# 1 ActiveTransfer Messages

---

- 1003            **Error while initializing ActiveTransfer database connection. The original error message was: {0}**
- 2001            **Invalid or unsupported RDBMS vendor: {0}.**
- 2002            **The database connection pool associated with ActiveTransfer should allow at least 2 connections. Your ActiveTransfer pool is currently configured with a maximum of {0} connections. Aborting TN startup. Please increase your ActiveTransfer database pool maximum and restart the server.**
- 2003            **There was an error while reading the dbops.sql file. The original error message was: {0}**
- 2004            **There was an error while reading the dblimits.cnf file. The original error message was: {0}**
- 2005            **A connection was returned to the connection pool with autoCommit = false. This may indicate some changes to the database were not committed properly. The changes will be rolled back. Stack trace {0}**

- 2006            **ActiveTransfer database pool is not configured. Please configure a database pool for functional alias "ActiveTransfer".**
  
- 2007            **There was an error while connecting to ActiveTransfer connection pool. The original error message was: {0}**
  
- 2008            **ActiveTransfer database pool is not configured properly. Make sure that a valid database pool is assigned for functional alias "ActiveTransfer".**
  
- 2009            **Error while reading the database configuration. The exception message is : {0}**
  
- 2011            **ActiveTransfer could not retrieve data from your database. Go to the JDBC Pools page in the Integration Server Administrator and make sure your database URL, user name, and password are set correctly. Also make sure you created the ActiveTransfer database tables as described in the Product Installation Guide.**
  
- 3001            **A scheduled action with this name already exists.**
  
- 3004            **Unable to save scheduled archive service "{0}".**
  
- 3009            **Interval value for fixed interval scheduled event cannot be empty.**
  
- 3010            **Interval value is not valid.**
  
- 3011            **Interval must be greater than zero.**
  
- 3012            **The scheduled {0} is invalid. Format must be YYYY/MM/DD.**
  
- 3013            **The scheduled {0} is invalid. Format must be hh:mm:ss.**

3020	<b>The scheduled delivery date/time is in the past.</b>
3021	<b>If an end time is supplied, an end date must also be supplied.</b>
3022	<b>End date/time is in the past.</b>
3023	<b>End date/time is before start date/time.</b>
3024	<b>Could not construct a valid timestamp from this schedule. Dates must be in YYYY/MM/DD format and times must be in hh:mm:ss format.</b>
3025	<b>Delivery schedule dates must be in the format "YYYY/MM/DD" and times must be in the format "hh:mm:ss".</b>
3031	<b>A post process event with this name already exists.</b>
3032E	<b>The action name "{0}" repeats for multiple actions in this event. Retry with unique action names.</b>
<b>Explanation</b>	Each action defined in an ActiveTransfer event must have a unique name.
<b>Action</b>	Specify a unique name for each action in an ActiveTransfer event.
3033	<b>The action name cannot be null.</b>
3034E	<b>Scheduled event "{0}" does not exist. Retry with an existing scheduled event.</b>
<b>Explanation</b>	The scheduleName parameter provided for the wm.mft.schedule:executeEvent service is not a valid scheduled event in ActiveTransfer.
<b>Action</b>	Ensure that the scheduled event name specified by the scheduleName parameter is defined in ActiveTransfer.
4003E	<b>Update of asset failed.</b>
<b>Explanation</b>	ActiveTransfer Server could not update the asset.
<b>Action</b>	Check the ActiveTransfer error logs for details.

<b>4005E</b>	<b>Insertion of asset failed.</b>
<b>Explanation</b>	ActiveTransfer could not insert the asset on the target server.
<b>Action</b>	Check the ActiveTransfer error logs for details.
<b>4006E</b>	<b>The export file name cannot be null.</b>
<b>Explanation</b>	The exportData service could not execute because no export file was specified.
<b>Action</b>	In the exportFileName parameter, specify the path and name of the XML file in which to save the exported assets.
<b>4007E</b>	<b>The import file name cannot be null.</b>
<b>Explanation</b>	The importData service could not execute because no import file was specified.
<b>Action</b>	In the importDataFileName parameter, specify the path and name of the XML file containing the assets to import.
<b>4008E</b>	<b>The import file {0} does not exist.</b>
<b>Explanation</b>	The specified file containing the assets to import does not exist.
<b>Action</b>	In the importDataFileName parameter, specify a valid path and name of the XML file containing the assets to import.
<b>4009E</b>	<b>The import file {0} cannot be read.</b>
<b>Explanation</b>	ActiveTransfer Server could not read the specified import file.
<b>Action</b>	In the importDataFileName parameter, specify a file name that ActiveTransfer Server can access.
<b>4010E</b>	<b>Specify values for input parameter {0} or set input parameter all to true.</b>
<b>Explanation</b>	The "all" input parameter for the importData service is set to "false," but no assets are specified to import.
<b>Action</b>	Either set the "all" input parameter to "true" or specify the assets to import in the "importData" parameter.
<b>4011E</b>	<b>The value of input parameter assetType of {0}{{1}} is null. Specify a value for the asset type.</b>
<b>Explanation</b>	ActiveTransfer Server could not import the asset for the indicated importData document because no asset type was specified.
<b>Action</b>	Specify a value in the assetType variable for each asset type you want to import.

---

<b>4012E</b>	<b>No assets to import.</b>
<b>Explanation</b>	The export file is blank or the assets selected for import are not in the export file.
<b>4013E</b>	<b>The version information in the import file cannot be null.</b>
<b>Explanation</b>	The version information in the import file is null. ActiveTransfer supports import of assets into ActiveTransfer 9.5 or later. The server could not find version information in the file the importData service is attempting to import.
<b>4014E</b>	<b>The version information provided in the file for Import operation is {0}, only the data exported from version {1} can be imported.</b>
<b>Explanation</b>	ActiveTransfer supports the export of assets from version 9.5 or later. This export file was created from an earlier version of ActiveTransfer
<b>4015E</b>	<b>A reference is not available on the target server. Reference details- type:{0}, name:{1}, and ID:{2}.</b>
<b>Explanation</b>	A reference to a server instance is not available on the target server.
<b>4016</b>	<b>assetType element not found in XML.</b>
<b>7001</b>	<b>A server with the same protocol and 'host + port' combination already exists.</b>
<b>7002</b>	<b>A server tunnel with the same name already exists.</b>
<b>7003</b>	<b>Error while updating the server. Check the logs.</b>
<b>7004</b>	<b>A proxy instance with the same host and port combination already exists.</b>
<b>7005</b>	<b>A proxy instance with the same name already exists.</b>
<b>8001</b>	<b>An invalid template has been specified for the user. Template ID:{0}</b>

- 8002            **A user template with the same name already exists.**
  
- 8003            **A user with the specified id does not exist. User ID:{0}**
  
- 8004            **The user does not have an associated template. User ID:{0}**
  
- 8005            **The user "{0}" already exists.**
  
- 8006            **No default user template is defined in ActiveTransfer. Please create a default user template before creating a user.**
  
- 8007            **Default template cannot be deleted.**
  
- 8101            **A virtual folder with the same name already exists.**

## 2 Application Designer Messages

---

<b>INMBAE0001</b>	<b>Login failed. The reason could be an incorrect username and/or password, or a database access error.</b>
<b>Explanation</b>	The system could not log you on. An error occurred during authentication.
<b>Action</b>	Specify correct user name (possibly including domain name) and password. Note that letters in passwords must be typed using the correct case. You may also want to check whether the CentraSite server is started.
<b>INMBAE0002</b>	<b>Please enter an appropriate value.</b>
<b>Explanation</b>	Please enter an appropriate value.
<b>Action</b>	Please enter an appropriate value.
<b>INMBAE0003</b>	<b>Cannot uninstall plug-in with id {0}, is required e.g. by plug-in with id {1}.</b>
<b>Explanation</b>	The plug-in you wish to uninstall cannot be uninstalled because another plug-in depends on it.
<b>Action</b>	Check whether to uninstall the dependent plug-in as well.
<b>INMBAE0005</b>	<b>Failed to delete {0}.</b>
<b>Explanation</b>	The given file or directory could not be deleted.
<b>Action</b>	Check whether in use by another program.

<b>INMBAE0006</b>	<b>Unable to load JAAS Configuration. The jaas.config file may have syntax errors.</b>
<b>Explanation</b>	JAAS Configuration seems to be invalid and hence cannot be loaded. The jaas.config file may have syntax errors
<b>Action</b>	Ensure the syntax correctness of jaas.config file. Fix any additional issues as pointed out in the error message
<b>INMBAE0009</b>	<b>Subject does not supply credentials. The subject instance is {0}.</b>
<b>Explanation</b>	Authenticated subject does not have credentials after authentication.
<b>Action</b>	This is most probably due to a CentraSite security misconfiguration.
<b>INMBAE0010</b>	<b>Connection handler {0} failed to establish connection.</b>
<b>Explanation</b>	Connection handler {0} failed to establish connection.
<b>Action</b>	Check logs.
<b>INMBAE0011</b>	<b>Plug-in {0} has been disabled.</b>
<b>Explanation</b>	Plug-in {0} has been disabled.
<b>Action</b>	Check logs for reason.
<b>INMBAE0012</b>	<b>Database access error. Can't connect to server CentraSite.</b>
<b>Explanation</b>	CentraSite Server is not running.
<b>Action</b>	Start CentraSite Server.
<b>INMBAW0004</b>	<b>Forced uninstall of plug-in with id {0} will cause disabling of dependent plug-in with id {1}.</b>
<b>Explanation</b>	When the plug-in is uninstalled, the dependent plug-in will no longer be usable.
<b>Action</b>	The dependent plug-in will be re-enabled when the required plug-in is available again.

# 3 Application Development Plug-in Messages

---

**JmxServiceConnectError – Designer was unable to physically connect to the server over JMX on port {0}. Verify the Server view's JMX port configuration matches the port configuration for the server. Verify the server is started and listening for socket connections on this port.**

**Explanation** Application Platform uses a JMX service to communicate with a server at design time.  
**Action** Verify the Server view's JMX port configuration matches the port configuration for the server. Verify the server is started and listening for socket connections on this port.

**JmxServiceNoInstanceError – Designer is connected to the server over JMX as required; however, the App Platform remote service is unavailable. Verify the 'Application Platform Support' component is installed for this server.**

**Explanation** Application Platform is using a JMX service to communicate with the server on port {0}. It connected to the server; however, the service is not available.  
**Action** The 'Application Platform Support' component must be installed for each server. Verify this component was installed; otherwise, please contact Global Support. Please provide the Designer and server logs.

**JmxServiceServerError – An error occurred while executing an Application Platform Designer remote JMX service on the server.**

**Explanation** Application Platform is using a JMX service to communicate with the server. An exception occurred on the server while executing a task.  
**Action** Determine the source of this server-side error and contact Global Support if unable to resolve the issue.

<b>PLDBBCE0000</b>	<b>Unable to establish a JMX connection to the {0} server over port {1}. Cause: {2}</b>
<b>Explanation</b>	Designer failed to establish a JMX to the remote development server.
<b>Action</b>	Verify that the server is started and that the installed PLS bundle deploy service bundle is active.
<b>PLDBBCE0001</b>	<b>Unable to access the bundle publisher service.</b>
<b>Explanation</b>	The Dependency Manager was unable to access the publisher service when the remote server was started. The dependency manager needs the publisher service in order to obtain the list of deployed bundles in the server's OSGi container.
<b>Action</b>	Restart Designer and verify that the PLD bundle deploy client bundle is active.
<b>PLDBBCE0002</b>	<b>Unable to access the Dependency Manager service.</b>
<b>Explanation</b>	The Dependency Manager service is contributed to the OSGi service registry but it is not registered to it.
<b>Action</b>	Restart Designer and verify that the PLD bundle builder core bundle is active.
<b>PLDBBUE0000</b>	<b>An error occurred while resolving the list of libraries in the Application Platform common classpath container for project: {0}. Cause: {1}</b>
<b>Explanation</b>	The list of libraries that are automatically created by Application Platform for the project cannot be resolved. One or more libraries, provided by Application Platform, must be present for projects with Application Platform project facets.
<b>Action</b>	Remove the Application Platform core project facet from the project and add it again. Verify that the Application Platform bundles exist in the target installation path under 'common/runtime/bundles/pls-core/eclipse/plugins' and 'common/runtime/bundles/applatform/eclipse/plugins'. If these directories do not exist, verify that all of the Application Platform components were selected during installation.
<b>PLDBBUE0001</b>	<b>An error occurred while initializing the Application Platform classpath container for project {0}. Cause: {1}</b>
<b>Explanation</b>	Designer could not initialize the classpath container for the existing project during the workspace initialization. The error is isolated to the initializer of this container.
<b>Action</b>	Remove the Application Platform core project facet from the project and add it again. Verify that the Application Platform bundles exist in the target installation path under 'common/runtime/bundles/pls-core/eclipse/plugins' and 'common/runtime/bundles/applatform/eclipse/plugins'. If these directories do not exist, verify that all of the Application Platform components were selected during installation.

---

<b>PLDBMGE0000</b>	<b>An exception occurred while reloading the Bundle Manager view. Cause: {0}</b>
<b>Explanation</b>	Designer could not reload the Bundle Manager view. Reloading the Bundle Manager view involves the following sources: a selected project, a connected server, and a configured set of directories.
<b>Action</b>	Determine the source where the error occurred (directory, project or server).
<b>PLDBMGE0001</b>	<b>An exception was produced while accessing the Dependency Manager Service.</b>
<b>Explanation</b>	Designer could not access the Dependency Manager Service. The Dependency Manager Service is an OSGi service. Application Platform uses this service for verifying bundles and their relationships to other bundles.
<b>Action</b>	Restart Designer and try again. If the error persists, contact Software AG Global Support.
<b>PLDBMGE0002</b>	<b>An exception was produced while accessing the Bundle Manager Service.</b>
<b>Explanation</b>	Designer could not access the Bundle Manager Service. The Bundle Manager Service is an OSGi service used by the Application Platform Bundle Manager View.
<b>Action</b>	Restart Designer and try again. If the error persists, contact Software AG Global Support.
<b>PLDBMGE0003</b>	<b>An error occurred while restoring the Bundle Manager to its default settings. Cause: {0}</b>
<b>Explanation</b>	An error occurred while resetting the Bundle Manager to its default values. The configuration settings of the Bundle Manager are stored by the Eclipse preferences API.
<b>Action</b>	Check the details of the exception and try to resolve the problem.
<b>PLDBMGE0005</b>	<b>Error opening Bundle Manager configuration settings dialog. Cause: {0}</b>
<b>Explanation</b>	The Bundle Manager configuration settings dialog failed to open. The configuration settings dialog contains configuration settings that impact the Bundle Manager view.
<b>Action</b>	Restart Designer and try again. Try to access the Bundle Manager configuration settings dialog from the Windows/Preferences/SoftwareAG/Bundle Manager menu path.
<b>PLDBMGE0006</b>	<b>Invalid number format for the App Platform server configuration key: {0}. Value: {1}</b>
<b>Explanation</b>	The server configuration property received an invalid value. A numeric value is required for the App Platform server configuration key.
<b>Action</b>	Verify that the server configuration value is non-null and that it is numeric.

**PLDBMGE0007**      **Bundle Manager encountered an error while publishing bundle {0} into the server's repository. Cause: {1}**

**Explanation**      The Bundle Manager could not publish the selected bundle to the server's bundle repository. The bundle must be published to the repository before it can be installed to the server's OSGi container. For this purpose, the bundle is first copied to a staging directory. Designer transfers the bundle to this directory by using a JMX interface via the port number, configured in the WST server

**Action**            Review the contents of the staging directory under the server's installation directory, for example: profiles/IS\_default/workspace/temp/app-platform/deployer/bundles/. Verify that the configuration of the WST server is correct and that the server is started and it is listening on the JMX port.

**PLDBMGE0008**      **Bundle Manager encountered an error while installing bundle {0} to the server's OSGi container. Cause: {1}**

**Explanation**      The Bundle Manager failed to install the bundle to the server's OSGi container.

**Action**            Verify that the bundle was copied from the staging directory to the repository directory under the installation directory, for example: profiles/IS\_default/workspace/app-platform/deployer/bundles/. If required bundles or imported packages are missing, review the OSGi dependencies to ensure that all required dependencies are met.

**PLDBMGE0009**      **Bundle Manager encountered an error while unpublishing the bundle {0} from the server's repository. Cause: {1}**

**Explanation**      The Bundle Manager failed to unpublish the bundle from the server's repository. The bundle can be unpublished from the server's repository after it is uninstalled from the OSGi container.

**Action**            Verify that the bundle was successfully removed from the repository directory under the installation folder, for example: profiles/IS\_default/workspace/app-platform/deployer/bundles/. If the bundle is still in the directory, delete it manually by removing the file from this directory and restarting the server.

**PLDBMGE0010**      **Bundle Manager encountered an error while removing bundle {0} from the server's OSGi container. Cause: {1}**

**Explanation**      The Bundle Manager failed to uninstall the bundle from the server's OSGi container. The bundle must be uninstalled from the OSGi container before it can be unpublished from the p2 repository.

**Action**            Verify that the bundle was successfully removed from the repository directory under the installation folder, for example: profiles/IS\_default/workspace/app-platform/deployer/bundles/. If the bundle is still in the directory, delete it manually by removing the file from this directory and restarting the server.

---

<b>PLDBMGE0011</b>	<b>The Bundle Manager encountered an unexpected error while executing the update server task. Cause: {0}</b>
<b>Explanation</b>	The Bundle Manager failed to update the server. The Bundle Manager runs an update server task when a server is started or bundle changes are committed.
<b>Action</b>	Review the contents of the staging directory under the server's installation directory. Verify that the configuration of the WST server is correct and that the server is started and it is listening on the JMX port. If you have uninstalled bundles from the server, verify that they bundle were successfully removed from the repository directory under the installation folder. If one or more bundles are still in the directory, delete it manually by removing the file from this directory and restarting the server.
<b>PLDBMGE0012</b>	<b>An Application Platform server must be configured and started for this operation.</b>
<b>Explanation</b>	This Application Platform operation in Designer requires access to a server instance. A server configuration must be created and successfully started.
<b>Action</b>	From the Servers view create an Application Platform server and start it.
<b>PLDBMGE0015</b>	<b>Error creating wrapper bundle. Cause: {0}</b>
<b>Explanation</b>	An unexpected error occurred while creating a wrapper bundle for the set of jars.
<b>Action</b>	Verify that the jar files and the bundle manifest are valid. If they are valid and the error persists, contact Software AG Global Support.
<b>PLDBMGE0017</b>	<b>An error occurred while creating a wrapper bundle. Cause: {0}</b>
<b>Explanation</b>	The Bundle Manager view failed to create a wrapper bundle for the given plain jar(s).
<b>Action</b>	Verify that the jars to be included in the wrapper jar are valid Java archives. Review the generated OSGi manifest entry in the jar (META-INF/MANIFEST.MF) and verify that the target directory, where the bundle is to be created, exists and has appropriate file permissions for the current user.
<b>PLDBMGE0019</b>	<b>Error removing wrapper bundle. Cause: {0}</b>
<b>Explanation</b>	An unexpected error occurred while removing one or more wrapper bundles.
<b>Action</b>	Verify that the associated jar files exist and that they are not opened in another application.
<b>PLDBMGE0021</b>	<b>File {0} was not installed on the server. The file is not a bundle.</b>
<b>Explanation</b>	The file you attempted for publishing to the server is not an OSGi bundle. Designer can only publish OSGi bundlers to the product server.
<b>Action</b>	Review the file contents and publish only OSGi bundles to the server.

<b>PLDBMGE0022</b>	<b>Unable to validate project {0}'s bundle file before attempting to publish or unpublish.</b>
<b>Explanation</b>	The file could not be validated by Designer. Designer needs a valid project archive file with OSGi bundle headers before it can perform publisher-related operations against a server.
<b>Action</b>	Rebuild the project to ensure its contents are up to date.
<b>PLDBMGI0020</b>	<b>The server must be started before bundles can be removed. The server is used to confirm they the bundles are not installed.</b>
<b>Explanation</b>	You cannot remove bundles when the server is started. Published bundles cannot be removed, so the server must first confirm that the selected bundles for removal are not installed.
<b>Action</b>	Start the Application Platform server in Designer and select unpublished bundles for removal.
<b>PLDBMGW0014</b>	<b>Clear the text filter to ensure that all bundles or jars are included in this action.</b>
<b>Explanation</b>	The filter cannot be cleared programmatically before the selected task is runned because the task is running on the same UI thread.
<b>Action</b>	Clear the text box and repeat the operation.
<b>PLDCDGE0000</b>	<b>Unknown data type from DataKey annotation for field {0}; type: {1}</b>
<b>Explanation</b>	The DataKey annotation is incorrect. The DataKey annotation identifies an element to be used in IS service signature. These signatures support only a limited set of data types. The data type of the field identified here is not supported.
<b>Action</b>	Update the DataKey annotation to use a supported data type.
<b>PLDCDGE0001</b>	<b>Unable to create POJO wrappers for IS node: {0}</b>
<b>Explanation</b>	The node is not recognized by the IS server as a defined service or a shared doctype or specification reference.
<b>Action</b>	Make sure that the selected node is valid on the selected IS server.
<b>PLDCDGE0002</b>	<b>Unexpected Integration Server node-type {0} for node {1}, expecting {2}</b>
<b>Explanation</b>	An unexpected node-type was found in the Integration Server node that was retrieved. This may be caused by an incorrect node name.
<b>Action</b>	Correct the Integration Server node name.

---

<b>PLDCDGE0003</b>	<b>Unable to retrieve Integration Server {0} description for node {1}; caught: {2}</b>
<b>Explanation</b>	Retrieving the service or record details for the given Integration Server node was unsuccessful. This error may result from improper configuration either in the IS server identification, or in the IS service.
<b>Action</b>	Check the error logs for more details about this error.
<b>PLDCDGE0004</b>	<b>Unexpected signature node type: {0}; field is {1}, generating bean: {2},{3}</b>
<b>Explanation</b>	The field-type used when generating a Java source for the IS service signature was not recognized. This may occur because of an unsupported IS service configuration.
<b>Action</b>	Contact Software AG Global Support.
<b>PLDCDGE0005</b>	<b>Cannot use a connection that is null or disconnected: {0}</b>
<b>Explanation</b>	Failed to connect to Integration Server. Application Platform attempted to generate a code for an IS service but the connection is not working.
<b>Action</b>	Verify that the connection to Integration Server is working. If the error persists with a working connection, contact Software AG Global Support.
<b>PLDCDGE0006</b>	<b>Unable to retrieve Integration Server {0} description for package {1}; caught: {2}</b>
<b>Explanation</b>	Retrieving the details for the given Integration Server package was unsuccessful. This error may result from improper configuration either in the IS server identification, or in the IS package.
<b>Action</b>	Check the error logs for more details about this error.
<b>PLDCFTE0000</b>	<b>An error occurred while creating Application Platform project facets in the project template. Cause: {0}</b>
<b>Explanation</b>	The creation of Application Platform project facets failed. Designer uses a template of Eclipse project facets when creating a service project. The Application Platform server uses these facets to determine if it can publish a project's module.
<b>Action</b>	Verify that all of the Application Platform components were installed in Designer.
<b>PLDCFTE0001</b>	<b>An error occurred in the Application Platform service project wizard while creating a project. Cause: {0}</b>
<b>Explanation</b>	The Application Platform service project wizard failed to create a project. The service project wizard creates a Designer project and performs tasks for each of the selected project facets.
<b>Action</b>	Review the error and verify that the project facet selections are valid.

<b>PLDCSPE0001</b>	<b>An error occurred while unpublishing a project resource from the server, configured for Application Platform.</b>
<b>Explanation</b>	An unexpected error occurred while unpublishing a project resource to the configured server.
<b>Action</b>	Verify that the project is still deployed on the server, that the server configuration is complete, and that the server can be started successfully.
<b>PLDCSPE0003</b>	<b>An error occurred while publishing a project resource to the Application Platform server.</b>
<b>Explanation</b>	An unexpected error occurred while publishing a project resource to the configured server.
<b>Action</b>	Verify that the project contents are valid, that the server configuration is complete, and that the server can be started successfully.
<b>PLDCSPE0004</b>	<b>Designer was unable to confirm the server's status during startup/shutdown. Details: {0}</b>
<b>Explanation</b>	The configured Application Platform server uses a polling ping approach to confirm if the remote server was successfully started or stopped. An error occurred during the ping operation and the status of the server could not be confirmed.
<b>Action</b>	If you are running the server via its native shell scripts, stop the server. Then try to restart the server in Designer.
<b>PLDCSPE0005</b>	<b>An exception was encountered while trying to synchronize the Application Platform server {0}'s run status in the Servers view. Cause: {1}</b>
<b>Explanation</b>	Designer was unable to synchronize the status of the Application Platform server. The Servers view for Application Platform has a configuration setting, which is used to control how Designer synchronizes its status against the server.
<b>Action</b>	Verify that the configuration parameters are correct. If the server properties section does not show any properties, delete the server configuration and recreate it.
<b>PLDCSPE0006</b>	<b>An error occurred while refreshing the Bundle Manager during the server status update to {1}. Cause: {2}</b>
<b>Explanation</b>	Designer failed to refresh the Bundle Manager when the server was started or stopped.
<b>Action</b>	Restart Designer. If the error persists, contact Software AG Global Support.

---

<b>PLDCSPE0009</b>	<b>An error occurred while updating the Application Platform server run status {0}. Cause: {1}</b>
<b>Explanation</b>	The Server's view for the Application Platform includes an entry for each configured server. Designer has received a WST server event, but an error has occurred while Designer attempted to update a server's run state.
<b>Action</b>	Review the server configuration in the Servers view and verify that the required server data is present. If the data is incorrect or some server properties are not displayed, delete the server configuration and recreate it.
<b>PLDCSPE0010</b>	<b>Error getting a URL for server {0} for verifying the run status of Integration Server. Cause: {1}</b>
<b>Explanation</b>	Designer was unable to obtain a URL for the server. The URL is needed in order to perform a ping operation against the server and to determine its current status.
<b>Action</b>	Verify that the server configuration properties are correct and try again.
<b>PLDCSPE0011</b>	<b>Unable to create Application Platform custom module.</b>
<b>Explanation</b>	Application Platform was unable to create a custom module. Application Platform uses a custom module in order to differentiate its server from other servers, like Tomcat, for example. The custom module is needed for adding all application projects containing the Application Platform project facets to the server. This is a critical component required for publishing bundles to the server.
<b>Action</b>	Contact Software AG Global Support.
<b>PLDCSPE0012</b>	<b>An unexpected error occurred while validating a project facet for module {0}. Cause: {1}</b>
<b>Explanation</b>	Designer could not validate a project facet for the module. Designer projects use facets in order to define capabilities, supported by the servers that host the projects. This ensures that no attempts for publishing a project to a server that does not support that project can be made.
<b>Action</b>	Review the error details and verify that the correct project facets are added to the project.
<b>PLDCSPE0013</b>	<b>An error occurred while adding server {0} to the lifecycle listener. Cause: {1}</b>
<b>Explanation</b>	Designer failed to add the server to the lifecycle listener. A collection of listeners is maintained for servers that are added or removed from Designer. The listeners contain all the information that is needed for performing server actions, like publishing or unpublishing project bundles.
<b>Action</b>	Restart Designer.

<b>PLDCSPE0014</b>	<b>An error occurred while synchronizing WST Servers View configuration updates. Cause: {0}</b>
<b>Explanation</b>	Application Platform uses the Eclipse WST subsystem server configuration data. An exception occurred while updating Application Platform plugins.
<b>Action</b>	Restart Designer.
<b>PLDCSPE0015</b>	<b>Missing credentials for server connection to the following url: {0}</b>
<b>Explanation</b>	No credentials have been provided to verify the server status.
<b>Action</b>	Verify that the server connection has appropriate credentials.
<b>PLDCSPW0000</b>	<b>An attempt was made to publish or unpublish a project module to a server that is not started.</b>
<b>Explanation</b>	An error occurred while publishing or unpublishing the project module because the server is not started. You can only publish or unpublish Application Server projects to a server, which is started.
<b>Action</b>	Verify that the server is started and repeat the action.
<b>PLDCSPW0002</b>	<b>No project modules were specified for the Application Platform publish operation.</b>
<b>Explanation</b>	The Application Platform publisher received a publish request but no project modules were included in the request.
<b>Action</b>	Confirm that there is at least one project added to the Application Platform server configuration and try to publish again.
<b>PLDCSPW0008</b>	<b>You must stop and restart the server after you change and save the server settings.</b>
<b>Explanation</b>	You must restart the server after you change the server settings. Many of the server settings you can configure in Designer update server configurations, such as port numbers.
<b>Action</b>	Restart the server, and then restart the configured server in Designer.
<b>PLDCUIE0001</b>	<b>An unexpected error occurred while configuring an Application Platform runtime environment.</b>
<b>Explanation</b>	The Application Platform runtime configuration failed. The runtime preference page is used to define the runtime instance used for Application Platform server and project configurations.
<b>Action</b>	Go to the Window/Preferences/Server/Runtime Environments preference panel and create a runtime instance for the Application Platform server. If no server entry is displayed, confirm that all the required Application Platform components were installed.

---

<b>PLDCUIE0002</b>	<b>Unable to verify preference setting {0} from the imported preferences file. Cause: {1}</b>
<b>Explanation</b>	Application Platform verifies all directory path preference settings during the import step. An error occurred while verifying one of the preference settings.
<b>Action</b>	Update the preference setting manually.
<b>PLDCUIE0003</b>	<b>{0} preference setting's directory path does not exist. ({1})</b>
<b>Explanation</b>	While importing Designer preferences, Application Platform encountered a preference setting that contains a non-existent directory path.
<b>Action</b>	Update the imported preference setting with a valid directory path.
<b>PLDCUII0000</b>	<b>No Application Platform runtime instance configuration was found.</b>
<b>Explanation</b>	Designer could not find an Application Platform runtime instance configuration. The Application Platform server and projects require a runtime configuration.
<b>Action</b>	Create a runtime instance in the 'Runtime Environments' preference page in Designer.
<b>PLDISPE0000</b>	<b>No Integration Server connections with valid URLs are defined in 'Window/Preferences/SoftwareAG/Integration Servers' for this Designer instance.</b>
<b>Explanation</b>	The Application Platform server was not able to start because there are no valid Integration Server connections defined.
<b>Action</b>	Configure a valid connection to a local Integration Server via the configuration panel. You can find the configuration panel in Window/Preferences/Software AG/Integration Servers.
<b>PLDISPE0007</b>	<b>An error occurred while retrieving the list of Integration Server connections. Details: {0}</b>
<b>Explanation</b>	Designer failed to retrieve the list of Integration Server connections. Designer maintains the list of connections in Window/Preferences/SoftwareAG/Integration Servers view.
<b>Action</b>	Contact Software AG Global Support.
<b>PLDISPE0008</b>	<b>No server connections are accessible in Window/Preferences/SoftwareAG/Integration Servers.</b>
<b>Explanation</b>	The Application Platform server configuration must have a Designer Integration Server connection defined for the same host and port. No servers were returned from the server connection manager.
<b>Action</b>	Verify that at least one server connection is defined in the preference view.

<b>PLDISWE0000</b>	<b>An error occurred while executing a task in the IS service wizard.</b>
<b>Explanation</b>	An error occurred while using the IS service wizard for creating POJO bean wrappers for Integration Server services.
<b>Action</b>	Restart Designer and try again.
<b>PLDISWE0001</b>	<b>The IS service wizard encountered an error while generating POJO classes for IS service: {0}</b>
<b>Explanation</b>	Application Platform was unable to produce Java POJO service wrappers for the selected IS service(s).
<b>Action</b>	Verify that the IS service is properly defined and retry the code generation step.
<b>PLDISWE0002</b>	<b>An Application Platform IS facet is not installed on this project.</b>
<b>Explanation</b>	The project is not configured to use the custom Application Platform facet for Integration Server extensions.
<b>Action</b>	Enable the Application Platform IS facet on the project's properties page.
<b>PLDISWI0003</b>	<b>IS services from IS product packages are not supported. Do not use this in a production setting.</b>
<b>Explanation</b>	The checkbox for selecting all IS services is provided only for demonstration purposes.
<b>Action</b>	Create new services to be used with the Application Platform.
<b>PLDNAVE0000</b>	<b>{0} model class is missing its identifier.</b>
<b>Explanation</b>	Every graph node in the Visual Navigator must have a unique identifier, which is provided by the model node provider implementation.
<b>Action</b>	Check if the class type is produced by a custom model node provider implementation and try to resolve the problem.
<b>PLDNAVE0002</b>	<b>Exception creating model node for object type {0}. Details: {1}</b>
<b>Explanation</b>	An error occurred while creating the model content for a graph node.
<b>Action</b>	Check if this is a custom implementation and try to resolve the problem.
<b>PLDNAVE0003</b>	<b>A class type is required when creating a category for a model object. Category name: {0}</b>
<b>Explanation</b>	You must provide a class type for all categories that you create for model node providers.
<b>Action</b>	Check if this is a custom implementation and try to resolve the problem.

---

<b>PLDNAVE0004</b>	<b>Exception creating list of package fragments from {0}. Details: {1}</b>
<b>Explanation</b>	An error occurred while the Visual Navigator was rendering a graph for the class dimension.
<b>Action</b>	Verify that there are no compilation errors in your projects and try again.
<b>PLDNAVE0005</b>	<b>Exception loading method {0}'s references. Details: {1}</b>
<b>Explanation</b>	The Method dimension in the navigator view could not find a reference to the method in Designer when rendering the graph view.
<b>Action</b>	Check the details of the exception and try to resolve the problem.
<b>PLDNAVE0006</b>	<b>Exception creating model nodes for class type {0} from native object {1}. Details: {2}</b>
<b>Explanation</b>	The Visual Navigator uses the currently selected object as input when it switches from one dimension to another. An error occurred while extracting the model from this input for the next dimension graph.
<b>Action</b>	Check the details of the exception and try to resolve the problem.
<b>PLDNAVE0007</b>	<b>Exception loading projects {0}'s references. Details: {1}</b>
<b>Explanation</b>	The Project dimension in the navigator view could not find a reference to the project in Designer when rendering the graph view.
<b>Action</b>	Check the details of the exception and try to resolve the problem.
<b>PLDNAVE0008</b>	<b>Exception loading resource {0}'s references. Details: {1}</b>
<b>Explanation</b>	The Resource dimension in the navigator view could not find a reference to the resource in Designer when rendering the graph view.
<b>Action</b>	Check the details of the exception and try to resolve the problem.
<b>PLDNAVE0010</b>	<b>Error executing model node providers for dimension {0} in the navigator view. Details: {1}</b>
<b>Explanation</b>	The Visual Navigator encountered an error while building the object model for its graph view.
<b>Action</b>	Check the details of the exception and try to resolve the problem.

<b>PLDNAVE0013</b>	<b>Universe with id {0} does not exist.</b>
<b>Explanation</b>	You can register universes containing unique IDs through the Visual Navigator API. However, the specified ID does not match any registered universe.
<b>Action</b>	Contact Software AG Global Support.
<b>PLDNAVE0014</b>	<b>Model node classname is required when creating an instance key.</b>
<b>Explanation</b>	Every graph node, created in the Visual Navigator must have a unique ID, which includes the model node class name.
<b>Action</b>	Contact Software AG Global Support.
<b>PLDNAVW0009</b>	<b>Unable to load annotation provider {0} for the navigator view. Details: {1}</b>
<b>Explanation</b>	The Visual Navigator failed to load the annotation provider, which is required for extending the content added to the graph view.
<b>Action</b>	Check the details of the exception and try to resolve the problem.
<b>PLDUTLE0000</b>	<b>An error occurred while updating Application Platform {0} project classpath. Cause: {1}</b>
<b>Explanation</b>	The project classpath failed to updated. The project classpath is updated when Application Platform project facets are installed or removed.
<b>Action</b>	Manually update the project classpath in Designer.
<b>PLDUTLE0001</b>	<b>Unable to resolve OSGi service: {0}</b>
<b>Explanation</b>	Designer could not resolve the OSGi service. This suggests that the OSGi service interface has no implementations in the service registry. A possible reason is that the bundle contributing an implementation did not activate as expected or is missing from the container.
<b>Action</b>	Restart Designer and retry.
<b>PLDWSE0000</b>	<b>An error occurred while adding Application Platform classpath containers to the {0} project. Cause: {1}</b>
<b>Explanation</b>	Adding Application Platform classpath containers failed with an error. When Application Platform project facets are added to a project, additional classpath containers are also added to the project. This error can be caused by a corrupt Java project.
<b>Action</b>	Delete the Java project and create it again. While creating the project, make sure that you do not delete project contents.

---

<b>PLDWSE0001</b>	<b>An invalid number format was found for Application Platform server configuration key: {0}. Value: {1}</b>
<b>Explanation</b>	The Application Platform server configuration key has an invalid number format. A numeric value is required.
<b>Action</b>	Verify that the server configuration value is non-null and numeric.
<b>PLDWSE0002</b>	<b>An attempt was made to register an Application Platform WST server instance with no server name.</b>
<b>Explanation</b>	A registration attempt was made for an Application Platform WST server instance with no server name. A server name is required.
<b>Action</b>	Verify that the server configuration has a server name and restart the server instance.
<b>PLDWSE0003</b>	<b>An error occurred while removing Application Platform classpath containers from the {0} project. Cause: {1}</b>
<b>Explanation</b>	Removing Application Platform classpath containers from the project failed with an error. When Application Platform project facets are removed from a project, additional classpath containers are also removed from the project. This error can be caused by a corrupt Java project.
<b>Action</b>	Delete the Java project and create it again. While creating the project, make sure that you do not delete project contents.
<b>ProfilesPageContentProvider_0 – Cannot resolve the server profiles from the base directory: {0}.</b>	
<b>Explanation</b>	An error occurred while resolving the server profiles using the base installation directory.
<b>Action</b>	Check if the ECLIPSE_HOME classpath variable for Designer points to the correct location. The default location is SAG_INSTALL_DIR/Designer/eclipse.

# 4 Application Platform Server Messages

---

<b>PLSAPPE0000</b>	<b>Need instance of MethodMetadataImpl, can not use type: {0}</b>
<b>Explanation</b>	Not all implementations of the metadata interfaces can be used for service invocation.
<b>Action</b>	Change your service configuration to use an acceptable implementation.
<b>PLSAPPE0001</b>	<b>OsgiService.validate failed because it cannot work with null metadata.</b>
<b>Explanation</b>	The OSGi service object was not properly initialized because of null metadata.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSAPPE0002</b>	<b>OsgiService.initializeService failed with exception: type({0}), msg({1})</b>
<b>Explanation</b>	The OSGi service was not properly initialized.
<b>Action</b>	Check the error logs for more details about this error.
<b>PLSAPPE0003</b>	<b>OsgiService.baseInvoke found a non-null svc object for {0} from an unexpected class loader; expected {1}, found {2}</b>
<b>Explanation</b>	The OSGi service invocation used a service class from an unknown, unexpected class loader. This has caused an OSGi container or a bundle configuration problem.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSAPPE0004</b>	<b>OsgiService.baseInvoke: unable to get service object for {0} from registry</b>
<b>Explanation</b>	Integration Server is expected to register an OSGi service to expose Integration Server artifacts in Application Platform. The OSGi service could not be found.
<b>Action</b>	Contact Software AG Global Support.

<b>PLSAPPE0005</b>	<b>Error initializing App Platform generated service binding {0}. Details: {1}</b>
<b>Explanation</b>	Integration Server (IS) calls Application Platform services that are exposed to IS by using a generated IS service.
<b>Action</b>	Unpublish the Application Platform service project and republish it again.
<b>PLSBDSE0000</b>	<b>Bundle deployment changes could not be initiated.</b>
<b>Explanation</b>	The Software AG Common Platform OSGi service, responsible for installing a bundle into the container, is missing.
<b>Action</b>	Restart the server and try again.
<b>PLSBDSE0001</b>	<b>The required OSGi deployment service is missing.</b>
<b>Explanation</b>	The Software AG Common Platform OSGi service, responsible for installing a bundle into the container, is missing.
<b>Action</b>	Restart the server and try again.
<b>PLSBDSE0006</b>	<b>{0} failed due to error: {1}</b>
<b>Explanation</b>	The install/uninstall operation failed because of the indicated error. The project bundle operation did not complete successfully and had to be retried after fixing the error.
<b>Action</b>	Review the error logs for more details about this error.
<b>PLSBDSE0007</b>	<b>Bundle installed, but failed to activate due to error: {0}</b>
<b>Explanation</b>	The project bundle was successfully installed in the runtime but its activation failed due to the specified error.
<b>Action</b>	Verify that all required libraries, with which the project has dependencies, are installed and available in the runtime.
<b>PLSBDSE0008</b>	<b>Installation failed! Bundle not present in installed bundles list</b>
<b>Explanation</b>	A bundle deploy call failed to install the specified bundle in the runtime. A possible cause is that the bundle deploy call was made to a runtime that does not contain the bundle jar file in the staging directory.
<b>Action</b>	If both runtime instance you are using and the server runtime configured in Designer are local, verify that they are the same.

---

<b>PLSBDSE0009</b>	<b>An exception was raised while uninstalling bundle {0}. Cause: {1}</b>
<b>Explanation</b>	The server encountered a fatal error while attempting to uninstall the referenced bundle.
<b>Action</b>	Check the error logs for more details about this error.
<b>PLSBDSE0010</b>	<b>An exception was raised while installing bundle {0}. Cause: {1}</b>
<b>Explanation</b>	The server encountered a fatal error while attempting to install the referenced bundle.
<b>Action</b>	Check the error logs for more details about this error.
<b>PLSBDSE0011</b>	<b>The bundle was not installed. The server was unable to copy {0} bundle into the bundle repository.</b>
<b>Explanation</b>	The bundle installation failed because the bundle could not be copied to the bundle repository.
<b>Action</b>	Perform a clean build and republish the bundle, if it is a project bundle. Inspect the server's bundle repository directory and the staging directories to determine condition of the bundle jar.
<b>PLSBDSE0014</b>	<b>An error occurred while transferring chunk {0} of bundle {1} from source {2}. Cause: {3}</b>
<b>Explanation</b>	The server encountered an exception while processing a chunk of resource transferred from Designer.
<b>Action</b>	Check the error logs for more details about this error.
<b>PLSBDSE0017</b>	<b>No test bundle with symbolic name: "{0}" and version: "{1}" is installed in the runtime! Unable to run test method: "{2}" in class: "{3}"</b>
<b>Explanation</b>	The bundle containing the JUnit App Platform Integration tests with the specified bundle symbolic name and version failed to install in the runtime.
<b>Action</b>	Deploy the project containing the integration tests to the running runtime instance before running the JUnit test through Designer.
<b>PLSBRME0000</b>	<b>The repository manager operation was not performed due to missing bundle key.</b>
<b>Explanation</b>	The repository manager operation failed because of a missing bundle key. Designer operations for publishing and unpublishing bundles from the server require a bundle key object.
<b>Action</b>	Contact Software AG Global Support.

**PLSBRME0001**      **Could not determine the location of the bundle repository from the location of the configured server.**

**Explanation**      Obtaining the bundle repository directory path failed. This directory contains project bundles and other bundles that are installed by the Bundle Publisher on the server's OSGi container. The bundle repository location is determined by the value, defined for the 'osgi.instance.area' configuration of the OSGi container running on the server.

**Action**              Verify that the server's config.ini file has a valid value for 'osgi.instance.area'.

**PLSBRME0002**      **Could not determine the server's OSGi instance area.**

**Explanation**      The 'osgi.instance.area' key, which is the value of the server's OSGi instance area could not be determined. The key is part of the required data included in the server's config.ini file. The problem may be caused by a corrupted config.ini file.

**Action**              Review the contents of the config. ini file.

**PLSBRME0004**      **Could not determine the bundle repository staging location from the location of the configured server.**

**Explanation**      Obtaining the bundle repository staging directory path failed. This is the directory path on the server where project bundles and other bundles, installed by the Bundle Publisher, are located when they are initially transferred to the server. This initial transfer is made prior to installing the bundles to OSGi container. The bundle repository location is determined by the value, defined for the 'osgi.instance.area' configuration of the OSGi container running in the server.

**Action**              Verify that the server's config.ini file has a valid value for 'osgi.instance.area'.

**PLSBRME0007**      **Unable to create directory path. {0}**

**Explanation**      The specified directory path could not be created.

**Action**              Verify that the specified path is valid on the file system and that there are no processes that are using it or that have locked it. Retry the operation afterwards.

**PLSBRME0008**      **An attempt was made to install or uninstall a bundle before the bundle has been transferred to the server's staging directory. {0}**

**Explanation**      Installing or uninstalling the bundle failed because the bundle is not transferred to the server. Bundles must first be transferred to the server before they can be installed or removed from its OSGi container.

**Action**              Retry the operation and verify that the bundle is transferred to the staging directory under the server profile's workspace.

---

<b>PLSBRME0009</b>	<b>An error occurred while refreshing the Application Platform project bundles in the bundle repository. {0}</b>
<b>Explanation</b>	Refreshing the Application Platform project bundles failed with an error. When you refresh the repository manager, the repository directory path is retrieved prior to registering the jars located there.
<b>Action</b>	Check the error logs for more details about this error.
<b>PLSBRME0010</b>	<b>Unable to refresh bundle file {0} in the bundle repository. {1}</b>
<b>Explanation</b>	Refreshing the bundle file in the bundle repository failed with an error. When you refresh the repository manager, it checks the OSGi manifest for each jar file in the directory. In this way the repository manager prepares for registering each bundle prior to installation.
<b>Action</b>	Check the error logs for more details about this error and try to determine if the jar file is corrupt.
<b>PLSBRME0011</b>	<b>Bundle {0}, which is transferred from Designer, does not match manifest {1} for this jar {2}.</b>
<b>Explanation</b>	The transferred bundle does not match the manifest for this jar. When Designer publishes bundles to the server, the bundle's name and version are included with the transfer request and they must match the name and version, declared in the jar file's OSGi manifest file.
<b>Action</b>	Perform a clean project build and repeat the operation.
<b>PLSBRME0012</b>	<b>Attempt to uninstall a bundle that is missing from the bundle repository manager. {0}</b>
<b>Explanation</b>	The Application Platform bundle repository manager maintains a map of all the bundles provisioned into the server. A bundle with this symbolic name and version was not found. This may have occurred because of changing the version of the project bundle without unpublishing the project bundle first.
<b>Action</b>	Unpublish the project bundle with the prior version and then update the project with the new version.
<b>PLSBRME0013</b>	<b>Attempt to uninstall a bundle missing from the bundle repository manager. {0}. (Note, another bundle version ({1}) is provisioned in the server.)</b>
<b>Explanation</b>	The Application Platform bundle repository manager maintains a map of all the bundles provisioned into the server. A bundle with this symbolic name and version was not found. This may have occurred because of changing the version of the project bundle without unpublishing the project bundle first.
<b>Action</b>	Unpublish the project bundle with the prior version and then update the project with the new version.

<b>PLSCOME0001</b>	<b>Unable to resolve the required OSGi service: {0}</b>
<b>Explanation</b>	A service implementation for the required OSGi service was not found in the OSGi registry.
<b>Action</b>	Check the error logs for more details about this error.
<b>PLSCOME0002</b>	<b>Data corruption was found on chunk {0} of bundle {1} during transfer from Designer to the server.</b>
<b>Explanation</b>	The hash computed by the server did not match the value computed by the sender. This may be caused by a faulty network or a modification from an intermediary.
<b>Action</b>	Verify that there are no network issues on proxy servers and so on.
<b>PLSCOME0003</b>	<b>Unable to delete this file: {0}</b>
<b>Explanation</b>	Your attempt to remove the file has failed according to your operating system.
<b>Action</b>	Verify that the file permissions are appropriate for the user that is running the server.
<b>PLSCOME0004</b>	<b>Unable to create this file: {0}</b>
<b>Explanation</b>	Your attempt to create the file has failed according to your operating system.
<b>Action</b>	Verify that the file permissions are appropriate for the user that is running the server.
<b>PLSCOME0005</b>	<b>Unable to create this directory path: {0}</b>
<b>Explanation</b>	Your attempt to create the directory path has failed according to your operating system.
<b>Action</b>	Verify that the file permissions are appropriate for the user that is running the server.
<b>PLSCOME0006</b>	<b>An illegal sequence was detected during a file transfer.</b>
<b>Explanation</b>	A chunk of a file resource that was transferred to the server had an unexpected sequence number.
<b>Action</b>	Repeat the failed operation.
<b>PLSCOME0007</b>	<b>Unable to read a non-existent file. {0}</b>
<b>Explanation</b>	An attempt was made to transfer a non-existent resource to the server.
<b>Action</b>	Verify that the expected files exist and repeat the operation.

<b>PLSCOME0008</b>	<b>The server does not have any of the expected message digest algorithms. {0}. At least one of these is required.</b>
<b>Explanation</b>	No message digest algorithms were found on the server. Application Platform needs a message digest to verify the integrity of data transferred from Designer to the server.
<b>Action</b>	Update Application Platform to include one of the digest algorithms.
<b>PLSCOME0009</b>	<b>File {0} is not a valid zip archive or it does not contain a manifest file.</b>
<b>Explanation</b>	The file is invalid. A Java archive file with manifest is expected.
<b>Action</b>	Review the file contents and update as necessary.
<b>PLSCOME0010</b>	<b>File {0} is not a valid bundle.</b>
<b>Explanation</b>	The file is invalid. An OSGi bundle with a valid manifest, containing the required OSGi headers, is expected.
<b>Action</b>	Review the file contents and update as necessary.
<b>PLSCOME0011</b>	<b>Connect operation timed out: {0}</b>
<b>Explanation</b>	A socket timeout error occurred when trying to connect to the JMX endpoint.
<b>Action</b>	Verify that target server is running and that the JMX port matches the server-side configuration.
<b>PLSGWIE0000</b>	<b>GatewayServiceImpl cannot work with NULL method metadata</b>
<b>Explanation</b>	The code, which calls GatewayServiceImpl, fails with an error. GatewayServiceImpl has no metadata and parameter details, which are required for identifying the service and invoking its method.
<b>Action</b>	Make sure that the code does not call the method, unless the required metadata is available.
<b>PLSGWIE0001</b>	<b>GatewayServiceImpl.delegateInvoke: unable to extract parameter values from IData for service ({0},{1}); caught: ({2}), msg({3})</b>
<b>Explanation</b>	The conversion of IData contents to Java method parameters failed. This may be caused by a mismatch between expected parameter types (as specified in metadata) and actual pipeline values (as presented during runtime). Check the exception message for more information about the cause.
<b>Action</b>	Compare the actual parameter values with the expected types, specified in the metadata.

<b>PLSGWIE0002</b>	<b>GatewayServiceImpl.delegateInvoke: unable to invoke targeted service ({0}.{1}); caught: ({2}), msg({3})</b>
<b>Explanation</b>	The invocation of the indicated method failed. This may be caused by a mismatch between expected parameter types (as specified in metadata) and actual pipeline values (as presented during runtime). Another possible cause is that the expected service is not registered with OSGi. Check the exception message for more information about the cause.
<b>Action</b>	Verify that the expected OSGi service is registered. Compare the actual parameter values with the expected types, specified in the metadata.
<b>PLSGWIE0003</b>	<b>GatewayServiceImpl.delegateInvoke: unable to extract IData from the object returned by ({0}.{1}); caught: ({2}), msg({3})</b>
<b>Explanation</b>	The conversion of Java object to IData failed. This may be caused by a mismatch between expected parameter types (as specified in metadata) and actual pipeline values (as presented during runtime). Check the exception message for more information about the cause.
<b>Action</b>	Compare the actual parameter values with the expected types, specified in the metadata.
<b>PLSGWIE0004</b>	<b>Unable to convert class name string ({0}) to class object using loader from {1}; caught type({2}), msg({3})</b>
<b>Explanation</b>	The named class from the metadata could not be loaded. This may be caused by a dependency issue.
<b>Action</b>	Make sure that the bundle that is hosting the targeted service can access the class.
<b>PLSGWIE0005</b>	<b>Unable to find method {0}({1}) on class {2}; caught type({3}), msg({4})</b>
<b>Explanation</b>	The method, expecting the indicated parameter types list, could not be found on the indicated class. This may be caused by a mismatch between expected parameter types (as specified in metadata) and available method signatures. Check the exception message for more information about the cause.
<b>Action</b>	Verify that the metadata is consistent with the targeted class.
<b>PLSGWIE0012</b>	<b>Unable to invoke method ({0}), a problem occurred with the conversion of input pipeline: {1}</b>
<b>Explanation</b>	The Application Platform gateway service encountered a problem converting the Integration Server pipeline to Java method parameters.
<b>Action</b>	Contact Software AG Global Support.

<b>PLSGWIE0013</b>	<b>Cannot invoke method {0}.{1}, no OSGi service is registered for {1}</b>
<b>Explanation</b>	The OSGi service was not found. GatewayService requires registration of the OSGi service.
<b>Action</b>	Verify that the indicated service is exposed by an active Application Platform bundle.
<b>PLSGWIE0014</b>	<b>Failed attempt to execute App Platform service {0} due to missing required metadata.</b>
<b>Explanation</b>	App Platform service implementations published to the Integration Server must contain additional metadata in a META-INF/gatewayMetadata.xml file. This information is needed to assist with the transformation to and from the Integration Server's data model.
<b>Action</b>	Review the server logs for any errors. Inspect the project bundle and verify its metadata file is present, and redeploy if necessary.
<b>PLSGWIE0015</b>	<b>Failed attempt to execute App Platform service {0}'s method {1}. The method signature does not match the signature expected by the Integration Server's generated service binding.</b>
<b>Explanation</b>	When Integration Server services execute service bindings of App Platform OSGi services, the IO signatures must match the OSGi service implementation.
<b>Action</b>	Republish the App Platform service project and verify the generated IS service bindings are updated.
<b>PLSGWIW0006</b>	<b>IData2Pojo.createCollectionValue: unable to convert collection object type: {0}</b>
<b>Explanation</b>	The Application Platform gateway failed to convert the indicated collection type from IData to Java type.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSGWIW0007</b>	<b>IData2Pojo.valueFromDataArray: unable to convert collection property type: {0}</b>
<b>Explanation</b>	The Application Platform gateway failed to convert the indicated property type from IData to Java type.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSGWIW0008</b>	<b>IData2Pojo.constructList(): expected element {0} to be IData but found {1} instead.</b>
<b>Explanation</b>	An unexpected data type was found in an IData parameter array.
<b>Action</b>	Verify that the calling code uses appropriate data types.

<b>PLSGWIW0009</b>	<b>IData2Pojo.constructList(): expected pipeline to hold an array but found {0} instead.</b>
<b>Explanation</b>	An unexpected data type was found in an IData parameter array.
<b>Action</b>	Verify that the calling code uses appropriate data types.
<b>PLSGWIW0010</b>	<b>IData2Pojo.constructCollection(): unexpected collection type: {0}</b>
<b>Explanation</b>	Application Platform encountered an unexpected collection data type while converting from IData to Java object.
<b>Action</b>	Verify that the calling code uses appropriate data types.
<b>PLSGWIW0011</b>	<b>Pojo2IData.collectionToData: unexpected collection data type: {0}</b>
<b>Explanation</b>	The Application Platform conversion from Java object to IData encountered an unexpected collection data type.
<b>Action</b>	Verify that the calling code uses appropriate data types.
<b>PLSOBEE0000</b>	<b>Unable to invoke service {0} after trying with {1} principal names.</b>
<b>Explanation</b>	None of the principal names associated with the current session were allowed to invoke the designated service.
<b>Action</b>	Check the log for previous entries that show failed invocation attempts by each principal. Make sure that you use a valid Integration Server user ID for the IS service invocation.
<b>PLSOBEE0002</b>	<b>An exception was caught while attempting to identify the Subject for the current session; attempting to invoke authorization service {0}; caught: {1}</b>
<b>Explanation</b>	Attempting to identify the Subject for the current session failed with an exception. This exception may be caused by a problem with the Authorization Service in Software AG Common Platform.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0003</b>	<b>Cannot introspect a NULL service for IS package {0}, metadata: {1}.</b>
<b>Explanation</b>	An attempt was made to construct a PipelineGenerator around a null OSGi Service object. This could indicate a problem with the Application Platform project preparation.
<b>Action</b>	Check the package name and metadata details in order to identify the targeted service.

---

<b>PLSOBEE0004</b>	<b>Cannot introspect a NULL class for IS package {0}, service: {1}, methods: {2}.</b>
<b>Explanation</b>	An attempt was made to construct a PipelineGenerator around a null Class object. This could indicate a problem with the Application Platform project preparation.
<b>Action</b>	Check the package name and metadata details in order to identify the targeted class.
<b>PLSOBEE0005</b>	<b>Unable to parse source details string {0}; caught this: type ({1}), msg({2})</b>
<b>Explanation</b>	An error was encountered while attempting to parse an XML string into source details objects.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0006</b>	<b>Unable to read contents from bundle URL {0}; caught this: type ({1}), msg({2})</b>
<b>Explanation</b>	An error was encountered while attempting to extract the contents of a file.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0007</b>	<b>A failure occurred during JAX-B unmarshalling from URL {0}; caught this: type ({1}), msg({2})</b>
<b>Explanation</b>	An error was encountered while attempting to convert the contents of a file.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0008</b>	<b>Unable to load class {0} from bundle {1}; caught this: type ({2}), msg({3})</b>
<b>Explanation</b>	The OSGi bundle was expected to contain the identified class.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0009</b>	<b>Unable to create IS services representing method {0} from the {1} class, in IS package {2}; caught this: type ({3}), msg({4})</b>
<b>Explanation</b>	Creating IS services representing the method failed. The problem may originated in the IS service creation or in the preparation of the IS pipeline used for service creation.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0010</b>	<b>A mismatch was found between source details and source annotation; class ({0}) has annotation, but source details have no element: {1}</b>
<b>Explanation</b>	The source details and source annotation do not match because the annotation service does not have an entry in the source details. This could indicate a problem in the Application Platform project preparation.
<b>Action</b>	Contact Software AG Global Support.

<b>PLSOBEE0011</b>	<b>Improper initialization using IS Service({0}), authz service ({1}), user({2}), cannot use null IS Service reference.</b>
<b>Explanation</b>	The initialization failed because the Metadata Extender did not find one or more elements. The element may be unavailable only for a short period.
<b>Action</b>	Try a subsequent invocation.
<b>PLSOBEE0012</b>	<b>Unable to initialize Bundle Tracker for Application Platform extender; caught this: type ({0}), msg({1})</b>
<b>Explanation</b>	This is an internal bundle initialization error. The bundle tracker that monitors user bundles for IS service metadata files could not be initialized correctly due to the specified error.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0013</b>	<b>PackageInstaller cannot write IS package zip into replicate directory ({0}); caught: type({1}), msg({2})</b>
<b>Explanation</b>	The PackageInstaller failed to put the package Zip file into the IS installation. This can be caused by the permission configuration on the file system.
<b>Action</b>	Verify that the directory permissions on the file system allow this operation.
<b>PLSOBEE0014</b>	<b>An attempt to extract the file ({0}) from the Jar file failed; caught: type({1}), msg({2})</b>
<b>Explanation</b>	The IS package Zip file could not be extracted from the Application Platform extender bundle.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0015</b>	<b>PackageInstaller cannot obtain a reference to Bundle Context after waiting {0} {1}; caught: type({2}), msg({3})</b>
<b>Explanation</b>	A problem was encountered while waiting for the extender bundle context.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0016</b>	<b>An attempt to invoke the IS service ({0}) failed; caught: type({1}), msg({2})</b>
<b>Explanation</b>	The Application Platform Package Installer failed to invoke the IS service(s), which are required for installation.
<b>Action</b>	Contact Software AG Global Support.

---

<b>PLSOBEE0017</b>	<b>IS Service({0}) returned NULL IData</b>
<b>Explanation</b>	The Application Platform Package Installer received a null result from the IS service.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0018</b>	<b>Improper initialization using IS Service({0}), authz service ({1}), user({2}), cannot use null authorization service reference.</b>
<b>Explanation</b>	The Metadata Extender could not find one or more expected elements. The elements may be unavailable only for a short period.
<b>Action</b>	Try a subsequent invocation.
<b>PLSOBEE0019</b>	<b>Improper initialization using IS Service({0}), authz service ({1}), user({2}), cannot use null/empty user ID.</b>
<b>Explanation</b>	The Metadata Extender could not find one or more expected elements. The elements may be unavailable only for a short period.
<b>Action</b>	Try a subsequent invocation.
<b>PLSOBEE0020</b>	<b>Unable to load class for service: {0}, from bundle BSN/ID: {1}/{2}, IS package: {3}</b>
<b>Explanation</b>	An interface named for exposure as an IS service could not be found. This means that the .class file for the interface could not be found.
<b>Action</b>	Verify that the fully qualified path to the interface is present in the classpath and that it is spelled correctly.
<b>PLSOBEE0022</b>	<b>Unable to load {0} bundle with state: {1}. Details: {2}</b>
<b>Explanation</b>	Application Platform was unable to access the bundle because of its state.
<b>Action</b>	Contact Software AG Global Support.
<b>PLSOBEE0023</b>	<b>Unable to remove IS services representing method {0} from the {1} class, in IS package {2}; caught this: type ({3}), msg({4})</b>
<b>Explanation</b>	Failed to remove the IS services that represent the method. The problem may originate in the IS service creation, or in the preparation of the IS pipeline used for service creation.
<b>Action</b>	Contact Software AG Global Support.

**PLSOBEE0024**      **Unable to create Integration Server client bindings for annotated OSGi service(s) in bundle {0}.**

**Explanation**      The generated project bundle is missing its OSGi manifest headers.

**Action**            Verify the project bundle's META-INF/MANIFEST.MF file is valid for the App Platform project bundle.

**PLSOBEE0025**      **The project bundle containing service class {0} is missing its gatewayMetadata.xml file.**

**Explanation**      A special metadata file is created and inserted in a project bundle if the bundle contains App Platform services when it's published into the server runtime container. This file is missing or corrupted.

**Action**            Review the Integration Server's OSGi server logs for errors. If the bundle is created using the Asset Build Environment (ABE) product, please review the configuration settings and inspect ABE logs for errors.

**PLSOBEE0026**      **The project bundle containing service class {0} is missing its Integration Server package annotation.**

**Explanation**      App Platform service implementations which are exposed to the Integration Server, must include the @ExposeToIS class annotation with packageName attribute set to a valid Integration Server package.

**Action**            Verify the source file is properly annotated and the package name is defined in the gatewayMetadata.xml file included in the deployed project bundle.

**PLSOBEE0027**      **Metadata mismatch for App Platform service class {0}'s {1} method. The number of parameters detected in the class ({2}) does not match the number defined in the gatewayMetadata.xml file ({3}).**

**Explanation**      The project bundle's META-INF/gatewayMetadata.xml file's metadata does not match the method signature of the currently deployed service.

**Action**            Rebuild and deploy the project bundle.

**PLSOBEE0028**      **Exception while introspecting App Platform service class {0}. Details: {1}**

**Explanation**      When an App Platform service contains complex request or response messages, Java Bean Introspection is used to analyze the class types in order to produce the necessary metadata to marshal the data to and from the Integration Server.

**Action**            Review the class and ensure it is a proper Java Bean.

<b>PLSOBEE0029</b>	<b>Illegal use of App Platform services with a recursive data model. Affected class: {0}.</b>
<b>Explanation</b>	App Platform service implementations with recursive object models are not supported.
<b>Action</b>	App Platform service implementations with recursive object models are not supported.
<b>PLSOBEI0001</b>	<b>An exception was caught while invoking IS service {0} with user {1}: {2}</b>
<b>Explanation</b>	The designated service could not be invoked.
<b>Action</b>	Check the exception message for more information about the cause of the failure. Attempt the same invocation with the service invoker using different user IDs. If one attempt succeeds, the failures may be ignored.
<b>PLSOBEW0021</b>	<b>Cannot change user ID to null/empty value, keeping previous value {0}</b>
<b>Explanation</b>	The default user ID was dynamically updated with an inappropriate value.
<b>Action</b>	Provide a non-empty value string.
<b>PLSSECE0000</b>	<b>Unauthorized! Method {0} execution not allowed</b>
<b>Explanation</b>	The specified method cannot be invoked by the currently logged user. The method has the @DenyAll annotation specified directly on it, or inherited from the type level.
<b>Action</b>	Change the method access security level by removing @DenyAll annotation and specifying the users that are allowed by using the @RolesAllowed annotation.
<b>PLSSECE0001</b>	<b>Unauthorized! Methods in type {0} cannot be invoked!</b>
<b>Explanation</b>	The methods in the specified class cannot be invoked because the @DenyAll annotation is invoked on them.
<b>Action</b>	Remove the @DenyAll annotation from the class level. Optionally, also specify explicitly the user roles that are allowed.
<b>PLSSECE0002</b>	<b>Unauthorized! User not in allowed roles to execute this method</b>
<b>Explanation</b>	The user that is currently logged in does not belong to the list of allowed roles to execute this method.
<b>Action</b>	Login as a user with a role that belongs to the list of allowed roles to execute the method and call the method again.

<b>PLSSECE0003</b>	<b>No valid authenticated subject found! An authenticated user is required when invoking this method.</b>
<b>Explanation</b>	In order to access this service method, you must be logged in with a user that has a valid account for the connected runtime.
<b>Action</b>	Ensure that the logged in user account has access rights to invoke the methods in the service.
<b>PLSSECE0005</b>	<b>Error injecting SecurityContext instance in field {0}! Reason: {1}</b>
<b>Explanation</b>	An error occurred while injecting an instance of the SecurityContext class into the field with the same type in the POJO service.
<b>Action</b>	Review the error log for more details about this error.
<b>PLSSECW0004</b>	<b>No security annotations found for @Secure annotated service type!</b>
<b>Explanation</b>	The service class with @Secure annotation does not contain any expected security annotations. Unless runtime authorization checks are performed, invocations will be allowed for all service methods.
<b>Action</b>	Ensure that correct authorization checks are performed for the methods in this service.
<b>PLSSISE0000</b>	<b>Error creating filter {0} IS_Transport login realm delegate may not be initialized properly! Reason: {1}</b>
<b>Explanation</b>	An error occurred while initializing the OSGi filter in order to obtain the IS_Transport Login Realm service.
<b>Action</b>	Review error logs for more information about this error.
<b>PLSUPGC0006</b>	<b>Unexpected error while verifying product source directory: {0}. Cause: {1}</b>
<b>Explanation</b>	The migration utility encountered an unexpected error.
<b>Action</b>	Confirm that the source directory path contains a product installation.
<b>PLSUPGE0002</b>	<b>App Platform server migration did not complete successfully. Cause: {0}</b>
<b>Explanation</b>	An error occurred while executing the server migration steps.
<b>Action</b>	Contact Software AG Global Support.

---

<b>PLSUPGE0003</b>	<b>Unable to determine App Platform product version for source installation using this product property file. {0}</b>
<b>Explanation</b>	The migration utility requires a product source version in order to determine the required migration tasks.
<b>Action</b>	Provide the product version by using the migration utility "-srcVersion" parameter.
<b>PLSUPGE0005</b>	<b>No servers are installed in this directory. {0}</b>
<b>Explanation</b>	To be rendered as a valid path, the specified directory must contain a 'profiles' directory, which contains one or more servers.
<b>Action</b>	Select another directory path that contains server profiles.
<b>PLSUPGE0007</b>	<b>Please ensure the current working directory contains the App Platform migrate.sh bat script.</b>
<b>Explanation</b>	The migration utility locates required components by using relative paths, which are offset from the current working directory.
<b>Action</b>	Update the working to a directory that contains the required Application batch script.
<b>PLSUPGE0008</b>	<b>The product properties file does not exist. {0}</b>
<b>Explanation</b>	Application Platform uses the product properties file in order to automatically detect the product version during migration.
<b>Action</b>	Ensure that the directory path is correct and it contains the product properties file.
<b>PLSUPGE0009</b>	<b>Unable to locate version string in product properties file.</b>
<b>Explanation</b>	The Application Platform migration script uses the product property file to detect the version, installed in the specified directory.
<b>Action</b>	Verify that the directory path is correct.
<b>PLSUPGE0011</b>	<b>Overinstall is not supported. The source and destination paths must be different.</b>
<b>Explanation</b>	The migration script can be run only in for side-by-side upgrade.
<b>Action</b>	Ensure that the source and the destination directories are different.
<b>PLSUPGE0012</b>	<b>Error resolving canonical path for directory: {0}. Cause: {1}</b>
<b>Explanation</b>	Application Platform uses relative paths to locate key directories. An error occurred while resolving a path to its canonical form. For example, this can happen when the parent path references have been removed ( ../ ).
<b>Action</b>	Verify that the directory path exists.

<b>PLSUPGE0021</b>	<b>Error copying project file "{0}" to destination directory: {1}. Cause: {2}</b>
<b>Explanation</b>	An error occurred while migrating the file to the destination directory.
<b>Action</b>	Copy the file manually.
<b>PLSUPGI0022</b>	<b>{0} files NOT migrated due to errors.</b>
<b>Explanation</b>	An error occurred while migrating some the files.
<b>Action</b>	Review the migration log in the installation directory's 'install/logs' folder to determine which project files were affected. Copy the required files manually.
<b>PLSUPGI0029</b>	<b>Project bundle files</b>
<b>PLSUPGI0030</b>	<b>{0} existing project bundles copied to destination (files from the destination were copied to the archive directory before overwriting).</b>
<b>Explanation</b>	The target installation contained project bundle file(s), and these files were replaced with the migrated ones. Copies of these files may be found in the archive directory under the common/migrate/ directory.
<b>Action</b>	No action necessary.
<b>PLSUPGW0010</b>	<b>Unable to detect product version for the specified directory. Cause: {0}</b>
<b>Explanation</b>	Application Platform was unable to determine the version of the installation path that was provided. This may have happened because the 'install/products' directory was deleted.
<b>Action</b>	Enter the version manually.
<b>PLSUPGW0017</b>	<b>These instances are missing in the destination installation. {0}</b>
<b>Explanation</b>	The source installation contains server instances that do not exist in the target installation. These servers will not be migrated for Application Platform.
<b>Action</b>	If required, create the missing server instances. Otherwise, proceed with the migration.
<b>PLSUPGW0019</b>	<b>Project file "{0}" overwritten in destination directory: {1}</b>
<b>Explanation</b>	The migration utility detected that a project file already exists in the destination directory. The contents are not overwritten.
<b>Action</b>	If you require to replace the old file with the new one, review the new file and copy it manually. This will overwrite the old file in the destination directory.

---

<b>PLSUPGW0028</b>	<b>Unable to archive existing files. Cause: {0}</b>
<b>Explanation</b>	If possible, the migration utility saves existing files before overwriting with migrated versions.
<b>Action</b>	No action is required. The migration will progress normally. However, the original files will not be retained.
<b>PLSUPGW0031</b>	<b>No zip entries detected in project file "{0}".</b>
<b>Explanation</b>	This suggests the project file was either an empty archive or its contents could not be migrated.
<b>Action</b>	Verify the file is a valid zip archive and copy it manually to the destination directory if necessary.
<b>PLSUPGW0032</b>	<b>Bundle {0} is missing its manifest.</b>
<b>Explanation</b>	OSGi bundles require manifests in the META-INF/MANIFEST directory of the archive. The migration tool will skip this bundle.
<b>Action</b>	No action required.
<b>PLSUPGW0033</b>	<b>Project bundle {0} contains a package {1} with import version range {2} that must be upgraded manually.</b>
<b>Explanation</b>	The migration utility has detected a customer project bundle which has a dependency to a different version of the App Platform SDK.
<b>Action</b>	Please update the source project to use this new SDK version.
<b>PLSWRPE0002</b>	<b>Unable to invoke service {0} after trying up to {1} principal names; caught: {2}</b>
<b>Explanation</b>	Invoking the service failed. This can be caused by a credentials issue, in which none of the principals associated with the current session was allowed to invoke the designated service. Another possible cause is a problem with the input parameters.
<b>Action</b>	Check the error logs for more details about this error. If the problem is caused by an authentication or authorization error, then search the log for more details about which principal names were successful or not. Verify that you are using a valid Integration Server user ID.
<b>PLSWRPE0003</b>	<b>An exception was caught while marshalling input object to IData for service {0}; {1}</b>
<b>Explanation</b>	The conversion of input bean to IData for the designated service failed with an exception.
<b>Action</b>	Check the exception message for more information about this error.

**PLSWRPE0004**      **An exception was caught while unmarshalling IData to output object for service {0}: {1}**

**Explanation**      The conversion of IData to output bean for the designated service failed with an exception.

**Action**            Check the exception message for more information about this error.

**PLSWRPE0005**      **Input argument to ServiceWrapper.invoke() needs 'InputData' annotation.**

**Explanation**      The invoke method requires specific type characteristics.

**Action**            Use a different input type, or add the required annotation.

**PLSWRPE0006**      **Return type for ServiceWrapper.invoke() needs 'OutputData' annotation**

**Explanation**      The invoke method requires specific output type characteristics.

**Action**            Use a different return type, or add the required annotation.

**PLSWRPE0007**      **Unable to fill data for key {0} with parameter ({1}), dim>1 not yet supported**

**Explanation**      This is a temporary shortcoming in the implementation.

**Action**            Contact Software AG Global Support.

**PLSWRPE0008**      **Unable to fill object {0} for key ({1}), dim>1 not yet supported**

**Explanation**      This is a temporary shortcoming in the implementation.

**Action**            Contact Software AG Global Support.

**PLSWRPE0010**      **An exception was caught while attempting to identify the Subject for the current session in order to invoke IS service {0}; current user is identified by {1}, exception: {2}**

**Explanation**      Identifying the Subject for the current session failed with an exception. This can indicate a problem with the Authorization Service in the Software AG Common Platform.

**Action**            Contact Software AG Global Support.

**PLSWRPE0012**      **ServiceWrapper cannot work with NULL return type.**

**Explanation**      An attempt was made for ServiceWrapper to work with a NULL return type. This can be caused by a problem with the Authorization Service source code generation.

**Action**            Contact Software AG Global Support.

<b>PLSWRPI0009</b>	<b>An exception was caught while invoking IS Service ({0}) with user ({1}): {2}</b>
<b>Explanation</b>	Invoking the designated service failed with an exception. Check the exception message for more information about the cause of failure.
<b>Action</b>	Attempt the same invocation with the service invoker using different user IDs. If one attempt succeeds, the failures may be ignored.

# 5 Business Rules Messages

---

**AbstractMainPage\_projectOutdatedError – The project is outdated. Please upgrade to the current version.**

**Explanation** The version of the rule project to be exported is outdated.

**Action** Right-click the rule project in the Rules Explorer view and select Upgrade project.

**AbstractMainPage\_serverVersionOutdated – The server version is outdated. Please upgrade the server to the current version.**

**Explanation** The version of the rules environment on the server is older than the version of the rule project to be exported.

**Action** Upgrade the server.

**ActionSelectionWizardPage\_InputOrOutputDataModelIsMissing – The selected action is invalid, because one of its data models is missing.**

**Explanation** An action can have multiple data models. The data model files are referenced in the xml of the action. If one or more of the data models are missing, this error occurs. Action data models are not shown in the Rules Explorer view.

**Action** Clean all projects in Software AG Designer. If that did not help and the data models are not shown in the Navigator view, the action might be corrupted. Try to create an action that uses the same type of data models. If this should fail, please contact your system administrator.

**EditorProjectToNewComposite\_ErrorDescription – Could not open the editor:**

**Explanation** There is an asset in the specified rule project that has a version newer than the version of the installed Rules Development plugin.

**Action** Update the Rules Development plugin of Software AG Designer.

**EditorProjectToNewComposite\_ErrorMessage – The rule project "{0}" was created with a newer version of Software AG Designer ({1}). Please upgrade the Rules Development feature.**

**Explanation** There is an asset in the specified rule project that has a version newer than the version of the installed Rules Development plugin.

**Action** Update the Rules Development plugin of Software AG Designer.

**EditorUpgradeComposite\_ErrorMessage – The rule project "{0}" is outdated.**

**Explanation** The rule project "{0}" is outdated. It needs to be updated first.

**Action** Right-click the rule project in the Rules Explorer view and select "Update".

**EditorUtility\_file\_must\_not\_be\_null – File must not be null**

**Explanation** An error occurred while opening the editor for the file.

**Action** Try to refresh your rule project. See error log for additional information.

**EditorUtility\_no\_active\_WorkbenchPage – No active workbench page**

**Explanation** No active workbench could be obtained for opening the file.

**Action** Try to restart Software AG Designer. See log for additional errors.

**EditorUtility\_no\_editorInput – Could not get an editor input for the given element**

**Explanation** No editor input could be created for the file.

**Action** Check, if the file is corrupt. See log for detailed information about the error.

**EventModelSourceSelectionPage\_FileNotFoundError – There is no file at the specified location.**

**Explanation** In the textbox on page two of the New Event Model wizard, the given location for the schema file is invalid.

**Action** Use the browse button on the same page to search for an existing schema file, or enter a valid location for a schema file.

**EventModelSourceSelectionPage\_File\_Not\_Parsed – Error while importing Event Type. File could not be parsed.**

**Explanation** Problem while trying to parse an NSRecord from the chosen XSD.

**Action** Make sure the chosen file is an event type (payload), or select a different file.

**EventModelSourceSelectionPage\_Stream\_Null – Error while retrieving contents of Event Type.**

<b>Explanation</b>	NSRecords could not be created from the given schema file.
<b>Action</b>	Make sure the selected schema file is a valid event type (payload), or select a different file.

**ExportWizard\_ExportFailedMessage – Export failed**

<b>Explanation</b>	Export failed.
<b>Action</b>	Please consult the log file for further information.

**ExportWizard\_ExportFailedReason – Could not export project. Make sure you have selected the right server and that it is configured correctly. See documentation, the Eclipse Error Log and check the IS Server log for more detailed information about the error.**

<b>Explanation</b>	The rule project could not be exported.
<b>Action</b>	Make sure that you have selected the right server and that it is configured correctly. For more information, consult the product documentation and the Eclipse Error Log.

**ISExporter\_ServerNotFound – Couldn't find server: "{0}"**

<b>Explanation</b>	The specified Integration Server could not be found.
<b>Action</b>	In Software AG Designer preferences, check if the selected Integration Server is available and configured properly.

**MWS\_InternalError An internal server error occurred. To resolve the problem please check the My webMethods Server log.**

<b>Explanation</b>	This happens when an error in Rule Management Console occurs.
<b>Action</b>	Check the Eclipse and MWS log for more information.

**MainIsExportPage\_pingServiceNotExisting – Unable to contact the Rule engine server.**

<b>Explanation</b>	An error occurred while invoking the ping service on the Integration Server.
<b>Action</b>	Try again. Check the versions of Software AG Designer and the Integration Server. Check connection.

**MainMwsImportPage\_ProjectToNewErrorMessage – The remote rule project "{0}" was created with a newer version of Software AG Designer ({1}). Please upgrade the Rules Development feature.**

<b>Explanation</b>	Cannot import a rule project that was created with a newer version of the Rules Development feature.
<b>Action</b>	Upgrade the Software AG Designer plugins.

**MainMwsImportPage\_WillUpgradeImportedProjectInfo – Outdated rule projects will be automatically upgraded to the current version of the Rules Development feature.**

**Explanation** The rule project in the My webMethods Server repository is outdated. It will be updated in a temporary location before it is copied into the workspace.

**Action** n/a

**MetaphorCorrectionProcessor\_error\_quickassist\_message – An error occurred while computing quick assists. Check log for details.**

**Explanation** An error occurred while computing quick assists.

**Action** Check log for details.

**MetaphorCorrectionProcessor\_error\_quickfix\_message – An error occurred while computing quick fixes. Check log for details.**

**Explanation** An error occurred while computing quick fixes.

**Action** Check log for details.

**MetaphorCorrectionProcessor\_error\_status – Exception while processing quick fixes or quick assists**

**Explanation** An error occurred while computing quick fixes or quick assists.

**Action** Check log for details.

**MetaphorSuppressWarningsProposal\_Error\_Msg – An exception occurred while applying the quick fix**

**Explanation** An error occurred while applying the quick fix.

**Action** Please see the dialog and/or error log for additional information on the error.

**NewEventModelWizard\_ErrorCreatingEventModel – Error creating event model**

**Explanation** An error occurred while importing the event type .xsd-file. NSRecord (event model) files may have not been created.

**Action** Try again, or try another schema file. Refer to the logged exception.

**ParameterSelectionComposite\_SelectAtLeastOne\_Error – Select at least one data model for a parameter.**

**Explanation** No data model is selected as an input or output parameter.

**Action** On the current wizard page, select a data model and move it to the right to make it available as parameter.

**Resources\_OutOfSyncResources\_Msg – Some resources are out of synch**

**Explanation** One or more resources are out of synch with the file system. They need to be refreshed inside Software AG Designer.

**Action** Please refresh your rule project.

**Resources\_OutOfSync\_Msg – Resource "{0}" is out of synch with the file system**

**Explanation** One or more resources are out of synch with the file system. They need to be refreshed inside Software AG Designer.

**Action** Please refresh your rule project.

**RuleFile\_ErrorParsingDTXMLForProcessingMode – Error parsing decision table XML for ProcessingModeType.**

**Explanation** An error occurred while parsing one of the selected files.

**Action** Try to deselect the files and retry your selection.

**RuleLocalLaunchRunner\_ErrorUndeploying\_Msg – An error occurred while undeploying the rule project [%s].**

**Explanation** The execution of the launch was terminated abnormally, and an attempt was made to clean up the rule project. The attempt failed.

**Action** Start Software AG Designer with -clean option. If the problem persists, send the details of this exception to your technical support.

**WOKDELE0016** Unable to invoke REST call to get Business Rules dashboard

**WOKDELI0013** Close

**WOKDELI0014** Click to view/edit decision entity

**WOKDELI0015** View/Hide

**WOKDTDE0003** Unable to retrieve Business Rules decision entity from REST service.

<b>WOKDTDE0004</b>	<b>Selected decision entity not found.</b>

<b>WOKDTSI0000</b>	<b>Info</b>
<b>WOKDTSI0001</b>	<b>Processing Mode:</b>
<b>WOKDTSI0002</b>	<b>Description:</b>
<b>WOKMRIE0011</b>	<b>Operation not supported</b>
<b>Explanation</b>	The operation attempted to be executed is not supported
<b>WOKMRIE0012</b>	<b>{0} is required</b>
<b>Explanation</b>	If configuration is enabled, {0} is required
<b>WOKMRIE0016</b>	<b>The URL "{0}" is invalid</b>
<b>Explanation</b>	The URL resulting from the entered values is invalid.
<b>WOKMRII0006</b>	<b>The Integration Server is online.</b>
<b>Explanation</b>	The Integration Server is online.
<b>WOKMRII0009</b>	<b>Business verification</b>
<b>Explanation</b>	Business verification REST server configuration
<b>Action</b>	Configure here the one single REST server for doing business verification
<b>WOKMRII0010</b>	<b>Master Integration Server</b>
<b>Explanation</b>	Connection Master Integration Server (wM Business Rules)
<b>WOKMRII0013</b>	<b>The configuration is valid.</b>
<b>Explanation</b>	The configuration is valid.
<b>WOKMRII0014</b>	<b>Data provider</b>
<b>Explanation</b>	Data provider REST service configuration
<b>Action</b>	Configure here the one single REST service for the Data provider

<b>WOKMRH0015</b>	<b>Principal types</b>
<b>Explanation</b>	Principal types configuration
<b>Action</b>	Here you can configure the principal types that should be visible in the PrincipalPicker
<b>WOKMRIW0000</b>	<b>An internal error occurred</b>
<b>Explanation</b>	Integration Server URL is not accessible: {0}
<b>Action</b>	Please check specified host and port and make sure Integration Server is running.
<b>WOKMRIW0001</b>	<b>Integration Server credentials are missing.</b>
<b>Explanation</b>	Username and password are needed for authentication.
<b>Action</b>	Please provide values for username and password.
<b>WOKMRIW0002</b>	<b>Integration Server password is missing.</b>
<b>Explanation</b>	The password is needed for authentication.
<b>Action</b>	Please provide a password for the Integration Server.
<b>WOKMRIW0003</b>	<b>Integration Server host and/or port are missing.</b>
<b>Explanation</b>	A valid hostname and port are needed to access Integration Server.
<b>Action</b>	Please provide host and port to access Integration Server.
<b>WOKMRIW0005</b>	<b>The server specified is not an Integration Server</b>
<b>Explanation</b>	A server has been contacted with the information provided. However it does not seem to be an Integration Server.
<b>Action</b>	Please check whether the server specified is an Integration Server. If this is the case this warning can be ignored.
<b>WOKMRIW0008</b>	<b>Authentication failed.</b>
<b>Explanation</b>	Authentication failed with the credentials provided. Please check username and password.
<b>Action</b>	Please check username and password.

## 6 CentraSite Messages

---

**E\_assertionNotFound30000** – Signifies that a particular publisher assertion (consisting of two businessKey values, and a keyed reference with three components) cannot be identified in a save or delete operation.

**Explanation** The specified publisher assertion does not exist in the registry.

**Action** Please make sure the publisher assertion exists before deleting or updating it.

**E\_authTokenRequired10120AUTH** – The authentication token value is missing in the authInfo argument of the UDDI request.

**Explanation** The authInfo element is not present in the UDDI request. CentraSite requires the authInfo element to be present in the request with a valid authToken.

**Action** Please make sure that authInfo is present in UDDI request.

**E\_authTokenRequired10120DEF** – Signifies that an invalid authentication token was passed to an API call that requires authentication.

**Explanation** The authentication token passed is not valid.

**Action** Please fetch the authentication token using get\_authToken API and use it in the API.

**E\_authTokenRequired10120INVAUTH** – The authentication token value {0} passed in the authInfo argument of the UDDI request is not valid.

**Explanation** The authentication token passed is not valid.

**Action** Please fetch the authentication token again using get\_authToken API and use it in the API.

**E\_fatalError10500** {0}

**Explanation** Fatal error occurred while processing the request.

**Action** Please retry and make sure the UDDI request is valid.

**E\_fatalError10500APPDOWN – UDDI application not properly initialized. Please try restarting the CentraSite server.**

**Explanation** UDDI application received UDDI API calls before the UDDI web application initialized properly.

**Action** Restart the CentraSite server.

**E\_fatalError10500CUSTOWN – Custody and Ownership Transfer API calls are not supported when security policy is Deactivated**

**Explanation** CentraSite needs a security policy to be activated for processing the Custody and Ownership Transfer API.

**Action** Please activate a security policy.

**E\_fatalError10500INFOSEL – Attribute infoSelection is not present in request.**

**Explanation** The get\_registeredInfo API requires the infoSelection attribute. If it is not present in the request then this error will occur.

**Action** Please make sure the infoSelection attribute is present in the get\_registeredInfo request.

**E\_fatalError10500INVFINDGET – Invalid find\_xx or get\_xx api specified in the subscriptionFilter**

**Explanation** The subscriptionFilter does not contain the valid UDDI v3 subscription filter.

**Action** Please make sure the subscription filter in the save\_subscription request is valid.

**E\_fatalError10500KREFNATB – KeyedReference does not contain required attribute.**

**Explanation** The KeyedReference should contain the keyValue attribute.

**Action** Please make sure the keyedReference in the request has attribute keyValue.

**E\_fatalError10500MISCFAT – Saving subscription failed due to internal registry error.**

**Explanation** Internal registry error.

**Action** Please retry the request.

**E\_fatalError10500MSE – Search limit exceeded, maximum allowed is {0}. Contact node operator to increase the search limit.**

**Explanation** Maximum search limit reached.

**Action** Please reduce the number of search keys in the inquiry request or increase the search limit via the System Management Hub.

**E\_fatalError10500PERF – Performance metrics with key {0} cannot be saved. Please make sure Performance Log is enabled in SMH.**

**Explanation** The user is trying to save performance metrics, but the performance log is disabled in SMH. Performance metrics will be saved only if the performance log is enabled in SMH.

**Action** Please make sure the performance log is enabled in SMH.

**E\_fatalError10500SUBKEXP – The subscription with subscriptionKey {0} has expired. Please renew this subscription.**

**Explanation** The subscription has expired as the specified expiration date has been reached.

**Action** Please renew the subscription by saving it with a new expiration date.

**E\_invalidCombination40500QUA – The combination of Qualifiers is not allowed**

**Explanation** Invalid find qualifier combinations were found in the request.

**Action** Please make sure the combination of find qualifiers present in the inquiry request is valid. The invalid combinations are: andAllKeys, orAllKeys and orLikeKeys are mutually exclusive; sortByNameAsc and sortByNameDesc are mutually exclusive; sortByDateAsc and sortByDateDesc are mutually exclusive; combineCategoryBags, serviceSubset and bindingSubset are mutually exclusive; exactMatch and approximateMatch are mutually exclusive; exactMatch and caseInsensitiveMatch are mutually exclusive; binarySort and UTS-10 are mutually exclusive, as are all collation algorithm tModels with each other; diacriticSensitiveMatch and diacriticInsensitiveMatch are mutually exclusive; exactMatch and diacriticInsensitiveMatch are mutually exclusive; caseSensitiveSort and caseInsensitiveSort are mutually exclusive; caseSensitiveMatch and caseInsensitiveMatch are mutually exclusive.

**E\_invalidCompletionStatus30100 – {0} is not a valid completion status.**

**Explanation** An invalid value was passed for completion status argument. Valid completion status are status:complete, status:fromKey\_incomplete, status:toKey\_incomplete and status:both\_incomplete.

**Action** Please provide a proper completion status.

**E\_invalidKeyPassed10210 – No matching key found in the registry for {0}.**

**Explanation** CentraSite does not contain any UDDI entity with the key specified in the UDDI request.

**Action** Please make sure the key specified in the request is valid.

**E\_invalidKeyPassed10210BEBEK – Could not find the business entity corresponding to the business key.**

**Explanation** CentraSite does not contain any business entity with the key specified in the UDDI request.

**Action** Please make sure the business key specified in the request is valid.

**E\_invalidKeyPassed10210BEBK – Could not find the business service corresponding to the binding key {0}.**

**Explanation** CentraSite does not contain a business service corresponding to the service key specified in the binding template.

**Action** Please make sure the service key specified in the request is valid.

**E\_invalidKeyPassed10210BEMAT – No businessEntity in the UDDI registry matched the key {0}.**

**Explanation** CentraSite does not contain any business entity with the key specified in the UDDI request.

**Action** Please make sure the business key specified in the request is valid.

**E\_invalidKeyPassed10210BKBE – Tried to get a businessEntity with key {0}, but key did not match with any existing businessEntities.**

**Explanation** CentraSite does not contain any business entity with the business key specified in the UDDI request.

**Action** Please make sure the business entity with the specified business key exists in CentraSite.

**E\_invalidKeyPassed10210BKINV – BusinessKey invalid.**

**Explanation** The BusinessKey specified in the request is invalid.

**Action** Please make sure the specified businessKey is valid.

**E\_invalidKeyPassed10210BKMAT – No bindingTemplate in the UDDI registry matched the key {0}.**

**Explanation** CentraSite does not contain a binding template with the key specified in the UDDI request.

**Action** Please make sure the binding key specified in the request is valid.

**E\_invalidKeyPassed10210BSMAT – No businessService in the UDDI registry matched the key {0}.**

**Explanation** CentraSite does not contain a business service with the key specified in the UDDI request.

**Action** Please make sure the service key specified in the request is valid.

**E\_invalidKeyPassed10210BSNE – A businessService with key {0} does not exist.**

**Explanation** CentraSite does not contain a business service with the key specified in the UDDI request.

**Action** Please make sure the service key specified in the request is valid.

**E\_invalidKeyPassed10210BSNF – Could not find the businessService corresponding to the service key {0}**

**Explanation** CentraSite does not contain a business service corresponding to the service key specified in the binding template.

**Action** Please make sure the service key specified in the request is valid.

**E\_invalidKeyPassed10210BT – The bindingKey of the bindingTemplate to save does not match any existing bindingTemplate in the UDDI registry.**

**Explanation** CentraSite does not contain a binding template with the key specified in the UDDI request.

**Action** Please make sure the binding key specified in the request is valid.

**E\_invalidKeyPassed10210BTNF – Could not find the binding Template corresponding to the binding key {0}**

**Explanation** CentraSite does not contain a binding template with the key specified in the UDDI request.

**Action** Please make sure the binding key specified in the request is valid.

**E\_invalidKeyPassed10210BTSK – The bindingTemplate to save does not contain a serviceKey.**

**Explanation** The binding template to be saved does not contain the service key required for this binding template. The service key has to be specified when saving a binding template.

**Action** Please specify a valid service key in the UDDI request.

**E\_invalidKeyPassed10210CAT – Invalid tModelKey in categoryBag.**

**Explanation** The category bag should contain keyedReference/KeyedReferenceGroups with valid values for tModelKey and KeyValue.

**Action** Please specify valid values for tModelKey/KeyValue in the category bag.

**E\_invalidKeyPassed10210DBE – Tried to delete a businessEntity with key {0}, but key did not match with any existing businessEntities.**

**Explanation** CentraSite does not contain any business entity with the business key specified in the delete request.

**Action** Please make sure the business key specified in the request is valid.

**E\_invalidKeyPassed10210DEF – Signifies that the uuid\_key value passed did not match with any known key values.**

**Explanation** CentraSite does not contain any UDDI entity with the key specified in the UDDI request.

**Action** Please make sure the key specified in the request is valid.

**E\_invalidKeyPassed10210DELSUB – Tried to delete a subscription with key {0}, but key did not match with any existing subscriptions.**

**Explanation** CentraSite does not contain any subscription with the key specified in the delete request.

**Action** Please make sure the key specified in the request is valid.

**E\_invalidKeyPassed10210EMTTMBAG – Tmodel bag is empty**

**Explanation** TModelBag cannot be empty, but the UDDI request contains an empty tModelBag.

**Action** Please make sure tModelBag contains the required values.

**E\_invalidKeyPassed10210FRMK – No businessEntity in the UDDI registry matched the fromKey {0}**

**Explanation** The fromKey specified in the add\_publisherAssertion request is either invalid, or no business entity matched the fromKey.

**Action** Please make sure the fromKey specified in the request is valid.

**E\_invalidKeyPassed10210HIDTM – Tried to delete a tModel with key {0} which is not hidden.**

**Explanation** Hidden Tmodels cannot be deleted.

**Action** Hidden tModels cannot be deleted. Please update the tModel and delete it.

**E\_invalidKeyPassed10210IBAG – Invalid tModelKey in identifierBag.**

**Explanation** The identifier bag should contain keyedReference/KeyedReferenceGroups with valid values for tModelKey and KeyValue.

**Action** Please specify valid values for tModelKey/KeyValue in the identifier bag.

**E\_invalidKeyPassed10210INVKEY – The Key {0} is invalid.**

**Explanation** The specified key is not valid.

**Action** Please make sure the key is valid according to the UDDI standard.

**E\_invalidKeyPassed10210INVTMK – Invalid tModelKey {0}.**

**Explanation** CentraSite does not contain a TModel with the key specified in the UDDI request.

**Action** Please specify a valid tModelKey in the UDDI request.

**E\_invalidKeyPassed10210KBAGK – key {0} passed in the key bag does not match any businessEntity or tModel.**

**Explanation** CentraSite does not contain a business entity or tModel with the key specified in key bag of the discard\_transferToken request.

**Action** Please specify a valid business key or tModel key in the key bag.

**E\_invalidKeyPassed10210KREF – KeyedReference should be passed !**

**Explanation** The publisher assertion should contain a keyedReference and it is missing in the UDDI request.

**Action** Please specify a KeyedReference for the publisher assertion.

**E\_invalidKeyPassed10210MITS – Multiple instances of the same {0} {1} were passed.**

**Explanation** Keys should be unique for all UDDI entities. The UDDI request contains an existing UDDI entity key.

**Action** Please provide a unique key for the UDDI entity.

**E\_invalidKeyPassed10210MREF – The tModelKey cannot have multiple references to be deleted.**

**Explanation** Multiple references of a tModelKey were specified in the UDDI request.

**Action** Please make sure that a single reference exists for a single tModelKey in the request.

**E\_invalidKeyPassed10210NBE – Tried to update a businessEntity with key {0}, but no businessEntity in the UDDI registry matched the key.**

**Explanation** CentraSite does not contain any business entity with the business key specified in the save request.

**Action** Please make sure the business key specified in the request is valid.

**E\_invalidKeyPassed10210NULTM – Tried to delete a tModel with key, but the key did not match with any existing tModel or it is null.**

**Explanation** CentraSite does not contain any TModel with the key specified in the delete request.

**Action** Please make sure the key specified in the request is valid.

**E\_invalidKeyPassed10210OPINFMAT – No OperationalInfo in the UDDI registry matched the key {0}.**

**Explanation** The operational info cannot be found for the given key.

**Action** Please make sure the key specified in the request is valid.

**E\_invalidKeyPassed10210PAINV – The Publisher Assigned Key {0} is not a valid key.**

**Explanation** The key provided for the UDDI entity by the publisher is not valid.

**Action** Please specify the key according to the UDDI standard

**E\_invalidKeyPassed10210PANAL – The Publisher Assigned Key is not allowed.**

**Explanation** The user is not allowed to assign keys for the UDDI entity (CentraSite object).

**Action** Save the UDDI entity without assigning a key to it.

**E\_invalidKeyPassed10210SUBMAT – No subscription in the UDDI registry matched the key {0}.**

**Explanation** CentraSite does not contain any subscription with the key specified in the delete request.

**Action** Please make sure the key specified in the request is valid.

**E\_invalidKeyPassed10210SUBNE – The subscription having subscriptionKey as {0} does not exist.**

**Explanation** CentraSite does not contain any subscription with the key specified in the delete request.

**Action** Please make sure the key specified in the request is valid.

**E\_invalidKeyPassed10210TMIBK – Invalid tModelKey in tModelInstanceInfo for BindingKey {0}.**

**Explanation** The specified binding template does not contain a valid tModelKey in tModelInstanceInfo.

**Action** Please make sure the tModelKey specified in tModelInstanceInfo of the binding template is valid.

**E\_invalidKeyPassed10210TMKN – TModelvalue should not be null !**

**Explanation** The key value of KeyedReference does not contain a valid value.

**Action** Please specify a valid key value for the KeyedReference.

**E\_invalidKeyPassed10210TMKNF – No matching tmodelkey was found. Please check that the tModelKey is of relationship type.**

**Explanation** CentraSite does not contain a tModel with the key specified in the UDDI request.

**Action** The tModelKey of the keyedReference in the publisher assertion must be the key of the uddi-org:relationships tModel.

**E\_invalidKeyPassed10210TMKREF – tModelKey not specified in one of the keyedReferenceGroup.**

**Explanation** The tModel key has to be specified for all KeyedReferenceGroups.

**Action** Please specify a valid tModel key for all KeyedReferenceGroups.

**E\_invalidKeyPassed10210TMMAT – No tModel in the UDDI registry matched the key {0}.**

**Explanation** CentraSite does not contain a tModel with the key specified in the UDDI request.

**Action** Please specify a valid tModel key in the UDDI request.

**E\_invalidKeyPassed10210TMNF – The specified tModelkey {0} cannot be found.**

**Explanation** CentraSite does not contain a TModel with the key specified in the UDDI request.  
**Action** Please specify a valid tModelKey in the UDDI request.

**E\_invalidKeyPassed10210TOK – No businessEntity in the UDDI registry matched the toKey {0}**

**Explanation** The toKey specified in the add\_publisherAssertion request is either invalid or no business entity matched the toKey.  
**Action** Please make sure the toKey specified in the request is valid.

**E\_invalidKeyPassed10210USUBK – Tried to update a subscription with key {0}, but no subscription in the UDDI registry matched the key.**

**Explanation** CentraSite does not contain any subscription with the key specified in the delete request.  
**Action** Please make sure the key specified in the request is valid.

**E\_invalidKeyPassed10210UTM – Tried to update a TModel with key {0}, but no TModel in the UDDI registry matched the key.**

**Explanation** CentraSite does not contain a TModel with the key specified in the UDDI request.  
**Action** Please specify a valid tModelKey in the UDDI request.

**E\_invalidProjection20230 – No businessService with service key {0} exists in the UDDI registry.**

**Explanation** CentraSite does not contain a business service with the key specified in the UDDI request.  
**Action** Please make sure the service key specified in the request is valid.

**E\_invalidTime40030 Invalid time period specified or the date/time pair is invalid.**

**Explanation** The date/time provided in the UDDI request is not valid.  
**Action** Please provide the date/time in the format specified in UDDI specification.

**E\_invalidValue20200EXPAFTDAT – The specified expiresAfter date value is incorrect**

**Explanation** The specified expiresAfter value for the subscription is not in the proper format.  
**Action** Please provide expiresAfter in the proper format.

**E\_invalidValue20200EXPAFTVAL – expiresAfter has a value older than the current date/time.**

**Explanation** The expiresAfter element of the subscription denotes when the subscription will expire. However, the value specified in the expiresAfter element is older than the current time.

**Action** Please provide a newer date/time value than the current time for the expiresAfter attribute.

**E\_invalidValue20200INV – {0} is not a valid value**

**Explanation** The specified attribute does not contain a valid value in the UDDI request.

**Action** Please provide a valid value.

**E\_invalidValue20200INVVAL – Invalid Value: {0}**

**Explanation** The key value of the relationship KeyedReference is invalid.

**Action** Please provide a valid key value.

**E\_invalidValue20200KNAMNUL – keyName and keyValue should be specified for {0} keyedReference**

**Explanation** In UDDI, the keyedReference with tModelKey “uddi:uddi.org:categorization:general\_keywords or uuid:A035A07C-F362-44dd-8F95-E2B134BF43B4” has different behavior. Unchecked value sets can be specified using this KeyedReference. Since this is unchecked, the value sets keyName and KeyValue are mandatory.

**Action** Please provide a value for KeyName and the KeyValue attribute of the uddi-org:general\_keywords KeyedReference.

**E\_invalidValue20200KVALINV – The attribute keyValue {0} for keyedReference {1} failed validation.**

**Explanation** Validation failed for the KeyedReference as it does not contain a proper key value.

**Action** Please provide valid key value.

**E\_invalidValue20200KVALNUL – The attribute keyValue should not be null for a keyedReference.**

**Explanation** KeyValue is a mandatory attribute and it should contain a valid value.

**Action** Please provide a value for the KeyValue attribute of KeyedReference.

**E\_invalidValue20200MAXENT – maxEntities has a negative value.**

**Explanation** The maxEntities attribute of the subscription should contain a positive number.  
**Action** Please provide a positive value for the maxEntities attribute.

**E\_invalidValue20200NOVAL – For asynchronous subscription, both the bindingKey and notificationInterval values should be specified**

**Explanation** To identify whether a subscription is asynchronous or synchronous, the elements bindingKey and notificationInterval are used. Element bindingKey is used to identify to which web service/email address the notification has to be sent. Element notificationInterval is used to identify how often the notification has to be sent. Both elements are required for asynchronous subscription.  
**Action** Please provide values for the bindingKey and notificationInterval attributes for asynchronous subscription.

**E\_invalidValue20200NTFINT – {0} is not a valid value for notification interval.**

**Explanation** The notificationInterval attribute has to be specified in xsd:duration format.  
**Action** Please provide notificationInterval attribute in xsd:duration format.

**E\_tokenAlreadyExists40070 – Token Generated for key {0} has expired or the token is already occupied for the specified entities.**

**Explanation** CentraSite already generated a transfer token for the specified entities.  
**Action** Please re-generate the token or use the existing token for the specified entities.

**E\_transferNotAllowed40600DEF – Transfer Not Allowed!!**

**Explanation** CentraSite does not allow this transfer. The specified transfer token is not present in CentraSite. It might be discarded.  
**Action** Transfer of the entities are not allowed

**E\_transferNotAllowed40600DNE – TransferToken does not exist.**

**Explanation** The specified transfer token does not exist in CentraSite. It might be invalid or discarded.  
**Action** Please generate new transfer token.

**E\_transferNotAllowed40600INV – Transfer not allowed. Custody (Operator) or ownership are not same.**

**Explanation** CentraSite does not allow the entities to be transferred if the owners or operator are not the same.

**Action** Operator and ownership must be the same to transfer entities.

**E\_transferNotAllowed40600TCBE – Transfer the custody of this businessEntity {0} to the node {1} on which it is modified.**

**Explanation** CentraSite does not support transferring the node businessEntity.

**Action** The transfer is not allowed for this business entity.

**E\_transferNotAllowed40600TCBS – Transfer the custody of this businessService {0} to the node {1} on which it is modified.**

**Explanation** The node of the businessService does not match the CentraSite node businessEntity.

**Action** Transfer is not allowed for this businessService.

**E\_transferNotAllowed40600TCBT – Transfer the custody of this bindingTemplate {0} to the node {1} on which it is modified.**

**Explanation** The node of the bindingTemplate does not match the CentraSite node businessEntity.

**Action** Transfer is not allowed for this bindingTemplate.

**E\_transferNotAllowed40600TCTM – Transfer the custody of this tModel {0} to the node {1} on which it is modified.**

**Explanation** The node of the tModel does not match the CentraSite node businessEntity.

**Action** Transfer is not allowed for this tModel.

**E\_transferNotAllowed40600TTNEX – This TransferToken does not exist.**

**Explanation** CentraSite does not contain the specified transfer token.

**Action** Please fetch a new transfer token.

**E\_unknownUser10150ID – User ID {0} and password pair passed in a get\_authToken API is unknown to the UDDI node or is not valid.**

**Explanation** A user ID in the get\_authToken request is mandatory, but the userId element in the get\_authTokenRequest request is null.

**Action** Please provide a valid user ID and password in the get\_authToken request.

**E\_unknownUser10150PASS – User ID and password {0} pair passed in a get\_authToken API is unknown to the UDDI node or is not valid.**

**Explanation** The cred element in the get\_authToken request is mandatory, but the cred element in the get\_authTokenRequest request is null.

**Action** Please provide a valid user ID and password in the get\_authToken request.

**E\_unrecognizedVersion10040 – Namespace {0} is unsupported by the node being queried.**

**Explanation** The request is not a valid UDDI request or the request cannot be processed by CentraSite.

**Action** Please provide a valid UDDI request as defined in the UDDI specification.

**E\_unsupported10050 Feature {0} is not supported.**

**Explanation** The request is not a valid UDDI request or the request cannot be processed by CentraSite.

**Action** Please provide a valid UDDI request as defined in the UDDI specification.

**E\_unsupported10050AUTH – authInfo element present in get\_assertionStatusReport element is required.**

**Explanation** Authorization is required to process the get\_assertionStatusReport call.

**Action** Please provide an authInfo element with a proper authToken in the get\_assertionStatusReport call. Please fetch the authToken using a get\_authToken call.

**E\_unsupported10050INVFINDGET – Invalid find\_xx or get\_xx api specified in the subscriptionFilter or some part of the subscription to be saved is invalid.**

**Explanation** The subscription filter for the subscription is not valid.

**Action** Please provide the subscription filter for the subscription according to the UDDI specification.

**E\_unsupported10050INVFQ – {0} is not a valid find qualifier value in version {1}.**

**Explanation** The provided find qualifier is not valid. The valid qualifiers can be found in UDDI specification.

**Action** Please provide find qualifiers compliant with the UDDI specification.

**E\_unsupported10050NINV – The notification interval specified is less than {0}. Please increase the notification interval.**

**Explanation** UDDI configuration parameter UDDIMinimalNotificationInterval specified the minimal notification interval that the UDDI engine can handle. If the given value is less than the UDDIMinimalNotification interval then this error will occur.

**Action** Please increase the notification interval

**E\_unsupported10050QUA – This Qualifier is not allowed with FindBinding Inquiry API.**

**Explanation** The find qualifiers binarySort, bindingSubset, caseInsensitiveSort, caseSensitiveSort, combineCategoryBags, sortByNameAsc, sortByNameDesc, serviceSubset and suppressProjectedServices are not supported in the find\_binding call.

**Action** Please specify find qualifiers other than binarySort, bindingSubset, caseInsensitiveSort, caseSensitiveSort, combineCategoryBags, sortByNameAsc, sortByNameDesc, serviceSubset and suppressProjectedServices for the find\_binding call.

**E\_unsupported10050QUARELB – This Qualifier is not allowed with FindRelatedBusinesses Inquiry API.**

**Explanation** The find qualifiers andAllKeys, bindingSubset, combineCategoryBags, orAllKeys, orLikeKeys, serviceSubset and suppressProjectedServices are not supported in the find\_relatedBusinesses call.

**Action** Please specify find qualifiers other than andAllKeys, bindingSubset, combineCategoryBags, orAllKeys, orLikeKeys, serviceSubset and suppressProjectedServices for the find\_relatedBusinesses call.

**E\_unsupported10050QUARSER – This Qualifier is not allowed with FindService Inquiry API.**

**Explanation** The serviceSubset find qualifier is not supported in the find\_service call.

**Action** Please remove the serviceSubset find qualifier from the find\_service request.

**E\_unsupported10050QUARTM – This Qualifier is not allowed with FindTModel Inquiry API.**

**Explanation** The find qualifiers bindingSubset, combineCategoryBags, serviceSubset and suppressProjectedServices are not supported in the find\_tModel call.

**Action** Please specify find qualifiers other than bindingSubset, combineCategoryBags, serviceSubset and suppressProjectedServices for the find\_tModel call.

**E\_unvalidatable20220UNVALID – The referenced tModel has been marked unvalidatable.**

**Explanation** CentraSite does not allow an unvalidatable KeyedReference to be present in the UDDI request.

**Action** The specified tModel cannot be used in the keyedReference.

**E\_userMismatch10140 – Signifies that an attempt was made to use the publishing API to change data that is controlled by another party.**

**Explanation** An access violation exception occurred as the user tried to modify a UDDI entity owner by another user.

**Action** Please make sure proper permissions are assigned to the user to update the entity.

**E\_userMismatch10140DELSUBUSR – Tried to delete a subscription that is controlled by another individual.**

**Explanation** An access violation exception occurred as the user tried to delete the subscription owned by another user.

**Action** Please provide the authToken of the user who owns the subscription.

**E\_userMismatch10140DIFSUB – The owner of the subscription is different.**

**Explanation** The subscription is not owned by the specified user.

**Action** Please provide the authToken of the user who owns the subscription.

**E\_userMismatch10140FRMTOK – USER-MISMATCH for publisherAssertion fromKey {0} and toKey {1}.**

**Explanation** The user should own the business specified in fromKey or toKey.

**Action** Please provide the business key owned by the user either in fromKey or in toKey.

**E\_userMismatch10140PBE – You are not authorized to publish a businessEntity.**

**Explanation** The user does not have permission to create a business in CentraSite.

**Action** Please make sure the user has permission to create a business in CentraSite.

**E\_userMismatch10140TT – You are not authorized to get the TransferToken for the key {0} which is owned by another publisher.**

**Explanation** The transfer token for an entity can be fetched by the user who owns the entity. Transfer token for the entities which the user does not own cannot be fetched.

**Action** Please provide the key of the owned UDDI entity.

**E\_userMismatch10140UEK – Tried to update the {0} {1} that is controlled by another individual.**

**Explanation** The user does not own or does not have permission to update the UDDI entity.  
**Action** Make sure the user has permission to update the UDDI entity, or make sure the user owns the UDDI entity.

**E\_userMismatch10140USUBUSR – Tried to update the subscription with key {0}, that is controlled by another individual.**

**Explanation** The subscription is not owned by the specified user.  
**Action** Please provide the authToken of the user who owns the subscription.

**E\_valueNotAllowed20210NODE – This checked category system is only permitted to be used by the node itself.**

**Explanation** The node business cannot be updated by the user.  
**Action** The node business cannot be updated by the user.

**INMAFE0001 The registry object must not be null.**

**Explanation** The constructor CSAppFixedRegistryObject() is trying to create a new instance so the registry object passed can't be null.  
**Action** Pass valid registry object.

**INMAFE0002 A fixed registry object's name cannot be changed.**

**Explanation** This is a fixed Registry Object. It's name must not be changed.  
**Action** Don't change a fixed registry object's name.

**INMAFE0003 Different object with duplicate key already registered: {0}**

**Explanation** Two different objects that have the same keys are being registered.  
**Action** Check for any reasons why the duplicate keys exist or change one of the object's keys.

**INMAFE0004 Different association type with duplicate name already registered {0}**

**Explanation** Two different associations that have the same names are being registered.  
**Action** Change one of the association's names.

**INMAFE0005**      **Different object type with duplicate name already registered {0}**  
**Explanation**      Object types have to have unique names.  
**Action**              Change the object type name to a unique one.

**INMAFE0006**      **Different child list already registered for parent path: {0}**  
**Explanation**      for this path there is already a defined child list.  
**Action**              Create another parent path to add the new child list.

**INMAFE0007**      **Unknown taxonomy: {0}**  
**Explanation**      The desired taxonomy does not exist.  
**Action**              Use an existing Taxonomy.

**INMAFE0008**      **Multiple taxonomies named {0} found.**  
**Explanation**      Taxonomies must have unique names.  
**Action**              Find a way to make the used taxonomies have a unique name.

**INMAFE0010**      **Different object with duplicate name already registered: {0}**  
**Explanation**      The objects are classification schemes, their names must be unique.  
**Action**              Find a way to change the object names to unique ones.

**INMAFE0011**      **No such concept: {0}**  
**Explanation**      This Concept does not exist in the database.  
**Action**              Create such a Concept or change to an existing one.

**INMAFE0012**      **No such classification scheme: {0}**  
**Explanation**      This classification scheme does not exist in the database.  
**Action**              Create a new one or change to an existing classification scheme.

**INMAFE0013**      **No such association type: {0}**  
**Explanation**      This association type does not exist in the database.  
**Action**              Create a new one or change to an existing association type.

<b>INMAFE0014</b>	<b>No such object type: {0}</b>
<b>Explanation</b>	This object type does not exist in the database.
<b>Action</b>	Create a new one or change to an existing object type.
<b>INMAFE0015</b>	<b>Child list not available for parent {0}, did you set the cache strategy 'childs'?</b>
<b>Explanation</b>	The cache strategy "childs" needs to be set in order to access child concepts.
<b>Action</b>	Set the cache strategy 'childs'.
<b>INMAFE0017</b>	<b>Child list not available for taxonomy {0}, did you set the cache strategy 'childs'?</b>
<b>Explanation</b>	The cache strategy "childs" needs to be set in order to access child concepts.
<b>Action</b>	Set the cache strategy 'childs'.
<b>INMAFE0018</b>	<b>Child list not available for parent concept {0}, did you set the cache strategy 'childs'?</b>
<b>Explanation</b>	The cache strategy "childs" needs to be set in order to access child concepts.
<b>Action</b>	Set the cache strategy childs.
<b>INMAFE0019</b>	<b>No object with key {0} is known by the pool.</b>
<b>Explanation</b>	No fixed RegistryObject was found in the bean pool.
<b>Action</b>	The fixed registry object must be added to the bean pool.
<b>INMAFE0021</b>	<b>Invalid element {0}, expected either of {1}</b>
<b>Explanation</b>	The specified element is not contained in the list of expected elements.
<b>Action</b>	Use or change the element to one of the expected types.
<b>INMAFE0023</b>	<b>Missing attribute: {0}</b>
<b>Explanation</b>	The searched attribute is mandatory and must be provided.
<b>Action</b>	Provide the missing attribute or change it so it is not mandatory any more.
<b>INMAFE0024</b>	<b>Empty attribute: {0}</b>
<b>Explanation</b>	The attribute is empty.
<b>Action</b>	Provide data for the attribute.

**INMAFE0025**      **Duplicate objectType name: {0}**  
**Explanation**      Object Types must have unique names.  
**Action**              Provide a unique name for the object type, delete or rename the existing one.

**INMAFE0026**      **Duplicate associationType name: {0}**  
**Explanation**      The assoiation type name must be unique.  
**Action**              Provide a unique association type name, delete or rename the existitng one.

**INMAFE0027**      **Duplicate taxonomy name: {0}**  
**Explanation**      Taxonomy name must be unique.  
**Action**              Provide unique name for the Taxonomy, rename or delete the existing one.

**INMAFE0028**      **Invalid value for {0}**  
**Explanation**      The specified value is invalid.  
**Action**              Provide valid value.

**INMAFE0029**      **Invalid element {0}, expected {1}**  
**Explanation**      The specified element does not match the expected element.  
**Action**              The element must be changed accordingly to the expected item.

**INMAFE0031**      **Duplicate concept value for taxonomy {0}**  
**Explanation**      Taxonomy must have a unique concept value.  
**Action**              Provide a unique concept value for the taxonomy.

**INMAFE0032**      **Duplicate concept value for concept {0}**  
**Explanation**      Concept must have a unique concept value.  
**Action**              Provide a unique concept value for the concept.

**INMAFE0033**      **Invalid argument: {0}**  
**Explanation**      The specified argument is invalid.  
**Action**              Provide a valid argument.

<b>INMAFE0034</b>	<b>The class {0} has no annotation of type {1} or has an empty 'implementation' attribute.</b>
<b>Explanation</b>	The given class does not have the expected annotation, or the annotation's "implementation" attribute is empty.
<b>Action</b>	Provide an annotation of the given type or fill in the 'implementation' attribute.
<b>INMAFE0037</b>	<b>The object type's qualified name must not be null.</b>
<b>Explanation</b>	One of the arguments has a null value.
<b>Action</b>	Provide arguments with a valid value.
<b>INMAFE0038</b>	<b>A classification's scheme must not be null.</b>
<b>Explanation</b>	The classification has a null value.
<b>Action</b>	Provide a valid value for classification.
<b>INMAFE0039</b>	<b>A classification's value must not be null.</b>
<b>Explanation</b>	The classification has a null value.
<b>Action</b>	Provide a valid value for classification.
<b>INMAFE0040</b>	<b>The object type's qualified name must not be null.</b>
<b>Explanation</b>	The object type's qualified name has null value.
<b>Action</b>	Provide a valid value for object type's qualified name.
<b>INMAFE0041</b>	<b>The classification schemes must not be null.</b>
<b>Explanation</b>	The classification schemes have a null value.
<b>Action</b>	Provida a valid value for the classification schemes.
<b>INMAFE0042</b>	<b>This object is unmodifiable.</b>
<b>Explanation</b>	The object cannot be modified.
<b>Action</b>	Do not try to modify the object.
<b>INMAFE0043</b>	<b>Unknown property {0}</b>
<b>Explanation</b>	The property has unknown value.
<b>Action</b>	Provide a valid value for the property.

<b>INMAFE0044</b>	<b>The IOC annotation of the field {0} has no ID or an empty ID.</b>
<b>Explanation</b>	Some annotation has an empty ID or no ID.
<b>Action</b>	Provide a valid ID for the annotation.
<b>INMAFE0045</b>	<b>The object to initialize must not be null.</b>
<b>Explanation</b>	The initializer has a null value.
<b>Action</b>	Provide a valid value for the initializer.
<b>INMAFE0046</b>	<b>The document must not be null.</b>
<b>Explanation</b>	The document is null.
<b>Action</b>	Provide a valid value for the document.
<b>INMAFE0047</b>	<b>The QName {0} is invalid, because it contains no terminating '}' character.</b>
<b>Explanation</b>	The value argument has no enclosing '}' character.
<b>Action</b>	Make sure the value argument has an enclosing '}' character.
<b>INMAFE0049</b>	<b>Expected {0} element, got {1}</b>
<b>Explanation</b>	The element is different than expected.
<b>Action</b>	Make sure the element type is as expected.
<b>INMAFE0051</b>	<b>Missing attribute for {0}</b>
<b>Explanation</b>	The attribute has a null value.
<b>Action</b>	Provide a valid value for the attribute.
<b>INMAFE0052</b>	<b>Invalid attribute {0} for element {1}</b>
<b>Explanation</b>	The attribute has an invalid value.
<b>Action</b>	Provide a valid value for the attribute.
<b>INMAFE0054</b>	<b>The attribute {0} for element {1} is using an invalid prefix: {2}</b>
<b>Explanation</b>	Some of the attributes have an invalid prefix.
<b>Action</b>	Make sure the attribute has a valid prefix.

<b>INMAFE0056</b>	<b>Missing attribute: {0}</b>
<b>Explanation</b>	Attribute is missing.
<b>Action</b>	Provide attribute.
<b>INMAFE0057</b>	<b>Empty attribute: {0}</b>
<b>Explanation</b>	Attribute is missing.
<b>Action</b>	Provide attribute.
<b>INMAFE0058</b>	<b>The class {0} doesn't implement {1}</b>
<b>Explanation</b>	Wrong class provided.
<b>Action</b>	Provide a valid class.
<b>INMAFE0116</b>	<b>Missing @RegistryObject annotation on persistent class {0}</b>
<b>Explanation</b>	The processed class has no @RegistryObject annotation. As long as there is no such annotation the persistent class cannot be considered a RegistryBean and cannot be processed.
<b>Action</b>	Add a @RegistryObject annotation to the persistent class interface or use different RegistryBean.
<b>INMAFE0119</b>	<b>The given registry bean is managed by another pool: {0}</b>
<b>Explanation</b>	A registry bean instance can be managed by one bean pool only. For example it is not allowed to read a bean with one bean pool instance and update it with another.
<b>Action</b>	Check for multiple beanPool instances managing your registry beans. For a single thread, make one bean pool instance to handle the registry beans.
<b>INMAFE0121</b>	<b>The given registry bean is not managed by the pool: {0}</b>
<b>Explanation</b>	The registry bean is being used by a bean pool it does not belong to.
<b>Action</b>	Find and use the bean pool instance that this registry bean belongs to. For example if a registry bean is read or created by one bean pool instance, this is the instance it belongs to and it cannot be managed by another one.
<b>INMAFE0123</b>	<b>Missing information for attribute with name {0} of type {1}</b>
<b>Explanation</b>	This attribute should have an attribute description but it does not. For example, attribute description is required for @Relationship , @DateAttribute and other attributes.
<b>Action</b>	When using @Relationship, @DateAttribute etc. an attributeName property must be specified, which corresponds to the name of an existing AttributeDescription. Either create new attribute description, or change the name of the attributeName property to an existing one.

<b>INMAFE0128</b>	<b>The RegistryObject must be an association, but is a {0}</b>
<b>Explanation</b>	The RegistryObject to be processed must be a javax.xml.registry.infomodel.Association. The method is trying to create a RegistryBean instance from a javax.xml.registry.infomodel.Association instance.
<b>Action</b>	Check the mapping of theRegistryBean that is being created for any inconsistencies.
<b>INMAFE0129</b>	<b>AssociationTarget property of {0} is null. Association target cannot be null.</b>
<b>Explanation</b>	While creating a javax.xml.registry.infomodel.Association instance from a registry bean Association instance. The target of the association must be present in order to create a javax.xml.registry.infomodel.Association.
<b>Action</b>	Set target for the association.
<b>INMAFE0130</b>	<b>Unable to determine object type. Missing RegistryObject annotation for class {0}.</b>
<b>Explanation</b>	Either the processed registry bean is not a registry bean at all, or it is missing its RegistryObject annotation. Without it the registry bean cannot be created and it is not considered a registry bean.
<b>Action</b>	Either use a different registry bean that has a RegistryObject annotation, or add the annotation in the used registry bean interface.
<b>INMAFE0131</b>	<b>Missing concept with key {0}.</b>
<b>Explanation</b>	The key that is specified is either wrong or does not belong to a concept instance.
<b>Action</b>	Use a different object type key for this annotation.
<b>INMAFE0132</b>	<b>Missing concept with name {0}</b>
<b>Explanation</b>	The name that is specified is either wrong or does not belong to a concept instance.
<b>Action</b>	Use a different object type name for this annotation.
<b>INMAFE0133</b>	<b>The RegistryObject must be a classification.</b>
<b>Explanation</b>	The registry object to be processed must be a javax.xml.registry.infomodel.Classification instance.
<b>Action</b>	Use a registry object that is an instance of javax.xml.registry.infomodel.Classification.

<b>INMAFE0134</b>	<b>ClassificationConcept property of {0} is null. The concept for internal classification cannot be null.</b>
<b>Explanation</b>	The classification's concept property is not specified.
<b>Action</b>	Specify a concept for this classification.
<b>INMAFE0135</b>	<b>Missing {0} annotation. {1} must be classified instance.</b>
<b>Explanation</b>	The ClassifiedInstances annotation is missing. It must be present in order to create a ClassifiedInstances property.
<b>Action</b>	Add the ClassifiedInstances annotation to the registry bean.
<b>INMAFE0136</b>	<b>{0} is not specified as ClassifiedInstance</b>
<b>Explanation</b>	None of the bean interfaces is a classified instance in the ClassifiedInstances annotation's instances.
<b>Action</b>	Specify a bean interface as ClassifiedInstance.
<b>INMAFE0137</b>	<b>Cannot find the required classification on {0}</b>
<b>Explanation</b>	There is no corresponding classification for the given registry object.
<b>Action</b>	Provide the classification.
<b>INMAFE0138</b>	<b>BeanInfo {0} for {1} must be instance of {2}</b>
<b>Explanation</b>	The BeanInfo instance is not of type BackedBeanInfo.
<b>Action</b>	Make the BeanInfo an instance of BackedBeanInfo.
<b>INMAFE0139</b>	<b>No setter found for property {0} in class {1}</b>
<b>Explanation</b>	The name of the setter is different and a corresponding setter cannot be found in the jaxr representation of this registry bean.
<b>Action</b>	Change the name of the setter in the registry bean interface.
<b>INMAFE0140</b>	<b>Missing type information for {0}</b>
<b>Explanation</b>	The BeanType for this jaxr registry object cannot be found in the registry object model. It is not supported by CSAF.
<b>Action</b>	Add BeanType for the required jaxr registry object type in the registry object model.

<b>INMAFE0141</b>	<b>Getter returns unexpected value type: {0} . Expected: Collection. For property: {1} in class: {2}</b>
<b>Explanation</b>	The value returned by the getter method does not match the return type specified in the bean interface.
<b>Action</b>	Change the return type to collection or change the annotation used for this property.
<b>INMAFE0142</b>	<b>No instance of SlotHandler registered for the type {0}</b>
<b>Explanation</b>	None of the existing slot handlers handles the given property type.
<b>Action</b>	Add a slot handler or change the property type.
<b>INMAFE0143</b>	<b>Expected RegistryObject of type javax.xml.registry.infomodel.User or javax.xml.registry.infomodel.Organization {0}</b>
<b>Explanation</b>	The javax.xml.registry.infomodel.TelephoneNumbers support type can only be found in a javax.xml.registry.infomodel.User or javax.xml.registry.infomodel.Organization instance.
<b>Action</b>	Use a javax.xml.registry.infomodel.User or javax.xml.registry.infomodel.Organization instance for operations with javax.xml.registry.infomodel.TelephoneNumbers.
<b>INMAFE0144</b>	<b>A Collection is expected {0}</b>
<b>Explanation</b>	TelephoneNumbers is always a collection. Single property is not allowed.
<b>Action</b>	Use a collection of TelephoneNumbers.
<b>INMAFE0145</b>	<b>Expected RegistryObject of type User or Organization RegistryBeans {0}</b>
<b>Explanation</b>	The CSAF support type TelephoneNumbers can only be found in a User or Organization RegistryBean instance.
<b>Action</b>	Use a User or Organization RegistryBean instance for operations with CSAF TelephoneNumbers.
<b>INMAFE0146</b>	<b>Beans to restore must be of BackedBeanInfo instance</b>
<b>Explanation</b>	Only BackedBeanInfo instances can provide access to the underlying RegistryObject.
<b>Action</b>	Use BackedBeanInfo to provide access to the RegistryObject that is standing behind the RegistryBean.

<b>INMAFE0147</b>	<b>Invalid bean mode</b>
<b>Explanation</b>	The bean mode of a configuration can be BACKED or SIMPLE (has been deprecated). Any other bean mode set to the configuration will result in this exception.
<b>Action</b>	Set the bean mode of the configuration to BACKED. The BACKED constant is located under com.softwareag.centrasite.appl.framework.persistence.BeanMode.java.
<b>INMAFE0148</b>	<b>The object to be read must be a RegistryObject instance: {0}</b>
<b>Explanation</b>	The object to be read must be an instance of javax.xml.registry.infomodel.RegistryObject but is not.
<b>Action</b>	Read a different object that is of javax.xml.registry.infomodel.RegistryObject instance.
<b>INMAFE0149</b>	<b>Unsupported value type passed: {0}</b>
<b>Explanation</b>	The value type passed is not supported by this method and cannot be processed.
<b>Action</b>	Change the value Type or change the method you are using to process this value. For example, the toJaxrValue() method expects one of the support types defined in CSAF (EmailAddress, TelephoneNumbers etc.) and processes it to a JAXR support type , while the toBeanValue method does the opposite.
<b>INMAFE0150</b>	<b>Missing type information for {0}</b>
<b>Explanation</b>	No BeanType found in the registry object model for the given registry object. It is not supported by CSAF.
<b>Action</b>	Create a BeanType and add it to the registry object model for the given registry object type.
<b>INMAFE0151</b>	<b>The BulkResponse collection must currently be java.util.List {0}</b>
<b>Explanation</b>	The result method of the Search class always has to return a java.util.List object.
<b>Action</b>	Change the Search's BulkResponse collection to java.util.List.
<b>INMAFE0152</b>	<b>Missing type information for {0}</b>
<b>Explanation</b>	No BeanType found in the registry object model for the given registry object. It is not supported by CSAF.
<b>Action</b>	Create a BeanType and add it to the registry object model for the given registry object type.

<b>INMAFE0153</b>	<b>Property is null, this kind of predicate is not allowed</b>
<b>Explanation</b>	A predicate has been created for a property that does not exist.
<b>Action</b>	Check the search criteria for wrong property names.
<b>INMAFE0154</b>	<b>The given class: {0} is not supported</b>
<b>Explanation</b>	No BeanType found for the given class in the registry object model.
<b>Action</b>	Add BeanType in the registry object model for the desired class.
<b>INMAFE0159</b>	<b>Invalid attribute name. Attribute name must not contain a space or special characters.</b>
<b>Explanation</b>	Creating a slot attribute with spaces or special characters in its name is not allowed.
<b>Action</b>	Use camel case (example: SlotAttribute) or '_' (example: Slot_Attribute) in the name instead of space, or change the name in a different way that it does not contain spaces.
<b>INMAFE0160</b>	<b>Invalid slot attribute data type.</b>
<b>Explanation</b>	The data type passed when creating slot attribute is not supported.
<b>Action</b>	Change the data type to one that is supported. Constants with supported data types can be found in AttributeDescription class.
<b>INMAFE0161</b>	<b>Unknown Error</b>
<b>Explanation</b>	The error that has been thrown has unknown reasons.
<b>Action</b>	Contact your software supplier.
<b>INMAFE0162</b>	<b>The parent concept must not be null.</b>
<b>Explanation</b>	The Concept must have a parent.
<b>Action</b>	Add parent to the concept.
<b>INMAFE0163</b>	<b>Invalid namespace prefix: {0}</b>
<b>Explanation</b>	The namespace prefix is invalid.
<b>Action</b>	Change the namespace to a valid one.
<b>INMAFE0164</b>	<b>Don't know how to handle skipped entity: {0}</b>
<b>Explanation</b>	The Parser has encountered a skipped entity. CSAF does not support skipped entities.
<b>Action</b>	Exclude the skipped entities from the entity list.

<b>INMAFE0165</b>	<b>Expected empty stack.</b>
<b>Explanation</b>	The Parser has reached the end of the file, and its stack should be empty.
<b>Action</b>	Check the file for any inconsistencies or errors.
<b>INMAFE0166</b>	<b>No getter for property {0} found in class {1}</b>
<b>Explanation</b>	In order to access a RegistryBean property it must have a getter method.
<b>Action</b>	Provide a getter method for this RegistryBean property. In some cases the getter methods are not provided for a purpose. These RegistryBeans should be documented.
<b>INMAFE0167</b>	<b>The method {0} in class {1} must be public, and neither static, nor abstract.</b>
<b>Explanation</b>	There is a restriction that must be followed.
<b>Action</b>	Change the method to public and remove any static or abstract modifiers.
<b>INMAFE0168</b>	<b>Failed to parse getter name: {0}</b>
<b>Explanation</b>	A getter method follows a rule when created. It must begin with either get or is. Any other case will result in this exception.
<b>Action</b>	Rename the getter method so it follows the described rule.
<b>INMAFE0169</b>	<b>The setter {0} in class {1} has return type {2} , not void.</b>
<b>Explanation</b>	A setter method must have a void return type.
<b>Action</b>	Change the setter return type to void.
<b>INMAFE0170</b>	<b>The method {0} in class {1} must be public, and not static.</b>
<b>Explanation</b>	There is a restriction to this method, namely it must be public and not static.
<b>Action</b>	Follow the restriction.
<b>INMAFE0171</b>	<b>Failed to parse method name: {0}</b>
<b>Explanation</b>	The method must start with either get, set, has or is. This is necessary in order to be recognized by the parser so a property name can be extracted.
<b>Action</b>	Change the method name accordingly.

<b>INMAFE0172</b>	<b>Illegal access to default constructor of class {0} : {1}</b>
<b>Explanation</b>	Nested exception is thrown here. The constructor has to be called with an empty expression list, or check {1} for more information.
<b>Action</b>	Change the constructor accordingly.
<b>INMAFE0173</b>	<b>Failed to instantiate class {0} : {1}</b>
<b>Explanation</b>	Nested exception is thrown here. More details are found in {1}
<b>Action</b>	Handle according to the nested exception message.
<b>INMAFE0174</b>	<b>Illegal access to default constructor of class {0} : {1}</b>
<b>Explanation</b>	Nested exception is thrown here. The constructor has to be called with an empty expression list, or check {1} for more information.
<b>Action</b>	Change the constructor accordingly.
<b>INMAFE0175</b>	<b>Failed to instantiate class {0} : {1}</b>
<b>Explanation</b>	Nested exception is thrown here. More details are found in {1}
<b>Action</b>	Handle according to the nested exception message.
<b>INMAFE0176</b>	<b>Failed to invoke constructor of class {0} : {1}</b>
<b>Explanation</b>	Nested Exception. See {1} for more information.
<b>Action</b>	Handle the case according to information in {1}.
<b>INMAFE0177</b>	<b>No field named {0} found in class {1} or any of its superclasses.</b>
<b>Explanation</b>	The desired field is not present in the class, nor in any of the superclasses.
<b>Action</b>	Provide the missing field, or change the field name being searched.
<b>INMAFE0178</b>	<b>Illegal access to field {0} in class {1} : {2}</b>
<b>Explanation</b>	Nested Exception thrown, see {2} for more details.
<b>Action</b>	Handle according to the information in {2}.
<b>INMAFE0179</b>	<b>Failed to load the class named {0}.</b>
<b>Explanation</b>	The class with the given name was not found.
<b>Action</b>	Provide the missing class.

<b>INMAFE0180</b>	<b>Invalid property specification: {0}</b>
<b>Explanation</b>	The property has opening bracket [ but no closing bracket ].
<b>Action</b>	Provide the closing bracket ] .
<b>INMAFE0181</b>	<b>Invalid property specification: {0}</b>
<b>Explanation</b>	The property was not specified correctly.
<b>Action</b>	Make sure that the property follows all rules.
<b>INMAFE0182</b>	<b>No list was returned for property specification {0}</b>
<b>Explanation</b>	This property is expected to return a list.
<b>Action</b>	Check the property for any inconsistencies.
<b>INMAFE0183</b>	<b>No add method found for property {0} in class {1}</b>
<b>Explanation</b>	The property must correspond to an add method, but it doesn't.
<b>Action</b>	Provide an add method, change the property or check the property for inconsistencies.
<b>INMAFE0184</b>	<b>No remove method found for property {0} in class {1}</b>
<b>Explanation</b>	The property must correspond to a remove method, but it doesn't.
<b>Action</b>	Provide a remove method, change the property or check the property for inconsistencies.
<b>INMAFE0185</b>	<b>A fixed registry object's description cannot be changed.</b>
<b>Explanation</b>	This registry object description cannot be changed.
<b>Action</b>	Don't attempt to change a fixed registry object's description.
<b>INMAFE0186</b>	<b>The interface {0} doesn't have its implementation attribute set in the {1} annotation.</b>
<b>Explanation</b>	Each interface bean needs to specify its implementation class.
<b>Action</b>	Please use correct value for the annotation attribute.
<b>INMAFE0187</b>	<b>The key must not be null.</b>
<b>Explanation</b>	Each key must have a non-null id value.
<b>Action</b>	Provide non-empty, unique key value.

<b>INMAFE0188</b>	<b>The concept key must point to a Concept: {0}</b>
<b>Explanation</b>	Classifications can only be based on concepts.
<b>Action</b>	Make sure that the Classification's concept key is actually pointing to a Concept registry object.
<b>INMAFE0189</b>	<b>The registry object type key must point to a Concept from the ObjectType taxonomy: {0}</b>
<b>Explanation</b>	The required object needs to be a child of the "ObjectType" taxonomy.
<b>Action</b>	Make sure that object type key points to a Concept from the ObjectType taxonomy (Classification Scheme).
<b>INMAFE0190</b>	<b>The association type key must point to a Concept from the AssociationType taxonomy: {0}</b>
<b>Explanation</b>	The required object needs to be a child of the "AssociationType" taxonomy.
<b>Action</b>	Make sure that association type key points to a Concept from the AssociationType taxonomy (Classification Scheme).
<b>INMAFE0191</b>	<b>The property is null.</b>
<b>Explanation</b>	The getMapper() method requires a non-null property argument.
<b>Action</b>	Make sure the property is available.
<b>INMAFE0192</b>	<b>No property mapper found for Property {0}</b>
<b>Explanation</b>	The property mapper for the desired property does not exist.
<b>Action</b>	Make sure that a suitable property mapper is available for this property.
<b>INMAFE0193</b>	<b>Wrong value type passed. Expected Collection&lt;com.softwareag.centrasite.appl.framework.beans.standard.TelephoneNumber&gt;</b>
<b>Explanation</b>	The method requires an argument of type "Collection".
<b>Action</b>	Make sure the correct value type is used.
<b>INMAFE0194</b>	<b>Cannot parse string to long(timestamp) {0}</b>
<b>Explanation</b>	The given value does not match the syntax rules for long numeric values.
<b>Action</b>	Expected long numeric value.

