these TN document types, delete them using the wm.tn.doctype:delete service, and then restart the server.
<b>TNS.0001.2091</b>	<b>Encountered an unsupported encoding</b>
<b>Explanation</b>	Encoding passed in the document is not supported by Integration Server.
<b>Action</b>	Change the document to a supported encoding.

<b>TNS.0001.2092</b>	<b>Error turning stream into bytes: {0}</b>
<b>Explanation</b>	Error encountered while converting the stream to bytes. This could happen if the stream was closed while still being read.
<b>Action</b>	Examine why the connection dropped while reading the stream.
<b>TNS.0001.2093E</b>	<b>This operation is not supported for MissingDocType.</b>
<b>Explanation</b>	The operation attempted to create a BizDocEnvelope from the MissingDocType class.
<b>Action</b>	If you developed code that creates instances of (No Suggestions) ensure that it does not attempt to create a BizDocEnvelope from the MissingDocType class.
<b>TNS.0001.2094E</b>	<b>ERROR: The Java class for this document type was not found.</b>
<b>Explanation</b>	The JAR file that holds the TN document type editor was not found.
<b>Action</b>	If you are viewing a Trading Networks XML or flat file document type, make sure that the tnclient.jar file is in the webMethods6\IntegrationServer\packages\WmTN\code\jars directory on the Integration Server file system. If you are viewing another category of TN document type, make sure that the JAR file with that TN document type editor is in the IntegrationServer\packages\WmTN\code\jars directory.
<b>TNS.0001.2097</b>	<b>Encountered an error while creating MAPI event to Optimize for EventMap {0} and for Sender with PartnerID {1}.</b>
<b>Explanation</b>	The error may be caused due to Broker being stopped.
<b>Action</b>	Start the associated Broker if it is stopped.
<b>TNS.0001.3000E</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3001</b>	<b>Unable to read mime message data source</b>
<b>Explanation</b>	The MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.

---

<b>TNS.0001.3002E</b>	<b>Unable to read mime message data source</b>
<b>Explanation</b>	Problem while reading from input data source.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3003E</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3004E</b>	<b>Unable to handle data of type: {0}</b>
<b>Explanation</b>	Attempted to add a message of type <msgType> to a multi-part MIME message. This type cannot be part of a multi-part MIME message.
<b>Action</b>	Check the message type that is being added to the multi-part MIME message. It must be either a multi-part MIME or a MIME message.
<b>TNS.0001.3005E</b>	<b>Unable to handle null data source</b>
<b>Explanation</b>	Cannot construct a MIME message from null data source.
<b>Action</b>	Pass valid, non-null data source to the service.
<b>TNS.0001.3006</b>	<b>Unable to read mime message data source</b>
<b>Explanation</b>	Problem while reading from input data source.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3007</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3008E</b>	<b>Can not replace existing body part</b>
<b>Explanation</b>	Attempted to add a MIME body part to a MIME message that already contains a body part.
<b>Action</b>	Set the input flag 'replace' on the wm.tn.mime:addBodyPart service to 'yes'. This will replace the existing body part with the new one. Another solution is to set the flag 'multipart' to 'yes'. This will append the new body part to the existing one, making the message a multi-part MIME message.

<b>TNS.0001.3009</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3010</b>	<b>Unable to read mime message data source</b>
<b>Explanation</b>	Problem while reading the input data source.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3011E</b>	<b>getBodyPart not supported on non multipart message</b>
<b>Explanation</b>	Attempted to get a MIME body part other than zero from a non-multipart MIME message.
<b>Action</b>	The number '0' (zero) is the only valid value for the input parameter 'index' of the wm.tn.mime:getBodyPartHeader and wm.tn.mime:getBodyPartContent services when the input MIME message is not a multi-part MIME message.
<b>TNS.0001.3012</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3013</b>	<b>Unable to read mime message data source</b>
<b>Explanation</b>	Problem while reading the input data source.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3014</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3015</b>	<b>Unable to read mime message data source</b>
<b>Explanation</b>	Problem while reading the input data source.
<b>Action</b>	Check input data source for errors.

---

<b>TNS.0001.3016</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3017</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3018</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3019</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3020</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3021</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3022</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.

<b>TNS.0001.3023</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3024E</b>	<b>Unable to determine Content type</b>
<b>Explanation</b>	MIME message does not contain content-type information. Message is improperly structured.
<b>Action</b>	Inform the message sender about the error.
<b>TNS.0001.3025E</b>	<b>Unable to get boundary for multipart mime message</b>
<b>Explanation</b>	MIME message does not contain message boundary information. Message is improperly structured.
<b>Action</b>	Inform the message sender about the error.
<b>TNS.0001.3026</b>	<b>Unable to determine content-type</b>
<b>Explanation</b>	MIME message does not contain content-type information. Message is improperly structured.
<b>Action</b>	Inform the message sender about the error.
<b>TNS.0001.3027</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3028</b>	<b>Unable to read mime message data source</b>
<b>Explanation</b>	The MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3029</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.

---

<b>TNS.0001.3030</b>	<b>Unable to determine content-type</b>
<b>Explanation</b>	MIME message does not contain content-type information. Message is improperly structured.
<b>Action</b>	Inform the message sender about the error.
<b>TNS.0001.3031E</b>	<b>Unable to determine content-type</b>
<b>Explanation</b>	MIME message does not contain content-type information. Message is improperly structured.
<b>Action</b>	Inform the message sender about the error.
<b>TNS.0001.3032E</b>	<b>Unable to read mime message data source</b>
<b>Explanation</b>	The MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3033E</b>	<b>Unable to construct mime message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3034E</b>	<b>Unable to parse Content-Type string</b>
<b>Explanation</b>	MIME message does not contain content-type information. Message is improperly structured.
<b>Action</b>	Inform the message sender about the error.
<b>TNS.0001.3035E</b>	<b>Cannot write message to outputStream, content is null</b>
<b>Explanation</b>	Message does not contain any data.
<b>Action</b>	Construct a MIME message with valid input data.
<b>TNS.0001.3036E</b>	<b>Operation can only be performed on parsed message.</b>
<b>Explanation</b>	The size of a MIME body part can only be determined for MIME messages that are parsed from a complete message. The size of each part cannot be determined when composing a MIME message.
<b>Action</b>	Do not attempt to obtain the size of a MIME body part that is part of a message that is being composed.

<b>TNS.0001.3037E</b>	<b>Unable to parse "Content-Disposition"</b>
<b>Explanation</b>	MIME message does not contain content-disposition information. Message is improperly structured.
<b>Action</b>	Inform the message sender about the error.
<b>TNS.0001.3039E</b>	<b>Unable to get content.</b>
<b>Explanation</b>	Error occurred while reading the message content.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3040E</b>	<b>Message Digest Algorithm "{0}" not supported.</b>
<b>Explanation</b>	User has specified an invalid value for the 'digestAlgorithm' input parameter of the wm.tn.mime:setDigestAlgorithm service.
<b>Action</b>	Specify a valid value of either "MD5" or "SHA-1" for the 'digestAlgorithm' input parameter.
<b>TNS.0001.3041E</b>	<b>Cannot set header for message that is not multipart. Either specify subType or set header using addBodyPart</b>
<b>Explanation</b>	When calling the wm.tn.mime:createMimeData service, header for a non-multipart message cannot be set .
<b>Action</b>	Specify a value for subType, which will create a multi-part MIME message. Alternatively, for a MIME message that is not multi-part, headers can be specified when calling the wm.tn.mime:addBodyPart service.
<b>TNS.0001.3101E</b>	<b>Parameter input must be an InputStream</b>
<b>Explanation</b>	Input parameter 'input' must be an InputStream object.
<b>Action</b>	Pass in an InputStream object.
<b>TNS.0001.3102</b>	<b>Parameter mimeType cannot be null</b>
<b>Explanation</b>	Input parameter 'mimeType' must be sent.
<b>Action</b>	Pass in an mimeType object.
<b>TNS.0001.3103E</b>	<b>content cannot be null when adding a mime body part</b>
<b>Explanation</b>	Content cannot be null when adding a MIME body part
<b>Action</b>	Specify valid content.

---

<b>TNS.0001.3104E</b>	<b>Unable to handle content of type {0}</b>
<b>Explanation</b>	Input parameter 'content' must be one of the following types: InputStream, byte, array, or MIME message.
<b>Action</b>	Specify the value of the 'content' input parameter using one of the three allowed types.
<b>TNS.0001.3105E</b>	<b>Parameter index must be of type int</b>
<b>Explanation</b>	Specified a non-integer value for the 'index' input parameter when attempting to obtain a MIME body part.
<b>Action</b>	Check the value of the input parameter 'index' to ensure it is a non-negative integer.
<b>TNS.0001.3106E</b>	<b>outputStream required</b>
<b>Explanation</b>	Calls to the wm.tn.mime:writeToStream service require an OutputStream object to be specified for the 'outputStream' parameter.
<b>Action</b>	Pass an OutputStream object to the wm.tn.mime:writeToStream service.
<b>TNS.0001.3107E</b>	<b>Unknown digest algorithm {0}</b>
<b>Explanation</b>	User has specified an invalid value for the 'digestAlgorithm' input parameter.
<b>Action</b>	Specify a valid value of either "MD5" or "SHA-1" for the 'digestAlgorithm' input parameter.
<b>TNS.0001.3108E</b>	<b>Parameter mimeType cannot be null</b>
<b>Explanation</b>	The 'mimeType' input parameter has a null value.
<b>Action</b>	Specify a valid value for the 'mimeType' parameter.
<b>TNS.0001.3109E</b>	<b>Parameter headerName cannot be null</b>
<b>Explanation</b>	The headerName parameter cannot be null.
<b>Action</b>	Specify a valid value for the 'headerName' parameter.
<b>TNS.0001.3112E</b>	<b>A digest algorithm must be specified when creating a message digest.</b>
<b>Explanation</b>	The user has specified an invalid value for the 'digestAlgorithm' input parameter.
<b>Action</b>	Specify a valid value of either "MD5" or "SHA-1" for the 'digestAlgorithm' input parameter.

<b>TNS.0001.3200E</b>	<b>Cannot recognize certificates</b>
<b>Explanation</b>	Cannot recognize certificates.
<b>Action</b>	Certificates must be passed in as byte array objects.
<b>TNS.0001.3201E</b>	<b>Cannot recognize certificate</b>
<b>Explanation</b>	Cannot recognize certificates.
<b>Action</b>	Check the certificate format. The certificates must be a DER encoded ASN.1 format.
<b>TNS.0001.3202E</b>	<b>Cannot recognize certificate at index {0}</b>
<b>Explanation</b>	Cannot recognize certificate in chain at index: <index>.
<b>Action</b>	Check the certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3203E</b>	<b>Certificate at index {0} is not valid</b>
<b>Explanation</b>	Cannot recognize certificate at index: <index>
<b>Action</b>	Certificate must be passed in as byte array object.
<b>TNS.0001.3204E</b>	<b>Error attempting to parse message contents</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3205E</b>	<b>Error attempting to read from message source</b>
<b>Explanation</b>	An error occurred while reading message content.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3206E</b>	<b>Recipient certificate is not valid</b>
<b>Explanation</b>	Cannot recognize certificates.
<b>Action</b>	Check the certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3207</b>	<b>Cannot recognize recipient certificate at index {0}</b>
<b>Explanation</b>	Cannot recognize certificate in chain at index: <index>
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.

---

<b>TNS.0001.3208</b>	<b>Cannot recognize recipient certificate at index {0}</b>
<b>Explanation</b>	Cannot recognize certificate in chain at index: <index>
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3209E</b>	<b>Cannot recognize recipient certificate at index {0}</b>
<b>Explanation</b>	Cannot recognize certificate at index: <index>.
<b>Action</b>	Check the certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3210E</b>	<b>Certificate format is invalid for recipient certificate at index {0}</b>
<b>Explanation</b>	Cannot recognize certificate in chain at index: <index>.
<b>Action</b>	Check the certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3211E</b>	<b>Specified keylength {0}, is not allowed</b>
<b>Explanation</b>	Invalid value specified for key length of RC2 encryption algorithm.
<b>Action</b>	Specify one of the allowed key length values: "40", "64", or "128".
<b>TNS.0001.3212E</b>	<b>Specified algorithm '{0}', is not supported</b>
<b>Explanation</b>	Invalid encryption algorithm is specified.
<b>Action</b>	Specify one of the supported encryption algorithms: "TripleDES", "RC2", or "DES".
<b>TNS.0001.3213E</b>	<b>In getEncryptedMimeObject: Cannot handle datasource of type: {0}</b>
<b>Explanation</b>	When trying to create an encrypted message, the 'mimeSrc' object must be a MimeData object.
<b>Action</b>	Pass in a MimeData object. MimeData objects are created using the wm.tn.mime:createMimeData service.
<b>TNS.0001.3214E</b>	<b>In getEncryptedMimeObject: Cannot handle null datasource</b>
<b>Explanation</b>	The 'mimeSrc' input parameter cannot be null.
<b>Action</b>	Specify a valid MimeData object in the 'mimeSrc' parameter.
<b>TNS.0001.3215</b>	<b>Unable to get signer's private key</b>
<b>Explanation</b>	Private key for sender may be missing.
<b>Action</b>	Ensure in My webMethods that the sender's private key is associated.

<b>TNS.0001.3216E</b>	<b>Unable to get signer's private key</b>
<b>Explanation</b>	Cannot recognize the private key.
<b>Action</b>	Check the supplied private key. It should be a DER encoded ASN.1 representation of an RSA private key.
<b>TNS.0001.3217E</b>	<b>Unable to get recipient certificate(s).</b>
<b>Explanation</b>	Cannot recognize the certificates.
<b>Action</b>	Check the certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3218E</b>	<b>Signer's certificate is not a valid data format</b>
<b>Explanation</b>	Cannot recognize certificates.
<b>Action</b>	Check the certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3219E</b>	<b>Signer's certificate is not recognized</b>
<b>Explanation</b>	Cannot recognize certificates.
<b>Action</b>	Check the certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3220E</b>	<b>Input parameter mimeSrc to service createSignedData cannot be of type {0}. It should be of type MimeData.</b>
<b>Explanation</b>	When trying to create a signed message, the 'mimeSrc' object must be a MimeData object.
<b>Action</b>	Pass in a MimeData object. MimeData objects are created using the wm.tn.mime:createMimeData service.
<b>TNS.0001.3221E</b>	<b>Input parameter mimeSrc to service createSignedData cannot be null. It should be of type MimeData.</b>
<b>Explanation</b>	When trying to create a signed message, the 'mimeSrc' object must be a MimeData object.
<b>Action</b>	Pass in a MimeData object. MimeData objects are created using the wm.tn.mime:createMimeData service.
<b>TNS.0001.3222E</b>	<b>Unable to parse message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.

---

<b>TNS.0001.3223E</b>	<b>Input parameter mimeSrc should be of type MimeData</b>
<b>Explanation</b>	The 'mimeSrc' object must be a MimeData object or an InputStream object.
<b>Action</b>	Pass in a MimeData or InputStream object. MimeData objects are created using the wm.tn.mime:createMimeData service.
<b>TNS.0001.3224E</b>	<b>Could not obtain message content</b>
<b>Explanation</b>	Error occurred while reading the message content.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3225E</b>	<b>Content is not of a recognized encryption type</b>
<b>Explanation</b>	Cannot process the encrypted message.
<b>Action</b>	Contact the sender to re-send the message using the correct format.
<b>TNS.0001.3226E</b>	<b>Given certificate does not decrypt message</b>
<b>Explanation</b>	The message was not encrypted for the certificate that was passed to the service.
<b>Action</b>	First, validate that the correct certificate is used to decrypt the message. Then, if the certificate is the correct one, contact the message sender to determine which certificate was actually used to create the encrypted message.
<b>TNS.0001.3229E</b>	<b>Cannot Process this object. Write this MimeData to stream, then process that stream.</b>
<b>Explanation</b>	Cannot process the object.
<b>Action</b>	Write the MimeData to a stream and then process the stream again.
<b>TNS.0001.3230E</b>	<b>Input parameter mimeType must be a MimeData object</b>
<b>Explanation</b>	The 'mimeType' input parameter is not a MimeData object.
<b>Action</b>	Pass in a MimeData object. MimeData objects are created using the wm.tn.mime:createMimeData service.
<b>TNS.0001.3231E</b>	<b>Message content is not certificates only data. Message could not be processed.</b>
<b>Explanation</b>	The message cannot be handled by the wm.tn.mime:processCertsOnlyData service.
<b>Action</b>	Use the wm.tn.mime:createMimeMessage service to determine if the message is signed or encrypted. Then use either wm.tn.mime:processSignedData or wm.tn.mime:processEncryptedData as appropriate.

<b>TNS.0001.3232E</b>	<b>Input parameter mimeSrc must be a MimeData object</b>
<b>Explanation</b>	The 'mimeSrc' object must be a MimeData object.
<b>Action</b>	Pass a MimeData object. MimeData objects are created using the wm.tn.mime:createMimeData service.
<b>TNS.0001.3233E</b>	<b>Message content is not signed data. Message could not be processed</b>
<b>Explanation</b>	The message cannot be handled by the wm.tn.mime:processSignedData service.
<b>Action</b>	Use the wm.tn.mime:createMimeMessage service to determine if the message is signed or encrypted. Then use either wm.tn.mime:processSignedData or wm.tn.mime:processEncryptedData as appropriate.
<b>TNS.0001.3234E</b>	<b>Signing key is not valid</b>
<b>Explanation</b>	The key used to sign the message is invalid.
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3235E</b>	<b>Unable to sign document</b>
<b>Explanation</b>	The key used to sign the message is invalid.
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3236E</b>	<b>Invalid signer certificate file information</b>
<b>Explanation</b>	The signer certificate chain is invalid.
<b>Action</b>	The signer certificate chain must be an array of certificates.
<b>TNS.0001.3237E</b>	<b>Certificate at index {0} not in recognizable format</b>
<b>Explanation</b>	Cannot recognize certificate in chain at index: <index>.
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3238E</b>	<b>Invalid certificate input at index {0}</b>
<b>Explanation</b>	Cannot recognize certificate in chain at index: <index>.
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.

---

<b>TNS.0001.3239E</b>	<b>Signature could not be verified</b>
<b>Explanation</b>	The signature is invalid. The signature cannot be validated.
<b>Action</b>	Contact the message creator to determine what message was originally sent.
<b>TNS.0001.3240E</b>	<b>Expired certificate chain</b>
<b>Explanation</b>	A certificate used to sign the message has expired.
<b>Action</b>	Notify the message creator that the certificates used to sign the message are invalid.
<b>TNS.0001.3241E</b>	<b>Error in certificate chain</b>
<b>Explanation</b>	The certificate chain is invalid.
<b>Action</b>	Check certificate format. The certificates must be a DER encoded ASN.1 format. Ensure that the certificates form a chain. If the chain consists of Cert A and Cert B, the issuer of Cert A should be the same as the subject of Cert B.
<b>TNS.0001.3242E</b>	<b>Untrusted certificate</b>
<b>Explanation</b>	The certificate used to sign the message is not signed by a trusted certificate authority. On the other hand, the signature is structured correctly.
<b>Action</b>	The message should not be trusted because the certificate authority is not trusted. Add the certificate authority to the trusted certificate authorities, or the message creator must use a certificate issued by a trusted certificate authority to sign the message.
<b>TNS.0001.3244E</b>	<b>Error using temporary storage space</b>
<b>Explanation</b>	An error occurred when using the temporary storage system.
<b>Action</b>	See the webMethods Integration Server User Guide for more details. Additional details are available in the exception message.
<b>TNS.0001.3245E</b>	<b>Unable to parse Encrypted Content. Invalid encrypted data.</b>
<b>Explanation</b>	The message cannot be decrypted.
<b>Action</b>	Check the server log for additional error information. The stack trace of this error should contain additional information why this message cannot be decrypted.

<b>TNS.0001.3246E</b>	<b>Unable to decrypt data.</b>
<b>Explanation</b>	The message could not be decrypted.
<b>Action</b>	Check the server log for additional error information. The stack trace of this error should contain additional information why this message cannot be decrypted.
<b>TNS.0001.3247E</b>	<b>Unable to parse Encrypted Content. Private key does not decrypt data.</b>
<b>Explanation</b>	The private key used to decrypt the message cannot decrypt the message.
<b>Action</b>	First, validate that the correct private key is used to decrypt the message. Then, if the private key is correct, contact the message sender to determine which certificate was used to create the encrypted message.
<b>TNS.0001.3248E</b>	<b>Unable to determine hash algorithm. Parameter micalg was null</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3249E</b>	<b>Unable to determine hash algorithm. Unknown micalg: {0}</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3250E</b>	<b>Improperly formed multipart/signed message</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3251E</b>	<b>Cannot process body part of type {0}</b>
<b>Explanation</b>	Error occurred while processing the message.
<b>Action</b>	Check the error message and take action as appropriate.
<b>TNS.0001.3252E</b>	<b>Cannot process signed data with content type {0}</b>
<b>Explanation</b>	Message does not seem to be a signed message and thus cannot be processed by the wm.tn.mime:processSignedData service.
<b>Action</b>	Use the wm.tn.mime:createMimeMessage service to determine if the message is signed or encrypted. Then, use either wm.tn.mime:processSignedData or wm.tn.mime:processEncryptedData as appropriate. Otherwise, obtain the message content by using the wm.tn.mime:getBodyPartContent service.

---

<b>TNS.0001.3253E</b>	<b>Unable to parse Content Type</b>
<b>Explanation</b>	Source data used to construct the MIME message is not a properly structured MIME message.
<b>Action</b>	Check the input data. Fix the message to conform to the MIME standard.
<b>TNS.0001.3254E</b>	<b>Unable to compute message digest using algorithm: {0}</b>
<b>Explanation</b>	The digest algorithm is either invalid or is not a supported algorithm.
<b>Action</b>	Specify a supported algorithm. Valid values for the digest algorithm are: "SHA-1" or "MD5".
<b>TNS.0001.3255E</b>	<b>Either "profileAlias" or ("privKey","signerCert") are required</b>
<b>Explanation</b>	To execute properly, the service requires either a valid value for 'profileAlias' or a valid value for the 'privKey' and 'signerCert' input parameters.
<b>Action</b>	Specify a value for either 'profileAlias', or 'privKey' and 'signerCert'. See the webMethods Trading Networks Built-In Services Reference for more details about this service.
<b>TNS.0001.3256E</b>	<b>Either "profileAlias" or ("privKey","recipientCert") are required</b>
<b>Explanation</b>	To execute properly, the service requires either a valid value for 'profileAlias', or a valid value for the 'privKey' and 'recipientCert' input parameters.
<b>Action</b>	Specify a value for either 'profileAlias', or 'privKey' and 'recipientCert'. See the webMethods Trading Networks Built-In Services Reference for more details about this service.
<b>TNS.0001.3257E</b>	<b>Algorithm {0} not supported</b>
<b>Explanation</b>	The message was encrypted using the <algorithmName> algorithm. Cannot decrypt messages encrypted with this algorithm.
<b>Action</b>	Can decrypt messages that are encrypted with RC2, TripleDes, or DES algorithms only.
<b>TNS.0001.3258E</b>	<b>Invalid RC2 parameter version: {0}</b>
<b>Explanation</b>	This version of the RC2 algorithm is unsupported or invalid. The RC2 algorithm is supported with 40, 64, or 128 bit keys.
<b>Action</b>	Contact the message sender to ensure that a supported RC2 key length is being used.

<b>TNS.0001.3259</b>	<b>Supplied certificate cannot decrypt content</b>
<b>Explanation</b>	Decryption failed as the available certificates failed to decrypt content.
<b>Action</b>	Check if the certificates are correctly mapped to the user.
<b>TNS.0001.3300E</b>	<b>No algorithm specified</b>
<b>Explanation</b>	Mandatory 'algorithm' input parameter contained no value.
<b>Action</b>	Specify a valid value for the 'algorithm' input parameter. Valid values are either "SHA-1" or "MD5".
<b>TNS.0001.3301E</b>	<b>Specified algorithm {0}, not supported</b>
<b>Explanation</b>	The 'algorithm' Input parameter contained an invalid value.
<b>Action</b>	Specify a valid value for the 'algorithm' input parameter. Valid values are either "SHA-1" or "MD5".
<b>TNS.0001.3302E</b>	<b>Security provider not found</b>
<b>Explanation</b>	An internal error occurred.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0001.3303E</b>	<b>Input to createMessageDigest must be byte[] or InputStream</b>
<b>Explanation</b>	The 'input' parameter must be a byte array or InputStream object.
<b>Action</b>	Specify a byte array or InputStream for the 'input' parameter.
<b>TNS.0001.3304E</b>	<b>Parameter "data" must be a byte[] or InputStream</b>
<b>Explanation</b>	The 'data' input parameter must be a byte array or InputStream object.
<b>Action</b>	Specify a byte array or InputStream for the 'data' parameter.
<b>TNS.0001.3305E</b>	<b>Parameter "signerInfo" cannot be null</b>
<b>Explanation</b>	Mandatory 'signerInfo' input parameter must contain a value.
<b>Action</b>	Specify valid information for the 'signerInfo' input parameter.
<b>TNS.0001.3306E</b>	<b>Unable to process "signerInfo" at index {0}</b>
<b>Explanation</b>	An error occurred attempting to process the signerInfo at index <index>.
<b>Action</b>	The server error log contains a stack trace with additional information about the error.

---

<b>TNS.0001.3307E</b>	<b>Invalid certificate chain</b>
<b>Explanation</b>	Cannot recognize certificates.
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3308E</b>	<b>Invalid certificate at index {0}</b>
<b>Explanation</b>	Cannot recognize certificate in chain at index: <index>.
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3309E</b>	<b>Required parameter "signatureStream" cannot be null.</b>
<b>Explanation</b>	Required 'signatureStream' parameter cannot be null.
<b>Action</b>	Pass an OutputStream object to the wm.tn.mime:sign service, in the 'signatureStream' parameter.
<b>TNS.0001.3310E</b>	<b>Error occured reading input stream, cannot construct signature.</b>
<b>Explanation</b>	Error occurred while reading the message content.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3311E</b>	<b>Hash Algorithm {0} not supported for signer at index {1}</b>
<b>Explanation</b>	Hash Algorithm <algorithmName> not supported for signer at index <index>.
<b>Action</b>	Change the <algorithmName> at <index> to be one of the allowed algorithm names: "MD5" or "SHA-1".
<b>TNS.0001.3312E</b>	<b>Bad certificate. Unable to set signer certificates.</b>
<b>Explanation</b>	Cannot recognize certificate in chain at index: <index>.
<b>Action</b>	Check certificate format. The certificate must be a DER encoded ASN.1 format.
<b>TNS.0001.3313E</b>	<b>Input parameter "signature" cannot be null.</b>
<b>Explanation</b>	The 'signature' input parameter cannot be null.
<b>Action</b>	Pass the signature to verify into the service in the 'signature' input parameter. The 'signature' object should be either a byte array or an InputStream object.

<b>TNS.0001.3314E</b>	<b>Input parameter "signature" must be a byte[] or InputStream</b>
<b>Explanation</b>	The 'signature' input parameter must be a byte[] or InputStream.
<b>Action</b>	The 'signature' input parameter must be a byte[] or InputStream.
<b>TNS.0001.3315E</b>	<b>Input parameter "data" required for verifying detached signature</b>
<b>Explanation</b>	The 'data' input parameter cannot be null.
<b>Action</b>	Pass in the 'data' input parameter of the service, the data that is to be verified. The 'data' object should be either a byte array or an InputStream object.
<b>TNS.0001.3316E</b>	<b>Input parameter "data" must be a byte[] or InputStream</b>
<b>Explanation</b>	The 'data' input parameter must be a byte[] or InputStream.
<b>Action</b>	The 'data' input parameter must be a byte[] or InputStream.
<b>TNS.0001.3317E</b>	<b>An error occurred while attempting to verify the signature.</b>
<b>Explanation</b>	Problem while reading from input data source.
<b>Action</b>	Check input data source for errors.
<b>TNS.0001.3318E</b>	<b>Signature provided is not PKCS#7 SignedData</b>
<b>Explanation</b>	Signature provided is not PKCS#7 SignedData.
<b>Action</b>	The wm.tn.mime:verify service can verify PKCS#7 SignedData signature only.
<b>TNS.0001.3319E</b>	<b>Input parameter "outputStream" must be an OutputStream</b>
<b>Explanation</b>	The 'outputStream' input parameter must be an OutputStream.
<b>Action</b>	The 'outputStream' input parameter must be an OutputStream.
<b>TNS.0001.3320E</b>	<b>Input contained no signer information when processed as {0} type signature</b>
<b>Explanation</b>	The message is not properly signed.
<b>Action</b>	This message cannot be verified. Contact the message creator to verify the proper message structure.
<b>TNS.0001.3321E</b>	<b>Parameter "data" must be null when parameter detachedSignature equals false.</b>
<b>Explanation</b>	The 'data' parameter must be null when 'detachedSignature' parameter equals to false.
<b>Action</b>	If the signature is detached, then set the 'detachedSignature' parameter to "true". Otherwise, do not pass in a value for 'data'. The signed message should be passed in via the 'signature' input parameter.

---

<b>TNS.0001.3322</b>	<b>Parameter "data" must not be null</b>
<b>Explanation</b>	The 'data' input parameter cannot be null.
<b>Action</b>	Pass the data into the service in the 'data' input parameter. The 'data' object should be either a byte array or an InputStream object.
<b>TNS.0001.3323E</b>	<b>Certificate chain cannot be null</b>
<b>Explanation</b>	Certificate chain cannot be null.
<b>Action</b>	Specify a certificate chain to use to sign this message.
<b>TNS.0001.3324E</b>	<b>Private key or keyAlias required</b>
<b>Explanation</b>	Private key or keyAlias required.
<b>Action</b>	To sign this message, specify either a private key, or use a keyAlias.
<b>TNS.0001.3325E</b>	<b>Unable to decode signed message. Verify that signature type specified (detached or implicit) matches actual type.</b>
<b>Explanation</b>	Unable to decode the signed message.
<b>Action</b>	Verify that the specified signature type (detached or implicit) matches the actual type.
<b>TNS.0001.3326</b>	<b>Unable to create digest. Input parameter "data" must be of type com.wm.app.tn.mime.DigestableInputStream or byte[].</b>
<b>Explanation</b>	Error while creating message digest.
<b>Action</b>	Check that the input parameter is passed correctly. Input parameter 'data' must be of type com.wm.app.tn.mime.DigestableInputStream, or byte[].
<b>TNS.0001.3327E</b>	<b>Unable to write message to outputStream.</b>
<b>Explanation</b>	Error occurred while writing the signed message.
<b>Action</b>	The server error log contains a stack trace with additional information about the error.
<b>TNS.0001.3328E</b>	<b>Only one "{0}" can be specified in "signerInfo"</b>
<b>Explanation</b>	When signing a message using a profile alias, you can only use one alias.
<b>Action</b>	Sign the message with only one profile alias.

<b>TNS.0001.3400E</b>	<b>Values are required for both input parameters type and id</b>
<b>Explanation</b>	Values are required for both 'type' and 'id' input parameters.
<b>Action</b>	Set the 'type' input parameter to "file" and the 'id' parameter to the name of the file that the InputStream will read from.
<b>TNS.0001.3401E</b>	<b>Input parameter type cannot be null</b>
<b>Explanation</b>	Values are required for both 'type' and 'id' input parameters.
<b>Action</b>	Set the 'type' input parameter to "file" and the 'id' parameter to the name of the file that the InputStream will read from.
<b>TNS.0001.3402E</b>	<b>Input parameter id cannot be null</b>
<b>Explanation</b>	Values are required for both 'type' and 'id' input parameters.
<b>Action</b>	Set the 'type' input parameter to "file" and the 'id' parameter to the name of the file that the InputStream will read from.
<b>TNS.0001.3403E</b>	<b>Unable to open SharedInputStream</b>
<b>Explanation</b>	An error occurred while reading from the specified data source.
<b>Action</b>	Check that the specified data source exists. The Integration Server error log should contain additional error information.
<b>TNS.0001.3404E</b>	<b>Value "{0}" for parameter type is not supported. Please select from allowed values.</b>
<b>Explanation</b>	The 'type' input parameter must be set to "file".
<b>Action</b>	Provide an allowed value. The 'type' input parameter must be set to "file".
<b>TNS.0001.3501E</b>	<b>Parameter "{0}" must not be null</b>
<b>Explanation</b>	The parameter called <parameterName> must be available but it does not exist in the pipeline .
<b>Action</b>	Specify a valid value for the <parameterName> parameter.
<b>TNS.0001.4001E</b>	<b>No profile store to validate partner ID</b>
<b>Explanation</b>	Unable to retrieve the profile store, probably due to a database error or a validation error.
<b>Action</b>	Check that the data is not corrupted or the database connection is active.

---

<b>TNS.0001.4002E</b>	<b>Error transforming attribute {0}: {1}</b>
<b>Explanation</b>	An exception was thrown while transforming a document attribute value.
<b>Action</b>	The exception was written to the server log. See the log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.4003E</b>	<b>BizDocAttribute: can't connect to profile store</b>
<b>Explanation</b>	Encountered an exception during initialization.
<b>Action</b>	Contact Software AG Global Support. Prepare the following information: server and error logs, a copy of the Support Information page from the Trading Networks Console, and the WmTN/config/properties.cnf file.
<b>TNS.0001.4006E</b>	<b>No profile store to transform attribute {0}</b>
<b>Explanation</b>	Trading Networks was unable to retrieve the profile store.
<b>Action</b>	The exception was written to the server log. See the log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.4007E</b>	<b>Unable to transform attribute {0}: attribute type {1} doesn't match function type {2}</b>
<b>Explanation</b>	Trading Networks could not transform the value of the attribute because the selected transformation is inappropriate for the data type of the attribute.
<b>Action</b>	Using My webMethods, update the TN document type that specifies the invalid transformation for the specified attribute. Select a transformation that is appropriate for the data type of the attribute.
<b>TNS.0001.4008E</b>	<b>Error fetching all attributes: {0}</b>
<b>Explanation</b>	An exception was thrown while reading all attributes from the database.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.4009E</b>	<b>Error defining attribute {0}: {1}</b>
<b>Explanation</b>	An exception was thrown while saving an attribute to the database.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.4010E</b>	<b>Error listing types for {0}: {1}</b>
<b>Explanation</b>	An exception was thrown while retrieving all TN document types that use an attribute.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.

<b>TNS.0001.4011E</b>	<b>Error redefining attribute {0}: {1}</b>
<b>Explanation</b>	An exception was thrown while updating an attribute in the database.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.4012E</b>	<b>Supplied value must be a number</b>
<b>Explanation</b>	A processing rule contains extended criteria that uses a custom attribute with a NUMBER data type. However, the value you specified in the condition for this attribute is not a numeric value.
<b>Action</b>	Using My webmethods, update the extended criteria in the processing rule to provide a numeric value for attributes that have a NUMBER data type.
<b>TNS.0001.4013E</b>	<b>Supplied value can not be transformed to a date</b>
<b>Explanation</b>	A processing rule contains extended criteria that uses a custom attribute with a DATETIME data type. However, the value you specified in the condition for this attribute is not a date.
<b>Action</b>	Using My webmethods, update the extended criteria in the processing rule to supply a date value for attributes that have a DATETIME data type.
<b>TNS.0001.4014E</b>	<b>{0} attribute value is a date but there is no transform.</b>
<b>Explanation</b>	A TN document type indicates that a custom attribute with a DATETIME data type should be extracted from a document. However, the TN document type does not specify a date transformation for the custom attribute.
<b>Action</b>	Using My webmethods, update the TN document type to specify an appropriate date transformation for the custom attribute.
<b>TNS.0001.4015E</b>	<b>{0} attribute is configured for custom transformation, but no transformation service is specified.</b>
<b>Explanation</b>	A TN document type indicates that a custom attribute should perform custom attribute transformation. However, the TN document type does not specify a transformation service.
<b>Action</b>	Using My webMethods, update the TN document type to specify a transformation service.
<b>TNS.0001.4016E</b>	<b>Error performing custom transformation on the {0} attribute.</b>
<b>Explanation</b>	Encountered an exception while updating an attribute in the database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0001.4017E</b>	<b>Custom transformation {0} for the {1} attribute returned the wrong type. Should be {2}</b>
<b>Explanation</b>	Custom attribute transformation did not return the data type that matches the data type of the associated attribute.
<b>Action</b>	Modify the custom attribute transformation service to return the correct data type specified in the error message.
<b>TNS.0001.4018E</b>	<b>Custom transformation service {0} for the {1} attribute did not return "newValues" in the pipeline.</b>
<b>Explanation</b>	Custom attribute transformation service did not return the required output parameter 'newValues'.
<b>Action</b>	Modify the custom attribute transformation service to return the 'newValues' output parameter.
<b>TNS.0001.4019E</b>	<b>{0} attribute value is a date list but there is no transform.</b>
<b>Explanation</b>	The TN document type does not specify a transformation for a date list type attribute.
<b>Action</b>	Using My webMethods, update the TN document type to specify a transformation service.
<b>TNS.0001.4020E</b>	<b>Unable to parse the given value. Value {0} could not be converted to date format</b>
<b>Explanation</b>	Unable to convert the value extracted from the document to a date format.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.4021E</b>	<b>Attribute transformation for {0} of doctype {1} generated an exception. The original exception message is: {2}.</b>
<b>Explanation</b>	Encountered an exception while updating an attribute in the database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.4022E</b>	<b>Attribute transformation function code {0} is invalid.</b>
<b>Explanation</b>	A TN document type indicates an invalid attribute transformation function.
<b>Action</b>	Using My webMethods, update the TN document type to specify a valid transformation function.

<b>TNS.0001.5006E</b>	<b>Converting the signed body of this document into a string failed. Verification cannot continue. The original signed body was {0}.</b>
<b>Explanation</b>	Conversion failed for a document.
<b>Action</b>	If the signed body of the document is invalid, notify the document sender.
<b>TNS.0001.5008E</b>	<b>This doctype ({0}) has no verification service defined. Verification cannot continue.</b>
<b>Explanation</b>	This TN document type (<doctypeName>) has no verification service defined.
<b>Action</b>	If you are using a built-in TN document type, contact Software AG Global Support. If you are using your own TN document type, specify a verification service for it.
<b>TNS.0001.5009E</b>	<b>No Verification Service</b>
<b>Explanation</b>	The TN document type has no verification service defined. Verification cannot continue.
<b>Action</b>	If you are using a built-in TN document type, contact Software AG Global Support. If you are using your own TN document type, specify a verification service for it.
<b>TNS.0001.5011E</b>	<b>The signature query for doctype {0} ({1}) generated an error. The error was {2}.</b>
<b>Explanation</b>	The signature query (<query>) for the TN document type (<doctypeName>) generated an error. The error was <exceptionMessage>.
<b>Action</b>	If the signed body of the document is invalid, notify the document sender.
<b>TNS.0001.5015E</b>	<b>Query Failed</b>
<b>Explanation</b>	A signature query was defined for the TN document type but it failed to produce a result for this document.
<b>Action</b>	Either adjust the signature query that is defined in the TN document type, or notify the document sender that the structure of the document is incorrect.
<b>TNS.0001.5017E</b>	<b>This document type ({0}) is missing one or both of its signature queries (Signature and SignedBody). Verification cannot proceed.</b>
<b>Explanation</b>	One or both of this document type signature queries (Signature and SignedBody) may be missing.
<b>Action</b>	Using My webMethods, update the TN document type to specify both, a signature query and a signed body query.

---

<b>TNS.0001.5018E</b>	<b>Missing Signature Query(s)</b>
<b>Explanation</b>	This TN document type is missing one or both of its signature queries (Signature and SignedBody). Trading Networks cannot proceed with the verification of the signature.
<b>Action</b>	Using My webMethods, update the TN document type to specify both, a signature query and a signed body query.
<b>TNS.0001.5019E</b>	<b>The signed body query for doctype {0} ({1}) generated an error. The error was {2}.</b>
<b>Explanation</b>	The signed body query (<query>) for the TN document type (<doctypeName>) generated an error. The error was <exceptionMessage>.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. If the structure of the document is incorrect, notify the document sender.
<b>TNS.0001.5020E</b>	<b>The signature of this document was invalid; no information was available about the party or parties that signed it.</b>
<b>Explanation</b>	The signature of this document might be invalid.
<b>Action</b>	Notify the document sender.
<b>TNS.0001.5021E</b>	<b>No Signer Info Available</b>
<b>Explanation</b>	The signature of this document was not valid. No information was available about the party or parties that signed it.
<b>Action</b>	Notify the document sender.
<b>TNS.0001.5022E</b>	<b>The PKCS verification service, pub.security.pkcs7:verify, produced an error trying to verify this document. The error was {0}.</b>
<b>Explanation</b>	Encountered an exception while verifying a document signature.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. If the signature is invalid, notify the document sender.
<b>TNS.0001.5023E</b>	<b>PKCS Service Error</b>
<b>Explanation</b>	The PKCS verification service pub.security.pkcs7:verify, produced an error while trying to verify this document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. If the signature is invalid, notify the document sender.

**TNS.0001.5024E**      **The verification service for this document ({0}) generated an error. The original error was {1}.**

**Explanation**      An exception was thrown while verifying a document signature.

**Action**            Take appropriate action to resolve the problem described in the exception. If the signature is invalid, notify the document sender.

**TNS.0001.5025E**      **Verification Failed**

**Explanation**      An exception was thrown while verifying a document signature.

**Action**            Take appropriate action to resolve the problem described in the exception. If the signature is invalid, notify the document sender.

**TNS.0001.5026E**      **The signature query for doctype {0} ({1}) failed to produce a value. Without a signature, verification cannot proceed.**

**Explanation**      A signature query was defined for the TN document type but it failed to produce a result for this document.

**Action**            Either update the TN document type to adjust the signature query, or notify the document sender that the structure of the document is incorrect.

**TNS.0001.5028E**      **The signed body query for doctype {0} ({1}) failed to produce a value. Without a signed body, verification cannot proceed.**

**Explanation**      A signed body query was defined for the TN document type but it failed to produce a result for this document.

**Action**            Either update the TN document type to adjust the signed body query, or notify the document sender that the structure of the document is incorrect.

**TNS.0001.5030E**      **Base-64 decoding the signature for this document failed to produce a value. The signature (before decoding) was {0,number} bytes.**

**Explanation**      An error occurred while decoding the signature. The signature might be invalid.

**Action**            Notify the document sender.

**TNS.0001.5031E**      **Decoding Error**

**Explanation**      Trading Networks could not decode the signature. The signature might be invalid.

**Action**            Notify the document sender.

---

<b>TNS.0001.5032E</b>	<b>XML {0} failed: does not apply to non-XML documents</b>
<b>Explanation</b>	Trading Networks attempted to perform an operation on a non-XML document. However, the operation can be performed only on XML documents.
<b>Action</b>	Check whether the input document is a valid XML document.
<b>TNS.0001.5033E</b>	<b>XML {0} failed: no document content available</b>
<b>Explanation</b>	Trading Networks attempted to perform an operation that failed because the document has no content.
<b>Action</b>	Notify the document sender.
<b>TNS.0001.5034E</b>	<b>Bad XML content</b>
<b>Explanation</b>	An exception was thrown while retrieving the document.
<b>Action</b>	The document may not be a valid XML document.
<b>TNS.0001.5035E</b>	<b>An error prevented fetching the content of this XML document for {0}. The original error was {2}.</b>
<b>Explanation</b>	An exception was thrown while retrieving the document.
<b>Action</b>	Check the database and make sure that the data is not corrupted.
<b>TNS.0001.5036E</b>	<b>Signature Verification failed : The verification service, {0} aborted processing of this document. The message was {1}.</b>
<b>Explanation</b>	A RoutingAbortedException was thrown by the verification service that caused the document processing to abort.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. If the document is invalid, notify the sender.
<b>TNS.0001.5037E</b>	<b>The signing service, {0} aborted processing of this document. The message was {1}.</b>
<b>Explanation</b>	A RoutingAbortedException was thrown by the verification service, which caused the document processing to abort.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. If the document is invalid, notify the sender.

<b>TNS.0001.6001E</b>	<b>Attribute transform for {0} of doctype {1} failed to produce a value. The transform function was {3}, the first original value was {2}.</b>
<b>Explanation</b>	The data type of the attribute might not match the type of the data extracted from the document.
<b>Action</b>	Make sure that the data type of the attribute matches the type of the data extracted from the document. If this is an XML TN document type, make sure that the XQL query that extracts the attribute is correct.
<b>TNS.0001.6002E</b>	<b>Attribute query for {0} of doctype {1} failed to produce a result. The document may not be complete. The query was: {2}</b>
<b>Explanation</b>	The XQL query for the attribute did not return a value.
<b>Action</b>	Change the XQL query accordingly to return correct result.
<b>TNS.0001.6003E</b>	<b>Attribute query for {0} of doctype {1} generated an exception. The original exception message is: {2}.</b>
<b>Explanation</b>	There is either a problem with the document, or with the query.
<b>Action</b>	Examine the document to see if it is well-structured XML. Correct and resubmit if needed. Examine the query to ensure that it is valid. Change the query if needed.
<b>TNS.0001.6004E</b>	<b>Unable to get XML content for corrupted doc {0}. The original exception message is: {1}.</b>
<b>Explanation</b>	The document may be corrupted.
<b>Action</b>	Fix the document and submit it again.
<b>TNS.0001.6005E</b>	<b>Transform for {0} of doctype {1} generated an exception. The transform function was {2}. The original exception message is: {3}.</b>
<b>Explanation</b>	There is either a problem with the document, or with the query.
<b>Action</b>	Examine the document to ensure that it is well-structured XML. Correct and resubmit if needed. Examine the query to ensure that it is valid. Adjust the query if needed.
<b>TNS.0001.6006E</b>	<b>Transform for {0} of doctype {1} failed to produce a value. The transform function was {3}, the first original value was {2}.</b>
<b>Explanation</b>	Perhaps the data type of the attribute does not match the type of the data extracted from the document.
<b>Action</b>	Make sure that the data extracted from the document is the same type as the attribute. If this is an XML TN document type, make sure that the XQL query that extracts the attribute is correct.

<b>TNS.0001.6007E</b>	<b>Envelope query for {0} of doctype {1} failed to produce a result. The document may not be complete. The query was: {2}</b>
<b>Explanation</b>	The XQL query for the attribute did not return a value.
<b>Action</b>	Fix the XQL query, if needed.
<b>TNS.0001.6008E</b>	<b>Envelope query for {0} of doctype {1} generated an exception. The original exception message is: {2}.</b>
<b>Explanation</b>	The document may be corrupted.
<b>Action</b>	Correct the document and submit it again.
<b>TNS.0001.6009E</b>	<b>There was an error in trying to get XML header information (DOCTYPE and DTD). The document ({0}) is probably not valid XML.</b>
<b>Explanation</b>	Probably, the document is not a well-structured XML.
<b>Action</b>	Correct the document and submit it again.
<b>TNS.0001.6010E</b>	<b>There was an error in trying to get XML header information (DOCTYPE and DTD). The document ({0}) is probably not valid XML. The original exception message is: {1}</b>
<b>Explanation</b>	Probably, the document is not a well-structured XML.
<b>Action</b>	Correct the document and submit it again.
<b>TNS.0001.6011E</b>	<b>XQL query {1} failed recognizing document {0}. The document is probably not valid XML. The original exception message is: {2}.</b>
<b>Explanation</b>	Probably, the document is not a well-structured XML. See the exception message for details.
<b>Action</b>	Correct the document and submit it again.
<b>TNS.0001.6013E</b>	<b>No bizdoc supplied to lookup validation schema</b>
<b>Explanation</b>	The wm.tn.doc.xml:getRecordBlueprint service was invoked with no BizDocEnvelope in the pipeline.
<b>Action</b>	Supply a BizDocEnvelope when invoking the wm.tn.doc.xml:getRecordBlueprint service.

<b>TNS.0001.6014E</b>	<b>Non-XML bizdoc supplied to lookup validation schema</b>
<b>Explanation</b>	The BizDocEnvelope passed to the wm.tn.doc.xml:getRecordBlueprint service is not an XML document type.
<b>Action</b>	Supply a BizDocEnvelope that matches an XML TN document type when invoking the wm.tn.doc.xml:getRecordBlueprint service.
<b>TNS.0001.6015E</b>	<b>No bizdoc ID supplied for testing validation</b>
<b>Explanation</b>	The wm.tn.doc.xml:testValidate service was invoked with no internal document ID in the pipeline.
<b>Action</b>	Supply an internal document ID (docID) when invoking the wm.tn.doc.xml:testValidate service.
<b>TNS.0001.6016E</b>	<b>No such bizdoc: {0}</b>
<b>Explanation</b>	The wm.tn.doc.xml:testValidate service was invoked with an invalid internal document ID in the pipeline.
<b>Action</b>	Provide a valid internal document ID when invoking the wm.tn.doc.xml:testValidate service.
<b>TNS.0001.6017E</b>	<b>Required attribute is missing</b>
<b>Explanation</b>	An attribute is defined as required by the document type but the document that matched the document type did not contain this attribute.
<b>Action</b>	Either change the document type so that this attribute is no longer required, or instruct the document sender to supply a value for the attribute.
<b>TNS.0001.6018E</b>	<b>The {0} attribute is required by the {1} doctype. The query {2} did not return any results</b>
<b>Explanation</b>	An attribute is defined as required by the document type but the document that matched the document type did not contain this attribute.
<b>Action</b>	Either change the document type so that this attribute is no longer required, or instruct the document sender to supply a value for the attribute.
<b>TNS.0001.6019E</b>	<b>Attribute transformation for {0} of doctype {1} generated an exception. The query is {2}. The original exception message is: {3}.</b>
<b>Explanation</b>	Encountered an exception.
<b>Action</b>	If the document is corrupted, notify the document sender.

---

<b>TNS.0001.7003</b>	<b>Error while getting {0}. Find if the EDI package is enabled and running in Integration Server.</b>
<b>Explanation</b>	WmEDI Package may be disabled.
<b>Action</b>	Check if the WmEDI package is enabled and running in Integration Server.
<b>TNS.0001.7004</b>	<b>Error while getting EDI Standards. Input for standard field cannot be null, its is a mandatory field.</b>
<b>Explanation</b>	Input for standard field cannot be null, it is a mandatory field.
<b>Action</b>	Configure the standard field in the input and run the service.
<b>TNS.0001.7005</b>	<b>Error while getting EDI Transactions. Input for standard field cannot be null, its is a mandatory field.</b>
<b>Explanation</b>	Input for standard field cannot be null, it is a mandatory field.
<b>Action</b>	Configure the standard field and run the query again.
<b>TNS.0001.7006</b>	<b>Error while getting EDI Transactions. Input for version field cannot be null, its is a mandatory field.</b>
<b>Explanation</b>	Input for version field cannot be null, it is a mandatory field.
<b>Action</b>	Configure the version field and run the query again.
<b>TNS.0001.7007</b>	<b>Error while getting {0}. Input for {1} field cannot be null, its is a mandatory field.</b>
<b>Explanation</b>	Input field suggested in error message is a mandatory field.
<b>Action</b>	Configure the input field and run the query again.
<b>TNS.0001.7008</b>	<b>Error while querying for document attributes.</b>
<b>Explanation</b>	Encountered an exception while querying document attributes.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.7009</b>	<b>Error while getting the related doctypes for doctype attribute {0}.</b>
<b>Explanation</b>	An error occurred while getting related doctypes for the associated doctype attribute. The error may be because of an SQLException.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0001.7010</b>	<b>Error while changing the status of the doctype attributes.</b>
<b>Explanation</b>	An error occurred while changing the status of the doctype attributes.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.7011</b>	<b>Error while getting doctype attribute for doctype attribute ID {0}.</b>
<b>Explanation</b>	An error occurred while getting doctype attribute for the associated attribute ID. This may be because of an SQLException while querying the attribute.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.7012</b>	<b>Error while updating doctype attribute for doctype attribute ID {0}.</b>
<b>Explanation</b>	An error occurred while updating the doctype attribute. This may be because of an SQLException while updating the attribute.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.7013</b>	<b>Error while changing the status of the doctype attribute ID {0}.</b>
<b>Explanation</b>	An error occurred while updating the doctype attribute. This may be because of an SQLException while updating the attribute.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.7014</b>	<b>Error while viewing doctype attribute. Input for docAttrID field cannot be null, its is a mandatory field.</b>
<b>Explanation</b>	An error occurred while viewing the doctype attribute. This may be because of an SQLException while querying for the attribute.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0001.7015</b>	<b>Error while updating doctype attribute. Input for docAttrID field cannot be null, its is a mandatory field.</b>
<b>Explanation</b>	Input for docAttrID field cannot be null, it is a mandatory field.
<b>Action</b>	Configure the docAttrID field while updating the doctype attribute.

<b>TNS.0001.7016</b>	<b>Error while adding doctype attribute. Check whether all input variables have been passed properly.</b>
<b>Explanation</b>	Some mandatory fields may not have been passed before calling the service.
<b>Action</b>	Configure all input variables before calling the service.
<b>TNS.0001.7017E</b>	<b>Attribute name "{0}" already exists. Change the name and save again.</b>
<b>Explanation</b>	Attribute with the same name already exists.
<b>Action</b>	Change the attribute name and save.
<b>TNS.0001.7018</b>	<b>Error while updating doctype attribute. Attribute name with "{0}" already exists. Change the name and save again.</b>
<b>Explanation</b>	Attribute with same name already exists.
<b>Action</b>	Change the name and save.
<b>TNS.0001.7019</b>	<b>Error while querying for document attributes {0}.</b>
<b>Explanation</b>	An error occurred while querying doctype attributes. This may be because of an SQLException while querying the attribute.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.1001E</b>	<b>"{0}" is empty. At least one {1} must be supplied. Please supply the required value.</b>
<b>Explanation</b>	You did not supply a value for the specified variable. At least one value is required.
<b>Action</b>	Supply at least one value for the specified field and try again.
<b>TNS.0002.1002E</b>	<b>"{0}" and "{1}" are required ({0}={2}, {1}={3}). Please supply the required values.</b>
<b>Explanation</b>	Both values are required.
<b>Action</b>	Supply both values.
<b>TNS.0002.1009E</b>	<b>The value originally supplied as sender ID for this document was not a valid partner ID. The value was {0}.</b>
<b>Explanation</b>	Partner ID supplied as sender ID is not being recognized as valid partner.
<b>Action</b>	Either create a partner profile for the document sender, add this ID to an existing partner's profile, or tell the document sender to resend the document using a different sender ID value.

<b>TNS.0002.1010E</b>	<b>Error formatting error message {0}: {1}</b>
<b>Explanation</b>	Unable to format the error message.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.1011E</b>	<b>The value originally supplied as receiver ID for this document was not a valid partner ID. The value was {0}.</b>
<b>Explanation</b>	Partner ID supplied as receiver ID is not being recognized as valid partner.
<b>Action</b>	Either create a partner profile for the document receiver, add this ID to an existing partner's profile, or tell the document sender to resend the document using a different receiver ID value.
<b>TNS.0002.1012E</b>	<b>{0} is null.</b>
<b>Explanation</b>	An internal variable is unexpectedly null.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.1013E</b>	<b>At least one of "{0}" and "{1}" is required.</b>
<b>Explanation</b>	At least one of the input fields is required, either its null or empty.
<b>Action</b>	Provide non-null value for at least one input parameter and try again.
<b>TNS.0002.1016E</b>	<b>"sourceVersion" is required. Please supply the required value.</b>
<b>Explanation</b>	A required value is missing.
<b>Action</b>	Supply the required value.
<b>TNS.0002.1017E</b>	<b>"feature" is required. Please supply the required value.</b>
<b>Explanation</b>	A required value is missing.
<b>Action</b>	Supply the required value.
<b>TNS.0002.1018E</b>	<b>At least one input is required.</b>
<b>Explanation</b>	All input fields are found to be null, at least one input should not be null.
<b>Action</b>	Provide at least one non-null value for input and try again.

---

<b>TNS.0002.1019E</b>	<b>Enumeration contains elements that are not Strings.</b>
<b>Explanation</b>	An unexpected value was passed to an internal method.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.1021E</b>	<b>schema cannot be null.</b>
<b>Explanation</b>	Attempted to create a Trading Networks IData object with an empty set of name/value pairs.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.1022E</b>	<b>schema rows must be 2 wide</b>
<b>Explanation</b>	Attempted to create a Trading Networks IData object without set of name/value pairs.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.1023E</b>	<b>keys cannot be null</b>
<b>Explanation</b>	Attempted to create a Trading Networks IData object with keys as null. Keys cannot be null.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.1024E</b>	<b>index out of bounds: {0}</b>
<b>Explanation</b>	Attempted to seek beyond the end of or before the start of a TNFixedData object.
<b>Action</b>	Supply a valid index to the seek method.
<b>TNS.0002.1025E</b>	<b>TNFixedData does not support setKey</b>
<b>Explanation</b>	Attempted to use an unsupported method.
<b>Action</b>	Do not call the setKey method.
<b>TNS.0002.1027E</b>	<b>TNFixedData does not support delete</b>
<b>Explanation</b>	Attempted to use an unsupported method.
<b>Action</b>	Do not call the delete method.
<b>TNS.0002.1028E</b>	<b>illegal null key</b>
<b>Explanation</b>	Supplied a null key to the keyMatch method on a TNFixedData object.
<b>Action</b>	Supply a valid key value.

<b>TNS.0002.1031E</b>	<b>Must supply props</b>
<b>Explanation</b>	A required value(props) is missing for wm.tn.admin:setProperties().
<b>Action</b>	Supply the required value for field(props) and try again.
<b>TNS.0002.1032E</b>	<b>Must shutdown before starting up again</b>
<b>Explanation</b>	Invoked the wm.tn.admin:startup service while the WmTN package is enabled and loaded.
<b>Action</b>	Use the Integration Server Administrator to stop and start the WmTN package. Do not invoke the wm.tn.admin:start service directly.
<b>TNS.0002.1042E</b>	<b>No such enum: {0}</b>
<b>Explanation</b>	A wm.tn.enumerate service was invoked with an invalid query enumeration identifier.
<b>Action</b>	Supply a valid enumeration identifier.
<b>TNS.0002.1043E</b>	<b>Either {0} or {1} must be supplied. Please supply one of these values.</b>
<b>Explanation</b>	A valid value for either of the required field was not supplied.
<b>Action</b>	Supply one of the valid values which are listed in the error message.
<b>TNS.0002.1044E</b>	<b>{0} is required whenever a value for {1} is supplied. Please supply a value for {0}.</b>
<b>Explanation</b>	A storageRef value was supplied, but no value was supplied for storageType.
<b>Action</b>	Supply a value for the storageType variable. Either supply value for both related fields or keep both fields null and try again.
<b>TNS.0002.1047E</b>	<b>The following TN properties can only take numeric values: {0}</b>
<b>Explanation</b>	Attempted to assign non-numeric values to numeric system properties.
<b>Action</b>	Supply numeric values for numeric system properties.
<b>TNS.0002.1048E</b>	<b>Error setting features on SAX parser. Exception message is: {0}</b>
<b>Explanation</b>	Threw a SAXException while initializing the SAX parser.
<b>Action</b>	Contact Software AG Global Support.

---

<b>TNS.0002.1056E</b>	<b>The {0} service is for Trading Networks internal use only.</b>
<b>Explanation</b>	The specified service was invoked, but not by Trading Networks. This service is for Trading Networks internal use only.
<b>Action</b>	Do not invoke this service.
<b>TNS.0002.1057E</b>	<b>Error encountered in invoking service wm.tn.samples.helpServices:installTNSamplesACLs</b>
<b>Explanation</b>	Internal error installing ACLs for Trading Networks Sample services.
<b>Action</b>	If you want to protect the WmTNSamples services, invoke the wm.tn.samples:installTNSamplesACLs service.
<b>TNS.0002.1058E</b>	<b>Error encountered in writing TN ACL information to disk</b>
<b>Explanation</b>	An exception was thrown saving the Trading Networks ACLs to the file system.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.1059E</b>	<b>ThreadQueue: too many jobs waiting</b>
<b>Explanation</b>	Attempted to spawn more threads than the configured limit.
<b>Action</b>	Use the wm.tn.admin:setThreadQueueConfig service to increase the value of the tn.thread.maxWaiting system property.
<b>TNS.0002.1061E</b>	<b>{0} is not an Integer</b>
<b>Explanation</b>	Invalid data type supplied to a service, expected an Integer value
<b>Action</b>	Supply an Integer for the specified field.
<b>TNS.0002.1065</b>	<b>Error encountered while unregistering TN's XML content handler. The exception message is: {0}</b>
<b>Explanation</b>	Error occurred while unregistering TN's content handler and activating default XML content handler.
<b>Action</b>	See the server log for details. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0002.1066</b>	<b>When scheduleType is {0}, a value must be supplied for {1}. Please supply a value for {1}.</b>
<b>Explanation</b>	Attempted to create new queue with schedule values null for a selected scheduleType.
<b>Action</b>	Supply valid values corresponding to selected schedule type.
<b>TNS.0002.1067E</b>	<b>Unable to update password for {0} with handle {1}</b>
<b>Explanation</b>	An exception was thrown when Trading Networks attempted to update the password associated with a profile delivery method.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.1068E</b>	<b>Unable to retrieve password for {0} with handle {1}</b>
<b>Explanation</b>	An exception was thrown when Trading Networks attempted to retrieve the password associated with a profile delivery method.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.1069E</b>	<b>Unable to insert password for {0} with handle {1}</b>
<b>Explanation</b>	An exception was thrown when Trading Networks attempted to insert the password associated with a profile delivery method.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.1070E</b>	<b>Unable to save password for {0} with handle {1}</b>
<b>Explanation</b>	An exception was thrown when Trading Networks attempted to save the password associated with a profile delivery method.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.1071E</b>	<b>Unable to delete password for {0} with handle {1}</b>
<b>Explanation</b>	An exception was thrown when Trading Networks attempted to delete the password associated with a profile delivery method.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.1072E</b>	<b>Either {0} or {1} must be supplied, but not both. Please supply a value for only one of these.</b>
<b>Explanation</b>	You supplied the specified two values; however, only one value can be specified.
<b>Action</b>	Supply value for either partByets or partStream and try again.

<b>TNS.0002.1073</b>	<b>Unable to import document type {0}. Attribute {1} is used in the document type but, it is not defined.</b>
<b>Explanation</b>	While importing a doctype, related attribute not found, so unable to import the doctype.
<b>Action</b>	Please either import the related attribute or define before importing the doctype.
<b>TNS.0002.1075</b>	<b>Unable to import processing rule {0}. Sender profile {1} is used in the processing rule but, it is not defined.</b>
<b>Explanation</b>	While importing a processing rule, related sender profile not found, so unable to import the processing rule.
<b>Action</b>	Either import the related sender profile or define it before importing the processing rule.
<b>TNS.0002.1076</b>	<b>Unable to import processing rule {0}. Receiver profile {1} is used in the processing rule but, it is not defined.</b>
<b>Explanation</b>	While importing a processing rule, related receiver profile not found, so unable to import the processing rule.
<b>Action</b>	Either import the related receiver profile or define it before importing the processing rule.
<b>TNS.0002.1077</b>	<b>Unable to import processing rule {0}. Document type {1} is used in the processing rule but, it is not defined.</b>
<b>Explanation</b>	While importing a processing rule, related Document Type not found, so unable to import the processing rule.
<b>Action</b>	Either import the related document type or define it before importing the processing rule.
<b>TNS.0002.1081</b>	<b>Error encountered while extracting doctype with doctypeID {0}. Please check whether it is a valid ID.</b>
<b>Explanation</b>	Could not retrieve Document Type from BizDocStore with provided docTypeID, would not be able to enable/update doc type for monitoring.
<b>Action</b>	Please check whether provided docTypeID is a valid ID, as system was not able to retrieve corresponding Document Type from store.

<b>TNS.0002.1083</b>	<b>Error encountered while setting TN BAM Monitoring status to {0}</b>
<b>Explanation</b>	Error encountered while enabling/disabling TN BAM monitoring. This happened while setting monitoring properties invoking service <code>wm.tn.admin:setProperties()</code> .
<b>Action</b>	Please see the error log.
<b>TNS.0002.2005S</b>	<b>Error(s) encountered in WmTN initialization: {0}</b>
<b>Explanation</b>	Encountered an exception while Trading Networks was initializing. This happened during filling the cache of attribute, type, routing rule and profile.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception and try to reload the package.
<b>TNS.0002.2013S</b>	<b>The <code>wm.tn.access:getConsoleRestrictions</code> service has been deleted, renamed or replaced. Aborting Trading Networks initialization.</b>
<b>Explanation</b>	Aborting Trading Networks initialization as the <code>wm.tn.access:getConsoleRestrictions</code> service has been tempered.
<b>Action</b>	Please contact your administrator to restore the original version of this service.
<b>TNS.0002.2014E</b>	<b>Error filling BizDocAttributeStore cache</b>
<b>Explanation</b>	Encountered an error while reading the document attributes from the database during startup.
<b>Action</b>	An exception was written to the server log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.2018W</b>	<b>Unable to register content types with the FlatFile Content Handler. The WmFlatFile package may be disabled. The WmFlatFile package must be enabled in order to use FlatFile capabilities in Trading Networks.</b>
<b>Explanation</b>	The WmFlatFile package is disabled. Unable to register content types with the FlatFile Content Handler.
<b>Action</b>	The WmFlatFile package may be disabled. The WmFlatFile package must be enabled in order to use FlatFile capabilities in Trading Networks.
<b>TNS.0002.3007E</b>	<b><code>wm.tn.admin:installACLs</code>: Unable to find group, {0}</b>
<b>Explanation</b>	The specified group, <code>&lt;group&gt;</code> , has not been created.
<b>Action</b>	Run the <code>wm.tn.admin:install</code> service to create the Trading Networks user groups.

---

<b>TNS.0002.3010S</b>	<b>Can not create IS user group {0}</b>
<b>Explanation</b>	An exception was thrown while creating a user group during server startup.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.3011E</b>	<b>Can not create IS user {0}</b>
<b>Explanation</b>	An exception was thrown while creating a user during server startup.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.4011E</b>	<b>Error encountered during TN server starting: {0}</b>
<b>Explanation</b>	An exception was thrown while Trading Networks was starting.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.4012E</b>	<b>Error encountered during TN server stopping: {0}</b>
<b>Explanation</b>	An exception was thrown while Trading Networks was stopping.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.4013E</b>	<b>Error encountered during TN server restarting: {0}</b>
<b>Explanation</b>	An exception was thrown while Trading Networks was restarting.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.4019E</b>	<b>TN database connection pool failed: error initializing Datastore</b>
<b>Explanation</b>	An exception was thrown while initializing the Trading Networks database connection pool.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception. Check TN DB configuration details.
<b>TNS.0002.4020E</b>	<b>TN Server failed starting up: error initializing database connection pool</b>
<b>Explanation</b>	An exception was thrown while initializing the Trading Networks database connection pool.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception. Check TN DB configuration details.

<b>TNS.0002.4021E</b>	<b>TN Server failed starting up: OEM restriction was hacked</b>
<b>Explanation</b>	A user or developer attempted to bypass the OEM restrictions. The server will not start.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0002.4024E</b>	<b>TN task manager encountered error: {0}</b>
<b>Explanation</b>	An exception was thrown that has terminated execution of the task manager.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. You might need to contact Software AG Global Support.
<b>TNS.0002.4025E</b>	<b>TN temporary storage space initialization failed: {0}</b>
<b>Explanation</b>	An exception was thrown while preparing temporary disk space for large files.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. You might need to change the tn.tspace.location system property to a disk partition that has more free space.
<b>TNS.0002.4028E</b>	<b>Invalid notification type encountered in pkginit:sendNotif</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.4039E</b>	<b>MBean cannot record statistics for document id {0}. Document does not exist.</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0002.4040E</b>	<b>Exception thrown while saving document processing statistics.</b>
<b>Explanation</b>	Error encountered while saving document processing statistics to DB.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.1001E</b>	<b>Invalid datatype. "cert" must be a byte[] or a X509Certificate.</b>
<b>Explanation</b>	You invoked a service and supplied a digital certificate value that is not a recognized data type.
<b>Action</b>	Supply either an X509Certificate or the bytes from an X509Certificate.

---

<b>TNS.0003.1005E</b>	<b>The user associated with this certificate ({0}) does not have a TN profile.</b>
<b>Explanation</b>	The supplied digital certificate is associated with an Integration Server user, but that user is not a Trading Networks partner.
<b>Action</b>	Either create a partner profile for the user, or supply a certificate that is associated with a Trading Networks partner.
<b>TNS.0003.1007E</b>	<b>An error occurred when the intended receiver tried to accept this document. The original error message was {0}.</b>
<b>Explanation</b>	An exception was thrown while accepting a polled document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.1008E</b>	<b>Unable to retrieve partner profile associated with supplied certificate.</b>
<b>Explanation</b>	An exception was thrown while retrieving the partner associated with a digital certificate.
<b>Action</b>	Trading Networks wrote the exception to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.1010E</b>	<b>Unable to save partner's certificate.</b>
<b>Explanation</b>	An exception was thrown while saving a partner's certificate.
<b>Action</b>	Trading Networks wrote the exception to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.1015E</b>	<b>Unable to retrieve signing keys to be used for sending documents to specified partner.</b>
<b>Explanation</b>	The wm.tn.access:getSigningKeys service was unable to retrieve the security information needed to sign documents sent to a partner.
<b>Action</b>	Trading Networks wrote the exception to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.1028E</b>	<b>Invalid feature specified.</b>
<b>Explanation</b>	While checking whether a feature was enabled, Trading Networks discovered that an invalid feature was specified.
<b>Action</b>	Contact Software AG Global Support.

<b>TNS.0003.1029E</b>	<b>Error retrieving Console restrictions.</b>
<b>Explanation</b>	An exception was thrown while determining what features are available to My webMethods Server.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.1030E</b>	<b>No session available</b>
<b>Explanation</b>	Attempted an action that requires an active session, but no active session was found.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.1031E</b>	<b>No user available from session</b>
<b>Explanation</b>	Unable to determine the connected user as session doesn't have any user defined.
<b>Action</b>	Try defining users and retry or contact your administrator to check database and Integttation Server status.
<b>TNS.0003.1032E</b>	<b>Group TNPartners not defined</b>
<b>Explanation</b>	TNPartners Group was not found
<b>Action</b>	Run the wm.tn.admin:install service to create TNPartners and other required user groups.
<b>TNS.0003.1033</b>	<b>Empty or null username for partner {0}.Also,The username may not have whitespace.</b>
<b>Explanation</b>	Encountered validation error while creating partner account. Iinput field username can't be null and should not contain spaces.
<b>Action</b>	Provide a valid user name and try again.
<b>TNS.0003.2002E</b>	<b>An ID type named {0} already exists.</b>
<b>Explanation</b>	Trading Networks attempted to create an external ID type with the provided name, but an external ID type with that name already exists.
<b>Action</b>	Specify the name of an external ID type that does not already exist when creating an external ID type.
<b>TNS.0003.2003E</b>	<b>A contact type named {0} already exists.</b>
<b>Explanation</b>	Trading Networks attempted to create a contact type with the provided name, but a contact type with that name already exists.
<b>Action</b>	Specify the name of a contact type that does not already exist when creating a contact type.

---

<b>TNS.0003.2004E</b>	<b>A field group named {0} already exists.</b>
<b>Explanation</b>	Trading Networks attempted to create a field group with the provided name, but a field group with that name already exists.
<b>Action</b>	Specify the name of a field group that does not already exist when creating a field group.
<b>TNS.0003.2005E</b>	<b>Could not get profile dictionary</b>
<b>Explanation</b>	Trading Networks encountered an unexpected error during profile dictionary initialization.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take action appropriate to resolve the problem described in the exception.
<b>TNS.0003.2006E</b>	<b>Could not retrieve field definitions</b>
<b>Explanation</b>	An exception was thrown while retrieving profile field definitions.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take action appropriate to resolve the problem described in the exception.
<b>TNS.0003.2007E</b>	<b>Could not add field definition</b>
<b>Explanation</b>	An exception was thrown while saving a profile field definition.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take action appropriate to resolve the problem described in the exception.
<b>TNS.0003.2008E</b>	<b>Could not update field definition</b>
<b>Explanation</b>	An exception was thrown while updating a profile field definition.
<b>Action</b>	The exception was written to the server log. See the server log for details. Take action appropriate to resolve the problem described in the exception.
<b>TNS.0003.2009E</b>	<b>"definition" is required.</b>
<b>Explanation</b>	A required field value was not supplied.
<b>Action</b>	Supply the required value.
<b>TNS.0003.3010E</b>	<b>Unable to map certificate to user for new partner {0}.</b>
<b>Explanation</b>	The wm.tn.security:setVerifyCertificateSet service was unable to save certificates for a new trading partner.
<b>Action</b>	Save the partner's profile with no certificates and then add the partner's certificates.

<b>TNS.0003.3019E</b>	<b>{0} could not retrieve the ProfileStore.</b>
<b>Explanation</b>	The Profile Store is inaccessible.
<b>Action</b>	Reload the WmTN package or restart the Integration Serve that hosts Trading Networks Server.
<b>TNS.0003.3030E</b>	<b>Unable to retrieve the {0} ID for partner {1}.</b>
<b>Explanation</b>	Could not convert the internal partner ID into an external ID.
<b>Action</b>	Make sure the partner has a value for this type of external ID.
<b>TNS.0003.3034W</b>	<b>An invalid or expired certificate was received from {0} and rejected.</b>
<b>Explanation</b>	An invalid or expired certificate was received and rejected from the Trading Partner specified in the message.
<b>Action</b>	Notify the Trading Partner specified in the message that their certificate is either invalid or expired.
<b>TNS.0003.3037W</b>	<b>Received a certificate issued by {0}, who is not on your list of trusted Certificate Authorities.</b>
<b>Explanation</b>	The Certificate Authority specified in the message is not on your list of trusted sources.
<b>Action</b>	You either can add this Certificate Authority to your list of trusted Certificate Authorities, or you can notify the trading partner that you do not trust their Certificate Authority.
<b>TNS.0003.3038E</b>	<b>Problem creating B2B account for partner (username={0}).</b>
<b>Explanation</b>	An account could not be created on the Integration Server for the partner.
<b>Action</b>	Create the account manually for the partner. The user name must match the partner's required external ID.
<b>TNS.0003.3050E</b>	<b>If {0} is supplied, {1} must also be supplied.</b>
<b>Explanation</b>	You must supply either both values or neither value.
<b>Action</b>	Supply both values or neither value.
<b>TNS.0003.3085W</b>	<b>The Trading Networks user does not have permission to change System properties. The certificate chain verifier is not correctly initialized. All incoming certificate chains will be trusted.</b>
<b>Explanation</b>	The watt.security.cert.wmChainVerifier.trustByDefault property might not be set correctly.
<b>Action</b>	Ask the Administrator to set the watt.security.cert.wmChainVerifier.trustByDefault property appropriately.

---

<b>TNS.0003.3102E</b>	<b>Either {0} or {1} must be supplied.</b>
<b>Explanation</b>	A value must be supplied for one of the two variables, but no value was supplied for either variable.
<b>Action</b>	Supply a value for one of the variables.
<b>TNS.0003.4001E</b>	<b>Could not delete field group.</b>
<b>Explanation</b>	An exception was thrown while deleting a profile field group.
<b>Action</b>	The exception was written to the error log. See the log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4003E</b>	<b>Could not add partner profile for {0}.</b>
<b>Explanation</b>	An exception was thrown while saving a partner profile.
<b>Action</b>	The exception was written to the error log. See the log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4005E</b>	<b>The partner specified (id={0}) has a {1} ID of {2}, but there is no matching IS user account.</b>
<b>Explanation</b>	Trading Networks could not find an Integration Server user account for this partner.
<b>Action</b>	Verify that the partner has a user account on the Integration Server and that the account name matches the partner's required external ID value.
<b>TNS.0003.4006E</b>	<b>Attempted to save an extended field value with an unknown field ID (id={0}).</b>
<b>Explanation</b>	Field with this ID doesn't exist. Trading Networks could not save the extended field for this ID.
<b>Action</b>	Specify a valid field ID.
<b>TNS.0003.4008E</b>	<b>Got null or empty extended profile fields</b>
<b>Explanation</b>	The "fields" input variable is required.
<b>Action</b>	Pass the extended fields you want to save in the "fields" variable.
<b>TNS.0003.4009E</b>	<b>Attempted to save an external ID that has an unknown type (type code={0}).</b>
<b>Explanation</b>	Trading Networks attempted to save an external ID for a partner, but the external ID is associated with an external ID type that has not been defined.
<b>Action</b>	To save a new type of external ID for a partner, you must first define the external ID type. To do so, use the <code>wm.tn.dictionary:addIDType</code> service.

<b>TNS.0003.4010E</b>	<b>ID Type {0} is not valid. Not found in the Trading Networks database.</b>
<b>Explanation</b>	ID Type provided is not recognized by Trading Networks.
<b>Action</b>	Supply a valid external ID type. Use the wm.tn.dictionary:addIDType service to define a new external ID type.
<b>TNS.0003.4011E</b>	<b>Attempted to save a contact that has an unknown type (type code={0}).</b>
<b>Explanation</b>	Trading Networks attempted to save a contact for a partner, but the contact is associated with a contact type that has not been defined.
<b>Action</b>	To save a new type of contact for a partner, you must first define the contact type. To do so, use the wm.tn.dictionary:addContactType service.
<b>TNS.0003.4012E</b>	<b>Cannot delete a standard field</b>
<b>Explanation</b>	Attempted to delete a standard profile field. You can only delete extended profile fields.
<b>Action</b>	No action required.
<b>TNS.0003.4014E</b>	<b>{0} not a valid Group ID. Must be greater than {1}.</b>
<b>Explanation</b>	Group ID provided is not a positive integer.
<b>Action</b>	Supply a valid group ID value. It should be positive integer.
<b>TNS.0003.4015E</b>	<b>Port must be a positive integer</b>
<b>Explanation</b>	When specifying a partner's host and port, the port value must be greater than zero.
<b>Action</b>	Supply a valid value that is greater than zero for the port number.
<b>TNS.0003.4016E</b>	<b>Could not decode bizdoc</b>
<b>Explanation</b>	Trading Networks created an internal BizDocEnvelope to validate the profile data, but could not decode the BizDocEnvelope.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4017E</b>	<b>Could not add {0}. A {0} with an ID of {1} already exists.</b>
<b>Explanation</b>	While adding lookup type (Contact Type/ ID Type/ Binary Type), Trading Networks found that a similar lookup type with same ID already exists. Trading Networks did not add the lookup type.
<b>Action</b>	Save this type with a different ID.

---

<b>TNS.0003.4018E</b>	<b>A profile already exists for the host of this Trading Network. Turn off the SELF setting on the corporate component of the profile and save it again.</b>
<b>Explanation</b>	The Enterprise profile already exists.
<b>Action</b>	If you are programmatically saving profiles, set the Self? variable to false before attempting to save the profile. If you are using My webMethods to save profiles, contact Software AG Global Support.
<b>TNS.0003.4019E</b>	<b>Could not validate profile: received null bizdoc</b>
<b>Explanation</b>	Trading Networks should have created an internal BizDocEnvelope to validate profile data, but the BizDocEnvelope is null.
<b>Action</b>	Contact Software AG Global Support. Please have the server and error logs and the WmTN/config/properties.cnf file available.
<b>TNS.0003.4020E</b>	<b>No "{0}" element found in bizdoc</b>
<b>Explanation</b>	Trading Networks created an internal BizDocEnvelope to validate profile data, but the BizDocEnvelope did not contain the "errors" element.
<b>Action</b>	Contact Software AG Global Support. Please have the server and error logs and the WmTN/config/properties.cnf file available.
<b>TNS.0003.4021E</b>	<b>Cannot set extended fields.</b>
<b>Explanation</b>	An exception was thrown while saving extended fields to the database.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4024E</b>	<b>Cannot access profile store.</b>
<b>Explanation</b>	An exception was thrown while accessing the Profile store.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4026E</b>	<b>You are using webMethods Trading Partners. To be able to add more partner profiles, please upgrade to webMethods Trading Networks.</b>
<b>Explanation</b>	When using webMethods Trading Partners, you are allowed to create only one profile other than your own.
<b>Action</b>	If you need to create additional partner profiles, upgrade to webMethods Trading Networks.

<b>TNS.0003.4027E</b>	<b>Could not retrieve {0} using {1}</b>
<b>Explanation</b>	Invalid id is provided. Trading Networks could not retrieve partner details using this ID.
<b>Action</b>	Supply a valid value.
<b>TNS.0003.4028E</b>	<b>An error occurred while retrieving company logos.</b>
<b>Explanation</b>	An exception was thrown while retrieving company logos.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4029E</b>	<b>Importing a profile for {0} (id={1}), which is marked as "My Enterprise", but it has different ID than the existing My Enterprise profile for this Trading Network. Cannot change the identity of the My Enterprise profile. Process terminated.</b>
<b>Explanation</b>	You attempted to import the Enterprise. However, the target Trading Networks system already has an Enterprise profile, which has a different ID than the one you are attempting to import. Trading Networks cannot import the Enterprise profile.
<b>Action</b>	Import Enterprise profile carefully only to those Trading Networks Servers where it's not already defined.
<b>TNS.0003.4030E</b>	<b>Could not get profile for user (username={0}).</b>
<b>Explanation</b>	An exception was thrown while retrieving a partner profile for a user.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4032E</b>	<b>Extended fields cannot have a column name.</b>
<b>Explanation</b>	Validation of profile fields failed. The column name on an extended profile field should be null.
<b>Action</b>	If you are programmatically creating extended fields, do not set the Column Name.
<b>TNS.0003.4033E</b>	<b>Extended fields cannot have a table name.</b>
<b>Explanation</b>	Validation of profile fields failed. The table name on an extended profile field should be null.
<b>Action</b>	If you are programmatically creating extended fields, do not set the Table Name.

---

<b>TNS.0003.4034E</b>	<b>Partner status can only be "Active" or "Inactive" when adding a new profile.</b>
<b>Explanation</b>	Invalid status provided for profile to be added.
<b>Action</b>	Supply a valid value for the Partner Status field.
<b>TNS.0003.4035E</b>	<b>Corporation is invalid: no partnerID.</b>
<b>Explanation</b>	Trading Networks attempted to update a partner profile, but the corporation component has no partner ID.
<b>Action</b>	Set the partnerID field to a valid value.
<b>TNS.0003.4036E</b>	<b>Attempted to save a binary object that has an unknown type (type code={0}).</b>
<b>Explanation</b>	The database does not have binary types defined.
<b>Action</b>	Populate your database with initial values by importing the file <IntegrationServer>/packages/WmTN/bin/init.xml, where <IntegrationServer> is the location where your server is installed.
<b>TNS.0003.4037E</b>	<b>Could not add Field Group {0}.</b>
<b>Explanation</b>	An exception was thrown while adding a profile field group.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4039E</b>	<b>Could not get {0} for partner (partnerID={1}).</b>
<b>Explanation</b>	An exception was thrown while retrieving protocol information for a partner.
<b>Action</b>	Verify whether the database connection is available. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4041E</b>	<b>Cannot delete the External ID, there has to be at least one external ID</b>
<b>Explanation</b>	Each partner must have a value for the required external ID type. The required external ID value is used for the user name of the partner's Integration Server user account.
<b>Action</b>	Do not attempt to delete the required external ID from a partner's profile.
<b>TNS.0003.4042E</b>	<b>The value for profile field {0} is not one of the valid values.</b>
<b>Explanation</b>	Invalid value provided for profile field.
<b>Action</b>	Supply a valid value.

<b>TNS.0003.4044E</b>	<b>Standard fields must have a column name.</b>
<b>Explanation</b>	Profile field Validation failed. The column name on a standard profile field is null.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4045E</b>	<b>Could not update {0}.</b>
<b>Explanation</b>	An exception was thrown while updating a profile component.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4046E</b>	<b>A profile already exists in the database with the supplied PartnerID ({0}).</b>
<b>Explanation</b>	Trading Networks attempted to save a new profile with the same partnerID as an existing profile.
<b>Action</b>	Do not specify a value for the partnerID when creating a new profile. Trading Networks will generate a unique ID for you.
<b>TNS.0003.4047</b>	<b>{0} cannot be null.</b>
<b>Explanation</b>	Partner ID is required field while fetching the Profile and it should not be null.
<b>Action</b>	Supply Partner ID to fetch profile.
<b>TNS.0003.4048E</b>	<b>Could not get profile for partner (id={0})</b>
<b>Explanation</b>	An exception was thrown while retrieving a partner profile.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4049E</b>	<b>webMethods Trading Partners is restricted to the creation of one profile in addition to your own.</b>
<b>Explanation</b>	When using webMethods Trading Partners, you can create only one profile other than your own.
<b>Action</b>	If you need to create additional partner profiles, upgrade to webMethods Trading Networks.
<b>TNS.0003.4050E</b>	<b>Could not upgrade your profile. Please contact webMethods Customer Service.</b>
<b>Explanation</b>	An exception was thrown while upgrading your profile from webMethods for Partners to webMethods Trading Networks.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. If necessary, contact Software AG Global Support.

---

<b>TNS.0003.4051E</b>	<b>At least 1 field has been defined for this group. Cannot delete.</b>
<b>Explanation</b>	Found at least one field still associated to group. Unable to delete this group.
<b>Action</b>	To delete this field group, you must first delete all extended profile fields in the group, or assign them to other groups.
<b>TNS.0003.4053E</b>	<b>Could not delete {0} ({1}={2}).</b>
<b>Explanation</b>	An exception was thrown while deleting a profile component.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4054E</b>	<b>Cannot set valid values for a standard field</b>
<b>Explanation</b>	You cannot define a list of valid values for standard fields.
<b>Action</b>	Do not attempt to define a list of valid values for a standard field. Valid values are applicable for extended fields.
<b>TNS.0003.4056E</b>	<b>Errors encountered validating profile/profile fields</b>
<b>Explanation</b>	A list of one or more validation errors follows this message after invoking wm.tn:submit.
<b>Action</b>	Take appropriate action to resolve the errors.
<b>TNS.0003.4058E</b>	<b>Another partner profile with the name "{0}" already exists. Cannot have duplicate partner names. Please enter a different name.</b>
<b>Explanation</b>	You are attempting to create a profile; however, a profile with the Corporation Name and User Name that you specified already exists in Trading Networks.
<b>Action</b>	Supply a different Corporation Name and/or Unit Name.
<b>TNS.0003.4060E</b>	<b>You must add a profile for your enterprise before you can upgrade to webMethods Trading Networks. Please create a profile for your enterprise.</b>
<b>Explanation</b>	You have not defined the Enterprise profile. The Enterprise profile must exist before you can upgrade Trading Networks.
<b>Action</b>	Create the Enterprise profile.
<b>TNS.0003.4062E</b>	<b>Cannot undelete a standard field</b>
<b>Explanation</b>	Standard fields cannot be deleted or undeleted.
<b>Action</b>	Do not attempt to delete or undelete a standard field.

<b>TNS.0003.4064E</b>	<b>{0}, no change made on server</b>
<b>Explanation</b>	Trading Networks encountered an error while saving partner profile information. See the error message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the error message.
<b>TNS.0003.4065E</b>	<b>An error was encountered deleting a partner's profile (partnerID={0}).</b>
<b>Explanation</b>	An exception was thrown while deleting a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4066E</b>	<b>Could not get host profile.</b>
<b>Explanation</b>	An exception was thrown while retrieving the Enterprise profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4068E</b>	<b>{0} is required.</b>
<b>Explanation</b>	No value was supplied for a required input variable.
<b>Action</b>	Supply the required value.
<b>TNS.0003.4069E</b>	<b>Standard fields must have a table name.</b>
<b>Explanation</b>	Trading Networks encountered an invalid field definition in the Trading Networks database.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4072E</b>	<b>Error initializing ProfileStore</b>
<b>Explanation</b>	Encountered error while initializing Profile Store.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4073E</b>	<b>Could not set binary object for partner (id={0}).</b>
<b>Explanation</b>	An exception was thrown while saving binary data to the Trading Networks database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4075E</b>	<b>Could not get Extended Field template (group={0}).</b>
<b>Explanation</b>	An exception was thrown while creating a new extended field.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4076E</b>	<b>Invalid group specified.</b>
<b>Explanation</b>	The group that was specified is not a valid group.
<b>Action</b>	Use the <code>wm.tn.dictionary:getFieldGroups</code> service to retrieve a list of valid groups.
<b>TNS.0003.4077E</b>	<b>{0} must be specified for partner {1}</b>
<b>Explanation</b>	Profile validation failed! Required data is missing from a partner profile.
<b>Action</b>	Supply a value for the required fields.
<b>TNS.0003.4078E</b>	<b>Datatype cannot be null.</b>
<b>Explanation</b>	Found Datatype parameter null while setting it to profile.
<b>Action</b>	Supply a valid data type.
<b>TNS.0003.4079E</b>	<b>Your webmethods Trading Networks server is restricted to the creation of {0} profiles in addition to your own.</b>
<b>Explanation</b>	Your Trading Networks Server is restricted to the creation of the number of profiles specified in the message.
<b>Action</b>	If you need to add more profiles, contact Software AG Global Support to upgrade your server.
<b>TNS.0003.4080E</b>	<b>Attempted to set the datatype of a field to an unrecognized value: {0}.</b>
<b>Explanation</b>	Provided datatype is not recognized by Trading Networks.
<b>Action</b>	Supply a valid data type.
<b>TNS.0003.4082E</b>	<b>Binary type not found in the Trading Networks database: {0}.</b>
<b>Explanation</b>	Trading Networks attempted to set the value of a binary object, but the type does not exist in the database.
<b>Action</b>	Supply a valid <code>binaryTypeDescription</code> or <code>binaryTypeCode</code> . If you have specified a valid binary type and the problem persists, import the <code>init.xml</code> file from the <code>&lt;IntegrationServer&gt;packages/WmTN/bin</code> directory, where <code>&lt;IntegrationServer&gt;</code> is the location where you installed your server.

<b>TNS.0003.4083E</b>	<b>Could not change {0} Type {1}.</b>
<b>Explanation</b>	An exception was thrown while attempting to update an external ID type or contact type.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4084E</b>	<b>Standard fields cannot have a set of extended valid values</b>
<b>Explanation</b>	Trading Networks encountered an invalid field definition in the Trading Networks database.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4085E</b>	<b>The specified delivery data (id={0}) does not exist in the database. Cannot delete.</b>
<b>Explanation</b>	Trading Networks was unable to perform the specified database action because the Destination data does not exist.
<b>Action</b>	Contact Software AG Global Support. Have the server and error logs and the WmTN/config/properties.cnf file available.
<b>TNS.0003.4086E</b>	<b>Standard fields cannot have an extended default value</b>
<b>Explanation</b>	Trading Networks encountered an invalid field definition in the Trading Networks database.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4087E</b>	<b>The value for {0} must be a String.</b>
<b>Explanation</b>	Found unexpected non-String value when datatype is String, validation failed.
<b>Action</b>	Supply a String value for the field.
<b>TNS.0003.4088E</b>	<b>A {0} ID of {1} already exists in the database. External IDs must be unique.</b>
<b>Explanation</b>	Cannot have two external IDs of the same external ID type that have the same value.
<b>Action</b>	Supply another value for this external ID.
<b>TNS.0003.4089E</b>	<b>Could not get internal ID for partner (id={0}, typeCode={1}, typeDesc={2}).</b>
<b>Explanation</b>	An exception was thrown while retrieving the internal partnerID.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4090E</b>	<b>Fields must have a datatype</b>
<b>Explanation</b>	Trading Networks encountered an invalid field definition in the Trading Networks database.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4091E</b>	<b>Could not get profile summaries.</b>
<b>Explanation</b>	An exception was thrown while retrieving profile summaries.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4092E</b>	<b>{0} cannot be null. {1} not {2}.</b>
<b>Explanation</b>	Trading Networks did not add or update the changes because a required value is missing.
<b>Action</b>	Supply the required value.
<b>TNS.0003.4093E</b>	<b>{0} must be equal or greater than {1}</b>
<b>Explanation</b>	Numeric field validation failed as supplied value found lesser than limit value, should be greater or equal to limit value.
<b>Action</b>	Supply a valid value.
<b>TNS.0003.4094E</b>	<b>You are already using webMethods Trading Networks. No upgrade is necessary.</b>
<b>Explanation</b>	Attempted to upgrade from webMethods for Partners to webMethods Trading Networks, but you are already using webMethods Trading Networks.
<b>Action</b>	No action required.
<b>TNS.0003.4096E</b>	<b>Could not get {0}.</b>
<b>Explanation</b>	An exception was thrown while retrieving a profile component.
<b>Action</b>	An exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4099E</b>	<b>Status was not changed to {0} because the profile has the following errors {1}</b>
<b>Explanation</b>	The profile has issues that must be resolved before the status can be changed.
<b>Action</b>	Take appropriate action to resolve the problem described in the errors.

<b>TNS.0003.4100E</b>	<b>Cannot set Column Name for an extended field</b>
<b>Explanation</b>	It is not valid for an extended profile field to have a value for Column Name.
<b>Action</b>	Do not attempt to set a value for Column Name for an extended profile field.
<b>TNS.0003.4102E</b>	<b>Cannot set Table Name for an extended field</b>
<b>Explanation</b>	It is not valid for an extended profile field to have a value for Table Name.
<b>Action</b>	Do not attempt to set a value for Table Name for an extended profile field.
<b>TNS.0003.4105E</b>	<b>Could not add {0} Type {1}.</b>
<b>Explanation</b>	An exception was thrown while attempting to create an IDType or ContactType.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4106E</b>	<b>Could not get profile summary (partnerID={0}).</b>
<b>Explanation</b>	An exception was thrown while attempting to retrieve a profile summary.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4107E</b>	<b>An error occurred while retrieving polling frequencies.</b>
<b>Explanation</b>	An exception was thrown while retrieving a partner's polling frequency.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4108E</b>	<b>Could not delete External Partner ID (internal PartnerID={0}).</b>
<b>Explanation</b>	An exception was thrown while deleting a partner's external ID.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4109E</b>	<b>Got null profile field metadata for extended field at index {0}</b>
<b>Explanation</b>	Required internal data is missing.
<b>Action</b>	Contact Software AG Global Support.

---

<b>TNS.0003.4110E</b>	<b>Could not undelete profile for partner (id={0}).</b>
<b>Explanation</b>	An exception was thrown while undeleting a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4113E</b>	<b>Attempted to save a field definition for an unknown group (group id={0}).</b>
<b>Explanation</b>	The specified field group does not exist and is not valid.
<b>Action</b>	Supply a valid field group. If you are using the Trading Networks Console to create an extended field, contact Software AG Global Support.
<b>TNS.0003.4114E</b>	<b>Could not get profile summary (username={0}).</b>
<b>Explanation</b>	An exception was thrown while retrieving a profile summary.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4115E</b>	<b>Profile has errors. Saved with a status of {0}.</b>
<b>Explanation</b>	Validation error found for the provided profile, saving with status as inactive.
<b>Action</b>	Take appropriate action to resolve the errors listed below this message.
<b>TNS.0003.4116E</b>	<b>Could not add external ID data for partner (id={1}).</b>
<b>Explanation</b>	Encountered an Exception while saving a profile component.
<b>Action</b>	See the Exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4117E</b>	<b>webMethods Trading Networks requires a special license key. Please contact webMethods to get a Trading Networks key. Until you do so, you will be limited to the creation of one profile in addition to your own.</b>
<b>Explanation</b>	You currently have a webMethods for Partners license key, which allows you to create only a single partner profile.
<b>Action</b>	If you need to create additional partner profiles, upgrade to webMethods Trading Networks.

<b>TNS.0003.4118E</b>	<b>Profile status may only be changed to {0} or {1}.</b>
<b>Explanation</b>	Attempted to change the profile status to an invalid status.
<b>Action</b>	Supply a valid value.
<b>TNS.0003.4120E</b>	<b>Could not change partner's status.</b>
<b>Explanation</b>	An exception was thrown while updating the status of a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4121E</b>	<b>{0} {1} delivery data already exists in the database for this partner.</b>
<b>Explanation</b>	You attempted to add a delivery method for a partner that is already defined for the partner. You cannot have two instances of the same delivery method for a partner.
<b>Action</b>	If the existing delivery method contains the information you want, no action is required. Otherwise, you can update the information for the existing delivery method.
<b>TNS.0003.4122E</b>	<b>Extended fields must have a name.</b>
<b>Explanation</b>	You did not specify a name for the extended profile field.
<b>Action</b>	Supply the required value.
<b>TNS.0003.4123E</b>	<b>Problem initializing Profile services.</b>
<b>Explanation</b>	An exception was thrown during initialization.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4124E</b>	<b>Cannot set default value for a standard field.</b>
<b>Explanation</b>	You cannot define a default value for a standard profile field.
<b>Action</b>	Do not attempt to define a default value for a standard profile field.
<b>TNS.0003.4125E</b>	<b>Could not retrieve extended fields.</b>
<b>Explanation</b>	An exception was thrown while retrieving extended fields for a partner.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4126E</b>	<b>Standard fields cannot be marked as deleted</b>
<b>Explanation</b>	You cannot delete a standard profile field.
<b>Action</b>	Do not attempt to delete a standard profile field.
<b>TNS.0003.4129E</b>	<b>Following errors occurred during updating profile</b>
<b>Explanation</b>	A list of one or more errors follows this message.
<b>Action</b>	Take appropriate action to resolve the problems described in the errors.
<b>TNS.0003.4130E</b>	<b>Cannot delete preferred delivery method</b>
<b>Explanation</b>	The delivery method you tried to delete is the preferred delivery method for the partner.
<b>Action</b>	Before you can delete this delivery method, choose another delivery method to be "preferred."
<b>TNS.0003.4131E</b>	<b>Could not delete {0} Type {1}.</b>
<b>Explanation</b>	An exception was thrown while deleting profile data.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4132E</b>	<b>Could not update corporation.</b>
<b>Explanation</b>	An exception was thrown while updating the Corporate component of a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4133E</b>	<b>Could not update addresses.</b>
<b>Explanation</b>	An exception was thrown while updating one or more addresses on a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4136E</b>	<b>Could not delete connection ({1}={2}).</b>
<b>Explanation</b>	An exception was thrown while deleting a delivery method from a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0003.4138E</b>	<b>Could not update external IDs.</b>
<b>Explanation</b>	An exception was thrown while updating one or more external IDs in a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4141E</b>	<b>Could not get binary object for partner (partnerID={1}).</b>
<b>Explanation</b>	An exception was thrown while retrieving a binary object for a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4142E</b>	<b>"extID" is required.</b>
<b>Explanation</b>	You attempted to invoke a service that requires a value for the extID input variable, but no value was supplied.
<b>Action</b>	Supply the required value.
<b>TNS.0003.4143E</b>	<b>Either idTypeCode or idTypeDesc must be supplied (idTypeCode={0}, idTypeDesc={1}).</b>
<b>Explanation</b>	You invoked a service without providing a required input variable to identify the external ID type.
<b>Action</b>	Supply one of the required values.
<b>TNS.0003.4144E</b>	<b>partnerID is required.</b>
<b>Explanation</b>	You invoked a service without providing a required input variable to identify the partner.
<b>Action</b>	Supply the required value.
<b>TNS.0003.4145E</b>	<b>Could not get external ID for partner (partnerID={0}).</b>
<b>Explanation</b>	An exception was thrown while retrieving an external ID for a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4146E</b>	<b>Error encountered updating binary object in the database (partnerID={0}).</b>
<b>Explanation</b>	An exception was thrown while updating a binary object for a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4147E</b>	<b>{0} must be supplied.</b>
<b>Explanation</b>	You called a Java method without supplying a value for a required field (<fieldName>).
<b>Action</b>	Supply the required value.
<b>TNS.0003.4148E</b>	<b>A status of {0} is not one of the permitted values.</b>
<b>Explanation</b>	Attempted to set the status to an invalid value.
<b>Action</b>	Supply a valid value.
<b>TNS.0003.4149E</b>	<b>Error encountered changing partner status.</b>
<b>Explanation</b>	An exception was thrown while updating the status of a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4151E</b>	<b>A profile is required.</b>
<b>Explanation</b>	While adding profile to the Data store, profile found to be null.
<b>Action</b>	Supply the valid profile data.
<b>TNS.0003.4152E</b>	<b>Error encountered adding profile to the database.</b>
<b>Explanation</b>	An exception was thrown while adding a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4153E</b>	<b>Error encountered adding contacts to the database.</b>
<b>Explanation</b>	An exception was thrown while adding one or more contacts to a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4155E</b>	<b>Error encountered adding destinations to the database.</b>
<b>Explanation</b>	An exception was thrown while adding one or more delivery methods (destinations) to a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0003.4156E</b>	<b>Error encountered adding IDs to the database.</b>
<b>Explanation</b>	An exception was thrown while adding one or more external IDs to a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4157E</b>	<b>Error encountered adding addresses to the database.</b>
<b>Explanation</b>	An exception was thrown while adding one or more addresses to a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4158E</b>	<b>Error encountered adding binary objects to the database.</b>
<b>Explanation</b>	An exception was thrown while adding one or more binary objects to a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4160E</b>	<b>{0} cannot be null.</b>
<b>Explanation</b>	When attempting to delete a profile-related asset from the Profile store, required asset ID was not provided.
<b>Action</b>	Supply the required asset ID.
<b>TNS.0003.4161E</b>	<b>Error encountered deleting profile from the database.</b>
<b>Explanation</b>	An exception was thrown while deleting a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4162E</b>	<b>Error encountered undeleting profile from the database.</b>
<b>Explanation</b>	An exception was thrown while undeleting a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4163E</b>	<b>Error encountered deleting contact (contactID={0}, partnerID={1}).</b>
<b>Explanation</b>	An exception was thrown while deleting a contact from a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4164E</b>	<b>Error encountered deleting address (addressID={0}, partnerID={1}).</b>
<b>Explanation</b>	An exception was thrown while deleting an address from a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4165E</b>	<b>Error encountered deleting destination (destID={0}).</b>
<b>Explanation</b>	An exception was thrown while deleting a delivery method (destination) from a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4166E</b>	<b>Error encountered deleting external id (id={0}).</b>
<b>Explanation</b>	An exception was thrown while deleting an external ID from a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4167E</b>	<b>Error encountered retrieving extended fields.</b>
<b>Explanation</b>	An exception was thrown while retrieving extended fields for a partner.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4168E</b>	<b>Error encountered adding extended field {0} to the database (partnerID={1}).</b>
<b>Explanation</b>	An exception was thrown while adding an extended profile field for a partner.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4170E</b>	<b>Error encountered retrieving contact {0} (partnerID={1}).</b>
<b>Explanation</b>	Encountered an exception while retrieving a contact for a partner.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4171E</b>	<b>Error encountered retrieving binary type {0} (partnerID={1}).</b>
<b>Explanation</b>	An exception was thrown while retrieving a binary object for a partner.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0003.4172E</b>	<b>Invalid binary type: {0}.</b>
<b>Explanation</b>	The supplied binary type is not recognized as a valid binary type. It does not match any existing binary type.
<b>Action</b>	Supply a valid binary type value.
<b>TNS.0003.4173E</b>	<b>A connection was requested for an unknown partner (partnerID={0}).</b>
<b>Explanation</b>	Attempted to establish a connection to a partner's server, but the supplied partnerID was invalid.
<b>Action</b>	Supply a valid partner ID.
<b>TNS.0003.4174E</b>	<b>Delivery method is {0}. Can only create contexts for HTTP or HTTPS destinations.</b>
<b>Explanation</b>	A webMethods context can only be established when using HTTP or HTTPS.
<b>Action</b>	If you want to connect to a partner's server with a different protocol (e.g., FTP or SMTP) use the appropriate service in the WmPublic package or one of the delivery services in the wm.tn.transport folder.
<b>TNS.0003.4175E</b>	<b>Error encountered connecting to partner's server.</b>
<b>Explanation</b>	An exception was thrown while connecting to a partner's server.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4181E</b>	<b>constant must start with FLD_[TBL]_</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4182E</b>	<b>bad constant results in non or multiple fields</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4184E</b>	<b>RetryFactor cannot be zero</b>
<b>Explanation</b>	Supplied RetryFactor is unexpectedly lower than 1, RetryFactor should be greater than or equal to 1.
<b>Action</b>	Supply a valid value for RetryFactor. It should be greater than or equal to 1.