<b>INMAFE0195</b>	<b>Cannot parse date string {0}</b>
<b>Explanation</b>	The given value does not match the syntax rules for dates.
<b>Action</b>	Make sure the string is in the proper date format.
<b>INMAFE0196</b>	<b>Unsupported value passed: {0}. String value expected: either {namespace}localPart or localPart only.</b>
<b>Explanation</b>	The method expects a vlue of type "String".
<b>Action</b>	Please provide the correct value.
<b>INMAFE0197</b>	<b>Unsupported value type {0}</b>
<b>Explanation</b>	The KeyPredicate value type must be one of "String", "Key", or "RegistryBean".
<b>Action</b>	Please provide a valid value.
<b>INMAFE0198</b>	<b>Unable to create predicate for : {0}. Check the passed sequence and try again.</b>
<b>Explanation</b>	The values specified for the predicate cannot be properly converted to a query criterion.
<b>Action</b>	Please provide a valid predicate.
<b>INMAFE0199</b>	<b>The given object is not a RegistryObject.</b>
<b>Explanation</b>	The method requires a RegistryObject parameter.
<b>Action</b>	Please provide the correct object.
<b>INMAFE0200</b>	<b>Given object is not Classification: {0}</b>
<b>Explanation</b>	The method requires a Classification object.
<b>Action</b>	Please provide a valid Classification object.
<b>INMAFE0201</b>	<b>Unsupported collection. Should be java.util.List or java.util.Set.</b>
<b>Explanation</b>	The method requires a parameter of type List or Set.
<b>Action</b>	Please provide a collection of valid type.
<b>INMAFE0202</b>	<b>Only attributes of type Slot can be indexed.</b>
<b>Explanation</b>	Index definitions are only possible for Slot attributes.
<b>Action</b>	Use an attribute of valid type.

<b>INMAFE0203</b>	<b>Value and forward label must not be null.</b>
<b>Explanation</b>	When creating a new association type it is mandatory to specify a value and a forward label.
<b>Action</b>	Correct the application program.
<b>INMAFE0204</b>	<b>Object type to be generated not found: {0}</b>
<b>Explanation</b>	The object type name specified when calling the RegistryBeanGenerator does not exist.
<b>Action</b>	Specify an existing type name.
<b>INMAFE0205</b>	<b>Invalid object ({0}) passed to delete operation</b>
<b>Explanation</b>	The delete operation only accepts RegistryBean instances. In particular, NULL pointers are rejected.
<b>Action</b>	Call the delete operation with correct RegistryBean instances.
<b>INMAPE0001</b>	<b>The user {0} does not have the view permission; contact the asset owner or administrator for help.</b>
<b>Explanation</b>	If the current user has no permission to view this object, then this error will be thrown.
<b>Action</b>	The user needs to be provided proper permission to view this object.
<b>INMBUE0002</b>	<b>Invalid URI {0}.</b>
<b>Explanation</b>	You have entered an invalid URI.
<b>Action</b>	Enter a valid URI.
<b>INMBUE0003</b>	<b>Invalid phone number.</b>
<b>Explanation</b>	You have entered an invalid phone number.
<b>Action</b>	Enter a valid phone number.
<b>INMBUE0004</b>	<b>Search scope is empty.</b>
<b>Explanation</b>	You have not entered a valid search scope in the recipe.
<b>Action</b>	Enter a valid search scope.

<b>INMBUE0007</b>	<b>Saved search token is not valid.</b>
<b>Explanation</b>	You have entered an invalid saved search token in the URL.
<b>Action</b>	Enter a valid saved search token.
<b>INMBUE0009</b>	<b>Failed to initialize the Unwatch action on selected assets.</b>
<b>Explanation</b>	Could not initialize the Unwatch action on selected assets; possibly because one or more of the selected assets are not already watched.
<b>Action</b>	Choose the assets that are already watched.
<b>INMBUE0011</b>	<b>Enter a valid IP address</b>
<b>Explanation</b>	Enter a valid IP address
<b>Action</b>	Enter a valid IP address
<b>INMBUE0012</b>	<b>Duplicate values for {0}</b>
<b>Explanation</b>	A user was selected as an administrator, but this user has already been selected.
<b>Action</b>	Avoid selecting a user as administrator that has already been chosen.
<b>INMBUE0013</b>	<b>Invalid URL</b>
<b>Explanation</b>	You have entered an invalid URL.
<b>Action</b>	Enter a valid URL.
<b>INMBUE0014</b>	<b>Enter a valid Administrator</b>
<b>Explanation</b>	You have entered an invalid administrator name.
<b>Action</b>	Enter a valid administrator name.
<b>INMBUE0015</b>	<b>Group name is empty</b>
<b>Explanation</b>	You have not entered a group name while creating a local group.
<b>Action</b>	Enter a group name.
<b>INMBUE0016</b>	<b>Invalid URI.</b>
<b>Explanation</b>	You have entered an invalid URI.
<b>Action</b>	Enter a valid URI.

<b>INMBUE0017</b>	<b>Invalid numeric value in attribute.</b>
<b>Explanation</b>	You have entered an invalid numeric value for this attribute.
<b>Action</b>	Enter a valid numeric value.
<b>INMBUE0018</b>	<b>Invalid attribute value.</b>
<b>Explanation</b>	You have entered an invalid attribute value for the chosen type.
<b>Action</b>	Enter a valid value for the chosen type.
<b>INMBUE0019</b>	<b>Required attribute value is empty.</b>
<b>Explanation</b>	You have entered a blank value for the required attribute.
<b>Action</b>	Enter a value for the required attribute.
<b>INMBUE0020</b>	<b>Enter a valid string value for the attribute.</b>
<b>Explanation</b>	You have entered an invalid value for this string attribute.
<b>Action</b>	Enter a valid string value.
<b>INMBUE0021</b>	<b>Enter a valid IP address.</b>
<b>Explanation</b>	You have entered an invalid IP address.
<b>Action</b>	Enter a valid IP address.
<b>INMBUE0022</b>	<b>Enter a valid email address.</b>
<b>Explanation</b>	You have entered an invalid email address. You must enter a valid email address (e.g. example@example).
<b>Action</b>	Enter a valid email address (e.g. example@example).
<b>INMBUE0023</b>	<b>Invalid category name.</b>
<b>Explanation</b>	You have entered an invalid category name for this classification attribute.
<b>Action</b>	Enter a valid category name for the defined taxonomy.
<b>INMBUE0024</b>	<b>Refresh interval is empty.</b>
<b>Explanation</b>	Number. Required. An input denoting the time interval for refreshing a portlet automatically is not specified.
<b>Action</b>	Enter a value (in seconds) for refresh interval.

<b>INMBUE0025</b>	<b>Required attribute value is empty.</b>
<b>Explanation</b>	You have entered a blank value for the required attribute.
<b>Action</b>	Enter a value for the required attribute.
<b>INMBUE0026</b>	<b>Invalid search condition.</b>
<b>Explanation</b>	An invalid search condition has occurred. A search condition consists of one or more predicates, each joined by a keyword (ALL or ANY). A predicate can be a comparison predicate, such as an Equals predicate, NotEquals predicate, StartsWith predicate, or a Contains predicate. This error occurs when none of the above search conditions are met.
<b>Action</b>	Correct the search condition.
<b>INMBUE0028</b>	<b>Invalid combination of x and y axes; at least one of the axes must have a numeric attribute for the graph to render properly.</b>
<b>Explanation</b>	One of the attribute in the x or y axis should have a numeric value.
<b>Action</b>	Choose a numeric attribute in one of the two axes.
<b>INMBUE0029</b>	<b>Invalid search for charts; you must choose at least one numeric attribute.</b>
<b>Explanation</b>	The chosen search does not have a numeric attribute to plot the chart. To plot a chart you must have a combination of non-numeric attribute and numeric attribute.
<b>Action</b>	Choose a search with at least one numeric attribute.
<b>INMBUE0030</b>	<b>Organization name is empty</b>
<b>Explanation</b>	The organization name field is empty, but the organization name must be provided when creating an organization.
<b>Action</b>	Enter the organization name.
<b>INMBUE0031</b>	<b>Role name is empty</b>
<b>Explanation</b>	The role name field is empty, but the role name must be provided when creating a role.
<b>Action</b>	Enter a role name.

<b>INMBUE0032</b>	<b>Enter a valid consumer application name.</b>
<b>Explanation</b>	The consumer application name specified is either invalid or empty.
<b>Action</b>	Enter a valid consumer application name.
<b>INMBUE0035</b>	<b>Base URL should not be empty.</b>
<b>Explanation</b>	The Base URL is empty.
<b>Action</b>	Enter the Base URL.
<b>INMBUE0036</b>	<b>Add at least one method to the resource.</b>
<b>Explanation</b>	A resource should have at least one HTTP method to perform a certain operation. This error occurs when an attempt is made to add a resource in the API without specifying at least one method.
<b>Action</b>	Add at least one HTTP method for the resource.
<b>INMBUE0037</b>	<b>Parameter name must not be empty.</b>
<b>Explanation</b>	The parameter name is empty.
<b>Action</b>	Enter the parameter name.
<b>INMBUE0038</b>	<b>Method name must not be empty.</b>
<b>Explanation</b>	The method name is empty.
<b>Action</b>	Enter the method name.
<b>INMBUE0039</b>	<b>Resource name must not be empty.</b>
<b>Explanation</b>	The resource name is empty.
<b>Action</b>	Enter the resource name.
<b>INMBUE0040</b>	<b>Resource path must not be empty.</b>
<b>Explanation</b>	The resource path is empty.
<b>Action</b>	Enter the resource path.
<b>INMBUE0041</b>	<b>Default value should be a value in the possible values list.</b>
<b>Explanation</b>	The default value does not match with any of the values in the list of possible values.
<b>Action</b>	Enter a value from the list of possible values.

<b>INMBUE0042</b>	<b>The resource already exists.</b>
<b>Explanation</b>	An attempt was made to add a resource with the same name as an existing resource in the same service.
<b>Action</b>	Enter a new resource name that is not already in use in the service.
<b>INMBUE0043</b>	<b>Resource with path already exists in this API.</b>
<b>Explanation</b>	An attempt was made to add a resource with the same path as an existing resource in the same API.
<b>Action</b>	Enter a new resource path which is not already in use in the API.
<b>INMBUE0044</b>	<b>Parameter already exists for this parameter type.</b>
<b>Explanation</b>	An attempt was made to add a parameter with the same name as an existing parameter for the given parameter type.
<b>Action</b>	Enter a new parameter name that is not already available for the parameter type.
<b>INMBUE0045</b>	<b>Select at least one resource to virtualize.</b>
<b>Explanation</b>	An attempt was made to virtualize a REST service without selecting the resource.
<b>Action</b>	Select at least one resource to virtualize the REST service.
<b>INMBUE0046</b>	<b>Request message cannot be empty.</b>
<b>Explanation</b>	You have not entered a request message when adding sample request and response to the REST service.
<b>Action</b>	Enter the sample request message.
<b>INMBUE0051</b>	<b>API Portal Name field cannot be empty.</b>
<b>Explanation</b>	You have not entered the name of API Portal when registering API Portal in CentraSite.
<b>Action</b>	Enter the API Portal name.
<b>INMBUE0052</b>	<b>API Portal Alias field cannot be empty.</b>
<b>Explanation</b>	You have not entered the name of API Portal alias when registering API Portal in CentraSite.
<b>Action</b>	Enter the API Portal alias name.

<b>INMBUE0053</b>	<b>Deployment Endpoint field cannot be empty.</b>
<b>Explanation</b>	You have not entered the deployment endpoint address when registering API Portal in CentraSite.
<b>Action</b>	Enter a valid deployment endpoint.
<b>INMBUE0054</b>	<b>CentraSite Alias field cannot be empty.</b>
<b>Explanation</b>	You have not entered the name of CentraSite alias when registering API Portal in CentraSite.
<b>Action</b>	Enter the CentraSite alias name.
<b>INMBUE0055</b>	<b>Consumer Onboarding Organization field cannot be empty.</b>
<b>Explanation</b>	You have not entered the name of the consumer onboarding organization when registering API Portal in CentraSite.
<b>Action</b>	Enter the consumer onboarding organization name.
<b>INMBUE0056</b>	<b>The base URL already exists.</b>
<b>Explanation</b>	An attempt was made to add a base URL with the same value as an existing base URL in the same service.
<b>Action</b>	Enter a new base URL value that is not already in use in the service.
<b>INMBUE0058</b>	<b>Select at least one API Portal to publish.</b>
<b>Explanation</b>	An attempt was made to publish the API without selecting at least one API Portal.
<b>Action</b>	Select at least one API Portal to publish the API.
<b>INMBUE0059</b>	<b>Username field cannot be empty.</b>
<b>Explanation</b>	You have not entered the CentraSite username when registering API Portal in CentraSite.
<b>Action</b>	Enter a valid CentraSite username.
<b>INMBUE0060</b>	<b>Password field cannot be empty.</b>
<b>Explanation</b>	You have not entered the CentraSite password when registering API Portal in CentraSite.
<b>Action</b>	Enter a valid CentraSite password.

---

<b>INMBUE0062</b>	<b>Gateway URL is not valid. Specify a valid URL, and try again.</b>
<b>Explanation</b>	The gateway URL is not valid, or not in the correct format.
<b>Action</b>	Specify a valid gateway URL, and try again.
<b>INMBUE0063</b>	<b>Invalid value</b>
<b>Explanation</b>	Value entered is not valid.
<b>Action</b>	Enter a valid value and try again.
<b>INMBUE0065</b>	<b>Maximum payload size cannot take the value "0".</b>
<b>Explanation</b>	You have specified the value "0" for the maximum payload size parameter.
<b>Action</b>	Specify "-1" for unlimited size or an integer value greater than "0" for the maximum payload size, and try again.
<b>INMBUE0066</b>	<b>Select at least one request content type.</b>
<b>Explanation</b>	A request content type is required if you have added either a schema or an example content for request.
<b>Action</b>	Add at least one content type for request.
<b>INMBUE0067</b>	<b>Select at least one response content type.</b>
<b>Explanation</b>	A response content type is required if you have added either a schema or an example content for response.
<b>Action</b>	Add at least one content type for response.
<b>INMBUE0068</b>	<b>The request(s) of this method do not consume the content type(s) {0}.</b>
<b>Explanation</b>	There is a mismatch between the method's request Content-Types and the Content-Type set for the request.
<b>Action</b>	Provide the correct method content type that matches the request content type.
<b>INMBUE0069</b>	<b>The response(s) of this method do not consume the content type(s) {0}.</b>
<b>Explanation</b>	There is a mismatch between the method's response Content-Types and the Content-Type set for the Response.
<b>Action</b>	Provide the correct method content type that matches the response content type.

<b>INMBUE0074</b>	<b>The error status code is not valid.</b>
<b>Explanation</b>	You have entered an incorrect error status code.
<b>Action</b>	Enter an error status code between 400 to 500.
<b>INMBUE0076</b>	<b>Message Subject field cannot be empty.</b>
<b>Explanation</b>	You have not entered the subject line of the email which is used for the consumer notifications.
<b>Action</b>	Enter the subject line of the email in the Message Subject field.
<b>INMBUE0077</b>	<b>Message Body field cannot be empty.</b>
<b>Explanation</b>	You have not entered the message content of the email which is used for the consumer notifications.
<b>Action</b>	Enter the message content of the email in the Message Body field.
<b>INMBUE0078</b>	<b>Required alias '<code>#{sys:dyn-Endpoint}</code>' is missing in the Route Through field.</b>
<b>Explanation</b>	You have not specified the alias ' <code>#{sys:dyn-Endpoint}</code> ' in the Route Through field.
<b>Action</b>	Make sure the alias ' <code>#{sys:dyn-Endpoint}</code> ' is specified in the Route Through field.
<b>INMBUE0079</b>	<b>Taxonomy name cannot be empty.</b>
<b>Explanation</b>	You have not provided a name for the taxonomy.
<b>Action</b>	Provide a name for the taxonomy.
<b>INMBUE0080</b>	<b>Asset type name cannot be empty.</b>
<b>Explanation</b>	You have not provided a name for the asset type.
<b>Action</b>	Provide a name for the asset type.
<b>INMBUE0081</b>	<b>Invalid profile name.</b>
<b>Explanation</b>	The entered value for profile name is not valid.
<b>Action</b>	Enter a valid profile name.
<b>INMBUE0082</b>	<b>Invalid attribute name.</b>
<b>Explanation</b>	The entered value for attribute name is not valid.
<b>Action</b>	Enter a valid attribute name.

<b>INMBUI0005</b>	<b>No document(s) available.</b>
<b>Explanation</b>	Documents are not available to download.
<b>Action</b>	No action required.
<b>INMBUI0006</b>	<b>Selected item(s) not applicable for Export</b>
<b>Explanation</b>	The selected item(s) are not applicable for export.
<b>Action</b>	No action required.
<b>INMBUI0008</b>	<b>No target found for deployment.</b>
<b>Explanation</b>	No target found was for deployment
<b>Action</b>	Register a target for deployment before initiating the Publish action.
<b>INMBUI0010</b>	<b>Error while instantiating the activity {0}.</b>
<b>Explanation</b>	Could not instantiate the activity {0}. The failure is likely to be cause by incorrect configuration.
<b>Action</b>	Verify that the activity has been configured correctly.
<b>INMBUI0027</b>	<b>Unable to view the profile information.</b>
<b>Explanation</b>	You do not have sufficient access right to view the profile information.
<b>Action</b>	Verify that you have the appropriate access rights. Contact your administrator and request access if necessary and then try again.
<b>INMBUI0033</b>	<b>Enter the base URL for API requests.</b>
<b>Explanation</b>	Base URL is mandatory for making requests to the API.
<b>Action</b>	Enter the base URL for API requests.
<b>INMBUI0034</b>	<b>Enter a namespace.</b>
<b>Explanation</b>	A namespace should be specified for the API.
<b>Action</b>	Enter a valid namespace.
<b>INMBUI0057</b>	<b>Select a sandbox for base URL.</b>
<b>Explanation</b>	No sandbox has been selected for the base URL. A base URL is classified with a sandbox environment such as a Development, Production or Test to indicate the usage.
<b>Action</b>	Select a sandbox for the base URL.

<b>INMBUI0075</b>	<b>Enter the Endpoint Prefix for the API.</b>
<b>Explanation</b>	Endpoint Prefix is optional for Virtual API.
<b>Action</b>	Enter the Endpoint Prefix for the API.
<b>INMBUW0001</b>	<b>Invalid search query.</b>
<b>Explanation</b>	You have entered an invalid search query, possibly because the query is not available in the CentraSite repository.
<b>Action</b>	The search query {0} is not available. Configure your portlet with a valid search query.
<b>INMBUW0047</b>	<b>Specified value is a duplicate value. Specify a valid unique value.</b>
<b>Explanation</b>	An alias value is already defined for this target.
<b>Action</b>	Specify a valid unique value.
<b>INMBUW0048</b>	<b>A value is already specified for the target. Select a different gateway.</b>
<b>Explanation</b>	This is an alias value already defined for this target.
<b>Action</b>	Select a different gateway.
<b>INMBUW0049</b>	<b>Provide an alias value.</b>
<b>Explanation</b>	You have to provide an alias value.
<b>Action</b>	No action required.
<b>INMBUW0050</b>	<b>Specify a value for this target, else delete the row.</b>
<b>Explanation</b>	You must specify a value for this target.
<b>Action</b>	Specify target specific alias value or else delete the entire row.
<b>INMBUW0061</b>	<b>To add multiple resources, you must manually reconfigure the Route to endpoint field. To reconfigure the Route to endpoint, append the resource path tokenizer <code>/\${sys:resource_path}</code> with the base URL of the native API in the format <code>&lt;base-url&gt;/\${sys:resource_path}</code>. For more information about handling multiple resources, see the documentation <a href="#">Run-Time Goveranance with CentraSite</a>.</b>
<b>Explanation</b>	To add multiple resources, you must manually reconfigure the Route to endpoint field. To reconfigure the Route to endpoint, append the resource path tokenizer <code>/\${sys:resource_path}</code> with the base URL of the native API in the format <code>&lt;base-url&gt;/\${sys:resource_path}</code> . For more information about handling multiple resources, see the documentation <a href="#">Run-Time Goveranance with CentraSite</a> .
<b>Action</b>	To add multiple resources, you must manually reconfigure the Route to endpoint field. To reconfigure the Route to endpoint, append the resource path tokenizer <code>/\${sys:resource_path}</code> with the base URL of the native API in the format

<base-url>/\${sys:resource\_path}. For more information about handling multiple resources, see the documentation Run-Time Governance with CentraSite.

**INMBU\_ERR\_EMPTY\_ERROR\_TEMPLATE – Select an error template in the Use as Default option.**

**Explanation** You have not specified an error template to use as the default in the Use as Default option.

**Action** Configure a default error template for the error condition and try again.

**INMBU\_ERR\_SAME\_TYPE\_MULTIPLE\_SELECTION – Multiple error templates are not permitted for same content type.**

**Explanation** You have selected more than one error template for the same content type.

**Action** Remove duplicate error templates with same content type and try again.

**INMBU\_LBL\_API\_UNPUBLISH\_WARNING – If you unpublish an API from API Portal, the API keys associated with the API will be lost.**

**INMBU\_LBL\_USER\_BEEPER\_PHONE – Beeper**

**INMBU\_LBL\_USER\_DOMAIN\_NAME – Display Name**

**INMBXE0003 Enter a valid username or password.**

**Explanation** You have entered an invalid username or password. To log in to CentraSite, you must enter a valid username and password.

**Action** Enter a valid username or password.

**INMBXE0004 Enter your username (full email address).**

**Explanation** You have entered an invalid username. To log in to CentraSite, you must enter your email address as username.

**Action** Enter a valid username.

**INMBXE0005 Enter a valid email address (e.g. example@example)**

**Explanation** You have entered a wrong or blank email address. You must enter a valid email address (e.g. example@example).

**Action** Enter a valid email address (e.g. example@example).

<b>INMBXE0009</b>	<b>Enter your password.</b>
<b>Explanation</b>	To request an account in CentraSite, you must enter a password.
<b>Action</b>	Enter a valid password.
<b>INMBXE0010</b>	<b>Enter your first name. Example: John.</b>
<b>Explanation</b>	To request an account in CentraSite, you must enter your first name.
<b>Action</b>	Enter your first name.
<b>INMBXE0011</b>	<b>Enter your last name. Example: Smith.</b>
<b>Explanation</b>	To request an account in CentraSite, you must enter your last name.
<b>Action</b>	Enter your last name.
<b>INMBXE0012</b>	<b>Enter a reason for requesting access to CentraSite.</b>
<b>Explanation</b>	To register an account in CentraSite, you must provide a valid reason for requesting the account to CentraSite.
<b>Action</b>	Enter a valid reason for requesting access to CentraSite.
<b>INMBXE0016</b>	<b>Password does not match</b>
<b>Explanation</b>	The password for Confirm Password does not match the given password.
<b>Action</b>	Confirm the given password by entering the same password again.
<b>INMBXE0017</b>	<b>Access is denied.</b>
<b>Explanation</b>	Could not log in to the CentraSite Business UI as a guest user, probably because the guest access is disabled.
<b>Action</b>	Verify the centrasite.xml file. Make sure that the property element "Guest visibility" is set to "true". For more information about the usage of "Guest visibility" property, see the CentraSite Administrator's Guide. If the property is already set to "true" and the error persists, contact your administrator.
<b>INMBXI0001</b>	<b>CentraSite gives your organization a single place to store, find and reuse service and process assets. That speeds up development. Automatic policy enforcement helps you ensure new services and processes perform consistently and to the quality standards you've set.</b>
<b>Explanation</b>	This message provides an introduction to CentraSite in the login page.
<b>Action</b>	Get an overview of the product.

<b>INMBXI0002</b>	<b>Log in to Your Account</b>
<b>Explanation</b>	Enter the user account credentials to log in to CentraSite.
<b>Action</b>	Log in to CentraSite.
<b>INMBXI0006</b>	<b>Create Your Account</b>
<b>Explanation</b>	Request for an account in CentraSite.
<b>Action</b>	Enter the user credentials and create an account in CentraSite.
<b>INMBXI0008</b>	<b>Thank you for your registration in CentraSite.</b>
<b>Explanation</b>	Thank you for your registration. We will contact you soon and inform you of the next steps. In the meantime you may visit CentraSite as a guest.
<b>Action</b>	Log in to CentraSite as a guest.
<b>INMBXI0013</b>	<b>You will be contacted by a CentraSite administrator.</b>
<b>Explanation</b>	The CentraSite administrator will process your registration request and contact you shortly.
<b>Action</b>	The CentraSite Administrator will process your request and contact you shortly.
<b>INMBXI0014</b>	<b>Access CentraSite as a guest.</b>
<b>Explanation</b>	You may access CentraSite as a guest.
<b>Action</b>	Access CentraSite as a guest.
<b>INMBXW0015</b>	<b>JavaScript is not enabled in your web browser.</b>
<b>Explanation</b>	If JavaScript is already installed but the application does not work, you may need to enable JavaScript in your web browser.
<b>Action</b>	Enable the JavaScript in your web browser.
<b>INMBX_LBL_ERROR_PAGE – Enable your CentraSite license</b>	
<b>Explanation</b>	Members of the CentraSite Community Edition (CE) are not allowed to use the CentraSite Business UI. This is because the Community Edition is a free-of-charge version of CentraSite that does not include a CentraSite license. In order to use the CentraSite Business UI, you must have the CentraSite license installed.
<b>Action</b>	Install the CentraSite license. For further information contact your software supplier.

**INMBX\_LBL\_IE8\_COMPATIBILITY\_TEXT – CentraSite Business UI is not designed to run in compatibility mode. Disable the compatibility mode to render the Business UI.**

**Explanation** CentraSite Business UI is not designed to run in compatibility mode.

**Action** Disable the compatibility mode to render the Business UI.

**INMBX\_LIC\_ACCESS\_ERROR – Error accessing license information. Check the error log for more information.**

**Explanation** Error encountered while accessing the CentraSite license information.

**Action** If this error persists, contact your administrator.

**INMCBE0009 You do not have sufficient access rights to modify this object.**

**Explanation** You do not have sufficient access rights to modify this object.

**Action** Verify that you have the appropriate access rights. Contact your administrator and request access if necessary and then try again.

**INMCBE0012 Invalid password specified.**

**Explanation** You have specified an invalid password.

**Action** Correct password and try again.

**INMCBE0013 HTTP response {0} received while updating password.**

**Explanation** While updating the password, the user received an http error with the given error code.

**Action** Analyse the reason for this error based on the http error code.

**INMCBE0014 Error occurred when reading configuration file at {0}.**

**Explanation** An error occurred when reading the user-specific configuration file at the given location.

**Action** Refer to the stack trace - you may need to delete the given file from the repository.

**INMCBE0015 You have entered no file or folder name.**

**Explanation** You have entered no file or folder name.

**Action** Enter a name.

<b>INMCBE0016</b>	<b>The name you have entered is invalid. Web Folder names cannot include any of the following characters: :?*&lt;&gt; \"</b>
<b>Explanation</b>	The name you have entered is invalid. Web folder names cannot include any of the following characters: :?*<> \"
<b>Action</b>	Specify another name.
<b>INMCBE0017</b>	<b>The name you have entered exceeds the maximum allowed name length.</b>
<b>Explanation</b>	The name you have entered exceeds the maximum allowed name length.
<b>Action</b>	Specify a shorter name.
<b>INMCBE0018</b>	<b>No report definition is linked to given report object</b>
<b>Explanation</b>	The report must have an external link referencing the report definition created via BIRT.
<b>Action</b>	Repeat the import of the report either via the "Import Report" command in the user interface or via the "Export to CentraSite" command in the BIRT plugin of Eclipse.
<b>INMCBE0020</b>	<b>Failed to obtain value of parameter {0}</b>
<b>Explanation</b>	Could not determine value for the parameter with given name.
<b>Action</b>	Contact your software supplier.
<b>INMCBE0021</b>	<b>The domain of the specified user is invalid.</b>
<b>Explanation</b>	The domain of the specified user is invalid. For non-windows platforms, only the domain LOCAL or LDAP is allowed.
<b>Action</b>	Enter a valid domain. For non-Windows platforms, only the domain LOCAL or LDAP is allowed.
<b>INMCBE0022</b>	<b>Object no longer available</b>
<b>Explanation</b>	The selected object does not exist, possibly because it has been implicitly discarded before or an import has failed.
<b>Action</b>	Check recent activities.
<b>INMCBE0024</b>	<b>The passwords you typed do not match.</b>
<b>Explanation</b>	The passwords you typed do not match.
<b>Action</b>	Enter the new password in both text boxes.

<b>INMCBE0027</b>	<b>The specified user does not exist.</b>
<b>Explanation</b>	The specified user is not present in CentraSite.
<b>Action</b>	Specify a valid user.
<b>INMCBE0029</b>	<b>Error occurred when initializing CentraSite Control - disabling plug-in.</b>
<b>Explanation</b>	An error occurred when initializing CentraSite Control.
<b>Action</b>	Check details of error message for further information.
<b>INMCBE0030</b>	<b>Invalid change of data type for existing data.</b>
<b>Explanation</b>	An attempt is being made to change the data type of a property that already has data present that is not of the type specified.
<b>Action</b>	Select a data type that matches the existing data.
<b>INMCBE0032</b>	<b>Asset name must not be empty.</b>
<b>Explanation</b>	No name is specified for the asset.
<b>Action</b>	Enter a valid asset name.
<b>INMCBE0033</b>	<b>Asset type not valid.</b>
<b>Explanation</b>	The selected asset type is not valid for this operation.
<b>Action</b>	Select a valid asset type.
<b>INMCBE0035</b>	<b>The associated object of type Associated with could not be deleted</b>
<b>Explanation</b>	User does not have permission to delete the associated object
<b>Action</b>	Grant delete permission to the user for the associated object
<b>INMCBE0036</b>	<b>The associated object of type WS-Policy attachment could not be deleted</b>
<b>Explanation</b>	The user does not have permission to delete the WS-Policy associated with the virtual service.
<b>Action</b>	Verify that you have the appropriate access rights. Contact your administrator and request access if necessary and then try again.

<b>INMCBE0037</b>	<b>The associated object of type External Link could not be deleted</b>
<b>Explanation</b>	The user does not have permission to delete associated external links.
<b>Action</b>	Verify that you have the appropriate access rights. Contact your administrator and request access if necessary and then try again.
<b>INMCBE0038</b>	<b>Asset with name {0} already exists of type {1}</b>
<b>Explanation</b>	There is a duplicate asset name.
<b>Action</b>	Enter another name for the asset.
<b>INMCBI0001</b>	<b>New ExternalLink has been copied to the internal clipboard. It can be added to arbitrary registry objects now.</b>
<b>Explanation</b>	The newly created ExternalLink object has been copied to the internal clipboard. It can be used to add the ExternalLink to any registry object via the tab "External Links".
<b>Action</b>	No action required.
<b>INMCBW0002</b>	<b>Resource cannot be deleted as it is the target of one or more ExternalLink objects.</b>
<b>Explanation</b>	You cannot delete this resource as it is referenced by one or more external links.
<b>Action</b>	You may run the impact analysis in order to determine the registry objects that have an external link referencing this resource.
<b>INMCBW0003</b>	<b>Folder cannot be deleted as it is the target of one or more ExternalLink objects.</b>
<b>Explanation</b>	You cannot delete this folder as it is referenced by one or more External Links.
<b>Action</b>	You may run the impact analysis in order to determine the registry objects that have an external link depending on this folder.
<b>INMCBW0004</b>	<b>Resource cannot be renamed as it is the target of one or more ExternalLink objects.</b>
<b>Explanation</b>	You cannot rename this resource as it is referenced by one or more registry objects.
<b>Action</b>	You may run the impact analysis in order to determine the registry objects that have an external link depending on this resource.
<b>INMCBW0007</b>	<b>No report is linked to type {0}.</b>
<b>Explanation</b>	No report has been associated to the type via the 'Link Reports' command.
<b>Action</b>	You can associate a report via the command 'Link Reports' for the respective type.

<b>INMCBW0010</b>	<b>No operation is defined for type {0}.</b>
<b>Explanation</b>	The definition of the respective type does not contain any operations.
<b>Action</b>	You can add operations via the 'Modify Type' command for the respective type.
<b>INMCBW0011</b>	<b>You are connected as a read-only user. This will lead to limited functionality being available.</b>
<b>Explanation</b>	A read-only user does not have privileges to modify registry objects.
<b>Action</b>	Log in as another user if you want to modify registry objects.
<b>INMCBW0019</b>	<b>No items have been exported</b>
<b>Explanation</b>	No items have been exported - this may happen if items selected for export are embedded into other objects and thus cannot be exported without their parent objects.
<b>Action</b>	Select the parent object for export.
<b>INMCBW0031</b>	<b>File cannot be deleted as it is the target of one or more Favorite objects of My CentraSite.</b>
<b>Explanation</b>	You cannot delete this file as it is referenced by one or more External Links in My CentraSite.
<b>Action</b>	You may run the impact analysis in order to determine the Favorite Object in My CentraSite that has an external link referencing this resource.
<b>INMCCE0001</b>	<b>Command {0} is not supported by CentraSite command line tool</b>
<b>Explanation</b>	The specified command cannot be executed by the CentraSite command line tool. It is not in the list of supported commands.
<b>Action</b>	Please check the usage of CentraSiteCommand and make sure you specify the command which is listed in the usage.
<b>INMCCE0002</b>	<b>Exception while fetching email properties</b>
<b>Explanation</b>	CentraSiteCommand is not able to fetch the email properties from CentraSite.
<b>Action</b>	Please make sure all the parameters are valid and re-execute the command.
<b>INMCCE0003</b>	<b>Exception while storing email properties</b>
<b>Explanation</b>	CentraSiteCommand is not able to store the email properties into CentraSite.
<b>Action</b>	Please make sure all the parameters are valid and re-execute the command.

<b>INMCCE0006</b>	<b>Parsing failed! Please make sure configuration file syntax and path are correct.</b>
<b>Explanation</b>	Parsing the CentraSiteCommand option and/or configFile failed.
<b>Action</b>	Please make sure the CentraSiteCommand options are specified properly and configFile exists in the specified location.
<b>INMCCE0007</b>	<b>Parsing failed! Please make sure configuration file syntax and path are correct.</b>
<b>Explanation</b>	This error can occur because of two reasons. 1) The syntax of the configuration file is not valid. 2) The specified configuration file path is incorrect.
<b>Action</b>	Please refer to the documentation for information on creating a valid configuration file.
<b>INMCCE0008</b>	<b>Failed to execute command {0}</b>
<b>Explanation</b>	Error occurred while executing the command.
<b>Action</b>	Please check the error message for details.
<b>INMCCE0009</b>	<b>Internal error occurred</b>
<b>Explanation</b>	This error may occur because of problems in the system execution.
<b>Action</b>	Please contact the administrator.
<b>INMCCE0010</b>	<b>{0} is an invalid log unit, possible values are {1}</b>
<b>Explanation</b>	The provided log unit is invalid. This can occur when the user specifies a log unit other than the supported ones.
<b>Action</b>	Please refer to the error message for the possible values.
<b>INMCCE0011</b>	<b>{0} is invalid log unit value, possible values are {1}</b>
<b>Explanation</b>	The provided log unit value is invalid. This can occur when the user specifies a log unit value other than the supported ones.
<b>Action</b>	Please refer to the error message for the possible values.
<b>INMCCE0012</b>	<b>Purger unavailable for {0}</b>
<b>Explanation</b>	No purger was found for the given log unit. This error can occur if an appropriate purger is not found/available for the given log unit.
<b>Action</b>	Please ensure the correct log units are provided in the configuration file.

<b>INMCCE0013</b>	<b>Purging stopped for {0} as there is no write permission for export location {1}</b>
<b>Explanation</b>	This error will occur when the user does not have the required write permission for the export location.
<b>Action</b>	Please provide required permissions before purging.
<b>INMCCE0014</b>	<b>Insufficient disk space in {0}. Required space {1}. Available space {2}.</b>
<b>Explanation</b>	The specified export location does not contain enough space for the exported logs. Please refer to the error message for the available and required space.
<b>Action</b>	Please choose a different export location.
<b>INMCCE0015</b>	<b>Purging Failed. Following error occurred {0}.</b>
<b>Explanation</b>	Purging failed for the log unit mentioned in the error message. Some failures may happen because of network time out and similar problems.
<b>Action</b>	Please try again later or contact the administrator for assistance.
<b>INMCCE0016</b>	<b>Unable to archive the export directory {0}</b>
<b>Explanation</b>	The archiving of the exported logs failed. This may happen because of files being accessed by an other application.
<b>Action</b>	Please close the other application and try again.
<b>INMCCE0017</b>	<b>Unable to create the export directory {0}</b>
<b>Explanation</b>	This error can occur when the user does not have the required write permission for the export location or the export location is invalid.
<b>Action</b>	Please provide required permissions before purging or make sure the export location is valid.
<b>INMCCE0018</b>	<b>Command {0} is not supported by CentraSite command line tool</b>
<b>Explanation</b>	The displayed command is invalid. This can occur when the user specifies a command other than the supported ones. For example, to purge logs, you should specify -command purge_logs.
<b>Action</b>	Please refer to the documentation for the list of supported commands and their usage.

<b>INMCCE0019</b>	<b>castUri option is mandatory for the command {1}</b>
<b>Explanation</b>	The castUri option is required for the specified commands.
<b>Action</b>	Please specify the cast URI in the -castUri option.
<b>INMCCE0020</b>	<b>CentraSite Application Server Object (CAST) already registered in CentraSite with the specified castUri {0}</b>
<b>Explanation</b>	The CAST will be identified using the host present in castUri option, and CentraSite already contains a CAST registered with the specified host.
<b>Action</b>	Specify a different value in the castUri option or de-register the existing CAST and register it again. A CAST can be de-registered using the deregister_cast command.
<b>INMCCE0021</b>	<b>{0} and {1} both present in configuration for log unit {2}</b>
<b>Explanation</b>	The tags Until and OlderThan are both present in the configuration file.
<b>Action</b>	Please use only one of the given tags in the configuration file. For more information, please refer to the Administration guide.
<b>INMCCE0022</b>	<b>Unable to obtain policy query manager. Cause: {0}</b>
<b>Explanation</b>	It was not possible to obtain the policy query manager.
<b>Action</b>	Verify your installation or contact the administrator.
<b>INMCCE0023</b>	<b>Exception occurred during restore operation. Cause: {0}.</b>
<b>Explanation</b>	An exception occurred during the restore operation.
<b>Action</b>	Please check the exception message for more details.
<b>INMCCE0024</b>	<b>Archive seal error. Invalid start/end date entries in the archive seal properties for the Archive file {0} located in {1}.</b>
<b>Explanation</b>	An archive seal error occurred. There are invalid start/end date entries in the archive seal properties.
<b>Action</b>	Please verify the seal properties file for correctness.
<b>INMCCE0025</b>	<b>Error creating archive seal file. Cause {0}.</b>
<b>Explanation</b>	An error occurred while creating the archive seal file.
<b>Action</b>	Please check the error message for more details.

<b>INMCCE0026</b>	<b>Command option {0} missing</b>
<b>Explanation</b>	The specified command requires a command option.
<b>Action</b>	See the usage information for the correct command syntax.
<b>INMCCE0028</b>	<b>Domain {0} not found</b>
<b>Explanation</b>	The domain to be processed does not exist.
<b>Action</b>	Correct the specified domain name.
<b>INMCCE0029</b>	<b>Domain {0} already exist</b>
<b>Explanation</b>	A domain entry with the specified name is already present.
<b>Action</b>	Correct the specified domain name.
<b>INMCCE0030</b>	<b>Error processing configuration file: {0}</b>
<b>Explanation</b>	The configuration file does not contain a valid domain entry.
<b>Action</b>	Correct the domain entry in the configuration file.
<b>INMCCE0031</b>	<b>Error deleting domain entry: {0}</b>
<b>Explanation</b>	The specified domain entry could not be deleted.
<b>Action</b>	Contact your support center.
<b>INMCCE0039</b>	<b>{0} is not a LDAP domain</b>
<b>Explanation</b>	The validate command is only supported for LDAP domains.
<b>Action</b>	Specify an LDAP domain for validating an authentication configuration.
<b>INMCCE0040</b>	<b>LDAP basic configuration validation error</b>
<b>Explanation</b>	The basic LDAP configuration is invalid.
<b>Action</b>	Check the basic settings for the specified domain.
<b>INMCCE0041</b>	<b>LDAP user login validation error</b>
<b>Explanation</b>	The user could not log on with supplied user name and password.
<b>Action</b>	Check if the user name and password were specified correctly. Check the settings for the specified domain.

<b>INMCCE0042</b>	<b>LDAP user properties validation error</b>
<b>Explanation</b>	The user properties configuration is invalid.
<b>Action</b>	Check the user properties settings for the specified domain.
<b>INMCCE0043</b>	<b>LDAP group resolution validation error</b>
<b>Explanation</b>	The group resolution configuration is invalid.
<b>Action</b>	Check the group resolution settings for the specified domain.
<b>INMCCE0046</b>	<b>CS Admin user {0} not created</b>
<b>Explanation</b>	An error occurred while attempting to create a user with the CentraSite Administrator role.
<b>Action</b>	See the additional information provided to find the reason.
<b>INMCCE0047</b>	<b>CS Admin user {0} ({1}) not created</b>
<b>Explanation</b>	An error occurred while attempting to create a user with the CentraSite Administrator role.
<b>Action</b>	See the additional information provided to find the reason.
<b>INMCCE0053</b>	<b>{0} No Users found!</b>
<b>Explanation</b>	Searched users are not found
<b>Action</b>	user has to retry the search
<b>INMCCE0054</b>	<b>{0} No group properties found!</b>
<b>Explanation</b>	The group properties entered for the configuration are not correct.
<b>Action</b>	Correct the group properties.
<b>INMCCE0055</b>	<b>Can't get group properties. {0}</b>
<b>Explanation</b>	{0} --> error message from the LDAP
<b>Action</b>	re-configuration needs to be done
<b>INMCCE0056</b>	<b>cannot read user property {0}</b>
<b>Explanation</b>	{0} --> user property configured
<b>Action</b>	Re-configure the user properties

<b>INMCCE0058</b>	<b>cannot read user property {0}</b>
<b>Explanation</b>	{0} --> user property
<b>Action</b>	Re-configure the property
<b>INMCCE0059</b>	<b>{0} No user properties found!</b>
<b>Explanation</b>	{0} --> status warning message
<b>Action</b>	Re-configure the user properties
<b>INMCCE0060</b>	<b>Cannot contact the server. {0}</b>
<b>Explanation</b>	An attempt to connect to the server failed with the error message {0}.
<b>Action</b>	Re-configure the server properties.
<b>INMCCE0066</b>	<b>Unable to connect to socket!</b>
<b>Explanation</b>	There was a problem while connecting to the socket.
<b>Action</b>	Re-configure the connection.
<b>INMCCE0067</b>	<b>The old file is not deleted</b>
<b>Explanation</b>	An SSX trace file already exists and should be deleted.
<b>Action</b>	The SSX trace file needs to be deleted manually.
<b>INMCCE0068</b>	<b>Unable to listen to port</b>
<b>Explanation</b>	It was not possible to connect to the given port.
<b>Action</b>	Re-configure the port.
<b>INMCCE0088</b>	<b>Cannot write to log4j.</b>
<b>Explanation</b>	A message could not be written to the log4j log file.
<b>Action</b>	Check your log4j configuration.
<b>INMCCE0089</b>	<b>Cannot write in the {0}</b>
<b>Explanation</b>	A message could not be written to the SSX trace file {0}.
<b>Action</b>	Check your trace file configuration.

<b>INMCCE0090</b>	<b>cannot connect to database - possibly password wrong?</b>
<b>Explanation</b>	An error was detected while trying to connect to the database.
<b>Action</b>	Check that you entered the correct password.
<b>INMCCE0091</b>	<b>Database 'CentraSite' not running</b>
<b>Explanation</b>	The database 'CentraSite' is not running.
<b>Action</b>	Start the CentraSite database.
<b>INMCCE0092</b>	<b>{0} User authentication for "{0}" failed!</b>
<b>Explanation</b>	{0} --> State error {1} --> user name
<b>Action</b>	Re-enter the user authentication
<b>INMCCE0093</b>	<b>The user repository cannot be created with parameters: {0}</b>
<b>Explanation</b>	The user repository cannot be created with the given parameters.
<b>Action</b>	Re-configure the repository.
<b>INMCCE0094</b>	<b>{0} open SSXRepository - {1}</b>
<b>Explanation</b>	The SSX repository is not connected. The state error is {0} and the error message is {1}.
<b>Action</b>	Re-configure the connection to the repository.
<b>INMCCE0096</b>	<b>Can't get users {0}</b>
<b>Explanation</b>	The user mapping does not match any entry on the LDAP server.
<b>Action</b>	Provide a user mapping that matches an entry in LDAP.
<b>INMCCE0100</b>	<b>Can't get member of group {0}</b>
<b>Explanation</b>	An incorrect group ID was specified.
<b>Action</b>	Provide a correct group ID.
<b>INMCCE0103</b>	<b>Can't get groups for user {0}</b>
<b>Explanation</b>	No groups were found for the given user.
<b>Action</b>	Provide a proper group resolution.

<b>INMCCE0105</b>	<b>db 'CentraSite' not running</b>
<b>Explanation</b>	The database "CentraSite" is not currently active.
<b>Action</b>	Restart the "CentraSite" database.
<b>INMCCE0111</b>	<b>Failed to obtain the user {0} folder from CentraSite</b>
<b>Explanation</b>	Could not obtain the folder for the user with given name. The username is used to store a search definition in CentraSite.
<b>Action</b>	Make sure the user is registered in CentraSite.
<b>INMCCE0112</b>	<b>Search definition {0} already exists in CentraSite</b>
<b>Explanation</b>	An attempt was made to overwrite the existing report search definition.
<b>Action</b>	Make sure that you publish a new module or pass the argument -overwrite option_value.
<b>INMCCE0113</b>	<b>File {0} not found</b>
<b>Explanation</b>	The file {0} was not found in the folder.
<b>Action</b>	Check the availability of the file in the specified path.
<b>INMCCE0114</b>	<b>Retrieving the namespace from {0} failed because the namespace is null.</b>
<b>Explanation</b>	Cannot retrieve the namespace in the search definition since the namespace is null.
<b>Action</b>	Make sure a valid namespace is declared in the search definition.
<b>INMCCE0115</b>	<b>Namespace does not match with the module</b>
<b>Explanation</b>	The specified namespace does not match with the new module and search definition.
<b>Action</b>	Make sure that the namespace matches with the new module and search definition.
<b>INMCCE0116</b>	<b>Error loading the module</b>
<b>Explanation</b>	Failed to load the new module into CentraSite.
<b>Action</b>	Make sure the module format is correct.
<b>INMCCE0117</b>	<b>The namespace {0} is already used by a module in CentraSite</b>
<b>Explanation</b>	The specified namespace {0} was already used by a module. The module namespace should be unique in CentraSite.
<b>Action</b>	Define a new module namespace or use -overwrite TRUE to overwrite the existing module with this new namespace.

<b>INMCCE0118</b>	<b>The user you specified does not exist</b>
<b>Explanation</b>	The user you specified is not a known user.
<b>Action</b>	Specify the name of a known user.
<b>INMCCE0119</b>	<b>The number of Arguments for the command SetAsymmetricBindingConfigurations is not sufficient</b>
<b>Explanation</b>	The number of Arguments for the command SetAsymmetricBindingConfigurations is not sufficient
<b>Action</b>	Please provide proper number of Arguments
<b>INMCCE0120</b>	<b>Additional arguments provided to the Command SetAsymmetricBindingConfiguration</b>
<b>Explanation</b>	Additional arguments provided to the Command SetAsymmetricBindingConfiguration
<b>Action</b>	Please delete the unwanted arguments
<b>INMCCE0121</b>	<b>Required parameters missing</b>
<b>Explanation</b>	At least one of the parameters among InitiatorTokenInclusion, RecipientTokenInclusion, AlgorithmSuite and Layout required for the command.
<b>Action</b>	Please Add one of InitiatorTokenInclusion, RecipientTokenInclusion, AlgorithmSuite or Layout
<b>INMCCE0122</b>	<b>Invalid values provided for InitiatorTokenInclusion</b>
<b>Explanation</b>	InitiatorTokenInclusion value can only be one among Always, AlwaysToRecipient, AlwaysToInitiator, Once, Never
<b>Action</b>	Please provide one value among Always, AlwaysToRecipient, AlwaysToInitiator, Once, Never
<b>INMCCE0123</b>	<b>Invalid values provided for RecipientTokenInclusion</b>
<b>Explanation</b>	RecipientTokenInclusion value can be one among AlwaysToRecipient, Always, AlwaysToInitiator, Once, Never
<b>Action</b>	Please provide one among AlwaysToRecipient, Always, AlwaysToInitiator, Once, Never

<b>INMCCE0124</b>	<b>Invalid values provided for AlgorithmSuite</b>
<b>Explanation</b>	Invalid values provided for AlgorithmSuite
<b>Action</b>	Please provide a valid value
<b>INMCCE0125</b>	<b>Invalid value provided for Layout</b>
<b>Explanation</b>	Layout can have one value among Strict,Lax,LaxTsFirst,LaxTsLast
<b>Action</b>	Please provide one value among Strict,Lax,LaxTsFirst,LaxTsLast
<b>INMCCE0126</b>	<b>Exception writing the values to the repository .Reason : {0}</b>
<b>Explanation</b>	{0}
<b>Action</b>	{0}
<b>INMCCE0127</b>	<b>Exception while reading from the repository .Reason : {0}</b>
<b>Explanation</b>	{0}
<b>Action</b>	{0}
<b>INMCCE0129</b>	<b>The target for federation cannot be configured in the file at {0}</b>
<b>Explanation</b>	While trying to configure a target for federation, the file at location {0} will be modified to include the configuration. This error occurs if the "multicast" element cannot be found in the file.
<b>Action</b>	Check to ensure that the "multicast" element is available after "from" in the file {0}.
<b>INMCCE0130</b>	<b>The mandatory parameter(s), {0} is/are not specified for the command</b>
<b>Explanation</b>	The command requires some parameters for proper execution and they are not specified. Without these mandatory parameters, the execution cannot proceed.
<b>Action</b>	Provide the parameters needed for the command execution. If you don't know the command format, just provide the command name alone to get the usage for the command.
<b>INMCCE0131</b>	<b>The provided configFile {0} is not configured with the {1} element.</b>
<b>Explanation</b>	While parsing the XML configFile, {0}, the parser cannot obtain the {1} element which is needed for the command execution.
<b>Action</b>	Check the configFile {0} to see if the {1} element is configured. If it is not, provide the necessary details.

<b>INMCCE0132</b>	<b>The given federation id {0} does not have any target associated with it.</b>
<b>Explanation</b>	The provided ID {0} is not configured to have a federation target.
<b>Action</b>	Use show_uddi_federation to determine the list of configured federation targets and identifiers.
<b>INMCCE0139</b>	<b>An Internal Error occurred</b>
<b>Explanation</b>	An Internal Error occurred
<b>Action</b>	An Internal Error occurred
<b>INMCCE0140</b>	<b>Invalid Credentials</b>
<b>Explanation</b>	Invalid Credentials provided
<b>Action</b>	Please provide valid credentials
<b>INMCCE0141E</b>	<b>Provide details for any one of the following parameters: api, accessToken, apiPortal</b>
<b>Explanation</b>	An error occurred while sending the access tokens using the send AccessTokens command because the details for more than one of the parameters was provided.
<b>Action</b>	Provide details for any one of the parameters.
<b>INMCCE0142</b>	<b>Invalid Virtual Service name</b>
<b>Explanation</b>	The specified virtual service name is invalid.
<b>Action</b>	Enter a valid virtual service name.
<b>INMCCE0144</b>	<b>Invalid Target name</b>
<b>Explanation</b>	The target is not created or is invalid for virtual services to be deployed, undeployed or redeployed.
<b>Action</b>	Please provide a valid target name.
<b>INMCCE0152</b>	<b>Command execution failed. Parameter value cannot be null or empty.</b>
<b>Explanation</b>	A command parameter value was not entered.
<b>Action</b>	Before you execute a command, make sure that you set a value for every parameter in the command.

<b>INMCCE0153</b>	<b>Command execution failed. Description of the path already exists.</b>
<b>Explanation</b>	Description of the command path already exists.
<b>Action</b>	Before you execute a command, make sure that you set a valid command path.
<b>INMCCE0154</b>	<b>Command execution failed. Combination of the path already exists.</b>
<b>Explanation</b>	Combination of the command path already exists.
<b>Action</b>	Before you execute a command, make sure that you set a valid command combination.
<b>INMCCE0155</b>	<b>Command execution failed. The name for command token is not valid.</b>
<b>Explanation</b>	You have entered an invalid name for the command token.
<b>Action</b>	Enter a valid name for the command token.
<b>INMCCE0156</b>	<b>Command execution failed. The input for command token is not valid.</b>
<b>Explanation</b>	You have entered invalid input for the command token.
<b>Action</b>	Enter a valid input for the command token.
<b>INMCCE0157</b>	<b>Command execution failed. Path already exists for the tokens: {0}</b>
<b>Explanation</b>	The path already exists for the command tokens: {0}.
<b>Action</b>	Before you execute a command, make sure that you set a valid path for the tokens.
<b>INMCCE0158</b>	<b>Command execution failed. Parameter value cannot be null or empty.</b>
<b>Explanation</b>	A command parameter value was not entered.
<b>Action</b>	Before you execute a command, make sure that you set a value for every parameter in the command.
<b>INMCCE0159</b>	<b>Command execution failed. Token or parameter value cannot be null or empty.</b>
<b>Explanation</b>	A command token or parameter value was not entered.
<b>Action</b>	Before you execute a command, make sure that you set a value for every token and parameter in the command.
<b>INMCCE0160</b>	<b>Command execution failed. Combination of the command tokens {} already exists.</b>
<b>Explanation</b>	An attempt was made to specify the same token that is already present in the command.
<b>Action</b>	Before you execute a command, make sure that you set a valid token in the command.

<b>INMCCE0161</b>	<b>Parameter {0} should not empty.</b>
<b>Explanation</b>	The '{0}' parameter is mandatory.
<b>Action</b>	Enter a value for the {0} parameter.
<b>INMCCE0162</b>	<b>Check the length of the command help.</b>
<b>Explanation</b>	The command help text you have entered does not meet the minimum requirement of {0} characters.
<b>Action</b>	Correct the help text appropriately.
<b>INMCCE0163</b>	<b>Command execution failed. Unable to join null or empty strings, or a single string.</b>
<b>Explanation</b>	The combination of a null and empty string, or a null and single string is not valid.
<b>Action</b>	Before you execute a command, make sure that you set valid combination of strings in the command.
<b>INMCCE0164</b>	<b>Configuration property {0} cannot be empty.</b>
<b>Explanation</b>	The configuration property '{0}' was not specified.
<b>Action</b>	Specify the property {0}.
<b>INMCCE0165</b>	<b>Command execution failed. Invalid value {0} for configuration parameter {1}.</b>
<b>Explanation</b>	The value {0} for configuration parameter {1} is not valid.
<b>Action</b>	Before you execute a command, make sure that you set a valid value for parameter {1} in the command.
<b>INMCCE0166</b>	<b>Invalid input file.</b>
<b>Explanation</b>	The specified input file is invalid, possibly because there are one or more elements which are not allowed for this command.
<b>Action</b>	Specify a valid input file and try again. If the problem persists, contact your administrator.
<b>INMCCE0170</b>	<b>The default domain {0} cannot be deleted.</b>
<b>Explanation</b>	The specified domain entry is the domain displayed by default and cannot be deleted.
<b>Action</b>	To delete the default domain first designate a different domain as the default domain.

<b>INMCCE0171</b>	<b>The "set Log" command failed due to incorrect data.</b>
<b>Explanation</b>	This is an internal error probably because the "set Log" command expects starting element {0} instead of {1}.
<b>Action</b>	Verify the config.xml contents. Make sure the configuration has starting element as <LogSettings>. For more information about the usage of "set Log" command, see the CentraSite Administrator's Guide. Contact your administrator if the problem persists.
<b>INMCCE0172</b>	<b>The "set Log" command failed due to incorrect data.</b>
<b>Explanation</b>	This is an internal error probably because the specified "set Log" command expects child element {0} instead of {1}.
<b>Action</b>	Verify the config.xml contents. Make sure the configuration has child element as <LogUnit>. For more information about the usage of "set Log" command, see the CentraSite Administrator's Guide. Contact your administrator if the problem persists.
<b>INMCCE0173</b>	<b>The "set Log" command failed due to incorrect data.</b>
<b>Explanation</b>	This is an internal error probably because the "set Log" command expects a <LogUnit> element {0} instead of {1}.
<b>Action</b>	Verify the config.xml contents. Make sure the configuration contain <LogUnit> element with attribute <name>. For more information about the usage of "set Log" command, see the CentraSite Administrator's Guide. Contact your administrator if the problem persists.
<b>INMCCE0174</b>	<b>Upload failed! The file {0} has an invalid extension.</b>
<b>Explanation</b>	An attempt was made to upload the specified file {0} with extension other than .xml.
<b>Action</b>	Upload a valid XML file.
<b>INMCCE0175</b>	<b>Failed to obtain the Organization folder of the user {0} from CentraSite.</b>
<b>Explanation</b>	Could not fetch the Organization folder of the specified user {0}, possibly because the user has been deleted from the CentraSite registry.
<b>Action</b>	Make sure the specified user exists in the CentraSite registry. If the user exists and the error persists, contact your administrator.
<b>INMCCE0178</b>	<b>The set gateway command failed. {0}</b>
<b>Explanation</b>	The gateway command has failed to create a new gateway or update the specified gateway. You might not have the necessary permissions to create/update a gateway in CentraSite or CentraSite might be down.
<b>Action</b>	Ensure that you have the necessary permissions in CentraSite and that CentraSite is up and running. Also, provide all the mandatory parameters when you run the command to create/update a gateway.

<b>INMCCE0180</b>	<b>Gateway deletion failed. {0}</b>
<b>Explanation</b>	The gateway command has failed to delete the specified gateway. You might not have the necessary permissions to delete a gateway in CentraSite or CentraSite might be down.
<b>Action</b>	Ensure that you have the necessary permissions in CentraSite and that CentraSite is up and running. Also, ensure that you have provided the correct gateway name or ID.
<b>INMCCE0181</b>	<b>The list gateways command failed. {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0183</b>	<b>Unable to find a gateway in CentraSite with the name or key "{0}".</b>
<b>Explanation</b>	You have provided a gateway name or key that does not exist in CentraSite. The delete gateway command failed to delete the specified gateway.
<b>Action</b>	Ensure that the gateway name or ID that you specify is correct and exists in CentraSite.
<b>INMCCE0184</b>	<b>Unable to find an organization in CentraSite with the specified name or key "{0}".</b>
<b>Explanation</b>	You have provided an organization name or key that does not exist in CentraSite. The set gateway command failed to create a new gateway.
<b>Action</b>	Ensure that the organization name or key that you specify is correct and exists in CentraSite.
<b>INMCCE0185</b>	<b>Unable to find a sandbox in CentraSite with the specified name or key "{0}".</b>
<b>Explanation</b>	You have provided a name or key of a sandbox category that does not exist in CentraSite. The set gateway command failed to create a new gateway.
<b>Action</b>	Ensure that the sandbox category with the specified name or key exists in CentraSite.
<b>INMCCE0186</b>	<b>Report with that name doesn't exist or name is not unique.</b>
<b>Explanation</b>	Either the name is misspelled or multiple reports with that name exist.
<b>Action</b>	Check the report name and provide a valid report name.

<b>INMCCE0187</b>	<b>Sharing of report failed.</b>
<b>Explanation</b>	Sharing of report failed possibly due to an internal error.
<b>Action</b>	Contact your local support.
<b>INMCCE0189E</b>	<b>Error occurred while publishing API Key {0} to API Portal {1}.</b>
<b>Explanation</b>	An error occurred while trying to publish API Key {0} to API Portal {1}.
<b>Action</b>	Ensure that the API Portal server is up and running. If the problem persists, contact your administrator.
<b>INMCCE0191E</b>	<b>Error occurred while publishing OAuth token {0} to API Portal {1}.</b>
<b>Explanation</b>	An error occurred while trying to publish OAuth token {0} to API Portal {1}.
<b>Action</b>	Ensure that the API Portal server is up and running. If the problem persists, contact your administrator.
<b>INMCCE0197</b>	<b>"{0}" is not a valid value for "{1}".</b>
<b>Explanation</b>	You have provided a value which is not part of the specified list.
<b>Action</b>	Ensure that the provided value is part of the specified list.
<b>INMCCE0198</b>	<b>Report with name "{0}" was not found.</b>
<b>Explanation</b>	You have provided a report name that does not exist in CentraSite.
<b>Action</b>	Ensure that the report name that you specified is correct and exists in CentraSite.
<b>INMCCE0199</b>	<b>More than one reports with the name "{0}" found.</b>
<b>Explanation</b>	You have provided a report name which is not unique in CentraSite.
<b>Action</b>	If the report name is not unique in CentraSite specify the report id.
<b>INMCCE0200</b>	<b>Unable to add a new Report to CentraSite.</b>
<b>Explanation</b>	An error occurred during the "add report" operation.
<b>Action</b>	A new report could not be created. For more information check the CentraSiteCommand log.

<b>INMCCE0201</b>	<b>Unable to delete the report with the id "{0}".</b>
<b>Explanation</b>	An error occurred during the "delete report" operation.
<b>Action</b>	Ensure that the report id is correct and exists in CentraSite. For more information check the CentraSiteCommand log.
<b>INMCCE0202</b>	<b>Unable to access the specified Report Template file.</b>
<b>Explanation</b>	You have provided a path to a report template file which does not exist.
<b>Action</b>	Ensure that the specified report template file exists.
<b>INMCCE0203</b>	<b>Unable to update the report with id "{0}".</b>
<b>Explanation</b>	An error occurred during the "update report" operation.
<b>Action</b>	Ensure that the report id is correct and exists in CentraSite. For more information please check the CentraSiteCommand log.
<b>INMCCE0204</b>	<b>Scheduled report with name "{0}" was not found.</b>
<b>Explanation</b>	You have provided a scheduled report name that does not exist in CentraSite.
<b>Action</b>	Ensure that the scheduled report name that you specified is correct and exists in CentraSite.
<b>INMCCE0205</b>	<b>More than one scheduled report with the name "{0}" found.</b>
<b>Explanation</b>	You have provided a scheduled report name which is not unique in CentraSite.
<b>Action</b>	If the scheduled report name is not unique in CentraSite the scheduled report id has to be specified.
<b>INMCCE0206</b>	<b>Unable to add a new scheduled report to CentraSite.</b>
<b>Explanation</b>	An error occurred during the "add scheduled report" operation.
<b>Action</b>	A new scheduled report could not be created. For more information check the CentraSiteCommand log.
<b>INMCCE0207</b>	<b>Unable to delete the scheduled report with the id "{0}"</b>
<b>Explanation</b>	An error occurred during the "delete scheduled report" operation.
<b>Action</b>	Ensure that the scheduled report id is correct and exists in CentraSite. For more information please check the CentraSiteCommand log.

<b>INMCCE0208</b>	<b>Unable to trigger the execution of the scheduled report with the id "{0}".</b>
<b>Explanation</b>	An error occurred during the "trigger scheduled report" operation.
<b>Action</b>	Ensure that the scheduled report id is correct and exists in CentraSite. For more information check the CentraSiteCommand log.
<b>INMCCE0209</b>	<b>Unable to update the scheduled report with the id "{0}".</b>
<b>Explanation</b>	An error occurred during the "update scheduled report" operation.
<b>Action</b>	Ensure that the scheduled report id is correct and exists in CentraSite. For more information check the CentraSiteCommand log.
<b>INMCCE0210</b>	<b>The property "{0}" is mandatory.</b>
<b>Explanation</b>	You have provided a configuration file where the property is missing.
<b>Action</b>	Ensure that the property is set in the configuration file.
<b>INMCCE0211</b>	<b>Unable to download the report template for the report id "{0}".</b>
<b>Explanation</b>	An error occurred during the "download report template" operation.
<b>Action</b>	Ensure that the report id is correct and exists in CentraSite. For more information check the CentraSiteCommand log.
<b>INMCCE0215</b>	<b>File {0} already exists.</b>
<b>Explanation</b>	The specified file already exists.
<b>Action</b>	Provide the correct file name.
<b>INMCCE0217</b>	<b>User level scope is not allowed.</b>
<b>Explanation</b>	You have provided the scope as user level.
<b>Action</b>	Change the scope either to global or org.
<b>INMCCE0218</b>	<b>Provide details for any one of the following parameters: scope, targetUser</b>
<b>Explanation</b>	An error occurred while copying the saved search because details for more than one of the parameters was provided.
<b>Action</b>	Provide details for any one of the parameters.

<b>INMCCE0219</b>	<b>Cannot find saved search with name {0}.</b>
<b>Explanation</b>	Cannot find saved search with name {0} while performing copy saved search operation.
<b>Action</b>	Make sure the saved search with name {0} is present.
<b>INMCCE0220</b>	<b>Specify a value for scope or targetUser.</b>
<b>Explanation</b>	You have not provided a value for both scope and targetUser.
<b>Action</b>	Enter a valid value for scope or targetUser.
<b>INMCCE0222</b>	<b>Insufficient privilege for user "{0}" to execute copy search command.</b>
<b>Explanation</b>	To execute copy search the user should be either an CentraSite Administrator or an Organization Administrator.
<b>Action</b>	Please make sure you have sufficient privileges.
<b>INMCCE0224</b>	<b>Insufficient privilege for user "{0}" to execute add search command in organization scope.</b>
<b>Explanation</b>	To execute add search in organization scope the user should be either an CentraSite Administrator or an Organization Administrator.
<b>Action</b>	Please make sure you have sufficient privileges.
<b>INMCCE0225</b>	<b>LDAP server {0} is not known.</b>
<b>Explanation</b>	The specified LDAP server {0} is not known, probably because the IP address or the host name of the LDAP server could not be determined.
<b>Action</b>	Enter a valid IP address, or the fully qualified host name of the LDAP server.
<b>INMCCE0226</b>	<b>LDAP server {0} is not reachable.</b>
<b>Explanation</b>	The specified LDAP server {0} is not reachable.
<b>Action</b>	Make sure that the LDAP server is reachable.
<b>INMCCE0227</b>	<b>Authentication failed {0}.</b>
<b>Explanation</b>	An error occurred while trying to access the LDAP server, possibly because of invalid credentials.
<b>Action</b>	Make sure the credentials for accessing the LDAP server are valid.

<b>INMCCE0231</b>	<b>The temporary configuration file name {0} already exists.</b>
<b>Explanation</b>	The name you are giving the temporary configuration file already exists for another file in CentraSite.
<b>Action</b>	Enter a configuration file name that does not already exist in CentraSite.
<b>INMCCE0234</b>	<b>Invalid object class.</b>
<b>Explanation</b>	The specified object class for users or groups does not exist in the LDAP server.
<b>Action</b>	Make sure the specified object class name exists in the LDAP server.
<b>INMCCE0235</b>	<b>Invalid root DN.</b>
<b>Explanation</b>	The specified root DN (distinguished name) for user or group searches does not exist in the LDAP server.
<b>Action</b>	Make sure the specified root DN exists in the LDAP server.
<b>INMCCE0238</b>	<b>Invalid attribute name.</b>
<b>Explanation</b>	The specified attribute name does not exist in the LDAP server.
<b>Action</b>	Make sure the specified attribute name exists in the LDAP server.
<b>INMCCE0259</b>	<b>Dynamic configuration property files of domain {0} are not unique.</b>
<b>Explanation</b>	The dynamic configuration property files of the specified domain {0} are not unique. The dynamic configuration files include the property files for the domain, and the property files for the alias declaration.
<b>Action</b>	Remove either the property files for the domain, or the property files for the alias declaration.
<b>INMCCE0260</b>	<b>The Truststore Type and Truststore URL fields or the Keystore Type and Keystore URL fields cannot be empty.</b>
<b>Explanation</b>	You have not entered values for the required Truststore Type and Truststore URL fields, or the Keystore Type and Keystore URL fields, when using LDAP over SSL (LDAPS).
<b>Action</b>	Enter valid values for either the Truststore Type and Truststore URL fields, or the Keystore Type and Keystore URL fields.

<b>INMCCE0261</b>	<b>Malformed URL.</b>
<b>Explanation</b>	Either no legal protocol could be found in the URL string or the URL string could not be parsed.
<b>Action</b>	Enter a valid URL.
<b>INMCCE0262</b>	<b>URL is not accessible.</b>
<b>Explanation</b>	An exception occurred when trying to connect to the specified URL.
<b>Action</b>	Check that the URL is correct.
<b>INMCCE0266</b>	<b>Target user {0} does not exist in the CentraSite registry.</b>
<b>Explanation</b>	Could not find the specified target user {0}, possibly because the user has been deleted from the CentraSite registry.
<b>Action</b>	Make sure the specified target user exists in the CentraSite registry. If the target user exists and the error persists, contact your administrator. If the target user does not exist, enter a valid CentraSite username.
<b>INMCCE0267</b>	<b>Incorrect date format {0}.</b>
<b>Explanation</b>	The specified date format is incorrect.
<b>Action</b>	Specify a valid date in the format yyyy-mm-dd.
<b>INMCCE0268</b>	<b>The access key or token does not match the authentication option.</b>
<b>Explanation</b>	The specified access key or token does not match the given authentication option.
<b>Action</b>	Specify the correct access key or token configured in the authentication option.
<b>INMCCE0269</b>	<b>Incorrect value for year {0}.</b>
<b>Explanation</b>	The specified value for year is incorrect.
<b>Action</b>	Specify a valid value for year in the format 'yyyy'.
<b>INMCCE0270</b>	<b>Incorrect value for month {0}.</b>
<b>Explanation</b>	The specified value for month is incorrect.
<b>Action</b>	Specify a valid value for month in the format 'mm'.

<b>INMCCE0271</b>	<b>Incorrect value for date {0}.</b>
<b>Explanation</b>	The specified value for date is incorrect.
<b>Action</b>	Specify a valid value for date in the format 'dd'.
<b>INMCCE0272</b>	<b>Failed to purge access token {0}.</b>
<b>Explanation</b>	Could not purge the specified access token using the CentraSite Command "purge accesstokens", possibly because of insufficient permissions or CentraSite database server is down.
<b>Action</b>	Make sure the CentraSite database server is up and running, and you have sufficient permissions to purge access tokens.
<b>INMCCE0273</b>	<b>The specified key is not available in DB.</b>
<b>Explanation</b>	The specified key is not available in DB .
<b>Action</b>	The specified key is not available in DB.
<b>INMCCE0274</b>	<b>Type with the given name does not exist or is not unique in the CentraSite registry.</b>
<b>Explanation</b>	Type with the given name does not exist or multiple type with the same name exist in the CentraSite registry.
<b>Action</b>	Provide a valid type name.
<b>INMCCE0276</b>	<b>{0} is the current logged in user.</b>
<b>Explanation</b>	An attempt was made to delete the logged in user.
<b>Action</b>	Ensure that the selected user for deletion is not the current logged in user.
<b>INMCCE0277</b>	<b>{0} is the primary contact of {1}.</b>
<b>Explanation</b>	The logged in user tried to delete the primary contact of an organization.
<b>Action</b>	Ensure that the selected user for deletion is not the primary contact of an organization.
<b>INMCCE0278</b>	<b>{0} is the CentraSite Administrator.</b>
<b>Explanation</b>	The logged in user tried to delete the user who is the CentraSite Administrator.
<b>Action</b>	Ensure that the selected user for deletion is not the CentraSite Administrator.

<b>INMCCE0279</b>	<b>At least one {0} should be present.</b>
<b>Explanation</b>	This is possible because there is only one user with the CentraSite Administrator or Organization Administrator role, and an attempt is made to delete this user.
<b>Action</b>	Make sure there is at least one CentraSite Administrator or Organization Administrator user at any time.
<b>INMCCE0280</b>	<b>User {0} has pending approvals and cannot be deleted.</b>
<b>Explanation</b>	The user selected for deletion has one or more pending approvals.
<b>Action</b>	Approve or reject the pending approvals for the selected user.
<b>INMCCE0281</b>	<b>Provide details for any one of these parameters: forceDelete, targetUser</b>
<b>Explanation</b>	An error occurred while deleting organization because details for more than one of these parameters were provided: forceDelete, targetUser.
<b>Action</b>	Provide details for any one of these parameters.
<b>INMCCE0282</b>	<b>Could not delete the organization that has deployed service(s).</b>
<b>Explanation</b>	Could not delete the organization, possibly because there is at least one service with key {0} deployed to a gateway.
<b>Action</b>	Undeploy the services before deleting the organization.
<b>INMCCE0284</b>	<b>Insufficient permissions for user "{0}" to execute delete search command in organization scope.</b>
<b>Explanation</b>	To execute delete search in organization scope the user should be either an CentraSite Administrator or an Organization Administrator.
<b>Action</b>	Make sure you have sufficient permissions to execute delete search command in organization scope.
<b>INMCCE0285</b>	<b>Insufficient permissions for user "{0}" to execute delete search command in global scope.</b>
<b>Explanation</b>	To execute delete search in global scope the user should be an CentraSite Administrator.
<b>Action</b>	Make sure you have sufficient permissions to execute delete search command in global scope.

<b>INMCCE0286</b>	<b>The list Action Categories command failed: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0287</b>	<b>Action category with the given name {0} already exists.</b>
<b>Explanation</b>	Action category with the given name {0} already exists.
<b>Action</b>	Specify an unique ID (uuid) to rename the action category.
<b>INMCCE0289</b>	<b>Invalid ID(uuid) {0}.</b>
<b>Explanation</b>	Action category with the given ID(uuid) {0} does not exist.
<b>Action</b>	Provide valid UDDI key for the action category.
<b>INMCCE0292</b>	<b>Action category named {0} is updated successfully, but could not update the category type.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCE0293</b>	<b>The add Action Category command failed: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0294</b>	<b>The delete Action Category command failed: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0295</b>	<b>Action category deletion failed. The category includes at least one active policy action. \nPolicy Action details: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.

<b>INMCCE0297</b>	<b>The list Action Categories command failed: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0303</b>	<b>The add action template command failed. {0}</b>
<b>Explanation</b>	Could not execute the add action template command.
<b>Action</b>	Check the CentraSite logs for the reason for the failure. Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0313</b>	<b>The delete Action Category command failed: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0314</b>	<b>The update action template command failed. {0}</b>
<b>Explanation</b>	Could not execute the update action template command.
<b>Action</b>	Check the CentraSite logs for the reason for the failure. Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0315</b>	<b>The download Action Template command failed: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0317</b>	<b>The get action template command failed. {0}</b>
<b>Explanation</b>	Could not execute the get action template command.
<b>Action</b>	Check the CentraSite logs for the reason for the failure. Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.

<b>INMCCE0319</b>	<b>File path does not exist.</b>
<b>Explanation</b>	Destination Directory does not exist.
<b>Action</b>	Create Directory and execute the command again
<b>INMCCE0321</b>	<b>The setup Custom Action command failed: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCE0322</b>	<b>The sync Ldap group command failed: {0}</b>
<b>Explanation</b>	Check the CentraSite logs for the reason for the failure.
<b>Action</b>	Run the command again after you have identified and fixed the issue(s). Ensure that all the parameters are correct and valid before you run the command. If the issue persists, contact Software AG support.
<b>INMCCI0027</b>	<b>Domain {0} not found</b>
<b>Explanation</b>	The domain to be processed does not exist.
<b>Action</b>	Correct the specified domain name.
<b>INMCCI0032</b>	<b>Domain {0} successfully added</b>
<b>Explanation</b>	The domain entry of the authentication configuration was created.
<b>Action</b>	No action required.
<b>INMCCI0033</b>	<b>Domain {0} successfully removed</b>
<b>Explanation</b>	The domain entry of the authentication configuration was removed.
<b>Action</b>	No action required.
<b>INMCCI0034</b>	<b>Validating LDAP domain {0}</b>
<b>Explanation</b>	The validate command has started.
<b>Action</b>	No action required.

<b>INMCCI0035</b>	<b>The LDAP server configuration has been successfully validated.</b>
<b>Explanation</b>	The specified LDAP server configuration is valid.
<b>Action</b>	No action required.
<b>INMCCI0036</b>	<b>LDAP user login validated successfully</b>
<b>Explanation</b>	The user could log on with supplied user name and password.
<b>Action</b>	No action required.
<b>INMCCI0037</b>	<b>LDAP user properties validated successfully</b>
<b>Explanation</b>	The user properties configuration is valid.
<b>Action</b>	No action required.
<b>INMCCI0038</b>	<b>LDAP group resolution validated successfully</b>
<b>Explanation</b>	The group resolution settings are valid.
<b>Action</b>	No action required.
<b>INMCCI0044</b>	<b>Creating CS Admin user {0} for domain {1}</b>
<b>Explanation</b>	The processing for creating a user with the CentraSite Administrator role has started.
<b>Action</b>	No action required.
<b>INMCCI0045</b>	<b>CS Admin user {0} created</b>
<b>Explanation</b>	A user with the CentraSite Administrator role has been successfully created.
<b>Action</b>	No action required.
<b>INMCCI0048</b>	<b>Do you want to see the LDAP search trace? {0}:</b>
<b>Explanation</b>	This prompt asks you whether or not you want to see the LDAP search results.
<b>Action</b>	Type Y (for yes) or N (for no) as appropriate, then press Enter. The default is N.
<b>INMCCI0049</b>	<b>User elements found: {0}. Do you want to see them?</b>
<b>Explanation</b>	The LDAP search found the given number of users.
<b>Action</b>	Type Y to see the results, otherwise N.

<b>INMCCI0050</b>	<b>Do you want to see all the users? (Y/N) [N]:</b>
<b>Explanation</b>	This prompt asks you whether or not to display all of the users.
<b>Action</b>	Type Y (for yes) or N (for no) as appropriate, then press Enter. The default is N.
<b>INMCCI0051</b>	<b>User with filter: {0}</b>
<b>Explanation</b>	User search filter
<b>Action</b>	search filter needs to be entered
<b>INMCCI0052</b>	<b>{0} The following group was found:</b>
<b>Explanation</b>	{0} --> ok
<b>Action</b>	No action
<b>INMCCI0057</b>	<b>Can't get user properties. {0}</b>
<b>Explanation</b>	{0} --> error message
<b>Action</b>	re-configure the user properties
<b>INMCCI0061</b>	<b>{0} User authenticated successfully</b>
<b>Explanation</b>	The user authentication was successful. The returned status is {0}.
<b>Action</b>	No action required.
<b>INMCCI0062</b>	<b>Trying to ping the server now...</b>
<b>Explanation</b>	An attempt is being made to connect to the server.
<b>Action</b>	No action required.
<b>INMCCI0063</b>	<b>Is the connection to the server protected with SSL? (Y/N) [N]:</b>
<b>Explanation</b>	This prompt asks you whether or not the LDAP connection to the server is protected with SSL.
<b>Action</b>	Type Y (for yes) or N (for no) as appropriate, then press Enter. The default is N.
<b>INMCCI0064</b>	<b>Do you want use LDAP Technical User? (Y/N) [N]:</b>
<b>Explanation</b>	The prompt asks whether or not you wish to use the LDAP Technical User.
<b>Action</b>	Type Y (for yes) or N (for no) as required. The default is N.

<b>INMCCI0065</b>	<b>Provide the LDAP Technical User credentials file:</b>
<b>Explanation</b>	The credentials file of the the LDAP Technical User needs to be given as input.
<b>Action</b>	Specify the credentials file.
<b>INMCCI0069</b>	<b>Direct binding using the constructed DN was successful.</b>
<b>Explanation</b>	A direct binding using the constructed DN was successful.
<b>Action</b>	No action required.
<b>INMCCI0070</b>	<b>Do you want use LDAP Technical User Key file?</b>
<b>Explanation</b>	User key file needs to be given or not
<b>Action</b>	File path will be given as input
<b>INMCCI0071</b>	<b>Trying to connect to LDAP at: {0}:{1}</b>
<b>Explanation</b>	An attempt is being made to connect to LDAP at host {0} and port {1}.
<b>Action</b>	No action required.
<b>INMCCI0072</b>	<b>To test the connection, please provide the credentials of a valid LDAP user.</b>
<b>Explanation</b>	To test the connection, the credentials of a valid LDAP user are required.
<b>Action</b>	Provide the credentials of a valid LDAP user.
<b>INMCCI0074</b>	<b>Do you want to save the configuration to CentraSite? (Y/N) [N]:</b>
<b>Explanation</b>	The prompt asks you whether or not to save the modified configuration to CentraSite.
<b>Action</b>	Reply Y (for yes) or N (for no). The default value is N.
<b>INMCCI0075</b>	<b>To store the connection, please provide the credentials of a user with role "CentraSite Administrator".</b>
<b>Explanation</b>	The connection can only be stored by a user with the role "CentraSite Administrator".
<b>Action</b>	Provide the credentials of a user with the role "CentraSite Administrator".
<b>INMCCI0076</b>	<b>Repeat configuration step {0}, Continue, or End? (R/C/E) [C]:</b>
<b>Explanation</b>	You can either repeat the given configuration step, continue to the next step, or end the processing.
<b>Action</b>	Type R, C or E to select the required option. The default is C.

<b>INMCCI0077</b>	<b>Repeat configuration step {0} or End? (R/E) [R]:</b>
<b>Explanation</b>	You can repeat the given configuration step or end the processing.
<b>Action</b>	Type R or E to select the required option. The default is R.
<b>INMCCI0078</b>	<b>Check {0} - Validating LDAP server configuration. Please wait...</b>
<b>Explanation</b>	This message is displayed when validating the LDAP server configuration settings.
<b>Action</b>	No action required.
<b>INMCCI0079</b>	<b>Check 2: LDAP User &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the configuration of the LDAP user is being checked.
<b>Action</b>	No action required.
<b>INMCCI0080</b>	<b>Check 3: LDAP User Authentication &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the configuration of the LDAP user authentication is being checked.
<b>Action</b>	No action required.
<b>INMCCI0081</b>	<b>Check 3: LDAP User Properties &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the configuration of the LDAP user properties is being checked.
<b>Action</b>	No action required.
<b>INMCCI0082</b>	<b>Check 4: LDAP User Search &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the configuration of the LDAP user search is being checked.
<b>Action</b>	No action required.
<b>INMCCI0083</b>	<b>Check 5: LDAP Group &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the configuration of the LDAP group is being checked.
<b>Action</b>	No action required.

<b>INMCCI0084</b>	<b>Check 6: LDAP Group Mapping &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the configuration of the LDAP group mapping is being checked.
<b>Action</b>	No action required.
<b>INMCCI0085</b>	<b>Check 7: LDAP Group Search &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the configuration of the LDAP group search is being checked.
<b>Action</b>	No action required.
<b>INMCCI0086</b>	<b>Check 8: LDAP Group Resolution Host &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the configuration of the LDAP group resolution host is being checked.
<b>Action</b>	No action required.
<b>INMCCI0087</b>	<b>Check 9: Displaying and saving configuration in CentraSite &gt;&gt; PLEASE WAIT...</b>
<b>Explanation</b>	This message is shown when the checked LDAP configuration is being saved in CentraSite.
<b>Action</b>	No action required.
<b>INMCCI0095</b>	<b>Do you want to see the complete trace? {0} :</b>
<b>Explanation</b>	The prompt asks you whether or not you want to see the complete trace.
<b>Action</b>	Type Y (yes) or N (no) as required. The default is N.
<b>INMCCI0097</b>	<b>Group elements found: {0} . Do you want to see them?</b>
<b>Explanation</b>	This is a confirmation message indicating that group elements have been found.
<b>Action</b>	Reply Yes if you want to see the group elements.
<b>INMCCI0098</b>	<b>Do you want to see all groups? {0} :</b>
<b>Explanation</b>	This prompt asks you if you want to see all groups.
<b>Action</b>	Reply Yes if you want to see the groups.

<b>INMCCI0099</b>	<b>Groups with filter: {0}</b>
<b>Explanation</b>	This is a confirmation message indicating that groups have been found with the filter.
<b>Action</b>	No action required.
<b>INMCCI0101</b>	<b>Groups for user found: {0} Do you want to see them?</b>
<b>Explanation</b>	Groups were found for the given user.
<b>Action</b>	Reply Yes if you want to see the groups that were found.
<b>INMCCI0107</b>	<b>Do you want to use the LDAP Technical User {0}:</b>
<b>Explanation</b>	This prompt asks you whether you want to use the LDAP Technical User (LDAP Principal) to access the LDAP user repository. If you reply Y, all authentication requests sent to the LDAP server will be made using this user. If you reply N, the client has to send its own credentials to LDAP to access a user record.
<b>Action</b>	Type Y (for yes) or N (for no) as appropriate, then press Enter. The default is N.
<b>INMCCI0108</b>	<b>Provide the LDAP Technical User credentials file.</b>
<b>Explanation</b>	This prompt asks you to provide the LDAP Technical User credentials file.
<b>Action</b>	Provide the LDAP Technical User credentials file.
<b>INMCCI0109</b>	<b>Provide the LDAP Technical User Key file</b>
<b>Explanation</b>	This prompt asks you to provide the LDAP Technical User Key file.
<b>Action</b>	Provide the LDAP Technical User key file.
<b>INMCCI0110</b>	<b>Trying to connect to LDAP at: {0}</b>
<b>Explanation</b>	An attempt is being made to connect to the LDAP Server with the given host name and port.
<b>Action</b>	No action required.
<b>INMCCI0133</b>	<b>The target identified by "{0}" has been removed from the configured federation targets.</b>
<b>Explanation</b>	The target identified by "{0}" has been removed from the configured federation targets during the execution of the command.
<b>Action</b>	No action required.

<b>INMCCI0134</b>	<b>A target is already associated with the given federation id "{0}".</b>
<b>Explanation</b>	The provided federation identifier already has a target associated with it.
<b>Action</b>	To obtain more details about the target associated with ID "{0}", execute the command <code>show_uddi_federation</code> .
<b>INMCCI0135</b>	<b>Do you want to update/overwrite the target at {0} ? {1} :</b>
<b>Explanation</b>	While running the <code>add_uddi_federation</code> command with the ID {0}, it may be already configured with another target. Then you should choose whether you want to update the target or not.
<b>Action</b>	Enter either y (Yes) to update/overwrite the target, or n (No) to do no modification. The default is y (Yes).
<b>INMCCI0136</b>	<b>Not overwriting the current configuration. Please provide another federation identifier</b>
<b>Explanation</b>	While executing the <code>add_uddi_federation</code> command, if an already existing identifier is provided, and you choose not to overwrite the target, then this message is displayed.
<b>Action</b>	You can provide a new identifier which does not already exist. To obtain the list of configured federation identifiers, execute the command <code>show_uddi_federation</code> .
<b>INMCCI0137</b>	<b>Overwriting/updating the target identified by "{0}"</b>
<b>Explanation</b>	While executing the command <code>add_uddi_federation</code> , if the provided federation identifier already exists, and you choose to overwrite/update the target, then you get this message.
<b>Action</b>	No action required.
<b>INMCCI0138</b>	<b>A target has been added/updated with the federation identifier {0}</b>
<b>Explanation</b>	This message is displayed if a target for federation has been successfully configured with the provided federation ID.
<b>Action</b>	No action required.
<b>INMCCI0143</b>	<b>Number of targets configured for federation : {0}</b>
<b>Explanation</b>	This message displays the number of targets configured for federation. {0} - Number of targets
<b>Action</b>	No action required.

<b>INMCCI0145</b>	<b>Deployment succeeded</b>
<b>Explanation</b>	The deployment succeeded.
<b>Action</b>	No action required.
<b>INMCCI0147</b>	<b>There are no Consumer Applications to deploy.</b>
<b>Explanation</b>	There are no consumer applications created in CentraSite to deploy.
<b>Action</b>	Create consumer applications in CentraSite to deploy to Mediator.
<b>INMCCI0148</b>	<b>The XML configuration of the Federation target "{0}":</b>
<b>Explanation</b>	The XML configuration of the federation target identified by {0} will be displayed in the console.
<b>Action</b>	No action required.
<b>INMCCI0149</b>	<b>The XML configuration of the Federation target "{0}" has been written to file "{1}"</b>
<b>Explanation</b>	This message informs that the XML configuration of the federation target identified by {0} has been written to the file located at {1}.
<b>Action</b>	No action required.
<b>INMCCI0150</b>	<b>The XML log configuration can be seen below:</b>
<b>Explanation</b>	The XML log configuration will be displayed to the console.
<b>Action</b>	No action required.
<b>INMCCI0151</b>	<b>The XML log configuration has been written to the file "{0}"</b>
<b>Explanation</b>	This message informs that the XML log configuration has been written to the file located at {0}.
<b>Action</b>	No action required.
<b>INMCCI0176</b>	<b>Domain {0} not found in jaas.config</b>
<b>Explanation</b>	The domain to be processed does not exist in jaas.config
<b>Action</b>	Correct the specified domain name.

<b>INMCCI0228</b>	<b>Do you really want to save the configuration {0}</b>
<b>Explanation</b>	When the end of the command is reached, the user is asked if the created LDAP configuration should be added to the current jaas.config file.
<b>Action</b>	Reply Y (for yes) or N (for no). There is no default value.
<b>INMCCI0229</b>	<b>The configuration has been saved successfully.</b>
<b>Explanation</b>	The LDAP configuration has been added successfully to the current jaas.config file.
<b>Action</b>	No action required.
<b>INMCCI0232</b>	<b>Check {0} - Validating LDAP user configuration. Please wait...</b>
<b>Explanation</b>	This message is displayed when validating the LDAP user configuration settings.
<b>Action</b>	No action required.
<b>INMCCI0233</b>	<b>The LDAP user configuration has been successfully validated.</b>
<b>Explanation</b>	The specified LDAP user configuration is valid.
<b>Action</b>	No action required.
<b>INMCCI0236</b>	<b>Check {0} - Validating LDAP user mapping configuration. Please wait...</b>
<b>Explanation</b>	This message is displayed when validating the LDAP user mapping configuration settings.
<b>Action</b>	No action required.
<b>INMCCI0237</b>	<b>The LDAP user mapping configuration has been successfully validated.</b>
<b>Explanation</b>	The specified LDAP user mapping configuration is valid.
<b>Action</b>	No action required.
<b>INMCCI0239</b>	<b>The following attributes have been retrieved for the LDAP user {0}:</b>
<b>Explanation</b>	Displays a list of mapped user attributes for the LDAP user {0}.
<b>Action</b>	No action required.
<b>INMCCI0240</b>	<b>No attributes could be retrieved for user {0}.</b>
<b>Explanation</b>	Could not retrieve attributes for the specified LDAP user {0}, possibly because all of the attributes are empty.
<b>Action</b>	No action required.

<b>INMCCI0241</b>	<b>No users were found matching search criteria {0}.</b>
<b>Explanation</b>	Could not find any users matching the specified search criteria {0}.
<b>Action</b>	No action required.
<b>INMCCI0242</b>	<b>The following users match the search criteria {0}:</b>
<b>Explanation</b>	Displays a list of LDAP users matching the search criteria {0}.
<b>Action</b>	No action required.
<b>INMCCI0243</b>	<b>The following users match the search criteria {0}. The following list only displays the first ten users matching the specified search criteria:</b>
<b>Explanation</b>	Displays the first ten users matching the search criteria {0}.
<b>Action</b>	No action required.
<b>INMCCI0244</b>	<b>No attributes could be retrieved for group {0}.</b>
<b>Explanation</b>	Could not retrieve attributes for the specified LDAP group {0}, possibly because all of the attributes are empty.
<b>Action</b>	No action required.
<b>INMCCI0245</b>	<b>No groups were found matching search criteria {0}.</b>
<b>Explanation</b>	Could not find any groups matching the specified search criteria {0}.
<b>Action</b>	No action required.
<b>INMCCI0246</b>	<b>The following groups match the search criteria {0}:</b>
<b>Explanation</b>	Displays a list of LDAP groups matching the search criteria {0}.
<b>Action</b>	No action required.
<b>INMCCI0247</b>	<b>The following groups match the search criteria {0}. The following list only displays the first ten groups matching the specified search criteria:</b>
<b>Explanation</b>	Displays the first ten groups matching the search criteria {0}.
<b>Action</b>	No action required.

<b>INMCCI0248</b>	<b>The LDAP group mapping configuration has been successfully validated.</b>
<b>Explanation</b>	The specified LDAP group mapping configuration is valid.
<b>Action</b>	No action required.
<b>INMCCI0249</b>	<b>Check {0} - Validating LDAP group mapping configuration. Please wait...</b>
<b>Explanation</b>	This message is displayed when validating the LDAP group mapping configuration settings.
<b>Action</b>	No action required.
<b>INMCCI0250</b>	<b>The following attributes have been retrieved for the LDAP group {0}:</b>
<b>Explanation</b>	Displays a list of mapped group attributes for the LDAP group {0}.
<b>Action</b>	No action required.
<b>INMCCI0251</b>	<b>Check {0} - Validating LDAP group configuration. Please wait...</b>
<b>Explanation</b>	This message is displayed when validating the LDAP group configuration settings.
<b>Action</b>	No action required.
<b>INMCCI0252</b>	<b>The specified LDAP group could not be found.</b>
<b>Explanation</b>	Could not find the specified LDAP group in the LDAP server.
<b>Action</b>	No action required.
<b>INMCCI0253</b>	<b>The LDAP group configuration has been successfully validated.</b>
<b>Explanation</b>	The specified LDAP group configuration is valid.
<b>Action</b>	No action required.
<b>INMCCI0254</b>	<b>Check {0} - Validating LDAP group resolution configuration. Please wait...</b>
<b>Explanation</b>	This message is displayed when validating the LDAP group resolution configuration settings.
<b>Action</b>	No action required.
<b>INMCCI0255</b>	<b>User {0} belongs to the following groups:</b>
<b>Explanation</b>	Displays a list of LDAP groups to which the user with name {0} belongs to.
<b>Action</b>	No action required.

<b>INMCCI0256</b>	<b>The LDAP group resolution configuration has been successfully validated.</b>
<b>Explanation</b>	The specified LDAP group resolution configuration is valid.
<b>Action</b>	No action required.
<b>INMCCI0257</b>	<b>User {0} belongs to the following groups:</b>
<b>Explanation</b>	Displays the first ten LDAP groups to which the user with name {0} belongs to.
<b>Action</b>	No action required.
<b>INMCCI0258</b>	<b>No groups were found to which the user {0} belongs to.</b>
<b>Explanation</b>	Could not find any groups to which the specified user with name {0} belongs to.
<b>Action</b>	No action required.
<b>INMCCI0263</b>	<b>Test user has successfully logged in.</b>
<b>Explanation</b>	Test user has successfully logged in.
<b>Action</b>	No action required.
<b>INMCCI0265</b>	<b>Search for user was successful.</b>
<b>INMCCI0288</b>	<b>Action category named {0} is created successfully.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCI0290</b>	<b>Action category named {0} is updated successfully.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCI0291</b>	<b>No changes available</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A

<b>INMCCI0296</b>	<b>Action category named {0} is deleted successfully.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCI0298</b>	<b>Action template named {0} is created successfully.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCI0310</b>	<b>Action template named {0} is updated successfully.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCI0312</b>	<b>Action template named {0} is deleted successfully.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCI0316</b>	<b>Action template named {0} is downloaded successfully to {1}.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCI0318</b>	<b>Action template named {0} is downloaded successfully to {1}.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCI0320</b>	<b>Custom policy action setup successful at {0}.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCI0323</b>	<b>Group {0} synchronized successfully.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A

<b>INMCCI0324</b>	<b>Members of the group {0} are already registered in CentraSite.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCW0004</b>	<b>Default Organization is not present in CentraSite. Hence UDDI configurations cannot be saved.</b>
<b>Explanation</b>	UDDI Configurations for CentraSite will be stored in "Default Organization". CentraSiteCommand is not able to find the "Default Organization" in CentraSite and hence cannot store the UDDI configurations.
<b>Action</b>	Make sure the user provided to execute the command has permission to update the "Default Organization".
<b>INMCCW0005</b>	<b>No CentraSite Application Server Tier (CAST) found in CentraSite with specified cast URI {0}. Please specify fully qualified host name in -casturi option.</b>
<b>Explanation</b>	UDDI configurations for a CAST will be stored in an Application Server object. The object will have the host and port details. This object is required to store the local configurations for the CAST. CentraSiteCommand is not able to find the ApplicationServer object with the host specified in the cast URI option.
<b>Action</b>	Please make sure the value specified for the option cast URI is valid. Please specify the host as a fully qualified domain name in the cast URI option.
<b>INMCCW0104</b>	<b>unknown host</b>
<b>Explanation</b>	The host name provided is not the name of a known host.
<b>Action</b>	Provide a proper host name.
<b>INMCCW0128</b>	<b>An error occurred while trying to close a resource - {0}</b>
<b>Explanation</b>	Occasionally an error might be encountered while trying to close open connections, streams, etc., This is just a warning that an error was encountered and can be ignored.
<b>Action</b>	Make sure that the resource in question is not opened and/or modified by another program/application.
<b>INMCCW0146</b>	<b>Deployment failed</b>
<b>Explanation</b>	The deployment failed.
<b>Action</b>	Check related messages to find the reason why the deployment failed.

<b>INMCCW0168</b>	<b>Missing &lt;LogSetting&gt; attribute for &lt;LogUnit&gt; {0}.</b>
<b>Explanation</b>	The <LogSetting> attribute used to configure <LogUnit> {0} is missing.
<b>Action</b>	The <LogSetting> attribute is specified as an attribute name when configuring log unit in the config.xml file. For more information about log settings, see the CentraSite Administrator's Guide.
<b>INMCCW0169</b>	<b>The &lt;LogUnit&gt; {0} has a null value for the &lt;LogSetting&gt; attribute.</b>
<b>Explanation</b>	Required <LogSetting> attribute value is missing.
<b>Action</b>	The <LogSetting> value is specified as an attribute value when configuring log unit in the config.xml file. For more information about log settings, see the CentraSite Administrator's Guide.
<b>INMCCW0230</b>	<b>Configuration was not saved on user request!</b>
<b>Explanation</b>	The configuration was not saved, possibly because the user chose to reject it.
<b>Action</b>	No action required.
<b>INMCCW0264</b>	<b>Test User was not found.</b>
<b>Explanation</b>	Could not find the specified test user.
<b>Action</b>	No action required.
<b>INMCCW0275</b>	<b>You cannot deactivate the user(s). Reason</b>
<b>Explanation</b>	The user cannot be deactivated for the following reason(s):
<b>Action</b>	Check for the above reasons and then try again.
<b>INMCCW0299</b>	<b>Implementation-File parameter cannot be empty. Enter the name of a Java implementation file for policy action.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCW0300</b>	<b>Action category named {0} does not exist.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A

<b>INMCCW0301</b>	<b>Template-File parameter cannot be empty. Enter the name of an output file to download the action template.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCW0302</b>	<b>Action template named {0} already exists.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCW0304</b>	<b>Action must be associated at least to one object type.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCW0305</b>	<b>Event type should have at least one value.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCW0306</b>	<b>Parameter name cannot be empty.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCW0307</b>	<b>Parameter type cannot be empty.</b>
<b>Explanation</b>	N/A
<b>Action</b>	N/A
<b>INMCCW0308</b>	<b>Policy action template with the given name {0} does not exist.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCW0309</b>	<b>Implementation file of predefined action templates cannot be modified.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA

<b>INMCCW0311</b>	<b>One or more required parameters in the action template configuration are missing.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCW0325</b>	<b>Group with the given name {0} does not exist in {1}.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCCW0326</b>	<b>The specified object group {0} has wrong type.</b>
<b>Explanation</b>	NA
<b>Action</b>	NA
<b>INMCLE0005</b>	<b>CentraSite cannot delete the gateway. {0}</b>
<b>Explanation</b>	An error occurred while deleting a gateway in CentraSite.
<b>Action</b>	Contact your system administrator with the stack trace information in the CentraSite log.
<b>INMCLE0013</b>	<b>Caught an exception while retrieving the configurator instance.</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid data in the configuration file.
<b>Action</b>	Verify that the data in configuration file are valid.
<b>INMCLE0014</b>	<b>System is unable to retrieve value for {0}.</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid data in the configuration file.
<b>Action</b>	Verify that the data in configuration file are valid.
<b>INMCLE0015</b>	<b>Invalid path {0}.</b>
<b>Explanation</b>	You have entered an invalid path.
<b>Action</b>	Enter a valid path.

<b>INMCLE0017</b>	<b>Failed to check whether or not property of {0} is read-only.</b>
<b>Explanation</b>	Could not check whether or not the property of the given path {0} is read-only. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0018</b>	<b>Caught an exception while retrieving the configuration file of type {0}.</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid data in the configuration file.
<b>Action</b>	Verify that the data in configuration file are valid.
<b>INMCLE0019</b>	<b>Caught an exception while trying to save the configuration file of type {0}.</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid data in the configuration file.
<b>Action</b>	Verify that the data in configuration file are valid.
<b>INMCLE0020</b>	<b>Failed to remove {0}.</b>
<b>Explanation</b>	This is an internal error. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0021</b>	<b>Caught an exception while trying to get the configuration file URL for type {0}.</b>
<b>Explanation</b>	Could not get configuration file URL for type {0}, possibly because of an invalid data in the configuration file.
<b>Action</b>	Verify that the data in configuration file are valid.
<b>INMCLE0022</b>	<b>Path or property value is empty.</b>
<b>Explanation</b>	You have entered an empty path or property value.
<b>Action</b>	Enter a valid path or property value.
<b>INMCLE0023</b>	<b>Failed to set configuration(s) for the path(s), {0}</b>
<b>Explanation</b>	Unable to set configuration(s) for the path(s). This is probably because of the following reasons: 1) configuration file is modified 2) failed to save the configuration file.
<b>Action</b>	Check to make sure that the configuration in a higher level is not already protected. Else, check the stack trace for detailed information.

<b>INMCLE0024</b>	<b>Failed to setProtectAll.</b>
<b>Explanation</b>	Unable to set ProtectAll configuration. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0025</b>	<b>Failed to getAllItems.</b>
<b>Explanation</b>	Unable to get one or more configuration items. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0026</b>	<b>Unable to construct ActivityMenuItem for id {0}.</b>
<b>Explanation</b>	Could not construct ActivityMenuItem for the given id {0}, possibly because the XPath of the ActivityMenuItem is invalid.
<b>Action</b>	Verify that the XPath of the ActivityMenuItem is valid.
<b>INMCLE0027</b>	<b>Unable to construct activity for id {0}.</b>
<b>Explanation</b>	Could not construct activity for the given id {0}, possibly because the XPath of the activity is invalid.
<b>Action</b>	Verify that the XPath of the activity is valid.
<b>INMCLE0028</b>	<b>Unable to construct ActivityMenuItem for activity {0}.</b>
<b>Explanation</b>	Check for the above possible reasons. If the problem persists, contact the CentraSite administrator.
<b>Action</b>	Check to make sure that the XPath of the ActivityMenuItem and Activity is correct and the corresponding Activity could be created.
<b>INMCLE0029</b>	<b>Failed to instantiate class {0}.</b>
<b>Explanation</b>	Could not instantiate the implementation class {0}, possibly because the class does not follow a valid syntax.
<b>Action</b>	Verify that the implementation class follows a valid syntax. Refer to the documentation reference for Activity Implementation class.
<b>INMCLE0030</b>	<b>Unable to find activity entry for id {0}.</b>
<b>Explanation</b>	Could not find an activity entry for the given id {0}, possibly because the id is invalid.
<b>Action</b>	Verify that the given activity id is correct.

<b>INMCLE0031</b>	<b>Unable to construct an ActivityMenu using activities.</b>
<b>Explanation</b>	Could not construct an ActivityMenu using the given activities. It is probably because, the activities do not exist.
<b>Action</b>	Verify that the activities exist. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0033</b>	<b>Failed to remove ActivityMenuItems.</b>
<b>Explanation</b>	Could not remove the ActivityMenuItems from given configuration file. It is possibly because of the following reasons: 1) XPath to remove the ActivityMenuItem is invalid. 2) ActivityMenuItem does not exist.
<b>Action</b>	Check for the above possible reasons. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0034</b>	<b>Failed to save ActivityMenuItems.</b>
<b>Explanation</b>	Could not save the ActivityMenuItems from given configuration file. It is possibly because of the following reasons: 1) XPath to save the ActivityMenuItem is invalid. 2) ActivityMenuItem does not exist.
<b>Action</b>	Check for the above possible reasons. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0035</b>	<b>User has not passed the CentraSite connection object. For a valid diagnostics configuration, CentraSite connection object is mandatory.</b>
<b>Explanation</b>	User has not passed the CentraSite connection object, which is mandatory for a valid diagnostics configuration.
<b>Action</b>	Enter a valid CentraSite connection object.
<b>INMCLE0036</b>	<b>Email address is empty,</b>
<b>Explanation</b>	You have not entered the email address for diagnostics configuration. An email address is mandatory to send the diagnostic information.
<b>Action</b>	Enter a valid email address.
<b>INMCLE0037</b>	<b>Email subject and template are empty.</b>
<b>Explanation</b>	You have not entered the email subject and template for diagnostics configuration. An email template is mandatory to send the diagnostic information. Refer to the CentraSite online documentation's section "Message Handling and Diagnostics".
<b>Action</b>	Enter the email subject and a valid template.

<b>INMCLE0038</b>	<b>Failed to get all activities.</b>
<b>Explanation</b>	Could not get all the activities, possibly because the activity classes are not set in the classpath.
<b>Action</b>	Verify that the activity classes are set in the classpath. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0039</b>	<b>Failed to remove activity for given id {0}.</b>
<b>Explanation</b>	Could not remove the activity for given id {0}, possibly because the activity id is invalid.
<b>Action</b>	Verify that the given activity id is valid.
<b>INMCLE0040</b>	<b>Failed to show one or more activity menu items that are associated with activity menu.</b>
<b>Explanation</b>	Could not display one or more activity menu items, possibly because the menu items are not associated with the activity menu.
<b>Action</b>	Verify that all the activity menu items are associated with activity menu.
<b>INMCLE0041</b>	<b>Failed to populate diagnostic context.</b>
<b>Explanation</b>	Could not populate the diagnostic context object, possibly because the CentraSite Connection object is incorrect.
<b>Action</b>	Verify that the CentraSite Connection object is correct.
<b>INMCLE0042</b>	<b>Invalid CentraSite connection URL {0}.</b>
<b>Explanation</b>	You have entered an invalid CentraSite Connection URL.
<b>Action</b>	Enter a valid CentraSite Connection URL.
<b>INMCLE0043</b>	<b>User has not passed CLLEException object. For a valid diagnostics configuration, CLLEException object is mandatory.</b>
<b>Explanation</b>	User has not passed the CLLEException object which is mandatory for the diagnostics configuration.
<b>Action</b>	Enter a valid CLLEException object.

<b>INMCLE0044</b>	<b>Unable to fetch email template from repository {0}.</b>
<b>Explanation</b>	Could not fetch the email template from given repository {0}, possibly because of the following reasons: 1) email template does not exist 2) repository URL is invalid.
<b>Action</b>	Check for the above possible reasons. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0045</b>	<b>Error loading implementation class for ActivityManager.</b>
<b>Explanation</b>	An unexpected error occurred while trying to load the implementation class for given ActivityManager. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0046</b>	<b>Error loading diagnosticHandler implementation class.</b>
<b>Explanation</b>	An unexpected error occurred while trying to load the diagnosticHandler implementation class. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0048</b>	<b>Failed to instantiate class {0}.</b>
<b>Explanation</b>	Could not instantiate the given class {0}, possibly because of the following reasons: 1) class file does not exist 2) classpath is incorrect.
<b>Action</b>	Check for the above possible reasons. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0049</b>	<b>Failed to initialize {0}.</b>
<b>Explanation</b>	Could not initialize the given component {0}.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0050</b>	<b>Failed to get CentraSite registry object property {0}.</b>
<b>Explanation</b>	Could not get the CentraSite registry object property. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0051</b>	<b>Failed to set registry object property {0}.</b>
<b>Explanation</b>	Could not set the CentraSite registry object property. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.

<b>INMCLE0052</b>	<b>Failed to save CentraSite object {0}.</b>
<b>Explanation</b>	An error occurred while trying to save CentraSite model object.  Possible reasons: {1}
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0053</b>	<b>Failed to delete CentraSite object {0}.</b>
<b>Explanation</b>	Could not delete the CentraSite object. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0054</b>	<b>Failed to get CentraSite object for id {0}.</b>
<b>Explanation</b>	Could not get CentraSite object for the given id {0}, possibly because the object id is invalid.
<b>Action</b>	Verify that the object id is valid.
<b>INMCLE0055</b>	<b>Failed to create CentraSite object {0}.</b>
<b>Explanation</b>	You cannot create the CentraSite object {0}, possibly because of the following reasons: 1) insufficient privileges to create the object 2) object type is invalid.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0056</b>	<b>Failed to delete CentraSite object.</b>
<b>Explanation</b>	You cannot delete the CentraSite object {0}, possibly because you do not have the required permission to delete the object.
<b>Action</b>	Verify that you have the required permission to delete the CentraSite object. Contact your administrator and request permission if necessary and try again.
<b>INMCLE0057</b>	<b>Unable to get list of CentraSite objects: {0}.</b>
<b>Explanation</b>	You cannot retrieve the following list of CentraSite objects: {0}. It is possibly because you do not have the required permission to retrieve the objects.
<b>Action</b>	Verify that you have the required permission to retrieve the given objects. Contact your administrator and request permission if necessary and try again.

<b>INMCLE0058</b>	<b>Unable to save list of CentraSite objects: {0}</b>
<b>Explanation</b>	You cannot save the following list of CentraSite objects: {0}. It is possibly because you do not have the required permission to save the objects.{0}
<b>Action</b>	Verify that you have the required permission to save the given objects. Contact your administrator and request permission if necessary and try again.
<b>INMCLE0059</b>	<b>Unable to delete list of CentraSite objects:</b>
<b>Explanation</b>	You cannot delete the following list of CentraSite objects: {0}. It is possibly because you do not have the required permission to delete the objects.
<b>Action</b>	Verify that you have the required permission to delete the given objects. Contact your administrator and request permission if necessary and try again.
<b>INMCLE0060</b>	<b>Caught an unexpected exception while converting concept to CentraSiteObjectType.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0061</b>	<b>Failed to populate ObjectType for given name {0}.</b>
<b>Explanation</b>	Could not populate the ObjectType for display name {0}, possibly because the given display name is incorrect.
<b>Action</b>	Verify that the display name is correct.
<b>INMCLE0062</b>	<b>Error retrieving the list of gateways.</b>
<b>Explanation</b>	CentraSite could not retrieve the list of existing gateways because of an error during gateway name validations.
<b>Action</b>	Contact your CentraSite Administrator.
<b>INMCLE0063</b>	<b>Unsupported attribute {0} for object type {1}.</b>
<b>Explanation</b>	This is an internal error. Cannot find the attribute {0} of the specified object type {1}.
<b>Action</b>	Check to make sure that the attribute {0} is present in the object type {1}.
<b>INMCLE0064</b>	<b>Failed to fetch attributes for {0}.</b>
<b>Explanation</b>	Could not fetch attributes for {0}, possibly because the object type {1} is invalid.
<b>Action</b>	Verify that the object type {1} is valid.

<b>INMCLE0065</b>	<b>Unable to obtain value for attribute {0}.</b>
<b>Explanation</b>	Could not obtain the value for attribute {0}. The cause is not immediately known.
<b>Action</b>	Verify integrity of the object and try later.
<b>INMCLE0066</b>	<b>Unsupported method for attribute {0} of object type {1}.</b>
<b>Explanation</b>	This method is not applicable for attribute {0} of object type {1}.
<b>Action</b>	Do not use this method for attribute {0} of object type {1}.
<b>INMCLE0067</b>	<b>Error while initializing CentraSiteConnector {0}.</b>
<b>Explanation</b>	Could not initialize the CentraSiteConnector {0}. It is probably because of the following reasons: 1) invalid class as CentraSite Connection Factory 2) invalid system property (com.softwareag.centrasite.common.connection.impl) for initializing.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0068</b>	<b>Failed to create an ActivityMenuItem for id {0}.</b>
<b>Explanation</b>	Could not create the ActivityMenuItem for above id, possibly because of the invalid configurations.
<b>Action</b>	Verify that the activity id and class name are configured properly.
<b>INMCLE0069</b>	<b>Error when closing connection {0}.</b>
<b>Explanation</b>	Error occurred when trying to close the underlying connection.
<b>Action</b>	Initialize before opening a connection.
<b>INMCLE0070</b>	<b>Failed to log in {0}.</b>
<b>Explanation</b>	Could not log in {0}, possibly because the login credentials are invalid.
<b>Action</b>	Enter valid login credentials.
<b>INMCLE0071</b>	<b>Cannot instantiate CentraSiteConnector class {0}.</b>
<b>Explanation</b>	Could not instantiate the CentraSiteConnector implementation class, possibly because the implementation class is invalid.
<b>Action</b>	Check to make sure that the CentraSiteConnector class is valid.

<b>INMCLE0072</b>	<b>Error loading email template {0} {1}.</b>
<b>Explanation</b>	Error when loading the admin and/or user email templates, possibly because the email template path is invalid.
<b>Action</b>	Verify that the email template path is valid.
<b>INMCLE0073</b>	<b>Email address is empty.</b>
<b>Explanation</b>	You have not entered an email address.
<b>Action</b>	Enter a valid email address.
<b>INMCLE0074</b>	<b>Invalid attribute {0} {1}.</b>
<b>Explanation</b>	The attribute {1} is not a valid {0} attribute.
<b>Action</b>	Check to make sure that the {1} attribute is valid.
<b>INMCLE0075</b>	<b>Usage of {0} operation in object {1} is not supported.</b>
<b>Explanation</b>	This operation is not supported on the given object {1}.
<b>Action</b>	Refer to the usage document for further information on the supported APIs.
<b>INMCLE0076</b>	<b>Unable to obtain relationship details of attribute {0} to object type {1}.</b>
<b>Explanation</b>	Could not obtain the relationship details of attribute {0} associated to the above object type {1}.
<b>Action</b>	Make sure that the attribute {0} is a valid relationship attribute for the object type {1}.
<b>INMCLE0077</b>	<b>Failed to execute query {0}.</b>
<b>Explanation</b>	Could not execute the query {0}, possibly because the query syntax is incorrect.
<b>Action</b>	Correct the query syntax.
<b>INMCLE0078</b>	<b>Failed to execute query {0}.</b>
<b>Explanation</b>	Could not execute the query {0}, possibly because the query syntax is incorrect.
<b>Action</b>	Correct the query syntax.
<b>INMCLE0079</b>	<b>Failed to get objectTypeValue from given ObjectType.</b>
<b>Explanation</b>	Could not get the objectTypeValue from ObjectType, possibly because the given ObjectType is invalid.
<b>Action</b>	Check to make sure that the given ObjectType is valid.

<b>INMCLE0080</b>	<b>Failed to construct search query.</b>
<b>Explanation</b>	Could not construct the search query. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0081</b>	<b>Caught an exception while getting iterator from CSOSearchResult.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0082</b>	<b>Failed to get search result count.</b>
<b>Explanation</b>	Could not get the number of results displayed on the Search Results page. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0083</b>	<b>Unable to fetch next object for id {0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to fetch the next object for above id.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0084</b>	<b>The configuration file is invalid; attribute {0} is mandatory for multi-valued elements.</b>
<b>Explanation</b>	The required attribute for multi-valued elements is not specified in the XML configuration file.
<b>Action</b>	Before you save the configuration file, check to make sure that all the required attributes are specified.
<b>INMCLE0085</b>	<b>The configuration file is invalid; attribute {0} is mandatory for multi-valued elements.</b>
<b>Explanation</b>	The required attribute for multi-valued elements is not specified in the XML configuration file.
<b>Action</b>	Before you save the configuration file, check to make sure that all the required attributes are specified.
<b>INMCLE0086</b>	<b>Failed to fetch common attribute {0}.</b>
<b>Explanation</b>	Could not fetch the common attribute {0}, possibly because the attribute does not exist.
<b>Action</b>	Verify that the common attribute {0} is valid.

<b>INMCLE0087</b>	<b>Caught an exception while trying to set value for attribute {0}.</b>
<b>Explanation</b>	Could not set a value for attribute {0}. It is probably because of the following reasons: 1) attribute does not exist 2) attribute is read-only.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0088</b>	<b>Failed to retrieve attribute {0}.</b>
<b>Explanation</b>	Could not retrieve attribute {0}, possibly because the attribute does not exist.
<b>Action</b>	Verify that the attribute is valid.
<b>INMCLE0089</b>	<b>{0} based search has null or empty value.</b>
<b>Explanation</b>	Could not execute {0} based search, possibly because of a null or empty value in the search criteria.
<b>Action</b>	Check to make sure that the search criteria is valid.
<b>INMCLE0090</b>	<b>Data type {0} in search criteria is invalid.</b>
<b>Explanation</b>	The specified data type {0} in search criteria is not supported.
<b>Action</b>	Specify a valid data type. Refer to the CentraSite online documentation's section "Attribute Data Types" for a list of the supported data types.
<b>INMCLE0091</b>	<b>The number of values provided in the search criteria does not match with the mandatory number allowed for the operator {0}.</b>
<b>Explanation</b>	Every operator will support only the specified number of values. This error occurs when the number of values entered is less than or greater than the specified number.
<b>Action</b>	Refer to the CentraSite online documentation's section "Searching the CentraSite Catalog".
<b>INMCLE0092</b>	<b>Failed to serialize search {0}.</b>
<b>Explanation</b>	Could not serialize the above search, possibly because of invalid parameters in the search criteria.
<b>Action</b>	Check to make sure that the mandatory parameters are specified in search criteria.

<b>INMCLE0093</b>	<b>Failed to create folder in WebDav.</b>
<b>Explanation</b>	Could not create folder in the WebDav, possibly because you do not have the necessary permission to create a folder or intermediate folder in WebDav.
<b>Action</b>	Verify that you have the required permission to create a folder or intermediate folder in WebDav.
<b>INMCLE0094</b>	<b>Failed to retrieve file from given URI {0}.</b>
<b>Explanation</b>	Could not retrieve file from the above URI. This is probably because of the following reasons: 1) file does not exist 2) insufficient permissions to read the file.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact your service provider.
<b>INMCLE0095</b>	<b>Search cannot be executed with given URI {0}.</b>
<b>Explanation</b>	Could not execute a search with URI {0}, possibly because the given URI is invalid.
<b>Action</b>	Verify that the specified URI is valid. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0096</b>	<b>Failed to parse persisted search output {0}.</b>
<b>Explanation</b>	Could not parse the search output, possibly because of an invalid XML syntax.
<b>Action</b>	Verify that the XML syntax is correct.
<b>INMCLE0097</b>	<b>Failed to convert input {0} to bytes.</b>
<b>Explanation</b>	Could not convert the given input {0} to bytes. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0098</b>	<b>Failed to read output.</b>
<b>Explanation</b>	Failed to read the output, possibly because the input or output stream is closed.
<b>Action</b>	Make sure that the input or output stream is open.
<b>INMCLE0099</b>	<b>Failed to initialize parser.</b>
<b>Explanation</b>	Error: could not initialize parser. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.

<b>INMCLE0100</b>	<b>Failed to get search data stored in folder {0}.</b>
<b>Explanation</b>	Could not get search data files that were stored in the above folder, possibly because you do not have insufficient permission to access the files.
<b>Action</b>	Verify that you have required permissions to access the data files.
<b>INMCLE0101</b>	<b>Cannot instantiate class{0}.</b>
<b>Explanation</b>	Could not instantiate the above class, possibly because the class is incorrect.
<b>Action</b>	Check to make sure that the implementation class is correct and follows a specified syntax. Refer to the documentation reference for Action Implementation class.
<b>INMCLE0102</b>	<b>Failed to load actions from system configurations.</b>
<b>Explanation</b>	Could not load specific actions from the system configuration file because of the following reasons: 1) class name for action is incorrect 2) action is not configured.
<b>Action</b>	Check to make sure that the class name for actions is correct and is configured in your system.xml file.
<b>INMCLE0103</b>	<b>Unable to retrieve actions for null parameter.</b>
<b>Explanation</b>	Internal error. It is possibly because you are trying to pass parameter with null value.
<b>Action</b>	Check if the parameter contains a null value.
<b>INMCLE0104</b>	<b>Failed to get configurator {0}</b>
<b>Explanation</b>	Could not get the above configurator, possibly because you do not have the required permissions.
<b>Action</b>	Verify that you have the required permission to get configurator. Contact your administrator and request permission if necessary and try again.
<b>INMCLE0105</b>	<b>Failed to get owner from connection.</b>
<b>Explanation</b>	Could not get the owner from connection, possibly because you do not have the required permissions.
<b>Action</b>	Verify that you have the required permission to get owner from connection. Contact your administrator and request permission if necessary and try again.

<b>INMCLE0106</b>	<b>Login failed.</b>
<b>Explanation</b>	Failed to login to CentraSite. It is possibly because of the following reasons: 1) incorrect CentraSite URL 2) invalid authentication credentials.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0107</b>	<b>{0} object is null.</b>
<b>Explanation</b>	Error: given object is null.
<b>Action</b>	Check to make sure that the given object is not null.
<b>INMCLE0108</b>	<b>Failed to get an instance of component {0}.</b>
<b>Explanation</b>	Could not get an instance of the above component. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0111</b>	<b>Failed to remove file {0} from WebDaV.</b>
<b>Explanation</b>	Could not create a folder in WebDav. It is probably because of the following reasons: 1) file does not exist in WebDav 2) insufficient permission to remove a file from WebDav.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0112</b>	<b>Failed to create a file in {0}.</b>
<b>Explanation</b>	Could not create a file in {0}, possibly because the parent directory does not exist in the given location.
<b>Action</b>	Verify that parent directory exists in the given location.
<b>INMCLE0113</b>	<b>Could not instantiate AccessControlElement.</b>
<b>Explanation</b>	Unable to instantiate the AccessControlElement. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0114</b>	<b>Failed to find resource exists for given URL {0}.</b>
<b>Explanation</b>	Could not find the file for given URL. It is probably because the file does not exist in the given URL.
<b>Action</b>	Check to make sure that the file exists in given URL.

<b>INMCLE0115</b>	<b>Failed to purge older versions of CentraSite object.</b>
<b>Explanation</b>	Could not purge older versions of the CentraSite object. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0116</b>	<b>Unable to version CentraSite object.</b>
<b>Explanation</b>	Could not create a new version of the CentraSite object. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0117</b>	<b>Unable to obtain base type for {0}.</b>
<b>Explanation</b>	Could not obtain the base type for {0}. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0118</b>	<b>Failed to retrieve profiles for {0}.</b>
<b>Explanation</b>	Could not retrieve profiles for {0} because of the following reasons: 1) failure in retrieving profiles from type 2) insufficient permission for accessing the profiles.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0119</b>	<b>Failed to retrieve information for profile {0}.</b>
<b>Explanation</b>	Could not retrieve the information for profile. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0120</b>	<b>Failed to choose assets for {0}.</b>
<b>Explanation</b>	Could not choose the assets for executing above action, possibly because the action is not in the 'initial' state.
<b>Action</b>	Verify that the action is in 'initial' state.
<b>INMCLE0122</b>	<b>Failed to retrieve immediate allowed states.</b>
<b>Explanation</b>	This is an unexpected exception. It is probably because the current lifecycle state does not have at least one immediate state.
<b>Action</b>	Check to make sure that the current lifecycle state has at least one immediate state.

<b>INMCLE0123</b>	<b>Failed to retrieve immediate preferred state</b>
<b>Explanation</b>	This is an unexpected exception. It is probably because the current lifecycle state does not have at least one immediate state.
<b>Action</b>	Check to make sure that the current lifecycle state has at least one immediate state.
<b>INMCLE0124</b>	<b>Failed to retrieve current state.</b>
<b>Explanation</b>	This is an unexpected exception. It is probably because the object is not associated with any of the lifecycle model.
<b>Action</b>	Check to make sure that the object type is associated with at least one lifecycle model.
<b>INMCLE0125</b>	<b>Failed to retrieve pending state.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact your system administrator.
<b>INMCLE0126</b>	<b>Failed to identify if state of object is pending or not.</b>
<b>Explanation</b>	Could not identify if state of the object is in pending or not. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact your system administrator.
<b>INMCLE0127</b>	<b>Failed to get lifecycle model assigned types.</b>
<b>Explanation</b>	Could not get the lifecycle model assigned types. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact your system administrator.
<b>INMCLE0128</b>	<b>Failed to identify initial state of lifecycle model.</b>
<b>Explanation</b>	Could not identify initial state of the lifecycle model. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact your system administrator.

<b>INMCLE0129</b>	<b>Failed to get applicable states of lifecycle model.</b>
<b>Explanation</b>	Could not get applicable states of the lifecycle model. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact your system administrator.
<b>INMCLE0130</b>	<b>Failed to identify if given lifecycle model is global or not.</b>
<b>Explanation</b>	Could not identify if the given lifecycle model belongs to the global category. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact your system administrator.
<b>INMCLE0131</b>	<b>Mandatory parameters to identify applicable lifecycle models are empty.</b>
<b>Explanation</b>	An attempt is made to pass one or more of the mandatory parameters (CentraSiteObjectType or Organization) empty.
<b>Action</b>	Enter valid value for the mandatory parameters.
<b>INMCLE0132</b>	<b>Mandatory parameters to identify applicable lifecycle models are empty.</b>
<b>Explanation</b>	An attempt is made to pass one or more of the mandatory parameters (Keyword, CentraSiteObjectType or Organization) empty.
<b>Action</b>	Enter valid value for the mandatory parameters.
<b>INMCLE0133</b>	<b>setParameter value for a CSOSearch is empty.</b>
<b>Explanation</b>	An attempt is made to pass an empty list of values for the setParameter of CSOSearch.
<b>Action</b>	Enter a valid list of values for the CSOSearch.
<b>INMCLE0134</b>	<b>Invalid authentication credentials.</b>
<b>Explanation</b>	You have entered invalid authentication credentials.
<b>Action</b>	Enter valid authentication credentials.
<b>INMCLE0135</b>	<b>Folder {0} does not exist.</b>
<b>Explanation</b>	The specified folder does not exist in WebDav.
<b>Action</b>	Create the folder in WebDav and try again.

<b>INMCLE0136</b>	<b>Choose the CentraSite Object(s) to perform this action.</b>
<b>Explanation</b>	You have not chosen the CentraSite Object(s) for performing this action.
<b>Action</b>	Choose the CentraSite Object(s) to perform this action.
<b>INMCLE0137</b>	<b>Failed to perform {0} on multiple CentraSite objects.</b>
<b>Explanation</b>	You cannot perform {0} on multiple CentraSite objects at a time.
<b>Action</b>	Ensure you choose only one CentraSite object for performing {0}.
<b>INMCLE0138</b>	<b>Failed to check if {0} is applicable or not.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0139</b>	<b>Failed to perform {0} on specified CentraSite object(s).</b>
<b>Explanation</b>	Could not perform {0} on the specified CentraSite object(s) due to one or more of the following reasons: (1) insufficient permission (2) CentraSite object is in 'Pending' state (3) CentraSite object is locked for editing by another user.
<b>Action</b>	Check for the above possible reasons and execute again. Else, contact the CentraSite administrator.
<b>INMCLE0140</b>	<b>Failed to verify if current user has Edit permission on {0}.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0141</b>	<b>You are trying to modify an outdated asset.</b>
<b>Explanation</b>	You are trying to modify an asset which is outdated.
<b>Action</b>	Before you start to edit an asset, refresh the details page.
<b>INMCLE0142</b>	<b>Failed to verify if user has Move permission on CentraSite object.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.

<b>INMCLE0143</b>	<b>Failed to cancel {0}.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0144</b>	<b>Error loading saved search with name {0}.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact our technical support.
<b>INMCLE0145</b>	<b>{0} is required for CSOSearch.</b>
<b>Explanation</b>	Mandatory property {0} for executing a CSOSearch is missing.
<b>Action</b>	Check to make sure that the mandatory property is specified.
<b>INMCLE0146</b>	<b>Mismatch of attribute {0} specified in {1} with {2}.</b>
<b>Explanation</b>	The attribute in {1} does not match with the given {2}.
<b>Action</b>	Remove the faulty {1} and execute again.
<b>INMCLE0147</b>	<b>Caught an exception while getting profile id for {0}.</b>
<b>Explanation</b>	Could not retrieve the profile id for {0}. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0148</b>	<b>{0} with name {1} used in {2} does not exist.</b>
<b>Explanation</b>	{0} with name {1} used in {2} does not exist.
<b>Action</b>	Contact the CentraSite administrator.
<b>INMCLE0149</b>	<b>Object {0} is null.</b>
<b>Explanation</b>	Could not get the object {0}.
<b>Action</b>	The object should be initialized before executing this operation.
<b>INMCLE0150</b>	<b>Caught an exception while trying to fetch pending approval requests.</b>
<b>Explanation</b>	Could not fetch pending approval requests for the logged in user. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.

<b>INMCLE0151</b>	<b>Caught an exception while trying to verify if the logged in user has CentraSite Administrator role.</b>
<b>Explanation</b>	Could not verify if the logged in user has CentraSite Administrator role. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0152</b>	<b>Wrong usage of {0} method.</b>
<b>Explanation</b>	Wrong usage of {0} method. This method is allowed only in the following scenarios: (1) if the action is in {1} state (2) before triggering the finishAllSteps() execution.
<b>Action</b>	Make sure that the method is used in one of the above scenarios. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0153</b>	<b>{0} execution without comments is invalid.</b>
<b>Explanation</b>	{0} execution without comments is invalid. The approver has not specified his/her comments for {0}.
<b>Action</b>	Enter the comments for {0} using {1} API.
<b>INMCLE0154</b>	<b>Failed to execute {0}.</b>
<b>Explanation</b>	Could not execute {0}. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0155</b>	<b>Failed to execute {0}</b>
<b>Explanation</b>	Could not execute {0} due to one or more of the following reasons: (1) {0} is not allowed at the time of execution (2) assets for {0} are in 'Completed' state (3) for a Revert action, the you should have the CentraSite administrator role (4) you do not have a pending approval flow to proceed with {0}.
<b>Action</b>	Check for the above possible reasons and execute again. Else, contact the CentraSite administrator.
<b>INMCLE0157</b>	<b>Invalid state transition from {0} by invoking {1} operation.</b>
<b>Explanation</b>	The state transition from {0} by invoking the {1} operation is not valid.
<b>Action</b>	See the Action Java API documentation for more details.

<b>INMCLE0158</b>	<b>One or more assets you have selected is not the most recent version of the asset.</b>
<b>Explanation</b>	One or more selected assets is not the most recent version of the asset. The New Version action does not apply to assets with intermediate version.
<b>Action</b>	Check to make sure that the selected assets for versioning are in their most recent version.
<b>INMCLE0159</b>	<b>Failed to create new version assets.</b>
<b>Explanation</b>	Error occurred when trying to create new version assets. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0160</b>	<b>Caught an exception while invoking {0} operation.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to execute the {0} operation.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0161</b>	<b>Could not exclude a CentraSite object in {0} state from export. The object should be in "Export Preview" state.</b>
<b>Explanation</b>	CentraSite object in a state other than "Export Preview" cannot be excluded from export. The CentraSite object in "Export Preview" state will only have the option to preview and modify the export list.
<b>Action</b>	Verify that the CentraSite object is in "Export Preview" state. Read the usage instructions of Export action before use.
<b>INMCLE0162</b>	<b>Could not obtain export archive of a CentraSite object in {0} state. The object should be in "Completed" state.</b>
<b>Explanation</b>	You cannot obtain an export archive of the CentraSite object, if the object is in a state other than "Completed".
<b>Action</b>	Verify that the CentraSite object is in "Completed" state. Read the usage instructions of Export action before use.
<b>INMCLE0163</b>	<b>Failed to execute Consume action.</b>
<b>Explanation</b>	Could not execute a Consume action, possibly because of one or more of the following reasons: 1) username is invalid 2) password is invalid 3) connection URL is incorrect.
<b>Action</b>	Check for the above possible reasons and execute again. Else, contact the CentraSite administrator.

<b>INMCLE0164</b>	<b>An action in {0} state will not have Export List viewable. The action should be in "Export Preview" state.</b>
<b>Explanation</b>	You cannot view an export list if the action is in a state other than "Export Preview".
<b>Action</b>	Verify that the action is in "Export Preview" state. Read the usage instructions of Export action before use.
<b>INMCLE0165</b>	<b>Failed to execute Consume action.</b>
<b>Explanation</b>	{0} execution can fail due to one or more of the following reasons: (1) consumers are not selected (2) consumer requests are not registered.
<b>Action</b>	Check for the above possible reasons and execute again. Else, contact the CentraSite administrator.
<b>INMCLE0166</b>	<b>CentraSiteObject type list is empty.</b>
<b>Explanation</b>	You have not entered a CentraSiteObject type list.
<b>Action</b>	Enter a valid CentraSiteObject type list.
<b>INMCLE0167</b>	<b>Invalid object {1} for object type {2}.</b>
<b>Explanation</b>	The specified CentraSite object {1} does not belong to CentraSiteObject type {2}.
<b>Action</b>	Enter a valid CentraSite object of type {2}.
<b>INMCLE0168</b>	<b>Caught an exception while trying to convert CentraSite objects.</b>
<b>Explanation</b>	This is an unexpected exception. This is probably because an attempt is made to convert RegistryObjects to CentraSiteObjects, and vice versa.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0169</b>	<b>Invalid value set for {0}. Expected value : {1} Current value : {2}.</b>
<b>Explanation</b>	The specified values for search condition does not match with the expected value.
<b>Action</b>	See the CentraSite online documentation's section "Searching the CentraSite Catalog" for details.
<b>INMCLE0170</b>	<b>Failed to verify if user {0} is watching asset {0}.</b>
<b>Explanation</b>	Could not verify if the user {0} is watching the given asset. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.

<b>INMCLE0171</b>	<b>Invalid operator set for {0}. Current operator: {1}. Supported operators for {2} type are {3}.</b>
<b>Explanation</b>	The specified operator for search does not match with the attribute's applicable operators.
<b>Action</b>	See the CentraSite online documentation's section "Searching the CentraSite Catalog" for details.
<b>INMCLE0172</b>	<b>Failed to get existing lists.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0173</b>	<b>List {0} does not exist.</b>
<b>Explanation</b>	An attempt is made to pass the list {0} that is not available for the current user.
<b>Action</b>	Check to make sure that the list you pass for setExistingList(..) is available for the current user.
<b>INMCLE0174</b>	<b>Wrong usage of Add to List action API.</b>
<b>Explanation</b>	Incorrect usage of the Add to List action API. This problem occurs, when the '{0}' method is triggered with action in a state other than 'Show Available Lists'.
<b>Action</b>	Before you execute the {0} method, verify that the Add to List action is in 'Show Available Lists' state.
<b>INMCLE0175</b>	<b>List to add selected assets is not set.</b>
<b>Explanation</b>	List to add the selected set of assets is not set. Use the {0} method to set this list.
<b>Action</b>	Make sure that you use the {0} method to set the list to add selected assets.
<b>INMCLE0176</b>	<b>Failed to execute {0}.</b>
<b>Explanation</b>	{0} execution can fail for a number of reasons: (1) action is not allowed (2) action is not applicable at the time of execution (3) action is in 'Completed' state.
<b>Action</b>	Check for the above possible reasons and execute again. Else, contact the CentraSite administrator.

<b>INMCLE0177</b>	<b>Failed to create a new list {0}.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0178</b>	<b>Failed to add selected assets to the list.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0179</b>	<b>Choose a document to attach to asset.</b>
<b>Explanation</b>	The document to attach to the asset is not specified.
<b>Action</b>	Call the setDocument method before invoking the execute method in Attach Document action.
<b>INMCLE0180</b>	<b>Failed to create {0}</b>
<b>Explanation</b>	Failed to create resources or asset. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLE0182</b>	<b>Data of type {0} is ignored.</b>
<b>Explanation</b>	Data of the above type defined for a CSOParameter is not supported.
<b>Action</b>	Use the supported data types for CSOParameter. See the CentraSite online documentation's section "Searching the CentraSite Catalog" for details.
<b>INMCLE0183</b>	<b>Current CSOSearch has unresolved parameters: {0}.</b>
<b>Explanation</b>	Current CSOSearch holds parameters that have a null value.
<b>Action</b>	Enter values for the unresolved parameters.
<b>INMCLE0184</b>	<b>Number of parameters defined in CSOSearch differs from parameters defined for the XQuery module.</b>
<b>Explanation</b>	Number of Parameters defined in the XQuery: {0} Number of Parameters defined in the CSOSearch: {1}.
<b>Action</b>	Validate your CSOSearch against the XQuery module.

<b>INMCLE0185</b>	<b>Missing parameters</b>
<b>Explanation</b>	The XQuery module used by the current CSOSearch requires {0} parameters.
<b>Action</b>	Validate the CSOSearch definition against the XQuery module that is being used.
<b>INMCLE0186</b>	<b>Cannot find Xquery module {1} in namespace {0}.</b>
<b>Explanation</b>	Could not find or load the XQuery module({0}:{1}) used by CSOSearch.
<b>Action</b>	Load the module / correct the CSOSearch definition.
<b>INMCLE0187</b>	<b>No CentraSite object is available for Export action.</b>
<b>Explanation</b>	You have not chosen the CentraSite objects for Export action.
<b>Action</b>	Choose the CentraSite objects for Export action.
<b>INMCLE0188</b>	<b>Configuration base directory is not set.</b>
<b>Explanation</b>	The configuration base directory specified by the path "com.softwareag.centrasite.api.configuration.basedir" is not set.
<b>Action</b>	Set the configuration base directory correctly. See the CentraSite online documentation for more details.
<b>INMCLE0189</b>	<b>Type {0} not valid for Attach Document action.</b>
<b>Explanation</b>	Could not perform the Attach Document action on selected type {0}.
<b>Action</b>	Enter a valid file. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0190</b>	<b>Failed to attach given document.</b>
<b>Explanation</b>	Could not attach the given document, possibly because the document is invalid.
<b>Action</b>	Enter a valid document.
<b>INMCLE0191</b>	<b>CentraSite object {0} does not belong to any of the given types {1}.</b>
<b>Explanation</b>	The specified CentraSite object {0} does not belong to any of the given types {1}. Only objects that belong to the given types {1} are applicable for the Consume action.
<b>Action</b>	Choose a CentraSite object that belongs to one of the types {1}.

<b>INMCLE0192</b>	<b>Could not choose consumer object in current state {0}.</b>
<b>Explanation</b>	You cannot choose a consumer object in the current state {0}. The object should be in state {1}.
<b>Action</b>	Make sure that the consumer is in state {1}. Read the usage instructions of Consume action before use.
<b>INMCLE0193</b>	<b>List of consumers is empty.</b>
<b>Explanation</b>	An attempt is made to add an empty list of consumers for the Consume action.
<b>Action</b>	Choose a valid list of consumers. Read the usage instructions of Consume action before use.
<b>INMCLE0194</b>	<b>Error: Timeout - The Document Processor Thread timed out waiting for the required inputs.</b>
<b>Explanation</b>	You have not entered the required inputs within the time that the Document Processor was prepared to wait.
<b>Action</b>	Enter the required inputs as soon as prompted.
<b>INMCLE0195</b>	<b>Failed to process missing resources, {0}.</b>
<b>Explanation</b>	Could not process because the following resources are missing: {0}.
<b>Action</b>	Check to make sure that the required resources are specified.
<b>INMCLE0196</b>	<b>Failed to initialize AttachDocumentProcessorThread.</b>
<b>Explanation</b>	This is an internal error. The cause is not immediately known.
<b>Action</b>	Check to make sure that the mandatory inputs are specified.
<b>INMCLE0198</b>	<b>Failed to attach given document(s), Reason : {0}.</b>
<b>Explanation</b>	An exception occurred while trying to attach the document(s). This is probably because of the following reasons: 1) document is invalid 2) network failure.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0199</b>	<b>Failed to get applicable reports for object {0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to get applicable reports for {0}. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.

<b>INMCLE0200</b>	<b>Wrong usage of the View Report action API {0}.</b>
<b>Explanation</b>	Incorrect usage of the View Report action API. This problem occurs, when the '{0}' method is triggered with action in a state other than '{1}'.
<b>Action</b>	Before you execute the '{0}' method, verify that the action is in '{1}' state.
<b>INMCLE0201</b>	<b>Could not get selected report.</b>
<b>Explanation</b>	Failed to get the selected report, possibly because the report is not implicitly set for retrieval.
<b>Action</b>	Use the 'setSelectedReport(..)' to set a report for this action.
<b>INMCLE0202</b>	<b>Could not generate the selected report {0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to generate the selected report {0}. The cause is not immediately known.
<b>Action</b>	Check the log file for detailed information.
<b>INMCLE0203</b>	<b>Failed to execute {0}.</b>
<b>Explanation</b>	You do not have permission to perform this action.
<b>Action</b>	Before executing {0} make sure that you have the 'Use the Reports UI' permission. Contact your CentraSite administrator and if necessary request access and then try again.
<b>INMCLE0204</b>	<b>Failed to close Centrasite ResourceAccessManager.</b>
<b>Explanation</b>	Caught an exception while trying to close the ResourceAccessManager. This is a system error.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0205</b>	<b>CentraSite cannot create a gateway because the gateway already exists. Gateway type: {0}, gateway name: {1}. Specify another name for the gateway.</b>
<b>Explanation</b>	You are trying to create a gateway in CentraSite with an existing name and gateway type.
<b>Action</b>	Provide another name for the gateway and try the "set gateway" command again.

<b>INMCLE0206</b>	<b>Failed to export {0}.</b>
<b>Explanation</b>	Could not export the asset (s). This is probably because of the following reasons: 1) mandatory input is missing 2) prerequisite not satisfied.
<b>Action</b>	Check for the above possible reasons. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0207</b>	<b>Exception in Export Processor Thread</b>
<b>Explanation</b>	Export Processor Thread caught an unhandled exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0208</b>	<b>Specify mandatory {0}s for performing operation {1}.</b>
<b>Explanation</b>	To perform this operation you should set the mandatory inputs.
<b>Action</b>	Check to make sure that the mandatory inputs are specified.
<b>INMCLE0209</b>	<b>List to remove the selected assets is not set.</b>
<b>Explanation</b>	The list to remove the selected assets is not set. Use the {0} method to set this list.
<b>Action</b>	Make sure that you use the {0} method to set the list to remove the selected assets.
<b>INMCLE0210</b>	<b>Caught an unexpected exception when setting notification options for user {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0211</b>	<b>Invalid file; specify a valid path to external file {0}.</b>
<b>Explanation</b>	You have entered an invalid file path.
<b>Action</b>	Enter a valid file path.
<b>INMCLE0212</b>	<b>Exception occurred when setting the specified email addresses for user {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.

<b>INMCLE0213</b>	<b>Exception occurred when adding the specified telephone number for user {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0214</b>	<b>Exception occurred when setting the specified name for user {0}.</b>
<b>Explanation</b>	An unexpected exception occurred when trying to set one of the specified name (First Name, Middle Name or Last Name) for the user {0}.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0215</b>	<b>Parameter passed for {0} is null.</b>
<b>Explanation</b>	An attempt is made to specify the mandatory parameter {0} with a null value.
<b>Action</b>	Check to make sure that the {0} has a valid value.
<b>INMCLE0216</b>	<b>Exception occurred when trying to store the given profile picture in WEBDAV for user {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0217</b>	<b>Exception occurred when trying to check for pending consumer registrations for user {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0218</b>	<b>Exception occurred when trying to get Approval Request Reason for {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0219</b>	<b>Exception occurred when trying to get Approval Workflow Name for {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.

<b>INMCLE0220</b>	<b>{0} is triggered for consumer registration approval / rejection process; accessing {1} is invalid.</b>
<b>Explanation</b>	The {0} is triggered for consumer registration approval / rejection; accessing {1} is not valid.
<b>Action</b>	Accessing the {1} method for this kind of {0} is not valid. Ensure that you do not call this method here.
<b>INMCLE0221</b>	<b>Could not create/update a gateway because the gateway type is not specified. Specify the gateway type and try again.</b>
<b>Explanation</b>	The gateway type attribute is required to identify a gateway along with the gateway name. You have not specified the gateway type for the "set gateway" command in CentraSite.
<b>Action</b>	Specify the gateway type along with the name and other mandatory parameters, and try the "set gateway" command again.
<b>INMCLE0222</b>	<b>Exception occurred when trying to get Consumer Registration Requestor for {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0223</b>	<b>Exception occurred when trying to get profile picture for user {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0224</b>	<b>Exception occurred when getting the notification options for user {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0225</b>	<b>Error loading predefined notification concepts</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information. If the problem persists, contact the CentraSite administrator.

<b>INMCLE0226</b>	<b>Invalid phone type {0}.</b>
<b>Explanation</b>	You have entered an invalid phone type. The phone type should match one of the predefined types.
<b>Action</b>	Refer to CLL API documentation for details on predefined phone types.
<b>INMCLE0228</b>	<b>Invalid name {0}.</b>
<b>Explanation</b>	You have entered an invalid name.
<b>Action</b>	Enter a valid name without special characters.
<b>INMCLE0229</b>	<b>CentraSite could not create the gateway. You might not have permission to create a Mediator gateway.</b>
<b>Explanation</b>	User is not authorized to create a Mediator gateway in CentraSite.
<b>Action</b>	Contact your CentraSite administrator.
<b>INMCLE0230</b>	<b>Failed to create {0} for given URI {1}.</b>
<b>Explanation</b>	Failed to create a {0} for the given URI {1}, possibly because the Save operation is applicable only for WebDav resources.
<b>Action</b>	Save is applicable only for WebDav resources.
<b>INMCLE0231</b>	<b>Failed to get content type for given URI {0}.</b>
<b>Explanation</b>	Failed to get content type for given URI {0}, possibly because the content type could not find the external URI.
<b>Action</b>	Failed to get content type for given URI {0}, possibly because the content type could not find the external URI.
<b>INMCLE0232</b>	<b>Unable to fetch folders from external URL {0}.</b>
<b>Explanation</b>	Could not get folders from an external URL, because this operation is only supported for a WebDav URL.
<b>Action</b>	Enter a valid WebDav URL.
<b>INMCLE0233</b>	<b>Unable to fetch files from external URL {0}.</b>
<b>Explanation</b>	Could not fetch files from an external URL, because this operation is only supported for a WebDav URL.
<b>Action</b>	Enter a valid a WebDav URL.

<b>INMCLE0234</b>	<b>Failed to read XQuery from file {0}.</b>
<b>Explanation</b>	Could not read the XQuery from file, possibly because the file does not exist.
<b>Action</b>	Enter a valid file path.
<b>INMCLE0235</b>	<b>Parameter passed to the method {0} is null.</b>
<b>Explanation</b>	The parameter passed to the method {0} is null.
<b>Action</b>	Pass a valid parameter to the method {0}.
<b>INMCLE0236</b>	<b>Invalid values for keyword condition</b>
<b>Explanation</b>	Keyword condition takes only one string value as input. The value should be put in the collection and then set to keyword condition.
<b>Action</b>	Check to make sure that valid values are set as input to the keyword condition.
<b>INMCLE0237</b>	<b>Failed to get TransformedContent {0}.</b>
<b>Explanation</b>	Failed to get the TransformedContent, possibly because of a connection failure.
<b>Action</b>	Check the network connection. If the problem persists, contact CentraSite administrator.
<b>INMCLE0240</b>	<b>{0} cannot be reset.</b>
<b>Explanation</b>	An attempt is made to reset the {0} that already has a value specified and that is read-only.
<b>Action</b>	{0} is read-only.
<b>INMCLE0241</b>	<b>Exception occurred while trying to get the webdav location of computed profile template.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to get the webdav location of computed profile template, possibly because the template does not exist.
<b>Action</b>	Check to make sure that the uploaded archive contains the computed profile template.
<b>INMCLE0242</b>	<b>Exception occurred while loading the implementation class of computed profile.</b>
<b>Explanation</b>	An unexpected exception occurred while loading the implementation class of computed profile, possibly because the class does not exist.
<b>Action</b>	Check to make sure that the uploaded archive contains the implementation class.

<b>INMCLE0243</b>	<b>Database access is denied.</b>
<b>Explanation</b>	Access to the database is denied.
<b>Action</b>	Login again.
<b>INMCLE0244</b>	<b>Exception while trying to retrieve the computed profile data.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Make sure that the getProfileDataAsJson() implementation is correct.
<b>INMCLE0245</b>	<b>Exception while trying to compute the profile data.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Make sure that the computeProfileData implementation is correct.
<b>INMCLE0246</b>	<b>Required input is missing.</b>
<b>Explanation</b>	The required input is missing.
<b>Action</b>	Enter a valid input.
<b>INMCLE0247</b>	<b>Error loading profile data.</b>
<b>Explanation</b>	An unexpected error occurred while trying to load the profile data, possibly because of the following reasons: {0}.
<b>Action</b>	Check for the above possible reasons. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0248</b>	<b>Search cannot be saved.</b>
<b>Explanation</b>	The current search contains validation errors.
<b>Action</b>	Correct the validation errors and try again.
<b>INMCLE0249</b>	<b>Error establishing a database connection.</b>
<b>Explanation</b>	Unable to connect the database, possibly because the database server is down.
<b>Action</b>	Start the database server.
<b>INMCLE0250</b>	<b>Failed to convert the given duration {0} to date.</b>
<b>Explanation</b>	Exception occurred while trying to convert the given duration to date; possibly because the duration string is invalid.
<b>Action</b>	Enter a valid duration.

<b>INMCLE0251</b>	<b>Failed to covert the given string {0} to date.</b>
<b>Explanation</b>	Exception occurred while trying to convert the given string to date; possibly because the string is invalid.
<b>Action</b>	Check to make sure that the string is valid and it supports the date format like "E MMM dd HH:mm:ss Z yyyy".
<b>INMCLE0252</b>	<b>Failed to create a new {0}.</b>
<b>Explanation</b>	The {0} could not be created; possibly because the inputs were invalid.
<b>Action</b>	Make sure the inputs are valid.
<b>INMCLE0253</b>	<b>Failed to save an asset with the given permissions.</b>
<b>Explanation</b>	Failed to save an asset with the given permissions; possibly because the asset is unlocked.
<b>Action</b>	Make sure the asset is locked and available for editing.
<b>INMCLE0254</b>	<b>Exception fetching the asset's instace-level and profile-level permissions.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Contact your system administrator if the problem persists.
<b>INMCLE0255</b>	<b>Display Interval {0} is invalid.</b>
<b>Explanation</b>	Specify the time interval how frequently you want to collect metrics for the service. The expected format is 3m 2d 6h; where m indicates the month, d indicates the day and h indicates the hour.
<b>Action</b>	Check to make sure that the time interval is specified in exactly the above format.
<b>INMCLE0256</b>	<b>Exception {0} occurred while trying to fetch the list of targets.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Check the exception stack trace information.
<b>INMCLE0257</b>	<b>Target {0} is not active.</b>
<b>Explanation</b>	The target {0} is not active. The cause is not immediately known.
<b>Action</b>	Check the stack trace information for details.

<b>INMCLE0258</b>	<b>Failed to deploy the asset {0} on target {1}.</b>
<b>Explanation</b>	Could not deploy the asset {0} on given target {1}. Possible reason: {2}
<b>Action</b>	Check the stack trace information for details.
<b>INMCLE0259</b>	<b>Unable to fetch policy with UUID '{0}'.</b>
<b>Explanation</b>	Could not fetch policies with the given UUID '{0}'; possibly because of the following reasons: 1. A policy with a UUID '{0}' does not exist. 2. Logged in user does not have the required permission on policy.
<b>Action</b>	Ensure that at least one policy exists with the given UUID and the logged in user has the required permissions on the policy.
<b>INMCLE0260</b>	<b>Unable to fetch policies with name pattern '{0}'.</b>
<b>Explanation</b>	Could not fetch policies with the given name pattern '{0}'; possibly because of the following reasons: 1. A policy with a name pattern '{0}' does not exist. 2. Logged in user does not have the required permission on policy.
<b>Action</b>	Ensure that at least one policy exists with the given name pattern and the logged in user has the required permissions on the policy.
<b>INMCLE0261</b>	<b>The policy action template is invalid.</b>
<b>Explanation</b>	Invalid action template; possibly because one or more vital parameters are null or not available.
<b>Action</b>	Enter valid parameters for the action template.
<b>INMCLE0262</b>	<b>Unable to fetch policy actions with UUID '{0}'.</b>
<b>Explanation</b>	Could not fetch policy actions with the given UUID '{0}'; possibly because of the following reasons: 1. A policy action with a UUID '{0}' does not exist. 2. Logged in user does not have the required permission on action.
<b>Action</b>	Ensure that at least one policy action exists with the given UUID and the logged in user has the required permissions on the action.
<b>INMCLE0263</b>	<b>Unable to fetch policy actions with name pattern '{0}'.</b>
<b>Explanation</b>	Could not fetch policy actions with the given name pattern '{0}'; possibly because of the following reasons: 1. A policy action with a name pattern '{0}' does not exist. 2. Logged in user does not have the required permission on policy action.
<b>Action</b>	Ensure that at least one policy action exists with the given name pattern and the logged in user has the required permissions on the policy action.

<b>INMCLE0264</b>	<b>Unable to fetch {0}.</b>
<b>Explanation</b>	Could not fetch the {0}. The cause is not immediately known.
<b>Action</b>	Check the exception stack trace information.
<b>INMCLE0266</b>	<b>Failed to identify the consumers for the asset {0}.</b>
<b>Explanation</b>	Could not identify the consumers for the given asset {0}
<b>Action</b>	This is an internal error. If the problem persists, contact the system administrator.
<b>INMCLE0267</b>	<b>Failed to identify the targets to which the asset {0} is deployed.</b>
<b>Explanation</b>	Exception occurred when populating the targets to which the asset {0} is deployed.
<b>Action</b>	This is an internal error. If the problem persists, consult the system administrator.
<b>INMCLE0268</b>	<b>Failed to identify the events for the given search filter.</b>
<b>Explanation</b>	Exception occurred when populating events for the given search filter.
<b>Action</b>	This is an internal error. If the problem persists, consult the system administrator.
<b>INMCLE0269</b>	<b>Failed to revoke profile permissions.</b>
<b>Explanation</b>	Caught an exception when trying to revoke the profile permissions.
<b>Action</b>	This is an internal error. If the problem persists, consult the system administrator.
<b>INMCLE0270</b>	<b>Failed to set profile permissions.</b>
<b>Explanation</b>	Caught an exception when trying to set the profile permissions.
<b>Action</b>	This is an internal error. If the problem persists, consult the system administrator.
<b>INMCLE0271</b>	
<b>INMCLE0272</b>	<b>Error obtaining the classifications for object {0}.</b>
<b>Explanation</b>	Caught an unexpected exception occurred while trying to obtain the classifications of object {0} and which prevented the application from proceeding further.
<b>Action</b>	Check the stack trace information for details.

<b>INMCLE0273</b>	<b>Missing attribute in virtualization.</b>
<b>Explanation</b>	Mandatory attribute (Virtual Alias or Endpoint) is missing. Virtual Alias and Endpoint attributes are mandatory for virtualizing an API.
<b>Action</b>	Set the Virtual Alias and Endpoint attributes.
<b>INMCLE0274</b>	<b>Invalid Display Interval {0}.</b>
<b>Explanation</b>	The display interval specified is invalid.
<b>Action</b>	Specify a valid interval (ex. 1m 1d 1h) and try again.
<b>INMCLE0275</b>	<b>Failed to configure the API Key.</b>
<b>Explanation</b>	Could not configure the API Key for the given asset; possibly because of missing parameters.
<b>Action</b>	Check to make sure all the required parameters are set.
<b>INMCLE0276</b>	<b>Failed to load approval groups from the CentraSite registry.</b>
<b>Explanation</b>	One or more approval groups could not be loaded from the CentraSite registry.
<b>Action</b>	Make sure that an approval group exists and try again.
<b>INMCLE0277</b>	<b>Error checking permissions or validity over objects.</b>
<b>Explanation</b>	Could not check permissions or validity over the specified objects.
<b>Action</b>	Verify the user and asset type are valid in the CentraSite registry.
<b>INMCLE0278</b>	<b>Failed to check if the current user has Manage Organizations permission.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0279</b>	<b>Unable to delete/remove the selected {0} {1}</b>
<b>Explanation</b>	You cannot delete the {0} {1}, because you do not have the required permission to delete/remove the {0}.
<b>Action</b>	Verify that you have the required permission to delete/remove the {0}. Contact your administrator, request permission if necessary and try again.

<b>INMCLE0280</b>	<b>Unable to delete the selected user {0}.</b>
<b>Explanation</b>	{1}. A user cannot be deleted if the user owns/modifies object(s), or if the user has any pending actions or if the user is the sole administrator for an organization. Also, if the user modified some object, and the corresponding audit trail entry is still present, deletion is rejected.{0} - The user that was attempted to be deleted.
<b>Action</b>	Delete all of the objects owned by the user, complete all pending actions, ensure another user is appointed as administrator for the corresponding organization and after all modification audit trail entries are purged (if any), user deletion will be allowed.
<b>INMCLE0281</b>	<b>Unable to delete the selected group {0}</b>
<b>Explanation</b>	{1}. You cannot delete the selected group either because you do not have the required permission or the group is associated with another object which creates a dependency to the group.
<b>Action</b>	Verify that you have the required permission to delete the user. Ensure that the group does not have any associations to other objects and try deleting the associations (if any) before attempting to delete the group again.
<b>INMCLE0282</b>	<b>Unable to delete the selected role {0}</b>
<b>Explanation</b>	{1}. You cannot delete the selected role either because you do not have the required permission, or the role is a pre-defined system role which cannot be deleted, or the role is associated with another object which is dependent on it.
<b>Action</b>	Verify that you have the required permission to delete the role. Ensure that you are not attempting to delete a pre-defined role.
<b>INMCLE0283</b>	<b>Unable to delete the selected Child Organization</b>
<b>Explanation</b>	{0}. You cannot delete the selected Child Organization either because you do not have the required permission, or the organization has policies which are active, or other objects are associated with the organization.
<b>Action</b>	Verify that you have the required permission to delete the Child Organization. Ensure that organization dependencies are resolved before attempting to delete again.
<b>INMCLE0284</b>	<b>Unable to delete/modify the selected group {0}</b>
<b>Explanation</b>	You cannot modify the users of/delete pre-defined groups of CentraSite such as "Users" and "Members". Since the group {0} is a pre-defined object, the deletion/modification of the group has been rejected.
<b>Action</b>	Ensure that the group that you are trying to delete/modify is not a pre-defined object.

<b>INMCLE0285</b>	<b>Unable to delete the selected role {0}</b>
<b>Explanation</b>	You cannot delete the OrganizationAdministrator role of an organization. This is because this role indicates the Administrator(s) of an organization.
<b>Action</b>	Ensure that the role you are trying to delete is not that of the OrganizationAdministrator.
<b>INMCLE0286</b>	<b>Caught an Exception while creating the VSProcessingStepsAdapter instance</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid connection.
<b>Action</b>	Verify that the user session is valid.
<b>INMCLE0287</b>	<b>Invalid Native service.</b>
<b>Explanation</b>	This is an internal error. It is probably because the native service Registry Object is null.
<b>Action</b>	Verify that the native service is valid.
<b>INMCLE0288</b>	<b>Unable to virtualize the native service</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid MessageFlow.
<b>Action</b>	Verify that the MessageFlow is valid.
<b>INMCLE0289</b>	<b>Cannot Construct MessageFlow from VirtualService.</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid VirtualService.
<b>Action</b>	Verify that the VirtualService is valid.
<b>INMCLE0290</b>	<b>Invalid Virtual service.</b>
<b>Explanation</b>	This is an internal error. It is probably because the virtual service Registry Object is null.
<b>Action</b>	Verify that the virtual service is valid.
<b>INMCLE0291</b>	<b>Falied to edit the VirtualService .</b>
<b>Explanation</b>	Cannot edit the VirtualService. It is probably because of an invalid MessageFlow.
<b>Action</b>	Verify the MessageFlow for the virtual service.

<b>INMCLE0292</b>	<b>Caught an Exception while creating Default StraightThrough routing for the Virtual Service</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid route-to.
<b>Action</b>	Verify the endpoints for the virtualization
<b>INMCLE0293</b>	<b>Caught an Exception while creating Default Routing Endpoints for the Virtual Service.</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid route-to.
<b>Action</b>	Verify the endpoint properties for the virtualization.
<b>INMCLE0294</b>	<b>Cannot build Processing steps with Empty MessageFlow.</b>
<b>Explanation</b>	This is an internal error. It is because the MessageFlow is empty.
<b>Action</b>	Verify the MessageFlow for the virtual service.
<b>INMCLE0295</b>	<b>Caught an Exception while building Processing steps for the VirtualService.</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid MessageFlow.
<b>Action</b>	Verify that the MessageFlow is valid.
<b>INMCLE0296</b>	<b>Cannot add the PolicyActionInstance with templateId {0} to Routing Step</b>
<b>Explanation</b>	This probably occurs because the PolicyActionInstance does not belong to the routing step.
<b>Action</b>	Verify that the PolicyActionInstance is valid.
<b>INMCLE0297</b>	<b>Cannot add empty Default StraightThrough routing and empty Default Routing Endpoints for a Virtual Service.</b>
<b>Explanation</b>	Default routing and endpoint properties are mandatory for a virtual service and cannot be deleted.
<b>Action</b>	Verify that the default routing and endpoint properties are not deleted.
<b>INMCLE0298</b>	<b>Cannot add the PolicyActionInstance with templateId {0} to Enforce Step.</b>
<b>Explanation</b>	This probably occurs because the policy action instance does not belong to the enforce step.
<b>Action</b>	Verify that the policy action instance is valid.

<b>INMCLE0299</b>	<b>Virtualization is not supported for type {0}</b>
<b>Explanation</b>	The asset passed to the virtualization action is not supported for virtualization.
<b>Action</b>	Verify that the asset is suitable for virtualization.
<b>INMCLE0300</b>	<b>Unable to delete the selected asset.</b>
<b>Explanation</b>	{0}. You cannot delete the selected asset either because you do not have the required permission or the asset has dependencies/associations with other objects (Example: pending approval of assets).
<b>Action</b>	Verify that you have the required permission to delete the asset. Also delete all dependencies with the asset and then attempt the deletion again.
<b>INMCLE0301</b>	<b>Unable to remove the selected role(s) for the user {0}</b>
<b>Explanation</b>	{1} Removal of role(s) for the user may have failed if you are trying to delete role(s) inherited through group membership, or if there are dependencies/associations between the objects.
<b>Action</b>	Ensure that all dependencies are resolved, and do not attempt to delete roles inherited through group memberships.
<b>INMCLE0302</b>	<b>Unable to remove the selected role(s) for the group {0}</b>
<b>Explanation</b>	{1}. Removal of role(s) from the group may have failed if a role has dependencies/associations and hence the role removal for the group may fail.
<b>Action</b>	Ensure that the roles do not have any dependencies and then try again.
<b>INMCLE0303</b>	<b>Unable to remove the group membership {0} for the user</b>
<b>Explanation</b>	{1}. You may not be able to remove a user's group membership if the user has dependencies/associations with the group (example: due to an approval policy). In such cases, membership removal for a user will be rejected.
<b>Action</b>	Ensure that all dependencies are resolved between the user and the group, then try again.
<b>INMCLE0304</b>	<b>Unable to retrieve {0} of a {1}</b>
<b>Explanation</b>	{2}. The retrieval may have failed because you do not have required permission, or due to database access error.
<b>Action</b>	Verify that you have required permissions and also ensure that the database is running, then try again.

<b>INMCLE0305</b>	<b>Failed to instantiate class {0}</b>
<b>Explanation</b>	Could not instantiate the given class {0}, possibly because of the following reasons: 1) class file does not exist 2) classpath is incorrect.
<b>Action</b>	Check for the above possible reasons. If the problem persists, contact the CentraSite administrator.
<b>INMCLE0306</b>	<b>Failed to check User {0} has Role {1}</b>
<b>Explanation</b>	An exception occurred while checking the role {1} for the user {0}.
<b>Action</b>	This is an internal error. Please contact the system administrator.
<b>INMCLE0307</b>	<b>Invalid Super User</b>
<b>Explanation</b>	The given super user configuration in CentraSite web.xml is invalid.
<b>Action</b>	Please provide a valid super user ID for the com.softwareag.centrasite.service.privilege.user.id Init-Param property under CentraSite web.xml.
<b>INMCLE0308</b>	<b>Invalid Super User Role</b>
<b>Explanation</b>	The super user configured under CentraSite web.xml does not have the required role to perform the privileged service.
<b>Action</b>	Please assign the CentraSite Administrator role for the super user or provide a user ID that has the CentraSite Administrator role.
<b>INMCLE0309</b>	<b>Invalid Calling User Role</b>
<b>Explanation</b>	The calling user does not have the appropriate role to execute a privileged service.
<b>Action</b>	Please assign an appropriate role to the user in order to perform the privileged service.
<b>INMCLE0310</b>	<b>API Key settings cannot be updated or deleted</b>
<b>Explanation</b>	A policy related to API Key settings is in the pending state, hence the settings cannot be updated.
<b>Action</b>	Ask the approvers to process the pending approval request pertaining to this asset.
<b>INMCLE0311</b>	<b>Cannot find a category for the policy.</b>
<b>Explanation</b>	This is an internal error. The category type cannot be found.
<b>Action</b>	Please verify the message flow.

<b>INMCLE0312</b>	<b>Caught an Exception while retrieving Default StraightThrough routing endpoint for the Virtual Service</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid route-to.
<b>Action</b>	Verify the endpoints for the virtualization
<b>INMCLE0313</b>	<b>Caught an Exception while creating Default HTTP Authentication for the Virtual Service.</b>
<b>Explanation</b>	This is an internal error. It is probably because of an invalid policy instance.
<b>Action</b>	Verify the policy instance.
<b>INMCLE0314</b>	<b>Unable to create/edit the selected {0}.</b>
<b>Explanation</b>	You cannot create the {0} {1}, because you do not have the required permission to create/edit the {0}.
<b>Action</b>	Verify that you have the required permission to create/edit the {0}. Contact your administrator, request permission if necessary and try again.
<b>INMCLE0315</b>	<b>Unable to modify the selected group {0}</b>
<b>Explanation</b>	Since the group you are trying to modify is associated with an external repository, you will not be able to modify the external group.
<b>Action</b>	Ensure that the group that you are trying to modify is not an external group.
<b>INMCLE0316</b>	<b>Unable to remove the selected role</b>
<b>Explanation</b>	The logged in user and the user for whom roles are attempted to be removed are the same. This is not allowed.
<b>Action</b>	Please make sure that you are not trying to remove roles assigned to you. It can only be done by the CentraSite Administrator or your Organization Administrator.
<b>INMCLE0317</b>	<b>Failed to find the alias which exists with the given name {0}</b>
<b>Explanation</b>	An exception occurred while trying to find the asset which already exists with the given name {0}.
<b>Action</b>	Please make sure the given asset name does not have any special characters.

<b>INMCLE0319</b>	<b>Email address already registered in CentraSite</b>
<b>Explanation</b>	This email address is already registered to a user in CentraSite.
<b>Action</b>	Enter a different email address.
<b>INMCLE0320</b>	<b>Please wait while we process your registration.</b>
<b>Explanation</b>	User registration with the given email address is being processed by the administrator.
<b>Action</b>	Please wait while we process your registration.
<b>INMCLE0321</b>	<b>Configure parameters for the New Account Registration policy</b>
<b>Explanation</b>	The parameters required for the New Account Registration Policy are missing.
<b>Action</b>	Configure parameters (such as, Approver Group, Approval Mode) for the New Account Registration policy.
<b>INMCLE0322</b>	<b>Failed to publish the asset</b>
<b>Explanation</b>	Unable to publish the asset; possibly because of an incorrect attribute.
<b>Action</b>	Check to make sure that the specified input parameters are correct.
<b>INMCLE0323</b>	<b>Failed to get the publish progress</b>
<b>Explanation</b>	An exception occurred while getting the publish progress information.
<b>Action</b>	Please make sure that the request end point, request and header parameters are correct.
<b>INMCLE0324</b>	<b>Failed to get the publish failed targets</b>
<b>Explanation</b>	An exception occurred while getting the deployment failed targets information.
<b>Action</b>	Please make sure that the request end point, request and header parameters are correct
<b>INMCLE0325</b>	<b>Failed to cancel publish operation</b>
<b>Explanation</b>	An exception occurred while canceling the publish operation.
<b>Action</b>	Please make sure that the request end point, request and header parameters are correct.
<b>INMCLE0326</b>	<b>Privileged user credentials are not configured.</b>
<b>Explanation</b>	The expected privileged user credentials are not configured in {0}.
<b>Action</b>	Check to make sure that the privilege user credentials are configured in {0}.

<b>INMCLE0327</b>	<b>Required roles to perform the publish are missing</b>
<b>Explanation</b>	One or more roles that are required to perform the publish are missing.
<b>Action</b>	Please contact the administrator to add roles required to perform the publish.
<b>INMCLE0328</b>	<b>Aliases or Targets input is empty</b>
<b>Explanation</b>	The publish request does not contains aliases or tagets information.
<b>Action</b>	Please make the you have provided the aliases and targets required to perform the publish operation.
<b>INMCLE0329</b>	<b>You do not have sufficient permissions to execute {0}.</b>
<b>Explanation</b>	You do not have sufficient permissions to execute {0}.
<b>Action</b>	Verify that you have the "Manage Organizations" permission. Contact your administrator and request permission if necessary and then try again.
<b>INMCLE0330</b>	<b>Unauthorized: Access is denied.</b>
<b>Explanation</b>	Access to the service is denied possibly because of insufficient permissions.
<b>Action</b>	Check to make sure that you have the required permissions for accessing the service.
<b>INMCLE0331</b>	<b>Forbidden: Access is denied.</b>
<b>Explanation</b>	Request is forbidden at the moment; possibly because the API key is pending for a renewal request.
<b>Action</b>	Kindly retry after sometime.
<b>INMCLE0332</b>	<b>Required policies to execute the API key renewal and/or revocation are not found.</b>
<b>Explanation</b>	Could not process the renewal and/or revocation requests for the API key; possibly because the requiried policies are not found.
<b>Action</b>	Check to make sure that the API key settings are configured for renewal and/or reovcation. If the problem persists, contact your system administrator.
<b>INMCLE0333</b>	<b>The Message Flow stage {0} that includes the action {1} must include at least one of the following dependent actions: Require Signing, Require Encryption, Require SLL, Require WSS X.509 Token.</b>
<b>Explanation</b>	This action {1} depends on the following actions: Require Signing, Require Encryption, Require SLL, Require WSS X.509 Token.
<b>Action</b>	Choose at least one of the dependent actions for {1}.

<b>INMCLE0339</b>	<b>The Message Flow stage {0} that includes the action {1} must also include {2} of the following dependent action(s): {3}.</b>
<b>Explanation</b>	This action {1} mandate that at least one of the dependent actions {3} be included in the message flow.
<b>Action</b>	Choose at least one of the dependent actions for {1}.
<b>INMCLE0340</b>	<b>Required field is missing</b>
<b>Explanation</b>	Required field {0} for the policy action {1} cannot be empty.
<b>Action</b>	Enter a value for the required field {0}.
<b>INMCLE0341</b>	<b>No action is defined for policy.</b>
<b>Explanation</b>	The Message Flow area in the indicated policy does not contain any actions.
<b>Action</b>	Add one or more actions to the Message Flow area in the indicated policy.
<b>INMCLE0342</b>	<b>Value set of Message Flow is null.</b>
<b>Explanation</b>	Value returned by Message Flow is null.
<b>Action</b>	Set a value for the Message Flow.
<b>INMCLE0343</b>	<b>{0} attribute not valid.</b>
<b>Explanation</b>	The specified attribute {0} is not a valid policy constraint.
<b>Action</b>	Specify a valid attribute.
<b>INMCLE0344</b>	<b>One or more dependent actions or action parameters are not configured.</b>
<b>Explanation</b>	There are no dependent actions or action parameters configured for the Message Flow.
<b>Action</b>	Configure the dependent actions and action parameters in the Message Flow area.
<b>INMCLE0345</b>	<b>Failed to change lifecycle state of {0}.</b>
<b>Explanation</b>	Could not change lifecycle state of this {0}, possibly because it has been implicitly locked by the server for an ongoing modification.
<b>Action</b>	Please try after some time.

<b>INMCLE0346</b>	<b>Failed to change lifecycle state of {0}.</b>
<b>Explanation</b>	Could not change lifecycle of this {0}, possibly because you do not have the required permissions.
<b>Action</b>	Check to make sure that you have the required permissions to change state of this{0}.
<b>INMCLE0347</b>	<b>Failed to delete {0}.</b>
<b>Explanation</b>	Could not delete this {0}, possibly because you do not have the required permissions.
<b>Action</b>	Check to make sure that you have the required permissions to delete this {0}.
<b>INMCLE0348</b>	<b>Failed to delete {0}.</b>
<b>Explanation</b>	Could not delete this {0}, possibly because it has been implicitly locked by the server for an ongoing modification.
<b>Action</b>	Please try after some time.
<b>INMCLE0349Error</b>	<b>CentraSite could not create the runtime alias. {0}</b>
<b>Explanation</b>	Error while creating a runtime alias in CentraSite.
<b>Action</b>	Check if a runtime alias with the same name already exists and if the parameters specified for the runtime alias are correct.
<b>INMCLE0350Error</b>	<b>CentraSite failed to publish the runtime alias to targets. {0}</b>
<b>Explanation</b>	Error while publishing runtime alias from CentraSite to target(s).
<b>Action</b>	Check the log file for more information.
<b>INMCLE0351</b>	<b>{0} action failed because the required objects {1} are not set.</b>
<b>Explanation</b>	Action {0} requires that the objects be set before it can execute.
<b>Action</b>	Ensure that the required objects {1} are set accordingly for the action.
<b>INMCLE0352</b>	<b>You must select valid objects for publishing/unpublishing to/from API Portals.</b>
<b>Explanation</b>	One or more of the selected registry objects cannot be published/unpublished to/from the specified API Portals. This is possibly because, one or more of the selected objects does not belong to the asset type "Service" or its variants.
<b>Action</b>	Make sure that the objects selected for publishing/unpublishing are of the asset type "Service" or any of its variants.

<b>INMCLE0353</b>	<b>{0} ERROR: Could not publish/unpublish APIs to API Portals.</b>
<b>Explanation</b>	An error {0} occurred while trying to publish/unpublish APIs to/from API Portals, possibly because one or more of the API Portal servers were unavailable.
<b>Action</b>	Make sure the API Portal servers are up and running. If the problem persists, contact your administrator.
<b>INMCLE0354</b>	<b>Category {0} does not belong to the taxonomy "Sandbox".</b>
<b>Explanation</b>	An attempt was made to classify an endpoint with the taxonomy "Sandbox", but the specified category {0} does not exist in the taxonomy "Sandbox".
<b>Action</b>	Make sure the category exists in the taxonomy "Sandbox".
<b>INMCLE0355</b>	<b>Failed to publish asset {0} to target.</b>
<b>Explanation</b>	Could not publish the specified asset {0} to the target, possibly because the specified asset is under the control of a lifecycle model (LCM), and is in a non-deployable state.
<b>Action</b>	Make sure you switch the asset to an active, ready-to-deploy state, before trying to publish asset to the target.
<b>INMCLE0356Error</b>	<b>Error while deploying runtime aliases. {0}</b>
<b>Explanation</b>	CentraSite could not deploy runtime aliases.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0357Error</b>	<b>Error while undeploying runtime aliases. {0}</b>
<b>Explanation</b>	CentraSite cannot undeploy runtime aliases.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0358</b>	<b>Could not get information from API Portal {0}, because of invalid user credentials.</b>
<b>Explanation</b>	An error occurred while getting an information from the specified API Portal {0}, possibly because of invalid username and/or password.
<b>Action</b>	Enter a valid username and/or password, and then try again.
<b>INMCLE0359</b>	<b>Could not get information from API Portal {0}.</b>
<b>Explanation</b>	An error occurred while getting an information from the specified API Portal {0}. There could be multiple reasons why this might have occurred: (1) API Portal server is down or inaccessible (2) invalid user credentials (3) application error on the CentraSite or API Portal server.
<b>Action</b>	Make sure the API Portal server is up and running, and the user credentials are correct.

<b>INMCLE0360</b>	<b>The API is published successfully but cannot be associated with API Portal.</b>
<b>Explanation</b>	The API was successfully published to the API Portal server, but could not be associated with it. This could be caused by an application error.
<b>Action</b>	Make sure the API Portal server is up and running. If the problem persists, contact your administrator.
<b>INMCLE0361</b>	<b>The API is unpublished successfully, but existing association with API Portal cannot be revoked.</b>
<b>Explanation</b>	The API was successfully unpublished from the API Portal server, but its existing association with API Portal could not be revoked. This could be caused by an application error.
<b>Action</b>	Make sure the API Portal server is up and running. If the problem persists, contact your administrator.
<b>INMCLE0362</b>	<b>Could not find API id {0} in the CentraSite registry.</b>
<b>Explanation</b>	An attempt was made to publish or unpublish the specified API which is not found in the CentraSite registry.
<b>Action</b>	Verify the API id is correct. If the API id is correct and the error persists, contact your administrator.
<b>INMCLE0363</b>	<b>Could not find API Portal id {0} in the CentraSite registry.</b>
<b>Explanation</b>	An attempt was made to publish or unpublish an API to the specified API Portal which is not found in the CentraSite registry.
<b>Action</b>	Verify the API Portal id is correct. If the API Portal id is correct and the error persists, contact your administrator.
<b>INMCLE0364</b>	<b>Could not find status id {0} of the publish/unpublish action in the CentraSite registry.</b>
<b>Explanation</b>	The publish or unpublish status could not be determined. The identifier used to get the status of the action is no longer valid, possibly because the action has already been completed.
<b>Action</b>	Verify the status id is correct. If the status id is correct and the error persists, contact your administrator.

<b>INMCLE0365</b>	<b>Database access error. Could not connect to the CentraSite Registry Repository.</b>
<b>Explanation</b>	The CentraSite Registry Repository is unavailable.
<b>Action</b>	Restart the Software AG CentraSite Registry Repository and Software AG Runtime. If the problem persists, contact your administrator.
<b>INMCLE0366</b>	<b>One or more of the selected resources have HTTP methods that are not supported for virtualization.</b>
<b>Explanation</b>	Resources with GET, POST, PUT, PATCH and DELETE methods are only allowed for virtualization. The following resource(s) have been found to have unsupported HTTP methods: {0}
<b>Action</b>	Select the resources that have supported HTTP methods.
<b>INMCLE0367</b>	<b>Could not set attribute {0} of the REST/XML service.</b>
<b>Explanation</b>	{1}: An error occurred while trying to set the attribute {0} of the REST/XML service. There could be multiple reasons why this might have occurred: (1) insufficient permissions (2) transaction timeouts (3) trying to modify an outdated service (4) invalid value for the attribute.
<b>Action</b>	Ensure that you have sufficient permissions to modify the service. If the underlying error is a transaction timeout or an outdated service, try setting the attribute again.
<b>INMCLE0368</b>	<b>Could not save the web service "{0}".</b>
<b>Explanation</b>	{1}: An error occurred while trying to save the specified REST/XML service {0}. There could be multiple reasons why this might have occurred: (1) insufficient permissions (2) transaction timeouts (3) trying to modify an outdated service (4) invalid property values for the service (5) a policy denies the save.
<b>Action</b>	Ensure that you have sufficient permissions to modify and save the service. Check for enabled policies denying the save. If the underlying error is a transaction timeout or an outdated service, try saving the service again.
<b>INMCLE0369</b>	<b>Failed to virtualize web service.</b>
<b>Explanation</b>	Could not virtualize the web service, possibly because the specified service doesn't reference any WSDL:binding element.
<b>Action</b>	Make sure that the WSDL contains a binding element.

<b>INMCLE0370</b>	<b>Failed to register CentraSite in the following API Portals: {0}</b>
<b>Explanation</b>	An error occurred while registering CentraSite in the indicated API Portals {0}. There could be multiple reasons why this might have occurred: (1) API Portal server is down or inaccessible (2) invalid user credentials (3) application error on the API Portal server.
<b>Action</b>	Make sure the API Portal server is up and running, and the user credentials are correct.
<b>INMCLE0371</b>	<b>Failed to delete the API {0}.</b>
<b>Explanation</b>	The selected API {0} cannot be deleted, because it is published to one or more API Portals.
<b>Action</b>	To delete the selected API first unpublish it from all the API Portals and then try again.
<b>INMCLE0373</b>	<b>Trying to access a resource {0} in API Portal {1} is forbidden.</b>
<b>Explanation</b>	A HTTP 403 error occurred while trying to access the resource {0} in API Portal {1} , possibly because you do not have sufficient access rights to access the specified resource in API Portal.
<b>Action</b>	Verify that you have the appropriate access rights. Contact your administrator and request access if necessary and then try again.
<b>INMCLE0374</b>	<b>Resource {0} is not found in API Portal {1}.</b>
<b>Explanation</b>	A HTTP 404 error occurred while trying to access the resource {0} in API Portal {1}. There could be multiple reasons why this might have occurred: (1) API Portal server is down or inaccessible (2) invalid resource endpoint.
<b>Action</b>	Make sure the API Portal server is up and running, and the resource endpoint is correct. If the problem persists, contact your administrator.
<b>INMCLE0375</b>	<b>Technical error encountered in API Portal {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	Contact your system administrator with exception stack trace information present in the error log.
<b>INMCLE0376</b>	<b>An error occurred while creating a gateway in CentraSite.</b>
<b>Explanation</b>	One or more gateway configuration parameters are null.
<b>Action</b>	Specify the mandatory gateway parameters, and try again.

<b>INMCLE0377</b>	<b>An error occurred while creating a gateway in CentraSite. {0}</b>
<b>Explanation</b>	An error occurred while creating a gateway in CentraSite. Check the CentraSite logs for details.
<b>Action</b>	Fix the error(s) and retry the "set gateway" command. If the issue persists, contact Software AG support with the log information.
<b>INMCLE0379</b>	<b>Unable to find a gateway in CentraSite with the ID, "{0}".</b>
<b>Explanation</b>	A gateway with the specified identifier does not exist in CentraSite.
<b>Action</b>	Specify a valid gateway ID, and try again.
<b>INMCLE0380</b>	<b>CentraSite cannot retrieve the gateway details because the mandatory attribute, gateway ID is not available.</b>
<b>Explanation</b>	Gateway ID for the gateway is not available in CentraSite.
<b>Action</b>	Check if the gateway ID set in CentraSite is valid.
<b>INMCLE0381</b>	<b>CentraSite could not delete the gateway because the gateway ID is not specified.</b>
<b>Explanation</b>	The mandatory gateway ID parameter is not specified for the "remove gateway" command in CentraSite.
<b>Action</b>	Specify the gateway ID parameter and try and command again.
<b>INMCLE0382</b>	<b>CentraSite could not create/update a gateway because a mandatory attribute for the command is not specified. Attribute not specified: {0}, gateway: {1}</b>
<b>Explanation</b>	A mandatory attribute is not specified for the set gateway command in CentraSite.
<b>Action</b>	Specify the mandatory parameter and try the "set gateway" command again.
<b>INMCLE0383</b>	<b>Error in synchronizing consumers with Mediator gateway.</b>
<b>Explanation</b>	An error occurred while synchronizing consumers with the Mediator gateway. There could be multiple reasons why this might have occurred: (1) Mediator is down or inaccessible. (2) At least one consumer application is not available for synchronizing.
<b>Action</b>	Make sure that Mediator is up and running, and at least one consumer application is available for synchronizing with the gateway.

<b>INMCLE0384</b>	<b>You do not have permission in CentraSite to publish/unpublish the API Portal, {0}.</b>
<b>Explanation</b>	To perform publish/unpublish operation on an API Portal, you must have either API Portal Administrator role or the modify permission on the selected API Portal(s).
<b>Action</b>	Contact the CentraSite administrator to add roles/permissions required to perform the publish or unpublish APIs.
<b>INMCLE0385</b>	<b>Error publishing CentraSite communication details to Mediator.</b>
<b>Explanation</b>	CentraSite cannot publish communication details to Mediator. Possible reasons could be: (1) Mediator is down or inaccessible (2) invalid user credentials or (3) Error in Mediator when you publish information from CentraSite to Mediator.
<b>Action</b>	Check Mediator and CentraSite log files and take corrective actions.
<b>INMCLE0386</b>	<b>Could not publish CentraSite Communication Details to Mediator.</b>
<b>Explanation</b>	An error occurred while trying to publish CentraSite Communication Details to Mediator. There could be multiple reasons why this might have occurred: (1) Integration Server on which Mediator is running is down or inaccessible (2) invalid user credentials (3) application error on the CentraSite server or Integration Server.
<b>Action</b>	Make sure the Integration Server is up and running, and the user credentials are correct. If the problem persists, contact your administrator.
<b>INMCLE0387</b>	<b>Could not deploy 'CentraSite Communication Details' to Mediator due to HTTP connection failure.</b>
<b>Explanation</b>	Failure of HTTP connection between CentraSite and Mediator.
<b>Action</b>	Check if the Mediator credentials and endpoint URL specified are valid and try again.
<b>INMCLE0388</b>	<b>Mediator endpoint URL format is not correct. Format:</b> <PROTOCOL>://<HOSTNAME>:<PORT>or <PROTOCOL>://<HOSTNAME>
<b>Explanation</b>	The Mediator endpoint URL should be specified in one of the following formats:(1) <PROTOCOL>://<HOSTNAME>:<PORT>(2) <PROTOCOL>://<HOSTNAME>
<b>Action</b>	Enter the Mediator endpoint URL in the correct format and try again.
<b>INMCLE0389</b>	<b>Could not unpublish instances of API Portal.</b>
<b>Explanation</b>	An error occurred while unpublishing the selected instances of API Portal. There could be multiple reasons why this might have occurred: (1) API Portal server was down or inaccessible (2) instances of API Portal was successfully unpublished, but its existing association with published APIs and access tokens could not be revoked, possibly because of an application error.
<b>Action</b>	Make sure the API Portal server is up and running. Try unpublishing the selected instances of API Portal using the "Force Unpublish" action. If the problem persists, contact your administrator.

<b>INMCLE0390</b>	<b>Path parameters can only be defined at the Resource level.</b>
<b>Explanation</b>	Path parameters can be defined at the Resource level; but cannot be defined at the API level or Method level.
<b>Action</b>	Specify a path parameter at the Resource level.
<b>INMCLE0391</b>	<b>Error while publishing/un-publishing to/from the gateways selected.</b>
<b>Explanation</b>	You do not have permission to publish/un-publish to/from one or more of the selected gateways.
<b>Action</b>	Check if you have permission to publish/un-publish to/from the selected targets, and try again.
<b>INMCLE0392</b>	<b>Download Documents action failed.</b>
<b>Explanation</b>	An attempt was made to execute the Download Documents action without selecting an asset of the type Service.
<b>Action</b>	Select an asset of the type Service to execute this action.
<b>INMCLE0393</b>	<b>No document(s) to download.</b>
<b>Explanation</b>	Service doesn't have any documents to download.
<b>Action</b>	Ensure there is at least one document to download. Service owner has to first upload documents which can be downloaded later.
<b>INMCLE0394</b>	<b>Organization field cannot be empty.</b>
<b>Explanation</b>	You have not entered the name of the submitting organization when creating an asset in CentraSite.
<b>Action</b>	Enter the organization name.
<b>INMCLE0395</b>	<b>Failed to create an asset because the required specification file is invalid.</b>
<b>Explanation</b>	Could not create an asset, possibly because the given {0} specification file is invalid.
<b>Action</b>	Upload a valid {0} specification file. If the problem persists, contact your administrator.
<b>INMCLE0396</b>	<b>Unable to initialize and load {0} importer implementation.</b>
<b>Explanation</b>	{1}: An error occurred while initializing the {0} importer implementation. There could be multiple reasons why this might have occurred: (1) incorrec importer implementation class is incorrect (2) importer implementation class could not be identified (3) importer implementation class failed to instantiate.
<b>Action</b>	Make sure that the importer implementation and specifications are correct. For more information about importer specifications, see the document Working with REST-based APIs. Contact your administrator if the problem persists.

<b>INMCLE0397</b>	<b>Failed to create an asset of type {0} from the specification type {1}.</b>
<b>Explanation</b>	In CentraSite, certain asset types require a particular type of specification file for creating asset instances of that type. An asset could not be created if the given type of specification file is not supported for that asset type.
<b>Action</b>	For a list of the asset types and their supported specification files, see the document Working with REST-based APIs. Contact your administrator if the problem persists.
<b>INMCLE0398</b>	<b>Could not create or modify {1} asset from the {0} specification file.</b>
<b>Explanation</b>	{2}: An error occurred while trying to import the specification file. There could be multiple reasons why this might have occurred: (1) specification file is invalid (2) data type or specification type is not supported in CentraSite (3) an internal error in saving the asset.
<b>Action</b>	Make sure the specification file is valid. For information on the mappings between the specification file and asset in CentraSite, see the document Working with REST-based APIs. Contact your administrator if the problem persists.
<b>INMCLE0399</b>	<b>Error occurred while importing the archive file: {0}</b>
<b>Explanation</b>	An error occurred while importing the archive file.
<b>Action</b>	Check the stack trace for the cause of the failure and if required, contact your system administrator.
<b>INMCLE0400</b>	<b>{0} ERROR: Could not unpublish APIs from API Portals.</b>
<b>Explanation</b>	An error {0} occurred while trying to unpublish APIs from API Portals, possibly because one or more of the API Portal servers were unavailable.
<b>Action</b>	Make sure the API(s) are already published and API Portal servers are up and running. If the problem persists, contact your administrator.
<b>INMCLE0401</b>	<b>Could not generate access token for API Portal.</b>
<b>Explanation</b>	An attempt was made to request access token through an API Portal, but the specified API Portal UUID {0} does not exist in the CentraSite registry.
<b>Action</b>	Make sure the API Portal UUID exists in the CentraSite registry.
<b>INMCLE0402</b>	<b>Could not generate access token for API Portal user, possibly because the user does not have an E-mail address.</b>
<b>Explanation</b>	A request for the access token triggered by an API Portal user could not be processed, possibly because the specified user does not have an E-mail address.
<b>Action</b>	Enter a valid E-mail address.

<b>INMCLE0403</b>	<b>CentraSite cannot update the gateway. {0}</b>
<b>Explanation</b>	An error occurred while updating a gateway in CentraSite.
<b>Action</b>	Contact your system administrator with exception stack trace information in the CentraSite log.
<b>INMCLE0407</b>	<b>Failed to undeploy the asset {0} on target {1}.</b>
<b>Explanation</b>	Could not undeploy the asset {0} on given target {1}. Possible reason: {2}
<b>Action</b>	Check the stack trace information for details.
<b>INMCLE0409</b>	<b>Could not find user with email address {0}</b>
<b>Explanation</b>	No user with the specified email address was found.
<b>Action</b>	Correct the parameter value of ' __consumerEmailAddress' in the configuration file and try again.
<b>INMCLE0410</b>	<b>Could not find CentraSite object with id {0}</b>
<b>Explanation</b>	A CentraSite object with the specified id was not found.
<b>Action</b>	Correct the CentraSite object id and try again.
<b>INMCLE0411</b>	<b>User is not a CentraSite Administrator.</b>
<b>Explanation</b>	The user does not have necessary permission to perform the service.
<b>Action</b>	Log in with a CentraSite Administrator role.
<b>INMCLE0412</b>	<b>Value for parameter '{0}' is missing.</b>
<b>Explanation</b>	The value for the mandatory parameter {0} is missing.
<b>Action</b>	Provide a value for the mandatory parameter {0}.
<b>INMCLE0413</b>	<b>Failed to remove consumer/s {0} from asset/s {1}. Possible reason for failure: {2}</b>
<b>Explanation</b>	You may encounter an error while trying to remove a consumer from an asset. It could be due to one of the following reasons: (1) Insufficient permissions (2) The consumer is not properly associated (3) The consumed asset is in Pending state (4) Internal error occurred while removing the consumer.
<b>Action</b>	Ensure that you have modify permission on the asset whose consumer or consumed assets you are trying to remove. If it is an internal error, please retry the operation after sometime.

<b>INMCLE0414</b>	<b>API does not have a valid end point.</b>
<b>Explanation</b>	The API to be published to API Portal does not have a valid end point.
<b>Action</b>	Ensure that the API has valid endpoint. If there is an endpoint available, ensure that the endpoint is categorized with the category which is chosen during the API publish. For example, if the API endpoint is categorized as "production" endpoint and the publisher chooses to publish only "Test" endpoint, then technically API has no endpoint to publish.
<b>INMCLE0415</b>	<b>Failed to get applicable usecases for object {0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to get applicable usecases for {0}. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0416</b>	<b>Wrong usage of the Impact Analysis action API {0}.</b>
<b>Explanation</b>	Incorrect usage of the Impact Analysis action API. This problem occurs, when the '{0}' method is triggered with action in a state other than '{1}'.
<b>Action</b>	Before you execute the '{0}' method, verify that the action is in '{1}' state.
<b>INMCLE0417</b>	<b>Could not retrieve the selected usecase.</b>
<b>Explanation</b>	Failed to retrieve the selected usecase, possibly because the report is not implicitly set for retrieval.
<b>Action</b>	Use the 'setSelectedUseCase(..)' to set a report for this action.
<b>INMCLE0418</b>	<b>Failed to execute {0}.</b>
<b>Explanation</b>	You do not have necessary permission to perform this action.
<b>Action</b>	Before executing {0} make sure that you have the permission. Contact your CentraSite administrator and if necessary request access and then try again.
<b>INMCLE0419</b>	<b>CentraSite could not create/update the gateway because a gateway with the gateway name specified in the command already exists.</b>
<b>Explanation</b>	A gateway already exists with the gateway name given in the command.
<b>Action</b>	Modify the gateway name and try the "set gateway" command again.

<b>INMCLE0420</b>	<b>Could not retrieve the parameters of the selected report {0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to retrieve the parameters of the selected report {0}. The cause is not immediately known.
<b>Action</b>	Check the log file for detailed information.
<b>INMCLE0421</b>	<b>Error while fetching action for template-id {0} from enforce-actions.</b>
<b>Explanation</b>	Invalid Template Id found while fetching action for template-id {0} from enforce-actions.
<b>Action</b>	Contact your CentraSite Administrator.
<b>INMCLE0422</b>	<b>Cannot register consumers since there are no consumable types defined for {0} type.</b>
<b>Explanation</b>	You cannot register consumers for this asset since the asset type {0} does not have any consumable types defined for it. Asset instances of the defined consumable types can only be registered as consumers.
<b>Action</b>	Ensure that the type {0} has consumable types defined for it. Refer to the documentation to define consumable types for an asset type.
<b>INMCLE0423</b>	<b>Could not save a scheduled report.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to save a scheduled report. The cause is not immediately known.
<b>Action</b>	Check the log file for detailed information.
<b>INMCLE0424</b>	<b>Invalid parameter name {0}.</b>
<b>Explanation</b>	You have entered an invalid parameter name.
<b>Action</b>	Provide a valid parameter name without special characters and try again.
<b>INMCLE0425</b>	<b>Invalid parameter type {0}.</b>
<b>Explanation</b>	You have entered an invalid parameter type.
<b>Action</b>	Provide a valid parameter type and try again.
<b>INMCLE0426</b>	<b>Failed to delete the asset {0}.</b>
<b>Explanation</b>	The selected asset {0} cannot be deleted because it is consumed by one or more assets.
<b>Action</b>	Make sure you unconsume all consumers from the asset, before trying to delete it.

<b>INMCLE0428</b>	<b>Exception occurred while searching for Gateways.</b>
<b>Explanation</b>	An exception occurred while searching for Gateways.
<b>Action</b>	Contact your System Administrator.
<b>INMCLE0429</b>	<b>Failure in performing resource synchronization for virtual alias {0} during virtualization.</b>
<b>Explanation</b>	An error occurred while performing resource synchronization for the virtual alias {0}. This may be due to improper resource selection during synchronization or an invalid message flow.
<b>Action</b>	Verify the resources that you have selected for synchronization with the native service and verify the message flow for the virtual service.
<b>INMCLE0430</b>	<b>Error while fetching saved search {0}.xml</b>
<b>Explanation</b>	An error occurred because the specified saved search resource cannot be found.
<b>Action</b>	Make sure the specified saved search is available.
<b>INMCLE0431</b>	<b>Invalid Consumer Certificate {0}.</b>
<b>Explanation</b>	The attached consumer certificate is invalid.
<b>Action</b>	Attach a valid consumer certificate and try again.
<b>INMCLE0432</b>	<b>Failed to create an OData service due to unsupported version {0} of OData.</b>
<b>Explanation</b>	Could not create OData service in the CentraSite registry. This is because the specified OData version {0} is not supported in CentraSite.
<b>Action</b>	For a list of supported OData versions, see the CentraSite documentation.
<b>INMCLE0433</b>	<b>Failed to publish CentraSite details to the following Mediators: {0}</b>
<b>Explanation</b>	An error occurred while publishing CentraSite details in the indicated Mediators {0}. There could be multiple reasons why this might have occurred: (1) Mediator server is down or inaccessible (2) invalid user credentials (3) application error on the Mediator server.
<b>Action</b>	Make sure the Mediator server is up and running, and the user credentials are correct.

<b>INMCLE0434</b>	<b>Failed to execute {0}.</b>
<b>Explanation</b>	Could not execute {0}. This is possibly because you do not have the sufficient permissions to execute {0}.
<b>Action</b>	Verify that you have the sufficient permissions. Contact your administrator and request permission if necessary and then try again.
<b>INMCLE0435</b>	<b>Failed to create an OData service due to unexpected metadata at {0}.</b>
<b>Explanation</b>	The metadata of the specified OData service has unexpected content. One or more of the required elements are missing.
<b>Action</b>	Check the metadata of the given OData service.
<b>INMCLE0436</b>	<b>An error occurred while executing an extension enabled for the CentraSite Business UI.\nError Message: {0}</b>
<b>Explanation</b>	A detailed explanation of the error thrown by the extension can be found here. Explanation: {1}
<b>Action</b>	Possible action steps to take: {2} \nIf the information provided by this error message is insufficient, please refer to the logs or contact your Administrator.
<b>INMCLE0437</b>	<b>Failed to check the permissions of the current user.</b>
<b>Explanation</b>	This is an unexpected exception. The cause is not immediately known.
<b>Action</b>	Check the stack trace for detailed information.
<b>INMCLE0438</b>	<b>Error publishing CentraSite communication details to Mediator.</b>
<b>Explanation</b>	CentraSite cannot publish communication details to Mediator version older than 9.8.
<b>Action</b>	Configure a supported version of Mediator.
<b>INMCLE0439</b>	<b>Could not remove API Key configuration because one or more API Key consumers are associated to the virtual service.</b>
<b>Explanation</b>	All API Key consumers associated to the virtual service must be deleted before revoking the API Key option in API Consumption Settings.
<b>Action</b>	Delete all associations between the virtual service and API Key consumers and try again.

<b>INMCLE0440</b>	<b>Could not remove OAuth configuration because one or more OAuth consumers are associated to the virtual service.</b>
<b>Explanation</b>	All OAuth consumers associated to the virtual service must be deleted before revoking the OAuth option in API Consumption Settings.
<b>Action</b>	Delete all associations between the virtual service and OAuth consumers and try again.
<b>INMCLE0441</b>	<b>Failed to initialize an action class.</b>
<b>Explanation</b>	Could not initialize the action class. Check the CentraSite logs for the action class name and for more details.
<b>Action</b>	Check to make sure that the implementation class is correct and follows a specified syntax. Refer to the documentation reference for Action Implementation class.
<b>INMCLE0445</b>	<b>Could not publish CentraSite communication details to {0}.</b>
<b>Explanation</b>	An error occurred while trying to publish the CentraSite communication details to {0}. There could be multiple reasons why this might have occurred: (1) {0} is down or inaccessible (2) invalid user credentials (3) application error in {0}.
<b>Action</b>	Make sure {0} is up and running, user credentials are correct, and then try again.
<b>INMCLE0446</b>	<b>Failed to publish CentraSite communication details to {0}.</b>
<b>Explanation</b>	Could not publish the CentraSite communication details to {0}, possibly because of a HTTP connection failure between CentraSite and {0}.
<b>Action</b>	Make sure the endpoint URL is valid, user credentials are correct, and then try again.
<b>INMCLE0447</b>	<b>{0} endpoint URL is invalid.</b>
<b>Explanation</b>	The specified {0} endpoint URL is invalid, possibly because it does not comply to the following formats:(1) <PROTOCOL>://<HOSTNAME>:<PORT>(2) <PROTOCOL>://<HOSTNAME>
<b>Action</b>	Enter a valid {0} endpoint URL and try again.
<b>INMCLE0448</b>	<b>Failed to publish CentraSite communication details to {0}.</b>
<b>Explanation</b>	Could not publish the CentraSite communication details to {0}, possibly because the SNMP configuration is not accessible.
<b>Action</b>	Please contact your administrator.

<b>INMCLE0449</b>	<b>Failed to register CentraSite in {0}.</b>
<b>Explanation</b>	An error occurred while registering CentraSite in {0}, possibly because {0} is already registered with another instance of CentraSite.
<b>Action</b>	Deregister the existing CentraSite instance from {0}, and then register CentraSite again.
<b>INMCLE0450</b>	<b>Failed to deregister CentraSite from {0}.</b>
<b>Explanation</b>	An error occurred while deregistering CentraSite from {0}. There could be multiple reasons why this might have occurred: (1) {0} is down or inaccessible (2) invalid user credentials (3) application error in {0}.
<b>Action</b>	Make sure {0} is up and running, user credentials are correct, and then try again.
<b>INMCLE0451</b>	<b>Failed to load SNMP configuration file.</b>
<b>Explanation</b>	Could not load the SNMP configuration file, possibly because the configuration file is missing or the file path is incorrect.
<b>Action</b>	Please contact your administrator.
<b>INMCLE0452</b>	<b>Failed to parse SNMP configuration file.</b>
<b>Explanation</b>	Could not parse the SNMP configuration file, possibly because the configuration file structure is not as expected.
<b>Action</b>	Please contact your administrator.
<b>INMCLE0453</b>	<b>Could not update the publish or unpublish status of API Gateway asset.</b>
<b>Explanation</b>	An error occurred while trying to update the publish or unpublish status of API Gateway asset.
<b>Action</b>	Please contact your administrator.
<b>INMCLE0454</b>	<b>Could not update the publish or unpublish status of API Gateway asset.</b>
<b>Explanation</b>	An error occurred while trying to update the publish or unpublish status of API Gateway asset, possibly because the update gateway status call does not have a valid value for the gateway ID.
<b>Action</b>	Please contact your administrator.

<b>INMCLE0455</b>	<b>Could not update the publish or unpublish status of API Gateway asset.</b>
<b>Explanation</b>	An error occurred while trying to update the publish or unpublish status of API Gateway asset, possibly because the update gateway status call does not have a valid value for the status parameter.
<b>Action</b>	Please contact your administrator.
<b>INMCLE0457</b>	<b>Asset type with the namespace URI {0} already exists.</b>
<b>Explanation</b>	An asset type with the given namespace URI {0} already exists.
<b>Action</b>	Change the name of the asset type and try it again.
<b>INMCLE0458</b>	<b>Failed to add a new asset type.</b>
<b>Explanation</b>	Could not add the new asset type.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0459</b>	<b>Failed to get the relationship types.</b>
<b>Explanation</b>	Could not fetch the relationship types.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0460</b>	<b>Failed to get the association types.</b>
<b>Explanation</b>	Could not fetch the association types.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0461</b>	<b>Failed to get the object types.</b>
<b>Explanation</b>	Could not fetch the object types.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0462</b>	<b>Failed to get the consumable types.</b>
<b>Explanation</b>	Could not fetch the consumable types.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0463</b>	<b>Failed to set the consumable types.</b>
<b>Explanation</b>	Could not set the consumable types.
<b>Action</b>	Check the stack trace information in the log file for more information.

---

<b>INMCLE0464</b>	<b>Unable to get the option {0} for asset type {1}.</b>
<b>Explanation</b>	Could not fetch the option {0} for asset type {1}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0465</b>	<b>Unable to update option {0} for asset type {1}.</b>
<b>Explanation</b>	Could not update the option {0} for asset type {1}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0466</b>	<b>Failed to add attribute {0} to asset type {1}.</b>
<b>Explanation</b>	Could not add the attribute {0} to asset type {1}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0467</b>	<b>Failed to modify attribute {0} of asset type {1}.</b>
<b>Explanation</b>	Could not modify the attribute {0} of asset type {1}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0468</b>	<b>Failed to delete attribute {0} from asset type {1}.</b>
<b>Explanation</b>	Could not delete the attribute {0} from asset type {1}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0469</b>	<b>Failed to set the profile sequence for asset type {0}.</b>
<b>Explanation</b>	Could not set the profile sequence for asset type {0}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0470</b>	<b>Failed to get the profiles of asset type {0}.</b>
<b>Explanation</b>	Could not fetch the profiles of asset type {0}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0471</b>	<b>Failed to add profile {0} to asset type {1}.</b>
<b>Explanation</b>	Could not add the profile {0} to asset type {1}.
<b>Action</b>	Check the stack trace information in the log file for more information.

<b>INMCLE0472</b>	<b>Failed to modify profile {0} of asset type {1}.</b>
<b>Explanation</b>	Could not modify the profile {0} of asset type {1}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0473</b>	<b>Failed to delete profile {0} from asset type {1}.</b>
<b>Explanation</b>	Could not delete the profile {0} from asset type {1}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0474</b>	<b>Failed to create a template for computed attribute or profile {0}.</b>
<b>Explanation</b>	Could not create a template for computed attribute or profile {0}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0475</b>	<b>Failed to update the template for computed attribute or profile {0}.</b>
<b>Explanation</b>	Could not update the template for computed attribute or profile {0}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLE0476</b>	<b>Failed to save asset type {0}.</b>
<b>Explanation</b>	An error occurred while trying to save the asset type {0}.
<b>Action</b>	Check the stack trace information in the log file for more information.
<b>INMCLI0001</b>	<b>Parsing failed. Make sure the configuration file syntax (or) path is correct.</b>
<b>Explanation</b>	This is probably because of the following reasons: 1) syntax of the configuration file is invalid 2) specified configuration file path is incorrect.
<b>Action</b>	Check for the above possible reasons and execute again. Refer to the CentraSite documentation for creating a valid configuration file.
<b>INMCLI0002</b>	<b>Internal error.</b>
<b>Explanation</b>	An unexpected error occurred due to failure in the system execution.
<b>Action</b>	Contact the CentraSite administrator.
<b>INMCLI0003</b>	<b>Error while executing command \${0}.</b>
<b>Explanation</b>	Unexpected error occurred while executing the command.
<b>Action</b>	Check the error message for details.

<b>INMCLI0004</b>	<b> \${0} is an invalid log unit; possible values are \${1}.</b>
<b>Explanation</b>	The specified log unit is not supported. Possible values are \${1}.
<b>Action</b>	Refer to the error message for a list of possible values.
<b>INMCLI0006</b>	<b> Purger is unavailable for \${0}.</b>
<b>Explanation</b>	Purger is not available for the specified log unit.
<b>Action</b>	Check to make sure that the log units specified in the XML configuration file are valid. Else, contact the CentraSite administrator.
<b>INMCLI0007</b>	<b> Purging stopped for \${0} as there is no write permission for export location \${1}.</b>
<b>Explanation</b>	Purging stopped for the log unit, possibly because you do not have the explicit permission to write to the export location.
<b>Action</b>	Verify if the user has required permissions for purging to the export location.
<b>INMCLI0008</b>	<b> Insufficient disk space in \${0}. Required space \${1}. Available space \${2}.</b>
<b>Explanation</b>	The specified export location does not contain enough space for the exported logs. Refer to error message for the available space and required space.
<b>Action</b>	Choose a different export location.
<b>INMCLI0009</b>	<b> Purging Failed. Following error occurred \${0}.</b>
<b>Explanation</b>	Purging failed for the log unit due to a network connection timeout.
<b>Action</b>	Try again later or contact CentraSite administrator.
<b>INMCLI0010</b>	<b> Unable to archive export directory \${0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to archive the exported logs. This is probably because the files may be accessed by another application.
<b>Action</b>	Close the application and retry the operation.
<b>INMCLI0011</b>	<b> Unable to create export directory \${0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to create the export directory. This is probably because of the following reasons: 1) you do not have the explicit permission to write to the export location 2) export location is invalid.
<b>Action</b>	Check for the above possible reasons and execute again. If the problem persists, contact the CentraSite administrator.

<b>INMCLI0012</b>	<b>Command \${0} is invalid.</b>
<b>Explanation</b>	The specified command is not supported. For example, to purge logs you must specify -command purge_logs.
<b>Action</b>	Refer to CentraSite documentation for a list of the supported commands and their usage.
<b>INMCLI0016</b>	<b>Attribute {0} does not exist for specified path {1}.</b>
<b>Explanation</b>	The given attribute does not exist for the specified path.
<b>Action</b>	Verify that the attribute and path values are configured properly.
<b>INMCLI0121</b>	<b>Error: Invalid session.</b>
<b>Explanation</b>	CentraSite session has expired (or) already closed.
<b>Action</b>	Close your browser and log in again.
<b>INMCLI0156</b>	<b>Parameters for New Version action can only be set in "Show Params" state. Current state of action is {0}.</b>
<b>Explanation</b>	Parameters for versioning an asset can only be set in "Show Params" state. Current state of the action is {0}.
<b>Action</b>	Refer to the CSOAction related java document.
<b>INMCLI0181</b>	<b>Current search criteria is invalid.</b>
<b>Explanation</b>	The current search criteria is invalid. Validate the search criteria before you run.
<b>Action</b>	Check to make sure that the current search criteria is valid.
<b>INMCLI0239</b>	<b>No list available to perform {0}.</b>
<b>Explanation</b>	List is not available to perform {0}.
<b>Action</b>	Make sure that at least one of the selected items is added to the logged in user's list already.
<b>INMCLI0265</b>	<b>Failed to create the custom activity {0}.</b>
<b>Explanation</b>	The custom activity syntax in the configuration file was invalid.
<b>Action</b>	Check the activity syntax in the configuration file.

<b>INMCLI0334</b>	<b>This action cannot be added to the Message Flow more than {0} time(s).</b>
<b>Explanation</b>	You cannot include this action more than the allowed number of time(s) in the Message Flow.
<b>Action</b>	Do not include this action more than the allowed number of time(s) in the Message Flow.
<b>INMCLI0335</b>	<b>This action cannot co-exist with {0}.</b>
<b>Explanation</b>	This action cannot co-exist with the existing {0} in the Message Flow. This is possibly because, the two actions are mutually exclusive.
<b>Action</b>	Check to make sure that there are no mutually exclusive actions in the Message Flow.
<b>INMCLI0336</b>	<b>{0} of the dependent actions {1} should be configured in the Message Flow.</b>
<b>Explanation</b>	This action mandates that at least one of the dependent actions {1} be included in the Message Flow.
<b>Action</b>	Choose at least one of the dependent actions for {1}.
<b>INMCLI0337</b>	<b>This action cannot be added to the Message Flow more than once.</b>
<b>Explanation</b>	You cannot include this action more than once in the Message Flow.
<b>Action</b>	Do not include this action more than once in the Message Flow.
<b>INMCLI0338</b>	<b>This action is not applicable to the {0} Message Flow stage.</b>
<b>Explanation</b>	You cannot include this action in the {0} Message Flow stage.
<b>Action</b>	Ensure that you include the action in the applicable Message Flow stage.
<b>INMCLI0442</b>	<b>Provide a valid IP address range.</b>
<b>Explanation</b>	You cannot specify only one IP address for a type.
<b>Action</b>	Ensure you have provided both the From and To IP address values.
<b>INMCLW0032</b>	<b>Activity {0} is not applicable for given user.</b>
<b>Explanation</b>	Activity {0} is not applicable for the given user.
<b>Action</b>	Assign the activity to given user.

<b>INMCLW0047</b>	<b>Failed to synchronize configurator items with other configurators.</b>
<b>Explanation</b>	Could not synchronize or update the configurator item changes with other configurators.
<b>Action</b>	Reset the configurator items. If the problem persists, contact the CentraSite administrator.
<b>INMCLW0109</b>	<b>Failed to retrieve guest locale. Instead, returns the default locale {0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to retrieve the locale for logged in user. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact the CentraSite administrator.
<b>INMCLW0110</b>	<b>Exception occurred when closing connection.</b>
<b>Explanation</b>	An unexpected exception occurred when trying to close the underlying connection.
<b>Action</b>	Initialize before opening a connection.
<b>INMCLW0197</b>	<b>Duplicate search condition.</b>
<b>Explanation</b>	An attempt is made to specify a duplicate condition in the search recipe.
<b>Action</b>	Remove the duplicate condition from search recipe.
<b>INMCLW0227</b>	<b>Search name '{0}' already exists.</b>
<b>Explanation</b>	The same name is not allowed for two different searches. This error occurs when an attempt is made to save a search with a name that already exists.
<b>Action</b>	Enter a different search name.
<b>INMCLW0238</b>	<b>Enable at least one notification option in User Preferences.</b>
<b>Explanation</b>	At least one notification options in the User Preferences page should be selected to allow the current user to receive notifications through email and/or Inbox.
<b>Action</b>	Enable at least one notification option in the User Preferences page before subscribing to an asset.
<b>INMCLW0318</b>	<b>Action {0} is not applicable for the message flow step {1}.</b>
<b>Explanation</b>	The chosen action {0} is not applicable for the message flow step {1}.
<b>Action</b>	Choose a valid action for the message flow.

**INMCLW0456**      **The service published to API Gateway could not be activated in API Gateway.**  
**Explanation**      The service published to API Gateway could not be activated in API Gateway. Reason: {0}  
**Action**              Check for reasons and solve the problem in API Gateway.

**INMCL\_COMMON\_ATTR\_PENDING\_APPROVALS – Pending Approvals**

**INMCL\_COMMON\_ATTR\_PENDING\_APPROVALS\_DEC – Pending approvals for the asset**

**INMCL\_USECASE\_ASSETDEPENDENCY – Asset Dependency**

**Explanation**      Displays the list of assets which the selected asset is depending upon.

**INMCL\_USECASE\_ASSETUSAGE – Asset Usage**

**Explanation**      Displays the list of assets which make use of the selected asset.

**INMCL\_USECASE\_ASSET\_VERSIONING\_AND\_CONSUMERS – Asset Versioning And Consumers**

**Explanation**      Displays the different versions of the selected asset and the consumers for each of the versions.

**INMCL\_USECASE\_DEPLOYMENT – Deployment Overview**

**Explanation**      Displays the list of gateways to which the selected asset is deployed.

**INMCL\_USECASE\_ORG Organization Structure**

**Explanation**      Displays the list of organizations and their related objects.

**INMCL\_USECASE\_RUNTIMELANDSCAPEVIEW – Runtime Landscape View**

**Explanation**      Displays the list of gateways and the assets deployed to them.

**INMCL\_USER\_ATTR\_AVATAR\_URL\_DESC – The WebDAV URL of the Avatar for the User**

**INMCL\_USER\_ATTR\_AVATAR\_URL\_NAME – Avatar URL Location**

**INMCL\_USER\_ATTR\_EMAIL\_DESC – The email address for the user**

**INMCL\_USER\_ATTR\_EMAIL\_NAME – Email Address**

**INMCL\_USER\_ATTR\_FIRSTNAME\_DESC – The details of the user's first name**

**INMCL\_USER\_ATTR\_FIRSTNAME\_NAME – First Name**

**INMCL\_USER\_ATTR\_LASTNAME\_DESC – The details of the user's last name**

**INMCL\_USER\_ATTR\_LASTNAME\_NAME – Last Name**

**INMCL\_USER\_ATTR\_PHONE\_DESC – The user's telephone number details**

**INMCL\_USER\_ATTR\_PHONE\_NAME – Telephone Number**

**INMCSE0006      Select a taxonomy to delete**  
**Explanation**      Attempting to execute the delete action without selecting a taxonomy.  
**Action**              Select a taxonomy to be deleted.

**INMCSE0007      Select JPG, GIF or PNG image format**  
**Explanation**      Adding files other than JPG, GIF or PNG formats into a taxonomy or concept object.  
**Action**              Add only files with JPG, GIF or PNG formats into a taxonomy or concept object.

**INMCSE0008      The given URL is not a proper WebDAV URL.**  
**Explanation**      Wrong WebDAV URL or resource added into the taxonomy.  
**Action**              Enter a correct WebDAV URL or resource.

<b>INMCSE0011</b>	<b>Select at least one user</b>
<b>Explanation</b>	At least one user should be selected.
<b>Action</b>	Select at least one user.
<b>INMCSE0012</b>	<b>Select at least one permission</b>
<b>Explanation</b>	At least one permission should be selected.
<b>Action</b>	Select at least one permission.
<b>INMCSE0013</b>	<b>Select an organization to delete</b>
<b>Explanation</b>	An attempt was made to delete an organization without selecting an organization object.
<b>Action</b>	Select an organization object to delete.
<b>INMCSE0014</b>	<b>Select the property to delete</b>
<b>Explanation</b>	An attempt was made to delete a property without selecting a property.
<b>Action</b>	Select the property to delete.
<b>INMCSE0015</b>	<b>Select at least one administrator</b>
<b>Explanation</b>	At least one administrator should be selected.
<b>Action</b>	Select at least one administrator.
<b>INMCSE0018</b>	<b>Organization {0} already exists</b>
<b>Explanation</b>	The same name is not allowed for two different organizations. This error occurs when an attempt is made to create an organization with a name that already exists.
<b>Action</b>	Enter a different organization name.
<b>INMCSE0019</b>	<b>Select a user to delete</b>
<b>Explanation</b>	An attempt was made to delete a user without selecting the user object.
<b>Action</b>	Select the user object to delete.
<b>INMCSE0020</b>	<b>Enter a valid user</b>
<b>Explanation</b>	A valid user is required.
<b>Action</b>	Enter a valid user.

<b>INMCSE0033</b>	<b>Enter the mandatory fields</b>
<b>Explanation</b>	Some mandatory fields were not entered.
<b>Action</b>	Enter the mandatory fields.
<b>INMCSE0038</b>	<b>Enter a valid user</b>
<b>Explanation</b>	A valid user has not been entered.
<b>Action</b>	Enter a valid user.
<b>INMCSE0042</b>	<b>Select permission to remove</b>
<b>Explanation</b>	At least one permission should be selected.
<b>Action</b>	Select at least one permission.
<b>INMCSE0044</b>	<b>E-mail address is not valid</b>
<b>Explanation</b>	An invalid E-mail address has been specified.
<b>Action</b>	Enter a valid E-mail address.
<b>INMCSE0045</b>	<b>Check the length of the contact input</b>
<b>Explanation</b>	The length of the contact input exceeds the limit.
<b>Action</b>	Check the length of the contact input.
<b>INMCSE0046</b>	<b>Enter valid contact input</b>
<b>Explanation</b>	A wrong value was entered in the contact input.
<b>Action</b>	Enter valid contact input.
<b>INMCSE0047</b>	<b>First name should not be empty</b>
<b>Explanation</b>	An empty first name was entered.
<b>Action</b>	Enter a value for the first name.
<b>INMCSE0051</b>	<b>A request with status 'Pending' can't be deleted.</b>
<b>Explanation</b>	It is not possible to perform an unregister if a selected request has 'InProgress' as its status.
<b>Action</b>	Ensure that none of the selected requests has the status 'InProgress'.

<b>INMCSE0052</b>	<b>Enter valid IP values</b>
<b>Explanation</b>	Valid IP values are required.
<b>Action</b>	Enter valid IP values.
<b>INMCSE0062</b>	<b>{0} is the current logged in user</b>
<b>Explanation</b>	An attempt was made to delete the logged in user.
<b>Action</b>	Ensure that selected user is not the current logged in user.
<b>INMCSE0063</b>	<b>{0} is the primary contact of {1}</b>
<b>Explanation</b>	The logged in user tried to delete the primary contact of an organization.
<b>Action</b>	Ensure that the selected user-{0} is not the primary contact of an organization-{1}.
<b>INMCSE0064</b>	<b>{0} is the CentraSite Administrator</b>
<b>Explanation</b>	The logged in user tried to delete the user who is the CentraSite Administrator.
<b>Action</b>	Ensure that the selected user to delete is not the CentraSite Administrator.
<b>INMCSE0068</b>	<b>Group {0} already exists in this organization</b>
<b>Explanation</b>	An attempt was made to create a group with the same name as an existing group in the same organization.
<b>Action</b>	Use a new group name which is not already in use in the organization.
<b>INMCSE0074</b>	<b>At least one {0} should be present</b>
<b>Explanation</b>	When there is only one user with the role CentraSite Administrator or Organization Administrator, and if that user is deleted, this error will be thrown.
<b>Action</b>	There should be at least one CentraSite Administrator or Organization Administrator user. Make sure that another user with the same role is available in CentraSite.
<b>INMCSE0075</b>	<b>Database access error. Can't connect to server CentraSite.</b>
<b>Explanation</b>	The CentraSite Server is not running.
<b>Action</b>	Start the CentraSite Server.

<b>INMCSE0076</b>	<b>There are no results matching your search criteria</b>
<b>Explanation</b>	No results were found that match the search criteria.
<b>Action</b>	No action required.
<b>INMCSE0077</b>	<b>The WSDL file is unreachable. Make sure the input information is correct.</b>
<b>Explanation</b>	The URL for the given WSDL is wrong.
<b>Action</b>	Verify the URL given for this WSDL file.
<b>INMCSE0084</b>	<b>{0} has child organization(s) and cannot be deleted.</b>
<b>Explanation</b>	An organization cannot be deleted if there is at least one child organization associated to it.
<b>Action</b>	Make sure that the parent organization is not associated with any child organization, and then the parent organization can be deleted.
<b>INMCSE0085</b>	<b>Select an attribute to move</b>
<b>Explanation</b>	If a user tries to re-order the attribute without selecting anything, this error will be thrown. For this the user has to first select any attribute and then do the re-ordering.
<b>Action</b>	Select an attribute to move.
<b>INMCSE0086</b>	<b>Reordering multiple attributes is not allowed</b>
<b>Explanation</b>	While assigning attributes to the profile, a user can re-order the attributes. If the user tries to re-order multiple attributes simultaneously, this error will be thrown.
<b>Action</b>	Ensure that you do not select multiple attributes for reordering.
<b>INMCSE0087</b>	<b>HTTP Methods cannot be empty</b>
<b>Explanation</b>	HTTP methods for an XML / REST service cannot be empty during import.
<b>Action</b>	Please select any one of the HTTP methods for the XML / REST service.
<b>INMCSE0090</b>	<b>User {0} not found in external user store</b>
<b>Explanation</b>	The synchronization of users can be done only with users who belong to the current default external user store.
<b>Action</b>	Deselect the users who do not belong to the default external user store.

<b>INMCSE0091</b>	<b>Users not found in external user store</b>
<b>Explanation</b>	The sychronization of users can be done only with users who belong to the current default external user store.
<b>Action</b>	Deselect the users who do not belong to the default external user store.
<b>INMCSE0092</b>	<b>No endpoint defined</b>
<b>Explanation</b>	For the namespace to be defined, declare the endpoint of the service.
<b>Action</b>	Provide the endpoint information for the service before giving the namespace.
<b>INMCSE0093</b>	<b>Only CentraSite Administrator can change the ownership</b>
<b>Explanation</b>	Only a CentraSite Administrator can change the ownership or the organization.
<b>Action</b>	If you want to change the ownership or the organization, ensure that you are a CentraSite Administrator.
<b>INMCSI0071</b>	<b>It is not allowed to add multiple associations if Relationship attribute is not multi-value</b>
<b>Explanation</b>	For any single value relationship attribute, multiple value is not possible.
<b>Action</b>	Verify the given value for the single value relationship attribute.
<b>INMCSW0053</b>	<b>Define the primary contact</b>
<b>Explanation</b>	A primary contact is required when creating the organization.
<b>Action</b>	Define the primary contact.
<b>INMCSW0060</b>	<b>{0} cannot be deleted</b>
<b>Explanation</b>	You can only delete an organization if you have the necessary permissions.
<b>Action</b>	Ensure that you have the necessary permissions to delete an organization.
<b>INMCSW0061</b>	<b>Default organization cannot be deleted</b>
<b>Explanation</b>	The default organization cannot be deleted by any user.
<b>Action</b>	It is not possible to delete the default organization.

<b>INMEUE0001</b>	<b>A connection with the same name already exists.</b>
<b>Explanation</b>	A CentraSite connection name should be unique.
<b>Action</b>	Enter another connection name.
<b>INMEUE0002</b>	<b>Could not connect to host.</b>
<b>Explanation</b>	The specified host could not be connected. But the connection can be saved in the workspace.
<b>Action</b>	Enter a reachable host name.
<b>INMEUE0003</b>	<b>Could not resolve host address.</b>
<b>Explanation</b>	The specified host could not be reached. But the connection can be saved in the workspace.
<b>Action</b>	Enter a reachable host name.
<b>INMEUE0004</b>	<b>Log on failed. Make sure your user name and password are correct.</b>
<b>Explanation</b>	A logon failed due to invalid credentials.
<b>Action</b>	Make sure your user name and password are correct.
<b>INMEUE0005</b>	<b>Connection Name should not be empty</b>
<b>Explanation</b>	The required name for the connection is missing.
<b>Action</b>	Enter a name for the connection.
<b>INMEUE0006</b>	<b>An error has occurred. See error log for more details.</b>
<b>Explanation</b>	An internal error has been occurred. Refer to the log files for more details.
<b>Action</b>	Refer to the log files for more details.
<b>INMEUE0007</b>	<b>Cannot connect to server. Verify the specified connection information!\nMaybe the application server or the registry is currently not available.</b>
<b>Explanation</b>	Maybe the application server or the registry is currently not available.
<b>Action</b>	Check whether the application server and CentraSite are available and accessible.

<b>INMEUE0008</b>	<b>Cannot initialize predicate editors.</b>
<b>Explanation</b>	Due to non-compliance with the Eclipse UI, the UI rendering failed.
<b>Action</b>	Check your implementation and make sure it handles the predicate properly.
<b>INMEUE0009</b>	<b>No editor found for predicate class {0}</b>
<b>Explanation</b>	No editors are associated with the predicate.
<b>Action</b>	Check whether the implementation of IPredicateEditor is associated in your plugin description.
<b>INMEUE0010</b>	<b>Profile already exists</b>
<b>Explanation</b>	The specified profile already exists with the asset type.
<b>Action</b>	Create another profile if required.
<b>INMEUE0011</b>	<b>Attribute already exists</b>
<b>Explanation</b>	An attribute with the same name already exists.
<b>Action</b>	Enter another name for the attribute if required.
<b>INMEUE0012</b>	<b>You cannot modify this predicate. Delete it and create a new one instead.</b>
<b>Explanation</b>	Predefined profiles are not modifiable.
<b>Action</b>	Delete it and/or create a new one instead.
<b>INMEUE0013</b>	<b>Could not save. Correct the input errors first!</b>
<b>Explanation</b>	The input value is not compatible with the selected type.
<b>Action</b>	Enter an input value that is compatible with the selected type.
<b>INMEUE0014</b>	<b>The object cannot be deleted because it still has incoming associations.</b>
<b>Explanation</b>	An object with incoming/outgoing association cannot be deleted.
<b>Action</b>	If you want to delete this object, first delete the associations.
<b>INMEUE0015</b>	<b>{0} cannot be renamed as it is the target of one or more ExternalLink objects.</b>
<b>Explanation</b>	If this object is the target of any ExternalLink object, the name cannot be modified.
<b>Action</b>	No action required.

<b>INMEUE0016</b>	<b>{0} cannot be deleted as it is the target of one or more ExternalLink objects.</b>
<b>Explanation</b>	If this object is the target of any ExternalLink object, the object cannot be deleted.
<b>Action</b>	No action required.
<b>INMEUI0001</b>	<b>You do not have the required authority.</b>
<b>Explanation</b>	The permission required to do this operation has not been granted.
<b>Action</b>	Contact the CentraSite administrator to get sufficient permission to do this operation if required.
<b>INMFEE0011</b>	<b>Error occurred while trying to publish UDDI object(s) : {0}</b>
<b>Explanation</b>	While trying to publish UDDI object(s), if the program encounters any errors, it displays this message. {0} - The Disposition Report Fault Message exception.
<b>Action</b>	Ensure that the object in question is valid and any dependency required by the object is already federated to the target registry. For example, key generators specific to the source registry might not be recognized by the target.
<b>INMFEE0012</b>	<b>Cannot find the taxonomy object : {0}, {1}</b>
<b>Explanation</b>	The taxonomy processor is looking for the taxonomy object in the target registry and cannot find it. {0} - Object name {1} - Object key
<b>Action</b>	This error occurs very rarely. So make sure that a connection to the target registry can be obtained and re-execute the program.
<b>INMFEE0013</b>	<b>Concept publish failed</b>
<b>Explanation</b>	If you are using the taxonomy processor, then it will attempt to publish concepts and classification schemes to the target registry. If not all the concepts can be published, then this error occurs.
<b>Action</b>	Make sure that the concepts have valid values and try to re-execute the program.
<b>INMFEE0014</b>	<b>The TModel for the key {0} is not available in the federated data.</b>
<b>Explanation</b>	This message is displayed by the taxonomy processor. While trying to federate the data, if a particular TModel is identified as a taxonomy, then it looks for the TModel in the federated data. If the data is not available, then this error occurs. {0} - TModel key
<b>Action</b>	Provide the TModel name for federation in the configuration file and re-execute the program.

<b>INMFEE0018</b>	<b>The given default Business Entity name "{0}" is not available in the target registry.</b>
<b>Explanation</b>	In the configuration file, you will provide a default business entity name for the target, so that services can be associated with this business. If this business entity name does not have any businesses in the target registry, then this error occurs. {0} Business entity name.
<b>Action</b>	Provide the right business entity name after ensuring that it exists in the target registry.
<b>INMFEE0022</b>	<b>The {0} registry details are not configured properly</b>
<b>Explanation</b>	The federation takes the data specification from the provided configuration file. If the {0} registry details are not configured in the configuration file, you will get this error. {0} source / target.
<b>Action</b>	Make sure the {0} registry details are provided with the proper syntax in the configuration file. To get more details, please refer to the product documentation.
<b>INMFEE0023</b>	<b>The provided configFile is not configured properly.</b>
<b>Explanation</b>	The configuration file provided does not have the required elements eventTypeStoreLoc and nervAssetsLoc. These elements should be present in the configFile.
<b>Action</b>	Ensure that these two elements are provided in the configuration XML file. Also ensure that you provide a valid path.
<b>INMFEE0026</b>	<b>Cannot obtain OSGi instance for federation process.</b>
<b>Explanation</b>	The OSGi instance is required to emit events across the event bus for federation. It could be that the OSGi container initialization is aborted.
<b>Action</b>	Restart your default OSGi container. Wait until the OSGi container is initialized before you begin the federation process.
<b>INMFEI0001</b>	<b>No data available for federation. Terminating program execution.</b>
<b>Explanation</b>	The configuration file specifies the data that has to be inquired from the source registry. If the result of the inquiry does not have any data, then the federation cannot proceed and the program will terminate.
<b>Action</b>	Make sure that the configuration file specifies the correct data that is needed for federation.

<b>INMFEI0002</b>	<b>Results of inquiring the source registry :</b>
<b>Explanation</b>	CentraSite is currently inquiring the source registry and will display the results of the inquiry.
<b>Action</b>	No action required.
<b>INMFEI0003</b>	<b>Obtained number of {0} : {1}</b>
<b>Explanation</b>	This message displays the number of business objects obtained from inquiring the source registry {0} - Business(es) {1} - Number
<b>Action</b>	No action required.
<b>INMFEI0004</b>	<b>Timestamp based update will be performed</b>
<b>Explanation</b>	The federated objects will be compared with the modification timestamp and the update will be performed based on that.
<b>Action</b>	No action required.
<b>INMFEI0005</b>	<b>Timestamp based update will not be performed</b>
<b>Explanation</b>	The federated objects will be published, irrespective of whether the object to be published is the same or modified.
<b>Action</b>	No action required.
<b>INMFEI0006</b>	<b>Key generator processor : Modifying the keys to belong to the domain {0}</b>
<b>Explanation</b>	The UDDI keys of the federated objects will go through the key generator processor which will modify the UDDI keys such that they belong to the provided domain {DomainKey} {0} - Domain Key
<b>Action</b>	No action required.
<b>INMFEI0007</b>	<b>The federated data is received as the following event :</b>
<b>Explanation</b>	The Federation framework enables event emission. So the data is federated as events. This message informs that the emitted event is received for publishing to the target registry.
<b>Action</b>	No action required.

<b>INMFEI0008</b>	<b>Time taken for publishing the data : {0} seconds</b>
<b>Explanation</b>	The time taken for publishing the UDDI objects to the target registry is displayed by this message {0} - Time taken.
<b>Action</b>	No action required.
<b>INMFEI0009</b>	<b>The given UDDI object(s) were federated to this target registry.</b>
<b>Explanation</b>	The federation operation has completed and the required UDDI objects were published to this target registry.
<b>Action</b>	No action required.
<b>INMFEI0010</b>	<b>Trying to update/publish {0} : {1}, {2}</b>
<b>Explanation</b>	This message is displayed when an attempt is made to publish a UDDI object. The object can be identified by the object name and the UDDI key which will be displayed in the message. {0} Business / Service / TModel {1} Name of the UDDI object {2} UDDI key.
<b>Action</b>	No action required.
<b>INMFEI0015</b>	<b>Taxonomy processor : Categories (Concepts) and Taxonomies (Classification Schemes) were identified and published to the target registry</b>
<b>Explanation</b>	The taxonomies and categories were identified from the provided data and published to the target registry.
<b>Action</b>	No action required.
<b>INMFEI0016</b>	<b>No {0} were found with the provided UDDIv3 Inquiry API parameters</b>
<b>Explanation</b>	The UDDI object to be inquired should be specified in the configuration file for federation. It is provided as UDDI v3 Inquiry API calls, find_business, find_service, find_tModel. If no UDDI object could be inquired with the provided Inquiry API, then this message is displayed. {0} - Business(es) / Service(s) / TModel(s).
<b>Action</b>	Make sure that the Inquiry API adheres to the UDDI standards and that the inquiry parameters can inquire the data from the registry.
<b>INMFEI0017</b>	<b>UDDI registry configured for {0} with the following properties: user {1}, {2} Authentication.</b>
<b>Explanation</b>	This message is displayed if a connection could be established to the UDDI registry with the provided details. {0} - host {1} - user {2} - AuthToken, Basic
<b>Action</b>	No action required.

<b>INMFIEI0019</b>	<b>The above mentioned {0} is published to the target registry</b>
<b>Explanation</b>	The UDDI object identified by the given name and the UDDI key has been updated/published in the target registry. {0} Business / Service / TModel.
<b>Action</b>	No action required.
<b>INMFIEI0020</b>	<b>Not updating {0} : {1}, {2} in the target registry</b>
<b>Explanation</b>	While the program was performing timestamp based updates in the target registry, the UDDI object identified by the given name and the UDDI key was not updated/published in the target registry because it is already available in the target. {0} - Business, Service, TModel {1} - Name of the UDDI object {2} - UDDI key.
<b>Action</b>	No action required.
<b>INMFIEI0021</b>	<b>Number of {0} received for publishing : {1} , number published : {2}</b>
<b>Explanation</b>	This message displays the number of {0} that were published to the target registry. {0} - Business(es) / Service(s) / TModel(s) {1} - Number of objects received {2} - Number published.
<b>Action</b>	No action required.
<b>INMFIEI0024</b>	<b>The federated data has reached the target : {0}</b>
<b>Explanation</b>	There can be multiple targets configured for federation. This message displays the details of the target which has received the federated data through the federation ID {0}.
<b>Action</b>	No action required.
<b>INMFIEW0025</b>	<b>An error occurred while trying to close a resource - {0}</b>
<b>Explanation</b>	Occasionally an error might be encountered while trying to close open connections, streams, etc. This is just a warning that an error was encountered and can be ignored.
<b>Action</b>	Make sure that the resource in question is not opened and/or modified by another program/application.
<b>INMIEE0001</b>	<b>The call to the registry layer of CentraSite has failed.</b>
<b>Explanation</b>	During export and import, access to the registry layer of CentraSite is required. The call to the registry layer of CentraSite has failed.
<b>Action</b>	Please contact your software supplier.

<b>INMIEE0002</b>	<b>The archive file {0} could not be opened.</b>
<b>Explanation</b>	The archive file is used to store the registry objects for export and import. The access to this archive file has failed.
<b>Action</b>	Please make sure that the archive file name is correct and you have sufficient access rights to access this file.
<b>INMIEE0003</b>	<b>The archive file {0} could not be closed.</b>
<b>Explanation</b>	The archive file is used to store the registry objects for export and import. The closing of this archive file has failed.
<b>Action</b>	Please make sure that the archive file has not been removed meanwhile.
<b>INMIEE0005</b>	<b>The object with name {0}, type {1} and key {2} references another object in the context {3}. The referenced object has the key {4}, but it does not exist in the registry.</b>
<b>Explanation</b>	Referenced object cannot be resolved, neither from the import set nor by existing objects.
<b>Action</b>	Add the referenced object.
<b>INMIEE0006</b>	<b>The registry object cannot be imported, because it is older than the existing registry object.</b>
<b>Explanation</b>	The import of the registry object has been rejected, because the timestamp of the existing registry object is newer than the timestamp of the import registry object. You can set the replace option of the import operation to overwrite the existing registry object with an older import object.
<b>Action</b>	You can set the replace option of the import operation to overwrite the existing registry object with an older import object.
<b>INMIEE0007</b>	<b>The import object refers to the invalid object "{0}" and thus cannot be imported either.</b>
<b>Explanation</b>	The import object refers to the specified invalid object, and thus cannot be imported either.
<b>Action</b>	Check why the referenced object is invalid by analyzing its error message.
<b>INMIEE0013</b>	<b>The object cannot be imported because the embedded object {0} which is embedded in the existing object does not exist and is referenced by object {1}.</b>
<b>Explanation</b>	The existing object contains an embedded object which is not defined in the object to be imported. This embedded object is referenced by another object either directly or through one of its embedded objects.
<b>Action</b>	Please add the missing object and try importing the object.

<b>INMIEE0014</b>	<b>The external link with URI {0} could not be found.</b>
<b>Explanation</b>	Specified resource could not be found. It may have been previously deleted.
<b>Action</b>	No action required.
<b>INMIEE0016</b>	<b>The user has no read/write privilege to access/modify already existing registry objects</b>
<b>Explanation</b>	The user wants to access or write an object for which the user has no privileges.
<b>Action</b>	The action must be performed by a more privileged user.
<b>INMIEE0017</b>	<b>The user has no write privilege to modify existing registry objects</b>
<b>Explanation</b>	The user wants to modify an object for which the user has no modify privileges.
<b>Action</b>	The action must be performed by a more privileged user.
<b>INMIEE0018</b>	<b>The database with the URL {0} cannot be accessed.</b>
<b>Explanation</b>	A connection to the database cannot be established.
<b>Action</b>	Check whether the URL is correct.
<b>INMIEE0019</b>	<b>The connection to database {0} cannot be closed.</b>
<b>Explanation</b>	The database connection has been lost and cannot be closed.
<b>Action</b>	Please contact your software supplier.
<b>INMIEE0021</b>	<b>The registry object could not be deleted.</b>
<b>Explanation</b>	The registry object should have been deleted after the export, but the deletion has failed.
<b>Action</b>	Please contact your software supplier.
<b>INMIEE0022</b>	<b>The lifecycle stage URL of the registry object does not match the URL of the import registry, which is {0}</b>
<b>Explanation</b>	The registry object carries information about valid target registries. This information is called the lifecycle stages of the particular lifecycle state of this registry object. This registry object thus can only be imported into matching target registries.
<b>Action</b>	The registry object can be imported into matching target registries only.

<b>INMIEE0025</b>	<b>The import of a user registry object has failed, because a user with identical name and key {0} already exists.</b>
<b>Explanation</b>	The user registry object already exists.
<b>Action</b>	No action required.
<b>INMIEE0026</b>	<b>The import of a group registry object has failed, because a group with identical name and key {0} already exists.</b>
<b>Explanation</b>	The group registry object already exists.
<b>Action</b>	No action required.
<b>INMIEE0027</b>	<b>The import operation has failed, because the update of the security information has failed, object "{0}" ({1}).</b>
<b>Explanation</b>	The update of the security information has failed.
<b>Action</b>	Please contact your software supplier.
<b>INMIEE0028</b>	<b>The import archive does not have the expected compatibility level of {0}.</b>
<b>Explanation</b>	The import archive must contain a file named MANIFEST.TXT which contains the compatibility level of the import archive. The compatibility level of the import archive must be the same as the compatibility level of the CentraSite version used.
<b>Action</b>	Use the same CentraSite version for exporting and importing.
<b>INMIEE0030</b>	<b>The provided import organization key {0} does not exist in the registry.</b>
<b>Explanation</b>	The lookup of this key in the registry was not successful.
<b>Action</b>	Please provide a valid import organization key.
<b>INMIEE0031</b>	<b>The provided import organization key {0} does not refer to an organization.</b>
<b>Explanation</b>	The provided key exists in the registry, but the referred object is not an organization object.
<b>Action</b>	Please provide a valid import organization key.
<b>INMIEE0032</b>	<b>The setting of the import organization {0} has failed.</b>
<b>Explanation</b>	During import, the setting of the import organization has failed.
<b>Action</b>	Please contact your software supplier.

<b>INMIEE0034</b>	<b>The deletion of the repository resource {0} has failed.</b>
<b>Explanation</b>	The option delete after export has been set and the deletion of a repository resource has failed.
<b>Action</b>	Please contact your software supplier.
<b>INMIEE0035</b>	<b>The query to find all external links with the external URI {0} has failed.</b>
<b>Explanation</b>	The option delete after export has been set and the query to find all external links with the same URI has failed.
<b>Action</b>	Please contact your software supplier.
<b>INMIEE0036</b>	<b>The collection of the registry objects of the policy {0} has failed.</b>
<b>Explanation</b>	The delete after export option is active and the policy is to be deleted after export. The collection of the registry objects belonging to the policy has failed.
<b>Action</b>	Please contact your software supplier.
<b>INMIEE0040</b>	<b>The import of a role registry object has failed, because a role with identical name and key {0} already exists.</b>
<b>Explanation</b>	Role objects cannot be replaced.
<b>Action</b>	Re-establish the organization's roles.
<b>INMIEE0041</b>	<b>The import of a permission registry object has failed, because a permission with identical name and key {0} already exists.</b>
<b>Explanation</b>	Permission objects cannot be replaced.
<b>Action</b>	Re-establish the organization's permission.
<b>INMIEE0044</b>	<b>The user has no privilege to create/update an asset type ({0})</b>
<b>Explanation</b>	The user has not enough permission to create or update an asset type.
<b>Action</b>	Check the roles of the user.
<b>INMIEE0046</b>	<b>The import of the organization with key {0} has failed, because the organization has not been exported with the option to include users, groups, roles and permissions.</b>
<b>Explanation</b>	You can only import an organization together with its users, groups, roles and permissions. However, if the organization already exists, then it is possible to just import an organization without its users, groups, roles and permissions.
<b>Action</b>	Export the organization with the option to include users, groups, roles and permissions.

---

<b>INMIEE0048</b>	<b>Creating/updating of asset type "{0}" failed with internal error: {1}</b>
<b>Explanation</b>	An asset type cannot be imported or updated because of an internal registry problem.
<b>Action</b>	View the internal error reason and the stack trace in the log.
<b>INMIEE0049</b>	<b>Replacement of asset type "{0}" failed due to layout mismatch</b>
<b>Explanation</b>	The asset type cannot be replaced because the layout of the importing type is incompatible with the existing one.
<b>Action</b>	View the stack trace for the details.
<b>INMIEE0050</b>	<b>The asset type "{0}" references another object with key {1}, but it does not exist in the registry.</b>
<b>Explanation</b>	A reference from the asset type to be imported is not in the registry. This is usually a referenced asset type and must be present. Due to internal reasons the import cannot continue.
<b>Action</b>	Check that the referenced object (asset type) is present in the target registry.
<b>INMIEE0055</b>	<b>Asset to be imported does not fit to Asset type definition with attribute mismatch, attribute: {0}</b>
<b>Explanation</b>	The asset does not match the asset type. Possibly the asset has an attribute which is not defined for the given asset type.
<b>Action</b>	Check the asset type for missing attributes. Import the asset type which matches the asset.
<b>INMIEE0057</b>	<b>Selective import not supported with old export archives</b>
<b>Explanation</b>	No selective import is possible, only importing the whole archive is supported.
<b>Action</b>	Do not select particular keys.
<b>INMIEE0061</b>	<b>User {0} not found</b>
<b>Explanation</b>	The requested user name was not found in the registry.
<b>Action</b>	Use a valid user name.
<b>INMIEE0063</b>	<b>The document cannot be imported, because the associated asset type will be rejected</b>
<b>Explanation</b>	The schema file of an asset type cannot be imported because the asset type itself will be rejected for another reason.
<b>Action</b>	Analyze the existing asset type.

<b>INMIEE0064</b>	<b>Replacement of asset type {0} failed due to layout mismatch, reason: {1}</b>
<b>Explanation</b>	The given asset type cannot be replaced because it would change or remove used information, e.g. attributes.
<b>Action</b>	Check the attributes of the existing asset type. There are assets with attributes which would be removed by the import.
<b>INMIEE0066</b>	<b>The document cannot be imported, because its parent was rejected</b>
<b>Explanation</b>	The repository document will not be imported because its parent object (e.g. an ExternalLink object) was rejected.
<b>Action</b>	Check why the parent object was rejected.
<b>INMIEE0067</b>	<b>The object cannot be replaced, because it would lose its attribute {0}, which is referenced within registry by: {1}</b>
<b>Explanation</b>	The given object cannot be replaced, because the object that is already present has an attribute which would disappear as a result of the replacement. This attribute is referenced by others, therefore the attribute must be kept.
<b>Action</b>	Check the existing object and its references.
<b>INMIEE0068</b>	<b>No privilege to update object</b>
<b>Explanation</b>	The user has no privilege to update an object, present in the archive, to the registry. This could happen when updating asset types or taxonomies.
<b>Action</b>	Check if you can import the archive as a user with more privileges.
<b>INMIEE0072</b>	<b>Cannot update asset type because of version mismatch ("{0}" / "{1}")</b>
<b>Explanation</b>	The asset type to be imported has a lower version number than the one in the registry. The type is incompatible to the registry and therefore a replacement would destroy relevant information.
<b>Action</b>	The asset type from a previous version cannot be imported.
<b>INMIEE0074</b>	<b>Insufficient permissions to access CentraSite's webdav for user {0} at resource {1}.</b>
<b>Explanation</b>	The user {0} tries to access the CentraSite webdav resource without insufficient permissions.
<b>Action</b>	Make sure the user has insufficient permissions to access the CentraSite webdav resource.

<b>INMIEE0075</b>	<b>Invalid credentials for promotion user {0}.</b>
<b>Explanation</b>	The promotion user defined in the asset promotion policy does not have the sufficient permissions to access the target CentraSite.
<b>Action</b>	Make sure the user has insufficient permissions to access the target CentraSite.
<b>INMIEI0010</b>	<b>The registry object is not imported, because it has the same timestamp as the existing object.</b>
<b>Explanation</b>	The object to be imported already exists with the same timestamp.
<b>Action</b>	No action required.
<b>INMIEI0011</b>	<b>The imported registry object has replaced the existing object.</b>
<b>Explanation</b>	The registry object to be imported already exists and has been replaced.
<b>Action</b>	No action required.
<b>INMIEI0012</b>	<b>The imported registry object has been created.</b>
<b>Explanation</b>	The registry object to be imported has been created.
<b>Action</b>	No action required.
<b>INMIEI0020</b>	<b>The registry object with key {0} was deleted after it has been exported.</b>
<b>Explanation</b>	The option delete after export has been set and the registry object has been deleted after the export.
<b>Action</b>	Please contact your software supplier.
<b>INMIEI0023</b>	<b>The document cannot be imported, because it is older than the existing document.</b>
<b>Explanation</b>	The import of the document has been rejected, because the timestamp of the existing document is newer than the timestamp of the import document. You can set the replace option of the import operation to overwrite the existing document with an older import document.
<b>Action</b>	You can set the replace option of the import operation to overwrite the existing document with an older import document.
<b>INMIEI0024</b>	<b>The document was not imported, because it has the same timestamp as the existing document.</b>
<b>Explanation</b>	The import document and the existing document have the same timestamp. No import is necessary.
<b>Action</b>	No action required.

<b>INMIEI0033</b>	<b>The repository resource was deleted after it has been exported.</b>
<b>Explanation</b>	The option delete after export has been set and the registry object has been deleted after the export.
<b>Action</b>	No action required.
<b>INMIEI0039</b>	<b>Referenced object not in export set: {0} --&gt; {1}</b>
<b>Explanation</b>	The target object is not in the export set.
<b>Action</b>	Before importing, the referenced (target) objects must be present in the registry.
<b>INMIEI0065</b>	
<b>INMIEI0069</b>	<b>The document cannot be imported because it is already present</b>
<b>Explanation</b>	The document, which contains executable code, is not imported because it is already present.
<b>Action</b>	No action required.
<b>INMIEI0070</b>	<b>The registry object is not imported, because it is already present</b>
<b>Explanation</b>	The object cannot be replaced because the root object was not imported.
<b>Action</b>	No action required.
<b>INMIEW0008</b>	<b>Embedded objects cannot be exported.</b>
<b>Explanation</b>	Embedded objects like Classification, AuditableEvent, ExternalIdentifier, ServiceBinding, SpecificationLink and Association cannot be exported.
<b>Action</b>	Deselect object from list of objects to be exported.
<b>INMIEW0009</b>	<b>Export of selected object does not find any objects to be exported.</b>
<b>Explanation</b>	Export of selected object does not find any objects to be exported.
<b>Action</b>	Remove object from list of objects to be exported.
<b>INMIEW0029</b>	<b>The referenced registry object with key {0} is not part of the export archive.</b>
<b>Explanation</b>	A referenced object is not selected for export. Therefore there might be problems at import.
<b>Action</b>	Check your associated objects and decide whether to add them to the export.

<b>INMIEW0037</b>	<b>Delete of registry objects failed, reason: {0}</b>
<b>Explanation</b>	The deletion of one or more registry objects has failed during the export with delete option. The export archive however is complete.
<b>Action</b>	See the reason for the rejection within the message.
<b>INMIEW0038</b>	<b>The referenced registry object with key {0} is not part of the export archive. It is referenced from object: "{1}"</b>
<b>Explanation</b>	A referenced object is not selected for export. Therefore there might be problems later when you try to import the archive.
<b>Action</b>	Check your associated objects and decide whether to add them to the export.
<b>INMIEW0042</b>	<b>Delete after export of object "{0}" is not supported</b>
<b>Explanation</b>	It is currently not supported to delete specified object with the delete-after-export function.
<b>Action</b>	Delete the object manually.
<b>INMIEW0043</b>	<b>User "{0}" could not be deleted from organization</b>
<b>Explanation</b>	The user cannot be deleted from an organization after import because this user is already in use.
<b>Action</b>	Clean up the user manually with the imported organization.
<b>INMIEW0047</b>	<b>Object {0} modified due to unreferenced association</b>
<b>Explanation</b>	The association to an unreferenced target object was removed from the object.
<b>Action</b>	Check the object and repair it if necessary.
<b>INMIEW0051</b>	<b>Unprivileged reference to key: {0}</b>
<b>Explanation</b>	An exported object has a reference to an object that the user has no privilege to access. This means for import that the referenced object must be present and the importing user must have privileges to access this object.
<b>Action</b>	Keep this situation in mind for a later import.
<b>INMIEW0052</b>	<b>One ore more asset types may be corrupted, key: {0}</b>
<b>Explanation</b>	Due to resolving an access violation situation, it may happen that asset types may be corrupted.
<b>Action</b>	Import the archive as CentraSite Administrator.

<b>INMIEW0053</b>	<b>{0} association to object "{1}" removed</b>
<b>Explanation</b>	The association to the given object has been removed during import because the target object is not present.
<b>Action</b>	Re-establish the removed association if possible.
<b>INMIEW0054</b>	<b>Classification "{0}" removed because of unreferenced category</b>
<b>Explanation</b>	The classification has been removed from the object because its concept is not present in the registry.
<b>Action</b>	Re-establish the classification if possible.
<b>INMIEW0058</b>	<b>External link reference removed from object "{0}"</b>
<b>Explanation</b>	An external link reference which does not exist for the object has been removed.
<b>Action</b>	Check if the external link can be re-inserted manually.
<b>INMIEW0059</b>	<b>Lifecycle state removed because of missing model</b>
<b>Explanation</b>	The object has a lifecycle state at import, however the associated lifecycle model is not present in the target registry.
<b>Action</b>	Import the lifecycle model first.
<b>INMIEW0060</b>	<b>User object cannot be imported because of a missing name, key: {0}</b>
<b>Explanation</b>	The import processing detected an invalid user element and ignored the import.
<b>Action</b>	Verify the user entry in the archive.
<b>INMIEW0062</b>	<b>contains unprivileged reference</b>
<b>Explanation</b>	The object given contains a reference to an object which cannot be exported because the user has no privilege of that object. Only the reference gets exported. At import, this reference is checked and possibly removed from the object if the referenced object is not present.
<b>Action</b>	Check if a more privileged user should export the object.
<b>INMIEW0071</b>	<b>ServiceBinding "{0}" removed because of unreferenced specificationObject</b>
<b>Explanation</b>	A service binding points to a specification object, which is not present in the archive or registry. Therefore the service binding gets removed from the service.
<b>Action</b>	Check the service and its specification objects.

<b>INMIEW0073</b>	<b>Asset type is replaced with a lower version number.</b>
<b>Explanation</b>	An older version of the asset type has been replaced in the registry.
<b>Action</b>	Consider that some values are changed in the type, for example, attributes no longer there.
<b>INMIME0001</b>	<b>ObjectType {0} does not exist.</b>
<b>Explanation</b>	The required object type does not exist in CentraSite.
<b>Action</b>	Make sure the required object type is available in CentraSite and create an instance of it.
<b>INMIME0002</b>	<b>Asset {0} not found.</b>
<b>Explanation</b>	A required asset is not available in CentraSite.
<b>Action</b>	Create the required asset.
<b>INMIME0003</b>	<b>Error while executing JAXR operation.</b>
<b>Explanation</b>	An internal JAXR operation failed.
<b>Action</b>	Retry your request.
<b>INMIME0004</b>	<b>XPDL file {0} not found.</b>
<b>Explanation</b>	An XPDL file does not exist in the location specified.
<b>Action</b>	Make sure the given XPDL file is in the specified location.
<b>INMIME0005</b>	<b>Error while parsing the XPDL file.</b>
<b>Explanation</b>	The XPDL file does not match the XPDL format.
<b>Action</b>	Make sure the given XPDL format is valid.
<b>INMIME0006</b>	<b>Error while connecting to CentraSite.</b>
<b>Explanation</b>	It is not possible to establish a connection to the CentraSite database.
<b>Action</b>	Make sure the CentraSite database URL and CentraSite user credentials are valid.
<b>INMIME0007</b>	<b>Given XPDL File not supported.</b>
<b>Explanation</b>	The given XPDL file is not supported by CentraSite. CentraSite supports only XPDL 2.x.
<b>Action</b>	Make sure the given XPDL version is 2.x.

<b>INMIME0008</b>	<b>Specified process {0} is not available</b>
<b>Explanation</b>	There is no process with the specified asset ID
<b>Action</b>	Check the asset ID provided in the request
<b>INMIME0009</b>	<b>Required id is missing in Pool</b>
<b>Explanation</b>	While parsing the XPDL file, a pool element has been found but the attribute "id" is missing.
<b>Action</b>	Please make sure the specified XPDL file is valid.
<b>INMIME0010</b>	<b>From reference is missing in Transition</b>
<b>Explanation</b>	While parsing the XPDL, a transition element has been found but the "from reference" is missing in the transition element.
<b>Action</b>	Please make sure the "from reference" element contains a proper value.
<b>INMIME0011</b>	<b>To reference is missing in Transition</b>
<b>Explanation</b>	While parsing the XPDL, a transition element has been found but the "to reference" is missing in the transition element.
<b>Action</b>	Please make sure the "to reference" element contains a proper value.
<b>INMIME0012</b>	<b>Id is missing in Transition</b>
<b>Explanation</b>	While parsing the XPDL, a transition element has been found but the "id" is missing in the transition element.
<b>Action</b>	Please make sure "id" is present in the transition element and contains a proper value.
<b>INMIME0013</b>	<b>Id is missing in lane element</b>
<b>Explanation</b>	While parsing the XPDL, a lane element has been found but the "id" is missing in the transition element.
<b>Action</b>	Please make sure the "id" is present in the lane element and contains a proper value.
<b>INMIME0014</b>	<b>Id is missing in activity element</b>
<b>Explanation</b>	While parsing the XPDL, a lane element has been found but the "id" is missing in the activity element.
<b>Action</b>	Please make sure "id" is present in the activity element and contains a proper value.

<b>INMJRE0001</b>	<b>Database access error: {0}</b>
<b>Explanation</b>	An error occurred while accessing the database. The corresponding stack trace contains a "caused by" message with the reason of the failure.
<b>Action</b>	Please contact your software supplier if you can't analyze the reason of the database access error.
<b>INMJRE0002</b>	<b>Expected {0} objects</b>
<b>Explanation</b>	Certain operations that accept a collection of input objects (such as for example <code>LifeCycleManager.saveOrganizations()</code> ) expect certain object types ("Organization" in this example). The affected operation can be found in the stack trace.
<b>Action</b>	Correct the client program.
<b>INMJRE0003</b>	<b>Invalid property name "{0}"</b>
<b>Explanation</b>	The name of a property must be a valid NCName as in XML schema, e.g. it must not contain colon or whitespace.
<b>Action</b>	Correct the name.
<b>INMJRE0004</b>	<b>Invalid object in {0} parameter</b>
<b>Explanation</b>	Certain operations that accept a collection of input objects expect certain object types. The affected operation can be found in the stack trace.
<b>Action</b>	Correct the client program.
<b>INMJRE0005</b>	<b>Mutually exclusive find qualifiers: {0}, {1}</b>
<b>Explanation</b>	The listed find qualifiers are mutually exclusive with respect to the performed operation.
<b>Action</b>	Correct the client program.
<b>INMJRE0006</b>	<b>Found multiple matches</b>
<b>Explanation</b>	The performed query method is supposed to return zero or one result object, however the database contains multiple matches.
<b>Action</b>	Please contact your software supplier.

<b>INMJRE0007</b>	<b>The javax.xml.registry.queryManagerURL property is not set</b>
<b>Explanation</b>	Before creating a new Connection, the javax.xml.registry.queryManagerURL property has to be set to a non-null value.
<b>Action</b>	Correct the client program.
<b>INMJRE0008</b>	<b>The credentials parameter must not be null</b>
<b>Explanation</b>	The setCredentials() method was called with a null value for the credentials parameter.
<b>Action</b>	Correct the client program.
<b>INMJRE0009</b>	<b>Re-connect failed</b>
<b>Explanation</b>	An error occurred while recreating the database connection according to the given credentials. The stack trace contains a "caused by" message with the reason of the failure.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0010</b>	<b>Invalid credentials: expected PasswordAuthentication</b>
<b>Explanation</b>	The credentials have to be passed as an instance of java.net.PasswordAuthentication.
<b>Action</b>	Correct the client program.
<b>INMJRE0011</b>	<b>User name is not unique: {0}, only readonly access granted</b>
<b>Explanation</b>	For each user, there should be only one user object in the database. For the given user however, several objects with the same name were found. When the user tries to log in he is granted readonly access.
<b>Action</b>	Log in using a different user (probably an administrator) and delete or rename the duplicate user objects.
<b>INMJRE0012</b>	<b>The declarative query manager is not supported by this implementation</b>
<b>Explanation</b>	The declarative query manager is not supported by this implementation.
<b>Action</b>	See the documentation for the available query functionality.
<b>INMJRE0013</b>	<b>Invalid interface name parameter: {0}</b>
<b>Explanation</b>	The method LifecycleManager.createObject() was called with an illegal interface name.
<b>Action</b>	Correct the client program.

<b>INMJRE0014</b>	<b>Invalid XML response when saving documents</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0015</b>	<b>The object to be undeprecated ({0}) is not in deprecated state</b>
<b>Explanation</b>	Only deprecated objects may be undeprecated.
<b>Action</b>	Select only deprecated objects for undeprecation.
<b>INMJRE0016</b>	<b>Illegal object type: {0}</b>
<b>Explanation</b>	A delete operation was called with an illegal object type.
<b>Action</b>	Correct the client program.
<b>INMJRE0017</b>	<b>Internal error: object with key "{0}" lost from cache</b>
<b>Explanation</b>	This internal error indicates an inconsistency in the object cache.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0018</b>	<b>Invalid null value in {0} parameter</b>
<b>Explanation</b>	The method QueryManager.getRegistryObjects() was called with a null value.
<b>Action</b>	Correct the client program.
<b>INMJRE0019</b>	<b>The object identified by the ConnectionFactory property {0}="{1}" is not a classification scheme</b>
<b>Explanation</b>	The default postal scheme was not specified correctly.
<b>Action</b>	Specify a correct default postal scheme.
<b>INMJRE0020</b>	<b>This implementation does not support makeRegistrySpecificRequest()</b>
<b>Explanation</b>	This implementation does not support makeRegistrySpecificRequest().
<b>Action</b>	See the documentation for the available query functionality.
<b>INMJRE0021</b>	<b>Invalid schema name "{0}", please consult the documentation for correct syntax</b>
<b>Explanation</b>	The schema name of a type must be a valid NCName as in XML schema, e.g. it must not contain colon or whitespace.
<b>Action</b>	Correct the name.

<b>INMJRE0022</b>	<b>An association cannot have itself as source object</b>
<b>Explanation</b>	An association cannot have itself as source object.
<b>Action</b>	Specify a correct association.
<b>INMJRE0023</b>	<b>An association cannot have itself as target object</b>
<b>Explanation</b>	An association cannot have itself as target object.
<b>Action</b>	Specify a correct association.
<b>INMJRE0024</b>	<b>Association type must not be null</b>
<b>Explanation</b>	When creating a new association the association type must not be null.
<b>Action</b>	Specify a correct association.
<b>INMJRE0025</b>	<b>The object to be deleted is not of type {0}</b>
<b>Explanation</b>	The delete operation specified that only objects of a particular type should be deleted, however at least one of the given keys points to a different object.
<b>Action</b>	Specify only keys of the requested type.
<b>INMJRE0026</b>	<b>An auditable event object cannot be deleted</b>
<b>Explanation</b>	It is not allowed to delete an auditable event.
<b>Action</b>	Correct the client program.
<b>INMJRE0027</b>	<b>Concept must have a classification scheme ancestor</b>
<b>Explanation</b>	The concept used for an internal classification has to belong to a classification scheme.
<b>Action</b>	Supply a correct concept for an internal classification.
<b>INMJRE0028</b>	<b>{0} parameter must not be null</b>
<b>Explanation</b>	The function shown on the call stack must not be called with a null value.
<b>Action</b>	Correct the client program.
<b>INMJRE0029</b>	<b>Concept must not have a parent</b>
<b>Explanation</b>	If a ClassificationScheme is created from a concept, then this concept must not have a parent.
<b>Action</b>	Supply a correct concept.

<b>INMJRE0030</b>	<b>Invalid value type: {0}</b>
<b>Explanation</b>	ClassificationScheme.setValueType() was called with an invalid value type.
<b>Action</b>	Supply a valid value type.
<b>INMJRE0031</b>	<b>The classification scheme to be deleted still has children</b>
<b>Explanation</b>	A classification scheme cannot be deleted if it has child concepts.
<b>Action</b>	Delete the child concepts before deleting the classification scheme.
<b>INMJRE0032</b>	<b>Parent not allowed for concept</b>
<b>Explanation</b>	The parent of a concept has to be a classification scheme or another concept.
<b>Action</b>	Supply a valid parent.
<b>INMJRE0034</b>	<b>The concept to be deleted still has children</b>
<b>Explanation</b>	A concept cannot be deleted if it has child concepts.
<b>Action</b>	Delete the child concepts before deleting the concept.
<b>INMJRE0035</b>	<b>Invalid value for {0} ({1})</b>
<b>Explanation</b>	An internal error occurred during the XML serialization of Java objects.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0036</b>	<b>Invalid string value for {0} ({1})</b>
<b>Explanation</b>	An internal error occurred while deserializing an XML document to a Java object.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0037</b>	<b>The external link to be deleted still has linked objects</b>
<b>Explanation</b>	An external link cannot be deleted if it has linked objects.
<b>Action</b>	Remove the external link from its linked objects before deleting it.
<b>INMJRE0039</b>	<b>Cannot add a non-KeyRef to a KeyRefList</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.

**INMJRE0040      toArray failed with attached JAXRException while resolving an object reference**

**Explanation**      An exception occurred while copying a collection to an array. See the "caused by" message in the stack trace for the cause of the problem.

**Action**              Please contact your software supplier.

**INMJRE0041      RegistryObjectIterator failed with attached JAXRException while resolving an object reference**

**Explanation**      An exception occurred while iterating a query result. See the "caused by" message of the stack trace for the cause of the problem.

**Action**              Please contact your software supplier.

**INMJRE0042      Invalid locale**

**Explanation**      An internal error occurred while deserializing an XML document to a Java object.

**Action**              Please contact your software supplier.

**INMJRE0043      The organization to be deleted still has child organizations**

**Explanation**      An organization cannot be deleted if it has child organizations.

**Action**              Delete the child organizations before deleting the organization.

**INMJRE0044      The organization to be deleted still has services**

**Explanation**      An organization cannot be deleted if it has child services.

**Action**              Remove the services before deleting the organization.

**INMJRE0045      The organization to be deleted still has users**

**Explanation**      An organization cannot be deleted if it has users.

**Action**              Remove the users before deleting the organization.

**INMJRE0046      Invalid stability value: {0}**

**Explanation**      The setStability() method was called with an invalid stability value.

**Action**              Supply a valid stability value.

<b>INMJRE0047</b>	<b>This registry provider does not support client supplied keys</b>
<b>Explanation</b>	This registry provider does not support client supplied keys.
<b>Action</b>	Do not call the setKey() method.
<b>INMJRE0048</b>	<b>Internal error: duplicate key in object cache "{0}"</b>
<b>Explanation</b>	This internal error indicates an inconsistency in the object cache.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0049</b>	<b>Cannot modify object type classification</b>
<b>Explanation</b>	An instance of a user-defined type cannot be assigned another object type classification.
<b>Action</b>	Correct the client program.
<b>INMJRE0050</b>	<b>Duplicate object type classification</b>
<b>Explanation</b>	An instance of a user-defined type can only be classified with one concept from the "ObjectType" classification scheme.
<b>Action</b>	Correct the client program.
<b>INMJRE0051</b>	<b>Cannot remove object type classification</b>
<b>Explanation</b>	For instances of user-defined types it is not allowed to remove the classification that represents the object type.
<b>Action</b>	Correct the client program.
<b>INMJRE0052</b>	<b>This object ({0}) is deprecated and must not be referenced</b>
<b>Explanation</b>	A deprecated object must not be referenced in any way by another object.
<b>Action</b>	Do not create references to deprecated objects.
<b>INMJRE0053</b>	<b>An object to be deleted has not been previously saved</b>
<b>Explanation</b>	Only objects that have been previously saved can be deleted.
<b>Action</b>	Correct the client program.
<b>INMJRE0054</b>	<b>The "{0}" object to be deleted ({1}) is the target of the "{2}" association "{3}". The source of the association is the {4} object "{5}" with key "{6}".</b>
<b>Explanation</b>	An object cannot be deleted if it is still the target of an association.
<b>Action</b>	Delete the association before deleting the object.

<b>INMJRE0055</b>	<b>The registry package to be deleted still has members</b>
<b>Explanation</b>	A registry package cannot be deleted if it has member objects.
<b>Action</b>	Remove the member objects from the package before deleting it.
<b>INMJRE0056</b>	<b>Cannot modify the name of a slot after it was added to a registry object</b>
<b>Explanation</b>	The name of a slot cannot be changed after the slot was added to a registry object.
<b>Action</b>	Correct the client program.
<b>INMJRE0057</b>	<b>Invalid namespace "{0}" of type</b>
<b>Explanation</b>	The namespace of a type must be a valid URI.
<b>Action</b>	Correct the namespace.
<b>INMJRE0058</b>	<b>Invalid XML stream</b>
<b>Explanation</b>	An internal error occurred while deserializing an XML document to a Java object.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0059</b>	<b>XML parsing error</b>
<b>Explanation</b>	An internal error occurred while deserializing an XML document to a Java object.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0060</b>	<b>STAX configuration error</b>
<b>Explanation</b>	An internal error occurred while deserializing an XML document to a Java object.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0061</b>	<b>Invalid URL value</b>
<b>Explanation</b>	An internal error occurred while deserializing an XML document to a Java object.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0062</b>	<b>Invalid boolean value for attribute {0}</b>
<b>Explanation</b>	An internal error occurred while deserializing an XML document to a Java object.
<b>Action</b>	Please contact your software supplier.

<b>INMJRE0063</b>	<b>Incomplete object ({0} is missing or does not have a value)</b>
<b>Explanation</b>	The indicated required part of an object was missing when an object was to be saved.
<b>Action</b>	Correct the client program.
<b>INMJRE0064</b>	<b>Cannot add an existing association to another object</b>
<b>Explanation</b>	It is not possible to add the same association object to several separate registry objects.
<b>Action</b>	Create a new association object.
<b>INMJRE0065</b>	<b>Cannot add an existing classification to another object</b>
<b>Explanation</b>	It is not possible to add the same classification object to several separate registry objects.
<b>Action</b>	Create a new classification object.
<b>INMJRE0066</b>	<b>Cannot add an existing external identifier to another object</b>
<b>Explanation</b>	It is not possible to add the same external identifier object to several separate registry objects.
<b>Action</b>	Create a new external identifier object.
<b>INMJRE0067</b>	<b>Unexpected owner type</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0068</b>	<b>Cannot delete the pre-defined object with key "{0}"</b>
<b>Explanation</b>	The CentraSite Registry/Repository database is installed with some pre-defined JAXR objects that are required for CentraSite operation. These objects must not be deleted.
<b>Action</b>	Do not delete pre-defined objects.
<b>INMJRE0069</b>	<b>Incomplete principal</b>
<b>Explanation</b>	A CentraSitePrincipal has to be either an href representing a user or a group, or an "all" indicator, or an "authenticated" indicator, or an "unauthenticated" indicator. None of these were set.
<b>Action</b>	Create a correct CentraSitePrincipal object.

<b>INMJRE0070</b>	<b>Cannot set instance based security for objects of type {0}</b>
<b>Explanation</b>	Instance based security cannot be set for the following object types: AuditableEvent, Association, Classification, ExternalIdentifier, ServiceBinding and SpecificationLink.
<b>Action</b>	Do not try to set instance based security for these object types.
<b>INMJRE0071</b>	<b>Failed with attached JAXRException</b>
<b>Explanation</b>	Comparison of two key references failed. See the "caused by" message in the stack trace for the cause of the failure.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0072</b>	<b>A ServiceBinding cannot have both a TargetBinding and an AccessURI</b>
<b>Explanation</b>	For a ServiceBinding object, TargetBinding and AccessURI are mutually exclusive.
<b>Action</b>	Choose either TargetBinding or AccessURI.
<b>INMJRE0073</b>	<b>Expected empty XML element {0}, but found content "{1}"</b>
<b>Explanation</b>	An internal error occurred while deserializing instance based security information to a Java object.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0074</b>	<b>Trying to use a closed connection (created by {0} at "{1}", closed at "{2}")</b>
<b>Explanation</b>	A previously closed connection must not be used any more.
<b>Action</b>	Open a new connection.
<b>INMJRE0075</b>	<b>A concept object must not have a HasParent association</b>
<b>Explanation</b>	In order to allow for a proper mapping between JAXR and UDDI, a concept object must not have a HasParent association.
<b>Action</b>	Do not create HasParent associations for concept objects.
<b>INMJRE0076</b>	<b>Internal error: object type concept not found</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.

<b>INMJRE0077</b>	<b>The operation "{0}" can only be called for objects of type "{1}"</b>
<b>Explanation</b>	Each operation belongs to one object type, and it can only be executed on objects of that type.
<b>Action</b>	Call the operation only for objects of the correct type.
<b>INMJRE0078</b>	<b>Internal error: method should not be called</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Do not call this method.
<b>INMJRE0079</b>	<b>Invalid status value: {0}</b>
<b>Explanation</b>	An invalid status value was specified.
<b>Action</b>	See the JAXR javadoc for correct status values.
<b>INMJRE0080</b>	<b>The status of the deprecated object ({0}) cannot be modified</b>
<b>Explanation</b>	The status of a deprecated object cannot be modified.
<b>Action</b>	Undeprecate the object before modifying its status.
<b>INMJRE0082</b>	<b>A concept ({0}) in the ObjectType classification scheme is to be saved without an external link to an XML schema file</b>
<b>Explanation</b>	Concepts in the ObjectType classification scheme represent JAXR object types. These concepts have to have an external link to an XML schema file (XSD).
<b>Action</b>	Supply an XSD file for this concept.
<b>INMJRE0087</b>	<b>Invalid value "{0}" of property "{1}"</b>
<b>Explanation</b>	The given value does not match the declared datatype of the property.
<b>Action</b>	Correct the value.
<b>INMJRE0088</b>	<b>The concept to be deleted ({0}) is used by a classification ({1}). The classification belongs to the {2} object with key "{3}".</b>
<b>Explanation</b>	A concept must not be deleted if it is used by a classification.
<b>Action</b>	Remove the classification before deleting the concept.

<b>INMJRE0089</b>	<b>Trying to add a concept with the already existing value "{0}" under the parent object with key "{1}".</b>
<b>Explanation</b>	Concepts under the same parent object must have unique values.
<b>Action</b>	Choose a different value for the new concept.
<b>INMJRE0090</b>	<b>Invalid slot name: "{0}"</b>
<b>Explanation</b>	In the CentraSite JAXR implementation a JAXR slot name has to have the format {uri}localname, where the {uri} part is optional. The localname has to be a valid NCName according to the XML specification. Basically this means it may start with a letter or an '_' character, followed by letters, digits, or the characters '_', '.', '-'. In particular, the localname must not contain any whitespace characters.
<b>Action</b>	Supply a valid slot name.
<b>INMJRE0091</b>	<b>Invalid concept used as association type: "{0}"</b>
<b>Explanation</b>	Only concepts from the classification scheme "AssociationType" may be used as association types.
<b>Action</b>	Choose a valid concept.
<b>INMJRE0092</b>	<b>Commit or rollback not allowed if connection does not have client controlled transactions</b>
<b>Explanation</b>	Only JAXR connections that were created with com.centrasite.jaxr.ClientTransaction=yes support commit and rollback operations.
<b>Action</b>	Correct the JAXR client program.
<b>INMJRE0093</b>	<b>The value "{0}" of slot "{1}" is not a valid "{2}".</b>
<b>Explanation</b>	The given value does not conform to the datatype as specified in the type definition.
<b>Action</b>	Specify a valid value.
<b>INMJRE0094</b>	<b>Trying to modify the value of the ObjectType concept "{0}".</b>
<b>Explanation</b>	It is not allowed to modify the value of a concept in the classification scheme ObjectType.
<b>Action</b>	Correct the client program.