---

<b>TNS.0003.4187E</b>	<b>External Field: {0} has errors. Error = {1}</b>
<b>Explanation</b>	See the errors listed in the message.
<b>Action</b>	Take appropriate action to resolve the problems described in the errors.
<b>TNS.0003.4188E</b>	<b>Is a required External Field</b>
<b>Explanation</b>	No data was supplied for a required extended profile field.
<b>Action</b>	Supply a value for this field.
<b>TNS.0003.4189E</b>	<b>Field value must be of data type java.lang.String</b>
<b>Explanation</b>	Data type for the extended profile field is String, value must be a String.
<b>Action</b>	Supply a String value.
<b>TNS.0003.4190E</b>	<b>Invalid value selected</b>
<b>Explanation</b>	Supplied value for extended profile field found to be invalid.
<b>Action</b>	Supply a valid value.
<b>TNS.0003.4192E</b>	<b>Could not retrieve ID Types from database</b>
<b>Explanation</b>	An exception was thrown while retrieving external ID types.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4193E</b>	<b>Could not retrieve IDType Descriptions from database</b>
<b>Explanation</b>	An exception was thrown while retrieving external ID type descriptions.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4194E</b>	<b>A database error occurred while adding an ID Type.</b>
<b>Explanation</b>	An exception was thrown while adding an external ID type.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0003.4195E</b>	<b>A database error occurred while changing an ID Type.</b>
<b>Explanation</b>	An exception was thrown while updating an external ID type.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4196E</b>	<b>A database error occurred while deleting an External ID Type.</b>
<b>Explanation</b>	An exception was thrown while deleting an external ID type.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4197E</b>	<b>Could not retrieve Contact Types from database</b>
<b>Explanation</b>	An exception was thrown while retrieving contact types.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4198E</b>	<b>A database error occurred while adding a Contact Type.</b>
<b>Explanation</b>	An exception was thrown while adding a contact type.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4199E</b>	<b>A database error occurred while changing a Contact Type.</b>
<b>Explanation</b>	An exception was thrown while updating a contact type.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4200E</b>	<b>A database error occurred while deleting a Contact Type.</b>
<b>Explanation</b>	An exception was thrown while deleting a contact type.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4201E</b>	<b>Could not retrieve Binary Types from database</b>
<b>Explanation</b>	An exception was thrown while retrieving binary types.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4202E</b>	<b>Could not retrieve Field Groups from database</b>
<b>Explanation</b>	An exception was thrown while retrieving field groups.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4203E</b>	<b>A database error occurred while adding a Field Group.</b>
<b>Explanation</b>	An exception was thrown while adding a field group.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4204E</b>	<b>A database error occurred while changing a Field Group.</b>
<b>Explanation</b>	An exception was thrown while updating a field group.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4205E</b>	<b>A database error occurred while deleting a Field Group.</b>
<b>Explanation</b>	An exception was thrown while deleting a field group.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4206E</b>	<b>Error initializing Profile Dictionary.</b>
<b>Explanation</b>	An exception was thrown during initialization.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4207E</b>	<b>pfmd cannot be null.</b>
<b>Explanation</b>	You did not supply a required value.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4208E</b>	<b>A problem was encountered updating the field defintion.</b>
<b>Explanation</b>	An exception was thrown while updating a field definition.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0003.4209E</b>	<b>Cannot add a standard field definition. Set Extended to true before saving this definition.</b>
<b>Explanation</b>	Attempted to add a standard profile field. You cannot add standard profile fields.
<b>Action</b>	Add the profile field as an extended profile field.
<b>TNS.0003.4210E</b>	<b>A problem was encountered adding the field definition.</b>
<b>Explanation</b>	An exception was thrown while adding a field definition.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4211E</b>	<b>Error retrieving profile</b>
<b>Explanation</b>	Encountered an exception while retrieving a partner profile.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4212E</b>	<b>Could not retrieve profile from database using external ID</b>
<b>Explanation</b>	An exception was thrown while retrieving a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4213E</b>	<b>Could not retrieve Profile Summaries from database</b>
<b>Explanation</b>	An exception was thrown while retrieving a profile summary.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4216E</b>	<b>Could not retrieve Custom Fields from database</b>
<b>Explanation</b>	An exception was thrown while retrieving extended profile fields.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4218E</b>	<b>Could not retrieve internal ID from database using PartnerIDID ({0}).</b>
<b>Explanation</b>	An exception was thrown while retrieving a partner profile ID.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4219E</b>	<b>Could not retrieve internal ID from database using DestinationID ({0}).</b>
<b>Explanation</b>	An exception was thrown while retrieving a partner profile ID.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4220E</b>	<b>Error retrieving {0} external ID for {1}.</b>
<b>Explanation</b>	An exception was thrown while retrieving the external ID for a partner.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4221E</b>	<b>Could not retrieve IDType from database using PartnerIDID ({0}).</b>
<b>Explanation</b>	An exception was thrown while retrieving an external ID type.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4222E</b>	<b>Could not update profile.</b>
<b>Explanation</b>	An exception was thrown while updating a profile that has been marked deleted.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4223E</b>	<b>Corporation can not be null.</b>
<b>Explanation</b>	Required Corporate information was not supplied.
<b>Action</b>	Supply the required Corporate information.
<b>TNS.0003.4224E</b>	<b>Could not update Corporation.</b>
<b>Explanation</b>	An exception was thrown while updating a partner profile.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4225E</b>	<b>Contacts can not be null.</b>
<b>Explanation</b>	Required Contact information was not supplied.
<b>Action</b>	Supply the required data.

<b>TNS.0003.4226E</b>	<b>At least one Contact is required.</b>
<b>Explanation</b>	The supplied Vector must contain at least one contact.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4227E</b>	<b>Could not update Contacts.</b>
<b>Explanation</b>	An exception was thrown while updating a partner's contact information.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4228E</b>	<b>Address can not be null.</b>
<b>Explanation</b>	Required address information was not supplied.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4229E</b>	<b>At least one Address is required.</b>
<b>Explanation</b>	The supplied vector must contain at least one address.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4230E</b>	<b>Could not update Addresses.</b>
<b>Explanation</b>	An exception was thrown while updating a partner's address information.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4231E</b>	<b>Destinations can not be null.</b>
<b>Explanation</b>	Required delivery method (destination) information was not supplied.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4232E</b>	<b>At least one Destination is required.</b>
<b>Explanation</b>	The supplied vector must contain at least one delivery method (destination).
<b>Action</b>	Supply the required data.
<b>TNS.0003.4233E</b>	<b>Could not update Destinations.</b>
<b>Explanation</b>	An exception was thrown while updating a partner's delivery method (destination) information.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4235E</b>	<b>At least one ID is required.</b>
<b>Explanation</b>	The supplied vector must contain at least one external ID.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4236E</b>	<b>Could not update IDs.</b>
<b>Explanation</b>	An exception was thrown while updating a partner's external ID information.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4237E</b>	<b>A vector of Contacts is required</b>
<b>Explanation</b>	The first argument to ProfileStore.addContacts is null.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4238E</b>	<b>A vector of Destinations is required</b>
<b>Explanation</b>	The first argument to ProfileStore.addDestinations is null.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4239E</b>	<b>A vector of IDs is required</b>
<b>Explanation</b>	The first argument to ProfileStore.addIDs is null.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4240E</b>	<b>A vector of Addresses is required</b>
<b>Explanation</b>	The first argument to ProfileStore.addAddresses is null.
<b>Action</b>	Supply the required data.
<b>TNS.0003.4242E</b>	<b>"addresses" is empty. At least one Address must be supplied.</b>
<b>Explanation</b>	No address was supplied.
<b>Action</b>	Supply the required value.
<b>TNS.0003.4243E</b>	<b>"connections" is empty. At least one Destination must be supplied.</b>
<b>Explanation</b>	No delivery method (destination) was supplied.
<b>Action</b>	Supply the required value.

<b>TNS.0003.4244E</b>	<b>Could not validate profile extended fields: received null bizdoc</b>
<b>Explanation</b>	Internal error occurred during profile validation.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4245E</b>	<b>No extended fields found in bizdoc</b>
<b>Explanation</b>	Internal error occurred during profile validation.
<b>Action</b>	This error can be safely ignored. If it persists, contact Software AG Global Support.
<b>TNS.0003.4246E</b>	<b>Could not validate profile standard fields: received null bizdoc</b>
<b>Explanation</b>	Internal error occurred during profile validation.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4247E</b>	<b>No standard fields found in bizdoc</b>
<b>Explanation</b>	Internal error occurred during profile validation.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.4252E</b>	<b>Attempted to import extended field "{0}" for partner ID {1}, but this partner does not exist on your Trading Networks system.</b>
<b>Explanation</b>	Attempted to import extended field for a partner, but this partner does not exist on your Trading Networks.
<b>Action</b>	You must import the partner's profile before you can import extended fields for the partner.
<b>TNS.0003.4253E</b>	<b>Attempted to import extended field "{0}" that has an extended profile field ID of {1}, but this extended field is not defined on your Trading Networks system.</b>
<b>Explanation</b>	Cannot import the value of the extended profile field because there is no definition for the extended field.
<b>Action</b>	You must import the extended field definitions before you can import extended field values.
<b>TNS.0003.4254E</b>	<b>Error encountered invoking wm.tn.profile:addProfile {0}.</b>
<b>Explanation</b>	An exception was thrown while saving a new partner profile.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4257E</b>	<b>Error encountered refreshing ID cache.</b>
<b>Explanation</b>	An exception was thrown while refreshing an internal cache.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4258E</b>	<b>Could not get external IDs for partner (partnerID={0}).</b>
<b>Explanation</b>	An exception was thrown while retrieving external IDs.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4259E</b>	<b>At least one ID must be specified for partner {0}.</b>
<b>Explanation</b>	Because the value of the required external ID type is used as the user name for an Integration Server user account, it must be specified.
<b>Action</b>	Specify the required external ID.
<b>TNS.0003.4260E</b>	<b>Could not retrieve Profile Groups from database.</b>
<b>Explanation</b>	Encountered a SQLException while retrieving profile group information from the database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4262E</b>	<b>profileGroupName can not be null or empty.</b>
<b>Explanation</b>	Trading Networks cannot accept null or an empty string for the profile group name.
<b>Action</b>	Specify a non-null a profile group name.
<b>TNS.0003.4263E</b>	<b>profileGroupName {0} already exists in database.</b>
<b>Explanation</b>	Trading Networks cannot accept a duplicate profile group name.
<b>Action</b>	Specify a unique profile group name.
<b>TNS.0003.4264E</b>	<b>A database error occurred while adding Profile Group {0}.</b>
<b>Explanation</b>	Encountered a SQLException while adding the new profile group.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0003.4265E</b>	<b>A database error occurred while changing Profile Group {0}.</b>
<b>Explanation</b>	Encountered a SQLException while changing the profile group name from its old name to a new name.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4266E</b>	<b>A database error occurred while deleting Profile Group {0}.</b>
<b>Explanation</b>	Encountered a SQLException while deleting the profile group from the database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4267E</b>	<b>A database error occurred while querying profile information.</b>
<b>Explanation</b>	Encountered a SQLException while executing a profile query.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4275E</b>	<b>Error encountered invoking service {0}</b>
<b>Explanation</b>	Encountered an exception while invoking the specified service.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4276E</b>	<b>{0} can not be null or a 0-length array.</b>
<b>Explanation</b>	The input signature profileGroupIds should be a non-null array.
<b>Action</b>	Specify non-null values for the profileGroupIds input.
<b>TNS.0003.4281E</b>	<b>Attempted to import security data for partner ID {0}, but this partner does not exist on your Trading Networks system.</b>
<b>Explanation</b>	You attempted to import a trading partner's security data without first importing this trading partner's profile.
<b>Action</b>	Import the trading partner's profile before you attempt to import the security data for this trading partner.
<b>TNS.0003.4282E</b>	<b>No {0} {1} delivery data exists in the database for this partner. Cannot update.</b>
<b>Explanation</b>	The profile update operation cannot be completed because the delivery protocol data is not available.
<b>Action</b>	Provide the delivery protocol details.

---

<b>TNS.0003.4283E</b>	<b>Could not add contact data for partner (id="{0}").</b>
<b>Explanation</b>	Encountered an exception while invoking wm.tn.profile:addContacts. The operation cannot be completed.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4284E</b>	<b>Could not add address data for partner (id="{0}").</b>
<b>Explanation</b>	Encountered an exception while invoking wm.tn.profile:addAddresses. The operation cannot be completed.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4285E</b>	<b>Could not add delivery data for partner (id="{0}").</b>
<b>Explanation</b>	Encountered an exception while invoking wm.tn.profile:addConnections. The operation cannot be completed.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4287E</b>	<b>Could not delete profile group {0}, it is still in use.</b>
<b>Explanation</b>	The delete operation cannot be completed because the profile group is in use.
<b>Action</b>	Check the trading partner profiles to make sure that no partner belongs to the group you are attempting to delete.
<b>TNS.0003.4289E</b>	<b>Database error in adding partner {0} to profile groups. Import operation aborted.</b>
<b>Explanation</b>	Trading Networks encountered a problem with its database. There is a problem in the database or database driver.
<b>Action</b>	Use the JDBC Pools page on the Integration Server Administrator to ensure that the Integration Server can connect to the Trading Networks database. Correct all connection problems. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4290E</b>	<b>Cannot import partner profile(s) without My Enterprise profile.</b>
<b>Explanation</b>	You are attempting to import one or more partner profiles; however, the target Trading Networks server does not have an Enterprise profile.
<b>Action</b>	Create an Enterprise profile on the target server. Then, import the partner profiles.

<b>TNS.0003.4291E</b>	<b>SQLException encountered in ProfileStore.addPartnerCertificate().</b>
<b>Explanation</b>	Trading Networks encountered a problem with its database. There is a problem in the database or database driver.
<b>Action</b>	Use the JDBC Pools page on the Integration Server Administrator to ensure that the Integration Server can connect to the Trading Networks database. Correct all connection problems. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4292E</b>	<b>EXMLException encountered in ProfileStore.addPartnerCertificate().</b>
<b>Explanation</b>	Trading Networks encountered a problem when attempting to save a certificate for a partner.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4293E</b>	<b>SQLException encountered in ProfileStore.getPartnerIDForCertificate().</b>
<b>Explanation</b>	Trading Networks encountered a problem with its database. There is a problem in the database or database driver.
<b>Action</b>	Use the JDBC Pools page on the Integration Server Administrator to ensure that the Integration Server can connect to the Trading Networks database. Correct all connection problems. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4294E</b>	<b>EXMLException encountered in ProfileStore.getPartnerIDForCertificate().</b>
<b>Explanation</b>	Trading Networks encountered a problem when attempting to retrieve a certificate for a partner.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4295E</b>	<b>Cannot deliver to My Enterprise. The supplied partnerID ({0}) is the partnerID of the My Enterprise profile. Please supply a different partnerID.</b>
<b>Explanation</b>	The document receiver is the Enterprise profile, which indicates Trading Networks is to deliver the document to itself. This is not valid; Trading Networks cannot deliver a document to itself.
<b>Action</b>	Either change the receiver to specify a trading partner, or do not attempt to deliver this document.

<b>TNS.0003.4296E</b>	<b>A deleted partner profile with the name "{0}" already exists. Cannot have duplicate partner names. Please enter a different name.</b>
<b>Explanation</b>	You attempted to create a profile. However, the Corporation Name and Unit Name you specify will make the profile a duplicate of a profile that was previously deleted. Although a profile is deleted, Trading Networks continues to maintain information about it in its database. As a result, you cannot create another profile using the same Corporation Name and Unit Name.
<b>Action</b>	If you want to reinstate the deleted profile, use the <code>wm.tn.profile:undeleteProfile</code> service. Otherwise, enter a different Corporation Name and Unit Name when creating a profile.
<b>TNS.0003.4297E</b>	<b>Importing a profile for {0} (id={1}), which is marked as "My Enterprise". A "My Enterprise" profile already exists for this Trading Network. If you want to update it, use the Force option. Process terminated.</b>
<b>Explanation</b>	You attempted to import an Enterprise profile into a Trading Networks system that already has an Enterprise profile.
<b>Action</b>	If you want to replace the existing Enterprise profile with the profile you are trying to import, use the Force option.
<b>TNS.0003.4298E</b>	<b>A deleted profile with the name "{0}" already exists. Unable to recreate a deleted profile.</b>
<b>Explanation</b>	A deleted partner profile with this Corporation Name already exists. Trading Networks maintains information about deleted profiles in its database and does not allow duplicate partner names.
<b>Action</b>	You can either use a different Corporation Name, or use the <code>wm.tn.profile:undeleteProfile</code> service to reinstate the deleted partner profile.
<b>TNS.0003.4299</b>	<b>Could not get Users for partner (partnerID={0}).</b>
<b>Explanation</b>	Encountered SQL Exception, not able to fetch users for specified partner.
<b>Action</b>	Check database connection
<b>TNS.0003.4300</b>	<b>Could not get partners for user (username={0}).</b>
<b>Explanation</b>	Encountered SQL Exception, not able to fetch partners for specified user.
<b>Action</b>	Check database connection

<b>TNS.0003.4301</b>	<b>Could not add users data for partner (id={1}).</b>
<b>Explanation</b>	An exception was thrown while adding users to a partner.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4302</b>	<b>Could not delete users data for partner (id={1}).</b>
<b>Explanation</b>	An exception was thrown while deleting users for a partner.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4303</b>	<b>Attempted to import a field definition "{0}" that uses a field group {1}, but this field group is not defined on your Trading Networks system.</b>
<b>Explanation</b>	You attempted to import a field definition that uses a field group, but this field group is not defined on your Trading Networks.
<b>Action</b>	Try importing field group before importing the field definition.
<b>TNS.0003.4304</b>	<b>Attempted to import a profile "{0}" that uses a contact type {1}, but this Contact Type is not defined on your Trading Networks system.</b>
<b>Explanation</b>	You attempted to import a profile that uses a contact type, but this contact type is not defined on your Trading Networks system.
<b>Action</b>	Try importing contact type before importing the profile.
<b>TNS.0003.4305</b>	<b>Attempted to import a profile "{0}" that uses an external id type {1}, but this external id type is not defined on your Trading Networks system.</b>
<b>Explanation</b>	You attempted to import a profile that uses an external ID type, but this external ID type is not defined on your Trading Networks system.
<b>Action</b>	Try importing external ID before importing the profile.
<b>TNS.0003.4306</b>	<b>Attempted to import a profile "{0}" that uses a profile group {1}, but this profile group is not defined on your Trading Networks system.</b>
<b>Explanation</b>	You attempted to import a profile that uses a profile group, but this profile group is not defined on your Trading Networks system.
<b>Action</b>	Try importing profile group before importing the profile.

<b>TNS.0003.4309</b>	<b>Could not validate the EXTERNAL ID with (idType={0}) and (externalID={1})</b>
<b>Explanation</b>	An exception was thrown while validating the specified external ID.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4310</b>	<b>Error encountered while getting the External IDs associated with partner with (partnerID={0})</b>
<b>Explanation</b>	Error encountered while getting the External IDs associated with the supplied partnerID.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4311</b>	<b>Following errors occurred during updating externalID</b>
<b>Explanation</b>	Errors occurred during updating external ID.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4312</b>	<b>ID not added as the (externalIDType={0}) given is not a valid one.</b>
<b>Explanation</b>	Validation failed while updating the set of external IDs associated with a profile.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4313</b>	<b>The partner specified (partnerID={0}) doesnot exist in the trading networks. Give a correct one.</b>
<b>Explanation</b>	Supplied partnerID does not exist in the Trading Networks.
<b>Action</b>	Supply valid partner ID.
<b>TNS.0003.4314</b>	<b>ID not added as the (externalIDType={0}) given already exists.</b>
<b>Explanation</b>	ID not added as the externalIDType=0 supplied already exists.
<b>Action</b>	Supply valid ID
<b>TNS.0003.4316</b>	<b>Error encountered while getting registered EDI IDTypes.</b>
<b>Explanation</b>	Error encountered while fetching registered EDI IDTypes.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0003.4317</b>	<b>Error encountered while cleaning up registered EDI IDTypes.</b>
<b>Explanation</b>	Error encountered while deregistering EDI ID Types.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4318</b>	<b>Error encountered while getting the Internal ID of the Enterprise profile.</b>
<b>Explanation</b>	Error encountered while getting the Internal ID of the Enterprise profile.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4319</b>	<b>Error encountered while getting the Internal Identifier for the environment.</b>
<b>Explanation</b>	Error encountered while getting the Internal Identifier for the environment.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4320</b>	<b>"deliveryInfo" is empty. At least one Destination must be supplied.</b>
<b>Explanation</b>	While adding delivery settings, no destination supplied. At least one destination must be supplied.
<b>Action</b>	Supply at least one destination.
<b>TNS.0003.4321</b>	<b>"DestinationID" is empty. At least one DestinationID must be supplied.</b>
<b>Explanation</b>	While removing delivery settings, no destination ID supplied. At least one destination ID must be supplied.
<b>Action</b>	Supply at least one destination ID.
<b>TNS.0003.4322</b>	<b>Error encountered while adding the (externalIDType={0}).</b>
<b>Explanation</b>	Error encountered while adding the External ID type to Trading Networks.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4323</b>	<b>Service Signature given (Service Signature ={0}) is invalid. Give a valid one.</b>
<b>Explanation</b>	Validation failed while retrieving the input or output signature of a specified service.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0003.4324</b>	<b>Error encountered while extracting Registered delivery Services.</b>
<b>Explanation</b>	Error encountered while extracting registered delivery Services.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4325</b>	<b>Cannot set extended field {0} for partnerID {1}.</b>
<b>Explanation</b>	Error encountered while updating extended field for a profile.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4326</b>	<b>Could not add user mapping for partnerID {0} and User {1}.</b>
<b>Explanation</b>	Error encountered while adding user mapping for a profile.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4327</b>	<b>Either one of the inputs of simpleQuery or queryInput is mandatory for querying the profile.</b>
<b>Explanation</b>	Neither input of simpleQuery nor queryInput fields supplied for querying the profile.
<b>Action</b>	Supply either input of simpleQuery or queryInput fields for querying the profile.
<b>TNS.0003.4328</b>	<b>Error encountered while executing Profile Query</b>
<b>Explanation</b>	Error encountered while executing Profile Query
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4329</b>	<b>My Enterprise Profile with specified (partnerID={0}) cannot be deleted.</b>
<b>Explanation</b>	You tried to delete the Enterprise Profile, but the Enterprise profile cannot be deleted.
<b>Action</b>	Don not attempt to delete the Enterprise profile.
<b>TNS.0003.4332</b>	<b>Please specify correct value for routing field. Mandatory values for it are true and false.</b>
<b>Explanation</b>	Supplied value for routing field is neither true nor false.
<b>Action</b>	Supply valid routing field value. It should be either true or false.

<b>TNS.0003.4334</b>	<b>Error encountered while adding DLS artifacts with name ({0}).</b>
<b>Explanation</b>	Error encountered while adding DLS artifacts, found artifact with specified name as null.
<b>Action</b>	Supply valid value for specified artifact name.
<b>TNS.0003.4336</b>	<b>Error encountered while querying on DLS Rules.</b>
<b>Explanation</b>	Error encountered while querying on DLS Rules and roles.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4337</b>	<b>Pipeline for modifying the Rules and RuleRoleInfo shouldn't be null.</b>
<b>Explanation</b>	Input fields found to be null, while modifying the Rules and RuleRoleInfo.
<b>Action</b>	Supply the input fields containing IData/pipeline.
<b>TNS.0003.4338</b>	<b>Either of the Rules or RoleRoleInfo shouldn't be present.</b>
<b>Explanation</b>	Either Rules or RoleRoleInfo should be present while modifying.
<b>Action</b>	Supply either Rules or RoleRoleInfo.
<b>TNS.0003.4339</b>	<b>Error while Rule Addition/Modification, as a Rule already exists with the name ({0}).</b>
<b>Explanation</b>	Error encountered while adding or modifying rule, because a rule with the same name already exists.
<b>Action</b>	Supply rule with a different name.
<b>TNS.0003.4340</b>	<b>Error while Role Addition/Modification, as a Role already exists with the name ({0}).</b>
<b>Explanation</b>	Error encountered while adding or modifying a role, because a role with the same name already exists.
<b>Action</b>	Supply a role with different name.
<b>TNS.0003.4341</b>	<b>Please specify either Permission or ProfileID. Both of them are either null or empty. Either one of them is mandatory.</b>
<b>Explanation</b>	Found that Permission and ProfileID both are either null or empty while checking whether the current user can perform the required action.
<b>Action</b>	Supply either Permission and ProfileID.

---

<b>TNS.0003.4342</b>	<b>Please specify Permission. Either it is null or empty. Its a mandatory field.</b>
<b>Explanation</b>	During functional permission check, input field Permission found to be null or empty.
<b>Action</b>	Supply mandatory input field Permission.
<b>TNS.0003.4343</b>	<b>Error encountered while during operation on Functional Privileges.</b>
<b>Explanation</b>	Error encountered while checking functional privileges.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4344</b>	<b>Error encountered while querying for Functional Privileges.</b>
<b>Explanation</b>	Error encountered while querying for functional privileges.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4345</b>	<b>Please specify either Add or Remove. Both of them are either null or empty. Either one of them is mandatory.</b>
<b>Explanation</b>	While modifying functional privileges, both of the input field Add/Remove found empty or null.
<b>Action</b>	Supply valid values for the field Add/Remove.
<b>TNS.0003.4346</b>	<b>Access denied, as the User "{0}" does not have the permission to {1} {2}.</b>
<b>Explanation</b>	User is not permitted to perform the specified action.
<b>Action</b>	Contact your administrator.
<b>TNS.0003.4347</b>	<b>Access denied, as the User "{0}" does not have the permission to view {1}.</b>
<b>Explanation</b>	User is not allowed to perform the specified action.
<b>Action</b>	Contact your administrator.
<b>TNS.0003.4348</b>	<b>Access denied, as the User "{0}" does not have the privilege to {1} {2}.</b>
<b>Explanation</b>	User is not allowed to perform the specified action.
<b>Action</b>	Contact your administrator.

<b>TNS.0003.4349</b>	<b>Access denied, as the User "{0}" does not have the privilege to view {1}.</b>
<b>Explanation</b>	User is not allowed to perform the specified action.
<b>Action</b>	Contact your administrator.
<b>TNS.0003.4393</b>	<b>Access Denied. User "{0}" does not have permission to query expired certificates.</b>
<b>Explanation</b>	Specified user does not have permission to query expired certificates.
<b>Action</b>	Contact your administrator.
<b>TNS.0003.4399</b>	<b>Error encountered while getting list of permissions for the user "{0}".</b>
<b>Explanation</b>	Error encountered while getting list of permissions for the specified user.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4401</b>	<b>Error encountered while profile "{0}" disassociation with DataSet "{1}".</b>
<b>Explanation</b>	Error encountered while profile disassociation with DataSet.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.4402</b>	<b>Disassociation of profile "{0}" from DataSet "{1}" is disallowed. Dissassociation would have made profile disappear from your profile list.</b>
<b>Explanation</b>	Disassociation of profile from DataSet is disallowed. Dissassociation would have made profile disappear from your profile list.
<b>Action</b>	No action required.
<b>TNS.0003.4404</b>	<b>Could not create delivery service {0}. A delivery service named {0} already exists.</b>
<b>Explanation</b>	Delivery service with the same name already exists in Trading Networks.
<b>Action</b>	Add delivery service with different name.
<b>TNS.0003.4405</b>	<b>The WmTN Property file {0} does not exist</b>
<b>Explanation</b>	Not able to locate Trading Networks properties file at expected location.
<b>Action</b>	Restore the TN Properties file. Contact Software AG Global Support.

---

<b>TNS.0003.4406</b>	<b>The WmTN Property file {0} is read only</b>
<b>Explanation</b>	Not able to write to the Trading Networks properties file.
<b>Action</b>	Make the Trading Networks properties file writable. Contact Software AG Global Support.
<b>TNS.0003.5001E</b>	<b>This document type ({0}) is missing one or both of its signature queries (Signature and SignedBody). Signing cannot proceed.</b>
<b>Explanation</b>	Trading Networks cannot create a digital signature because the TN document type did not instruct Trading Networks to extract the signature or signed body system attributes.
<b>Action</b>	Add queries to extract the Signature and SignedBody system attributes to the TN document type. For instructions, see the Trading Networks documentation.
<b>TNS.0003.5002E</b>	<b>The signing service for this document ({0}) generated an error. The original error was {1}.</b>
<b>Explanation</b>	Error encountered while signing the specified document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.5003E</b>	<b>Signing Failed</b>
<b>Explanation</b>	See message TRNSERV.000013.000002 for full details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception displayed with message TRNSERV.000013.000002.
<b>TNS.0003.5005E</b>	<b>Base-64 encoding the signed body for this document failed to produce a value. The signed body (before encoding) was {0}.</b>
<b>Explanation</b>	The query used to extract the signed body from the document might be invalid. You specify the query that Trading Networks uses in the TN document type used for the document.
<b>Action</b>	If the query used for the signed body returned an empty string, adjust the signed body query for this TN document type. For instructions, see the Trading Networks documentation.
<b>TNS.0003.5006E</b>	<b>Encoding Error</b>
<b>Explanation</b>	See message TRNSERV.000013.000005 for full details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception displayed with message TRNSERV.000013.000005.

<b>TNS.0003.5007E</b>	<b>An error prevented fetching certificate info for the sender of this document.</b>
<b>Explanation</b>	An exception was thrown while retrieving certificates needed to sign a document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.5008E</b>	<b>Error fetching cert info</b>
<b>Explanation</b>	See message TRNSERV.000013.000007 for full details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception displayed with message TRNSERV.000013.000007.
<b>TNS.0003.5010E</b>	<b>No private key information was available for the sender of this document. {0}</b>
<b>Explanation</b>	Trading Networks encountered an error while fetching a private key. See the error message for details.
<b>Action</b>	You might need to import security data for this partner.
<b>TNS.0003.5012E</b>	<b>Applying the {1} query to this document failed. The error: {2}</b>
<b>Explanation</b>	Trading Networks encountered an error while executing the query to extract the signature from a document. See the exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.5013E</b>	<b>Query Error</b>
<b>Explanation</b>	See message TRNSERV.000013.000012 for full details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception displayed with message TRNSERV.000013.000012.
<b>TNS.0003.5014E</b>	<b>The signature query for doctype {0} identified the {1} node as the target of the signature, but this node is missing in this document. Signing cannot proceed.</b>
<b>Explanation</b>	The query used to extract the signature from the document identified a node that is not in the document. You specify the query that Trading Networks uses in the TN document type used for the document.
<b>Action</b>	Adjust the signature and/or signed body query for this TN document type. For instructions, see the Trading Networks documentation.

<b>TNS.0003.5015E</b>	<b>Missing Document Node</b>
<b>Explanation</b>	See message TRNSERV.000013.000014 for full details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception displayed with message TRNSERV.000013.000014.
<b>TNS.0003.5017E</b>	<b>No cert chains are available for the sender of this document. {0}</b>
<b>Explanation</b>	Trading Networks encountered an error while fetching a certificate chain. See the error message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the error.
<b>TNS.0003.5019E</b>	<b>Cannot sign documents from UNKNOWN sender</b>
<b>Explanation</b>	The sender of the document is unknown to Trading Networks. Reasons that Trading Networks might be unable to determine the sender are: 1) The query that Trading Networks uses to extract the Sender value from the document might be incorrect. The query is defined in the TN document type. 2) The value extracted from the document for the Sender query does not match the external ID of any partner in the Trading Networks database. 3) The structure of the document is incorrect.
<b>Action</b>	Do one of the following: 1) If the query used to extract the Sender value is not valid, adjust the query in the TN document type. For instructions, see the Trading Networks documentation. 2) If the value extracted for the Sender query does not match an external ID in the Trading Networks database, add the external ID to the appropriate partner's profile. For instructions, see the Trading Networks documentation. 3) If the document structure is incorrect, notify the partner that sent the document.
<b>TNS.0003.5021E</b>	<b>This doctype ({0}) has no signing service defined. Signing cannot continue.</b>
<b>Explanation</b>	This TN document type has no signing service defined, so Trading Networks cannot continue with signing.
<b>Action</b>	If this is an XML TN document type, contact Software AG Global Support. If this is not an XML TN document type and the TN document type supports signing services, define a signing service for the TN document type.
<b>TNS.0003.5024E</b>	<b>The signature query for doctype {0} ({1}) failed to identify a node to insert the signature into. Signing cannot proceed.</b>
<b>Explanation</b>	Either the query that Trading Networks uses to extract the signature is incorrect in the TN document type or the structure of the document is incorrect.
<b>Action</b>	If the query is not correct, adjust the signature query for this TN document type. For instructions, see the Trading Networks documentation. If the document structure is incorrect, notify the document sender.

<b>TNS.0003.5025E</b>	<b>The signature query for doctype {0} identified the {1} node as the target of the signature, but this node is not unique in this document. Signing cannot proceed.</b>
<b>Explanation</b>	Either the structure of the document is incorrect or the query that Trading Networks uses to extract the signature is incorrect in the TN document type.
<b>Action</b>	If the document structure is incorrect, notify the document sender. If the query is not correct, adjust the signature query for this TN document type. For instructions, see the Trading Networks documentation. Note that if your XQL query is returning an array of nodes, you can force it to return a single node by adding a subscript. For example, change <code>"/anXMLtag"</code> to <code>"/anXMLtag[0]"</code> .
<b>TNS.0003.5027W</b>	<b>No signing service for doctype {0}</b>
<b>Explanation</b>	This TN document type has no signing service defined, so Trading Networks cannot continue with signing.
<b>Action</b>	If this is an XML TN document type, contact Software AG Global Support. If this is not an XML TN document type and the TN document type supports signing services, define a signing service for the TN document type.
<b>TNS.0003.5030E</b>	<b>Trading Networks will not sign documents originating from the Unknown partner. Signing fails.</b>
<b>Explanation</b>	The sender of the document is unknown to Trading Networks. Reasons that Trading Networks might be unable to determine the sender are: 1) The query that Trading Networks uses to extract the Sender value from the document might be incorrect. The query is defined in the TN document type. 2) The value extracted from the document for the Sender query does not match the external ID of any partner in the Trading Networks database. 3) The structure of the document is incorrect.
<b>Action</b>	Do one of the following: 1) If the query used to extract the Sender value is not valid, adjust the query in the TN document type. For instructions, see the Trading Networks documentation. 2) If the value extracted for the Sender query does not match an external ID in the Trading Networks database, add the external ID to the appropriate partner's profile. For instructions, see the Trading Networks documentation. 3) If the document structure is incorrect, notify the partner that sent the document.
<b>TNS.0003.5031E</b>	<b>The signed body query for this document type ({0}) failed to produce a value. Signing the document fails. The query was {1}.</b>
<b>Explanation</b>	Either the query that Trading Networks uses to extract the signature is incorrect in the TN document type or the structure of the document is incorrect.
<b>Action</b>	If the query is not correct, adjust the signature query for this TN document type. For instructions, see the Trading Networks documentation. If the document structure is incorrect, notify the document sender.

---

<b>TNS.0003.6001E</b>	<b>Cannot persist a TPA</b>
<b>Explanation</b>	An exception was thrown while saving a TPA to the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6002E</b>	<b>Cannot retrieve a TPA</b>
<b>Explanation</b>	An exception was thrown while reading a TPA from the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6006E</b>	<b>Cannot delete a TPA with status="agreed"</b>
<b>Explanation</b>	You cannot delete a TPA with status Agreed.
<b>Action</b>	Change the TPA's status to Proposed and then delete it.
<b>TNS.0003.6007E</b>	<b>Cannot delete a TPA</b>
<b>Explanation</b>	An exception was thrown while deleting a TPA from the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6008E</b>	<b>Cannot update a TPA that has status="agreed"</b>
<b>Explanation</b>	A TPA in "Agreed" status cannot be revised.
<b>Action</b>	Change the TPA's status to "Proposed" before updating the TPA.
<b>TNS.0003.6009E</b>	<b>Cannot update a TPA</b>
<b>Explanation</b>	An exception was thrown while updating a TPA in the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6010E</b>	<b>Cannot get a TPA lock</b>
<b>Explanation</b>	An exception was thrown while getting a lock on a TPA in the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

<b>TNS.0003.6011E</b>	<b>Cannot update controlNumber for a TPA</b>
<b>Explanation</b>	An exception was thrown while updating the control number of a TPA in the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6014E</b>	<b>Cannot update tpaData when status="agreed" and dataStatus="immutable"</b>
<b>Explanation</b>	You attempted to update the TPA data that is associated with a TPA. The Agreement Status of the TPA is "Agreed" and the Data Status is "Non-modifiable." You cannot update the TPA data when the Data Status is "Non-modifiable."
<b>Action</b>	To be able to update the TPA data, perform one of the following actions: 1) change the Data Status to "Modifiable," or 2) change the Agreement Status to "Proposed."
<b>TNS.0003.6017E</b>	<b>Cannot update tpaData</b>
<b>Explanation</b>	An exception was thrown while updating the TPA data in a TPA in the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6018E</b>	<b>Cannot get the next controlNumber for a TPA</b>
<b>Explanation</b>	An exception was thrown while determining the next control number for a TPA in the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6020E</b>	<b>Cannot change status for a TPA</b>
<b>Explanation</b>	An exception was thrown while changing the status of a TPA in the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6021E</b>	<b>A TPA that matches senderID, receiverID and agreementID does not exists</b>
<b>Explanation</b>	Internal error
<b>Action</b>	Contact Software AG Global Support.

---

<b>TNS.0003.6022E</b>	<b>Missing senderID, or receiverID, or agreementID or initService</b>
<b>Explanation</b>	Internal error
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.6023E</b>	<b>Cannot invoke initService</b>
<b>Explanation</b>	Unable to initialize the data in a TPA because the TPA's initialization service could not be invoked.
<b>Action</b>	Make sure the TPA's initialization service is an existing service in an enabled package.
<b>TNS.0003.6025E</b>	<b>Query TPA exception</b>
<b>Explanation</b>	An exception was thrown while executing a TPA database query.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6026E</b>	<b>Cannot get all TPAs</b>
<b>Explanation</b>	An exception was thrown while retrieving a list of TPAs from the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6027E</b>	<b>Cannot import TPA</b>
<b>Explanation</b>	An exception was thrown while importing one or more TPAs.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6028E</b>	<b>Missing data schema</b>
<b>Explanation</b>	No IS document type is defined for the TPA.
<b>Action</b>	Define an IS document type for the TPA.
<b>TNS.0003.6029E</b>	<b>Missing TPA data</b>
<b>Explanation</b>	The TPA Data field in the TPA is empty.
<b>Action</b>	Enter values into the TPA Data field.

<b>TNS.0003.6030E</b>	<b>Cannot invoke validation service</b>
<b>Explanation</b>	An exception was thrown while invoking the pub.schema:validate service while validating the structure of the IS document type in the TPA.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6031E</b>	<b>Missing {0}</b>
<b>Explanation</b>	A required input variable was not supplied to the wm.tn.tpa:updateTPA service.
<b>Action</b>	Supply a value for the required variable.
<b>TNS.0003.6032E</b>	<b>A TPA that matches senderID, receiverID and agreementID already exists</b>
<b>Explanation</b>	Cannot save this TPA because it would duplicate an existing TPA.
<b>Action</b>	Either add the data in this TPA to the one that already exists, or specify a different agreementID.
<b>TNS.0003.6033E</b>	<b>A TPA that matches senderID, receiverID and agreementID does not exist</b>
<b>Explanation</b>	Cannot update the TPA because Trading Networks cannot locate a TPA in the database that has the supplied senderID, receiverID, and agreementID.
<b>Action</b>	Specify a senderID, receiverID and agreementID that matches an existing TPA.
<b>TNS.0003.6034E</b>	<b>controlNumber cannot not be null</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.6035E</b>	<b>tpaData cannot not be null</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.6036E</b>	<b>Cannot update tpaData when dataStatus="immutable"</b>
<b>Explanation</b>	You cannot make changes to a TPA's data when the TPA's Data Status is "Non-modifiable."
<b>Action</b>	To make changes to the TPA data, change the TPA's Data Status to "Modifiable."

---

<b>TNS.0003.6037E</b>	<b>Cannot update controlNumber</b>
<b>Explanation</b>	An exception was thrown while updating the control number of a TPA in the database.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.6038E</b>	<b>There are more than one TPA that matches senderID, receiverID and agreementID</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.6039E</b>	<b>Cannot serialize tpaData</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0003.6040E</b>	<b>Cannot de-serialize tpaData</b>
<b>Explanation</b>	The supplied control number is not a valid integer.
<b>Action</b>	Supply a valid integer value.
<b>TNS.0003.6041</b>	<b>New controlNumber is not an integer</b>
<b>Explanation</b>	Encountered error while parsing supplied controlNumber because it is not an integer.
<b>Action</b>	Supply an integer value for controlNumber.
<b>TNS.0003.6042E</b>	<b>A TPA with the supplied ID ({0}) does not exist.</b>
<b>Explanation</b>	An invalid value was supplied for the tpaID field.
<b>Action</b>	Supply a valid TPA ID.
<b>TNS.0003.6043E</b>	<b>If "tpaID" is not supplied, then "senderID", "receiverID" and "agreementID" must be supplied.</b>
<b>Explanation</b>	The user did not supply the correct required inputs.
<b>Action</b>	Supply the required inputs.
<b>TNS.0003.6044</b>	<b>Attempted to import a TPA for Sender {0}, but the sender's profile is not defined on your Trading Networks system.</b>
<b>Explanation</b>	Attempted to import a TPA for Sender, but the sender's profile is not defined on your Trading Networks system.
<b>Action</b>	Import Sender's profile first.

**TNS.0003.6045**      **Attempted to import a TPA for Receiver {0}, but the receiver's profile is not defined on your Trading Networks system.**

**Explanation**      Attempted to import a TPA for Receiver, but the receiver's profile is not defined on your Trading Networks system.

**Action**             Import Receiver's profile first.

**TNS.0003.6050**      **Attempted to import a Archive Scheduled Service for Sender {0}, but the sender's profile is not defined on your Trading Networks system.**

**Explanation**      Attempted to import a Archive Scheduled Service for specified Sender, but the sender's profile is not defined on your Trading Networks system.

**Action**             Import Sender's profile first.

**TNS.0003.6051**      **Attempted to import a Archive Scheduled Service for Receiver {0}, but the receiver's profile is not defined on your Trading Networks system.**

**Explanation**      Attempted to import a Archive Scheduled Service for Receiver, but the receiver's profile is not defined on your Trading Networks system.

**Action**             Import Receiver's profile first.

**TNS.0003.7002E**      **Document type {0} has no validation service defined. Validation fails.**

**Explanation**      Supplied document type has no validation service defined.

**Action**             Contact Software AG Global Support.

**TNS.0003.7003E**      **No Validation Service**

**Explanation**      A TN document type has no validation service defined. Validation fails.

**Action**             Contact Software AG Global Support.

**TNS.0003.7004E**      **{0}: {1}**

**Explanation**      A document sent to Trading Networks failed validation.

**Action**             Notify the document sender.

**TNS.0003.7005W**      **Doctype {0}: no validation svc. defined; validation skipped**

**Explanation**      Document type has no validation service defined. Validation fails.

**Action**             Contact Software AG Global Support.

---

<b>TNS.0003.7010E</b>	<b>The doctype for this document ({0}) does not have a validation schema defined; validation fails.</b>
<b>Explanation</b>	The document matches a TN document type that indicates the document's structure should be validated, but no schema was defined.
<b>Action</b>	Update the TN document type, and specify the schema to use for document validation.
<b>TNS.0003.7011E</b>	<b>No Validation Schema</b>
<b>Explanation</b>	The document matches a processing rule that indicates the document's structure should be validated, but no schema was defined.
<b>Action</b>	Update the TN document type that the document matches to specify the schema to use for document validation.
<b>TNS.0003.7012E</b>	<b>The validation service for this XML document, {0}, could not be successfully invoked. The original exception message is: {1}</b>
<b>Explanation</b>	The service used to validate the document's structure threw an exception.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.7013E</b>	<b>The validation service used for this document ({0}) failed with the following exception message: {1}</b>
<b>Explanation</b>	The service used to validate the document's structure threw an exception.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.7014E</b>	<b>Validation Service Failed</b>
<b>Explanation</b>	The service used to validate the document's structure threw an exception.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0003.7015E</b>	<b>XML validation failed: does not apply to non-XML documents.</b>
<b>Explanation</b>	Invoked the wm.tn.doc.xml:validate service with a document that is not XML.
<b>Action</b>	Supply an XML document.
<b>TNS.0003.7016E</b>	<b>XML validation failed: no document content available</b>
<b>Explanation</b>	Document is empty.
<b>Action</b>	Supply an XML document that has content.

<b>TNS.0003.7017E</b>	<b>The validation service, {0} aborted processing of this document. The message was {1}.</b>
<b>Explanation</b>	The document is not valid XML.
<b>Action</b>	Notify the document sender.
<b>TNS.0003.7019E</b>	<b>Flat file validation failed. Document type is not "flat file".</b>
<b>Explanation</b>	Attempted to use a flat file validation service to validate a document that is not a flat file.
<b>Action</b>	Supply a flat file document.
<b>TNS.0003.7020E</b>	<b>Flat file validation failed: no document content available</b>
<b>Explanation</b>	Document is empty.
<b>Action</b>	Supply a flat file document that has content.
<b>TNS.0003.7021E</b>	<b>Flat file validation failed. Document type "{0}" has no parsing schema.</b>
<b>Explanation</b>	The document matches a TN document type that indicates the document's structure should be validated, but no schema was defined.
<b>Action</b>	Update the TN document type, and specify the schema to use for document validation.
<b>TNS.0003.7022E</b>	<b>Validation error</b>
<b>Explanation</b>	The flat file document structure is invalid.
<b>Action</b>	Notify the document sender.
<b>TNS.0004.1001E</b>	<b>Invalid or missing page number.</b>
<b>Explanation</b>	This error occurs if a value for the pageNum variable is not specified for the wm.tn.enumerate:nth service or if a value for the pageNumber variable is not specified for the wm.tn.query:getQueryResults service.
<b>Action</b>	Specify a value for the pageNum variable or pageNumber variable.
<b>TNS.0004.1002E</b>	<b>id is required.</b>
<b>Explanation</b>	A value for the id input variable was not specified for either the wm.tn.enumerate:nth service or the wm.tn.enumerate:first service.
<b>Action</b>	Specify a value for the input variable id.

---

<b>TNS.0004.1004E</b>	<b>Invalid time interval {0} for query.</b>
<b>Explanation</b>	The wm.tn.query:createDocumentQuery service was supplied an invalid value for the input variable timeInterval.
<b>Action</b>	Provide a valid value for the input variable timeInterval.
<b>TNS.0004.1005E</b>	<b>Unknown attribute ID: {0}.</b>
<b>Explanation</b>	The wm.tn.query:createDocumentQuery service was provided an invalid value for the input variable attribId.
<b>Action</b>	Provide a valid value for the input variable attribId.
<b>TNS.0004.1006E</b>	<b>Unknown attribute name: {0}.</b>
<b>Explanation</b>	The wm.tn.query:createDocumentQuery service was provided an invalid value for the input variable attribName.
<b>Action</b>	Provide a valid value for the input variable attribName.
<b>TNS.0004.1007E</b>	<b>Unknown op: {0}.</b>
<b>Explanation</b>	The wm.tn.query:createDocumentQuery service was provided an invalid value for the input variable op.
<b>Action</b>	Provide a valid value for the input variable op. For more information about valid values, refer to the Trading Networks documentation.
<b>TNS.0004.1008E</b>	<b>Invalid entry type {0} for event.</b>
<b>Explanation</b>	The wm.tn.query:createEventQuery service was provided an invalid value for the input variable entryType.
<b>Action</b>	Provide a valid value for the input variable entryType.
<b>TNS.0004.1009E</b>	<b>Invalid time interval {0} for query</b>
<b>Explanation</b>	Either the wm.tn.query:createEventQuery service or the wm.tn.query:createTPAQuery service has an invalid value specified for the input variable timeInterval.
<b>Action</b>	Specify a valid value for the input variable timeInterval.
<b>TNS.0004.1010E</b>	<b>Invalid timeCreated interval {0} for query</b>
<b>Explanation</b>	The wm.tn.query:createTaskQuery service has an invalid value specified for the input variable timeCreated.
<b>Action</b>	Specify a valid value for the input variable timeCreated.

<b>TNS.0004.1012D</b>	<b>Requested page is not available</b>
<b>Explanation</b>	Requested page is not available. This error occurs when Trading Networks attempts to read beyond the end of the query results while invoking the wm.tn.enumerate:nth service. This error can also occur when data corresponding to the pageNumber input variable for the service wm.tn.query:getQueryResults is not available to Trading Networks.
<b>Action</b>	If the error occurs while invoking the wm.tn.enumerate:nth service, ensure the value specified for pageNum is valid. If the error occurs while invoking the wm.tn.query:getQueryResults service, ensure the value specified for pageNumber is valid. If the problem still persists, refresh the query.
<b>TNS.0004.1013D</b>	<b>Unable to retrieve page. Operation timed out.</b>
<b>Explanation</b>	The Integration Server might be busy doing other work.
<b>Action</b>	Attempt to retrieve the page again, or re-execute the query.
<b>TNS.0004.1014E</b>	<b>Query execution failed.</b>
<b>Explanation</b>	An exception occurred while executing a database query.
<b>Action</b>	The exception was written to the log. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0004.1015E</b>	<b>External ID value is required.</b>
<b>Explanation</b>	You created a profile query that specifies an externalIDType, but did not specify an externalIDValue.
<b>Action</b>	Provide a valid value for the externalIDValue input variable to the createProfileQuery service.
<b>TNS.0004.1016E</b>	<b>fieldId[{0}] is null or empty.</b>
<b>Explanation</b>	You created a profile query that specifies an externalIDValue, but you did not specify an externalIDType.
<b>Action</b>	Supply a valid value for the externalIDType input variable to the createProfileQuery service.
<b>TNS.0004.2001E</b>	<b>Illegal query type: {0}.</b>
<b>Explanation</b>	The query type specified as the input to the service is not valid.
<b>Action</b>	Supply a valid value for the query type. For a list of valid values, see the Trading Networks documentation.

---

<b>TNS.0004.2002E</b>	<b>pageNumber should be a positive integer.</b>
<b>Explanation</b>	The wm.tn.query:getQueryResults service was supplied an invalid value for the input variable pageNumber.
<b>Action</b>	Supply a valid value for the input variable pageNumber. The value must be a positive integer.
<b>TNS.0004.2003E</b>	<b>A valid pageNumber is required.</b>
<b>Explanation</b>	The pageNumber input variable for the wm.tn.query:getQueryResults service is not valid.
<b>Action</b>	Specify a valid value for pageNumber. The value must be a positive integer.
<b>TNS.0004.2005E</b>	<b>Got null query result data for queryId={0}, page={1}.</b>
<b>Explanation</b>	The wm.tn.query:getQueryResults service is not able to find the data corresponding to the specified queryId and pageNumber.
<b>Action</b>	Ensure the queryId and pageNumber are correct. If the issue persists, resubmit the query.
<b>TNS.0004.2006E</b>	<b>Got null row at index {0}.</b>
<b>Explanation</b>	There is no data corresponding to the specified index.
<b>Action</b>	Make sure the specified index is correct.
<b>TNS.0004.2008I</b>	<b>Can not retrieve task {0}.</b>
<b>Explanation</b>	While searching for tasks in My webMethods Server, no data corresponding to the specified taskId was found.
<b>Action</b>	Make sure the taskId is correct. If you update the taskId, then you must resubmit the query.
<b>TNS.0004.2010E</b>	<b>User does not have adequate privilege to obtain requested data.</b>
<b>Explanation</b>	The user's attempt to view the data failed because the user does not have permission to view the requested data.
<b>Action</b>	An administrator can grant permission to the user. For information about assigning permissions, refer to the Trading Networks documentation.

<b>TNS.0004.2011E</b>	<b>Bizdoc with internal id={0} does not exist.</b>
<b>Explanation</b>	The bizdoc with the specified docId cannot be found in the Trading Networks database .
<b>Action</b>	Make sure the docId is correct. If you change the docId, resubmit the query.
<b>TNS.0004.2012E</b>	<b>Null bizdoc retrieved for internal id = {0}.</b>
<b>Explanation</b>	The bizdoc with the specified docID cannot be found in the Trading Networks database.
<b>Action</b>	Make sure the specified docId is correct. If you change the docId, then you must resubmit the query.
<b>TNS.0004.2013E</b>	<b>Can not parse {0}: {1}.</b>
<b>Explanation</b>	The specified input value must be an integer.
<b>Action</b>	Supply a valid integer for the specified input value.
<b>TNS.0004.2017E</b>	<b>Retrieved null content part for document id = {0}, part name = {1}.</b>
<b>Explanation</b>	There are no content parts available for the bizdoc that corresponds to the specified docId.
<b>Action</b>	Make sure that the specified docId is correct and the content parts are recieved. After specifying the correct docId, resubmit the query.
<b>TNS.0004.2019</b>	<b>{0} encountered execution error.</b>
<b>Explanation</b>	An exception occurred while executing the service <code>wm.tn.portal.queries.getContentPartBytes</code> .
<b>Action</b>	The exception is in the full message. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0004.2027</b>	<b>{0} encountered error resubmitting internalDocIDs[{1}] = {2}.</b>
<b>Explanation</b>	In webMethods Trading Networks, when you resubmit the Bizdocs, this exception is thrown if the resubmission fails.
<b>Action</b>	Contact your system administrator.

<b>TNS.0004.2028</b>	<b>{0} encountered error while resubmitting following internalDocIDs: {1}. Access denied, as user {2} doesn't have permission to resubmit these documents.</b>
<b>Explanation</b>	In webMethods Trading Networks, while resubmitting the BizDoc documents, if the user does not have access permission to resubmit these documents, this error is thrown.
<b>Action</b>	The administrator needs to give permission to the user for resubmitting the BizDoc documents.
<b>TNS.0004.2030</b>	<b>{0} encountered null or empty internalDocIDs[{1}], this document was not reprocessed.</b>
<b>Explanation</b>	In webMethods Trading Networks, while reprocessing BizDocs, if null or empty internal DocIDs are passed, this error is thrown.
<b>Action</b>	Ensure that the internal DocIDs are not null or empty.
<b>TNS.0004.2031</b>	<b>{0} encountered error reprocessing internalDocIDs[{1}] {2}.</b>
<b>Explanation</b>	In webMethods Trading Networks, if an error is encountered while reprocessing BizDocs, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0004.2032</b>	<b>{0} encountered error while reprocessing following internalDocIDs: {1}. Access denied, as user {2} doesn't have permission to reprocess these documents.</b>
<b>Explanation</b>	In webMethods Trading Networks, if an error is encountered while reprocessing BizDocs, access is denied as the user does not have permission to reprocess the documents.
<b>Action</b>	Ensure that the administrator gives permission to the user to reprocess BizDocs.
<b>TNS.0004.2034</b>	<b>{0} encountered null or empty taskIDs[{1}] {2}, this task was not stopped.</b>
<b>Explanation</b>	In webMethods Trading Networks, while stopping the tasks, if null or empty taskIDs are passed, this error is thrown.
<b>Action</b>	Ensure that the taskID is not null or empty and try again.
<b>TNS.0004.2035</b>	<b>{0} encountered error stopping taskIDs[{1}] {2}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while stopping the tasks, if the stopping fails for any reason, this error is thrown
<b>Action</b>	Contact your system administrator.