<b>INMJRE0095</b>	<b>Invalid concept value: {0}</b>
<b>Explanation</b>	As described in the JAXR standard, a concept value has to be a valid NCName.
<b>Action</b>	Provide a valid concept value.
<b>INMJRE0096</b>	<b>Trying to use an internal classification scheme ({0}) for an external classification.</b>
<b>Explanation</b>	An external classification requires an external classification scheme.
<b>Action</b>	Supply a correct classification scheme.
<b>INMJRE0097</b>	<b>Trying to save object "{0}" which is marked to be modified without lock.</b>
<b>Explanation</b>	Objects which are marked to be modified without lock cannot be saved.
<b>Action</b>	Correct the client program.
<b>INMJRE0098</b>	<b>Trying to modify an outdated object ("{0}")</b>
<b>Explanation</b>	The application tried to modify a registry object which has been modified by someone else in the meantime.
<b>Action</b>	Make sure to modify only the latest version of a registry object.
<b>INMJRE0099</b>	<b>Repository access error.</b>
<b>Explanation</b>	An error occurred accessing the repository.
<b>Action</b>	Ensure the repository is available. Check there are no resource issues (e.g. lack of disk space).
<b>INMJRE0100</b>	<b>Lock not available for object "{0}"</b>
<b>Explanation</b>	The requested lock could not be granted.
<b>Action</b>	Wait until the lock is available.
<b>INMJRE0103</b>	<b>Cannot handle a collection of values with a simple ParameterInstance</b>
<b>Explanation</b>	A simple non-array ParameterInstance is associated with a single value.
<b>Action</b>	Use a single value.
<b>INMJRE0104</b>	<b>ParameterType mismatch: requested {0}, present {1}</b>
<b>Explanation</b>	The value(s) of a ParameterInstance have to correspond to the type of the respective ParameterTemplate.
<b>Action</b>	Read / set values according to the ParameterType.

<b>INMJRE0105</b>	<b>The readonly property "{0}" must not be modified.</b>
<b>Explanation</b>	Readonly properties can only be added to new objects. Existing property values must not be changed.
<b>Action</b>	Do not modify readonly properties. Do not add readonly properties to existing objects.
<b>INMJRE0106</b>	<b>Login rejected, user "{0}" not registered</b>
<b>Explanation</b>	Each user has to be registered before being used for login.
<b>Action</b>	Register the user.
<b>INMJRE0107</b>	<b>The "login user" option must not be modified for existing users.</b>
<b>Explanation</b>	The "login user" option can only be assigned to new users.
<b>Action</b>	Do not modify an existing user's "login user" option.
<b>INMJRE0108</b>	<b>For an existing user with "login user" option, the name must not be changed.</b>
<b>Explanation</b>	A user with "login user" option has to keep his name.
<b>Action</b>	Do not modify the name of a user with "login user" option.
<b>INMJRE0109</b>	<b>Invalid URI specified for principal: {0}.</b>
<b>Explanation</b>	The URI specified for the principal is not valid. It must be an absolute URI or one with an absolute path. The scheme of "ino:" is not a valid scheme.
<b>Action</b>	Ensure that the URI is valid.
<b>INMJRE0110</b>	<b>"post insert" policy event failed for RegistryObject ("{0}")</b>
<b>Explanation</b>	The enclosed exception explains the reason of the failure.
<b>Action</b>	Analyze the enclosed exception.
<b>INMJRE0111</b>	<b>"post update" policy event failed for RegistryObject ("{0}")</b>
<b>Explanation</b>	The enclosed exception explains the reason of the failure.
<b>Action</b>	Analyze the enclosed exception.
<b>INMJRE0112</b>	<b>"post delete" policy event failed for RegistryObject ("{0}")</b>
<b>Explanation</b>	The enclosed exception explains the reason of the failure.
<b>Action</b>	Analyze the enclosed exception.

<b>INMJRE0113</b>	<b>Please set the mandatory parameter {0} before activating the policy</b>
<b>Explanation</b>	The policy activation verifies whether all mandatory parameters are set. 0 - Name of the mandatory parameter which was not set.
<b>Action</b>	Please set all the mandatory parameters before activating the policy
<b>INMJRE0114</b>	<b>Action {0} does not match the scope of the policy {1}</b>
<b>Explanation</b>	The selected action does not match the scope of the policy 0 - Name of the action 1 - Name of the policy.
<b>Action</b>	Please ensure that the selected action matches the scope of the policy.
<b>INMJRE0115</b>	<b>The name of the default organization must not be changed.</b>
<b>Explanation</b>	The name of the default organization must not be changed.
<b>Action</b>	None
<b>INMJRE0117</b>	<b>Name not specified for user with "login user" option</b>
<b>Explanation</b>	A user without a name cannot have the "login user" option.
<b>Action</b>	Specify a user name.
<b>INMJRE0119</b>	<b>Enumeration not allowed for data type {0}</b>
<b>Explanation</b>	Enumerations are not allowed for data types InternationalString and InternationalRichText.
<b>Action</b>	Do not specify the enumeration option for these data types.
<b>INMJRE0120</b>	<b>Internal error: missing ExternalLink to schema document</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0121</b>	<b>Internal error: target of {0} external link does not exist.</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.

<b>INMJRE0122</b>	<b>Duplicate type name {0}</b>
<b>Explanation</b>	Each object type is identified by a name consisting of a namespace and a schema name. This name has to be unique.
<b>Action</b>	Provide a unique type name.
<b>INMJRE0123</b>	<b>Trying to remove the primary contact from organization {0} ({1}).</b>
<b>Explanation</b>	Each organization has to have a primary contact. It is not allowed to remove the primary contact.
<b>Action</b>	Do not remove the primary contact from an organization.
<b>INMJRE0124</b>	<b>Cannot delete an ObjectType concept ({0})</b>
<b>Explanation</b>	The taxonomy "ObjectType" contains concepts that represent object types. It is not allowed to delete these concepts.
<b>Action</b>	Do not delete ObjectType concepts.
<b>INMJRE0125</b>	<b>The user "{0}" ({1}) is the owner of, or modified the "{2}" object "{3}" ({4})</b>
<b>Explanation</b>	A user who still owns an object cannot be deleted. Also, if the user modified some object, and the corresponding audit trail entry is still present, deletion is rejected. However, the audit trail can be purged, and after all modification audit trail entries are purged, user deletion will be allowed.
<b>Action</b>	Delete all of the user's objects before deleting the user.
<b>INMJRE0126</b>	<b>Attempt to modify a readonly privilege</b>
<b>Explanation</b>	Readonly privileges must not be modified.
<b>Action</b>	Do not modify a readonly privilege.
<b>INMJRE0127</b>	<b>Unsupported data type '{0}'</b>
<b>Explanation</b>	The requested datatype is not supported.
<b>Action</b>	This is an internal error. Please contact your software supplier.
<b>INMJRE0128</b>	<b>Illegal usage of deny ACE</b>
<b>Explanation</b>	An ACE with deny can only be used with principal ALL and privilege ALL.
<b>Action</b>	Correct the ACE.

<b>INMJRE0129</b>	<b>Not a valid revision object</b>
<b>Explanation</b>	The object specified is not a object from the revision part.
<b>Action</b>	Check objects for the revision restore.
<b>INMJRE0130</b>	<b>Expected revision object not present</b>
<b>Explanation</b>	Unexpectedly a revision object could not be located. Obviously there is no version present of the actual object.
<b>Action</b>	Contact your software supplier because there is a structural problem with the revision part.
<b>INMJRE0131</b>	<b>Revision object must not be modified ("{0}")</b>
<b>Explanation</b>	Revision object must not be modified, these objects are readonly.
<b>Action</b>	Check your objects.
<b>INMJRE0132</b>	<b>Invalid revision object encountered ("{0}")</b>
<b>Explanation</b>	Invalid revision object encountered. The keys must be the same but are different.
<b>Action</b>	Check registry objects.
<b>INMJRE0133</b>	<b>The "{0}" to be deleted ({1}) is an intermediate version object</b>
<b>Explanation</b>	The object to be deleted is a target of a version association and must not be explicitly deleted.
<b>Action</b>	To delete objects of old versions use the purge() methods of the VersionManager interface.
<b>INMJRE0134</b>	<b>Login rejected, user "{0}" not active</b>
<b>Explanation</b>	Deactivated users cannot log in.
<b>Action</b>	Activate the user.
<b>INMJRE0135</b>	<b>Association type "{0}" already used in this asset type</b>
<b>Explanation</b>	There can be only one association of type "Implements" per asset type. You attempted to create such an attribute, but one exists already.
<b>Action</b>	Use a different association type.

<b>INMJRE0136</b>	<b>Uploaded computed profile zip does't contain computed implementation</b>
<b>Explanation</b>	the zip does not the class which implements the interfaces like {0}
<b>Action</b>	Make sure the computed profile implementation bundled in zip
<b>INMJRE0138</b>	<b>User "{0}" is still the primary contact of organization "{1}"</b>
<b>Explanation</b>	A user cannot be deleted if this user is still the primary contact of an organization.
<b>Action</b>	Do not delete primary contact users.
<b>INMJRE0139</b>	<b>Taxonomy "{0}" still used to classify object "{1}"</b>
<b>Explanation</b>	An external taxonomy cannot be deleted as long as it is referenced by classifications.
<b>Action</b>	Remove the classifications before deleting the taxonomy.
<b>INMJRE0140</b>	<b>The association type to be deleted ({0}) is used by an association ({1}). The association belongs to the {2} object "{3}".</b>
<b>Explanation</b>	An association type cannot be deleted if there are still associations of that type.
<b>Action</b>	Delete all associations of that type before deleting the association type.
<b>INMJRE0141</b>	<b>Untyped RegistryEntry "{0}" must not be saved</b>
<b>Explanation</b>	Java RegistryEntry objects are used to represent instances of user-defined types. In order to make a RegistryEntry an instance of a type, it has to be classified with the corresponding type concept.
<b>Action</b>	Save only typed RegistryEntries.
<b>INMJRE0142</b>	<b>must not replace existing type concept</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMJRE0143</b>	<b>duplicate target type "{0}"</b>
<b>Explanation</b>	For a Relationship attribute the same target type was specified twice.
<b>Action</b>	Specify each target type only once.

---

<b>INMJRE0144</b>	<b>invalid maxOccurs value "{0}"</b>
<b>Explanation</b>	Allowed values for maxOccurs are "1" and "unbounded".
<b>Action</b>	Specify a valid value.
<b>INMJRE0145</b>	<b>invalid minOccurs value "{0}"</b>
<b>Explanation</b>	Allowed values for minOccurs are "0" and "1".
<b>Action</b>	Specify a valid value.
<b>INMJRE0146</b>	<b>Missing taxonomy for classification attribute "{0}"</b>
<b>Explanation</b>	Each classification attribute needs a taxonomy.
<b>Action</b>	Specify a taxonomy.
<b>INMJRE0147</b>	<b>For the classification attribute "{0}", the default value "{1}" does not belong to the taxonomy "{2}".</b>
<b>Explanation</b>	The default value needs to belong to the taxonomy.
<b>Action</b>	Select a concept from the taxonomy as the default value.
<b>INMJRE0148</b>	<b>Missing association type for relationship attribute "{0}"</b>
<b>Explanation</b>	Each relationship attribute needs an association type.
<b>Action</b>	Specify an association type.
<b>INMJRE0149</b>	<b>duplicate attribute name "{0}"</b>
<b>Explanation</b>	Attribute names have to be unique within classification, relationship, and file attributes.
<b>Action</b>	Choose a unique attribute name.
<b>INMJRE0150</b>	<b>trying to access a deleted type</b>
<b>Explanation</b>	After a type was deleted, the corresponding Java instance must no longer be used.
<b>Action</b>	Correct the client program.
<b>INMJRE0151</b>	<b>must not rename existing type's schema name</b>
<b>Explanation</b>	The schema name uniquely identifies a type, it must not be modified.
<b>Action</b>	Do not rename an existing schema name.

<b>INMJRE0152</b>	<b>Cannot save object due to missing lifecycle state. The object "{0}" is classified with lifecycle state "{1}" which does not exist.</b>
<b>Explanation</b>	A call to saveObjects fails, when a saved object contains a lifecycle state classification which does not exist. This can occur after importing objects, when the lifecycle model data has not been imported beforehand.
<b>Action</b>	Make sure that any referenced lifecycle models are available in the registry before importing objects that refer to them.
<b>INMJRE0153</b>	<b>Invalid attribute "{0}" applied to object of type "{1}"</b>
<b>Explanation</b>	A setAttributeValue() or getAttributeValue() operation was issued against a registry object whose type does not contain the specified attribute.
<b>Action</b>	Correct the application.
<b>INMJRE0154</b>	<b>Conflicting aggregation settings</b>
<b>Explanation</b>	A relationship attribute can be aggregating, or reversely aggregating, but not both.
<b>Action</b>	Choose a correct aggregation setting.
<b>INMJRE0155</b>	<b>"{0}" is not a virtual type</b>
<b>Explanation</b>	The given type concept is not a virtual type.
<b>Action</b>	Please supply a virtual type.
<b>INMJRE0156</b>	<b>The delete operation failed due to a hidden association.</b>
<b>Explanation</b>	The object to be deleted is still the target of an association. However, the user that tries to delete the object does not have view permissions on the association and its source object. Probably a CentraSite administrator with full permissions is required to perform the delete operation.
<b>Action</b>	Please contact your CentraSite administrator.
<b>INMJRE0158</b>	<b>The locale {0} is not contained in the set of restricted locales.</b>
<b>Explanation</b>	The set of restricted locales defines which locales may be used when creating a value for an InternationalString.
<b>Action</b>	Choose a different locale.

<b>INMJRE0159</b>	<b>Invalid or missing default locale</b>
<b>Explanation</b>	When defining the set of restricted locales, exactly one locale needs to be marked as the default locale.
<b>Action</b>	Specify a proper default locale.
<b>INMJRE0160</b>	<b>The "{0}" package to be deleted ({1}) still has members, e.g. the {2} object "{3}" with key "{4}".</b>
<b>Explanation</b>	A registry package cannot be deleted if it still has members.
<b>Action</b>	Delete the members before deleting the registry package.
<b>INMJRE0161</b>	<b>no value provided for required attribute {0} of {1} "{2}"</b>
<b>Explanation</b>	The attribute is defined with the "required" option, but the attribute value was not supplied when storing the object.
<b>Action</b>	Provide a value for the attribute.
<b>INMJRE0162</b>	<b>too many values provided for single-value attribute {0} of {1} "{2}"</b>
<b>Explanation</b>	For single-value attributes, at most one value may be provided.
<b>Action</b>	Provide a correct attribute value.
<b>INMJRE0163</b>	<b>Internal error: cannot construct a RegistryObject from {0}.</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact your software provider.
<b>INMJRE0164</b>	<b>Internal error: missing object id for {0}</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact your software provider.
<b>INMJRE0165</b>	<b>Cannot modify attribute {0} of type {1} to be required, because it does not exist in the object with key "{2}"</b>
<b>Explanation</b>	While updating a type description, an attribute was modified to be a required attribute. This modification however can only be done when the attribute is already present in all existing objects of the type (which is trivially true if there are no existing objects), or it has been equipped at the same time with a default value.
<b>Action</b>	Define a default value for the attribute, or refrain from setting the attribute to "required", then retry the modification only after the attribute has been added to all existing objects of the given type.

<b>INMJRE0166</b>	<b>Failed to check that the given profile is a computed profile</b>
<b>Explanation</b>	While parsing the uploaded zip file, an unexpected exception occurred.
<b>Action</b>	Please make sure the uploaded zip file is not corrupted.
<b>INMJRE0167</b>	<b>Uploaded computed profile implementation zip file does not contain profile implementation class, which implements the interface like {0}</b>
<b>Explanation</b>	The uploaded computed profile implementation zip file does not contain the class that implements the interface like {0}.
<b>Action</b>	Please make sure the zip file contains the computed profile implementation.
<b>INMJRE0168</b>	<b>Default value should be given for all required attributes when the types have instances. Please provide the default value for the required attribute "{0}".</b>
<b>Explanation</b>	When updating an asset type which already has instances, all the required attributes of that type should be provided with default values.
<b>Action</b>	Ensure that all the required attributes of the edited asset type have default values.
<b>INMJRE0169</b>	<b>The predefined attribute cannot be deleted</b>
<b>Explanation</b>	You cannot delete the predefined attributes.
<b>Action</b>	You cannot delete the predefined attribute.
<b>INMJUE0001</b>	<b>Check your access rights and the proxy settings</b>
<b>Explanation</b>	The accessing user does not have sufficient privileges for the target object.
<b>Action</b>	Do the action as a more privileged user.
<b>INMJUE0005</b>	<b>No privilege to access target object from object: {0}</b>
<b>Explanation</b>	The accessing user does not have sufficient privileges for the target object.
<b>Action</b>	Do the action with a more privileged user.
<b>INMJUE0006</b>	<b>Uploaded computed profile implementation zip doesn't contain profile implementation class, which implements the interface like {0}</b>
<b>Explanation</b>	The uploaded computed profile implementation zip file does not contain the class that implements the interface like the one shown.
<b>Action</b>	Make sure the zip file contains the computed profile implementation.

<b>INMJUE0007</b>	<b>Failed to check that a given profile is a computed profile</b>
<b>Explanation</b>	While parsing the uploaded zip file an unexpected exception occurred.
<b>Action</b>	Make sure that the uploaded zip file is not corrupted.
<b>INMJUW0002</b>	<b>The associated object of type "External Link" could not be deleted</b>
<b>Explanation</b>	This can happen while deleting virtual services.
<b>Action</b>	No action required.
<b>INMJUW0003</b>	<b>The associated object of type "WS-Policy attachment" could not be deleted</b>
<b>Explanation</b>	This can happen when deleting virtual services.
<b>Action</b>	No action required.
<b>INMJUW0004</b>	<b>The associated object of type "Associated with" could not be deleted</b>
<b>Explanation</b>	This can happen when deleting virtual services.
<b>Action</b>	No action required.
<b>INMLFE0001</b>	<b>Provider not set for {0}</b>
<b>Explanation</b>	The LCM factory could not be initialized since the property for the provider class is not set appropriately.
<b>Action</b>	Please check the javadoc of the LCM API to set the appropriate property.
<b>INMLFE0002</b>	<b>Provider {0} not found</b>
<b>Explanation</b>	The LCM provider class could not be loaded.
<b>Action</b>	Please check that the name of provider class is appropriately set and is available for class loading.
<b>INMLFE0003</b>	<b>Provider {0} could not be instantiated</b>
<b>Explanation</b>	An exception occurred while trying to load the provider class.
<b>Action</b>	Please check that the name of provider class is appropriately set and is available for class loading

<b>INMLFE0004</b>	<b>No initial state defined</b>
<b>Explanation</b>	There should be an initial state defined for any lifecycle model.
<b>Action</b>	Please make sure that there is an initial state defined for the lifecycle model.
<b>INMLFE0005</b>	<b>The state(s) {0} are unreachable</b>
<b>Explanation</b>	It should be possible to traverse to each state within a lifecycle model from the initial state 0 - name(s) of the state(s) unreachable from the initial state.
<b>Action</b>	Please make sure that each state is reachable from the initial state in the lifecycle model.
<b>INMLFE0006</b>	<b>A lifecycle model should have at least one end state</b>
<b>Explanation</b>	Any lifecycle model should have at least one state that does not have a next state.
<b>Action</b>	Please make sure that the lifecycle model has at least one end state.
<b>INMLFE0007</b>	<b>The given object type {0} cannot be LCM enabled</b>
<b>Explanation</b>	Only asset types, policies and lifecycle models can be LCM enabled 0 - name of the invalid object type
<b>Action</b>	Please make sure that an appropriate object type that can be LCM enabled is used.
<b>INMLFE0008</b>	<b>The state {0} cannot be set as an initial state. The state is currently not present in the lifecycle model.</b>
<b>Explanation</b>	Only states which are already part of the lifecycle model can be set as an initial state.
<b>Action</b>	Please make sure that you add the state to the lifecycle model before setting it as the initial state.
<b>INMLFE0009</b>	<b>The state {0} cannot be set as a preferred next state. The state is currently not a next state.</b>
<b>Explanation</b>	Only states which are part of the next states can be set as preferred next state 0 - name of the invalid preferred next state.
<b>Action</b>	Please ensure that the state is part of the next states before setting it as the preferred next state.

<b>INMLFE0010</b>	<b>Each lifecycle model should belong to an organization</b>
<b>Explanation</b>	Each LCM should belong to one organization.
<b>Action</b>	Please assign an organization to which the lifecycle model belongs.
<b>INMLFE0011</b>	<b>It is only possible to define a lifecycle model for lifecycle models in CentraSite Active SOA version</b>
<b>Explanation</b>	A lifecycle model for lifecycle models can only be defined in the CentraSite Active SOA edition.
<b>Action</b>	No action required.
<b>INMLFE0012</b>	<b>{0} is not a type in CentraSiteRegistryTypes taxonomy</b>
<b>Explanation</b>	The concept used for the registry type should belong to the predefined CentraSiteRegistryTypes taxonomy 0 - key of the invalid concept.
<b>Action</b>	Please use a concept that belongs to the predefined CentraSiteRegistryTypes taxonomy.
<b>INMLFE0014</b>	<b>A type with the given name {0} was not found</b>
<b>Explanation</b>	No object type was found with the given name 0 - name of the given object type.
<b>Action</b>	Please specify a valid type name.
<b>INMLFE0015</b>	<b>No active lifecycle model for the given registry object found</b>
<b>Explanation</b>	The given registry object is not associated with any active lifecycle model.
<b>Action</b>	No action required.
<b>INMLFE0016</b>	<b>The given state {0} is not a valid follow up state of {1} for the given registry object {2}</b>
<b>Explanation</b>	The current state of the registry object does not have a state transition to the specified target state. 0 - specified target state 1 - current state of the registry object 2 - name of the registry object.
<b>Action</b>	Please ensure that there is a valid state transition from the current state of the registry object to the specified target state.
<b>INMLFE0017</b>	<b>The given registry object is never in a work flow to change its state</b>
<b>Explanation</b>	The given registry object cannot be approved or rejected since it was never in a work flow to change its state.
<b>Action</b>	No action required.

<b>INMLFE0018</b>	<b>For each object type, only one lifecycle model can be active per organization</b>
<b>Explanation</b>	For any object type and organization, there can be at most one active LCM.
<b>Action</b>	Please make sure that there are no active LCMs associated with the given object type and organization, before trying to activate this LCM.
<b>INMLFE0019</b>	<b>A promotion node can be set only on the final states of the lifecycle model</b>
<b>Explanation</b>	Promotion nodes be only be set for final states of a lifecycle model.
<b>Action</b>	Please make sure that promotion nodes are set only for final states.
<b>INMLFE0020</b>	<b>The registry object is in a workflow to change its state</b>
<b>Explanation</b>	Next states cannot be determined for a registry object with a pending state change.
<b>Action</b>	No action required.
<b>INMLFE0021</b>	<b>The given registry object is not a user or a role or a group that could be used to restrict transitions to the state</b>
<b>Explanation</b>	The registry object used to restrict transitions to the state should be either a user or group or role. No other type of registry object can be used.
<b>Action</b>	Please make sure that the registry object used to restrict transitions to the state is either a user or a group or a role.
<b>INMLFE0022</b>	<b>The current user is not allowed to perform the state transition</b>
<b>Explanation</b>	The current user does not have the necessary permissions to perform the requested state transition.
<b>Action</b>	Please make sure that the current user has the necessary permissions to perform the requested state transition.
<b>INMLFE0024</b>	<b>Failed to set the initial state for the registry object {0}</b>
<b>Explanation</b>	The registry object could not be set to the initial state of the life cycle model since there is an approval work flow.
<b>Action</b>	Please make sure that there are no approval work flows triggered for the initial state of the LCM.

<b>INMLFE0026</b>	<b>The lifecycle model is deleted!</b>
<b>Explanation</b>	Deleted lifecycle models cannot be reused.
<b>Action</b>	Please use an existing lifecycle model and do not refer to deleted lifecycle models.
<b>INMLFE0027</b>	<b>The lifecycle model is not associated with any types</b>
<b>Explanation</b>	Each lifecycle model should be associated with at least one object type.
<b>Action</b>	Please choose at least one object type which will be associated with the lifecycle model.
<b>INMLFE0028</b>	<b>Internal error: User {0}/{1} does not belong to any organization</b>
<b>Explanation</b>	The logged in user does not belong to any organization 0 - Name of the user 1 - Key of the user.
<b>Action</b>	Please make sure that the logged in user belongs to some organization.
<b>INMLFE0029</b>	<b>Internal error: please specify the organization for which the lifecycle model has to be found</b>
<b>Explanation</b>	A lifecycle model can be found only in the context of an organization for which the registry object is to be created.
<b>Action</b>	Please specify the organization for which the lifecycle model has to be found.
<b>INMLFE0030</b>	<b>{0} lifecycle model cannot be modified</b>
<b>Explanation</b>	A lifecycle model which is active or in a state after active cannot be modified.
<b>Action</b>	Please ensure that the lifecycle model is in a state before active so that it can be modified.
<b>INMLFE0031</b>	<b>The lifecycle model cannot be deleted!</b>
<b>Explanation</b>	The lifecycle model could not be deleted because of an internal exception.
<b>Action</b>	Please look at the exception for more details.
<b>INMLFE0032</b>	<b>The model cannot be set to state {0}</b>
<b>Explanation</b>	The lifecycle model could not be set to the given state since it is not a valid transition from the current state of the model 0 - name of the invalid state.
<b>Action</b>	Please make sure that the model is set to a state that is a valid transition from its current state.

<b>INMLFE0033</b>	<b>Transition from any state to initial state is not allowed</b>
<b>Explanation</b>	Transition from any state to initial state is not allowed.
<b>Action</b>	Transition from any state to initial state is not allowed.
<b>INMLFE0034</b>	<b>The lifecycle model cannot be activated since the older version of this model could not be superseded</b>
<b>Explanation</b>	The lifecycle model which is a newer version of some other model could not be activated since the older version model could not be marked as superseded.
<b>Action</b>	Please ensure that the older version model can be marked as superseded before activating the newer lifecycle model.
<b>INMLFE0035</b>	<b>An active lifecycle model cannot be deleted</b>
<b>Explanation</b>	An attempt was made to delete an active lifecycle model.
<b>Action</b>	An active lifecycle model cannot be deleted.
<b>INMLFE0036</b>	<b>State transition can only be made between states which belong to the same lifecycle model</b>
<b>Explanation</b>	There are state transitions which have been made between states which belong to different lifecycle models.
<b>Action</b>	Please ensure that the state transitions are not made between states of two different lifecycle models.
<b>INMLFE0037</b>	<b>Lifecycle Model for Lifecycles cannot be deleted</b>
<b>Explanation</b>	The predefined lifecycle model for lifecycles cannot be deleted.
<b>Action</b>	No action required.
<b>INMLFE0038</b>	<b>Policy Lifecycle cannot be deleted</b>
<b>Explanation</b>	The predefined lifecycle model for policies cannot be deleted.
<b>Action</b>	No action required.
<b>INMLFE0041</b>	<b>Intermediate versions of a Lifecycle cannot be deleted using 'Delete' option</b>
<b>Explanation</b>	There are two options to delete a lifecycle and its version objects, namely 'Delete' and 'Purge'. The 'Delete' option can be used only for the latest version of the lifecycle.
<b>Action</b>	Deletion will not be allowed.

<b>INMLYE0002</b>	<b>Lifecycle Model Name should not be empty</b>
<b>Explanation</b>	The model name is mandatory.
<b>Action</b>	Enter the model name.
<b>INMLYE0003</b>	<b>Stage Name should not be empty</b>
<b>Explanation</b>	The stage name is mandatory.
<b>Action</b>	Enter the stage name.
<b>INMLYE0005</b>	<b>Only one row can be moved down</b>
<b>Explanation</b>	For the order of the lifecycle state, only one row can be moved up or down.
<b>Action</b>	While moving down any lifecycle state, please ensure that only one state is selected.
<b>INMLYE0007</b>	<b>Only one row can be moved up</b>
<b>Explanation</b>	To order the LC State, only one row can be moved up.
<b>Action</b>	Lifecycle state order.
<b>INMLYE0008</b>	<b>Lifecycle model(s) should be selected for saving report</b>
<b>Explanation</b>	Saving a report should have one LCM object.
<b>Action</b>	Saving a report should have one LCM object.
<b>INMLYE0009</b>	<b>Two state names cannot have the same name</b>
<b>Explanation</b>	There is a duplicate state name.
<b>Action</b>	Choose a unique state name.
<b>INMPPEE0003</b>	<b>Namespace {0} does not match any of the possible namespaces {1}</b>
<b>Explanation</b>	Service namespace is validated against the set of possible namespaces as specified by the policy. 0 - Namespace of the service 1 - Allowed namespaces from policy.
<b>Action</b>	Please ensure that the namespace of the service matches at least one of the allowed namespaces.
<b>INMPPEE0009</b>	<b>Policy {0} cannot be deactivated since an approval triggered by the policy for {1} {2} is in progress</b>
<b>Explanation</b>	Since there is an approval which is in progress, this policy cannot be deactivated. 0 - Name of the policy 1 - Type of the object which is pending 2 - Name of the object which is pending.
<b>Action</b>	Please complete the approval flow for the specific object and then deactivate the policy.

<b>INMP EE0013</b>	<b>Organization {0} should have Administrator</b>
<b>Explanation</b>	Every organization should have an administrator assigned 0 - Name of the organization
<b>Action</b>	Please ensure that the organization has an administrator assigned to it.
<b>INMP EE0016</b>	<b>{0} {1} must be classified by taxonomy {2}</b>
<b>Explanation</b>	The given registry object is validated to be classified by the given taxonomy. 0 - Type name of the object 1 - Registry Object name 2 - Taxonomy node name.
<b>Action</b>	Please ensure that the registry object is classified by the given taxonomy.
<b>INMP EE0021</b>	<b>Policy without any actions cannot be executed</b>
<b>Explanation</b>	A policy without any actions cannot be executed.
<b>Action</b>	Please assign some actions to this policy.
<b>INMP EE0030</b>	<b>Service WSDL size {0} does not conform with the specified size {1}</b>
<b>Explanation</b>	The service WSDL size does not match the size specified by the policy. 0 - WSDL size of the service 1 - WSDL size specified in the policy.
<b>Action</b>	Please ensure that the WSDL size of the service conforms with the specified size.
<b>INMP EE0031</b>	<b>{0} name {1} does not conform with the pattern {2}</b>
<b>Explanation</b>	The registry object name does not match the specified pattern. 0 - Type of the registry object 1 - Name of the registry object 2 - Name pattern specified in the policy.
<b>Action</b>	Please ensure that the name of registry object conforms to the specified pattern.
<b>INMP EE0039</b>	<b>Service Binding Type(s) {0} are missing in the WSDL. The mandatory bindings specified in the policy are {1}</b>
<b>Explanation</b>	The binding types of the service are validated against the specified bindings. 0 - Violating binding types of the service 1 - Binding types specified by the policy.
<b>Action</b>	Please ensure that the service binding types conform to the specified binding types.
<b>INMP EE0043</b>	<b>User does not have the permission to create {0}</b>
<b>Explanation</b>	The user does not have the required permission to create an object of the given type. {0} refers to the object type for which the user is creating an instance.
<b>Action</b>	Please assign the necessary permissions to the user before trying to create an object of the type.

<b>INMP0045</b>	<b>Namespace cannot be empty for {0} {1}</b>
<b>Explanation</b>	The namespace of the applied object is empty. {0} - type of the applied object {1} - name of the applied object.
<b>Action</b>	Please ensure that the namespace is provided for the object.
<b>INMP0046</b>	<b>Description is empty for {0} {1}</b>
<b>Explanation</b>	The description of the registry object is empty. 0 - Type of the registry object 1 - Name of the registry object.
<b>Action</b>	Please make sure that the registry object has a non-empty and valid description.
<b>INMP0047</b>	<b>Name is empty for {0}</b>
<b>Explanation</b>	The name of the registry object is empty 0. - Type of the registry object.
<b>Action</b>	Please make sure that the registry object has a non-empty and valid name.
<b>INMP0048</b>	<b>Policy {0} cannot be activated since there is a newer active version of this policy</b>
<b>Explanation</b>	Since there is a newer version of this policy which is active, the policy cannot be activated.
<b>Action</b>	Please use the newest active version of the policy for enforcement.
<b>INMP0049</b>	<b>Policy {0} cannot be activated since the older version of the policy could not be superseded</b>
<b>Explanation</b>	The policy which is a newer version of some other policy could not be activated since the older version could not be marked as superseded.
<b>Action</b>	Please ensure that the older version policy can be marked as superseded before activating the newer policy.
<b>INMP0052</b>	<b>{0} description {1} does not conform with the pattern {2}</b>
<b>Explanation</b>	The registry object description does not conform to the pattern specified in the policy. 0 - Type of the registry object 1 - Description of the registry object 2 - Description pattern specified in the policy.
<b>Action</b>	Please ensure that the description of the registry object conforms to the specified pattern.

<b>INMP EE0057</b>	<b>{0} {1} does not belong to an LCM state</b>
<b>Explanation</b>	The registry object does not belong to an LCM state. 0 - Type name of the object 1 - Name of the object.
<b>Action</b>	Please ensure that the registry object is set to an appropriate LCM state.
<b>INMP EE0059</b>	<b>{0} {1} belongs to state {2} which does not conform to the allowed states {3}</b>
<b>Explanation</b>	The LCM state of the registry object is validated against the allowed states specified in the policy. 0 - Type name of the registry object 1 - Name of the registry object 2 - Current state name of the registry object 3 - Allowed states specified in the policy.
<b>Action</b>	Please ensure that the registry object is set to an appropriate LCM state.
<b>INMP EE0064</b>	<b>{0} {1} does not have a value set for attribute {2}</b>
<b>Explanation</b>	The registry object does not have a value set of the specified attribute. 0 - Type of the registry object 1 - Name of the registry object 2 - Attribute name specified in the policy.
<b>Action</b>	Please ensure that the object has a value set for the specific attribute.
<b>INMP EE0066</b>	<b>{0} {1} has value {2} set for attribute {3} which does not conform to the allowed values {4}</b>
<b>Explanation</b>	The registry object has a value set of the specified attribute which does not conform to the allowed values. 0 - Type of the registry object 1 - Name of the registry object 2 - Attribute value of the registry object 3 - Attribute name specified in the policy 4 - Allowed attribute values specified in the policy.
<b>Action</b>	Please ensure that the object has an appropriate value set for the specific attribute.
<b>INMP EE0069</b>	<b>Policy {0} cannot be activated as some mandatory action parameters are not set</b>
<b>Explanation</b>	The policy has some mandatory parameters which are not set, so the policy cannot be activated. 0 - Name of the policy.
<b>Action</b>	Please ensure that all mandatory parameters of the policy are set before activation.
<b>INMP EE0071</b>	<b>Priority for a policy should be between {0} and {1}</b>
<b>Explanation</b>	The priority for a policy should be within the specified limits.
<b>Action</b>	Please enter a priority within the specified limits.

<b>INMP0072</b>	<b>Policy action rule {0} is invalid</b>
<b>Explanation</b>	The action.properties file is not accessible for this policy action rule. 0- name of the policy action.
<b>Action</b>	Please enter the correct rule file for the policy action.
<b>INMP0073</b>	<b>{0} is not a valid Groovy script</b>
<b>Explanation</b>	The action file is not a valid Groovy script. 0 – name of the Groovy script.
<b>Action</b>	Please upload a valid Groovy script.
<b>INMP0074</b>	<b>Result message not set for Groovy action {0}</b>
<b>Explanation</b>	The Groovy script did not set the result object. 0 – name of the Groovy action.
<b>Action</b>	Set the result inside the Groovy action.
<b>INMP0087</b>	<b>Active user {0} cannot be deleted.</b>
<b>Explanation</b>	Only deactivated users can be deleted in CentraSite. {0} specifies the user name.
<b>Action</b>	Deactivate the user before deletion.
<b>INMP0089</b>	<b>Organization level permission for {0} is not created yet for organization {1}</b>
<b>Explanation</b>	Firstly we have to create an organization before creating any registry object for an organization. This is because organization level permissions of that organization are used in instance level permission for those registry objects. 0 – name of the registry object 1 – name of the organization.
<b>Action</b>	Create the organization first.
<b>INMP0091</b>	<b>User cannot update the role {0} with permissions that he does not have</b>
<b>Explanation</b>	A user can assign permissions that he has to a role. If a user tries to update a role with a permission that he does not have, then this error will be thrown. 0 – name of the role.
<b>Action</b>	Please ensure that the user has the permissions that he is assigning to a role.
<b>INMP0092</b>	<b>{0} cannot be deleted</b>
<b>Explanation</b>	The default organization cannot be deleted.
<b>Action</b>	Do not try to delete the default organization.

<b>INMPEE0094</b>	<b>Policy {0} cannot be activated since an active older version of the policy has a pending approval</b>
<b>Explanation</b>	Since there is an older version of this policy which is active and has a pending approval, this newer policy version cannot be activated. 0 – name of the policy.
<b>Action</b>	Please ensure that any approval triggered by the older active version of this policy gets completed before activating the newer version.
<b>INMPEE0102</b>	<b>Organization Primary Contact has to be an active user</b>
<b>Explanation</b>	A deactivated user cannot become the primary contact of an organization.
<b>Action</b>	Please assign an active user as the primary contact of an organization.
<b>INMPEE0104</b>	<b>User cannot assign the role {0} to a user/group that he cannot manage</b>
<b>Explanation</b>	If a user with "Manage Users" permission in one organization tries to assign a role from another organization or a system level role to his own organization's user, then this error message will be thrown.
<b>Action</b>	The user needs to have the "Manage Users" permission of the role's organization (if it is an organization level role) or the user should have the "Manage System-wide Roles" permission if it is a system level role. Only then can the user assign that role to a user.
<b>INMPEE0105</b>	<b>User cannot create the Role {0} with permissions that the user does not have</b>
<b>Explanation</b>	A user can update the role only with the permissions that he possesses. If a user with Organization level "Manage Users" permission or "Manage System-wide Roles" permission tries to update a role then this user can assign only the permission that he/she already has, otherwise this error message will be thrown.
<b>Action</b>	Please ensure that the user has the permissions that he/she is assigning to a role.
<b>INMPEE0106</b>	<b>Action class {0} not found in {1}</b>
<b>Explanation</b>	The action class mentioned in the properties file should be present in the action rule archive. 0 – name of the executable class, 1 – name of the action rule archive.
<b>Action</b>	The action class mentioned in the properties file is not present in the action rule archive. Please make sure the class mentioned in the property file is present in the archive.

<b>INMP00110</b>	<b>WS-I actions should not be combined with other actions in a single policy</b>
<b>Explanation</b>	A policy containing WS-I actions cannot contain any actions other than WS-I policy actions
<b>Action</b>	Make sure WS-I actions are not combined with other actions in a single policy.
<b>INMP00111</b>	<b>Dependent actions {0} for {1} is not included</b>
<b>Explanation</b>	Dependent actions of a WS-I action are not included. 0 – name of the missing dependent WS-I action, 1 - name of the included WS-I action.
<b>Action</b>	Dependent actions of a WS-I action should be included in a policy.
<b>INMP00113</b>	<b>There are no lifecycle states associated with the {0} event for the policy {1} and hence this policy cannot be activated</b>
<b>Explanation</b>	The pre/post state change policy does not have any lifecycle states associated with it and hence the policy will not be executed for any state transition. Hence this policy cannot be activated. 0 - Pre/Post State Change event, 1 - Name of the policy.
<b>Action</b>	Please ensure that the policy is associated with the appropriate lifecycle states for the pre/post state change events
<b>INMP00114</b>	<b>Lifecycle state {0} from {1} does not match the scope of the policy {2}</b>
<b>Explanation</b>	The lifecycle state associated with the policy does not correspond to the object types specified in the scope of the policy. 0 - Name of the lifecycle state associated with this policy, 1 - Name of the lifecycle model to which this state belongs, 2 - Name of the policy.
<b>Action</b>	Please ensure that the lifecycle states associated to the policy belong to a lifecycle model whose object type conform to the object types specified in the policy scope
<b>INMP00115</b>	<b>Consumer Registration Request {0} is not associated with any asset</b>
<b>Explanation</b>	A consumer registration request object must be associated with an asset. 0 – Name of the consumer registration request.
<b>Action</b>	Associate the consumer registration request object with an asset using an association with the association type "relatedTo". The source object of the association is the consumer registration request. The target object of the association is the asset.
<b>INMP00118</b>	<b>{0} {1} is pending on state change. So it cannot be modified or deleted.</b>
<b>Explanation</b>	The object has a pending state change. So this object cannot be modified or deleted. 0 - Type of the object 1 - Name of the object.
<b>Action</b>	If you want to modify or delete the object, release the object from the pending state. If there are pending approvals, get them completed.

<b>INMP EE0120</b>	<b>Attribute {0} is read only and hence cannot be set for {1} {2}</b>
<b>Explanation</b>	Since the attribute is read only, the given attribute value cannot be set for the registry object. 0 - Name of the read only attribute, 1 - Type of the registry object, 2 - Name of the registry object.
<b>Action</b>	Please ensure that the chosen attribute is not a read only attribute.
<b>INMP EE0129</b>	<b>Initial State {0} cannot be used to define policy on Pre-State Change event</b>
<b>Explanation</b>	Pre-state change policies cannot be defined on initial states of any lifecycle model. 0 - Name of the initial state associated with the policy.
<b>Action</b>	Please use a lifecycle state other than the initial state to define the pre-state change policy.
<b>INMP EE0136</b>	<b>Policy action {0} is used, so it cannot be edited or deleted</b>
<b>Explanation</b>	If the policy action is used by any other policy, the policy action can't be edited or deleted.
<b>Action</b>	Before editing or deleting any policy action, the user has to verify whether any policy is using this action or not.
<b>INMP EE0142</b>	<b>{0} {1} has a pending approval and hence cannot be moved</b>
<b>Explanation</b>	The registry object has an approval in pending state. So it cannot be moved to a new owner and/or organization. 0 - Type of the registry object 1 - Name of the registry object.
<b>Action</b>	Please complete the pending approval for the registry object before moving it.
<b>INMP EE0143</b>	<b>{0} {1} has a pending consumer registration request and hence cannot be moved</b>
<b>Explanation</b>	The registry object has a pending consumer registration, so it cannot be moved to a new owner and/or organization. 0 - Type of the registry object 1 - Name of the registry object.
<b>Action</b>	Please complete the consumer registration request for the registry object before moving it.
<b>INMP EE0144</b>	<b>{0} {1} is an internal object of CentraSite and hence cannot be moved</b>
<b>Explanation</b>	Internal objects of CentraSite cannot be moved.
<b>Action</b>	Internal objects of CentraSite cannot be moved.

<b>INMP EE0145</b>	<b>{0} {1} cannot be moved to inactive or internal users of CentraSite</b>
<b>Explanation</b>	Ownership of the registry object cannot be transferred to inactive or internal users of CentraSite. 0 - Type of the registry object 1 - Name of the registry object.
<b>Action</b>	Please ensure that the new owner for the registry object is an active and non-internal user of CentraSite.
<b>INMP EE0146</b>	<b>The mandatory attribute {0} does not have value for this object</b>
<b>Explanation</b>	An attribute should have a value for a registry object if it is marked as required.
<b>Action</b>	Provide appropriate value(s).
<b>INMP EE0148</b>	<b>Only user with CentraSite Administrator role can do the change ownership action</b>
<b>Explanation</b>	Only a user with the CentraSite Administrator role can do the change ownership action.
<b>Action</b>	Please make sure that you log in as a user who has CentraSite Administrator role to perform the ownership change.
<b>INMP EE0149</b>	<b>Only user with CentraSite Administrator role can do the change organization action</b>
<b>Explanation</b>	Only a user with the CentraSite Administrator role can do the change organization action for assets.
<b>Action</b>	Please make sure that you log in as a user who has the CentraSite Administrator role to perform the organization change.
<b>INMP EE0150</b>	<b>Internal users cannot be moved across organizations.</b>
<b>Explanation</b>	If the user is trying to move any of the predefined or internal users from one organization to another organization, this error message will be displayed.
<b>Action</b>	Remove the predefined/internal users from the list for moving users across organizations.
<b>INMP EE0151</b>	<b>Owner for the object {0} of type {1} is not present in CentraSite</b>
<b>Explanation</b>	The owner for the object is not present in CentraSite. {0} - Name of the object {1} - Type of the object.
<b>Action</b>	The owner should not be allowed to be removed from CentraSite while owning some objects. So, identify how the owner was removed from CentraSite with this object dependency and report a bug.

<b>INMP EE0153</b>	<b>View permission on {0} {1} is not available for {2} {3}</b>
<b>Explanation</b>	The view permission on the registry object is not available for the specific user or group. 0 - Type of the registry object for which the profile permissions are being set 1 - Name of the registry object 2 - User or Group 3 - Name of the user or group.
<b>Action</b>	Please set the view permission on the registry object for the specific user or group before setting the profile permissions.
<b>INMP EE0154</b>	<b>Modify permission on {0} {1} is not available for {2} {3}</b>
<b>Explanation</b>	The modify permission on the registry object is not available for the specific user or group. 0 - Type of the registry object for which the profile permissions are being set 1 - Name of the registry object 2 - User or Group 3 - Name of the user or group.
<b>Action</b>	Please set the modify permission on the registry object for the specific user or group before setting the profile permissions.
<b>INMP EE0156</b>	<b>The new owner {0} does not have create asset permission in organization {1}</b>
<b>Explanation</b>	An attempt was made to move an asset to a user who does not have "create assets" permission in the asset's organization.
<b>Action</b>	Assign the Asset Provider role or any custom role which contains the "create assets" permission in the asset' organization to the target user.
<b>INMP EE0167</b>	<b>The RejectHandler policy prohibited the operation for {0} {1}</b>
<b>Explanation</b>	Operations like "move", "delete", etc. are only allowed for specific object types.
<b>Action</b>	Correct the application program.
<b>INMP EE0175</b>	<b>Virtual Service {0} cannot be deleted because it has been deployed to the target.</b>
<b>Explanation</b>	This error message is thrown when you are attempting to delete the virtual service which is deployed to a target.
<b>Action</b>	Undeploy the virtual service before attempting to delete.
<b>INMP EE0176</b>	<b>Target information not available for the deployment operation.</b>
<b>Explanation</b>	A target is mandatory for deployment operations of Virtual Service/Virtual XML service/Virtual REST service/Consumer Application/Aliases.
<b>Action</b>	Trigger deployment from the deployment profile.

<b>INMP EE0180</b>	<b>IS Service Interface {0} should have at least one associated IS Service Object, hence the corresponding REST service is not created.</b>
<b>Explanation</b>	The IS Service Interface object should have at least one associated IS Service Object.
<b>Action</b>	Make sure at least one IS Service Object (HTTP methods get, put, post and delete) is associated to the IS Service Interface and also make sure the name of the IS Service Object should contain the following strings (get, put, post and delete) appropriate to the method definition.
<b>INMP EE0181</b>	<b>REST Service {0} should have at least one native endpoint, hence the corresponding REST service is not created.</b>
<b>Explanation</b>	The REST service published from the webMethods product suite should have at least one native endpoint.
<b>Action</b>	Make sure the port attribute (IS Server object) has a value defined.
<b>INMP EE0184</b>	<b>Cannot remove the existing life cycle state from the object {0}</b>
<b>Explanation</b>	It is not possible to remove the existing life cycle state from the given object
<b>Action</b>	No action required.
<b>INMP EE0185</b>	<b>{0} {1} must be classified by at least one of {2}</b>
<b>Explanation</b>	The given registry object is validated to be classified by the given taxonomy or category. 0 - Type name of the object 1 - Registry Object name 2 - Taxonomy node name or category node name.
<b>Action</b>	Please ensure that the registry object is classified by the given taxonomy or category.
<b>INMP EE0190</b>	<b>Unable to delete the exported archive file</b>
<b>Explanation</b>	The intermediate archive file created for asset promotion could not be deleted.
<b>Action</b>	No action required.
<b>INMP EE0204</b>	<b>The mandatory attribute {0}, of {1} "{2}" does not have a value</b>
<b>Explanation</b>	The mandatory attribute {0} of {2} created from type {1} does not have a value. Attribute {0} has been marked "required" in the definition of type {2} and hence should have a value.
<b>Action</b>	Provide a value for the attribute {0} or provide a default value for the attribute in the definition of type {2}.

<b>INMP EE0206</b>	<b>The validation pattern "{0}" is invalid for policy "{1} at {2}". Repair the regular expression pattern.</b>
<b>Explanation</b>	The validation policy action of the specified policy contains an invalid/unsupported regular expression pattern.
<b>Action</b>	Specify a syntactically correct regular expression for the policy action.
<b>INMP EE0210</b>	<b>Key Generator Policy is not enabled for the API {0}</b>
<b>Explanation</b>	The Key Generator Policy for the given API is not generated.
<b>Action</b>	Contact the API provider.
<b>INMP EE0211</b>	<b>Onboarding Organization {0} with Administrator User {1} has failed</b>
<b>Explanation</b>	Onboarding the given organization with the given administrator user of that organization has failed.
<b>Action</b>	Contact the CentraSite administrator.
<b>INMP EE0212</b>	<b>Onboarding User {0} in Organization {1} has failed</b>
<b>Explanation</b>	Onboarding of the given user has failed in the given organization.
<b>Action</b>	Contact the organization administrator.
<b>INMP EE0218</b>	<b>API key revocation failed.</b>
<b>Explanation</b>	The specified API key could not be revoked. This problem can occur because the requestor does not have the required permission to revoke API key.
<b>Action</b>	Only a user with Administrator or Asset Provider role can revoke API keys.
<b>INMP EE0225Error</b>	<b>CentraSite cannot delete the alias because it is already deployed to the target. Alias: {0}</b>
<b>Explanation</b>	You are trying to delete an alias which is already deployed to a target.
<b>Action</b>	You must undeploy an alias before you delete it.
<b>INMP EE0226</b>	<b>The user {0} of the API Portal cannot be deleted.</b>
<b>Explanation</b>	You do not have sufficient access rights to delete the specified user {0} of API Portal, who has onboarded in the CentraSite registry. To delete the specified user, you must belong to the CentraSite Administrator role.
<b>Action</b>	Verify that you have the appropriate access rights. Contact your administrator and request access if necessary and then try again.

<b>INMP EE0227</b>	<b>Could not send key revocation notice to the user configured in the API consumption settings.</b>
<b>Explanation</b>	An email notification for the key revocation status could not be sent to the user configured in the API consumption settings, possibly because the user specified has been deleted from the CentraSite registry.
<b>Action</b>	Verify that the specified user exists in the CentraSite registry. If the user exists and the error persists, contact your administrator. If the user does not exist, remove the user from the API consumption settings.
<b>INMP EE0228</b>	<b>API Portal user {0} was off-boarded.</b>
<b>Explanation</b>	The API Portal user {0} has been off-boarded prior to the key generation/renewal operation.
<b>Action</b>	Onboard the API Portal user and try again.
<b>INMP EE0229</b>	<b>Key revocation policy must be enabled for the API.</b>
<b>Explanation</b>	The key revocation policy required for revoking an API's key has not been enabled for the API.
<b>Action</b>	Contact the API provider.
<b>INMP EE0230</b>	<b>Failed to delete the API {0}.</b>
<b>Explanation</b>	Could not delete the specified API {0} from CentraSite registry, possibly because the specified API is published to one or more API Portals.
<b>Action</b>	Make sure you unpublish the API from all of the API Portals, before trying to delete it.
<b>INMP EE0231</b>	<b>Failed to create object {0} in organization {1}.</b>
<b>Explanation</b>	Could not create the object {0} in the organization {1}, possibly because of insufficient permissions.
<b>Action</b>	Ensure that you have sufficient permissions to create the object in the selected organization.
<b>INMP EE0234</b>	<b>The asset {0} cannot be deleted, because it is consumed by one or more assets.</b>
<b>Explanation</b>	The asset {0} cannot be deleted, because it is consumed by one or more assets.
<b>Action</b>	Make sure you unconsume all consumers from the asset, before trying to delete it.

<b>INMP EE0236</b>	<b>The WSDL does not have any service element for {0}.</b>
<b>Explanation</b>	The WSDL cannot be validated if there are no service elements in it.
<b>Action</b>	If the service {0} is a Virtual type, the service element will be available only after it is deployed to a Mediator gateway.
<b>INMP EI0002</b>	<b>Namespace {0} matches one of the possible namespaces {1}</b>
<b>Explanation</b>	The service namespace validated against the set of possible namespaces as specified by the policy. 0 - Namespace of the service 1 - Allowed namespaces from policy.
<b>Action</b>	No action required.
<b>INMP EI0004</b>	<b>User {0} does not have the role specified in the policy</b>
<b>Explanation</b>	Since the user does not have the role specified in the policy, the role group policy is not applicable for the user 0 - Name of the user.
<b>Action</b>	No action required.
<b>INMP EI0005</b>	<b>Attribute {0} is not applicable for {1} {2}</b>
<b>Explanation</b>	The specified attribute is not applicable for the given object. 0 - Name of the attribute 1 - Type of the object 2 - Name of the object.
<b>Action</b>	No action required.
<b>INMP EI0006</b>	<b>Policy {0} was successfully validated for activation</b>
<b>Explanation</b>	The policy was successfully validated for activation. 0 - Name of the policy.
<b>Action</b>	No action required.
<b>INMP EI0007</b>	<b>LC Model {0} was successfully validated for activation</b>
<b>Explanation</b>	The lifecycle was successfully validated for activation. 0 - Name of the lifecycle model.
<b>Action</b>	No action required.
<b>INMP EI0008</b>	<b>Policy {0} was successfully validated for deactivation</b>
<b>Explanation</b>	The policy was successfully validated for deactivation. 0 - Name of the policy.
<b>Action</b>	No action required.

<b>INMPEI0010</b>	<b>Permissions assigned successfully for {0} {1}</b>
<b>Explanation</b>	Default permissions were assigned successfully for the given registry object. 0 - Type of the object 1 - Name of the object.
<b>Action</b>	No action required.
<b>INMPEI0012</b>	<b>User {0} was assigned to organization groups successfully</b>
<b>Explanation</b>	The user was assigned to organization groups successfully. 0 - Name of the user.
<b>Action</b>	No action required.
<b>INMPEI0014</b>	<b>Organization {0} has Administrator</b>
<b>Explanation</b>	The given organization has an administrator assigned to it. 0 - Name of the organization.
<b>Action</b>	No action required.
<b>INMPEI0015</b>	<b>{0} {1} is classified by taxonomy {2}</b>
<b>Explanation</b>	The given registry object is validated to be classified by the given taxonomy. 0 - Type name of the object 1 - Registry object name 2 - Taxonomy node name.
<b>Action</b>	No action required.
<b>INMPEI0017</b>	<b>Default Roles, Permissions and Groups created successfully for Organization {0}</b>
<b>Explanation</b>	Default roles, permissions and groups were created successfully for the given organization. 0 - Name of the organization.
<b>Action</b>	No action required.
<b>INMPEI0018</b>	<b>Default Roles, Permissions and Groups deleted successfully for Organization {0}</b>
<b>Explanation</b>	Default roles, permissions and groups were deleted successfully for the given organization. 0 - Name of the organization.
<b>Action</b>	No action required.
<b>INMPEI0019</b>	<b>Adding {0} privilege for {1} {2} on {3} {4}</b>
<b>Explanation</b>	The chosen privilege on the given registry object was successfully added for the particular user/group. 0 - View/Modify 1 - User/Group 2 - Name of the user/group 3 - Type of the registry object 4 - Name of the registry object.
<b>Action</b>	No action required.

<b>INMPEI0022</b>	<b>Default roles, groups, permissions and SDL for organization {0} created successfully</b>
<b>Explanation</b>	Default roles, groups, permissions and SDL were created successfully for the given organization. 0 - Name of the organization.
<b>Action</b>	No action required.
<b>INMPEI0023</b>	<b>Default roles, groups, permissions for organization {0} removed successfully</b>
<b>Explanation</b>	Default roles, permissions and groups were removed successfully for the given organization. 0 - Name of the organization.
<b>Action</b>	No action required.
<b>INMPEI0024</b>	<b>User creation policy for User {0} was successful</b>
<b>Explanation</b>	The user was successfully added to the default groups of the organization to which the user belongs. 0 - Name of the user.
<b>Action</b>	No action required.
<b>INMPEI0025</b>	<b>Request Approval Flow {0} for {1} created successfully</b>
<b>Explanation</b>	Request approval flow with the specified name was created successfully for the object. 0 - Approval Flow Name 1 - Name of the object for which approval is triggered.
<b>Action</b>	No action required.
<b>INMPEI0026</b>	<b>Default instance level permissions for Asset {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given asset. 0 - Name of the asset.
<b>Action</b>	No action required.
<b>INMPEI0027</b>	<b>Email with subject {0} successfully sent to {1}</b>
<b>Explanation</b>	An email with the given subject was successfully sent to the recipients. 0 - Subject of the sent email 1 - email address of the recipient(s).
<b>Action</b>	No action required.
<b>INMPEI0029</b>	<b>Service WSDL size {0} conforms with the specified size {1}</b>
<b>Explanation</b>	The service WSDL size validated against the size specified by the policy. 0 - WSDL size of the service 1 - WSDL size specified in the policy.
<b>Action</b>	No action required.

<b>INMPEI0032</b>	<b>{0} name {1} conforms with the pattern {2}</b>
<b>Explanation</b>	The registry object name matches the specified pattern. 0 - Type of the registry object 1 - Name of the registry object 2 - Name pattern specified in the policy.
<b>Action</b>	No action required.
<b>INMPEI0033</b>	<b>Default instance level permissions for Group {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given group. 0 - Name of the group.
<b>Action</b>	No action required.
<b>INMPEI0034</b>	<b>Default instance level permissions for Lifecycle Model {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given lifecycle model. 0 - Name of the lifecycle model.
<b>Action</b>	No action required.
<b>INMPEI0035</b>	<b>Default instance level permissions for Policy {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given policy. 0 - Name of the policy.
<b>Action</b>	No action required.
<b>INMPEI0036</b>	<b>Default instance level permissions for Report Template {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given report template. 0 - Name of the report template.
<b>Action</b>	No action required.
<b>INMPEI0037</b>	<b>Default instance level permissions for Role {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given role. 0 - Name of the role.
<b>Action</b>	No action required.
<b>INMPEI0038</b>	<b>Default instance level permissions for Taxonomy {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given taxonomy. 0 - Name of the taxonomy.
<b>Action</b>	No action required.

<b>INMPEI0040</b>	<b>Service Binding Type(s) conform with the specified bindings {0}</b>
<b>Explanation</b>	The binding types of the service validated against the specified bindings. 0 - Binding types specified by the policy.
<b>Action</b>	No action required.
<b>INMPEI0041</b>	<b>Default instance level permissions for User {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given user 0 - Name of the User
<b>Action</b>	No action required
<b>INMPEI0042</b>	<b>Default instance level permissions for Policy Action {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given policy action. 0 - Name of the policy action.
<b>Action</b>	No action required.
<b>INMPEI0050</b>	<b>{0} {1} successfully classified by specified taxonomies {2}</b>
<b>Explanation</b>	The given registry object has been classified with the specified taxonomy nodes. 0 - Type name of the registry object 1 - Name of the registry object 2 - Name(s) of the taxonomy nodes.
<b>Action</b>	No action required.
<b>INMPEI0051</b>	<b>{0} {1} successfully unclassified from specified taxonomies {2}</b>
<b>Explanation</b>	The given registry object has been unclassified from the specified taxonomies. 0 - Type name of the registry object 1 - Name of the registry object 2 - Name(s) of the taxonomies.
<b>Action</b>	No action required.
<b>INMPEI0053</b>	<b>{0} description {1} conforms with the pattern {2}</b>
<b>Explanation</b>	The registry object description validated with the specified pattern. 0 - Type of the registry object 1 - Description of the registry object 2 - Description pattern specified in the policy.
<b>Action</b>	No action required.

<b>INMPEI0054</b>	<b>{0} {1} was triggered to change to initial state {2}</b>
<b>Explanation</b>	The registry object has been triggered to change to initial state of the corresponding lifecycle model. 0 - Type name of the object 1 - Name of the registry object 2 - Name of the initial state of the corresponding lifecycle model.
<b>Action</b>	No action required.
<b>INMPEI0055</b>	<b>Object type of {0} - {1} is not LCM-enabled</b>
<b>Explanation</b>	The type of the registry object is not lifecycle-enabled. 0 - Name of the object 1 - Type name of the object.
<b>Action</b>	No action required.
<b>INMPEI0056</b>	<b>{0} {1} was triggered to change activation to {2}</b>
<b>Explanation</b>	The registry object has been triggered to change activation to Active/Inactive. 0 - Type name of the object 1 - Name of the object 2 - Change activation to Active/Inactive.
<b>Action</b>	No action required.
<b>INMPEI0058</b>	<b>{0} {1} belongs to state {2} which conforms to the allowed states {3}</b>
<b>Explanation</b>	The lifecycle state of the registry object is validated against the allowed states specified in the policy. 0 - Type name of the registry object 1 - Name of the registry object 2 - Current state name of the registry object 3 - Allowed states specified in the policy.
<b>Action</b>	No action required.
<b>INMPEI0060</b>	<b>State change to {0} is not applicable for {1} {2}</b>
<b>Explanation</b>	The state change to the specified state is not applicable for the given object. 0 - Change to state name specified in the policy 1 - Type of the registry object 2 - Name of the registry object.
<b>Action</b>	No action required.
<b>INMPEI0061</b>	<b>State change to {0} is initiated for {1} {2}</b>
<b>Explanation</b>	The state change to the specified state has been initiated for the given object. 0 - Change to state name specified in the policy 1 - Type of the registry object 2 - Name of the registry object.
<b>Action</b>	No action required.

<b>INMPEI0062</b>	<b>{0} {1} cannot be applied role groups policy</b>
<b>Explanation</b>	Role groups policy can be applied only to user objects. 0 - Type of the registry object 1 - Name of the registry object.
<b>Action</b>	No action required
<b>INMPEI0063</b>	<b>User {0} was added or removed from group {1}</b>
<b>Explanation</b>	The given user was added or removed from the specified group. 0 - Name of the user 1 - Name of the group where the user was added or removed.
<b>Action</b>	No action required.
<b>INMPEI0065</b>	<b>{0} {1} has value {2} set for attribute {3} which conforms to the allowed values {4}</b>
<b>Explanation</b>	For the specified attribute of the given registry object, a value has been set which conforms to the allowed values. 0 - Type of the registry object 1 - Name of the registry object 2 - Attribute value of the registry object 3 - Attribute name specified in the policy 4 - Allowed attribute values specified in the policy.
<b>Action</b>	No action required.
<b>INMPEI0067</b>	<b>Attribute {2} of {0} {1} was set to value {3}</b>
<b>Explanation</b>	The specified attribute of the registry object was set to the specified value. 0 - Type of the registry object 1 - Name of the registry object 2 - Attribute name specified in the policy 3 - Attribute value specified in the policy.
<b>Action</b>	No action required
<b>INMPEI0068</b>	<b>LC Model {0}'s enabled object type instances were initiated into initial state {1}</b>
<b>Explanation</b>	The instances of the object types which are LCM enabled by the given LC Model have been triggered to change to the initial state of the LC Model. 0 - Name of the LC Model 1 - Name of the initial state of the LC Model.
<b>Action</b>	No action required
<b>INMPEI0076</b>	<b>Default instance level permissions for Target {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given target. 0 - Name of the target
<b>Action</b>	No action required.

<b>INMPEI0077</b>	<b>Default instance level permissions for Lifecycle State {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given lifecycle state. 0 - Name of the lifecycle state.
<b>Action</b>	No action required.
<b>INMPEI0078</b>	<b>Default instance level permissions for Asset Type {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given asset type. 0 - Name of the asset type.
<b>Action</b>	No action required.
<b>INMPEI0079</b>	<b>Default instance level permissions for Taxonomy {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given taxonomy. 0 - Name of the taxonomy.
<b>Action</b>	No action required.
<b>INMPEI0080</b>	<b>Default instance level permissions for Event Type {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given event type. 0 - Name of the event type
<b>Action</b>	No action required.
<b>INMPEI0081</b>	<b>Default instance level permissions for Profile {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given profile. 0 - Name of the profile
<b>Action</b>	No action required.
<b>INMPEI0082</b>	<b>Default instance level permissions for UDDI Subscription {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given UDDI subscription. 0 - Name of the UDDI subscription
<b>Action</b>	No action required.
<b>INMPEI0083</b>	<b>Default instance level permissions for Federation {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given federation. 0 - Name of the federation.
<b>Action</b>	No action required.

<b>INMPEI0084</b>	<b>Default instance level permissions for Concept {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given concept. 0 - Name of the concept.
<b>Action</b>	No action required.
<b>INMPEI0085</b>	<b>Taxonomy {0} instance level permissions were assigned successfully to its child objects</b>
<b>Explanation</b>	The instance level permissions of the taxonomy were successfully assigned to its children concepts. 0 - Name of the taxonomy.
<b>Action</b>	No action required.
<b>INMPEI0086</b>	<b>Policy {0} instance level permissions were assigned successfully to its child objects</b>
<b>Explanation</b>	Policy has child objects like Policy Condition and Policy Parameter. When we assign the instance level permission to a Policy, the permission should be assigned also to its child objects. The message states that this action was performed successfully.
<b>Action</b>	No action required.
<b>INMPEI0088</b>	<b>User {0} is not active</b>
<b>Explanation</b>	The user is not active and hence can be deleted. 0 - Name of the user.
<b>Action</b>	No action required.
<b>INMPEI0095</b>	<b>Pending state transition was terminated by CSA</b>
<b>Explanation</b>	The CentraSite administrator has terminated the pending state transition on the registry object.
<b>Action</b>	No action required.
<b>INMPEI0103</b>	<b>Organization Primary Contact is an active user</b>
<b>Explanation</b>	The primary contact of the organization is an active user and hence the validation for updating the organization is successful.
<b>Action</b>	No action required.
<b>INMPEI0119</b>	<b>Default instance level permissions for ConsumerRegistrationRequest {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions for the consumer registration request were assigned successfully. 0 – Name of the consumer registration request.
<b>Action</b>	No action required.

<b>INMPEI0134</b>	<b>Default instance level permissions for ExternalLink {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given external link. 0 - Name of the external link.
<b>Action</b>	No action required.
<b>INMPEI0135</b>	<b>Default instance level permissions for ExtrinsicObject {0} were assigned successfully</b>
<b>Explanation</b>	Default instance level permissions were successfully assigned for the given extrinsic object. 0 - Name of the extrinsic object.
<b>Action</b>	No action required.
<b>INMPEI0137</b>	<b>Collector was successfully executed for {0} {1}</b>
<b>Explanation</b>	The collector policy was executed successfully for the given object. 0 - Type of the object 1 - Name of the object.
<b>Action</b>	No action required.
<b>INMPEI0138</b>	<b>Default delete handler was successfully executed for {0} {1}</b>
<b>Explanation</b>	The default delete handler policy was executed successfully for the given object. 0 - Type of the object 1 - Name of the object.
<b>Action</b>	No action required.
<b>INMPEI0140</b>	<b>WSDL regeneration skipped for Service {0} since the service is not a VirtualService, VirtualXMLService or VirtualRESTService</b>
<b>Explanation</b>	WSDL regeneration can be performed only for a virtual service, virtual XML service or virtual REST service.
<b>Action</b>	Make sure the asset is a virtual service, virtual XML service or virtual REST service.
<b>INMPEI0141</b>	<b>{0} {1} moved successfully</b>
<b>Explanation</b>	The registry object has been moved successfully to the new owner and/or organization. 0 - Type of the registry object 1 - Name of the registry object.
<b>Action</b>	No action required.
<b>INMPEI0147</b>	<b>Registry Object {0} has been validated successfully against its mandatory attributes of type Classification, File and Relationship</b>
<b>Explanation</b>	All the mandatory classification, file and relationship attributes for the given registry object have been populated. 0 - Name of the registry object.
<b>Action</b>	No action required.

<b>INMPEI0155</b>	<b>Profile permissions for {0} {1} were assigned successfully</b>
<b>Explanation</b>	The profile level permissions for the given registry object were successfully assigned.
<b>Action</b>	No action required.
<b>INMPEI0158</b>	<b>Organization export handler was successfully executed for {0}</b>
<b>Explanation</b>	The organization export handler was executed successfully for the given organization.
<b>Action</b>	No action required.
<b>INMPEI0159</b>	<b>Taxonomy/Concept export handler was successfully executed for {0} {1}</b>
<b>Explanation</b>	The Taxonomy/Concept export handler was executed successfully for the given object.
<b>Action</b>	No action required.
<b>INMPEI0160</b>	<b>Default export handler was successfully executed for {0} {1}</b>
<b>Explanation</b>	The default export handler policy was executed successfully for the given object. 0 - Type of the object 1 - Name of the object.
<b>Action</b>	No action required.
<b>INMPEI0161</b>	<b>Asset type export handler was successfully executed for {0} {1}</b>
<b>Explanation</b>	The asset type export handler policy was executed successfully for the given object. 0 - Type of the object 1 - Name of the object.
<b>Action</b>	No action required.
<b>INMPEI0164</b>	<b>Metrics does not contain serviceKey hence will not be saved in Runtime Metrics Collection</b>
<b>Explanation</b>	Metrics must be saved against a service. But the user is trying to save a metrics object without classifying it with a proper service key. This metrics will be discarded.
<b>Action</b>	Please classify the metrics objects with the classificationScheme "uddi:centrasite.com:management:service.key". The value of the classification must be the key of the service to which the metrics belongs.
<b>INMPEI0168</b>	<b>The required permissions are already available for {0} {1}</b>
<b>Explanation</b>	The permissions to be set by the policy are already available in the registry object. 0 - Type of the registry object 1 - Name of the registry object.
<b>Action</b>	No action required.

<b>INMPEI0169</b>	<b>Request Approval Flow {0} for {1} was automatically approved</b>
<b>Explanation</b>	The approval flow for the registry object was automatically approved since the triggering user is part of the approver group.
<b>Action</b>	No action required.
<b>INMPEI0170</b>	<b>CentraSite does not contain an object of type {0} and with name {1}</b>
<b>Explanation</b>	The policy executed successfully, since CentraSite does not contain an object of the specified type and with specified name.
<b>Action</b>	No action required.
<b>INMPEI0171</b>	<b>CentraSite already contains an object of type {0} and with name {1}</b>
<b>Explanation</b>	This policy enforces uniqueness in names of the object. As the user tried to create an object using a name which already exists in CentraSite, this policy failed.
<b>Action</b>	Please use a different name
<b>INMPEI0173</b>	<b>Notified Webservice endpoint {0} hosted in application server {1} successfully.</b>
<b>Explanation</b>	A Webservice request has been published to the endpoint successfully.
<b>Action</b>	No action required.
<b>INMPEI0174</b>	<b>Failed to notify Webservice endpoint {0} hosted in application server {1}: Error Message {2}</b>
<b>Explanation</b>	The Webservice request could not be published to the specified endpoint.
<b>Action</b>	Provide a valid webservice endpoint which can accept the SOAP message configured in the notify policy.
<b>INMPEI0177</b>	<b>{0} {1} has kept the current LCM state</b>
<b>Explanation</b>	The LCM state has been retained during the import.
<b>Action</b>	No action required.
<b>INMPEI0178</b>	<b>Successfully deleted the rest service of IS Service Interface '{0}'</b>
<b>Explanation</b>	Rest service deletion has completed successfully while retracting the IS Service Interface from the Designer.
<b>Action</b>	No action required.

<b>INMPEI0179</b>	<b>Failed to delete the rest service '{0}' ({1}) used by IS Service Interface '{2}'</b>
<b>Explanation</b>	The deletion of the Rest Service failed while retracting the IS Service Interface from the Designer.
<b>Action</b>	No action required.
<b>INMPEI0182</b>	<b>IS Service Interface {0} object has been transformed successfully into REST service {1}.</b>
<b>Explanation</b>	The IS Service Interface object has been transformed successfully into a REST service in CentraSite.
<b>Action</b>	No action required.
<b>INMPEI0183</b>	<b>The given object {0} does not contain the state</b>
<b>Explanation</b>	The given object 0 does not contain the state.
<b>Action</b>	No action required.
<b>INMPEI0186</b>	<b>Target Group not applicable for the operation</b>
<b>Explanation</b>	The target group is not applicable for the operation.
<b>Action</b>	No action required.
<b>INMPEI0187</b>	<b>Target Group created for the Target</b>
<b>Explanation</b>	The target group was created for the target.
<b>Action</b>	No action required.
<b>INMPEI0188</b>	<b>Target Group not created for the Target</b>
<b>Explanation</b>	The target group was not created for the target.
<b>Action</b>	No action required.
<b>INMPEI0189</b>	<b>{0} {1} promoted successfully</b>
<b>Explanation</b>	The registry object has been promoted successfully to the specified target stage. 0 - Type of the registry object 1 - Name of the registry object.
<b>Action</b>	No action required.

<b>INMPEI0191</b>	<b>Not updating Consumer WSDL for VirtualService {0} as it does not contain WSDL or Consumer WSDL is already contains the proper WSDL file.</b>
<b>Explanation</b>	The Consumer WSDL attribute will not get updated if the Virtual Service does not have WSDL associated with it. Also the attribute will get updated if it contains the proper value in it.
<b>Action</b>	No Action Required, as this policy get triggered when WSDL is attached to the Virtual Service
<b>INMPEI0193</b>	<b>Consumer WSDL attribute is populated with proper WSDL</b>
<b>Explanation</b>	Policy Action successfully executed by populated the Consumer WSDL attribute with proper WSDL
<b>Action</b>	No action required
<b>INMPEI0194</b>	<b>Not updating Consumer WSDL for {0} since it is not a Service</b>
<b>Explanation</b>	Consumer WSDL attribute is applicable only for Virtual Service and hence it can't be updated for other objects
<b>Action</b>	Please make sure applicable object for "Consumer WSDL Generator" policy is set only to Virtual Service
<b>INMPEI0201</b>	,
<b>Explanation</b>	This is a user display name separator.
<b>Action</b>	No action required.
<b>INMPEI0202</b>	{0} {1} {2}
<b>Explanation</b>	This is a user display name.
<b>Action</b>	No action required.
<b>INMPEI0203</b>	<b>Ownership of {0} {1} was changed successfully to user {2}</b>
<b>Explanation</b>	The ownership of the given asset was changed successfully to the specified user. 0 - Type of the object; 1 - Name of the object; 2 - New owner of the object.
<b>Action</b>	No action required.

<b>INMPEI0205</b>	<b>{0} of type {1} has been validated for all mandatory Slot, Classification, File and Relationship attribute types.</b>
<b>Explanation</b>	The "required" attributes of the registry object {0} of type {1} have been identified and all such "required" attributes have been provided with values.
<b>Action</b>	No action required.
<b>INMPEI0207</b>	<b>The API Key is deployed successfully to target {0}</b>
<b>Explanation</b>	The specified API key was successfully deployed to the specified target.
<b>Action</b>	No action required.
<b>INMPEI0208</b>	<b>A new API Key is generated.</b>
<b>Explanation</b>	A new API key has been generated.
<b>Action</b>	No action required.
<b>INMPEI0209</b>	<b>Onboarded user {0} proceeds with consume API request for {1}</b>
<b>Explanation</b>	The onboarding of the user was successful, and the consume API request for the API has been triggered.
<b>Action</b>	User registration completion information will be sent as an email.
<b>INMPEI0213</b>	<b>Onboarding User {0} in Organization {1} is successful</b>
<b>Explanation</b>	Onboarding of the user in API Management solution was successful.
<b>Action</b>	The Consume API request will be generated automatically for the onboarded user.
<b>INMPEI0214</b>	<b>Onboarding Organization {0} with Administrator User {1} is successful</b>
<b>Explanation</b>	Onboarding of the given Organization with the given User in API Management solution was successful.
<b>Action</b>	The Consume API request will be generated automatically for the the onboarded administrator user.
<b>INMPEI0215</b>	<b>Congratulations from API management team</b>
<b>Explanation</b>	Email subject for successful onboarding of user.
<b>Action</b>	No action.

<b>INMPEI0216</b>	<b>API key deleted successfully from target {0}.</b>
<b>Explanation</b>	The API key is deleted successfully from the target {0}.
<b>Action</b>	None. Informational only.
<b>INMPEI0220</b>	<b>WSDL regeneration skipped for virtual service {0} as WSDL related objects are not modified.</b>
<b>Explanation</b>	WSDL regeneration is needed only if JAXR binding is updated, else WSDL update not required. CentraSite updates it only if it really required.
<b>Action</b>	No action required.
<b>INMPEI0221</b>	<b>API key has been renewed successfully.</b>
<b>Explanation</b>	API key has been renewed successfully.
<b>Action</b>	No action required
<b>INMPEI0232</b>	<b>OAuth2 Client is revoked successfully.</b>
<b>Explanation</b>	The OAuth2 Client was revoked successfully.
<b>Action</b>	No action required.
<b>INMPEI0235</b>	<b>Swagger2.0 file is generated successfully for the API {0}.</b>
<b>INMPEW0028</b>	<b>WSDL URL is empty for {0}</b>
<b>Explanation</b>	The service WSDL URL is empty. 0 - Name of the service.
<b>Action</b>	Please ensure that the service has a WSDL URL.
<b>INMPEW0172</b>	<b>Could not send notification to application server as it is not configured with APG_SERVICE_ENDPOINT</b>
<b>Explanation</b>	The notification will be send only if the application server is configured with APG_SERVICE_ENDPOINT in the object specific property.
<b>Action</b>	Configure a valid webservice endpoint to the application server which is associated to the registry object.

<b>INMPEW0192</b>	<b>Consumer WSDL attribute is not found Virtual Service type</b>
<b>Explanation</b>	This policy action will update the Consumer WSDL attribute with WSDL which may contain WS Policy in it. So this policy action requires Consumer WSDL attribute
<b>Action</b>	Please make sure Consumer WSDL file attribute exists for Service type
<b>INMPEW0217</b>	<b>Failed to delete API key from target {0} .</b>
<b>Explanation</b>	The specified API key could not be deleted from the target {0}. This problem can occur because the requestor does not have the required permisison to delete API key.
<b>Action</b>	Only a user with Administrator role can delete API key from targets.
<b>INMPEW0219</b>	<b>You can revoke an access token only once.</b>
<b>Explanation</b>	The access token is revoked twice.
<b>Action</b>	Revoke an access token only once.
<b>INMPEW0233</b>	<b>Failed to revoke OAuth2 Client from Mediator.</b>
<b>Explanation</b>	Could not revoke the OAuth2 Client from the specified Mediator. There could be multiple reasons why this might have occurred: (1) Integration Server on which Mediator is running is down or inaccessible (2) invalid user credentials (3) application error on the Integration Server.
<b>Action</b>	Make sure the Integration Server on which Mediator is up and running, and the user credentials are correct.
<b>INMPUE0003</b>	<b>Action category and action template types are mismatched</b>
<b>Explanation</b>	For a design time/ change time category, the action template type should be programmatic. If the action template type does not match the design time/ change time category, this causes an error.
<b>Action</b>	Ensure that the action category and action template types are matched.
<b>INMPUE0006</b>	<b>Action template name already exists</b>
<b>Explanation</b>	An action template name should be unique across the system, otherwise this will create confusion for the user. So this error occurs if a user tries to create an action template with a name that is already in use.
<b>Action</b>	Use a different action template name.

<b>INMPUE0015</b>	<b>WS-I actions cannot be combined with other actions</b>
<b>Explanation</b>	While creating a policy, WS-I actions should not be combined with other actions. If a user tries to do so, this problem will happen.
<b>Action</b>	WS-I actions cannot be combined with other actions.
<b>INMPUE0020</b>	<b>Reordering multiple actions is not allowed</b>
<b>Explanation</b>	While assigning actions to the policy, a user can re-order the actions. If the user tries to re-order multiple actions at a time, this error will be thrown.
<b>Action</b>	Reordering multiple actions is not allowed.
<b>INMPUE0028</b>	<b>Select an action to move</b>
<b>Explanation</b>	If a user tries to re-order the actions without selecting anything, this error will be thrown. For this the user has to first select any action and then do the re-ordering.
<b>Action</b>	Select an action to move.
<b>INMPUE0029</b>	<b>Action category with name {0} already available</b>
<b>Explanation</b>	Action category names are unique across the system. If a user tries to create an action category with a name that exists already, this error will be thrown.
<b>Action</b>	Enter a valid action category name.
<b>INMPUE0030</b>	<b>Provide the URL of ZIP file</b>
<b>Explanation</b>	When creating an action template with the selected rule type of Java, the user has to provide a valid zip file, otherwise this error will be thrown.
<b>Action</b>	Enter the URL of the ZIP file.
<b>INMPUE0032</b>	<b>Set Profile Permission action cannot be applied to multiple object types</b>
<b>Explanation</b>	If the policy applies to multiple object types, then the set profile permission action cannot be applied
<b>Action</b>	Change the object types or create a new policy with a single object type
<b>INMPUE0033</b>	<b>Provide the correct Attribute Values</b>
<b>Explanation</b>	The attribute value provided is incorrect for the chosen type.
<b>Action</b>	Provide the correct attribute value for the chosen type.

<b>INMPUE0034</b>	<b>You must specify a value for Attribute Name</b>
<b>Explanation</b>	The required value for the duration attribute name is missing.
<b>Action</b>	Supply a correct value for the duration attribute name.
<b>INMRAE0001</b>	<b>Cannot obtain {0} from closed Resource Access Manager.</b>
<b>Explanation</b>	The Resource Access Manager is closed and thus not yet initialized.
<b>Action</b>	Make sure that the Resource Access Manager is opened before using it.
<b>INMRAE0002</b>	<b>No configuration set.</b>
<b>Explanation</b>	No configuration info set was found.
<b>Action</b>	Please provide a configuration info set. Refer to the Resource Access javadoc for additional information.
<b>INMRAE0003</b>	<b>No valid credentials found.</b>
<b>Explanation</b>	No valid credentials were found.
<b>Action</b>	Please provide valid credentials.
<b>INMRAE0004</b>	<b>Found {0} while expecting instance of XmlServerRoleManager.</b>
<b>Explanation</b>	Failed authentication against CentraSite server or absence of XmlServerLoginModule from security configuration.
<b>Action</b>	Check logs and security configuration.
<b>INMRAE0005</b>	<b>SagRoleManagementPrincipal instance not available for the authenticated subject.</b>
<b>Explanation</b>	The SagRoleManagementPrincipal security artefact is missing.
<b>Action</b>	Check the security configuration.
<b>INMRAE0006</b>	<b>Authenticated Subject cannot be null.</b>
<b>Explanation</b>	After successful authentication, the Subject instance was not found.
<b>Action</b>	Contact your software supplier.
<b>INMRAE0007</b>	<b>No representation of the Group to be associated in external user repository.</b>
<b>Explanation</b>	The external group, to be associated with a local group, is no longer present in the external repository.
<b>Action</b>	External user repositories are managed outside of CentraSite.

<b>INMRAE0008</b>	<b>Error during System level permission copy.</b>
<b>Explanation</b>	Error during System level permission copy.
<b>Action</b>	Contact your software supplier.
<b>INMRAE0009</b>	<b>An organization must be set.</b>
<b>Explanation</b>	A permission has to belong to an organization.
<b>Action</b>	Assign an organization to the permission instance.
<b>INMRAE0010</b>	<b>Organization level permission needs to have a corresponding system level permission.</b>
<b>Explanation</b>	An organization level permission needs to have a corresponding system level permission.
<b>Action</b>	Assign the system level permission to the organization level permission instance.
<b>INMRAE0011</b>	<b>A Role needs to belong to an Organization.</b>
<b>Explanation</b>	A role needs to belong to an organization.
<b>Action</b>	Assign an organization to the role instance.
<b>INMRAE0012</b>	<b>The user does not have a working Organization set.</b>
<b>Explanation</b>	The user does not have a working organization set.
<b>Action</b>	Set the working organization of the user.
<b>INMRAE0013</b>	<b>Roles can be assigned only to registered users.</b>
<b>Explanation</b>	Roles can be assigned only to registered users associated with an external user repository.
<b>Action</b>	Register a user instance to CentraSite.
<b>INMRAE0014</b>	<b>Unsupported collection type.</b>
<b>Explanation</b>	The passed collection is of an unsupported type.
<b>Action</b>	The collection expected is a list-backed one.

<b>INMRAE0015</b>	<b>Got {0} while expecting {1}</b>
<b>Explanation</b>	Passed in Registry Object instance is not of group type.
<b>Action</b>	Make sure that passed in Registry Object instance is of group type.
<b>INMRAE0016</b>	<b>Cannot obtain external user repository type.</b>
<b>Explanation</b>	Cannot retrieve the currently effective external user repository type.
<b>Action</b>	Check the security configuration.
<b>INMRAE0017</b>	<b>Unsupported external user repository type {0}.</b>
<b>Explanation</b>	The currently effective external user repository type is unknown.
<b>Action</b>	Check the security configuration.
<b>INMRAE0018</b>	<b>Currently effective external user repository type {0} does not support custom predicate.</b>
<b>Explanation</b>	Currently effective external user repository type does not support custom predicate.
<b>Action</b>	Use predicates instead.
<b>INMRAE0019</b>	<b>Currently effective external user repository type {0} does not support predicates.</b>
<b>Explanation</b>	Currently effective external user repository type does not support predicates.
<b>Action</b>	Use custom predicate instead.
<b>INMRAE0020</b>	<b>SagUserPrincipal instance not available for the authenticated subject.</b>
<b>Explanation</b>	The SagUserPrincipal security artefact is missing. It is possible that authentication against the external user repository is not performed, for example internal user accounts such as the Guest user account.
<b>Action</b>	Check the security configuration.
<b>INMRAE0021</b>	<b>PersonName must be added</b>
<b>Explanation</b>	A user instance must have PersonName.
<b>Action</b>	When creating a User object, the first name, middle name and last name of the user object need to be provided.

<b>INMSOE0001</b>	<b>HTTP Routing Protocol not enabled</b>
<b>Explanation</b>	During configuration of routing protocol, if any of the routing types are StraightThrough/LoadBalance/ContentBased/ContextBased routing, then the transport of the routing should be HTTP enabled.
<b>Action</b>	Enable the HTTP transport for routing protocol.
<b>INMSOE0002</b>	<b>JMS Routing Protocol not enabled</b>
<b>Explanation</b>	During configuration of the routing protocol, if the routing type is JMS routing, then the transport of the routing should be JMS enabled.
<b>Action</b>	Enable the JMS transport for routing protocol.
<b>INMSOE0007</b>	<b>TargetType definition file missing</b>
<b>Explanation</b>	The input JAR file provided does not contain the relevant TargetType definition XML.
<b>Action</b>	Add the relevant TargetType definition XML to the input JAR file.
<b>INMSOE0008</b>	<b>Transformation definition file missing</b>
<b>Explanation</b>	The input JAR file provided does not contain the relevant transformation file.
<b>Action</b>	Add the relevant transformation file to the input JAR file.
<b>INMSOE0010</b>	<b>Target Type name should not be empty</b>
<b>Explanation</b>	The input JAR file provided does not contain the target type name in the Target Type Definition file.
<b>Action</b>	Provide the Target Type name.
<b>INMSOE0011</b>	<b>Event Type definition file missing</b>
<b>Explanation</b>	The input JAR file provided does not contain the relevant Event Type definition.
<b>Action</b>	Add the relevant Event Type definition to the input JAR file.
<b>INMSOE0012</b>	<b>Target Type name already exists</b>
<b>Explanation</b>	The Target Type already exists with the provided name in Target Type definition file.
<b>Action</b>	Change the Target Type name.

<b>INMSOE0013</b>	<b>Service WSDL does not contain the WSDL Service Element</b>
<b>Explanation</b>	The imported WSDL does not contain the service element.
<b>Action</b>	Make sure service element is present in the service WSDL.
<b>INMSOE0015</b>	<b>Service WSDL is mandatory for deployment operations</b>
<b>Explanation</b>	The WSDL is not present for the created virtual service.
<b>Action</b>	Make sure the created virtual service contains the WSDL.
<b>INMSOE0016</b>	<b>Deployment activity {0} is the current activity log for {1} {2}</b>
<b>Explanation</b>	An activity log which is the latest deployment log for a deployed asset cannot be deleted.
<b>Action</b>	Unselect the particular deployment log from the deployment history before deleting other old entries.
<b>INMSOE0019</b>	<b>The consumer application defined in the routing rule of the asset is no longer available in CentraSite. Specify a valid consumer application in the routing rule.</b>
<b>Explanation</b>	The consumer application used as part of the context based routing condition of the asset to be deployed is not available in the CentraSite Repository.
<b>Action</b>	Provide a valid consumer application in the routing rule.
<b>INMSOE0020</b>	<b>Data type mismatch during attribute mapping for RuntimeEventType: {0}. Expected data type for attribute {1} is {2}, while the supplied data type is {3}.</b>
<b>Explanation</b>	This exception is thrown when a data type mismatch is encountered when mapping SNMP Trap attributes from EventType.xml to RuntimeEventType attributes.
<b>Action</b>	Ensure the data type matches.
<b>INMSOE0021</b>	<b>Entry protocol not defined for asset {0}</b>
<b>Explanation</b>	The inbound transport information is not defined for the asset to be deployed to the Mediator.
<b>Action</b>	Configure the entry protocol in the processing steps profile of the asset to be deployed.
<b>INMSOE0022</b>	<b>WSDL not found for native service</b>
<b>Explanation</b>	A WSDL is not available for the native service to be virtualized.
<b>Action</b>	Attach the WSDL for the native service to be virtualized.

<b>INMSOE0023</b>	<b>Cannot virtualized this WebService since the service does not contain any wsdl:bindings</b>
<b>Explanation</b>	Service must contain at least one service binding, otherwise it cannot be virtualized
<b>Action</b>	Getting error while virtualizing the service without service binding
<b>INMSOE0027</b>	<b>TrapOID (Object Identifier) {0} is duplicated in the EventType.xml inside the provided Target Type definition jar file</b>
<b>Explanation</b>	During target type creation, if the SNMP Trap OID is duplicated in EventType.xml, this exception is thrown.
<b>Action</b>	SNMP Trap OIDs should be unique within and across target types.
<b>INMSOE0028</b>	<b>TrapOID {0} already defined in existing Target Type {1}</b>
<b>Explanation</b>	During target type creation, if the SNMP Trap OID is already present in an existing target type, this exception is thrown.
<b>Action</b>	SNMP Trap OIDs should be unique within and across target types.
<b>INMSOE0031</b>	<b>Scoped Virtual Service deployment will not be triggered since dependent assertion {0} does not exist</b>
<b>Explanation</b>	Scoped Virtual Service deployment will not be triggered since some of the dependent assertions are missing in the Runtime Policy.
<b>Action</b>	Ensure dependent assertions exist.
<b>INMSOE0033</b>	<b>Scoped Virtual Service deployment will not be triggered since dependent assertion {0} does not exist</b>
<b>Explanation</b>	Virtual Service will have policies associated with it. These policies may be dependent on other policies. If the dependent policies are not applied for the virtual service, this exception will arise.
<b>Action</b>	Please create the dependent runtime policy and make sure it is applicable for the virtual service to be deployed.
<b>INMSOE0036</b>	<b>Error in API Key Creation</b>
<b>Explanation</b>	An error occurred while creating an API Key instance.
<b>Action</b>	Check if there are any related messages in the log to determine the cause of the problem.

<b>INMSOE0037</b>	<b>Mandatory parameters are not present for creation of API Key instance</b>
<b>Explanation</b>	Mandatory parameters were not provided while creating API Key object
<b>Action</b>	Provide the mandatory parameters.
<b>INMSOE0039</b>	<b>Invalid parameter {0} is selected which is not supported in the version of Mediator installed</b>
<b>Explanation</b>	The version of mediator to which the asset is being deployed does not support the parameter {0}.
<b>Action</b>	Change the parameter to one that is supported in the mediator version installed.
<b>INMSOE0041</b>	<b>Error occurred during creation of OAuth2 Client asset</b>
<b>Explanation</b>	An error was encountered while creating the OAuth2 Client asset.
<b>Action</b>	Check if there are any related messages in the log to determine the cause of the problem.
<b>INMSOE0042</b>	<b>Mandatory parameters are missing for creation of OAuth2 client instance</b>
<b>Explanation</b>	Mandatory parameters were missing while creating OAuth2 client object.
<b>Action</b>	Check if the mandatory parameters 'Service' and 'Consumer' are missing.
<b>INMSOE0043</b>	<b>Cannot enforce evaluate actions ApiKey and OAuth2 for the service.</b>
<b>Explanation</b>	When both API Keys and OAuth2 are enforced for an API in AND condition, this exception is thrown.
<b>Action</b>	Change the enforce condition to OR.
<b>INMSOE0044</b>	<b>Deployment of the Virtual Service failed. Check the Integration Server log.</b>
<b>Explanation</b>	The deployment of the Virtual Service has failed.
<b>Action</b>	Check the Integration Server log.
<b>INMSOE0045Error</b>	<b>You might not be authorized to view the runtime alias type</b>
<b>Explanation</b>	Alias Key Name Map is not initialized.
<b>Action</b>	Check if you have permission to use the alias type.

<b>INMSOE0049Error</b>	<b>Default value not specified for the runtime alias. CentraSite cannot save the alias.</b>
<b>Explanation</b>	CentraSite cannot save the runtime alias because the default value for the alias is not specified.
<b>Action</b>	Retry after you specify a default value for the runtime alias.
<b>INMSOE0050Error</b>	<b>Provide values in the fields for the runtime target: {0}</b>
<b>Explanation</b>	You are trying to associate a target to a runtime alias which has no values specified in the fields.
<b>Action</b>	Retry after you have provided target-specific values for the runtime alias fields.
<b>INMSOE0053Error</b>	<b>CentraSite does not support alias deployment for runtime target Mediator version {0}. Runtime alias deployment is supported only for Mediator version {1} and above.</b>
<b>Explanation</b>	CentraSite cannot deploy runtime aliases because they are not support in the Mediator version installed.
<b>Action</b>	If you would like to create and deploy runtime aliases, upgrade to Mediator 9.7
<b>INMSOE0054</b>	<b>Alias with name {0} already exists. Provide a different name.</b>
<b>Explanation</b>	CentraSite cannot have aliases with same name as this will have issues when it is deployed to the same Mediator.
<b>Action</b>	Provide a different name for alias and save it.
<b>INMSOE0055Error</b>	<b>Runtime alias is already deployed to target(s). You must disassociate the alias from the services and undeploy it before you change the alias name.</b>
<b>Explanation</b>	You are trying to change the alias name of a runtime alias that is already deployed to its target(s).
<b>Action</b>	Disassociate the alias from the services and undeploy it before you change the alias name.
<b>INMSOE0056Error</b>	<b>Runtime alias not found. Alias name: {0}</b>
<b>Explanation</b>	You are trying to use a runtime alias that is not defined in CentraSite.
<b>Action</b>	Check if the alias is defined in CentraSite or use an alias that is already defined.

<b>INMSOE0057Error</b>	<b>The authentication type in the secure alias does not match the authentication type in the virtual service. Secure alias: {0}, virtual service: {1}. Check the authentication type of the secure alias that you published and change it to match the authentication type used in the virtual service</b>
<b>Explanation</b>	The authentication type specified in the secure alias does not match with the outbound authentication policy specified in CentraSite.
<b>Action</b>	Check the authentication type of the secure alias that you published and change it to match the authentication type used in the virtual service.
<b>INMSOE0058</b>	<b>Target does not support deployment of REST services with more than one resource and/or tokenized routing endpoints.</b>
<b>Explanation</b>	Older Mediators before version 9.7 do not support more than one REST resource and tokenized routing endpoints.
<b>Action</b>	Make sure that you deploy to a newer version of Mediator.
<b>INMSOE0059</b>	<b>Invalid deployment endpoint.</b>
<b>Explanation</b>	The deployment endpoint is not valid.
<b>Action</b>	Provide a valid deployment endpoint.
<b>INMSOE0061</b>	<b>HTTP protocol is not supported for Kerberos. Select HTTPS protocol only.</b>
<b>Explanation</b>	HTTP protocol is not supported for Kerberos. Only, HTTPS protocol is supported.
<b>Action</b>	Select HTTPS protocol only during virtualization.
<b>INMSOE0062</b>	<b>The Custom Error Variable name field must not be empty.</b>
<b>Explanation</b>	You have not entered a name while adding a Custom Error Variable in the Conditional Error Processing step.
<b>Action</b>	Enter a name for the Custom Error Variable.
<b>INMSOE0063</b>	<b>The Custom Error Variable Xpath expression cannot be empty.</b>
<b>Explanation</b>	You have not entered an Xpath expression while adding Custom Error Variable in the Conditional Error Processing step.
<b>Action</b>	Provide an Xpath expression for the Custom Error Variable.

<b>INMSOE0064</b>	<b>Gateway with version {0} does not support OData services.</b>
<b>Explanation</b>	The gateway is too old for deploying OData services.
<b>Action</b>	Use a newer gateway (>= 9.10)
<b>INMSOE0065</b>	<b>Service {0} is not of supported type for {1}.</b>
<b>Explanation</b>	The service is not supported for the give action. This is an internal problem.
<b>Action</b>	Check the type of service.
<b>INMSOE0066</b>	<b>VSD cannot be generated for virtual service {0}.</b>
<b>Explanation</b>	The VSD document of a virtual service cannot be generated due to internal problems.
<b>Action</b>	Check the details of the virtual service.
<b>INMSOE0067</b>	<b>Gateway with version {0} does not support the HTTP PATCH method for REST service {1}.</b>
<b>Explanation</b>	The deployed REST service exposes the HTTP PATCH method, which is not supported by this version of Mediator.
<b>Action</b>	Deploy the REST service with HTTP PATCH method to a newer version of Mediator.
<b>INMSOE0068</b>	<b>The REST service {0} uses the HTTP PATCH method, however the deployment mode is not set to "axis-free".</b>
<b>Explanation</b>	The REST service {0} uses the HTTP PATCH method, however the deployment mode is not set to "axis-free". This is because only the axis-free deployment mode supports the PATCH method.
<b>Action</b>	Check if you can activate the axis-free deployment mode in centrasite.xml.
<b>INMSOE0069</b>	<b>Incompatible gateway types.</b>
<b>Explanation</b>	The gateway types of the CentraSite registry object and the running instance are not the same type.
<b>Action</b>	Check your running target and the CentraSite gateway object.
<b>INMSOE0070</b>	<b>REST service deployment to API Gateway requires "axis-free" setting.</b>
<b>Explanation</b>	REST service deployment to API Gateway is only supported if the CentraSite deployment mode was set to axis-free.
<b>Action</b>	Configure the axis-free mode in CentraSite.

<b>INMSOE0072</b>	<b>Connection to deployment endpoint failed {0}.</b>
<b>Explanation</b>	This occurs if no connection can be established to the deployment endpoint defined in a target during deployment/undeployment/synconsumers operations. This could be because the deployment endpoint is down or the credentials used for accessing the deployment endpoint are incorrect.
<b>Action</b>	Check if the deployment endpoint is up and running. Also check if the credentials defined in the target for accessing the deployment endpoint are correct.
<b>INMSOE0073</b>	<b>Gateway not active or accessible.</b>
<b>Explanation</b>	The selected gateway is not active or accessible.
<b>Action</b>	Check the accessibility of gateway.
<b>INMSOE0074</b>	<b>Invalid credentials</b>
<b>Explanation</b>	Invalid username or password specified for accessing the gateway.
<b>Action</b>	Check the username and password for accessing the gateway.
<b>INMSOE0075</b>	<b>Unknown host: {0}</b>
<b>Explanation</b>	The host to be accessed is unknown.
<b>Action</b>	Check if the host is accessible.
<b>INMSOI0017</b>	<b>Connection to deployment endpoint failed</b>
<b>Explanation</b>	This occurs if no connection can be established to the deployment endpoint defined in a target during deployment/undeployment/synconsumers operations. This could be because the deployment endpoint is down or the credentials used for accessing the deployment endpoint are wrong.
<b>Action</b>	Check if the deployment endpoint is up and running. Also check if the credentials defined in the target for accessing the deployment endpoint are correct.
<b>INMSOI0035</b>	<b>API Key for {0} of {1}</b>
<b>Explanation</b>	This is how the name of the API key will be generated where the service name is passed as a parameter.
<b>Action</b>	No action required.

<b>INMSOI0040</b>	<b>OAuth2 Client for {0} of {1}</b>
<b>Explanation</b>	This is how the name of the OAuth2 Client is created when the service name and consumer name are passed as parameters.
<b>Action</b>	No action required.
<b>INMSOW0034</b>	<b>The parameter(s)/action(s) {0} were ignored as it is not supported by Mediator {1}</b>
<b>Explanation</b>	Virtual Service can be deployed from latest version of CentraSite to Mediator version 8.2.2 and above. If you deploy any service to older version of Mediator from latest version of CentraSite, some policy parameters or actions cannot be executed on older version of Mediator. Such policy parameters or actions will be ignored. This warning message will list those ignored parameter/actions.
<b>Action</b>	If the ignored parameters or actions need to be executed, then Mediator has to be upgraded to version in which CentraSite is running. If the ignored parameter or actions are not needed, then this warning message can be ignored.
<b>INMSOW0076</b>	<b>Service is published to API gateway but activation is denied.</b>
<b>Explanation</b>	Service was successfully published to API gateway but the service is still in deactivation state.
<b>Action</b>	Log into API Gateway and try to activate the service.
<b>INMSTE0001</b>	<b>Referenced service does not exist ("{0}")</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMSTE0002</b>	<b>Dangling reference ("{0}")</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMSTE0003</b>	<b>Conflicting state ({0})</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.

<b>INMSTE0004</b>	<b>Invalid Reference ("{0}")</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMSTE0005</b>	<b>Type concept is not found in ImportList</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMSTE0006</b>	<b>No schema definition generated</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMSTE0007</b>	<b>schemaName for selected concept is null</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Please contact your software supplier.
<b>INMSTE0008</b>	<b>At least one instance does not comply with the type modifications.</b>
<b>Explanation</b>	A type is being modified in a way that is not compliant with the existing instances of that type.
<b>Action</b>	Modify the type in a compliant way.
<b>INMSTE0009</b>	<b>Type concept not found for "{0}"</b>
<b>Explanation</b>	While updating or deleting a JAXR object type, the corresponding type concept was not found in the registry.
<b>Action</b>	This is an internal error. Please contact your software supplier.
<b>INMSUE0001</b>	<b>Reordering multiple actions is not allowed</b>
<b>Explanation</b>	Reordering multiple actions not allowed.
<b>Action</b>	Reordering multiple actions not allowed.
<b>INMSUE0002</b>	<b>You must select valid jar file</b>
<b>Explanation</b>	The selected jar file(s) are not valid.
<b>Action</b>	Select valid jar files.

<b>INMSUE0003</b>	<b>Enter unique name</b>
<b>Explanation</b>	The event type name already exists.
<b>Action</b>	Enter a unique name for the event type
<b>INMSUE0004</b>	<b>Target name should not be empty</b>
<b>Explanation</b>	An attempt was made to add a target object without a name.
<b>Action</b>	Supply a target name.
<b>INMSUE0005</b>	<b>Target type should not be empty</b>
<b>Explanation</b>	An attempt was made to add a target type object without a name.
<b>Action</b>	Supply a target type name.
<b>INMSUE0006</b>	<b>Policy name cannot be empty</b>
<b>Explanation</b>	An attempt was made to add a policy object without a name.
<b>Action</b>	Supply a policy name.
<b>INMSUE0007</b>	<b>Select an Asset Type for the policy</b>
<b>Explanation</b>	For creating a runtime policy object, the object needs an associated object type.
<b>Action</b>	Select an object type for the policy.
<b>INMSUE0008</b>	<b>Select a target type for the policy</b>
<b>Explanation</b>	The target type for the policy is missing.
<b>Action</b>	Select a target type for the policy.
<b>INMSUE0009</b>	<b>Default route cannot be empty</b>
<b>Explanation</b>	The default route is missing.
<b>Action</b>	Define a default route.
<b>INMSUE0010</b>	<b>XPath expression cannot be empty</b>
<b>Explanation</b>	An empty XPath expression was supplied.
<b>Action</b>	Supply an XPath expression.

<b>INMSUE0011</b>	<b>Enter the valid XPath to the 'Element Required to be Signed'</b>
<b>Explanation</b>	The correct XPath to the 'Element Required to be Signed' is required.
<b>Action</b>	Enter the valid XPath to the 'Element Required to be Signed'.
<b>INMSUE0012</b>	<b>Virtual Service name should not be empty</b>
<b>Explanation</b>	The required name is missing.
<b>Action</b>	Supply the name.
<b>INMSUE0013</b>	<b>Version cannot be empty</b>
<b>Explanation</b>	A version was not entered.
<b>Action</b>	Enter a version.
<b>INMSUE0014</b>	<b>No WSDL Found</b>
<b>Explanation</b>	For the given URL, there is no WSDL available.
<b>Action</b>	Supply a WSDL for the URL.
<b>INMSUE0015</b>	<b>Virtual service with name {0} already exists</b>
<b>Explanation</b>	A virtual service with the given name already exists.
<b>Action</b>	Supply a different name for the virtual service.
<b>INMSUE0016</b>	<b>Assign actions for the policy</b>
<b>Explanation</b>	The actions required for the runtime policy object are missing.
<b>Action</b>	Assign actions for the policy.
<b>INMSUE0017</b>	<b>Create target type before creating runtime policy</b>
<b>Explanation</b>	The target type required for creating the runtime policy is not available.
<b>Action</b>	Create the target type before creating the runtime policy.
<b>INMSUE0018</b>	<b>Create target type before creating target</b>
<b>Explanation</b>	The target type must be created before the target can be created.
<b>Action</b>	Create the target type before creating the target.

<b>INMSUE0019</b>	<b>Select at least one target to deploy</b>
<b>Explanation</b>	No target was selected to deploy.
<b>Action</b>	Select at least one target to deploy.
<b>INMSUE0020</b>	<b>Default route cannot be empty</b>
<b>Explanation</b>	The default route was not specified.
<b>Action</b>	Specify a default route
<b>INMSUE0022</b>	<b>JMS alert destination cannot be empty</b>
<b>Explanation</b>	The JMS alert destination was not specified.
<b>Action</b>	Specify the JMS alert destination.
<b>INMSUE0023</b>	<b>Select at least one consumer application</b>
<b>Explanation</b>	No consumer applications have been selected.
<b>Action</b>	Select at least one consumer application.
<b>INMSUE0024</b>	<b>Rule name already exists</b>
<b>Explanation</b>	The specified rule name already exists.
<b>Action</b>	Specify a different rule name.
<b>INMSUE0025</b>	<b>Endpoint URL cannot be empty</b>
<b>Explanation</b>	An empty endpoint URL was specified.
<b>Action</b>	Specify a value for the endpoint URL.
<b>INMSUE0026</b>	<b>Consumer application cannot be empty</b>
<b>Explanation</b>	The consumer application was not specified.
<b>Action</b>	Specify the consumer application.
<b>INMSUE0027</b>	<b>Invalid hour given</b>
<b>Explanation</b>	The input for hour is invalid.
<b>Action</b>	Enter a valid hour.

<b>INMSUE0028</b>	<b>Invalid minute given</b>
<b>Explanation</b>	The input for minute is invalid.
<b>Action</b>	Enter a valid minute.
<b>INMSUE0029</b>	<b>Date cannot be empty</b>
<b>Explanation</b>	A date was not entered.
<b>Action</b>	Enter a date.
<b>INMSUE0030</b>	<b>Assertion type not found</b>
<b>Explanation</b>	The assertion type was not found.
<b>Action</b>	Specify an assertion type.
<b>INMSUE0031</b>	<b>Virtual service name cannot be same as web service name</b>
<b>Explanation</b>	The virtual service name should not be the same as the web service name.
<b>Action</b>	Specify a different virtual service name.
<b>INMSUE0032</b>	<b>HTTP header value cannot be empty</b>
<b>Explanation</b>	An HTTP header value was not entered.
<b>Action</b>	Enter an HTTP header value.
<b>INMSUE0033</b>	<b>HTTP header name cannot be empty</b>
<b>Explanation</b>	The HTTP header name is empty.
<b>Action</b>	Enter an HTTP header name.
<b>INMSUE0034</b>	<b>JMS message property name cannot be empty</b>
<b>Explanation</b>	The JMS message property name is empty.
<b>Action</b>	Enter a JMS message property name.
<b>INMSUE0035</b>	<b>JMS message property value cannot be empty</b>
<b>Explanation</b>	The JMS message property value is empty.
<b>Action</b>	Enter a JMS message property value.

<b>INMSUE0036</b>	<b>Virtual service name cannot have # character</b>
<b>Explanation</b>	The virtual service name contains the "#" character.
<b>Action</b>	Ensure that the name of the virtual service does not contain the "#" character.
<b>INMSUE0037</b>	<b>JMS header name cannot be empty</b>
<b>Explanation</b>	The JMS header name is empty.
<b>Action</b>	Enter the JMS header name.
<b>INMSUE0038</b>	<b>JMS header value cannot be empty</b>
<b>Explanation</b>	The JMS header value is empty.
<b>Action</b>	Enter the JMS header value.
<b>INMSUE0039</b>	<b>Select a policy to delete</b>
<b>Explanation</b>	No policy has been selected for deletion.
<b>Action</b>	Select a policy to delete.
<b>INMSUE0062</b>	<b>Undeploy the Service(s) before deleting the Target</b>
<b>Explanation</b>	Before deleting the target, undeploy all virtual services from the target.
<b>Action</b>	Make sure that the target instance has no deployed virtual services before trying to delete the target.
<b>INMSUE0066</b>	<b>Virtual XML Service with name {0} already exists</b>
<b>Explanation</b>	A virtual XML service with the given name already exists.
<b>Action</b>	Supply a different name for the virtual XML service.
<b>INMSUE0067</b>	<b>HTTP Methods not declared for the native XML Service</b>
<b>Explanation</b>	HTTP methods required for the XML service being virtualized were not declared.
<b>Action</b>	Update the HTTP methods of the native XML service being virtualized.
<b>INMSUE0068</b>	<b>HTTP Methods are not declared for the XML Service</b>
<b>Explanation</b>	The HTTP methods cannot be empty when creating an XML service.
<b>Action</b>	Select any one of the HTTP methods provided to create an XML Service.

<b>INMSUE0069</b>	<b>Select an HTTP Method for Entry Protocol</b>
<b>Explanation</b>	HTTP Methods for an entry protocol policy of a virtual XML service cannot be empty
<b>Action</b>	Select any one of the options available for HTTP Methods for an Entry Protocol policy
<b>INMSUE0070</b>	<b>Select the data type for predefined context variable</b>
<b>Explanation</b>	The data type for the predefined context variable should be selected.
<b>Action</b>	Select either the String or Int data type for the predefined context variable.
<b>INMSUE0071</b>	<b>Select the name for predefined context variable</b>
<b>Explanation</b>	The context variable name cannot be empty.
<b>Action</b>	Select any of the available context variable names.
<b>INMSUE0072</b>	<b>Enter the value for predefined context variable</b>
<b>Explanation</b>	The context variable value cannot be empty.
<b>Action</b>	Enter the value of the selected context variable.
<b>INMSUE0073</b>	<b>Select the data type for custom context variable</b>
<b>Explanation</b>	The data type for the selected custom context variable is invalid.
<b>Action</b>	Select the data type of the custom context variable.
<b>INMSUE0074</b>	<b>Enter the name for custom context variable</b>
<b>Explanation</b>	The name of the custom context variable cannot be empty.
<b>Action</b>	Enter the custom context variable name.
<b>INMSUE0075</b>	<b>Enter the value for custom context variable</b>
<b>Explanation</b>	The value for the custom context variable cannot be empty.
<b>Action</b>	Enter the value for the custom context variable.
<b>INMSUE0076</b>	<b>Virtual REST Service with name {0} already exists</b>
<b>Explanation</b>	A virtual REST service with the given name already exists.
<b>Action</b>	Supply a different name for the virtual REST service.

<b>INMSUE0077</b>	<b>Select at least one asset to deploy</b>
<b>Explanation</b>	There are no assets selected for deployment
<b>Action</b>	Please select the assets to be deployed
<b>INMSUE0078</b>	<b>User does not have permission to create groups in the organization</b>
<b>Explanation</b>	When a target is created, a corresponding synchronization group is created in the organization selected with the given target name, but the user who is trying to create the target does not have permission to create a group in the organization he belongs to or the selected organization.
<b>Action</b>	Grant manage users permission to the user.
<b>INMSUE0079</b>	<b>Abstract WSDL services cannot be virtualized</b>
<b>Explanation</b>	The chosen service is an abstract service and hence cannot be virtualized
<b>Action</b>	Please choose a service which has concrete service definitions to virtualize
<b>INMSUE0080</b>	<b>Reserved characters except _ and - and non-ASCII characters are not allowed in the virtual service name.</b>
<b>Explanation</b>	The virtual service name can only contain the letters A-Z, a-z, numbers from 0-9, _ and - characters.
<b>Action</b>	Remove the special characters from the virtual service name.
<b>INMSUE0081</b>	<b>Logged in user {0} does not have permission to deploy the asset</b>
<b>Explanation</b>	To deploy an asset to the target, the user must have manage targets permission.
<b>Action</b>	Request the manage targets permission from the CentraSite administrator and try again.
<b>INMSUE0083</b>	<b>Hard Limit value should not be empty</b>
<b>Explanation</b>	Number. Required. Specifies the maximum number of invocations allowed per Interval before stopping the processing of further requests and issuing an alert. Typically, this limit should be higher than the soft limit.
<b>Action</b>	On Save of Throttling Policy

<b>INMSUE0085</b>	<b>Select Consumer Application to Limit traffic</b>
<b>Explanation</b>	Specifies the consumer application(s) that this action applies to. To specify multiple consumer applications, use the plus button to add rows, or select Any Consumer
<b>Action</b>	Specifies the consumer application(s) that this action applies to. To specify multiple consumer applications, use the plus button to add rows, or select Any Consumer
<b>INMSUE0086</b>	<b>Soft Limit value should not be empty</b>
<b>Explanation</b>	Number. Optional. Specifies the maximum number of invocations allowed per Interval before issuing an alert. Reaching the soft limit will not affect further processing of requests (until the Hard Limit is reached).
<b>Action</b>	On Save of Throttling Policy
<b>INMSUE0087</b>	<b>Soft Limit should not be higher than the Hard Limit</b>
<b>Explanation</b>	Hard limit should be higher than the soft limit
<b>Action</b>	On Save of Throttling Policy
<b>INMSUE0089</b>	<b>Reserved characters except _ and - and non-ASCII characters are not allowed in the target name.</b>
<b>Explanation</b>	The target name can only contain the letters A-Z, a-z, numbers from 0-9, _ and - characters.
<b>Action</b>	Remove the special characters from the target name.
<b>INMSUI0082</b>	<b>Service URL is invalid</b>
<b>Explanation</b>	Service URL should not contain characters like *
<b>Action</b>	Replace character ' * ' with a valid character.
<b>INMSUI0084</b>	<b>Interval should not be empty.</b>
<b>Explanation</b>	Specifies the amount of time for the soft limit and hard limit to be reached.
<b>Action</b>	Specifies the amount of time for the soft limit and hard limit to be reached.
<b>INMSUI0088</b>	<b>Please enter a valid URL or URI</b>
<b>Explanation</b>	A URL or URI was specified that is an invalid endpoint.
<b>Action</b>	Specify a valid URL or URI.

<b>INMUCE0001</b>	<b>Error while creating Axis2 SOAP Service Stub for UDDI Security API</b>
<b>Explanation</b>	This error may happen if the host or port specified in RegistryConfiguration is not valid or if there is an incorrect version of Axis jars in the classpath.
<b>Action</b>	Please make sure the host and port of the registry provided in RegistryConfiguration are valid. And also make sure that the classpath has the correct version of Axis2 jars.
<b>INMUCE0002</b>	<b>Error while creating Axis2 SOAP Service Stub for UDDI Inquiry API</b>
<b>Explanation</b>	This error may happen if the host or port specified in RegistryConfiguration is not valid or if there is an incorrect version of Axis jars in the classpath.
<b>Action</b>	Please make sure the host and port of the registry provided in RegistryConfiguration are valid. And also make sure the classpath has the correct version of Axis2 jars.
<b>INMUCE0003</b>	<b>Error while creating Axis2 SOAP Service Stub for UDDI Publish API</b>
<b>Explanation</b>	This error may happen if the host or port specified in RegistryConfiguration is not valid or if there is an incorrect version of Axis jars in the classpath.
<b>Action</b>	Please make sure the host and port of the registry provided in RegistryConfiguration are valid. And also make sure the classpath has the correct version of Axis2 jars.
<b>INMUCE0004</b>	<b>Error while creating Axis2 SOAP Service Stub for UDDI Subscription API</b>
<b>Explanation</b>	This error may happen if the host or port specified in RegistryConfiguration is not valid or if there is an incorrect version of Axis jars in the classpath.
<b>Action</b>	Please make sure the host and port of the registry provided in RegistryConfiguration are valid. And also make sure the classpath has the correct version of Axis2 jars.
<b>INMUCE0005</b>	<b>Error while creating Axis2 SOAP Service Stub for Taxonomy API</b>
<b>Explanation</b>	This error may happen if the host or port specified in RegistryConfiguration is not valid or if there is an incorrect version of Axis jars in the classpath.
<b>Action</b>	Please make sure the host and port of the registry provided in RegistryConfiguration are valid. And also make sure the classpath has the correct version of Axis2 jars.
<b>INMUCE0006</b>	<b>Not able to connect to the UDDI Registry. get_authToken call failed.</b>
<b>Explanation</b>	Remote exception thrown while connecting to UDDI registry.
<b>Action</b>	Please make sure the host and port provided in RegistryConfiguration are valid.

<b>INMUCE0007</b>	<b>Not able to connect to the UDDI Registry. discard_authToken call failed.</b>
<b>Explanation</b>	Remote exception thrown while connecting to UDDI registry.
<b>Action</b>	Please make sure the host and port provided in RegistryConfiguration are valid.
<b>INMUCE0008</b>	<b>Not able to fetch the modified date of service with key {0}. get_operationalInfo call failed due to RemoteException.</b>
<b>Explanation</b>	Remote exception was thrown while getting operational info for the given service.
<b>Action</b>	Please make sure the registry is running the host and port provided in RegistryConfiguration.
<b>INMUCE0009</b>	<b>Not to able to fetch the virtual services for the specified target {0}</b>
<b>Explanation</b>	Not to able to fetch the virtual services for the specified target {0}, as remote exception was caught in find_service call.
<b>Action</b>	Please make sure the registry is running the host and port provided in RegistryConfiguration.
<b>INMUCE0011</b>	<b>Not able to fetch the service with name {0}. find_service call failed due to RemoteException.</b>
<b>Explanation</b>	Remote exception was thrown while inquiring the registry for services.
<b>Action</b>	Please make sure the registry is running the host and port provided in RegistryConfiguration.
<b>INMUCE0012</b>	<b>Not able to fetch the details of the service {0}. get_serviceDetail call failed due to RemoteException.</b>
<b>Explanation</b>	Remote exception was thrown while inquiring the registry for service details.
<b>Action</b>	Please make sure the registry is running the host and port provided in RegistryConfiguration.
<b>INMUCE0013</b>	<b>Not able to fetch the details of the tModel {0}. get_tModelDetail call failed due to RemoteException.</b>
<b>Explanation</b>	Remote exception was thrown while inquiring the registry for tModel details.
<b>Action</b>	Please make sure the registry is running the host and port provided in RegistryConfiguration.

<b>INMUCW0010</b>	<b>Unable to find the virtual service with specified name {0}</b>
<b>Explanation</b>	There is not virtual service with the specified name in the UDDI registry.
<b>Action</b>	Please make sure the UDDI registry has a virtual service with the specified name. If it exists please make sure the user provided in RegistryConfiguration has the privilege to view the virtual service.
<b>INMVSE0001</b>	<b>Internal JAXR error happened</b>
<b>Explanation</b>	An exception inside JAXR occurred.
<b>Action</b>	Analyze the JAXR exception given by the stack.
<b>INMVSE0002</b>	<b>Invalid NULL parameter given</b>
<b>Explanation</b>	A version interface method was called with invalid parameters containing NULL.
<b>Action</b>	Correct the usage of the version management interface.
<b>INMVSE0003</b>	<b>Object of type {0} not supported for External Link versioning</b>
<b>Explanation</b>	This object must not be used for duplicating external links.
<b>Action</b>	Do not use this kind of object.
<b>INMVSE0004</b>	<b>Invalid external link for versioning, must be a WebDAV one. URI: {0}</b>
<b>Explanation</b>	The external link object provided for versioning is not supported. It must be an external link of a WebDAV resource.
<b>Action</b>	Do not use this kind of external link.
<b>INMVSE0005</b>	<b>Unexpected external link. URI: {0}</b>
<b>Explanation</b>	During external link versioning the external link handling was unexpected.
<b>Action</b>	Check your WebDAV resources of external links.
<b>INMVSE0006</b>	<b>Object of type {0} not supported for a versioning operation</b>
<b>Explanation</b>	A non-versionable object was found during a versioning operation.
<b>Action</b>	Check your registered objects.

<b>INMVSE0007</b>	<b>Unexpected: no new external link in duplication list</b>
<b>Explanation</b>	Internal error: an element was not properly duplicated during versioning.
<b>Action</b>	Contact your software supplier.
<b>INMVSE0008</b>	<b>Object to be versioned ({0}) does not have the highest version number</b>
<b>Explanation</b>	The registry object to be versioned is an intermediate one in the versioning hierarchy, which is not permitted.
<b>Action</b>	Use only the highest versioned object for a versioning action.
<b>INMVSE0009</b>	<b>Object ({0}) is not granted for a versioning operation.</b>
<b>Explanation</b>	A registered listener rejected the object for the given versioning operation.
<b>Action</b>	Check your registry entries and why the listener has denied the action.
<b>INMVSE0010</b>	<b>Invalid association ID specified: {0}</b>
<b>Explanation</b>	An invalid association type was specified by the user of the API.
<b>Action</b>	Correct the association type, e.g. for HasParent, Uses, etc.
<b>INMVSE0011</b>	<b>Invalid WebDAV URL: {0}</b>
<b>Explanation</b>	The WebDAV URL has an invalid format.
<b>Action</b>	Correct the format.
<b>INMVSE0012</b>	<b>WebDAV cannot be accessed</b>
<b>Explanation</b>	Failure on WebDAV access.
<b>Action</b>	Inspect the original exception.
<b>INMVSE0013</b>	<b>Resource cannot be stored to WebDAV</b>
<b>Explanation</b>	Internal error on storing a file to WebDAV.
<b>Action</b>	Inspect the original exception.
<b>INMVSE0014</b>	<b>Unexpected: copied object not found in list</b>
<b>Explanation</b>	An object which was duplicated was not found in the list holding those elements.
<b>Action</b>	No action required.

<b>INMVSE0015</b>	<b>Unsupported copy mode for a Package object</b>
<b>Explanation</b>	The copy mode for versioning a package is not supported.
<b>Action</b>	Use only supported copy modes.
<b>INMVSE0016</b>	<b>Error retrieving checkpoint objects for ID: {0}</b>
<b>Explanation</b>	The revision or checkpoint object cannot be determined.
<b>Action</b>	See the embedded exception description.
<b>INMVSE0017</b>	<b>Error finding checkpoint records</b>
<b>Explanation</b>	Checkpoint records couldn't be determined during a find with qualifiers.
<b>Action</b>	See the embedded exception description.
<b>INMVSE0018</b>	<b>The restore of revision objects failed</b>
<b>Explanation</b>	The replacement of the current object with an older revision of the object was not successful.
<b>Action</b>	See the embedded exception description.
<b>INMVSE0019</b>	<b>The method is not allowed if revision feature not enabled</b>
<b>Explanation</b>	The revision feature must be enabled in CentraSite before using certain methods.
<b>Action</b>	Enable CentraSite's revision feature.
<b>INMVSE0020</b>	<b>Checkpoint label {0} already in use</b>
<b>Explanation</b>	A checkpoint label must only be used once in the system.
<b>Action</b>	Use another label or delete the label first.
<b>INMVSE0021</b>	<b>Setting of checkpoint label '{0}' failed</b>
<b>Explanation</b>	Setting of checkpoint label to revision objects failed.
<b>Action</b>	See embedded exception description.
<b>INMVSE0022</b>	<b>Error reading checkpoint with label '{0}'</b>
<b>Explanation</b>	Reading revision objects failed due to an internal reason.
<b>Action</b>	See embedded exception description.

<b>INMVSE0023</b>	<b>Error on finding checkpoint label names</b>
<b>Explanation</b>	Retrieving all checkpoint label names was not successful.
<b>Action</b>	See embedded exception description.
<b>INMVSE0024</b>	<b>Error during deletion of checkpoint label '{0}'</b>
<b>Explanation</b>	Deleting checkpoint labels from objects was not successful.
<b>Action</b>	See embedded exception description.
<b>INMVSE0025</b>	<b>Checkpoint label count cannot be determined</b>
<b>Explanation</b>	The checkpoint label count cannot be determined due to internal problems.
<b>Action</b>	Please contact your software supplier.
<b>INMVSE0026</b>	<b>Error getting minor version of object: {0}</b>
<b>Explanation</b>	Error getting minor version of object.
<b>Action</b>	See embedded exception description.
<b>INMVSE0027</b>	<b>Error getting checkpoint label of object: {0}</b>
<b>Explanation</b>	Error getting checkpoint label of object.
<b>Action</b>	See embedded exception description.
<b>INMVSE0028</b>	<b>Invalid keepCount parameter</b>
<b>Explanation</b>	Invalid keepCount parameter.
<b>Action</b>	Correct the keepCount parameter.
<b>INMVSE0029</b>	<b>Error purging checkpoints of object: {0}</b>
<b>Explanation</b>	Error purging checkpoints of object.
<b>Action</b>	See embedded exception description.
<b>INMVSE0030</b>	<b>Revision and Checkpoint enablement failed</b>
<b>Explanation</b>	Revision and Checkpoint enablement failed.
<b>Action</b>	See embedded exception description.

<b>INMVSE0031</b>	<b>Disable of Revision and Checkpoint failed</b>
<b>Explanation</b>	Disable of Revision and Checkpoint failed.
<b>Action</b>	See embedded exception description.
<b>INMVSE0032</b>	<b>Base collection not present</b>
<b>Explanation</b>	The base CentraSite collection is not available. The registry seems to be inconsistent.
<b>Action</b>	Please contact your software supplier.
<b>INMVSE0033</b>	<b>The common CentraSite schema is not present.</b>
<b>Explanation</b>	Schema CentraSiteObjects is not present.
<b>Action</b>	Check the CentraSite environment.
<b>INMVSE0034</b>	<b>Asset Type ({0}) does not support the Versioning Capability</b>
<b>Explanation</b>	An instance of an asset type should get a new version, but the asset type does not support this.
<b>Action</b>	Check the properties of your asset type.
<b>INMWSE0001</b>	<b>Unable to connect to {0} using the provided username and password.</b>
<b>Explanation</b>	The service was unable to connect to the provided CentraSite address.
<b>Action</b>	Make sure the CentraSite address is valid and the username and password are correct.
<b>INMWSE0002</b>	<b>Error reading {0}.</b>
<b>Explanation</b>	The service was unable to read the document.
<b>Action</b>	Make sure that the document is accessible and valid.
<b>INMWSE0003</b>	<b>Unable to import service.</b>
<b>Explanation</b>	The application was unable to import the service in the CentraSite registry.
<b>Action</b>	Make sure the arguments are correct or manually check the CentraSite registry for problems.
<b>INMWSE0004</b>	<b>Error retrieving product with name {0}.</b>
<b>Explanation</b>	The service was unable to find the product with the provided product name.
<b>Action</b>	Make sure that the product name is correct and exists in the CentraSite registry.

<b>INMWSE0005</b>	<b>Unable to import {0} {1}.</b>
<b>Explanation</b>	The service was unable to import the file.
<b>Action</b>	Make sure the arguments are correct or manually check the CentraSite registry for problems.
<b>INMWSE0006</b>	<b>Failed to retrieve the imported service ID.</b>
<b>Explanation</b>	Unable to retrieve the UDDI key of the service which has been imported.
<b>Action</b>	Check connection to CentraSite server. Check the logs for errors.
<b>INMWSE0007</b>	<b>Unable to retrieve the registered BPEL process ID.</b>
<b>Explanation</b>	The application was unable to retrieve the imported BPEL process ID.
<b>Action</b>	Check connection to CentraSite server. Check the logs for errors.
<b>INMWSE0008</b>	<b>Unable to import BPEL process.</b>
<b>Explanation</b>	The application was unable to import the BPEL process in the CentraSite registry.
<b>Action</b>	Make sure the arguments are correct or manually check the CentraSite registry for problems.
<b>INMWSE0009</b>	<b>Unable to import XSD schema.</b>
<b>Explanation</b>	The service was unable to import the XSD schema in the CentraSite registry.
<b>Action</b>	Make sure the arguments are correct or manually check the CentraSite registry for problems.
<b>INMWSE0010</b>	<b>Missing attachment with content ID {0}.</b>
<b>Explanation</b>	The service was unable to retrieve the attachment.
<b>Action</b>	Make sure the content ID of the attachment is valid.
<b>INMWSE0011</b>	<b>Invalid file descriptor. Missing file type.</b>
<b>Explanation</b>	The value for file type was missing.
<b>Action</b>	Make sure the arguments are valid.

<b>INMWSE0012</b>	<b>Invalid file descriptor. Missing file name.</b>
<b>Explanation</b>	The value for the file name was missing.
<b>Action</b>	Make sure the arguments are valid.
<b>INMWSE0013</b>	<b>Invalid file descriptor. Missing content ID string.</b>
<b>Explanation</b>	The value for the content ID string was missing.
<b>Action</b>	Make sure the arguments are valid.
<b>INMWSE0014</b>	<b>Invalid file type. Must be XSD, WSDL, BPEL, XPDL, META_INFO, DOCUMENT or REFERENCED.</b>
<b>Explanation</b>	CentraSite web services will only accept the following file types: XSD, WSDL, BPEL, XPDL, META_INFO, DOCUMENT or REFERENCED.
<b>Action</b>	Please provide valid file type.
<b>INMWSE0015</b>	<b>Missing Authorization header.</b>
<b>Explanation</b>	Authorization header for HTTP basic authentication was not found in the request.
<b>Action</b>	Provide username and password to connect to the CentraSite server.
<b>INMWSE0016</b>	<b>The creation of a folder in the temp directory has failed.</b>
<b>Explanation</b>	The creation of a folder in the temp directory has failed. The folder could not be created in the temp directory which is determined by the system property java.io.tmpdir.
<b>Action</b>	Please make sure that the temp directory has enough free space.
<b>INMWSE0017</b>	<b>The creation of folder {0} has failed.</b>
<b>Explanation</b>	The specified folder could not be created.
<b>Action</b>	Please make sure that you have sufficient privileges to create the folder.
<b>INMWSE0018</b>	<b>Exception while importing XPDL</b>
<b>Explanation</b>	An exception occurred while importing the XPDL file.
<b>Action</b>	Please make sure the SOAP request has all required parameters filled with proper values.

<b>INMWSE0019</b>	<b>Referenced file {0} not found</b>
<b>Explanation</b>	The XPDL file to be imported has a reference to a web service. But the WSDL file for the referenced file was not passed to the XPDL importer service.
<b>Action</b>	Please create a file descriptor for the referenced WSDL file and send it to ImportXPDLService.
<b>INMWSE0020</b>	<b>Response from XPDL importer does not contain any registry objects</b>
<b>Explanation</b>	The XPDL Importer didn't report any error. Also it didn't return any response which needs to be filled for a web service response.
<b>Action</b>	Please make sure the XPDL file contains the Process element which will be created in CentraSite and returned in the web service response.
<b>INMWSE0021</b>	<b>Error while fetching LCM state for process</b>
<b>Explanation</b>	A system error has occurred while loading the LCM state of the process.
<b>Action</b>	Please check whether the Process object is in a valid state. If it is in a valid state, please retry the request.
<b>INMWSE0022</b>	<b>Parameter name (wild card) is mandatory input</b>
<b>Explanation</b>	This operation requires a keyword as a parameter. In the request, the keyword is not set.
<b>Action</b>	Please set the keyword in the SOAP request.
<b>INMWSE0023</b>	<b>Error while fetching processes from CentraSite</b>
<b>Explanation</b>	A system error has occurred while fetching process objects from CentraSite. Perhaps the connection to the CentraSite Server has been lost.
<b>Action</b>	Please check whether the CentraSite Server is up and running.
<b>INMWSE0024</b>	<b>Error while fetching services from CentraSite</b>
<b>Explanation</b>	A system error has occurred while fetching services from CentraSite. Perhaps the connection to the CentraSite Server has been lost.
<b>Action</b>	Please check whether the CentraSite Server is up and running.

<b>INMWSE0025</b>	<b>Error while fetching organizations from CentraSite</b>
<b>Explanation</b>	A system error has occurred while fetching organizations from CentraSite. Perhaps the connection to the CentraSite Server has been lost.
<b>Action</b>	Please check whether the CentraSite Server is up and running.
<b>INMWSE0026</b>	<b>Invalid LCM states {0} are used in search filters</b>
<b>Explanation</b>	At least one lifecycle state provided in the search filter is not valid.
<b>Action</b>	Please provide proper lifecycle states in the search filter.
<b>INMWSE0027</b>	<b>Invalid file descriptor.</b>
<b>Explanation</b>	The value for file type was missing.
<b>Action</b>	Make sure the arguments are valid.
<b>INMWSE0028</b>	<b>The XPDL is not passed as FileDescriptor in the request</b>
<b>Explanation</b>	The request does not contain a file descriptor.
<b>Action</b>	Please pass the XPDL content as the file descriptor in the request.
<b>INMWSE0029</b>	<b>Specified organization key {0} is not valid</b>
<b>Explanation</b>	CentraSite does not contain an organization with the provided key.
<b>Action</b>	Please make sure the organization key provided in the request is valid.
<b>INMWSE0030</b>	<b>Specified product {0} is not valid</b>
<b>Explanation</b>	CentraSite does not contain the product concept with the specified key.
<b>Action</b>	Please make sure the product specified in the request is valid.
<b>INMWSE0031</b>	<b>Exception while fetching the properties from META-INFO</b>
<b>Explanation</b>	The user can provide attributes with values in the request. CentraSite is not able to fetch the properties from the provided META-INFO file descriptor.
<b>Action</b>	Please provide the properties in the format which is supported by CentraSite. Please refer <a href="http://localhost:53307/wsstack/services/Property.xsd">http://localhost:53307/wsstack/services/Property.xsd</a> for the CentraSite supported format. Please replace the host and port in the above URL accordingly.

<b>INMWSE0032</b>	<b>Referenced file {0} not found</b>
<b>Explanation</b>	The WSDL file to be imported imports another WSDL/XSD. But the other imported WSDL/XSD file was not passed to the WSDL importer service.
<b>Action</b>	Please create a file descriptor for the referenced WSDL/XSD file and send it to ImportWSDLService.
<b>INMWSE0033</b>	<b>Exception occurred while executing getApprovalHistory operation</b>
<b>Explanation</b>	An internal issue occurred while performing the getApprovalHistory operation. It might be a CentraSite issue or the data provided to the CentraSite is not sufficient.
<b>Action</b>	Please make sure the web service operation is executed with right set of parameters.
<b>INMWSE0034</b>	<b>Exception occurred while executing getPendingApprovals operation</b>
<b>Explanation</b>	An internal issue occurred while performing the getPendingApprovals operation. It might be a CentraSite issue or the data provided to the CentraSite is not sufficient.
<b>Action</b>	Please make sure the web service operation is executed with right set of parameters.
<b>INMWSE0035</b>	<b>Exception occurred while approving the approval flow using approve operation</b>
<b>Explanation</b>	An internal issue occurred while performing the approve operation. It might be a CentraSite issue or the data provided to the CentraSite is not sufficient.
<b>Action</b>	Please make sure the web service operation is executed with right set of parameters.
<b>INMWSE0036</b>	<b>Exception occurred while executing getApprovalRequests operation</b>
<b>Explanation</b>	An internal issue occurred while performing the getApprovalRequests operation. It might be a CentraSite issue or the data provided to the CentraSite is not sufficient.
<b>Action</b>	Please make sure the web service operation is executed with right set of parameters.
<b>INMWSE0037</b>	<b>Exception occurred while executing getApprovalActions operation</b>
<b>Explanation</b>	An internal issue occurred while performing the getApprovalActions operation. It might be a CentraSite issue or the data provided to the CentraSite is not sufficient.
<b>Action</b>	Please make sure the web service operation is executed with right set of parameters.
<b>INMWSE0038</b>	<b>Revert Pending State operation can only be performed by CentraSite Administrator</b>
<b>Explanation</b>	Not all users have permission to revert the pending state of a registry object. The user should have the CentraSite Administrator role to perform a revert pending state operation.
<b>Action</b>	Please provide the user with CentraSite Administrator role for the revert pending state operation.

<b>INMWSE0039</b>	<b>CentraSite does not contain a registry object with the specified key {0}.</b>
<b>Explanation</b>	The revert pending state operation requires a key of the registry object which exists in CentraSite. The pending state change cannot be reverted for a registry object that does not exist in CentraSite.
<b>Action</b>	Please make sure a registry object exists in CentraSite with the specified key.
<b>INMWSE0040</b>	<b>Exception occurred while executing revertPendingStateChange operation</b>
<b>Explanation</b>	An internal issue occurred while reverting a pending state change. It might be a CentraSite issue or the data provided to the CentraSite is not sufficient.
<b>Action</b>	Please make sure the web service operation is executed with right set of parameters.
<b>INMWSE0041</b>	<b>Exception occurred while executing reject operation</b>
<b>Explanation</b>	An internal issue occurred while performing the reject operation. It might be a CentraSite issue or the data provided to the CentraSite is not sufficient.
<b>Action</b>	Please make sure the web service operation is executed with right set of parameters.
<b>INMWSE0042</b>	<b>applicationServeKeyOrName parameter is missing in the request</b>
<b>Explanation</b>	This error happens when the user does not set the applicationServerKeyOrName in the request parameter.
<b>Action</b>	Set the applicationServerKeyOrName in the request parameter.
<b>INMWSE0043</b>	<b>serviceKey parameter is missing in the request message</b>
<b>Explanation</b>	This error happens when the user does not set serviceKey in the request parameter.
<b>Action</b>	Set the serviceKey in the request parameter.
<b>INMWSE0044</b>	<b>Invalid product {0} has been specified in the request</b>
<b>Explanation</b>	The value given as product parameter is invalid.
<b>Action</b>	Give a valid product name in the product parameter.
<b>INMWSE0045</b>	<b>Found {0} {1} application server instances during search. Use application server key to find unique instance.</b>
<b>Explanation</b>	This error happens if the search result matches more than one application server instance.
<b>Action</b>	Use the key to find a unique application server instance in the web service request operation.

<b>INMWSE0046</b>	<b>Failed to associate the given application server {0} and service {1}</b>
<b>Explanation</b>	This error may happen if the given CentraSite location is wrong or because of invalid credentials.
<b>Action</b>	Check the CentraSite location and its credentials. Also check if the application server instance exists.
<b>INMWSE0047</b>	<b>Invalid application server {0}</b>
<b>Explanation</b>	The given application server key or name is not valid.
<b>Action</b>	Give the correct application server key in the request parameter.
<b>INMWSE0048</b>	<b>Parameter name (serviceKeys) is mandatory input</b>
<b>Explanation</b>	The serviceKeys element is mandatory for the GetServiceDetails request.
<b>Action</b>	Specify at least one service key for the GetServiceDetails request.
<b>INMWSE0049</b>	<b>Error while retrieving service detail</b>
<b>Explanation</b>	Verify that the given request parameters are appropriate for the getServiceDetails call.
<b>Action</b>	Validate the parameters supplied for the getServiceDetails operation.
<b>INMWSE0050</b>	<b>Error while retrieving associated type for Lifecycle model {0}</b>
<b>Explanation</b>	An error occurred while retrieving an associated type for a lifecycle model.
<b>Action</b>	Verify that the associated types for the lifecycle model are appropriate.
<b>INMWSE0051</b>	<b>Error while retrieving transition state for the Lifecycle model {0}</b>
<b>Explanation</b>	An error occurred while retrieving the transition state for the lifecycle state and lifecycle model.
<b>Action</b>	Verify that the transition states are appropriate for the retrieved lifecycle state.
<b>INMWSE0052</b>	<b>Error while retrieving LC State for the LC Model {0}</b>
<b>Explanation</b>	An error occurred while retrieving a lifecycle state for the lifecycle model.
<b>Action</b>	Verify that the lifecycle states are appropriate for the retrieved lifecycle model.

<b>INMWSE0053</b>	<b>Error while retrieving LC Model {0}</b>
<b>Explanation</b>	An error occurred while retrieving the lifecycle model.
<b>Action</b>	Verify that the retrieved lifecycle model is correct.
<b>INMWSE0054</b>	<b>Failed to process getLifecycleModels operation</b>
<b>Explanation</b>	The getLifecycleModels operation could not be processed.
<b>Action</b>	Verify that the parameters are appropriately specified in the request.
<b>INMWSE0055</b>	<b>Error while registering the application server {0}</b>
<b>Explanation</b>	An error occurred while registering the application server.
<b>Action</b>	Verify that the parameters are appropriately specified in the request.
<b>INMWSE0056</b>	<b>Error while deregistering the application server</b>
<b>Explanation</b>	An error occurred while deregistering the application server.
<b>Action</b>	Verify that the parameters are appropriately specified in the request.
<b>INMWSE0057</b>	<b>Error while reading product version information</b>
<b>Explanation</b>	An error occurred while getting the application server version.
<b>Action</b>	Verify that the parameters are specified in the request.
<b>INMWSE0058</b>	<b>Error while retrieving installed language information from CentraSite</b>
<b>Explanation</b>	Error while retrieving installed language information from CentraSite.
<b>Action</b>	Validate the web service request or contact the CentraSite administrator.
<b>INMWSE0059</b>	<b>Invalid owner key {0} specified in request</b>
<b>Explanation</b>	The request XML contains an invalid owner key.
<b>Action</b>	Specify the appropriate owner key in the request XML.
<b>INMWSE0060</b>	<b>Invalid organization key {0} specified in request</b>
<b>Explanation</b>	The request contains an invalid organization key.
<b>Action</b>	Specify an appropriate organization key in the request.

<b>INMWSE0061</b>	<b>Invalid object type {0} specified in request</b>
<b>Explanation</b>	The request contains an invalid object type.
<b>Action</b>	Specify an appropriate object type string in the request.
<b>INMWSE0062</b>	<b>Object Type is mandatory when Organization Key is specified in request</b>
<b>Explanation</b>	The object type is mandatory when the organization key is specified in the request.
<b>Action</b>	Specify a valid object type string in the request.
<b>INMWSE0063</b>	<b>Service {0} is not available in organization {1}</b>
<b>Explanation</b>	The organization key specified for this service is not correct.
<b>Action</b>	Provide the correct organization key of this service.
<b>INMWSE0064</b>	<b>Invalid asset key {0} passed in the request</b>
<b>Explanation</b>	The request contains an invalid asset key.
<b>Action</b>	Pass a valid asset key in the request.
<b>INMWSE0065</b>	<b>Error while processing getAssociatedServices request</b>
<b>Explanation</b>	An error occurred while processing a getAssociatedServices request.
<b>Action</b>	Check if the given request parameters are correct.
<b>INMWSE0066</b>	<b>Error while processing releaseProcesses request</b>
<b>Explanation</b>	It was not possible to process the releaseProcesses request.
<b>Action</b>	Check if the given request parameters are correct.
<b>INMWSE0067</b>	<b>CentraSite does not contain an Application Server with the specified key or name {0}.</b>
<b>Explanation</b>	A CentraSite web service received a RegisterApplicationServer request with a key or name specified. The web service tried to update the object with the specified key or name, but the web service was not able to find any Application Server object with the specified key or name.
<b>Action</b>	Please check whether an Application Server object exists in CentraSite with the specified key or name. If an object exists in CentraSite, please make sure the requested user has view/edit permission on the Application Server object.

<b>INMWSE0068</b>	<b>Specified application server {0} does not exist</b>
<b>Explanation</b>	The application server name or key given in the request is not valid.
<b>Action</b>	Check the given application server name or key and correct it.
<b>INMWSE0073</b>	<b>Invalid application server key {0}</b>
<b>Explanation</b>	The request contains an invalid application server key.
<b>Action</b>	Specify a valid application server key.
<b>INMWSE0074</b>	<b>Exception while parsing XPDL file {0}</b>
<b>Explanation</b>	CentraSite will parse the specified XPDL file to create corresponding objects in CentraSite. CentraSite is not able to parse the specified the XPDL file as the given XPDL file does not comply with the XML and XPDL specification.
<b>Action</b>	Please make sure the specified XPDL file is in accordance with the XML and XPDL specification.
<b>INMWSE0075</b>	<b>The given organization key {0} in the request does not match the key of the existing asset's organization {1}</b>
<b>Explanation</b>	The organization key given in the importWSDL request does not match the organization key of the existing asset's organization.
<b>Action</b>	Provide the existing asset's organization key in the request.
<b>INMWSE0077</b>	<b>Failed to find application server in given name {0}.</b>
<b>Explanation</b>	This exception is unexpected. The cause is not immediately known.
<b>Action</b>	If the problem persists, contact CentraSite administrator.
<b>INMWSE0078</b>	<b>Application Server name is empty</b>
<b>Explanation</b>	No name was supplied for the application server.
<b>Action</b>	Provide a valid application server name.
<b>INMWSE0079</b>	<b>Unsupported Association Type {0}</b>
<b>Explanation</b>	The specified association type is not supported.
<b>Action</b>	Correct the association type.

<b>INMWSE0080</b>	<b>Check your access rights and proxy settings.</b>
<b>Explanation</b>	You do not have sufficient privileges to access the target object.
<b>Action</b>	Execute the action with sufficient privileges.
<b>INMWSE0081</b>	<b>The {0} parameter value is null.</b>
<b>Explanation</b>	The function shown on the call stack is called with a null value.
<b>Action</b>	Correct the client program.
<b>INMWSE0082</b>	<b>The credentials parameter value is null.</b>
<b>Explanation</b>	The setCredentials() method is called with a null value for the credentials parameter.
<b>Action</b>	Correct the client program.
<b>INMWSE0083</b>	<b>Specified process {0} is unavailable.</b>
<b>Explanation</b>	Process with the specified asset ID is not available.
<b>Action</b>	Check the asset ID provided in the request.
<b>INMWSI0069</b>	<b>Asset {0} is already associated with the server {1}</b>
<b>Explanation</b>	The given asset key request is already associated with the specified application server.
<b>Action</b>	Remove the asset key from the request.
<b>INMWSI0070</b>	<b>Asset {0} has been associated with the server {1} successfully</b>
<b>Explanation</b>	The asset {0} has been associated with the server {1} successfully.
<b>Action</b>	The association between the asset key and the server was created successfully.
<b>INMWSI0071</b>	<b>The asset {0} has not been associated with the server {1}</b>
<b>Explanation</b>	The asset is not associated with the specified server.
<b>Action</b>	Associate the asset and the server first before disassociating.
<b>INMWSI0072</b>	<b>Asset {0} has been disassociated from the server {1} successfully</b>
<b>Explanation</b>	The given asset has been disassociated from the server successfully.
<b>Action</b>	The given asset has been disassociated from the server successfully.

<b>INMWSI0076</b>	<b>Application server does not exist for given name {0}.</b>
<b>Explanation</b>	An application server does not exist in the given name.
<b>Action</b>	Create an application server in the given name.
<b>INOQJE0001</b>	<b>XQConnection for {0} is closed!</b>
<b>Explanation</b>	The connection to the specified database is closed.
<b>Action</b>	Make sure that the connection in use is not closed prior to any later operation.
<b>INOQJE0002</b>	<b>XQExpression is closed!</b>
<b>Explanation</b>	The underlying expression is already closed.
<b>Action</b>	Make sure that the expression / connection in use is not closed prior to any later operation.
<b>INOQJE0003</b>	<b>XQItemType mismatch! Item is not of type {0}.</b>
<b>Explanation</b>	The specified item is not of the declared item type.
<b>Action</b>	Check for the compatibility of item types.
<b>INOQJE0004</b>	<b>No cursor handle given!</b>
<b>Explanation</b>	The cursor associated with the query handle was not found.
<b>Action</b>	This happens if there is no proper result set associated with the specified query.
<b>INOQJE0005</b>	<b>Error reading from file - {0}</b>
<b>Explanation</b>	This exception is thrown by the Java run-time architecture when an input error has occurred while reading from the specified file.
<b>Action</b>	Possible causes for this exception are an error reading from the specified file or the specified file is not found.
<b>INOQJE0006</b>	<b>Error while parsing the XMLStream - {0}</b>
<b>Explanation</b>	This is an error for unexpected errors during processing / XML handling, namely, to report well-formedness errors as well as unexpected processing conditions.
<b>Action</b>	The error message contains the explanation from the StAX parser. Modify the XML accordingly.

<b>INOQJE0007</b>	<b>Parser configuration error - {0}</b>
<b>Explanation</b>	Indicates a serious configuration error. An exception occurred during configuration of the XML parser being used.
<b>Action</b>	Add the corresponding XML parser jars in the CLASSPATH.
<b>INOQJE0008</b>	<b>Factory Configuration Error - {0}</b>
<b>Explanation</b>	A problem with configuration of the Parser Factories exists. This error will typically be thrown when the class of a parser factory specified in the system properties cannot be found or instantiated.
<b>Action</b>	Add the XML parser jars to the CLASSPATH and set the JAXP factory names.
<b>INOQJE0009</b>	<b>Cannot access the XQItem of type XQITEMTYPE_ATTRIBUTE</b>
<b>Explanation</b>	Indicates that the base item type of the current item is an attribute while writing the current item to a SAX stream.
<b>Action</b>	The current item should not be of type attribute.
<b>INOQJE0010</b>	<b>SAX Parse Error - {0}</b>
<b>Explanation</b>	Represents a general SAX error or warning.
<b>Action</b>	Possible causes for this error are if the value of the "org.xml.sax.driver" system property is null or the class cannot be loaded and instantiated.
<b>INOQJE0011</b>	<b>I/O Error - {0}</b>
<b>Explanation</b>	This exception is thrown by the Java run-time architecture when an input / output error of some kind has occurred while reading from the specified input source.
<b>Action</b>	Refer to the Java documentation for the error message.
<b>INOQJE0012</b>	<b>End of the sequence is reached</b>
<b>Explanation</b>	Execution of an XQuery returns a sequence of results. You can traverse the sequence of results using the XQResultSequence API.
<b>Action</b>	Reading or trying to modify items in the sequence after reaching the end of the sequence will result in this error.

---

<b>INOQJE0013</b>	<b>Positioned before the start of the sequence</b>
<b>Explanation</b>	Execution of an XQuery returns a sequence of results. You can traverse the sequence of results using the XQResultSequence API. Invoking the next() method for the first time will get to the first item in the sequence. If any operations are tried before this, this will result in this error.
<b>Action</b>	Invoke the next() method to get the first item.
<b>INOQJE0014</b>	<b>Server {0} unavailable</b>
<b>Explanation</b>	The specified database or server is not running.
<b>Action</b>	Provide the correct database URL, and check if the database is stopped.
<b>INOQJE0015</b>	<b>Error when attempting to change the transaction mode</b>
<b>Explanation</b>	The attempt to change the transaction mode failed.
<b>Action</b>	Check the Server documentation for the specified error code in the error message.
<b>INOQJE0016</b>	<b>Error closing the {0}</b>
<b>Explanation</b>	An attempt to close the underlying connection or result sequence that is specified along with the error failed.
<b>Action</b>	Make sure that the underlying connection is not closed before closing the result sequence.
<b>INOQJE0017</b>	<b>Transaction failed while committing the changes</b>
<b>Explanation</b>	Committing the changes failed.
<b>Action</b>	Check the Server documentation for the specified error code in the error message.
<b>INOQJE0018</b>	<b>Transaction failed while rolling back the changes</b>
<b>Explanation</b>	Rolling back the changes failed.
<b>Action</b>	Check the Server documentation for the specified error code in the error message.
<b>INOQJE0019</b>	<b>The scrollability type {0} is not supported</b>
<b>Explanation</b>	The mentioned scrollability type is not supported.
<b>Action</b>	Set a valid value for the scrollability type.

<b>INOQJE0020</b>	<b>The property {0} is not supported</b>
<b>Explanation</b>	The mentioned property is not supported.
<b>Action</b>	Provide a valid property.
<b>INOQJE0021</b>	<b>A property mentioned in the list is not supported</b>
<b>Explanation</b>	One of the mentioned properties in the property list is not supported.
<b>Action</b>	Check if all the properties in the property list are supported by the current implementation.
<b>INOQJE0022</b>	<b>Error executing the server command : {0}</b>
<b>Explanation</b>	An error occurred while executing the specified database command.
<b>Action</b>	Please refer to the documentation of the specified command.
<b>INOQJE0023</b>	<b>XQTypeException thrown - Error Code : {0} Message : {1}</b>
<b>Explanation</b>	External variable binding to XQuery failed.
<b>Action</b>	Check the server documentation for the error code displayed in the error.
<b>INOQJE0024</b>	<b>Error fetching cursor</b>
<b>Explanation</b>	Indicates a cursor based failure when fetching a number of documents from a cursor.
<b>Action</b>	Check the server documentation for the error code displayed in the error.
<b>INOQJE0025</b>	<b>XQuery exception: {0}</b>
<b>Explanation</b>	Error in the XQuery.
<b>Action</b>	Please check the XQuery for errors.
<b>INOQJE0026</b>	<b>Error while opening cursor</b>
<b>Explanation</b>	Indicates a failure when opening a cursor.
<b>Action</b>	Check the server documentation for the error code displayed in the error.
<b>INOQJE0027</b>	<b>Error executing XQuery {0}: {1}</b>
<b>Explanation</b>	Executing the XQuery failed. See the error code for more information.
<b>Action</b>	Check the server documentation for the error code displayed in the error.

<b>INOQJE0028</b>	<b>Sequence is non-scrollable</b>
<b>Explanation</b>	Cannot scroll on a non-scrollable sequence.
<b>Action</b>	Avoid scrolling, because the sequence is non-scrollable.
<b>INOQJE0029</b>	<b>Failed because of following exception</b>
<b>Explanation</b>	The cause of the exception is specified in the error message.
<b>Action</b>	Check the server documentation for the specified error code in the error message.
<b>INOQJE0030</b>	<b>Error creating the cached item</b>
<b>Explanation</b>	Creating a cached item failed.
<b>Action</b>	Check if the items are closed.
<b>INOQJE0031</b>	<b>Error binding the {0} Message - {1}</b>
<b>Explanation</b>	Binding the specified value to the expression / prepared expression failed.
<b>Action</b>	Check if the values declared and bound to the query are the same.
<b>INOQJE0032</b>	<b>Error executing the request with error [{0} {1} {2} {3}]</b>
<b>Explanation</b>	The message appears with the specific error code and information from the server.
<b>Action</b>	Refer to the server documentation for the specified error code.
<b>INOQJE0033</b>	<b>Sequence not scrollable</b>
<b>Explanation</b>	Cannot scroll a non scrollable sequence.
<b>Action</b>	Avoid scrolling, because the sequence is non-scrollable.
<b>INOQJE0034</b>	<b>Expected type {0} Current type {1} Location {2}</b>
<b>Explanation</b>	The expected type and the current type specified do not match.
<b>Action</b>	Check the types mentioned in the error at the specified location.
<b>INOQJE0035</b>	<b>Expected start or end tag {0}</b>
<b>Explanation</b>	When trying to move to the next tag in the resulting XML Stream, any white space , COMMENT, or PROCESSING_INSTRUCTION is skipped until a START_ELEMENT or END_ELEMENT is reached. If anything other than white space characters, COMMENT, PROCESSING_INSTRUCTION, START_ELEMENT, END_ELEMENT is encountered, this error is thrown along with the location number.
<b>Action</b>	Check the error message for the missing start or end in the XML.

<b>INOQJE0036</b>	<b>{0} cannot be null!</b>
<b>Explanation</b>	The underlying object specified is null.
<b>Action</b>	Make sure that the underlying object is properly initialized.
<b>INOQJE0037</b>	<b>The {0} method is not supported</b>
<b>Explanation</b>	The method specified in the error message is not supported.
<b>Action</b>	The specified method is not supported by the current XQJ implementation.
<b>INOQJE0038</b>	<b>XQPreparedExpression is closed!</b>
<b>Explanation</b>	The underlying prepared expression is already closed.
<b>Action</b>	Make sure that the XQPreparedExpression is not closed before any usage.
<b>INOQJE0039</b>	<b>XQSequence is closed!</b>
<b>Explanation</b>	The underlying sequence is already closed.
<b>Action</b>	Make sure that the XQSequence is not closed before any usage.
<b>INOQJE0040</b>	<b>XQItem is closed!</b>
<b>Explanation</b>	The underlying item is already closed.
<b>Action</b>	Make sure that the XQItem is not closed before any usage.
<b>INOQJE0041</b>	<b>The value for the property {0} cannot be null</b>
<b>Explanation</b>	The value for the specified property in the error message cannot be null.
<b>Action</b>	Mention a property value for the specified property name in the error message.
<b>INOQJE0042</b>	<b>Access Failure Exception - {0}</b>
<b>Explanation</b>	The cause for the exception is specified in the error message.
<b>Action</b>	Check the server documentation for the specified error code in the error message.
<b>INOQJE0043</b>	<b>Invalid user ID or password</b>
<b>Explanation</b>	The supplied user ID and password combination is invalid.
<b>Action</b>	Check the user ID and password.

<b>INOQJE0044</b>	<b>Cannot access the XQItem of type XQITEMKIND_ATTRIBUTE</b>
<b>Explanation</b>	This indicates that the item kind of the current item is an attribute while writing the current item to a SAX stream.
<b>Action</b>	The current item should not be of type attribute.
<b>INOQJE0045</b>	<b>Error creating the XQ item</b>
<b>Explanation</b>	An error occurred while creating an XQ item.
<b>Action</b>	Check if the items are closed.
<b>INOQJE0046</b>	<b>Binding to {0} not supported</b>
<b>Explanation</b>	While binding an external variable to an XQuery, the type specification was not valid. Either the type is not supported at all for binding external variables, or it was used with a binding method that does not support this specific type.
<b>Action</b>	Use one of the supported types with a proper binding method.
<b>UDDIE00002</b>	<b>No businessKey was defined</b>
<b>Explanation</b>	Keys have to be specified to fetch the details.
<b>Action</b>	Please provide keys in the UDDI request to fetch the details.
<b>UDDIE00005</b>	<b>At least keyBag or transferToken should be specified</b>
<b>Explanation</b>	The discard_transferToken request is not valid. It has to be according to the UDDI v3 specification.
<b>Action</b>	Please specify transferToken to discard it.
<b>UDDIE00006</b>	<b>The value of the attribute maxRows is not a valid number.</b>
<b>Explanation</b>	The value for the maxRows attribute in the UDDI request should be a number.
<b>Action</b>	Please specify an integer value for the maxRows attribute in the UDDI request.
<b>UDDIE00007</b>	<b>{0} is not a valid find qualifier value in version {1}.</b>
<b>Explanation</b>	The find qualifier is not supported in the specified version.
<b>Action</b>	Please specify find qualifiers corresponding to the UDDI version.

<b>UDDIE00008</b>	<b>No entityKey was defined</b>
<b>Explanation</b>	Keys have to be specified to fetch the operationa info.
<b>Action</b>	Please provide keys in the get_operationalInfo request to fetch the operational information.
<b>UDDIE00011</b>	<b>Publisher assertions are null</b>
<b>Explanation</b>	The add_publisherAssertions, delete_publisherAssertions and set_publisherAssertions requests should have publisher assertions in them.
<b>Action</b>	Please add the publisherAssertions element in add_publisherAssertions, delete_publisherAssertions and set_publisherAssertions requests.
<b>UDDIE00012</b>	<b>Exactly one BusinessKey must be defined.</b>
<b>Explanation</b>	Either fromKey, toKey or businessKey should be specified.
<b>Action</b>	Please specify a value for the toKey or fromKey or businessKey attribute of the find_relatedBusiness call.
<b>UDDIE00013</b>	<b>Only one keyedReference element may be defined in a find_relatedBusinesses message.</b>
<b>Explanation</b>	The publisher assertion should contain only one keyedReference element.
<b>Action</b>	Please provide one KeyedReference in the find_relatedBusiness call.
<b>UDDIE00014</b>	<b>{0} is not a valid UUID.</b>
<b>Explanation</b>	The specified key is not valid.
<b>Action</b>	Please make sure the key is valid according to the UDDI standard.
<b>UDDIE00015</b>	<b>The specified names are not valid for version</b>
<b>Explanation</b>	The names are not specified according to the UDDI specification.
<b>Action</b>	Please specify valid names.
<b>UDDIE00016</b>	<b>Only one key may be defined</b>
<b>Explanation</b>	Multiple keys are defined for the UDDI entity.
<b>Action</b>	Please specify a single key for the UDDI entity.

<b>UDDIE00017</b>	<b>The fromKey element is mandatory in a publisherAssertion document</b>
<b>Explanation</b>	The fromKey element does not contain a valid value.
<b>Action</b>	Please provide values for the fromKey element in the publisherAssertion element.
<b>UDDIE00018</b>	<b>The toKey element is mandatory in a publisherAssertion document</b>
<b>Explanation</b>	The toKey element does not contain valid value.
<b>Action</b>	Please provide values for the toKey element in the publisherAssertion element.
<b>UDDIE00019</b>	<b>The keyedReference element is mandatory in a publisherAssertion document</b>
<b>Explanation</b>	The keyedReference element does not contain valid value.
<b>Action</b>	Please provide values for the keyedReference element in the publisher assertion element.
<b>UDDIE00020</b>	<b>The keyedReference element in a publisherAssertion must be defined exactly one time</b>
<b>Explanation</b>	The publisher assertion should contain only one keyedReference element.
<b>Action</b>	Please provide one KeyedReference in the publisher assertion element.
<b>UDDIE00022</b>	<b>{0} is not a valid findQualifier value</b>
<b>Explanation</b>	Provided findQualifier is not valid. The valid qualifiers can be found in UDDI specification.
<b>Action</b>	Please provide findQualifiers according to the UDDI specification
<b>UDDIE00024</b>	<b>The string representation may not be empty.</b>
<b>Explanation</b>	A value for the element in the UDDI request is not according to the UDDI specification.
<b>Action</b>	Please make sure the UDDI request is valid according to UDDI specification.
<b>UDDIE00025</b>	<b>A tag of the language code must have at least one character and no more than eight characters.</b>
<b>Explanation</b>	A value for the language code in the UDDI request does not comply with the UDDI specification.
<b>Action</b>	Please make sure the UDDI request is valid according to UDDI specification.

<b>UDDIE00026</b>	<b>A language code may only contain ASCII alphanumerics.</b>
<b>Explanation</b>	A value for the language code in the UDDI request does not comply with the UDDI specification.
<b>Action</b>	Please make sure the UDDI request is valid according to UDDI specification.
<b>UDDIE00027</b>	<b>Could not authenticate the user {0}</b>
<b>Explanation</b>	The user specified in the UDDI request is not valid.
<b>Action</b>	Please specify a valid CentraSite user.
<b>UDDIE00042</b>	<b>{0} does not represent a businessKey.</b>
<b>Explanation</b>	CentraSite does not contain any business entity with the specified key.
<b>Action</b>	Please make sure the business key specified in the request is valid.
<b>UDDIE00043</b>	<b>No businessKey in the registry matches the key {0}.</b>
<b>Explanation</b>	CentraSite does not contain any business entity with the specified key.
<b>Action</b>	Please make sure the business key specified in the request is valid.
<b>UDDIE00045</b>	<b>No entity in the registry matches the key {0}.</b>
<b>Explanation</b>	CentraSite does not contain any UDDI entity with the specified key.
<b>Action</b>	Please make sure the key specified in the request is valid.
<b>UDDIE00047</b>	<b>The value of maxRows parameter is not a valid number.</b>
<b>Explanation</b>	The value for the maxRows attribute in the UDDI request should be a number.
<b>Action</b>	Please specify an integer value for the maxRows attribute in the UDDI request.
<b>UDDIE00049</b>	<b>The contact {0} already exists. Please specify a different contact.</b>
<b>Explanation</b>	The specified contact already exists in the CentraSite. A contact cannot be present in multiple businesses
<b>Action</b>	Please make sure the contact is not present in any other business
<b>UDDIE00050</b>	<b>The value of maxEntities parameter is not valid</b>
<b>Explanation</b>	The maxEntities attribute of the subscription should contain an valid non-negative number.
<b>Action</b>	Please provide valid non-negative number for the maxEntities attribute.

**uddi:107e04bd-bdf4-11e2-b6b3-c566c3aaf997 – Verify Required Attributes**

**Explanation**            During asset instance creation and modification, verifies whether the required attributes of that Asset Type are provided with values

**uddi:18bf0e3d-bdf4-11e2-b6b3-886f1ce73523 – Verify Required Attributes Policy**

**Explanation**            During asset instance creation and modification, this policy verifies whether the required attributes of that Asset Type are provided with values.

**uddi:44e3e2de-064c-432f-b67a-8fbca0fb04d6 – Invoke webMethods Integration Server**

**Explanation**            Processing steps calling an Integration Server (IS) Service which will be executed when the consumer invokes the Virtual Service.

# 7 CloudStreams Messages

---

<b>0010.0715E</b>	<b>CloudStreams Upgrade, did not complete successfully.</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. This message indicates the upgrade was not successful. There should be a previous error message in the server log that indicates the problem.
<b>Action</b>	See actions for message ID '0010.0702'
<b>0030.0099</b>	<b>PublisherPropsObserver - Unknown wrapper factory data type ({0})</b>
<b>Explanation</b>	This message has incorrect text. It should indicate an invalid data type for UDDP publisher bean.
<b>Action</b>	Update the pg configuration file to use a proper UDDI publisher data type.
<b>0030.0100</b>	<b>PublisherPropsObserver - Unable to find wrapper factory</b>
<b>Explanation</b>	There is no UDDI publisher configured, but its properties are being changed.
<b>Action</b>	Update the configuration file. Either configure a UDDI publisher or unregister the UDDI properties observer.
<b>0030.0109</b>	<b>PublisherPropsObserver - Can't convert string ({0}) to integer for publishing interval, ignoring input</b>
<b>Explanation</b>	The value received for performance data reporting interval was not a valid numeric string.
<b>Action</b>	Make sure a numeric value is input.

<b>0030.0113</b>	<b>PublisherPropsObserver - Unknown pg service deployer data type {{0}}</b>
<b>Explanation</b>	The data type of the PG Service Deployer bean is invalid.
<b>Action</b>	Update the pg configuration file to use a proper PG Service Deployer data type.
<b>0030.0301</b>	<b>ConsumerApplicationManager.convert - cannot handle null request</b>
<b>Explanation</b>	Unable to create Consumer deployment object for update.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0302</b>	<b>ConsumerApplicationManager.convert - cannot convert consumer with null {0}</b>
<b>Explanation</b>	Invalid Consumer deployment object was found.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0303</b>	<b>VirtualServiceDeployer.{0} - cannot handle null {1}</b>
<b>Explanation</b>	A null reference was found during a deployment activity. The object and activity are identified in the message.
<b>Action</b>	Probably bad SOAP request for deployment, fix request.
<b>0030.0304</b>	<b>VirtualServiceDeployer.deploy - service {{0}} already deployed, undeploying</b>
<b>Action</b>	Info level message, no action required.
<b>0030.0306</b>	<b>VirtualServiceDeployer.{0} - caught this: type({1}) message({2})</b>
<b>Explanation</b>	Unable to deploy virtual service. See exception message for more details.
<b>Action</b>	Address the problem indicated by exception and try to deploy again.
<b>0030.0309</b>	<b>ClusteredServiceDeployer{0} - cannot handle null {1}</b>
<b>Explanation</b>	Unable to create VS deployment object for update.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0315</b>	<b>ClusteredConsumerManager.updateConsumer - cannot handle null consumer</b>
<b>Explanation</b>	Unable to create Consumer object for update.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.

---

<b>0030.0318</b>	<b>ClusteredServiceDeployer - cannot deploy null info to cache</b>
<b>Explanation</b>	A problem occurred while attempting to convert a PGService for deployment to shared cache. There should be another message describing the conversion or deployment issue.
<b>Action</b>	Fix the conversion or deployment problem.
<b>0030.0319</b>	<b>ClusteredServiceDeployer - cannot undeploy null service name from cache</b>
<b>Explanation</b>	Virtual service undeployment requires a non-empty service name. This is problem with undeployment request payload.
<b>Action</b>	Fix the undeployment request payload.
<b>0030.0328</b>	<b>ConsumerApplicationManager.{0} - cannot handle null update request</b>
<b>Explanation</b>	Invalid Consumer deployment request for update.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0330</b>	<b>ConsumerApplicationManager - not updating consumer ({0}), modification date, ({1}), is no more recent</b>
<b>Action</b>	Info level message, no action required.
<b>0030.0333</b>	<b>ConsumerApplicationManager.{0} - caught this: type({1}) message({2})</b>
<b>Explanation</b>	Unable to create and persist Consumer object for update.
<b>Action</b>	Either bad SOAP request to Deployer, fix Request. Or file system problem, check file system permissions. See logged message text for specific error details.
<b>0030.0336</b>	<b>Consumer Application Update Failed; requested update has invalid {0} field</b>
<b>Explanation</b>	Invalid consumer name or key in remove request.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0337</b>	<b>Consumer Application Remove Failed; consumer ({0}) does not exist</b>
<b>Explanation</b>	Attempt to remove consumer failed.
<b>Action</b>	Reply to CentraSite Deployment attemp should indicate error. Try redeploying this consumer or resynchronizing all consumers.

<b>0030.0343</b>	<b>RegisteredConsumerNamesManager.{0} - cannot handle null update request</b>
<b>Explanation</b>	Invalid RegisteredConsumerNames deployment request for update.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0344</b>	<b>Registered Consumer Names Update Failed; requested update has invalid {0} field</b>
<b>Explanation</b>	Invalid service name or consumer names in registered consumer names update request.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0346</b>	<b>RegisteredConsumerNamesManager - not updating consumer names registered to ({0}), modification date, ({1}), is no more recent</b>
<b>Action</b>	Info level message, no action required.
<b>0030.0347</b>	<b>RegisteredConsumerNamesManager.{0} - cannot handle null update request</b>
<b>Explanation</b>	Invalid RegisteredConsumerNames deployment request for remove.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0348</b>	<b>Registered Consumer Names Remove Failed; requested update has invalid {0} field</b>
<b>Explanation</b>	Invalid service consumer name in remove request.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0350</b>	<b>Registered Consumer Names Remove Failed; service ({0}) has no registered consumers</b>
<b>Explanation</b>	Invalid request to remove RegisteredConsumerNames, must include at least one consumer name.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
<b>0030.0352</b>	<b>RegisteredConsumerNamesManager.{0} - caught this: type({1}) message({2})</b>
<b>Explanation</b>	Unable to create and persist RegisteredConsumerNames object for update.
<b>Action</b>	Either bad SOAP request to Deployer, fix Request. Or file system problem, check file system permissions. See logged message text for specific error details.

---

0030.0356	<b>VirtualServiceDeployer - unable to get endpoints for {0}, caught this: type({1}), msg({2})</b>
<b>Explanation</b>	Unable to obtain endpoint for deployed service.
<b>Action</b>	Probably bad SOAP request to Deployer or bad VSD, fix one or both.
0030.0357	<b>ClusteredRegisteredConsumerNamesDeployer.updateConsumerNames - cannot handle null reg names object</b>
<b>Explanation</b>	Unable to create RegisteredConsumerNames object for update.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
0030.0358	<b>Consumer Application Remove Failed; requested update has invalid name and key fields, both are empty</b>
<b>Explanation</b>	Consumer remove request must have either name or key to identify consumer; both were null or empty.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
0030.0359	<b>ConsumerApplicationManager - Consumer update request has invalid IP range; from ({0}) to ({1})</b>
<b>Explanation</b>	Consumer update request had invalid IP address range.
<b>Action</b>	Probably bad SOAP request to Deployer, fix request.
0030.0361	<b>VirtualServiceDeployer - redeploying undeployed service ({0}), deployment failed for newer version</b>
<b>Action</b>	Info level message, no action required.
0030.0362	<b>VirtualServiceDeployer - a problem was encountered during deployment, ({0}) will be undeployed and replaced if necessary</b>
<b>Action</b>	Info level message, no action required.
0030.0363	<b>VirtualServiceDeployer.{0} - service({1}) caught this: type({2}) message({3})</b>
<b>Explanation</b>	Message context encountered an exception while attempting to redeploy or undeploy a virtual service. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

<b>0030.0364</b>	<b>Deployment request for service: {0}. Registered consumer name element was processed, but the existing modification date is the same as the request. {1}</b>
<b>Action</b>	Info level message, no action required.
<b>0030.0366</b>	<b>UddiPropertiesObserver - Password lookup failed; type ({0}), message ({1})</b>
<b>Explanation</b>	A problem was encountered by attempting to retrieve stored password. There should be an exception with more specific trouble description.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0030.0367</b>	<b>UddiPropertiesObserver - Unable to activate performance data policies; type ({0}), message ({1})</b>
<b>Explanation</b>	The performance data deployer was unable to run. This message should include more details regarding the reason.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0030.0370</b>	<b>UddiPropertiesObserver - Unable to connect to UDDI: ({0}); property updates saved, but data collection is OFF.</b>
<b>Explanation</b>	A problem was encountered during publisher test.
<b>Action</b>	This is probably a bad configuration parameter, fix it.
<b>0030.0371</b>	<b>UddiPropertiesObserver - Unable to convert port string ({0}) to integer, using default port {1}</b>
<b>Explanation</b>	The value input for 'UDDI port' number is non-numeric.
<b>Action</b>	Input an numeric port value.
<b>0050.0001</b>	<b>Unable to find Policy Element in the VSD:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to extract a policy element from VSD. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0002</b>	<b>Unable to create Rampart properties:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to assemble Rampart keystore properties. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

---

<b>0050.0003</b>	<b>Unable to replace static Rampart configuration with configured properties:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to re-configure Rampart keystore properties. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0004</b>	<b>Unable to create Rampart Configuration Element:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to convert Rampart configuration string to XML. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0005</b>	<b>Unable to create XPath to select first Policy Alternative:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to create an Xpath object. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0006</b>	<b>Error while removing existing RampartConfig elements:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to remove configuration elements. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0007</b>	<b>Required configuration information to enable WS-Security processing is missing. Unable to process service: {0}. Please ensure Keystore/Truststore information is configured</b>
<b>Explanation</b>	Service could not be initialized due to a problem with keystore/trustore configuration.
<b>Action</b>	Fix the security configuration.
<b>0050.0011</b>	<b>Exception while determining hostname or IP address of the server:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to resolve a host name or IP address. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

<b>0050.0013</b>	<b>CloudStreams needs the repository location of the SOAP stack</b>
<b>Explanation</b>	Configuration does not include a valid location for Axis2 repository configuration.
<b>Action</b>	Fix the axis2 configuration.
<b>0050.0016</b>	<b>ServerManager ready for processing</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0017</b>	<b>CloudStreams encountered exception while starting ServerManager:{0}</b>
<b>Explanation</b>	An exception was encountered during configuration of Axis2 listeners. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0018</b>	<b>Invalid Port specified. Using default configuration: {0}</b>
<b>Explanation</b>	The 'port' property has a non-numeric string value, the value configured in Axis is used.
<b>Action</b>	Make sure the property value to numeric.
<b>0050.0019</b>	<b>Port {0} is already in use. Trying alternate</b>
<b>Explanation</b>	The port indicated in the message is not available to use with a new socket.
<b>Action</b>	Specify another port value in the system 'port' property or Axis configuration.
<b>0050.0020</b>	<b>Exception while creating "id" selection XPath: {0}</b>
<b>Explanation</b>	Message context encountered an exception while attempting to create an XPath object. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0021</b>	<b>Found Element within Resources element with id: {0}</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0022</b>	<b>Exception while selecting element with id:{0} in Resources Element: {1}</b>
<b>Explanation</b>	Message context encountered an exception while attempting to extract the indicated element from XML. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

---

<b>0050.0023</b>	<b>CloudStreams received a response for the request with message Id :{0} But a callback is not registered (anymore) to process this response</b>
<b>Explanation</b>	No callback was registered at the time this response was processed.
<b>Action</b>	This is probably a VS configuration problem.
<b>0050.0024</b>	<b>CloudStreams received a response message without a message Id</b>
<b>Explanation</b>	There was a problem relating the native service response to a virtual service request.
<b>Action</b>	Look for previously logged message indicating that message Id was not used.
<b>0050.0025</b>	<b>CloudStreams encountered an exception: {0}. No error handlers found - [Message Dropped]</b>
<b>Explanation</b>	This could be a configuration problem. An exception was encountered while attempting to handle a fault. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the configuration, or other problem identified by the exception message.
<b>0050.0026</b>	<b>Outbound client can't locate policy from the property :{0}</b>
<b>Explanation</b>	The Synapse message context does not contain an entry for theproperty key identified in the message.
<b>Action</b>	This is a policy configuration problem.
<b>0050.0027</b>	<b>CloudStreams outbound client encountered error:{0}</b>
<b>Explanation</b>	Client encountered an exception while attempting to send a message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0029</b>	<b>VSD with incorrect Namespace:{0}. Unable to create PGService.</b>
<b>Explanation</b>	The namespace found in the VSD is unknown.
<b>Action</b>	This is a virtual service configuration problem.
<b>0050.0031</b>	<b>The {0} element is required for a CloudStreams service</b>
<b>Explanation</b>	Some element used during service deployment was found to be null. The specific element should be identified in the message text.
<b>Action</b>	This is a virtual service configuration problem.

<b>0050.0032</b>	<b>The {0} sequence element is required for a CloudStreams service</b>
<b>Explanation</b>	The VSD is missing the sequence element identified in the message.
<b>Action</b>	This is a virtual service configuration problem.
<b>0050.0033</b>	<b>The inSequence for VSD:{0} is invalid.</b>
<b>Explanation</b>	The sequence identified in the message failed validation. Look for recent error message with more validation failure details.
<b>Action</b>	This is a virtual service configuration problem.
<b>0050.0034</b>	<b>The outSequence for VSD:{0} is invalid.</b>
<b>Explanation</b>	The sequence identified in the message failed validation. Look for recent error message with more validation failure details.
<b>Action</b>	This is a virtual service configuration problem.
<b>0050.0035</b>	<b>Exception while parsing Virtual Service String Definition:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to parse the virtual service description. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0036</b>	<b>Unable to create Virtual Service Definition</b>
<b>Explanation</b>	Unable to create XML object from the VSD string.
<b>Action</b>	This is a virtual service configuration or deployment problem.
<b>0050.0037</b>	<b>PGServiceFactory encountered and exception while creating the PGService: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to validate input or output sequence or during WSDL URI processing. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0038</b>	<b>Invalid parameter specified for PGService: {0}</b>
<b>Explanation</b>	The attribute named in the message has no value in the VSD.
<b>Action</b>	This is a virtual service configuration problem.

---

<b>0050.0039</b>	<b>Exception {0} for PGService: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting during service creation. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0040</b>	<b>No PGService found with name: {0}</b>
<b>Explanation</b>	Attempting to undeploy or get endpoints for a service that does not exist.
<b>Action</b>	Make sure the virtual service exists before operating on it.
<b>0050.0041</b>	<b>WSStack exception processing service: {0} Cause: {1}</b>
<b>Explanation</b>	An AxisFault was encountered while attempting to either undeploy or get endpoints for the virtual service named in the message. The associated fault message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the fault message.
<b>0050.0042</b>	<b>Unable to locate the WSStack configuration. Can't deploy Virtual Service:{0}</b>
<b>Explanation</b>	The Synapse configuration cannot supply an Axis configuration.
<b>Action</b>	This is an Axis2/Synapse/WS-Stack configuration problem.
<b>0050.0043</b>	<b>A Virtual Service with name:{0} already exists. Unable to deploy.</b>
<b>Explanation</b>	Cannot deploy an Axis service when one already exists with the same name.
<b>Action</b>	Undeploy the existing service before attempting to redeploy or use the same name.
<b>0050.0044</b>	<b>Unable to locate WSStack configuration. Please check if WSStack is enabled/correctly configured.</b>
<b>Explanation</b>	Unable to retrieve the configuration context supplier bean.
<b>Action</b>	This is a Spring bean configuration issue, the pg-config.xml file is missing or corrupted.
<b>0050.0045</b>	<b>Invalid parameter passed for Virtual Service creation:{0}</b>
<b>Explanation</b>	An attempt to persist the VSD for a service found a null element. The VSD is not allowed to be null.
<b>Action</b>	This may be the result of invalid deployment payload; fix the VSD.

<b>0050.0046</b>	<b>Unable to persist VSD:{0} to disk. Encountered error:{1}</b>
<b>Explanation</b>	An exception was encountered while attempting to serialize the VSD for the service identified in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0047</b>	<b>Unable to {0} VSD:{1}. Error:{2}</b>
<b>Explanation</b>	This message is used in several different error conditions, as indicated by the object of 'unable to...'.
<b>Action</b>	Fix the 'unable to...' problem for the service identified by 'VSD:'.
<b>0050.0048</b>	<b>Error getting endpoints for service:{0}, Cause: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to get endpoints. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0049</b>	<b>Exception while creating PGService: {0}, Cause: {1}</b>
<b>Explanation</b>	An AxisFault was encountered while checking if deploying service already exists or while attempting to register service with Axis2. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0050</b>	<b>Error while engaging module: {0}</b>
<b>Explanation</b>	An AxisFault was encountered while attempting to engage the Axis2 module indicated in the message. The associated fault message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the fault message.
<b>0050.0052</b>	<b>Axis was unable to load module {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to load and engage module identified in message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

---

<b>0050.0053</b>	<b>Loading the WSDL : {0}</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0055</b>	<b>PGService {0} encountered error while converting wsdl element to a StreamSource:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to read WSDL from manifest. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0057</b>	<b>Unknown WSDL format for PGService:{0}, neither WSDL 1.1 nor WSDL 2.0</b>
<b>Explanation</b>	The current WSDL element has unknown or no namespace associated.
<b>Action</b>	This is a virtual service configuration problem.
<b>0050.0060</b>	<b>Populating SOAP service using WSDL</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0061</b>	<b>Unable to find a WSDL for the PGService:{0}. Assuming a POX or Legacy service</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0062</b>	<b>PGService: {0} is available on transports {1}</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0063</b>	<b>Adding PGService:{0} to the SOAP Stack</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0064</b>	<b>Removing PGService:{0} due to error: axisFault.getMessage()</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0065</b>	<b>Exception while setting policy on PGService:{0}</b>
<b>Explanation</b>	An exception was encountered while attempting to engage WS-Policy module. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

<b>0050.0066</b>	<b>Setting policy with id:{0} on CloudStreams service:{1}</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0068</b>	<b>Successfully created service in SOAP Stack for PGService:{0} containing {1} endpoint(s).</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0069</b>	<b>Error{1} on setting parameter :{0} on CloudStreams service</b>
<b>Explanation</b>	An exception was encountered while attempting to set a parameter into an Axis service. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0070</b>	<b>creating new CloudStreams service: {0}</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0071</b>	<b>Unable to find service directory for service {0}</b>
<b>Explanation</b>	Unable to persist WSDL assets because the virtual service directory does not exist.
<b>Action</b>	Redeploying the virtual service should create the service directory.
<b>0050.0074</b>	<b>Error: {0} while reading from file {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to read the proxy file identified in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0076</b>	<b>Scheduled task[{0}] with startup delay of {1} ms and interval of {2} ms</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0077</b>	<b>Error initializing JMS transport listener. Cause: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to register JMS listener. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

---

<b>0050.0078</b>	<b>Unable to stop TransportListener called:{0}. Exception:{1}</b>
<b>Explanation</b>	An AxisFault was encountered while attempting to stop the JMS transport listener during bean initialization. The associated fault message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the fault message.
<b>0050.0083</b>	<b>Error {0} occurred while updating the load balancer properties</b>
<b>Explanation</b>	An AxisFault was encountered while attempting to add load balancer URL to an Axis transport description. The associated fault message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the fault message.
<b>0050.0084</b>	<b>Loadbalanced Endpoint: [{0}] failed!</b>
<b>Explanation</b>	A mediation operation to a load balanced endpoint has failed. The endpoint indicated in the message is not available. This usually indicates a communication problem with the targeted server.
<b>Action</b>	Fix the targeted server.
<b>0050.0086</b>	<b>Unable to get the IS keystore manager - please check your configuration!</b>
<b>Explanation</b>	Unable to retrieve the keystore manager bean.
<b>Action</b>	This is a Spring bean configuration issue, the pg-config.xml file is missing or corrupted.
<b>0050.0089</b>	<b>Unable to get the Rampart Configuration Handler - please check your configuration!</b>
<b>Explanation</b>	Unable to retrieve the Rampart creation handler bean.
<b>Action</b>	This is a Spring bean configuration issue, the pg-config.xml file is missing or corrupted.
<b>0050.0099</b>	<b>VSD proxy loader, Unable to delete file: {0}</b>
<b>Explanation</b>	The file or directory indicated in the message could not be deleted.
<b>Action</b>	Determine why the file or directory could not be deleted and make it deletable.
<b>0050.0100</b>	<b>VSD proxy loader, Unable to delete directory: {0}</b>
<b>Explanation</b>	The directory indicated in the message could not be deleted.
<b>Action</b>	Determine why the directory could not be deleted and make it deletable.

<b>0050.0105</b>	<b>Unable to determine the fault cause. Check the log file for more information.</b>
<b>Explanation</b>	This error indicates that CloudStreams could not determine the cause for the error when trying to extract the soap fault message from the response. Additional errors, if any, would be present in the Integration Server log file (server.log).
<b>0050.0208</b>	<b>Error resolving WSDL URI. Cause {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to resolve URI elements into XML source. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0209</b>	<b>Error initializing virtual service factory. Cause: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to initialize XPath elements. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0210</b>	<b>Error setting location of virtual service proxies directory. Path: {0} Cause: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to use the directory identified in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0211</b>	<b>Unable to determine service endpoint URI for this service: {0} No transport listener defined for the virtual service's transport protocol.</b>
<b>Explanation</b>	The configuration context's listener manager cannot find an endpoint for the current service. This may indicate that the hosting IS does not have an appropriate listener registered.
<b>Action</b>	This is a configuration problem, either in IS ports or VSD
<b>0050.0212</b>	<b>Unknown exception deploying virtual service: {0} Cause: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to get an endpoint reference from the context listener manager. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

---

<b>0050.0214</b>	<b>Error {0} manifest from external resources associated with virtual service: {1}. Cause: {2}</b>
<b>Explanation</b>	An exception was encountered while attempting to read WSDL from manifest. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0215</b>	<b>Error initializing virtual service transformation bean with this xslt: {0} Cause: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to read the transformation file. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0221</b>	<b>CloudStreams has an internal configuration error. It's deploy-time xslt transformation file path does not exist. Path: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to read the file identified in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	This is a configuration problem; make sure the file identified in the message exists and contains the transformation.
<b>0050.0235</b>	<b>URI creation error: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to resolve an endpoint URI. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0250</b>	<b>Could not find user-specified value for HTTP method! Defaulting to inbound request HTTP method {0}</b>
<b>Explanation</b>	The 'routing method' context variable has an invalid value.
<b>Action</b>	If the value indicated in the message is acceptable, no action is required. Otherwise virtual service configuration must be changed.
<b>0050.0252</b>	<b>Could not set HTTP method for outgoing request for endpoint: {0}</b>
<b>Explanation</b>	The outgoing request's message context is null.
<b>Action</b>	This is a virtual service/policy configuration problem.

**0050.0300**            **Context variable name "{0}" is already declared. Multiple declarations in the same context is not allowed.**

**Explanation**        Context variable names must be unique for a service.

**Action**              This is a service configuration problem.

**0050.0303**            **Attempt to reference context variable without providing a message context. Custom context variables may only be declared with a 'session' scope at this time. Other scopes are not supported.**

**Explanation**        Attempting to get context variable or context variable map, but the message context (or session) is null.

**Action**              Earlier error messages should provide clues to help determine why a valid message context is null.

**0050.0306**            **Context variable name is required for variable declaration.**

**Explanation**        Variable name validation failed, QName is null or is missing a local part.

**Action**              This is a context variable configuration problem.

**0050.0307**            **Namespace URI and prefix is required for custom variable declaration. varName: {0}**

**Explanation**        Variable name validation failed, Namespace URI and prefix must both be neither null nor empty.

**Action**              This is a context variable configuration problem.

**0050.0308**            **Context variable name must be a valid identifier ( alpha-numeric, \$, or \_ permitted ) Found: {0}**

**Explanation**        Variable name validation failed, name has invalid characters.

**Action**              This is a context variable configuration problem.

**0050.0309**            **Core Context variables cannot have a namespace or prefix as part of its declaration. varName: {0}**

**Explanation**        Variable name validation failed, prefix for core variables must be empty.

**Action**              This is a context variable configuration problem.

---

<b>0050.0310</b>	<b>Either a Message context or axis service name is required when creating a custom context variable. varName: {0}</b>
<b>Explanation</b>	Both service name and Axis2 message context are null, this is not acceptable. This is probably the result of attempting to deploy a service with no service name.
<b>Action</b>	Verify that service configuration is correct.
<b>0050.0311</b>	<b>Attempt to create a custom variable using a message context with no AxisService. varName: {0}</b>
<b>Explanation</b>	The axis2 message context is corrupted, it should identify a service.
<b>Action</b>	Earlier error messages should provide clues to help determine why a valid message context could not be created.
<b>0050.0312</b>	<b>Unexpected error creating custom CloudStreams context variable. varName: {0} reason: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to create a custom context variable. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0313</b>	<b>Unexpected error removing custom CloudStreams context variable for service: {0} reason: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to remove or inject a custom context variable. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0314</b>	<b>Unexpected error initializing core CloudStreams context variables. reason: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to create a context variable. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0316</b>	<b>Unexpected error getting CloudStreams context variable value. varName: {0} reason: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to get the value of the context variable named in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

<b>0050.0317</b>	<b>Unexpected error setting CloudStreams context variable value. varName: {0}, value:{1}, reason: {2}</b>
<b>Explanation</b>	An exception was encountered while attempting to set the context variable value named in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0318</b>	<b>Expected a virtual service name for this method operation, but none was provided.</b>
<b>Explanation</b>	Attempting to get context variable map for a null service name.
<b>Action</b>	Earlier error messages should provide clues to help determine why a valid service name is null.
<b>0050.0321</b>	<b>CloudStreams context variable adapter unable to locate this type: {0}</b>
<b>Explanation</b>	The context variable type indicated in the message is unknown.
<b>Action</b>	This is a context variable configuration problem.
<b>0050.0322</b>	<b>Unexpected error getting core CloudStreams context variable value from adapter. type: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to get the context variable value named in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0323</b>	<b>Only string and int schema types are supported at this time. Type: {0}, declared with "{1}" context variable is not supported.</b>
<b>Explanation</b>	The context variable schema type is not among the accepted types.
<b>Action</b>	This is a service configuration problem.
<b>0050.0324</b>	<b>Context variable name declarations cannot contain \$ sign symbols in the name since that is used as a reference operator. varName: {0}</b>
<b>Explanation</b>	Variable name validation failed, name must include substitution character, (dollar sign).
<b>Action</b>	This is a context variable configuration problem.

---

<b>0050.0325</b>	<b>Unable to return list of context variables declared for this service: {0} Reason: {1}</b>
<b>Explanation</b>	An AxisFault was encountered while attempting to retrieve a list of context variable names. The associated fault message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the fault message.
<b>0050.0326</b>	<b>Unable to return list of context variables declared for this message context: {0} Reason: {1}</b>
<b>Explanation</b>	An AxisFault was encountered while attempting to get a list of context variables or list of variable keys. The associated fault message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the fault message.
<b>0050.0327</b>	<b>Context variable name deployed with virtual service {0} references an unknown namespace prefix. name attribute: {1}</b>
<b>Explanation</b>	Context variable identified in message has invalid namespace.
<b>Action</b>	This is a context variable configuration problem.
<b>0050.0328</b>	<b>Exception while copying context variables from request to response message context. Reason: {0}</b>
<b>Explanation</b>	An AxisFault was encountered while attempting to copy context variable names between contexts. The associated fault message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the fault message.
<b>0050.0329</b>	<b>Could not create backup directory for failed services! Dir tried = {0}</b>
<b>Explanation</b>	An attempt to create the 'failed services' directory has failed.
<b>Action</b>	Determine why the directory could not be created. Either fix the creation problem or specify a different directory.
<b>0050.0331</b>	<b>Error occurred when getting backup directory for path {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to determine directory for backing up failed services. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

<b>0050.0333</b>	<b>Error occurred while resolving URI; message = {0}</b>
<b>Explanation</b>	An exception was encountered during URI resolution. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0337</b>	<b>Previously selected {0} port {1} is no longer enabled or available!</b>
<b>Explanation</b>	The message indicates port number and type. The requested port is not available.
<b>Action</b>	Select a new port number for the indicated port type.
<b>0050.0343</b>	<b>Context variable API expected an IData object for ctx variable, {0}, but received this: {1}</b>
<b>Explanation</b>	The data element from which a context variable is to be extracted has an unknown data type.
<b>Action</b>	This is probably a flow configuration problem; where the pipeline was populated with an invalid value.
<b>0050.0344</b>	<b>Attempt to insert {0} core ctx variable with invalid value type: {1}. Expected a collection of this type: {2}</b>
<b>Explanation</b>	.The allowable data type for a core context variable is restricted, depending on variable type.
<b>Action</b>	.This is a context variable configuration problem.
<b>0050.0345</b>	<b>Unable to access array element [{0}] in SOAP_HEADERS core ctx variable. Cause: {1}</b>
<b>Explanation</b>	The index value indicated in the message must be numeric.
<b>Action</b>	This is a context variable configuration problem.
<b>0050.0346</b>	<b>Invalid array or key reference for core ctx variable. This substitution string has mismatched braces: {0}</b>
<b>Explanation</b>	The context variable substitution string is invalid, mismatched brace characters were found.
<b>Action</b>	This is a context variable configuration problem.

---

<b>0050.0347</b>	<b>Attempt to create an IData value for a ctx variable from an unsupported class type. CtxVar: {0} Bad type: {1}</b>
<b>Explanation</b>	The context variable to be converted to IData has an unknown data type.
<b>Action</b>	This is a context variable configuration problem.
<b>0050.0348</b>	<b>Unable to append header block to the end of the soap header. Cause: {0}, soapHeader element: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to add append new SOAP header block. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0349</b>	<b>Unable to prepend header block to the beginning of the soap header. Cause: {0}, soapHeader element: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to add prepend new SOAP header block. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0350</b>	<b>Unable to remove header block from the soap header. Cause: {0}, soapHeader: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to remove a SOAP header block. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0351</b>	<b>Unable to set header block at position {0} of the soap header. Cause: {1}, soapHeader element: {2}</b>
<b>Explanation</b>	An exception was encountered while attempting to replace a SOAP header block with a new one. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0357</b>	<b>Error occurred when getting STS configurations directory for path {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to create the directory indicated in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

<b>0050.0362</b>	<b>Error occurred when creating STS client</b>
<b>Explanation</b>	An exception was encountered while attempting to create an STS client object. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0364</b>	<b>Error occurred when initializing default STS configuration store</b>
<b>Explanation</b>	An exception was encountered while attempting to create JAXB marshaller/unmarshaller pair. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0367</b>	<b>Error occurred when saving STS configuration to disk</b>
<b>Explanation</b>	An exception was encountered while attempting to marshal configuration object into file. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0368</b>	<b>Error occurred when reading STS configuration from file {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to unmarshal configuration file indicated in the message into JAXB object. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0371</b>	<b>Error getting IS keystore manager instance!</b>
<b>Explanation</b>	An exception was encountered while attempting to get a reference to the keystore manager. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0373</b>	<b>Error occurred when adding rampart configuration to STS policy</b>
<b>Explanation</b>	An exception was encountered while attempting to configure the STS policy. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

---

<b>0050.0379</b>	<b>Error occurred when adding assertion to STS policy</b>
<b>Explanation</b>	An exception was encountered while attempting to add an assertion to a WS-Policy artifact. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0382</b>	<b>Error occurred when adding OnBehalfOf element to WS-Trust request element</b>
<b>Explanation</b>	An exception was encountered while attempting to add the WS-Trust element to a request. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0383</b>	<b>Error occurred when sending WS-Trust request to STS to obtain SAML assertion</b>
<b>Explanation</b>	An exception was encountered while attempting to add SAML assertion to pipeline. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0389</b>	<b>Adding OnBehalfOf element in WS-Trust request for IS user {0}</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0390</b>	<b>Could not find base STS policy file: {0} !</b>
<b>Explanation</b>	An exception was encountered while attempting to load a WS-Policy artifact from the file indicated in the message. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0391</b>	<b>Error occurred when getting STS configurations! Check to see if the ISTSClientConfigManager bean is configured!</b>
<b>Explanation</b>	The STS configuration manager bean could not be found.
<b>Action</b>	This is a Spring bean configuration issue, the pg-config.xml file is missing or corrupted.
<b>0050.0394</b>	<b>Error occurred when getting key aliases for keystore {0}: Error: {1}</b>
<b>Explanation</b>	An exception was encountered while attempting to add a list of certificate aliases to the pipeline. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

<b>0050.0395</b>	<b>Error occurred when getting keystore handles {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to add a list of keystore handles to the pipeline. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0396</b>	<b>Error when signing SAML assertion and SOAP request body</b>
<b>Explanation</b>	An exception was encountered while attempting to sign a SAML assertion and request body. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0397</b>	<b>Error occurred when adding ws-addressing headers to outbound soap request; Error: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to add WS-Addressing headers. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0400</b>	<b>Using default timestamp value of 300s, because input TTL {0} is invalid (-ve or too big)</b>
<b>Explanation</b>	The input value was not valid, a default was used.
<b>Action</b>	If the default is acceptable, no action is required. Otherwise update the configuration.
<b>0050.0404</b>	<b>Response content type was empty! Falling back to original request content-type [{0}]</b>
<b>Explanation</b>	The response message context contained an empty 'ContentType', so the type from the original request was used.
<b>Action</b>	This may be acceptable. If not, then configuration update will be required.
<b>0050.0507</b>	<b>ScaDeploymentPayload.extractParts found no virtual service requests</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0508</b>	<b>Unexpected exception, attempting to {0}, caught: type({1}), msg({2})</b>
<b>Explanation</b>	An exception was encountered while attempting to process a deployment request. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.

---

<b>0050.0509</b>	<b>ScaDeploymentPayload.extractParts - Unable to find consumer file {0}, for component {1}</b>
<b>Explanation</b>	The SCA deployment package was expected to contain a file to define the consumer identified in the message. The file was not found.
<b>Action</b>	This is a deployment payload construction problem.
<b>0050.0510</b>	<b>Unexpected exception, attempting to process {0} request, caught: type({1}), msg({2})</b>
<b>Explanation</b>	An exception was encountered while attempting to process a deployment request. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0515</b>	<b>ScaCompositeConfiguration found component with implementation type ({0})</b>
<b>Action</b>	Info level message, no action required.
<b>0050.0516</b>	<b>{0} - unable to convert string ({1}) to XMLGregorianCalendar: exception message ({2})</b>
<b>Explanation</b>	The date element from the deployment payload has an unexpected format.
<b>Action</b>	This is problem with the contents of the deployment payload.
<b>0050.0517</b>	<b>DeploymentPayload.{0} - input pipeline does not contain expected key ({1})</b>
<b>Explanation</b>	The deployment payload must include an element with the key indicated in the message.
<b>Action</b>	This is problem with the contents of the deployment payload.
<b>0050.0519</b>	<b>ScaDeploymentPayload - unable to delete temporary zip file: ({0})</b>
<b>Explanation</b>	The file indicated in the message could not be deleted.
<b>Action</b>	Determine why the file could not be deleted and make it deletable.
<b>0050.0520</b>	<b>DeploymentPayload - invalid request type: {0}</b>
<b>Explanation</b>	The deployment payload type is unknown.
<b>Action</b>	This is a deployment payload construction problem.

<b>0050.0528</b>	<b>DeploymentPayload - found null/empty virtual service descriptor for service {0}</b>
<b>Explanation</b>	The deployment payload must contain a VSD. The VSD for the service identified in the message was not found.
<b>Action</b>	This is a deployment payload construction problem.
<b>0050.0603</b>	<b>Error occurred when adding UsernameToken to SOAP Envelope: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to add username token to the pipeline. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0050.0605</b>	<b>Error occurred when adding X.509 token to SOAP Envelope: {0}</b>
<b>Explanation</b>	An exception was encountered while attempting to add X509 token to the pipeline. The associated exception message should include more details regarding the problem.
<b>Action</b>	Fix the problem identified by the exception message.
<b>0100.0001</b>	<b>The specified node {0} could not be found.</b>
<b>0100.0002</b>	<b>You have specified an invalid transformer service {0} for the cloud service node {1}.</b>
<b>0100.0003</b>	<b>Error occurred while handling the custom service signature for the cloud service node {0}. Error is {1}.</b>
<b>0100.0004</b>	<b>You have specified an invalid transformer service {0} for the cloud service node {1}. The transformer service should have a signature with Input/Output prefixes.</b>
<b>0100.0005</b>	<b>You have specified an invalid transformer service {0} for the cloud service node {1}. The root of the transformer service signature should be a document type only.</b>
<b>0101.0311</b>	<b>Error occurred while validating certificate "{0}". Error is "{1}"</b>
<b>Explanation</b>	An error occurred while validating a certificate. This can be due to an invalid certificate or a non-existent certificate.
<b>Action</b>	Ensure that the certificate specified is valid and exists in the filesystem.

0300.0048.description – Define any custom configurations specific to the SaaS provider.

0300.0049            OAuth Alias

0300.0049.description – Define the OAuth tokens alias to be used for the connection.

0300.0101.description – Define the required connection configurations to initiate communication with the SaaS provider.

0300.0102.description – Define configurations needed for the username and password based authentication to the SaaS provider.

0300.0103.description – Define the HTTP request header contents that will be used while making a request to a SaaS provider.

0300.0104.description – Define configurations needed for the HTTP protocol that the connection will use to connect to the SaaS provider.

0300.0126.description – Define configurations needed for Amazon web services requests requiring AWS Signature Version 2 authentication.

0300.0127.description – Indicates that the group is defined for the Amazon S3 authentication scheme and it uses the Access Key and the Secret Key of the client to authenticate the requests.

0300.0128.description – Define configurations needed for Amazon web services requests requiring AWS Signature Version 4 authentication.

0300.0129            Invalid proxy server alias specified "{0}". Ensure that proxy server alias "{0}" exists and is valid.

**Explanation**            Invalid proxy server alias is provided in the cloud connection.

**Action**                    Ensure that proxy server alias exists and is valid.

**0300.0130.description – Define the configurations needed for the OAuth version 1.0a authentication scheme.**

**0300.0131.description – Define configurations needed for the OAuth version 2.0 authentication scheme.**

**0300.0132            'Refresh Token' value is required when "{0}" is selected as 'Refresh Request Type' for refreshing the OAuth V2.0 access token**

**Explanation**        'Refresh Token' is a required field when 'Refresh Access Token' is 'true' and option selected for 'Refresh Request Type' is '{0}' in the OAuth V2.0 configuration screen

**Action**                Specify a value for the 'Refresh Token' field

**0300.0133            'Refresh URL' value is required when "{0}" is selected as 'Refresh Request Type' for refreshing the OAuth V2.0 access token**

**Explanation**        'Refresh URL' is a required field when 'Refresh Access Token' is 'true' and option selected for 'Refresh Request Type' is '{0}' in the OAuth V2.0 configuration screen

**Action**                Specify a value for the 'Refresh URL' field

**0300.0134            'Custom ESB Service Name' value is required when "Custom ESB Service" is selected as 'Refresh Request Type' for refreshing the OAuth V2.0 access token**

**Explanation**        'Custom ESB Service Name' value is required when "Custom ESB Service" is selected as 'Refresh Request Type' for refreshing the OAuth V2.0 access token

**Action**                Specify a value for the 'Custom ESB Service Name' field

**0501.0005Error       Error while initializing the connector "{0}". Details: {1}**

**Explanation**        An error occurred while trying to initialize the specified connection definition. The Details describe the exact cause of the error.

**Action**                For more information, see the Integration Server logs. Try to correct the error and reload the provider package.

**0501.0009Error       I/O exception, while trying to load manifest for connector: {0}. Details: {1}**

**Explanation**        An error occurred while reading the connector manifest file at the specified location. The error occurs if the manifest file is missing or corrupted, or the manifest file does not contain the required attribute definitions.

**Action**                Re-install the connector.

<b>0501.0025Warning</b>	<b>Duplicate definition found for operation: {0} in connector definition for: {1}. Ignoring!</b>
<b>Explanation</b>	The specified connector descriptor contains more than one operation definition against the specified name {0}. The duplicate definition will be ignored.
<b>Action</b>	Correct the connector descriptor and ensure that each operation name definition is unique.
<b>0501.0026Warning</b>	<b>No definition found for operation: {0} in connector definition for: {1}. Ignoring!</b>
<b>Explanation</b>	The WSDL contains an operation definition, but the connector definition does not include the corresponding operation definition and the operation is ignored.
<b>Action</b>	Consider including the operation definition, if required to be included, as part of the connector definition.
<b>0501.0028Warning</b>	<b>No operations defined in the connector definition: {0}, while the WSDL model contains {1} operation(s).</b>
<b>Explanation</b>	The connector descriptor does not include any valid operation definition, while the WSDL definition contains one or more operation definitions.
<b>Action</b>	Include one or more valid operation definitions in the connector descriptor.
<b>0501.0030Warning</b>	<b>No abstract type defined in service: {0}. Ignoring complex type check for interaction: {1}, connector: {2}</b>
<b>Explanation</b>	One or more interactions are marked as COMPLEX, but the connector descriptor does not define any 'abstractObject' definition. The interaction will be treated as a SIMPLE interaction.
<b>Action</b>	Consider either including an 'abstractObject' definition for the specified service or mark the interaction type as SIMPLE.
<b>0501.0031Warning</b>	<b>Exception while populating the abstract definition for operation: {0}. Details: {1}</b>
<b>Explanation</b>	Unable to populate the abstract definition for the specified operation. The operation will be treated as SIMPLE operation.
<b>Action</b>	For more information, see the Integration Server log. Correct the error based on the information from the log or mark the operation type as SIMPLE.
<b>0501.0052Error</b>	<b>Unable to {0} the document type package "{1}" for connector: {2}. Details: {3}</b>
<b>Explanation</b>	The error occurred while performing the specified operation on the connector.
<b>Action</b>	For more information, see the Integration Server log.

<b>0501.0080Error</b>	<b>Error loading the model for resource: {0}</b>
<b>Explanation</b>	A parsing error occurred while loading the connector descriptor for the specified resource.
<b>Action</b>	For more information, see the Integration Server log.
<b>0501.0082</b>	<b>Unable to load resource file {0}. Details: {1}</b>
<b>Explanation</b>	Error occurred while loading the resource file or no schema definition file found at {0}. No schema validation would be performed.
<b>Action</b>	Ensure that the necessary XML Schema file {0} exists at the location
<b>0501.0202Warning</b>	<b>At least one connection for the connector: {0} is enabled. Disable all the connections for this connector.</b>
<b>Explanation</b>	You tried to disable a connector that contains one or more enabled connections.
<b>Action</b>	You must disable all the connections created for the connector, before disabling the connector.
<b>0501.0218Warning</b>	<b>No provider registered with name: {0}</b>
<b>Explanation</b>	No provider with the specified name is registered with webMethods CloudStreams.
<b>Action</b>	Check the provider name. Typically, the provider name is the same as the provider package name for the package that contains the connector definitions.
<b>0501.0219Warning</b>	<b>No connector registered with name: {0}</b>
<b>Explanation</b>	No connector descriptor is registered with webMethods CloudStreams for the specified identifier.
<b>Action</b>	Check the connector identifier. See the 'connector-Key' in the manifest.cpd file for the connector unique identifier.
<b>0501.0224Warning</b>	<b>Unable to delete the connector: {0}, the connector is enabled.</b>
<b>Explanation</b>	The connector cannot be deleted, because it is currently enabled.
<b>Action</b>	When you want to delete the connector, you must first disable the connector. You cannot recover a connector after deleting it and you lose all the connector-related artifacts.

<b>0501.0227Error</b>	<b>Error initializing the provider registry and meta-data handler factory. Details: {0}</b>
<b>Explanation</b>	Unable to initialize and load the provider registry.
<b>Action</b>	For more information, see the Integration Server log.
<b>0501.0231Error</b>	<b>Error {0} provider: {1}. Details: {2}</b>
<b>Explanation</b>	The error occurred when registering or unregistering the provider.
<b>Action</b>	For more information, see the Integration Server log.
<b>0501.0262</b>	<b>Invalid mapping "{0}" found. Source type "{1}" and target type "{2}".</b>
<b>Explanation</b>	The specified mapping defined in the connector XML of a Provider is invalid.
<b>Action</b>	Correct the mapping and ensure that the source and target types are valid, and the source type supports the output to a given target type. See Administering webMethods CloudStreams guide for more details.
<b>0501.0265</b>	<b>An exception occurred while creating a connection for the connector: {0}. Details: {1}</b>
<b>0501.0266</b>	<b>Connection created successfully.</b>
<b>0501.0267</b>	<b>Connection updated successfully.</b>
<b>0501.0268</b>	<b>An exception occurred while updating the connection: {0}. Details: {1}</b>
<b>0501.0269</b>	<b>Connection deleted successfully.</b>
<b>0501.0270</b>	<b>An exception occurred while deleting the connection : {0}. Details: {1}</b>
<b>0502.0004Error</b>	<b>Error occurred while registering connection node: "{0}".</b>
<b>Explanation</b>	If the connection is enabled as per the node definition, Integration Server tries to enable the connection during restart or package reload. During this process, no connection is established with the SaaS provider and an exception occurs.
<b>Action</b>	Check if the connection parameters are valid and if a connection can be established using those parameters. Also, in the connector configuration file, check if the mappings and operation names/document types are configured correctly for the connection type.

<b>0502.0006Error</b>	<b>Error while unregistering connection alias: "{0}".</b>
<b>Explanation</b>	This error may occur under different circumstances. The Integration Server log contains the details of the error that explain the root cause for the error.
<b>Action</b>	For more information, see the Integration Server error log.
<b>0502.0007Error</b>	<b>Error while making a copy of connection alias: "{0}".</b>
<b>Explanation</b>	If you make a copy of a connection node using Designer, the copy of the source connection node might not be available in the file system.
<b>Action</b>	Check if the node.ndf file of the source connection node is available for read and that it is valid.
<b>0502.0017Error</b>	<b>Unable to create node "{0}" in the server namespace.</b>
<b>Explanation</b>	This error may occur under different circumstances. The Integration Server log contains the details of the error that explain the root cause for the error.
<b>Action</b>	For more information, see the Integration Server error log.
<b>0502.0047Error</b>	<b>Error occurred while destroying a connection instance of the alias: "{0}". Details: {1}</b>
<b>Explanation</b>	The error occurs when disabling a connection and 1/ The SaaS provider is not accessible. 2/ The logout request can not be created successfully, because of incorrect mappings or document types specified in the connector configuration file.
<b>Action</b>	For more information, see the Integration Server logs.
<b>0502.0056Error</b>	<b>Updating the connection alias {0} failed because the connection is enabled. Disable the connection and try updating again.</b>
<b>Explanation</b>	The error occurs when you attempt to delete or update a connection alias when the connection is enabled.
<b>Action</b>	Disable the connection alias and try updating or deleting the connection again.
<b>0502.0224</b>	<b>Error occurred while initializing the connection metadata builder for the given connection "{0}"</b>
<b>Explanation</b>	An error occurred while loading the connection metadata (connection attributes) associated with the specified connection.
<b>Action</b>	Ensure that all the connection attributes are valid for the specified connection. Check the server log for the Integration Server for more details.

---

<b>0502.0225</b>	<b>'Session Management' under 'Connection Management Properties' must be enabled when OAuth V2.0 'Refresh Access Token' is configured to 'true'</b>
<b>Explanation</b>	'Session Management' under 'Connection Management Properties' must be configured to 'idle' or 'fixed' when OAuth V2.0 'Refresh Access Token' is configured to 'true'
<b>Action</b>	Either configure 'Session Management' under 'Connection Management Properties' to 'idle' or 'fixed' or configure 'OAuth V2.0' 'Refresh Access Token' to 'false'
<b>0502.0226</b>	<b>'Refresh Access Token' under 'OAuth V2.0' configuration must be configured to 'true' when 'Session Management' under 'Connection Management Properties' is enabled</b>
<b>Explanation</b>	'Refresh Access Token' under 'OAuth V2.0' configuration must be configured to 'true' when 'Session Management' under 'Connection Management Properties' is configured to 'idle' or 'fixed'
<b>Action</b>	Either configure 'Refresh Access Token' under 'OAuth V2.0' configuration to 'true' or disable 'Session Management' under 'Connection Management Properties' by configuring it to 'none'
<b>0503.0101</b>	<b>Error while retrieving the service list from provider. Connection name "{0}". Details: {1}</b>
<b>Explanation</b>	The CloudStreams server cannot load the connector model for the specified connection name.
<b>Action</b>	Ensure that the associated connector model is valid or exists, and that the model loads without an error.
<b>0503.0106</b>	<b>Error creating CloudStreams connector service: "{0}". Details: {1}</b>
<b>Explanation</b>	The inputs provided or configured when creating the connector service are incomplete, invalid, or not supported. The error also occurs when the CloudStreams server is trying to load an existing CloudStreams service node that is corrupted.
<b>Action</b>	Ensure that the service is configured properly. If you are using a custom connector, ensure that it is valid and that the service node is not corrupted.
<b>0503.0108</b>	<b>Error occurred while registering the cloud connector service {0} with connector virtual service.</b>
<b>Explanation</b>	A CloudStreams connector service is registered with a connector virtual service whenever the cloud connector service is created or updated. The registration is required for generating Analytics information.
<b>Action</b>	Ensure that the connector virtual service that the CloudStreams connector service refers to is valid and available.

<b>0503.0109</b>	<b>Unable to invoke CloudStreams connector service "{0}". Details: {1}.</b>
<b>Explanation</b>	Internal error while executing the cloud connector service.
<b>Action</b>	Contact Software AG Global Support.
<b>0503.0112</b>	<b>Unable to invoke CloudStreams connector service "{0}" because the associated connection "{1}" is not found.</b>
<b>Explanation</b>	The connection associated with the specified CloudStreams connector service or the connection alias passed at runtime does not exist.
<b>Action</b>	Ensure that the associated or specified connection exists and that the connection is enabled.
<b>0503.0113</b>	<b>Unable to invoke CloudStreams connector service "{0}" because the associated connection "{1}" is disabled.</b>
<b>Explanation</b>	The connection associated with the CloudStreams connector service or the connection alias passed at runtime exists, but is disabled.
<b>Action</b>	Ensure that the associated or specified connection exists and that the connection is enabled.
<b>0503.0116</b>	<b>Unable to retrieve virtual service runtime instance while executing CloudStreams connector service "{0}"</b>
<b>Explanation</b>	Internal error while executing the cloud connector service.
<b>Action</b>	Contact Software AG Global Support.
<b>0503.0120</b>	<b>Error occurred while invoking CloudStreams connector service "{0}" using virtual service "{1}". Details: {2}</b>
<b>Explanation</b>	Internal error while executing the cloud connector service.
<b>Action</b>	Contact Software AG Global Support.
<b>0503.0121</b>	<b>Error occurred while registering CloudStreams connector service "{0}" with cloud virtual service "{1}".</b>
<b>Explanation</b>	A CloudStreams connector service is registered with a connector virtual service whenever the connector service is created or updated. The registration is required for generating Analytics information.
<b>Action</b>	Ensure that the connector virtual service that the CloudStreams connector service refers to is valid and available.

<b>0503.0122</b>	<b>Error occurred while unregistering CloudStreams connector service "{0}" with cloud virtual service "{1}".</b>
<b>Explanation</b>	A CloudStreams connector service is un-registered with a connector virtual service whenever the connector service is deleted. This is required for generating Analytics information.
<b>Action</b>	Ensure that the connector virtual service that the CloudStreams connector service refers to is valid and available.
<b>0503.0123</b>	<b>Error while retrieving the default virtual service name for "{0}" based connector service. Details: {1}</b>
<b>Explanation</b>	The error occurred while retrieving the connector virtual services list because of an internal error.
<b>Action</b>	Ensure that WmCloudStreams package is loaded without any warnings. If the problem persists, contact Software AG Global Support.
<b>0503.0124</b>	<b>Error retrieving business object list. Connection name "{0}". Details: {1}</b>
<b>Explanation</b>	The error occurs because of one of the following reasons: 1/ The connection does not exist or is disabled. 2/ The session ID for the connection has expired. 3/ The backend is not available or it cannot be reached to retrieve the metadata from the backend SaaS provider.
<b>Action</b>	To resolve this error, ensure that: 1/ The connection exists and is enabled. 2/ The connection is enabled and has a valid session ID. You can turn on the session management connection option. 3/ Ensure that the backend is reachable and metadata is retrieved successfully from the backend SaaS provider.
<b>0503.0125</b>	<b>Error retrieving business object description. Connection name "{0}". Details: {1}</b>
<b>Explanation</b>	The error occurs because of one of the following reasons: 1/ The connection does not exist or is disabled. 2/ The session ID for the connection has expired. 3/ The backend is not available or cannot be reached to retrieve metadata from the backend SaaS provider.
<b>Action</b>	To resolve the error, ensure that: 1/ The connection exists and is enabled. 2/ The connection is enabled and has a valid session ID. You can turn on the session management connection option. 3/ The backend is reachable and metadata is retrieved successfully from the backend SaaS provider.
<b>0503.0126</b>	<b>Invalid lookup service "{0}" specified.</b>
<b>Explanation</b>	Lookup services are invoked during the cloud connector service definition. The lookup services should exist in the Integration Server namespace.
<b>Action</b>	Ensure that the lookup service specified in the error message exists in the Integration Server namespace and it is accessible.

<b>0503.0127</b>	<b>Invalid service specification "{0}". The lookup service "{1}" must use the specification "{2}".</b>
<b>Explanation</b>	Every lookup service must implement the specified service specification.
<b>Action</b>	Ensure that the specified lookup service implements the required service specification.
<b>0503.0128</b>	<b>Unable to invoke CloudStreams connector service "{0}".</b>
<b>Explanation</b>	Cloud connector services access the connection from a connection pool during service invocation. The error occurs when the CloudStreams framework cannot obtain a connection from a connection pool.
<b>Action</b>	Analyze the cloud service usage and ensure that the connection is properly configured. Also, the connection pool should have a free available connection whenever a CloudStreams connector service is invoked.
<b>0503.0210</b>	<b>Unable to load the REST service node model for "{0}".</b>
<b>0503.0212</b>	<b>Invalid REST resource end point: "{0}"</b>
<b>Explanation</b>	The REST resource end point is not resolved correctly. It may have entries in brackets({}) that should be resolved.
<b>Action</b>	Check if the required Parameters are passed during the cloud connector service execution. You can also set any default values on the "Parameter" tab in Designer.
<b>0503.0213</b>	<b>Error in ServiceDispatcher, invalid input.</b>
<b>Explanation</b>	One of the key inputs for service execution is missing, such as a connection that is enabled or a virtual service.
<b>Action</b>	Check if the connection exists and is enabled. In Designer, check if the virtual service is available. Also, check that the values you specified for the inputs are correct.
<b>0503.0217</b>	<b>Unable to apply mapping on CloudStreams connector service "{0}", for operation "{1}". Details: "{2}"</b>
<b>Explanation</b>	Error while reading or applying the mappings.
<b>Action</b>	Check the mappings available in the Cloud Provider Descriptor.
<b>0503.0233</b>	<b>Could not execute the map service "{0}". Exception: {1}</b>
<b>Explanation</b>	The map service associated with the mapping could not be executed.
<b>Action</b>	Check the server log for more details.

---

0503.0297	<b>Parameter "{0}" is not supported for mapping because the Data Type is Record.</b>
0503.0513	<b>Unable to identify connectorID or none specified</b>
<b>Explanation</b>	ConnectorID is not specified or empty while creating cloud connector service
<b>Action</b>	Please provide a valid connectorID
0503.0514	<b>Unable to identify providerName or none specified</b>
<b>Explanation</b>	Provider Name is not specified or empty while creating cloud connector service
<b>Action</b>	Please provide a valid provider name
0503.0519	<b>Invalid InteractionHandler implementation {0} specified for the interaction name {1}. Note that if the interaction type is {2} then InteractionHandler must implements the abstract class {3}.</b>
<b>Explanation</b>	Interaction implementation can be externalised to Java based implementation. If the interaction is involved with multiple business objects then connector developer should leverage the built in abstract implementation class. This abstract implementation can generate the input and output cloud service based on various properties configurations. Internally CloudStreams server generates the signature based of various templates. These internal templates reads the multiple properties and generates the signatures.
<b>Action</b>	Make sure that the implementation class specified extends the mentioned abstract InteractionHandler class.
0550.0001	<b>Error while creating Connection "{0}".</b>

<b>CLS.0010.0014E</b>	<b>PolicyGateway.shutdownMyService - Unable to remove service:{0}. Error:{1}</b>
<b>Explanation</b>	A virtual service was not completely removed during CloudStreams package unload.
<b>Action</b>	No action is necessary if the error occurred while the Integration Server was shutting down.
<b>CLS.0010.0020W</b>	<b>Consumer file [{0}] could not be found! Could not load Consumer information into CloudStreams.</b>
<b>Explanation</b>	Consumer definitions defined in the CloudStreams admin are persisted in an XML file in a directory under the WmCloudStreams package.
<b>Action</b>	No action is necessary if no consumers have been defined; otherwise, please contact support.
<b>CLS.0010.0062E</b>	<b>Unable to get the password for callback identifier: {0}</b>
<b>Explanation</b>	Error while retrieving the cleartext password from the encrypted passman file store.
<b>Action</b>	Review the CloudStreams STS configuration, else this is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the Integration Server Administrator's package management menu > WmCloudStreams package's list of services, if available.
<b>CLS.0010.0083W</b>	<b>Non-fatal CloudStreams package initialization error. {0}, {1}</b>
<b>Explanation</b>	CloudStreams encountered an error during an upgrade processing step, after the package initialization has completed.
<b>Action</b>	Verify whether the overinstall upgrade steps were followed as defined in the documentation, else this is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.

<b>CLS.0010.0085E</b>	<b>CloudStreams - Unable to find ClusterStateCache</b>
<b>Explanation</b>	CloudStreams defines a cache for this information even when the product is not clustered.
<b>Action</b>	Contact support.
<b>CLS.0010.0190E</b>	<b>Error initializing CloudStreams keystore manager's keystore. Path:{0}, Cause: {1}</b>
<b>Action</b>	Verify whether a valid keystore file exists for this path and the file permissions allow for the Integration Server to read the file.
<b>CLS.0010.0212E</b>	<b>Endpoint connection timeout duration expected as a number but was not a number ({0})</b>
<b>Explanation</b>	A virtual service was deployed with an invalid connection timeout specified for its native provider endpoint.
<b>Action</b>	Review the advanced endpoint configuration in CentraSite and redeploy the service if necessary.
<b>CLS.0010.0214E</b>	<b>Either both keystore and key alias must be specified or none for the SSL configuration; KeyStore alias = [{0}]; Key alias = [{0}]</b>
<b>Explanation</b>	A virtual service with a native provider SSL endpoint was deployed with an invalid advanced endpoint configuration. The endpoint must have a valid alias for both the keystore file and the keystore entry aliases as defined in the Integration Server, or it can have no aliases defined at all.
<b>Action</b>	Update the advanced endpoint configuration and redeploy the virtual service to CloudStreams.
<b>CLS.0010.0217E</b>	<b>Error occurred while getting the password for handle {0} from the passman.</b>
<b>Explanation</b>	An attempt to retrieve a cleartext password from a passman encrypted file store failed.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0010.0218E</b>	<b>Error occurred when storing the password for handle {0} in the passman.</b>
<b>Explanation</b>	An attempt to save a password in a passman encrypted file store failed during CloudStreams STS configuration.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloustreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.

---

<b>CLS.0010.0220E</b>	<b>Error while converting the given WS-Policy component to string.</b>
<b>Explanation</b>	Cloudstreams was unable to parse policy elements used in producing request security tokens (RST) to a configured security token service (STS).
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0010.0702E</b>	<b>CloudStreams upgrade/migration has been interrupted due to an error. Details: {0}</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. It indicates that the upgrade was not successful and further actions are required.
<b>Action</b>	Depending on the error message, the following options are available: 1) Resolve the issue which is causing the upgrade to fail and then restart the Integration Server to see if the upgrade completes successfully. 2) Delete the cloudstreamsUpgrade.xml file from the installation path: \${IS_HOME}/packages/WmCloudStreams/ directory. This is the file that causes CloudStreams to perform its upgrade step. If this action is taken, the CloudStreams configuration will have to be re-entered manually through the Integration Server Administrator's UI. 3) Contact Support. Whenever the Integration Server is restarted, CloudStreams will attempt to perform an upgrade as long as its cloudstreamsUpgrade.xml file is present in the package directory.
<b>CLS.0010.0706E</b>	<b>CloudStreams Upgrade, unable to read required file. {0}</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. This message implies that the OS user running the Integration Server does not have adequate permissions to read the file referenced in the error message.
<b>Action</b>	Review user and file permissions and make necessary adjustments to ensure the file can be read.
<b>CLS.0010.0707E</b>	<b>During CloudStreams upgrade, a configuration file is missing a required entry element key attribute. {0}, File path: {1}</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. The cloudstreamsUpgrade.xml file used to control a CloudStreams overinstall upgrade is corrupted. It is missing a reference to an attribute containing a path to an archive of the previous CloudStreams version, prior to the overinstall.
<b>Action</b>	Contact Support.

<b>CLS.0010.0708E</b>	<b>During CloudStreams upgrade, a configuration file entry element key attribute is not as expected: {0}, expected this value: {1}, but found: {2}, File path: {3}</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. The cloudstreamsUpgrade.xml file used to control a CloudStreams overinstall upgrade is corrupted.
<b>Action</b>	Contact Support.
<b>CLS.0010.0709E</b>	<b>CloudStreams Upgrade, unable to find the required file. Expected location: {0}</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. The backup file archive containing the CloudStreams package prior to the overinstall upgrade cannot be found.
<b>Action</b>	Contact support.
<b>CLS.0010.0711E</b>	<b>CloudStreams Upgrade, unable to delete configuration file. CloudStreams upgrade task will continue to execute after each Integration Server startup until this file is removed. Path: {0}</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. Verify that the OS user account running the Integration Server has the necessary permissions to delete the file.
<b>Action</b>	If the log messages suggest the upgrade ran successfully, this file can be deleted; otherwise, contact support.
<b>CLS.0010.0712E</b>	<b>During CloudStreams upgrade, a configuration file is not a valid xml. Unable to parse it. {0}, Details: {1}</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. The cloudstreamsUpgrade.xml file is corrupted.
<b>Action</b>	Contact Support.
<b>CLS.0010.0717W</b>	<b>CloudStreams Upgrade, Could not find Default STS configuration file: {0} in archived zip file</b>
<b>Explanation</b>	The default STS configuration file was not found when performing an overinstall upgrade.
<b>Action</b>	This is an internal error. Contact webMethods Customer Care. Please produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the CloudStreams package's list of services in IS Admin's package management menu if available.

---

<b>CLS.0010.0718E</b>	<b>During CloudStreams upgrade, a configuration file has an unexpected element key attribute, {0}, with value. {1}. The configuration file path is: {2}</b>
<b>Explanation</b>	This log message may occur when the CloudStreams package loads during the Integration Server restart after an overinstall. The cloudstreamsUpgrade.xml file is corrupted.
<b>Action</b>	Contact Support.
<b>CLS.0010.0719E</b>	<b>CloudStreams Upgrade, Could not find Default STS configuration file: {0} following upgrade; Skipping migrating configuration data!</b>
<b>Explanation</b>	CloudStreams was unable to locate the default STS configuration file during an overinstall upgrade.
<b>Action</b>	This is an internal error. Contact webMethods Customer Care. Please produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in IS Admin's package management menu if available.
<b>CLS.0010.0720W</b>	<b>CloudStreams Upgrade, Could not load Default STS client configuration; Skipping migrating configuration data</b>
<b>Explanation</b>	The default STS configuration file was not found when performing an overinstall upgrade.
<b>Action</b>	This is an internal error. Contact Customer Care. Please produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in IS Admin's package management menu if available.
<b>CLS.0050.0279D</b>	<b>Callback not removed for message id, "{0}". Receiver: {1}, Properties: {2}</b>
<b>Explanation</b>	When a service is invoked, the state for the invocation is stored in a callbackStore map until the response is returned. The callback object was not found in the map for the given message id.
<b>Action</b>	No action is necessary unless memory runs low. In that event, please contact support.
<b>CLS.0050.0280D</b>	<b>Message receiver not found for message id: "{0}", Properties: {1}</b>
<b>Explanation</b>	Synapse callback receiver used to process the provider response is not found.
<b>Action</b>	Please contact support.

<b>CLS.0050.0281D</b>	<b>Outbound message id not found. "{0}", Properties: {1}</b>
<b>Explanation</b>	The message id used to correlate a native provider request was not found.
<b>Action</b>	Please contact support.
<b>CLS.0050.0408E</b>	<b>Authentication failed for user {0}</b>
<b>Explanation</b>	Invalid basic authentication credentials were included in the Authorization header sent to a virtual service that has a "Require HTTP Basic Authentication" runtime security policy.
<b>Action</b>	The web service consumer should include proper credentials and resend the service request.
<b>CLS.0050.0608E</b>	<b>Error occurred when adding Timestamp to SOAP Envelope: {0}</b>
<b>Explanation</b>	CloudStreams was unable to insert a WS security timestamp element to the request's security header sent to the native provider.
<b>Action</b>	Review the configured ESB "AddTimestamp" service call for virtual service and redeploy if incorrect, else this is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0070.0010E</b>	<b>Incoming SOAP request does not contain the 'Authorization' header. This service requires the HTTP Basic Authentication token to be present!</b>
<b>Explanation</b>	No Authorization header was sent to a virtual service that has a "Require HTTP Basic Authentication" runtime security policy.
<b>Action</b>	The web service consumer should include proper credentials and resend the service request.
<b>CLS.0070.0032E</b>	<b>Unable to create Schema for this service "{0}". Schema validation may not succeed.</b>
<b>Explanation</b>	CloudStreams was unable to initialize the schema parser for a virtual service with a "Validate Schema" runtime policy. This error occurs when a consumer sends CloudStreams a service request.
<b>Action</b>	Review the schemas defined in the virtual service, make corrections, and then redeploy the virtual service if necessary; otherwise, this is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.

---

<b>CLS.0070.0071W</b>	<b>The ESB service name specified for InvokeESB cloudstreams cannot be empty.</b>
<b>Explanation</b>	A virtual service was deployed containing an ESB service invocation step containing an invalid or missing service name.
<b>Action</b>	Review all service invocations from the "Processing steps" configuration for the virtual service, and redeploy if necessary.
<b>CLS.0070.0072E</b>	<b>The 'service' attribute is required for the InvokeESB cloudstreams definition.</b>
<b>Explanation</b>	The deployed virtual service configuration is corrupted.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0070.0073W</b>	<b>Did not invoke ESB service, because the service name was either empty or invalid (must be of the form folder1.folder2:service)</b>
<b>Explanation</b>	A virtual service was deployed containing an ESB service invocation step with an invalid or missing service name.
<b>Action</b>	This warning is logged when a virtual service request is executed. See the action defined for CLS.0070.0071.
<b>CLS.0070.0074E</b>	<b>Unknown mediator : {0}</b>
<b>Explanation</b>	Synapse mediators are used in the "In Sequence", "Out Sequence", and "Error Sequence" steps defined for virtual services. These Mediators are predefined and registered in CloudStreams.
<b>Action</b>	Contact Support.
<b>CLS.0101.0099D</b>	<b>Unable to remove session context for connector service with this session token. "{0}"</b>
<b>Explanation</b>	The CloudStreams transport listener should remove the session context for a connector service when it is no longer needed.
<b>Action</b>	Please contact support if available IS heap memory runs low.
<b>CLS.0102.0056E</b>	<b>Package name and service name must be specified for deploying service(s).</b>
<b>Action</b>	Verify whether the service has an associated package and then redeploy; otherwise, contact Support.

**CLS.0102.0057E**      **Unable to deploy. A virtual service with the name "{0}" already exists in the package "{1}".**

**Action**              Confirm whether the package association is correct and consider undeploying previous virtual services before deployment. Otherwise, contact Support.

**CLS.0200.0045E**      **Error saving EhCache configuration file: {0}**

**Explanation**        CloudStreams was unable to save its configuration file used for the Terracotta cache component.

**Action**              This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.

**CLS.0200.0046E**      **Could not find the specified EhCache configuration file: {0}**

**Explanation**        The Terracotta cache configuration file for CloudStreams caches could not be found during package startup.

**Action**              This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.

**CLS.0201.0003E**      **PgMen incoming handler found no sie event for {0}, mep: {1}**

**Explanation**        A service invoke event (sie) contains basic attributes of a service invocation. The sie should have been created by another Axis2 handler, but it was not or is no longer accessible from this handler.

**Action**              The service request will be permitted to execute, but the invocation may not be accurately tracked by the policy engine.

**CLS.0201.0004E**      **Exception in Outgoing fault handler while creating sie. serviceName: {0} cause: {1}**

**Explanation**        An error occurred while trying to create a service invoke event (sie) in a policy engine's Axis2 fault handler.

**Action**              The original service fault will be returned to the caller, but the service invocation may not be accurately tracked by the policy engine.

---

<b>CLS.0201.0005E</b>	<b>Unable to create an sie event in outgoing fault handler. serviceName: {0}</b>
<b>Explanation</b>	A service invoke event (sie) contains basic attributes of a service invocation. The sie should have been created by this or another Axis2 handler, but it was not or is no longer accessible.
<b>Action</b>	The original service fault will be returned to the caller, but the service invocation may not be accurately tracked by the policy engine.
<b>CLS.0201.0006E</b>	<b>PgMen incomingHandler found an event with unexpected state {0}</b>
<b>Explanation</b>	The policy engine relies on Axis2 handlers executing during specific phases in order to capture all the attributes of a service invocation. These attributes are stored in a service invoke event (sie) for each inbound or outbound phase.
<b>Action</b>	The sie data for this specific service invocation may be corrupted. The data contained in dependent policy engine events may be affected. Contact support.
<b>CLS.0201.0007E</b>	<b>Exception in incomingHandler. msgId: {0} details {1}</b>
<b>Explanation</b>	An error occurred while executing a policy engine Axis2 handler.
<b>Action</b>	A service fault will be returned to the caller, but the service invocation may not be accurately tracked by the policy engine.
<b>CLS.0201.0008E</b>	<b>PgMen incoming handler had no service name in message context for this msgId {0}</b>
<b>Explanation</b>	The inbound policy engine Axis2 handler did not find an Axis2 service registered in the message context; however, the service request will be permitted to execute and the response will be returned to the caller.
<b>Action</b>	Since the virtual service was not identified for this service request, the invocation will not be tracked by the policy engine.
<b>CLS.0201.0011E</b>	<b>PgMen incoming handler could not find service operation in axis2 message context. Service name: {0}</b>
<b>Explanation</b>	The inbound policy engine Axis2 handler did not find an Axis operation registered in the message context; however, the service request will be permitted to execute and the response will be returned to the caller.
<b>Action</b>	Since the virtual service operation was not identified for this service request, the invocation will not be tracked by the policy engine.

<b>CLS.0201.0013E</b>	<b>PgMen outgoing handler found an event with unexpected state {0}, sie Dump: {1}</b>
<b>Explanation</b>	The policy engine relies on Axis2 handlers executing during specific phases in order to capture all the attributes of a service invocation. These attributes are stored in a service invoke event (sie) for each inbound or outbound phase.
<b>Action</b>	The sie data for this specific service invocation may be corrupted. The data contained in dependent policy engine events may be affected. Contact support.
<b>CLS.0201.0015E</b>	<b>Policy {0} forbids invocation of service {1} for scope {2}</b>
<b>Explanation</b>	This service invocation was rejected because a policy rule was breached in the policy engine.
<b>Action</b>	No action is necessary.
<b>CLS.0201.0016E</b>	<b>PgMen outgoing handler expected service {0} and invokeId: {1}, but cached event had {2} and {3}</b>
<b>Explanation</b>	The invocation id for this execution thread's handler does not match the id that is stored on the current service invocation event (sie).
<b>Action</b>	This error suggests that data corruption may have occurred. Please contact support.
<b>CLS.0201.0017E</b>	<b>PgMen outgoing handler had no service name in message context for this msgId {0}</b>
<b>Explanation</b>	The inbound policy engine Axis2 handler did not find an Axis2 service registered in the message context; however, the service request will be permitted to execute and the response will be returned to the caller.
<b>Action</b>	Since the virtual service was not identified for this service request, the invocation will not be tracked by the policy engine.
<b>CLS.0201.0018E</b>	<b>Axis service object not found in message context.</b>
<b>Explanation</b>	The inbound policy engine Axis2 handler did not find an Axis2 service registered in the message context; however, the service request will be permitted to execute and the response will be returned to the caller.
<b>Action</b>	Since the virtual service was not identified for this service request, the invocation will not be tracked by the policy engine.
<b>CLS.0201.0023W</b>	<b>No native service provider endpoint for {0}.</b>
<b>Explanation</b>	The policy engine's Axis2 outbound handlers found no endpoint reference in message context.
<b>Action</b>	No further action is necessary if an endpoint was located at a later point during execution and the service was invoked.

---

<b>CLS.0201.0024E</b>	<b>Exception caught while constructing the reason expression: {0}</b>
<b>Explanation</b>	An error occurred while processing a virtual service's error sequence step.
<b>Action</b>	No further action is necessary. The soap fault will be returned without the fault's reason content.
<b>CLS.0201.0034W</b>	<b>BaseHandler - No PolicyViolationDetector found, skipping analysis</b>
<b>Explanation</b>	The spring component for detecting policy violations is missing.
<b>Action</b>	Verify the WmCloudStreams package loaded successfully; otherwise please contact support to verify the CloudStreams spring configuration is not corrupted.
<b>CLS.0201.0040E</b>	<b>PgMen incoming event handler encountered an error executing PgMen outgoing FAULT handler. Cause: {0}</b>
<b>Explanation</b>	An error occurred while processing one of the Axis2 fault handlers used by the policy engine during a service invocation.
<b>Action</b>	A service fault will be returned to the caller, but the service invocation may not be accurately tracked by the policy engine.
<b>CLS.0201.0041E</b>	<b>PgMen outgoing handler could not find service operation in axis2 message context. Service name: {0}</b>
<b>Explanation</b>	The outbound policy engine Axis2 handler did not find an Axis operation registered in the message context; however, the service request will be permitted to execute and the response will be returned to the caller.
<b>Action</b>	Since the virtual service operation was not identified for this service request, the invocation will not be tracked by the policy engine.
<b>CLS.0201.0042E</b>	<b>PgMen outgoing FAULT handler could not find service operation in axis2 message context. Service name: {0}</b>
<b>Explanation</b>	The outbound policy engine Axis2 fault handler did not find an Axis operation registered in the message context; however, the service request will be permitted to execute and the response will be returned to the caller.
<b>Action</b>	Since the virtual service operation was not identified for this service request, the invocation may not be accurately tracked by the policy engine.
<b>CLS.0201.0043E</b>	<b>PgMen outgoing handler encountered error publishing an event. Missing sie event.</b>
<b>Explanation</b>	A service invoke event (i.e. sie) contains basic attributes of a service invocation. The sie should have been created by another Axis2 handler, but it was not or is no longer accessible from this handler.
<b>Action</b>	The service request will be permitted to execute, but the invocation may not be accurately tracked by the policy engine.

<b>CLS.0201.0044E</b>	<b>PgMen outgoing handler encountered error publishing an event. sie event is missing service name.</b>
<b>Explanation</b>	A service invoke event (i.e. sie) contains basic attributes of a service invocation. The sie should have been created by another Axis2 handler, but it was not or is no longer accessible from this handler.
<b>Action</b>	The service request will be permitted to execute, but the invocation may not be accurately tracked by the policy engine.
<b>CLS.0201.0046E</b>	<b>No UUID generator bean (bean id={0}) configured, using java.util.UUID</b>
<b>Explanation</b>	The spring configuration is missing an expected component for UUID generation.
<b>Action</b>	CloudStreams is falling back to an alternate UUID factory; however, this error suggests the configuration may be corrupted. Verify the WmCloudStreams package loaded successfully; otherwise, please contact support to verify.
<b>CLS.0202.0003E</b>	<b>Cannot create a PolicyEnforcer using a null/empty service name {0}</b>
<b>Explanation</b>	A virtual service must be associated to a policy before it may be applied at runtime.
<b>Action</b>	Verify the policy configuration filter is correct, the policy is active, and redeploy the affected virtual services.
<b>CLS.0202.0004E</b>	<b>Cannot create a PolicyEnforcer using a null PolicyInfo reference</b>
<b>Explanation</b>	The policy enforcer is a runtime object that requires a policy info configuration element.
<b>Action</b>	This should not happen under normal circumstances. Please contact support.
<b>CLS.0203.0062E</b>	<b>ControllingNodeLocker.run, thread id({0}), expected Ehcache, found ({1})</b>
<b>Explanation</b>	Unexpected content was returned in the Terracotta cluster status cache.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0203.0065E</b>	<b>ControllingNodeLocker.run, thread id({0}), caught ({1}/{2}) attempting to get a lock, thread dies.</b>
<b>Explanation</b>	CloudStreams encountered an error trying to obtain a lock on the controlling node in a Terracotta cluster.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.

<b>CLS.0203.0070I</b>	<b>ClusterStatusCache - cache manager for {0} returned null CacheCluster reference. Not clustered.</b>
<b>Explanation</b>	CloudStreams was unable to obtain a reference to the configured Terracotta cluster.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0203.0071I</b>	<b>{0} - getCluster(ClusterScheme.TERRACOTTA) threw exception {1}, using schema NONE</b>
<b>Explanation</b>	An attempt to get Terracotta cluster configuration details failed.
<b>Action</b>	If CloudStreams is configured for a Terracotta cluster, this is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0203.0072E</b>	<b>ClusterStatusCache - thread id({0}) attempts to release {1} lock, but does not hold it.</b>
<b>Explanation</b>	An attempt to release the lock on the node controller in a Terracotta cluster failed.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0203.0073E</b>	<b>Error initializing JAXB Context: {0}</b>
<b>Explanation</b>	Initialization for the cached global or registered consumers deployed to CloudStreams has failed.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0203.0075E</b>	<b>ControllingNodeLocker.run, thread id({0}), caught {1} attempting to ask about lock status, thread dies.</b>
<b>Explanation</b>	The thread defining the controlling node in a CloudStreams cluster encountered an error.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.

<b>CLS.0203.0076E</b>	<b>Unable to get the cache named {0} from the cache manager {1}</b>
<b>Explanation</b>	CloudStreams encountered an error while accessing one of the Terracotta caches.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0203.0081E</b>	<b>{0}, thread id({1}), caught {2}/{3} attempting to release lock. Thread dies.</b>
<b>Explanation</b>	CloudStreams encountered an error while releasing the lock on the controlling node in the Terracotta cluster.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0203.0082E</b>	<b>EhcacheClusterStatusCache, thread id({0}), caught {1}/{2} attempting to update the controlling lock in the cache.</b>
<b>Explanation</b>	CloudStreams encountered an error while updating the controlling node in a Terracotta cluster.
<b>Action</b>	This is an internal error. Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0203.0100W</b>	<b>Thread interrupted when trying to obtain {0} lock for the cache {1}</b>
<b>Explanation</b>	While CloudStreams was attempting to obtain a lock on a cache entry key, its thread was interrupted.
<b>Action</b>	No action is necessary if CloudStreams is functioning normally.
<b>CLS.0203.0101E</b>	<b>Unable to {0} lock the {1} cache for key {2} after waiting {3} ms</b>
<b>Explanation</b>	CloudStreams failed to lock a cache key in the expected time period.
<b>Action</b>	No action is necessary if CloudStreams is functioning normally
<b>CLS.0203.0103E</b>	<b>{0} task in thread {1} threw this: {2}</b>
<b>Explanation</b>	During CloudStreams shutdown, an error occurred in the controlling node of a Terracotta cluster.
<b>Action</b>	Contact Support. Produce a diagnostic zip file by running the cloudstreams.util:diagnosticZip service from the WmCloudStreams package's list of services in the Integration Server Administrator's package management menu, if available.

<b>CLS.0204.0008E</b>	<b>Unable to access spring bean config bean : {0}. Is there a problem with CloudStreams spring config file?</b>
<b>Explanation</b>	The interval manager thread pool is missing from its spring configuration file.
<b>Action</b>	Contact support.
<b>CLS.0204.0013W</b>	<b>No value defined in {0} cache for this key: {1}</b>
<b>Explanation</b>	The policy engine's interval manager component creates and updates a global interval counter that is used for both clustered and non-clustered installations.
<b>Action</b>	It is normal for this warning to appear once or twice when the WmCloudStreams package is reloaded or during Integration Server startup. If this warning message continues to occur, verify the WmCloudStreams package loaded successfully; otherwise, please contact support.
<b>CLS.0205.0062E</b>	<b>UddiPerformanceMetricsSender - unable to publish metrics over UDDI for service: {0}, message: {1}</b>
<b>Explanation</b>	This log message is produced when CloudStreams is unable to publish performance metrics results to CloudStreams. When reviewing the content, note that some exception details may have originated from the CentraSite product hosting the UDDI server. Errors can range from improper CloudStreams configuration, OS resource issues, network connectivity, or issues with the CentraSite installation.
<b>Action</b>	Depending on the errors logged in the CloudStreams UI, one of the following actions may prove more relevant: (1) Verify whether the CentraSite configuration information regarding UDDI is correct for the CloudStreams UI. (2) Verify whether the hostname or IP address is reachable from the computer running the CloudStreams instance. (3) Verify whether the CentraSite instance and its repository is up and accessible.
<b>CLS.0205.0063E</b>	<b>Unable to initialize UddiClientAdapter due to a missing password for username: {0}.</b>
<b>Explanation</b>	This log message is produced when CloudStreams is unable to publish performance metrics results to CloudStreams. A password was not found in the encrypted store for the user, configured in the CentraSite panel of the CloudStreams UI.
<b>Action</b>	Verify whether the password is entered and the configuration was successfully saved for the CentraSite configuration screen in the CloudStreams UI.
<b>CLS.0205.0064E</b>	<b>Error connecting to the CentraSite UDDI registry running on {0}://{1}:{2}. Error: {3}</b>
<b>Explanation</b>	This log message may be produced under the following situations: (1) During CloudStreams package startup. (2) CentraSite configuration entered in the CloudStreams UI is saved, but a connection to the UDDI server fails for these settings. (3) CloudStreams attempts to publish performance metrics but fails during its regular scheduled interval.
<b>Action</b>	Verify whether CentraSite configuration values in the CloudStreams UI are correct and CentraSite is up and running.

<b>CLS.0205.0067E</b>	<b>Error disconnecting to CentraSite UDDI registry running on {0}://{1}:{2}. Error: {3}</b>
<b>Explanation</b>	This log message may be seen during the following situations: (1) During CloudStreams package shutdown. (2) While CloudStreams is initializing communications with the CentraSite UDDI server after encountering an error during runtime or saving configuration values in the CloudStreams UI.
<b>Action</b>	Refer the "Action" text for 0205.0064.
<b>CLS.0205.0602E</b>	<b>Missing "{0}" JDBC destination pool from spring configuration.</b>
<b>Explanation</b>	A CloudStreams configuration file may be corrupted and a necessary configuration element may be missing.
<b>Action</b>	Contact Support.
<b>CLS.0205.0603E</b>	<b>Jdbc destination sender expected a JdbcEvent object but received: "{0}"</b>
<b>Explanation</b>	The JDBC destination sender event component received an unexpected event type.
<b>Action</b>	Contact Support.
<b>CLS.0205.0604E</b>	<b>JDBC destination sender encountered an SQL Exception while generating "{0}" events. Error Code: {1} Cause: {2}</b>
<b>Explanation</b>	The CloudStreams JDBC destination sender component encountered an SQL exception while sending a runtime event.
<b>Action</b>	Verify whether the CloudStreams functional alias in the Integration Server Administrator is configured for a JDBC pool. Verify whether the database is operational and then restart the functional alias pool. Verify whether the CloudStreamsEvents database component tables installed using the Common Database Component are still defined, and the JDBC pool credentials and URL defined in the Integration Server are correct. If it still fails, contact Support.
<b>CLS.0205.0605D</b>	<b>JDBC destination sender took {0} ms to get a connection out of the data source.</b>
<b>Explanation</b>	If the '0205 MEN - Events' CloudStreams logging component is set to 'DEBUG', CloudStreams issues a log message if the time it takes to get a JDBC connection exceeds a predefined threshold as defined in the CloudStreams pg-jdbc.xml file. The current default is 50 milliseconds.
<b>Action</b>	No action is necessary.

---

<b>CLS.0205.0606D</b>	<b>JDBC destination sender took {0} ms to get a prepared statement out of connection with this SQL: {1}.</b>
<b>Explanation</b>	If the '0205 MEN - Events' CloudStreams logging component is set to 'DEBUG', then CloudStreams issues a log message if the time it takes to get a JDBC prepared statement exceeds a predefined threshold as defined in the CloudStreams pg-jdbc.xml file. The current default is 50 milliseconds.
<b>Action</b>	No action is necessary.
<b>CLS.0205.0609D</b>	<b>JDBC destination sender took {0} ms to close the prepared statement and connection.</b>
<b>Explanation</b>	If the '0205 MEN - Events' CloudStreams logging component is set to 'DEBUG', then CloudStreams issues a log message if the time it takes to close a JDBC connection exceeds a predefined threshold as defined in the CloudStreams pg-jdbc.xml file. The current default is 50 milliseconds.
<b>Action</b>	No action is necessary.
<b>CLS.0205.0610E</b>	<b>JDBC event requires at least one SQL clause to be valid.</b>
<b>Explanation</b>	The CloudStreams JDBC component is in an invalid state.
<b>Action</b>	Contact Support.
<b>CLS.0205.0611D</b>	<b>JDBC destination sender took {0} ms to insert a batch of {1} "{2}" events. AutoCommit enabled on driver? {3}, Transaction Isolation level? {4}</b>
<b>Explanation</b>	If the '0205 MEN - Events' CloudStreams logging component is set to 'DEBUG', then CloudStreams issues a log message if the time it takes to execute a batch of runtime event inserts into the database, exceeds a predefined threshold as defined in the CloudStreams pg-jdbc.xml file. The current default is 500 milliseconds.
<b>Action</b>	No action is necessary unless the time is extremely large. In that case, consider reducing the 'pg.jdbc.batchSize' property in the CloudStreams pg-config.properties file. This will cause the JDBC destination sender to send updates to the database server in smaller batches.
<b>CLS.0205.0612E</b>	<b>JDBC destination sender cannot use a read-only connection object to insert events.</b>
<b>Explanation</b>	The functional alias used by the CloudStreams JDBC destination sender is configured for a read-only transaction model in the Integration Server Administrator.
<b>Action</b>	Change the configured transaction model so that it supports updates to the database.

<b>CLS.0205.0614E</b>	<b>The JDBC event SQL range should be between 0 and {0}, {1} is out of range.</b>
<b>Explanation</b>	The CloudStreams JDBC component is in an invalid state.
<b>Action</b>	Contact Support.
<b>CLS.0205.0615E</b>	<b>The JDBC performance metrics processor expected only one return key, but "{0}" were found.</b>
<b>Explanation</b>	The CloudStreams JDBC component is in an invalid state.
<b>Action</b>	Contact Support.
<b>CLS.0205.0616E</b>	<b>The JDBC performance metrics processor expected two SQL statements, but "{0}" were found.</b>
<b>Explanation</b>	The CloudStreams JDBC component is in an invalid state.
<b>Action</b>	Contact Support.
<b>CLS.0205.0617E</b>	<b>The JDBC performance metrics processor is missing the returned primary key upon SQL insert.</b>
<b>Explanation</b>	The database did not return the 'event_pk' primary key column for the event inserted into the cloudstreams_metrics_event table.
<b>Action</b>	Verify whether the database is functioning properly; otherwise, contact Support.
<b>CLS.0205.0618E</b>	<b>Jdbc event is in a bad state. Data type count "{0}" does not equal column value count "{1}"</b>
<b>Explanation</b>	The Jdbc event destination component is in an invalid state.
<b>Action</b>	Contact Support.
<b>CLS.0205.0619W</b>	<b>Jdbc driver doesn't support returned named SQL columns from Insert statement. Trying "Statement.RETURN_GENERATED_KEYS" mode.</b>
<b>Explanation</b>	The Jdbc event destination component will attempt to use named columns for returning the database-generated primary key after inserting a row. If the database driver does not support this feature, this log message is raised, and the component will use another method to return the inserted primary key.
<b>Action</b>	No action required unless other SQLException errors are raised.

---

<b>CLS.0206.0035W</b>	<b>MAC cache update {0} operation took {1} ms to complete for {2} SIEs. This could cause lock attempts for tallying metrics statistics in MAC cache to fail.</b>
<b>Explanation</b>	An update to the policy engine metrics data took longer than expected. When the duration of this task is longer than the configured lock request timeout, tasks can be lost when they fail to obtain exclusive locks.
<b>Action</b>	Review the Integration Server performance, increase the advanced property for lock timeout <code>pg.PgMenSharedCacheManager.lockTimeOut</code> , and the restart Integration Server. Otherwise, if this happens very frequently, contact Support. Produce a diagnostic zip file by running the <code>cloudstreams.util:diagnosticZip</code> service from the <code>WmCloudStreams</code> package's list of services in the Integration Server Administrator's package management menu, if available.
<b>CLS.0207.0002E</b>	<b>DCPool spring configuration {0} missing a workQueue property? No workQueue was instantiated.</b>
<b>Explanation</b>	The referenced policy engine thread pool is missing its in-memory work queue configuration.
<b>Action</b>	Possibly the <code>*-pgmen.xml</code> spring configuration file is corrupted. Contact support.
<b>CLS.0207.0003E</b>	<b>Work queue capacity must be greater than 0. Value {0} is invalid.</b>
<b>Explanation</b>	One of the advanced configuration properties in the <code>*-config.properties</code> file has an invalid queue size.
<b>Action</b>	These values are not exposed in the admin UI. Review the values in the <code>pg-config.properties</code> or <code>wst-config.properties</code> file and verify the policy engine work queue sizes are greater than 0.
<b>CLS.0207.0009W</b>	<b>{0} thread pool shutdown - caught {1} while awaiting pool termination.</b>
<b>Explanation</b>	A policy engine pool's thread was interrupted while waiting for graceful shutdown to complete.
<b>Action</b>	No action is needed.
<b>CLS.0300.0001E</b>	<b>"{0}" is an unknown connection factory alias</b>
<b>Explanation</b>	The classname specified in <code>wst-core.xml</code> spring bean configuration for the implementation map of the <code>'clientConnectionFactoryManager'</code> bean is not in the classpath.
<b>Action</b>	Contact support.

<b>CLS.0300.0002E</b>	<b>Class "{0}" for alias "{1}" does not implement the IConnectionManager interface.</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0003E</b>	<b>"{0}" is an unknown connection pool alias.</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0004E</b>	<b>Unknown configuration group alias, "{0}"</b>
<b>Explanation</b>	A CloudStreams connector descriptor has a configurable group in its connection configuration that is not valid for the connection manager.
<b>Action</b>	Contact support.
<b>CLS.0300.0007E</b>	<b>Error creating connection alias "{0}".</b>
<b>Explanation</b>	A CloudStreams connection manager had an error during its initialization phase.
<b>Action</b>	Contact support.
<b>CLS.0300.0010E</b>	<b>Unknown field key "{0}" from connection factory alias "{1}"</b>
<b>Explanation</b>	All managed connection configuration fields must have a unique key name including custom configuration fields. 'cn.providerURL' is an example.
<b>Action</b>	Review CloudStreams connector configuration to locate source of the unknown field name.
<b>CLS.0300.0011E</b>	<b>Attempt to unregister an unregistered connection configuration instance, "{0}"</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0012E</b>	<b>Attempt to reference an unregistered connection configuration instance, "{0}"</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0013T</b>	<b>Duplicate field "{0}" exists in configurable group "{1}" of connection factory</b>
<b>Explanation</b>	Each managed connection configuration field may only exist once for the select configurable groups.
<b>Action</b>	In normal cases, some common fields are shared across groups intended to be mutually exclusive (e.g. Amazon Web Service groups) when used with service configurations.

---

<b>CLS.0300.0014E</b>	<b>Duplicate custom field "{0}" exists in configurable group "{1}" of connection factory</b>
<b>Explanation</b>	Each managed connection configuration custom field must have a unique key name associated with it.
<b>Action</b>	Review all custom configuration fields created in CloudStreams and verify each name is unique.
<b>CLS.0300.0016E</b>	<b>Unexpected connection configuration implementation type, {0}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0017W</b>	<b>Error {0}, while releasing resources for connection configuration "{0}"</b>
<b>Explanation</b>	An error was encountered while releasing a managed connection pool instance during connection manager shutdown.
<b>Action</b>	No action is necessary.
<b>CLS.0300.0019E</b>	<b>Invalid HTTP method selected, "{0}"</b>
<b>Explanation</b>	An invalid HTTP method was referenced.
<b>Action</b>	Locate the source of the invalid method and change it to a valid HTTP method.
<b>CLS.0300.0020E</b>	<b>Unknown service method implementation: {0}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0021E</b>	<b>Missing connection configuration alias is required.</b>
<b>Explanation</b>	CloudStreams connector services must have a configured managed connection alias.
<b>Action</b>	Configure or recreate the connector service so it has a managed connection pool alias.
<b>CLS.0300.0022E</b>	<b>Connection configuration alias "{0}" requires at least one configurable group.</b>
<b>Action</b>	Review CloudStreams connectors and locate the connector that does not have at least one configurable group for all of its connections.
<b>CLS.0300.0025E</b>	<b>Unknown service request implementation: {0}</b>
<b>Action</b>	Contact Support.

<b>CLS.0300.0026E</b>	<b>Error getting property value for "{0}" from class {1}, Error: {2}</b>
<b>Explanation</b>	CloudStreams was unable to access the value for one of its managed connection's configurable fields.
<b>Action</b>	Inspect the configuration value and verify it is valid for the specified field.
<b>CLS.0300.0027E</b>	<b>Error setting property value "{0}" for "{1}" from class {2}, Error: {3}</b>
<b>Explanation</b>	CloudStreams was unable to access the value for one of its managed connection's configurable fields.
<b>Action</b>	Inspect the configuration value and verify it is valid for the specified field.
<b>CLS.0300.0028E</b>	<b>Error introspecting class {0}, Error: {1}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0029E</b>	<b>Custom config field "{0}" expected group alias "{1}" instead of "{2}"</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0030E</b>	<b>Custom config field is missing required key property.</b>
<b>Explanation</b>	All managed connection custom configuration fields must have a unique key name.
<b>Action</b>	Review CloudStreams connector configuration to locate source of the missing field key.
<b>CLS.0300.0031E</b>	<b>Illegal attempt to binding or register a connection configuration "{0}". It is already registered.</b>
<b>Explanation</b>	When a connection configuration (e.g. a managed connection pool) is enabled, its alias name must be unique.
<b>Action</b>	Change the connection configuration alias name so it will be unique.
<b>CLS.0300.0032E</b>	<b>Attempt to create a connection configuration instance "{0}" with missing required groups. Required groups: {1}</b>
<b>Action</b>	Review the affected CloudStreams connection configuration and ensure that it includes the required configurable group.

---

<b>CLS.0300.0033W</b>	<b>Error unloading connection manager alias "{0}" from factory. Details: {1}</b>
<b>Explanation</b>	An error was encountered while releasing a managed connection pool instance during connection manager shutdown.
<b>Action</b>	No action is necessary.
<b>CLS.0300.0034E</b>	<b>Connection factory manager overwrote key "{0}" for implementation. Old value: {1}, New value: {2}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0035E</b>	<b>Missing connection configuration instance for the alias "{0}"</b>
<b>Explanation</b>	An error occurred while attempting to obtain a socket connection for an unknown connection configuration instance.
<b>Action</b>	Confirm a connection configuration exists and is enabled with this alias name.
<b>CLS.0300.0036E</b>	<b>The config value "{0}" for field "{1}" is not supported.</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0038E</b>	<b>Configuration value missing for required field "{0}" in connection configuration "{1}"</b>
<b>Action</b>	Provide a value for the connection configuration's required field and then enable it again.
<b>CLS.0300.0039E</b>	<b>Configuration value for field "{0}" is not serializable. Value: {1}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0040E</b>	<b>Error creating native service provider endpoint, {0} with service context, {1} Error: {2}</b>
<b>Explanation</b>	The native provider endpoint could not be defined as a valid URI.
<b>Action</b>	Review the configured value and ensure it is properly formatted as a URI.
<b>CLS.0300.0041E</b>	<b>An IO or timeout exception is encountered for invoke "{0}" method for connection alias "{1}". Check the network connectivity/proxy setting. Details: {2}</b>
<b>Explanation</b>	A service invocation error occurred due to a network IO exception on the socket.
<b>Action</b>	Verify whether the connection configuration is correct, the endpoint is valid, the service is running, the connect and read timeouts are not too short, including the network connectivity and proxy settings.

<b>CLS.0300.0042E</b>	<b>Unexpected exception encountered for invoke "{0}" method for connection alias "{1}". Details: {2}</b>
<b>Explanation</b>	An unexpected service invocation error occurred that is not caused by an IO socket exception.
<b>Action</b>	Verify connection configuration is correct.
<b>CLS.0300.0044E</b>	<b>Error while activating Authentication scheme, "{0}" for connection alias, "{1}". Details: {2}</b>
<b>Explanation</b>	An error occurred activating an authentication scheme (e.g. OAuth, Basic Auth, etc.).
<b>Action</b>	Review configuration details if the authentication scheme has its own configuration; otherwise, please contact support.
<b>CLS.0300.0045E</b>	<b>HTTP version "{0}" is not supported. Must be HTTP/0.9, HTTP/1.0 or HTTP/1.1</b>
<b>Action</b>	Ensure that the connection configuration specifies the correct HTTP version.
<b>CLS.0300.0046E</b>	<b>Error in request headers configuration for "{0}" alias. Names: {1}, Values: {2}, Details: {3}</b>
<b>Explanation</b>	Error validating request headers encountered while enabling a connection configuration.
<b>Action</b>	Verify the comma-delimited list of request headers and values are valid.
<b>CLS.0300.0047E</b>	<b>Error in request headers configuration for "{0}" alias. Names: {1}, Values: {2}, Names and values are required.</b>
<b>Action</b>	Verify whether the comma-delimited list of header names and values have non-whitespace characters for each entry.
<b>CLS.0300.0051E</b>	<b>Error invoking connection from connection configuration instance "{0}". It is configured for an unknown web proxy alias "{1}"</b>
<b>Explanation</b>	A connection configuration has a configuration field for an unknown IS proxy server.
<b>Action</b>	Confirm the proxy alias entered for the connection configuration exists in the Integration Server 'Proxy Server' configuration.
<b>CLS.0300.0052W</b>	<b>Unable to register scheme for web proxy alias, "{0}", in connection configuration: "{1}"</b>
<b>Explanation</b>	A connection configuration's web proxy alias could not be initialized when it was enabled, so the configuration is enabled with no proxy server support.
<b>Action</b>	Verify the Integration Server proxy server configuration identified by the alias is valid.

---

<b>CLS.0300.0054E</b>	<b>Cannot create OAuthCredentials for OAuth version {0}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0055E</b>	<b>Cannot create SchemeFactory for OAuth version {0}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0056E</b>	<b>OAuthAliasHelperFactory cannot work with null token alias name</b>
<b>Explanation</b>	A connection configuration instance requires a valid OAuth alias.
<b>Action</b>	Verify the oauth token configuration in the CloudStreams admin has a proper alias.
<b>CLS.0300.0057E</b>	<b>OAuthAliasHelperFactory cannot find token alias name {0}</b>
<b>Explanation</b>	A connection configuration instance references an unknown OAuth token alias.
<b>Action</b>	Verify the connection configuration references the correct alias as defined in the oauth token configuration in the CloudStreams admin.
<b>CLS.0300.0058E</b>	<b>OAuthAliasHelperFactory cannot work with null OAuthAccessDetailsManager bean. Not configured.</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0059I</b>	<b>CloudStreams outbound connector "{0}" encountered an IO exception while reading the native provider response. Consider setting the advanced connection configuration, increasing timeout values for 'Connection Timeout' and 'Socket Read Timeout' properties. Also, optionally change 'Retry on Response Failure' to true while 'Connection Retry Count ' is greater than 0 if it is safe to send requests more than once.</b>
<b>Explanation</b>	The default timeout value for 'Connection Timeout' and 'Socket Read Timeout' property may not be enough. The default settings for the default connector outbound connection factory will not attempt to resend a request if it believes it was received by the provider. If there is no harm to send a request more than once to a provider, enable the 'Retry on Response Failure' advanced property (cn.retryIfRequestSentOk).
<b>Action</b>	In case the network is slow or the backend processing takes longer than usual, increase the 'Connection Timeout' and the 'Socket Read Timeout' values. Also, optionally change 'Retry on Response Failure' to true while 'Connection Retry Count ' is greater than 0 if it is safe to send requests more than once.

<b>CLS.0300.0061E</b>	<b>Error instantiating object for hostname verifier: "{0}", Details: {1}</b>
<b>Explanation</b>	This configuration field must be set to a fully qualified classname that implements the Apache HttpClient interface: org.apache.http.conn.ssl.X509HostnameVerifier. This field is used to perform validation checks between a native provider host and its server SSL certificate.
<b>Action</b>	Specify "org.apache.http.conn.ssl.AllowAllHostnameVerifier" to accept all hosts or "org.apache.http.conn.ssl.StrictHostnameVerifier" for strict enforcement. Leaving this field blank implies using the "AllowAllHostnameVerifier" option.
<b>CLS.0300.0062E</b>	<b>Hostname verifier class, "{0}", must implement org.apache.http.conn.ssl.X509HostnameVerifier interface.</b>
<b>Action</b>	Specify a valid fully qualified classname in the CloudStream package's java classpath that implements the interface or leave the field blank to disable hostname verification. See CLS.0300.0061 for more details.
<b>CLS.0300.0063E</b>	<b>Error initializing registered provider's SSL context for the "{0}" algorithm. Details: {1}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0064E</b>	<b>Error reading a key store for this file: {0}, Details: {1}</b>
<b>Action</b>	Verify whether the file path exists, the file is a valid keystore file, and Integration Server has privileges to read the file.
<b>CLS.0300.0065E</b>	<b>Error reading a trust store for this file: {0}, Details: {1}</b>
<b>Action</b>	Verify whether the file path exists, is a valid trust store file, and the Integration Server has OS privileges to read the file; otherwise, contact Support.
<b>CLS.0300.0066E</b>	<b>Error initializing entrust security provider's socket factory "{0}" algorithm. Details: {1}</b>
<b>Action</b>	Unless this is a correctable error with one of the keystore files, contact Support.
<b>CLS.0300.0069E</b>	<b>Unable to verify hostname. unknown SSL socket type: {0}</b>
<b>Explanation</b>	Unable to perform hostname verification on a native provide endpoint.
<b>Action</b>	Contact support.

---

<b>CLS.0300.0070E</b>	<b>Unknown HCAdapter event type: {0}</b>
<b>Explanation</b>	An enabled connection configuration instance has received a notification event from an unknown origin. (These events are used to keep configuration instances in synch with related Integration Server configuration changes when possible.)
<b>Action</b>	Contact support.
<b>CLS.0300.0072E</b>	<b>Error creating socket factory, "{0}". Details: {1}</b>
<b>Explanation</b>	Unable to create the SSL socket factory for use with a connection configuration.
<b>Action</b>	Review the configuration and make corrections if possible; otherwise, please contact support.
<b>CLS.0300.0073D</b>	<b>Error during onCleanup for socket factory for "{0}". Details: {1}</b>
<b>Explanation</b>	Nonfatal error encountered while release resources associated with a connection configuration's SSL socket factory.
<b>Action</b>	No action should be necessary for this debug message.
<b>CLS.0300.0075E</b>	<b>Unable to initialize the key store for file: {0}, Details: {1}</b>
<b>Action</b>	Ensure that the file path exists, is a valid keystore file, and the Integration Server has OS privileges to read the file; otherwise, contact Support.
<b>CLS.0300.0076E</b>	<b>Unable to create key store object from this file. {0}, exists? {1}, readable? {2}</b>
<b>Action</b>	Ensure that the file path exists, is a valid keystore file, and the Integration Server has OS privileges to read the file; otherwise, contact Support.
<b>CLS.0300.0077E</b>	<b>Unable to access client's private key and certificate for this key alias: {0}, in this keystore file: {1}, Details: {2}</b>
<b>Action</b>	Ensure that the configuration alias used to access the client key is correct for the specified keystore; otherwise, contact Support.
<b>CLS.0300.0081E</b>	<b>Unable to register or unregister connfactory event subscriber instance, {0}. Event type: {1} Details: {2}</b>
<b>Explanation</b>	An error occurred while the connection factory registered its event listener used to receive notifications for some Integration Server configuration changes.
<b>Action</b>	Contact support.

<b>CLS.0300.0082E</b>	<b>Error during onInit for socket factory, "{0}". Details: {1}</b>
<b>Explanation</b>	Error during SSL socket factory initialization.
<b>Action</b>	Contact support.
<b>CLS.0300.0083E</b>	<b>Error initializing security provider's socket factory. Key store alias: {0}, trust store alias: {1}, details: {2}</b>
<b>Explanation</b>	Error during SSL socket factory initialization.
<b>Action</b>	Contact support.
<b>CLS.0300.0093E</b>	<b>Error initializing connfactory cert chain verifier for trust store file: {0}, Details: {1}</b>
<b>Explanation</b>	Error occurred while building the list of certificates that the connection configuration will trust.
<b>Action</b>	Contact support.
<b>CLS.0300.0096E</b>	<b>Error while attempting to verify trust for this cert: {0}, Cert will not be trusted. Details: {1}</b>
<b>Action</b>	No action is necessary unless this certificate is trusted; otherwise, contact Support.
<b>CLS.0300.0099E</b>	<b>Credentials configurable group failed to bind configuration field "{0}", with an illegal value "{1}".</b>
<b>Explanation</b>	The "cr.authSchemeType" configuration field is limited to a closed set of possible values.
<b>Action</b>	It should not be possible to specify an unknown value through the CloudStreams connection admin UI, so please contact support.
<b>CLS.0300.0100E</b>	<b>Protocol configurable group failed to bind configuration field "{0}", with an illegal value "{1}".</b>
<b>Explanation</b>	The "pr.protocolVersion" configuration field is limited to a closed set of possible values.
<b>Action</b>	It should not be possible to specify an unknown value through the CloudStreams connection admin UI, so please contact support.
<b>CLS.0300.0105E</b>	<b>Error creating buffered entity for request message. Details: {0}</b>
<b>Action</b>	If problem persists, contact Support.

---

<b>CLS.0300.0106E</b>	<b>Connection configuration instance "{0}" contains a custom key "{1}" with no prefix. Suggest "cx.{1}"</b>
<b>Explanation</b>	All connection fields including custom fields must have a key name that may be used to identify the field. A dot-separated prefix must be prepended to the field name's key. 'cx.' is the suggested convention for custom fields.
<b>Action</b>	Change the specified key for the custom configuration field so it contains a valid prefix.
<b>CLS.0300.0107E</b>	<b>AWS Activator called with wrong token instance. {0}</b>
<b>Explanation</b>	The Amazon web service auth scheme requires auth tokens to produce the content necessary to invoke an AWS service.
<b>Action</b>	Please contact support.
<b>CLS.0300.0108E</b>	<b>Missing auth token required field for Amazon Web Service authentication. {0}</b>
<b>Explanation</b>	The Amazon web services require auth tokens to build a proper service request that can be authenticated.
<b>Action</b>	Review configuration and ensure all token fields are provided.
<b>CLS.0300.0110E</b>	<b>AWS v2 signature auth scheme requires application/x-www-form-urlencoded content.</b>
<b>Explanation</b>	Amazon web service signature version 2 cannot be used unless request message is using the required Content-Type.
<b>Action</b>	Correct service configuration to use the appropriate content type for the request.
<b>CLS.0300.0111E</b>	<b>Unable to update native provider URI for AWS {0} signature auth scheme.</b>
<b>Explanation</b>	The Amazon signature auth scheme appends additional security tokens as query parameters on the native provider endpoint.
<b>Action</b>	Please contact support.
<b>CLS.0300.0112E</b>	<b>Unexpected request type received in AWS {0} auth scheme. {1}</b>
<b>Action</b>	Contact Support.
<b>CLS.0300.0114E</b>	<b>Unsupported algorithm. {0} AWS {1} signature scheme must be one of these. {2}</b>
<b>Explanation</b>	The service must be configured to use one of the valid algorithms for signing the request.
<b>Action</b>	Review connection configuration.

<b>CLS.0300.0115E</b>	<b>"{0}" header is missing from {1} AWS signature auth scheme.</b>
<b>Explanation</b>	The AWS authentication scheme requires this header.
<b>Action</b>	Verify the service configuration is correct.
<b>CLS.0300.0117D</b>	<b>Expected one value for AWS Param key: {0}, Found: {1}</b>
<b>Explanation</b>	This AWS auth scheme parameter was expected to have only one value.
<b>Action</b>	Please contact support.
<b>CLS.0300.0118T</b>	<b>Provider endpoint: {0}, AWS Canonical Request: {1}</b>
<b>Explanation</b>	AWS signature calculations require requests to be in a specific format.
<b>Action</b>	Use this message to debug AWS signature authentication failures.
<b>CLS.0300.0119T</b>	<b>Provider endpoint: {0}, AWS String to sign: {1}</b>
<b>Explanation</b>	AWS signature calculations create a specific string to sign when generating signatures for the request.
<b>Action</b>	Use this message to debug AWS signature authentication failures.
<b>CLS.0300.0120T</b>	<b>Provider endpoint: {0}, AWS Canonical Request: {1}</b>
<b>Explanation</b>	AWS v2 signatures calculations require requests to be in a specific format.
<b>Action</b>	Use this message to debug AWS signature authentication failures.
<b>CLS.0300.0122T</b>	<b>Added 'Host' header: {0}</b>
<b>Explanation</b>	Amazon v4 signature requests require a "Host" header be sent with request.
<b>Action</b>	Use this message to debug AWS signature authentication failures.
<b>CLS.0300.0123E</b>	<b>Unknown AWS auth scheme type.</b>
<b>Explanation</b>	The AuthSchemeActivatorFactory received auth tokens for an unsupported signature scheme. type: {0}
<b>Action</b>	Please contact support.
<b>CLS.0300.0124E</b>	<b>Unsupported AWS auth scheme type. {0}</b>
<b>Explanation</b>	An auth scheme must be declared for the service, so it can be properly authenticated by the AWS server.
<b>Action</b>	Verify the connector configuration is correct.