<b>TNS.0004.2036</b>	<b>{0} encountered error while stopping following tasks: {1}. Access denied, as user {2} doesn't have permission to stop these tasks.</b>
<b>Explanation</b>	In webMethods Trading Networks, while stopping the tasks, if the user does not have permission to stop the tasks, this error is thrown.
<b>Action</b>	Ensure that the user has permission to stop the tasks.
<b>TNS.0004.2038</b>	<b>{0} encountered null or empty taskIDs[{1}], this task was not restarted.</b>
<b>Explanation</b>	In webMethods Trading Networks, while restarting tasks, if null or empty taskIDs are passed, this error is thrown.
<b>Action</b>	Ensure that the taskID is not null or empty and try again.
<b>TNS.0004.2039</b>	<b>{0} encountered error restarting taskIDs[{1}] {2}.</b>
<b>Explanation</b>	In webMethods Trading Networks, if restarting tasks fails, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0004.2040</b>	<b>{0} encountered error while restarting following tasks: {1}. Access denied, as user {2} doesn't have permission to restart these tasks.</b>
<b>Explanation</b>	In webMethods Trading Networks, while restarting tasks, if access is denied to the user, this error is thrown.
<b>Action</b>	Ensure that the user has access permission to restart tasks and try again.
<b>TNS.0004.2042</b>	<b>{0} encountered null or empty taskIDs[{1}], this task was not deleted.</b>
<b>Explanation</b>	In webMethods Trading Networks, while deleting tasks, if null or empty taskIDs are passed, this error is thrown.
<b>Action</b>	Ensure that the taskIDs passed are not null or empty, and try again.
<b>TNS.0004.2043</b>	<b>{0} encountered error deleting taskIDs[{1}] {2}.</b>
<b>Explanation</b>	In webMethods Trading Networks, if an error occurs while deleting the tasks, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0004.2044</b>	<b>{0} encountered error while deleting following tasks: {1}. Access denied, as user{2} doesn't have permission to delete these tasks.</b>
<b>Explanation</b>	In webMethods Trading Networks, while deleting tasks, if the user does not have permission, this error is thrown.
<b>Action</b>	Ensure that the user has permission to delete tasks, and try again.

---

<b>TNS.0004.2048</b>	<b>{0} encountered error while updating User Status for internalDocID {1}. Access denied, as user {2} doesn't have permission to change UserStatus for this document.</b>
<b>Explanation</b>	In webMethods Trading Networks, while updating the user status for XXX, if access is denied because the user does not have permission to change UserStatus for this document, this error is thrown.
<b>Action</b>	Ensure to give permission to the user to change UserStatus for the document, and try again.
<b>TNS.0004.2050</b>	<b>{0} encountered error while updating comments for internalDocID {1}. Access denied, as user {2} doesn't have permission to edit comments for this document.</b>
<b>Explanation</b>	In webMethods Trading Networks, while updating comments for an internal document, if access is denied because the user does not have access permissions, this error is thrown.
<b>Action</b>	Ensure that the user has access permissions and try again.
<b>TNS.0004.2052</b>	<b>{0} encountered error while deleting following ActivityLogIDs: {1}. Access denied, as user {2} doesn't have permission to delete these activity logs.</b>
<b>Explanation</b>	In webMethods Trading Networks, while deleting activity logs, if access is denied because the user does not have access permissions, this error is thrown.
<b>Action</b>	Ensure that the user has access permissions, and try again.
<b>TNS.0004.2054</b>	<b>{0} can not reassign task {1} to {2}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while reassigning the task to another server, if it is unsuccessful, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0004.2055</b>	<b>{0} encountered error while reassigning following tasks. Access denied, as user {2} doesn't have permission to reassign these tasks.</b>
<b>Explanation</b>	In webMethods Trading Networks, while reassigning tasks to another server, if the user does not have access permissions, this error is thrown.
<b>Action</b>	Ensure that the user has access permissions, and try again.
<b>TNS.0004.2057</b>	<b>ws.monitor.process.instance:getList returns null output.</b>
<b>Explanation</b>	In webMethods Trading Networks, while getting process information, if ws.monitor.process.instance:getList service returns null output, this error is thrown.
<b>Action</b>	Ensure that the ws.monitor.process.instance:getList service does not return null output, and try again.

<b>TNS.0004.2058</b>	<b>{0} can not get instance information for conversationId {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks, when the user gets a null value of the process information for the conversation ID, this error is thrown.
<b>Action</b>	Ensure the conversation ID is valid and try again.
<b>TNS.0004.2060</b>	<b>{0} retrieved null instance at index 0 for conversationId {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while getting process information for a conversation ID, if the instance at index 0 is null, this error is thrown.
<b>Action</b>	Ensure that the instance at index 0 is not null and try again.
<b>TNS.0004.2065</b>	<b>WmMonitor package is not enabled.</b>
<b>Explanation</b>	In webMethods Trading Networks, while checking process information, the WmMonitor package is not installed or enabled.
<b>Action</b>	Ensure that the WmMonitor package is installed and enabled.
<b>TNS.0004.2066</b>	<b>{0} can not submit document.</b>
<b>Explanation</b>	In webMethods Trading Networks, if resubmission of a modified document fails, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0004.2067</b>	<b>{0} encountered error retrieving submitted document from pipeline.</b>
<b>Explanation</b>	In webMethods Trading Networks, while resubmitting documents with modifications, if the retrieved BizDoc is null, this error is encountered.
<b>Action</b>	Ensure that the resubmitted BizDoc is not null and try again.
<b>TNS.0004.2071</b>	<b>{0} encountered error while modifying &amp; resubmitting following document {1}. Access denied, as user {2} doesn't have permission to modify and resubmit this document.</b>
<b>Explanation</b>	In webMethods Trading Networks, while resubmitting modified BizDoc documents, if the user does not have access permissions, this error is displayed.
<b>Action</b>	Ensure that the user has access permissions to resubmit and modify BizDoc documents, and try again.

---

<b>TNS.0004.2072</b>	<b>{0} encountered execution error.</b>
<b>Explanation</b>	In webMethods Trading Networks, if the execution of any query related service fails, this error is displayed.
<b>Action</b>	Contact your system administrator.
<b>TNS.0004.2074</b>	<b>can not parse {0} to long number.</b>
<b>Explanation</b>	In webMethods Trading Networks Server portal util, in the getTimestampFromLong utility, if the time is not in numbered format, this error is thrown.
<b>Action</b>	Enter time in a numbered format and try again.
<b>TNS.0004.2075</b>	<b>null or empty field name</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the checkQueryColumnName utility throws this exception when the column name is null or empty.
<b>Action</b>	Enter a column name that is not null.
<b>TNS.0004.2076</b>	<b>Invalid query column name: {0}.</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the checkQueryColumnName utility throws an exception if the column name is invalid.
<b>Action</b>	Enter a valid column name and try again.
<b>TNS.0004.2077</b>	<b>Invalid document attribute "{0}".</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the checkQueryColumnName utility throws an exception if the query type is of doc query and the attribute list of the document does not contain the name passed to the utility.
<b>Action</b>	Ensure that the attribute list of the document contains the name passed to the utility and try again.
<b>TNS.0004.2078</b>	<b>Invalid whichQuery value ({0}) for PortalUtils.checkQueryColumnName().</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the checkQueryColumnName utility throws an exception if the query type passed to the utility is invalid.
<b>Action</b>	Ensure to enter a valid query type and try again.

<b>TNS.0004.2079</b>	<b>Invalid value for {0}: null or empty.</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the validateOperator utility throws an exception if the operator passed to the utility is null or empty.
<b>Action</b>	Pass a valid operator to the utility and try again.
<b>TNS.0004.2080</b>	<b>Invalid operator {0} for data type {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the validateOpValPair utility throws an exception if the operator passed to the utility is null or empty.
<b>Action</b>	Enter a valid operator and try again.
<b>TNS.0004.2081</b>	<b>Invalid null value for {0}, corresponding operator is {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the validateOpValPair utility throws an exception if the value supplied corresponding to an operator is null.
<b>Action</b>	Enter a not null value corresponding to the operator.
<b>TNS.0004.2082</b>	<b>Illegal value for number query, {0}: {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the validateOpValPair utility throws this exception if the value passed to this utility corresponding to an operator is not in numeric value.
<b>Action</b>	Pass the value to the utility in numeric value and try again.
<b>TNS.0004.2083</b>	<b>Illegal value for date and time query, {0}: {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the validateOpValPair utility throws this exception if the value passed to this utility corresponding to an operator is not parsed to a long value.
<b>Action</b>	Enter a numeric long value for the date and time query and try again.
<b>TNS.0004.2084</b>	<b>Unable to display the error message. An internal error has occurred. Please contact customer support.</b>
<b>Explanation</b>	In webMethods Trading Networks portal util, the decodeErrorMessage2 utility throws an exception and is unable to decode the error message.
<b>Action</b>	Contact your system administrator.

<b>TNS.0004.2085</b>	<b>Can not get related document information for docId={0}: null data returned</b>
<b>Explanation</b>	In webMethods Trading Networks, while getting document information for a document ID, If the data extracted for the document ID is null, it throws an error.
<b>Action</b>	Contact your system administrator.
<b>TNS.0004.2086</b>	<b>Invalid whichQuery value {0}.</b>
<b>Explanation</b>	In webMethod Trading Networks, this error message is shown if the query type (whichQuery) for creating a query is invalid.
<b>Action</b>	Enter a valid query type (whichQuery) in creating a query.
<b>TNS.0004.2088</b>	<b>Invalid non-number value for queryInput/pageSize: {0}.</b>
<b>Explanation</b>	In webMethods Trading Networks, in creating a query, the query input or page size entered is a non-number value.
<b>Action</b>	Enter a valid numeric value for the query input or the page size.
<b>TNS.0004.2089</b>	<b>queryInput/pageSize value is equal or less than 0.</b>
<b>Explanation</b>	In the webMethods Trading Networks, while creating or retrieving a query, the queryInput or pageSize value entered is not valid because it is equal to or less than 0.
<b>Action</b>	Enter a valid queryInput or pageSize value for creating or retrieving a query.
<b>TNS.0004.2090</b>	<b>queryInput/criteria/dateRange/startDate {0} is after queryInput/criteria/dateRange/endDate {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query, if the start time is earlier than the end time, this error is shown.
<b>Action</b>	Ensure to correct the start time.
<b>TNS.0004.2091</b>	<b>Invalid null value for queryInput/sortOrder[{0}].</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating or retrieving a query, if any of the sorting columns is null, this error is shown.
<b>Action</b>	Ensure that the sorting column is not null.

<b>TNS.0004.2092</b>	<b>{0} queryInput/sortOrder[{1}]/columnName ({2}) is not valid, ignored this column for query sorting.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query, if the sorting column specified in the query input is not valid, the column is ignored for query sorting.
<b>Action</b>	Ensure to enter a valid sorting column in the query.
<b>TNS.0004.2093</b>	<b>Invalid null value for queryInput/criteria/fields[{0}].</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query, if any of the given fields is null, this error is shown.
<b>Action</b>	Ensure to enter a valid value (not null) for all the fields.
<b>TNS.0004.2094</b>	<b>Invalid null or empty queryInput/criteria/fields[{0}]/fieldName value.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query, if the field name is null or empty, this error is thrown.
<b>Action</b>	Ensure that all field names are valid.
<b>TNS.0004.2095</b>	<b>query criteria for field {0} already exists, additional criteria found at index {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query, if the query criteria for the field already exists, this error is thrown.
<b>Action</b>	Enter a query criteria that is unique.
<b>TNS.0004.2096</b>	<b>Invalid value: {0} for queryInput/criteria/fields/isOrQuery.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query, an invalid value is entered for the IsOrQuery (value of OR is undefined).
<b>Action</b>	Enter a valid value for the IsOrQuery (value of OR).
<b>TNS.0004.2097</b>	<b>queryInput/criteria/fields[{0}]/criteria is null or 0-length.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query object based on filter criteria, the criteria list for query fields is null or empty.
<b>Action</b>	Enter a valid criteria list for query fields in queryInput.
<b>TNS.0004.2100</b>	<b>Invalid value for {0}: null or empty.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query object based on filter criteria, if the criteria does not contain any operator, this error is thrown.
<b>Action</b>	Enter the operator for the criteria.

<b>TNS.0004.2101</b>	<b>{0} criteria can only be a list plus a dynamic profile query.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query object based on filter criteria, if the query type is a doc query, there should be only one list of values and profile query in the sender and receiver criteria.
<b>Action</b>	Enter only one list of values and profile query in the sender and receiver criteria and try again.
<b>TNS.0004.2102</b>	<b>Invalid value for {0}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while creating a query object based on filter criteria, if the query is of jobQuery type, the internal doc ID or the sender ID or the task ID or the server ID or the instance ID cannot be null.
<b>Action</b>	Ensure that the internal doc ID or the sender ID or the task ID or the server ID or the instance ID are not null and try again.
<b>TNS.0004.2103</b>	<b>Can not understand query {0}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while performing a query, if the query type is not a doc, task, event, profile, bizdoc type, attrib, tpa, or invite type of query, this error message is thrown.
<b>Action</b>	Enter the valid query type and try again.
<b>TNS.0005.1003E</b>	<b>Service manager create failed for server {0} - {1}</b>
<b>Explanation</b>	Encountered a problem while communicating with the database. See the text in the SQL exception for details.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1005E</b>	<b>Unable to get profile for {0} - {1}</b>
<b>Explanation</b>	Encountered a problem while communicating with the database. See the text in the SQL exception for details.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.

<b>TNS.0005.1006E</b>	<b>Unable to remove delivery service {0} - {1}</b>
<b>Explanation</b>	Encountered a problem while communicating with the database. See the text in the SQL exception for details.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1014E</b>	<b>Unable to create delivery task {0} - service {1} does not exist</b>
<b>Explanation</b>	Attempted to deliver a document using a non-existent delivery service.
<b>Action</b>	Correct the serviceName parameter sent to wm.tn.delivery:deliver.
<b>TNS.0005.1027E</b>	<b>Unable to create service data for partner {0} - {1}</b>
<b>Explanation</b>	Attempted to deliver a document to a partner that cannot receive the document. Receiver is either INACTIVE or is My Enterprise (the entity hosting this Trading Network).
<b>Action</b>	Deliver the document to a valid trading partner with an ACTIVE status.
<b>TNS.0005.1028E</b>	<b>Unable to set private key and certificate chain - {0}</b>
<b>Explanation</b>	Encountered an exception while setting the certificate chain and private key in preparation to deliver a document. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1032E</b>	<b>{0} refreshing {1} cache: {2}</b>
<b>Explanation</b>	Encountered an exception while refreshing an internal cache. See the exception message for details.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1038E</b>	<b>Error transporting via {0}: {1}</b>
<b>Explanation</b>	Encountered an exception while delivering a document. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception, if possible. It may be a network error beyond your control.

---

<b>TNS.0005.1040E</b>	<b>{0} initializing task store: {1}</b>
<b>Explanation</b>	Encountered an exception while initializing internal caches used for document delivery. See the exception message for details.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1041E</b>	<b>{0} deleting delivery service {1}: {2}</b>
<b>Explanation</b>	Encountered an exception while removing a registered delivery service from the database.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1050E</b>	<b>{0} deleting task {1}: {2}</b>
<b>Explanation</b>	Encountered an exception while deleting a delivery or routing task.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1054E</b>	<b>DeliveryUtils init error: Unable to get profile store: {0}</b>
<b>Explanation</b>	Could not access the profile store during server initialization.
<b>Action</b>	Copy the exception details and call Software AG Global Support.
<b>TNS.0005.1055E</b>	<b>Unable to register delivery service {0} - {1}</b>
<b>Explanation</b>	Encountered an exception while registering a delivery service.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1064E</b>	<b>Unable to initialize delivery interface</b>
<b>Explanation</b>	Encountered an exception while initializing the Delivery Service Manager.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.

<b>TNS.0005.1065E</b>	<b>Unable to register delivery defaults</b>
<b>Explanation</b>	Encountered an exception while registering the built-in delivery services.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1066E</b>	<b>Unable to deliver bizdoc by service</b>
<b>Explanation</b>	Encountered an exception when wm.tn.deliver:deliverByService was invoked.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception, if possible. It may be a network error beyond your control.
<b>TNS.0005.1067E</b>	<b>Error delivering bizdoc</b>
<b>Explanation</b>	Encountered an exception while delivering a document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception, if possible. It may be a network error beyond your control.
<b>TNS.0005.1068E</b>	<b>Error getting delivery job</b>
<b>Explanation</b>	Encountered an exception while retrieving a delivery job.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1069E</b>	<b>Error getting delivery job output</b>
<b>Explanation</b>	Encountered an exception while retrieving the output of a reliable delivery job.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1070E</b>	<b>Error getting delivery job status</b>
<b>Explanation</b>	Encountered an exception while retrieving the status of a delivery job.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0005.1071E</b>	<b>Error removing delivery job</b>
<b>Explanation</b>	Encountered an exception while removing a reliable delivery job.
<b>Action</b>	Use the JDBC Pools page on the Integration Server Administrator to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1072E</b>	<b>Error restarting delivery job</b>
<b>Explanation</b>	Encountered an exception while restarting a reliable delivery job.
<b>Action</b>	Use the JDBC Pools page on the Integration Server Administrator to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1073E</b>	<b>Error getting registered delivery service {0}</b>
<b>Explanation</b>	Encountered an exception while retrieving a registered delivery service.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1074E</b>	<b>Error getting registered delivery services</b>
<b>Explanation</b>	Encountered an exception while retrieving the set of registered delivery services.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1075E</b>	<b>Error determining if delivery service {0} is registered</b>
<b>Explanation</b>	Encountered an exception while retrieving a named registered delivery service.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1076E</b>	<b>Error refreshing service cache</b>
<b>Explanation</b>	Encountered an exception while refreshing the cache of registered delivery services.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.

<b>TNS.0005.1077E</b>	<b>Error registering service {0}</b>
<b>Explanation</b>	Encountered an exception while registering a delivery service.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1078E</b>	<b>Error removing service {0}</b>
<b>Explanation</b>	Encountered an exception while unregistering a delivery service.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1081E</b>	<b>Couldn't query delivery service table</b>
<b>Explanation</b>	Encountered a SQLException while reading delivery services.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception, if possible.
<b>TNS.0005.1082E</b>	<b>Couldn't query delivery job table</b>
<b>Explanation</b>	Encountered a SQLException while reading delivery jobs.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception, if possible.
<b>TNS.0005.1083E</b>	<b>Property watt.server.smtpServer is not set</b>
<b>Explanation</b>	Cannot send e-mail messages because the system property, watt.server.smtpServer, has not been set.
<b>Action</b>	Use the Properties page of the Integration Server Administrator to supply a value for the watt.server.smtpServer property.
<b>TNS.0005.1084E</b>	<b>Receiver of document cannot be self</b>
<b>Explanation</b>	A document is being sent from this Trading Networks server and the receiver of the document is a host of Trading Network. You cannot send a document to yourself.
<b>Action</b>	Ensure that the receiver of the document is not a host of Trading Networks.
<b>TNS.0005.1085E</b>	<b>Receiver of document is not Active</b>
<b>Explanation</b>	Status of the partner profile for the receiver of the document is not in active state. Documents can only be sent to active partners.
<b>Action</b>	Ensure the receiver of the document is an active partner.

---

<b>TNS.0005.1086E</b>	<b>Unknown protocol: {0}</b>
<b>Explanation</b>	Attempted to send a document via an unknown protocol. Documents must be sent using one of the registered delivery services.
<b>Action</b>	Use a registered delivery service to send the document.
<b>TNS.0005.1087E</b>	<b>Destination info not found</b>
<b>Explanation</b>	Attempting to send a document, but the receiver's destination information cannot be found.
<b>Action</b>	Examine the document to learn the intended receiver. Make sure the receiver's profile has valid delivery method information.
<b>TNS.0005.1090E</b>	<b>Unable to initialize DeliveryStore {0}</b>
<b>Explanation</b>	Encountered an exception during initialization.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1092E</b>	<b>Service not registered</b>
<b>Explanation</b>	Attempted to remove a delivery service that is not registered.
<b>Action</b>	Check the name of the registered delivery service you want to remove.
<b>TNS.0005.1096E</b>	<b>Delivery queue {0} refers to Delivery service {1} which is not registered.</b>
<b>Explanation</b>	In webMethods Trading Networks, during batch delivery of queued tasks, if the delivery service used is not registered and the delivery queue refers to it, this error is thrown.
<b>Action</b>	Use the webMethods Trading Networks to update the delivery queue so that it uses a valid batch delivery service.
<b>TNS.0005.1097E</b>	<b>Cannot deliver document. Receiver is not active. (DocID={0}, ReceiverD={1})</b>
<b>Explanation</b>	Queued a document for scheduled delivery, but the receiver is inactive and cannot receive documents.
<b>Action</b>	Activate the receiver's trading partner profile, if appropriate.
<b>TNS.0005.1098E</b>	<b>Unable to get document content for delivery. (DocID={0})</b>
<b>Explanation</b>	Queued a document for scheduled delivery and encountered an error while retrieving document content.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.

<b>TNS.0005.1099E</b>	<b>Cannot register a delivery service with the same name as a built-in delivery service ({0}).</b>
<b>Explanation</b>	This name is reserved for a built-in Trading Networks delivery service.
<b>Action</b>	Change the delivery service's name.
<b>TNS.0005.1101E</b>	<b>Cannot get certificate information from security store for partner {0} in getting delivery information: {1}</b>
<b>Explanation</b>	Encountered an exception while retrieving the certificate chain and private key for a trading partner.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1105E</b>	<b>Unable to get profile for partner {0} - {1}</b>
<b>Explanation</b>	Encountered an exception while retrieving a trading partner profile.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1106E</b>	<b>Unable to get destination info for partner {0} - {1}</b>
<b>Explanation</b>	Encountered an exception while retrieving destination information from a trading partner profile in preparation for document delivery.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. If no connection problem exists, take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.1107E</b>	<b>Encountered error while delivering by context: {0}</b>
<b>Explanation</b>	Encountered an exception while delivering a document using an internal webMethods protocol.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception, if possible. It may be a network error beyond your control.
<b>TNS.0005.1108E</b>	<b>Unable to deliver document {0}. Delivery service [{1}] does not exist</b>
<b>Explanation</b>	Document delivery failed because the associated delivery service does not exist.
<b>Action</b>	Create the missing delivery service or specify a different delivery service.

---

<b>TNS.0005.1109</b>	<b>The document (id={0}) was not persisted. The "{1}" delivery service will not be invoked. The document will not be delivered.</b>
<b>Explanation</b>	In webMethods Trading Networks, while delivering documents, if the BizDoc is not persisted, the delivery service is not invoked and the document is not delivered.
<b>Action</b>	Contact your system administrator.
<b>TNS.0005.1115</b>	<b>Event found to be null</b>
<b>Explanation</b>	In webMethods Trading Networks, while writing routing events, if the event is found to be null, then this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0005.1117</b>	<b>Encountered error while creating TN document from service response: {0}</b>
<b>Explanation</b>	In webMethods Trading Networks, while delivering a document via WebService, if the document cannot be created from response data, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0005.1118</b>	<b>Encountered error while adding service response to bizdoc: {0}</b>
<b>Explanation</b>	In webMethods Trading Networks, while delivering a document via WebService, if the response data cannot be added as content to the BizDoc, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0005.2002E</b>	<b>An error occurred when this partner polled for documents on this server. The original error message was {0}.</b>
<b>Explanation</b>	An exception was thrown while polling for documents.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.2014E</b>	<b>Error polling for documents</b>
<b>Explanation</b>	An exception was thrown while polling for documents.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.2017E</b>	<b>An error occurred when trying to connect to this partner for polling. The original error was: {0}</b>
<b>Explanation</b>	In webMethods Trading Networks, during a remote checking of a partner, if the connection to the partner cannot be made, this error is thrown.
<b>Action</b>	Ensure that the partner connection information is valid and try again.

<b>TNS.0005.2018E</b>	<b>Error connecting for polling</b>
<b>Explanation</b>	An error occurred when trying to connect to this partner for polling.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception. You might need to contact your trading partner about the error.
<b>TNS.0005.2021E</b>	<b>The user account that schedules polling jobs is {0}. The account does not exist on the B2B Server.</b>
<b>Explanation</b>	In webMethods Trading Networks, during scheduling of a polling job, if the user account that starts the polling job does not exist on the B2B server, this error is thrown.
<b>Action</b>	Create a user account for the user and reload the WmTN package or restart the Integration Server.
<b>TNS.0005.2031E</b>	<b>An error occurred in the process of accepting a document polled from this partner. The original document ID was {0}. The original error message was {1}.</b>
<b>Explanation</b>	In webMethods Trading Networks, if any error occurs during the process of submitting a document locally that is polled from a remote partner, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0005.2037E</b>	<b>Error accepting document</b>
<b>Explanation</b>	An exception was thrown while accepting a document polled from a partner.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.2052E</b>	<b>Unable to initialize TN Polling.</b>
<b>Explanation</b>	An exception was thrown during initialization.
<b>Action</b>	The exception was written to the server log. See the log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.2053E</b>	<b>User {0} is not an administrator and attempted to accept a document (docID={1}) that does not belong to him.</b>
<b>Explanation</b>	A partner attempted to accept a pollable document; however, the partner is not the specified receiver of the document.
<b>Action</b>	Review the log message. Contact the partner identified in the log message to explain that a partner can only accept pollable documents for which that partner is the specified receiver.

---

<b>TNS.0005.2054E</b>	<b>You do not have the authority to accept this document. Only administrators may accept documents that they did not receive.</b>
<b>Explanation</b>	A partner attempted to accept a pollable document; however, the partner is not the specified receiver of the document.
<b>Action</b>	Review the log message. Contact the partner identified in the log message to explain that a partner can only accept pollable documents for which that partner is the specified receiver.
<b>TNS.0005.2055E</b>	<b>No document with an ID of {0} exists. No document accepted.</b>
<b>Explanation</b>	A partner is trying to accept a pollable document that does not exist within Trading Networks.
<b>Action</b>	Review the log message. Work with the partner specified in the log message to resolve the issue.
<b>TNS.0005.3001E</b>	<b>{0} is required.</b>
<b>Explanation</b>	A service was invoked, and a required input variable was not supplied.
<b>Action</b>	Supply a value for the specified variable.
<b>TNS.0005.3002E</b>	<b>Unable to save queue "{0}".</b>
<b>Explanation</b>	Attempt to insert queue information into the Trading Networks database failed.
<b>Action</b>	Ask your database administrator (DBA) to examine the database logs to determine the cause of the problem.
<b>TNS.0005.3003E</b>	<b>Cannot reassign tasks to a private queue.</b>
<b>Explanation</b>	Each partner might have its own private queue. Private queues are defined in the profile for a partner. A private queue can contain only tasks for the partner identified by the profile; private queues cannot contain tasks from other partners.
<b>Action</b>	You can reassign these tasks to a public queue.
<b>TNS.0005.3004E</b>	<b>Unable to remove queue "{0}".</b>
<b>Explanation</b>	Attempt to delete queue information from the Trading Networks database failed.
<b>Action</b>	Ask your database administrator (DBA) to examine the database logs to determine the cause of the problem.

<b>TNS.0005.3005E</b>	<b>Unable to update queue "{0}".</b>
<b>Explanation</b>	Attempt to update queue information in the Trading Networks database failed.
<b>Action</b>	Ask your database administrator (DBA) to examine the database logs to determine the cause of the problem.
<b>TNS.0005.3006E</b>	<b>The queue cannot be deleted because there is data that depends on it.</b>
<b>Explanation</b>	The queue cannot be deleted for one or more of the following reasons: 1) There might be tasks currently on the queue. 2) There are partner profiles and/or processing rules that refer to the queue. A list of objects that depend on the queue follow this message.
<b>Action</b>	Take one or more of the following actions: 1) If there are tasks on the queue, place it in a DRAINING state so that the queue will empty. After all tasks in the queue are processed, you can delete the queue. 2) If there are profiles and/or processing rules that refer to the queue, remove those references. After you remove the references, you can delete the queue.
<b>TNS.0005.3007E</b>	<b>There are {0} tasks on the queue.</b>
<b>Explanation</b>	The queue cannot be removed because it has tasks on it.
<b>Action</b>	Place the queue in a DRAINING state so that the queue will empty. After the tasks in the queue have been processed, you can delete it.
<b>TNS.0005.3008E</b>	<b>There are {0} partner profiles that refer to the queue.</b>
<b>Explanation</b>	The queue cannot be removed because one or more partner profiles refers to it.
<b>Action</b>	This message is followed by a list of partners whose profiles refer to the queue. Modify these profiles so they no longer refer to the queue being removed. After you remove the references, you can delete the queue.
<b>TNS.0005.3009E</b>	<b>There are {0} processing rules that refer to the queue.</b>
<b>Explanation</b>	The queue cannot be removed because one or more processing rules refers to it.
<b>Action</b>	This message is followed by a list of processing rules that refer to the queue. Modify these processing rules so they no longer refer to the queue being removed. After you remove the references, you can delete the queue.
<b>TNS.0005.3012E</b>	<b>There is no task with the supplied ID ({0}).</b>
<b>Explanation</b>	The wm.tn.queuing:updateQueuedTask service was supplied an invalid task ID.
<b>Action</b>	Supply a valid task ID.

---

<b>TNS.0005.3013E</b>	<b>updateQueuedTask may only be invoked for tasks that are currently being processed from a DeliveryQueue. This task ({0}) has a status of {1}.</b>
<b>Explanation</b>	You attempted to run the wm.tn.queuing:updateQueuedTask service for a task; however, you did not first invoke the wm.tn.queuing:getQueuedTask service.
<b>Action</b>	Be sure to use the wm.tn.queuing:getQueuedTask service to retrieve a task from a queue.
<b>TNS.0005.3018E</b>	<b>Attempted to update a DeliveryQueue that has not been registered (queue name={0}).</b>
<b>Explanation</b>	The specified queue does not exist.
<b>Action</b>	Either supply a valid queue name or use My webMethods to define the delivery queue.
<b>TNS.0005.3019E</b>	<b>status must be "success" or "fail". {0} was supplied.</b>
<b>Explanation</b>	The wm.tn.queuing:updateQueuedTask service was supplied an invalid status.
<b>Action</b>	Supply a valid status value.
<b>TNS.0005.3020E</b>	<b>Attempted to remove a DeliveryQueue that has not been registered (queue name={0}).</b>
<b>Explanation</b>	The specified queue does not exist.
<b>Action</b>	Supply a valid queue name.
<b>TNS.0005.3021E</b>	<b>Unable to decode TypeData for a DeliveryJob (ID={0}) while dequeuing from {1}</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0005.3023E</b>	<b>The scheduled delivery date/time is in the past.</b>
<b>Explanation</b>	Trading Networks cannot schedule delivery to run in the past.
<b>Action</b>	Supply a future date and time.
<b>TNS.0005.3024E</b>	<b>The delivery schedule is empty. It has been ignored.</b>
<b>Explanation</b>	The delivery queue does not have a delivery schedule. The operation has failed.
<b>Action</b>	If you receive this error while invoking a service, make sure that you are supplying a valid DeliveryQueue object that contains a DeliverySchedule. If you receive this error while using My webMethods, contact Software AG Global Support.

<b>TNS.0005.3025E</b>	<b>Delivery schedule dates must be in the format "YYYY/MM/DD" and times must be in the format "hh:mm:ss"</b>
<b>Explanation</b>	A date and/or time in the delivery schedule is invalid.
<b>Action</b>	All dates and times in the delivery schedule must be in the specified formats.
<b>TNS.0005.3027E</b>	<b>Unable to schedule delivery for queue "{0}". The pipeline for the delivery service does not contain "queue".</b>
<b>Explanation</b>	The variable "queue" was not supplied in the pipeline.
<b>Action</b>	Supply the name of the delivery queue.
<b>TNS.0005.3028E</b>	<b>The delivery schedule has no schedule type. It has been ignored.</b>
<b>Explanation</b>	The delivery schedule must have a type of "repeat", "complex", or "once".
<b>Action</b>	Set the type on the delivery schedule to a valid value.
<b>TNS.0005.3029E</b>	<b>The queue "{0}" does not exist.</b>
<b>Explanation</b>	In webMethods Trading Networks, while updating a queue, if the queue does not exist, this error is thrown.
<b>Action</b>	Ensure that the queue that is to be updated exists, and try again.
<b>TNS.0005.3037E</b>	<b>Scheduled delivery failed. No more retries.</b>
<b>Explanation</b>	The final attempt to delivery a document failed.
<b>Action</b>	See the message TRNSERV.000022.000038 for full details.
<b>TNS.0005.3038E</b>	<b>Scheduled delivery of document {0} failed. No more retries. {1}</b>
<b>Explanation</b>	The final attempt to deliver a document failed.
<b>Action</b>	See the error message for details. You might need to contact your trading partner.
<b>TNS.0005.3039E</b>	<b>The queue "{0}" has a status of "{1}". It is not accepting documents. This document will not be delivered.</b>
<b>Explanation</b>	Attempted to route a document to a delivery queue that is either disabled or draining. Queues in either of these statuses cannot accept documents.
<b>Action</b>	Either change the status of this queue or route the document to a different queue.

<b>TNS.0005.3040E</b>	<b>Unable to validate private queue/partner relationship (id={0}) because the partner could not be retrieved. The queue has been saved with a "disabled" status.</b>
<b>Explanation</b>	You can only create a private queue for a partner that has an active profile. The specified partnerID identifies a partner that does not exist or whose profile is not active.
<b>Action</b>	Perform one of the following actions: 1) Specify a different queue. 2) If the profile is not active, change its status to active.
<b>TNS.0005.3041E</b>	<b>Private queue "{0}" has a status of "{1}", but the partner's profile is not active. The queue has been saved with a "disabled" status.</b>
<b>Explanation</b>	Trading Networks attempted to route a document to a private queue that is defined for a profile that is not active. Trading Networks can only route documents to private queues belonging to active partners; it cannot route documents to private queues of inactive partners. Trading Networks has disabled the queue.
<b>Action</b>	Enable the partner by changing the profile status to active. Then enable the partner's private queue.
<b>TNS.0005.3042E</b>	<b>Delivery not scheduled from queue.</b>
<b>Explanation</b>	In webMethods Trading Networks, while scheduling delivery of documents from queues, if the queue is private and the partner is either inactive or not found, this error is thrown.
<b>Action</b>	Ensure that the partner of the private queue is available and active, and try again.
<b>TNS.0005.3044E</b>	<b>Document was not queued for delivery on queue {0}. The receiver's profile was not found. (receiverID={1}).</b>
<b>Explanation</b>	A processing rule indicated that the document should be delivered to a queue that is associated with a receiver. However, there is no profile for the receiver.
<b>Action</b>	Use My webMethods to determine who the intended receiver is. If the receiver is valid but does not have a profile, create a partner profile for the receiver. If the receiver is not valid, notify the document sender that the receiver information in the document is incorrect.
<b>TNS.0005.3045E</b>	<b>Document was not queued for delivery on queue {0}. The receiver is not active (receiverID={1}).</b>
<b>Explanation</b>	A processing rule indicated that the document should be delivered to a queue that is associated with a receiver. However, the receiver's profile is not active. Trading Networks can only route documents to active partners.
<b>Action</b>	Enable the partner by changing the profile status to active. Then enable the partner's private queue.

<b>TNS.0005.3046E</b>	<b>The queue "{0}" does not exist.</b>
<b>Explanation</b>	The wm.tn.queuing:deliverBatch service was supplied an invalid queue name.
<b>Action</b>	Supply the name of an existing queue.
<b>TNS.0005.3048E</b>	<b>The scheduled {0} is invalid. Format must be YYYY/MM/DD</b>
<b>Explanation</b>	In webMethods Trading Networks, while validating scheduling of tasks, if the format of the schedule date is invalid, this error is thrown.
<b>Action</b>	Enter the schedule date in the correct format and try again.
<b>TNS.0005.3049E</b>	<b>The scheduled {0} is invalid. Format must be hh:mm:ss</b>
<b>Explanation</b>	In webMethods Trading Networks, while validating the schedule task, if the format of the time is invalid, this error is thrown.
<b>Action</b>	Enter the schedule time in the correct format and try again.
<b>TNS.0005.3056E</b>	<b>Interval is required.</b>
<b>Explanation</b>	An interval must be specified for repeating tasks.
<b>Action</b>	Supply an interval value.
<b>TNS.0005.3057E</b>	<b>Interval is not a valid integer.</b>
<b>Explanation</b>	In webMethods Trading Networks, while validating a scheduling task, if the time interval is not a valid integer, this error is thrown.
<b>Action</b>	Enter the time interval as a valid integer and try again.
<b>TNS.0005.3058E</b>	<b>Interval must be greater than zero.</b>
<b>Explanation</b>	In webMethods Trading Networks, while validating a scheduling task, if the time interval is not greater than zero, this error is thrown.
<b>Action</b>	Enter the time interval as a valid integer greater than zero and try again.
<b>TNS.0005.3059E</b>	<b>End date/time is in the past.</b>
<b>Explanation</b>	In webMethods Trading Networks, while validating a scheduling task, if the end date/time is occurring in the past, this error is thrown.
<b>Action</b>	Enter a valid end date/time and try again.

---

<b>TNS.0005.3060E</b>	<b>End date/time is before start date/time.</b>
<b>Explanation</b>	In webMethods Trading Networks, while validating a scheduling task, if the end date/time occurs before the start date/time, this error is thrown.
<b>Action</b>	Enter the valid end date/time and try again.
<b>TNS.0005.3061E</b>	<b>Could not construct a valid timestamp from this schedule. Dates must be in YYYY/MM/DD format and times must be in hh:mm:ss format.</b>
<b>Explanation</b>	In webMethods Trading Networks, while validating the scheduling task, if the end date is not in YYYY/MM/DD format and the end time is not in hh:mm:ss format, this error is thrown.
<b>Action</b>	Ensure that the end date and time are in the correct format and try again.
<b>TNS.0005.3062E</b>	<b>A queue with this name already exists.</b>
<b>Explanation</b>	In webMethods Trading Networks, while registering a queue, if a queue with this name already exists, this error is thrown.
<b>Action</b>	Ensure to have a unique queue name and try again.
<b>TNS.0005.3063E</b>	<b>There is a task on the queue (task id={0}).</b>
<b>Explanation</b>	The queue cannot be removed because it has tasks on it.
<b>Action</b>	Place the queue in a DRAINING state so that the queue will empty. After the tasks in the queue have been processed, you can delete it.
<b>TNS.0005.3064E</b>	<b>The profile for {0} refers to the queue (partner id={1}).</b>
<b>Explanation</b>	The queue cannot be removed because one or more partner profiles refers to it.
<b>Action</b>	This message is followed by a list of partners whose profiles refer to the queue. Modify these profiles so they no longer refer to the queue being removed. After you remove the references, you can delete the queue.
<b>TNS.0005.3065E</b>	<b>The {0} processing rule refers to the queue.</b>
<b>Explanation</b>	The queue cannot be removed because one or more processing rules refers to it.
<b>Action</b>	This message is followed by a list of processing rules that refer to the queue. Modify these processing rules so they no longer refer to the queue being removed. After you remove the references, you can delete the queue.

<b>TNS.0005.3066E</b>	<b>If an end time is supplied, an end date must also be supplied.</b>
<b>Explanation</b>	In webMethods Trading Networks, while validating a scheduling task, if the delivery schedule is of complex type, and the end time is supplied but the end date is not supplied, this error is thrown.
<b>Action</b>	Ensure to also supply the end date along with the end time and try again.
<b>TNS.0005.3067</b>	<b>Unable to import partner private queue {0}. Partner profile for {1} does not exist.</b>
<b>Explanation</b>	In webMethods Trading Networks, while importing Trading Networks assets, if the partner profile for which a partner private queue is to be imported does not exist, this error is thrown.
<b>Action</b>	Ensure that the partner profile exists, and try again.
<b>TNS.0005.4002E</b>	<b>Processing recursion was detected: the processing rule {0} invoked itself, most recently with document {1}. Processing fails.</b>
<b>Explanation</b>	A processing rule recursed. Either no recursion is allowed, or recursion is allowed, and the maximum recursion level was exceeded.
<b>Action</b>	If you want a processing rule to recurse (to call itself), set the tn.recursion.max property to an appropriate value. If you do not want the processing rule to recurse, check the service that the processing rule invokes. The service is submitting a document that matches the same routing rule.
<b>TNS.0005.4004E</b>	<b>If alertPartner is not specified, neither alertContact, alertSubject nor alertMessage may be specified.</b>
<b>Explanation</b>	An invalid combination of input values was sent to wm.tn.route:create.
<b>Action</b>	If you are not supplying a value for alertPartner, do not supply a value for alertContact, alertSubject, or alertMessage.
<b>TNS.0005.4008E</b>	<b>Error sending mail: {0}</b>
<b>Explanation</b>	Encountered an exception while sending an email alert.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4011E</b>	<b>An error occurred invoking the processing service ({2}) for this document. The original error was of type {0}; the message was {1} and the service output this pipeline: {3}</b>
<b>Explanation</b>	A processing rule invoked a service, and that service returned an error.
<b>Action</b>	Take appropriate action to resolve the problem described in the error message.

---

<b>TNS.0005.4012E</b>	<b>Error signaled in processing service</b>
<b>Explanation</b>	A processing rule invoked a service, and that service returned an error.
<b>Action</b>	See the full message (TRNSERV.000014.000012) for details.
<b>TNS.0005.4013E</b>	<b>An internal error prevented processing from finishing normally on this document. The aborted rule was {0}, and the original error message was {1}.</b>
<b>Explanation</b>	See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4014E</b>	<b>Internal processing error</b>
<b>Explanation</b>	See the full message (TRNSERV.000014.000013) for details.
<b>Action</b>	See the full message for details.
<b>TNS.0005.4017E</b>	<b>{0} loading rules</b>
<b>Explanation</b>	Encountered an exception while reading processing rules from the database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4023S</b>	<b>{0} saving rules</b>
<b>Explanation</b>	Encountered an exception while saving processing rules to the database. Trading Networks wrote the exception to the server log.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4027E</b>	<b>An exception occurred invoking a processing service for document {0}. The processing service was {1}, and the original error message was: {2}.</b>
<b>Explanation</b>	A processing rule invoked a service, and that service threw an exception.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4028E</b>	<b>An error occurred invoking the processing service {0} for this document. The original error was {1}.</b>
<b>Explanation</b>	A processing rule invoked a service, and that service threw an exception.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.

<b>TNS.0005.4029E</b>	<b>Service invoke err: {0}</b>
<b>Explanation</b>	A processing rule invoked a service, and that service threw an exception.
<b>Action</b>	See the full message for details.
<b>TNS.0005.4034E</b>	<b>Error sending via {0}</b>
<b>Explanation</b>	Error encountered.
<b>Action</b>	See the full message for details.
<b>TNS.0005.4035E</b>	<b>Fatal processing error: {0}</b>
<b>Explanation</b>	Encountered an exception while processing a document. See the exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4038W</b>	<b>Changing the user status on document {0} generated an error. The original error message was: {1}</b>
<b>Explanation</b>	Encountered an exception while changing the status for a document. See the exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4039E</b>	<b>Error changing status</b>
<b>Explanation</b>	Encountered an exception while changing the status for a document. See the exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4040E</b>	<b>An error occurred sending via protocol {0}. The original error message was: {1}</b>
<b>Explanation</b>	Encountered an exception while sending a document. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4041E</b>	<b>Error delivering document</b>
<b>Explanation</b>	Encountered an exception while sending a document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.

---

<b>TNS.0005.4052E</b>	<b>Processing Alert Failed</b>
<b>Explanation</b>	Encountered an error while sending an email alert.
<b>Action</b>	See full message for details.
<b>TNS.0005.4053E</b>	<b>The server was unable to send email to {0} during processing. The subject of the email was {1}. The error message was: {2}.</b>
<b>Explanation</b>	Encountered an error while sending an email alert.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4054E</b>	<b>PROCESSING ERROR: partner contact {0}/{1} is not defined</b>
<b>Explanation</b>	Processing is configured to send alerts to a specific contact type, but the partner profile does not have a contact of that type.
<b>Action</b>	Either change the processing rule to send alerts to a different contact type (or use a hard-coded email address), or create a contact of this type for the partner.
<b>TNS.0005.4055E</b>	<b>Partner {1} sent this document posing as {0}.</b>
<b>Explanation</b>	When Trading Networks receives a document, it determines the partner initiating the request based on the user account that sent the document. The partner that sent the request does not match the sender from within the document content.
<b>Action</b>	You might want to notify the partner who sent the document and/or the partner being impersonated.
<b>TNS.0005.4056E</b>	<b>Partner {1} sent document {2} posing as {0}.</b>
<b>Explanation</b>	When Trading Networks receives a document, it determines the partner initiating the request based on the user account that sent the document. The partner that sent the request does not match the sender from within the document content.
<b>Action</b>	You might want to notify the partner who sent the document and/or the partner being impersonated.
<b>TNS.0005.4057E</b>	<b>Partner ID mismatch</b>
<b>Explanation</b>	The partner who sent the document does not match the partner in the document content.
<b>Action</b>	See full message for details.

**TNS.0005.4058E      The sender of this document ({0}) has been deleted. Documents from this partner are not permitted at this time.**

**Explanation**      Trading Networks received a document from a partner whose profile was deleted. Although Trading Networks still maintains a copy of the deleted profile in its database, it will not accept documents nor process documents from the partner.

**Action**              If you do not want to accept documents from the partner, you can either ignore this error or notify the partner to stop sending documents. If you want to receive and process documents from this partner, use the `wm.tn.profile:undeleteProfile` service to reinstate the partner's profile.

**TNS.0005.4059E      The sender of document {2} ({0}) had been deleted. Documents from this partner are not permitted at this time.**

**Explanation**      Trading Networks received a document from a partner whose profile was deleted. Although Trading Networks still maintains a copy of the deleted profile in its database, it will not accept documents nor process documents from the partner.

**Action**              If you do not want to accept documents from the partner, you can either ignore this error or notify the partner to stop sending documents. If you want to receive and process documents from this partner, use the `wm.tn.profile:undeleteProfile` service to reinstate the partner's profile.

**TNS.0005.4060E      Partner deleted**

**Explanation**      Received a document from a partner whose profile was deleted.

**Action**              See full message for details.

**TNS.0005.4067E      An attempt was made to send email to the {0} contact of the Unknown partner. No email was sent.**

**Explanation**      The processing rule is configured to send an alert to a partner's contact, but Trading Networks could not identify the partner.

**Action**              Examine the document content and the Sender/Receiver queries on the document type to determine why Trading Networks could not identify the partner.

**TNS.0005.4068E      Can't send to UNKNOWN**

**Explanation**      The processing rule is configured to send an alert to a partner, but Trading Networks could not identify the partner.

**Action**              Examine the document content and the Sender/Receiver queries on the document type to determine why Trading Networks could not identify the partner.

---

<b>TNS.0005.4070E</b>	<b>Processing aborted</b>
<b>Explanation</b>	Threw a RoutingAbortedException while processing the document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4071E</b>	<b>The processing service, {0} aborted processing of this document. The message was {1}.</b>
<b>Explanation</b>	Threw a RoutingAbortedException while processing the document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4074E</b>	<b>The user that posted this document ({0}) could not be associated with a partner to check their identity.</b>
<b>Explanation</b>	Received a document from someone other than a trading partner.
<b>Action</b>	You can either ignore this error or contact the document sender. The sender is using a valid Integration Server account, but not the account associated with their profile.
<b>TNS.0005.4075E</b>	<b>The user that posted document {1} ({0}) could not be associated with a partner to check their identity.</b>
<b>Explanation</b>	Received a document from someone other than a trading partner.
<b>Action</b>	You can either ignore this error or contact the document sender. The sender is using a valid Integration Server account, but not the account associated with their profile.
<b>TNS.0005.4076E</b>	<b>No user ID</b>
<b>Explanation</b>	Received a document from someone other than a trading partner.
<b>Action</b>	You can either ignore this error or contact the document sender. The sender is using a valid Integration Server account, but not the account associated with their profile.
<b>TNS.0005.4078E</b>	<b>No email address</b>
<b>Explanation</b>	Could not determine the address to send an email alert.
<b>Action</b>	Examine the processing rule and the receiver's profile. You must specify an address either in the processing rule or the receiver's profile.
<b>TNS.0005.4079E</b>	<b>No email address was available for sending to {0} ({1}). No email was sent.</b>
<b>Explanation</b>	Could not determine the address to send an email alert.
<b>Action</b>	Examine the processing rule and the receiver's profile. You must specify an address either in the processing rule or the receiver's profile.

<b>TNS.0005.4086E</b>	<b>No SMTP server defined: check property watt.server.smtpServer</b>
<b>Explanation</b>	The processing rule is configured to send an email alert, but no email server is defined.
<b>Action</b>	Set the SMTP Server on the Settings > Logging page of the Integration Server Administrator, or directly set the watt.server.smtpServer property.
<b>TNS.0005.4087E</b>	<b>Cannot specify a Sender of {0} and also supply a specific senderId"s.</b>
<b>Explanation</b>	When invoking wm.tn.route:create, you cannot specify that the processing rule matches 'Any' sender or the 'Unknown' sender, and also supply specific senderIDs.
<b>Action</b>	Either remove "Any", "Unknown", or the specific senderIDs.
<b>TNS.0005.4089E</b>	<b>Cannot specify a DocType of {0} and also supply specific docTypeId"s.</b>
<b>Explanation</b>	When invoking wm.tn.route:create, you cannot specify that the processing rule matches 'Any' document type or the document type is 'Unknown', and also supply specific document type IDs.
<b>Action</b>	Either remove "Any", "Unknown", or the specific document type IDs.
<b>TNS.0005.4090E</b>	<b>An exception prevented the sender"s identity from being completely checked. The original exception was {0}.</b>
<b>Explanation</b>	Threw a ProfileStoreException while checking the identity of the document sender.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0005.4094E</b>	<b>The sender of this document ({0}/{1}) is in status {2}. Documents from this partner are not permitted at this time.</b>
<b>Explanation</b>	The document sender is not active. Inactive partners are not allowed to send documents to Trading Networks.
<b>Action</b>	You can ignore this error, activate this partner's profile, or notify the partner to stop sending documents.
<b>TNS.0005.4095E</b>	<b>The sender of document {3} ({0}/{1}) is in status {2}. Documents from this partner are not permitted at this time.</b>
<b>Explanation</b>	The document sender is not active. Inactive partners are not allowed to send documents to Trading Networks.
<b>Action</b>	You can ignore this error, activate this partner's profile, or notify the partner to stop sending documents.

---

<b>TNS.0005.4096E</b>	<b>Bad status</b>
<b>Explanation</b>	The document sender is not active. Inactive partners are not allowed to send documents to Trading Networks.
<b>Action</b>	You can ignore this error, activate this partner's profile, or notify the partner to stop sending documents.
<b>TNS.0005.4097E</b>	<b>An error occurred trying to send this document via {0} (intended receiver: {1}). The original error message was: {2}.</b>
<b>Explanation</b>	Encountered an exception while sending a document. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4098E</b>	<b>An error occurred trying to send this document via {0} (sender: {1}). The original error message was: {2}.</b>
<b>Explanation</b>	Encountered an exception while sending a document. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4099E</b>	<b>Couldn't send doc {0} via {1}: {2}</b>
<b>Explanation</b>	Encountered an exception while sending a document. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4100E</b>	<b>An error occurred trying to fetch profile information for sending email to the {1} contact of partner {0}. The original error was: {2}</b>
<b>Explanation</b>	Unable to retrieve the partner profile while sending an email alert. See the exception message for details.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0005.4101E</b>	<b>Profile error</b>
<b>Explanation</b>	Unable to retrieve the partner profile while sending an email alert. See the exception message for details.
<b>Action</b>	Contact Software AG Global Support.

<b>TNS.0005.4102E</b>	<b>Processing aborted: {0}</b>
<b>Explanation</b>	Threw a RoutingAbortedException while processing the document.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4104E</b>	<b>{0} is not a known document attribute.</b>
<b>Explanation</b>	The wm.tn.route:create service was supplied an invalid attribute name.
<b>Action</b>	Supply only names of existing document attributes.
<b>TNS.0005.4107E</b>	<b>No preferred protocol. Status changed to POLLABLE.</b>
<b>Explanation</b>	The processing rule was configured to send the document using the receiver's preferred protocol, but the receiver does not have a preferred protocol.
<b>Action</b>	Signify one of the receiver's delivery methods as the preferred protocol.
<b>TNS.0005.4111E</b>	<b>No profile summary was available for the sender of this document</b>
<b>Explanation</b>	Could not process the document because Trading Networks could not find a partner profile for the sender.
<b>Action</b>	Modify either the sender identification in the document or the external ID in the profile.
<b>TNS.0005.4112E</b>	<b>No profile summary was available for the sender of document {2}. The sender ID was {0}, and the sender logged in as {1}.</b>
<b>Explanation</b>	Could not process the document because Trading Networks could not find a partner profile for the sender.
<b>Action</b>	Modify either the sender identification in the document or the external ID in the profile.
<b>TNS.0005.4113E</b>	<b>No profile summary available</b>
<b>Explanation</b>	Could not process the document because Trading Networks could not find a partner profile for the sender.
<b>Action</b>	Modify either the sender identification in the document or the external ID in the profile.

---

<b>TNS.0005.4114E</b>	<b>A supplied attribute condition has an invalid combination of datatype, operator and value ({0} {1} {2}).</b>
<b>Explanation</b>	The wm.tn.route:create service was supplied an invalid attribute condition.
<b>Action</b>	Correct the attribute condition.
<b>TNS.0005.4115E</b>	<b>An invalid value was supplied for the tn.recursion.max property. No recursion of processing rules will be allowed.</b>
<b>Explanation</b>	The value of the tn.recursion.max property is not a valid number.
<b>Action</b>	Supply a valid number for this property.
<b>TNS.0005.4116E</b>	<b>Processing recursion exceeded the allowed recursion depth of {0}. The processing rule {1} invoked itself, most recently with document {2}. Processing fails.</b>
<b>Explanation</b>	One or more processing rules invoked services that resubmitted documents to Trading Networks, exceeding the recursion limit defined by the tn.recursion.max property.
<b>Action</b>	Increase the value of the tn.recursion.max property, or configure your processing rules not to resubmit documents.
<b>TNS.0005.4117E</b>	<b>Couldn't load routing schedule: {0}</b>
<b>Explanation</b>	Encountered an exception while reading the set of processing rules from the database.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4118E</b>	<b>Couldn't save routing schedule: {0}</b>
<b>Explanation</b>	Encountered an exception while saving the set of processing rules to the database.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4119E</b>	<b>Cannot specify a Receiver of Any and also supply a specific receiverId's.</b>
<b>Explanation</b>	When invoking the wm.tn.route:create service, you cannot specify that the processing rule matches 'Any' receiver and also supply specific receivers.
<b>Action</b>	Remove either "Any" or the specific receivers.
<b>TNS.0005.4120E</b>	<b>Cannot specify a Receiver of Unknown and also supply a specific receiverId's.</b>
<b>Explanation</b>	When invoking the wm.tn.route:create service, you cannot specify that the processing rule matches an 'Unknown' receiver and also supply specific receivers.
<b>Action</b>	Remove either "Unknown" or the specific receivers.

<b>TNS.0005.4121E</b>	<b>Cannot specify a DocType of Any and also supply specific docTypeIds.</b>
<b>Explanation</b>	When invoking the wm.tn.route:create service, you cannot specify that the processing rule matches 'Any' TN document type and also supply specific TN document types.
<b>Action</b>	Remove either "Any" or the specific TN document types.
<b>TNS.0005.4122E</b>	<b>Cannot specify a DocType of Unknown and also supply specific docTypeIds.</b>
<b>Explanation</b>	When invoking the wm.tn.route:create service, you cannot specify that the processing rule matches the 'Unknown' TN document type and also supply specific TN document types.
<b>Action</b>	Remove either "Unknown" or the specific TN document types.
<b>TNS.0005.4123E</b>	<b>If deliverUsing is "Queue for delivery", then deliveryQueue cannot be null</b>
<b>Explanation</b>	An invalid combination of input values was sent to the wm.tn.route:create service.
<b>Action</b>	Supply a value for the "deliveryQueue" variable.
<b>TNS.0005.4125E</b>	<b>Cannot queue a bizdoc for deliver that has not been persisted. This bizdoc (id={0}) has not been persisted.</b>
<b>Explanation</b>	The scheduled delivery mechanism requires that the document be saved to the database.
<b>Action</b>	Change the TN document type or processing rule to save documents of this type.
<b>TNS.0005.4130E</b>	<b>qname is required</b>
<b>Explanation</b>	Attempted to enqueue a delivery job without supplying a queue name for the "qname" parameter.
<b>Action</b>	Supply a valid queue name for the "qname" parameter.
<b>TNS.0005.4131E</b>	<b>Invalid queue name ({0}).</b>
<b>Explanation</b>	Attempted to enqueue a delivery job without supplying a queue name for the "qname" parameter.
<b>Action</b>	Supply a valid queue name for the "qname" parameter.
<b>TNS.0005.4132E</b>	<b>Receiver does not have a delivery queue.</b>
<b>Explanation</b>	The processing rule is configured to send the document to the receiver's private delivery queue, but the receiver does not have a delivery queue.
<b>Action</b>	Change the processing rule to deliver the document by a different means, or create a delivery queue for the receiver.

---

<b>TNS.0005.4133E</b>	<b>Receiver does not have a delivery queue. Document has been made POLLABLE (document id={0})</b>
<b>Explanation</b>	The processing rule is configured to send the document to the receiver's private delivery queue, but the receiver's profile does not contain a definition for a delivery queue.
<b>Action</b>	Change the processing rule to deliver the document by a different means, or update the receiver's profile to specify a delivery queue.
<b>TNS.0005.4134E</b>	<b>Receiver does not have a preferred protocol. Document has been made POLLABLE. (document id={0})</b>
<b>Explanation</b>	The processing rule is configured to send the document by the receiver's preferred delivery method, but the receiver does not have a preferred delivery method.
<b>Action</b>	Change the processing rule to deliver the document by a different means, or signify one of the delivery methods on the receiver's profile as "preferred".
<b>TNS.0005.4135E</b>	<b>Error encountered in RoutingActions.invoke(): can not clone input pipeline.</b>
<b>Explanation</b>	An internal error occurred while invoking a service to process the document.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0005.4136E</b>	<b>Unable to save document: {0}.</b>
<b>Explanation</b>	Encountered an exception while saving the document to the database.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4138E</b>	<b>The processing rule list has been modified by another user. Added this rule to the bottom of the list. Refresh your rule list.</b>
<b>Explanation</b>	The rule list displayed on your Trading Networks Console is not the current list that resides in the database. As a result, the newly added rule is appended to the end of the rule list rather than the specific position required in the list.
<b>Action</b>	Refresh your routing rule list and move the newly added rule to the desired position.
<b>TNS.0005.4139E</b>	<b>Error encountered while inserting processing rule {0}. The exception message is : {1}.</b>
<b>Explanation</b>	Encountered an exception while inserting a processing rule.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.

**TNS.0005.4140E      Error encountered while updating processing rule {0}. The rule index cannot be changed during an update operation.**

**Explanation**      You attempted to update both the contents of a processing rule and its location within the list of processing rules (its index) at the same time. You cannot make both these changes at the same time.

**Action**            Please update the rule first, and then move the rule to a new position in the rule list.

**TNS.0005.4141E      Error encountered while updating processing rule {0}. The exception message is : {1}.**

**Explanation**      Encountered an exception while updating a processing rule.

**Action**            See the exception message for details. Take appropriate action to resolve the problem described in the exception.

**TNS.0005.4142E      Processing rule update failed. Processing rule update collision detected. This rule has been modified by another user. Refresh your rule list and retry this operation.**

**Explanation**      While you were updating this processing rule, another user edited and saved the same processing rule. To prevent your changes from overwriting those made by the other user, Trading Networks did not save your changes.

**Action**            Refresh the list of processing rules and update the processing rule again.

**TNS.0005.4145S      Error encountered while deleting processing rule(s). The exception message is : {0}.**

**Explanation**      Encountered an exception while deleting processing rule(s).

**Action**            See the exception message for details. Take appropriate action to resolve the problem described in the exception.

**TNS.0005.4146E      Processing rule delete operation aborted. The processing rule list has been modified by another user. Refresh your rule list and retry this operation.**

**Explanation**      While you were deleting this processing rule, another user edited and saved the rule. So that your changes do not overwrite those made by the other user, your changes have not been saved.

**Action**            Refresh your rule list, and then delete the rule again.

**TNS.0005.4147E      Processing rule {0} does not exist.**

**Explanation**      The specified routing rule cannot be retrieved because the rule ID does not exist in the database.

**Action**            Check that the rule ID is correct, modify it if necessary, and then attempt to retrieve it again.

---

<b>TNS.0005.4148S</b>	<b>Error encountered while reading processing rules from the database. The exception message is : {0}.</b>
<b>Explanation</b>	Encountered an exception while retrieving processing rules from the database.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4149S</b>	<b>Error encountered while moving processing rules. The exception message is : {0}.</b>
<b>Explanation</b>	Encountered an exception while moving processing rules in the rule list.
<b>Action</b>	See the exception message for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.4150E</b>	<b>Processing rule move operation aborted. The processing rule list has been modified by another user. Refresh your rule list and retry this operation.</b>
<b>Explanation</b>	While you were moving this processing rule, another user edited and saved the rule list. So that your changes do not overwrite those made by the other user, your changes have not been saved.
<b>Action</b>	Refresh the rule list, and then move the rule again.
<b>TNS.0005.4151E</b>	<b>Illegal move operation. The insertAt position cannot be within the range of rules to be moved.</b>
<b>Explanation</b>	The insertAt position must be outside the range of rules to be moved.
<b>Action</b>	Change the insertAt position to be outside of the range of rules to be moved.
<b>TNS.0005.4152E</b>	<b>Illegal move operation. You cannot move a non-contiguous set of rules.</b>
<b>Explanation</b>	You attempted to change the order of processing rules by moving a non-contiguous set of rules. Trading Networks does not support this type of operation.
<b>Action</b>	Define a contiguous set of rules to be moved.
<b>TNS.0005.4156E</b>	<b>Encountered an error retrieving the Profile Summary for partner ID {0}.</b>
<b>Explanation</b>	An error occurred attempting to look up the Profile Summary.
<b>Action</b>	Ensure that the partner IDs on the document being processed are valid.

**TNS.0005.4157E**      **Encountered an error while sending MAPI event to Optimize for EventMap {0} and for Sender with PartnerID {1}.**

**Explanation**      In webMethods Trading Networks, while routing a document, if a TN BAM monitoring event cannot be logged in Optimize, this error is thrown.

**Action**              Contact your system administrator.

**TNS.0005.4160E**      **The content-length ({0}) specified in handleLargeDoc is less than the length of the content ({1}) sent.**

**Explanation**      In webMethods Trading Networks, in a document transaction, while handling large documents, if the content length specified in the handleLargeDoc is less than the length of the BizDoc content, this error is thrown.

**Action**              Ensure that the content length specified in the handleLargeDoc is equal to the length of the BizDoc content and try again.

**TNS.0005.4162E**      **Routing Aborted as the Receiver is disabled.**

**Explanation**      In webMethods Trading Networks, while routing a document, if the receiver is in an inactive state, this error is thrown.

**Action**              Ensure to set the receiver to active state and try again.

**TNS.0005.4163E**      **Routing Aborted as the Receiver is deleted.**

**Explanation**      In webMethods Trading Networks, while routing a document, if the receiver is in deleted state, this error is thrown.

**Action**              Ensure to set the receiver profile is not deleted and try again.

**TNS.0005.4164E**      **Routing Aborted as the Sender is disabled.**

**Explanation**      In webMethods Trading Networks, while routing a document, if the sender is in inactive state, this error is thrown.

**Action**              Ensure to set the sender to active state and try again.

**TNS.0005.4165E**      **Routing Aborted as the Sender is deleted.**

**Explanation**      In webMethods Trading Networks, while routing a document, if the sender is deleted, this error is thrown.

**Action**              Ensure to set the sender profile is not deleted and try again.

---

<b>TNS.0005.4166E</b>	<b>The processing service aborted processing of this document. The message was {0}.</b>
<b>Explanation</b>	In webMethods Trading Networks, while routing a document, if an error occurs in processing the document, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0005.4167E</b>	<b>Posting of BAM events failed because of following errors - {0}.</b>
<b>Explanation</b>	In webMethods Trading Networks, if any error occurs while posting BAM events, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0005.5002E</b>	<b>Delivery service for {0} failed with a status of {1} and status message of {2}</b>
<b>Explanation</b>	Unable to deliver the document, possibly due to a problem with the network or the destination server.
<b>Action</b>	Verify that your server has network connectivity. If a problem exists with the destination server, contact the person responsible for that server.
<b>TNS.0005.5004E</b>	<b>Unable to get output for task {0} - Task has not finished. Status is {1}</b>
<b>Explanation</b>	The task was still executing when the request for output expired.
<b>Action</b>	Request the output again.
<b>TNS.0005.5005E</b>	<b>Unable to refresh {0} cache on server {1} - {2}</b>
<b>Explanation</b>	A cache could not be refreshed, probably due to a database problem.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. Verify that your database is successfully processing requests.
<b>TNS.0005.5007E</b>	<b>Unable to remove task {0} - Does not exist</b>
<b>Explanation</b>	An invalid task ID was supplied.
<b>Action</b>	Supply a valid task ID.
<b>TNS.0005.5011S</b>	<b>Disabling reliable task manager at {0} - Fatal error: {1}</b>
<b>Explanation</b>	Encountered an exception that requires the task manager to shut down.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.

<b>TNS.0005.5013W</b>	<b>Unable to restart task {0} upon initialization</b>
<b>Explanation</b>	The task status could not be updated to "Pending" in the database.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. Verify that your database is successfully processing requests.
<b>TNS.0005.5015E</b>	<b>Unable to persist task {0}</b>
<b>Explanation</b>	Encountered an exception while saving the task to the database.
<b>Action</b>	See the full message (TRNSERV.000015.000089) for details.
<b>TNS.0005.5019E</b>	<b>Task {0} unable to move to server {1} - {2}</b>
<b>Explanation</b>	Task has already completed. Status is "Done".
<b>Action</b>	No action required.
<b>TNS.0005.5020E</b>	<b>Unable to refresh {0} cache - {1}</b>
<b>Explanation</b>	See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.5025E</b>	<b>Task {0} failed, status changed to {1}</b>
<b>Explanation</b>	The task has failed. No more retries.
<b>Action</b>	See full message (TRNSERV.000015.000036) for details.
<b>TNS.0005.5026E</b>	<b>Unable to init task manager for server {0} - {1}</b>
<b>Explanation</b>	The task manager could not be initialized, probably due to a database problem.
<b>Action</b>	Use the Integration Server Administrator JDBC Pools page to check that the Integration Server can connect to the database. Verify that your database is successfully processing requests.
<b>TNS.0005.5031E</b>	<b>Error invoking service {0} - message: {1} - stacktrace: {2}</b>
<b>Explanation</b>	The task manager invoked a service to process a document, and that service threw an exception.
<b>Action</b>	See the exception message for details. Correct the invoked service to handle the exception condition.

---

<b>TNS.0005.5036E</b>	<b>Task {0} failed with no more retries available. Reason for failure - {1}</b>
<b>Explanation</b>	See the status message for details.
<b>Action</b>	If the failure is due to an error on another server, contact the person responsible for that server.
<b>TNS.0005.5037E</b>	<b>Unable to restart task {0} - {1}</b>
<b>Explanation</b>	The task status is neither "Failed" nor "Stopped", so the task cannot be restarted.
<b>Action</b>	No action necessary.
<b>TNS.0005.5039E</b>	<b>Unable to shut down the task manager.</b>
<b>Explanation</b>	The wm.tn.task:shutdown service was unable to stop the task manager. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5042E</b>	<b>Unable to initialize task manager.</b>
<b>Explanation</b>	The wm.tn.task:init service was unable to start the task manager. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5043E</b>	<b>Unable to reset task manager.</b>
<b>Explanation</b>	The wm.tn.task:restart service was unable to restart the task manager. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5044E</b>	<b>Unable to retrieve tasks.</b>
<b>Explanation</b>	The wm.tn.task:getTasks service was unable to get tasks from the task manager. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5045E</b>	<b>Unable to retrieve task {0}.</b>
<b>Explanation</b>	The wm.tn.task:getTask service was unable to get a task from the task manager. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.

<b>TNS.0005.5046E</b>	<b>Unable to get output for task {0}.</b>
<b>Explanation</b>	The wm.tn.task:getTaskOutput service was unable to get output for a task. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5047E</b>	<b>Unable to get status for task {0}.</b>
<b>Explanation</b>	The wm.tn.task:getTaskStatus service was unable to get the status of a task. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5048E</b>	<b>Unable to change server for task {0}.</b>
<b>Explanation</b>	The wm.tn.task:changeServerForTask service was unable to move a task from one server to another. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5049E</b>	<b>Unable to remove task {0}.</b>
<b>Explanation</b>	The wm.tn.task:removeTask service was unable to remove a task from the task manager. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5050E</b>	<b>Unable to restart task {0}.</b>
<b>Explanation</b>	The wm.tn.task:restartTask service was unable to restart a task in the task manager. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5051E</b>	<b>Unable to stop task {0}.</b>
<b>Explanation</b>	The wm.tn.task:stopTask service was unable to stop a task in the task manager. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.
<b>TNS.0005.5052E</b>	<b>Unable to move task {0} to server {1}. Task does not exist.</b>
<b>Explanation</b>	An invalid task ID was supplied.
<b>Action</b>	Supply a valid task ID.

---

<b>TNS.0005.5053E</b>	<b>Unable to move task {0} to server {1}. Task has completed.</b>
<b>Explanation</b>	Task status is "Done". Cannot move a completed task.
<b>Action</b>	No action necessary.
<b>TNS.0005.5054E</b>	<b>Unable to move task {0} to server {1}. Could not "ping" server: {2}</b>
<b>Explanation</b>	Invoked the wm.server:ping service on the other server, and it threw an exception.
<b>Action</b>	Take appropriate action to resolve the problem on the other server as described in the exception.
<b>TNS.0005.5055E</b>	<b>Unable to move task {0} to server {1}. Server {2} is up, but the task has not failed.</b>
<b>Explanation</b>	The server that created this task is running. Therefore, the task cannot be moved because the task status is neither "Failed" nor "Stopped".
<b>Action</b>	No action necessary.
<b>TNS.0005.5056E</b>	<b>Unable to move task {0} to server {1}. Server {2} is down, but the task is done.</b>
<b>Explanation</b>	Task status is "Done". Cannot move a completed task.
<b>Action</b>	No action necessary.
<b>TNS.0005.5057E</b>	<b>Unable to stop task {0}. Job has completed.</b>
<b>Explanation</b>	Cannot stop a completed task.
<b>Action</b>	No action necessary.
<b>TNS.0005.5058E</b>	<b>Unable to stop task {0}. Job does not exist.</b>
<b>Explanation</b>	An invalid task ID was supplied.
<b>Action</b>	Supply a valid task ID.
<b>TNS.0005.5060E</b>	<b>Delivery Job Manager error: task {0} is not NEW.</b>
<b>Explanation</b>	Cannot start a task that does not have a "New" status.
<b>Action</b>	No action necessary. Task has already started.
<b>TNS.0005.5061E</b>	<b>Delivery Job Manager error with task {0}. {1}</b>
<b>Explanation</b>	Encountered an exception while writing to the database. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.

<b>TNS.0005.5062E</b>	<b>Task {0} unable to restart. Does not exist.</b>
<b>Explanation</b>	An invalid task ID was supplied.
<b>Action</b>	Supply a valid task ID.
<b>TNS.0005.5064E</b>	<b>Unable to remove task {0}. {1}</b>
<b>Explanation</b>	Encountered an exception while writing to the database. See the exception message for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the exception.
<b>TNS.0005.5065E</b>	<b>Cannot get job output. Job does not exist.</b>
<b>Explanation</b>	An invalid task ID was supplied.
<b>Action</b>	Supply a valid task ID.
<b>TNS.0005.5066E</b>	<b>Unable to initialize task manager. ServerId is null.</b>
<b>Explanation</b>	Unable to determine server ID.
<b>Action</b>	Supply a value for the watt.net.localhost property in the server.cnf file on the Integration Server.
<b>TNS.0005.5068E</b>	<b>Unable to delete tasks. There are {0} active jobs in the list of jobs to be deleted. Stop the active jobs and retry</b>
<b>Explanation</b>	Cannot delete active tasks.
<b>Action</b>	If you want to delete tasks that are active, stop them first.
<b>TNS.0005.5069E</b>	<b>Unable to get task</b>
<b>Explanation</b>	The wm.tn.route:getTask service can only retrieve tasks that are service execution tasks. A taskID of a delivery task was supplied.
<b>Action</b>	Request only service execution tasks from the wm.tn.route:getTask service.
<b>TNS.0005.5070E</b>	<b>Error getting task</b>
<b>Explanation</b>	The wm.tn.route:getTask service encountered an exception while retrieving a task. See the nested exception for details.
<b>Action</b>	Take appropriate action to resolve the problem described in the nested exception.

<b>TNS.0005.5072E</b>	<b>Unable to restart queued task (id={0}). Its delivery queue no longer exists. You can resubmit the document to process it again.</b>
<b>Explanation</b>	The delivery queue for this document has been deleted. Cannot be requeued.
<b>Action</b>	Verify that the processing rule that handles this document is configured to use a valid delivery queue. Resubmit the document.
<b>TNS.0005.5081E</b>	<b>Error invoking service, {0} - Service did not return valid output</b>
<b>Explanation</b>	The task manager invoked a service to process a document. The output of the service did not conform to the expected format.
<b>Action</b>	If this is a delivery service, make sure the output matches the <code>wm.tn.rec:DeliveryServiceOutput</code> IS document type. If this is a service invoked by a service execution task, make sure the output matches the <code>wm.tn.rec:reliableServiceOutput</code> IS document type.
<b>TNS.0005.5082E</b>	<b>ERROR: Unable to update task {0} due to database error : {1}. Since task update retry is turned off, manual correction is required. Please correct the database errors and manually update the task using the additional task details provided. Additional Details of this task : Task ID={2}; DocID={3}; TaskStatus={4}; Retries={5}; TransportStatus={6}; TransportStatusMessage={7}; TransportTime={8}</b>
<b>Explanation</b>	Could not update the task. See exception message for details.
<b>Action</b>	Manually update the task in My webMethods using the details provided in the message.
<b>TNS.0005.5089E</b>	<b>ERROR: Unable to update task {0} due to IOException : {1}. Task update will continue to fail until this exception is rectified. Until this error is rectified, manual correction is required. Manually update the task using the additional task details provided. Additional Details of this task : Task ID={2}; DocID={3}; TaskStatus={4}; Retries={5}; TransportStatus={6}; TransportStatusMessage={7}; TransportTime={8}</b>
<b>Explanation</b>	Could not update the task. See exception message for details.
<b>Action</b>	Manually update the task in My webMethods using the details provided in the message.
<b>TNS.0005.5091S</b>	<b>TN Job Manager sweep time property <code>tn.task.sweepTime</code> contains ({0}), which is not a numeric value. Using the default value 300 seconds</b>
<b>Explanation</b>	The <code>tn.task.sweepTime</code> property contains an invalid value.
<b>Action</b>	Supply a valid numeric value.

<b>TNS.0005.5094E</b>	<b>Task {0} failed at {1}: Probable reason for failure - {2}. {3} more retries left.</b>
<b>Explanation</b>	In webMethods Trading Networks, if any error occurs while disabling the delivery for a partner, this error is thrown.
<b>Action</b>	Contact your system administrator.
<b>TNS.0006.1001E</b>	<b>Cannot setIData for CertificateData because the supplied data is null.</b>
<b>Explanation</b>	The setIData method on a CertificateData object passed a null IData object.
<b>Action</b>	If your code is calling CertificateData.setIData, supply an IData object that is not null. If it is not your code that is calling this method, contact Software AG Global Support.
<b>TNS.0006.1002E</b>	<b>Cannot setIData for CertificateData.</b>
<b>Explanation</b>	The setIData method on a CertificateData object was not successful.
<b>Action</b>	If Integration Server logging is set to logging level 4 or higher, the exception was written to the server log. See the server log for more information. Take the appropriate action to resolve the problem described in the exception.
<b>TNS.0006.1003S</b>	<b>Certificate provider Entrust/IAIK was not found, so Trading Networks cannot convert byte[] to java.security.cert.X509Certificate. Please ensure that entrust jar files are in the Integration Server's classpath.</b>
<b>Explanation</b>	The Entrust jar files are missing from the Integration Server's classpath.
<b>Action</b>	Place the Entrust jar files in the Integration Server's classpath. If you need assistance, contact Software AG Global support.
<b>TNS.0006.1004E</b>	<b>CertificateException encountered; Trading Networks cannot convert byte[] to java.security.cert.X509Certificat.</b>
<b>Explanation</b>	Trading Networks encountered a certificateException when attempting to convert a byte array to a java.security.cert.X509Certificat.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, the exception was written to the server log. See the server log for details. Take the appropriate action to resolve the problem described in the exception.
<b>TNS.0006.1005E</b>	<b>Cannot convert byte[][] to X509Certificate[], exception encountered at index {0}.</b>
<b>Explanation</b>	Trading Networks could not create a certificate chain from the bytes. Trading Networks encountered the error at <zeroBasedIndexNum> certificate.
<b>Action</b>	Check the byte array to ensure that it is in the correct format.

---

<b>TNS.0006.1006E</b>	<b>Cannot convert byte[] to java.security.PrivateKey.</b>
<b>Explanation</b>	Trading Networks could not create a private key object from bytes.
<b>Action</b>	Check the byte array to ensure that it is in the correct format.
<b>TNS.0006.1007E</b>	<b>Cannot convert X509Certificate[] to byte[][], CertificateEncodingException encountered at index {0}. Please verify that the certificate is valid.</b>
<b>Explanation</b>	The certificate chain is not valid.
<b>Action</b>	Provide a valid certificate chain.
<b>TNS.0006.1008E</b>	<b>Cannot convert PKCS7 formatted byte[] into .der formatted byte[][].</b>
<b>Explanation</b>	The PKCS7-formatted bytes are not valid.
<b>Action</b>	Check the byte array to ensure that it is in the correct format. Provide a valid byte array.
<b>TNS.0006.1009E</b>	<b>Cannot load certificate from null File. Please supply a valid File.</b>
<b>Explanation</b>	The supplied certificate file is null.
<b>Action</b>	Supply a certificate file that is not null.
<b>TNS.0006.1010S</b>	<b>Certificate provider Entrust/IAIK not found, so Trading Networks cannot load java.security.cert.X509Certificate from file &lt;filename&gt;. Ensure that entrust jar files are in the Integration Server's classpath.</b>
<b>Explanation</b>	The Entrust jar files are missing from the Integration Server's classpath.
<b>Action</b>	Place the Entrust jar files in the Integration Server's classpath. If you need assistance, contact Software AG Global Support.
<b>TNS.0006.1011E</b>	<b>CertificateException encountered getting certificate from file {0}.</b>
<b>Explanation</b>	An error occurred while attempting to load certificates from the specified file.
<b>Action</b>	Check the certificate file to ensure that it is in the correct format.
<b>TNS.0006.1012E</b>	<b>Cannot load private key from null File.</b>
<b>Explanation</b>	Trading Networks attempted to load the private key from a file; however, the file is null.
<b>Action</b>	Supply a private key file that is not null.

<b>TNS.0006.1013E</b>	<b>IOException encountered loading RSA private key from file {0}.</b>
<b>Explanation</b>	An error occurred while the server attempted to load a private key from the specified file.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem described in the exception.
<b>TNS.0006.1014E</b>	<b>InvalidKeyException encountered loading RSA private key from file {0}.</b>
<b>Explanation</b>	An error occurred while the server attempted to load a private key from the specified file.
<b>Action</b>	Check the private key file to ensure that it is in the correct format.
<b>TNS.0006.1015E</b>	<b>Cannot determine whether the certificate is self-signed because the certificate byte[] is null.</b>
<b>Explanation</b>	The supplied certificate byte array is null.
<b>Action</b>	Supply a non-null certificate byte array.
<b>TNS.0006.1016E</b>	<b>Cannot determine whether the certificate is self-signed because both the subject and issuer are null.</b>
<b>Explanation</b>	The supplied certificate is not in a valid format. Both the subject and issuer are null.
<b>Action</b>	Supply a valid certificate.
<b>TNS.0006.1017E</b>	<b>Cannot determine whether the certificate is self-signed because the certificate is null.</b>
<b>Explanation</b>	The supplied certificate is null.
<b>Action</b>	Supply a non-null certificate.
<b>TNS.0006.1018E</b>	<b>Integration Server's certificate file {0} not found.</b>
<b>Explanation</b>	Trading Networks could not find the specified file that contains the Integration Server's client certificate.
<b>Action</b>	Specify a file that contains a client certificate for the Integration Server.

---

<b>TNS.0006.1019E</b>	<b>Integration Server's CA certificate file {0} not found.</b>
<b>Explanation</b>	Trading Networks could not find the specified file that contains the Integration Server's CA certificate.
<b>Action</b>	Specify a file that contains the Integration Server's CA certificate.
<b>TNS.0006.1020E</b>	<b>IOException encountered when retrieving the Integration Server's private key from {0}.</b>
<b>Explanation</b>	IOException thrown when Trading Networks was attempting to retrieve the Integration Server's private key from the specified file.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem described in the exception.
<b>TNS.0006.1021E</b>	<b>InvalidKeyException encountered when retrieving the Integration Server's private key from {0}.</b>
<b>Explanation</b>	An error occurred when Trading Networks was attempting to retrieve the Integration Server's private key from the specified file.
<b>Action</b>	Specify a file that contains a valid private key for the Integration Server.
<b>TNS.0006.1022E</b>	<b>Certificate chain bytes cannot be null or zero length.</b>
<b>Explanation</b>	The certificate chainBytes parameter is either null or has a length of zero.
<b>Action</b>	Supply a valid certificate chain.
<b>TNS.0006.1023E</b>	<b>Certificate chain contains a single certificate, and that certificate is not self-signed.</b>
<b>Explanation</b>	The certificate chain is not valid. The certificate chain contains only one certificate, and that certificate is not self-signed. When you are not using a self-signed certificate, a certificate chain must include a certificate and its corresponding CA certificate(s).
<b>Action</b>	Supply a valid certificate chain. That is a single self-signed certificate or a certificate and its corresponding CA certificates.
<b>TNS.0006.1024E</b>	<b>Entrust cannot verify the certificate chain: {0}</b>
<b>Explanation</b>	Entrust could not verify the certificate chain.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take appropriate action to resolve the problem.

<b>TNS.0006.1027E</b>	<b>Cannot determine whether to trust the sign/verify certificate because there is no Enterprise profile.</b>
<b>Explanation</b>	Trading Networks cannot determine whether to trust the sign/verify certificate because there is no Enterprise profile.
<b>Action</b>	Create an Enterprise profile. For information about creating profiles, see the Trading Networks documentation.
<b>TNS.0006.1028E</b>	<b>Cannot set sign/verify certificate for receiver, Enterprise, because a CertificateException was encountered when determining whether the Integration Server trusts the certificate chain.</b>
<b>Explanation</b>	Before setting the sign/verify certificates that are specified in the Enterprise profile, Trading Networks ensures that the Integration Server trusts the certificates. A CertificateException was thrown when determining whether the Integration Server trusts the certificates.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take appropriate action to resolve the problem.
<b>TNS.0006.1029W</b>	<b>Cannot set sign/verify certificate for receiver, Enterprise, because the Integration Server is not set up to trust the certificate specified in the Enterprise profile.</b>
<b>Explanation</b>	Before setting the sign/verify certificate that is specified in the Enterprise profile, Trading Networks ensures that the Integration Server trusts the certificate. The certificate supplied in the Enterprise profile is not among the certificates that the Integration Server trusts.
<b>Action</b>	Add this certificate to the Integration Server's directory of trusted certificates.
<b>TNS.0006.1031E</b>	<b>SQLException encountered when setting certificate data for partner {0}; error message is {1}.</b>
<b>Explanation</b>	An error occurred when Trading Networks attempted to set the certificate data for the partner with the specified partner ID.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take appropriate action to resolve the problem described in the exception.
<b>TNS.0006.1032E</b>	<b>SQLException encountered when retrieving certificate data for partner {0}; error message is {1}.</b>
<b>Explanation</b>	An error occurred when Trading Networks attempted to retrieve the certificate data for the partner with the specified partner ID.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem described in the exception.

<b>TNS.0006.1035E</b>	<b>Cannot setIData() for CertData: CertData is null.</b>
<b>Explanation</b>	The setIData method on a CertData object passed a null IData object.
<b>Action</b>	If your code is calling CertData.setIData, supply a non-null IData object. If it is not your code that is calling this method, contact Software AG Global Support.
<b>TNS.0006.1036E</b>	<b>EXMLException encountered in CertData.setIData().</b>
<b>Explanation</b>	com.wm.app.tn.err.EXMLException was thrown in the setIData() method.
<b>Action</b>	If your code is calling CertData.setIData, check the server log for a stack trace. Take the appropriate action to resolve the problem described in the exception. If it is not your code that is calling this method, contact Software AG Global Support.
<b>TNS.0006.1037E</b>	<b>Cannot get expiration date for node certificate.</b>
<b>Explanation</b>	The certificate does not have expiration date information.
<b>Action</b>	Ensure that the certificate is in a valid format.
<b>TNS.0006.1038E</b>	<b>Cannot convert byte array to java.lang.PrivateKey.</b>
<b>Explanation</b>	Trading Networks could not convert the byte array because it is corrupted.
<b>Action</b>	Ensure that the byte array in the private key file is in a valid format.
<b>TNS.0006.1039E</b>	<b>Cannot set illegal usage {0} for CertData.</b>
<b>Explanation</b>	The CertData object contains a certificate usage parameter that is not legal.
<b>Action</b>	Ensure the certificate usage parameter in the CertData object has one of the following values: "sign", "decrypt", or "ssl".
<b>TNS.0006.1040E</b>	<b>Cannot insert CertData into database, CertData is null.</b>
<b>Explanation</b>	The CertData object is null.
<b>Action</b>	Supply a non-null CertData object.
<b>TNS.0006.1041E</b>	<b>Cannot insert CertData into database because data already exists for supplied owner={0}, partner={1} and usage={2}.</b>
<b>Explanation</b>	You attempted to add certificate information for the specified owner/partner/usage combination. However, there is already certificate information for this owner/partner/usage combination in the Trading Networks database.
<b>Action</b>	If you want to update the certificate information for the specified owner/partner/usage combination, use the update operation instead of insert operation. Otherwise, specify a unique owner/partner/usage combination that does not already exist in the Trading Networks database.

<b>TNS.0006.1042E</b>	<b>Error inserting CertData into the database; update row count is not 1.</b>
<b>Explanation</b>	Trading Networks encountered a database error when performing the insert operation.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1043E</b>	<b>Error inserting CertData into the database; IOException encountered encoding data into binary format.</b>
<b>Explanation</b>	Trading Networks encountered an error when performing the insert operation; an IOException was thrown when encoding data into binary format.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1044E</b>	<b>Error inserting CertData into the database; SQLException encountered with the error message {0}.</b>
<b>Explanation</b>	An SQLException occurred while Trading Networks was attempting to perform a database insert operation.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1045E</b>	<b>Cannot update CertData because the supplied CertData object is null.</b>
<b>Explanation</b>	Trading Networks was attempting to perform a database update operation to update certificate information. However, the supplied CertData object that Trading Networks is to use to update the existing certificate information is null. As a result, Trading Networks cannot perform the database update operation.
<b>Action</b>	Supply a non-null CertData object.
<b>TNS.0006.1046E</b>	<b>Cannot update CertData because the supplied CertID is null.</b>
<b>Explanation</b>	Trading Networks is not able to update the certificate information because the supplied unique identifier, CertID, is null.
<b>Action</b>	Supply a non-null CertID.

---

<b>TNS.0006.1047E</b>	<b>Cannot update CertData because the specified CertID, {0} does not match the CertID that Trading Networks has for the supplied owner/partner/usage.</b>
<b>Explanation</b>	You attempted to update certificate information for the specified owner/partner/usage combination. However, the supplied CertID does not match CertID that Trading Networks has for this owner/partner/usage combination.
<b>Action</b>	Retrieve the correct CertID for the owner/partner/usage combination from database, and issue the request again. This time specify the correct CertID for the owner/partner/usage combination.
<b>TNS.0006.1048E</b>	<b>Error updating CertData; the update count from the update operation is not 1.</b>
<b>Explanation</b>	Trading Networks encountered a database error when performing the update operation.
<b>Action</b>	If the Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1049E</b>	<b>Error updating CertData in the database; IOException encountered encoding data into binary format.</b>
<b>Explanation</b>	Trading Networks encountered an error when performing the update operation; an IOException was thrown when encoding data into binary format.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1050E</b>	<b>Error updating CertData in the database; SQLException encountered with the error message {0}.</b>
<b>Explanation</b>	An SQLException occurred when Trading Networks was attempting to perform a database update operation.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1051E</b>	<b>Cannot delete CertData because the supplied CertID is null.</b>
<b>Explanation</b>	Trading Networks is not able to delete the certificate information because the supplied unique identifier, CertID, is null.
<b>Action</b>	Supply a non-null CertID.

<b>TNS.0006.1052E</b>	<b>Error deleting CertData; the delete count from the delete operation is not 1.</b>
<b>Explanation</b>	Trading Networks encountered a database error when performing the delete operation.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1053E</b>	<b>Error deleting CertData from the database; SQLException encountered with the error message {0}.</b>
<b>Explanation</b>	An SQLException was thrown when Trading Networks was attempting to perform a database delete operation.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1054E</b>	<b>Cannot construct new CertData from SecurityOps.getCertificateData().</b>
<b>Explanation</b>	Internal error
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1055E</b>	<b>Error selecting CertData for ownerId={0}, partnerId={1}, usage={2}; IOException encountered decoding bytes to IData.</b>
<b>Explanation</b>	When Trading Networks was attempting to select CertData for the owner/partner/usage combination, an IOException was thrown when decoding bytes to IData.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1056E</b>	<b>Error selecting CertData for ownerId={0}, partnerId={1}, usage={2}; SQLException encountered with the error message {3}.</b>
<b>Explanation</b>	An SQLException occurred while Trading Networks was attempting select CertData for the owner/partner/usage combination.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

---

<b>TNS.0006.1057E</b>	<b>Cannot construct new CertData from SecurityOps.getCertificateDataByCertID().</b>
<b>Explanation</b>	Internal error
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1058E</b>	<b>Error selecting CertData for CertId=&lt;certID&gt;; IOException encountered decoding bytes to IData.</b>
<b>Explanation</b>	When Trading Networks was attempting to select CertData with the specified CertID, an IOException was thrown when decoding bytes to IData.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1059E</b>	<b>Error selecting CertData for CertId={0}; SQLException encountered with the error message {1}.</b>
<b>Explanation</b>	An SQLException occurred while Trading Networks was attempting select CertData with the specified CertID.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1060E</b>	<b>Cannot construct new CertData from SecurityOps.getCertificateDataForOwner().</b>
<b>Explanation</b>	Internal error
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1061E</b>	<b>Error selecting CertData for ownerId={0}; IOException encountered decoding bytes to IData.</b>
<b>Explanation</b>	When Trading Networks was attempting to select CertData for the specified owner, an IOException was thrown while decoding bytes to IData.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1062E</b>	<b>Error selecting CertData for ownerId={0}; SQLException encountered with the error message {1}.</b>
<b>Explanation</b>	An SQLException occurred while Trading Networks was attempting to select CertData for the specified owner.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

<b>TNS.0006.1063E</b>	<b>Cannot search certificate data because the expiration date is null.</b>
<b>Explanation</b>	The certificate expiration date search criterion is null.
<b>Action</b>	Supply a valid certificate expiration date for this search criterion.
<b>TNS.0006.1064E</b>	<b>Cannot construct new CertData from SecurityOps.getCertificateDataForUpdate().</b>
<b>Explanation</b>	Internal error
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1065E</b>	<b>Error selecting CertData for ownerId={0} and expDate={1}; IOException encountered decoding bytes to IData.</b>
<b>Explanation</b>	While Trading Networks was attempting to select CertData for the specified owner and with the specified expiration date, an IOException was thrown when decoding bytes to IData.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1066E</b>	<b>Error selecting CertData for ownerId={0} and expDate={1}; SQLException encountered with the error message {2}.</b>
<b>Explanation</b>	An SQLException occurred while Trading Networks was attempting to select CertData for the specified owner and with the specified expiration date.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1067E</b>	<b>Cannot construct new CertData from SecurityOps.getCertificateDataForPartnerAndUsage().</b>
<b>Explanation</b>	Internal error
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1068E</b>	<b>Error selecting CertData for partnerId={0} with usage={1}; IOException encountered decoding bytes to IData.</b>
<b>Explanation</b>	While Trading Networks was attempting to select CertData for the specified partner and with the specified certificate usage, an IOException was thrown when decoding bytes to IData.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

<b>TNS.0006.1069E</b>	<b>Error selecting CertData for partnerId={0} with usage={1}; SQLException encountered with the error message {2}.</b>
<b>Explanation</b>	An SQLException occurred while Trading Networks was attempting to select CertData for the specified partner and with the specified certificate usage.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1070E</b>	<b>Cannot get profile store or profile summary list, so Trading Networks cannot migrate certificates.</b>
<b>Explanation</b>	An exception was thrown while retrieving profile data.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1071W</b>	<b>Cannot get partner's ({0}) profile data; skip migrating this partner's certificate set.</b>
<b>Explanation</b>	Trading Networks was not able to find profile data for the partner with the specified partner ID. As a result, Trading Networks cannot migrate this partners certificate set.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1074E</b>	<b>Error loading partner's ({0}) certificate; skip migrating this partner's certificate set.</b>
<b>Explanation</b>	An exception occurred while loading certificate data for the partner with the specified partner ID. As a result, Trading Networks cannot migrate this partner's certificate set.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1075E</b>	<b>Cannot migrate partner's ({0}) certificate set because the certificate is null.</b>
<b>Explanation</b>	While Trading Networks was attempting to migrate the specified partner's certificate set, it encountered a null certificate. As a result, Trading Networks cannot migrate the certificate set.
<b>Action</b>	Supply a valid, non-null certificate.
<b>TNS.0006.1077E</b>	<b>Error loading partner's ({0}) CACertificate; skip migrating this partner's certificate set.</b>
<b>Explanation</b>	An exception was thrown while loading certificate data for the partner with the specified partner ID. As a result, Trading Networks cannot migrate this partner's certificate set.

**Action** If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

**TNS.0006.1078E** **Cannot migrate partner's ({0}) certificate set because a CA certificate is null.**

**Explanation** While Trading Networks was attempting to migrate the specified partner's certificate set, it encountered a null CA certificate. As a result, Trading Networks cannot migrate the certificate set.

**Action** Supply a valid CA certificate.

**TNS.0006.1079E** **Error loading partner's ({0}) private key; skip migrating this partner's certificate set.**

**Explanation** An exception occurred while loading the private key for the partner with the specified partner ID. As a result, Trading Networks cannot migrate this partner's certificate set.

**Action** If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

**TNS.0006.1080E** **Cannot migrate partner's ({0}) certificate set because the private key is null.**

**Explanation** The private key is null. When Trading Networks was attempting to migrate the specified partner's certificate set, it encountered a null private key. As a result, Trading Networks cannot migrate the certificate set.

**Action** If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

**TNS.0006.1081E** **Error adding partner's verify certificate to Trading Networks database (partner ID={0}, Integration Server user account={1}); skip migrating this partner's verify certificate set.**

**Explanation** An exception was thrown while attempting to add the verify certificate to the database. As a result, Trading Networks cannot migrate this partner's verify certificate set.

**Action** If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

---

<b>TNS.0006.1082E</b>	<b>Found null node certificate for CertId={0} in migration.</b>
<b>Explanation</b>	Trading Networks cannot migrate the certificate with the specified CertID because the node certificate is null.
<b>Action</b>	Supply a valid certificate.
<b>TNS.0006.1083E</b>	<b>IOException encountered in migration, CertID={0}.</b>
<b>Explanation</b>	IOException thrown when Trading Networks attempted to migrate the certificate with the specified CertID.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1084E</b>	<b>Error duplicating sign certificate data to SSL certificate data for owner={0}, partner={1}.</b>
<b>Explanation</b>	Internal error
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1085E</b>	<b>Cannot migrate certificate information. Cannot get current Trading Networks version from database.</b>
<b>Explanation</b>	Trading Networks cannot migrate certificate information because it cannot determine the Trading Networks version. The database information is not up-to-date or the database is not running.
<b>Action</b>	Ensure that the Trading Networks database is running. Use the JDBC Pools page on the Integration Server Administrator to ensure that the Integration Server can connect to the Trading Networks database.
<b>TNS.0006.1087E</b>	<b>fromVersion is required to run wm.tn.admin.migrate:migrateCerts.</b>
<b>Explanation</b>	The required fromVersion parameter was not supplied.
<b>Action</b>	Supply a valid fromVersion.
<b>TNS.0006.1092E</b>	<b>SQLException encountered in wm.tn.admin.migrate:migrateCerts.</b>
<b>Explanation</b>	An SQLException thrown was when executing the wm.tn.admin.migrate:migrateCerts service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

<b>TNS.0006.1093E</b>	<b>Error encountered in wm.tn.admin.migrate:migrateCerts.</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1094E</b>	<b>Error encountered invoking service {0}.</b>
<b>Explanation</b>	An error occurred when invoking the specified service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1098E</b>	<b>Cannot get certificate for verification of sender={0}, receiver={1}.</b>
<b>Explanation</b>	The certificates used to verify the Sender-Receiver partner pair are not available.
<b>Action</b>	Specify the certificates that you want to use for the partners in the Trading Networks profiles.
<b>TNS.0006.1099E</b>	<b>Cannot get certificate for verification of sender={0}, receiver={1}, stack trace is {2}.</b>
<b>Explanation</b>	Trading Networks could not retrieve the verify certificate for the specified sender and receiver.
<b>Action</b>	Ensure the verify certificate information is provided for specified sender and receiver.
<b>TNS.0006.1101I</b>	<b>No chain for signer {0} ({1}).</b>
<b>Explanation</b>	Required security data is missing.
<b>Action</b>	If your application code is creating or updating certificates, ensure that you supply all required certificate data to the services you are invoking. If you receive this error while using the Trading Networks Console, contact Software AG Global Support.
<b>TNS.0006.1102E</b>	<b>Cannot find verification cert.</b>
<b>Explanation</b>	Trading Networks could not retrieve a verify certificate.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1103E</b>	<b>Cannot find verification cert for sender={0}, receiver={1}.</b>
<b>Explanation</b>	Trading Networks could not retrieve the verify certificate for the specified sender and receiver.
<b>Action</b>	Ensure the verify certificate information is provided for specified sender and receiver.

---

<b>TNS.0006.1104E</b>	<b>Error encountered verifying XML document.</b>
<b>Explanation</b>	An error was thrown when verifying an XML document.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1109E</b>	<b>Error encountered signing XML document.</b>
<b>Explanation</b>	An error was thrown while signing an XML document.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1110E</b>	<b>Signing certificate for sender={0} receiver={1} not valid.</b>
<b>Explanation</b>	The signing certificate for the specified sender and receiver is not valid.
<b>Action</b>	Provide a valid signing certificate for the sender/receiver pair.
<b>TNS.0006.1111E</b>	<b>Verify certificate for sender={0} receiver={1} not valid.</b>
<b>Explanation</b>	The verify certificate for the specified sender and receiver is not valid.
<b>Action</b>	Provide a valid verify certificate for the sender/receiver pair.
<b>TNS.0006.1115E</b>	<b>Error encountered invoking wm.tn.security:getDecryptCACertificates.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:getDecryptCACertificates service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1116E</b>	<b>Error encountered invoking wm.tn.security:getDecryptCertificate.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:getDecryptCertificate service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

<b>TNS.0006.1117E</b>	<b>Error encountered invoking wm.tn.security:getDecryptKey.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:getDecryptKey service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1118E</b>	<b>Error encountered invoking wm.tn.security:getEncryptCACertificates.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:getEncryptCACertificates service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1119E</b>	<b>Error encountered invoking wm.tn.security:getEncryptCertificate.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:getEncryptCertificate service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1120E</b>	<b>Error encountered invoking wm.tn.security:getEncryptKey.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:getEncryptKey service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1121E</b>	<b>Error encountered invoking wm.tn.security:getSecurity.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:getSecurity service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1122E</b>	<b>Error encountered invoking wm.tn.security:getSignCACertificates.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:getSignCACertificates service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

---

<b>TNS.0006.1123E</b>	<b>Error encountered invoking <code>wm.tn.security:getSignCertificate</code>.</b>
<b>Explanation</b>	An error was encountered while invoking the <code>wm.tn.security:getSignCertificate</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1124E</b>	<b>Error encountered invoking <code>wm.tn.security:getSignKey</code>.</b>
<b>Explanation</b>	An error was encountered while invoking the <code>wm.tn.security:getSignKey</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1125E</b>	<b>Error encountered invoking <code>wm.tn.security:getVerifyCACertificates</code>.</b>
<b>Explanation</b>	An error was encountered while invoking the <code>wm.tn.security:getVerifyCACertificates</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1126E</b>	<b>Error encountered invoking <code>wm.tn.security:getVerifyCertificate</code>.</b>
<b>Explanation</b>	An error was encountered while invoking the <code>wm.tn.security:getVerifyCertificate</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1132E</b>	<b>Error encountered invoking <code>wm.tn.security:setDecryptCertificateSet</code>.</b>
<b>Explanation</b>	An error was encountered while invoking the <code>wm.tn.security:setDecryptCertificateSet</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

<b>TNS.0006.1133E</b>	<b>cert is null; however, CACerts is not null.</b>
<b>Explanation</b>	You provided information in CACerts to specify CA certificates; however, you did not specify a certificate for the cert variable.
<b>Action</b>	Provide a valid certificate for the cert variable.
<b>TNS.0006.1134E</b>	<b>CACerts is required when the certificate is not self-signed.</b>
<b>Explanation</b>	You did not specify CA certificates for the CACerts variable. CA certificates are required unless the certificate you specify is self-signed.
<b>Action</b>	Provide valid CA certificates for the CACerts variable.
<b>TNS.0006.1137E</b>	<b>Error encountered invoking wm.tn.security:setEncryptCertificateSet.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:setEncryptCertificateSet service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1151E</b>	<b>Error encountered invoking wm.tn.security:setSecurity.</b>
<b>Explanation</b>	An error was encountered while invoking the wm.tn.security:setSecurity service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1152E</b>	<b>privateKey and cert should be both null or neither null.</b>
<b>Explanation</b>	You specified a value for either privateKey or cert, but not for both. The values for privateKey and cert must either both be null or both have non-null values.
<b>Action</b>	Provide valid values for privateKey and cert.
<b>TNS.0006.1153W</b>	<b>CACerts is required for non self signed certificates.</b>
<b>Explanation</b>	A value for CACerts must be specified for non self-signed certificates.
<b>Action</b>	Provide valid value for CACerts.

<b>TNS.0006.1156E</b>	<b>Error encountered invoking <code>wm.tn.security:setSignCertificateSet</code>.</b>
<b>Explanation</b>	An error was encountered while invoking the <code>wm.tn.security:setSignCertificateSet</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1159E</b>	<b>Error encountered invoking <code>wm.tn.security:setVerifyCertificateSet</code>.</b>
<b>Explanation</b>	An error was encountered while invoking the <code>wm.tn.security:setVerifyCertificateSet</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1164E</b>	<b>Error encountered invoking <code>wm.tn.security:updateCertificate</code>.</b>
<b>Explanation</b>	An error was encountered while invoking the <code>wm.tn.security:updateCertificate</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1165E</b>	<b>Error encountered in <code>wm.tn.security:addCertificateData</code>.</b>
<b>Explanation</b>	An error was encountered while executing the <code>wm.tn.security:addCertificateData</code> service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1166E</b>	<b>Cannot get existing Certificate Data from supplied <code>certID={0}</code>.</b>
<b>Explanation</b>	Cannot get existing certificate data for the certificate information with <code>certID=&lt;certID&gt;</code> . The supplied <code>certID</code> might be invalid.
<b>Action</b>	Ensure that the value for <code>certID</code> is valid.
<b>TNS.0006.1167E</b>	<b>Cannot get existing CertID from supplied <code>ownerID={0}</code> <code>partnerID={1}</code> and <code>usage={2}</code>.</b>
<b>Explanation</b>	Cannot get existing CertID for certificate data that is associated with <code>ownerID=&lt;ownerID&gt;</code> <code>partnerID=&lt;partnerID&gt;</code> and <code>usage=&lt;certificateUsage&gt;</code> .
<b>Action</b>	Ensure that the values for <code>ownerID</code> , <code>partnerID</code> , and <code>usage</code> are valid.

<b>TNS.0006.1168E</b>	<b>Cannot construct new CertData in wm.tn.security:updateCertificateData.</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1169E</b>	<b>Error encountered in wm.tn.security:updateCertificateData.</b>
<b>Explanation</b>	An error was encountered while executing the wm.tn.security:updateCertificateData service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1170E</b>	<b>Cannot delete non-existing CertData for ownerID={0}, partnerID={1} and usage={2}.</b>
<b>Explanation</b>	Trading Networks could not locate certificate data for the specified ownerID, partnerID, or usage.
<b>Action</b>	Ensure the values for ownerID, partnerID, and usage are valid.
<b>TNS.0006.1171E</b>	<b>Error encountered in wm.tn.security:deleteCertificateData.</b>
<b>Explanation</b>	An error was encountered while executing the wm.tn.security:deleteCertificateData service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1172E</b>	<b>Error encountered in wm.tn.security:getCertificateData.</b>
<b>Explanation</b>	An error was encountered while executing the wm.tn.security:getCertificateData service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1175E</b>	<b>Error encountered in wm.tn.security:getSigningKeyAndChain.</b>
<b>Explanation</b>	An error was encountered while executing the wm.tn.security:getSigningKeyAndChain service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

---

<b>TNS.0006.1176E</b>	<b>Error encountered in wm.tn.security:getVerifyingChain.</b>
<b>Explanation</b>	An error was encountered while executing the wm.tn.security:getVerifyingChain service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1178E</b>	<b>Error encountered in wm.tn.security:getDecryptionKeyAndCert.</b>
<b>Explanation</b>	An error was encountered while executing the wm.tn.security:getDecryptionKeyAndCert service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1179E</b>	<b>Error encountered in wm.tn.security:getEncryptionChain.</b>
<b>Explanation</b>	An error was encountered while executing the wm.tn.security:getEncryptionChain service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1182E</b>	<b>{0} private key not defined.</b>
<b>Explanation</b>	The private key for the SSL client certificate set was not defined.
<b>Action</b>	Provide a valid SSL private key for the SSL client certificate set.
<b>TNS.0006.1183E</b>	<b>{0} certificate chain not defined.</b>
<b>Explanation</b>	The certificate chain for the SSL client certificate set was not defined.
<b>Action</b>	Provide a valid SSL certificate chain for the SSL client certificate set.
<b>TNS.0006.1184E</b>	<b>Error encountered in wm.tn.security:getSSLKeyAndChain.</b>
<b>Explanation</b>	Error encountered when executing the wm.tn.security:getSSLKeyAndChain service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.