<b>CLS.0300.0125E</b>	<b>Unexpected error binding configuration authTokens to AWS configuration. Details: {1}</b>
<b>Explanation</b>	Unable to enable a connection configuration with AWS configuration group because of an unexpected error.
<b>Action</b>	Please contact support.
<b>CLS.0301.0001E</b>	<b>This IData request is missing NSRecord metadata. Namespace details may be impacted.</b>
<b>Explanation</b>	NSRecord metadata (document types) are used to marshal between IData and Axiom (XML) data models.
<b>Action</b>	Contact support.
<b>CLS.0301.0002E</b>	<b>IDataBuilder error translating IData message into an Axiom element. Details: {0}</b>
<b>Explanation</b>	An error occurred while translating a message from IData to the Axiom (XML) data model.
<b>Action</b>	Verify the IData content is valid.
<b>CLS.0301.0003E</b>	<b>IDataBuilder missing required parameters. Either an input stream or an IData object is needed to process a message.</b>
<b>Explanation</b>	The component that translates IData to Axiom (XML) data model is missing a required value.
<b>Action</b>	Review service that produced this error and verify a reference to either an input stream or IData content was provided.
<b>CLS.0301.0005E</b>	<b>IDataMessageFormatter error translating Axiom element to IData for service: {0} and operation: {1}. Details: {2}</b>
<b>Explanation</b>	An error occurred while translating a message from Axiom (XML) to the IData data model.
<b>Action</b>	Review service that produced this error and verify the message content is valid.
<b>CLS.0301.0006E</b>	<b>IDataMessageFormatter error encoding IData message to stream for service: {0} and operation: {1}. Details: {2}</b>
<b>Explanation</b>	An error occurred while serializing a message.
<b>Action</b>	Review service that produced this error and verify the message content is valid.

<b>CLS.0301.0008E</b>	<b>IDataMessageFormatter is unable to resolve provider targetAddress as a valid URL. {0}</b>
<b>Action</b>	Verify whether the target address endpoint is a valid URL.
<b>CLS.0301.0009E</b>	<b>CloudStreams message mappings for CloudStreams virtual service invocation "{0}" is invalid. Details: {1}</b>
<b>Explanation</b>	A CloudStreams service has one or more message mapping steps which are invalid.
<b>Action</b>	Review the errors and correct the message mapping statements for this connector.
<b>CLS.0301.0010D</b>	<b>CloudStreams mapping step, Error applying map step to message. Service invocation aborted? {0}. Source: {1}, Target: {2}, Details: {3}</b>
<b>Explanation</b>	Debug message showing an exception that occurred while executing a mapping step.
<b>Action</b>	If the mapping step is not required, then no additional action is necessary.
<b>CLS.0301.0011E</b>	<b>CloudStreams mapping step, Unknown map type "{0}"</b>
<b>Explanation</b>	There are various categories of mapping steps. (e.g. HEADER, COOKIE, XPATH, IDATA, etc.).
<b>Action</b>	Review the connector configuration and fix the invalid mapping step.
<b>CLS.0301.0012E</b>	<b>CloudStreams mapping step, Illegal attempt to set a value on a LITERAL mapping step named, "{0}"</b>
<b>Explanation</b>	A mapping step cannot have a 'LITERAL' target. In other words, a LITERAL cannot have a value assigned to it; it can only be used as a source value in mapping expressions.
<b>Action</b>	Review the connector configuration and fix the invalid mapping step.
<b>CLS.0301.0013E</b>	<b>CloudStreams mapping step, mapping step is missing "{0}" map value.</b>
<b>Explanation</b>	The mapping step is not properly configured. It is missing required elements.
<b>Action</b>	Review the connector configuration and fix the invalid mapping step.
<b>CLS.0301.0014E</b>	<b>CloudStreams mapping step, mapping step is missing "context" for map value. Must be IN or OUT.</b>
<b>Explanation</b>	A mapping step has a specific context depending on where it is used during service invocations. The 'IN' context implies the expression executes before the service invocation. The 'OUT' context implies the expression executes after the service invocation.
<b>Action</b>	Review the connector configuration and fix the invalid mapping step.

---

<b>CLS.0301.0016E</b>	<b>CloudStreams mapping step, XPath map value expression contains namespace prefix, but no namespaces were provided with map. {0}</b>
<b>Explanation</b>	An XPATH mapping step must include a namespace prefix and URI declaration(s) if the XPath expression contains a colon-delimited prefix reference.
<b>Action</b>	Review the connector configuration and fix the invalid mapping step.
<b>CLS.0301.0017E</b>	<b>CloudStreams mapping step, XPath map step unable to set value on node. "{0}" did not find any nodes in message.</b>
<b>Explanation</b>	An XPATH mapping step executed but the expression returned no matching nodes from the Axiom (XML) message.
<b>Action</b>	Review the connector configuration and verify the expression is valid if matches were expected.
<b>CLS.0301.0019E</b>	<b>CloudStreams mapping step, Error executing XPath map step to set value for this XPath: "{0}" and this value: {1}, Details: {2}</b>
<b>Explanation</b>	An error occurred while executing an XPath expression meant to set a value on an Axiom (XML) message.
<b>Action</b>	Review the connector configuration and fix the invalid mapping step if this error was unexpected.
<b>CLS.0301.0020E</b>	<b>CloudStreams mapping step, XPath map step unable to set value on node. "{0}" found {1} nodes in message.</b>
<b>Explanation</b>	An XPATH mapping step's XPath expression against an Axiom (XML) message did not resolve to a single node.
<b>Action</b>	Review the connector configuration and fix the invalid mapping step if this error was unexpected.
<b>CLS.0301.0021E</b>	<b>CloudStreams mapping step, Error executing XPath map step to get value for this XPath: "{0}", Details: {1}</b>
<b>Explanation</b>	An error occurred while executing an XPath expression meant to get a value from a message.
<b>Action</b>	Review the connector configuration and fix the invalid mapping step if this error was unexpected.

<b>CLS.0301.0023E</b>	<b>CloudStreams mapping step. Error executing validation for mappings. Details: {0}</b>
<b>Action</b>	Review the connector configuration and then fix the invalid mapping step(s).
<b>CLS.0301.0025E</b>	<b>CloudStreams mapping step, XPath "{0}" expression returned unsupported XML element type, "{1}". Expressions must resolve to a single element or attributes only.</b>
<b>Explanation</b>	CloudStreams XPATH mapping expressions may only reference text or attributes nodes in the XML message.
<b>Action</b>	Review the connector configuration and fix the invalid mapping step.
<b>CLS.0301.0031E</b>	<b>No validator instance to validate CloudStreams message content using IS doc type validation.</b>
<b>Explanation</b>	CloudStreams was unable to create a validator for a message against its associated doc type(s).
<b>Action</b>	Review the doctypes for the affected request or response message.
<b>CLS.0301.0032E</b>	<b>Error while validating CloudStreams message content using IS doc type validation. Details: {0}</b>
<b>Explanation</b>	An unexpected error occurred while validating a message against its associated doctype(s).
<b>Action</b>	Review the doctypes for the affected request or response message.
<b>CLS.0301.0033E</b>	<b>Cloudstreams message is not valid based on expected doc type. Details: {0}</b>
<b>Explanation</b>	A CloudStreams request or response message did not have the expected structure as defined by its associated doctype(s).
<b>Action</b>	Review the connector service configuration and state of the native provider to resolve the underlying error with the unexpected message structure.
<b>CLS.0301.0034E</b>	<b>The configured translator service "{0}" is missing "static" method declaration for its "translate" method.</b>
<b>Explanation</b>	A mapping statement may have an optional attribute that defines a fully qualified classname for a java class. This class must contain a public static method named 'translate'.
<b>Action</b>	Verify the connector configuration's mapping statement is correct and the class has the expected 'translate' public static method and is in the CloudStreams class loader.

---

<b>CLS.0301.0035E</b>	<b>Error resolving configured translate service "{0}", Details: {1}</b>
<b>Action</b>	Verify whether the connector configuration's mapping statement is correct and the class is in the CloudStreams class loader. See CLS.0301.0034 for more details.
<b>CLS.0301.0037E</b>	<b>Unknown builder type "{0}" for message data handler.</b>
<b>Explanation</b>	No Axis2 message Builder implementation is registered for this builder type (key).
<b>Action</b>	Contact support.
<b>CLS.0301.0038E</b>	<b>Unknown message formatter type "{0}" for message data handler.</b>
<b>Explanation</b>	No Axis2 MessageFormatter implementation is registered for this message type (key).
<b>Action</b>	Contact support.
<b>CLS.0301.0042E</b>	<b>No response code and method mapping found for connector "{0}" and response code "{1}" and httpMethod "{2}"</b>
<b>Explanation</b>	The invoked connector service has returned an unexpected response code for the httpMethod used to execute the request. So it is considered to be a fault condition regardless of the provider response code.
<b>Action</b>	A fault message will be returned to the pipeline. If the virtual service is configured to return the native provider fault, then this provider response will be included.
<b>CLS.0301.0045E</b>	<b>Unknown message handler phase. {0}</b>
<b>Explanation</b>	CloudStreams message handlers have predefined inbound and outbound phases for both request and response message processing.
<b>Action</b>	Contact support.
<b>CLS.0301.0046E</b>	<b>Unknown message builder content type, "{0}" for "{1}" message phase</b>
<b>Explanation</b>	The message mapping in CloudStreams wst-transport.xml configuration file is incorrect.
<b>Action</b>	Contact support.
<b>CLS.0301.0047E</b>	<b>Unknown message formatter content type, "{0}" for "{1}" message phase</b>
<b>Explanation</b>	The message mapping in CloudStreams wst-transport.xml configuration file is incorrect.
<b>Action</b>	Contact support.

**CLS.0301.0062E**      **Error instantiating builder class: {0} for content type: {1}. Details: {2}**  
**Explanation**      The message mapping in CloudStreams wst-transport.xml or Integration Server's axis2.xml configuration file is incorrect.  
**Action**              Contact support.

**CLS.0301.0063E**      **Error instantiating message formatter class: {0} for content type: {1}. Details: {2}**  
**Explanation**      The message mapping in CloudStreams wst-transport.xml or Integration Server's axis2.xml configuration file is incorrect.  
**Action**              Contact support.

**CSHeaderTreeTable\_Active\_Label – Active**

**CSHeaderTreeTable\_Add\_Header\_Label – Add Header**

**CSHeaderTreeTable\_Add\_Label – Add**

**CSHeaderTreeTable\_Add\_Row\_Label – Add Row**

**CSHeaderTreeTable\_Default\_Value\_Label – Default Value**

**CSHeaderTreeTable\_Delete\_Header\_Label – Delete Header**

**CSHeaderTreeTable\_Delete\_Row\_Label – Delete Row**

**CSHeaderTreeTable\_Headers\_Label – Header(s)**

**CSHeaderTreeTable\_Headers\_Not\_Available\_Message – No headers are available to select because no operation is selected on the Operation tab.**

**CSHeaderTreeTable\_Headers\_Not\_Available\_Title – Headers Not Available**

**CSHeaderTreeTable\_Headers\_Not\_Found\_Title – Headers Not Found**

**CSHeaderTreeTable\_Insert\_Row\_Label – Insert Row**

**CloudServiceCreationPage\_Error – Error**

**CloudServiceCreationPage\_Page\_Description – Specify the location and name for the new cloud connector service.**

**CloudServiceCreationPage\_Page\_Title – Create a New Cloud Connector Service**

**CloudServiceCreationPage\_Warning – Warning**

**CloudStreams\_Provider\_Project\_Label – CloudStreams Provider Project**

**Explanation**            Menu item label for creating a new CloudStreams Provider Project.

**ConnectionAliasSelectionPage\_No\_Connections\_Error\_Message – No connection pools have been created for the selected cloud application provider.**

**ConnectionAliasSelectionPage\_Page\_Description – Select the connection pool that the cloud connector service "{0}" will use to connect to the cloud provider.**

**ConnectionAliasSelectionPage\_Search\_Message\_Text – type connection name**

**ConnectionAliasSelectionPage\_Text\_Available\_Connection\_Pool – Available Connection Pools**

**ConnectionAliasSelectionPage\_Text\_Name – Name**

**ConnectorParameterTable\_6 – Add Parameter**

**ConnectorParameterTable\_8 – Delete Parameter**

**ConnectorParameterTable\_Add\_Parameter\_Label – Add Parameter**

**ConnectorParameterTable\_Data\_Type\_Label – Data Type**

**ConnectorParameterTable\_Default\_Value\_Label – Default Value**

**ConnectorParameterTable\_Delete\_Parameter\_Label – Delete Parameter**

**ConnectorParameterTable\_Name\_Label – Name**

**ConnectorParameterTable\_Shift\_Down – Shift Down**

**ConnectorParameterTable\_Shift\_Down\_Label – Shift Down**

**ConnectorParameterTable\_Shift\_Up – Shift Up**

**ConnectorParameterTable\_Shift\_Up\_Label – Shift Up**

**ConnectorParameterTable\_Type\_Label – Type**

**ConnectorServiceWizard\_Wizard\_Title – New Cloud Connector Service**

**Deploylog\_Table\_ServerHost – CloudStreams Server Host**

**Deploylog\_Table\_ServerVersion – CloudStreams Server Version**

**Deploylog\_table\_serverColumn – CloudStreams Server Alias**

<b>Description</b>	<b>Description:</b>
<b>ECLS.0300.0008</b>	<b>Connection configuration alias "{0}" already registered. Original config was replaced with alias "{1}"</b>
<b>Explanation</b>	Managed connection pool aliases must be unique across all CloudStreams connectors.
<b>Action</b>	Locate the duplicate alias name and change its name to ensure no two pool configurations share the same alias.

**Error\_Generic\_Message – Operation failed because of the following reason, please check the log files for more details.**

**Error\_Unable\_To\_Reach\_Destination – Unable to reach the Resource Destination. Check your Network connection and Hostname.**

**Group\_Column\_Connection\_Description – Connection Description**

**Group\_Column\_Connection\_Name – Connection Name**

**Group\_Column\_Connection\_Type – Connection Type**

**HeaderPage\_Page\_Name – Headers**

**HeaderPage\_Section\_Input – Input**

**HeaderPage\_Section\_Output – Output**

**HeaderSelectionPage\_Available\_Headers\_Label – Available Headers**

**HeaderSelectionPage\_Description – Select Header**

**HeaderSelectionPage\_Filter\_Text\_Message – type filter text**

**HeaderSelectionPage\_Header\_Label – Header**

**HeaderSelectionPage\_Title – Header**

**HeaderSelectionWizard\_Title – Select Header**

**IOEditor\_Editor\_Name – Input/Output**

**ISCloudConnectionNode\_Node\_Name – Cloud Connection**

**Info\_Configure\_Login\_Operation – Configure a Login Operation under Services.**

**Info\_Configure\_Logout\_Operation – Configure a Logout Operation under Services.**

**Is\_Hidden            Hide**

**Lookup\_SODescribe soDescribe**

**Lookup\_Selection\_Dialog – Lookup Selection Dialog**

**Lookup\_Selection\_Dialog\_Message – Select a Lookup.**

**Lookup\_Selection\_Dialog\_Title – Lookup Selection**

**New\_Group\_Wizard\_Description** – Select a group.

**New\_Group\_Wizard\_Title** – New Group

**OperationPage\_Business\_Object\_Label** – Business Object:

**OperationPage\_Con\_Pool\_Label** – Connection Pool:

**OperationPage\_Name** Operation

**OperationPage\_Operation\_Change\_Title** – Operation change confirmation

**OperationPage\_Provider\_Type\_Label** – Connector Type:

**OperationPage\_Virtual\_Svc\_Label** – Connector Virtual Service:

**OperationPage\_operation\_Label** – Operation:

**ParameterPage\_Form\_Text\_Parameters** – Parameters

**ParameterPage\_Page\_Name** – Parameters

**ParameterWizardPage\_Field\_Column** – Field

**ParameterWizardPage\_Field\_Label\_Column** – Field Label

**ParameterWizardPage\_Native\_Column** – Native

**ParameterWizardPage\_SOAP\_TYPE\_Column – SOAP Type**

**ProviderSelectionPage\_Name – Name**

**ProviderSelectionPage\_No\_Providers\_Error\_Message – No CloudStreams connectors are installed.**

**ProviderSelectionPage\_Page\_Description – Select a CloudStreams Connector instance to use for the cloud connector service "{0}".**

**ProviderSelectionPage\_Page\_title – Select the Connector**

**ProviderSelectionPage\_SearchLabel – Available Connectors**

**ProviderSelectionPage\_Search\_Message\_Text – type connector name**

**ProviderSelectionPage\_Type – Type**

**ProviderSelectionPage\_Version – Version**

**Publisher Publisher:**

**RetrieveBusinessObjs\_Operation\_Cancelled – Business Objects retrieval operation was canceled.**

**RetrieveBusinessObjs\_TaskName – Getting Business Objects...**

**ServiceSelectionPage\_No\_Services\_Error\_Message – No services exist for the selected cloud application provider.**

**ServiceSelectionPage\_Page\_Description – Select the service that will be used for the cloud connector service "{0}".**

**ServiceSelectionPage\_Page\_Title – Select the Service**

**ServiceSelectionPage\_Search\_Label – Available Services**

**ServiceSelectionPage\_Search\_Message\_Text – type service name**

**ServiceSelectionPage\_Text\_Name – Name**

**SummaryPage\_Business\_Object – Business Object:**

**SummaryPage\_ConnectionPool – Connection Pool:**

**SummaryPage\_Name Name:**

**SummaryPage\_Namespace – Namespace:**

**SummaryPage\_Operation – Operation:**

**SummaryPage\_Package\_Name – Package:**

**SummaryPage\_Page\_Name – Summary**

**SummaryPage\_Provider – Connector:**

**SummaryPage\_Provider\_Type – Connector Type:**

**SummaryPage\_Service\_Name – Service Name:**

**SummaryPage\_Version\_Number – Version Number:**

**TCLS.0300.0121**      **Added 'X-Amz-Date' header: {0}**  
**Explanation**      Amazon v4 signature requests require a 'Date' or 'X-Amz-Date' header be sent with request.  
**Action**              Use this message to debug AWS signature authentication failures.

**WST-2360**            **Updated CloudStreams Connector service "{0}" of package "{1}".**  
**Explanation**      Cloud connector service updation has failed. See the server/error logs for details.  
**Action**              Ensure that the cloud service which you are updating is not locked or in readonly mode. If the problem still persists, restart the Integration Server. If the problem still remains, contact Support.

**category.name**      **ESB**

**content-type.name** **CloudService**

**g11ndsp\_run\_as\_user** – **Run As User**

**service.editor.name** – **CloudStreams Service Multi-page Editor**

**wizard.name**        **Cloud Connector Service**

# 8 Command Central Messages

---

<b>CCEADME0000</b>	<b>Unknown node alias.</b>
<b>Explanation</b>	A node with the specified alias is not found.
<b>Action</b>	Provide a valid node alias.
<b>CCECAME0000</b>	<b>The specified flatfile location does not exist.</b>
<b>Explanation</b>	The flatfile repository was not located at the specified location on the file system.
<b>Action</b>	Specify a valid location for the flatfile repository.
<b>CCECAME0001</b>	<b>A repository already exists at the same location.</b>
<b>Explanation</b>	Two or more repositories cannot point to the same location.
<b>Action</b>	Specify a unique location for the new repository.
<b>CCECAME0002</b>	<b>A repository with this name already exists.</b>
<b>Explanation</b>	The name of the repository is not unique.
<b>Action</b>	Check the repository name and provide a unique name for the repository.
<b>CCECAME0003</b>	<b>Repository name, type and location cannot be empty or missing.</b>
<b>Explanation</b>	The name, type, and location are required parameters when creating asset type repositories.
<b>Action</b>	Specify values for all required parameters.

<b>CCECAME0004</b>	<b>Name and type cannot be empty or missing.</b>
<b>Explanation</b>	All parameters are required.
<b>Action</b>	Specify values for all parameters.
<b>CCECAME0005</b>	<b>Update failed. Trying to update {0} asset repository when the cached repository is of type {1}.</b>
<b>Explanation</b>	The specified asset repository type is incorrect.
<b>Action</b>	Specify the correct repository type.
<b>CCECCBE0000</b>	<b>File with path {} can not be deleted.</b>
<b>Explanation</b>	The file can not be deleted.
<b>Action</b>	Make sure the file is not used by any process.
<b>CCECCUI0143</b>	<b>No ports configured for the specified runtime.</b>
<b>Explanation</b>	There are no ports configured for the specified runtime.
<b>Action</b>	Configure a port.
<b>CCECCUI0288</b>	<b>No rows were selected. You are about to download all Log Sources.</b>
<b>Explanation</b>	No rows were selected in the Log Sources table before clicking the Download Selected Files menu option.
<b>Action</b>	No action required.
<b>CCECCUI0802</b>	<b>Chart shows summarized used {0}</b>
<b>Explanation</b>	Chart shows summarized used {0}
<b>CCECCUI0803</b>	<b>Total {0} above licensed capacity:</b>
<b>Explanation</b>	Total {0} above licensed capacity:
<b>CCECFRE0000</b>	<b>The content of the response is not acceptable according to the accept headers</b>
<b>Explanation</b>	The response content cannot be converted into the requested media type that is specified in the HTTP Accept header. For example, the response is in text format and cannot be converted into XML or JSON format.
<b>Action</b>	Try to load the configuration again and specify a supported media type.

<b>CCECFRE0001</b>	<b>The ConfigurationTypeId "{1}" does not exist for RuntimeComponentId "{0}".</b>
<b>Explanation</b>	One or more configuration types specified do not match or are not valid for the specified properties.
<b>Action</b>	Provide valid configuration types for the specified properties. You can determine the valid configuration types using the following command:cc list configuration types
<b>CCECFRE0002</b>	<b>The ConfigurationTypeId "{0}" does not exist for RuntimeComponentId "{1}".</b>
<b>Explanation</b>	There is no registered ConfigurationType with the provided ID for the specified runtime component.
<b>Action</b>	Provide a valid ConfigurationTypeId for the specified runtime component. You can determine the IDs for configuration types using the following command:cc list configuration types
<b>CCECFRE0005</b>	<b>LandscapeConfigurationUiBindingService is not available.</b>
<b>Explanation</b>	The LandscapeConfigurationUiBindingService is not registered.
<b>Action</b>	Ensure that the bundle that contains this service is active.
<b>CCECFRE0006</b>	<b>Configuration instance {0} cannot store license keys.</b>
<b>Explanation</b>	The specified configuration instance {0} cannot store license keys.
<b>Action</b>	Specify a configuration instances that is able to store license keys. Such configuration instances always start with the COMMON-LICENSE prefix.
<b>CCECFRE0007</b>	<b>Getting the content of an input stream as string fails</b>
<b>Explanation</b>	Command Central cannot convert the input stream as string.
<b>Action</b>	Check the logs for more information.
<b>CCECLTE0001</b>	<b>The expected values expression could not be parsed correctly.</b>
<b>Explanation</b>	The expected values expression could not be parsed correctly.
<b>Action</b>	Check the expected values expression for errors.
<b>CCECLTE0012</b>	<b>A resource was not specified.</b>
<b>Explanation</b>	The REST call failed because a remote resource location was not specified in the REST service.
<b>Action</b>	Specify a valid resource in the REST service, for example, spm/inventory/components.

<b>CCECLTE0013</b>	<b>A URL was not specified.</b>
<b>Explanation</b>	The REST call to the remote host failed because the URL was not specified.
<b>Action</b>	Specify a valid URL, for example, <code>http://localhost:8092</code> .
<b>CCECNFE0000</b>	<b>LandscapeDefinition service is not available.</b>
<b>Explanation</b>	The LandscapeDefinition service is not registered.
<b>Action</b>	Ensure that the bundle that contains this service is active and the service is properly configured.
<b>CCECNFE0001</b>	<b>Landscape inventory service not available.</b>
<b>Explanation</b>	The landscape inventory service was not configured.
<b>Action</b>	Ensure that the bundle that contains this service is active.
<b>CCECNFE0002</b>	<b>Configuration service factory not available.</b>
<b>Explanation</b>	A configuration service factory is not configured.
<b>Action</b>	Ensure that the bundle that contains the configuration service factory is active and that the component definition is correct.
<b>CCECNFE0003</b>	<b>The configuration service encountered a remote request failure.</b>
<b>Explanation</b>	The remote request for a configuration item failed.
<b>Action</b>	Ensure that the node in the request is active.
<b>CCECNFE0004</b>	<b>The remote request encountered a concurrency error.</b>
<b>Explanation</b>	The system could not execute parallel remote requests.
<b>Action</b>	Contact Software AG Global Support.
<b>CCECNFE0005</b>	<b>Can not update credentials.</b>
<b>Explanation</b>	The user credentials on Command Central can not be updated.
<b>Action</b>	Ensure that the <code>runtimeComponentId</code> and <code>nodeAlias</code> parameters are valid.
<b>CCECNFE0006</b>	<b>Can not process JSON configuration.</b>
<b>Explanation</b>	The JSON format of an old configuration is incorrect.
<b>Action</b>	Verify that the configuration uses proper JSON format.

---

<b>CCECNFE0008</b>	<b>Can not update configurations cache because of failure during retrieval of remote configurations.</b>
<b>Explanation</b>	The remote request for configuration items failed and the configurations cache can not be updated.
<b>Action</b>	Ensure that the node in the request is active.
<b>CCECNFE0009</b>	<b>The configuration service encountered a remote request failure while retrieving configuration data for runtime component {0}, configuration instance {1}.</b>
<b>Explanation</b>	The remote request for the specified configuration item failed.
<b>Action</b>	Ensure that the node in the request is active and check the Platform Manager logs.
<b>CCECOME0000</b>	<b>Cannot perform an operation on nodes that are not accessible. The offline nodes are {0}.</b>
<b>Explanation</b>	The specified nodes cannot be accessed because they are offline.
<b>Action</b>	Check the status of the specified nodes. Command Central can only access nodes that are online.
<b>CCECOME0002</b>	<b>{0} on {1} ({2}) became unresponsive. Component restart may help to resolve this quickly.</b>
<b>Explanation</b>	Specified components became unresponsive.
<b>Action</b>	Component restart may help to resolve this quickly.
<b>CCECOME0003</b>	<b>{0} on {1} ({2}) crashed. You will need to start it again and investigate the cause of the failure.</b>
<b>Explanation</b>	Specified components crashed.
<b>Action</b>	You will need to start it again and investigate the cause of the failure.
<b>CCECOME0007</b>	<b>{0} of {1} on {2} ({3}) spiked into critical zone. The component may become overloaded!</b>
<b>Explanation</b>	The specified component becomes overloaded.
<b>Action</b>	Try to release the load on the specified component.

<b>CCECOME0015</b>	<b>Node {0} was not found.</b>
<b>Explanation</b>	The specified node was not found.
<b>Action</b>	Check if the correct alias is used. If the node is not present in the landscape it can be added using the landscape service. If the node has been added but is still not accessible, contact Software AG Global Support.
<b>CCECOME0016</b>	<b>Node {0} could not be created.</b>
<b>Explanation</b>	A node with alias {0} could not be created because another node with alias {1} already exists.
<b>Action</b>	Provide a different alias for the new node.
<b>CCECOME0017</b>	<b>Environment {0} could not be created.</b>
<b>Explanation</b>	An environment with alias {0} could not be created because another environment with alias {1} already exists.
<b>Action</b>	Provide a different alias for the new environment.
<b>CCECOME0018</b>	<b>Generation of checksum for license metering report failed</b>
<b>Explanation</b>	The generation of the checksum for the license metering report failed.
<b>Action</b>	Contact Software AG Global Support.
<b>CCECOME0019</b>	<b>Generation of report id for license metering report failed</b>
<b>Explanation</b>	The generation of the report ID for the license metering report failed.
<b>Action</b>	Contact Software AG Global Support.
<b>CCECOME0020</b>	<b>Cannot convert XML report to string</b>
<b>Explanation</b>	The conversion of the XML report failed.
<b>Action</b>	Contact Software AG Global Support.
<b>CCECOME0025</b>	<b>Generation of XML string for object instance of class {0} failed</b>
<b>Explanation</b>	The generation of the XML string for object instance of class {0} failed.
<b>Action</b>	Provide a valid object instance.

---

<b>CCECOME0029</b>	<b>License key {0} not found.</b>
<b>Explanation</b>	The license key with the specified alias {0} is not found.
<b>Action</b>	Upload and assign a valid license key for this alias or use a different existing license key alias.
<b>CCECOME0030</b>	<b>Checksum verification of report {0} failed!</b>
<b>Explanation</b>	The checksum verification of report {0} failed.
<b>Action</b>	Contact Software AG Global Support.
<b>CCECOME0033</b>	<b>Unable to parse this date string({0}).</b>
<b>Explanation</b>	Unable to parse this date string({0}).
<b>Action</b>	Contact Software AG support.
<b>CCECOME0034</b>	<b>Unexpected exception occurred: {0}.</b>
<b>Explanation</b>	An unexpected exception occurred: {0}.
<b>Action</b>	Contact Software AG support.
<b>CCECOME0038</b>	<b>The remote Platform Manager job with id {0} was not found.</b>
<b>Explanation</b>	A job with the specified id was not found on Platform Manager.
<b>Action</b>	Specify an existing job id.
<b>CCECORE0001</b>	<b>Exceeded the maximum nodes allowed as per the configured license.</b>
<b>Explanation</b>	You have exceeded the nodes allowed to you as per the license configured for Command Central.
<b>Action</b>	Contact Software AG support to upgrade the license.
<b>CCECORE0002</b>	<b>Invalid License found. The system is going to shutdown in 30 minutes.</b>
<b>Explanation</b>	The configured license is invalid. You need to configure a valid license immediately else the system will shutdown in 30 mintures.
<b>Action</b>	Configure a valid license immediately. If you do not have one, contact your system dministrator or Software AG support.

<b>CCECORE0003</b>	<b>Invalid License found. The system is shutting down.</b>
<b>Explanation</b>	The system is shutting down as the configured license is invalid.
<b>Action</b>	Contact your Administrator or Software AG support.
<b>CCECORE0004</b>	<b>The license has expired.</b>
<b>Explanation</b>	The configured license has expired.
<b>Action</b>	Contact your system administrator or Software AG support.
<b>CCECORE0005</b>	<b>The license is not valid for the current operating system.</b>
<b>Explanation</b>	The configured license is not valid for the current operating system.
<b>Action</b>	Contact your Administrator or Software AG support.
<b>CCECORE0006</b>	<b>The number of nodes has exceeded as per the configured license.</b>
<b>Explanation</b>	As per the configured license, you are not allowed to add more nodes as you have exhausted the licensed number of nodes.
<b>Action</b>	Contact your system administrator or Software AG support to get the license upgraded to add more nodes.
<b>CCECORE0007</b>	<b>Failed to get the node count from the license.</b>
<b>Explanation</b>	This issue may occur when your license file is corrupt.
<b>Action</b>	Contact your system administrator or Software AG support.
<b>CCECORE0008</b>	<b>The configured license is not valid for this product.</b>
<b>Explanation</b>	Either the license file is not for Command Central or it may have be a corrupt file.
<b>Action</b>	Contact your system administrator or Software AG support.
<b>CCECORE0009</b>	<b>Failed to read the product code from the license.</b>
<b>Explanation</b>	This issue may occur when your license file is corrupt.
<b>Action</b>	Contact your system administrator or Software AG support.
<b>CCECORE0010</b>	<b>The configured license is not valid for this product version.</b>
<b>Explanation</b>	This issue may occur when your license file is corrupt.
<b>Action</b>	Contact your system administrator or Software AG support.

---

<b>CCECORE0011</b>	<b>Failed to read the product version from the license.</b>
<b>Explanation</b>	Either the license file is not for current version of Command Central or the license file may be corrupt.
<b>Action</b>	Contact your system administrator or Software AG support.
<b>CCECORE0012</b>	<b>Node with alias {0} is not found.</b>
<b>Explanation</b>	The specified node is not found in Command Central.
<b>Action</b>	Ensure that the node alias is spelled correctly. You can view a list of installations and their aliases using either the Command Central Web user interface, the cc list landscape nodes command, or the REST API.
<b>CCECORE0013</b>	<b>The specified search query is not valid. The supported search attributes are: {0}</b>
<b>Explanation</b>	One or more attributes are not supported for this type of search.
<b>Action</b>	Ensure that the search attributes are supported for the type of search you want to perform. Make sure that the attributes are spelled correctly. The supported search attributes are listed in the error message. Note that search attributes are case-sensitive.
<b>CCECORE0014</b>	<b>Task "{0}" for node "{1}" failed.</b>
<b>Explanation</b>	The specified task failed to execute for the specified node.
<b>Action</b>	Read through the details provided in the error message and the logs, then take corrective steps.
<b>CCECORE0015</b>	<b>Tasks execution has failed.</b>
<b>Explanation</b>	Some or all of the tasks failed to execute.
<b>Action</b>	Read through the details provided in the error message and the logs, then take corrective steps.
<b>CCECORE0016</b>	<b>The specified attribute name and the attribute name in the request are not the same.</b>
<b>Explanation</b>	The attribute name in the body and the attribute name in the path segment should be the same.
<b>Action</b>	Fix the request and try again.

<b>CCECORE0017</b>	<b>Specify attributes to created or updated.</b>
<b>Explanation</b>	The request does not contain search attributes to be created or updated.
<b>Action</b>	Fix the request and submit it again.
<b>CCECORE0018</b>	<b>{0} did not get {1} for {2} seconds!</b>
<b>Explanation</b>	The specified node did not reach the expected status in the given amount of time.
<b>Action</b>	Retry the operation or contact SoftwareAG Global Support.
<b>CCECORE0019</b>	<b>Key {0} is invalid.</b>
<b>Explanation</b>	The specified key {0} is invalid.
<b>Action</b>	Specify a valid key, followed by a valid contract item identifier (for example, item=<contractItemIdentifier>).
<b>CCECORE0020</b>	<b>Contract item identifier {0} is invalid.</b>
<b>Explanation</b>	The specified contract item identifier {0} is invalid.
<b>Action</b>	Specify a valid contract item identifier (for example, item=<contractItemIdentifier>). You can find the valid contract item identifiers using the following command: cc list license-tools manifests contracts basepeak <nodeAlias> <productId>
<b>CCECORE0021</b>	<b>One contract item identifier expected.</b>
<b>Explanation</b>	Command Central expects one contract item identifier.
<b>Action</b>	Specify one valid contract item identifier.
<b>CCECORE0022</b>	<b>Could not retrieve Version of node {0}.</b>
<b>Explanation</b>	The error usually occurs because of issues connecting to node {0}.
<b>Action</b>	Check the logs for details about the connectivity issues.
<b>CCECORE0023</b>	<b>Cannot add contract item identifier assignment for runtime components with base and peak license key.</b>
<b>Explanation</b>	Command Central cannot add the manual contract item identifier assignment if the runtime component has a base and peak license key.
<b>Action</b>	Specify contract item identifiers only for runtime components without base and peak license key.

---

<b>CCECORE0025</b>	<b>{0} did not get {1} for {2} seconds!</b>
<b>Explanation</b>	The specified node did not reach the expected status in the given amount of time.
<b>Action</b>	Retry the operation or contact SoftwareAG Global Support.
<b>CCECORE0026</b>	<b>{0} did not get {1} for {2} seconds!</b>
<b>Explanation</b>	The specified node did not reach the expected status in the given amount of time.
<b>Action</b>	Retry the operation or contact SoftwareAG Global Support.
<b>CCECORE0027</b>	<b>A node with the specified alias does not exist.</b>
<b>Explanation</b>	An installation (node) with the specified alias name does not exist.
<b>Action</b>	Specify a valid alias name for an existing installation (node).
<b>CCECORE0028</b>	<b>A runtime component with the specified id does not exist.</b>
<b>Explanation</b>	A runtime component with the specified ID does not exist on the node(s).
<b>Action</b>	Specify an ID of an existing runtime component.
<b>CCECORE0029</b>	<b>Cache update operation failed.</b>
<b>Explanation</b>	One of the automatic cache update operations failed to complete.
<b>Action</b>	Check the logs for details.
<b>CCECORE0030</b>	<b>Unknown cahce type: {0}. EventListener was not added because the required cache could not be created.</b>
<b>Explanation</b>	Ehcache is not configured properly.
<b>Action</b>	Contact Software AG global support.
<b>CCECORE0031</b>	<b>Unknown cahce type: {0}. EventListener was not removed because the required cache could not be created.</b>
<b>Explanation</b>	Ehcache is not configured properly.
<b>Action</b>	Contact Software AG global support.
<b>CCECORE0032</b>	<b>Invalid settings format: {0}</b>
<b>Explanation</b>	The format of the settings is as follows: key:value[;key:value]...
<b>Action</b>	Make sure that the settings comply with the specified format.

<b>CCECORE0033</b>	<b>Invalid value for period: {0}</b>
<b>Explanation</b>	The value for period must match the following pattern \d+h m. Examples: 9m, 3h, 45m, 12h
<b>Action</b>	Make sure the period value complies with the specified format.
<b>CCECPTE0000</b>	<b>Invalid composite template alias: {0}</b>
<b>Explanation</b>	The composite template alias is not present or contains special characters.
<b>Action</b>	Specify a composite template alias. The template alias can include the following characters: letters, digits, hyphen and dot.
<b>CCECPTE0001</b>	<b>A composite template with alias {0} already exists.</b>
<b>Explanation</b>	A composite template with the specified alias already exists.
<b>Action</b>	Change the alias of the composite template that is being imported or delete the existing composite template that has the same alias.
<b>CCECPTE0002</b>	<b>Missing property {0}.</b>
<b>Explanation</b>	A property is missing from the composite template definition.
<b>Action</b>	Add the missing property with a proper value.
<b>CCECPTE0003</b>	<b>Invalid value {0} for property {1}.</b>
<b>Explanation</b>	A property has an invalid value.
<b>Action</b>	Provide a proper value as described in the Command Central documentation.
<b>CCECPTE0004</b>	<b>A composite template with alias {0} does not exist.</b>
<b>Explanation</b>	A composite template with the specified alias does not exist.
<b>Action</b>	Import a composite template with the specified alias or use the alias of an existing composite template.
<b>CCECPTE0005</b>	<b>The requested repository version {0} was not found.</b>
<b>Explanation</b>	The requested repository version was not found.
<b>Action</b>	Provide an existing repository version or specify an image file location if the repository is of type image.

---

<b>CCECPTE0006</b>	<b>Invalid repository definition.</b>
<b>Explanation</b>	An invalid combination of properties was specified.
<b>Action</b>	See the Command Central documentation on how to define a repository.
<b>CCECPTE0007</b>	<b>The repository definition cannot have both version and location.</b>
<b>Explanation</b>	In the repository definition, the specified location defines that this is an image repository. However, a version cannot be specified for an image repository.
<b>Action</b>	Fix the repository definition. If it is an image repository, specify only a location. Otherwise, remove the location and specify proper credentials.
<b>CCECPTE0008</b>	<b>Cannot have both credentials and location in repository definition.</b>
<b>Explanation</b>	In the repository definition, location defines that this is an image repository. However, you cannot specify credentials for an image repository.
<b>Action</b>	Fix the repository definition. If the repository is an image repository, specify a location. If the repository is a master repository, remove the location and specify proper credentials.
<b>CCECPTE0015</b>	<b>The runtime status of runtime component {0} on node {1} is not online.</b>
<b>Explanation</b>	The runtime component has a status different than online.
<b>Action</b>	Check the logs on the node for issues which may cause the behavior.
<b>CCECPTE0016</b>	<b>The {0} lifecycle job of a runtime component on node {1} did not complete successfully.</b>
<b>Explanation</b>	The lifecycle job of a runtime component on a node did not complete successfully.
<b>Action</b>	Check the jobs on the node.
<b>CCECPTE0017</b>	<b>Define layers when there is a provisioning section.</b>
<b>Explanation</b>	Provisioning requires layers to be defined.
<b>Action</b>	Define a layers section.
<b>CCECPTE0018</b>	<b>Provisioning requires layer {0} however a layer is not defined.</b>
<b>Explanation</b>	All layers defined in the provisioning section should be defined in the layers section.
<b>Action</b>	Fix the layers section by adding the missing layers or change the provisioning section to not include layers.

<b>CCECPTE0019</b>	<b>Invalid layer alias: {0}</b>
<b>Explanation</b>	The layer alias is not present or contains special characters.
<b>Action</b>	Provide a layer alias. The layer alias can contain the following characters: letters, digits, hyphen and dot.
<b>CCECPTE0020</b>	<b>Invalid template alias: {0}</b>
<b>Explanation</b>	The template alias is not present or contains special characters.
<b>Action</b>	Provide a layer alias. The layer alias can contain the following characters: letters, digits, hyphen and dot.
<b>CCECPTE0021</b>	<b>Repository with name {0} is already defined.</b>
<b>Explanation</b>	A repository with the same name is already defined in the YAML document.
<b>Action</b>	Change the name of the repository, so that the name is unique in the scope of the document.
<b>CCECPTE0022</b>	<b>The maximum number of retries for applying template {0} on node {1} due to possible Platform Manager restarts is reached.</b>
<b>Explanation</b>	The maximum number of retries for applying a template on a node due to possible Platform Manager restarts is reached.
<b>Action</b>	Check the logs for details about previous attempts to apply the template to determine what the issues are.
<b>CCECPTE0023</b>	<b>{0} did not get {1} for {2} seconds!</b>
<b>Explanation</b>	The specified node did not reach the expected status in the given amount of time.
<b>Action</b>	Retry the operation or contact SoftwareAG Global Support.
<b>CCECPTE0024</b>	<b>Can not find any repository matching the provided host and name.</b>
<b>Explanation</b>	Command Central does not find a repository matching the specified host and name.
<b>Action</b>	Specify valid host and name.
<b>CCECPTE0025</b>	<b>Snapshot template {0} not found!</b>
<b>Explanation</b>	The snapshot template referred from the composite template cannot be found.
<b>Action</b>	Import a snapshot template with the specified alias and re-apply the composite template.

---

<b>CCECPTE0027</b>	<b>Server action {0} failed with a non-zero exit code: {1}</b>
<b>Explanation</b>	An action executing on the CommandCentral server failed.
<b>Action</b>	Make sure the action itself is correct and try again.
<b>CCECPTE0032</b>	<b>The jar command executable cannot be found on the source node installation.</b>
<b>Explanation</b>	The jar command executable cannot be found on the source node installation.
<b>Action</b>	Check the composite template logs.
<b>CCECPTE0038</b>	<b>Remote action {0} failed with a non-zero exit code: {1}</b>
<b>Explanation</b>	An action executing remotely failed.
<b>Action</b>	Make sure the action itself is correct and try again.
<b>CCECPTE0039</b>	<b>Neither script nor file exist for action: {0}!</b>
<b>Explanation</b>	An action must have either a script, or a file associated with it.
<b>Action</b>	Add a script or file and try again.
<b>CCECPTE0040</b>	<b>The runtime status of runtime component {0} on node {1} is not paused.</b>
<b>Explanation</b>	The runtime component has a status other than paused.
<b>Action</b>	Check the logs on the node for issues which may cause the behavior.
<b>CCECPTE0041</b>	<b>Environment {0} is not defined in 'provision'!</b>
<b>Explanation</b>	The environments in the 'provision' and 'migration' sections do not match.
<b>Action</b>	Make sure the same set of environments is present in both the 'provision' and 'migration' sections and try again.
<b>CCECPTE0042</b>	<b>Layer {0} referenced in 'migration' but not in 'provision'!</b>
<b>Explanation</b>	The layers referenced in the 'provision' and 'migration' sections do not match.
<b>Action</b>	Make sure the same set of layers are referenced from both the 'provision' and 'migration' sections and try again.
<b>CCECPTE0043</b>	<b>The number of nodes for layer {0} in 'migration' and 'provision' don't match!</b>
<b>Explanation</b>	The number of nodes for a given layer in the 'migration' section must match the number of nodes for the same layer in the 'provision' section.
<b>Action</b>	Make sure the number of nodes per layer is the same across the 'migration' and 'provision' sections and try again.

<b>CCECPTE0044</b>	<b>Executing more than one migration type in a single composite template is not supported: {0}, {1}. Check the source and target nodes hostnames and installation directories.</b>
<b>Explanation</b>	The composite template contains nodes that should be migrated using different migration type scenarios. This is not supported.
<b>Action</b>	Split or parameterize the template so that the migration is done using a single migration type.
<b>CCECPTE0045</b>	<b>Error during archiving the migration source node installation directory.</b>
<b>Explanation</b>	An error occurred during archiving the migration source node installation directory.
<b>Action</b>	Check the logs for the result of the executed remote archive command.
<b>CCECPTE0046</b>	<b>Runtime component with id {0} cannot be found.</b>
<b>Explanation</b>	Runtime component with the provided ID cannot be found.
<b>Action</b>	Check the Command Central logs for inventory service errors.
<b>CCECPTE0047</b>	<b>Cannot find node with alias {0} in the list of the bootstrapped migration source nodes: {1}.</b>
<b>Explanation</b>	Command Central cannot find the source node with the specified nodeAlias in the list of bootstrapped migration source nodes.
<b>Action</b>	Check the logs for previous errors.
<b>CCECPTE0048</b>	<b>Aborted because of a migration failure, see the logs for more details.</b>
<b>Explanation</b>	The entire composite template operation failed because of a migration error.
<b>Action</b>	Check the logs to identify the issue and try again.
<b>CCECPTE0049</b>	<b>Cannot skip run-time components stop operation when doing migration on the same host.</b>
<b>Explanation</b>	Skipping the run-time components stop operation when doing migration on the same host is not supported.
<b>Action</b>	To stop the run-time components, enable the migration/options/shutdown option in the composite template definition.

---

<b>CCECPTE0050</b>	<b>A {0} file could not be found in the imported composite template archive {1}.</b>
<b>Explanation</b>	The expected template yaml file could not be found in the imported composite template archive.
<b>Action</b>	Provide a valid template archive containing the expected template yaml file.
<b>CCECPTE0051</b>	<b>Source backup archive {0} was not found on the Command Central host.</b>
<b>Explanation</b>	The backup archive, created from the migration source node, was not found on the Command Central host.
<b>Action</b>	Check the logs for previous errors related to the backup archive creation or archive transfer from the source host to the Command Central host.
<b>CCECPTE0052</b>	<b>Source backup archive {0} was not found on host {1}.</b>
<b>Explanation</b>	The backup archive, created from the migration source node, was not found on the target host.
<b>Action</b>	Check the logs for previous errors related to backup archive transfer from the Command Central host to the target host. If the backup was transferred manually then check if its location is the expected by Command Central one.
<b>CCECPTE0053</b>	<b>Cygpah command returned empty result.</b>
<b>Explanation</b>	The Cygpah command returned empty result.
<b>Action</b>	Check the Command Central template logs.
<b>CCECPTE0054</b>	<b>Cannot skip run-time components stop operation for node {0} running on Windows when doing migration of type different hosts.</b>
<b>Explanation</b>	Skipping the run-time components stop operation when doing migration on different hosts running on Windows is not supported.
<b>Action</b>	To stop the run-time components, enable the migration/options/shutdown option in the composite template definition.
<b>CCECPTE0055</b>	<b>Unexpected YAML type {0} in field {1}! The correct type is integer.</b>
<b>Explanation</b>	Non-integer data was used in a field that requires integer.
<b>Action</b>	Use the correct integer value and try again.

<b>CCECPTE0078</b>	<b>Composite template validation for {0} completed: {1}</b>
<b>Explanation</b>	Validation detected that the composite template cannot be applied successfully.
<b>Action</b>	Study the validation report, fix the errors and try again.
<b>CCECPTI0026</b>	<b>The following runtime components are started but not ready to accept client requests: {0}</b>
<b>Explanation</b>	Some runtime components have started, but are not ready to accept client requests.
<b>Action</b>	The components might require additional configuration.
<b>CCECPTW0030</b>	<b>Source migration step {0} finished with error: {1}</b>
<b>Explanation</b>	The source node migration step finished with an error.
<b>Action</b>	Check the logs and identify the error root cause.
<b>CCECPTW0031</b>	<b>Skipping source node archive step. Source node installation directory is null.</b>
<b>Explanation</b>	Command Central will skip the source node archive step, because the source node installation directory is null.
<b>Action</b>	Start Platform Manager on the source node, retrieve the node information on Command Central when Platform Manager gets online.
<b>CCEIMPE0004</b>	<b>You cannot update the license location for the configuration type COMMON-LICLOC in Command Central.</b>
<b>Explanation</b>	You cannot update the license location for the configuration type COMMON-LICLOC in Command Central.
<b>Action</b>	Use the default license location.
<b>CCEIMPE0005</b>	<b>You cannot create a license location for the configuration type COMMON-LICLOC in Command Central.</b>
<b>Explanation</b>	You cannot create a license location for the configuration type COMMON-LICLOC in Command Central.
<b>Action</b>	Use the default license location.
<b>CCEIMPE0006</b>	<b>You cannot delete the license location for the configuration type COMMON-LICLOC in Command Central.</b>
<b>Explanation</b>	You cannot delete the license location for the configuration type COMMON-LICLOC in Command Central.
<b>Action</b>	Use the default license location.

---

<b>CCEIMPE0007</b>	<b>The product version is invalid.</b>
<b>Explanation</b>	In Command Central, when the license is created or updated for Command Central Engine, if the product version in license validation does not match the version of the product installed, this error is thrown.
<b>Action</b>	Provide a new license file with the product version matching the installed product.
<b>CCEIMPE0009</b>	<b>The product code is invalid.</b>
<b>Explanation</b>	In Command Central, when the license is created or updated for the Command Central Engine, if the product code does not match the Command Central Engine product code, this error is thrown.
<b>Action</b>	Provide a new license file with the product code matching with the Command Central Engine product code.
<b>CCEIMPE0021</b>	<b>A layer definition with the same name already exists.</b>
<b>Explanation</b>	A layer definition with the same name already exists.
<b>Action</b>	Specify a unique name for the layer type.
<b>CCEIMPE0022</b>	<b>A micro template with alias {0} does not exist.</b>
<b>Explanation</b>	A micro template with the specified alias does not exist.
<b>Action</b>	Specify the alias of an existing micro template.
<b>CCEIMPE0023</b>	<b>The provided configuration cannot be null.</b>
<b>Explanation</b>	The provided configuration cannot be null.
<b>Action</b>	Provide non-null layer definition configuration.
<b>CCEIMPE0024</b>	<b>Configuration of type CCE-LAYER-TYPES should have a name attribue with a valid id.</b>
<b>Explanation</b>	The name attribute of the specified configuration type should have an ID that contains only URL friendly symbols.
<b>Action</b>	Provide a URL-friendly ID for the name attribute.
<b>CCEIMPE0025</b>	<b>Providing micro template alias is required.</b>
<b>Explanation</b>	Specifying the micro template alias is required.
<b>Action</b>	Specify the alias of an existing micro template.

<b>CCEIMPE0026</b>	<b>Deleting default system layer definition {0} is not allowed.</b>
<b>Explanation</b>	Deleting default system layer definition is not allowed.
<b>Action</b>	Do not delete the default system layer definitions.
<b>CCEINME0000</b>	<b>Fix repository with Id {0} cannot be found.</b>
<b>Explanation</b>	The specified repository ID is not the ID of an existing repository.
<b>Action</b>	Check the input parameters and specify the ID of an existing repository.
<b>CCEINME0001</b>	<b>An error occurred while registering repository {0} on node {1}. Check the server logs for details.</b>
<b>Explanation</b>	The issue might occur because of a problem with the repository contents.
<b>Action</b>	Check the server logs for details.
<b>CCEINRE0001</b>	<b>A node with the specified alias does not exist.</b>
<b>Explanation</b>	An installation (node) with the specified alias name does not exist.
<b>Action</b>	Specify the valid alias name for an existing installation (node).
<b>CCEINRE0002</b>	<b>The specified runtime component is not a process!</b>
<b>Explanation</b>	The specified run-time component is not a PROCESS. Run-time components that are in the PROCESS category are components that function on their own. In contrast, run-time components that are in the ENGINE category cannot function on their own, but rather run within a PROCESS run-time component.
<b>Action</b>	Specify a PROCESS run-time component.
<b>CCEJMRE0000</b>	<b>A job with ID {0} cannot be found.</b>
<b>Explanation</b>	A job with the specified ID may have never existed or it may have completed long before this request.
<b>Action</b>	Use the following URI to list all jobs that are running or recently completed: <code>/cce/jobmanager/jobs</code>
<b>CCEJMRE0001</b>	<b>A node with alias {0} does not exist.</b>
<b>Explanation</b>	There is no node with the given alias in the landscape.
<b>Action</b>	Add the node to the landscape.

---

<b>CCEJMRE0002</b>	<b>A job with ID {0} on node {1} cannot be found.</b>
<b>Explanation</b>	A job with the specified ID may have never existed or it may have completed long before this request.
<b>Action</b>	Use the following URI to list all jobs that are running or recently completed: /cce/jobmanager/landscapejobs/local where "local" is the node alias
<b>CCELCRE0000</b>	<b>The lifecycle operation to execute is unknown.</b>
<b>Explanation</b>	You specified a lifecycle operation that is not valid. Valid lifecycle operations are start, stop, restart, pause, resume, start in debug mode, and start in safe mode. Note, however, that a run-time component might support only a subset of the valid lifecycle operations.
<b>Action</b>	Specify a valid lifecycle operation.
<b>CCELCYE0003</b>	<b>Error occured while executing lifecycle operation on a remote managed node with alias {0}. Remote task status is {1}</b>
<b>Explanation</b>	Error occured while executing lifecycle operation on a remote managed node.
<b>Action</b>	Check the Command Central and target node Platform Manager logs.
<b>CCELCYE0004</b>	<b>Error during lifecycle job execution.</b>
<b>Explanation</b>	An error occurred during the lifecycle job execution.
<b>Action</b>	Check the logs for details about the error.
<b>CCELCYE0005</b>	<b>At least one remote call has timed out.</b>
<b>Explanation</b>	At least one remote lifecycle execution call has timed out.
<b>Action</b>	Check the remote Platform Manager logs for related errors.
<b>CCELIRE0000</b>	<b>Error deleting license report with id: {0}</b>
<b>Explanation</b>	An unexpected error occurred when trying to delete the License Report with the given ID.
<b>Action</b>	Check the report id provided and if valid, check the server log for any exception messages.

<b>CCELIRE0001</b>	<b>Error deleting license reports.</b>
<b>Explanation</b>	At least one of the license reports was not deleted successfully.
<b>Action</b>	Retry the delete operation later or contact Software AG Global Support.
<b>CCELIRE0003</b>	<b>Exception while building license report Document, {0}: caught type({1}), msg({2})</b>
<b>Explanation</b>	A problem was encountered while attempting to build a License Report XML document from its string representation.
<b>Action</b>	Consult Software AG Global Support.
<b>CCELIRE0004</b>	<b>Invalid license manifest file.</b>
<b>Explanation</b>	The contents of the specified file is invalid for license manifest files.
<b>Action</b>	Specify a valid license manifest file.
<b>CCELIRW0002</b>	<b>Error deleting the following reports: {0}</b>
<b>Explanation</b>	The specified reports could not be deleted successfully.
<b>Action</b>	Check the server log for more details and try to delete the reports individually.
<b>CCELITE0000</b>	<b>Error generating license report id!</b>
<b>Explanation</b>	An error occurred when trying to generate a unique report ID for the license report snapshot.
<b>Action</b>	Retry the operation or contact Software AG Global Support.
<b>CCELITE0001</b>	<b>Could not find a report with id {0}</b>
<b>Explanation</b>	No license report with the specified report ID was found in the system.
<b>Action</b>	Check the report ID value and try again.
<b>CCELITE0002</b>	<b>Error creating license snapshots directory {0}</b>
<b>Explanation</b>	An error occurred when trying to create a filesystem directory to store the license snapshots.
<b>Action</b>	Check if there is enough disk space and/or contact Software AG Global Support.

---

<b>CCELITE0003</b>	<b>Unable to get runtime component {0}/{1} caught: {2}</b>
<b>Explanation</b>	During license data collection, an attempt to retrieve information about this runtime component failed. The issue may indicate a communication issue between Command Central and Platform Manager.
<b>Action</b>	This could be a temporary communications issue. If the problem persists, contact Software AG Global Support.
<b>CCELITE0004</b>	<b>Unable to get configuration types for {0}/{1} caught: {2}</b>
<b>Explanation</b>	During license data collection, an attempt to retrieve information about this runtime component failed. The issue may indicate a communication issue between Command Central and Platform Manager.
<b>Action</b>	This could be a temporary communications issue. If the problem persists, contact Software AG Global Support.
<b>CCELITE0005</b>	<b>Unable to get configuration instances for {0}/{1} caught: {2}</b>
<b>Explanation</b>	During license data collection, an attempt to retrieve information about this runtime component failed. The issue may indicate a communication issue between Command Central and Platform Manager.
<b>Action</b>	This could be a temporary communications issue. If the problem persists, contact Software AG Global Support.
<b>CCELITE0006</b>	<b>Unable to get configuration data for {0}/{1}/{2} caught: {3}</b>
<b>Explanation</b>	During license data collection, an attempt to retrieve information about this runtime component failed. The issue may indicate a communication issue between Command Central and Platform Manager.
<b>Action</b>	This could be a temporary communications issue. If the problem persists, contact Software AG Global Support.
<b>CCELITE0007</b>	<b>Found null value for license configuration data for {0}/{1}/{2}</b>
<b>Explanation</b>	During license data collection, an attempt to retrieve license information about this runtime component found an invalid license.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0008</b>	<b>Expected a String value for license configuration data for {0}/{1}/{2}, found type {3}</b>
<b>Explanation</b>	During license data collection, an attempt to retrieve license information about this runtime component found an invalid license.
<b>Action</b>	Contact Software AG Global Support.

<b>CCELITE0010</b>	<b>Checksum verification failed for License Report with id {0} {1}.</b>
<b>Explanation</b>	The license report file may be corrupted or been tampered with, which has resulted in an integrity check failure.
<b>Action</b>	Regenerate the license report and/or contact Software AG Global Support with the affected license report file.
<b>CCELITE0011</b>	<b>Unable to generate and store license snapshot report; caught type: {0}, msg: {1}</b>
<b>Explanation</b>	An issue was encountered either when generating, or saving the generated license report snapshot.
<b>Action</b>	Check the exception and message to identify the exact cause, or contact Software AG Global Support.
<b>CCELITE0012</b>	<b>Unable to generate report, no report generator configured</b>
<b>Explanation</b>	The issue occurred because of incorrect component configuration.
<b>Action</b>	Check the license report configuration or contact Software AG Global Support.
<b>CCELITE0013</b>	<b>Error getting license report!</b>
<b>Explanation</b>	An error occurred when trying to retrieve the requested license report.
<b>Action</b>	Check the cause and retry the operation.
<b>CCELITE0014</b>	<b>Unable to parse license XML for {0}/{1} from string that follows; except msg: {2}. XML: {3}</b>
<b>Explanation</b>	The license content retrieved from the Platform Manager could not be parsed.
<b>Action</b>	Check the exception message for the exact cause and/or contact Software AG Global Support. The error may occur if a license file is found that is not in a standard Software AG format.
<b>CCELITE0015</b>	<b>Error generating pdf report for this reportId "{0}". Cause: {1}</b>
<b>Explanation</b>	The attempt to transform the XML data failed to produce a PDF data stream.
<b>Action</b>	Generate another report and verify whether the XML response is well-formed.
<b>CCELITE0016</b>	<b>Error generating pdf license report. No XML data stream available for "{0}"</b>
<b>Explanation</b>	The license reports module cannot produce a pdf report unless its canonical data is provided.
<b>Action</b>	Verify that the pdf generation task was executed properly using an existing report ID.

---

<b>CCELITE0017</b>	<b>Error generating pdf license report. Unable to locate XSLT style sheet for pdf generation. "{0}"</b>
<b>Explanation</b>	The license tools bundle could not locate the XSLT style used to produce a pdf report.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0018</b>	<b>Error applying license pdf report stylesheet "{0}" to XML data "{1}". Cause: {2}</b>
<b>Explanation</b>	Unexpected errors were encountered while generating the license pdf report.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0019</b>	<b>Unable to serialize a license report data object for "{0}". Cause: {1}</b>
<b>Explanation</b>	The license report data object could not be serialized as input for pdf report generation.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0020</b>	<b>Error verifying license report checksum.</b>
<b>Explanation</b>	An error occurred when trying to verify the license report checksum when retrieving the report.
<b>Action</b>	Retry request later or contact Software AG Global Support.
<b>CCELITE0022</b>	<b>Unable to open extended rights table ({0})</b>
<b>Explanation</b>	The indicated value is not available.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0023</b>	<b>Unable to load extended rights properties from {0}; caught: type({1}). message({2})</b>
<b>Explanation</b>	A problem was encountered while loading the indicated file into memory.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0024</b>	<b>Unable to close input stream from {0}; caught: type({1}). message({2})</b>
<b>Explanation</b>	A problem was encountered while cleaning up after loading the indicated file into memory.
<b>Action</b>	Contact Software AG Global Support.

<b>CCELITE0026</b>	<b>License manifest is already stored.</b>
<b>Explanation</b>	The license manifest is already been stored with alias {0}.
<b>Action</b>	Specify a different license manifest.
<b>CCELITE0027</b>	<b>Unable to store license manifest "{0}"; caught type: {1}, msg: {2}</b>
<b>Explanation</b>	An issue was encountered when storing a license manifest.
<b>Action</b>	Check the exception and message to identify the exact cause, or contact Software AG Global Support.
<b>CCELITE0028</b>	<b>Error creating storage location {0} for license manifests.</b>
<b>Explanation</b>	An error occurred when trying to create a filesystem directory to store license manifests.
<b>Action</b>	Check access rights and disk space or contact Software AG Global Support.
<b>CCELITE0029</b>	<b>Error retrieving license manifests.</b>
<b>Explanation</b>	An error occurred when trying to retrieve the list of stored license manifests.
<b>Action</b>	Check the cause and retry the operation.
<b>CCELITE0030</b>	<b>Could not find a license manifest with alias {0}</b>
<b>Explanation</b>	No license manifest with the specified alias was found in the system.
<b>Action</b>	Check the license manifest alias value and try again.
<b>CCELITE0031</b>	<b>Invalid license manifest.</b>
<b>Explanation</b>	The specified file is not a valid license manifest.
<b>Action</b>	Specify a valid license manifest.
<b>CCELITE0032</b>	<b>Checksum verification failed for LicenseMeteringConfiguration.xml file.</b>
<b>Explanation</b>	The LicenseMeteringConfiguration.xml file which is delivered with the CCE installation is either corrupted, or modified.
<b>Action</b>	Contact Software AG Global Support to get a valid LicenseMeteringConfiguration.xml file.

---

<b>CCELITE0034</b>	<b>Alias "{0}" already exists.</b>
<b>Explanation</b>	A license manifest with the specified alias already exists.
<b>Action</b>	Specify a new alias for the license manifest.
<b>CCELITE0035</b>	<b>License manifest alias missing.</b>
<b>Explanation</b>	No license manifest alias has been specified.
<b>Action</b>	Specify a valid license manifest alias.
<b>CCELITE0036</b>	<b>Deleting license manifest with alias "{0}" failed.</b>
<b>Explanation</b>	An error occurred while trying to delete the license manifest with the specified alias.
<b>Action</b>	Check the exception and message to identify the exact cause, or contact Software AG Global Support.
<b>CCELITE0037</b>	<b>Deleting license manifests failed.</b>
<b>Explanation</b>	An error occurred while trying to delete the license manifests.
<b>Action</b>	Check the exception and message to identify the exact cause, or contact Software AG Global Support.
<b>CCELITE0042</b>	<b>Invalid processor core class {0}.</b>
<b>Explanation</b>	The specified processor core class is not valid.
<b>Action</b>	Specify a valid processor core class.
<b>CCELITE0046</b>	<b>Checksum verification failed for the given License Manifest.</b>
<b>Explanation</b>	The license manifest file is corrupted or been tampered with, which has resulted in an integrity check failure.
<b>Action</b>	Use original license manifest file from Software AG and/or contact Software AG Global Support with the affected license manifest file.
<b>CCELITE0047</b>	<b>Cannot open license metering configuration file.</b>
<b>Explanation</b>	The license metering configuration file could not be read.
<b>Action</b>	Contact Software AG support.

<b>CCELITE0048</b>	<b>Updating {0} cache for node {1} failed.</b>
<b>Explanation</b>	Updating the cache failed. The license metering report may contain invalid data.
<b>Action</b>	Contact Software AG support.
<b>CCELITE0049</b>	<b>Processor core class is not available. Product cannot be checked.</b>
<b>Explanation</b>	The Platform Manager where the product is installed did not provide the processor core class the node is running on.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0050</b>	<b>Cannot find runtime status: {0}</b>
<b>Explanation</b>	The run-time status of the current landscape XML file was not found.
<b>Action</b>	Provide a valid landscape XML file.
<b>CCELITE0051</b>	<b>Cannot store license metering configuration data to file.</b>
<b>Explanation</b>	An error occurred while writing the license metering configuration data to a new file.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0053</b>	<b>Platform Manager with version {0} is not sufficient for the license metering. Version 9.8 or higher is required.</b>
<b>Explanation</b>	The version of the Platform Manager is {0}. Platform Manager version of 9.8 or higher is required for the license metering.
<b>Action</b>	Update the Platform Manager with version 9.8 or higher.
<b>CCELITE0054</b>	<b>Consolidation of License Manifests failed.</b>
<b>Explanation</b>	An error occurred during the consolidation of the license manifests.
<b>Action</b>	Contact Software AG support.
<b>CCELITE0055</b>	<b>Collecting server details information failed.</b>
<b>Explanation</b>	An error occurred during the collection of server details information.
<b>Action</b>	Contact Software AG support.

---

<b>CCELITE0056</b>	<b>Generating license report compliance result failed.</b>
<b>Explanation</b>	An error occurred during the generation of the license report compliance result.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0057</b>	<b>License manifest for referenced location id {0} not found.</b>
<b>Explanation</b>	The license manifest for the location id {0} has been removed.
<b>Action</b>	Add the license manifest for the location id {0} to Command Central or assign a different location id to the installation details in the landscape overview tab.
<b>CCELITE0058</b>	<b>Unable to retrieve Command Central port number.</b>
<b>Explanation</b>	An error occurred while trying to retrieve the port number of Command Central.
<b>Action</b>	Ensure that the Platform Manager that belongs to this Command Central installation is running.
<b>CCELITE0059</b>	<b>The license metering cannot be stopped, because metering is required.</b>
<b>Explanation</b>	One of the active license manifests contains a product for which license metering is required, so that it is not possible to stop the metering.
<b>Action</b>	Remove the license manifest that requires metering or keep license metering running.
<b>CCELITE0060</b>	<b>No node alias specified.</b>
<b>Explanation</b>	The alias of a node was not specified.
<b>Action</b>	Specify a valid node alias. The available node aliases can be determined from the landscape configuration.
<b>CCELITE0061</b>	<b>No product id specified.</b>
<b>Explanation</b>	The ID of the product for which contracts are to be retrieved is not specified.
<b>Action</b>	Specify a valid product ID. The available product IDs can be determined from the landscape configuration.
<b>CCELITE0062</b>	<b>Node alias {0} is invalid.</b>
<b>Explanation</b>	A node with the specified alias {0} is not registered in Command Central.
<b>Action</b>	Specify a valid node alias. The available node aliases can be determined from the landscape configuration.

<b>CCELITE0063</b>	<b>No server details found for node with alias {0}.</b>
<b>Explanation</b>	The server details could not be determined for the node with the specified alias {0}.
<b>Action</b>	Make sure that the Platform Manager on the node with the specified alias is running.
<b>CCELITE0064</b>	<b>No product with id {0} found on node with alias {1}.</b>
<b>Explanation</b>	There is no product with the specified ID {0} installed on the node with the specified alias {1}.
<b>Action</b>	Specify the ID of a product that is installed on the node with the specified alias. The available product IDs can be determined from the landscape configuration.
<b>CCELITE0065</b>	<b>Platform Manager on node with alias {0} is not running.</b>
<b>Explanation</b>	The Platform Manager on the node with alias {0} is not running.
<b>Action</b>	Start Platform Manager on the node with alias {0} and execute the command again.
<b>CCELITE0068</b>	<b>Version {0} of license manifest is not supported. Highest supported version is {1}.</b>
<b>Explanation</b>	The version {0} of the specified license manifest is higher than the version {1} currently supported.
<b>Action</b>	Update Command Central to a version that supports the version of the specified license manifest.
<b>CCELITE0069</b>	<b>Version {0} of license report is not supported. Highest supported version is {1}.</b>
<b>Explanation</b>	The version {0} of the specified license report is higher than the version {1} currently supported.
<b>Action</b>	Update Command Central to a version that supports the version of the specified license report.
<b>CCELITE0070</b>	<b>Aggregated license report with alias {0} already exists.</b>
<b>Explanation</b>	An aggregated license report with the alias {0} already exists.
<b>Action</b>	Specify an aggregated license report with a different alias.
<b>CCELITE0071</b>	<b>Alias {0} already exists.</b>
<b>Explanation</b>	A license key with the specified alias {0} already exists.
<b>Action</b>	Specify a different alias.

---

<b>CCELITE0072</b>	<b>ProductCode and productId specified.</b>
<b>Explanation</b>	You must specify either productCode or productId.
<b>Action</b>	Remove either productCode or productId.
<b>CCELITE0073</b>	<b>Platform and OS specified.</b>
<b>Explanation</b>	You must specify either platform, or operating system.
<b>Action</b>	Remove either the platform or the operating system.
<b>CCELITE0074</b>	<b>Invalid platform(s) {0} specified.</b>
<b>Explanation</b>	The specified platform(s) {0} is invalid.
<b>Action</b>	Specify valid platform(s).
<b>CCELITE0075</b>	<b>Specified installationType {0} is invalid</b>
<b>Explanation</b>	The specified installationType {0} is invalid.
<b>Action</b>	Specify a valid installationType.
<b>CCELITE0076</b>	<b>Invalid productCode {0} specified.</b>
<b>Explanation</b>	The specified productCode {0} is invalid.
<b>Action</b>	Specify a valid productCode.
<b>CCELITE0077</b>	<b>Invalid productId {0} specified.</b>
<b>Explanation</b>	The specified productId {0} is invalid.
<b>Action</b>	Specify a valid productId.
<b>CCELITE0078</b>	<b>Invalid os {0} specified.</b>
<b>Explanation</b>	The specified OS {0} is invalid.
<b>Action</b>	Specify valid OS.
<b>CCELITE0080</b>	<b>Specified licenseKeyType {0} is invalid.</b>
<b>Explanation</b>	The specified licenseKeyType {0} is invalid.
<b>Action</b>	Specify a valid licenseKeyType.

<b>CCELITE0081</b>	<b>Error verifying landscape checksum.</b>
<b>Explanation</b>	An error occurred when trying to verify the landscape checksum.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITE0082</b>	<b>Invalid license key.</b>
<b>Explanation</b>	The specified file is not a valid license key. A valid license key must not contain binary data or be empty.
<b>Action</b>	Specify a valid license key.
<b>CCELITE0083</b>	<b>Invalid license key: {0}.</b>
<b>Explanation</b>	Specified file is not a valid license key.
<b>Action</b>	Specify a valid license key.
<b>CCELITE0084</b>	<b>A node with the specified alias does not exist.</b>
<b>Explanation</b>	An installation (node) with the specified alias name does not exist.
<b>Action</b>	Specify a valid alias name for an existing installation (node).
<b>CCELITE0085</b>	<b>A run-time component with the specified id does not exist.</b>
<b>Explanation</b>	A run-time component with the specified ID does not exist on the node(s).
<b>Action</b>	Specify an ID of an existing runtime component.
<b>CCELITE0090</b>	<b>Invalid productCode {0} and productId {1} specified.</b>
<b>Explanation</b>	The specified productCode {0} and productId {1} is invalid.
<b>Action</b>	Specify a valid productCode and productId.
<b>CCELITE0091</b>	<b>Unexpected exception occurred: {0}</b>
<b>Explanation</b>	An unexpected exception occurred: {0}
<b>Action</b>	Contact Software AG support.
<b>CCELITE0092</b>	<b>Failed to update server time stamp for server {0} : {1}</b>
<b>Explanation</b>	Failed to update server time stamp for server {0} : {1}
<b>Action</b>	Make sure the Platform Manager on server {0} is running.

---

<b>CCELITE0093</b>	<b>Error creating URL from urlString {0}.</b>
<b>Explanation</b>	Error creating URL from urlString {0}.
<b>Action</b>	Specify a valid URL.
<b>CCELITE0094</b>	<b>License key with specified alias {0} not found.</b>
<b>Explanation</b>	A license key with the specified alias {0} is not stored in the license key manager.
<b>Action</b>	Specify the alias of a stored license key.
<b>CCELITE0102</b>	<b>Alias must be specified for custom license keys.</b>
<b>Explanation</b>	You must specify an alias when adding a custom license key.
<b>Action</b>	Specify a license key alias.
<b>CCELITE0105</b>	<b>Invalid license key archive.</b>
<b>Explanation</b>	The specified file is not a valid license key archive. A valid license key archive must contain license keys.
<b>Action</b>	Specify a valid license key archive.
<b>CCELITE0106</b>	<b>License key already stored with alias {0}.</b>
<b>Explanation</b>	This license key is already stored with alias {0}.
<b>Action</b>	Specify another license key, or add the license key with a different alias.
<b>CCELITI0033</b>	<b>Type of installation is not defined. Product cannot be checked.</b>
<b>Explanation</b>	The Platform Manager where the product is installed does not have a type of installation (Development, Production, Test) defined.
<b>Action</b>	Define a type of installation for your Platform Manager.
<b>CCELITI0038</b>	<b>Product is not found in the license manifest(s).</b>
<b>Explanation</b>	You have no valid license for the installed product.
<b>Action</b>	Contact Software AG for licensing your product.
<b>CCELITI0039</b>	<b>Core class does not match: {0} is installed, {1} is licensed.</b>
<b>Explanation</b>	The core class of the Platform Manager server does not match the licensed core class.
<b>Action</b>	Contact Software AG Global Support for licensing a higher core class.

<b>CCELITI0040</b>	<b>License capacity does not match: {0} {1} used, {2} {1} licensed.</b>
<b>Explanation</b>	The number of units used does not match the licensed number of units.
<b>Action</b>	Contact Software AG Global Support for licensing a higher number of units.
<b>CCELITI0043</b>	<b>Installation type does not match: {0} is installed, {1} is licensed.</b>
<b>Explanation</b>	The installation type of the Platform Manager server does not match the licensed installation type.
<b>Action</b>	Contact Software AG Global Support for licensing the appropriate installation type.
<b>CCELITW0021</b>	<b>Unable to translate extended rights code ({0}), not found</b>
<b>Explanation</b>	The table used to look up license Extended Rights codes does not contain the indicated value.
<b>Action</b>	Contact Software AG Global Support.
<b>CCELITW0025</b>	<b>LicenseReportFactory - unable to determine runtime status for component ({0}) on node ({1}); caught this: type({2}), msg({3})</b>
<b>Explanation</b>	Command Central can not determine if the identified component is up or down.
<b>Action</b>	This behavior could occur when the Platform Manager node is down, or because of some other communication issue. If this problem persists when the Platform Manager node is up, contact Software AG Global support.
<b>CCELNDE0000</b>	<b>The node alias is invalid.</b>
<b>Explanation</b>	An installation (node) with the specified alias name does not exist.
<b>Action</b>	Specify the valid alias name for an existing installation (node).
<b>CCELNDE0001</b>	<b>"{0}" Run-time component is not found on node "{1}".</b>
<b>Explanation</b>	The Landscape Inventory cache does not contain run-time component "{0}" for node "{1}".
<b>Action</b>	Use a combination of an existing run-time component Id and node alias or refresh the Landscape Inventory run-time component cache and try again.
<b>CCELNDE0002</b>	<b>Invalid node alias or url.</b>
<b>Explanation</b>	The specified alias name or URL for an installation (node) is not valid.
<b>Action</b>	Specify a valid alias name or URL.

---

<b>CCELNDE0003</b>	<b>Specify a valid URL.</b>
<b>Explanation</b>	The URL field in NodeInfo contains an invalid value.
<b>Action</b>	Check if the URL syntax of the node is valid.
<b>CCELNDE0004</b>	<b>A node with a different alias for the same host:port already exist.</b>
<b>Explanation</b>	An installation (node) with a different alias name already exists for the installation with the specified host name and port number.
<b>Action</b>	None.
<b>CCELNDE0006</b>	<b>Node {0} could not be created.</b>
<b>Explanation</b>	A node with alias {0} could not be created because another node with alias {1} already exists.
<b>Action</b>	Provide a different alias for the new node.
<b>CCELNDE0008</b>	<b>Can not retrieve node's product information for {0}</b>
<b>Explanation</b>	Command Central can not connect to Platform Manager to retrieve Platform Manager product information.
<b>Action</b>	Make sure the node is online.
<b>CCELNDE0009</b>	<b>Can not update inventory cache because of failure during retrieval of remote inventory items.</b>
<b>Explanation</b>	The remote request for inventory items failed and the inventory cache can not be updated.
<b>Action</b>	Ensure that the node in the request is active or the target node inventory is responsive.
<b>CCELNDE0010</b>	<b>The node alias cannot be empty or longer than 100 characters.</b>
<b>Explanation</b>	The specified node alias is incorrect, either because the node alias is empty, or it exceeds 100 characters.
<b>Action</b>	Specify a correct node alias and try again.
<b>CCELNDE0011</b>	<b>The host name should be between 2 and 253 characters long.</b>
<b>Explanation</b>	The host name is incorrect, because it is shorter or longer than the specified character length limitations.
<b>Action</b>	Provide a correct host name and try again.

<b>CCELNDE0012</b>	<b>The node display name should not be longer than 100 characters.</b>
<b>Explanation</b>	The node display name is incorrect, because it is longer than 100 characters.
<b>Action</b>	Specify a correct node display name and try again.
<b>CCELNDE0013</b>	<b>Trying to use unavailable NodeInfo element.</b>
<b>Explanation</b>	The specified element of type NodeInfo does not exist.
<b>Action</b>	Specify a NodeInfo element that is available.
<b>CCELNDE0014</b>	<b>Node alias is not valid. Only letters, numbers, -, _ and . are allowed.</b>
<b>Explanation</b>	The specified node alias is incorrect, because it uses special characters that are not allowed.
<b>Action</b>	Specify a correct node alias and try again.
<b>CCELNDI0005</b>	<b>You have exhausted the number of licensed nodes that can be configured. To add more nodes, contact your system administrator or Software AG support to get the license upgraded.</b>
<b>Explanation</b>	You have exhausted the number of licensed nodes that can be configured.
<b>Action</b>	To add more nodes, contact your system administrator or Software AG support to get the license upgraded.
<b>CCELSRE0001</b>	<b>The node alias cannot be updated.</b>
<b>Explanation</b>	You cannot update the alias name for an installation (node).
<b>Action</b>	Create a new installation or update the existing installation without changing the alias name.
<b>CCELSRE0002</b>	<b>The environment alias cannot be updated.</b>
<b>Explanation</b>	You cannot change the alias name of an environment.
<b>Action</b>	Create a new environment or update the existing environment without changing the alias name.
<b>CCELSRE0004</b>	<b>Node Aliases not specified!</b>
<b>Explanation</b>	To add installations (nodes) to an environment, you must specify the alias names of the installations that you want to add.
<b>Action</b>	Try again, this time specifying the installation (node) alias names as query parameters.

---

<b>CCELSRE0005</b>	<b>Alias not specified or invalid.</b>
<b>Explanation</b>	The environment could not be created or updated because the alias is invalid.
<b>Action</b>	Specify a valid alias. You can view a list of installations and their aliases using the following command: <code>cc list landscape nodes</code>
<b>CCELSRE0006</b>	<b>Node {0} could not be created.</b>
<b>Explanation</b>	A node with alias {0} could not be created because another node with alias {1} already exists.
<b>Action</b>	Provide a different alias for the new node.
<b>CCELSRE0007</b>	<b>Environment {0} could not be created.</b>
<b>Explanation</b>	An environment with alias {0} could not be created because another environment with alias {1} already exists.
<b>Action</b>	Provide a different alias for the new environment.
<b>CCELSRE0008</b>	<b>Trying to use unavailable NodeInfo element.</b>
<b>Explanation</b>	Trying to use element of type NodeInfo that doesn't exist.
<b>Action</b>	Provide an available NodeInfo element.
<b>CCELSRE0012</b>	<b>Alias not specified.</b>
<b>Explanation</b>	The node could not be created because the alias is missing.
<b>Action</b>	Specify a valid alias.
<b>CCELSRE0013</b>	<b>Node {0} could not be created.</b>
<b>Explanation</b>	A node with alias {0} could not be created because the specified location id {1} does not exist.
<b>Action</b>	Provide an existing location id. Available location id(s): {2}
<b>CCELSRE0014</b>	<b>Node {0} could not be updated.</b>
<b>Explanation</b>	A node with alias {0} could not be updated because the specified location id {1} does not exist.
<b>Action</b>	Provide an existing location id. Available location id(s): {2}

<b>CCELSRE0015</b>	<b>Node {0} could not be created.</b>
<b>Explanation</b>	A node with alias {0} could not be created because the specified installation type {1} is invalid.
<b>Action</b>	Provide a valid installation type. Valid installation types are: {2}
<b>CCELSRE0016</b>	<b>Node {0} could not be updated.</b>
<b>Explanation</b>	A node with alias {0} could not be updated because the specified installation type {1} is invalid.
<b>Action</b>	Provide a valid installation type. Valid installation types are: {2}
<b>CCELSRI0000</b>	<b>A node with the specified alias does not exist.</b>
<b>Explanation</b>	No node alias matches {0}
<b>Action</b>	Provide a valid node alias.
<b>CCELSRI0003</b>	<b>The environment with the provided alias doesn't exist.</b>
<b>Explanation</b>	An environment with the specified alias name does not exist.
<b>Action</b>	Specify the valid alias name of an existing environment.
<b>CCEMIGE0019</b>	<b>Extracting source version failed.</b>
<b>Explanation</b>	Command Central failed to extract the source version from the bundles.info file.
<b>Action</b>	Ensure that the bundles.info file is at the correct location.
<b>CCEMONE0001</b>	<b>{0} on {1} ({2}) became unresponsive. Component restart may help to resolve this quickly.</b>
<b>Explanation</b>	{0} on {1} ({2}) became unresponsive.
<b>Action</b>	Component restart may help to resolve this quickly.
<b>CCEMONE0002</b>	<b>{0} on {1} ({2}) crashed. You will need to start it again and investigate the cause of the failure.</b>
<b>Explanation</b>	RuntimeStatus of {0} went from ONLINE to FAILED.
<b>Action</b>	Try to restart it. Have a look on {1} ({2}) for additional information on its status.

---

<b>CCEMONE0006</b>	<b>{0} of {1} on {2} ({3}) spiked into critical zone. The component may become overloaded!</b>
<b>Explanation</b>	The kpi {0} of {1} went from MARGINAL into CRITICAL status.
<b>Action</b>	Please have a look on {2} ({3}) to find out why this is happening.
<b>CCEMONE0011</b>	<b>Node with alias {0} does not exist.</b>
<b>Explanation</b>	There is no node with the specified alias registered with Command Central.
<b>Action</b>	Ensure that the node alias is spelled correctly and that it is registered with Command Central.
<b>CCEMONE0012</b>	<b>No runtime monitoring information could be found for component {0}.</b>
<b>Explanation</b>	The landscape nodes do not have monitoring information for the specified component.
<b>Action</b>	Check the landscape nodes for the for the specified component. Ensure that the specified component exists on the nodes and that it is spelled correctly.
<b>CCEMONE0013</b>	<b>Component {0} does not exist on node {1}.</b>
<b>Explanation</b>	The specified runtime component does not exist on the specified SPM node.
<b>Action</b>	Ensure that the specified component is spelled correctly and exists on the specified node.
<b>CCEMONE0014</b>	<b>Removing alert with id {0} failed.</b>
<b>Explanation</b>	The specified alert could not be found.
<b>Action</b>	Ensure that the alert with the specified ID exists in the Command Central landscape.
<b>CCEMONE0015</b>	<b>Error getting runtime component {0} for node {1}</b>
<b>Explanation</b>	Runtime component {0} is not available in cache.
<b>Action</b>	Try to update the inventory cache and make sure the node in the request is active and the target node inventory is responsive.
<b>CCEMONE0016</b>	<b>includeChildren parameter requires NodeAlias and RuntimeComponentId to be provided.</b>
<b>Explanation</b>	The <includeChildren> parameter requires the <nodeAlias> and <runtimeComponentId> parameters to be provided.
<b>Action</b>	Provide values for the <nodeAlias> and <runtimeComponentId> parameters.

<b>CCEMONE0017</b>	<b>Alerts filtering requires both NodeAlias and RuntimeComponentId.</b>
<b>Explanation</b>	The filtering of alerts requires both <NodeAlias> and <RuntimeComponentId> parameters to be provided.
<b>Action</b>	Provide values for both <NodeAlias> and <RuntimeComponentId> parameters.
<b>CCEMONE0018</b>	<b>Error while handling event [{0}].</b>
<b>Explanation</b>	There was an error while handling an event.
<b>Action</b>	Check the logs for previous errors.
<b>CCEMONE0019</b>	<b>Error polling SPM node [{0}].</b>
<b>Explanation</b>	The monitoring states for a runtime component on a target node could not be retrieved.
<b>Action</b>	Check the logs for previous errors.
<b>CCEMONE0020</b>	<b>Error during retrieving of monitoring state of {0} on node {1}.</b>
<b>Explanation</b>	The monitoring state for a runtime component on a target node could not be retrieved.
<b>Action</b>	Check the logs for previous errors.
<b>CCEMONE0021</b>	<b>Error polling SPM node [{0}]. Node Status will be set to {1} and the Runtime State for all instances of the node will be set to {2}.</b>
<b>Explanation</b>	The monitoring states on a target node could not be retrieved and as a result all states will be set to unknown.
<b>Action</b>	Check the logs for previous errors.
<b>CCEMONE0022</b>	<b>Could not retrieve Cache. Monitoring stopped.</b>
<b>Explanation</b>	The Command Central cache manager could not be retrieved.
<b>Action</b>	Contact Software AG Global Support.
<b>CCEPROE0000</b>	<b>No node with alias, {0}, exists in the environment.</b>
<b>Explanation</b>	The node alias specified in the request does not exist.
<b>Action</b>	Resubmit the request with an existing node alias.

---

<b>CCEPROE0001</b>	<b>No artifacts specified in uninstall request.</b>
<b>Explanation</b>	The uninstall request did not specify any artifacts.
<b>Action</b>	Resubmit the request with a list of valid artifacts.
<b>CCEPROE0002</b>	<b>{0} is an invalid/unsupported type for artifacts.</b>
<b>Explanation</b>	Only Product and Fix are valid artifact types.
<b>Action</b>	Resubmit the request with valid artifacts.
<b>CCEPROE0003</b>	<b>{0} MASTER repository configuration is invalid.</b>
<b>Explanation</b>	The repository configuration misses the location URL.
<b>Action</b>	Remove and add this repository again to ensure it has valid remote location URL.
<b>CCEPROE0004</b>	<b>{0} repository is not configured with user credentials.</b>
<b>Explanation</b>	The repository configuration misses username property value. Most likely the repository was not configured with the required user credentials after it was discovered.
<b>Action</b>	Configure the repository with valid user credentials.
<b>CCEPROE0005</b>	<b>{0} repository is not configured with user credentials.</b>
<b>Explanation</b>	The repository configuration misses the username property value. Most likely the repository was not configured with the required user credentials after it was discovered.
<b>Action</b>	Configure the repository with valid user credentials.
<b>CCEPROE0006</b>	<b>{0} IMAGE repository configuration is invalid.</b>
<b>Explanation</b>	The repository configuration misses the image file location.
<b>Action</b>	Edit this repository to ensure it has a valid image location.
<b>CCEPROE0007</b>	<b>Node {0} is already registred and reports ONLINE status.</b>
<b>Explanation</b>	The node that you are attempting to bootstrap already reports ONLINE status. Most likely you specified a node that is already setup and ready to use.
<b>Action</b>	Use a node alias for a Platform Manager that is not running yet. It can be a node that is already registered but does not have a backing Platform Manager, or a completely new node alias that will be added to the landscape when the Platform Manager bootstrap operation is finished.

<b>CCEPROE0008</b>	<b>Repository {0} type is not a MASTER repository.</b>
<b>Explanation</b>	Bootstrap images can be generated only from a MASTER PRODUCT repository. Other types are not supported.
<b>Action</b>	Specify a configured MASTER PRODUCT repository with valid user credentials and try again.
<b>CCEPROE0009</b>	<b>Repository {0} is not configured with a user password.</b>
<b>Explanation</b>	MASTER repositories require configuration of user credentials.
<b>Action</b>	Ensure that the selected repository is configured with a valid username and password.
<b>CCEPROE0010</b>	<b>Target machine platform is not specified.</b>
<b>Explanation</b>	The bootstrap operation requires the target platform to be explicitly defined.
<b>Action</b>	Select platform of the target machine that Platform Manager will be installed
<b>CCEPROE0011</b>	<b>Cannot match requested version {0} to any of the configured repositories.</b>
<b>Explanation</b>	The version you requested to install does not match the available repositories.
<b>Action</b>	Select a specific repository or add new repositories that will match the version you requested.
<b>CCEPROE0012</b>	<b>No PRODUCT repositories are defined to complete the operation.</b>
<b>Explanation</b>	You did not explicitly specify a repository or version to use and Command Central cannot automatically pick a repository.
<b>Action</b>	Ensure that you have configured a PRODUCT repository that contains the required version of Platform Manager.
<b>CCEPROE0013</b>	<b>Remote machine credentials are not provided.</b>
<b>Explanation</b>	Command Central cannot connect to a remote machine without valid user credentials.
<b>Action</b>	Provide user credentials for the remote machine on which you are installing Platform Manager.
<b>CCEPROE0014</b>	<b>Error while retrieving configuration.</b>
<b>Explanation</b>	Internal error while retrieving common proxy configuration.
<b>Action</b>	Make sure COMMON-PROXY configuration exists.

---

<b>CCEPROE0015</b>	<b>Remote access service returned {0} jobs while 1 was expected.</b>
<b>Explanation</b>	Only one remote operation was initiated but a different amount of jobs was returned.
<b>Action</b>	Contact Software AG Global Support.
<b>CCEPROE0016</b>	<b>Java not found on {0}.</b>
<b>Explanation</b>	The Java Runtime Environment is not available on the given node.
<b>Action</b>	Install Java Runtime Environment and try again.
<b>CCEPROE0017</b>	<b>Remote command returned a non-zero exit code: {0}</b>
<b>Explanation</b>	The remote installer command failed. Check the logs for more information.
<b>Action</b>	Re-try the operation. If the problem persists, contact Software AG Global Support.
<b>CCEPROE0018</b>	<b>Can not connect to Platform Manager running on host {0} and port {1} due to wrong credentials.</b>
<b>Explanation</b>	Can not connect to Platform Manager due to wrong credentials.
<b>Action</b>	Provide valid Platform Manager credentials.
<b>CCEPROE0026</b>	<b>The nodeAlias field is required for each node that is added.</b>
<b>Explanation</b>	Node alias is required field for each node that is added.
<b>Action</b>	Provide node alias.
<b>CCEPROE0027</b>	<b>The hostname field is required for each node that is added.</b>
<b>Explanation</b>	A hostname is required field for each node that is added.
<b>Action</b>	Provide a hostname.
<b>CCEPROE0028</b>	<b>Platform Manager port is required field for each node that is added.</b>
<b>Explanation</b>	A Platform Manager port is required field for each node that is added.
<b>Action</b>	Provide a port field value.
<b>CCEPROE0029</b>	<b>Platform Manager nodes are available, but the provided credentials for them are wrong: {0}</b>
<b>Explanation</b>	Platform Manager nodes are available, but the provided credentials for them are incorrect.
<b>Action</b>	Provide valid credentials for the Platform Manager nodes.

<b>CCEPROE0030</b>	<b>The Platform Managers are not remotely accessible: {0}</b>
<b>Explanation</b>	The specified Platform Managers are not remotely accessible.
<b>Action</b>	Check the connectivity and the remote accessibility to the Platform Managers.
<b>CCEPROE0034</b>	<b>Error occured while installing {2} on node {0}. Remote task status is {1}</b>
<b>Explanation</b>	The selected artifact was not installed on the remote managed node.
<b>Action</b>	See the error logs for more details about the error.
<b>CCEPROE0038</b>	<b>The maximum number of retries for installing artifacts from repository {0} on node {1} due to possible Platform Manager restarts is reached.</b>
<b>Explanation</b>	The maximum number of retries for installing artifacts from repository {0} on node {1} due to possible Platform Manager restarts is reached.
<b>Action</b>	Check the logs for details about previous attempts to install artifacts to determine what the issues are.
<b>CCEPROE0042</b>	<b>The maximum number of retries for uninstalling artifacts on node {0} due to possible Platform Manager restarts is reached.</b>
<b>Explanation</b>	The maximum number of retries for uninstalling artifacts on node {0} due to possible Platform Manager restarts is reached.
<b>Action</b>	Check the logs for details about previous attempts to install artifacts to determine what the issues are.
<b>CCEPROE0043</b>	<b>Creating an image with name {0} failed.</b>
<b>Explanation</b>	Creating an image from a mirror repository that is not on the local Platform Manager is not supported.
<b>Action</b>	Create a mirror repository on the local Platform Manager node and use it for bootstrapping.
<b>CCEPROE0044</b>	<b>Bootstrapping Platform Manager on installation with alias {0} failed.</b>
<b>Explanation</b>	The export of artifacts from a mirror repository with name {0} into image with name {1} failed.
<b>Action</b>	See the Platform Manager logs for more information.

---

<b>CCEPROE0046</b>	<b>Bootstrap installer {0} not found.</b>
<b>Explanation</b>	The bootstrap installer file was not found under install_dir/profiles/CCE/data/installers
<b>Action</b>	Make sure the specified bootstrap installer file is in the correct location.
<b>CCEPROE0047</b>	<b>unzip command not found on {0}</b>
<b>Explanation</b>	The unzip package is not present in your cygwin environment.
<b>Action</b>	Install unzip in your cygwin environment and try again.
<b>CCEPROE0048</b>	<b>Local bootstrap completed with exit code: {0}</b>
<b>Explanation</b>	The execution of the bootstrap operation failed unexpectedly.
<b>Action</b>	Check the bootstrap logs for more information.
<b>CCEPROE0049</b>	<b>The installers directory does not exist.</b>
<b>Explanation</b>	The directory containing the bootstrap installers does not exist.
<b>Action</b>	Create the install_dir/profiles/CCE/data/installers directory.
<b>CCEPROE0050</b>	<b>Installer platform mismatch! Expected W64 but found {0}.</b>
<b>Explanation</b>	The installation cannot be performed, because the incorrect platform is selected.
<b>Action</b>	Select an installer with the correct platform.
<b>CCEPROE0051</b>	<b>{0} is not a valid installer directory or it does not exist.</b>
<b>Explanation</b>	The bootstrap installer archive may not have been extracted correctly.
<b>Action</b>	Retry the operation or contact Software AG global support.
<b>CCEPROE0052</b>	<b>Invalid number of Windows scripts in the installer directory: {0}</b>
<b>Explanation</b>	The bootstrap installer archive must contain exactly one executable script (batch).
<b>Action</b>	Obtain the correct bootstrap installer.
<b>CCEPROE0055</b>	<b>Platform Manager nodes are available, but the installation directory is different than requested: {0}</b>
<b>Explanation</b>	The Platform Manager nodes are available, but the installation directory is different than requested.
<b>Action</b>	Change the installation directory or stop the available Platform Manager if you want to bootstrap a new instance on the same ports.

**CCEPROW0045**      **The SSH server did not return the exit code of the bootstrap operation. The operation has completed but it is not clear if it was successful or not.**

**Explanation**      In some cases the SSH server may not return the exit code of the executed operation. This makes it unclear if the operation was successful or not.

**Action**            Examine the installation logs on the remote node to make sure the installation was successful.

**CCERARE0000**      **Not all mandatory parameters are specified.**

**Explanation**      Some of the parameters required for this request are missing.

**Action**            Check the Command Central documentation for the required parameters.

**CCERARE0001**      **Nothing has been scheduled for execution for this request.**

**Explanation**      This request should start jobs for execution, but no jobs have started.

**Action**            Check the logs for errors why the request has not terminated properly.

**CCERARE0002**      **Remote Access Service is missing.**

**Explanation**      A required service is missing.

**Action**            Check whether the remote-access bundle is started and has registered any services.

**CCERARE0003**      **The private key must be specified when certificate is used for authentication.**

**Explanation**      The selected authorization method is "certificate", however, a path to the private key is not specified.

**Action**            Specify the path to the private key.

**CCEREAE0003**      **Authentication method {0} not supported.**

**Explanation**      The specified authentication method is not supported.

**Action**            Check the Command Central documentation for the supported authentication methods.

**CCEREAE0004**      **The provided private key does not exist: {0}**

**Explanation**      The specified file that contains the private key does not exist on the file system.

**Action**            Make sure the private key is available.

---

<b>CCEREA0005</b>	<b>Remote host should be specified.</b>
<b>Explanation</b>	Remote host is not specified and a connection cannot be established.
<b>Action</b>	Specify the remote host.
<b>CCEREA0007</b>	<b>{0} not found on {1}</b>
<b>Explanation</b>	The specified path cannot be found on the target host.
<b>Action</b>	Make sure the specified path exists and try again.
<b>CCEREA0008</b>	<b>Invalid output from df: {0}</b>
<b>Explanation</b>	The output of the df command does not match the POSIX standard.
<b>Action</b>	Make sure the target system has a POSIX compliant df command.
<b>CCEREA0009</b>	<b>The home directory of user {0} on host {1} could not be found.</b>
<b>Explanation</b>	The home directory of the specified user on the specified host could not be found.
<b>Action</b>	Check the configuration of the remote endpoint.
<b>CCEREA0010</b>	<b>Cannot close remote receive session.</b>
<b>Explanation</b>	The remote session for receiving files cannot be closed.
<b>Action</b>	Check the logs for previous errors.
<b>CCEREMW0000</b>	<b>Error producing zipped log source contents. Node alias: {0}, RuntimeComponent: {1}, Log Source Aliases: {2} Details: {3}</b>
<b>Explanation</b>	An error occurred while producing the zipped archive containing a collection of log source contents on the Command Central server.
<b>Action</b>	Try again. If the problem persists, contact Software AG Global Support.
<b>CCEREMW0001</b>	<b>Error attempting to close a file store used to produce zipped collection of log source contents.</b>
<b>Explanation</b>	An error occurred while closing the zip file system object containing a collection of log source file contents.
<b>Action</b>	No action required.

**CCEREMW0002**      **Error attempting to delete a temporary file used to create a zipped collection of log source contents. Filename: {0}**

**Explanation**      An attempt to delete the specified file has failed.

**Action**            Locate the file on the server hosting Command Central and delete the file if it still exists.

**CCEREMW0004**      **Error producing zipped log source contents. Node alias: {0} Details: {1}**

**Explanation**      An error occurred while producing the zipped archive containing a collection of log source contents on the Command Central server.

**Action**            Try again. If the problem persists, contact Software AG Global Support.

**CCEREPE0000**      **No repository with id, {0}, exists on managed node, {1}**

**Explanation**      The specified repository does not exist.

**Action**            Ensure the correct repository id is specified in the request, or add the desired repository to the managed node.

**CCEREPE0001**      **No repository with id, {0}, exists on managed node, {1}**

**Explanation**      The specified repository does not exist.

**Action**            Ensure the correct repository id is specified in the request, or add the desired repository to the managed node.

**CCEREPE0002**      **No such node, {0}**

**Explanation**      The node alias specified in the request does not exist.

**Action**            Specify the correct node alias, or add the relevant node to the environment.

**CCEREPE0003**      **The specified image location does not exist.**

**Explanation**      The specified location for an image repository was not found on the file system.

**Action**            Provide a valid location for the image repository.

**CCEREPE0004**      **The specified repository does not exist.**

**Explanation**      The specified repository was not found.

**Action**            Check the repository name and provide the name of an existing repository.

---

<b>CCEREPE0005</b>	<b>Parameters cannot be empty or missing.</b>
<b>Explanation</b>	All parameters are required.
<b>Action</b>	Specify values for all parameters.
<b>CCEREPE0006</b>	<b>A repository with this name already exists.</b>
<b>Explanation</b>	The name of the repository should be unique.
<b>Action</b>	Check the repository name and provide a unique name for the repository.
<b>CCEREPE0007</b>	<b>A repository at the same location already exists.</b>
<b>Explanation</b>	Two or more repositories cannot point to the same location.
<b>Action</b>	Provide a unique location for the new repository.
<b>CCEREPE0008</b>	<b>The specified repository points to an image file but the repository type is not image.</b>
<b>Explanation</b>	The specified repository cannot point to an image file, because the repository type is not image.
<b>Action</b>	Specify the correct repository type.
<b>CCEREPE0009</b>	<b>There is no repository to register.</b>
<b>Explanation</b>	No repository is found for the specified name.
<b>Action</b>	Check the repository and resubmit the request.
<b>CCEREPE0010</b>	<b>User credentials are missing.</b>
<b>Explanation</b>	No user credentials are specified for the repository.
<b>Action</b>	Add user credentials for the repository.
<b>CCEREPE0011</b>	<b>Connection to node {0} failed.</b>
<b>Explanation</b>	Could not connect to node {0}.
<b>Action</b>	Check if the node is online.
<b>CCEREPE0012</b>	<b>Repository with type {0} does not exist.</b>
<b>Explanation</b>	The repository with the specified type does not exist.
<b>Action</b>	Specify an existing repository type for the repository.

<b>CCEREPE0013</b>	<b>Repository content cache invalidate failed.</b>
<b>Explanation</b>	Invalidation of the content cache for repository {0} and nodeAlias {1} failed.
<b>Action</b>	See the Command Central logs for more details.
<b>CCEREPE0015</b>	<b>Repository with the specified name: {0} does not exist.</b>
<b>Explanation</b>	Importing content from the repository with name: {0} failed because a repository with the specified name was not found.
<b>Action</b>	Check the repository name and provide the name of an existing repository.
<b>CCEREPE0020</b>	<b>Error occurred while importing artifacts from repository with name: {0} to mirror repository with name: {1} for platforms: {2}</b>
<b>Explanation</b>	An error occurred while importing artifacts from repository with name: {0} to mirror repository with name: {1} for platforms: {2}
<b>Action</b>	See the corresponding Platform Manager logs for more details.
<b>CCEREPE0024</b>	<b>Mirror repository with name: {0} is not published or registered on Command Central.</b>
<b>Explanation</b>	Command Central cannot identify the specified mirror repository.
<b>Action</b>	Check if a mirror repository with name: {0} is published and registered on Command Central. Note that the Refresh operation refreshes a published mirror repository immediately after it is created or at a later point in time.
<b>CCEREPE0029</b>	<b>Local mirror repository with name {0} can not be removed on target node {1}</b>
<b>Explanation</b>	The local mirror repository with name {0} can not be removed on the target node {1}
<b>Action</b>	See the corresponding Platform Manager logs for more details.
<b>CCEREPE0035</b>	<b>Remote task failed: {0}</b>
<b>Explanation</b>	Remote task failed: {0}
<b>Action</b>	See the corresponding Platform Manager logs for more details.
<b>CCEREPE0036</b>	<b>Initiating mirror operation not from an image repository and without selecting "Product Repositories" is not supported.</b>
<b>Explanation</b>	This operation is not supported as it might be time consuming because of the size of the source repository.
<b>Action</b>	Either select a product repository, or change the source repository to an image repository.

---

<b>CCEREPE0038</b>	<b>Cannot delete Mirror repository with name: {0} because node with alias: {1} does not exist. Register node for host:{2} and port:{3}.</b>
<b>Explanation</b>	The mirror repository is physically stored on {1} node, which was deleted and is not now registered in Command Central.
<b>Action</b>	Add the node with alias: {1} , host: {2} and port: {3}
<b>CCEREPE0039</b>	<b>Cannot perform mirror operation because node with alias: {0} does not exist any more. Register again the node with alias: {0} for host: {1} and port: {2}.</b>
<b>Explanation</b>	The mirror repository is physically stored on {0} node, which was deleted and is not now registered in Command Central.
<b>Action</b>	Add the node with alias: {0} , host: {1} and port: {2}
<b>CCEREPE0041</b>	<b>Content of repository with displayName : {0} cannot be loaded.</b>
<b>Explanation</b>	The content of the repository with displayName : {0} cannot be listed.
<b>Action</b>	Use a different repository type or check all logs for details about the error.
<b>CCEREPE0042</b>	<b>Generation of repository status report for repository {0} will be skipped because connectivity validation failed.</b>
<b>Explanation</b>	Generating the Repository Status report will be skipped and the list content operation will not be triggered.
<b>Action</b>	Check if the proxy is available and if the Platform Manager proxy configuration is set correctly. Also, check if the user credentials are valid.
<b>CCEREPE0043</b>	<b>Creating a mirror repository failed because the source repository is not specified.</b>
<b>Explanation</b>	The source repository from which to create the mirror repository is not specified.
<b>Action</b>	Specify at least one source repository. You can specify a master, image, or another mirror repository.
<b>CCEREPE0044</b>	<b>Attempt to connect to {0} product repository from {1} installation timed out.</b>
<b>Explanation</b>	Internet access is required to connect to this repository. The error occurred either because the proxy for the local Platform Manager is not configured, or the metadata and the user credentials for the repository are not correct.
<b>Action</b>	Configure a proxy for the local Platform Manager and check the repository metadata.

<b>CCEREPE0048</b>	<b>Repository fix content cache update failed.</b>
<b>Explanation</b>	An explicit repository fix content cache update failed during the regular cache update.
<b>Action</b>	Check if the connection to the fix repository is successful.
<b>CCEREPE0049</b>	<b>Remote task failed: {0}</b>
<b>Explanation</b>	Remote task failed \ : {0}
<b>Action</b>	Check the corresponding Platform Manager logs for more details about the error.
<b>CCEREPE0052</b>	<b>Error while retrieveing credentials with alias {0}.</b>
<b>Explanation</b>	A credentials alias is not defined.
<b>Action</b>	Try again using an existing credentials alias.
<b>CCERPPE0000</b>	<b>The repository name is not specified.</b>
<b>Explanation</b>	The requested operation requires a repository name.
<b>Action</b>	Check the input and provide a repository name.
<b>CCERPPE0001</b>	<b>Repository with the specified name {0} already exists.</b>
<b>Explanation</b>	The repository name must be unique.
<b>Action</b>	Check the repository name and provide a unique name for the repository.
<b>CCERPPE0002</b>	<b>Repository with the specified name {0} does not exists.</b>
<b>Explanation</b>	Editing the repository failed, because a repository with the specified name was not found.
<b>Action</b>	Check the repository name and provide the name of an existing repository.
<b>CCERPPE0003</b>	<b>Unknown repository type. Use one of {0}</b>
<b>Explanation</b>	The specified repository type is not supported by Command Central.
<b>Action</b>	Use one of the suggested repository types.
<b>CCERPPE0004</b>	<b>Destination is not specified.</b>
<b>Explanation</b>	The destination parameter is missing.
<b>Action</b>	Specify a value for the destination parameter. For example, dest=myfixes.zip

---

<b>CCERP0005</b>	<b>Destination parameter contains invalid characters.</b>
<b>Explanation</b>	The destination parameter cannot contain file path manipulation characters.
<b>Action</b>	Specify a proper destination value. For example, dest=myfixes.zip
<b>CCERP0006</b>	<b>Export image job is not found.</b>
<b>Explanation</b>	The job responsible for creating an image is not found on the local Platform Manager.
<b>Action</b>	Check the logs for indication what went wrong.
<b>CCERP0007</b>	<b>The specified path for the image file is not valid.</b>
<b>Explanation</b>	The path specified for the image file is not valid.
<b>Action</b>	Provide a valid path for the image file.
<b>CCERP0008</b>	<b>The specified repository content type ( {0} ) did not match the actual content type of the repository ( {1} ).</b>
<b>Explanation</b>	The specified repository content type ( {0} ) did not match the actual content type of the repository ( {1} ).
<b>Action</b>	Verify that the specified repository content type is correct.
<b>CCERP0009</b>	<b>The specified repository image file location "{0}" is not valid.</b>
<b>Explanation</b>	The specified repository image file location "{0}" is not valid.
<b>Action</b>	Provide a valid repository image file location.
<b>CCERP0010</b>	<b>The artifact : {0} is not found in the repository : {1}</b>
<b>Explanation</b>	The identifier specified for the artifact is not valid or the artifact does not exist in the repository.
<b>Action</b>	Provide a valid identifier for the artifact: <id>_<version>.
<b>CCERP0011</b>	<b>Command Central cannot find the specified image file at the specified location "{0}".</b>
<b>Action</b>	Make sure the given path and file name are correct.

<b>CCERPRE0012</b>	<b>Repository with that name is not found.</b>
<b>Explanation</b>	There is no registered repository with that name.
<b>Action</b>	Provide a valid name of a registered repository.
<b>CCERPRE0013</b>	<b>Repository image location URI is not valid.</b>
<b>Explanation</b>	The location you provided is empty or not a valid URI.
<b>Action</b>	Ensure the provided location is not empty, does not include white spaces and points to a valid image file.
<b>CCESREE0000</b>	<b>Error occurred during retrieving user credentials</b>
<b>Explanation</b>	This error might occur due to the following reasons: - Users attempt to get credentials when the credentials data store is empty; - While setting credentials, the communication with the remote SPM failed; - While deleting credentials, the communication with the remote SPM failed.
<b>Action</b>	Ensure that: - If you are attempting to get the credentials, the credentials data store is not empty. - If you are setting the credentials, the remote SPM is accessible. - If you are deleting the credentials, the remote SPM is accessible.
<b>CCESREE0001</b>	<b>Specify the private key when certificate is used for authentication.</b>
<b>Explanation</b>	The selected authorization method is "certificate", however, the path to the private key is not specified or is invalid.
<b>Action</b>	Specify a valid path to the private key.
<b>CCETEME0000</b>	<b>A job with ID {0} cannot be found.</b>
<b>Explanation</b>	The job with the specified ID may have completed long before this request.
<b>Action</b>	Use the following URI to list all recently completed or running jobs: /cce/jobmanager/jobs
<b>CCETEME0001</b>	<b>The remote request encountered a concurrency error.</b>
<b>Explanation</b>	The system could not execute parallel remote requests.
<b>Action</b>	Contact Software AG Global Support.
<b>CCETEME0002</b>	<b>A job with ID {0} did not completed successfully in {1} seconds.</b>
<b>Explanation</b>	The job with the specified ID may require more time to complete.
<b>Action</b>	Use the following URI to list all recently completed or running jobs: /cce/jobmanager/jobs

---

<b>CCETEME0003</b>	<b>Template metadata cannot be empty.</b>
<b>Explanation</b>	The template metadata is required for creating a template.
<b>Action</b>	Ensure that you have provided metadata for the template. The metadata.Alias and nodeAlias fields are required.
<b>CCETEME0004</b>	<b>Template alias cannot be empty.</b>
<b>Explanation</b>	The template alias is a required attribute of the template metadata.
<b>Action</b>	Specify a value for the template alias attribute.
<b>CCETEME0005</b>	<b>Template nodeAlias cannot be empty.</b>
<b>Explanation</b>	The template nodeAlias is a required attribute of the template metadata.
<b>Action</b>	Specify a value for the nodeAlias attribute.
<b>CCETEME0006</b>	<b>Template options cannot be empty.</b>
<b>Explanation</b>	The template options attribute is required in the template metadata.
<b>Action</b>	Specify at least one option and retry.
<b>CCETEME0007</b>	<b>Error occurred during template creation {0}</b>
<b>Explanation</b>	Creating the template failed with an error.
<b>Action</b>	Check the error logs for more details.
<b>CCETEME0008</b>	<b>Error occurred during template creation on the remote managed node with alias : {0}. Remote task status is {1}</b>
<b>Explanation</b>	Creating a template on the remote managed node with the specified ID failed with an error.
<b>Action</b>	Check the job status.
<b>CCETEME0009</b>	<b>A template with alias: {0} already exists.</b>
<b>Explanation</b>	Another template with the same alias already exists.
<b>Action</b>	To overwrite the existing template, add the OVERWRITE_TEMPLATE option in the template metadata. To create a new template and keep the existing template, change the template alias.

<b>CCETEME0010</b>	<b>Node with alias : {0} does not exist.</b>
<b>Explanation</b>	A managed installation (node) with the specified alias name does not exist.
<b>Action</b>	Specify a valid alias name for an existing installation (node).
<b>CCETEME0011</b>	<b>A problem occurred while downloading template with alias {0} on Command Central.</b>
<b>Explanation</b>	Command Central could not create a folder for the template on the file system.
<b>Action</b>	Contact the Command Central Administrator.
<b>CCETEME0012</b>	<b>A template with alias {0} could not be found.</b>
<b>Explanation</b>	Command Central could not find a template with the specified alias.
<b>Action</b>	Check if the specified alias for the template you want to delete is correct.
<b>CCETEME0013</b>	<b>Error occurred while creating a template on the remote managed node with alias: {0}. Remote task status is {1}</b>
<b>Explanation</b>	Creating the template fails with a "Nothing to download on Command Central" error.
<b>Action</b>	See the error logs for the error details.
<b>CCETEME0014</b>	<b>Template with alias {0} was not found.</b>
<b>Explanation</b>	Command Central could not find a template with the specified alias.
<b>Action</b>	Verify that the alias is spelt correctly and that a template with this alias is already created. If the template is not created, execute a create template operation.
<b>CCETEME0015</b>	<b>Template already exists.</b>
<b>Explanation</b>	A template with the specified alias already exists.
<b>Action</b>	Change the alias of the imported template or delete the existing template with the same alias.
<b>CCETEME0016</b>	<b>A problem occurred while importing the template.</b>
<b>Explanation</b>	Command Central could not create a folder for the template on the file system.
<b>Action</b>	Contact the Command Central Administrator.

---

<b>CCETEME0017</b>	<b>Could not import template because a required file was not found.</b>
<b>Explanation</b>	Command Central could not find or access the file from which to import the template.
<b>Action</b>	Contact the Command Central Administrator.
<b>CCETEME0018</b>	<b>Template data is invalid.</b>
<b>Explanation</b>	The provided template data could not be deserialised.
<b>Action</b>	Check if the provided template data is corrupted.
<b>CCETEME0019</b>	<b>Template options cannot be empty.</b>
<b>Explanation</b>	The template options attribute is required in the template metadata.
<b>Action</b>	Specify at least one option and retry.
<b>CCETEME0020</b>	<b>The requested service temporarily not available.</b>
<b>Explanation</b>	The requested service temporarily not available. This may be due to Platform Manager (SPM) being in the process of shutting down or still loading at start up.
<b>Action</b>	Ensure that Platform Manager is running and Installation has ONLINE status.
<b>CCETEME0021</b>	<b>The Platform Manager (SPM) is shut down.</b>
<b>Explanation</b>	The Platform Manager (SPM) is shut down.
<b>Action</b>	Ensure that Platform Manager is running and Installation has ONLINE status
<b>CCETEME0022</b>	<b>Template metadata must be specified.</b>
<b>Explanation</b>	Specify metadata for the template.
<b>Action</b>	Check the input parameters.
<b>CCETEME0023</b>	<b>Node Alias must be specified.</b>
<b>Explanation</b>	The template input parameters must include Node Alias.
<b>Action</b>	Check the input parameters.
<b>CCETEME0024</b>	<b>Repository Id must be specified.</b>
<b>Explanation</b>	The template input parameters must include Repository Id.
<b>Action</b>	Check the input parameters.

<b>CCETEME0025</b>	<b>Repository with Id {0} cannot be found.</b>
<b>Explanation</b>	The template input parameters must include Repository Id of existing Repository.
<b>Action</b>	Check the input parameters.
<b>CCETEME0026</b>	<b>Template metadata in {0} cannot be unmarshalled.</b>
<b>Explanation</b>	The file containing the metadata for the template cannot be read.
<b>Action</b>	Make sure the file exists, can be read and contains valid XML.
<b>CCETEME0027</b>	<b>An error occurred while registering Repository {0} on Node {1}. Check the Server logs for details.</b>
<b>Explanation</b>	The issue might occur because of a problem with the Repository contents.
<b>Action</b>	Check the Server logs for details.
<b>CCETEME0028</b>	<b>Unable to obtain snapshot template job group id for node {0}.</b>
<b>Explanation</b>	Command Central was unable to obtain the snapshot template job group id for a node.
<b>Action</b>	Contact Software AG Global Support.
<b>CCETEME0029</b>	<b>Error during checking remote job status.</b>
<b>Explanation</b>	An error occurred while checking the remote job status.
<b>Action</b>	Check if Platform Manager is running.
<b>CCETMRE0000</b>	<b>Specify template alias, options, and target node.</b>
<b>Explanation</b>	Template alias, target node alias, and options are required parameters for this template.
<b>Action</b>	Specify values for all required parameters.
<b>CCETMRE0001</b>	<b>{0} option is specified but a repository for the option is not specified.</b>
<b>Explanation</b>	A repository for the option is not specified.
<b>Action</b>	Specify a repository for the option. For example, if the option is PRODUCTS, specify a product repository.

---

<b>CCETMRE0002</b>	<b>The specified repository is not applicable for this option {0}</b>
<b>Explanation</b>	The specified repository is not applicable for the specified option.
<b>Action</b>	Specify a proper repository. For example, if the option is PRODUCTS, specify a product repository.
<b>CCETMRE0003</b>	<b>There is no repository that supports the specified option {0}.</b>
<b>Explanation</b>	The specified option is not supported by the specified repositories. For example, the error occurs if the FIXES option is specified, but the repository for this option does not support fixes.
<b>Action</b>	Specify a proper repository. For example, if the specified option is FIXES, specify a repository that contains fixes.
<b>CCETMRE0004</b>	<b>No suitable option found for {0}.</b>
<b>Explanation</b>	No matching option found for the specified parameter.
<b>Action</b>	Specify a supported template option.
<b>CCEWCME0009</b>	<b>Display name cannot be empty.</b>
<b>Explanation</b>	Display name is required.
<b>Action</b>	Provide the display name.
<b>CCEWCME0010</b>	<b>Alias {0} cannot be empty.</b>
<b>Explanation</b>	Environment alias and node alias cannot be empty.
<b>Action</b>	Provide a valid alias name.
<b>CCEWCME0011</b>	<b>{0} cannot exceed {1} characters.</b>
<b>Explanation</b>	The specified field input is incorrect.
<b>Action</b>	Check the error message and provide the correct input to the specified field.
<b>CCEWCME0012</b>	<b>Environment name or alias cannot be {0}.</b>
<b>Explanation</b>	Incorrect environment name/alias provided.
<b>Action</b>	Check the error message and provide the correct input.

**CCEWCME0013**     **{0} alias cannot contain {1} non-ASCII characters.**

**Explanation**     Environment alias cannot contain non-ASCII characters.

**Action**            Make sure the value of the alias field is correct.

**CCEWCME0014**     **Alias {0} cannot contain spaces.**

**Explanation**     Environment alias cannot contain spaces.

**Action**            Make sure the value of the alias field is correct.

**CCEWCME0015**     **{0} already exists.**

**Explanation**     The specified node/environment already exists.

**Action**            Specify a correct node/environment.

**CCEWCME0017**     **Installation name cannot be empty. It must be less than 100 characters.**

**Explanation**     Node name cannot be empty or contain more than 100 characters.

**Action**            Enter a valid node name.

**CCEWCME0018**     **Alias cannot be empty. It should be no more than 100 characters long. It should not have spaces. Only ASCII characters, numbers, -, \_ and . are allowed.**

**Explanation**     The node alias cannot be empty. It should be no more than 100 characters long.

**Action**            Enter a valid node alias.

**CCEWCME0019**     **Host name cannot be empty. The host name should be between two and 253 characters characters long. Do not use any special characters, except period(.) and minus(-). Do not start or end the host name with a period(.) or minus(-).**

**Explanation**     The host name field cannot be empty.

**Action**            Provide a valid host name. The host name should be between two and 253 characters characters long. Do not use any special characters, except period(.) and minus(-). Do not start or end the host name with a period(.) or minus(-).

**CCEWCME0020**     **Port number cannot be empty. It must be a positive number.**

**Explanation**     Port number cannot be empty.

**Action**            Enter a valid port number.

---

<b>CCEWCME0028</b>	<b>Installation alias {0} already exists. Please provide a different alias for the installation.</b>
<b>Explanation</b>	Installation node already exists.
<b>Action</b>	Provide a different alias for the installation node you want to add.
<b>CCEWCME0039</b>	<b>Null returned while retrieving the configuration types for comparison.</b>
<b>Explanation</b>	This intermittent error occurs while retrieving the configuration types from Platform Manager.
<b>Action</b>	Retry configuration comparison.
<b>CCEWCME0047</b>	<b>Specify a name for the template. No spaces allowed. Use only ASCII characters, numbers, "-", "_", and "."</b>
<b>Explanation</b>	The alias field for the template cannot be empty.
<b>Action</b>	Provide a valid template alias. No spaces allowed. Use only ASCII characters, numbers, "-", "_", and "."
<b>CCEWCME0048</b>	<b>Shared secret cannot be empty.</b>
<b>Explanation</b>	The template shared secret cannot be empty.
<b>Action</b>	Provide a valid shared secret.
<b>CCEWCME0049</b>	<b>The shared secrets you entered do not match.</b>
<b>Explanation</b>	The shared secrets that you entered do not match.
<b>Action</b>	Re-enter the shared secrets.
<b>CCEWCME0050</b>	<b>Select at least one include option.</b>
<b>Explanation</b>	You cannot clear all include option check boxes.
<b>Action</b>	You must select at least one include option check box.
<b>CCEWCME0051</b>	<b>No license reports were selected for deletion.</b>
<b>Explanation</b>	At least one report must be selected in the view before clicking the delete button.
<b>Action</b>	Select one or more reports and click the delete button.

<b>CCEWCME0053</b>	<b>No repositories configured. Add at least one repository.</b>
<b>Explanation</b>	There are no central repositories configured in Command Central.
<b>Action</b>	Register at least one repository in Command Central.
<b>CCEWCME0069</b>	<b>Specify a name for the repository. No spaces allowed. Use only ASCII characters, numbers, "-", "_", and "."</b>
<b>Explanation</b>	The alias field for the repository cannot be empty.
<b>Action</b>	Provide a valid repository alias. No spaces allowed. Use only ASCII characters, numbers, "-", "_", and "."
<b>CCEWCME0072</b>	<b>Repository {0} creation failed.</b>
<b>Explanation</b>	Creating the repository failed.
<b>Action</b>	Check the server logs or contact your system administrator.
<b>CCEWCME0073</b>	<b>Repository {0} update failed.</b>
<b>Explanation</b>	Updating the specified repository failed.
<b>Action</b>	Check the server logs or contact your system administrator.
<b>CCEWCME0074</b>	<b>Version cannot be empty.</b>
<b>Explanation</b>	The Version field is a required field.
<b>Action</b>	Click the Advanced button and specify a valid server in the Enter server URL field. Leave this field empty to use the Software AG Download Center.
<b>CCEWCME0075</b>	<b>Image file path cannot be empty.</b>
<b>Explanation</b>	The Image file on server field is a required field.
<b>Action</b>	In the Image file on server field, provide a valid path to an image file on the Command Central server.
<b>CCEWCME0076</b>	<b>An image file should be selected.</b>
<b>Explanation</b>	Specifying an image file is required.
<b>Action</b>	In the Upload image file field, select an image file.

---

<b>CCEWCME0077</b>	<b>A repository with location {0} was not found in the Software AG Download Center.</b>
<b>Explanation</b>	The repository that you are trying to edit was not found in the Software AG Download Center.
<b>Action</b>	Contact your system administrator.
<b>CCEWCME0099</b>	<b>Applying template {0} on installation {1} failed.</b>
<b>Explanation</b>	The apply template operation on the target installation has failed.
<b>Action</b>	Check the logs and jobs on the target installation.
<b>CCEWCME0103</b>	<b>Error while creating a new license report. {0}</b>
<b>Explanation</b>	An error occurred while invoking the service action responsible for creating a new report.
<b>Action</b>	Check the Command Central server logs to determine the root cause for the error.
<b>CCEWCME0104</b>	<b>Error while deleting license report(s). {0}</b>
<b>Explanation</b>	An error occurred while invoking the service action responsible for deleting reports.
<b>Action</b>	Check the Command Central server logs to determine the root cause for the error.
<b>CCEWCME0105</b>	<b>Error while refreshing the license reports view. {0}</b>
<b>Explanation</b>	An error occurred while invoking the service action responsible for retrieving the reports from the Command Central server.
<b>Action</b>	Check the Command Central server logs to determine the root cause for the error.
<b>CCEWCME0114</b>	<b>Saving of template {0} from installation {1} failed.</b>
<b>Explanation</b>	The save template operation on the target installation has failed.
<b>Action</b>	Check the logs and jobs on the target installation.
<b>CCEWCME0119</b>	<b>You do not have enough access privileges to perform requested operation.</b>
<b>Explanation</b>	You do not have enough access privileges to perform requested operation.
<b>Action</b>	Contact your system administrator to help you get the required permissions.

<b>CCEWCME0124</b>	<b>Bootstrapping of Platform Manager on installation with alias {0} failed.</b>
<b>Explanation</b>	The bootstrap Platform Manager operation on the target installation has failed.
<b>Action</b>	Check the logs and jobs on Command Central.
<b>CCEWCME0125</b>	<b>Alias {0} already exists. Provide a unique alias.</b>
<b>Explanation</b>	Alias already exists.
<b>Action</b>	Provide a unique alias for the object you want to add.
<b>CCEWCME0126</b>	<b>Alias cannot be empty. It should not have spaces. Only ASCII characters, numbers, -, _ and . are allowed.</b>
<b>Explanation</b>	Alias cannot be empty.
<b>Action</b>	Enter a valid alias.
<b>CCEWCME0127</b>	<b>No file specified.</b>
<b>Explanation</b>	A valid file must be specified.
<b>Action</b>	Press the 'Browse' button and select a valid file.
<b>CCEWCME0129</b>	<b>Error while deleting license manifest(s). {0}</b>
<b>Explanation</b>	An error occurred while invoking the service action responsible for deleting license manifests.
<b>Action</b>	Check the Command Central server logs to determine the root cause for the error.
<b>CCEWCME0130</b>	<b>Error while refreshing the license manifests view. {0}</b>
<b>Explanation</b>	An error occurred while invoking the service action responsible for retrieving the license manifests from the Command Central server.
<b>Action</b>	Check the Command Central server logs to determine the root cause for the error.
<b>CCEWCME0132</b>	<b>No license manifests were selected for deletion.</b>
<b>Explanation</b>	At least one license manifest must be selected in the view before clicking the delete button.
<b>Action</b>	Select one or more license manifests and click the delete button.

---

<b>CCEWCME0135</b>	<b>The contents of the specified file has invalid format.</b>
<b>Explanation</b>	The contents of the specified file does not match the required format.
<b>Action</b>	Specify a file with valid format.
<b>CCEWCME0136</b>	<b>Select remote installation method.</b>
<b>Explanation</b>	A remote installation method is not selected in the web user interface.
<b>Action</b>	Select a remote installation method in the web user interface.
<b>CCEWCME0137</b>	<b>Distribution cannot be empty.</b>
<b>Explanation</b>	The Distribution field in the web user interface cannot be empty.
<b>Action</b>	Select a distribution in the Distribution field.
<b>CCEWCME0138</b>	<b>Repository cannot be empty.</b>
<b>Explanation</b>	The Repository field in the web user interface cannot be empty.
<b>Action</b>	Select a repository in the Repository field.
<b>CCEWCME0140</b>	<b>Installation directory cannot be empty.</b>
<b>Explanation</b>	The Installation directory field in the web user interface cannot be empty.
<b>Action</b>	Select an installation directory in the Installation directory field.
<b>CCEWCME0141</b>	<b>Operating System cannot be empty.</b>
<b>Explanation</b>	The Operating System field in the web user interface cannot be empty.
<b>Action</b>	Select an operating System in the Operating System field.
<b>CCEWCME0142</b>	<b>Bootstrapped node {0} startup timed out.</b>
<b>Explanation</b>	The status of the bootstrapped node is still OFFLINE after the required timeout.
<b>Action</b>	Check the Command Central bootstrap logs.
<b>CCEWCME0143</b>	<b>Bootstrap installer creation failed.</b>
<b>Explanation</b>	Bootstrap installer creation failed.
<b>Action</b>	Check the Command Central logs.

- CCEWCME0145**     **User name cannot be empty.**  
**Explanation**     The user name field cannot be empty.  
**Action**             Provide a value in the user name field.
- CCEWCME0146**     **Password cannot be empty for the selected authentication method.**  
**Explanation**     The Password cannot be empty for the selected authentication method.  
**Action**             Provide a value in the Password field for the selected authentication method.
- CCEWCME0147**     **Key file cannot be empty for the selected authentication method.**  
**Explanation**     The Key file field cannot be empty for the selected authentication method.  
**Action**             Provide a value in the Key file field for the selected authentication method.
- CCEWCME0148**     **Password cannot be empty.**  
**Explanation**     The Password field cannot be empty.  
**Action**             Provide a value in the Password field.
- CCEWCME0149**     **User name cannot be empty.**  
**Explanation**     The user name cannot be empty.  
**Action**             Provide a value in the user name field.
- CCEWCME0151**     **Navigation to the log(s) for node {0} can not be initiated.**  
**Explanation**     A node with alias {0} does not exist in the Command Central landscape.  
**Action**             Select an existing node different than {0}.
- CCEWCME0152**     **You do not have access to the requested operation(s).**  
**Explanation**     You do not have access to the requested operation(s).  
**Action**             Provide valid credentials to perform the requested operation(s).
- CCEWCME0154**     **Request to create a license report failed.**  
**Explanation**     An error occurred during the creation of the license report.  
**Action**             Contact Software AG Global Support.

---

<b>CCEWCME0155</b>	<b>Select fixes to be installed.</b>
<b>Explanation</b>	No fixes are selected for installation.
<b>Action</b>	Select at least one fix to be installed.
<b>CCEWCME0156</b>	<b>Duplicate fixes selected. Select only one of the fix versions to be installed.</b>
<b>Explanation</b>	Duplicate fixes with the same ID, but different versions were selected.
<b>Action</b>	Select only one of the possible versions.
<b>CCEWCME0157</b>	<b>The key should not be empty.</b>
<b>Explanation</b>	The Support Patch key should not be empty.
<b>Action</b>	Provide a Support Patch key.
<b>CCEWCME0158</b>	<b>The Platform Manager (SPM) on this installation is not online.</b>
<b>Explanation</b>	The selected fix and product installation functions are not supported when Platform Manager is not running.
<b>Action</b>	Start Platform Manager and try again.
<b>CCEWCME0159</b>	<b>Release 9.7 and higher supports fix installation.</b>
<b>Explanation</b>	Fix installation is supported for installations of release 9.7 and higher. See the actions suggested for your installation in the Action field.
<b>Action</b>	Use Software AG Update Manager to install fixes and support patches for this installation. Consider upgrading this installation to 9.10 or a later release, using Command Central.
<b>CCEWCME0162</b>	<b>This installation version ({0}) does not support this feature.</b>
<b>Explanation</b>	The selective fix uninstallation feature is supported beginning with Platform Manager 9.7.
<b>Action</b>	If it is not possible to upgrade the installation to the latest available release version, you should use Update Manager to uninstall fixes.
<b>CCEWCME0163</b>	<b>Select a support patch to be installed.</b>
<b>Explanation</b>	There is no support patch selected for installation.
<b>Action</b>	Select a support patch to install.

<b>CCEWCME0166</b>	<b>Select at least one source repository.</b>
<b>Explanation</b>	You must select at least one source repository from which to create a mirror repository.
<b>Action</b>	Select at least one source repository from which to create a mirror repository.
<b>CCEWCME0167</b>	<b>The provided configuration is not valid.</b>
<b>Explanation</b>	The server request can not be completed successfully.
<b>Action</b>	Expand this view for more details.
<b>CCEWCME0168</b>	<b>No license keys were selected for deletion.</b>
<b>Explanation</b>	You must select at least one license key in the view before clicking the delete button.
<b>Action</b>	Select one or more license keys and click the delete button.
<b>CCEWCME0171</b>	<b>Error while refreshing the license keys view. {0}</b>
<b>Explanation</b>	An error occurred while invoking the service action responsible for retrieving the license keys from the Command Central server.
<b>Action</b>	Check the Command Central server logs to determine the root cause for the error.
<b>CCEWCME0174</b>	<b>Adding/Updating a repository operation failed.</b>
<b>Explanation</b>	Adding a repository operation failed. The job status is Error.
<b>Action</b>	Check the logs and try again.
<b>CCEWCME0175</b>	<b>Error while deleting license key(s). {0}</b>
<b>Explanation</b>	An error occurred while invoking the service action responsible for deleting license keys.
<b>Action</b>	Check the Command Central server logs to determine the root cause for the error.
<b>CCEWCME0183</b>	<b>Invalid username or password.</b>
<b>Explanation</b>	Invalid username or credentials provided in the Command Central Login page.
<b>Action</b>	Provide valid username or credentials in the Command Central Login page.
<b>CCEWCME0184</b>	<b>To mirror from a MASTER repository, you need at least one product repository that will be used as a filter for the repository content.</b>
<b>Explanation</b>	To mirror from a MASTER repository, you need at least one product repository that will be used as a filter for the repository content.
<b>Action</b>	Select at least one product repository.

---

<b>CCEWCME0185</b>	<b>Specify a name that follows the webMethods-&lt;major.version&gt;.&lt;minor.version&gt;_&lt;name&gt; pattern.</b>
<b>Explanation</b>	The pattern allows to extract the version when constructing a bootstrap image for ALL SPM distribution.
<b>Action</b>	Name your product mirror repository after the pattern.
<b>CCEWCME0188</b>	<b>Insufficient permissions to access this resource.</b>
<b>Explanation</b>	You do not have sufficient permissions to access this resource.
<b>Action</b>	Contact your system administrator to get sufficient permissions.
<b>CCEWCME0209</b>	<b>Release 9.8 and higher supports product installation.</b>
<b>Explanation</b>	Product installation is supported for installations of release 9.8 and higher. See the actions suggested for your installation in the Action field.
<b>Action</b>	Use Software AG Installer to install products for this installation. Consider upgrading this installation to 9.10 or a later release, using Command Central.
<b>CCEWCME0210</b>	<b>Release 9.8 and higher supports support patch installation.</b>
<b>Explanation</b>	Support patch installation is supported for installations of release 9.8 and higher. See the actions suggested for your installation in the Action field.
<b>Action</b>	Use Software AG Update Manager to install support patches for this installation. Consider upgrading this installation to 9.10 or a later release, using Command Central.
<b>CCEWCME0214</b>	<b>Enter your user name for the Software AG Download Center.</b>
<b>Explanation</b>	The user name field cannot be empty.
<b>Action</b>	Enter a valid user name for the Software AG Download Center.
<b>CCEWCME0215</b>	<b>Enter your password for the Software AG Download Center.</b>
<b>Explanation</b>	The password field cannot be empty.
<b>Action</b>	Enter a valid password for the Software AG Download Center.
<b>CCEWCME0216</b>	<b>Enter your user name for the remote Platform Manager.</b>
<b>Explanation</b>	The user name field cannot be empty.
<b>Action</b>	Enter a valid user name for the Platform Manager, which is specified in the repository URL.

<b>CCEWCME0217</b>	<b>Enter your password for the remote Platform Manager.</b>
<b>Explanation</b>	The password field cannot be empty.
<b>Action</b>	Enter a valid password for the Platform Manager, which is specified in the repository URL.
<b>CCEWCME0220</b>	<b>Updating repository contents operation failed.</b>
<b>Explanation</b>	The repository update contents operation failed. The job status is Error.
<b>Action</b>	Check the logs and try again.
<b>CCEWCME0223</b>	<b>Could not transfer the file to the target destination {0}.</b>
<b>Explanation</b>	The file could not be transferred because of an error.
<b>Action</b>	Check if the target host has enough disk space or the specified file name is valid.
<b>CCEWCME0228</b>	<b>You are not allowed to perform the requested operation.</b>
<b>Explanation</b>	You are not allowed to perform the requested operation because of Cross Site Request Prevention.
<b>Action</b>	Ensure that you do not have several Command Central REST resources open in the same browser session. If you do, close all the instances of the browser and log into the Command Central web user interface again.
<b>CCEWCME0239</b>	<b>Source repositories with different versions are selected: {0}.</b>
<b>Explanation</b>	The selected source repositories have different versions.
<b>Action</b>	Select source repositories with the same version.
<b>CCEWCME0240</b>	<b>Connecting to asset repository {0} failed.</b>
<b>Explanation</b>	Connecting to an asset repository failed.
<b>Action</b>	Check the logs and try again.
<b>CCEWCME0243</b>	<b>Asset repository {0} could not be connected/edited.</b>
<b>CCEWCMI0021</b>	<b>Installation {0} already exists in environment {1}.</b>
<b>Explanation</b>	The selected node already exists in the environment. Drag and drop not possible.
<b>Action</b>	Verify if you have selected the correct nodes and the environment for drag and drop.

---

<b>CCEWCMI0040</b>	<b>{0} must be a non-negative integer.</b>
<b>Explanation</b>	Specified field must be a non-negative integer.
<b>Action</b>	Enter a valid field value.
<b>CCEWCMI0041</b>	<b>{0} cannot be empty.</b>
<b>Explanation</b>	Specified field cannot be empty.
<b>Action</b>	Enter a valid field value.
<b>CCEWCMI0046</b>	<b>Alias cannot be empty.</b>
<b>Explanation</b>	The port alias field cannot be empty.
<b>Action</b>	Provide a valid port alias name.
<b>CCEWCMI0057</b>	<b>User credentials saved successfully.</b>
<b>Explanation</b>	The provided user credentials are successfully saved.
<b>Action</b>	None.
<b>CCEWCMI0058</b>	<b>User credentials deleted successfully.</b>
<b>Explanation</b>	The provided user credentials are successfully deleted.
<b>Action</b>	None.
<b>CCEWCMI0098</b>	<b>Template {0} successfully saved from installation {1}.</b>
<b>Explanation</b>	The save template operation completed successfully.
<b>Action</b>	No action required.
<b>CCEWCMI0100</b>	<b>Type a keyword to display only the reports that contain the keyword in the report id, creator, create date or compliance status. The search is case-insensitive.</b>
<b>Explanation</b>	License report search filter help text.
<b>Action</b>	None.
<b>CCEWCMI0101</b>	<b>Do you wish to continue?</b>
<b>Explanation</b>	Part of the license report confirmation dialog for creating a new report.
<b>Action</b>	None.