<b>TNS.0006.1185E</b>	<b>No SSL key and cert defined.</b>
<b>Explanation</b>	The SSL private key and certificate are not defined.
<b>Action</b>	Provide a valid SSL private key and certificates.
<b>TNS.0006.1187E</b>	<b>Error encountered in wm.tn.security:setSSLKeyAndChain.</b>
<b>Explanation</b>	An error was encountered while executing the wm.tn.security:setSSLKeyAndChain service.
<b>Action</b>	If Integration Server logging is configured at logging level 4 or higher, a stack trace was written to the server log. See the server log for details. Take the appropriate action to resolve the problem.
<b>TNS.0006.1190E</b>	<b>Certificate chain bytes cannot be null or zero length.</b>
<b>Explanation</b>	The certificate chainBytes value is either null or a zero length. The certificate chain must contain data.
<b>Action</b>	Provide valid certificate chain byte array.
<b>TNS.0006.1191E</b>	<b>Invalid RSA Private Key file.</b>
<b>Explanation</b>	The RSA private key file is not valid.
<b>Action</b>	Provide a valid RSA private key file.
<b>TNS.0006.1192E</b>	<b>Cannot construct new CertData.</b>
<b>Explanation</b>	Internal Error.
<b>Action</b>	Contact Software AG Global Support.
<b>TNS.0006.1193E</b>	<b>Bad private key for usage {0}: {1}</b>
<b>Explanation</b>	The private key that was provide is not valid.
<b>Action</b>	Provide a valid private key.
<b>TNS.0006.1194</b>	<b>Unable to import security data for owner {0} because the owner is not defined in your Trading Networks system.</b>
<b>Explanation</b>	In webMethods Trading Networks, it is not possible to import the security data for the owner as the owner is not defined.
<b>Action</b>	Define the owner in webMethods Trading Networks and try again.

<b>TNS.0006.1196</b>	<b>Unable to import security data of owner {0} for partner {1} because the partner {1} is not defined in your Trading Networks system.</b>
<b>Explanation</b>	In webMethods Trading Networks, if the partner is not defined as the owner of the certificate, the security data cannot be imported.
<b>Action</b>	Ensure that the partner is the owner of the certificate and try again.
<b>TNS.0006.1198</b>	<b>Error encountered while viewing certificate data for partnerID={0}. The error is {1}</b>
<b>Explanation</b>	In webMethods Trading Networks, an error is encountered while viewing certificate data for the partner.
<b>Action</b>	Contact your system administrator.
<b>TNS.0006.1199</b>	<b>Error encountered in wm.tn.security:updateCertificateData for partnerID={0}. The error is {1}</b>
<b>Explanation</b>	In webMethods Trading Networks, an error is encountered while updating a certificate.
<b>Action</b>	Contact your system administrator.
<b>TNS.0006.1200</b>	<b>Error encountered while validating chain The error is {0}</b>
<b>Explanation</b>	In webMethods Trading Networks, an error is encountered when the certificate details that are entered is not correct.
<b>Action</b>	Ensure to define the certificate details correctly and try again.
<b>TNS.0006.1201</b>	<b>Unable to import security data for partner {0} because this partner is not defined in your Trading Networks system.</b>
<b>Explanation</b>	webMethods Trading Networks is unable to import security data for the partner because this partner is not defined in your webMethods Trading Networks system.
<b>Action</b>	Define the partner in your webMethods Trading Networks system and try again.
<b>TNS.0007.1001E</b>	<b>{0} is required.</b>
<b>Explanation</b>	A value was not supplied for the specified variable.
<b>Action</b>	Supply the required value.

<b>TNS.0007.1002E</b>	<b>wm.tnweb.wrapper:xmlEncode: could not encode IData to binary</b>
<b>Explanation</b>	An exception was thrown while encoding an IData.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1003E</b>	<b>wm.tnweb.wrapper:xmlDecode: could not decode binary to IData</b>
<b>Explanation</b>	An exception was thrown while decoding an IData.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1004E</b>	<b>wm.tnweb.wrapper:xmlDecode2: could not decode binary to Values</b>
<b>Explanation</b>	An exception was thrown while decoding an IData.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1005E</b>	<b>wm.tnweb.wrapper:removeNullAlerts: error caught in removing null alerts</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1006E</b>	<b>wm.tnweb.wrapper:compareRights: error caught in comparing rights</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1007E</b>	<b>wm.tnweb.wrapper:getTNRights: error caught in getting Trading Networks partner ACL privilege</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1008E</b>	<b>wm.tnweb.wrapper:getUserGroups: error caught in getting Trading Networks partner ACL group memberships</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1009E</b>	<b>wm.tnweb.wrapper:getUserInfo: error caught in getting Trading Networks partner IS login name</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.

---

<b>TNS.0007.1010E</b>	<b>wm.tnweb.wrapper:getHashKeys: error caught in getting Hashtable keys</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1011E</b>	<b>{0} cannot be null</b>
<b>Explanation</b>	A value was not supplied for the specified variable.
<b>Action</b>	Supply the required value.
<b>TNS.0007.1012E</b>	<b>wm.tnweb.wrapper:IntegerToStrng: error caught converting Integer datatype to String datatype</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1013E</b>	<b>wm.tnweb.wrapper:ShortToStrng: error caught converting Short datatype to String datatype</b>
<b>Explanation</b>	Trading Networks encountered an internal error
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1014E</b>	<b>wm.tnweb.wrapper:isBIEnabled: error caught in retrieving enabled Integration Server packages</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1015E</b>	<b>wm.tnweb.wrapper:isBIEnabled: could not find if Business Integrator (ProcessMonitor) package is installed and enabled</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1016E</b>	<b>wm.tnweb.wrapper:getStringFromBundle: could not get String from resource bundle wm.tnweb.wrapper_bundle for key = {0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.

<b>TNS.0007.1017E</b>	<b>wm.tnweb.querySvc:getQuery: could not get pre-saved query ({0}) for partnerID={1}.</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1018E</b>	<b>{0} cannot be null or empty</b>
<b>Explanation</b>	A value was not supplied for the specified variable.
<b>Action</b>	Supply the required value.
<b>TNS.0007.1019E</b>	<b>partnerID is null or empty in invoking wm.tnweb.querySvc:getSavedQueries</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1020E</b>	<b>wm.tnweb.querySvc:getSavedQueries: could not get pre-saved queries for partnerID={0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1021E</b>	<b>wm.tnweb.querySvc:getDocuments: could not get documents</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1022E</b>	<b>wm.tnweb.querySvc:createTaskQuery: could not create task query for document id={0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1023E</b>	<b>wm.tnweb.querySvc:getCalendar: invalid input {0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1024E</b>	<b>wm.tnweb.querySvc:getCalendar: could not get calender for year={0}, month={1}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.

<b>TNS.0007.1025E</b>	<b>wm.tnweb.querySvc:getQueryRestriction: could not get document query restriction for document id = {0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1026E</b>	<b>Could not get profile store</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1027E</b>	<b>Could not get document attributes for id = {0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1028E</b>	<b>Could not get internal document type id for name = {0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1029E</b>	<b>wm.tnweb.configSvc:checkDefaultConfigLoaded: could not check if default config is loaded</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1030E</b>	<b>wm.tnweb.configSvc:getHashes: could not construct Hashtables for TNAdministrators and TNPartners</b>
<b>Explanation</b>	Internal error Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1035E</b>	<b>wm.tnweb.configSvc:getUserConfig: could not get membership info for user {0}.</b>
<b>Explanation</b>	The user account for the specified user does not exist in the Integration Server.
<b>Action</b>	If you have deleted the user account for this user, use the Integration Server Administrator to create the user account again.  If this is for an external user, ensure that the user account is a member of the TNPartners group.

**TNS.0007.1039E**      **wm.tnweb.configSvc:getUserConfig: could not get partner specific config for {0}**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1040E**      **wm.tnweb.configSvc:getGroupConfig: could not get group specific config for {0}**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1041E**      **wm.tnweb.configSvc:getTNPartners: could not get partner information**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1042E**      **wm.tnweb.configSvc:getTNGroups: could not get IS group information**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1043E**      **wm.tnweb.configSvc:getTNUsers: could not get Trading Networks IS user information**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1044E**      **wm.tnweb.configSvc:getUserConfigDisplay: could not get specific user config information**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1045E**      **wm.tnweb.configSvc:getAvailableStatus: could not get user status from database**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1047E**      **wm.tnweb.configSvc:saveCustomPages: error encountered in saving new custom pages setting**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

---

<b>TNS.0007.1048E</b>	<b>wm.tnweb.configSvc:addToHashes: invalid type value</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1049E</b>	<b>wm.tnweb.configSvc:addToHashes: could not add new config IData to hashtable</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1050E</b>	<b>wm.tnweb.configSvc:changeConfig: could not change config setting</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1051E</b>	<b>wm.tnweb.querySvc:getQueryRestriction: do not have privilege to check query restriction</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1053E</b>	<b>wm.tnweb.wrapper:logBrowserLocale: error encountered in getting browser locale</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1054E</b>	<b>cert is null</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1055E</b>	<b>CACerts is null</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1056E</b>	<b>CACerts[{}] is null</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.

<b>TNS.0007.1057E</b>	<b>privateKey is null</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1058E</b>	<b>Can not get user specific configuration: no such user {0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1059E</b>	<b>Error encountered calling wm.tnweb.configSvc:checkAndUpdateConfig</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1061E</b>	<b>Error updating/retrieving configuration info from repo</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1062E</b>	<b>Error encountered in invoking service wm.tnweb.querySvc:getPartnerNameAndID</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1063E</b>	<b>Can not get valid profile summary list: list is null or empty</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1064E</b>	<b>Error encountered in invoking service wm.tnweb.querySvc:runTaskQuery</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1065E</b>	<b>Error encountered in invoking service wm.tnweb.querySvc:taskQueryById</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.

---

<b>TNS.0007.1066E</b>	<b>Error encountered in invoking service wm.tnweb.querySvc:getDocDetails</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1067E</b>	<b>Got null bizdoc, docId = {0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1068E</b>	<b>Got null or 0-length bizdoc content parts, docId = {0}</b>
<b>Explanation</b>	The contents of this document might not have been saved to the Trading Networks database.
<b>Action</b>	Check the corresponding TN document type and processing rule to determine whether Trading Networks has saved the document contents to the database.
<b>TNS.0007.1069E</b>	<b>Invalid startIndex = {0}</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1070E</b>	<b>Can not convert content bytes to String: unsupported encoding</b>
<b>Explanation</b>	Trading Networks encountered an internal error.
<b>Action</b>	Gather error information from the logs and contact Software AG Global Support.
<b>TNS.0007.1071E</b>	<b>NOTE: No privilege to view contents of this document</b>
<b>Explanation</b>	You attempted to view a document of which you are neither the sender nor the receiver.
<b>Action</b>	You can only view a document that you have sent or received.
<b>TNS.0007.1072E</b>	<b>NOTE: No more data to display</b>
<b>Explanation</b>	Either the document has no content or the startIndex is beyond the end of the content.
<b>Action</b>	If you determine that this is an error, gather error information and contact webMethods Customer Care.

**TNS.0007.1073E**      **Got null bizdoc content part, docId={0}, content part name={2}**  
**Explanation**      The content of this document might not have been saved to the Trading Networks database.  
**Action**              Check the corresponding TN document type and processing rule to determine whether Trading Networks saved the document content to the database.

**TNS.0007.1074E**      **Error encountered in invoking service wm.tnweb.wrapper:getTNInfo**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1075E**      **Error encountered in invoking service wm.tnweb.wrapper:registerTNonIntegrationServer**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1076E**      **Error encountered parsing date {0} or {1}.**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TNS.0007.1077E**      **Error encountered in invoking service wm.tnweb.wrapper:installTNWebACLs**  
**Explanation**      Trading Networks encountered an internal error.  
**Action**              Gather error information from the logs and contact Software AG Global Support.

**TRNSERV.000018.000001 – new String[]{"{0} is required","Please supply the required value","0"}**  
**Explanation**      A value for the specified input field is not supplied.  
**Action**              Supply a valid value for the specified input field.

**TRNSERV.000018.000018 – new String[]{"{0} cannot be null or empty","","0"}**  
**Explanation**      The specified input field does not contain a value. A value for this input field is required.  
**Action**              Supply a valid value for the specified input field.

---

**TRNSERV.000018.000025 – new String[]{"wm.tnweb.querySvc:getQueryRestriction: could not get document query restriction for document id = {0}","","0"}**

**Explanation** An error occurred while fetching a document query restriction for specified document.

**Action** The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

**TRNSERV.000018.000051 – new String[]{"wm.tnweb.querySvc:getQueryRestriction: do not have privilege to check query restriction","","0"}**

**Explanation** You are not allowed to check the query restriction.

**Action** Contact your administrator.

**TRNSERV.000018.000066 – new String[]{"Error encountered in invoking service wm.tnweb.querySvc:getDocDetails","","0"}**

**Explanation** An error occurred while retrieving content part bytes.

**Action** The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

**TRNSERV.000018.000067 – new String[]{"Got null bizdoc, docId = {0}","","0"}**

**Explanation** While checking the query restriction, a null bizdoc was found for the specified docID.

**Action** Supply a valid docId.

**TRNSERV.000024.000204 – new String[]{"Error attempting to parse message contents","","0"}**

**Explanation** A MessagingException error occurred while parsing the MIME message.

**Action** The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

**TRNSERV.000024.000205 – new String[]{"Error attempting to read from message source","","0"}**

**Explanation** An IOException error occurred while reading a MIME message from the message source.

**Action** The exception was written to the log. Take appropriate action to resolve the problem described in the exception.

**bizDocDeletionError – You did not select an item to delete. Select at least one item to delete.**

**Explanation** You did not select an item to delete.  
**Action** Select at least one item to delete.

**bizDocSelectionError – You did not select an item to archive. Select at least one item to archive.**

**Explanation** You did not select an item to archive.  
**Action** Select at least one item to archive.

**cert.err An error occurred while validating the certificate chain. Take corrective action based on the error details.**

**Explanation** An error occurred while validating the certificate chain.  
**Action** Take corrective action based on the error details.

**corp.name.required You did not supply a value for the required Corporation Name field. Provide a value for this field.**

**Explanation** You did not supply a value for the required Corporation Name field.  
**Action** Provide a value for this field.

**date.is.required You did not specify a date. Specify a date to proceed.**

**Explanation** You did not specify a date.  
**Action** Specify a date to proceed.

**default.connection.error.msg – Trading Networks Server is not configured, or it is not available.**

**Explanation** Trading Networks server is not configured, or it is not available.  
**Action** Contact the Administrator.

**dlscheck.dialogMessage – You do not have permission to perform this action. Contact your system administrator for the required privileges.**

**Explanation** You do not have permission to perform this action.  
**Action** Contact your system administrator for the required privileges.

---

**docTypeDetails\_NameRequiredError – The document type name is a required field. Provide a document type name.**

**Explanation** The document type name is required.

**Action** Provide a document type name.

**docTypeSearch.fileInput.required.msg – No document was provided for testing. Provide the document.**

**Explanation** No document was provided for testing.

**Action** Provide the document.

**doctype.instantiation.error – The EDI document type could not be instantiated. Make sure that a valid schema standard is specified.**

**Explanation** The EDI document type could not be instantiated.

**Action** Make sure that a valid schema standard is specified.

**editor.detailsid.missing.error – Document Type ID is missing.**

**Explanation** In webMethods Trading Networks, if the Document Type ID is missing, this error shows up.

**Action** Ensure to log out and log in again to webMethods Trading Networks.

**empty.attribute.name.error – The Name field cannot be blank. Provide a valid value for this field.**

**Explanation** The Name field cannot be blank.

**Action** Provide a valid value for this field.

**error.InvalidDefaultValue – You specified a default value of %1\$s. This value is not valid. Select a value from the list of valid values.**

**Explanation** The specified default value is not valid.

**Action** Select a value from the list of valid values.

**error.InvalidFieldId – Invalid Field Id Specified: %1\$s**

**Explanation** In webMethods Trading Networks, if the Field Definition ID of the profile is null or invalid, this error shows up.

**Action** Contact your system administrator.

**error.InvalidFieldLength** – You specified a field length of %1\$s. This field length is not valid. Specify a positive integer value.

**Explanation** The specified field length is not valid.

**Action** Specify a positive integer value.

**error.WmEDIPackageNotEnabled** – The WmEDI package is not enabled on the Integration Server. Enable the package.

**Explanation** The WmEDI package is not enabled on the Integration Server.

**Action** Enable the package.

**error.days.greaterthan.zero** – You entered a value for Days that is not valid. Enter an integer value greater than zero.

**Explanation** You entered a value for Days that is not valid.

**Action** Enter an integer value greater than zero.

**error.defValue.exceeds.maxLength** – Default Value %1\$s exceeds specified Maximum Length %2\$s

**Explanation** In webMethods Trading Networks, if the default value of a field definition exceeds the maximum length permissible, this error throws up.

**Action** Enter a field definition with default value within the permissible maximum length, and try again.

**error.delete** The activity log(s) could not be deleted. Take corrective action based on the error details.

**Explanation** The activity log(s) could not be deleted.

**Action** Take corrective action based on the error details.

**error.enter.valid.file.name** – Enter a valid file name

**Explanation** The file name is empty or contains invalid characters such as ", /, \, \*, or ?.

**Action** Specify a valid file name.

**error.enter.valid.solution.name** – Enter a valid solution name

**Explanation** The solution name is empty or contains invalid characters such as ", /, \, \*, or ?.

**Action** Specify a valid solution name.

<b>error.extract.file</b>	<b>The file you uploaded is not in a valid format. Provide an XML or a binary file containing valid asset data to import.</b>
<b>Explanation</b>	The file you uploaded is not in a valid format.
<b>Action</b>	Provide an XML or a binary file containing valid asset data to import.
<b>error.getComment</b>	<b>An error occurred while retrieving comments from Trading Networks. Take corrective action based on the error details and trace.</b>
<b>Explanation</b>	An error occurred while retrieving comments from Trading Networks.
<b>Action</b>	Take corrective action based on the error details and trace.
<b>error.getEDIINTProperties – My webMethods encountered an error while trying to retrieve WmEDIforTN package properties.</b>	<b>Take corrective action based on the error details.</b>
<b>Explanation</b>	My webMethods Server encountered an error while trying to retrieve WmEDIforTN package properties.
<b>Action</b>	Take corrective action based on the error details.
<b>error.getEDIProperties – My webMethods Server encountered an error while trying to retrieve WmEDI package properties.</b>	<b>Take corrective action based on the error details.</b>
<b>Explanation</b>	My webMethods Server encountered an error while trying to retrieve WmEDI package properties.
<b>Action</b>	Take corrective action based on the error details.
<b>error.getTNProperties – My webMethods Server encountered an error while trying to retrieve Trading Networks properties.</b>	<b>Make sure the WmTN package is properly installed and loaded.</b>
<b>Explanation</b>	My webMethods Server encountered an error while trying to retrieve Trading Networks properties.
<b>Action</b>	Make sure the WmTN package is properly installed and loaded.
<b>error.message</b>	<b>Download action failed.</b>
<b>Explanation</b>	An exception occurred while downloading the file.
<b>Action</b>	Check the server connection. Contact the system administrator to check your security and locale settings.

**error.message.edi.not.installed** – This feature requires the WmEDI and WmEDIforTN packages. These packages are either not loaded or are disabled. Enable these packages.

**Explanation** This feature requires the WmEDI and WmEDIforTN packages.

**Action** These packages are either not loaded or are disabled. Enable these packages.

**error.name.already.exists** – The name you have chosen for this field, %1\$s, already exists. Enter a different name.

**Explanation** The name you have chosen for this field already exists.

**Action** Enter a different name.

**error.noserver** My WebMethods Server could not reassign the task(s) because no target was specified. Specify the target server.

**Explanation** My webMethods Server could not reassign the task(s) because no target was specified.

**Action** Specify the target server.

**error.reassign** My WebMethods Server encountered an error while reassigning the task(s). Take corrective action based on the error details.

**Explanation** My webMethods Server encountered an error while reassigning the task(s).

**Action** Take corrective action based on the error details.

**error.restart** My WebMethods Server encountered an error while restarting the task(s). Take corrective action based on the error details.

**Explanation** My webMethods Server encountered an error while restarting the task(s).

**Action** Take corrective action based on the error details.

**error.saveEDIFormatSettings** – My webMethods encountered an error while trying to update EDI Module format settings. Take corrective action based on the error details.

**Explanation** My webMethods Server encountered an error while trying to update EDI Module format settings.

**Action** Take corrective action based on the error details.

**error.saveEDIINTProperties** – My webMethods encountered an error while trying to update EDI Module configuration properties. Take corrective action based on the error details.

**Explanation** My webMethods Server encountered an error while trying to update EDI Module configuration properties.

**Action** Take corrective action based on the error details.

**error.saveEDIProperties – My webMethods encountered an error while trying to save EDI Module configuration properties. Take corrective action based on the error details.**

**Explanation** My webMethods Server encountered an error while trying to save EDI Module configuration properties.

**Action** Take corrective action based on the error details.

**error.saveTNProperties – My webMethods Server encountered an error while trying to save Trading Networks properties. Make sure the WmTN package is properly installed and loaded.**

**Explanation** My webMethods Server encountered an error while trying to save Trading Networks properties.

**Action** Make sure the WmTN package is properly installed and loaded.

**error.setComment An error occurred while setting comments from Trading Networks. Take corrective action based on the error details and trace.**

**Explanation** An error occurred while setting comments from Trading Networks.

**Action** Take corrective action based on the error details and trace.

**error.stop My WebMethods Server encountered an error while stopping the task(s). Take corrective action based on the error details.**

**Explanation** My webMethods Server encountered an error while stopping the task(s).

**Action** Take corrective action based on the error details.

**error.submitDocument – An error occurred while submitting the document to Trading Networks. Check the file path and resubmit the document.**

**Explanation** An error occurred while submitting the document to Trading Networks.

**Action** Check the file path and resubmit the document.

**file.validation.messageE – Invalid file format. Supported format: csv**

**Explanation** The file uploaded is not a valid file format.

**Action** Upload .csv files.

**g11n.wm\_tn\_bam\_attributes.default.optimize\_not\_installed – Optimize is not installed. Install webMethods Optimize.**

**Explanation** Optimize is not installed.

**Action** Install webMethods Optimize.

**g11n.wm\_tn\_bam\_doctypes.default.optimize\_not\_installed – Optimize is not installed. Install webMethods Optimize.**

**Explanation** Optimize is not installed.  
**Action** Install webMethods Optimize.

**g11n.wm\_tn\_dls\_viewDataSet.default.at\_least\_one\_permission – Permissions have not yet been granted to this role. Grant at least one permission to this role on the Permissions tab.**

**Explanation** Permissions have not yet been granted to this role.  
**Action** On the Permissions tab, grant at least one permission to this role.

**g11n.wm\_tn\_pf\_profile.users.invalid\_user\_name – You did not specify a user name. Provide a valid user name.**

**Explanation** You did not specify a user name.  
**Action** Provide a valid user name.

**g11n.wm\_tn\_pf\_profile.users.no\_password – The password is missing. Provide and confirm the password.**

**Explanation** The password is missing.  
**Action** Provide and confirm the password.

**g11n.wm\_tn\_pf\_profile.users.passwords\_do\_not\_match – The values for Password and Confirm Password do not match. Enter the same values for these fields.**

**Explanation** The values for Password and Confirm Password do not match.  
**Action** Enter the same values for these fields.

**g11n.wm\_tn\_pf\_profile.users.user\_already\_exists\_please – The specified user name already exists. Provide a unique user name.**

**Explanation** The specified user name already exists.  
**Action** Provide a unique user name.

**g11n.wm\_tn\_pf\_profile.users.user\_name\_invalid – The user name provided is not valid because it contains special characters. Specify a user name that contains only alphanumeric characters.**

**Explanation** The user name provided is not valid because it contains special characters.  
**Action** Specify a user name that contains only alphanumeric characters.

**id.generate.error**      **Can not generate EDI document type ID. Try again.**  
**Explanation**            Cannot generate EDI document type ID.  
**Action**                    Try again.

**invalid.fileE**            **Invalid file format. Supported formats: xml,txt**  
**Explanation**            The file uploaded is not a valid file format.  
**Action**                    Upload .xml or .txt files.

**invalid.integer.value.detail** – **The value you provided for the Control Number Minimum is not an integer. For the VDA standard, enter an integer value greater than or equal to 0. For other standards, enter an integer value greater than or equal to 1.**

**Explanation**            The value you provided for the Control Number Minimum is not an integer.  
**Action**                    For the VDA standard, enter an integer value greater than or equal to 0. For other standards, enter an integer value greater than or equal to 1.

**invalid.message.minimum.value** – **The value you provided for the Control Number Minimum is not valid. For the VDA standard, enter a value greater than or equal to 0. For other standards, enter a value greater than or equal to 1.**

**Explanation**            The value you provided for the Control Number Minimum is not valid.  
**Action**                    For the VDA standard, enter a value greater than or equal to 0. For other standards, enter a value greater than or equal to 1.

**invalid.role**            **You cannot add or remove privileges for Trading Networks or My webMethods administrators. Contact your system administrator.**  
**Explanation**            You cannot add or remove privileges for Trading Networks or My webMethods administrators.  
**Action**                    Contact your system administrator.

**invalid.value.inputcontrol** – **The value you provided for the Control Number Minimum is not valid. Enter an integer value. For the VDA standard, enter a value greater than or equal to 0. For other standards, enter a value greater than or equal to 1.**

**Explanation**            The value you provided for the Control Number Minimum is not valid. Enter an integer value.  
**Action**                    For the VDA standard, enter a value greater than or equal to 0. For other standards, enter a value greater than or equal to 1.

**label.error.maxrowsexceededE – Number of records to fetch exceeds the maximum limit.**

**Explanation** Error occurred while trying to access Trading Networks dashboard because the number of records to fetch from the dashboard table (TransactionSummaryData table) exceeds the maximum limit.

**Action** Contact your system administrator to either purge records or specify a larger value for the tn.chart.fetchMaxRows property.

**missing.required.extended – The required extended field {1} of group {0} is missing. Provide a value for this extended field.**

**Explanation** The required extended field is missing.

**Action** Provide a value for this field.

**msg.badDateRange The start date is later than the end date. Correct the start date so that it occurs before the end date.**

**Explanation** The start date is later than the end date.

**Action** Correct the start date so that it occurs before the end date.

**msg.badDynamicData You submitted dynamic query criteria that are incomplete. Provide all expected elements for the dynamic query.**

**Explanation** The dynamic query criteria are incomplete.

**Action** Provide all expected elements for the dynamic query.

**msg.errSave The content viewer page size is empty or is not valid. Enter an integer value greater than zero.**

**Explanation** The content viewer page size is empty or is not valid.

**Action** Enter an integer value greater than zero.

**msg.maxReprocessDocuments – You cannot reprocess more than {0} documents. To change this limit, contact your system administrator.**

**Explanation** Reprocessing limit exceeded.

**Action** To change this limit, contact your system administrator.

**msg.maxResubmitDocuments** – You cannot resubmit more than {0} documents. To change this limit, contact your system administrator.

**Explanation** Resubmission limit exceeded.

**Action** To change this limit, contact your system administrator.

**name.is.required** You did not specify a queue name. Specify a queue name to proceed.

**Explanation** You did not specify a queue name.

**Action** Specify a queue name to proceed.

**no.data.set** My webMethods was unable to find the dataset for the specified ID. Log in to My webMethods again.

**Explanation** Unable to find the dataset for the specified ID.

**Action** Log in to My webMethods again.

**no.return.url** My webMethods could not navigate to the specified page because of a caching issue. Log in to My webMethods again.

**Explanation** My webMethods could not navigate to the specified page because of a caching issue.

**Action** Log in to My webMethods again.

**no.root.vailable.error** – The sample document used for creating the XML document type does not contain a Root tag. Provide a properly formatted document that contains a Root tag.

**Explanation** The sample document used for creating XML document type does not contain a Root tag.

**Action** Provide a properly formatted document that contains a Root tag.

**not.valid.document** You uploaded a sample document that is not valid. Provide a sample document with a valid root node.

**Explanation** You uploaded a sample document that is not valid.

**Action** Provide a sample document with a valid root node.

**optionsTab.check.duplicate.doc.error.msg** – You selected the "Check for Duplicate Document" option but did not specify a duplication service. Select a service.

**Explanation** You selected the "Check for Duplicate Document" option but did not specify a duplication service.

**Action** Select a service.

**partnerid.missing.message** – The partner ID is missing. Click here to go to the Partner Profiles page, and then specify a valid partner ID.

**Explanation** The partner ID is missing.

**Action** Click here to go to the Partner Profiles page, and then specify a valid partner ID.

**problem.AccessException** – You do not have permission to perform the requested action. Check with your system administrator.

**Explanation** You do not have permission to perform the requested action.

**Action** Request that your system administrator assign you the permission.

**problem.ConnectException** – My webMethods Server could not connect to the Trading Networks Server because that server is not available. Make sure the server is running on the specified host and port "{0}".

**Explanation** The specified Trading Networks server is not available.

**Action** Make sure the server is running on the specified host and port.

**problem.UnknownHostException** – My webMethods Server could not connect to the Trading Networks Server named "{0}" because that server is either not available or its host name is not recognized. Start the Trading Networks Server or specify a different server to connect to.

**Explanation** The specified Trading Networks server is not available.

**Action** Verify the host name of the Trading Networks Server.

**problem.noSelection** – You did not select any items to act on. Select one or more items and retry the action.

**Explanation** You did not select any items to act on.

**Action** Select one or more items and then retry the action.

**proc.rules.detailsno.server.error** – Trading Networks Server is not configured, or it is not available.

**Explanation** The configured Trading Networks instance may be down, or the system administrator may not have granted you permission to access the Trading Networks Server.

**Action** Make sure the server is running. If it is, contact the system administrator for permission to access the server.

**procrule.details.name.invalid.errorE – Invalid Processing rule name. Special characters are not allowed.**

**Explanation** Processing rule name cannot have special characters.

**Action** Provide a valid name for the processing rule.

**profile.externalid.required – You did not specify an external ID for this profile. Provide the external ID.**

**Explanation** You did not specify an external ID for this profile.

**Action** Provide an external ID.

**query.not.found.error – You uploaded a sample document that does not contain a valid root node. Provide a sample document with a valid root node.**

**Explanation** You uploaded a sample document that does not contain a valid root node.

**Action** Provide a sample document with a valid root node.

**query.not.match Your query does not match any of the nodes present in the sample document. Resubmit the query with a valid node.**

**Explanation** Your query does not match any of the nodes present in the sample document.

**Action** Resubmit the query with a valid node.

**role.is.required Permissions have not yet been granted to any roles. Grant permission(s) to at least one role on the Permissions tab.**

**Explanation** Permissions have not yet been granted to any roles.

**Action** On the Permissions tab, grant permission(s) to at least one role.

**rule.name.is.required – The dataset could not be created or updated because no dataset name was specified. Provide the dataset name.**

**Explanation** Dataset name not specified while creating or updating the dataset.

**Action** Enter the dataset name.

**std.version.trans.not.sel.error – You did not specify a standard, version, or transaction while creating the EDI document type. Select a standard, version, and transaction.**

**Explanation** You did not specify a standard, version, or transaction while creating the EDI document type.

**Action** Select a standard, version, and transaction.

**text.futuredate.validationE – Date selected cannot be in the future.**

**Explanation** Error occurred while trying to retrieve records from the TransactionSummaryData table because the date selected was a future date.

**Action** Select an appropriate date to view data.

**text.response.nodataI – No records found for the selected date.**

**tn.srvr.displayGroup – Trading Networks**

**tn.srvr.displayName – Server**

**tpa.details.agreementID.required.error – Agreement ID cannot be empty.**

**Explanation** Agreement ID is empty.

**Action** Provide an Agreement ID.

**tpa.details.controlnumber.notInteger – Control Number must be an integer. Provide an integer value.**

**Explanation** Control Number must be an integer.

**Action** Provide an integer value.

**tpa.details.profiles.required.error – Sender or Receiver fields cannot be empty.**

**Explanation** Sender or Receiver field is empty.

**Action** Specify Sender and Receiver.

**tree.load.error My webMethods encountered an error while loading the XML node tree. Click Upload to try loading the tree again.**

**Explanation** My webMethods Server encountered an error while loading the XML node tree.

**Action** Click Upload to try loading the tree again.

**updateFAStatus.errorMessage – Error in updating EDI FA status.**

**Explanation** Error in updating EDI FA status.

**Action** Take corrective action according to the error details.

**warn.noFileSelected** – No document was chosen for submission. Specify the file path to the document to be submitted.

**Explanation**            No document was chosen for submission.

**Action**                 Specify the file path to the document to be submitted.

## webMethods Social BPM Messages

---

<b>SBPAPIE0000</b>	<b>Could not establish session for {0} server. Status: {1}</b>
<b>Explanation</b>	Connection to the client failed.
<b>Action</b>	Check the connection settings for the client.
<b>SBPAPIE0001</b>	<b>Could not send the email. Enter the recipients' email address, subject, and message in their respective fields.</b>
<b>Explanation</b>	The values for the recipients' email address, subject, and message fields cannot be null or invalid.
<b>Action</b>	Make sure the email address, subject, and message fields are not empty.
<b>SBPAPIE0002</b>	<b>Could not send the email. Read the log file for more details.</b>
<b>Explanation</b>	The email address might be wrong or empty.
<b>Action</b>	Check the error details in the log file. Provide the correct email address.
<b>SBPAPIE0004</b>	<b>The remote resource, {0} did not return a valid session.</b>
<b>Explanation</b>	Client connection is not valid.
<b>Action</b>	Check the connection settings.
<b>SBPAPIE0005</b>	<b>{0} HTTP method is not supported.</b>
<b>Explanation</b>	Only GET, POST, PUT, and DELETE methods are supported.
<b>Action</b>	Use only GET, POST, PUT, or DELETE methods.

<b>SBPAPIE0006</b>	<b>You do not have the required privileges to view task data. Contact the Administrator.</b>
<b>Explanation</b>	Only users with the required privileges can view task data.
<b>Action</b>	Request the Administrator to provide you the privileges to view task data.
<b>SBPAPIE0007</b>	<b>Task ID cannot be null.</b>
<b>Explanation</b>	A valid Task ID is required.
<b>Action</b>	Provide a valid Task ID.
<b>SBPAPIE0008</b>	<b>At least one group is required if you set {groupByField=&lt;field&gt; / groupByTaskType = &lt;true&gt; parameter.</b>
<b>Explanation</b>	You cannot use groupByField or groupByTaskType when there are no groups.
<b>Action</b>	Use groupByField or groupByTaskType only when there are groups.
<b>SBPAPIE0009</b>	<b>Wrong operator specified for task list search.</b>
<b>Explanation</b>	The criteria for task list search is incorrect.
<b>Action</b>	Provide the correct search criteria.
<b>SBPAPIE0010</b>	<b>AppSpace not found. You might not have access to the AppSpace or the AppSpace might have been removed.</b>
<b>Explanation</b>	Either the Administrator might have removed the AppSpace or you do not have the privileges to view the AppSpace.
<b>Action</b>	Request the Administrator to verify the AppSpace availability or provide you the privileges to view the AppSpace.
<b>SBPAPIE0011</b>	<b>Invalid input. The JSON payload for the {0} is not valid.</b>
<b>Explanation</b>	The input to the RESTful service is invalid.
<b>Action</b>	Verify the JSON payload to the RESTful service.
<b>SBPAPIE0012</b>	<b>Avoid using reserved words for {0} name</b>
<b>Explanation</b>	The dashboard name should not contain programming keywords such as null or var.
<b>Action</b>	Do not use programming keywords in the dashboard name.

---

<b>SBPAPIE0013</b>	<b>Insufficient Privileges. You cannot view {0}.</b>
<b>Explanation</b>	You do not have the privileges to view the dashboard.
<b>Action</b>	Request the Administrator to provide you the privileges to view the dashboard.
<b>SBPAPIE0014</b>	<b>Insufficient Privileges. You cannot edit {0}.</b>
<b>Explanation</b>	You do not have the privileges to edit the dashboard.
<b>Action</b>	Request the Administrator to provide you the privileges to edit the dashboard.
<b>SBPAPIE0015</b>	<b>Insufficient Privileges. You cannot delete {0}.</b>
<b>Explanation</b>	You do not have the privileges to delete the dashboard.
<b>Action</b>	Request the Administrator to provide you the privileges to delete the dashboard.
<b>SBPAPIE0016</b>	<b>Insufficient Privileges. You cannot create {0}.</b>
<b>Explanation</b>	You do not have the privileges to create the dashboard.
<b>Action</b>	Request the Administrator to provide you the privileges to create the dashboard.
<b>SBPAPIE0017</b>	<b>Unable to remove the delegation. You cannot remove delegations done by other users.</b>
<b>Explanation</b>	You cannot remove delegations done by other users.
<b>Action</b>	Request the user who has delegated the task to remove the delegation.
<b>SBPAPIE0047</b>	<b>Cannot retrieve the preferences for {0}</b>
<b>Explanation</b>	Cannot retrieve the preference settings.
<b>Action</b>	Verify if the preferences set in Business Console are available.
<b>SBPAPII0003</b>	<b>Task ID not found.</b>
<b>Explanation</b>	The task instance is not available in the database.
<b>Action</b>	Request the Administrator to verify the task instance availability.
<b>SBPAPII0018</b>	<b>Invalid email</b>
<b>Explanation</b>	Cannot send task reminder to an invalid email.
<b>Action</b>	Provide a valid email.

<b>SBPAPII0019</b>	<b>Internal server error</b>
<b>Explanation</b>	Cannot send task reminder because of an internal server error.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0020</b>	<b>Integration Server connection error</b>
<b>Explanation</b>	Cannot connect to the Integration Server.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0023</b>	<b>AgileApps server connection error</b>
<b>Explanation</b>	Cannot connect to the AgileApps server.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0024</b>	<b>Failed to retrieve the 'isDelegated' property from task: {0}</b>
<b>Explanation</b>	Cannot retrieve the delegation status of the task.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0025</b>	<b>No delegation to remove. The task ID {0} is not delegated.</b>
<b>Explanation</b>	The task is not delegated to a user.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0027</b>	<b>Invalid input parameters</b>
<b>Explanation</b>	The input parameters specified for the AppSpace is not valid.
<b>Action</b>	Verify the input parameters.
<b>SBPAPII0028</b>	<b>The task {0} is not active.</b>
<b>Explanation</b>	You cannot set the status because the task is not active.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0029</b>	<b>Insufficient privileges</b>
<b>Explanation</b>	You do not have the privileges to perform this action.
<b>Action</b>	Request the Administrator to provide you the required privileges.

---

<b>SBPAPII0030</b>	<b>User, group, or role name is null or does not exist.</b>
<b>Explanation</b>	User, group, or role name is null or does not exist.
<b>Action</b>	Use a valid user, group, or role name.
<b>SBPAPII0031</b>	<b>Insufficient privileges. {0} does not have the privileges to add comments.</b>
<b>Explanation</b>	You do not have the privileges to add comments.
<b>Action</b>	Request the Administrator to provide you the privileges to add comments.
<b>SBPAPII0032</b>	<b>The task ID: {0} is not found.</b>
<b>Explanation</b>	The task ID is not found.
<b>Action</b>	Verify if the task ID is correct or contact the Administrator.
<b>SBPAPII0033</b>	<b>Profile picture not loaded</b>
<b>Explanation</b>	Cannot load the profile picture.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0034</b>	<b>Insufficient privileges. {0} cannot update the profile of {1}.</b>
<b>Explanation</b>	You do not have the privileges to update the profile.
<b>Action</b>	Request the Administrator to provide you the privileges to update the profile.
<b>SBPAPII0035</b>	<b>Cannot retrieve the file.</b>
<b>Explanation</b>	The file is not found.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0036</b>	<b>The Task Engine host: {0} not found.</b>
<b>Explanation</b>	The specified host name for the Task Engine is not found.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0037</b>	<b>Task Engine server connection error</b>
<b>Explanation</b>	Cannot connect to the Task Engine server.
<b>Action</b>	Contact the Administrator for resolving this error.

<b>SBPAPII0038</b>	<b>I/O exception in Task Engine: {0}</b>
<b>Explanation</b>	Cannot resolve the Task Engine URL.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0039</b>	<b>Exception in Task Engine: {0}</b>
<b>Explanation</b>	An error has occurred in Task Engine.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0040</b>	<b>Task definition URI error</b>
<b>Explanation</b>	Cannot resolve the task definition URI.
<b>Action</b>	Provide a valid task definition URI.
<b>SBPAPII0041</b>	<b>You are not logged on.</b>
<b>Explanation</b>	You must log on to perform the action.
<b>Action</b>	Log on to perform the action.
<b>SBPAPII0044</b>	<b>Invalid search</b>
<b>Explanation</b>	Search is not valid.
<b>Action</b>	Use valid search criteria.
<b>SBPAPII0045</b>	<b>Cannot sync {0} task types.</b>
<b>Explanation</b>	Cannot sync the indicated number of task types from Task Engine.
<b>Action</b>	Contact the Administrator for resolving this error.
<b>SBPAPII0046</b>	<b>Invalid URL: {0}</b>
<b>Explanation</b>	Cannot resolve the URL.
<b>Action</b>	Provide a valid URL.
<b>SBPCORI1046</b>	<b>Duration</b>

## Web Services Stack Messages

---

<b>WSSAPE0029</b>	<b>Failed to initialize argus configuration due to the following: {0}.</b>
<b>Explanation</b>	An argus configuration file is invalid or unavailable, or a WS_STACK_HOME variable is not set.
<b>Action</b>	Make sure that the WS_STACK_HOME environment variable is properly set. Check the path to the argus configuration file and make sure that the argus configuration file is valid and not empty.
<b>WSSAPE0030</b>	<b>Unknown user: {0}.</b>
<b>Explanation</b>	The user cannot be authenticated because the supplied username is not correct.
<b>Action</b>	Provide a valid username.
<b>WSSAPE0031</b>	<b>Unknown password callback type: {0}</b>
<b>Explanation</b>	Only UsernameToken authentication is supported. You use a different authentication mechanism.
<b>Action</b>	Provide a valid username and password.
<b>WSSAPE0032</b>	<b>An argus username is not configured in the argus agents properties file.</b>
<b>Explanation</b>	The entries in argus agents properties file must be initialized. The "wsstack.adminservice.user" property does not contain a valid value.
<b>Action</b>	Provide a valid, non-empty value for "wsstack.adminservice.user" property in the argus agents properties file.

<b>WSSARE0000</b>	<b>Login failed.</b>
<b>Explanation</b>	Authentication fails. Invalid or empty credentials provided.
<b>Action</b>	Provide valid, non-empty username and password.
<b>WSSARE0001</b>	<b>The following Web service archive does not comply with the naming standards: {0}. The archive is not deployed.</b>
<b>Explanation</b>	The artifact name and extension contain invalid characters or do not comply with the correct name format.
<b>Action</b>	Edit the current artifact to conform to the AAR standards. Rename the archive using a valid name. The '.aar' extension cannot contain capital letters.
<b>WSSARE0030</b>	<b>A problem occurred while executing a Web service. The Web service name is "{0}" with request payload "{1}".</b>
<b>Explanation</b>	There is a problem while executing the Web service.
<b>Action</b>	Make sure that the requested Web service is operational.
<b>WSSARI0027</b>	<b>Version information.</b>
<b>Explanation</b>	A version information label.
<b>Action</b>	None.
<b>WSSASE0000</b>	<b>Cannot find library jar file "{0}"</b>
<b>Explanation</b>	The message appears when Web Services Stack administration service is trying to locate the axis2-kernel jar but the file does not exist or its location cannot be determined.
<b>Action</b>	Assert that the reported file exists and it is not locked by another process on the system.
<b>WSSASE0009</b>	<b>Cannot find library directory "{0}"</b>
<b>Explanation</b>	The message appears when Web Services stack administration service is trying to locate the library directory with the jar files used by the Web Services Stack runtime.
<b>Action</b>	Assert that the reported path exists and it is a valid directory.
<b>WSSCLE0001</b>	<b>Deployment configuration file cannot be null.</b>
<b>Explanation</b>	A valid deployment configuration file was not specified or an empty value for deployment configuration file was provided.
<b>Action</b>	Specify a valid deployment configuration file.

---

<b>WSSCLE0002</b>	<b>[[0]] object cannot be null.</b>
<b>Explanation</b>	Deployment configurator is not initialized correctly and returns null.
<b>Action</b>	You must initialize the deployment configurator with a valid, non-empty deployment configuration file or valid deployment configuration properties.
<b>WSSCLE0003</b>	<b>The specified transport protocol [[0]] is not supported.</b>
<b>Explanation</b>	The transport protocol defined in the DeploymentConfigurator is not supported.
<b>Action</b>	Set HTTP or HTTPS transport in the DeploymentConfigurator.
<b>WSSCLE0004</b>	<b>Deployment configuration properties object cannot be null.</b>
<b>Explanation</b>	Valid deployment configuration properties are not specified or empty values for deployment configuration properties are provided.
<b>Action</b>	Specify valid, non-empty deployment configuration properties.
<b>WSSCLE0005</b>	<b>Problems while loading the deployment configuration from the file with the following location path: [[0]].</b>
<b>Explanation</b>	Deployment configuration cannot be loaded from the specified file.
<b>Action</b>	Check whether the provided configuration file is valid and whether its location path is correct.
<b>WSSCLE0006</b>	<b>"Servlet context" configuration is not found. The needed "servlet context" configuration is not set into the deployment configuration file.</b>
<b>Explanation</b>	The deployment configuration property that specifies the servlet context is not set into the deployment configuration file.
<b>Action</b>	Set the servlet deployment configuration property into the deployment configuration file.
<b>WSSCLE0007</b>	<b>"Host name" configuration is not found. The needed "host name" configuration is not set into the deployment configuration file.</b>
<b>Explanation</b>	The deployment configuration property hostname is not set into the deployment configuration file or the given value cannot be resolved.
<b>Action</b>	Set a valid, non-empty value for the hostname property into the deployment configuration file.

**WSSCLE0008**      **Unknown "host name" configuration found. You can find the needed "host name" configuration into the deployment configuration file.**

**Explanation**      The deployment configuration property hostname is set with a value that cannot be resolved.

**Action**            Set a valid, non-empty value for the hostname property into the deployment configuration file.

**WSSCLE0009**      **Invalid "port number" configuration found. You can find the needed "port number" configuration into the deployment configuration file.**

**Explanation**      In the deployment configuration property port is set an invalid value.

**Action**            Set a valid port property into the deployment configuration file.

**WSSCLE0010**      **Service name [{0}] for undeployment is invalid.**

**Explanation**      The Web service added for undeployment does not have a valid service name.

**Action**            Add a valid service name for the Web service that you want to undeploy.

**WSSCLE0011**      **Archive data unit must not be "null".**

**Explanation**      The archive file added for deployment is null or invalid.

**Action**            Add a valid archive file for deployment.

**WSSCLE0012**      **Failed to parse the configured [{0}] with value [{1}]. The default value [{2}] will be used.**

**Explanation**      The given value for maxConnectionsPerHost is invalid or cannot be processed. A default value will be used instead.

**Action**            Set a valid positive integer for the value of maxConnectionsPerHost. Otherwise, an alternative default value will be used.

**WSSCLE0013**      **Failed to parse the configured [{0}] with value [{1}]. The default value [{2}] will be used.**

**Explanation**      The given value for maxTotalConnections is invalid or cannot be processed. A default value will be used instead.

**Action**            Set a valid positive integer for the value of maxTotalConnections. Otherwise, an alternative default value will be used.

---

<b>WSSCLE0014</b>	<b>There are no archives added for deployment.</b>
<b>Explanation</b>	Web service archives are not added for deployment or undeployment.
<b>Action</b>	Add Web service archives for deployment or undeployment.
<b>WSSCLE0015</b>	<b>An error is thrown during the retrieval of the deployment result.</b>
<b>Explanation</b>	Deployment result cannot be retrieved because of an error while executing the remote operation.
<b>Action</b>	Check the connection to the server and the error log.
<b>WSSCLE0016</b>	<b>An error is thrown during the retrieval of the deployment result. The cause of the error is: {0}</b>
<b>Explanation</b>	Deployment result cannot be retrieved because of an error while executing the remote operation.
<b>Action</b>	Check the connection to the server and the error log.
<b>WSSCLE0017</b>	<b>The URI given for deployment is invalid. The passed value is [{0}].</b>
<b>Explanation</b>	The given URI for deployment is empty or the given value cannot be parsed as a URI reference.
<b>Action</b>	Provide a valid, non-empty URI for deployment.
<b>WSSCLE0018</b>	<b>The org.apache.commons.httpclient.HostConfiguration object passed is "null".</b>
<b>Explanation</b>	The HostConfiguration is empty.
<b>Action</b>	Check that the properties set for the host have valid, non-empty values and check the connection.
<b>WSSCLE0019</b>	<b>An error while deploying Web services occurs due to a problem while invoking the operation on the remote server . Reason: {0}.</b>
<b>Explanation</b>	An error occurs during the deployment. The services cannot be deployed.
<b>Action</b>	Check the error log for details.
<b>WSSCLE0020</b>	<b>An error while undeploying services occurs due to a problem while invoking the operation on the remote server. Reason: {0}.</b>
<b>Explanation</b>	An error occurs during undeployment. The services cannot be undeployed.
<b>Action</b>	Check the error log for details.

<b>WSSCLE0021</b>	<b>An error while listing the Web services occurs due to a problem while invoking the operation on the remote server. Reason: {0}.</b>
<b>Explanation</b>	An error occurs while listing services.
<b>Action</b>	Check the error log for details.
<b>WSSCLE0022</b>	<b>An error while listing properties occurs due to a problem while invoking the operation on the remote server. Reason: {0}.</b>
<b>Explanation</b>	An error occurs while listing properties.
<b>Action</b>	Check the error log for details.
<b>WSSCLE0023</b>	<b>The given keystore file {0} cannot be converted to a URL.</b>
<b>Explanation</b>	The given value for the keystore file cannot be parsed.
<b>Action</b>	Provide a valid, non-empty value for the keystore file and check its location path.
<b>WSSCLE0024</b>	<b>The given truststore file {0} cannot be converted to a URL.</b>
<b>Explanation</b>	The given value for the truststore file cannot be parsed.
<b>Action</b>	Provide a valid, non-empty value for the truststore file and check its location path.
<b>WSSCLE0025</b>	<b>The given proxy port with value [{0}] is invalid.</b>
<b>Explanation</b>	The value provided for a proxy port is not in the correct format.
<b>Action</b>	Provide a valid proxy port. If you do not want to use a proxy port do not set a value to it.
<b>WSSCLE0030</b>	<b>The WSDL definition cannot be null.</b>
<b>Explanation</b>	You have not specified a WSDL definition.
<b>Action</b>	Specify a valid, non-empty WSDL definition.
<b>WSSCLE0031</b>	<b>The WSDL URL cannot be null.</b>
<b>Explanation</b>	You have not specified a WSDL URL or you have provided a null or empty value.
<b>Action</b>	Specify a valid, non-empty WSDL URL.

---

<b>WSSCLE0032</b>	<b>The constructor is not found.</b>
<b>Explanation</b>	You did not provide a valid constructor for the class.
<b>Action</b>	Check the parameters you used. One or more of them are not suitable for the class. Use one of the available constructors for instantiating the class.
<b>WSSCLE0033</b>	<b>This action is not supported.</b>
<b>Explanation</b>	You are trying to use functionality that is not yet implemented.
<b>Action</b>	This action is not supported. Contact Software AG Global Support.
<b>WSSCLE0034</b>	<b>Service [{0}] is not found.</b>
<b>Explanation</b>	The service with the specified name [{0}] is not available.
<b>Action</b>	Check the service name.
<b>WSSCLE0035</b>	<b>Problem getting the WSDL, HTTP error code: {0}.</b>
<b>Explanation</b>	The operation for getting the WSDL encounters a problem.
<b>Action</b>	Check the causes for the HTTP status error code.
<b>WSSCLE0036</b>	<b>Cannot apply Web service client policy.</b>
<b>Explanation</b>	Policy cannot be applied to the description hierarchy.
<b>Action</b>	Check and validate the configuration and the policy.
<b>WSSCLE0037</b>	<b>Cannot locate the security configuration file "{0}" specified in the axis2 configuration under the key "securityConfigFile".</b>
<b>Explanation</b>	The specified configuration security in the axis2 configuration file cannot be found. The properties cannot be loaded.
<b>Action</b>	If you want to load security properties from a custom security configuration file it must be placed in the proper place. The file is searched as defined in axis2 configuration under the key "securityConfigFile". Check the path and the file name.
<b>WSSCLE0038</b>	<b>Cannot close security configuration file properly.</b>
<b>Explanation</b>	An error occurs during close operation of the security configuration file.
<b>Action</b>	None.

<b>WSSCLE0039</b>	<b>The WSDL file or WSDL definition cannot be found.</b>
<b>Explanation</b>	In order to extract policies, either the WSDL location or the WSDL4J definition object must be valid. They are both missing or empty.
<b>Action</b>	Provide either a WSDL file or a valid WSDL definition.
<b>WSSCLE0040</b>	<b>The class of the supplied callback must extend org.apache.axis2.client.async.Callback.</b>
<b>Explanation</b>	The class of the supplied callback does not extend org.apache.axis2.client.async.Callback. It cannot be used.
<b>Action</b>	Provide a valid callback class.
<b>WSSCLE0041</b>	<b>Failed to create a new client factory instance.</b>
<b>Explanation</b>	Client factory instance cannot be created because the class cannot be found or instantiated.
<b>Action</b>	Check the configuration and the validity of the used constructor.
<b>WSSCLE0042</b>	<b>Failed to create new client factory instance.</b>
<b>Explanation</b>	The supplied factory class name argument does not resolve to a valid com.softwareag.wsstack.client.api.AbstractClientFactory implementation. Client factory instance cannot be created because the class name argument is not a com.softwareag.wsstack.client.api.AbstractClientFactory implementation.
<b>Action</b>	Give a fully qualified name of the factory implementation class that is going to be instantiated.
<b>WSSCLE0043</b>	<b>Output stream cannot be null.</b>
<b>Explanation</b>	The given output stream is not initialized or empty.
<b>Action</b>	Give a valid, non-empty output stream.
<b>WSSCLE0044</b>	<b>Policy input stream cannot be null.</b>
<b>Explanation</b>	The given policy input stream is not initialized or empty.
<b>Action</b>	Give a valid, non-empty policy input stream.