<b>CCEWCMI0110</b>	<b>It may take a few moments to generate the report.</b>
<b>Explanation</b>	Part of the license report confirmation dialog for creating a new report.
<b>Action</b>	None.
<b>CCEWCMI0112</b>	<b>license report(s)</b>
<b>Explanation</b>	Part of 'delete license report(s)' confirmation dialog.
<b>Action</b>	None.
<b>CCEWCMI0113</b>	<b>Report Id(s): {0}</b>
<b>Explanation</b>	License report confirmation dialog for deleting one or more reports.
<b>Action</b>	None.
<b>CCEWCMI0115</b>	<b>Template {0} successfully applied on installation {1}.</b>
<b>Explanation</b>	The apply template operation completed successfully.
<b>Action</b>	No action required.
<b>CCEWCMI0117</b>	<b>Scheduled job did not complete within status checker's allotted time.</b>
<b>Explanation</b>	The client job status checker stopped polling for an executing job's status before it completed. This does not necessarily mean the job did not complete successfully.
<b>Action</b>	Confirm if job completed via other means.
<b>CCEWCMI0120</b>	<b>Attribute {0} successfully submitted.</b>
<b>Explanation</b>	The attribute was successfully added or updated.
<b>Action</b>	No action required.
<b>CCEWCMI0121</b>	<b>Attribute {0} successfully deleted.</b>
<b>Explanation</b>	The attribute was successfully deleted.
<b>Action</b>	No action required.
<b>CCEWCMI0123</b>	<b>Platform Manager successfully bootstrapped on installation with alias {0}.</b>
<b>Explanation</b>	The bootstrap of Platform Manager was successful.
<b>Action</b>	No action required.

---

<b>CCEWCMI0131</b>	<b>Type a keyword to display only the license manifests that contain the keyword in one of the columns. The search is case-insensitive.</b>
<b>Explanation</b>	License manifest search filter help text.
<b>Action</b>	None.
<b>CCEWCMI0144</b>	<b>Bootstrap installer created successfully.</b>
<b>Explanation</b>	A new bootstrap installer was successfully created.
<b>Action</b>	None.
<b>CCEWCMI0180</b>	<b>No licenses have been registered</b>
<b>Explanation</b>	No license key aliases have been registered so that it is not possible to select a license key alias.
<b>Action</b>	Register a license key alias.
<b>CCEWCMI0186</b>	<b>Provided configuration is valid.</b>
<b>Explanation</b>	The server request is completed successfully.
<b>Action</b>	Expand this view for more details.
<b>CCEWCMW0107</b>	<b>No data selected for delete.</b>
<b>Explanation</b>	You must select at least one object for deletion.
<b>Action</b>	Select at least one object from the object list.
<b>CCEWCMW0108</b>	<b>Delete request failed, but no ErrorInfo was found.</b>
<b>Explanation</b>	A problem occurred when executing a delete request, but the server did not provide details about the problem.
<b>Action</b>	Check the server-side log files for details. Contact Software AG Global Support.
<b>CCEWCMW0109</b>	<b>Request to delete license reports failed for these report IDs: {0}</b>
<b>Explanation</b>	The server was not able to delete the license reports identified here. The request may have included other report IDs for which deletion was successful.
<b>Action</b>	Refresh the display of license reports to see which were deleted. Check the server-side error log for details about why the attempt to delete failed.

**CCEWCMW0118**    **Unable to determine job status due to unexpected error while checking status. {0}**

**Explanation**    Job status checking encountered an error. This does not necessarily mean the job did not complete successfully.

**Action**    Confirm if job completed via other means.

**CCEWCMW0122**    **The provided attribute name {0} already exists.**

**Explanation**    The attribute name which you are trying to add already exists.

**Action**    Provide a unique attribute name.

**CCEWCMW0172**    **Delete request failed for this alias: {0}**

**Explanation**    The server was not able to delete the object with the given alias.

**Action**    Check the server-side error log for details about why the attempt to delete failed.

**CCEWCMW0187**    **Provided configuration is valid, but check the warnings.**

**Explanation**    The server request is completed, but check the warnings.

**Action**    Expand this view for more details.

**CCEWCMW0211**    **Not all products can be installed by Command Central.**

**Explanation**    The number of products that you can install using Command Central increases with each Software AG release.

**Action**    See the Command Central release readme for a list of products that you cannot install through Command Central for each Software AG release.

**CCEWCMW0212**    **There are artifacts which are either not applicable for the installation or not present in the selected repository.**

**Explanation**    The following artifacts are either not applicable, or not present in the selected repository: {0}

**Action**    Either continue without the missing artifacts, or use a source repository containing those artifacts.

**CCEWCMW0222**    **User credentials for repository {0} are missing or invalid.**

**Explanation**    The user credentials for repository {0} are missing or invalid.

**Action**    Specify valid user credentials for repository {0}.

## Common Monitoring Provider Messages

---

<b>CMPAPIE0000</b>	<b>{0}: The input parameter {1} is null or empty.</b>
<b>Explanation</b>	A required input parameter is null or empty.
<b>Action</b>	Please provide the required input parameter.
<b>CMPAPIE0001</b>	<b>{0}: The input parameter {1} is null.</b>
<b>Explanation</b>	A required input parameter is null.
<b>Action</b>	Please provide the required input parameter.
<b>CMPAPIE0003</b>	<b>{0}: Cannot load XSD file {1}</b>
<b>Explanation</b>	A required input parameter is null.
<b>Action</b>	Please provide the required input parameter.
<b>CMPBKRE0000</b>	<b>Error initializing Broker Attribute Values. Broker Monitoring Context cannot be null.</b>
<b>Explanation</b>	Broker Monitoring Context is required for initializing Broker Attribute Values.
<b>Action</b>	Verify Broker Connection parameters.
<b>CMPBKRE0001</b>	<b>Error while retrieving attribute value. MetaModel Type Name cannot be null or empty.</b>
<b>Explanation</b>	MetaModel Type Name is required for retrieving attribute value.
<b>Action</b>	Verify metadata model type name is provided.

<b>CMPBKRE0002</b>	<b>Error while retrieving attribute value. MetaModel instance name cannot be null or empty.</b>
<b>Explanation</b>	MetaModel instance name is required to retrieve attribute value.
<b>Action</b>	Verify metadata model instance name is provided.
<b>CMPBKRE0003</b>	<b>Error while retrieving attribute value. Attribute ID cannot be null or empty.</b>
<b>Explanation</b>	Attribute ID is required to retrieve attribute value.
<b>Action</b>	Verify Attribute ID is provided.
<b>CMPBKRE0004</b>	<b>Error while retrieving attribute values. Attribute query object cannot be null.</b>
<b>Explanation</b>	Attribute query object is required to retrieve attribute values.
<b>Action</b>	Verify attribute query object is provided.
<b>CMPBKRE0005</b>	<b>Error while retrieving attribute value due to invalid model type.</b>
<b>Explanation</b>	An invalid model type was provided while retrieving attribute values.
<b>Action</b>	Verify a valid model type is provided.
<b>CMPBKRE0006</b>	<b>Error while destroying Monitoring Context. Monitoring Context cannot be null.</b>
<b>Explanation</b>	Error while destroying Monitoring Context. Monitoring Context cannot be null.
<b>Action</b>	Verify Monitoring Context is provided
<b>CMPBKRE0007</b>	<b>Error while destroying Monitoring Context. Invalid Broker Monitoring Context provided.</b>
<b>Explanation</b>	Error while destroying Monitoring Context. Invalid Broker Monitoring Context provided.
<b>Action</b>	Verify valid Broker Monitoring Context is provided.
<b>CMPBKRE0008</b>	<b>Error while getting meta model. Model type name cannot be null.</b>
<b>Explanation</b>	Error while getting meta model. Model type name cannot be null.
<b>Action</b>	Verify Model type name is provided.

---

<b>CMPBKRE0009</b>	<b>Error while validating Broker Monitoring Context. Broker Monitoring Context cannot be null.</b>
<b>Explanation</b>	Error while validating Broker Monitoring Context. Broker Monitoring Context cannot be null.
<b>Action</b>	Verify Broker Monitoring Context is provided.
<b>CMPBKRE0010</b>	<b>Error while validating Broker Monitoring Context. Invalid Broker Monitoring Context provided.</b>
<b>Explanation</b>	Error while validating Broker Monitoring Context. Invalid Broker Monitoring Context provided.
<b>Action</b>	Verify a valid Broker Monitoring Context is provided.
<b>CMPBKRE0011</b>	<b>Error while validating Broker Monitoring Context. Context object is null.</b>
<b>Explanation</b>	Error while validating Broker Monitoring Context. Context object is null.
<b>Action</b>	Verify Broker Monitoring Context is provided.
<b>CMPBKRE0012</b>	<b>Error while validating Broker Monitoring Context. Context is invalid.</b>
<b>Explanation</b>	Error while validating Broker Monitoring Context. Context is invalid.
<b>Action</b>	Verify valid Broker Monitoring Context is provided.
<b>CMPBKRE0013</b>	<b>Error while validating Broker Monitoring Context. Context host attribute cannot be null or empty.</b>
<b>Explanation</b>	Error while validating Broker Monitoring Context. Context host attribute cannot be null or empty.
<b>Action</b>	Verify host attribute is provided in Broker Monitoring Context
<b>CMPBKRE0014</b>	<b>Error while validating Broker Monitoring Context. Context port attribute is invalid.</b>
<b>Explanation</b>	Error while validating Broker Monitoring Context. Context port attribute is invalid.
<b>Action</b>	Verify valid port attribute is provided in Broker Monitoring Context.
<b>CMPBKRE0015</b>	<b>Error while creating Broker Server client. Host name cannot be null or empty.</b>
<b>Explanation</b>	Error while creating Broker Server client. Host name cannot be null or empty.
<b>Action</b>	Verify host name is provided.

<b>CMPBKRE0016</b>	<b>Error while creating Broker Server client. Port cannot be null or empty.</b>
<b>Explanation</b>	Error while creating Broker Server client. Port cannot be null or empty.
<b>Action</b>	Verify port is provided.
<b>CMPBKRE0017</b>	<b>Error while destroying Broker Server client. Broker Name cannot be null or empty.</b>
<b>Explanation</b>	Error while destroying Broker Server client. Broker Name cannot be null or empty.
<b>Action</b>	Verify Broker Name is provided.
<b>CMPBKRE0018</b>	<b>Error while creating Broker Admin client. Broker Name cannot be null.</b>
<b>Explanation</b>	Error while creating Broker Admin client. Broker Name cannot be null.
<b>Action</b>	Verify Broker Name is provided.
<b>CMPBKRE0019</b>	<b>Error while setting Broker Admin client. Broker Name cannot be null.</b>
<b>Explanation</b>	Error while setting Broker Admin client. Broker Name cannot be null.
<b>Action</b>	Verify Broker Name is provided.
<b>CMPBKRE0020</b>	<b>Error while setting Broker Admin client. Broker Admin Client cannot be null.</b>
<b>Explanation</b>	Error while setting Broker Admin client. Broker Admin Client cannot be null.
<b>Action</b>	Verify Broker Admin Client is specified.
<b>CMPBKRE0021</b>	<b>Error while initializing Broker Client model. Broker Monitoring Context is null.</b>
<b>Explanation</b>	Error while initializing Broker Client model. Broker Monitoring Context is null.
<b>Action</b>	Verify Broker Monitoring Context is provided.
<b>CMPBKRE0022</b>	<b>Error while getting Broker Client attributes. Model Instance List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Client attributes. Model Instance List cannot be null.
<b>Action</b>	Verify Model Instance List is provided.
<b>CMPBKRE0023</b>	<b>Error while getting Broker Client attributes. Attribute List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Client attributes. Attribute List cannot be null.
<b>Action</b>	Verify Attribute List is provided.

---

<b>CMPBKRE0024</b>	<b>Error while getting Broker Client attribute. Attribute ID cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Client attribute. Attribute ID cannot be null.
<b>Action</b>	Verify Attribute ID is provided.
<b>CMPBKRE0025</b>	<b>Error while initializing Broker Document Type model. Broker Monitoring Context is null.</b>
<b>Explanation</b>	Error while initializing Broker Document Type model. Broker Monitoring Context is null.
<b>Action</b>	Verify Broker Monitoring Context is provided.
<b>CMPBKRE0026</b>	<b>Error while getting Broker Document Type attributes. Model Instance List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Document Type attributes. Model Instance List cannot be null.
<b>Action</b>	Verify Model Instance List is provided.
<b>CMPBKRE0027</b>	<b>Error while getting Broker Document Type attributes. Attribute List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Document Type attributes. Attribute List cannot be null.
<b>Action</b>	Verify Attribute List is provided.
<b>CMPBKRE0028</b>	<b>Error while getting Broker Document Type attribute. Attribute ID cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Document Type attribute. Attribute ID cannot be null.
<b>Action</b>	Verify Attribute ID is provided.
<b>CMPBKRE0029</b>	<b>Error while initializing Broker Gateway model. Broker Monitoring Context is null.</b>
<b>Explanation</b>	Error while initializing Broker Gateway model. Broker Monitoring Context is null.
<b>Action</b>	Verify Broker Monitoring Context is provided.
<b>CMPBKRE0030</b>	<b>Error while initializing Broker Gateway model. Broker Monitoring Context is null.</b>
<b>Explanation</b>	Error while initializing Broker Gateway model. Broker Monitoring Context is null.
<b>Action</b>	Verify Broker Monitoring Context is provided.

<b>CMPBKRE0031</b>	<b>Error while getting Broker Gateway attributes. Model Instance List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Gateway attributes. Model Instance List cannot be null.
<b>Action</b>	Verify Model Instance List is provided.
<b>CMPBKRE0032</b>	<b>Error while getting Broker Gateway attributes. Attribute List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Gateway attributes. Attribute List cannot be null.
<b>Action</b>	Verify Attribute List is provided.
<b>CMPBKRE0033</b>	<b>Error while getting Broker Gateway attribute. Attribute ID cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Gateway attribute. Attribute ID cannot be null.
<b>Action</b>	Verify Attribute ID is provided.

<b>Explanation</b>	Error while getting Broker attributes. Model Instance List cannot be null.
<b>Action</b>	Verify Model Instance List is provided.
<b>CMPBKRE0036</b>	<b>Error while getting Broker attributes. Attribute List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker attributes. Attribute List cannot be null.
<b>Action</b>	Verify Attribute List is provided.
<b>CMPBKRE0037</b>	<b>Error while getting Broker attribute. Attribute ID cannot be null.</b>
<b>Explanation</b>	Error while getting Broker attribute. Attribute ID cannot be null.
<b>Action</b>	Verify Attribute ID is provided.
<b>CMPBKRE0038</b>	<b>Error while initializing Broker model instance. Broker Monitoring Context is null.</b>
<b>Explanation</b>	Error while initializing Broker model instance. Broker Monitoring Context is null.
<b>Action</b>	Verify Broker Monitoring Context is provided.

---

<b>CMPBKRE0039</b>	<b>Error while getting model instances. MetaModel Type name is null or empty.</b>
<b>Explanation</b>	Error while getting model instances. MetaModel Type name is null or empty.
<b>Action</b>	Verify MetaModel Type Name is provided.
<b>CMPBKRE0040</b>	<b>Error while getting model instances. Invalid MetaModel Type Name.</b>
<b>Explanation</b>	Error while getting model instances. Invalid MetaModel Type Name.
<b>Action</b>	Verify valid MetaModel Type Name is provided.
<b>CMPBKRE0041</b>	<b>Error while initializing Broker Server model. Broker Monitoring Context is null.</b>
<b>Explanation</b>	Error while initializing Broker Server model. Broker Monitoring Context is null.
<b>Action</b>	Verify Broker Monitoring Context is provided.
<b>CMPBKRE0042</b>	<b>Error while getting Broker Server attributes. Model Instance List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Server attributes. Model Instance List cannot be null.
<b>Action</b>	Verify Model Instance List is provided.
<b>CMPBKRE0043</b>	<b>Error while getting Broker Server attributes. Attribute List cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Server attributes. Attribute List cannot be null.
<b>Action</b>	Verify Attribute List is provided.
<b>CMPBKRE0044</b>	<b>Error while getting Broker Server attribute. Attribute ID cannot be null.</b>
<b>Explanation</b>	Error while getting Broker Server attribute. Attribute ID cannot be null.
<b>Action</b>	Verify Attribute ID is provided.
<b>CMPBKRE0045</b>	<b>Error while getting Broker SSL Stats attributes. Attribute ID cannot be null.</b>
<b>Explanation</b>	Error while getting Broker SSL Stats attributes. Attribute ID cannot be null.
<b>Action</b>	Verify valid Attribute ID is provided.
<b>CMPBKRE0046</b>	<b>Error while initializing Broker Territory model. Broker Monitoring Context is null.</b>
<b>Explanation</b>	Error while initializing Broker Territory model. Broker Monitoring Context is null.
<b>Action</b>	Verify Broker Monitoring Context is provided.

**CMPBKRE0047**      **Error while getting Broker Territory attributes. Model Instance List cannot be null.**  
**Explanation**      Error while getting Broker Territory attributes. Model Instance List cannot be null.  
**Action**              Verify Model Instance List is provided.

**CMPBKRE0048**      **Error while getting Broker Territory attributes. Attribute List cannot be null.**  
**Explanation**      Error while getting Broker Territory attributes. Attribute List cannot be null.  
**Action**              Verify Attribute List is provided.

**CMPBKRE0049**      **Error while getting Broker Territory attribute. Attribute ID cannot be null.**  
**Explanation**      Error while getting Broker Territory attribute. Attribute ID cannot be null.  
**Action**              Verify Attribute ID is provided.

**CMPBKRE0050**      **Error while initializing Territory Broker model. Broker Monitoring Context is null.**  
**Explanation**      Error while initializing Territory Broker model. Broker Monitoring Context is null.  
**Action**              Verify Broker Monitoring Context is provided.

**CMPBKRE0051**      **Error while getting Territory Broker attributes. Model Instance List cannot be null.**  
**Explanation**      Error while getting Territory Broker attributes. Model Instance List cannot be null.  
**Action**              Verify Model Instance List is provided.

**CMPBKRE0052**      **Error while getting Territory Broker attributes. Attribute List cannot be null.**  
**Explanation**      Error while getting Territory Broker attributes. Attribute List cannot be null.  
**Action**              Verify Attribute List is provided.

**CMPBKRE0053**      **Error while getting Territory Broker attribute. Attribute ID cannot be null.**  
**Explanation**      Error while getting Territory Broker attribute. Attribute ID cannot be null.  
**Action**              Verify Attribute ID is provided.

**CMPBKRE0054**      **Error while getting Territory Broker Stats attribute. Could not retrieve attribute value.**  
**Explanation**      Error while getting Territory Broker Stats attribute. Could not retrieve attribute value.

---

<b>CMPBKRE0055</b>	<b>Error while getting Territory Broker Stats Event attribute. Could not retrieve attribute value.</b>
<b>Explanation</b>	Error while getting Territory Broker Stats Event attribute. Could not retrieve attribute value.
<b>CMPBKRE0056</b>	<b>Error during Broker ping. Invalid Ping Context.</b>
<b>Explanation</b>	Error during Broker ping. Invalid Ping Context.
<b>Action</b>	Verify valid Ping Context is provided.
<b>CMPBKRE0057</b>	<b>Error during Broker Client ping. Broker Name not set in Broker Monitoring Context.</b>
<b>Explanation</b>	Error during Broker Client ping. Broker Name not set in Broker Monitoring Context.
<b>Action</b>	Verify Broker Name is set in Broker Ping Context.

<b>Action</b>	Report the error
<b>CMPUMIE0049</b>	<b>Failed to get attribute values for instance {0}. No such node with path : {1}</b>
<b>Explanation</b>	Failed to get attribute values for instance {0}. No such node with path : {1}
<b>Action</b>	Report the error

---

<b>CMPUMIE0050</b>	<b>Failed for instance {0}. Exception message : {1}</b>
<b>Explanation</b>	Failed to get attribute values for an instance. Exception message attached.
<b>Action</b>	Report the error
<b>CMPUMIE0051</b>	<b>Failed for instance {0}. Can't parse path : {1}</b>
<b>Explanation</b>	Failed to get attribute values for an instance. Failed to parse the attached path.
<b>Action</b>	Report the error
<b>CMPUMIE0052</b>	<b>Unknown model type: {0} During getting attribute values.</b>
<b>Explanation</b>	Encountered an unknown model type when getting attribute values.
<b>Action</b>	Report the error
<b>CMPUMIE0053</b>	<b>Object is invalid or not available.</b>
<b>Explanation</b>	Object is invalid or not available is a default error message for a missing attribute.
<b>Action</b>	Report the error.
<b>CMPUMIE0054</b>	<b>Can't create UMMonitoringContext with null UMInputContext</b>
<b>Explanation</b>	There is code trying to create a UMMonitoringContext with null UMInputContext
<b>Action</b>	Report the error
<b>CMPUMIE0055</b>	<b>User not authorized on this node. user:{0}, sessionAttributes:{1}</b>
<b>Explanation</b>	The User specified to connect to the realm is not authorized for operations on this node. Attaches user and sessionAttributes
<b>Action</b>	report the error
<b>CMPUMIE0056</b>	<b>Input context cannot be null</b>
<b>Explanation</b>	Input context cannot be null
<b>CMPUMIE0057</b>	<b>Can't find interface status for {0}</b>
<b>Explanation</b>	Can't find interface status for an Interface
<b>Action</b>	Report the error

<b>CMPUMIE0058</b>	<b>Can't find interface name for {0}</b>
<b>Explanation</b>	Can't find interface name for a interface
<b>Action</b>	Report the error
<b>CMPUMIE0059</b>	<b>Not Authorized to use nRealmNode methods</b>
<b>Explanation</b>	This exception will be thrown if a user connecting to UM is Not Authorized to use nRealmNode methods
<b>Action</b>	Report the error
<b>CMPUMIE0060</b>	<b>Can't set node to null in UMNNodeModel</b>
<b>Explanation</b>	Can't set node to null in UMNNodeModel
<b>Action</b>	Report the error
<b>CMPUMIE0061</b>	<b>Node does not exist in NodeFactory, path:{0}</b>
<b>Explanation</b>	Node does not exist in NodeFactory, path attached.
<b>Action</b>	Report the error
<b>CMPUMIE0062</b>	<b>Realm Node Not connected, path:{0}</b>
<b>Explanation</b>	Realm Node Not connected, the connection has expired or couldn't be established. path attached.
<b>Action</b>	Report the error
<b>CMPUMIE0063</b>	<b>Realm Node Not connected</b>
<b>Explanation</b>	Realm Node Not connected
<b>Action</b>	Report the error
<b>CMPUMIE0064</b>	<b>Exception occurred while getting Object Status, {0}</b>
<b>Explanation</b>	Exception occurred while getting Object Status, Exception attached.
<b>Action</b>	Report the error
<b>CMPUMIE0065</b>	<b>Can't get realm for node, path: {0}</b>
<b>Explanation</b>	Can't get realm for node, path attached
<b>Action</b>	Report the error

<b>CMPUMIE0066</b>	<b>Node is null during isConnected call in class: {0}</b>
<b>Explanation</b>	Node is null during isConnected call in class: {0}
<b>Action</b>	Report the error

# 10 Database Component Configurator Messages

---

## **CAN\_NOT\_RUN\_MIGRATE\_MSG – Can not run migrate to version {0}**

**Explanation** The user tried to migrate a database component that does not exist.

**Action** Make sure the database component exists using the catalog action before trying to migrate it.

## **CMP\_STORE\_INIT\_ERROR – Error initializing definition store instance**

**Explanation** The Database Component Configurator could not initialize all database component definitions.

**Action** Contact Software AG Global Support.

## **DCI\_INFO\_ERROR\_MSG Error in getting DCI about information.**

**Explanation** The user displayed the About information, but build information is missing.

**Action** Contact Software AG Global Support.

## **ERROR\_ENCODING Error in checking database encoding**

**Explanation** The checkEncoding action failed.

**Action** Make sure the the RDBMS is running.

# 11

## Deployer Messages

---

<b>1232</b>	<b>Repository-based deployment does not support deployment of {0} assets when part of a project that also contains either MWS, Optimize, or Business Rules assets.</b>
<b>Explanation</b>	Deployer does not support deployment of Universal Messaging assets when part of a project that also contains MWS, Optimize, or Business Rules assets.
<b>Action</b>	Remove the the Universal Messaging assets from the deployment set and update the deployment map accordingly. To deploy Universal Messaging assets, you must create a separate project that contains the Universal Messaging assets.
<b>1234</b>	<b>Deployer issued the following exception while attempting to compile the package: "{0}"</b>
<b>Explanation</b>	Deployer invoked the <code>wm.server.packages:compilePackage</code> service, and the <code>compilePackage</code> service returned an error.
<b>Action</b>	Verify the network connectivity between the Deployer server and each target Integration Server. Also, verify that the target Integration Servers are up and running. For more information about the error that the <code>compilePackage</code> service returned, see the deploy or simulation report.
<b>1240</b>	<b>Error occurred while attempting to compile the package {0}. Error details : {1}</b>
<b>Explanation</b>	This error message is shown in case of compilation errors while compiling java sources present in Integration Server package.
<b>Action</b>	Fix the compilation issue.

<b>185I</b>	<b>Successfully stored the password entry.</b>
<b>186I</b>	<b>Successfully retrieved the password.</b>
<b>187I</b>	<b>Successfully deleted the password entry.</b>
<b>188I</b>	<b>Successfully retrieved the list of password handles.</b>
<b>189I</b>	<b>Successfully updated the password entry.</b>
<b>190E</b>	<b>Existing password does not match the specified old password.</b>
<b>Explanation</b>	The specified old password does not match the password handle.
<b>Action</b>	Supply the correct existing password.
<b>191E</b>	<b>Password handle {0} does not exist.</b>
<b>Explanation</b>	An error occurred while retrieving the password entry for the password handle.
<b>Action</b>	Supply a valid password handle.
<b>192E</b>	<b>An error occurred while listing password handles.</b>
<b>Explanation</b>	An error occurred while getting the list of available password handles from the password store.
<b>Action</b>	Check the Integration Server logs for more details.
<b>193E</b>	<b>An error occurred while storing the password entry for handle {0}.</b>
<b>Explanation</b>	An error occurred while storing the entry for the specified handle and password values.
<b>Action</b>	Check the Integration Server logs for more details.
<b>194</b>	<b>An error occurred while deleting the password entry for handle {0}.</b>
<b>Explanation</b>	An error occurred while deleting the password entry for the supplied password handle.
<b>Action</b>	Check the Integration Server logs for more details.

<b>195E</b>	<b>The current user is not authorized to access password store operations.</b>
<b>Explanation</b>	Only an authorized user can perform create/delete/update/fetch operations on password stores.
<b>Action</b>	Obtain the proper authorization.
<b>DEP.0000.1205E</b>	<b>Repository-based deployment does not support the simulate operation for the mapped target servers.</b>
<b>Explanation</b>	Repository-based projects do not support simulate operations for the mapped target servers.
<b>Action</b>	Perform Deploy operation.
<b>DEP.0001.0002E</b>	<b>Deployer could not connect to server aliases {0}. Make sure the server alias information is correct and the server is running.</b>
<b>Explanation</b>	Deployer could not connect to the specified server when executing the CreateBuild command-line script.
<b>Action</b>	Make sure the connection information specified to the script is correct and that the server is running.
<b>DEP.0001.0003E</b>	<b>You are not authorized to extract the {0} project. Ask an administrator or user that has build authorization for the project to perform this task, or ask an administrator to update the authorization for the specified project to give you build authorization.</b>
<b>Explanation</b>	You do not have build authority for the specified project.
<b>Action</b>	Ask an administrator or user that has build authorization for the project to perform this task or ask an administrator to update the authorization for the specified project to give you build authorization.
<b>DEP.0001.0005E</b>	<b>Error checking authorization: {0}. Make sure the service exists and the permissions for the service are adequate to allow execution of the service.</b>
<b>Explanation</b>	An error occurred while invoking the wm.deployer.authorization:isAuthorized service on the Integration Server that is running Deployer.
<b>Action</b>	Make sure the service exists and the permissions for the service are adequate to allow execution of the service.
<b>DEP.0001.0006E</b>	<b>Error writing project file into build file {0}. Make sure there is sufficient disk space, memory, and operating system privileges.</b>
<b>Explanation</b>	An error occurred while trying to write the project file in the build archive file.
<b>Action</b>	Make sure there is sufficient disk space, memory, and that you have the proper operating system privileges.

<b>DEP.0001.0007E</b>	<b>Error writing properties file into build file {0}. Ensure that the project name was correctly specified and that there is sufficient disk space, memory, and operating system privileges.</b>
<b>Explanation</b>	An error occurred while attempting to write the build properties file in the build archive file.
<b>Action</b>	Ensure there is sufficient disk space, memory, and operating system privileges.
<b>DEP.0001.0008E</b>	<b>Error closing build file {0}. Make sure there is sufficient disk space, memory, and operating system privileges to close the build file.</b>
<b>Explanation</b>	An error occurred while attempting to close the build file.
<b>Action</b>	Make sure there is sufficient disk space, memory, and operating system privileges to close the build file.
<b>DEP.0001.0009E</b>	<b>Error creating build report {0}. Make sure there is sufficient disk space, memory, and operating system privileges to create a build report.</b>
<b>Explanation</b>	An error occurred when attempting to create a build report.
<b>Action</b>	Make sure there is sufficient disk space, memory, and operating system privileges to create a build report.
<b>DEP.0001.0010E</b>	<b>Error during extraction: {0}</b>
<b>Explanation</b>	An error occurred while attempting to create a build for a project. The extraction error can be any error that occurred when attempting to create a build. This error can be caused by an object that is listed in the project, but does not exist on the source system.
<b>Action</b>	Ensure that all objects listed in the project exist on the source system.
<b>DEP.0001.0011E</b>	<b>Error extracting IS package {0}: {1}. Make sure the service exists and that the permissions are adequate to allow execution of the service.</b>
<b>Explanation</b>	An error occurred while invoking the <code>wm.deployer.resource.extractor.is:extractPackage</code> service.
<b>Action</b>	Make sure the service exists and that the permissions are adequate to allow execution of the service.
<b>DEP.0001.0012E</b>	<b>Error extracting IS ACL(s) on source system {0}: {1}. Make sure the service exists and the permissions are adequate to allow execution of the service.</b>
<b>Explanation</b>	An error occurred while invoking the <code>wm.deployer.resource.extractor.is:extractAcls</code> service on the specified source system.
<b>Action</b>	Make sure the service exists and that the permissions are adequate to allow execution of the service.

<b>DEP.0001.0013E</b>	<b>Integration Server ACL {0} does not exist on the source system.</b>
<b>Explanation</b>	The identified asset does not exist on the source system.
<b>Action</b>	Either remove the asset from the project or add it to the source system.
<b>DEP.0001.0014E</b>	<b>Deployer encountered the following error while extracting Integration Server users from source system {0}: {1}</b>
<b>Explanation</b>	An error occurred while invoking the wm.deployer.resource.extractor.is:extractUsers service on the specified source system.
<b>Action</b>	Make sure the service exists and that you have the proper permissions to execute the service.
<b>DEP.0001.0015E</b>	<b>The Integration Server user account {0} does not exist on the source system. Either remove the user account from the project or create it on the source system.</b>
<b>Explanation</b>	The identified IS user account does not exist on the source system.
<b>Action</b>	Either remove the user account from the project or create it on the source system.
<b>DEP.0001.0016E</b>	<b>Deployer encountered the following error while extracting Integration Server groups from source system {0}: {1}</b>
<b>Explanation</b>	An error occurred while invoking the wm.deployer.resource.extractor.is:extractGroups service on the specified source system.
<b>Action</b>	Make sure the service exists and that the permissions are adequate to allow execution of the service.
<b>DEP.0001.0017E</b>	<b>The Integration Server group {0} does not exist on the source system. Either remove the group from the project or create the group on the source system.</b>
<b>Explanation</b>	The identified Integration Server group does not exist on the source system.
<b>Action</b>	Either remove the group from the project or create the group on the source system.
<b>DEP.0001.0018E</b>	<b>Deployer encountered the following error while extracting Integration Server ports from source system {0}: {1}</b>
<b>Explanation</b>	An error occurred while invoking the wm.deployer.resource.extractor.is:extractPorts service on the specified source system.
<b>Action</b>	Make sure the service exists and the permissions are adequate to allow execution of the service.

<b>DEP.0001.0020E</b>	<b>Deployer encountered the following error while extracting Integration Server scheduled service {0} ({1}) from source system {2}: {3}</b>
<b>Explanation</b>	An error occurred while invoking the pub.scheduler:getTaskInfo service on the specified source system.
<b>Action</b>	Make sure the service exists and the permissions are adequate to allow execution of the service. If the error message indicates that the scheduled service is not on the source system, either remove the scheduled service from the project or add it to the source system.
<b>DEP.0001.0021E</b>	<b>Deployer encountered the following error while extracting assets from Trading Networks from source system {0}: {1}</b>
<b>Explanation</b>	An error occurred while invoking the wm.tn.admin:exportData service on the specified source Trading Networks system.
<b>Action</b>	Make sure the source Trading Networks system is running, the service exists, and the permissions are adequate to allow execution of the service.
<b>DEP.0001.0035E</b>	<b>Error invoking service "{0}".</b>
<b>Explanation</b>	An error occurred invoking a service on the Integration Server that is running Deployer.
<b>Action</b>	Verify that the service exists and that the permissions are adequate to execute the service. For more information, see the Integration Server error message in the Integration Server error log.
<b>DEP.0001.0036E</b>	<b>An error occurred while invoking service "{0}" on system "{1}".</b>
<b>Explanation</b>	An error occurred while invoking a service on a remote system.
<b>Action</b>	Verify that the service exists and that the permissions are adequate to execute the service. For more information, see the Integration Server error message in the Integration Server error log.
<b>DEP.0001.0038E</b>	<b>Project {0} is empty; it does not contain any assets to extract. Use the Deployer user interface to add assets to the project.</b>
<b>Explanation</b>	The specified project does not contain any assets to extract.
<b>Action</b>	Use the Deployer user interface to add assets to the project.

<b>DEP.0001.0039E</b>	<b>The following source servers are currently unavailable: {0}. Check your network connection and make sure the source servers are running.</b>
<b>Explanation</b>	The source servers are not responding to a ping. To ping a server, Deployer executes services as follows: <ul style="list-style-type: none"> <li>- For an Integration Server system, Deployer uses the wm.server:ping service.</li> <li>- For a Trading Networks system, Deployer uses the wm.tn:ping service.</li> <li>- For any other system, Deployer uses the ping plug-in Web service.</li> </ul>
<b>Action</b>	Check the network connection and make sure the source servers are running.
<b>DEP.0001.0041E</b>	<b>Deployment set {0} has unresolved dependencies and could result in an incomplete deployment. Use the Deployer user interface to resolve the dependencies</b>
<b>Explanation</b>	The deployment set has unresolved dependencies and could result in an incomplete deployment.
<b>Action</b>	Use the Deployer user interface to resolve the dependencies.
<b>DEP.0001.0042E</b>	<b>Integration Server package files {0} do not exist. Use the Deployer user interface to verify and edit the list of files for the package.</b>
<b>Explanation</b>	The list of files specified for the package do not exist.
<b>Action</b>	Use the Deployer user interface to verify and edit the list of files for the package.
<b>DEP.0001.0043E</b>	<b>Integration Server package {0} does not exist on the source system. Either remove the package from the project or add it to the source system.</b>
<b>Explanation</b>	The identified Integration Server package does not exist on the source system.
<b>Action</b>	Either remove the package from the project or add it to the source system.
<b>DEP.0001.0044E</b>	<b>Deployer encountered the following error while extracting assets from {0} on source system {1}: {2}</b>
<b>Explanation</b>	An error occurred while invoking the Deployer plug-in web service getObjects on the specified source system.
<b>Action</b>	Make sure the source system is running, the service exists, and the permissions are adequate to execute the service.

<b>DEP.0001.0045E</b>	<b>Build file {0} does not contain a properties file. Build cannot load because the file is incomplete. Make sure the build file is not corrupted and has not been manually updated.</b>
<b>Explanation</b>	Build cannot load because the file is incomplete.
<b>Action</b>	Make sure the build file is not corrupted and has not been manually updated.
<b>DEP.0001.0053E</b>	<b>Integration Server port {0} does not exist on the source system and was not extracted into the build. Make sure the port exists in the source system.</b>
<b>Explanation</b>	The Integration Server port was not extracted into the build.
<b>Action</b>	Make sure the port exists in the source system.
<b>DEP.0001.0054E</b>	<b>The Integration Server scheduled service does not exist on source system {0}: {1}</b>
<b>Explanation</b>	The scheduled service does not exist on the source server.
<b>Action</b>	Either remove the scheduled service from the project or add it to the source system.
<b>DEP.0001.0068E</b>	<b>Deployer encountered the following error while extracting Integration Server package {0} node ACLs: {1}</b>
<b>Explanation</b>	Error when executing the <code>wm.deployer.resource.gui.IS:getTypedPackageContents</code> service.
<b>Action</b>	Make sure the service exists on the Integration Server and the user has the necessary privileges to execute the service.
<b>DEP.0001.0069E</b>	<b>Error writing to the build file {0}. Make sure the build file exists, that it has read/write permission, and that the file system has adequate space.</b>
<b>Explanation</b>	An error occurred while trying to write to the build file.
<b>Action</b>	Read the error message to determine the possible causes. Make sure the build file exists, that it has read/write permission, and there is adequate space for it on the file system.
<b>DEP.0001.0070E</b>	<b>Trading Networks field group {0} does not exist on the specified source Trading Networks system. Either remove the profile field group from the project or add it to the source Trading Networks system.</b>
<b>Explanation</b>	The identified Trading Networks profile field group does not exist on the specified source Trading Networks system.
<b>Action</b>	Either remove the profile field group from the project or add it to the source Trading Networks system.

<b>DEP.0001.0071E</b>	<b>Trading Networks field definition {0} does not exist on the source Trading Networks system. Either remove the profile field definition from the project or add it to the source Trading Networks system.</b>
<b>Explanation</b>	The identified Trading Networks profile field definition does not exist on the source Trading Networks system.
<b>Action</b>	Either remove the profile field definition from the project or add it to the source Trading Networks system.
<b>DEP.0001.0072E</b>	<b>Trading Networks Profile {0} does not exist on the source Trading Networks system. Either remove the profile from the project or add it to the source Trading Networks system.</b>
<b>Explanation</b>	The identified Trading Networks profile does not exist on the source Trading Networks system.
<b>Action</b>	Either remove the profile from the project or add it to the source Trading Networks system.
<b>DEP.0001.0073E</b>	<b>Trading Networks TPA {0} does not exist on the source Trading Networks system. Either remove the TPA from the project or add it to the source Trading Networks system.</b>
<b>Explanation</b>	The identified Trading Networks trading partner agreement (TPA) does not exist on the source Trading Networks system.
<b>Action</b>	Either remove the TPA from the project or add it to the source Trading Networks system.
<b>DEP.0001.0074E</b>	<b>Trading Networks document attribute {0} does not exist on the source Trading Networks system. Either remove the document attribute from the project or add it to the source Trading Networks system.</b>
<b>Explanation</b>	The identified Trading Networks document attribute does not exist on the source Trading Networks system.
<b>Action</b>	Either remove the document attribute from the project or add it to the source Trading Networks system.
<b>DEP.0001.0075E</b>	<b>Trading Networks document type {0} does not exist on the source Trading Networks system. Either remove the Trading Networks document type from the project or add it to the source Trading Networks system.</b>
<b>Explanation</b>	The identified Trading Networks document type does not exist on the source Trading Networks system.
<b>Action</b>	Either remove the Trading Networks document type from the project or add it to the source Trading Networks system.

**DEP.0001.0076E**      **Trading Networks processing rule {0} does not exist on the Trading Networks source system. Either remove the processing rule from the project or add it to the source Trading Networks system.**

**Explanation**      The identified Trading Networks processing rule does not exist on the Trading Networks source system.

**Action**            Either remove the processing rule from the project or add it to the source Trading Networks system.

**DEP.0001.0077E**      **Trading Networks external ID type {0} does not exist on the source Trading Networks system. Either remove the external ID type from the project or add it to the source Trading Networks system.**

**Explanation**      The identified Trading Networks external ID type does not exist on the source Trading Networks system.

**Action**            Either remove the external ID type from the project or add it to the source Trading Networks system.

**DEP.0001.0078E**      **Trading Network contact type {0} does not exist on the source Trading Networks system. Either remove the contact type from the project or add it to the source Trading Networks system.**

**Explanation**      The identified Trading Networks contact type does not exist on the source Trading Networks system.

**Action**            Either remove the contact type from the project or add it to the source Trading Networks system.

**DEP.0001.0079E**      **Trading Networks binary type {0} does not exist on the source Trading Networks system. Either remove the binary type from the project or add it to the source Trading Networks system.**

**Explanation**      The identified Trading Networks binary type does not exist on the source Trading Networks system.

**Action**            Either remove the binary type from the project or add it to the source Trading Networks system.

**DEP.0001.0080E**      **Trading Networks profile group {0} does not exist on the source Trading Networks system. Either remove the profile group from the project or add it to the source Trading Networks system.**

**Explanation**      The identified Trading Networks profile group does not exist on the source Trading Networks system.

**Action**            Either remove the profile group from the project or add it to the source Trading Networks system.

---

<b>DEP.0001.0081E</b>	<b>Trading Networks extended field {0} for profile {1} does not exist on the source Trading Networks system for the specified profile. Either remove the extended field from the project or add it to the appropriate profile in the source Trading Networks system.</b>
<b>Explanation</b>	The identified Trading Networks extended field does not exist on the source Trading Networks system for the specified profile.
<b>Action</b>	Either remove the extended field from the project or add it to the appropriate profile in the source Trading Networks system.
<b>DEP.0001.0082E</b>	<b>Trading Networks security data item {0} does not exist on the source Trading Networks system. Either remove the security data item from the project or add it to the source Trading Networks system.</b>
<b>Explanation</b>	The identified Trading Networks security data item does not exist on the source Trading Networks system.
<b>Action</b>	Either remove the security data item from the project or add it to the source Trading Networks system.
<b>DEP.0001.0085W</b>	<b>Warning creating build {0}. See build report for details.</b>
<b>Explanation</b>	Deployer issued a warning while creating the build.
<b>Action</b>	Check the build report for details.
<b>DEP.0001.0087E</b>	<b>Deployer encountered the following error while extracting Integration Server extended settings from source system {0}: {1}</b>
<b>Explanation</b>	An error occurred while invoking the <code>wm.deployer.resource.extractor.is:extractExtendedSettings</code> service on the specified source system.
<b>Action</b>	Make sure the service exists and that the permissions are adequate to allow execution of the service.
<b>DEP.0001.0093</b>	<b>Trading Networks queue {0} does not exist on the source system. Either remove the asset from the project or add it to the source system.</b>
<b>Explanation</b>	The identified asset does not exist on the source system.
<b>Action</b>	Either remove the asset from the project or add it to the source system.

<b>DEP.0001.0094E</b>	<b>Integration Server extended setting {0} does not exist on the source server.</b>
<b>Explanation</b>	The indicated extended setting does not exist on the source server.
<b>Action</b>	Either remove the extended setting from the project or add the extended setting to the source server.
<b>DEP.0001.0109</b>	<b>TN processing rule {0} does not exist on the source system. Either remove the asset from the project or add it to the source system.</b>
<b>Explanation</b>	The identified asset does not exist on the source system.
<b>Action</b>	Either remove the asset from the project or add it to the source system.
<b>DEP.0001.0114</b>	<b>TN extended field {0} for profile {1} does not exist on the source system. Either remove the asset from the project or add it to the source system.</b>
<b>Explanation</b>	The identified asset does not exist on the source system.
<b>Action</b>	Either remove the asset from the project or add it to the source system.
<b>DEP.0001.0117</b>	<b>Cannot write to build directory: {0}. The Integration Server user does not have privileges to create or write to a file. Make sure the user has the correct privileges.</b>
<b>Explanation</b>	The Integration Server user does not have privileges to create or write to a file.
<b>Action</b>	Make sure the user has the correct privileges.
<b>DEP.0001.0118</b>	<b>Error writing checkpoint report: {0}. An error occurred while attempting to close the build file. Make sure there is sufficient disk space, memory, and operating system privileges.</b>
<b>Explanation</b>	An error occurred while attempting to close the build file.
<b>Action</b>	Make sure there is sufficient disk space, memory, and operating system privileges.
<b>DEP.0001.0119</b>	<b>IS scheduled service {0} ({1}) does not exist on the source server. Either remove the scheduled service from the project or add it to the source system.</b>
<b>Explanation</b>	The identified asset was not found on the source system.
<b>Action</b>	Either remove the asset from the project or add it to the source system.
<b>DEP.0001.0122</b>	<b>TN DIs {0} does not exist on the source server. Either remove the asset from the project or add it to the source system.</b>
<b>Explanation</b>	The identified asset does not exist on the source system.
<b>Action</b>	Either remove the asset from the project or add it to the source system.

<b>DEP.0001.0125</b>	<b>TN Fp {0} does not exist on the source system.</b>
<b>Explanation</b>	The identified asset does not exist on the source system.
<b>Action</b>	Either remove the asset from the project or add it to the source system.
<b>DEP.0001.0128</b>	<b>TN Archival Service {0} does not exist on the source system.</b>
<b>Explanation</b>	The identified asset does not exist on the source system.
<b>Action</b>	Either remove the asset from the project or add it to the source system.
<b>DEP.0001.0130</b>	<b>The Target Server/Group {0} is not currently available; skipping that Target Server/Group. Check your network connection, and verify that the Target Server/Group is running.</b>
<b>Explanation</b>	Deployer cannot ping a target server or some servers in a target group. This might occur because the servers in question are not running or because of network latency.
<b>Action</b>	Make sure that the servers in question are running.
<b>DEP.0001.0131</b>	<b>{0} {1} {2} does not exist on the source system.</b>
<b>Explanation</b>	The identified objects do not exist on the source system.
<b>Action</b>	Either remove the identified objects from the project or add them to the source system.
<b>DEP.0001.0133</b>	<b>Could not rebuild project {0} because the specific build in the project could not be rebuilt. See the Integration Server logs for more information.</b>
<b>Explanation</b>	Deployer could not migrate the project because the specific build in the project could not be rebuilt.
<b>Action</b>	See the Integration Server logs for more information.
<b>DEP.0001.0135</b>	<b>Deployer could not migrate project {0}. Make sure all source servers specified in project {0} are running. See the Integration Server logs for more information.</b>
<b>Explanation</b>	Deployer could not migrate the project.
<b>Action</b>	See the Integration Server logs for more information.
<b>DEP.0001.0136</b>	<b>Could not migrate projects data. See the Integration Server logs for more information.</b>
<b>Explanation</b>	Deployer was unable to migrate the project data.
<b>Action</b>	See the Integration Server logs for more information.

<b>DEP.0001.0139</b>	<b>Some of the projects could not be migrated. See the Integration Server logs for more information.</b>
<b>Explanation</b>	Deployer could not migrate all projects.
<b>Action</b>	See the Integration Server logs for more information.
<b>DEP.0001.0144E</b>	<b>The source servers hosting the deployment sets are from different releases. Make sure all source servers are from the same release.</b>
<b>Explanation</b>	Deployer issues this message and ends the build process when you modify the version of the source server alias for existing projects.
<b>Action</b>	Make sure all source servers are from the same release.
<b>DEP.0001.0145E</b>	<b>Deployer did not migrate the following target groups because the alias servers were not migrated to the correct version. Change the version of the server alias or target group so that the two match.</b>
<b>Explanation</b>	You migrated a target group to a different version than that of its server alias.
<b>Action</b>	Change the version of the server alias or target group so that the two match.
<b>DEP.0001.0153W</b>	<b>Marked {0} {1} for deletion. The indicated server, or the network connection to that server, is not available. Alternatively, the command-line values for user and password might not be valid on the indicated server. Confirm that the server is running and reachable, and that the user/password values are valid.</b>
<b>Explanation</b>	The indicated server, or the network connection to that server, is not available. Alternatively, the command-line values for user and password might not be valid on the indicated server.
<b>Action</b>	Confirm that the server is running and reachable, and that the user/password values are valid.
<b>DEP.0001.0154W</b>	<b>Streamed file {0} for file {1} in deployment set {3} not found. The Integration Server, or the network connection to that server, might be shut down. Confirm that the server is running and that the network connection is up.</b>
<b>Explanation</b>	The Integration Server, or the network connection to that server, might be shut down.
<b>Action</b>	Confirm that the server is running and that the network connection is up.
<b>DEP.0001.0155</b>	<b>Error while reading streamed file {0} for file {1} in deployment set {3}. See the Integration Server logs for more information.</b>
<b>Explanation</b>	An error occurred while reading the streamed file.
<b>Action</b>	See the Integration Server logs for more information.

<b>DEP.0001.0156</b>	<b>Deployer could not connect to the source server aliases specified in the project. Deployer could not rebuild and upgrade the project {0}. Make sure the server alias information is correct and the servers are running.</b>
<b>Explanation</b>	Deployer could not migrate the project because the specific build in the project could not be rebuilt.
<b>Action</b>	Make sure the source servers for the deployment set in the build are running.
<b>DEP.0001.0158E</b>	<b>Build name {0} contains one or more of the following invalid characters: # &amp; # ; @ ^ ! &amp; # 3 8 ; * : \$ / \ ` ' ; , ~ + = &amp; g t ; &amp; l t ; " Remove the invalid characters from the build name.</b>
<b>Explanation</b>	The build name contains one or more of the following invalid characters: # & @ ^ ! % * : \$ / \ ` ' ; , ~ + = > < \ "
<b>Action</b>	Remove the invalid characters from the build name.
<b>DEP.0001.0159E</b>	<b>Deployer could not migrate the Deployer settings. See the Integration Server logs for more information.</b>
<b>Explanation</b>	Deployer encountered an error while migrating the Deployer settings.
<b>Action</b>	Check the Integration Server logs for more information.
<b>DEP.0001.0161E</b>	<b>Deployer could not migrate settings.</b>
<b>Explanation</b>	Deployer did not receive the settings during migration.
<b>Action</b>	Reload the Deployer package.
<b>DEP.0002.0004E</b>	<b>Project {0} does not contain a deployment set named {1}.</b>
<b>Explanation</b>	The Deployer user interface referenced a deployment set name that is not recognized by the Deployer. Another Deployer session might have deleted this deployment set, or the project might be corrupted on the file system.
<b>Action</b>	Refresh the page and try again. If the same error occurs, this project might be corrupted on the file system and you might have to discard it.
<b>DEP.0002.0006E</b>	<b>Deployer did not find a dependency on component {0} was found.</b>
<b>Explanation</b>	The Deployer user interface attempted to delete a dependency that is not recognized by Deployer. Another Deployer session might have deleted the dependency, or the project might be corrupted on the file system.
<b>Action</b>	Refresh the page and try again. If the same error occurs, this project might be corrupted on the file system and you might have to discard it.

<b>DEP.0002.0007E</b>	<b>Deployer cannot access server alias {0} in deployment set {1}.</b>
<b>Explanation</b>	The Deployer user interface referenced a source server name that is not recognized by Deployer. Another Deployer session might have deleted the source server from the project, or the project might be corrupted on the file system.
<b>Action</b>	Refresh the page and try again. If the same error occurs, this project might be corrupted on the file system and you might have to discard it.
<b>DEP.0002.0008E</b>	<b>Package {0} from server alias {1} does not exist in deployment set {2}.</b>
<b>Explanation</b>	The Deployer user interface referenced a package or server name that is not recognized by Deployer. Another Deployer session might have deleted the package or server name from the project, or the project might be corrupted on the file system.
<b>Action</b>	Refresh the page and try again. If the same error occurs, this project might be corrupted on the file system and you might have to discard it.
<b>DEP.0002.0009E</b>	<b>Server {0} already exists in deployment set {1} as a non-Integration Server server. You cannot add Integration Server objects to it.</b>
<b>Explanation</b>	You passed an incorrect value for the parameter.
<b>Action</b>	Avoid executing the service outside of the Deployer user interface.
<b>DEP.0002.0010E</b>	<b>Package {0} already exists in deployment set {1} as a complete package. Cannot add package components or files to it.</b>
<b>Explanation</b>	You attempted to add package components to a deployment set that already exists on the deployment set.
<b>Action</b>	If you want to include the entire package in a deployment set, no action is necessary because it is already included. If you want the deployment set to contain only a partial package, first remove the entire package from the deployment set before trying to add specific package components.
<b>DEP.0002.0011E</b>	<b>Project {0} already contains a deployment set named {1}. Use a different name for the new deployment set.</b>
<b>Explanation</b>	You attempted to add a deployment set to the specified project, but the project already has a deployment set that uses the same name that you specified.
<b>Action</b>	Use a different name for the new deployment set.

<b>DEP.0002.0012E</b>	<b>Project name {0} contains illegal characters.</b>
<b>Explanation</b>	The project name contains spaces or one or more of the following invalid characters: # & @ ^ ! % * : \$ / \ \ ' ; , ~ + = > < \ "
<b>Action</b>	Specify another name for the project that does not include the illegal characters.
<b>DEP.0002.0013E</b>	<b>Could not complete project copy due to file system error. Check your Integration Server's disk space. If you believe there is sufficient space, try the copy again. As a final option, manually recreate the project.</b>
<b>Explanation</b>	Deployer encountered an error writing the project to disk.
<b>Action</b>	Check your Integration Server's disk space. If you believe there is sufficient space, try the copy again. As a final option, manually recreate the project.
<b>DEP.0002.0014E</b>	<b>Project {0} already exists. Use a different, unique name for the new project.</b>
<b>Explanation</b>	A project with the name you specified already exists.
<b>Action</b>	Use a different, unique name for the new project.
<b>DEP.0002.0015E</b>	<b>Deployer was unable to invoke service {0}.</b>
<b>Explanation</b>	Deployer was unable to find the specified Integration Server service.
<b>Action</b>	Determine whether a required Integration Server package is disabled, missing, or whether parts are missing. Check for the following packages: WmDeployer, WmAdmin, WmRoot, WmDeployerResource, and WmModeler.
<b>DEP.0002.0016E</b>	<b>Unable to delete build {0}. The build file is probably in use. This file exists in the &lt;serverDirectory&gt;/packages/WmDeployer/persist/projects/&lt;YourProjectName&gt;/builds directory. Locate the process that is accessing this file and stop it. Then try to delete the build again.</b>
<b>Explanation</b>	Deployer was unable to delete the specified build file.
<b>Action</b>	The build file is probably in use. This file exists in the <serverDirectory>/packages/WmDeployer/persist/projects/<YourProjectName>/builds directory. Locate the process that is accessing this file and stop it. Then try to delete the build again.
<b>DEP.0002.0017E</b>	<b>Project {0} does not contain a build named {1}.</b>
<b>Explanation</b>	The Deployer user interface referenced a build name that is not recognized by Deployer. Another Deployer session might have deleted this build, or the project might be corrupted on the file system.
<b>Action</b>	Refresh the page and try again. If the same error occurs, this project might be corrupted on the file system and you might have to discard it.

<b>DEP.0002.0018E</b>	<b>Deployer could not load build {0}.</b>
<b>Explanation</b>	The build file is corrupted.
<b>Action</b>	Use Windows Explorer to locate the <serverDirectory>\packages\WmDeployer\persist\projects\<YourProjectName>\builds directory and manually remove the corrupted build file. Then use Deployer to rebuild.
<b>DEP.0002.0019E</b>	<b>Deployment map {0} already exists in project {1}.</b>
<b>Explanation</b>	You attempted to create a deployment map with the same name as an existing deployment map.
<b>Action</b>	Use a different name for the new deployment map.
<b>DEP.0002.0020E</b>	<b>Deployment map {0} does not exist in project {1}.</b>
<b>Explanation</b>	The Deployer user interface referenced a deployment map name that is not recognized by the Deployer. Another Deployer session might have deleted this deployment map, or the project on the file system might be corrupted.
<b>Action</b>	Refresh the page and try again. If the same error occurs, this project might be corrupted on the file system and you might have to discard it.
<b>DEP.0002.0021E</b>	<b>Deployer could not load deployment map {0} from project {1}.</b>
<b>Explanation</b>	The deployment map file is corrupted.
<b>Action</b>	Use Windows Explorer to locate the <serverDirectory>\packages\WmDeployer\persist\projects\<YourProjectName>\targets directory and manually remove your deployment candidate file. Then use Deployer to recreate it.
<b>DEP.0002.0026E</b>	<b>Deployer could not save deployment map {0}.</b>
<b>Explanation</b>	Deployer encountered an error writing to disk.
<b>Action</b>	Check your Integration Server's disk space. If you believe there should be sufficient space, try to save again. If this is not successful, try one or both of the following:  Restart the server.  Recreate the deployment map.

---

<b>DEP.0002.0028E</b>	<b>Deployment set {0} is not mapped to target {1}.</b>
<b>Explanation</b>	The Deployer user interface referenced a deployment set name that is not recognized by the Deployer. Another Deployer session might have deleted this deployment set, or the project might be corrupted on the file system.
<b>Action</b>	Refresh the page and try again. If the same error occurs, this project might be corrupted on the file system and you might have to discard it.
<b>DEP.0002.0031</b>	<b>Could not invoke service {0} remotely.</b>
<b>Explanation</b>	An integration service invocation failed.
<b>Action</b>	Ensure that the Integration Server is running and that the service exists on that Integration Server. Also ensure that you have the proper privileges to execute the service.
<b>DEP.0002.0032E</b>	<b>Server Alias cannot be blank.</b>
<b>Explanation</b>	You left the required Server Alias field blank.
<b>Action</b>	Specify a value for the Server Alias field and try again.
<b>DEP.0002.0054E</b>	<b>The value specified for the task parameter is not valid.</b>
<b>Explanation</b>	You passed an incorrect value for the task parameter. The task must be either DEFINE, MAP, EXTRACT, DEPLOY, or VIEW.
<b>Action</b>	Avoid executing the service outside of the Deployer user interface.
<b>DEP.0002.0058E</b>	<b>Deployer cannot perform export operation because the file {0} already exists under WmDeployer/outbound</b>
<b>Explanation</b>	You attempted to export a build with the same name as an existing build.
<b>Action</b>	Use a different name when you export the build.
<b>DEP.0002.0059E</b>	<b>The Deployer import map file {0} is not accessible or does not exist.</b>
<b>Explanation</b>	You attempted to import a build that does not exist.
<b>Action</b>	Refresh the Import Build page and try again.
<b>DEP.0002.0060E</b>	<b>User is not authorized to export builds from project {0}.</b>
<b>Explanation</b>	You are not authorized to export builds for the specified project. You must have build authorization for the project.
<b>Action</b>	Ask an administrator or user that has build authorization for the project to perform this task or have an administrator assign you build authorization.

- DEP.0002.0061E**      **User is not authorized to import builds to project {0}.**  
**Explanation**      You are not authorized to import builds for the specified project. You must have build authorization for the project.  
**Action**              Ask an administrator or user that has build authorization for the project to perform this task or have an administrator assign you build authorization.
- DEP.0002.0064E**      **Deployment set {0} already exists in project {1}.**  
**Explanation**      You attempted to create a deployment set in a project that already contains a deployment set of the same name.  
**Action**              Use a different name for the new deployment set.
- DEP.0002.0065E**      **Deployer encountered an error and did not save deployment {0}.**  
**Explanation**      Deployer encountered an error while writing to disk.  
**Action**              Check your Integration Server's disk space. If you believe there should be sufficient space, try to save again. If Deployer still cannot save the deployment, restart the server or recreate the deployment candidate.
- DEP.0002.0067E**      **Deployment candidate {0} does not exist in project {1}.**  
**Explanation**      The Deployer user interface referenced a deployment candidate that is not recognized by Deployer. Another Deployer session might have deleted the deployment candidate, or the project might be corrupted on the file system.  
**Action**              Refresh the page and try again. If the same error occurs, this project might be corrupted on the file system and you might have to discard it.
- DEP.0002.0068E**      **Unable to delete deployment map {0}.**  
**Explanation**      Deployer was unable to delete the specified deployment map file.  
**Action**              The deployment map file is probably in use. This file exists in the <serverDirectory>\packages\WmDeployer\persist\projects\<YourProjectName>\targets directory. Locate the process that is accessing this file and stop it. Then try to delete the deployment candidate again.
- DEP.0002.0069E**      **Unable to delete deployment candidate {0}.**  
**Explanation**      Deployer was unable to delete the deployment candidate file.  
**Action**              The deployment candidate file is probably in use. This file exists in the <serverDirectory>\packages\WmDeployer\persist\projects\<YourProjectName>\deployments directory. Locate the process that is accessing this file and stop it. Then try to delete the deployment candidate again.

<p>DEP.0002.0072E</p> <p><b>Explanation</b></p> <p><b>Action</b></p>	<p><b>Deployer could not load deployment {0} from project {1}.</b></p> <p>The deployment candidate file is corrupted.</p> <p>Use Windows Explorer to locate to the &lt;serverDirectory&gt;\packages\WmDeployer\persist\projects\&lt;YourProjectName&gt;\deployments directory and manually remove the deployment candidate file. Then use Deployer to recreate it.</p>
<p>DEP.0002.0073E</p> <p><b>Explanation</b></p> <p><b>Action</b></p>	<p><b>Deployer could not add component {0} of type {1}.</b></p> <p>Deployer does not recognize the specified Integration Server component.</p> <p>Rather than attempting to add the component to the project, add the files that comprise the component (example, "ns" directory). You can also try adding the entire package rather than individual components of the package.</p>
<p>DEP.0002.0075E</p> <p><b>Explanation</b></p> <p><b>Action</b></p>	<p><b>When you specify "deploymentName", you cannot specify additional arguments .</b></p> <p>You specified incorrect arguments when running the deploy.bat or deploy.sh script.</p> <p>The deploy script can either reference an existing deployment candidate or create a new deployment candidate. When you specify the "deploymentName" argument to reference an existing deployment candidate do not supply other arguments.</p>
<p>DEP.0002.0076E</p> <p><b>Explanation</b></p> <p><b>Action</b></p>	<p><b>When you specify "newDeploymentName", "buildName" and "deploymentMapName" are required.</b></p> <p>You specified incorrect arguments for the deploy.bat or deploy.sh script.</p> <p>You can specify the deploy script to either reference an existing deployment candidate or to create a new deployment candidate. If you use the "newDeploymentName" argument to create a new deployment candidate, you must also specify the "buildName" and "deploymentMapName" arguments.</p>
<p>DEP.0002.0077E</p> <p><b>Explanation</b></p> <p><b>Action</b></p>	<p><b>You are not authorized to modify the project definition.</b></p> <p>You are not authorized to define a project.</p> <p>Ask an administrator or user that has define authorization to perform the action for you or have an administrator assign you define authorization.</p>
<p>DEP.0002.0078E</p> <p><b>Explanation</b></p> <p><b>Action</b></p>	<p><b>You are not authorized to modify the project target mapping.</b></p> <p>You are not authorized to map a project.</p> <p>Ask an administrator or user that has map authorization to perform the action for you or have an administrator assign you map authorization.</p>

- DEP.0002.0079E**      **You are not authorized to modify project deployments.**  
**Explanation**      You are not authorized to deploy a project.  
**Action**              Ask an administrator or user that has deploy authorization to perform the action for you or have an administrator assign you deploy authorization.
- DEP.0002.0080E**      **You are not authorized to remove project builds.**  
**Explanation**      You are not authorized to build a project.  
**Action**              Ask an administrator or user that has build authorization to perform the action for you or have an administrator assign you build authorization.
- DEP.0002.0081E**      **Deployer cannot delete build {0} because it is being used by deployment candidate {1}.**  
**Explanation**      You attempted to delete a build that is referenced by a deployment candidate.  
**Action**              Delete or modify the deployment candidate that references the build or do not delete this build.
- DEP.0002.0082E**      **Deployer cannot delete deployment map {0} because it is being used by deployment candidate {1}.**  
**Explanation**      You attempted to delete a deployment map that is referenced by another deployment candidate.  
**Action**              Delete or modify the deployment candidate that references the deployment map.
- DEP.0002.0083E**      **Deployer encountered the following exception while parsing project {0}: {1}**  
**Explanation**      An exception occurred while trying to load the project. The exception be due to an input/output error.  
**Action**              Review the exception message to determine the cause of the error.
- DEP.0002.0085E**      **Deployer could not add package {0} to the deployment set.**  
**Explanation**      Deployer was unable to determine which components in the package were available for variable substitution. The problem might be that the source Integration Server was temporarily unavailable.  
**Action**              Check the Integration Server Error log to determine the reason that Deployer was unable to access information about the package components.

<b>DEP.0002.0086E</b>	<b>Deployment map {0} in project {1} is corrupted and must be removed. It references deployment set {2} which does not exist.</b>
<b>Explanation</b>	The deployment map file is corrupted.
<b>Action</b>	Use Windows Explorer to locate the <serverDirectory>\packages\WmDeployer\persist\projects\<YourProjectName>\targets directory and manually remove the deployment map file. Then use Deployer to recreate it.
<b>DEP.0002.0087E</b>	<b>Deployer cannot remove deployment set {0}. It is referenced by deployment map {1}.</b>
<b>Explanation</b>	You attempted to delete a deployment set that is being referenced by a deployment map.
<b>Action</b>	Perform one of the following: <ul style="list-style-type: none"> <li>- Delete or modify the deployment map that references the deployment set.</li> <li>- Do not delete the deployment set.</li> </ul>
<b>DEP.0002.0089E</b>	<b>Deployer could not save adapter connection metadata for project {0}</b>
<b>Explanation</b>	The project is corrupted.
<b>Action</b>	Retry the last action taken on the deployment project. If the action is unsuccessful, create a new project.
<b>DEP.0002.0092E</b>	<b>Deployer cannot update package {0} version in the deployment set.</b>
<b>Explanation</b>	Deployer was unable to access the specified package on the server.
<b>Action</b>	Retry the action. If the action is unsuccessful, investigate why Deployer is unable to locate the specified package on the remote server. If the package appears to be available on the remote server, shut down the Deployer window (as well as the window that launched Deployer) and restart the browser.
<b>DEP.0002.0093E</b>	<b>Both the {0} and the {1} Deployer plug-ins contain the Deployer plug-in type {2}.</b>
<b>Explanation</b>	More than one plug-in for the same type of deployment asset has been detected. This indicates a problem with the configuration of the Deployer.
<b>Action</b>	Update the configuration of the Deployer to remove extraneous plug-ins for the same type of deployment asset. Alternatively, you can uninstall, then reinstall Deployer.

<b>DEP.0002.0096E</b>	<b>Deployer is currently unable to access Trading Networks system: {0}.</b>
<b>Explanation</b>	No data was returned from the specified Trading Networks server. This indicates that the Trading Networks server is not accessible.
<b>Action</b>	Ensure that the Trading Networks server is accessible over the network and that you have correctly configured the server alias.
<b>DEP.0002.0097E</b>	<b>Deployer is currently unable to access target system: {0}.</b>
<b>Explanation</b>	The target Trading Networks Server is not available. The server did not respond to a server ping.
<b>Action</b>	Ensure that the Trading Networks Server is accessible over the network and that you have correctly configured the server alias for the Trading Networks server.
<b>DEP.0002.0098E</b>	<b>Deployer cannot check target cluster configuration. The target is missing the Deployer resource package. This can be installed from the Servers &gt; IS &amp; TN screen.</b>
<b>Explanation</b>	An error occurred while Deployer attempted to access a service on the target WmDeployerResource package.
<b>Action</b>	Install the current version of WmDeployerResource package on the target server.
<b>DEP.0002.0099E</b>	<b>Cluster node details not available.</b>
<b>Explanation</b>	An error occurred when the Deployer attempted to access a service on the target WmDeployerResource package.
<b>Action</b>	Install the current version of the WmDeployerResource package on the target server. Also, ensure that the target server is running and that Deployer can access it over the network.
<b>DEP.0002.0101E</b>	<b>The source servers hosting the deployment sets are different versions.</b>
<b>Explanation</b>	The source servers hosting the deployment sets are different versions.
<b>Action</b>	Modify the source servers to use the same versions.
<b>DEP.0002.0102E</b>	<b>The target server or target group is a different version than the project source. Select servers that use the same version.</b>
<b>Explanation</b>	Deployer issues this error message when you add a target server or target group to a deployment map and the version of the target server or group is different than that of the project source server.
<b>Action</b>	Use a target server or target group that is the same version as the project source server.

<b>DEP.0002.0106E</b>	<b>Dependencies may not contain the \$ character.</b>
<b>Explanation</b>	You added a manual dependency that contains the \$ character.
<b>Action</b>	Remove the \$ character.
<b>DEP.0002.0109E</b>	<b>Failed to install resource package on Integration Server {0}: {1}</b>
<b>Explanation</b>	Deployer is trying to install the WmDeployerResource package on the IntegrationServer indicated by <serverName>, but the attempt failed. The <exceptionMessage> provides more information.
<b>Action</b>	Make sure the server is running and connected to the network, and that the system has sufficient disk space, memory, and necessary operating system privileges.
<b>DEP.0002.0110E</b>	<b>Deployer could not locate resource package {0}. Make sure the WmDeployerResource package has been installed on the Integration Server that hosts Deployer and that the system has sufficient disk space, memory, and the necessary operating system privileges.</b>
<b>Explanation</b>	An error occurred when the Deployer tried to locate the WmDeployerResource package. The <exceptionMessage> provides information about why that attempt failed. The resource package might not exist on your Integration Server or might require more memory.
<b>Action</b>	Make sure the WmDeployerResource package has been installed on the Integration Server that hosts Deployer and that the system has sufficient disk space, memory, and the necessary operating system privileges.
<b>DEP.0002.0112</b>	<b>Unable to import the XML document {0} nl{1}. The XML file you passed in either the import map or the import varsub flow is invalid. Correct the XML file as necessary.</b>
<b>Explanation</b>	The XML file you passed in either the import map or the import varsub flow is invalid.
<b>Action</b>	Correct the XML file as necessary.
<b>DEP.0002.0114</b>	<b>Input XML varsub information is not valid. It might contain an asset type for which varsub is not supported. Validate the XML file against the wm.deployer.flows:DeploymentMap_Definition or wm.deployer.flows:Varsub_Definition XSD.</b>
<b>Explanation</b>	The varsub XML file is not valid. It might contain an asset type for which varsub is not supported. The assets for which varsub is supported are AdapterConnection, ScheduledService, ExtendedSettings, Port, AdapterNotification, AdapterListener, eform, and webServiceDescriptor.
<b>Action</b>	Validate the XML file against the wm.deployer.flows:DeploymentMap_Definition or wm.deployer.flows:Varsub_Definition XSD.

<b>DEP.0002.0116</b>	<b>Exporting of map {0} failed; the exported map file already exists in the WmDeployer/replicate/inbound folder. Make a backup of the map file in another location, delete the map file from the inbound folder, and then export the map file again.</b>
<b>Explanation</b>	The exported map file already exists in the WmDeployer/replicate/inbound folder.
<b>Action</b>	Make a backup of the map file in another location, delete the map file from the inbound folder, and then export the map file again.
<b>DEP.0002.0118</b>	<b>Importing of map {0} failed. Make sure the <code>wm.deployer.gui.UITarget:addMapSetToProject</code> service exists and that the user has the necessary privileges for executing the service, and then try again.</b>
<b>Explanation</b>	This error might occur for no specific reason.
<b>Action</b>	Make sure the <code>wm.deployer.gui.UITarget:addMapSetToProject</code> service exists and that the user has the necessary privileges for executing the service, and then try again.
<b>DEP.0002.0119</b>	<b>Deployment map {0} already exists in project {1} and cannot be overwritten.</b>
<b>Explanation</b>	You attempted to import a map file for a map that already exists.
<b>Action</b>	Delete the existing map and then import the map. If you need a backup of the existing map export the map and store it in a different location.
<b>DEP.0002.0120</b>	<b>Unable to list remote server aliases.</b>
<b>Explanation</b>	This error might occur for no specific reason.
<b>Action</b>	Make sure the <code>wm.deployer.Util:listAliases</code> service exists and the user has the necessary privileges for executing the service. then try again.
<b>DEP.0002.0121</b>	<b>Unable to list target group aliases.</b>
<b>Explanation</b>	This error might occur for no specific reason.
<b>Action</b>	Make sure the <code>wm.deployer.gui.UITargetGroup:listTargetGroups</code> service exists and the user has the necessary privileges for executing the service. Then try again.
<b>DEP.0002.0124</b>	<b>Deployment set {0} is not valid for project {1}.</b>
<b>Explanation</b>	One or more deployment sets defined in the map file you are importing are not included in the project definition.
<b>Action</b>	Make sure the map file you are trying to import is consistent with the define step of the project.

<b>DEP.0002.0125</b>	<b>The target server {0} is not valid for plugin type {1}. Either define the target server alias on the Deployer where you are trying to import the map file or remove the target server alias from the exported map file.</b>
<b>Explanation</b>	This error is shown when you attempt to import a map file that contains a target server alias that is not defined on that Deployer.
<b>Action</b>	Either define the target server alias on the Deployer where you are trying to import the map file or remove the target server alias from the exported map file.
<b>DEP.0002.0126</b>	<b>The target group {0} is not valid for plugin type {1}. Define the target group on the Deployer where you are trying to import the map file or else remove the target group from the exported map file.</b>
<b>Explanation</b>	This error is shown when you try to import a map file that contains a target group not defined on that Deployer.
<b>Action</b>	Define the target group on the Deployer where you are trying to import the map file or else remove the target group from the exported map file.
<b>DEP.0002.0129</b>	<b>Either the number passed is not a number or is negative. Enter an integer value for the flag -id for the command --showReport.</b>
<b>Explanation</b>	This error is thrown by the Deployer command line interface for the --showReport command. The --showReport command requires an integer value for the flag -id. If an integer is not entered for this flag then the above error is thrown.
<b>Action</b>	Enter an integer value for the flag -id for the command --showReport.
<b>DEP.0002.0133</b>	<b>Error exporting properties for the project {0}.</b>
<b>Explanation</b>	This error might occur for no specific reason.
<b>Action</b>	Make sure the wm.deployer.gui.UIProject:getFormattedProjectInfo service exists and the user has the necessary privileges for executing the service.
<b>DEP.0002.0135</b>	<b>Error retrieving properties for the project {0}.</b>
<b>Explanation</b>	This error might occur for no specific reason.
<b>Action</b>	Make sure the wm.deployer.gui.UIProject:getFormattedProjectInfo service exists and the user has the necessary privileges for executing the service.
<b>DEP.0002.0136</b>	<b>Unable to import zip file; zip file might be corrupt. Copy the build file from the source Deployer again. If this does not fix the problem, rebuild the original project and export the build again.</b>
<b>Explanation</b>	The build file placed in the WmDeployer/replicate/inbound is corrupted. This can occur because of error while copying the build file.
<b>Action</b>	Copy the build file from the source Deployer again. If this does not fix the problem, rebuild the original project and export the build again.

**DEP.0002.0137**      **Install of WmDeployerResource package cannot proceed. All the nodes in this cluster are not online. The following nodes are offline: {0}. Installing the package on the local node only.**

**Explanation**      This error occurs when you try to install the WmDeployerResource package on a cluster node and some of the nodes of the cluster are offline.

**Action**             Make sure all the nodes in the cluster are online.

**DEP.0002.0138E**      **You tried to add a target server or a target group of the same name as one that already exists in the deployment map.**

**Explanation**      You tried to add a target server or a target group of the same name as one that already exists in the deployment map.

**Action**             Rename the target server or target group alias and add it to the map.

**DEP.0002.0139**      **Cannot import the deployment map. Make sure the field names, values and the structure of the XML file are valid.**

**Explanation**      The exported map does not have the expected structure.

**Action**             If you modified the XML, validate the exported XML with the service `wm.deployer.flows:validateXMLWithXSD`.

If you are exporting a map, pass the schema file as `wm.deployer.flows:DeploymentMap_Definition`.

If you are exporting a varsub, pass the schema file as `wm.deployer.flows:Varsub_Definition`.

**DEP.0002.0140**      **Cannot import variable substitution values. Make sure the field names and values and the structure of the XML file are valid.**

**Explanation**      This error occurs when the exported map does not have the expected structure.

**Action**             If you have modified the XML, validate the exported xml with the service `wm.deployer.flows:validateXMLWithXSD`.

If you are exporting a map then pass the schema file as `wm.deployer.flows:DeploymentMap_Definition`.

If you are exporting a varsub then pass the schema file as `wm.deployer.flows:Varsub_Definition`.

<b>DEP.0002.0142</b>	<b>Project {0} already contains a deletion set named {1}. Rename the deployment or deletion set you are trying to create or delete the existing deployment or deletion set from the project. Then retry your action.</b>
<b>Explanation</b>	You tried to add a deployment or deletion set of the same name as one of the deployment or deletion sets already in the project.
<b>Action</b>	Rename the deployment or deletion set you are trying to create or delete the existing deployment or deletion set from the project. Then retry your action.
<b>DEP.0002.0143</b>	<b>A project can have only one deletion set for each server type. Deletion set {0} already exists for {1}. You can add assets to existing deleting sets, or delete the existing deletion set before trying to create another deletion set.</b>
<b>Explanation</b>	You attempted to create a deletion set on a project that already contains one. Only one deletion set can be created for a project.
<b>Action</b>	You can add assets to existing deleting sets, or delete the existing deletion set before trying to create another deletion set.
<b>DEP.0002.0144E</b>	<b>Deployer encountered an error while trying to get dependent assets for deletion set {0}. See the Integration Server logs.</b>
<b>Explanation</b>	This error might occur for no specific reason.
<b>Action</b>	Ensure the <code>wm.deployer.gui.UITarget:checkTargetDependencies</code> service exists and the user has the necessary privileges for executing the service.
<b>DEP.0002.0146</b>	<b>Deletion sets definition file {0} already exists for this project. Make a back up of the existing file in another location and then delete the file. Then export the deletion set again.</b>
<b>Explanation</b>	The exported file already exists and another export for the same deletion set would cause this error.
<b>Action</b>	Make a back up of the existing file in another location and then delete the file. Then export the deletion set again.
<b>DEP.0002.0147</b>	<b>Rollback on deployment candidate {0} failed. Check the rollback report for more information.</b>
<b>Explanation</b>	This error might occur for no specific reason.
<b>Action</b>	Check the rollback report for further information.

DEP.0002.0148	<b>No such deployment candidate {0} found in project {1}. Delete and recreate the deployment candidate.</b>
<b>Explanation</b>	This error might occur for no specific reason.
<b>Action</b>	Delete and recreate the deployment candidate.
DEP.0002.0149	<b>Deployment candidate {0} in project {1} is not checkpointed. Use the Deployer command-line interface to create a checkpoint for the deployment candidate. If you want to deploy without creating a checkpoint, use the -force flag.</b>
<b>Explanation</b>	This error is shown when you attempt to deploy without creating a checkpoint from the Deployer command-line interface.
<b>Action</b>	Use the Deployer command-line interface to create a checkpoint for the deployment candidate. If you want to deploy without creating a checkpoint, use the -force flag.
DEP.0002.0150	<b>The WmDeployerResource package is not installed on the target Integration Server. Install the WmDeployerResource package on the target Integration Server from the Deployer user interface on the Integration Server alias page.</b>
<b>Explanation</b>	The WmDeployerResource package is not installed on the target Integration Server.
<b>Action</b>	Install the WmDeployerResource package on the target Integration Server from the Deployer user interface on the Integration Server alias page.
DEP.0002.0158E	<b>Deployer did not save the versions for the aliases {0} because the aliases do not exist. Make sure the alias for which you specified the version is valid.</b>
<b>Explanation</b>	The alias for which you tried to update the version does not exist.
<b>Action</b>	Make sure the alias for which you specified the version is valid.
DEP.0002.0159E	<b>The deployment set contains source servers of different versions. Source servers in a deployment set must be the same version. Remove the source servers with the wrong version from the deployment set or change the versions to match.</b>
<b>Explanation</b>	The source servers in the deployment set are different versions.
<b>Action</b>	Remove the source servers with the wrong version from the deployment set or change the versions to match.
DEP.0002.0160E	<b>The deployment maps contain target servers of different versions. Target servers in deployment maps must be the same version. Remove the target servers with the wrong version from the deployment maps or change the versions to match.</b>
<b>Explanation</b>	The target servers in the deployment maps are different versions.
<b>Action</b>	Remove the target servers with the wrong version from the deployment maps or change the versions to match.

<b>DEP.0002.0162E</b>	<b>Repository name {0} contains illegal characters.</b>
<b>Explanation</b>	The repository name contains one or more spaces or the following invalid characters: # & @ ^ ! % * : \$ / \ \ ` ' ; , ~ + = > < \ "
<b>Action</b>	Remove the invalid characters from the repository alias name.
<b>DEP.0002.0163E</b>	<b>Deployment set name {0} contains illegal characters.</b>
<b>Explanation</b>	The deployment set name contains one or more spaces or the following invalid characters: # & @ ^ ! % * : \$ / \ \ ` ' ; , ~ + = > < \ "
<b>Action</b>	Remove the invalid characters from the deployment set name.
<b>DEP.0002.0164E</b>	<b>Deployment map name {0} contains illegal characters.</b>
<b>Explanation</b>	The deployment map name contains one or more spaces or the following invalid characters: # & @ ^ ! % * : \$ / \ \ ` ' ; , ~ + = > < \ "
<b>Action</b>	Remove the invalid characters from the deployment map name.
<b>DEP.0002.0165E</b>	<b>Deployment candidate name {0} contains illegal characters.</b>
<b>Explanation</b>	The deployment candidate name contains one or more spaces or the following invalid characters: # & @ ^ ! % * : \$ / \ \ ` ' ; , ~ + = > < \ "
<b>Action</b>	Remove the invalid characters from the deployment candidate name.
<b>DEP.0002.0166E</b>	<b>Component {0} not found in composite {1} from repository source {2}.</b>
<b>Explanation</b>	The contents of the repository have been modified.
<b>Action</b>	Run the build script again or recreate the repository.
<b>DEP.0002.0167E</b>	<b>There is an error in deployment candidates(s) {0} from project {1}. See the Integration Server logs for more information.</b>
<b>Explanation</b>	Deployer displays this error for various reasons.
<b>Action</b>	See the Integration Server logs for an explanation of the exception.
<b>DEP.0002.0168E</b>	<b>Cannot save variable substitutions. There are no servers selected.</b>
<b>Explanation</b>	Deployer requires that you select at least one server for variable substitutions.
<b>Action</b>	Select at least one server from the list of selected servers.

**DEP.0002.0172W**      **When adding a new target server to the map, Deployer will remove any checkpoints created for the associated deployment candidates. You must recreate any checkpoints you want to use. Do you want to continue?**

**Explanation**      Adding new target servers to the map will cause Deployer to remove any checkpoints previously created for the deployment candidates associated with this map.

**Action**      If you continue with the change, you must recreate any checkpoints you want to use for the associated deployment candidates.

**DEP.0002.0173W**      **When modifying the deployment set, Deployer will remove any checkpoints created for the associated deployment candidates. You must recreate any checkpoints you want to use. Do you want to continue?**

**Explanation**      Modifying the deployment set will cause Deployer to remove any checkpoints previously created for the deployment candidates associated with this project.

**Action**      If you continue with the change, you must recreate any checkpoints you want to use for the project.

**DEP.0002.0180E**      **Repository {0} is not connected. The specified flat file directory does not exist.**

**Explanation**      The specified repository does not exist.

**Action**      Ensure that the repository exists in the specified location.

**DEP.0002.0183W**      **When modifying the deletion set, Deployer will remove any checkpoints created for the associated deployment candidates. You must recreate any checkpoints you want to use. Do you want to continue?**

**Explanation**      If you modify the deletion set, Deployer will remove any checkpoints previously created for the deployment candidates associated with this project.

**Action**      If you continue with the change, you must recreate any checkpoints you want to use for the project.

**DEP.0002.0201E**      **Checkpoint for Deployment Candidate {0} failed. For more information, see the checkpoint report.**

**Explanation**      Possible causes for this error:

- 1) The project file could not be found in, or loaded from, the build.
- 2) The target file or deployment candidate could not be loaded from disk.
- 3) The user is not authorized to create a checkpoint.
- 4) Another reason shown in the checkpoint report.

**Action**      Verify that the build is available and correct and that there is sufficient disk space and memory. Also review the checkpoint report and verify that the necessary operating system privileges are set and that the user has authorization to create a checkpoint.

<b>DEP.0002.0202W</b>	<b>Checkpoint for deployment candidate {0} completed with warnings. For more information, see the checkpoint report.</b>
<b>Explanation</b>	Deployer encountered a warning while extracting objects from source system.
<b>Action</b>	Review the checkpoint report to determine any further action to take. Most warnings require no action by the user.
<b>DEP.0002.0206E</b>	<b>Checkpoint for deployment candidate {0} failed: {1}</b>
<b>Explanation</b>	Deployer encountered an exception while extracting objects from the source system. The following are possible causes for the exception:  <ol style="list-style-type: none"> <li>1) Deployer could not find project file in, or load it from, the build.</li> <li>2) Deployer could not load the target file or deployment candidate from disk.</li> <li>3) The user is not authorized to create a checkpoint.</li> <li>4) Other reasons as shown in the checkpoint report.</li> </ol>
<b>Action</b>	Verify that the build is available and correct, and that there is sufficient disk space and memory. Also review the checkpoint report to verify that the necessary operating system privileges are set and that the user has authorization to create a checkpoint.
<b>DEP.0002.0300E</b>	<b>User is not authorized to create variable substitution file for project {0}.</b>
<b>Explanation</b>	You are not authorized to perform the action of variable substitution for the specified project. You must have map authorization for the project.
<b>Action</b>	Ask an administrator or user that has map authorization for the project to perform this task or have an administrator assign you map authorization.
<b>DEP.0002.0301E</b>	<b>Could not save variable substitution file {0}.</b>
<b>Explanation</b>	Deployer encountered an error writing to disk.
<b>Action</b>	Check your Integration Server's disk space. If you believe there should be sufficient space, try to save again. If saving again is not successful, perform one or both of the following and retry the action:  <p>Restart the server.</p> <p>Recreate the variable substitution information.</p>

- DEP.0002.0302E**      **Variable substitution object type {0} is invalid.**  
**Explanation**      Deployer attempted to create a variable substitution item that is not valid. This might occur if the service that is attempting to create the variable substitution item is invoked by something other than the Deployer user interface.  
**Action**              Contact Software AG Global Support to report this issue and request a fix.
- DEP.0002.0306E**      **Deployer cannot import the substitute configuration values into the deployment map. The .vs file does not exist.**  
**Explanation**      There are no .vs files in the WmDeployer/replicate/inbound folder.  
**Action**              Copy the variable substitution file to the WmDeployer/replicate/inbound folder and then import it into the deployment map.
- DEP.0002.0309E**      **Unable to export variable substitution information.**  
**Explanation**      This error occurs when the exported map already exists in the WmDeployer/replicate/inbound folder.  
**Action**              Backup the file to a different location and delete the original. Then export the map again.
- DEP.0002.0311E**      **The Deployer {0} file is not accessible or does not exist.**  
**Explanation**      The XML file name you passed for importing the varsub is not present in the WmDeployer/replicate/inbound folder.  
**Action**              Check and correct the file name you passed in the command-line.
- DEP.0004.0001E**      **Version Mismatch Error: The server alias is a different version number than the other source/target servers. Source and target servers must use the same version as the server alias.**  
**Explanation**      The versions of the source or target servers are different than the version selected for the alias version.  
**Action**              Remove the aliases with the wrong version from the deployment set or change the version to match the source servers.
- DEP.0004.0002W**      **The target Integration Server is part of a cluster, but is not properly configured to support clustered deployment. See the product documentation for instructions on proper cluster configuration.**  
**Explanation**      One of the target Integration Servers is not properly configured for clustering.  
**Action**              See the webMethods Integration Server documentation for a description of the proper configuration settings for clustering.

<b>DEP.0005.0105I</b>	<b>No publishable document types needed to be synchronized in the following package(s): "{0}"</b>
<b>Explanation</b>	The packages with document types are deployed. However, there are no unsynchronized document types.
<b>Action</b>	Make sure that no unsynchronized document types are used for process development.
<b>DEP.0005.0111E</b>	<b>The source user has no username. Deployer cannot deploy an undefined user.</b>
<b>Explanation</b>	This error occurs when Deployer cannot deploy or roll back a target server due to an undefined user.
<b>Action</b>	Verify that the user exists on the source server and that configuration details are correct.
<b>DEP.0005.0113E</b>	<b>The source user "{0}" has a non-ASCII password. Deployer cannot deploy assets to an undefined user.</b>
<b>Explanation</b>	Deployer is attempting to deploy an invalid user.
<b>Action</b>	Verify that the selected user is valid.
<b>DEP.0005.0115E</b>	<b>An error occurred while attempting to deploy user "{0}" with the following error message follows: &lt;p&gt;"{1}"&lt;/p&gt;</b>
<b>Explanation</b>	An error occurred while attempting to deploy a user.
<b>Action</b>	Check the Integration Server logs and error messages in the output report for more information.
<b>DEP.0005.0118E</b>	<b>Deployer encountered the following exception while attempting to put package "{0}" into the inbound directory: "{1}"</b>
<b>Explanation</b>	There might be network connectivity problems between Deployer and each target Integration Server. Alternatively, the target Integration Servers might not be currently running.
<b>Action</b>	Verify network connectivity between the Deployer server and each target server. Also, verify that the target Integration Servers are running.
<b>DEP.0005.0131E</b>	<b>Deployment completed with errors. Following is a path to the output report, followed by an error message: "{0}" &lt;p&gt;Error message: "{1}"&lt;/p&gt;</b>
<b>Explanation</b>	Deployment completed with errors.
<b>Action</b>	Check the Integration Server logs, as well as error messages in the output report.

<b>DEP.0005.0134E</b>	<b>Deployer encountered an error while synchronizing documents in the following packages: "{0}"</b>
<b>Explanation</b>	This error occurs when a Broker or UM mapped with an Integration Server is unavailable.
<b>Action</b>	Ensure that the mapped JMS Broker or UM is available.
<b>DEP.0005.0156E</b>	<b>Deployer encountered an error during deployment. Deployer did not find package "{0}" in the build zip file "{1}".</b>
<b>Explanation</b>	Deployer invoked the wm.server.util:putPackageFile service and the service returned an error.
<b>Action</b>	See the deployment or simulation report to determine which error putPackageField service returned.
<b>DEP.0005.0157E</b>	<b>Deployer encountered an error during deployment. "{0}" package was not found in the build zip file: "{1}".</b>
<b>Explanation</b>	The specified package was not found in the build. Typically, this indicates that the deployment set is not current with the build.
<b>Action</b>	Re-create your deployment set and build files.
<b>DEP.0005.0160E</b>	<b>While attempting to install package "{0}" an exception with the following error message occurred: &lt;p&gt;"{1}"&lt;/p&gt;</b>
<b>Explanation</b>	Deployer invoked the pub.packages:installPackage service, and the service returned an error.
<b>Action</b>	Verify network connectivity between the Deployer server and each target server. Verify that the target Integration Servers are running. For more information about the error returned by the installPackage service, see the deployment or simulation report. For more information about the installPackage service, see Integration Server Built-In Services Reference.
<b>DEP.0005.0161E</b>	<b>The number of bytes read from package "{0}" was not correct.</b>
<b>Explanation</b>	An I/O exception occurred while reading the specified package. As a result, all data from the package could not be read. This exception can occur for the following reasons: <ul style="list-style-type: none"> <li>- The I/O operation failed or was interrupted while accessing the build file.</li> <li>- A security violation has occurred, which typically means that the user running Deployer does not have correct privileges to access the files.</li> </ul>
<b>Action</b>	Verify that the file system and the build file that contains the source package are not corrupt. Verify that the user attempting this action has the proper authority to read files on the file system. You might need to re-create the build.

<b>DEP.0005.0164E</b>	<b>The scheduled service type "{0}" for service name "{1}" is unknown and could not be processed.</b>
<b>Explanation</b>	Your version of Deployer is out of date.
<b>Action</b>	Ensure that you have the latest version of the WmDeployer package.
<b>DEP.0005.0170E</b>	<b>Deployer encountered the following error while retrieving the scheduled service with service name "{0}" from target "{1}": "{2}".</b>
<b>Explanation</b>	This error occurs when Deployer fails to get details for a scheduled service for the variable substitution.
<b>Action</b>	Verify that the scheduled service exists under the specified name on the target server.
<b>DEP.0005.0187E</b>	<b>Deployer encountered the following exception while performing a remote invoke of the service "{0}": "{1}"</b>
<b>Explanation</b>	This error occurs when Deployer cannot invoke a service on a remote server, which indicates that the remote server might be offline.
<b>Action</b>	Verify that the remote server is running and available.
<b>DEP.0005.0190E</b>	<b>Deployer encountered the following error while attempting to deploy Group: "{0}": "{1}"</b>
<b>Explanation</b>	An error occurred while attempting to deploy the group.
<b>Action</b>	Recreate the build and deploy the group again.
<b>DEP.0005.0193E</b>	<b>Deployer encountered the following error while attempting to deploy ACL "{0}": "{1}"</b>
<b>Explanation</b>	An error occurred while attempting to deploy an ACL.
<b>Action</b>	Check Integration Server logs and error messages in the Deployment report.
<b>DEP.0005.0197E</b>	<b>Deployer encountered the following error while attempting to deploy Port "{0}" associated with package "{1}": "{2}".</b>
<b>Explanation</b>	An error occurred while attempting to deploy a port associated with a package.
<b>Action</b>	Check for error messages in the output report and Integration Server logs. Verify that the specified port is available on the target server. Recreate the build if problems persist.

<b>DEP.0005.0199E</b>	<b>Deployment failed.</b>
<b>Explanation</b>	The deployment failed.
<b>Action</b>	Review the deployment report and Integration Server logs to determine the cause of the failure, and take the appropriate action.
<b>DEP.0005.0204E</b>	<b>Deployer encountered the following Trading Networks error while attempting to import "{0}" with name "{1}": "{2}", message: "{3}"</b>
<b>Explanation</b>	An error occurred attempting to import one of the following Trading Network object types: Document Attributes, Document Types, Field Groups, ID Types, Contact Types, Binary Types, or Profile Groups. Possible causes include: <ul style="list-style-type: none"><li>- A network connection error occurred between the Deployer server and the target Integration Server.</li><li>- The target Integration Server is not running.</li><li>- The target WmTN package on the target Integration Server is not loaded or enabled.</li><li>- There could be problems with the Trading Networks object type being imported to the target.</li></ul>
<b>Action</b>	Verify the following: <ul style="list-style-type: none"><li>- There are no network connectivity errors between the Deployer server and each target Integration Server.</li><li>- All target Integration Servers are running.</li><li>- The WmTN package on each target Integration Server is loaded and enabled.</li><li>- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible Trading Networks object types.</li></ul>
<b>DEP.0005.0231</b>	<b>There are no required patches specified for the target Integration Server.</b>
<b>Explanation</b>	This message occurs when a user deploys unrequired patches into a target.
<b>Action</b>	See the patch details for more information.
<b>DEP.0005.0234E</b>	<b>Deployer encountered the following error while pausing the listener "{0}" associated with package "{1}": "{2}"</b>
<b>Explanation</b>	Could not pause the listener associated with the package.
<b>Action</b>	Check the Integration Server logs and error messages in the output report for more information.

<b>DEP.0005.0235E</b>	<b>Deployer encountered an error while disabling of port "{0}" associated with package "{1}".</b>
<b>Explanation</b>	An exception occurred while disabling the port associated with the package.
<b>Action</b>	Check the Integration Server logs and error messages in the output report for more information.
<b>DEP.0005.0236E</b>	<b>Deployer encountered an error while enabling the listener "{0}" associated with package "{1}": "{2}"</b>
<b>Explanation</b>	Deployer could not enable the specified listener.
<b>Action</b>	See the webMethods Integration Server documentation for specific instructions on how to enable a listener.
<b>DEP.0005.0240E</b>	<b>Deployer encountered the following error while suspending the triggers: "{0}"</b>
<b>Explanation</b>	Deployer could not suspend the triggers on the target Integration Server. Deployer attempts to suspend all triggers by setting the maximum percentage of document retrieval threads and the maximum percentage of trigger execution threads to zero.
<b>Action</b>	Verify network connectivity between Deployer and each target Integration Server. Also, verify that the target Integration Servers are running. For more information about the configuration settings for document retrieval threads and trigger execution threads, see information about configuring the server in the webMethods Integration Server documentation.
<b>DEP.0005.0242E</b>	<b>Could not resume the Integration Server triggers. Error message follows: "{0}"</b>
<b>Explanation</b>	Deployer could not resume the triggers on the target Integration Server. Deployer attempts to resume all triggers by resetting the maximum percentage of document retrieval threads and the maximum percentage of trigger execution threads to the values they had before Deployer suspended the triggers.
<b>Action</b>	Verify network connectivity between the Deployer server and each target Integration Server. Verify that the target Integration Servers are running. For more information about configuration settings for document retrieval threads and trigger execution threads, see information about configuring the server in the webMethods Integration Server documentation.
<b>DEP.0005.0243E</b>	<b>Deployer did not deploy deployment set "{0}" because it contains the following unsatisfied dependencies: "{1}"</b>
<b>Explanation</b>	The dependencies required by the specified deployment set are missing on the target system.
<b>Action</b>	Either install the necessary components on the target system, or change the Deployer project so that it no longer requires the missing dependencies.

<b>DEP.0005.0244E</b>	<b>Deployer encountered the following exception while checking dependencies on target "{0}" for deployment set "{1}": "{2}"</b>
<b>Explanation</b>	An exception occurred while checking dependencies for the deployment set at the target.
<b>Action</b>	Check Integration Server logs and error messages in the output report for exception details.
<b>DEP.0005.0250E</b>	<b>Simulation failed.</b>
<b>Explanation</b>	The deployment simulation failed.
<b>Action</b>	Refer to the simulation report and Integration Server logs to determine the cause of the failure and take the appropriate action.
<b>DEP.0005.0256E</b>	<b>There are no targets mapped for the current deployment set.</b>
<b>Explanation</b>	There are no valid target servers mapped for the deployment set.
<b>Action</b>	Verify that the specified target servers are mapped appropriately for the current deployment set.
<b>DEP.0005.0257E</b>	<b>Deployer cannot deploy the deployment set because there are no source servers specified.</b>
<b>Explanation</b>	There are no source servers mapped for the deployment set to define assets for deployment.
<b>Action</b>	Verify that source servers are defined appropriately for assets to be deployed.
<b>DEP.0005.0263E</b>	<b>The following Trading Networks error occurred while attempting to import processing rules: class: "{0}", message: "{1}"</b>
<b>Explanation</b>	An error occurred when attempting to import processing rules into Trading Networks. Possible causes include: <ul style="list-style-type: none"> <li>- A network connection error between the Deployer server and the target Integration Server running Trading Networks.</li> <li>- The target Integration Server is not running.</li> <li>- The WmTN package is not loaded or enabled on the target Integration Server.</li> <li>- The Trading Networks object type being imported to the target might be in error.</li> </ul>
<b>Action</b>	Verify the following: <ul style="list-style-type: none"> <li>- There are no network connectivity errors between the Deployer server and each target Integration Server.</li> <li>- All target Integration Servers are running.</li> <li>- The WmTN package on each target Integration Server is loaded and enabled.</li> </ul>

- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible processing rules.

**DEP.0005.0265E** **Deployer encountered the following Trading Networks error while attempting to import "{0}" with a group code "{1}" and name "{2}": class: "{3}", message: "{4}"**

**Explanation** An error occurred when attempting to import field groups into Trading Networks. Possible causes include:

- An error in the network connection between the Deployer server and the target Integration Server running Trading Networks.
- The target Integration Server is not running.
- The WmTN package is not loaded or enabled on the target Integration Server.
- The Trading Networks object type being imported to the target might be in error.

**Action** Verify the following:

- There are no network connectivity errors between the Deployer server and each target Integration Server.
- All target Integration Servers are running.
- The WmTN package on each target Integration Server is loaded and enabled.
- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible field groups.

**DEP.0005.0266E** **Deployer encountered the following Trading Networks error while attempting to import field definitions: class: "{0}", message: "{1}"**

**Explanation** An error occurred when attempting to import field definitions into Trading Networks. Possible causes include:

- An error in the network connection between the Deployer server and the target Integration Server running Trading Networks.
- The target Integration Server is not running.
- The WmTN package is not loaded or enabled on the target Integration Server.
- The Trading Networks object type being imported to the target might be in error.

**Action** Verify the following:

- There are no network connectivity errors between the Deployer server and each target Integration Server.
- All target Integration Servers are running.
- The WmTN package on each target Integration Server is loaded and enabled.

- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible field definitions.

**DEP.0005.0270E**     **Deployer encountered the following Trading Networks error while attempting to import partner profiles: class: "{0}", message: "{1}"**

**Explanation**     An error occurred when attempting to import partner profiles into Trading Networks. Possible causes include:

- A network connection error between the Deployer server and the target Integration Server running Trading Networks.
- The target Integration Server is not running.
- The WmTN package is not loaded or enabled on the target Integration Server.
- The Trading Networks object type being imported to the target might be in error.

**Action**     Verify the following:

- There are no network connectivity errors between the Deployer server and each target Integration Server.
- All target Integration Servers are running.
- The WmTN package on each target Integration Server is loaded and enabled.
- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible partner profiles.

**DEP.0005.0274E**     **Deployer encountered the following Trading Networks error while attempting to import trading partner agreements: class: "{0}", message: "{1}"**

**Explanation**     An error occurred when attempting to import trading partner agreements (TPAs) into Trading Networks. Possible causes include:

- A network connection error between the Deployer server and the target Integration Server running Trading Networks.
- The target Integration Server is not running.
- The WmTN package is not loaded and/or enabled on the target Integration Server.
- The Trading Networks object type being imported to the target might be in error.

**Action**     Verify the following:

- There are no network connectivity errors between the Deployer server and each target Integration Server.
- All target Integration Servers are running.
- The WmTN package on each target Integration Server is loaded and enabled.

- The TN object type is allowed. See the webMethods Trading Networks documentation for details about permissible trading partner agreements (TPAs).

**DEP.0005.0277E** **Deployer encountered an error while attempting to import "{0}" with a type code "{1}" and a name "{2}". The following is the error information from Trading Networks: class: "{3}", message: "{4}"**

**Explanation** An error occurred when attempting to import external ID types, contact types, or binary types into Trading Networks. Possible causes include:

- A network connection error between the Deployer server and the target Integration Server running Trading Networks.
- The target Integration Server is not running.
- The WmTN package is not loaded or enabled on the target Integration Server.
- The Trading Networks object type being imported to the target might be in error.

**Action** Verify the following:

- There are no network connectivity errors between the Deployer server and each target Integration Server.
- All target Integration Servers are running.
- The WmTN package on each target Integration Server is loaded and enabled.
- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible external ID types, contact types, and binary types.

**DEP.0005.0280E** **Triggers were not suspended prior to package deployment. Failure to suspend a trigger during deployment could cause problems on the target server.**

**Explanation** Triggers were not suspended prior to package deployment.

**Action** Not suspending a trigger during deployment can cause problems on the target. Check the Integration Server logs for more information.

**DEP.0005.0282E** **Scheduled services were not suspended prior to deployment. Failure to suspend scheduled services during deployment could cause problems on the target server.**

**Explanation** Scheduled services were not suspended prior to deployment. Failure to suspend scheduled services during deployment can cause problems at the target.

**Action** Check the Integration Server logs and error messages in the output report for more information.

<b>DEP.0005.0284E</b>	<b>Scheduled services were not started after deployment.</b>
<b>Explanation</b>	Scheduled services were not started after deployment. There might be an issue with a target server.
<b>Action</b>	For more information, check the Integration Server logs and error messages in the output report.
<b>DEP.0005.0286E</b>	<b>Listeners were not suspended prior to deployment. Failure to suspend listeners during deployment could cause problems on the target server.</b>
<b>Explanation</b>	Listeners were not suspended prior to deployment. Failure to suspend listeners during deployment could cause problems on the target server.
<b>Action</b>	Check the Integration Server logs for errors in suspending the listeners.
<b>DEP.0005.0288E</b>	<b>Listeners were not started after deployment.</b>
<b>Explanation</b>	Listeners were not started after deployment. It happens when the ports are disabled or if they will be used for the first time.
<b>Action</b>	Check the Integration Server logs and error messages in the output report.
<b>DEP.0005.0296E</b>	<b>Deployer did not deploy the {0}, which is required for source package "{1}" and it does not already exist at the target. Although the source package would be deployed to the target, some services in that package will not run correctly until that ACL is created at the target.</b>
<b>Explanation</b>	The Read, Write, List, or Execute ACLs required for the deployed package to run correctly are not being deployed to the target Integration Server, and that ACL does not already exist on the target Integration Server. Typically, this indicates that the ACLs associated with the package were not extracted.
<b>Action</b>	Repeat the extraction step using Deployer to ensure that all ACLs are included.
<b>DEP.0005.0297E</b>	<b>Deployer did not deploy the {0}, which is required for source package "{1}" and it does not already exist on the target. Some services in that source package will not run correctly until that ACL is created at the target.</b>
<b>Explanation</b>	The Read, Write, List, or Execute ACLs that are necessary for the deployed package to run correctly are not being deployed to the target Integration Server, and the specified ACL does not already exist on the target Integration Server. Typically, this problem indicates that the ACLs associated with the package were not extracted.
<b>Action</b>	Perform the extraction step again using Deployer to ensure that all ACLs are included.

<b>DEP.0005.0298E</b>	<b>Deployer encountered the following exception while invoking of the service "{0}": "{1}"</b>
<b>Explanation</b>	This exception occurs when Deployer invokes a service on a remote server.
<b>Action</b>	Verify that the source or target server is available.
<b>DEP.0005.0302E</b>	<b>Deployer encountered the following exception while creating the directory "{0}": "{1}"</b>
<b>Explanation</b>	An exception occurred while attempting to create a directory.
<b>Action</b>	Ensure that the appropriate write permissions exist to allow for the creation of the new directory and that adequate free space is available.
<b>DEP.0005.0303E</b>	<b>Deployer encountered an exception while creating one of the temporary jar files in "{0}": "{1}"</b>
<b>Explanation</b>	An exception occurred while attempting to create one of the temporary jar files.
<b>Action</b>	Ensure that the appropriate write permissions exist for the new file location and that adequate free space is available.
<b>DEP.0005.0304E</b>	<b>Target Server {0} is unavailable.</b>
<b>Explanation</b>	Deployer could not connect to the specified target server.
<b>Action</b>	Verify the following: <ul style="list-style-type: none"> <li>- Network connectivity between Deployer and each target Integration Server.</li> <li>- The target Integration Servers are running.</li> <li>- The target Integration Server alias is defined on the Deployer host server.</li> </ul>
<b>DEP.0005.0305E</b>	<b>An exception occurred while getting a Trading Networks docType object. This is most likely caused by a user-defined extension to the Trading Networks type BizDocType. Copy the jar files containing the extensions from the webM_install_dir/IntegrationServer/packages/WmTN/code/jars directory into the WmDeployer/code/jars directory.</b>
<b>Explanation</b>	There is a user-defined extension to a Trading Networks document type and Deployer does not have access to the associated jar files.
<b>Action</b>	To ensure Deployer has access to the associated jar files, copy the jar files containing the extensions from the webM_install_dir/IntegrationServer/packages/WmTN/code/jars directory into the WmDeployer/code/jars directory.

**DEP.0005.0306E**      **An error occurred while attempting to import extended field definitions; error information from Trading Networks: class: "{0}", message: "{1}"**

**Explanation**      An error occurred when attempting to import extended field definitions into Trading Networks. Possible causes include:

- An error in the network connection between the Deployer server and the target Integration Server that is running Trading Networks.
- The target Integration Server is not running.
- The WmTN package is not loaded and/or enabled on the target Integration Server.
- The Trading Networks object type being imported to the target might be in error.

**Action**      Verify the following:

- There are no network connectivity errors between the Deployer server and each target Integration Server.
- All target Integration Servers are running.
- The WmTN package on each target Integration Server is loaded and enabled.
- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible extended field definitions.

**DEP.0005.0307E**      **Deployer encountered the following Trading Networks error while attempting to import security data for profile: "{0}": class: "{1}", message: "{2}"**

**Explanation**      Deployer encountered an error occurred while attempting to import the security data for the specified profile into Trading Networks. Possible causes include:

- A network connection error between the Deployer server and the target Integration Server running Trading Networks.
- The target Integration Server is not running.
- The WmTN package is not loaded or enabled on the target Integration Server.
- The Trading Networks object type being imported to the target might be in error.

**Action**      Verify the following:

- There are no network connectivity errors between the Deployer server and each target Integration Server.
- All target Integration Servers are running.
- The WmTN package on each target Integration Server is loaded and enabled.
- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible Trading Networks Security Data.

<b>DEP.0005.0308E</b>	<b>An error occurred while attempting to import queues: class: "{0}", message: "{1}"</b>
<b>Explanation</b>	<p>An error occurred when attempting to import the public queues into Trading Networks. Possible causes include:</p> <ul style="list-style-type: none"> <li>- A network connection error between the Deployer server and the target Integration Server running Trading Networks.</li> <li>- The target Integration Server is not running.</li> <li>- The WmTN package is not loaded and/or enabled on the target Integration Server.</li> <li>- The Trading Networks object type being imported to the target might be in error.</li> </ul>
<b>Action</b>	<p>Verify the following:</p> <ul style="list-style-type: none"> <li>- There are no network connectivity errors between the Deployer server and each target Integration Server.</li> <li>- All target Integration Servers are running.</li> <li>- The WmTN package on each target Integration Server is loaded and enabled.</li> <li>- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible public queues.</li> </ul>
<b>DEP.0005.0309E</b>	<b>An error occurred while attempting to import profile group "{0}" with value "{1}". class: "{2}", message: "{3}"</b>
<b>Explanation</b>	<p>An error occurred when attempting to import the profile groups into Trading Networks. Possible causes include:</p> <ul style="list-style-type: none"> <li>- A network connection error between the Deployer server and the target Integration Server running Trading Networks.</li> <li>- The target Integration Server is not running.</li> <li>- The WmTN package is not loaded and/or enabled on the target Integration Server.</li> <li>- The Trading Networks object type being imported to the target might be in error.</li> </ul>
<b>Action</b>	<p>Verify the following:</p> <ul style="list-style-type: none"> <li>- There are no network connectivity errors between the Deployer server and each target Integration Server.</li> <li>- All target Integration Servers are running.</li> <li>- The WmTN package on each target Integration Server is loaded and enabled.</li> <li>- The Trading Networks object type is allowed. See the webMethods Trading Networks documentation for details about permissible profile groups.</li> </ul>

**DEP.0005.0326E**      **An error occurred while deploying package "{0}". Item "{1}" could not be loaded because of reason "{2}". The package may have partially loaded; please check your target server.**

**Explanation**      The specified package did not load due to the reason returned from the target Integration Server.

**Action**            See the webMethods Integration Server documentation for the specific requirements for loading a package.

**DEP.0005.0328E**      **The JVM "{0}" on the target server is older than the "{1}" JVM recommended on the source for package "{2}".**

**Explanation**      The JVM version running on the target is older than the minimum JVM version property specified by the source.

**Action**            Change the minimum JVM property for the package being deployed and redeploy the package.

**DEP.0005.0329E**      **The "{0}" target JVM is older than the JVM recommended "{1}" on the source for package "{2}".**

**Explanation**      The JVM version running on the target is older than the minimum JVM version property required by the source.

**Action**            Change the minimum JVM property for the package being deployed, and then deploy again.

**DEP.0005.0330E**      **The target package version is null.**

**Explanation**      For partial deployment, Deployer requires that the package is present on the target server and that version of the package is not null and matches that of the source server.

**Action**            Verify that the package version defined on the target server is appropriate for partial package deployment.

**DEP.0005.0334E**      **Source package is of type Patch and package does not exist on target. The package: "{0}" will not be deployed. Re-define package to Full to deploy the package on target**

**Explanation**      This message indicates that the target partial mode package is undefined.

**Action**            Verify that the specified package exists on the target server and that it is valid for partial package deployment.

---

<b>DEP.0005.0337E</b>	<b>An error occurred while deploying package: "{0}"</b>
<b>Explanation</b>	Deployer invoked the pub.packages:installPackage service and the installPackage service returned an error.
<b>Action</b>	For more information about the error that the installPackage service returned, see the deployment or simulation report. For more information about the installPackage service and the requirements for installing packages, see the Integration Server Built-In Services Reference.
<b>DEP.0005.0338E</b>	<b>Deployer issued the following exception while attempting to activate the package: "{0}"</b>
<b>Explanation</b>	Deployer invoked the pub.packages:activatePackage service, and the activatePackage service returned an error.
<b>Action</b>	Verify the network connectivity between the Deployer server and each target Integration Server. Also, verify that the target Integration Servers are up and running. For more information about the error that the activatePackage service returned, see the deploy or simulation report. For more information about the activatePackage service, see the documentation for webMethods Integration Server documentation.
<b>DEP.0005.0352E</b>	<b>The package name "{0}" contains the invalid "{1}" character. For more information about illegal characters, see the webMethods Integration Server documentation.</b>
<b>Explanation</b>	The package name contains illegal characters.
<b>Action</b>	See the webMethods Integration Server documentation for information about how to name a package.
<b>DEP.0005.0353E</b>	<b>"{0}" is an invalid value for the Cleanup File Age parameter. Valid values are 1-9999.</b>
<b>Explanation</b>	The value specified for the Cleanup File Age parameter is invalid.
<b>Action</b>	Specify a valid value between 1 and 9999 for the Cleanup File Age parameter.
<b>DEP.0005.0354E</b>	<b>Invalid File Age parameter "{0}". Valid values are 0-9999.</b>
<b>Explanation</b>	The value specified for the File Age parameter is invalid.
<b>Action</b>	Specify a value between 0 and 9999 for the File Age parameter.
<b>DEP.0005.0355E</b>	<b>The Allow Recursive Polling parameter "{0}" is invalid. Valid values are "yes" and "no".</b>
<b>Explanation</b>	The specified Allow Recursive Polling parameter is neither "yes" nor "no".
<b>Action</b>	Specify either "yes" or "no" for the Allow Recursive Polling parameter.

**DEP.0005.0356E**      **The Run As User value "{0}" contains invalid character "{1}". For more information about illegal characters, see the webMethods Integration Server documentation.**

**Explanation**      The Run As User value contains illegal characters.

**Action**      For more information about illegal characters, see the webMethods Integration Server documentation.

**DEP.0005.0357E**      **No value was provided for the required Run services as user parameter.**

**Explanation**      The Run services as user parameter value is not specified.

**Action**      Specify a value for the Run services as user parameter. For more information, see the webMethods Integration Server documentation.

**DEP.0005.0358E**      **"{0}" is an invalid value for the File Polling Interval parameter. Valid values are 1-9999.**

**Explanation**      The value specified for the File Polling Interval parameter is invalid.

**Action**      Specify a valid value between 1 and 9999 for the File Polling Interval parameter.

**DEP.0005.0359E**      **No value is specified for the File Polling Interval parameter. Valid values are 1-9999.**

**Explanation**      No value is specified for the File Polling Interval parameter.

**Action**      Specify a value between 1 through 9999 for the File Polling Interval parameter.

**DEP.0005.0360E**      **"{0}" is an invalid value for the Cleanup Interval parameter. Valid values are 1-9999.**

**Explanation**      The value specified for the Cleanup Interval parameter is invalid.

**Action**      Specify a value between 1 and 9999 for the Cleanup Interval parameter.

**DEP.0005.0361E**      **"{0}" is an invalid value for the Maximum Number of Invocation Threads parameter. Valid values are 1-10.**

**Explanation**      The value specified for the Maximum Number of Invocation Threads parameter is invalid.

**Action**      Specify a value between 1 and 10 for the Maximum Number of Invocation Threads parameter.

**DEP.0005.0362E**      **No value provided for the required Maximum Number of Invocation Threads parameter.**

**Explanation**      No value was specified for the Maximum Number of Invocation Threads parameter.

**Action**      Specify a value between 1 and 10 for the Maximum Number of Invocation Threads parameter.

---

DEP.0005.0363E	<b>"{0}" is an invalid value for the Port parameter. The Port parameter requires an integer value.</b>
<b>Explanation</b>	The value specified for the Port parameter is not an integer.
<b>Action</b>	Specify a valid value for the Port parameter.
DEP.0005.0364E	<b>"{0}" is an invalid value for the Port parameter. The value for the Port parameter must be greater than -1.</b>
<b>Explanation</b>	The value for the Port parameter is not valid.
<b>Action</b>	Specify a valid value for the Port parameter.
DEP.0005.0365E	<b>No value was specified for the required Port parameter. Specify a value for the Port parameter.</b>
<b>Explanation</b>	No value was specified for the Port parameter.
<b>Action</b>	Specify a valid integer type value that is greater than -1 for the Port parameter.
DEP.0005.0366E	<b>The Client Authentication value: "{0}" is invalid. Valid values are 'true' and 'false'.</b>
<b>Explanation</b>	The specified Client Authentication value is neither "true" nor "false".
<b>Action</b>	Specify either "true" or "false" for the Client Authentication value.
DEP.0005.0367E	<b>The Host parameter requires a value.</b>
<b>Explanation</b>	The value for the Host parameter was not specified.
<b>Action</b>	Specify a value for the Host parameter.
DEP.0005.0368E	<b>"{0}" is an invalid value for the Type parameter. Valid values are "pop3" and "imap".</b>
<b>Explanation</b>	The value specified for the Type parameter is invalid.
<b>Action</b>	Specify either "pop3" or "imap" for the Type parameter.
DEP.0005.0369E	<b>Specify a value for the Type parameter. Valid values are "pop3" and "imap".</b>
<b>Explanation</b>	No value is specified for the required Port parameter.
<b>Action</b>	Specify either "pop3" or "imap" for the Port parameter.

- DEP.0005.0370E**      **The user name value: "{0}" contains an invalid character: "{1}". Refer to the Administering Integration Server guide for listed illegal characters.**
- Explanation**      The user name value contains illegal characters.
- Action**              For information about legal characters for user accounts, see the Administering Integration Server guide.
- 
- DEP.0005.0371E**      **No value provided for user name. This field is mandatory.**
- Explanation**      No value is provided for user name.
- Action**              Specify a value for the user name. For information about the legal characters for user accounts, see the Administering Integration Server guide.
- 
- DEP.0005.0372E**      **Invalid value provided for the "Log out after each mail check" parameter: "{0}". Valid values are "yes" and "no".**
- Explanation**      The specified value for the "Log out after each mail check" parameter is neither "yes" nor "no".
- Action**              Specify a valid value for the "Log out after each mail check" parameter. Valid values are "yes" and "no".
- 
- DEP.0005.0373E**      **The Authorize value "{0}" is invalid. Valid values are Yes and No.**
- Explanation**      The specified Authorize value is neither Yes and No.
- Action**              Specify either Yes or No for the Authorize value.
- 
- DEP.0005.0374E**      **"{0}" is an invalid value for the Time Interval parameter. Valid values are 1-9999.**
- Explanation**      The value specified for the Time Interval parameter is invalid.
- Action**              Specify a valid value between 1 and 9999 for the Time Interval parameter.
- 
- DEP.0005.0375E**      **Specify a value for the required Time Interval parameter. Valid values are 1-9999.**
- Explanation**      The required Time Interval parameter has not been specified.
- Action**              Specify a value from 1 through 9999 for the Time Interval parameter.
- 
- DEP.0005.0376E**      **The Reply value: "{0}" is invalid. Valid values are "yes" and "no".**
- Explanation**      The specified Reply value is neither "yes" nor "no".
- Action**              Specify either "yes" or "no" for the Reply value.

---

DEP.0005.0377E	<b>The Send reply e-mail on error value "{0}" is invalid. Valid values are Yes and No.</b>
<b>Explanation</b>	The Send reply e-mail on error value is set to a value other than Yes or No.
<b>Action</b>	Specify either Yes or No for the Send reply e-mail on error value.
DEP.0005.0378E	<b>The Remove value: "{0}" is invalid. Valid values are "yes" and "no".</b>
<b>Explanation</b>	The specified Remove value is neither "yes" nor "no".
<b>Action</b>	Specify either "yes" or "no" for the Remove value.
DEP.0005.0379E	<b>"{0}" is an invalid value for the Delete invalid messages parameter. Valid values are Yes and No.</b>
<b>Explanation</b>	The value specified for the Delete invalid messages parameter is invalid.
<b>Action</b>	Specify a valid value of Yes or No for the Delete invalid messages parameter.
DEP.0005.0380E	<b>The Multithread processing value "{0}" is invalid. Valid values are Yes and No.</b>
<b>Explanation</b>	The Multithread processing is set to a value other than Yes or No.
<b>Action</b>	Specify either Yes or No for the Multithread processing value.
DEP.0005.0381E	<b>"{0}" is an invalid value for the Number of threads if multithreading is turned on parameter. Valid values are 1-99.</b>
<b>Explanation</b>	The value specified for the Number of threads if multithreading is turned on field is invalid.
<b>Action</b>	Specify a value between 1 and 99 for the Number of threads if multithreading is turned on field.
DEP.0005.0382E	<b>Enter a value for the Number of threads if multithreading is turned on parameter. Valid values are 1-99.</b>
<b>Explanation</b>	There is no value set for the Number of threads if multithreading is turned on parameter.
<b>Action</b>	Specify a value between 1 and 99 for the Number of threads if multithreading is turned on parameter.
DEP.0005.0383E	<b>The Break Mmsg value: "{0}" is invalid. Valid values are "yes" and "no".</b>
<b>Explanation</b>	The specified Break Mmsg value is neither "yes" nor "no".
<b>Action</b>	Specify either "yes" or "no" for the Break Mmsg value.

<b>DEP.0005.0384E</b>	<b>The Include Headers value: "{0}" is invalid. Valid values are "yes" and "no".</b>
<b>Explanation</b>	The specified Include Headers value is neither "yes" nor "no".
<b>Action</b>	Specify either "yes" or "no" for the Include Headers value.
<b>DEP.0005.0421E</b>	<b>Unknown system type: "{0}".</b>
<b>Explanation</b>	The source system type is unknown, which indicates that your version of Deployer is out of date.
<b>Action</b>	Ensure that you have the latest version of the WmDeployer package.
<b>DEP.0005.0422E</b>	<b>Unable to invoke "{1}" because the connection object is of an unknown type. Its value is: "{0}".</b>
<b>Explanation</b>	The system type object is set to a value that is not recognized. This issue might occur if the user manually edits the project XML file.
<b>Action</b>	Rebuild the project file and map the steps again. Do not manually edit the project file.
<b>DEP.0005.0423E</b>	<b>Deployer encountered an exception while writing the bytes for package "{0}" to the output stream in preparation for deployment to the target "{1}".</b>
<b>Explanation</b>	An exception occurred when Deployer tried to write the package data to disk. That exception can occur for the following reasons:  - The I/O operation failed or was interrupted while accessing the build file.  - A security violation occurred, which typically means that the user running Deployer lacks the correct privileges to access the files.
<b>Action</b>	Verify that the file system is not corrupt and that adequate disk space is available for writing new files. Also verify that the user has appropriate privileges to write files on the file system.
<b>DEP.0005.0430</b>	<b>There is no logical server defined for the specified Server ID.</b>
<b>Explanation</b>	Either no logical server is defined in the WmDesigner service on the target Integration Server server, or the server is not up and running and available for process model deployment.
<b>Action</b>	Verify that the logical server is defined in the WmDesigner service on the target Integration Server server and that the server is available.

<b>DEP.0005.0431</b>	<b>The most-likely fix for that is to use webMethods Administrator on your target server to define a logical server with the name: "{0}".</b>
<b>Explanation</b>	This problem occurs when the logical server is not defined in the WmDesigner service on the target Integration Server server for process model deployment.
<b>Action</b>	Verify that the logical server is defined in the WmDesigner service on the target Integration Server server.
<b>DEP.0005.0433E</b>	<b>Cannot associate {0} ACL "{1}", with "{2}" because user "{3}" is not in the Write ACL: "{4}" .</b>
<b>Explanation</b>	Cannot associate the ACL because the user is not a member of the Write ACL.
<b>Action</b>	Add the user to the Write ACL.
<b>DEP.0005.0435E</b>	<b>Deployer cannot suspend selected triggers. You can suspend selected triggers only with Integration Server 6.0.1 Fix 144, Integration Server 6.1 Fix 22, or Integration Server 6.5 and later. Alternatively, you can suspend all triggers in the project properties.</b>
<b>Explanation</b>	Selected trigger suspension is supported only in the following releases: <ul style="list-style-type: none"> <li>- Integration Server 6.0.1 Fix 144</li> <li>- Integration Server 6.1 Fix 22.</li> <li>- Integration Server 6.5 and later</li> </ul>
<b>Action</b>	You can suspend all triggers in the project properties.
<b>DEP.0005.0447I</b>	<b>The "{0}" file was deployed.</b>
<b>Explanation</b>	This message occurs when a user deploys files.
<b>Action</b>	Check whether the files are deployed or not.
<b>DEP.0005.0449E</b>	<b>Deployer could not suspend the adapter notifications. Adapter suspension is supported only with Integration Server 6.5 and later.</b>
<b>Explanation</b>	Adapter notifications could not be suspended because this functionality is only supported for Integration Server 6.5 and later.
<b>Action</b>	None.

<b>DEP.0005.0457E</b>	<b>Suspend adapter notifications prior to deploying packages. Failure to suspend adapter notifications during deployment can cause problems on the target.</b>
<b>Explanation</b>	Adapter notifications were not suspended prior to package deployment.
<b>Action</b>	Check the Integration Server logs and error messages in the output report for more information.
<b>DEP.0005.0458E</b>	<b>Deployer suspended adapter notification "{0}" but could not verify status.</b>
<b>Explanation</b>	Deployer suspended the adapter notification but was unable to verify its status after the suspension.
<b>Action</b>	For more information, check the Integration Server logs and error messages in the output report.
<b>DEP.0005.0459E</b>	<b>Deployer resumed adapter notification "{0}" but could not verify status.</b>
<b>Explanation</b>	Deployer resumed adapter notification but could not verify the status.
<b>Action</b>	Check the Integration Server logs and error messages in the output report for more information.
<b>DEP.0005.0460E</b>	<b>Suspend trigger "{0}" failed: {1}</b>
<b>Explanation</b>	Deployer could not suspend the trigger.
<b>Action</b>	Check the Integration Server logs and error messages in the output report for more information.
<b>DEP.0005.0461E</b>	<b>Suspend adapter notification "{0}" failed: {1}</b>
<b>Explanation</b>	Suspension of adapter notification failed.
<b>Action</b>	Recreate the build and deploy again. If the problem persists, check the target server adapter settings.
<b>DEP.0005.0477E</b>	<b>The source group has no name. Deployer cannot deploy an undefined group.</b>
<b>Explanation</b>	This message occurs when Deployer attempts to roll back an undefined group.
<b>Action</b>	Verify that the specified group is defined on the source server.
<b>DEP.0005.0482E</b>	<b>The source ACL has no name. Deployer cannot deploy an undefined ACL.</b>
<b>Explanation</b>	Deployer attempted to roll back an undefined ACL.
<b>Action</b>	Verify that the specified ACL exists on the source server.

<b>DEP.0005.0492</b>	<b>The Extended Setting in the source has no name. Deployer cannot deploy an undefined Extended Setting.</b>
<b>Explanation</b>	This message occurs when Deployer attempts to roll back of an undefined Extended Setting.
<b>Action</b>	Verify that the specified Extended Setting exists on the target server.
<b>DEP.0005.0496E</b>	<b>The Trading Networks instance is not currently available on the target server "{0}". Please check your network connection and verify that the Trading Networks instance is installed, configured, and running.</b>
<b>Explanation</b>	The target Trading Networks server is not accessible due to a network connection problem.
<b>Action</b>	Check your network connection. Verify that the Trading Networks instance is installed, configured, and running.
<b>DEP.0005.0501E</b>	<b>Deployer issued the following exception after it failed to load the variable substitution object {0}.</b>
<b>Explanation</b>	The map file: <code>&lt;srcDir&gt;\&lt;pkg&gt;\&lt;winDir&gt;\&lt;path&gt;\&lt;projName&gt;\&lt;mapName&gt;\&lt;dynamicName&gt;\&lt;targetName&gt;.ml</code> is either corrupt or not present.
<b>Action</b>	Verify that the map file exists. If it does, you might need to use Deployer to recreate your map and variable substitution actions.
<b>DEP.0005.0505E</b>	<b>ERROR: Failed to generate IData for Port. The following exception was thrown: {0}</b>
<b>Explanation</b>	The port type is unknown. This indicates that your version of Deployer is out of date.
<b>Action</b>	See the error log of the Deployer server.
<b>DEP.0005.0506</b>	<b>Variable {2}, in {0} "{1}" will be changed from "{3}" to "{4}" on the target system.</b>
<b>Explanation</b>	This message is displayed in the deployment report when the variable is substituted during deployment.
<b>Action</b>	Verify that the displayed variables are substituted.
<b>DEP.0005.0600E</b>	<b>The target server is Integration Server {0}, which does not support this feature. Deployer cannot update the following adapter connections with the variable substitution values: {1}</b>
<b>Explanation</b>	The version of the target Integration Server is a version prior to version 6.1. Versions of the Integration Server prior to 6.1 do not support the APIs that are required to update the adapter connections.
<b>Action</b>	Either upgrade the target Integration Server to version 6.1 or later, or manually update the Adapter connections on the target system.

<b>DEP.0005.0615E</b>	<b>Deployer encountered an error while retrieving current values for adapter connection "{0}".</b>
<b>Explanation</b>	Deployer invoked the <code>wm.art.admin.connection:getResourceConfiguration</code> service but was unable to get current values for the adapter connection in the vars sub page.
<b>Action</b>	The <code>wm.art.admin.connection:getResourceConfiguration</code> service might not be operational or the WmART package is not installed on the target machine. Verify that both the service and the package are installed and operational.
<b>DEP.0005.0706</b>	<b>Rollback failed. For more information, see the rollback report and the Integration Server log.</b>
<b>Explanation</b>	This message occurs when a rollback operation fails.
<b>Action</b>	Review the rollback report and take appropriate action.
<b>DEP.0005.0850E</b>	<b>Deployer issued the following error while rolling back the contact type: "{0}"</b>
<b>Explanation</b>	Deployer issued an exception while rolling back the contact type.
<b>Action</b>	Contact the Trading Networks target administrator.
<b>DEP.0005.0851E</b>	<b>Deployer issued the following exception while deleting the document type during rollback: "{0}"</b>
<b>Explanation</b>	An exception occurred while deleting the document type.
<b>Action</b>	Contact the administrator of the target Trading Networks system for assistance.
<b>DEP.0005.0852E</b>	<b>Deployer issued the following exception while deleting the field group during rollback: "{0}"</b>
<b>Explanation</b>	An exception occurred while deleting the field group.
<b>Action</b>	Contact the administrator of the target server for assistance.
<b>DEP.0005.0854E</b>	<b>Deployer issued the following exception while deleting the external ID type during rollback: "{0}".</b>
<b>Explanation</b>	An exception occurred while deleting the external ID type during rollback.
<b>Action</b>	Verify that target server is running, then try the deleting the external ID type again.

DEP.0005.0856E	<b>Deployer issued the following exception while deleting the processing rule during rollback: "{0}"</b>
<b>Explanation</b>	An exception occurred while deleting the processing rule.
<b>Action</b>	Contact the administrator of the target server for assistance.
DEP.0005.0858E	<b>Deployer issued the following exception while deleting the profile during rollback: "{0}"</b>
<b>Explanation</b>	An exception occurred while deleting the profile.
<b>Action</b>	Verify that the target server is running. Then try the deletion again.
DEP.0005.0859E	<b>Deployer could not suspend the "{0}" scheduled service type with service name "{1}" because it was deployed to a clustered Integration Server.</b>
<b>Explanation</b>	The service was deployed to a clustered Integration Server and could not be suspended.
<b>Action</b>	Suspend the service manually at each target.
DEP.0005.0860E	<b>Deployer could not resume the scheduled service type "{0}" with service name "{1}". The service was deployed to a clustered Integration Server and could not be resumed. You must resume the service manually at each target.</b>
<b>Explanation</b>	The service was deployed to a clustered Integration Server and could not be resumed.
<b>Action</b>	Resume the service manually at each target.
DEP.0005.0861E	<b>Scheduled services are being deployed to a clustered Integration Server and cannot be started after deployment.</b>
<b>Explanation</b>	Scheduled services cannot be started on the clustered target.
<b>Action</b>	Start the services manually on each clustered target.
DEP.0005.0862E	<b>Scheduled services have been deployed to a clustered Integration Server and were not suspended after deployment. If suspension is required, then do so manually at each target.</b>
<b>Explanation</b>	Scheduled services could not be suspended at the clustered target after deployment
<b>Action</b>	Suspend the services manually at each target.

<b>DEP.0005.0864E</b>	<b>Deployer requires that scheduled services be updated at a clustered Integration Server, but this is not supported with this release. You can update the scheduled services by deploying them to each of the individual Integration Servers in the cluster.</b>
<b>Explanation</b>	This deployment candidate requires that scheduled services be updated at a clustered Integration Server, which is not supported with this release.
<b>Action</b>	Update the services by deploying to each of the individual Integration Servers in the cluster.
<b>DEP.0005.0869E</b>	<b>The deployment failed and Deployer is performing an automatic rollback. Please see the separate rollback report for more information about the failed deployment.</b>
<b>Explanation</b>	This message occurs when a deployment fails and an automatic rollback occurs.
<b>Action</b>	Please see the Rollback report and take appropriate action.
<b>DEP.0005.1003E</b>	<b>An IO exception occurred while attempting to access: "{0}". Exception details follow: "{1}".</b>
<b>Explanation</b>	An exception occurred when Deployer tried to create, write data to, or save a file. This exception can occur for the following reasons: <ul style="list-style-type: none"> <li>- The I/O operation failed or was interrupted while accessing the build file.</li> <li>- A security violation has occurred, which typically means that the user running Deployer lacks appropriate privileges to access the files.</li> </ul>
<b>Action</b>	Verify that the file system is not corrupt and that adequate disk space is available for creating, writing, and/or saving new files. Also verify that the user has proper privileges to create, write, and save files on the file system.
<b>DEP.0005.1004E</b>	<b>An exception occurred while attempting to access "{0}". Exception details follow: "{1}".</b>
<b>Explanation</b>	An exception occurred when Deployer tried to access (that is, create, save, read, or load) the indicated <object>, where <object> is one of the following: checkpoint, deployment, build, deployReport, targetFileName, or targetServer. Possible causes of the exception include the following: <ul style="list-style-type: none"> <li>- The deployment, reportFiles, or targetFile Object could not be loaded from the file system.</li> <li>- An I/O operation failed or was interrupted while accessing the build or checkpoint file.</li> <li>- A security violation has occurred, which typically means that the user running Deployer does not have privileges to access files necessary to perform the deploy operation.</li> <li>- A target Integration Server Adapter and/or Trigger could not be suspended/resumed.</li> </ul>

	<ul style="list-style-type: none"> <li>- A variable substitution failed.</li> <li>- Deployer could not obtain a connection to a target server.</li> </ul>
<b>Action</b>	<p>Verify the following:</p> <ul style="list-style-type: none"> <li>- The file system is not corrupt.</li> <li>- Adequate disk space is available for creating and/or saving new files.</li> <li>- The user attempting this action has the proper authority to create and save files on the file system.</li> <li>- The target server is running, and is reachable on the network.</li> </ul>
<b>DEP.0005.1005E</b>	<b>You are not authorized to deploy the "{0}" project.</b>
<b>Explanation</b>	The user does not have the authorization to deploy the specified project.
<b>Action</b>	Ask an administrator or user that has deploy authorization to perform the action for you. Alternatively, have an administrator update your authorization to assign you deploy authorization for the project.
<b>DEP.0005.1006E</b>	<b>You are not authorized to deploy the "{0}" project for the following reason: "{1}".</b>
<b>Explanation</b>	An error occurred when invoking the service on the host Integration Server. Integration Server cannot determine whether the user is authorized to deploy the specified project.
<b>Action</b>	Verify that the host Integration Server is still running. If you are running Deployer from a remote location, verify the network connectivity between the Deployer user interface and the server.
<b>DEP.0005.1007E</b>	<b>The following exception occurred while attempting to process "{0}": "{1}"</b>
<b>Explanation</b>	<p>In the message, &lt;subMessage&gt; is one of the following sub-messages that Deployer displays to provide additional information about the exception: -&lt;targetFileName&gt; - An exception occurred while performing a [remote] invoke of the service: &lt;ISServiceName&gt;. Exception details follow: &lt;exceptionInfo&gt; - An exception occurred while attempting to XMLDecode the file: &lt;buildFileName&gt;. Exception details follow: &lt;exceptionInfo&gt;. - &lt;errorMessageReturnedFromIS&gt; - An exception occurred getting a Trading Networks, TN, docType object. That is most likely caused by a user-defined extension to the TN type BizDocType. Copy the jar files, which should be found in the &lt;webM install dir&gt; \ \IntegrationServer \ \packages \ \WmTN \ \code \ \jars directory, containing those extensions into the WmDeployer/code/jars directory. - Source package is of type upgrade and required target package version is null. - Error: no Logical Server for Server ID" The most-likely fix for that is to use webMethods Administrator on your target server to define a logical server with the name: &lt;sourceSystemName&gt;. - An Exception occurred while attempting to IDataBinCoder the file: '&lt;buildFileName&gt;'. Exception details follow: &lt;exceptionInfo&gt; - Overwrite 'everything else' field is set to &lt;overwriteEverythingElseString&gt;, which is invalid. - The Port: &lt;sourcePortName&gt;, associated with Package: &lt;packageName&gt; - Disabling</p>

of the Port: <sourcePortName>, associated with Package: <packageName> - Enabling of the Port: <sourcePortName>, associated with Package: <packageName> - Resuming the scheduled-service: " + scheduledServiceName - Suspending the scheduled-service: " + scheduledServiceName - <serviceName> - A SOAP fault occurred while performing a remote invoke of the service: <ISServiceName>.The SOAP Fault string follows: <faultString> - Getting information about the Port: <sourcePortName>, associated with Package: <packageName> The reason for the exception can be one of the following:

- There is a problem with connectivity to the target Integration Server.
- The target Integration Server is not running.
- The target Integration Server requires a Broker Server, but no Broker Server is connected to it.
- There is a user-defined extension to a Trading Networks document type, and Deployer does not have access to the associated jar files.
- You specified a partial package for deployment; however, the package does not exist on the target.
- You specified a logical server that is not defined on the target.
- The overwrite flag is invalid, which can only occur if the build file was manually edited.