---

<b>WSSCLE0045</b>	<b>Failed to close the WSDL input stream after reading.</b>
<b>Explanation</b>	The close operation for the used WSDL input stream did not finish successfully.
<b>Action</b>	None.
<b>WSSCLE0046</b>	<b>The provided content is too large to be buffered: {0} bytes.</b>
<b>Explanation</b>	The content exceeds the maximum possible value that can be buffered.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSCLE0047</b>	<b>Cannot create DataObject for type {0}.</b>
<b>Explanation</b>	The requested type {0} cannot be identified.
<b>Action</b>	The used data type is not supported. Use an alternative data type.
<b>WSSCLE0048</b>	<b>Failed to create a wsstack client instance out of the following class: "{0}".</b>
<b>Explanation</b>	A client instance cannot be created because the class cannot be found or instantiated.
<b>Action</b>	Check whether the name of the used class is correct.
<b>WSSCLE0049</b>	<b>Failed to create a wsstack client instance. The class "{0}" is not a valid IWSBasicClient implementation.</b>
<b>Explanation</b>	The defined class exists but its usage is incorrect. The class "{0}" cannot be used for instantiating a wsstack client because it is not a valid IWSBasicClient implementation.
<b>Action</b>	Define a valid implementation class.
<b>WSSCLE0050</b>	<b>The services are not added for undeployment</b>
<b>Explanation</b>	Web service archives are not added for undeployment.
<b>Action</b>	Add service archives for undeployment.
<b>WSSCLE0051</b>	<b>The WS-Stack Java version is older than the Java version of the compiled archive "{0}".</b>
<b>Explanation</b>	You compiled your archive with a newer Java version than the available in WS-Stack. The service cannot be deployed successfully.
<b>Action</b>	Compile the archive with an older Java version. You can check the supported Java version in the validation page of WS-Stack listed as java.version.

<b>WSSCLE0052</b>	<b>There is a corrupted Java class file in the following archive: "{0}".</b>
<b>Explanation</b>	One or more of the class files in the archive is corrupted or it is not a valid Java class file.
<b>Action</b>	Check the classes in your archive. Compile them with a supported Java version in WS-Stack and deploy the archive again.
<b>WSSCLE0053</b>	<b>An error occurred while reading the archive "{0}"; the archive is corrupted or empty.</b>
<b>Explanation</b>	The archive that you want to deploy is not valid. It may be empty or cannot be read.
<b>Action</b>	Check and validate the content of archive "{0}". You may need to repack the content and deploy it again.
<b>WSSCLE0054</b>	<b>An error occurred while manipulating the archive "{0}". The archive is locked or another Input/Output related problem has occurred.</b>
<b>Explanation</b>	Other processes locked the archive and it cannot be processed or an Input/Output related problem has interrupted the execution of the command.
<b>Action</b>	Deploy the archive again.
<b>WSSCLE0056</b>	<b>Cannot configure client factory thread pool.</b>
<b>Explanation</b>	The error occurs when the WSSStack client factory tries to configure a client instance to use a thread pool, and the client already has a thread pool set.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSCLE0057</b>	<b>The specified attachment lifecycle manager instance is not valid.</b>
<b>Explanation</b>	The error occurs when the WSSStack client factory configures a client instance to use an attachment lifecycle manager set by the user, and the specified lifecycle manager property is not a valid instance of <code>org.apache.axiom.attachments.lifecycle.LifecycleManager</code> .
<b>Action</b>	Specify a valid instance of " <code>org.apache.axiom.attachments.lifecycle.LifecycleManager</code> " under the client factory property key " <code>attachmentsLifecycleManager</code> ".
<b>WSSCLE0058</b>	<b>Cannot configure attachment lifecycle manager for a client instance.</b>
<b>Explanation</b>	The error occurs when the Web Services Stack client factory configures a client instance to use a specific attachment lifecycle manager set by the user. Essentially, the error occurs when the attachment lifecycle parameter is locked.
<b>Action</b>	Contact Software AG Global Support.

---

<b>WSSCLE0059</b>	<b>The supplier object (an instance of {0}) is not a proxy instance.</b>
<b>Explanation</b>	The Web Services Stack client registry API provides a utility for retrieving the internal client configuration from a Web service proxy object. This error indicates that the tool is being used with a wrong proxy implementation (it is not a WSS compliant Web service client proxy).
<b>Action</b>	Modify your client implementation as the utility is used only with proxies created by the Web Services Stack registry API.
<b>WSSCLI0000</b>	<b>Unable to locate the default security configuration file "{0}".</b>
<b>Explanation</b>	The default security configuration file cannot be found and its properties are not loaded.
<b>Action</b>	If you want to load security properties from the default security configuration file, the file must be placed in the proper directory. The default security configuration file name is "wsclientsec.properties" and it must be either in the current working directory, or in "<REPOSITORY_DIRECTORY>/conf".
<b>WSSCLI0026</b>	<b>An XMLStreamException thrown.</b>
<b>Explanation</b>	The close operation for the used XMLStreamWriter did not finish successfully.
<b>Action</b>	None.
<b>WSSCLW0027</b>	<b>Unable to locate the default security configuration file: "{0}".</b>
<b>Explanation</b>	The default security configuration file cannot be found. Its properties are not loaded.
<b>Action</b>	If you want to load security properties from the default security configuration file you must put it in the proper place. The file is searched on the following location: "{0}".
<b>WSSCLW0028</b>	<b>The service policy is not set; cannot write service policy to the given stream.</b>
<b>Explanation</b>	The service policy is not set.
<b>Action</b>	To associate a policy, use one of the setPolicy methods first.
<b>WSSCLW0029</b>	<b>Overwriting an existing policy.</b>
<b>Explanation</b>	This is an existing policy and it is going to be overwritten.
<b>Action</b>	Do not use this method if you expect different behavior.

**WSSCLW0055**      **The parameters for max connections settings passed to configure the connection manager, associated with the HttpClient, caused a problem.**

**Explanation**      The default parameters will be used for the non-standard ones. \n  
 MAX\_HOST\_CONNECTIONS parameter passed is "{0}". \n  
 MAX\_TOTAL\_CONNECTIONS parameter passed is "{1}".

**Action**            None.

**WSSCME0001**      **Key value cannot be null or empty**

**Explanation**      The error appears when you prepare configuration properties parser of a security module. This implementation is used only in private constructors and therefore the error appears only if a severe implementation fault occurs.

**Action**            The error indicates a severe fault in the Web Services Stack implementation. If the error occurs, report it to the software development team.

**WSSCME0002**      **Rampart configuration element value cannot be null or empty**

**Explanation**      The message appears in an application program interface (API) method and reflects to an error in the implementation. The error appears when you update the security module configuration. It shows that you did not provide configuration to the update process.

**Action**            When you call a  
 WSCliientSecurityProperty#updateRampartConfigElement(OMEElement, String) the implementation ensures that the given OMEElement argument is not null or empty. Specify a valid entry for the OMEElement.

**WSSCME0003**      **Invalid value is configured for time-to-live timestamp: "{0}"**

**Explanation**      The configured time-to-live value for the timestamp used by the security module is invalid. The system expects an integer as a configuration value.

**Action**            Security module configuration for timestamp time-to-live must be an integer.

**WSSCME0004**      **Invalid value is configured for max skew timestamp: "{0}"**

**Explanation**      The configured max skew value for the timestamp used by the security module is invalid. The system expects an integer as a configuration value.

**Action**            Security module configuration for timestamp max skew must be an integer.

---

<b>WSSCME0005</b>	<b>Property name cannot be null or empty</b>
<b>Explanation</b>	You updated the security module configuration and did not specify a property for update.
<b>Action</b>	The error indicates a severe fault in the Web Services Stack implementation. If the error occurs, report it to the software development team.
<b>WSSCME0009</b>	<b>Rampart configuration assertion update error</b>
<b>Explanation</b>	The error occurs when xml serialization of an existing rampart configuration assertion fails. Prior to the update, the configuration assertion is serialized to stax stream and parsed with axiom. An invalid rampart configuration assertion can cause the error.
<b>Action</b>	If you configure the rampart configuration assertion manually, an invalid configuration can cause the error. Use the Web Services Stack configuration properties instead of providing manual configuration.
<b>WSSCME0019</b>	<b>Failed to decode the basic authentication header.</b>
<b>Explanation</b>	Web Services Stack security utility failed to decode the received HTTP Basic authentication header. The header should be encoded with base64 encoding. The error suggests that an illegal character (non-ASCII) was found within the header value.
<b>Action</b>	Make sure the http client sends an HTTP basic authentication header properly encoded in base64 encoding.
<b>WSSCMI0000</b>	<b>Cannot recognize the security configuration key "{0}"; the key is ignored.</b>
<b>Explanation</b>	Rampart configuration updater searches through the client options and dynamic service parameters for keys that refer to the security module configuration. The message is logged when it encounters an unrecognized key. For example, a general purpose key that does not control Rampart specific configuration.
<b>Action</b>	None.
<b>WSSCMW0020</b>	<b>Axis2 configuration file: '{0}' does not exist. Password change will be disabled.</b>
<b>Explanation</b>	The axis2 configuration file is missing. This disables the password change functionality.
<b>Action</b>	Contact Software AG global support.
<b>WSSCMW0021</b>	<b>Axis2 configuration file: '{0}' cannot be written. Password change will be disabled.</b>
<b>Explanation</b>	The axis2 configuration file cannot be written. This disables the password change functionality.
<b>Action</b>	Ensure that you can write in the axis2 configuration file.

<b>WSSCMW0022</b>	<b>Axis2 configuration URL '{0}' does not denote a valid file path. Password change will be disabled.</b>
<b>Explanation</b>	The path to the axis2 configuration file is invalid.
<b>Action</b>	Ensure that the URL to the axis2 configuration file is valid and that it is using file protocol.
<b>WSSCMW0023</b>	<b>AxisConfiguration instance does not have a valid configuration file URL set. Password change will be disabled.</b>
<b>Explanation</b>	AxisConfiguration is missing.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSCMW0025</b>	<b>Failed to close input stream to Axis2 configuration file: {0}</b>
<b>Explanation</b>	Internal error. Cannot change the axis2 configuration.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSCMW0026</b>	<b>Failed to close output stream to Axis2 configuration file: {0}</b>
<b>Explanation</b>	Internal error. Cannot change the axis2 configuration.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSDAE0000</b>	<b>Unsupported algorithm exception: {0}</b>
<b>Explanation</b>	A particular cryptographic algorithm is requested but is not available in the environment.
<b>Action</b>	Ensure that you have enabled unlimited strength JCE (Java Cryptographic Extension) on your machine. If you already have it enabled, contact Software AG Global Support.
<b>WSSDAE0016</b>	<b>Keystore exception: {0}</b>
<b>Explanation</b>	Keystore file can not be processed.
<b>Action</b>	Ensure that the keystore file is not corrupted and all required certificates are available in it.
<b>WSSDAE0017</b>	<b>Key management exception: {0}</b>
<b>Explanation</b>	Keystore file can not be processed.
<b>Action</b>	Ensure that the keystore file is not corrupted and all required certificates are available in it.

---

<b>WSSDAE0018</b>	<b>I/O error reading keystore/truststore file: {0}</b>
<b>Explanation</b>	Keystore file can not be processed.
<b>Action</b>	Ensure that the keystore file is available in the particular location.
<b>WSSDIE0000</b>	<b>Invalid or unsupported service scope set to AxisService: {0}.</b>
<b>Explanation</b>	The message appears when a service with an invalid scope is created or accessed. The following scopes are supported by Web Services Stack: application; transportsession; soapsession; request.
<b>Action</b>	Recreate your service using one of the following scopes: application; transportsession; soapsession; request.
<b>WSSDIE0001</b>	<b>Cannot create valid policy manager factory implementation.</b>
<b>Explanation</b>	The abstract policy manager factory fails to instantiate the default policy manager factory instance. The default factory implementation class is either not available or the user does not have permissions to access it.
<b>Action</b>	Ensure that the wsstack deployer-impl-[VERSION].jar is available on the classpath and the user who starts the java process has the proper permissions to access it.
<b>WSSDIE0002</b>	<b>Cannot create valid policy repository factory implementation.</b>
<b>Explanation</b>	The abstract policy repository factory fails to instantiate the default policy repository factory instance. The default factory implementation class is either not available or the user does not have permissions to access it.
<b>Action</b>	Ensure that the wsstack deployer-impl-[VERSION].jar is available on the classpath and that the user who starts the java process has the proper permissions to access it.
<b>WSSDIE0003</b>	<b>Cannot close a policy stream after parsing it.</b>
<b>Explanation</b>	Policy supplier cannot close the policy stream after parsing it.
<b>Action</b>	Ensure that the stream source is available and it is not locked by another process.
<b>WSSDIE0004</b>	<b>Cannot initialize the local policy repository; the axis configuration is not available.</b>
<b>Explanation</b>	Axis runtime configuration is not available to the policy repository. This means that the code is not executed in a properly initialized runtime.
<b>Action</b>	Ensure that you access the policy repository inside a properly initialized and started wsstack runtime.

<b>WSSDIE0005</b>	<b>Cannot create an invalid policies directory; the policy repository is null.</b>
<b>Explanation</b>	Invalid policies are automatically moved to a directory inside the policy repository. If the policy repository directory is not available, the invalid policies directory cannot be created.
<b>Action</b>	Ensure that the policy repository is properly initialized.
<b>WSSDIE0006</b>	<b>Duplicate policy ID; the policy file is moved to {0}.</b>
<b>Explanation</b>	The system detects that a policy is deployed with an ID that already exists in the policy repository. The new policy is moved to the invalid policies directory.
<b>Action</b>	When you deploy a policy, ensure that a policy with the same ID does not exist in the repository.
<b>WSSDIE0007</b>	<b>Cannot verify module support for a policy with the following ID: {0}.</b>
<b>Explanation</b>	The policy repository cannot verify whether a policy is supported (all assertions in it are recognized and there are modules deployed in the runtime that handle those assertions). The error occurs when the policy is invalid and/or does not contain any assertions.
<b>Action</b>	Ensure that the verified policy is valid and contains valid policy assertions.
<b>WSSDIE0008</b>	<b>Policy with the following key: {0} exists in the repository.</b>
<b>Explanation</b>	The policy repository contains a policy with the same ID as the policy that is deployed and the "updateIfPresent" flag is set to false.
<b>Action</b>	Ensure that the policy does not contain a policy with the same ID as the deployed one or set the flag "updateIfPresent" to true; that enables the update of the existing policy in the repository.
<b>WSSDIE0009</b>	<b>An error occurred during policy deployment.</b>
<b>Explanation</b>	An unexpected error occurs during policy deployment.
<b>Action</b>	Contact Software AG Global Support
<b>WSSDIE0010</b>	<b>The given policy does not contain any policy alternatives.</b>
<b>Explanation</b>	Cannot verify the policy against modules that support it because it does not contain any policy alternatives.
<b>Action</b>	Ensure that the deployed policy is valid and contains at least one policy alternative.

---

<b>WSSDIE0011</b>	<b>Cannot find a module to process the following assertion: {0}</b>
<b>Explanation</b>	There is no module deployed in the wsstack runtime that supports the given assertion.
<b>Action</b>	If the assertion requires additional processing by a specific module, ensure that the corresponding module is deployed on the wsstack runtime.
<b>WSSDIE0012</b>	<b>The following module: {0}; cannot process the assertion: {1}.</b>
<b>Explanation</b>	Although the module is registered to handle a certain policy assertion namespace, the module does not support the particular assertion.
<b>Action</b>	Ensure that the policy and all of its assertions are valid and can be processed by the module.
<b>WSSDIE0013</b>	<b>Cannot find a policy with the specified ID: {0}.</b>
<b>Explanation</b>	You are searching for a policy ID that is not available in the policy repository.
<b>Action</b>	Ensure that the policy you use is deployed to the policy repository.
<b>WSSDIE0014</b>	<b>The policy XML does not contain an ID, or a name that can be associated with the ID.</b>
<b>Explanation</b>	When a policy is deployed to the policy repository, the repository attempts to parse it and get its ID, or its name if an ID is not available. The ID or name afterward is used as a key for retrieving the policy from the repository. If there is no ID or a name in the policy XML, the repository cannot deploy it.
<b>Action</b>	Ensure that the policy XML that is deployed in the repository has either a valid (not empty) ID or a valid (not empty) name so that it can be deployed.
<b>WSSDIE0015</b>	<b>Cannot find an element with the following name: {0} and the following namespace: {1} in the policy input stream; the policy document is invalid.</b>
<b>Explanation</b>	When a policy is deployed to the policy repository, the repository attempts to parse it and get its ID, or its name if an ID is not available. The ID or name is used afterward as a key for retrieving the policy from the repository. If there is no ID or a name in the policy XML the repository cannot deploy it.
<b>Action</b>	Ensure that the policy XML includes a name or a wsu:Id attribute declared.
<b>WSSDIE0016</b>	<b>An exception occurs while trying to parse the policy input stream.</b>
<b>Explanation</b>	The policy repository fails to parse the policy XML stream.
<b>Action</b>	Assert that the deployed policy source is a valid XML.

<b>WSSDIE0017</b>	<b>Cannot close policy file input stream.</b>
<b>Explanation</b>	The policy repository cannot close policy stream after reading it.
<b>Action</b>	Ensure that the policy source is available.
<b>WSSDIE0018</b>	<b>Cannot initialize local policy repository; the following repository path is incorrect: "{0}".</b>
<b>Explanation</b>	When the policy repository is initialized it tries to create its directory or use the one that exists. This error occurs when the repository path exists on the file system but it is not a directory.
<b>Action</b>	Ensure that the repository path is a directory on the file system or does not exist (so that the policy repository can create it). Alternatively, you can configure another repository path if the configured one cannot be used.
<b>WSSDIE0019</b>	<b>Cannot move the following invalid policy file: "{0}"; to the invalid policies directory.</b>
<b>Explanation</b>	The policy repository detects that an invalid policy is deployed. The repository cannot move the invalid policy into the invalid policies directory.
<b>Action</b>	Ensure that you deploy a valid XML policy.
<b>WSSDIE0020</b>	<b>Cannot load a policy file during policy repository initialization.</b>
<b>Explanation</b>	The policy repository fails to deploy a problematic policy file.
<b>Action</b>	Ensure that the policy files in the policy repository are valid XML policies.
<b>WSSDIE0021</b>	<b>Cannot initialize local policy repository; the following repository path: "{0}" does not exist and cannot be created.</b>
<b>Explanation</b>	While the policy repository is initialized it checks whether the repository directory exists and if it does not, the repository attempts to create it. This message shows that the creation of the directory fails. The policy repository is not functional.
<b>Action</b>	Ensure that either the repository directory exists or the user who starts the java processes is authorized to create it.
<b>WSSDIE0022</b>	<b>Cannot initialize a local policy repository; the following repository path is incorrect: "{0}".</b>
<b>Explanation</b>	When the policy repository is initialized it tries to determine the repository directory path but it fails. The reason is that the code is not invoked inside an initialized wsstack runtime or the wsstack repository directory is not available (in case if a URL configurator is used, for example).
<b>Action</b>	Ensure that either the wsstack repository directory is available or configure a specific directory to be used as a policy repository directory.

---

<b>WSSDIE0023</b>	<b>Cannot create a default policy supplier object; the following policy file: "{0}" is not a valid file.</b>
<b>Explanation</b>	The file argument of the policy file that is deployed through a default policy supplier is either null or does not exist.
<b>Action</b>	When you deploy a file through the default policy supplier, ensure that the policy file exists on the file system at the time it is detected by the policy repository.
<b>WSSDIE0024</b>	<b>The following policy file does not exist: "{0}".</b>
<b>Explanation</b>	When a policy stream is retrieved through a default policy supplier instance, the policy file that is used by the supplier is not available.
<b>Action</b>	Ensure that the file with the policy you try to access is available in the policy repository.
<b>WSSDIE0025</b>	<b>Policy repository location must not be null.</b>
<b>Explanation</b>	Policy repository path is not available and therefore the default policy supplier cannot be created since it cannot store the policy in the repository.
<b>Action</b>	Ensure that the policy repository is properly initialized.
<b>WSSDIE0026</b>	<b>Cannot copy a policy to the repository.</b>
<b>Explanation</b>	When a policy stream is deployed through the default policy supplier, the supplier attempts to store the policy in repository directory. However, the copy procedure of the policy file to the repository directory fails.
<b>Action</b>	Ensure that the user who starts the java process is authorized to write to the policy repository directory. Another reason for the error is that the stream is closed before policy file is copied.
<b>WSSDIE0027</b>	<b>An error occurred during policy deployment while trying to close the file output stream.</b>
<b>Explanation</b>	A policy stream is deployed in the policy repository through a default policy supplier instance. While storing the stream to the policy repository directory, the supplier fails to close the original stream. However, the policy XML is successfully stored in the repository and the policy is effectively deployed.
<b>Action</b>	None.
<b>WSSDIE0028</b>	<b>The following policy repository does not exist and cannot be created: {0}.</b>
<b>Explanation</b>	The policy repository directory does not exist and cannot be created.
<b>Action</b>	Ensure that the policy repository is properly initialized. Ensure that the user who starts the java process is authorized to write in the specified repository directory.

<b>WSSDIE0029</b>	<b>Failed to delete a policy file.</b>
<b>Explanation</b>	A policy file deployed through a default policy supplier cannot be deleted.
<b>Action</b>	Ensure that the policy file is not locked by another process.
<b>WSSDIE0138</b>	<b>Cannot assign a policy to a service; a policy with the following ID cannot be found: "{0}".</b>
<b>Explanation</b>	The policy manager is requested to assign a policy to a certain service but the policy denoted by the supplied policy ID cannot be found in the policy repository.
<b>Action</b>	Ensure that the policy you attach exists in the policy repository.
<b>WSSDIE0144</b>	<b>Unsupported IDynamicDescription implementation; the WSPolicyManager implementation works only with dynamic description instances of type {0} but {1} is available.</b>
<b>Explanation</b>	Encountered an unrecognized dynamic description instance. Web Services Stack policy manager is intended to work with a specific implementation of the underlying dynamic description.
<b>Action</b>	If you use the default Web Services Stack policy manager, implement your dynamic assets so that they extend the default implementation of the deployer API.
<b>WSSDIE0158</b>	<b>Service {0} does not use a standard deployment classloader; the resource jar is not appended to the classpath of the classloader.</b>
<b>Explanation</b>	Service resource jar cannot be added to the service classpath. The service class loader is not an instance of org.apache.axis2.deployment.DeploymentClassLoader.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSDIE0162</b>	<b>The method can be called on a deployed unit only.</b>
<b>Explanation</b>	The boolean isEngaged(String, boolean) method is called on an AxisDescription instance that has not been deployed on the Web Services Stack runtime yet. Therefore, it has no AxisConfiguration instance associated with it.
<b>Action</b>	Assert that the isEngaged module check is invoked on the deployed instance.
<b>WSSDIE0164</b>	<b>Web Services Stack policy manager failed to update or remove policy from associated services when handling a "policy file deleted" event fired by the policy repository due to: "{0}".</b>
<b>Explanation</b>	By default, the Web Services Stack policy manager is registered as a policy repository listener so it is notified when the policy repository detects that a policy file has been deleted. When such an event is received the policy manager attempts to remove the deleted policy from any associated attachment points (services, operations, or messages) and in the course of these actions the error occurs.
<b>Action</b>	This is an internal error. Contact Software AG Global Support.

---

<b>WSSDIE0165</b>	<b>Web Services Stack policy manager fails to update or remove policy from associated services when handling a "policy file updated" event fired by the policy repository due to: "{0}".</b>
<b>Explanation</b>	By default, the Web Services Stack policy manager is registered as a policy repository listener so it is notified when the policy repository detects that a policy file has been updated. When such an event is received the policy manager attempts to remove the policy from any associated attachment points (services, operations, or messages) in case the new policy has a different ID. If the new policy has the same ID as the previously deployed one (true update) it tries to refresh the policy attached to the respective subjects. In the course of these actions the error occurs.
<b>Action</b>	This is an internal error. Contact Software AG Global Support.
<b>WSSDIE0166</b>	<b>Cannot deploy policy file "{0}" as the policy is invalid. A file with name "{0}" already exists in the invalid policies directory. The existing file is overwritten.</b>
<b>Explanation</b>	You try to deploy more than once an invalid policy. A policy file with the same name already exists in the directory, in which invalid policies are maintained. The existing file is overwritten with the new one (the file is updated).
<b>Action</b>	Check the policy you want to deploy.
<b>WSSDIE0167</b>	<b>The policy ID or name is invalid. The policy is not deployed.</b>
<b>Explanation</b>	The policy ID or name, if available, cannot contain whitespace characters inside. If whitespace characters are found inside, the policy is considered invalid and the policy file is moved to the invalid folder.
<b>Action</b>	Check the policy ID or name for whitespace characters and remove them, if any.
<b>WSSDIE0168</b>	<b>Cannot deploy policy "{0}"; the policy is invalid and cannot be processed.</b>
<b>Explanation</b>	There is a problem while processing the policy. The policy file is corrupted or the XML is invalid.
<b>Action</b>	Check and validate the policy XML, check for typographical errors, and so on. Finally, deploy the policy again.
<b>WSSDIE0169</b>	<b>Failed to roll back disengage of the following module: {0}.</b>
<b>Explanation</b>	An error occurs while disengaging modules, the system attempts to re-engage them but the corresponding module fails.
<b>Action</b>	Contact Software AG Global Support.

<b>WSSDIE0170</b>	<b>Failed to disengage module {0}. Reason: {1}</b>
<b>Explanation</b>	While removing policy components for the current DynamicDescription instance, the system attempts to disengage a referenced module but it fails.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSDIE0171</b>	<b>Exceptions must not be generated when skipping module disengagement.</b>
<b>Explanation</b>	Policy cleanup must not generate any exceptions if module disengagement argument is not set.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSDIE0172</b>	<b>Cannot refresh services after the "{0}" policy is updated due to the following: "{1}".</b>
<b>Explanation</b>	Web Services Stack policy manager is automatically updating policy subjects upon a policy update with a certain ID. The update fails when applying the new policy to the subjects.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSDIE0173</b>	<b>Failed to create a dynamic deployer instance.</b>
<b>Explanation</b>	The exception occurs while trying to initialize the default policy manager instance and it fails to initialize the dynamic deployer. This happens when no valid Axis configuration is found.
<b>Action</b>	Ensure that the code is running in properly started and initialized Web Services Stack runtime.
<b>WSSDIE0174</b>	<b>Cannot clean policy of the following Web service: "{0}".</b>
<b>Explanation</b>	The policy manager failed to remove policies for the given Web service. Generally, the exception is generated when the disengageModules flag is set to true. However, this is not what causes the problem in this invocation.
<b>Action</b>	Redeploy your Web service.
<b>WSSDIE0175</b>	<b>Cannot clean policy of the Web service "{0}" operation "{1}".</b>
<b>Explanation</b>	The policy manager failed to clean the policy on the given operation of the given Web service. Generally, the exception is thrown only when the disengageModules flag is set to true. However, this is not what causes the problem in this invocation.
<b>Action</b>	Redeploy your Web service.

---

<b>WSSDIE0176</b>	<b>Cannot clean message policy for service "{0}" operation "{1}".</b>
<b>Explanation</b>	The policy manager failed to clean the message policy on the given operation of the given service. Generally, the exception is thrown only when the disengageModules flag is set to true. However, this is not what causes the problem in this invocation.
<b>Action</b>	Redeploy your Web service.
<b>WSSDIE0178</b>	<b>Failed to retrieve the following service group after persisting and redeploying it: "{0}".</b>
<b>Explanation</b>	The Dynamic deployer API was used to persist a service group but after redeploying the service group could not be found in Web Services Stack runtime. A possible cause for the error is a problem during the deployment.
<b>Action</b>	Ensure that the service group file or directory is not locked, and the current user has the credentials to write to it. Redeploy your Web service manually.
<b>WSSDIE0179</b>	<b>Exception occurs while trying to obtain policy manager instance and the policy manager cannot be notified about redeployed Web services.</b>
<b>Explanation</b>	When a service is persisted the Web Services Stack runtime undeploys and redeploys it again. That makes any references kept to the previous Web service invalid. Since the policy manager keeps associations between policies and attachment points (such as Web services) it needs to be notified to synchronize its cache.
<b>Action</b>	The system is automatically recovered but the policy manager's cached association for the updated Web services are lost.
<b>WSSDIE0180</b>	<b>Failed to retrieve the following Web service "{0}" after persisting and redeploying it.</b>
<b>Explanation</b>	The Dynamic deployer API was used to persist a Web service but after redeploying the Web service cannot be found in the Web Services Stack runtime. A possible cause for the error is a problem during the deployment.
<b>Action</b>	Ensure that the Web service file or directory is not locked and the current user has permissions to write to it. Redeploy your Web service manually.
<b>WSSDIE0181</b>	<b>Web Services Stack policy engine failed to parse the deployed policy.</b>
<b>Explanation</b>	An exception occurred while the policy engine was processing a freshly deployed policy. Most probably the policy xml is invalid.
<b>Action</b>	Correct the policy xml and redeploy it.

<b>WSSDIE0184</b>	<b>Security exception during fetch of class field.</b>
<b>Explanation</b>	This is an internal error caused by an API inconsistency.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSDIE0185</b>	<b>Unreachable field with name {0} in class {1}</b>
<b>Explanation</b>	This is an internal error caused by an API inconsistency.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSDIE0186</b>	<b>Illegal argument: engageModules passed to method.</b>
<b>Explanation</b>	This is an internal error caused by an API inconsistency.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSDIE0187</b>	<b>Illegal access to field with name {0} in class {1}</b>
<b>Explanation</b>	This is an internal error caused by an API inconsistency.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSDIE0189</b>	<b>Failed to read the policy file.</b>
<b>Explanation</b>	The policy file could not be read or is invalid.
<b>Action</b>	Verify that your policy file is compliant with WS Security specification.
<b>WSSDIW0163</b>	<b>Modules cannot be engaged at the following binding hierarchy - Endpoint (port), Binding, Binding operation, Binding Message.</b>
<b>Explanation</b>	Axis2 does not support engaging modules at the listed subjects and respectfully calling isEngaged on those axis objects throws an UnsupportedOperationException.
<b>Action</b>	Invalid invocation. This method cannot be invoked on IDynamicPort, IDynamicBinding, IDynamicBindingOperation, or IDynamicBindingMessage.
<b>WSSDIW0177</b>	<b>Parent service group is not found for the following Web service: "{0}".</b>
<b>Explanation</b>	The dynamic deployer could not find the parent service group of the given Web service.
<b>Action</b>	Ensure that the Web service is properly deployed or redeploy it.

<b>WSSDIW0190</b>	<b>Expected dialect "{0}" but found "{1}" ,cannot proceed.</b>
<b>Explanation</b>	Found unexpected dialect in the specified request.
<b>Action</b>	Set proper dialect. If you are unable to do so, contact Software AG global support.
<b>WSSDIW0191</b>	<b>Null or empty policy identifier given, cannot proceed.</b>
<b>Explanation</b>	Policy identifier is invalid.
<b>Action</b>	Set proper identifier. If you are unable to do so, contact Software AG global support.
<b>WSSDSE0000</b>	<b>In order to deploy JAX-WS services you must have a JAX-WS Deployer configured in your axis2.xml.</b>
<b>Explanation</b>	The <deployer extension=".jar" directory="servicejars" class="org.apache.axis2.jaxws.framework.JAXWSDeployer"/> line in your axis2.xml is commented or missing.
<b>Action</b>	Uncomment the <deployer extension=".jar" directory="servicejars" class="org.apache.axis2.jaxws.framework.JAXWSDeployer"/> line in the axis2.xml, or add it if it is missing.
<b>WSSDSE0011</b>	<b>An error occurs while trying to remove the following security provider: "{0}".</b>
<b>Explanation</b>	Before the SAGAdminServlet is destroyed, it checks whether the BouncyCastle and JuiCE are added to the java security providers and whether they are loaded by the current web application classloader. If it is true, the servlet tries to remove them, as they are not available to other web applications. This error occurs when the servlet tries to cleanup the BouncyCastle and JuiCE providers from the list.
<b>Action</b>	Contact Software AG Global Support
<b>WSSDSE0012</b>	<b>DeployServlet requires the following instance in the servlet context but cannot find it: "{0}".</b>
<b>Explanation</b>	An Axis2 "org.apache.axis2.deployment.DeploymentEngine" instance has to be available in Web Services Stack DeployServlet's servlet context under the DEPLOYER servlet context attribute but such an attribute is not found.
<b>Action</b>	The reason for the error is that Web Services Stack Administration servlet fails to initialize. Make sure that the servlet is properly initialized.
<b>WSSDSW0013</b>	<b>Cannot find the axi2.xml file location in the known locations.</b>
<b>Explanation</b>	The axis2 configuration file is missing.
<b>Action</b>	Make sure the axis2 configuration file is the proper location.

<b>WSSDSW0014</b>	<b>Cannot find the axi2.xml location due to an error.</b>
<b>Explanation</b>	The axis2 configuration could not be obtained.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSJCE0012</b>	<b>Module "{0}" is engaged but configuration for a JAX-WS handler-chain was not found.</b>
<b>Explanation</b>	The module is engaged, but it does not contain any JAX-WS handlers configured into the chain.
<b>Action</b>	Inspect the engaged module if it contains the expected JAX-WS handlers.
<b>WSSJCE0015</b>	<b>The JAX-WS handler chain cannot be loaded.</b>
<b>Explanation</b>	The JAX-WS handler-chain descriptor (XML) file is not correct or the handler instances configured in it cannot be loaded.
<b>Action</b>	Inspect and correct the JAX-WS handler-chain descriptor (XML) file.
<b>WSSJCE0018</b>	<b>An incorrect property value is set for the JAX-WS handler-chain.</b>
<b>Explanation</b>	The JAX-WS handler-chain descriptor (XML) file has an incorrect property value set for a JAX-WS handler.
<b>Action</b>	Check and correct the JAX-WS handler-chain descriptor (XML) file.
<b>WSSJCE0019</b>	<b>An error occurs in the JAX-WS handler-chain execution.</b>
<b>Explanation</b>	At the invocation of JAX-WS in/out flow, an exception is thrown while processing the chain.
<b>Action</b>	For more information about the failure, see the AxisFault response message. Check the JAX-WS chain configuration.
<b>WSSJCW0001</b>	<b>A handler class of the handler chain cannot be found.</b>
<b>Explanation</b>	Classes are missing for some handler instances configured into the handler-chain descriptor (XML) file.
<b>Action</b>	Check that the handler classes configured into the handler-chain descriptor (XML) file are available into the jar library (class-path).

---

<b>WSSJCW0002</b>	<b>A handler of the handler chain cannot be instantiated.</b>
<b>Explanation</b>	A class of the handler available into the classpath is not a standard one.
<b>Action</b>	Check that the handler class available into the jar library is the original one provided by the product and was not modified improperly.
<b>WSSJCW0004</b>	<b>The configuration of a class from the handler chain is incorrect.</b>
<b>Explanation</b>	A class of the handler available into the classpath is not a standard one.
<b>Action</b>	Check that the handler class available into the jar library is the original one provided by the product and was not modified improperly.
<b>WSSJCW0005</b>	<b>An error occurs while loading the JAX-WS handler chain.</b>
<b>Explanation</b>	A class of the handler available into the classpath is not a standard one.
<b>Action</b>	Check that the handler class available into the jar library is the original one provided by the product and was not modified improperly.
<b>WSSJCW0009</b>	<b>An error occurs while executing PreDestroy methods of the JAX-WS handlers. {0}</b>
<b>Explanation</b>	A JAX-WS handler executed into the chain, throws an exception while destroying it after being used.
<b>Action</b>	Check that the handler class available into the jar library or its XML configuration file were not modified improperly.
<b>WSSJCW0011</b>	<b>An error occurs while executing PostConstruct methods of the JAX-WS handlers. {0}</b>
<b>Explanation</b>	A JAX-WS handler executed into the chain throws an exception during its initialization.
<b>Action</b>	Check that the handler jar archive or its XML configuration file were not modified improperly.
<b>WSSJHE0003</b>	<b>An error occurs during the completion of a JAX-WS handler.</b>
<b>Explanation</b>	An error occurs into the flow when closing a JAX-WS handler.
<b>Action</b>	Check whether the handler class that is available into the jar library or its XML configuration file are not modified improperly.

<b>WSSJHE0004</b>	<b>JAX-WS handler PreDestroy method failed.</b>
<b>Explanation</b>	An error occurs when invoking a JAX-WS handler PreDestroy method.
<b>Action</b>	Check whether the Handler class that is available into the jar library or its XML configuration file are not modified improperly.
<b>WSSJHE0008</b>	<b>A JAX-WS handler failed.</b>
<b>Explanation</b>	An error occurs when invoking a JAX-WS handler.
<b>Action</b>	Check whether the handler class that is available into the jar library or its XML configuration file are not modified improperly.
<b>WSSJHE0010</b>	<b>A JAX-WS handler instantiation failed for the following classname: {0}.</b>
<b>Explanation</b>	An error occurs during JAX-WS handler instantiation.
<b>Action</b>	Check whether the handler class that is available into the jar library or its XML configuration file are not modified improperly.
<b>WSSJHE0011</b>	<b>The JAX-WS handler {1} is not type {0}.</b>
<b>Explanation</b>	An error occurs during JAX-WS handler invocation.
<b>Action</b>	Check whether the handler class that is available into the jar library or its XML configuration file are not modified improperly.
<b>WSSJNE0000</b>	<b>Could not read the value, Illegal state exception.</b>
<b>Explanation</b>	The provided JSON data is invalid.
<b>Action</b>	Make sure the provided JSON data is valid.
<b>WSSJNE0001</b>	<b>IO error while reading JSON stream.</b>
<b>Explanation</b>	An error during reading/writing JSON data.
<b>Action</b>	Check your connectivity and try again.
<b>WSSJNE0004</b>	<b>Could not load configured json type converter "{0}".</b>
<b>Explanation</b>	Missing JSON type converter class.
<b>Action</b>	Make sure that the service archive (aar file) contains a configured JSON type converter class.

---

<b>WSSJNE0005</b>	<b>Could not instantiate configured json type converter "{0}".</b>
<b>Explanation</b>	Invalid converter class definition.
<b>Action</b>	Check the converter class definition.
<b>WSSJNE0006</b>	<b>Could not access configured json type converter class "{0}".</b>
<b>Explanation</b>	Invalid converter class definition.
<b>Action</b>	Check the converter class definition. Make your class/default constructor public.
<b>WSSJNE0007</b>	<b>Could not load configured json type converter "{0}".</b>
<b>Explanation</b>	Missing JSON type converter class.
<b>Action</b>	Make sure that the service archive (aar file) contains a configured JSON type converter class.
<b>WSSJNE0008</b>	<b>Configured json type converter class "{0}" cannot be cast to type converter interface class "{1}".</b>
<b>Explanation</b>	Invalid converter class definition.
<b>Action</b>	Check the converter class definition and ensure it implements the type converter interface.
<b>WSSJNE0014</b>	<b>Failed to configure type converter, the JSON formatter will use the default type converter. Reason: {0}</b>
<b>Explanation</b>	Could not load the configured custom JSON type converter.
<b>Action</b>	Ensure the configured custom JSON type converter class is valid and available on the classpath.
<b>WSSJNW0010</b>	<b>Could not load configured json type converter "{0}" using class loader of service "{1}", falling back to Web Services Stack class loader.</b>
<b>Explanation</b>	The configured JSON type converter could not be loaded from service archive (aar file) and Web Services Stack will attempt to load it using Web Services Stack class loader.
<b>WSSJNW0011</b>	<b>{0} - Ignoring "{1}" parameter with null value.</b>
<b>Explanation</b>	The configured JSON type converter parameter has a null value.
<b>Action</b>	Check the configured 'json.type.converter' parameter definition and ensure it specifies a non-null value.

<b>WSSJNW0012</b>	<b>Unable to obtain current element class name due to {0}</b>
<b>Explanation</b>	Current class name element could not be obtained.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSJNW0013</b>	<b>{0} - Ignoring "{1}" parameter with a non-String value ({2})</b>
<b>Explanation</b>	The configured JSON type converter parameter has a non-String value.
<b>Action</b>	Check the configured 'json.type.converter' parameter definition and ensure it specifies a String value.
<b>WSSMRE0003</b>	<b>The service does not define adapter class parameter: "{0}"</b>
<b>Explanation</b>	When com.softwareag.wsstack.message receivers.AdapterMessageReceiver is invoked, it tries to find a parameter named adapter in the currently invoked service. The adapter parameter denotes a name of a class that implements the com.softwareag.wsstack.adapter.api.Adapter interface. The message receiver attempts to instantiate and execute the configured adapter.
<b>Action</b>	Add an adapter parameter to your service definition (in your services.xml file). As a value to the parameter, set the required adapter implementation class.
<b>WSSMRE0004</b>	<b>The configured adapter class is invalid: "{0}"</b>
<b>Explanation</b>	When com.softwareag.wsstack.message receivers.AdapterMessageReceiver is invoked, it tries to find a parameter named adapter in the currently invoked service. The adapter parameter denotes a name of a class that implements the com.softwareag.wsstack.adapter.api.Adapter interface. The message receiver attempts to instantiate and execute the configured adapter.
<b>Action</b>	Specify a valid adapter class name as a value to the adapter parameter in your service definition.
<b>WSSOGE0000</b>	<b>Failed to add service {0}</b>
<b>Explanation</b>	Failed to add service.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSOGE0001</b>	<b>Failed to handle service modification {0}</b>
<b>Explanation</b>	Failed to handle service modification.
<b>Action</b>	Contact SoftwareAG global support.

---

<b>WSSOGE0002</b>	<b>Failed to handle service removal {0}</b>
<b>Explanation</b>	Failed to handle service removal.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSOGE0003</b>	<b>Failed to add service {0}</b>
<b>Explanation</b>	Internal error. Failed to add service.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSOGE0004</b>	<b>Failed to handle service removal {0}</b>
<b>Explanation</b>	Internal error. Failed to handle service removal.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSOGE0010</b>	<b>The specified {0} property points to a non-existing or non-readable file. Using default.</b>
<b>Explanation</b>	The main axis2.xml configuration file is missing.
<b>Action</b>	Make sure that the configured axis2.xml file is in the correct location and is readable.
<b>WSSOGE0013</b>	<b>Cannot set axi2.xml URL as axisConfig parameter.</b>
<b>Explanation</b>	Internal error. Cannot set the axi2.xml URL as an axisConfig parameter.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSOGE0016</b>	<b>Error during module shutdown: {0}</b>
<b>Explanation</b>	Internal error. The error occurred during module shutdown.
<b>Action</b>	Contact SoftwareAG global support.
<b>WSSOGE0021</b>	<b>Failed to remove group {0}</b>
<b>Explanation</b>	Internal error. Failed to remove group.
<b>Action</b>	Contact Software AG global support.
<b>WSSOGE0023</b>	<b>Failed to resolve relative resource: {0} from bundle {1}</b>
<b>Explanation</b>	Internal error. Failed to resolve resource from a bundle.
<b>Action</b>	Contact Software AG global support.

<b>WSSOGE0025</b>	<b>Failed to resolve relative resource {0} from bundle {1}</b>
<b>Explanation</b>	Internal error. Failed to resolve resource from a bundle.
<b>Action</b>	Contact Software AG global support.
<b>WSSOGE0031</b>	<b>AxisConfigurator instance (class '{0}') does not derive from {1}, Web Services Stack Deploy Servlet will not be functional.</b>
<b>Explanation</b>	Provided axis configurator is not aware of the axis deploy engine.
<b>Action</b>	Contact Software AG global support.
<b>WSSPWE0000</b>	<b>UsernameToken authentication failed.</b>
<b>Explanation</b>	Invalid or empty password provided.
<b>Action</b>	Provide valid credentials.
<b>WSSPWE0001</b>	<b>Unknown password callback type: {0}.</b>
<b>Explanation</b>	Invalid usage of the password callback handler. Valid usage is for signing, decryption, and username password validation.
<b>Action</b>	Provide a valid usage of the callback handler.
<b>WSSPWE0004</b>	<b>The system cannot load the LDAP configuration for the password callback handler: {0}.</b>
<b>Explanation</b>	The password callback handler needs LDAP configuration. If it is not configured, the default LDAP configuration ldap.properties is used. LDAP configuration file cannot be loaded.
<b>Action</b>	Provide valid LDAP configuration.
<b>WSSPWE0008</b>	<b>Invalid LDAP configuration for the password callback handler.</b>
<b>Explanation</b>	One or more of the required LDAP configuration properties are not available in the LDAP configuration.
<b>Action</b>	Provide all required LDAP configuration properties.
<b>WSSPWE0009</b>	<b>UsernameToken authentication failed.</b>
<b>Explanation</b>	Invalid or empty password provided. The user cannot be authenticated.
<b>Action</b>	Provide valid, non-empty values for username and password.

---

<b>WSSPWE0010</b>	<b>Cannot recognize the following user ID: "{0}".</b>
<b>Explanation</b>	Invalid or empty username, or certificate alias provided.
<b>Action</b>	Check the spelling and provide a valid, non-empty value for username, or certificate alias (depending on the use case).
<b>WSSPWE0012</b>	<b>System cannot load the password callback handler configuration file: {0}.</b>
<b>Explanation</b>	The password callback handler configuration file is not found and cannot be loaded.
<b>Action</b>	Check if the configuration file exists and if the path to the file is correct.
<b>WSSPWE0013</b>	<b>Cannot convert the configuration from a stream to an OMElement: {0}.</b>
<b>Explanation</b>	A problem occurs while converting the configuration file content to an OMElement.
<b>Action</b>	Check and validate the XML format of the configuration file.
<b>WSSRME0000</b>	<b>Exception on callback.</b>
<b>Explanation</b>	Internal error. Failed to receive message on callback.
<b>Action</b>	Contact Software AG global support.
<b>WSSRME0001</b>	<b>Exception on callback.</b>
<b>Explanation</b>	Internal error. Failed to receive message on callback.
<b>Action</b>	Contact Software AG global support.
<b>WSSTLW0013</b>	<b>Password must comply with 3 out of the following 4 rules: at least 1 uppercase character, 1 lowercase character, 1 digit, and 1 special character. Minimum password length is 10 characters.</b>
<b>WSSTRE0001</b>	<b>Cannot close the input stream of the file; the file absolute path value is [{0}]. The exception message is: {1}.</b>
<b>Explanation</b>	Cannot close a file input stream or cannot release system resources associated with the stream.
<b>Action</b>	Check the file state. For example, it can be locked by another process.

<b>WSSTRE0002</b>	<b>The used key cannot be "null".</b>
<b>Explanation</b>	The key that is used for a property is null.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSTRE0003</b>	<b>Cannot close an input/output stream of type {{0}}; the exception message is: {1}</b>
<b>Explanation</b>	There is an exception during input/output stream closure.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSTRE0004</b>	<b>There is an error while manipulating an input/output stream in use.</b>
<b>Explanation</b>	There is an exception during input/output stream processing.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSTRE0005</b>	<b>The repository listener is not initialized.</b>
<b>Explanation</b>	The repository listener is not initialized.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSTRE0006</b>	<b>The following operation is not supported: {{0}}.</b>
<b>Explanation</b>	Non existing operation requested.
<b>Action</b>	Check that an operation with the specified name exists. Contact Software AG Global Support.
<b>WSSTRE0007</b>	<b>Cannot delete the file with the following file path: {{0}}.</b>
<b>Explanation</b>	There is a problem deleting the file.
<b>Action</b>	Check that the file exists and it is not locked. Check that you have sufficient permissions to delete the file.
<b>WSSTRE0008</b>	<b>Cannot create a directory in the following location: {{0}}.</b>
<b>Explanation</b>	There is a problem while creating a "services" directory.
<b>Action</b>	Contact Software AG Global Support.
<b>WSSTRE0009</b>	<b>The following Web service element cannot be null: {0}.</b>
<b>Explanation</b>	The Web service element is null.
<b>Action</b>	Check the content structure of the Web service that is deployed dynamically.

---

<b>WSSTRE0010</b>	<b>The name of the Web service client {0} must not be null or empty.</b>
<b>Explanation</b>	The name of the Web service client that is instantiated is null or empty.
<b>Action</b>	Check the Web service client implementation.
<b>WSSTRE0011</b>	<b>Cannot delete the following directory: [{0}].</b>
<b>Explanation</b>	There is a problem while deleting a Web service directory.
<b>Action</b>	Check that the Web service directory is not locked and check that you have sufficient permissions to delete the directory.
<b>WSSXTE0000</b>	<b>{0}: An XML document that is empty, invalid or does not exist.</b>
<b>Explanation</b>	The document is empty or invalid.
<b>Action</b>	Provide a valid, non-empty XML document.
<b>WSSXTE0013</b>	<b>Unexpected element found after the SOAP Body element: "{0}"</b>
<b>Explanation</b>	Web Services Stack is processing an invalid message. The sent message contains an unexpected element in the SOAP Envelope after the SOAP Body element. A SOAP Envelope is expected to contain only an optional SOAP Header element followed by one SOAP Body element.
<b>Action</b>	Inform the web service conversation partner that they are generating invalid web service messages.
<b>WSSXTE0014</b>	<b>Unexpected element found after the SOAP envelope has been consumed: "{0}"</b>
<b>Explanation</b>	Web Services Stack is processing an invalid message. The sent message contains an unexpected element after the already consumed SOAP Envelope. A web service message is expected to contain a single SOAP Envelope element.
<b>Action</b>	Inform the web service conversation partner that they are generating invalid web service messages.
<b>WSSXTE0016</b>	<b>Failed to marshall response object.</b>
<b>Explanation</b>	Internal error. Failed to marshall response object.
<b>Action</b>	Contact Software AG global support.

<b>WSSXTE0017</b>	<b>Could not close piped output stream.</b>
<b>Explanation</b>	Internal error. Could not close piped output stream.
<b>Action</b>	Contact Software AG global support.
<b>WSSXTE0018</b>	<b>Invalid timeout value format: not a number.</b>
<b>Explanation</b>	Illegal number for timeout config parameter.
<b>Action</b>	Check timeout parameters: SO_TIMEOUT, CONNECTION_TIMEOUT
<b>WSSXTW0019</b>	<b>Could not obtain inbound message context.</b>
<b>Explanation</b>	The obtained axis2 message context is invalid.
<b>Action</b>	Contact SoftwareAG global support.

# 30 Universal Messaging Messages

---

<b>NUMSPME0001</b>	<b>Unexpected exception encountered.</b>
<b>Explanation</b>	An unexpected exception occurred.
<b>Action</b>	Check the detailed error message. Contact Software AG Global Support for further assistance.
<b>NUMSPME0002</b>	<b>An error occurred while identifying the inventory components of Universal Messaging.</b>
<b>Explanation</b>	Unexpected exception occurred while identifying the inventory components of Universal Messaging.
<b>Action</b>	Please contact webMethods Administrator.
<b>NUMSPME0003</b>	<b>An error occurred while retrieving the interfaces configured for Universal Messaging.</b>
<b>Explanation</b>	Unable to read the adapters.nst file.
<b>Action</b>	Please contact webMethods Administrator.
<b>NUMSPME0005</b>	<b>Invalid configuration instance. {0} entered.</b>
<b>Explanation</b>	Format of the port configuration is wrong.
<b>Action</b>	Contact your webMethods product administrator and re-configure the port settings.

<b>NUMSPME0006</b>	<b>Invalid configuration object. {0} expected.</b>
<b>Explanation</b>	Format of the port configuration is wrong.
<b>Action</b>	Contact your webMethods product administrator and re-configure the port settings.
<b>NUMSPME0007</b>	<b>Invalid input for the port alias.</b>
<b>Explanation</b>	The input for the port alias is not valid.
<b>Action</b>	Input a valid port alias or keep the port alias field empty.
<b>NUMSPME0008</b>	<b>SSL configuration cannot be set for a non-SSL port.</b>
<b>Explanation</b>	SSL configuration can be set only for the SSL ports.
<b>Action</b>	Remove the SSL configuration from the non-SSL port and try again.
<b>NUMSPME0009</b>	<b>The configuration instance ID argument is missing.</b>
<b>Explanation</b>	The configuration instance ID is required to load the port configuration.
<b>Action</b>	Specify the configuration instance ID.
<b>NUMSPME0010</b>	<b>No port matches the provided configuration instance ID.</b>
<b>Explanation</b>	The provided configuration instance ID is incorrect.
<b>Action</b>	Verify the configuration instance ID provided for configuration update.
<b>NUMSPME0011</b>	<b>Protocol entered for the interface is incorrect.</b>
<b>Explanation</b>	The protocol can only be NSP, NHP, NSPS, or NHPS.
<b>Action</b>	Verify the protocol value entered for the port.
<b>NUMSPME0012E</b>	<b>Unable to connect to the UM realm server.</b>
<b>Explanation</b>	Unable to connect to the UM realm server. None of the interfaces can connect to the realm server.
<b>Action</b>	Verify if at least one interface is available for the realm server.
<b>NUMSPME0013</b>	<b>At least one port must be specified.</b>
<b>Explanation</b>	Port configuration is not specified in the port settings input.
<b>Action</b>	Add the port configuration to the port settings input.

---

<b>NUMSPME0014</b>	<b>Error occurred while saving the port configurations.</b>
<b>Explanation</b>	Unable to save the port configurations.
<b>Action</b>	See the detailed error message and verify the cause of failure.
<b>NUMSPME0015</b>	<b>Only one set of port settings is allowed.</b>
<b>Explanation</b>	More than one set of port settings are passed in the input.
<b>Action</b>	Configure only one set of port setting.
<b>NUMSPME0016</b>	<b>Universal Messaging port number must not be changed.</b>
<b>Explanation</b>	Attempted to change the Universal Messaging port number.
<b>Action</b>	Do not modify the port number.
<b>NUMSPME0017</b>	<b>Universal Messaging Server port type must be STANDARD.</b>
<b>Explanation</b>	Universal Messaging Server port type is not STANDARD.
<b>Action</b>	Set the Universal Messaging Server port type as STANDARD.
<b>NUMSPME0018</b>	<b>Universal Messaging Server protocol must be NSP, NHP, NHPS, or NSPS.</b>
<b>Explanation</b>	Universal Messaging Server protocol is not valid.
<b>Action</b>	Set NSP, NHP, NSPS, or NHPS as the Universal Messaging port protocol.
<b>NUMSPME0019</b>	<b>Do not modify the BindAddress.</b>
<b>Explanation</b>	Attempted to modify the BindAddress.
<b>Action</b>	Do not modify the BindAddress in the input.
<b>NUMSPME0020</b>	<b>Invalid argument provided.</b>
<b>Explanation</b>	Invalid value provided for argument. Port cannot be configured.
<b>Action</b>	Verify and provide correct value for all the arguments. Refer to the Universal Messaging documentaion for more information about argument values.
<b>NUMSPME0021</b>	<b>IPAccess is not supported by Universal Messaging.</b>
<b>Explanation</b>	IPAccess is set, but Universal Messaging does not support IPAccess.
<b>Action</b>	Do not set the IPAccess.

<b>NUMSPME0022</b>	<b>KeepAliveTimeout is not supported by Universal Messaging.</b>
<b>Explanation</b>	KeepAliveTimeout is set, but Universal Messaging does not support KeepAliveTimeout.
<b>Action</b>	Do not set the KeepAliveTimeout.
<b>NUMSPME0023</b>	<b>ThreadPool is not supported by Universal Messaging.</b>
<b>Explanation</b>	ThreadPool is set, but Universal Messaging does not support ThreadPool.
<b>Action</b>	Do not set the ThreadPool.
<b>NUMSPME0024</b>	<b>URLAccess is not supported by Universal Messaging.</b>
<b>Explanation</b>	URLAccess is set, but Universal Messaging does not support URLAccess.
<b>Action</b>	Do not set the URLAccess.
<b>NUMSPME0025</b>	<b>Keystore definition must not be null.</b>
<b>Explanation</b>	Keystore definition for SSL in the port configuration input is set to Null.
<b>Action</b>	Set a valid value for the keystore definition.
<b>NUMSPME0026</b>	<b>Truststore definition must not be null.</b>
<b>Explanation</b>	Truststore definition for SSL in the port configuration input is set to Null.
<b>Action</b>	Set a valid value for the truststore definition.
<b>NUMSPME0027</b>	<b>Cannot delete this interface. At least one interface is required for a Universal Messaging server.</b>
<b>Explanation</b>	At least one interface must exist for a Universal Messaging server.
<b>Action</b>	Make sure you retain at least one interface for a Universal Messaging server.
<b>NUMSPME0028</b>	<b>Unexpected error occurred while fetching the monitoring data.</b>
<b>Explanation</b>	An internal error occurred while fetching the monitoring data.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0029</b>	<b>The primary port cannot be stopped.</b>
<b>Explanation</b>	The primary port of a ream server cannot be stopped.
<b>Action</b>	Do not attempt to stop the primary port of a ream server.

---

<b>NUMSPME0030</b>	<b>Keystore definition type can only be JKS.</b>
<b>Explanation</b>	Keystore definition type can only be JKS.
<b>Action</b>	Specify JKS in the keystore type.
<b>NUMSPME0031</b>	<b>Truststore definition type can only be JKS.</b>
<b>Explanation</b>	Truststore definition type can only be JKS.
<b>Action</b>	Specify JKS for the Truststore type.
<b>NUMSPME0032</b>	<b>Client Authentication cannot be set to REQUEST_CERTIFICATE.</b>
<b>Explanation</b>	Only values supported for client authentication is REQUIRE_CERTIFICATE or NONE.
<b>Action</b>	Use either REQUIRE_CERTIFICATE or NONE.
<b>NUMSPME0033</b>	<b>Universal Messaging instance management operation failed.</b>
<b>Explanation</b>	An error occurred during the instance management operation.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0034</b>	<b>Universal Messaging instance creation operation failed for the instance with name {0}.</b>
<b>Explanation</b>	An error occurred while creating the Universal Messaging instance.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0035</b>	<b>Universal Messaging instance deletion operation failed for the instance with name {0}.</b>
<b>Explanation</b>	An error occurred while deleting the Universal Messaging instance.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0036</b>	<b>Universal Messaging instance management read operation failed for the runtime component {0}.</b>
<b>Explanation</b>	An error occurred while reading the Universal Messaging instance.
<b>Action</b>	Contact Software AG Global Support for further assistance.

**NUMSPME0037**    **Universal Messaging instance management does not support the operation called on the runtime component {0}.**

**Explanation**    The specified operation is not supported by Universal Messaging instance management.

**Action**    Contact Software AG Global Support for further assistance.

**NUMSPME0038**    **Universal Messaging instance management operation was called with an invalid server name for the runtime component {0}.**

**Explanation**    Universal Messaging instance name specified for the operation is invalid or empty.

**Action**    Provide a valid Universal Messaging instance name.

**NUMSPME0039**    **Universal Messaging instance management operation was called with an empty server name for product-id {0}.**

**Explanation**    Universal Messaging instance name specified for the operation is invalid or empty.

**Action**    Provide a valid Universal Messaging instance name.

**NUMSPME0040**    **Universal Messaging instance management operation was called with an empty port for product-id {0}.**

**Explanation**    The port specified for the Universal Messaging instance management operation is invalid or empty.

**Action**    Provide a valid port number for the Universal Messaging instance.

**NUMSPME0041**    **Universal Messaging instance name, {0}, already exists.**

**Explanation**    The Universal Messaging instance name specified already exists.

**Action**    Choose a Universal Messaging instance name, which is not already present.

**NUMSPME0042**    **Universal Messaging instance management operation was called with the wrong product id, {0}.**

**Explanation**    An error occurred during the instance management operation.

**Action**    Contact Software AG Global Support for further assistance.

**NUMSPME0043**    **Universal Messaging user repository file does not exist.**

**Explanation**    The new repository file for the Universal Messaging users does not exist on the file system.

**Action**    Contact Software AG Global Support for further assistance.

---

<b>NUMSPME0044</b>	<b>Universal Messaging cluster update operation failed for the instance with name {0}.</b>
<b>Explanation</b>	An error occurred while updating the cluster details of the Universal Messaging instance.
<b>Action</b>	Check the detailed error message. Contact Software AG Global Support for further assistance.
<b>NUMSPME0045</b>	<b>Universal Messaging cluster management operation failed.</b>
<b>Explanation</b>	An error occurred during the cluster management operation.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0046</b>	<b>Universal Messaging cluster get operation failed for the instance with name {0}.</b>
<b>Explanation</b>	An error occurred while getting the cluster details of the Universal Messaging instance.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0047</b>	<b>The configuration instance ID argument is missing.</b>
<b>Explanation</b>	The configuration instance ID is required to load the cluster configuration.
<b>Action</b>	Specify the configuration instance ID.
<b>NUMSPME0049</b>	<b>Universal Messaging cluster operation failed. Minimum of two Universal Messaging server instances are required in the cluster.</b>
<b>Explanation</b>	Minimum of two Universal Messaging server instances are required in the cluster.
<b>Action</b>	Make sure the cluster has a minimum of two Universal Messaging server instances. Contact Software AG Global Support for further assistance.
<b>NUMSPME0050</b>	<b>Cannot update the {0} site information for {1} Universal Messaging server instance in {2} cluster.</b>
<b>Explanation</b>	Failed to add or delete the site information to a server node in the cluster.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0051</b>	<b>Cannot update {0} prime site for {1} cluster. The specified prime site does not belong to the cluster.</b>
<b>Explanation</b>	Failed to update the prime site of the cluster. Only a site defined in the cluster can be specified as the prime site.
<b>Action</b>	Specify one of the sites defined in the cluster as the prime site. Contact Software AG Global Support for further assistance.

**NUMSPME0052**      **Cannot create the {0} site information for {1} Universal Messaging server instance in {2} cluster.**

**Explanation**      Failed to create the site for the server node in the cluster.

**Action**            Check the detailed error message. Contact Software AG Global Support for further assistance.

**NUMSPME0053**      **Universal Messaging cluster create operation failed.**

**Explanation**      An error occurred while creating the Universal Messaging cluster.

**Action**            Check the detailed error message. Contact Software AG Global Support for further assistance.

**NUMSPME0054**      **Universal Messaging cluster delete operation failed for the cluster with name {0}.**

**Explanation**      An error occurred while deleting the Universal Messaging cluster.

**Action**            Check the detailed error message. Contact Software AG Global Support for further assistance.

**NUMSPME0055**      **Universal Messaging cluster create operation failed because the cluster name is not provided.**

**Explanation**      To create a Universal Messaging cluster, you must provide a cluster name.

**Action**            Specify the cluster name in the input for Universal Messaging cluster creation.

**NUMSPME0056**      **Universal Messaging server instance {0} is either offline or not reachable.**

**Explanation**      For performing cluster management operations, all the nodes of the cluster must be online.

**Action**            Make sure that the Universal Messaging server instance is online. Contact Software AG Global Support for further assistance.

**NUMSPME0057**      **The cluster update operation failed because there is a mismatch in the cluster name. Actual cluster name is {0} where as the cluster name input is {1}.**

**Explanation**      There is a mismatch between the cluster name specified in the input and the name of the existing cluster.

**Action**            Input the correct cluster name. Contact Software AG Global Support for further assistance.

<b>NUMSPME0058</b>	<b>The license file you have provided is invalid. Provide a valid license file.</b>
<b>Explanation</b>	Invalid license file provided.
<b>Action</b>	Provide a valid Software AG license file. Please contact Software AG Global Support for further assistance.
<b>NUMSPME0060</b>	<b>Unable to configure the Universal Messaging server properties.</b>
<b>Explanation</b>	An error occurred while configuring server properties.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0061</b>	<b>Unable to load the Universal Messaging server configuration properties. Provide a valid configuration instance ID.</b>
<b>Explanation</b>	Configuration instance ID is invalid or not provided.
<b>Action</b>	Provide a valid configuration instance ID.
<b>NUMSPME0062</b>	<b>Parameter validation failed. Unable to update the Universal Messaging server configuration parameters.</b>
<b>Explanation</b>	Incorrect configuration parameter values provided.
<b>Action</b>	See the Universal Messaging documentation for information about valid configuration parameter values.
<b>NUMSPME0063</b>	<b>Unable to update Universal Messaging server configuration parameters.</b>
<b>Explanation</b>	An error occurred when updating the Universal Messaging server configuration properties.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0064</b>	<b>The Universal Messaging server configuration parameter provided is null or does not exist within the group.</b>
<b>Explanation</b>	The Universal Messaging server parameter is null or does not exist.
<b>Action</b>	See the Command Central Help and Universal Messaging documentation for information about valid parameters and values.
<b>NUMSPME0065</b>	<b>Cannot create the {0} site information for {1} Universal Messaging server instance in {2} cluster within the event time interval.</b>
<b>Explanation</b>	Failed to create the site information for the server node in the cluster, in the time interval.
<b>Action</b>	Contact Software AG Global Support for further assistance.

<b>NUMSPME0066</b>	<b>An error occurred while initializing the Universal Messaging Context.</b>
<b>Explanation</b>	An error occurred while initializing the Universal Messaging Context for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0067</b>	<b>An error occurred while initializing the Universal Messaging Context for Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while initializing the Universal Messaging Context for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0068</b>	<b>An error occurred while retrieving the JNDI connection factory entries.</b>
<b>Explanation</b>	An error occurred while retrieving the JNDI connection factory entries from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the JNDI connection factories are present on the server.
<b>NUMSPME0069</b>	<b>An error occurred while retrieving the JNDI connection factory entries for the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the JNDI connection factory entries from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the JNDI connection factories are present on the server.
<b>NUMSPME0070</b>	<b>An error occurred while retrieving JNDI connection factory {0} for Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while retrieving the JNDI connection factory entry from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the JNDI connection factory is present on the server.
<b>NUMSPME0071</b>	<b>An error occurred while deleting the JNDI connection factory.</b>
<b>Explanation</b>	An error occurred while deleting the JNDI connection factory from the Universal Messaging server.
<b>Action</b>	Ensure that the JNDI connection factory is present on the server.

---

<b>NUMSPME0072</b>	<b>An error occurred while deleting the JNDI connection factory {0} for Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while deleting the JNDI connection factory from the Universal Messaging server.
<b>Action</b>	Ensure that the JNDI connection factory is present on the server.
<b>NUMSPME0073</b>	<b>An error occurred while binding the JNDI connection factory.</b>
<b>Explanation</b>	An error occurred while binding the JNDI connection factory for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0074</b>	<b>An error occurred while binding the JNDI connection factory {0} for Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while binding the JNDI connection factory for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0075</b>	<b>An error occurred while updating the JNDI connection factory.</b>
<b>Explanation</b>	An error occurred while updating the JNDI connection factory for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the JNDI connection factory is present on the server.
<b>NUMSPME0076</b>	<b>An error occurred while updating the JNDI connection factory {0} for Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while updating the JNDI connection factory for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the JNDI connection factory is present on the server.
<b>NUMSPME0077</b>	<b>An error occurred while loading the JNDI connection factory type for Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while loading the JNDI connection factory type for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.

**NUMSPME0078**     **An error occurred while creating the JNDI connection factory type {0} for Universal Messaging server {1}.**

**Explanation**     An error occurred while creating the JNDI connection factory type for the Universal Messaging server.

**Action**     Ensure that the Universal Messaging server is running.

**NUMSPME0079**     **An error occurred while binding the JNDI destination.**

**Explanation**     An error occurred while binding the JNDI destination on the Universal Messaging server.

**Action**     Ensure that the Universal Messaging server is running.

**NUMSPME0080**     **An error occurred while binding the JNDI destination {0} on Universal Messaging server {1}.**

**Explanation**     An error occurred while binding the JNDI destination on the Universal Messaging server.

**Action**     Ensure that the Universal Messaging server is running.

**NUMSPME0081**     **An error occurred while retrieving the JNDI destination.**

**Explanation**     An error occurred while retrieving the JNDI destination from the Universal Messaging server.

**Action**     Ensure that the Universal Messaging server is running and JNDI destinations are present on the server.

**NUMSPME0082**     **An error occurred while retrieving the JNDI destination from Universal Messaging server {0}.**

**Explanation**     An error occurred while retrieving the JNDI destination from the Universal Messaging server.

**Action**     Ensure that the Universal Messaging server is running and JNDI destinations are present on the server.

**NUMSPME0083**     **An error occurred while retrieving the JNDI destination {0} from Universal Messaging server {1}.**

**Explanation**     An error occurred while retrieving the JNDI destination from the Universal Messaging server.

**Action**     Ensure that the Universal Messaging server is running and JNDI destinations are present on the server.

---

<b>NUMSPME0084</b>	<b>An error occurred while deleting the JNDI destination.</b>
<b>Explanation</b>	An error occurred while deleting the JNDI destination from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the JNDI destinations are present on the server.
<b>NUMSPME0085</b>	<b>An error occurred while deleting the JNDI destination {0} from Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while deleting the JNDI destination from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the JNDI destinations are present on the server.
<b>NUMSPME0086</b>	<b>An error occurred while loading the JNDI destination type for Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while loading the JNDI destination type for Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0087</b>	<b>An error occurred while creating the JNDI destination {0} for Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while creating the JNDI destination on the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0088</b>	<b>Updating a JNDI destination type is not supported.</b>
<b>Explanation</b>	Update operation for a JNDI destination type is not supported for Universal Messaging server.
<b>Action</b>	No action required.
<b>NUMSPME0089</b>	<b>The Universal Messaging server is unavailable, check the status of the Universal Messaging server.</b>
<b>Explanation</b>	The Universal Messaging server might not be running.
<b>Action</b>	Ensure that the Universal Messaging server is running.

<b>NUMSPME0090</b>	<b>An error occurred while retrieving the Universal Messaging session.</b>
<b>Explanation</b>	An error occurred while retrieving the Universal Messaging session.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0091</b>	<b>An error occurred while retrieving the session for Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the session for Universal Messaging server {0}.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0092</b>	<b>JNDI connection factory name is either empty or contains invalid characters.</b>
<b>Explanation</b>	JNDI connection factory name is either empty or contains invalid characters.
<b>Action</b>	Provide a valid JNDI connection factory name.
<b>NUMSPME0093</b>	<b>Updating JNDI connection factory name is not supported.</b>
<b>Explanation</b>	Update operation for JNDI connection factory name is not supported for the Universal Messaging server.
<b>Action</b>	No action required.
<b>NUMSPME0094</b>	<b>Updating JNDI connection factory {0} name is not supported.</b>
<b>Explanation</b>	Update operation for JNDI connection factory name is not supported for the Universal Messaging server.
<b>Action</b>	No action required.
<b>NUMSPME0095</b>	<b>Invalid JNDI connection factory type. Allowed types are Connection Factory, Topic Connection Factory, Queue Connection Factory, and XA Connection Factory.</b>
<b>Explanation</b>	Invalid JNDI connection factory type. Allowed types are Connection Factory, Topic Connection Factory, Queue Connection Factory, and XA Connection Factory.
<b>Action</b>	Provide a valid JNDI connection factory type.
<b>NUMSPME0096</b>	<b>JNDI connection factory URL is either empty or invalid.</b>
<b>Explanation</b>	JNDI connection factory URL is either empty or invalid.
<b>Action</b>	Provide a valid JNDI connection factory URL.

<b>NUMSPME0097</b>	<b>Invalid value provided for JNDI connection factory shared durable property. Allowed values are true and false.</b>
<b>Explanation</b>	Invalid value provided for JNDI connection factory shared durable property. Allowed values are true and false.
<b>Action</b>	Provide true to enable and false to disable shared durable for the JNDI connection factory.
<b>NUMSPME0098</b>	<b>JNDI destination name is either empty or contains invalid characters.</b>
<b>Explanation</b>	JNDI destination name is either empty or contains invalid characters.
<b>Action</b>	Provide a valid JNDI destination name.
<b>NUMSPME0099</b>	<b>Invalid JNDI destination type. Allowed types are Topic and Queue.</b>
<b>Explanation</b>	Invalid JNDI destination type. Allowed types are Topic and Queue.
<b>Action</b>	Provide a valid JNDI destination type.
<b>NUMSPME0100</b>	<b>JNDI store name is either empty or contains invalid characters.</b>
<b>Explanation</b>	JNDI store name is either empty or contains invalid characters.
<b>Action</b>	Provide a valid JNDI store name.
<b>NUMSPME0101</b>	<b>Invalid value provided for the JNDI destination auto-create option. Allowed values are true and false</b>
<b>Explanation</b>	Invalid value provided for the JNDI destination auto-create option. Allowed values are true and false.
<b>Action</b>	Provide true to enable and false to disable auto-creation of JNDI destinations.
<b>NUMSPME0102</b>	<b>An error occurred while creating a channel on the Universal Messaging server.</b>
<b>Explanation</b>	An error occurred while creating a channel on the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0103</b>	<b>An error occurred while creating channel {0} on Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while creating a channel on the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.

<b>NUMSPME0104</b>	<b>An error occurred while creating a queue on the Universal Messaging server.</b>
<b>Explanation</b>	An error occurred while creating a queue on the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0105</b>	<b>An error occurred while creating queue {0} on Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while creating a queue on the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0106</b>	<b>The JNDI connection factory already exists on the Universal Messaging server.</b>
<b>Explanation</b>	The JNDI connection factory already exists on the Universal Messaging server.
<b>Action</b>	Provide a different name for the JNDI connection factory.
<b>NUMSPME0107</b>	<b>JNDI connection factory {0} already exists on Universal Messaging server {1}.</b>
<b>Explanation</b>	JNDI connection factory already exists on the Universal Messaging server.
<b>Action</b>	Provide a different name for the JNDI connection factory.
<b>NUMSPME0108</b>	<b>The JNDI destination already exists on the Universal Messaging server.</b>
<b>Explanation</b>	The JNDI destination already exists on the Universal Messaging server.
<b>Action</b>	Provide a different name for the JNDI destination.
<b>NUMSPME0109</b>	<b>JNDI destination {0} already exists on Universal Messaging server {1}.</b>
<b>Explanation</b>	JNDI destination already exists on Universal Messaging server.
<b>Action</b>	Provide a different name for the JNDI destination.
<b>NUMSPME0110</b>	<b>Unable to load Universal Messaging server configuration properties user interface.</b>
<b>Explanation</b>	An error occurred while reading or writing configuration properties.
<b>Action</b>	Contact Software AG Global Support for further assistance.
<b>NUMSPME0111</b>	<b>Unable to establish connection with the Universal Messaging server.</b>
<b>Explanation</b>	An error occurred while retrieving the session from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.

<b>NUMSPME0112</b>	<b>Unable to retrieve the session attribute object associated with with Universal Messaging server session.</b>
<b>Explanation</b>	An exception occurred while retrieving the session attribute.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0113</b>	<b>Unable to find the Universal Messaging channel on this Universal Messaging sever.</b>
<b>Explanation</b>	An error occurred while retrieving the Universal Messaging channel on the Universal Messaging realm server connected to this session, or a joined realm.
<b>Action</b>	Please check if the channel exists on this Universal Messaging sever.
<b>NUMSPME0114</b>	<b>Unable to retrieve the named object on this channel.</b>
<b>Explanation</b>	An error occurred while retrieving the named object details from this channel on the Universal Messaging server.
<b>Action</b>	Please check if the namd object exists on this channel.
<b>NUMSPME0115</b>	<b>Unable to delete the named object on this channel.</b>
<b>Explanation</b>	An error occurred while deleting the named object from this channel on the Universal Messaging server.
<b>Action</b>	Please check if the named object exists on this channel.
<b>NUMSPME0116</b>	<b>Missing argument: {0}.</b>
<b>Explanation</b>	Arguments not provided. Please provide both the channel and durable subscriber names to view details or delete a durable subscriber.
<b>Action</b>	Provide valid arguments for durable subscriber or channel.
<b>NUMSPME0117</b>	<b>Unable to connect to the Universal Messaging server.</b>
<b>Explanation</b>	An error occurred while retrieving the session from the Universal Messaging server.
<b>Action</b>	Please check if the Universal Messaging server is running.
<b>NUMSPME0118</b>	<b>Unable to retrieve the channel/queue {0} from Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while retrieving the channel/queue from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the specified channel/queue exists on the server.

<b>NUMSPME0119</b>	<b>Unable to establish connection with the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while connecting to the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server exists and is running.
<b>NUMSPME0120</b>	<b>An error occurred while loading channel configuration for the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while loading channel configuration for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0121</b>	<b>Unable to retrieve the channel list for the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the list of channels for the Universal Messaging server.
<b>Action</b>	Check if the Universal Messaging server is running and if the channels are configured.
<b>NUMSPME0122</b>	<b>Unable to retrieve the details of channel {0} in Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while retrieving the channel details for the Universal Messaging server.
<b>Action</b>	Check if the Universal Messaging server is running and if the channel exists on the server.
<b>NUMSPME0123</b>	<b>Unable to connect to the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while connecting to the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server exists and is running.
<b>NUMSPME0124</b>	<b>An error occurred while loading the queues for the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while loading the queues for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server exists and is running.
<b>NUMSPME0125</b>	<b>Unable to retrieve the queue list for the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the queue list for the Universal Messaging server.
<b>Action</b>	Please check if the Universal Messaging server is running and has queues configured.

---

<b>NUMSPME0126</b>	<b>Unable to retrieve the details of the queue {0} in Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while retrieving the queue details from the Universal Messaging server.
<b>Action</b>	Please check if Universal Messaging server is running and the queue exists on the server.
<b>NUMSPME0127</b>	<b>Universal Messaging instance management operation failed, exit code - {0}, full command - {1}, standard output - {2}</b>
<b>Explanation</b>	The Universal Messaging instance management operation failed due to an error.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error, resolve the error and retry.
<b>NUMSPME0128</b>	<b>Unable to create or update the channel as the channel name is not provided or is invalid.</b>
<b>Explanation</b>	Cannot create or update the channel with an empty or invalid name.
<b>Action</b>	Provide a valid channel name.
<b>NUMSPME0129</b>	<b>Unable to create or update the channel as the channel TTL value provided is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel as the TTL is negative.
<b>Action</b>	Provide a TTL value between 0 to 2147483647.
<b>NUMSPME0130</b>	<b>Unable to create or update the channel as the provided channel capacity value is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel as the provided value for the channel capacity is in negative.
<b>Action</b>	Provide a capacity value between 0 to 2147483647.
<b>NUMSPME0131</b>	<b>Unable to create or update the channel as the channel type provided is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel because the channel type provided is invalid.
<b>Action</b>	Provide a valid channel type.
<b>NUMSPME0132</b>	<b>Unable to create or update the channel as the channel engine provided is invalid</b>
<b>Explanation</b>	Cannot create or update the channel because the channel engine type provided is invalid.
<b>Action</b>	Provide a valid channel engine type.

<b>NUMSPME0133</b>	<b>Unable to create or update the channel as the publish key name provided is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel because the publish key name provided is invalid .
<b>Action</b>	Provide a valid channel publish key name.
<b>NUMSPME0134</b>	<b>Unable to create or update the channel as the key depth value provided is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel because the key depth value provided is invalid.
<b>Action</b>	Provide a valid channel key depth.
<b>NUMSPME0135</b>	<b>Unable to create or update the channel as the priority value provided is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel because the priority value provided is invalid.
<b>Action</b>	Provide a value between 0 to 9.
<b>NUMSPME0136</b>	<b>Unable to create or update the channel as the selected stamp dictionary is invalid.</b>
<b>Explanation</b>	Cannot create /update a channel with an invalid stamping dictionary
<b>Action</b>	Select a valid stamp dictionary.
<b>NUMSPME0137</b>	<b>Unable to create the channel {0} on Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while creating the channel on the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0138</b>	<b>Unable to create/update the channel attributes as the provided parameters are invalid.</b>
<b>Explanation</b>	An error occurred while creating/updating the channel attributes as the provided input parameters are invalid.
<b>Action</b>	Ensure that the provided input channel parameter values are valid.
<b>NUMSPME0139</b>	<b>Unable to create/update the channel as the dead event store provided is invalid.</b>
<b>Explanation</b>	An error occurred while creating/updating the channel as the provided dead event store does not exist on the Universal Messaging server.
<b>Action</b>	Ensure that the dead event store channel or queue provided exists on the server.

<b>NUMSPME0140</b>	<b>Unable to create the channel as channel {0} already exists on server {1}.</b>
<b>Explanation</b>	Channel already exists on the server.
<b>Action</b>	Create a channel with a different name.
<b>NUMSPME0141</b>	<b>Unable to delete the channel or queue {0} on Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while deleting the channel or queue on the Universal Messaging server.
<b>Action</b>	Check if the Universal Messaging server is running.
<b>NUMSPME0142</b>	<b>Unable to update the channel or queue {0} on Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while updating the channel or queue on the Universal Messaging server.
<b>Action</b>	Check if the Universal Messaging server is running.
<b>NUMSPME0143</b>	<b>Cannot update the channel or queue {0} on Universal Messaging server {1} because of invalid input parameters.</b>
<b>Explanation</b>	An error occurred while updating the channel or queue for the Universal Messaging server because of invalid input parameters.
<b>Action</b>	Ensure that the input parameters are valid and correct.
<b>NUMSPME0144</b>	<b>Unable to update the channel or queue {0} on Universal Messaging server {1}.</b>
<b>Explanation</b>	Update failed because an error occurred while copying the new configuration over the existing channel or queue configuration.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0145</b>	<b>Unable to create or update the channel or queue {0} on Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while creating or updating the channel or queue on Universal Messaging server because of invalid input storage parameters.
<b>Action</b>	Ensure that the input storage parameters are valid and correct.
<b>NUMSPME0146</b>	<b>Unable to create queue {0} on Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while creating the queue on Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.

<b>NUMSPME0147</b>	<b>Unable to create or update the queue.</b>
<b>Explanation</b>	Cannot create or update the queue because of empty or invalid name.
<b>Action</b>	Ensure that you provide a valid name.
<b>NUMSPME0148</b>	<b>Unable to create or update the queue because the TTL value is invalid.</b>
<b>Explanation</b>	Cannot create or update a queue as the TTL value is negative.
<b>Action</b>	Please provide a TTL between 0 to 2147483647 (exclusive)
<b>NUMSPME0149</b>	<b>Unable to create or update the queue as the channel capacity value is invalid.</b>
<b>Explanation</b>	Cannot create or update a queue as the capacity is negative.
<b>Action</b>	Enter a capacity value between 0 to 2147483647.
<b>NUMSPME0150</b>	<b>Unable to create or update the channel because the queue type is invalid.</b>
<b>Explanation</b>	Cannot create or update a queue with an invalid type.
<b>Action</b>	Provide a valid queue type.
<b>NUMSPME0151</b>	<b>Unable to create or update the channel because the priority value is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel with an invalid event priority.
<b>Action</b>	Provide a priority value between 0 to 9 (lowest to highest) .
<b>NUMSPME0152</b>	<b>Unable to create or update the channel as the stamping dictionary value provided is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel with an invalid stamping dictionary.
<b>Action</b>	Provide a valid stamping dictionary value.
<b>NUMSPME0153</b>	<b>Unable to create the queue attributes as the provided parameters are invalid.</b>
<b>Explanation</b>	An error occurred while creating the queue attributes as the input parameters are invalid.
<b>Action</b>	Provide valid queue parameters.
<b>NUMSPME0154</b>	<b>Unable to create the channel attributes as the dead event store is invalid.</b>
<b>Explanation</b>	An error occurred while creating the channel attributes as the provided dead event store does not exist on the Universal messaging server.
<b>Action</b>	Ensure that the dead event store channel or queue exists on the server.

---

<b>NUMSPME0155</b>	<b>Unable to create the queue as queue {0} already exists on server {1}.</b>
<b>Explanation</b>	Queue exists on the server.
<b>Action</b>	Create a queue with a different name.
<b>NUMSPME0156</b>	<b>Missing argument: {0}.</b>
<b>Explanation</b>	Arguments not provided. Provide the channel name to view status of a channel.
<b>Action</b>	Provide a valid channel name.
<b>NUMSPME0157</b>	<b>Unable to retrieve the status of channel {0} in Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while retrieving the channel details from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the channel exists on the server.
<b>NUMSPME0158</b>	<b>Arguments not provided.</b>
<b>Explanation</b>	Arguments not provided. Provide the queue name to view status of a queue.
<b>Action</b>	Provide queue name as the argument.
<b>NUMSPME0159</b>	<b>Unable to retrieve the status of queue {0} for Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while retrieving the queue status from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running and the queue exists on the server.
<b>NUMSPME0160</b>	<b>Unable to retrieve ACLs for channel {0}.</b>
<b>Explanation</b>	An error occurred while retrieving ACLs for channel {0}.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error resolve the error and retry.
<b>NUMSPME0161</b>	<b>Unable to add ACLs for channel {0}.</b>
<b>Explanation</b>	An error occurred while adding ACLs to a channel.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.

<b>NUMSPME0162</b>	<b>Unable to update ACLs for channel {0}.</b>
<b>Explanation</b>	An error occurred while updating ACLs for channel {0}.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.
<b>NUMSPME0163</b>	<b>Unable to create an ACL entry with subject {0} for channel {1}.</b>
<b>Explanation</b>	An error occurred when creating an ACL entry object for the channel.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.
<b>NUMSPME0164</b>	<b>Unable to retrieve ACLs for queue {0}.</b>
<b>Explanation</b>	An error occurred when retrieving ACLs for the queue.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.
<b>NUMSPME0165</b>	<b>Unable to add ACLs for queue {0}.</b>
<b>Explanation</b>	Adding ACLs to a queue failed due to an error.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.
<b>NUMSPME0166</b>	<b>Unable to update ACLs for queue {0}.</b>
<b>Explanation</b>	An error occurred when updating ACLs for a queue.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.
<b>NUMSPME0167</b>	<b>Unable to create the ACL entry with name {0} for queue {1}.</b>
<b>Explanation</b>	An error occurred in creating ACL entry object with name {0} for queue {1}.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.
<b>NUMSPME0168</b>	<b>Unable to create the ACL entry with subject {0} for channel {1}.</b>
<b>Explanation</b>	Invalid group name provided for ACL entry object with subject {0} for channel {1}.
<b>Action</b>	Provide a valid group name.

---

<b>NUMSPME0169</b>	<b>Unable to create the ACL entry with name {0} for queue {1}.</b>
<b>Explanation</b>	Invalid group name provided for ACL entry with name {0}, for queue {1}.
<b>Action</b>	Provide a valid group name.
<b>NUMSPME0170</b>	<b>Unable to create a join from {0} to {1} because the operation is unsupported.</b>
<b>Explanation</b>	An error occurred while creating the join.
<b>Action</b>	Ensure that the source node is a valid channel. For archived join, ensure that the destination node is a queue.
<b>NUMSPME0171</b>	<b>Unable to create a join from {0} to {1}.</b>
<b>Explanation</b>	An error occurred while creating the join.
<b>Action</b>	Ensure that the source is a valid channel and the Universal Messaging server is running.
<b>NUMSPME0172</b>	<b>Unable to delete the join from {0} to {1} as this operation is unsupported.</b>
<b>Explanation</b>	An error occurred while deleting the join.
<b>Action</b>	Ensure that the source node is a valid channel.
<b>NUMSPME0173</b>	<b>Unable to delete the join from {0} to {1}.</b>
<b>Explanation</b>	An error occurred while deleting the join.
<b>Action</b>	Ensure that the source is a valid channel and the Universal Messaging server is running.
<b>NUMSPME0174</b>	<b>Unable to delete the join from {0} to {1} as this is not a source node.</b>
<b>Explanation</b>	An error occurred while deleting the join.
<b>Action</b>	Delete the join from the source node. A join cannot be deleted from a destination node.
<b>NUMSPME0175</b>	<b>Unable to create the cluster.</b>
<b>Explanation</b>	Unable to create the cluster because the Universal Messaging server instance is already part of another cluster or the server instance already exists in the cluster or a local store is configured in one of the server instances that you are adding to the cluster.
<b>Action</b>	Ensure that the Universal Messaging server instance added to the cluster complies to the restrictions provided in the error message explanation.

<b>NUMSPME0176</b>	<b>Unable to create the cluster.</b>
<b>Explanation</b>	Session error.
<b>Action</b>	Check the detailed error message in the Command Central and Universal Messaging logs. Resolve the error and retry.
<b>NUMSPME0177</b>	<b>Unable to create the cluster.</b>
<b>Explanation</b>	Request timed out.
<b>Action</b>	Retry creating the cluster.
<b>NUMSPME0178</b>	<b>Unable to create the cluster.</b>
<b>Explanation</b>	Error in the response received from the realm server.
<b>Action</b>	Check for the detailed error message in the Universal Messaging logs. Resolve the error and retry.
<b>NUMSPME0179</b>	<b>Unable to create the cluster.</b>
<b>Explanation</b>	The Universal Messaging server instance is currently unreachable.
<b>Action</b>	Check for the detailed error message in the Universal Messaging logs. Resolve the error and retry.
<b>NUMSPME0180</b>	<b>Unable to create the cluster.</b>
<b>Explanation</b>	Conflicting realm names provided.
<b>Action</b>	Ensure that you provide the correct realm names to create the cluster.
<b>NUMSPME0181</b>	<b>Unable to create the cluster.</b>
<b>Explanation</b>	The Universal Messaging server instance could not be found.
<b>Action</b>	Check for detailed error messages in the Command Central and Universal Messaging logs. Contact Software AG Global Support for further assistance.
<b>NUMSPME0182</b>	<b>Unable to create the cluster.</b>
<b>Explanation</b>	You do not have the required administration rights for the realm.
<b>Action</b>	Ensure that you have the relevant administration rights for the realm.

---

<b>NUMSPME0183</b>	<b>Channel created successfully but cannot create a join from {0} to {1} because the operation is not supported.</b>
<b>Explanation</b>	An error occurred while creating the join.
<b>Action</b>	Ensure that the source is a valid channel. For archived join, ensure that the destination node is a queue.
<b>NUMSPME0184</b>	<b>Channel created successfully but cannot create a join from {0} to {1}.</b>
<b>Explanation</b>	An error occurred while creating the join.
<b>Action</b>	Ensure that the source is a valid channel and the Universal Messaging server is running.
<b>NUMSPME0185</b>	<b>Unable to create a join from {0} to {1} because the operation is not supported. The other channel properties are successfully updated.</b>
<b>Explanation</b>	An error occurred while creating the join.
<b>Action</b>	Ensure that the source is a valid channel. For archived join, ensure that the destination node is a queue.
<b>NUMSPME0186</b>	<b>Unable to create a join from {0} to {1}. The other channel properties are successfully updated.</b>
<b>Explanation</b>	An error occurred while creating the join.
<b>Action</b>	Ensure that the source is a valid channel and the Universal Messaging server is running.
<b>NUMSPME0187</b>	<b>Unable to delete the join from {0} to {1} as the operation is not supported. Other channel properties are updated.</b>
<b>Explanation</b>	An error occurred while deleting the join.
<b>Action</b>	Ensure that the source node is a valid channel.
<b>NUMSPME0188</b>	<b>Unable to delete the join from {0} to {1}. Other channel properties are updated.</b>
<b>Explanation</b>	An error occurred while deleting the join.
<b>Action</b>	Ensure that the source is a valid channel and the Universal Messaging server is running.

<b>NUMSPME0189</b>	<b>Cannot delete the join from {0} to {1} because {0} is not the source node. Other channel properties are updated.</b>
<b>Explanation</b>	An error occurred while deleting the join.
<b>Action</b>	Delete the join from the source node. A join cannot be deleted from a destination node.
<b>NUMSPME0190</b>	<b>Unable to create or update the channel as the protobuf descriptor file does not exist.</b>
<b>Explanation</b>	Cannot create or update a channel with an invalid protobuf descriptor file.
<b>Action</b>	Ensure that the protobuf descriptor file exists in the provided path.
<b>NUMSPME0191</b>	<b>Unable to create or update the channel as the protobuf descriptor file provided is invalid.</b>
<b>Explanation</b>	An error occurred while creating or updating the channel because the protobuf descriptor file provided is invalid.
<b>Action</b>	Provide a valid protobuf descriptor file.
<b>NUMSPME0192</b>	<b>Unable to create or update the queue as the protobuf descriptor file does not exist.</b>
<b>Explanation</b>	Cannot create or update a queue with an invalid protobuf descriptor file.
<b>Action</b>	Ensure that the protobuf descriptor file exists in the provided path.
<b>NUMSPME0193</b>	<b>Unable to create or update the queue as the protobuf descriptor provided is invalid.</b>
<b>Explanation</b>	An error occurred while creating or updating the queue because the protobuf descriptor file provided is invalid.
<b>Action</b>	Provide a valid protobuf descriptor file.
<b>NUMSPME0194</b>	<b>Unable to edit the name of the channel.</b>
<b>Explanation</b>	You cannot edit the name of a channel, operation not supported.
<b>Action</b>	Delete and recreate the channel.
<b>NUMSPME0195</b>	<b>Unable to edit the name of the queue.</b>
<b>Explanation</b>	You cannot edit the name of a queue, operation not supported.
<b>Action</b>	Delete and recreate the queue.

<b>NUMSPME0196</b>	<b>Unable to retrieve the channel or queue {0} from Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while retrieving the channel or queue from the Universal Messaging server as the node addition has failed.
<b>Action</b>	Ensure that the Universal Messaging server instances are not clustered.
<b>NUMSPME0197</b>	<b>An error occurred while creating the join.</b>
<b>Explanation</b>	Cannot create the join between {0} and {1} because remote node {1} is not a valid node.
<b>Action</b>	Ensure that the remote node is a valid channel or queue and the Universal Messaging server is running.
<b>NUMSPME0198</b>	<b>Cannot edit a channel join. Operation not supported.</b>
<b>Explanation</b>	Channel joins can only be created and deleted. Editing is not supported.
<b>Action</b>	Delete and recreate the join with the new join attributes.
<b>NUMSPME0199</b>	<b>Missing argument: {0}.</b>
<b>Explanation</b>	Arguments not provided. Please provide both the channel and durable subscriber names to delete a durable subscriber.
<b>Action</b>	Provide valid arguments for durable subscriber or channel.
<b>NUMSPME0200</b>	<b>An error occurred while creating file {0} for the Universal Messaging server instance {1}.</b>
<b>Explanation</b>	An error occurred while creating the file for Universal Messaging instance {1}.
<b>Action</b>	Check the Platform Manager logs for more information about the error.
<b>NUMSPME0201</b>	<b>Invalid cluster configuration. Cluster name not provided for Universal Messaging server instance {0}.</b>
<b>Explanation</b>	Invalid cluster configuration provided. Cluster name not provided for Universal Messaging server instance {0}.
<b>Action</b>	Provide a valid cluster name in the cluster configuration.
<b>NUMSPME0202</b>	<b>Invalid cluster configuration. Servers element is required and is not provided for the Universal Messaging server instance {0}.</b>
<b>Explanation</b>	Invalid cluster configuration. Servers element is required in the cluster configuration and is not provided for the Universal Messaging server instance {0}.
<b>Action</b>	Provide valid cluster configuration with the necessary servers element.

<b>NUMSPME0203</b>	<b>Invalid cluster configuration. Server name is required and is not provided for the Universal Messaging server instance {0}.</b>
<b>Explanation</b>	Invalid cluster configuration. Server name is required and is not provided for the Universal Messaging server instance {0}.
<b>Action</b>	Provide a valid server name in the cluster configuration.
<b>NUMSPME0204</b>	<b>Invalid cluster configuration. Server URL {0} is not provided or is invalid for Universal Messaging server name {1} for server instance {2}.</b>
<b>Explanation</b>	Invalid cluster configuration. Server URL {0} is not provided or is invalid for Universal Messaging server name {1} for server instance {2}.
<b>Action</b>	Provide a valid server URL in the cluster configuration.
<b>NUMSPME0205</b>	<b>Unable to establish connection with the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while connecting to the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server exists and is running.
<b>NUMSPME0206</b>	<b>An error occurred while loading the realm ACL configuration for the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while loading the realm ACL configuration for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0207</b>	<b>Unable to retrieve the realm ACLs for Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the realm ACLs for {0}.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.
<b>NUMSPME0208</b>	<b>Unable to update realm ACLs for Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while updating ACLs for Universal Messaging server {0}.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.

---

<b>NUMSPME0209</b>	<b>Unable to create an ACL entry with subject {0} for Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred when creating an ACL entry for the realm.
<b>Action</b>	Check the Platform Manager and Universal Messaging logs to find the error; resolve the error and retry.
<b>NUMSPME0210</b>	<b>Unable to create the ACL entry with subject {0} for Universal Messaging server {1}.</b>
<b>Explanation</b>	Invalid group name provided for ACL entry object with subject {0} for realm {1}.
<b>Action</b>	Provide an existing group name.
<b>NUMSPME0211</b>	<b>Purge operation not supported on the durable subscriber of type {0}.</b>
<b>Explanation</b>	Purge operation is not allowed for this durable subscriber type.
<b>Action</b>	Purge events on a different durable type.
<b>NUMSPME0212</b>	<b>Unable to establish connection to the Universal Messaging server.</b>
<b>Explanation</b>	An error occurred while retrieving the session from the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0213</b>	<b>An error occurred while trying to view events on the durable subscriber.</b>
<b>Explanation</b>	An error occurred while trying to view events on the durable subscriber.
<b>Action</b>	Ensure that the channel and durable type exists, and the Universal Messaging server is running.
<b>NUMSPME0214</b>	<b>An error occurred while purging events on the durable subscriber.</b>
<b>Explanation</b>	An error occurred while purging events on the durable subscriber.
<b>Action</b>	Ensure that the channel and durable type exists, and the Universal Messaging server is running.
<b>NUMSPME0215</b>	<b>An error occurred while parsing the event header.</b>
<b>Explanation</b>	An error occurred while parsing the event header.
<b>Action</b>	Ensure that the header does not contain corrupted information.

<b>NUMSPME0217</b>	<b>Invalid arguments provided.</b>
<b>Explanation</b>	Invalid arguments provided.
<b>Action</b>	Ensure that you provide valid arguments and try again.
<b>NUMSPME0227</b>	<b>Creation of realm ACLs for Universal Messaging server is not supported.</b>
<b>Explanation</b>	Create operation for realm ACLs is not supported for a Universal Messaging server.
<b>NUMSPME0228</b>	<b>Deletion of realm ACLs for Universal Messaging server is not supported.</b>
<b>Explanation</b>	Delete operation for realm ACLs is not supported for Universal Messaging server.
<b>NUMSPME0229</b>	<b>Universal Messaging cluster update operation failed for the instance with name {0}.</b>
<b>Explanation</b>	An error occurred while updating the cluster details of the Universal Messaging instance.
<b>Action</b>	Ensure that all the cluster nodes are online and the cluster has the quorum.
<b>NUMSPME0239</b>	<b>XA Connection Factory does not support round robin URL.</b>
<b>Action</b>	Change the connection factory type or the URL.
<b>NUMSPME0240</b>	<b>An error occurred while loading the Groups configuration for the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while loading the groups for the Universal Messaging server.
<b>NUMSPME0241</b>	<b>Unable to retrieve the Groups for Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the groups list for the Universal Messaging server.
<b>NUMSPME0242</b>	<b>Unable to add entry with subject {0} for Group {1}.</b>
<b>Explanation</b>	An error occurred while adding the subject to the group as it might be a non-existent group
<b>Action</b>	Provide an existing group name or provide a subject in the format user@host.

<b>NUMSPME0243</b>	<b>Unable to create group {0} for the Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while creating a group for the Universal Messaging server.
<b>NUMSPME0244</b>	<b>Unable to delete group {0} for the Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while deleting a group for the Universal Messaging server.
<b>NUMSPME0245</b>	<b>Unable to update group {0} for the Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while updating a group for the Universal Messaging server.
<b>NUMSPME0246</b>	<b>Unable to add entry with subject {0} for the Group {1}.</b>
<b>Explanation</b>	An error occurred while adding a subject to the group.
<b>NUMSPME0247</b>	<b>Unable to connect to the Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while connecting to the Universal Messaging server.
<b>NUMSPME0248</b>	<b>Unable to create group as the group name is not provided or is invalid.</b>
<b>Explanation</b>	Cannot create or update group with an empty or invalid name.
<b>Action</b>	Provide a valid group name.
<b>NUMSPME0249</b>	<b>Unable to create zone {0} with Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while creating a zone with the Universal Messaging server.
<b>Action</b>	Check the detailed error message. Contact Software AG Global Support for further assistance.
<b>NUMSPME0250</b>	<b>Unable to create or update the channel as the read buffer size value provided is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel because the read buffer size value provided is invalid.
<b>Action</b>	Provide a read buffer size value between 0 to 2147483647.
<b>NUMSPME0251</b>	<b>Unable to create or update the channel as the events per spindle value provided is invalid.</b>
<b>Explanation</b>	Cannot create or update a channel because the events per spindle value provided is invalid.
<b>Action</b>	Provide a value between 0 to 2147483647.

**NUMSPME0252**     **Unable to create or update the channel as the sync batch property values provided are invalid.**

**Explanation**     Cannot create or update a channel because the sync batch property values provided are invalid.

**Action**     Provide a sync batch property value between 0 to 2147483647.

**NUMSPME0253**     **Unable to create or update the queue as the read buffer size value provided is invalid.**

**Explanation**     Cannot create or update a queue because the read buffer size value provided is invalid.

**Action**     Provide a read buffer size value between 0 to 2147483647.

**NUMSPME0254**     **Unable to create or update the queue as the events per spindle value provided is invalid.**

**Explanation**     Cannot create or update a queue because the events per spindle value provided is invalid.

**Action**     Provide a events per spindle value between 0 to 2147483647.

**NUMSPME0255**     **Unable to create or update the queue as the sync batch property values provided are invalid.**

**Explanation**     Cannot create or update a queue because the sync batch property values provided are invalid.

**Action**     Provide a sync batch property value between 0 to 2147483647.

**NUMSPME0256**     **Unable to update zone {0} with Universal Messaging server {1}.**

**Explanation**     An error occurred while updating a zone with the Universal Messaging server.

**Action**     Check the detailed error message in the Universal Messaging server logs.

**NUMSPME0257**     **Unable to remove link from Universal Messaging server {0} to Universal Messaging server {1}.**

**Explanation**     An error occurred while removing links between Universal Messaging servers in the zone.

**Action**     Check for the detailed error message in the Universal Messaging logs. Resolve the error and retry.

<b>NUMSPME0258</b>	<b>Failed to remove cluster link from cluster {0} to cluster {1}.</b>
<b>Explanation</b>	An error occurred while removing links between clusters in the zone.
<b>Action</b>	Ensure the clusters are available and connected.
<b>NUMSPME0259</b>	<b>Unable to retrieve zone details for Universal Messaging server {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the zone members list for the Universal Messaging server.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0260</b>	<b>The Universal Messaging server instance is currently not accessible .</b>
<b>Explanation</b>	Check for the detailed error messages in the Universal Messaging logs. Resolve the error and retry.
<b>Action</b>	Ensure that the Universal Messaging server is running.
<b>NUMSPME0261</b>	<b>An error occurred while creating a zone.</b>
<b>Explanation</b>	Zone members are incompatible, clustered and non-clustered Universal Messaging server instances cannot be in the same zone.
<b>Action</b>	Ensure that the clustered and non-clustered Universal Messaging server instances are not added to the same zone. Clustered and non-clustered Universal Messaging server instances need to be grouped in separate zones.
<b>NUMSPME0262</b>	<b>Unable to create a link to the Universal Messaging server {0} from Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while linking the Universal Messaging servers. Rolling back the created links.
<b>Action</b>	Ensure that all the Universal Messaging servers that are being linked are running.
<b>NUMSPME0263</b>	<b>Unable to rollback the added Universal Messaging server instance links.</b>
<b>Explanation</b>	An error occurred when rolling back the Universal Messaging instance links added to the zone.
<b>Action</b>	Check the detailed error message.

<b>NUMSPME0264</b>	<b>Unable to delete zone {0} with Universal Messaging server {1}.</b>
<b>Explanation</b>	An error occurred while deleting a zone with the Universal Messaging server.
<b>Action</b>	Check the detailed error message.
<b>NUMSPME0265</b>	<b>Unable to create or update the cluster as the server URL provided is invalid.</b>
<b>Explanation</b>	The URL provided for the Universal Messaging server instance is invalid.
<b>Action</b>	Please provide a valid URL for the Universal Messaging server instance.
<b>NUMSPME0266</b>	<b>Cannot disable this interface. At least one interface needs to be enabled.</b>
<b>Explanation</b>	At least one interface should be enabled for a Universal Messaging server.
<b>Action</b>	Ensure that you enable at least one interface for a Universal Messaging server.
<b>NUMSPME0267</b>	<b>The specified prime site is invalid, the prime site specified does not belong to the cluster.</b>
<b>Explanation</b>	The specified prime site is invalid.
<b>Action</b>	Specify one of the sites defined in the cluster as the prime site.
<b>NUMSPME0268</b>	<b>Unable to create the zone as the zone name is not provided or is invalid.</b>
<b>Explanation</b>	Cannot create or update a zone with an empty or invalid name.
<b>Action</b>	Provide a valid zone name.
<b>NUMSPME0269</b>	<b>Unable to add Universal Messaging server {0} to the zone. Universal Messaging server {0} is already part of zone {1}.</b>
<b>Explanation</b>	Unable to add Universal Messaging server to the zone as it is already a part of another zone.
<b>Action</b>	Provide a different Universal Messaging server or remove the server from the other zone.
<b>NUMSPME0270</b>	<b>Unable to create or update the zone as the server URL provided is invalid.</b>
<b>Explanation</b>	The URL provided for the Universal Messaging server instance is invalid.
<b>Action</b>	Provide a valid URL for the Universal Messaging server instance.

<b>NUMSPME0271</b>	<b>Unable to update the zone because the zone should contain at least one member.</b>
<b>Explanation</b>	Zone update cannot be performed because a zone should contain at least one cluster.
<b>Action</b>	Ensure at least one cluster is part of the zone after modification.
<b>NUMSPME0272</b>	<b>Unable to retrieve the configured user repository file path for instance {0}.</b>
<b>Explanation</b>	Unable to retrieve the configured user repository file path for instance {0}.
<b>Action</b>	Verify if the user repository file is configured for the instance {0}.
<b>NUMSPMI0048</b>	<b>The Universal Messaging server instance {0} is not a part of any cluster.</b>
<b>Explanation</b>	This Universal Messaging sever instance is not a part of any cluster.
<b>Action</b>	No action required.
<b>NUMSPMW0004</b>	<b>Unable to connect to the Command Central interface of the Universal Messaging server {0}.</b>
<b>Explanation</b>	Interface factory could not connect to any interface.
<b>Action</b>	Please contact webMethods Administrator.