**Action**

Based on the reason for the exception, perform one of the following:

- Verify the network connectivity between the Deployer server and each target server.
- Verify that each target server is running.
- If the target Integration Server requires that a Broker be connected to it, ensure that a Broker is connected.
- If a user-defined Trading Networks document type is in use, ensure Deployer has access to the associated jar files. To do so copy the jar files located in the <serverDirectory>\packages\WmTN\code\jars directory (which contain the Trading Networks document type extensions) to the <serverDirectory>\packages\WmDeployer\code\jars directory.
- If you specified a partial package and the package does not exist on the target, either remove the package from the deployment or specify a full package for deployment.
- If the definition of a logical server is missing, use webMethods Administrator on your target server to define a logical server with the name indicated in the error message.
- If the overwrite flag is invalid, ensure that your build file has not been manually edited.

<b>DEP.0005.1008E</b>	<b>The deploy report: "{0}" already exists. Please move it to a different directory.</b>
<b>Explanation</b>	The deploy report already exists.
<b>Action</b>	Move the existing deploy report file to a different directory.
<b>DEP.0005.1010</b>	<b>An error occurred interacting with server: "{0}". Exception details follow: "{1}"</b>
<b>Explanation</b>	This error occurs if the servers in a cluster are not up and running or if the cluster is invalid for some reason.
<b>Action</b>	Verify that the cluster is configured correctly and that all servers are up and running.
<b>DEP.0005.1011E</b>	<b>Error invoking service wm.deployer.UIAuthorization. Contact Software AG support.</b>
<b>Explanation</b>	Error invoking service wm.deployer.UIAuthorization.
<b>Action</b>	Contact Software AG support.
<b>DEP.0005.1014E</b>	<b>An exception occurred while attempting to close the file "{0}". This will not affect deployment, but will keep a lock on the file. Exception details follow: "{1}"</b>
<b>Explanation</b>	The build file could not be closed because an I/O exception occurred. The exception can occur for the following reasons:  <ul style="list-style-type: none"> <li>- The I/O operation failed or was interrupted while accessing the build file.</li> <li>- A security violation has occurred, which typically means that the user running Deployer does not have correct privileges to access the files.</li> </ul>
<b>Action</b>	Verify that the file system is not corrupt and that adequate disk space is available for saving new files. Also verify that the user attempting this action has proper privileges to save files on the file system.
<b>DEP.0005.1015E</b>	<b>The Overwrite Existing field is set to {0}, which is invalid.</b>
<b>Explanation</b>	The overwrite flag was set to a value that the code did not recognize. This occurs when a user has manually edited the XML in the target file.
<b>Action</b>	Repeat the build and map steps. Do not manually edit the target file.
<b>DEP.0005.1018E</b>	<b>A null aliasValues IData was returned from the invocation of wm.server.remote:getAliasValue against remote host: {0} Cannot continue with deployment of Trading Networks. Make sure the WmTN package and the Trading Networks JDBC pool on the target server are enabled.</b>
<b>Explanation</b>	Deployer invoked the wm.server.remote:getAliasValue service while deploying Trading Networks assets, and a null value was returned.
<b>Action</b>	Make sure the WmTN package and the Trading Networks JDBC pool on the target server are enabled.

**DEP.0005.1024E**      **The target cluster {0} is not currently available. Deployer is skipping that cluster. Check your network connection and make sure all target servers ({1}) are running within the cluster.**

**Explanation**      Deployer cannot connect to the target cluster servers due to network connection problems.

**Action**            Check your network connection. You should be able to access the target server machines.

**DEP.0005.1025W**      **webMethods Deployer does not support deployment of certificates. Certificates for profile "{0}" will not be deployed.**

**Explanation**      Deployer does not support the deployment of certificates.

**Action**            Deployer does not support deployment of certificates. Certificates for profile "{0}" will not be deployed.

**DEP.0005.1026E**      **Deployer cannot enable adapter connection {0} on target {1}. Make sure the pub.art.connection:enableConnection service is operational and the WmART package is installed on the target server.**

**Explanation**      Deployer invoked the pub.art.connection:enableConnection service but could not enable adapter notification on the target server after deployment.

**Action**            Make sure the pub.art.connection:enableConnection service is operational and the WmART package is installed on the target server.

**DEP.0005.1027E**      **Adapter connection {0} on target {1} is not enabled. Make sure the pub.art.connection:queryConnectionState service is operational and the WmART package is installed on the target server.**

**Explanation**      Deployer invoked the pub.art.connection:queryConnectionState service but could not enable adapter connections on the target server after deployment.

**Action**            Make sure the pub.art.connection:queryConnectionState service is operational and the WmART package is installed on the target server.

**DEP.0005.1028E**      **Deployer cannot update adapter connection "{0}" on target "{1}".**

**Explanation**      Deployer invoked the wm.art.dev.connection:updateConnectionNode service but could not update adapter connections on the target server after deployment.

**Action**            Make sure the wm.art.dev.connection:updateConnectionNode service is operational and the WmART package is installed on the target server.

<b>DEP.0005.1029E</b>	<b>Unable to disable adapter connection {0} on target {1}. Check the Integration Server logs and error messages in the output report for more information.</b>
<b>Explanation</b>	Unable to disable adapter connection on target.
<b>Action</b>	Check the Integration Server logs and error messages in the output report for more information.
<b>DEP.0005.1030E</b>	<b>Deployer encountered an error retrieving current values for adapter connection {0} on target {1}. Make sure the <code>wm.art.admin.connection:getResourceConfiguration</code> service is operational and the WmART package is installed on the target server.</b>
<b>Explanation</b>	Deployer invoked the <code>wm.art.admin.connection:getResourceConfiguration</code> service but could not get current values for the adapter connection in the varsub page.
<b>Action</b>	Make sure the <code>wm.art.admin.connection:getResourceConfiguration</code> service is operational and the WmART package is installed on the target server.
<b>DEP.0005.1031E</b>	<b>Deployer cannot set the adapter notification for {0} on target {1}. The selected adapter notification might be active on the target server. Review the project settings.</b>
<b>Explanation</b>	Deployer could not set variable substitution values for adapter notification.
<b>Action</b>	The selected adapter notification might be active on the target server. Review project settings to make sure they are appropriate.
<b>DEP.0005.1032E</b>	<b>The adapter notification for {0} on target {1} is not enabled.</b>
<b>Explanation</b>	Deployer invoked the <code>pub.art.notification:queryPollingNotificationState</code> service but could not enable adapter notification on the target server after deployment.
<b>Action</b>	Make sure the <code>pub.art.notification:queryPollingNotificationState</code> service is operational and the WmART package is installed on the target server.
<b>DEP.0005.1033E</b>	<b>Deployer cannot enable adapter notification for {0} on target {1}.</b>
<b>Explanation</b>	Deployer invoked the <code>pub.art.notification:enablePollingNotification</code> service, but could not enable adapter notification on the target server after deployment.
<b>Action</b>	Make sure the <code>pub.art.notification:enablePollingNotification</code> service is operational and the WmART package is installed on the target server.
<b>DEP.0005.1034E</b>	<b>Deployer cannot disable the adapter notification for {0} on target {1}. Check the Integration Server logs for more information. Re-create the build and redeploy if necessary.</b>
<b>Explanation</b>	Deployer cannot disable adapter notification.
<b>Action</b>	Check the Integration Server logs for more information. Re-create the build and deploy again if necessary.

<b>DEP.0005.1039E</b>	<b>Deployer cannot find the deployment reports for deployment candidate {0}.</b>
<b>Explanation</b>	There are no reports for the deployment candidate.
<b>Action</b>	Try to view the reports using a simulate or deploy operation.
<b>DEP.0005.1040E</b>	<b>Invalid ID for deployment report. Please use the list command to verify your inputs.</b>
<b>Explanation</b>	This message occurs when a Deployer user attempts to view the deployment report through command line interface and the report ID does not exist.
<b>Action</b>	Perform simulate and deploy operations and refer to the report ID shown.
<b>DEP.0005.1041E</b>	<b>Deployer cannot read report {0}.</b>
<b>Explanation</b>	This message occurs when Deployer is unable to display reports in a browser.
<b>Action</b>	Ensure that the report HTML or XML files are valid and not corrupted.
<b>DEP.0005.1045E</b>	<b>An error occurred while attempting to import functional permissions: class: "{0}", message: "{1}"</b>
<b>Explanation</b>	This error occurs when Deployer is unable to deploy Trading Network functional permissions, and it indicates that there might be a problem with the build.
<b>Action</b>	Verify that the selected functional permissions are valid on the source server, and rebuild if necessary.
<b>DEP.0005.1049E</b>	<b>An exception occurred while deleting DLS "{0}"</b>
<b>Explanation</b>	An exception occurred while deleting DLS.
<b>Action</b>	Contact the administrator of the target Trading Networks system for assistance.
<b>DEP.0005.1050E</b>	<b>An exception occurred while deleting the "{0}" functional permission.</b>
<b>Explanation</b>	An exception occurred while deleting the functional permission.
<b>Action</b>	Verify that the target server is running and try the deletion again.
<b>DEP.0005.1055E</b>	<b>An error occurred while attempting to import DLSs. The following is the error information from Trading Networks: class: "{0}", message: "{1}"</b>
<b>Explanation</b>	Deployer displays this error when it cannot deploy Trading Network DLSs. It indicates that there might be a problem with the build.
<b>Action</b>	Verify that the selected DLSs are valid on the source server and rebuild if necessary.

---

DEP.0005.1057E	<b>Invalid ID for build report. Use the list command to verify your inputs.</b>
<b>Explanation</b>	Deployer displays this message when a Deployer user attempts to view the build report through the command line interface and the specified report ID does not exist.
<b>Action</b>	Perform a build operation on the deployment sets and refer to the build report ID shown.
DEP.0005.1058E	<b>Unable to read JMS trigger {0}.</b>
<b>Explanation</b>	Deployer is unable to read the JMS trigger files from the source server.
<b>Action</b>	Ensure that the JMS trigger was created properly on the source server.
DEP.0005.1059E	<b>Unable to read build zip file.</b>
<b>Explanation</b>	Deployer is unable to read the build zip file while deploying.
<b>Action</b>	Verify that the project build file is correct, and ensure that it has not been corrupted.
DEP.0005.1060E	<b>Error deploying to cluster. One or more of the nodes in the cluster are not running. Check the cluster configuration and the extended settings for further information.</b>
<b>Explanation</b>	Not all of the nodes in the cluster are running.
<b>Action</b>	Check the cluster configuration and the extended settings.
DEP.0005.1063	<b>Action failed: The target server is unavailable. See the Integration Server logs for more information.</b>
<b>Explanation</b>	The target server is not available.
<b>Action</b>	Check the Integration Server logs for any relevant errors or messages.
DEP.0005.1067E	<b>An error occurred while attempting to import archival services. The following is the error information from Trading Networks:&lt;p&gt;class: "{0}", message: "{1}"&lt;/p&gt;</b>
<b>Explanation</b>	This error occurs when Deployer is unable to deploy the Trading Networks archival services and indicates that there might be a problem with the build.
<b>Action</b>	Verify that the selected archival services are valid on the source server and rebuild if necessary.
DEP.0005.1068E	<b>Automatic rollback in logical cluster group {0} failed because the connection to target server {1} was refused.</b>
<b>Explanation</b>	Deployer displays this message when an automatic rollback fails.
<b>Action</b>	Ensure that the specified server is online and that the network connection works. For more information, see the rollback report and take appropriate action.

**DEP.0005.1069E**      **Deployment in logical cluster group {0} failed. Connection to target server {1} was refused. Deployer will perform rollback on logical group {2}.**

**Explanation**      This error occurs when Deployer is unable to deploy assets to a logical cluster group of target servers.

**Action**      Verify that the servers in the logical cluster group are online and available.

**DEP.0005.1074E**      **Deployer cannot import Trading Networks partner profiles without a My Enterprise profile.**

**Explanation**      Deployer was unable to deploy the Trading Networks partner profile.

**Action**      Verify that a My Enterprise profile exists on the target server. If not, you must deploy the My Enterprise profile first.

**DEP.0005.1076E**      **Deployer encountered an exception while trying to delete {0}. Exception details follow: "{1}"**

**Explanation**      An exception occurred while trying to delete the node.

**Action**      Refresh the node list and try deleting again.

**DEP.0005.1125E**      **Assets in deletion set {0} have unresolved dependencies. Either add the dependent assets or remove the existing assets from the deletion set.**

**Explanation**      Assets in the deletion set have unresolved dependencies.

**Action**      Add the dependent assets, or remove the existing assets from the deletion set.

**DEP.0005.1126E**      **Deployment to a logical cluster failed and Deployer performed a rollback. Refer to the deployment and rollback reports for more details.**

**Explanation**      Deployment to a logical cluster failed and rollback has occurred.

**Action**      See the deployment and rollback reports for more details.

**DEP.0005.1129E**      **Error occured when deploying file to a Target. Please check the target Integration Server logs for details. {0}**

**Explanation**      This error occurs when deploying large files. It indicates that the target server WmDeployerResource package is not operational.

**Action**      Verify that the WmDeployerResource package is installed on the target server. If it is already installed, try re-installing.

<b>DEP.0005.1130E</b>	<b>An error occurred while creating or reading the streaming file {0} corresponding to {1} in the build. Check the target Integration Server logs for details.</b>
<b>Explanation</b>	This error occurs when extracting large files from a source server. It indicates that the WmDeployerResource package is not operational.
<b>Action</b>	Verify that the WmDeployerResource package is installed on the target server. If it is already installed, try re-installing.
<b>DEP.0005.1135E</b>	<b>The deployment or deletion set "{0}" contains unresolved dependencies or references. Please resolve the unresolved dependencies to continue with deployment.</b>
<b>Explanation</b>	The deployment or deletion set contains unresolved dependencies or references.
<b>Action</b>	Resolve the unresolved dependencies or references for the deployment or deletion sets in your project.
<b>DEP.0005.1152E</b>	<b>The delivery of artifacts to the {0} target server failed. For details, check the logs of the target server.</b>
<b>Explanation</b>	The delivery of artifacts to the target server failed.
<b>Action</b>	For more information, check the deployment report and the Integration Server log.
<b>DEP.0005.1153E</b>	<b>The activation of artifacts on the {0} target server failed. For details, check the logs of the target server.</b>
<b>Explanation</b>	The activation of artifacts on the target server failed.
<b>Action</b>	For details, check the deployment report and the Integration Server log.
<b>DEP.0005.1161E</b>	<b>Deployer could not deliver artifacts to {0} because the server is unavailable.</b>
<b>Explanation</b>	The target server is unavailable.
<b>Action</b>	Ensure the target server is running.
<b>DEP.0005.1167E</b>	<b>Unable to delete artifacts previously delivered to {0} because the server is unavailable.</b>
<b>Explanation</b>	The target server is unavailable.
<b>Action</b>	Make sure the target server is running.

<b>DEP.0005.1173E</b>	<b>Skipping the activation of deployment on {0} because the target server is unavailable.</b>
<b>Explanation</b>	Target server is unavailable.
<b>Action</b>	Ensure target server is running.
<b>DEP.0005.1183E</b>	<b>A simulation initiated by user {0} for deployment candidate {1} of project {2} is in progress. Wait until the simulation in progress is complete.</b>
<b>Explanation</b>	Another user is running an operation for this project.
<b>Action</b>	Wait until the other operation finishes.
<b>DEP.0005.1184E</b>	<b>A deployment initiated by the user {0} for deployment candidate {1} of project {2} is in progress. Wait until the deployment in progress is complete.</b>
<b>Explanation</b>	Another user is running an operation for this project.
<b>Action</b>	Wait until the other operation finishes.
<b>DEP.0005.1185E</b>	<b>A rollback initiated by user {0} for deployment candidate {1} of project {2} is in progress. Wait until the rollback in progress is complete.</b>
<b>Explanation</b>	Another user is running an operation for this project.
<b>Action</b>	Wait until the other operation finishes.
<b>DEP.0005.1186E</b>	<b>A checkpoint initiated by user {0} for deployment candidate {1} of project {2} is in progress. Wait until the checkpoint in progress is complete.</b>
<b>Explanation</b>	Another user is running an operation for this project.
<b>Action</b>	Wait until the other operation finishes.
<b>DEP.0005.1187E</b>	<b>You cannot deploy the {0} project because it is not locked.</b>
<b>Explanation</b>	The project was not locked before deployment.
<b>Action</b>	Lock the project.
<b>DEP.0005.1188E</b>	<b>You cannot deploy the {0} project because it is locked by another user.</b>
<b>Explanation</b>	Another user has locked the project.
<b>Action</b>	Wait until the project is unlocked by the other user.

<b>DEP.0005.1189E</b>	<b>You cannot simulate the deployment for the {0} project because it is not locked.</b>
<b>Explanation</b>	The project was not locked before simulation.
<b>Action</b>	Lock the project.
<b>DEP.0005.1190E</b>	<b>You cannot simulate the deployment for the {0} project because it is locked by another user.</b>
<b>Explanation</b>	Another user has locked the project.
<b>Action</b>	Wait until the project is unlocked by the other user.
<b>DEP.0005.1191E</b>	<b>You cannot rollback the deployment for the {0} project because it is not locked.</b>
<b>Explanation</b>	The project was not locked before you attempted to roll back the deployment.
<b>Action</b>	Lock the project.
<b>DEP.0005.1192E</b>	<b>You cannot rollback the deployment for the {0} project because it is locked by another user.</b>
<b>Explanation</b>	Another user has locked the project.
<b>Action</b>	Wait until the project is unlocked by the other user.
<b>DEP.0005.1193E</b>	<b>You are not authorized to generate a checkpoint for the {0} project because it is not locked.</b>
<b>Explanation</b>	The project was not locked before you attempted to generate a checkpoint.
<b>Action</b>	Lock the project.
<b>DEP.0005.1194E</b>	<b>You are not authorized to generate a checkpoint for the {0} project because it is locked by a different user.</b>
<b>Explanation</b>	Another user has locked the project.
<b>Action</b>	Wait until the project is unlocked by the other user.
<b>DEP.0005.1195E</b>	<b>The deletion of delivered to the {0} target server artifacts failed. For details, check the logs of the target server.</b>
<b>Explanation</b>	The deletion of delivered to the target server artifacts failed.
<b>Action</b>	Check the deployment report for details. There might be additional information in the log of Integration Server.

<b>DEP.0005.1201E</b>	<b>Repository-based deployment does not support the rollback operation for the mapped target servers.</b>
<b>Explanation</b>	Repository-based projects do not support rollback operations for the mapped target servers.
<b>Action</b>	Only Deploy operation is supported.
<b>DEP.0005.1203E</b>	<b>There are no target servers or target groups mapped for deployment candidate {0}.</b>
<b>Explanation</b>	There are no target servers or target groups mapped to the deployment set in the map step.
<b>Action</b>	Map at least one deployment set to a target server or a target group in the map step.
<b>DEP.0005.1204E</b>	<b>The success flag does not match any messages returned by the target server {0}.</b>
<b>Explanation</b>	Either the target server returned the success flag of true and the messages from the target server contains error messages, or the target returned a success flag of false and the message from the target server does not contain an error message.
<b>Action</b>	Check the target server logs or contact Software AG Global Support.
<b>DEP.0005.1206E</b>	<b>An error occurred while saving deployment candidate {0}.</b>
<b>Explanation</b>	An error encountered while saving the deployment candidate.
<b>Action</b>	Contact Software AG Global Support.
<b>DEP.0005.1210E</b>	<b>Deployer did not delete the assets from {0} because the server is unavailable.</b>
<b>Explanation</b>	The target server is unavailable.
<b>Action</b>	Ensure target server is running.
<b>DEP.0005.1212E</b>	<b>Deployer failed to delete the assets on the target server {0}. For more information, see the target server's logs.</b>
<b>Explanation</b>	The deletion of assets on the target server failed.
<b>Action</b>	Check the deployment report and the Integration Server log for details.
<b>DEP.0005.1215E</b>	<b>Deployer failed to delete the assets on the target server {0}. For more information, see the target server's logs.</b>
<b>Explanation</b>	The deletion of assets on the target server failed.
<b>Action</b>	Check the deployment report for details. There might be additional information in the Integration Server log.

---

<b>DEP.0005.1216E</b>	<b>Target server {0} did not return any messages.</b>
<b>Explanation</b>	Deployer did not receive any messages from target server {0}.
<b>Action</b>	Check the target server log for details.
<b>DEP.0005.1217E</b>	<b>Deletion set {0} contains unresolved dependencies. Please resolve the dependencies to proceed with deployment.</b>
<b>Explanation</b>	The deletion set contains unresolved dependencies.
<b>Action</b>	Resolve the unresolved dependencies for the deletion set.
<b>DEP.0005.1218E</b>	<b>Repository-based deployment does not support the rollback operation for target servers of types {0}.</b>
<b>Explanation</b>	Repository-based deployment does not support rollback operation for target servers of the given type.
<b>Action</b>	Remove the assets of the unsupported runtimes from the deployment and deletion sets and update the deployment map accordingly.
<b>DEP.0005.1219E</b>	<b>Repository-based deployment does not support the simulate operation for target servers of types {0}.</b>
<b>Explanation</b>	Repository-based deployment does not support simulate operation for target servers of the given type.
<b>Action</b>	Remove the assets of the unsupported runtimes from the deployment and deletion sets and update the deployment map accordingly.
<b>DEP.0005.1220E</b>	<b>Repository-based deployment does not support deletion sets for target servers of types {0}.</b>
<b>Explanation</b>	Repository-based deployment does not support deletion sets for target servers of the given type.
<b>Action</b>	Remove the assets of the unsupported runtimes from the deletion set and update the deployment map accordingly.
<b>DEP.0005.1221E</b>	<b>Repository-based deployment does not support deletion sets for the selected target servers.</b>
<b>Explanation</b>	Repository-based deployment does not support deletion sets for the selected target servers.
<b>Action</b>	Remove the deletion set from the project.

**DEP.0005.1222E**      **The repository is corrupted. The binary file for composite {0} of type {1} is missing from repository {2}.**

**Explanation**      The binary file is missing from the repository.

**Action**            Rebuild the repository using Asset Build Environment.

**DEP.0005.1227E**      **Deployer issued the following exception while deleting the field definition during rollback: "{0}"**

**Explanation**      An exception occurred while deleting the field definition.

**Action**            Contact the administrator of the target server for assistance.

**DEP.0005.1230**      **No value was specified for the required package parameter. Specify a value for the package parameter.**

**Explanation**      No value was specified for the package parameter.

**Action**            Specify a valid package value for the package parameter.

**DEP.0006.0011E**      **Plugin {0} does not exist.**

**Explanation**      The specified plug-in is not correctly configured in the Deployer plugin configuration file. This indicates an incomplete or damaged installation, or possibly a modification to the plugin configuration file located in  
<serverDirectory>\packages\WmDeployer\config\plugin folder.

**Action**            Make sure a file named <pluginName>.cnf exists in the  
<serverDirectory>\packages\WmDeployer\config\plugin directory.

**DEP.0006.0025E**      **The versions for the aliases {0} were not persisted successfully. Verify that the specified version is valid.**

**Explanation**      The specified versions are not valid.

**Action**            Ensure that the specified versions are valid.

**DEP.0006.0026E**      **The version {0} reported by the {1} plugin for the server alias {2} does not match the version {3} set by the user.**

**Explanation**      The version reported by the plugin is different from the version set for the server alias.

**Action**            Set the correct version for the server alias.

<b>DEP.0006.0028E</b>	<b>Plugin server name {0} contains illegal characters.</b>
<b>Explanation</b>	The plugin server name contains one or more spaces or the following invalid characters: # & @ ^ ! % * : \$ / \ \ ` ' ; , ~ + = > < \ "
<b>Action</b>	Remove the invalid characters from the plugin server name.
<b>DEP.0006.0030E</b>	<b>Plugin server {0} of type {1} does not exist for the specified runtime type. Create a new plugin server or remove it from the project map.</b>
<b>Explanation</b>	The plugin server does not exist for the specified runtime type.
<b>Action</b>	Create a new plugin server or remove it from the project map.
<b>DEP.0007.0001E</b>	<b>A target group with the name {0} already exists.</b>
<b>Explanation</b>	You specified a name for a target group that already exists. Deployer requires that target groups be uniquely named.
<b>Action</b>	Specify a unique name for the target group.
<b>DEP.0007.0002E</b>	<b>Target group {0} does not exist.</b>
<b>Explanation</b>	The specified target group does not exist
<b>Action</b>	Verify that the target group exists in the Deployer server target groups.
<b>DEP.0007.0005E</b>	<b>Error invoking service {0}. This usually indicates a problem with the Integration Server installation. On the local Deployer server, determine whether the following Integration Server packages are disabled, missing, or missing parts: WmDeployer, WmAdmin, WmRoot, WmDeployerResource, WmModeler.</b>
<b>Explanation</b>	Deployer was unable to invoke a required Integration Server service. This usually indicates a problem with the Integration Server installation.
<b>Action</b>	On the local Deployer server, determine whether the following Integration Server packages are disabled, missing, or missing parts:
	WmDeployer
	WmAdmin
	WmRoot
	WmDeployerResource
	WmModeler

**DEP.0007.0006E**      **Deployer encountered the following error while invoking getConnectionInfo for system {0}: {1}**

**Explanation**      Deployer could not retrieve the logical server connection information from the source server. The source server might not be running or the logon credentials might be incorrect.

**Action**            Make sure the specified source server is running and that the logon credentials in the plug-in server configuration, including the Port value, are correct.

**DEP.0007.0007E**      **The call to getConnectionInfo for system {0} returned the following exception for host name {1}: {2}**

**Explanation**      Deployer was unable to retrieve the logical server connection information from the source server. The source server might not be running or the logon credentials might be incorrect.

**Action**            Make sure the specified source server is running and that the logon credentials in the plug-in server configuration, including the Port value, are correct.

**DEP.0007.0008E**      **The call to getConnectionInfo for system {0} returned the following missing data: {1} Make sure the specified source server is running and that the logon credentials in the plug-in server configuration, including the Port value, are correct.**

**Explanation**      Deployer was unable to retrieve the logical server connection information from the source server. The source server might not be running or the logon credentials might be incorrect.

**Action**            Make sure the specified source server is running and that the logon credentials in the plug-in server configuration, including the Port value, are correct.

**DEP.0007.0009E**      **Deployer encountered the following error while connecting to Integration Server {0}: {1}**

**Explanation**      Deployer was unable to connect to the specified remote Integration Server. The Integration Server might not be running, or the logon credentials might be incorrect.

**Action**            Make sure the Integration Server is running and that the logon credentials in the remote server configuration, including the Port value, are correct.

**DEP.0007.0010E**      **Deployer encountered the following error while invoking the required Integration Server service {0} on system {1}: {2} This usually indicates an incomplete or error with the installation of a plug-in on the remote server. On the specified remote server, determine whether the following required Integration Server packages are disabled, missing, or incomplete:**

**Explanation**      Deployer was unable to invoke a required Integration Server service. This usually indicates an incomplete or error with the installation of a plug-in on the remote server.

**Action**            On the specified remote server, determine whether the following required Integration Server packages are disabled, missing, or incomplete:

- WmDeployer
- WmAdmin
- WmRoot
- WmDeployerResource
- WmModeler

**DEP.0007.0011**     **A Target Server with name {0} already exists. Rename the target server alias or use a different name for the Target Group.**

**Explanation**     Target servers and target groups cannot have the same names.

**Action**     Rename the target server alias or use a different name for the Target Group.

**DEP.0007.0012E**     **Failed to load the plug-in server configuration file {0}. This indicates that the configuration file has been modified and Deployer can no longer parse the configuration file. Try to delete and then re-add the plug-in server. This should correctly recreate the configuration file. If this fails, send the contents of the server configuration file, located in "<serverDirectory>/packages/WmDeployer/config/pluginServer/<pluginName>" to Software AG Global Support.**

**Explanation**     When Deployer started, it could not successfully load the plug-in server configuration file. This indicates the configuration file has been modified and Deployer can no longer parse the configuration file.

**Action**     Try to delete and then re-add the plug-in server. This should correctly recreate the configuration file. If this fails, send the contents of the server configuration file, located in "<serverDirectory>/packages/WmDeployer/config/pluginServer/<pluginName>" to Software AG Global Support.

**DEP.0007.0013E**     **Failed to save plugin server config file {0}. The plug-in configuration file provided by Software AG does not contain the entry identifying the class necessary to remotely install the communication component. The configuration file may have been altered incorrectly. Reinstall Deployer. Your project data will remain unchanged.**

**Explanation**     The plug-in configuration file provided by Software AG does not contain the entry identifying the class necessary to remotely install the communication component. The configuration file might have been altered incorrectly.

**Action**     Reinstall Deployer. Your project data will remain unchanged.

<b>DEP.0007.0014E</b>	<b>{0} target group {1} dependencies have been resolved. See the Integration Server error log for details. Contact webMethods Global Support if the problem cannot be resolved locally.</b>
<b>Explanation</b>	The invocation of the Communication Component Installation class has failed.
<b>Action</b>	See the Integration Server error log for details. Contact Software AG Global Support if the problem cannot be resolved locally.
<b>DEP.0007.0015E</b>	<b>{0} Target Group {1} validation failed. Unable to resolve some servers within the group. Your installation could be damaged or corrupt. Reinstall Deployer. Your project data will remain unchanged.</b>
<b>Explanation</b>	The remote installation of the communication component was unable to locate the component file on the file system. Your installation could be damaged or corrupt.
<b>Action</b>	Reinstall Deployer. Your project data will remain unchanged.
<b>DEP.0007.0018E</b>	<b>Deployer encountered the following error while pinging plug-in server {0}: {1} Deployer cannot contact the remote server hosting the identified plug-in. The host could be down or the host name could be incorrect. Verify the host name (or IP address) and ensure that the system is available.</b>
<b>Explanation</b>	Deployer cannot contact the remote server hosting the identified plug-in. The host could be down or the host name could be incorrect.
<b>Action</b>	Verify the host name (or IP address) and ensure that the system is available.
<b>DEP.0007.0019E</b>	<b>Plug-in {0} on target group {1} does not contain any servers.</b>
<b>Explanation</b>	You have attempted to add a target group with no servers.
<b>Action</b>	Add target servers in that target group.
<b>DEP.0007.0029</b>	<b>Cannot create a Target Group with same name as that of a Target Server. Either rename the target group or delete the existing target group or target server with the same name.</b>
<b>Explanation</b>	You cannot create a target group with same name as one used by a target server.
<b>Action</b>	Either rename the target group or delete the existing target group or target server with the same name.
<b>DEP.0007.0030</b>	<b>{0} Target Group {1} validation failed. Unable to resolve some servers within the cluster {2} in the group {3}. Make sure all nodes in the cluster are running and the WmDeployerResource package is installed on all of these nodes. If the WmDeployerResource package is not installed, install it using the Deployer user interface.</b>
<b>Explanation</b>	Deployer cannot ping some of the cluster servers.

<b>Action</b>	Make sure all nodes in the cluster are running and the WmDeployerResource package is installed on all of these nodes. If the WmDeployerResource package is not installed, install it using the Deployer user interface.
<b>DEP.0007.0031E</b>	<b>Validation of plug-in {0} on target group {1} failed. Deployer cannot resolve server {2} which is a part of the cluster {3}. Remove this server manually from target group.</b>
<b>Explanation</b>	A server in the cluster could not be resolved.
<b>Action</b>	Manually remove the server from the tagret group.
<b>DEP.0007.0032E</b>	<b>Invalid version specified for the target group {0} of type {1}. The valid versions can be {2}.</b>
<b>Explanation</b>	The version specified for the target group is not valid.
<b>Action</b>	Specify the correct version.
<b>DEP.0007.0033E</b>	<b>The server aliases {0} version do not match the target group {1} version. Server aliases and target groups must be of the same version. Modify either the definition of the targets within the target group or modify the version of the target group.</b>
<b>Explanation</b>	The version of the targets in the target group do not match the version of the parent target group.
<b>Action</b>	Modify either the definition of the targets within the target group or modify the version of the target group.
<b>DEP.0007.0034E</b>	<b>Target group name {0} contains illegal characters.</b>
<b>Explanation</b>	The target group name contains one or more spaces or the following invalid characters: # & @ ^ ! % * : \$ / \ \ ` ' ; , ~ + = > < \ "
<b>Action</b>	Remove the invalid characters from the target group name.
<b>DEP.0007.0035</b>	<b>Target group {0} does not exist.</b>
<b>Explanation</b>	A target group was mapped for deployment but is either not defined or was deleted.
<b>Action</b>	Define the target group.
<b>DEP.0008.0001E</b>	<b>You are not authorized to checkpoint the {0} project. Use the Deployer user interface to grant the user the right to deploy the project.</b>
<b>Explanation</b>	The user is not authorized to generate a checkpoint for the project.
<b>Action</b>	Use the Deployer user interface to grant the user the right to deploy the project.

<b>DEP.0008.0003E</b>	<b>Error invoking service "{0}".</b>
<b>Explanation</b>	An exception occurred while invoking the wm.deployer.UIAuthorization:isAuthorized service. This could mean that Integration Server is either not running or that it cannot be reached on the network.
<b>Action</b>	Verify that the Integration Server is running and available on the network.
<b>DEP.0008.0004E</b>	<b>Error cloning source system "{0}": {1}</b>
<b>Explanation</b>	The project contains a source system of an unknown type.
<b>Action</b>	Rebuild the project.
<b>DEP.0008.0006E</b>	<b>Checkpoint summary file "{0}" does not exist.</b>
<b>Explanation</b>	The checkpoint file does not exist on the disk.
<b>Action</b>	Use Deployer to create a checkpoint.
<b>DEP.0008.0007E</b>	<b>Cannot write to checkpoint directory "{0}".</b>
<b>Explanation</b>	You cannot create or write to the specified directory.
<b>Action</b>	Ensure that you have the correct privileges to create and write to the directory and that the file system has enough space for the creation of a new directory.
<b>DEP.0008.0009E</b>	<b>Error creating checkpoint "{0}": {1}</b>
<b>Explanation</b>	An exception occurred while creating the checkpoint report.
<b>Action</b>	Ensure that you have the correct privileges to create and write to files and that the file system has enough space for the new file.
<b>DEP.0008.0010E</b>	<b>Error saving checkpoint project {0}: {1}. Make sure you have the correct privileges to create and write to files and that the file system has enough space for the new file</b>
<b>Explanation</b>	The specified file could not be saved to disk.
<b>Action</b>	Make sure you have the correct privileges to create and write to files and that the file system has enough space for the new file.
<b>DEP.0008.0013E</b>	<b>Deployer cannot generate a checkpoint at {0} because the target server is unavailable</b>
<b>Explanation</b>	The target server is unavailable.
<b>Action</b>	Ensure that the target server is running.

---

<b>DEP.0008.0015E</b>	<b>Checkpoint on the target server {0} failed. Please check the target server's logs for details.</b>
<b>Explanation</b>	The checkpoint operation failed due to the reason specified in the checkpoint report.
<b>Action</b>	Check the checkpoint report for details. There might also be additional information in the Integration Server log.
<b>DEP.0008.0018E</b>	<b>Skipping the delete checkpoint for {0} because the server is unavailable.</b>
<b>Explanation</b>	The target server is unavailable.
<b>Action</b>	Ensure that the target server is running.
<b>DEP.0008.0022E</b>	<b>Failed to delete checkpoint for target server {0}.</b>
<b>Explanation</b>	Deletion of checkpoint failed.
<b>Action</b>	Check Deployer and Integration Server logs.
<b>DEP.0008.0023E</b>	<b>Repository-based deployment does not support the checkpoint operation for the mapped target servers.</b>
<b>Explanation</b>	Repository-based projects do not support checkpoint operations for the mapped target servers
<b>Action</b>	Perform Deploy operation.
<b>DEP.0008.0024I</b>	<b>Deployer does not allow you to create checkpoints for transactional deployment.</b>
<b>Explanation</b>	You cannot create a checkpoint for projects that use transactional deployment. Deployer creates checkpoints automatically for transactional deployment.
<b>Action</b>	See the webMethods Deployer documentation for more information.
<b>DEP.0008.0025E</b>	<b>Repository-based deployment does not support checkpoint operation for target servers of type {0}.</b>
<b>Explanation</b>	Repository-based deployment does not support checkpoint operation for target servers of the given type.
<b>Action</b>	Remove the assets of the unsupported runtimes from the deployment and deletion sets and update the deployment map accordingly.

**DEP.0100.3.42E**      **The simulate, checkpoint, deploy, or rollback operation encountered an error while generating the report. Contact Software AG Global Support.**

**Explanation**      The simulate, checkpoint, deploy, or rollback operation encountered an error while generating the report.

**Action**              Contact Software AG Support.

**DEP.0100.5.37**      **Deployer cannot retrieve the project specified on the command. Make sure the user is authorized to view this information.**

**Explanation**      Deployer cannot retrieve the project specified on the command.

**Action**              Make sure the user is authorized to view this information.

**DEP.0100.5.38**      **Deployer cannot retrieve the build information specified on the command. Make sure the user is authorized to view this information.**

**Explanation**      Deployer cannot retrieve the build information specified on the command.

**Action**              Make sure the user is authorized to view this build information.

**DEP.0100.5.39**      **Deployer cannot retrieve the map specified on the command. Make sure the user is authorized to view this information.**

**Explanation**      Deployer cannot retrieve the map the user specified on the command.

**Action**              Make sure the user is authorized to view this information.

**DEP.0100.5.40**      **Deployer cannot retrieve the deployment candidates specified on the command. Make sure the user is authorized to view this information.**

**Explanation**      Deployer cannot retrieve the deployment candidates specified on the command.

**Action**              Make sure the user is authorized to view this information.

**DEP.0100.5.41**      **Deployer cannot retrieve the map for the user and project specified on the command. Make sure the user is authorized to view this information.**

**Explanation**      Deployer cannot retrieve the map for the user and project specified on the command.

**Action**              Make sure the user is authorized to view this information.

**DEP.0100.5.42**      **Deployer cannot retrieve the build information specified on the command. Make sure the user is authorized to view this information**

**Explanation**      Deployer cannot retrieve the build information specified on the command.

**Action**              Make sure the user is authorized to view this information.

**DEP.0100.5.43**      **There are no .map files in the IntegrationServer/packages/WmDeployer/replicate/inbound folder. Make sure the file you want to import exists in the specified folder.**

**Explanation**      There are no .map files in the IntegrationServer/packages/WmDeployer/replicate/inbound folder.

**Action**             Make sure the file you want to import exists in the specified folder.

**DEP.0100.5.63**      **The Integration Server to which you are trying to connect is configured to accept only secure connections on the UNIX platform. Use the correct digital certificates to establish the connection.**

**Explanation**      The Integration Server to which you are trying to connect is configured to accept only secure connections on the UNIX platform.

**Action**             Use the correct digital certificates to establish the connection.

**DEP.0100.5.64E**      **Deployer encountered an error while invoking the service. Make sure the Integration Server to which you are trying to connect is up and running and you have properly installed all required components.**

**Explanation**      This error is encountered when trying to invoke the service from CLI.

**Action**             Make sure the Integration Server to which you are trying to connect is up and running and you have properly installed all required components.

**InputValidationMessages.0001E – Parameter {0} cannot be null or empty**

**Explanation**      The specified parameter is either null or empty.

**Action**             Provide a valid value for the parameter.

**InputValidationMessages.0002E – Parameter {0} cannot be null.**

**Explanation**      The specified parameter is null.

**Action**             Provide a valid value for the parameter.

**InputValidationMessages.0003E – Parameter {0} cannot be a negative integer**

**Explanation**      The specified value is a negative integer.

**Action**             Provide a positive integer value for the parameter.

**InputValidationMessages.0004E – File {0} does not exist.**

**Explanation** The specified file does not exist in the specified location.  
**Action** Provide a valid file.

**InputValidationMessages.0005E – SSL-enabled connections require that either the TrustClientCertificatesByDefault parameter be set to true or that both TrustStoreFileName and TrustStorePassword are specified.**

**Explanation** Either the TrustClientCertificatesByDefault parameter is set to false or either the TrustStoreFileName, TrustStorePassword, or both are not specified.  
**Action** Set the TrustClientCertificatesByDefault parameter to true or provide valid values for both the TrustStoreFileName and TrustStorePassword parameters.

**OperationMessages.0002E – Failed to ping the target {0} of type {1} with following exception : {2}. Either the target is unavailable or the credentials provided are invalid.**

**Explanation** Either the target is unavailable or the credentials provided are invalid.  
**Action** Verify that the server is up and running, and that the specified parameters are valid.

**OperationMessages.0003E – An unexpected error occurred while pinging the target {0}. Error details : {1}**

**Explanation** An unexpected error occurred while pinging the target.  
**Action** Check the server logs for more details.

**OperationMessages.0011E – Deliver operation on the target server {0} of type {1} failed with following exception : {2}. Please check the target server's logs for details.**

**Explanation** The Deliver operation failed due to the reason specified in the Deliver report.  
**Action** Check the Deliver report for details. There might also be additional information in the Integration Server log.

**OperationMessages.0012E – An unexpected error occurred while performing variable substitutions for the asset with ACDL file name {0}. Error details : {1}**

**Explanation** An unexpected error occurred while substituting values.  
**Action** Check server logs for more details.

---

**OperationMessages.0021E – An unexpected error occurred while deleting the delivered assets for the deployment with ID {0} from target {1}. Error details : {2}**

**Explanation** An unexpected error occurred while deleting the delivered assets.

**Action** Check the server logs for more details.

**OperationMessages.0030E – An unexpected error occurred while activating the deployment with ID {0} for target {1}. Error details : {2}**

**Explanation** An unexpected error occurred while activating the delivered assets.

**Action** Check the server logs for more details.

**OperationMessages.0050E – Runtime type of the artifact {0} is different from the target runtime type {1}**

**Explanation** The runtime type of the specified artifact is different than the target runtime type.

**Action** Ensure that the runtime type of the asset to be deployed is same as the target server type.

**WDY-4460 The Package: "{0}" will not be activated. The dependent package "{1}" version "{2}" does not match the package version "{3}" present on the target server.**

**Explanation** The dependent package version does not match the package version present on the target server.

**Action** Ensure that the target server package version is the same as the dependent package version on the source server.

# 12 Designer Composite Application Framework

**restconnector.wizard.fieldpage.validation – Validation**

**restconnector.wizard.title – New REST Connector Wizard**

# 13 Digital Event Services

---

<b>DEVABEE0000</b>	<b>The specified location "{0}" does not denote an existing directory.</b>
<b>Explanation</b>	A valid event type repository is needed.
<b>Action</b>	Check whether the specified location points to a DES event type repository.
<b>DEVABEE0002</b>	<b>Could not read content of file "{0}" in order to create zip archive "{1}"</b>
<b>Explanation</b>	The file content was not available while creating zip archive.
<b>Action</b>	See stacktrace for further explanations and actions.
<b>DEVABEE0003</b>	<b>Saving of acdl composite "{0}" failed.</b>
<b>Explanation</b>	See stacktrace for further information
<b>DEVABEE0004</b>	<b>Asset with path name "{0}" is duplicate in repository.</b>
<b>Explanation</b>	The path of an asset should always be unique.
<b>Action</b>	Check if the asset already exists and remove the wrong duplicate entry.
<b>DEVABEE0005</b>	<b>Not a valid repository "{0}".</b>
<b>Explanation</b>	The specified folder is not a valid repository folder.
<b>Action</b>	Specify a valid repository folder.

<b>DEVDECOE0040</b>	<b>Missing configuration location.</b>
<b>Explanation</b>	Required parameter for configuration location has not been set.
<b>Action</b>	Set an existing configuration location.
<b>DEVDECOE0041</b>	<b>Configuration location "{0}" does not exist.</b>
<b>Explanation</b>	The configuration location does not exist.
<b>Action</b>	Provide an existing configuration location.
<b>DEVDECOE0042</b>	<b>Configuration location "{0}" is not an absolute path.</b>
<b>Explanation</b>	Configuration location is not an absolute path.
<b>Action</b>	Provide an absolute path as configuration location.
<b>DEVDECOE0043</b>	<b>Configuration location "{0}" is not a directory.</b>
<b>Explanation</b>	The configuration location must be a directory.
<b>Action</b>	Provide a directory as configuration location.
<b>DEVDEEEE0000</b>	<b>Storing password for handle {0} failed</b>
<b>Explanation</b>	This is a failure of the Passman component.
<b>Action</b>	Contact your local support organization.
<b>DEVDEEEE0003</b>	<b>Failed to calculate passman config location: {0}</b>
<b>Explanation</b>	Malformed URL or invalid URI provided.
<b>Action</b>	Verify the correct URL / URI location.
<b>DEVDELIE0000</b>	<b>System property for license file path not specified</b>
<b>Explanation</b>	The system property that defines the location of the license file is not specified.
<b>Action</b>	Specify the system property.
<b>DEVDELIE0001</b>	<b>The specified license file path "{0}" does not exist</b>
<b>Explanation</b>	The specified license file path does not exist.
<b>Action</b>	Specify a valid license file.

---

<b>DEVDELIE0002</b>	<b>Invalid product code.</b>
<b>Explanation</b>	The product code is not valid.
<b>Action</b>	Provide a valid license.
<b>DEVDELIE0003</b>	<b>Invalid product version, expected major version "{0}", but found "{1}"</b>
<b>Explanation</b>	The major version in the license does not match the runtime version of the Digital Event Services product.
<b>Action</b>	Provide a valid license.
<b>DEVDELIE0004</b>	<b>Invalid OSGi installation directory</b>
<b>Explanation</b>	The specified value for the OSGi installation directory does not denote a valid directory.
<b>Action</b>	This is an internal error. Contact your support organization.
<b>DEVDELIE0005</b>	<b>The specified license file path "{0}" denotes a directory.</b>
<b>Explanation</b>	The location of the Digital Event Services license must point to the license file.
<b>Action</b>	Provide the proper license file location.
<b>DEVDERCE0030</b>	<b>Passed object of RunWatchdog is not valid</b>
<b>Explanation</b>	During instantiation of one of the RunWatchdog handlers, the RunWatchdog object itself is passed. However, this RunWatchdog object is not valid (null).
<b>Action</b>	Verify that the RunWatchdog object is valid before instantiating the handlers.
<b>DEVDERCE0042</b>	<b>A service group with the name "{0}" already exists.</b>
<b>Explanation</b>	Each service group must have a valid and unique name. The name must be unique in the namespace of all service groups. The service group name must follow the rule: <alpha character>+(<word character>   -   .)* where <word character> can be a digit, a lower or upper case character, and <alpha character> can be a lower or upper case character.
<b>Action</b>	Specify a unique service group name.
<b>DEVDERCE0045</b>	<b>The specified path "{0}" does not exist</b>
<b>Explanation</b>	The path must be a valid folder and it must exist on disk.
<b>Action</b>	Make sure the path location is an existing folder and create it if necessary.

<b>DEVDERCE0046</b>	<b>The specified path "{0}" is not a valid directory</b>
<b>Explanation</b>	The path is not an existing directory.
<b>Action</b>	Make sure that the specified directory exists.
<b>DEVDERCE0047</b>	<b>The specified path "{0}" is not an absolute path.</b>
<b>Explanation</b>	The path must be specified as an absolute path.
<b>Action</b>	Make sure that the path is specified as an absolute path.
<b>DEVDERCE0048</b>	<b>The service "{0}" is still used by the Service Group "{1}".</b>
<b>Explanation</b>	A service can only be deleted if it is not included in a service group.
<b>Action</b>	Remove all references to a service before deleting it.
<b>DEVDERCE0049</b>	<b>A service must not be renamed</b>
<b>Explanation</b>	A service name is used as a unique ID to reference the service.
<b>Action</b>	If a new name is required, delete the service and create a new one. Before deleting the service, make sure it is no longer referenced by any service group.
<b>DEVDERCE0050</b>	<b>The service name must not be empty</b>
<b>Explanation</b>	Each service must have a valid and unique name. A service name must follow the rule: <word character>+(<word character>   -   .)* where <word character> can be a digit, lower or upper case character.
<b>Action</b>	Specify a valid name for the service.
<b>DEVDERCE0051</b>	<b>Name "{0}" not unique considering the instance IDs. (Not allowed predefined ids: {1}).</b>
<b>Explanation</b>	Software AG Platform Manager allows only unique instance IDs to be used for the Event Routing runtime component.
<b>Action</b>	Change the name so that is is not identical to any other already existing service name, service group name, or the predefined {1}.
<b>DEVDERCE0052</b>	<b>A service with the name "{0}" already exists.</b>
<b>Explanation</b>	Each service must have a valid and unique name. A service name must follow the rule: <word character>+(<word character>   -   .)* where <word character> can be a digit, lower or upper case character.
<b>Action</b>	Specify a unique name for the service.

---

<b>DEVDERCE0053</b>	<b>Cannot use reserved service name "{0}"</b>
<b>Explanation</b>	This is the name of a predefined service.
<b>Action</b>	Choose a different service name.
<b>DEVDERCE0054</b>	<b>The service group name must not be empty</b>
<b>Explanation</b>	Each service group must have a valid and unique name. The name must be unique in the namespace of all service groups. The service group name must follow the rule: <alpha character>+(<word character>   -   . )* where <word character> can be a digit, a lower or upper case character, and <alpha character> can be a lower or upper case character.
<b>Action</b>	Specify a valid and unique name for the service group.
<b>DEVDERCE0057</b>	<b>The service group "{0}" contains duplicate service entries: "{1}"</b>
<b>Explanation</b>	Each service group must contain at least one service. The list of services within a service group must contain only unique services.
<b>Action</b>	Use only unique services within a service group.
<b>DEVDERCE0059</b>	<b>The referenced service "{0}" does not exist</b>
<b>Explanation</b>	The specified service does not exist and cannot be assigned to a service group.
<b>Action</b>	Choose a valid service in order to assign it to a service group.
<b>DEVDERCE0060</b>	<b>In the group "{0}" only one service can be marked as "source"</b>
<b>Explanation</b>	Only one service within a service group can be specified as "source".
<b>Action</b>	Mark only one service as "source".
<b>DEVDERCE0062</b>	<b>Service type name not found for service "{0}" in group "{1}"</b>
<b>Explanation</b>	A service with invalid service type has been specified within a certain service group.
<b>Action</b>	Use a service with a valid service type. Only valid services may be assigned to a service group.
<b>DEVDERCE0063</b>	<b>Service type not found for service "{0}" in group "{1}"</b>
<b>Explanation</b>	A service with invalid service type has been specified within a certain service group.
<b>Action</b>	Use a service with a valid service type. Only valid services may be assigned to a service group.

<b>DEVDERCE0064</b>	<b>The service "{0}" is marked as "source", however the corresponding service type "{1}" cannot act as source</b>
<b>Explanation</b>	The parameters of each service depend on its service type definition. If the service type is not configured to act as source, then the services of that type cannot be configured as "source" either.
<b>Action</b>	Remove the "source" marker from the service definition or change the configuration of the service type in order to allow the "source" marker.
<b>DEVDERCE0067</b>	<b>The "{0}" service has to be configured as source&amp;destination</b>
<b>Explanation</b>	This predefined service can only be used as "source and destination".
<b>Action</b>	Configure the service as "source and destination".
<b>DEVDERCE0068</b>	<b>A service group must not be renamed</b>
<b>Explanation</b>	A service group name is used as a unique ID to reference the service group.
<b>Action</b>	If a new name is required, delete the service group and create a new one. Before deleting the service group make sure that no event types are associated to it.
<b>DEVDERCE0069</b>	<b>The default service group must not be deleted</b>
<b>Explanation</b>	The default service group name is "Default". This group covers all event types which are not associated to other service groups, therefore the "Default" service group cannot be deleted.
<b>Action</b>	Do not delete the "Default" service group.
<b>DEVDERCE0070</b>	<b>The service group "{0}" is still referenced by an event type e.g. "{1}"</b>
<b>Explanation</b>	A service group can only be deleted if no event types are associated to it.
<b>Action</b>	Remove all event types associations to the service group before deleting it.
<b>DEVDERCE0078</b>	<b>Validation Error Message: {0}</b>
<b>DEVDERCE0079</b>	<b>Invalid name "{0}". It must follow the rule: &lt;alpha character&gt;+(&lt;word character&gt;   -   .)*</b>
<b>Explanation</b>	A name must follow the rule: <alpha character>+(<word character>   -   .)* where <word character> can be a digit, lower or upper case character.
<b>Action</b>	Do not use invalid URI characters.

<b>DEVDERCE0080</b>	<b>{0} must not be null or an empty string!</b>
<b>DEVDERCE0081</b>	<b>"{0}" is not a valid capacity value</b>
<b>Explanation</b>	The capacity must consist of digits only, optionally followed by one of [K, k, M, m, G, g]. The resulting value must not be larger than 9223372036854775807.
<b>Action</b>	Provide a valid capacity.
<b>DEVDERCE0082</b>	<b>Missing parameter "defaultCapacityValue" in order to return the valid capacity value.</b>
<b>DEVDERCE0083</b>	<b>Event Type not found in type repository: {0}</b>
<b>DEVDERCE0101</b>	<b>Cannot configure non-publishable event type: {0}</b>
<b>DEVDERCW0061</b>	<b>The predefined "{0}" service will be configured as source&amp;destination</b>
<b>Explanation</b>	This predefined service must always be configured as "source and destination".
<b>Action</b>	Configure this predefined service as "source and destination".
<b>DEVDERE0000</b>	<b>Failed to look-up {0} implementation of type "{1}".</b>
<b>Explanation</b>	No ServiceProvider implementation for the respective type name has been found. As a result, services of this type cannot be created. Most probably this indicates that the library containing the ServiceProvider implementation is not on the application's classpath.
<b>Action</b>	Make sure the library containing the ServiceProvider implementation for the respective type is on the application's classpath.
<b>DEVDERE0009</b>	<b>Caught and suppressed an exception thrown from notify() of observer {0}.</b>
<b>Explanation</b>	The observer of a subscription executed a notification which failed.
<b>DEVDERE0020</b>	<b>Failed to start a receiving route for event type {0} and subscriber ID {1}.</b>
<b>Explanation</b>	A subscriber cannot be created because of an unavailable source service, an invalid durable subscriber ID, or because the durable subscriber ID is already in use.
<b>Action</b>	Check if the service configured as a source is available. If you are creating a durable subscriber, make sure that its ID does not contain invalid characters, and that no durable subscriber with this ID for the same event type is currently active on the source service.

<b>DEVDERE0100</b>	<b>Cannot use non-publishable event type for pub-sub operations: {0}</b>
<b>Explanation</b>	Only event types marked as publishable can be used to emit events, or to set up a subscription.
<b>Action</b>	Choose a publishable event for sending/subscribing.
<b>DEVDERE0102</b>	<b>A nonpositive value of "{0}" has been specified for 'maxUnacknowledgedEvents' which is not allowed.</b>
<b>DEVDERE0107</b>	<b>Failed to read last data event key for subscriber "{0}" from file "{1}".</b>
<b>DEVDERUE0041</b>	<b>The event type name "{0}" could not be decomposed, probably the event sender did not use the correct protocol.</b>
<b>Explanation</b>	When receiving an event the accompanying type name has to follow a certain pattern , so that it can be decomposed into parts. This pattern changed between Digital Event Services 9.12 and 10.0, which means senders and receivers across these versions cannot talk to each other.
<b>Action</b>	Make sure all senders and receivers are either of version 9.12, or they are all of version 10.0 or greater.
<b>DEVDERUE0043</b>	<b>Failed to unsubscribe subscriber "{0}" for event type "{1}" from the Universal Messaging server, as the session is not connected. To avoid high number of events being stored for its named object, please delete the named object manually.</b>
<b>DEVDERUW0040</b>	<b>Timed out waiting to acquire the session lock in {0}. Probably the lock is held by a client event listener processing a received event or by a client subscriber observer processing a notification.</b>
<b>DEVDESCE0000</b>	<b>Internal error: the given "RuntimeComponent" parameter is not an instance of the "Instance" interface</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>DEVDESCE0001</b>	<b>It is not allowed to create new instances of Runtime Configuration</b>
<b>Explanation</b>	Only one built-in instance of Runtime Configuration exists.
<b>Action</b>	In order to apply your changes, edit the built-in instance of Runtime Configuration.

---

<b>DEVDESCE0002</b>	<b>It is not allowed to delete the instance of Runtime Configuration</b>
<b>Explanation</b>	There is only one built-in instance of Runtime Configuration, which must not be deleted.
<b>Action</b>	In order to apply changes, edit the built-in instance of Runtime Configuration.
<b>DEVDESCE0005</b>	<b>It is not possible to change storage location, while instance {0} is running</b>
<b>Explanation</b>	Please ensure that the component using Digital Event Services is restarted in order to start using the new storage location.
<b>Action</b>	Changing the storage location requires a restart of the components using Digital Event Services.
<b>DEVDESCE0007</b>	<b>"{0}" is not a valid number</b>
<b>Explanation</b>	The value to be configured needs to be a number.
<b>Action</b>	Provide a valid number.
<b>DEVDESCE0008</b>	<b>It is not allowed to create new instances of Event Types Configuration</b>
<b>Explanation</b>	Only one built-in instance of Event Types Configuration exists.
<b>Action</b>	In order to apply your changes, edit the built-in instance of Event Types Configuration.
<b>DEVDESCE0009</b>	<b>It is not allowed to delete the instance of Event Types Configuration</b>
<b>Explanation</b>	There is only one built-in instance of Event Types Configuration, which must not be deleted.
<b>Action</b>	In order to apply changes, edit the built-in instance of Event Types Configuration.
<b>DEVDESCE0010</b>	<b>Configured service group "{0}" does not exist</b>
<b>Explanation</b>	Event types can only be assigned to existing service groups.
<b>Action</b>	Create the service group before assigning an event type, or choose a different service group.
<b>DEVDESCE0011</b>	<b>Unknown reliability string "{0}" as configured value string e.g. on UI</b>
<b>Explanation</b>	The string of the reliability value is unknown to the system and cannot be assigned to an internal definition. This is an internal error and should never occur.
<b>Action</b>	Contact Software AG Global Support.

<b>DEVDESCE0012</b>	<b>Invalid EventTypeReliability value "{0}"</b>
<b>Explanation</b>	Invalid EventTypeReliability value used for conversion into string for output on UI e.g. This is an internal error and should not occur.
<b>Action</b>	Contact Software AG Global Support.
<b>DEVDESCE0013</b>	<b>Invalid EventType Delivery Mode Preference value "{0}"</b>
<b>Explanation</b>	Invalid EventType Delivery Mode Preference value used for conversion into string for output on UI e.g. This is an internal error and should not occur.
<b>Action</b>	Contact Software AG Global Support.
<b>DEVDESCI0006</b>	<b>The storage content is not automatically copied from {0} to the new destination {1}.</b>
<b>Explanation</b>	Before starting Digital Event Services the new storage location should be prepared by copying the necessary folder and files. Events may be lost if the storage is not available at runtime.
<b>Action</b>	Copy the storage from the old path into the new specified path before starting Digital Event Services.
<b>DEVDESCI0021</b>	<b>com.softwareag.event.routing.configuration bundle started.</b>
<b>Explanation</b>	The Digital Event Services (DES) configuration bundle for Command Central is started.
<b>Action</b>	(No action required)
<b>DEVDESCI0022</b>	<b>com.softwareag.event.routing.configuration bundle stopped.</b>
<b>Explanation</b>	The Digital Event Services (DES) configuration bundle for Command Central is stopped.
<b>Action</b>	(No action required)
<b>DEVDESCW0003</b>	<b>It is not possible to check whether product to be configured is online. The configuration modification will take effect only after the next restart of the product.</b>
<b>Explanation</b>	The status of Digital Event Services cannot be checked using SPM tools. Please ensure that the component using Digital Event Services is restarted to use the new storage location.
<b>Action</b>	Changing the storage location requires a restart of the product which is using Digital Event Services.

<b>DEVDESCW0004</b>	<b>Restart "{0}" to use the storage location "{1}"</b>
<b>Explanation</b>	The running instance must be restarted to use the new storage location. SPM must be active to change the storage location.
<b>Action</b>	Restart SPM, otherwise the old location will be used.
<b>DEVDTRE0000</b>	<b>Annotation type "{0}" contains duplicate field name "{1}"</b>
<b>Explanation</b>	Annotation type definitions must not contain duplicate field names.
<b>Action</b>	Correct the annotation type definition.
<b>DEVDTRE0001</b>	<b>System property "{0}" not set.</b>
<b>Explanation</b>	Digital Events Repositories location is defined by a system property.
<b>Action</b>	Define the system property.
<b>DEVDTRE0002</b>	<b>Repositories location "{0}" is not a directory.</b>
<b>Explanation</b>	The repositories location must be a directory.
<b>Action</b>	Define a directory as a repository location.
<b>DEVDTRE0003</b>	<b>Double field name "{0}" found.</b>
<b>Explanation</b>	Event type fields with the same name are not allowed within one event type definition. E.g. \nF1 : string;F1 : boolean; <-- duplicate field name - must be renamed or deleted.
<b>Action</b>	Rename or delete the corresponding field.
<b>DEVDTRE0007</b>	<b>Annotation type "{0}" not found in repository.</b>
<b>Explanation</b>	Each annotation specified inside the event type definition must be defined in the annotation type repository of the installation. Predefined annotation is e.g. "@Unique".
<b>Action</b>	Use only these annotations which are defined inside the annotation type repository of the installation.
<b>DEVDTRE0008</b>	<b>Field names of annotation type "{0}" must be specified explicitly.</b>
<b>Explanation</b>	If more than one annotation field is defined for a certain annotation type you have to specify <key>=<value> pairs in the annotation's parameter list. E.g. \n@multipfield_annotation(field1="value1", field2="value2")\n\nThe number of specified parameters is arbitrary: \n@multipfield_annotationOnly\n\nin case of one single defined annotation field you can specify only the "<value>" without the <key>= in front of it. E.g. \n@singlefield_annotation("value")
<b>Action</b>	Specify <key>=<value> pairs as annotation parameter list instead of just "<value>". E.g. \n@multipfield_annotation(field1="value1", field2="value2")

<b>DEV DRE0009</b>	<b>No field names defined for annotation type "{0}".</b>
<b>Explanation</b>	If there is no annotation field defined for a certain annotation type then it is not allowed to specify any <key>=<value> pair as parameter of the annotation.
<b>Action</b>	Remove the whole parameter list of the annotation. Only the annotation name may be specified e.g. "@Unique".
<b>DEV DRE0011</b>	<b>No annotation field "{0}" allowed because no fields defined for annotation type "{1}".</b>
<b>Explanation</b>	There is at least one annotation field specified in the annotation's parameter list. But because no field is defined it is not allowed to specify any annotation field.
<b>Action</b>	Remove the whole parameter list as no annotation field is defined for the annotation type e.g. "@Unique".
<b>DEV DRE0012</b>	<b>Annotation field "{0}" not defined for annotation type "{1}".</b>
<b>Explanation</b>	The specified annotation field is invalid because it is not defined for the corresponding annotation type.
<b>Action</b>	Specify the correct annotation field name in the annotation parameter list. E.g. correct the <key> inside of @annotation(<key>=<value>)
<b>DEV DRE0013</b>	<b>Value "{0}" cannot be converted into annotation field type "{1}".</b>
<b>Explanation</b>	A certain annotation field type is assigned to each annotation field. The value is specified as string but it must be convertible into the corresponding annotation field type. The annotation field types are defined for each annotation field definition of a certain annotation type. Valid types: \nSTRING: any string (corresponds to java "String" type) \nINT64: 64 bit integer value (corresponds to java "Long" type) \nFLOAT64: 64 bit floating point value (corresponds to java "Double" type) \nBOOLEAN: boolean value (corresponds to java "Boolean" type)
<b>Action</b>	Specify a correct value according to the correct annotation field type.
<b>DEV DRE0015</b>	<b>Event Type "{0}" is not unique.</b>
<b>Explanation</b>	Trying to access an event type as unique, that is not unique.
<b>Action</b>	Don't access a non unique event type with methods for unique types.
<b>DEV DRE0016</b>	<b>Event Type "{0}" is unique, but contains more than one entry in repository.</b>
<b>Explanation</b>	There is more than one file for an unique Event Type in the repository.
<b>Action</b>	The repository must be repaired to contain only one variant of the unique Event Type.

---

<b>DEVVDRE0017</b>	<b>Inconsistent file name: variant key "{0}" does not match filename "{1}"</b>
<b>Explanation</b>	The variant key, as computed based on the contents of the type definition file, does not match the type definition file name. Probably, the type definition file was manipulated directly with a text editor.
<b>Action</b>	Fix the type definition file.
<b>DEVVDRE0018</b>	<b>Inconsistent file name: event type name "{0}" does not match filename "{1}"</b>
<b>Explanation</b>	The event type name, as extracted from the contents of the type definition file, does not match the type definition file name. Probably, the type definition file was manipulated directly with a text editor.
<b>Action</b>	Fix the type definition file.
<b>DEVVDRE0019</b>	<b>Inconsistent file name: Annotation type name "{0}" does not match filename "{1}"</b>
<b>Explanation</b>	The annotation type name, as extracted from the contents of the type definition file, does not match the type definition file name. Probably, the type definition file was manipulated directly with a text editor.
<b>Action</b>	Fix the type definition file.
<b>DEVVDRE0022</b>	<b>Cannot change "unique" for {0} due to broken reference of an embedded type.</b>
<b>Explanation</b>	"unique" cannot be changed, if the event type is referenced by another event type.
<b>Action</b>	Insert a new variant for the referenced type, change or delete the referenced types.
<b>DEVVDRE0024</b>	<b>Event type info does not match for "{0}"</b>
<b>Explanation</b>	The event type info of the type being inserted does not match the existing event type info in the repository.
<b>Action</b>	Correct the event type info.
<b>DEVVDRE0036</b>	<b>Type name to be inserted ({0}) conflicts with existing type ({1})</b>
<b>Explanation</b>	The name of any type in the repository must not be the prefix of another type name. For example, "com.company" and "com.company.type" are not allowed.
<b>Action</b>	Supply a non-conflicting type name.

<b>DEVDRIO004</b>	<b>Referenced event type "{0}" is expected to be a {1} event type, but is not found in event type repository.</b>
<b>Explanation</b>	Event type fields may be of type 'event type reference'. The referenced type should be available in the repository of the installation. But if the referenced type is not available in the repository the reference is stored in the event type model internally just with the information of event type name and variant key name, if provided. \nUnique event type references must not have any variant key specified; non-unique event type references must have the variant key specified: E.g. \nF1 : event : unique_eventtype;F1 : event : nonunique_eventtype("<variant key>");
<b>Action</b>	Add the missing event type to the event type repository of the installation or remove/add the variant key depending on whether the event type is unique or non-unique.
<b>DEVDRW0010</b>	<b>Exception for input : {0} in file : {1}. Event type skipped.</b>
<b>Action</b>	(No action required)
<b>DEVDRW0014</b>	<b>EventTypeInfo skipped due to exception in file : {0}.</b>
<b>Action</b>	(No action required)
<b>DEVDTTE0000</b>	<b>Field name "{0}" has wrong format</b>
<b>Explanation</b>	The field name must follow this pattern: "[a-zA-Z][a-zA-Z0-9]*".
<b>Action</b>	Provide a valid field name.
<b>DEVDTTE0001</b>	<b>A field definition requires a name</b>
<b>Explanation</b>	Each field definition has to have a name.
<b>Action</b>	Provide a name for the field definition.
<b>DEVDTTE0002</b>	<b>A field definition requires a type</b>
<b>Explanation</b>	Each field definition has to have a type.
<b>Action</b>	Provide a type for the field definition.
<b>DEVDTTE0004</b>	<b>Invalid field annotation</b>
<b>Explanation</b>	For field definitions, only field-applicable annotations may be specified.
<b>Action</b>	Provide a valid field annotation.

---

<b>DEVDTTE0005</b>	<b>Type name "{0}" has wrong format</b>
<b>Explanation</b>	The event type name must follow this pattern: "[a-zA-Z_][a-zA-Z0-9_]*(\.[a-zA-Z_][a-zA-Z0-9_]*)".
<b>Action</b>	Provide a valid event type name.
<b>DEVDTTE0006</b>	<b>Invalid event annotation</b>
<b>Explanation</b>	For event types, only event-applicable annotations may be specified.
<b>Action</b>	Provide a valid event annotation.
<b>DEVDTTE0007</b>	<b>Field name "{0}" is not defined in annotation type "{1}".</b>
<b>Explanation</b>	The field name is not defined in the corresponding annotation type.
<b>Action</b>	Use a different field name or define the field name in annotation type.
<b>DEVDTTE0008</b>	<b>Field type for field "{0}" is "{1}" not matching "{2}".</b>
<b>Explanation</b>	The defined field type does not match the Java type used for an annotation value.
<b>Action</b>	Use a matching Java type.
<b>DEVDTTE0009</b>	<b>Field type for field "{0}" is "{1}" is not matching any allowed field value.</b>
<b>Explanation</b>	AnnotationTypeDefinition only allows certain field types.
<b>Action</b>	Use a type which is allowed.
<b>DEVDTTE0010</b>	<b>Duplicate annotation "{0}"</b>
<b>Explanation</b>	The same annotation can be applied multiple times only if the corresponding annotation type is marked as repeatable.
<b>Action</b>	Provide a valid annotation.
<b>DEVDTTE0011</b>	<b>Java object not supported for any: "{0}"</b>
<b>Explanation</b>	Only Java objects that are supported by any must be set as values for any. These value can only be scalars or EventTypes. An arrays must be defined as arrays.
<b>DEVDTTE0012</b>	<b>Missing annotation type name.</b>
<b>Explanation</b>	No annotation type name was provided for the building of an annotation type.
<b>Action</b>	Set a name for the annotation type on the annotation type builder.

<b>DEVDTE0013</b>	<b>Recursive reference to "{0}" not allowed</b>
<b>Explanation</b>	Digital Event Types do not allow recursive type references, neither directly, nor indirectly.
<b>Action</b>	Provide a valid type reference.
<b>DEVDTE0014</b>	<b>An array must not contain another array.</b>
<b>Explanation</b>	It is not possible to define an array of arrays.
<b>Action</b>	An array is specified by explicitly defining the dimension.
<b>DEVDTE0017</b>	<b>The array dimension has to be a positive integer.</b>
<b>Explanation</b>	Array dimensions have to be positive integers. For example, specify dimension = 2 in order to construct a string[[]].
<b>Action</b>	Provide a valid dimension.
<b>DEVDTE0019</b>	<b>Field "{0}" is not defined for type "{1}".</b>
<b>Explanation</b>	The type for the event does not contain the field. The type does not contain the field.
<b>Action</b>	Set or get a field that is defined for the type of the event.
<b>DEVDTE0020</b>	<b>Field "{0}" in event type "{1}" has field type "{2}" in event type variant "{3}", and field type "{4}" in event type variant "{5}".</b>
<b>Explanation</b>	The field types for a field are not matching.
<b>Action</b>	Consider using another event type variant for accessing the event.
<b>DEVDTE0021</b>	<b>The reserved package name "{0}" must not be used</b>
<b>Explanation</b>	The Digital Event Services system uses the reserved package name for internal purposes.
<b>Action</b>	Provide a valid package name.
<b>DEVDTE0022</b>	<b>Transmission event type "{0}" and subscribing event type "{1}" must be the same.</b>
<b>Explanation</b>	The event type used for transmission is different from the one that has been subscribed for.
<b>Action</b>	Contact Software AG support.

<b>DEVDTTE0024</b>	<b>The path for the "{0}" annotation "{1}" does not match any field definition.</b>
<b>Explanation</b>	The paths for the annotations like "EventTime" and "EventId" must point to an existing field.
<b>Action</b>	Correct the path value of the annotation.
<b>DEVDTTE0025</b>	<b>The field corresponding to event time path "{0}" is not a time field.</b>
<b>Explanation</b>	The event time path must point to an existing time field.
<b>Action</b>	Correct the path value of the EventTime annotation.
<b>DEVDTTE0028</b>	<b>Field "{0}" of event type "{1}" contains an unresolved reference to event type "{2}".</b>
<b>Explanation</b>	This should not happen because only valid event type models are stored to the repository. However, the referenced type is no longer available in the repository in the case that it has been deleted from it.
<b>Action</b>	Correct the invalid event type or add the referenced event type to the repository.
<b>DEVDTTE0030</b>	<b>The unique event type "{0}" has different variants.</b>
<b>Explanation</b>	A unique event type should only exist in one variant.
<b>Action</b>	Use only one variant of a unique event type.
<b>DEVDTTE0031</b>	<b>Variants of Event Type "{0}" differ in "unique" setting.</b>
<b>Explanation</b>	If an event type is "unique", there cannot exist another variant of the same event type which is not "unique".
<b>Action</b>	Define an event type as "unique" or use it with variants.
<b>DEVDTTE0032</b>	<b>The type name "{0}" does not have a package</b>
<b>Explanation</b>	Each event type name needs to be qualified with a package.
<b>Action</b>	Provide a valid type name.
<b>DEVDTTE0033</b>	<b>The event type "{0}" and the nested event type "{1}" should have the same uniqueness setting</b>
<b>Explanation</b>	If an event type is marked as "unique", it can only refer to other "unique" event types. Vice versa, a "non-unique" event type can only refer to other "non-unique" event types.
<b>Action</b>	Correct the uniqueness setting.

<b>DEVDTTE0035</b>	<b>Cannot access the field "{0}" of unknown type "{1}" in event type "{2}"</b>
<b>Explanation</b>	The data type of the field is not known to the current runtime, therefore the field value cannot be accessed.
<b>Action</b>	Specify a field with a known data type.
<b>DEVDTTE0049</b>	<b>No variant key allowed for unique referenced event type "{0}".</b>
<b>Explanation</b>	In case of a uniquely defined event type, variant keys must not be specified in an event type reference: Invalid field definition: "F1 : event : package.unique_eventtype("<variant key>");" Correct field definition: "F1 : event : package.unique_eventtype;" (* Uniquely defined event types contain a @Unique annotation on event level.) (* The variant key is a hexadecimal 16-digit value, which is automatically added to the file name in the repository.)
<b>Action</b>	Remove the variant key and just specify the fully qualified event type name: F1 : event : package.unique_eventtype;
<b>DEVDTTE0050</b>	<b>Variant key necessary for non-unique referenced event type "{0}".</b>
<b>Explanation</b>	In case of a non-uniquely defined event type, a variant key must be specified in an event type reference. Invalid field definition: "F1 : event : package.nonunique_eventtype;" Correct field definition: "F1 : event : package.nonunique_eventtype("<variant key>");" (* Non-uniquely defined event types don't contain a @Unique annotation on event level.) (* The <variant key> is a hexadecimal 16-digit value, which is automatically added to the file name in the repository.)
<b>Action</b>	Add the variant key behind the fully qualified event type name: F1 : event : package.nonunique_eventtype("<variant key>");"
<b>DEVDTTE0051</b>	<b>Unknown type found: {0}</b>
<b>Explanation</b>	The any field contains an unknown type or type id, that cannot be read. Maybe the event has been created in a later product version.
<b>DEVDTTE0052</b>	<b>Event type "{0}" cannot be resolved.</b>
<b>Explanation</b>	The event type cannot be resolved.
<b>DEVDTI0015</b>	<b>Annotation field name "{0}" has wrong format.</b>
<b>Explanation</b>	The annotation field name must follow this pattern: "[a-zA-Z][a-zA-Z0-9_]*".
<b>Action</b>	Provide a valid annotation field name.

<b>DEVDTI0016</b>	<b>Annotation type name "{0}" has wrong format.</b>
<b>Explanation</b>	The annotation type name must follow this pattern: "[a-zA-Z_][a-zA-Z0-9_]*(\.[a-zA-Z_][a-zA-Z0-9_]*)".
<b>Action</b>	Provide a valid annotation type name.

---

---

<b>EDAERBCE0000</b>	<b>The service group name must not be empty</b>
<b>Explanation</b>	Each service group must have a valid and unique name. The name must be unique in the namespace of all service groups. The service group name must follow the rule: <alpha character>+(<word character>   -   . )* where <word character> can be a digit, a lower or upper case character, and <alpha character> can be a lower or upper case character.
<b>Action</b>	Specify a valid and unique name for the service group.
<b>EDAERBCE0001</b>	<b>A service group with the name "{0}" already exists.</b>
<b>Explanation</b>	Each service group must have a valid and unique name. The name must be unique in the namespace of all service groups. The service group name must follow the rule: <alpha character>+(<word character>   -   . )* where <word character> can be a digit, a lower or upper case character, and <alpha character> can be a lower or upper case character.
<b>Action</b>	Specify a unique service group name.
<b>EDAERBCE0002</b>	<b>Invalid service group name "{0}". It must follow the rule: &lt;alpha character&gt;+(&lt;word character&gt;   -   . )*</b>
<b>Explanation</b>	Each service group must have a valid and unique name. The name must be unique in the namespace of all service groups. The service group name must follow the rule: <alpha character>+(<word character>   -   . )* where <word character> can be a digit, a lower or upper case character, and <alpha character> can be a lower or upper case character.
<b>Action</b>	Specify a valid service group name which follows the rule of service group names.

- EDAERBCE0003**     **Invalid service group name "{0}" because it is different from the created unique instance name "{1}" which is used for the configuration persistence.**
- Explanation**     Each service group must have a valid and unique name. The name must be unique in the namespace of all service groups. The service group name must follow the rule: <word character>+(<word character> | - | . | \_)\* where <word character> can be a digit, a lower or upper case character.
- Action**     Specify a valid service group name where service group name must be the same as the unique instance name.
- 
- EDAERBCE0004**     **The default service group must not be deleted**
- Explanation**     The default service group name is "Default". This group covers all event types which are not associated to other service groups, therefore the "Default" service group cannot be deleted.
- Action**     Do not delete the "Default" service group.
- 
- EDAERBCE0006**     **The default service group must not be renamed**
- Explanation**     The default service group name is "Default". This group covers all event types which are not associated to other service groups, therefore the "Default" service group cannot be renamed.
- Action**     Do not rename the "Default" service group.
- 
- EDAERBCE0007**     **The service group "{0}" is still referenced by an event type e.g. "{1}"**
- Explanation**     A service group can only be deleted if no event types are associated to it.
- Action**     Remove all event types associations to the service group before deleting it.
- 
- EDAERBCE0008**     **The service group "{0}" contains duplicate service entries: "{1}"**
- Explanation**     Each service group must contain at least one service. The list of services within a service group must contain only unique services.
- Action**     Use only unique services within a service group.
- 
- EDAERBCE0009**     **The service group "{0}" must contain at least one service**
- Explanation**     Each service group must contain at least one service. The list of services within a service group must contain only unique services.
- Action**     Assign at least one service to the service group.

---

<b>EDAERBCE0010</b>	<b>The referenced service "{0}" does not exist</b>
<b>Explanation</b>	The specified service does not exist and cannot be assigned to a service group.
<b>Action</b>	Choose a valid service in order to assign it to a service group.
<b>EDAERBCE0011</b>	<b>In the group "{0}" only one service can be marked as "source"</b>
<b>Explanation</b>	Only one service within a service group can be specified as "source".
<b>Action</b>	Mark only one service as "source".
<b>EDAERBCE0012</b>	<b>Service type name not found for service "{0}" in group "{1}"</b>
<b>Explanation</b>	A service with invalid service type has been specified within a certain service group.
<b>Action</b>	Use a service with a valid service type. Only valid services may be assigned to a service group.
<b>EDAERBCE0013</b>	<b>Service type not found for service "{0}" in group "{1}"</b>
<b>Explanation</b>	A service with invalid service type has been specified within a certain service group.
<b>Action</b>	Use a service with a valid service type. Only valid services may be assigned to a service group.
<b>EDAERBCE0014</b>	<b>The service "{0}" is marked as "source", however the corresponding service type "{1}" cannot act as source</b>
<b>Explanation</b>	The parameters of each service depend on its service type definition. If the service type is not configured to act as source, then the services of that type cannot be configured as "source" either.
<b>Action</b>	Remove the "source" marker from the service definition or change the configuration of the service type in order to allow the "source" marker.
<b>EDAERBCE0015</b>	<b>The service "{0}" is marked as "reliable", however the corresponding service type "{1}" does not support reliable</b>
<b>Explanation</b>	The parameters of each service depend on its service type definition. If the service type is not configured to support reliable delivery, then the services of that type cannot be configured as "reliable" either.
<b>Action</b>	Remove the "reliable" marker from the service definition or change the configuration of the service type in order to allow the "reliable" marker.

<b>EDAERBCE0017</b>	<b>The service name must not be empty</b>
<b>Explanation</b>	Each service must have a valid and unique name. A service name must follow the rule: <word character>+(<word character>   -   . )* where <word character> can be a digit, lower or upper character.
<b>Action</b>	Specify a valid name for the service.
<b>EDAERBCE0018</b>	<b>A service with the name "{0}" already exists.</b>
<b>Explanation</b>	Each service must have a valid and unique name. A service name must follow the rule: <word character>+(<word character>   -   . )* where <word character> can be a digit, lower or upper character.
<b>Action</b>	Specify a unique name for the service.
<b>EDAERBCE0019</b>	<b>The service "{0}" is still used by the Service Group "{1}".</b>
<b>Explanation</b>	A service can only be deleted if it is not included in a service group.
<b>Action</b>	Remove all references to the service before deleting it.
<b>EDAERBCE0020</b>	<b>Invalid name "{0}". It must follow the rule: &lt;alpha character&gt;+(&lt;word character&gt;   -   . )*</b>
<b>Explanation</b>	A name must follow the rule: <alpha character>+(<word character>   -   . )* where <word character> can be a digit, lower or upper character.
<b>Action</b>	Do not use invalid URI characters.
<b>EDAERBCE0021</b>	<b>Name "{0}" not unique considering the instance IDs. (Not allowed predefined ids: {1}).</b>
<b>Explanation</b>	Software AG Platform Manager allows only unique instance IDs to be used for the Event Routing runtime component.
<b>Action</b>	Change the name so that is is not identical to any other already existing service names, service group names, or the predefined {1}.
<b>EDAERBCE0024</b>	<b>Event type "{0}" does not exist</b>
<b>Explanation</b>	The specified event type is not present in the Event Type Store, and therefore cannot be used in the Service Group Event Types configuration.
<b>Action</b>	Remove the event type from the Service Group Event Types.

---

<b>EDAERBCE0025</b>	<b>Duplicate event type "{0}"</b>
<b>Explanation</b>	The specified event type appears twice in the Service Group Event Types configuration.
<b>Action</b>	Remove the duplicate event type from the Service Group Event Types configuration.
<b>EDAERBCE0026</b>	<b>The service group "{0}" does not exist</b>
<b>Explanation</b>	The specified service group does not exist.
<b>Action</b>	Remove the service group from the Service Group Event Types configuration, or create the service group before updating the Service Group Event Types configuration.
<b>EDAERBCE0028</b>	<b>A service group must not be renamed</b>
<b>Explanation</b>	A service group name is used as a unique id to reference the service group.
<b>Action</b>	If a new name is required, delete the service group and create a new one. Before deleting the service group make sure that no event types are associated to it.
<b>EDAERBCE0029</b>	<b>A service must not be renamed</b>
<b>Explanation</b>	A service name is used as a unique id to reference the service.
<b>Action</b>	If a new name is required, delete the service and create a new one. Before deleting the service make sure it is no longer referenced by any service group.
<b>EDAERBCE0030</b>	<b>"{0}" is not a valid capacity value</b>
<b>Explanation</b>	The capacity must consist of digits only, optionally followed by one of [K, k, M, m, G, g]. The resulting value must not be larger than 9223372036854775807.
<b>Action</b>	Provide a valid capacity.
<b>EDAERBCE0032</b>	<b>The "{0}" service has to be configured as source&amp;destination</b>
<b>Explanation</b>	This predefined service can only be used as "source and destination".
<b>Action</b>	Configure the service as "source and destination".
<b>EDAERBCE0033</b>	<b>Cannot use reserved service name "{0}"</b>
<b>Explanation</b>	This is the name of a predefined service.
<b>Action</b>	Choose a different service name.

<b>EDAERBCE0038</b>	<b>It is not possible to change storage location, while instance {0} is running</b>
<b>Explanation</b>	Please ensure that the component using Event Routing is restarted in order to start using the new storage location.
<b>Action</b>	Changing the storage location requires a restart of the components using Event Routing.
<b>EDAERBCE0040</b>	<b>The specified path "{0}" is not a valid directory</b>
<b>Explanation</b>	The path is not an existing directory.
<b>Action</b>	Make sure that the specified directory exists.
<b>EDAERBCE0041</b>	<b>The specified path "{0}" is not an absolute path.</b>
<b>Explanation</b>	The path must be specified as an absolute path.
<b>Action</b>	Make sure that the path is specified as an absolute path.
<b>EDAERBCE0042</b>	<b>The specified path "{0}" does not exist</b>
<b>Explanation</b>	The path must be a valid folder and it must exist on disk.
<b>Action</b>	Make sure the path location is an existing folder and create it if necessary.
<b>EDAERCE0005</b>	<b>It is not allowed to create new instances of Runtime Configuration</b>
<b>Explanation</b>	Only one built-in instance of Runtime Configuration exists.
<b>Action</b>	In order to apply your changes, edit the built-in instance of Runtime Configuration.
<b>EDAERCE0021</b>	<b>Invalid name "{0}". It must follow the rule: &lt;alpha character&gt;+(&lt;word character&gt;   -   .)*</b>
<b>Explanation</b>	Each service must have a valid and unique name. A service name must follow the rule: <alpha character>+(<word character>   -   .)* where <word character> can be a digit, lower or upper character, and <alpha character> can be a lower or upper case character. The service name is the same as the corresponding instance ID, which is used to identify a service in the configuration persistence. This instance ID must be unique for all instances of Event Routing.
<b>Action</b>	Use a valid service name following the naming rules.

---

<b>EDAERCE0022</b>	<b>It is not allowed to create new instances of Service Group Event Types</b>
<b>Explanation</b>	Only one built-in instance of Service Group Event Types exists.
<b>Action</b>	In order to apply changes, edit the built-in instance of Service Group Event Types.
<b>EDAERCE0023</b>	<b>It is not allowed to delete the instance of Service Group Event Types</b>
<b>Explanation</b>	Only one built-in instance of Service Group Event Types exists, and it cannot be deleted.
<b>Action</b>	In order to apply changes, edit the built-in instance of Service Group Event Types.
<b>EDAERCE0027</b>	<b>Internal error: the given "RuntimeComponent" parameter is not an instance of the "Instance" interface</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact your support organization.
<b>EDAERCE0031</b>	<b>It is not allowed to delete the instance of Runtime Configuration</b>
<b>Explanation</b>	There is only one built-in instance of Runtime Configuration, which must not be deleted.
<b>Action</b>	In order to apply changes, edit the built-in instance of Runtime Configuration.
<b>EDAERCE0041</b>	<b>Exception from getRuntimeStatus.</b>
<b>EDAERCE0048</b>	<b>Registration failed for service type: {0}.</b>
<b>EDAERCI0043</b>	<b>ui binding for {0} setup.</b>
<b>EDAERCI0045</b>	<b>com.softwareag.event.routing.configuration bundle stopped.</b>
<b>EDAERCPE0028</b>	<b>Passed object of RunWatchdog is not valid</b>
<b>Explanation</b>	During instantiation of one of the RunWatchdog handlers, the RunWatchdog object itself is passed. However, this RunWatchdog object is not valid (null).
<b>Action</b>	Verify that the RunWatchdog object is valid before instantiating the handlers.

<b>EDAERCPE0029</b>	<b>Default configuration not found</b>
<b>Explanation</b>	If no event routing configuration is available, all default configuration files are copied to the place where the configuration is expected. However, the zip file containing all these files could not be found. This file is created by calling the "eclipse" task of the project.
<b>Action</b>	Execute the "eclipse" task of the gradle build script beforehand.
<b>EDAERCPE0030</b>	<b>File {0} is empty! Service {1} is not created and no events can be handled by {1}</b>
<b>Explanation</b>	The file has no content. A service cannot be created and no events can be sent or received.
<b>Action</b>	Provide a file containing the desired entry or use a graphical configuration such as Software AG Command Central user interface for creating a correct service.
<b>EDAERCPE0031</b>	<b>{0} contains invalid content {1}</b>
<b>Explanation</b>	The content is not correct.
<b>Action</b>	Correct the content or use a graphical configuration tool such as Software AG Command Central.
<b>EDAERCW0042</b>	<b>Service group {0}: IP service set to source&amp;destination.</b>
<b>EDAERE0002</b>	<b>Failed to start a subscriber route consuming from URI "{0}".</b>
<b>Explanation</b>	A subscriber cannot be created because of an unavailable source service or an invalid or an already used durable subscriber ID.
<b>Action</b>	Check if the service configured as a source is available. If you are creating a durable subscriber, make sure that its ID does not contain invalid characters, and that no durable subscriber with this ID for the same event type is currently active on the source service.
<b>EDAERE0003</b>	<b>Failed to start a subscriber route consuming from URI "{0}": a durable subscriber with ID "{1}" already exists on the IP service.</b>
<b>Explanation</b>	An IP service durable subscriber cannot be created because of an already used durable subscriber ID.
<b>Action</b>	Make sure that no durable subscriber with this ID for the same event type is currently active on the source IP service.

---

<b>EDAERE0058</b>	<b>Failed to delete the service implementation bundle for service name: "{0}".</b>
<b>Explanation</b>	Undeploying the service from the bundles folder of the configuration failed. Even if the service could not be deleted, this should not prevent the system from running normally.
<b>Action</b>	Delete the service jar file manually if desired.
<b>EDAESE0000</b>	<b>Failed to create an event parser.</b>
<b>Explanation</b>	The factory was not able to create an event parser.
<b>Action</b>	Check the log for exception stacktrace.
<b>EDAESIE0004</b>	<b>The selected Integration Server Document Type is recursive and its conversion results in a recursive Event Type which is not supported.</b>
<b>Explanation</b>	The Integration Server Document type which has been selected is recursive. After the conversion a recursive Event Type is produced. Recursive Event Types are not supported.
<b>Action</b>	Remove recursion from the Integration Server Document type prior to creating an event type from it.
<b>EDAESIE0006</b>	<b>Restrictions not supported for {0}</b>
<b>Explanation</b>	Union and List are not supported for restrictions.
<b>Action</b>	Please contact your software supplier.
<b>EDAESIE0007</b>	<b>Unsupported facet {0} with value {1}</b>
<b>Explanation</b>	The called restriction facet is not supported.
<b>Action</b>	Please contact your software supplier.
<b>EDAESIE0029</b>	<b>Event Types without a target namespace are not allowed outside the root "Event Types" directory.</b>
<b>Explanation</b>	An event type which does not define target namespace exists outside the root of the event types directory.
<b>Action</b>	Either move this event type in the "Event Types" directory or manually create a target namespace definition for it.

<b>EDAESIE0034</b>	<b>Node {0} is not filterable because node {1} is not of cardinality 0..1 or 1..1.</b>
<b>Explanation</b>	The node is not filterable, since the node path can have several values (and not only a unique one).
<b>Action</b>	Set the node to not filterable, or set the cardinality of all nodes on the node path to cardinality 1..1.
<b>EDAESIE0035</b>	<b>Node {0} is not filterable because nodes {1} are not of cardinality 0..1 or 1..1.</b>
<b>Explanation</b>	The node is not filterable, since the node path can have several values (and not only a unique one).
<b>Action</b>	Set the node to not filterable, or set the cardinality of all nodes on the node path to cardinality 1..1.
<b>EDAETE0211</b>	<b>Event Types without a target namespace are not allowed outside the root "Event Types" directory.</b>
<b>Explanation</b>	An event type which does not define target namespace exists outside the root of the event types directory.
<b>Action</b>	Either move this event type in the "Event Types" directory or manually create a target namespace definition for it.
<b>EDAETE0213</b>	<b>Cannot build editor tree.</b>
<b>Explanation</b>	A unexpected error occurred while building the editor tree.
<b>Action</b>	Make sure the event type schema is correctly defined.
<b>EDAETE0214</b>	<b>Cannot provide children in node tree.</b>
<b>Explanation</b>	Unexpected error while getting the child nodes in a node tree.
<b>Action</b>	Make sure the event type schema is correctly defined.
<b>EDAISE0012</b>	<b>The selected IS Document Type is recursive and its conversion results in a recursive Event Type which is not supported.</b>
<b>Explanation</b>	The IS Document type which has been selected is recursive. After the conversion a recursive Event Type is produced. Recursive Event Types are not supported.
<b>Action</b>	Remove recursion from the IS Document type prior to creating an event type from it.

---

<b>EDANCE0000</b>	<b>Failed to parse date string "{0}" within {1}</b>
<b>Explanation</b>	Failed to parse date string.
<b>Action</b>	Check the format of the supplied data.
<b>EDANCE0001</b>	<b>Failed to parse date string "{0}" within {1}</b>
<b>Explanation</b>	Failed to not parse date string.
<b>Action</b>	Check the format of the supplied data.
<b>EDANCE0003</b>	<b>Specified value "{0}" for property "{1}" is not of type integer.</b>
<b>Explanation</b>	Required property is not of required type.
<b>Action</b>	Check the format of the supplied data.
<b>EDANCE0004</b>	<b>Specified value "{0}" for property "{1}" is not of type long.</b>
<b>Explanation</b>	Specified value for a property is not of type long.
<b>Action</b>	Check whether the specified property is of the required type.
<b>EDANCE0005</b>	<b>Specified value "{0}" for property "{1}" is not of the supported types: "{2}", "{3}", "{4}", "{5}", "{6}", "{7}".</b>
<b>Explanation</b>	The specified guaranteed delivery level in your NERV configuration file is not of the supported ones.
<b>Action</b>	Go to the NERV configuration file and specify one of the valid values: NORMAL, HIGH, MAXIMUM_STRONG, MAXIMUM_EVENTUAL, SHARED for the com.softwareag.eda.nerv.guaranteed.delivery.level property.
<b>EDANCE0007</b>	<b>Failed to create JNDI entry for topic "{0}".</b>
<b>Explanation</b>	Failed to create JNDI entry.
<b>Action</b>	Check your JMS provider configuration.
<b>EDANCE0008</b>	<b>No {0} instance available - no attempts will be made for creating JNDI entry for topic "{1}".</b>
<b>Explanation</b>	Failed to create JNDI entry.
<b>Action</b>	Check your JMS provider configuration.

<b>EDANCE0009</b>	<b>Failed to create topic with name "{0}" on the JMS provider.</b>
<b>Explanation</b>	Failed to create topic on the JMS Provider.
<b>Action</b>	Check your JMS provider configuration.
<b>EDANCE0010</b>	<b>No {0} instance available - no attempts will be made for creating topic with name "{1}" on the JMS provider.</b>
<b>Explanation</b>	Failed to create topic on the JMS provider.
<b>Action</b>	Check your JMS provider configuration.
<b>EDANCE0012</b>	<b>{0} instance is not configured properly.</b>
<b>Explanation</b>	The JNDI settings of your NERV component configuration are not correct.
<b>Action</b>	Check the JNDI settings of your NERV component configuration.
<b>EDANCE0013</b>	<b>Failed to create topic with name "{0}" on Broker running at "{1}".</b>
<b>Explanation</b>	During emit and subscribe operations NERV creates the respective topics on the JMS provider if they are missing.
<b>Action</b>	Check your JMS provider and NERV configuration.
<b>EDANCE0014</b>	<b>Failed to bind topic "{0}" at "{1}".</b>
<b>Explanation</b>	Failed to bind topic.
<b>Action</b>	Check your JMS provider configuration.
<b>EDANCE0015</b>	<b>Failed to create topic "{0}" on Universal Messaging Realm server at "{1}".</b>
<b>Explanation</b>	Failed to create topic.
<b>Action</b>	Check your JMS provider configuration.
<b>EDANCE0016</b>	<b>Failed to process the specified JMS provider url: "{0}". The expected format is "{1}{broker.name}@{broker.host}:{broker.port}".</b>
<b>Explanation</b>	Failed to process the JMS provider URL.
<b>Action</b>	Check your NERV configuration.

<b>EDANCE0017</b>	<b>No connection factory found. Either the "{0}" instance is not available or the creation of the factory has failed.</b>
<b>Explanation</b>	No connection factory has been found. This might be due to the unavailability of the NERV destination support service or the failure of the factory creation. This service is available only for webMethods Broker and Universal Messaging components.
<b>Action</b>	Check your NERV configuration and make sure Universal Messaging or Broker are configured and running.
<b>EDANCE0028</b>	<b>Failed to create connection factory for Broker with name "{0}" and address "{1}".</b>
<b>Explanation</b>	During initialization NERV tries to create and bind a connection factory for the specified JMS provider if such does not exist.
<b>Action</b>	Please make sure the specified provider URL denotes a running webMethods Broker instance.
<b>EDANCE0029</b>	<b>Failed to create topic with name "{0}" on Broker running at "{1}".</b>
<b>Explanation</b>	During emit and subscribe operations NERV creates the respective topics on the JMS provider if they are missing.
<b>Action</b>	Check your JMS provider and NERV configuration.
<b>EDANCE0032</b>	<b>The JmsSupport utility supports Universal Messaging and Broker, but the specified JMS provider "{0}" is of a different type.</b>
<b>Explanation</b>	The JmsSupport utility does not support the specified JMS provider.
<b>Action</b>	Please specify a provider URL denoting a JMS provider of type Universal Messaging or Broker.
<b>EDANCW0002</b>	<b>Not a date: {0} {1}</b>
<b>Explanation</b>	The passed argument is not a date.
<b>Action</b>	Check whether the passed argument is of the required type.
<b>EDANCW0011</b>	<b>Unsupported JMS provider. No attempts will be made for configuring the JMS provider.</b>
<b>Explanation</b>	Unsupported JMS provider.
<b>Action</b>	Check documentation for the list of supported JMS providers.

<b>EDANCW0026</b>	<b>JMS provider URL is set to "{0}" and the hostname denotes a loopback address. Remote clients will not be able to establish a connection to the JMS server.</b>
<b>Explanation</b>	This property is used for creating a connection factory that clients can look up remotely.
<b>Action</b>	To use NERV to connect remotely to a JMS provider, you must change the value of the JMS provider URL property to the actual hostname of the JMS server.
<b>EDANIE0002</b>	<b>Failed to propagate NERV properties change to NERV errorhandler because the JMX helper is not initialized.</b>
<b>Explanation</b>	Failed to propagate NERV properties change to NERV errorhandler because the JMX helper is not initialized.
<b>Action</b>	Check that NERV is properly initialized.
<b>EDANIE0005</b>	<b>Failed to handle notification.</b>
<b>Explanation</b>	Failed to handle route changed notification or unrecognized notification type.
<b>Action</b>	Check that NERV is properly initialized.
<b>EDANIE0006</b>	<b>NERV could not close JMS connection factory successfully.</b>
<b>Explanation</b>	NERV could not close JMS connection factory successfully.
<b>Action</b>	Close JMS connection factory.
<b>EDANIE0011</b>	<b>Failed to register service "{0}"</b>
<b>Explanation</b>	Failed to register Destination Support Service
<b>Action</b>	Make sure that NERV is properly configured.
<b>EDANIE0013</b>	<b>Failed to propagate NERV properties change to NERV component updater because it is not available.</b>
<b>Explanation</b>	Failed to propagate NERV properties change to NERV component updater because it is not available.
<b>Action</b>	Check the log files for errors during Component Updater initialization.
<b>EDANIE0014</b>	<b>Failed to propagate NERV properties change to NERV errorhandler updater because it is not available.</b>
<b>Explanation</b>	Failed to propagate NERV properties change to NERV errorhandler updater because it is not available.
<b>Action</b>	Check the log files for errors during Error Handler initialization.

---

<b>EDANIE0015</b>	<b>Failed to restart file watcher for NERV deployment directory.</b>
<b>Explanation</b>	Failed to restart file watcher for NERV deployment directory.
<b>Action</b>	Check that NERV is properly configured.
<b>EDANIE0018</b>	<b>Failed to update NERV component "{0}" in "{1}".</b>
<b>Explanation</b>	Failed to update NERV Default JMS component Event Consumer Service.
<b>Action</b>	Make sure that NERV is properly configured.
<b>EDANIE0019</b>	<b>Failed to update NERV component "{0}" in "{1}".</b>
<b>Explanation</b>	Failed to update NERV Default JMS component Event Emitter Service.
<b>Action</b>	Make sure that NERV is properly configured.
<b>EDANIE0021</b>	<b>Failed to configure NERV Default Component "{0}" via properties because the property "{1}" is missing or has an empty value.</b>
<b>Explanation</b>	Failed to configure NERV Default Component via properties because com.softwareag.eda.nerv.default.jms.provider property is missing or has an empty value.
<b>Action</b>	Make sure that NERV is properly configured.
<b>EDANIE0022</b>	<b>Unsubscribe failed for endpoint: &lt;&lt;{0}&gt;&gt;. No such subscription found.</b>
<b>Explanation</b>	Unsubscribe failed for endpoint. No such subscription found.
<b>Action</b>	Check endpointURI.
<b>EDANIE0023</b>	<b>Failed to find any NERV errohandler MBeans.</b>
<b>Explanation</b>	Failed to find any NERV errohandler Services.
<b>Action</b>	Check that NERV error handling is properly configured.
<b>EDANIE0024</b>	<b>Failed to configure NERV errorhandlers.</b>
<b>Explanation</b>	Failed to configure NERV errorhandlers.
<b>Action</b>	Check that NERV error handling is properly configured.

<b>EDANIE0025</b>	<b>Failed to obtain pub/sub "toEndpoint" for: {0}</b>
<b>Explanation</b>	Failed to obtain pub/sub "toEndpoint" for specified url.
<b>Action</b>	Check that NERV Components are properly configured.
<b>EDANIE0026</b>	<b>Failed to set tracing for object name "{0}" to: {1}</b>
<b>Explanation</b>	Failed to set tracing for object name to value.
<b>Action</b>	Check that NERV Components are properly configured.
<b>EDANIE0027</b>	<b>Failed to find existing in-memory endpoint object name for: {0}</b>
<b>Explanation</b>	Failed to find existing in-memory endpoint object name for the specified url.
<b>Action</b>	Check that NERV Components are properly configured.
<b>EDANIE0028</b>	<b>Failed to resolve component: "{0}". NERVSingleton.loadAssets() method has to be invoked prior to obtaining EventEmitter or EventConsumer references.</b>
<b>Explanation</b>	Failed to resolve specified component. NERVSingleton.loadAssets() method has to be invoked prior to obtaining EventEmitter or EventConsumer references.
<b>Action</b>	Make sure NERVSingleton.loadAssets() has been invoked before obtaining Consumer/Emitter references.
<b>EDANIE0029</b>	<b>Failed to resolve component: "{0}". There is no such bean loaded by NERV.</b>
<b>Explanation</b>	Failed to resolve the specified component. No such bean is loaded by NERV.
<b>Action</b>	Check NERV configuration.
<b>EDANIE0030</b>	<b>Failed to resolve component: "{0}". The bean exists, but it is not a NERV component.</b>
<b>Explanation</b>	Failed to resolve specified component. The bean exists, but it is not a NERV component.
<b>Action</b>	Check that the bean is a NERV component.
<b>EDANIE0031</b>	<b>The event type is not specified in the headers of event: {0}</b>
<b>Explanation</b>	The event type is not specified in the event headers.
<b>Action</b>	Message headers map should contain an "\$Event\$Type" entry.

---

<b>EDANIE0032</b>	<b>No Event Type Store has been set.</b>
<b>Explanation</b>	No Event Type Store has been set.
<b>Action</b>	Check that the Event Type Store location is configured properly.
<b>EDANIE0033</b>	<b>The event type is not specified in the message headers.</b>
<b>Explanation</b>	The event type is not specified in the event headers.
<b>Action</b>	Message headers map should contain an "\$Event\$Type" entry.
<b>EDANIE0034</b>	<b>No OSGi bundle context is set.</b>
<b>Explanation</b>	No OSGi bundle context is set. The bundle has not been initialized correctly.
<b>Action</b>	Restart bundle/OSGi/Product instance.
<b>EDANIE0035</b>	<b>Failed to resolve component with id "{0}". The JMS provider might be down.</b>
<b>Explanation</b>	Failed to resolve specified component. Possible cause: the JMS provider is unreachable due to incorrectly set address in the NERV component configuration properties file or due to the JMS provider being down.
<b>Action</b>	Check NERV Component configuration. Check if the JMS provider is running and reachable.
<b>EDANIE0036</b>	<b>Failed to resolve component with id "{0}".</b>
<b>Explanation</b>	Failed to resolve the specified component.
<b>Action</b>	Check NERV Component configuration.
<b>EDANIE0037</b>	<b>Failed to create NERV default component "{0}": unknown JMS provider "{1}".</b>
<b>Explanation</b>	Failed to create NERV default component: NERVDefaultJms unknown JMS provider.
<b>Action</b>	Check the value of the com.softwareag.eda.nerv.default.jms.provider property in the NERV configuration file.
<b>EDANIE0038</b>	<b>No OSGi bundle context is set.</b>
<b>Explanation</b>	No OSGi bundle context is set. The bundle has not been initialized correctly.
<b>Action</b>	Restart bundle/OSGi/Product instance.

<b>EDANIE0039</b>	<b>Failed to get NERV default component status.</b>
<b>Explanation</b>	Failed to get NERV default component status.
<b>Action</b>	Check that NERV is properly configured.
<b>EDANIE0040</b>	<b>Failed to subscribe to an empty endpoint URI: &lt;&lt;{0}&gt;&gt;</b>
<b>Explanation</b>	Failed to subscribe to an empty endpoint URI.
<b>Action</b>	Check that endpointURI is not null or empty.
<b>EDANIE0041</b>	<b>Failed to subscribe to endpoint URI: &lt;&lt;{0}&gt;&gt;</b>
<b>Explanation</b>	Failed to subscribe to the specified endpoint URI.
<b>Action</b>	Check that the endpointURI is valid.
<b>EDANIE0042</b>	<b>Processor must not be null.</b>
<b>Explanation</b>	When making a subscription, the provided Processor must not be null.
<b>Action</b>	Make sure the processor is not null.
<b>EDANIE0043</b>	<b>End-Points must be more than zero.</b>
<b>Explanation</b>	When making a subscription, the list of the End-Points must contain at least one entry.
<b>Action</b>	Check endpointURIs.
<b>EDANIE0044</b>	<b>Processor must not be null.</b>
<b>Explanation</b>	When unsubscribing, the provided Processor must not be null.
<b>Action</b>	Make sure the processor is not null.
<b>EDANIE0045</b>	<b>No route with id:&lt;&lt;{0}&gt;&gt; found while trying to stop!</b>
<b>Explanation</b>	No route with the specified id is found while trying to stop!
<b>Action</b>	Make sure the route ID is correct.
<b>EDANIE0046</b>	<b>Event Type must be specified in the message headers.</b>
<b>Explanation</b>	The event type is not specified in the event headers.
<b>Action</b>	Message headers map should contain a valid "\$Event\$Type" entry.

---

<b>EDANIE0047</b>	<b>Message should not be null.</b>
<b>Explanation</b>	Message should not be null or empty.
<b>Action</b>	Make sure the message is not null or empty.
<b>EDANIE0048</b>	<b>Message should not be null and at least one endpoint should be specified.</b>
<b>Explanation</b>	Message should not be null and at least one endpoint should be specified.
<b>Action</b>	Check that the message is not null or empty and that the endpointURIs is not null or empty.
<b>EDANIE0049</b>	<b>&lt;&lt;{0}&gt;&gt; is mandatory header.</b>
<b>Explanation</b>	The "\$Event\$EventID" entry is not specified in the headers of the event.
<b>Action</b>	Message headers map should contain an "\$Event\$EventID" entry.
<b>EDANIE0050</b>	<b>Failed to set {0} header.</b>
<b>Explanation</b>	Failed to set "\$Event\$Start" header.
<b>Action</b>	Expect events with a missing start header.
<b>EDANIE0051</b>	<b>Error while emitting event to endpoint: {0}</b>
<b>Explanation</b>	Error while emitting event to endpoint.
<b>Action</b>	Check the log file for more details.
<b>EDANIE0052</b>	<b>Error while emitting event to endpoint: {0}</b>
<b>Explanation</b>	Error while emitting event to endpoint.
<b>Action</b>	Check the log file for more details.
<b>EDANIE0053</b>	<b>Error while emitting event to endpoint: {0}</b>
<b>Explanation</b>	Error while emitting event to endpoint.
<b>Action</b>	Check the log file for more details.
<b>EDANIE0054</b>	<b>Failed to create route from: {0} to: {1}.</b>
<b>Explanation</b>	Failed to create default routing.
<b>Action</b>	Check the log file for more details.

**EDANIE0055**      **NERV Default Error Handler "{0}" has not been set. Please make sure a valid instance of type "{0}" is provided during Event Emitter instantiation.**

**Explanation**      No ErrorHandlerBuilder instance has been provided during Event Emitter instantiation.

**Action**              Check that a service/bean of type ErrorHandlerBuilder is exposed/registered by NERV.

**EDANIE0056**      **Failed to remove default route for endpoint: {0}**

**Explanation**      Failed to remove default route for endpoint.

**Action**              Check the log file for more details.

**EDANIE0057**      **Component Resolver has not been set. Please make sure a valid instance of type "{0}" is provided during Event Emitter instantiation.**

**Explanation**      No Component Resolver instance has been provided during Event Emitter instantiation.

**Action**              Check that a service/bean of type ComponentResolver is exposed/registered by NERV.

**EDANIE0058**      **EDAEventTypeID must not be null.**

**Explanation**      EDAEventTypeID must not be null.

**Action**              When making a subscription, check that eventTypeID is not null.

**EDANIE0059**      **No route with id:<<{0}>> found while trying to stop.**

**Explanation**      No route with specified id found while trying to stop.

**Action**              Check the log file for more details.

**EDANIE0060**      **Message should not be null.**

**Explanation**      Message should not be null.

**Action**              Check that the message is not null.

**EDANIE0061**      **Message should not be null.**

**Explanation**      Message should not be null.

**Action**              Check that the message is not null.

---

<b>EDANIE0062</b>	<b>Event type is missing from the provided event envelope. It should be specified under the /Event/Header/Type element of the XML string. The following tag should exist &lt;Type&gt;...&lt;/Type&gt;. Provided event envelope: {0} {1}</b>
<b>Explanation</b>	Event type is missing from the provided event envelope. It should be specified under the /Event/Header/Type element of the XML string. The following tag should exist <Type>...</Type>.
<b>Action</b>	Check that the eventContent matches the specified pattern.
<b>EDANIE0063</b>	<b>Could not find body element in the following string: {0}</b>
<b>Explanation</b>	Could not find body element in the specified string.
<b>Action</b>	Check that eventAsXMLString matches the specified pattern.
<b>EDANIE0064</b>	<b>Event type is either missing or has incorrect format. Provided event type: {0}</b>
<b>Explanation</b>	Event type is either missing or has incorrect format.
<b>Action</b>	Check that eventType is not null or empty or invalid.
<b>EDANIE0065</b>	<b>Event helper is null. It must be set prior to using it.</b>
<b>Explanation</b>	Event helper is null. It must be set prior to using it.
<b>Action</b>	Message Creator service is not configured properly. Check the NERV configuration.
<b>EDANIE0066</b>	<b>Event type store has not been set. Please make sure a valid reference to the Event Type Store is provided during Message Creator instantiation.</b>
<b>Explanation</b>	Event type store has not been set. Please make sure a valid reference to the Event Type Store is provided during Message Creator instantiation.
<b>Action</b>	Check that the Event Type Store location is configured properly.
<b>EDANIE0067</b>	<b>Failed to marshal event.</b>
<b>Explanation</b>	Failed to marshal event.
<b>Action</b>	Check the log file for more details.
<b>EDANIE0068</b>	<b>Event type is either missing or has incorrect format. It should be specified in the message headers map using key {0}.</b>
<b>Explanation</b>	Event type is either missing or has an incorrect format.
<b>Action</b>	Message headers map should contain an "\$Event\$Type" entry.

<b>EDANIE0069</b>	<b>Event should not be null or empty.</b>
<b>Explanation</b>	Event should not be null or empty.
<b>Action</b>	Check that eventAsXMLString is not null or empty.
<b>EDANIE0070</b>	<b>Failed to extract headers and filterable properties from event: {0} {1}</b>
<b>Explanation</b>	Failed to extract headers and filterable properties from the spefied event.
<b>Action</b>	Check the log file for more details.
<b>EDANIE0071</b>	<b>Event headers cannot be null and should not be empty.</b>
<b>Explanation</b>	Invalid headers.
<b>Action</b>	Check that the headers are not null or empty.
<b>EDANIE0072</b>	<b>Event headers cannot be null and should not be empty.</b>
<b>Explanation</b>	Invalid headers.
<b>Action</b>	Check that the headers are not null or empty.
<b>EDANIE0073</b>	<b>Event body should not be null. This is allowed only if the event is of kind heartbeat.</b>
<b>Explanation</b>	Invalid body.
<b>Action</b>	Check that the body is not null or empty.
<b>EDANIE0077</b>	<b>Failed to resolve XSD parser.</b>
<b>Explanation</b>	An error has occurred while trying to provide an XSD parser instance.
<b>Action</b>	Please review the exception stacktrace for detailed explanation of the failure.
<b>EDANIE0078</b>	<b>Failed to resolve XSD parser due to missing Event Type Store bean with name "{0}".</b>
<b>Explanation</b>	The default Event Type Store bean has not been found.
<b>Action</b>	Please make sure that you have specified a correct Event Type Store location in the NERV configuration file.
<b>EDANIE0083</b>	<b>Error while emitting event to endpoint: {0}</b>
<b>Explanation</b>	Error while emitting event to endpoint.
<b>Action</b>	Check the log file for more details.

---

<b>EDANIE0088</b>	<b>Guaranteed delivery level is set to "{0}", but the configuration directory specified via property "{1}" at "{2}" does not contain a configuration file with name "{3}".</b>
<b>Explanation</b>	No configuration XML file with name equal to the selected guaranteed level is found at the specified configuration directory.
<b>Action</b>	Make sure that a file with name equal to the specified guaranteed mode exists in the configuration directory.
<b>EDANIE0090</b>	<b>Event Emitter has not been set. Please make sure a valid instance of type "0" is provided during Event Consumer instantiation.</b>
<b>Explanation</b>	No Event Emitter instance has been provided during Event Consumer instantiation.
<b>Action</b>	Check that a service/bean of type Event Emitter is exposed/registered by NERV.
<b>EDANIE0091</b>	<b>Failed to flush NERV caches.</b>
<b>Explanation</b>	During initialization NERV flushes all cached events.
<b>Action</b>	Check the exception stacktrace in the log file for more details. Restarting NERV would trigger another flush attempt.
<b>EDANIE0094</b>	<b>Failed to retrieve bindings of type "{0}" from JNDI context at "{1}".</b>
<b>Explanation</b>	Look-up of bindings from the JNDI context at the specified server failed.
<b>Action</b>	Make sure that the messaging provider denoted by the provider URL property is up and running. Check the log file for any preceding error logs that might be related to this issue.
<b>EDANIE0095</b>	<b>Failed to retrieve deployed destinations at "{0}" using connection factory "{1}".</b>
<b>Explanation</b>	A connection created with this connection factory could not be initialized.
<b>Action</b>	Check the log file for any preceding error logs that might be related to this issue.
<b>EDANIE0096</b>	<b>The event emitting failed. EventEmitter.emit() was called from the init() or start() method of a custom route bundle loaded by NERV.</b>
<b>Explanation</b>	EventEmitter.emit() was called from the init() or start() method of a custom route bundle loaded by NERV.
<b>Action</b>	If a custom route bundle needs to emit an event from its init() or start() method, it has to do it in a separate thread in order to avoid a deadlock.

**EDANIE0097**      **Failed to propagate NERV properties change to NERV text encryptor because it is not available.**

**Explanation**      Failed to propagate NERV properties change to NERV text encryptor because it is not available.

**Action**            Check the log files for errors during text encryptor initialization.

**EDANIW0000**      **{0} does not denote an existing directory.**

**Explanation**      Specified directory does not exist.

**Action**            Make sure that "com.softwareag.eda.nerv.dead.letter.channel.uri" property denotes a directory.

**EDANIW0001**      **Failed to initialize NERV JMX helper.**

**Explanation**      Failed to initialize NERV JMX helper.

**Action**            Check log file for more details.

**EDANIW0003**      **Failed to configure NERV Default Error Handler "{0}" with the specified configuration properties.**

**Explanation**      Failed to configure NERV Default Error Handler with the specified configuration properties.

**Action**            Check that NERV error handling is properly configured.

**EDANIW0004**      **Failed to add event headers to message body.**

**Explanation**      Failed to add event headers to message body.

**Action**            Check log file for more details.

**EDANIW0007**      **Failed to process NERV Default Component "{0}" change.**

**Explanation**      Failed to process NERV Default Component change.

**Action**            Check log file for more details.

**EDANIW0008**      **Failed to configure NERV Default Component "{0}" with specified configuration properties: {1}**

**Explanation**      Failed to configure NERV Default Component with the specified configuration properties.

**Action**            Check NERV configuration.

---

<b>EDANIW0009</b>	<b>Failed to configure NERV Default Component "{0}" with specified configuration properties: {1}</b>
<b>Explanation</b>	Failed to configure NERV Default Component with the specified configuration properties.
<b>Action</b>	Check NERV configuration.
<b>EDANIW0010</b>	<b>Failed to update NERV Default Component "{0}".</b>
<b>Explanation</b>	Failed to update NERV Default Component.
<b>Action</b>	Check NERV configuration and log file for more details.
<b>EDANIW0012</b>	<b>Failed to register service "{0}" because NERV component "{1}" does not configure a webMethods Broker or Universal Messaging connection.</b>
<b>Explanation</b>	Failed to register Destination Support service because the specified NERV component does not configure a webMethods Broker or Universal Messaging connection.
<b>Action</b>	If you are configuring a Broker or Universal Messaging connection, double check that the configuration is correct. Otherwise ignore this message.
<b>EDANIW0016</b>	<b>Failed to process a bundle lifecycle change because no bundle component updater has been set.</b>
<b>Explanation</b>	NERVService Listener has not been properly initialized. Failed to process a bundle lifecycle change because no bundle component updater has been set.
<b>Action</b>	Restart bundle/OSGi/Product instance.
<b>EDANIW0017</b>	<b>NERV component "{0}" is not properly configured. Shutting down all routes consuming from component "{1}". In order to restart the routes, please provide a valid configuration and restart your consume bundles or restart the whole OSGi instance.</b>
<b>Explanation</b>	NERV component is not properly configured.
<b>Action</b>	Shutting down all routes consuming from specified component. In order to restart the routes, please provide a valid configuration and restart your consume bundles or restart the whole OSGi instance.
<b>EDANIW0020</b>	<b>Failed to load NERV assets from "{0}". Reason: {1}</b>
<b>Explanation</b>	Failed to load NERV assets from NERV asset folder.
<b>Action</b>	Check nervAssetFolder and log file more details.

<b>EDANIW0098</b>	<b>Failed to configure NERV text encryptor "{0}" with the specified configuration properties.</b>
<b>Explanation</b>	Failed to configure NERV text encryptor with the specified configuration properties.
<b>Action</b>	Check that the NERV security file location is properly configured.
<b>EDANRBE0000</b>	<b>The XML generation failed.</b>
<b>Explanation</b>	Failed to write the route bundle to an output stream.
<b>Action</b>	Check the error log for exception details.
<b>EDANRBE0001</b>	<b>The replaceable value could not be encrypted.</b>
<b>Explanation</b>	The replaceable value could not be encrypted.
<b>Action</b>	Check if the NervTextEncryptor instance passed to the NervRouteBundle object has been correctly initialized.
<b>EDANRBE0002</b>	<b>NervTextEncryptor is not set.</b>
<b>Explanation</b>	NervTextEncryptor is not set.
<b>Action</b>	Before writing the bundle, invoke NervRouteBundle.setTextEncryptor() and pass a properly initialized NervTextEncryptor.
<b>EDANRBE0004</b>	<b>Unsupported Event Persistence endpoint type was specified: "{0}".</b>
<b>Explanation</b>	The supported Event Persistence types are hdfs and jdbc.
<b>Action</b>	Please specify either hdfs or jdbc as a type.
<b>EDANRBE0005</b>	<b>The mandatory configuration property "{0}" for Event Persistence endpoint of type "{1}" is not set.</b>
<b>Explanation</b>	A mandatory Event Persistence endpoint configuration property has not been set.
<b>Action</b>	Set all mandatory configuration properties to the Event Persistence endpoint before adding it to a route.
<b>EDANRBE0006</b>	<b>Cannot perform any operations on a route which has not been properly initialized with a from() invocation.</b>
<b>Explanation</b>	The to() or camel() method invocation is not allowed on a route which has not been initialized with from() invocation first.
<b>Action</b>	Prior to calling the to() or camel() methods on a NervRoute, invoke the from() method first.

---

<b>EDANRBE0007</b>	<b>Empty parameter found in user package import entry {0}.</b>
<b>Explanation</b>	The specified user package import entry contains an empty argument or directive - for example: package;;version=["1.0,2.0).
<b>Action</b>	Make sure the user package import entry does not contain any empty arguments or directives before adding it to the bundle manifest.
<b>EDANRBE0008</b>	<b>User package import entry "{0}" does not contain any packages.</b>
<b>Explanation</b>	A user-added package import entry must contain at least one import and can have optional arguments and directives.
<b>Action</b>	Make sure the user import package entry you want to add to the bundle manifest contains one or more semicolon-separated packages.
<b>EDANRBE0009</b>	<b>The NERV route bundle factory could not be created.</b>
<b>Explanation</b>	The NERV route bundle factory could not be created.
<b>Action</b>	Please check the log.
<b>EDANRBE0010</b>	<b>The XML generation failed.</b>
<b>Explanation</b>	Failed to write the route bundle to a directory.
<b>Action</b>	Check the error log for exception details.
<b>EDANRBE0011</b>	<b>The output path is not a directory.</b>
<b>Explanation</b>	The specified path does not denote a directory where the bundle can be persisted.
<b>Action</b>	Please specify a valid directory path.
<b>EDANRBE0012</b>	<b>The contents of the output directory cannot be deleted.</b>
<b>Explanation</b>	Failed to delete the files found in the output directory.
<b>Action</b>	Please make sure that any access permissions for the file systems are properly configured.
<b>EDANRBE0013</b>	<b>The output directory cannot be created.</b>
<b>Explanation</b>	Failed to create a directory in which to persist the route bundle.
<b>Action</b>	Please make sure that access permissions for the file systems are properly configured.

**EDANRBE0014**      **The following directory cannot be created: "{0}".**  
**Explanation**      Failed to create a directory while persisting the route bundle.  
**Action**              Please make sure that access permissions for the file system are properly configured.

# 15

## Event Persistence Messages

---

**EVSECM172E0000 Invalid Event Persistence Elasticsearch URI format: {0}**

**Explanation** The Elasticsearch URI was specified using an invalid or unexpected format.

**EVSECM172E0001 Error creating Elasticsearch transport client for URI: {0}**

**Explanation** There was an error creating the Elasticsearch client and connecting to the cluster using the specified URI.

**EVSECM172E0002 Error creating Elasticsearch transport client for cluster name {0} and host(s) {1}**

**Explanation** There was an error creating the Elasticsearch client and connecting to the cluster using the specified URI.

**EVSECM232E0000 Invalid Event Persistence Elasticsearch URI format: {0}**

**Explanation** The Elasticsearch URI was specified using an invalid or unexpected format.

**EVSECM232E0001 Error creating Elasticsearch transport client for URI: {0}**

**Explanation** There was an error creating the Elasticsearch client and connecting to the cluster using the specified URI.

**EVSECM232E0002 Error creating Elasticsearch transport client for cluster name {0} and host(s) {1}**

**Explanation** There was an error creating the Elasticsearch client and connecting to the cluster using the specified URI.

<b>EVSECME0000</b>	<b>Error creating Elasticsearch transport client for URI: {0}</b>
<b>EVSECME0001</b>	<b>Error creating Elasticsearch transport client for cluster name {0} and host(s) {1}</b>
<b>EVSECME0002</b>	<b>Invalid Event Persistence Elasticsearch URI format: {0}</b>
<b>EVSEDSE0000</b>	<b>Cannot get EDA event type schema parser.</b>
<b>Explanation</b>	Cannot get EDA event type schema parser.
<b>EVSEDSE0001</b>	<b>Cannot get event type store at location: {0}</b>
<b>Explanation</b>	Cannot get event type store at the given location.
<b>Action</b>	Please make sure that the event type store location is valid.
<b>EVSEDSE0002</b>	<b>Non-default ETS locations are not currently supported in OSGi {0}</b>
<b>EVSEDSE0003</b>	<b>Timeout waiting for blueprint injection of EDA interface provider</b>
<b>Explanation</b>	The timeout expired when waiting for EDA ETS/XSD services
<b>EVSEQI172E0000</b>	<b>Unsupported syntax found in aggregate function clause: {0}</b>
<b>Explanation</b>	The syntax of the aggregate expression is incorrect. This error should never occur because the grammar has already been validated. It's included for proper error handling.
<b>EVSEQI172E0001</b>	<b>Unsupported encoding exception encountered when formatting result</b>
<b>Explanation</b>	The default utf-8 encoding was not supported in this environment. The result body could not be added to the result set.
<b>EVSEQI172E0002</b>	<b>An error has occurred because the response reference has not been set in response handler</b>
<b>Explanation</b>	This is a programming class usage issue. This error shouldn't be experienced once the implementation is tested and verified.

---

<b>EVSEQI172E0003</b>	<b>Unexpected statement type found when trying to determine query builder implementation</b>
<b>Explanation</b>	The query builder examines the statement to determine if its an instance or aggregate query. In this case the implementation couldn't identify the statement type.
<b>EVSEQI172E0004</b>	<b>Error executing full text query due to invalid query filter</b>
<b>Explanation</b>	The query filter could not be transformed and used in the Elasticsearch query.
<b>EVSEQI172E0005</b>	<b>An unsupported encoding exception was thrown while generating query hit.</b>
<b>Explanation</b>	The default encoding of utf-8 was not available and the query hit document could not be processed.
<b>EVSEQI172E0006</b>	<b>An unsupported encoding exception was thrown while generating explain message</b>
<b>Explanation</b>	The default encoding of utf-8 was not available to format the explain plan message
<b>EVSEQI172E0007</b>	<b>Error creating full text query for explain plan due to invalid query filter.</b>
<b>Explanation</b>	The explain plan content could not be generated due to a parsing error in the filter syntax
<b>EVSEQI172E0010</b>	<b>Error transforming query to native Elasticsearch request!%n{0}</b>
<b>Explanation</b>	The query as specified in the Common Query Syntax could not be transformed into a native Elasticsearch query.
<b>EVSEQI172E0011</b>	<b>Error executing native Elasticsearch search request!%n{0}</b>
<b>Explanation</b>	An error occurred during execution of the Elastisearch query.
<b>EVSEQI172E0012</b>	<b>Error transforming query to native Elastisearch request for explain plan</b>
<b>Explanation</b>	The query as expressed in the Common Query Syntax could not be transformed into an Elasticsearch request when creating the explain plan.
<b>EVSEQI172E0013</b>	<b>An unsupported encoding exception was thrown while generating explain message</b>
<b>Explanation</b>	The default encoding of utf-8 is not availble and caused an exception when generating the explain plan text.

- EVSEQI172E0014**    **Query session has been created with invalid context for this implementation**  
**Explanation**        The context must include all of the required parameters for this query implementation.
- EVSEQI172E0015**    **Error creating a transport client connection to Elasticsearch cluster**  
**Explanation**        A connection to the Elasticsearch cluster could not be established.
- EVSEQI172E0016**    **Failed to position cursor at next event in the result stream**  
**Explanation**        An exception was thrown when trying to move the cursor to the next position in the result stream.
- EVSEQI172E0017**    **The method {0} is unsupported in this implementation of ResultStream**  
**Explanation**        The ResultStream interface only requires that all implementations provide a next operation.
- EVSEQI172E0018**    **Error getting result at current cursor position from handler**  
**Explanation**        An exception was thrown when attempting to get the event data from the current position in the result stream.
- EVSEQI172I0008**    **Inbound query in common syntax form:**
- EVSEQI172I0009**    **Outbound query in native form:**
- EVSEQI232E0000**    **Unsupported syntax found in aggregate function clause: {0}**  
**Explanation**        The syntax of the aggregate expression is incorrect. This error should never occur because the grammar has already been validated. It's included for proper error handling.
- EVSEQI232E0001**    **Unsupported encoding exception encountered when formatting result**  
**Explanation**        The default utf-8 encoding was not supported in this environment. The result body could not be added to the result set.

---

<b>EVSEQI232E0002</b>	<b>An error has occurred because the response reference has not been set in response handler</b>
<b>Explanation</b>	This is a programming class usage issue. This error shouldn't be experienced once the implementation is tested and verified.
<b>EVSEQI232E0003</b>	<b>Unexpected statement type found when trying to determine query builder implementation</b>
<b>Explanation</b>	The query builder examines the statement to determine if its an instance or aggregate query. In this case the implementation couldn't identify the statement type.
<b>EVSEQI232E0004</b>	<b>Error executing full text query due to invalid query filter</b>
<b>Explanation</b>	The query filter could not be transformed and used in the Elasticsearch query.
<b>EVSEQI232E0005</b>	<b>An unsupported encoding exception was thrown while generating query hit.</b>
<b>Explanation</b>	The default encoding of utf-8 was not available and the query hit document could not be processed.
<b>EVSEQI232E0006</b>	<b>An unsupported encoding exception was thrown while generating explain message</b>
<b>Explanation</b>	The default encoding of utf-8 was not available to format the explain plan message
<b>EVSEQI232E0007</b>	<b>Error creating full text query for explain plan due to invalid query filter.</b>
<b>Explanation</b>	The explain plan content could not be generated due to a parsing error in the filter syntax
<b>EVSEQI232E0010</b>	<b>Error transforming query to native Elasticsearch request:%n{0}</b>
<b>Explanation</b>	The query as specified in the Common Query Syntax could not be transformed into a native Elasticsearch query.
<b>EVSEQI232E0011</b>	<b>Error executing native Elasticsearch search request:%n{0}</b>
<b>Explanation</b>	An error occurred during execution of the Elastisearch query.
<b>EVSEQI232E0012</b>	<b>Error transforming query to native Elastisearch request for explain plan</b>
<b>Explanation</b>	The query as expressed in the Common Query Syntax could not be transformed into an Elasticsearch request when creating the explain plan.

- EVSEQI232E0013**    **An unsupported encoding exception was thrown while generating explain message**  
**Explanation**    The default encoding of utf-8 is not available and caused an exception when generating the explain plan text.
- EVSEQI232E0014**    **Query session has been created with invalid context for this implementation**  
**Explanation**    The context must include all of the required parameters for this query implementation.
- EVSEQI232E0015**    **Error creating a transport client connection to Elasticsearch cluster**  
**Explanation**    A connection to the Elasticsearch cluster could not be established.
- EVSEQI232E0016**    **Failed to position cursor at next event in the result stream**  
**Explanation**    An exception was thrown when trying to move the cursor to the next position in the result stream.
- EVSEQI232E0017**    **The method {0} is unsupported in this implementation of ResultStream**  
**Explanation**    The ResultStream interface only requires that all implementations provide a next operation.
- EVSEQI232E0018**    **Error getting result at current cursor position from handler**  
**Explanation**    An exception was thrown when attempting to get the event data from the current position in the result stream.
- EVSEQI232I0008**    **Inbound query in common syntax form:**
- EVSEQI232I0009**    **Outbound query in native form:**
- EVSEQIE0000**        **Query session has been created with invalid context for this implementation**
- EVSEQIE0001**        **Error creating a transport client connection to Elasticsearch cluster**

---

<b>EVSEQIE0002</b>	<b>Error transforming query into native Elasticsearch request!%c{0}</b>
<b>EVSEQIE0003</b>	<b>Error executing native Elasticsearch search request!%c{0}</b>
<b>EVSEQIE0004</b>	<b>Failed to position cursor at next event in the result stream</b>
<b>Explanation</b>	There was an error when moving the cursor position forward in the stream
<b>EVSEQIE0005</b>	<b>The method {0} is unsupported in this implementation of ResultStream</b>
<b>Explanation</b>	The only requirement on a ResultStream implementation is that they provide a forward cursor via the next method
<b>EVSEQIE0006</b>	<b>Error getting result at current cursor position from handler</b>
<b>Explanation</b>	There was an error retrieving or formatting the result at the cursor position
<b>EVSEQIE0007</b>	<b>Unexpected statement type found when trying to determine query builder implementation</b>
<b>Explanation</b>	The query transformation found an expression other than an instance, property list or aggregate query.
<b>EVSEQIE0008</b>	<b>Unsupported syntax found in aggregate function clause: {0}</b>
<b>Explanation</b>	When processing an aggregation other than count, sum, avg, min or max was found.
<b>EVSEQIE0009</b>	<b>Unsupported encoding exception encountered when formatting result</b>
<b>EVSEQIE0010</b>	<b>An error has occurred because the response reference has not been set in response handler</b>
<b>Explanation</b>	This is a fatal programming error; the Elasticsearch response reference was not set before invoking the handler methods.
<b>EVSEQIE0011</b>	<b>Cursor positioning error; No pending results on result stack</b>
<b>Explanation</b>	The getResult method was invoked but there is no pending result item on the cursor stack.

<b>EVSEQIE0013</b> <b>Explanation</b>	<b>An unsupported encoding exception was thrown while generating explain message</b> An error was encountered when creating a byte array with utf8 encoding
<b>EVSEQIE0016</b>	<b>Error executing full text query due to invalid query filter.</b>
<b>EVSEQIE0017</b>	<b>An unsupported encoding exception was thrown while generateing query hit.</b>
<b>EVSEQII0014</b>	<b>Inbound query in common syntax form:</b>
<b>EVSEQII0015</b>	<b>Outbound query in native form:</b>
<b>EVSEQIW0012</b> <b>Explanation</b>	<b>Error transforming query for explain plan</b> The query transformation failed during processing of the explain plan call.
<b>EVSEREE0001</b> <b>Explanation</b>	<b>Event Routing Consumers are not supported by this Endpoint implementation</b> Event Persistence components only support producers
<b>EVSEREE0002</b> <b>Explanation</b>	<b>Synchronous Event processing is not supported by this component.</b> This component only supports asynchronous processing.
<b>EVSEREE0003</b> <b>Explanation</b>	<b>Error initializing required internal resources</b> Internal resources such as the transformer or storage provider could not be initialized.
<b>EVSEREE0004</b> <b>Explanation</b>	<b>Error transforming event instance from native format to JSON format</b> An error occurred during transformation from XML to JSON
<b>EVSEREE0005</b> <b>Explanation</b>	<b>Fatal exception thrown from storage provider during event processing</b> An error occurred when trying to persist the current event

---

<b>EVSEREE0006</b>	<b>Error creating storage type definition for event type: {0}</b>
<b>Explanation</b>	The event type schema could not be transformed to the storage type definition required by the storage providers.
<b>EVSEREE0007</b>	<b>Error parsing event schema with namespace {0} and event type {1}</b>
<b>Explanation</b>	The EDA event type schema for the specified type could not be parsed.
<b>EVSEREE0008</b>	<b>Error creating schema parser with Event Type Store location: {0}</b>
<b>Explanation</b>	A reference to the EDA schema parser class or service could not be obtained.
<b>EVSERSE0000</b>	<b>Port {0} should be a non-negative and non-zero integer value.</b>
<b>Explanation</b>	Port should be a non-negative integer value.
<b>EVSERSE0001</b>	<b>Index Name {0} has to be all lower case.</b>
<b>Explanation</b>	Index Name has to be all lower case..
<b>EVSERSE0003</b>	<b>Thread Pool Keep Alive Time has to be a non-negative non-zero integer.</b>
<b>Explanation</b>	Thread Pool Keep Alive Time has to be a non-negative and non-zero integer.
<b>EVSERSE0006</b>	<b>Thread Pool Queue size has to be a non-negative integer.</b>
<b>Explanation</b>	Thread Pool Queue size has to be a non-negative integer.
<b>EVSERSE0009</b>	<b>Batch size has to be a non-negative and non-zero integer.</b>
<b>Explanation</b>	Batch size has to be a non-negative and non-zero integer.
<b>EVSERSE0010</b>	<b>Batch write time has to be a non-negative and non-zero integer.</b>
<b>Explanation</b>	Batch write time has to be a non-negative and non-zero integer.
<b>EVSERSE0011</b>	<b>Event Persistence does not support storage type: {0}.</b>
<b>Explanation</b>	This is not supported store type for event persistence.

<b>EVSERSE0012</b>	<b>Can't create service bundle for storage type: {0}.</b>
<b>Explanation</b>	The service bundle could not be created!
<b>EVSERSE0013</b>	<b>Core Thread Pool size has to be a non-negative integer.</b>
<b>Explanation</b>	Core Thread Pool size has to be a non-negative integer.
<b>EVSERSE0014</b>	<b>Not supported storage type {0}.</b>
<b>EVSERSE0015</b>	<b>Hdfs maximum file size has to be a non-negative and non-zero integer.</b>
<b>Explanation</b>	Hdfs maximum file size has to be a non-negative and non-zero integer.
<b>EVSERSE0016</b>	<b>Maximum Thread Pool Size has to be a non-negative and non-zero integer.</b>
<b>Explanation</b>	Maximum Thread Pool Size has to be a non-negative and non-zero integer.
<b>EVSERSE0017</b>	<b>Elasticsearch keystore filepath is not valid.</b>
<b>Explanation</b>	Elasticsearch keystore filepath is not valid.
<b>EVSERSE0018</b>	<b>Elasticsearch truststore filepath is not valid.</b>
<b>Explanation</b>	Elasticsearch truststore filepath is not valid.
<b>EVSERSE0019</b>	<b>Key store should not be blank</b>
<b>Explanation</b>	Key store should not be blank
<b>EVSERSE0020</b>	<b>Trust store should not be blank</b>
<b>Explanation</b>	Trust store should not be blank
<b>EVSERSE0025</b>	<b>{0} must be specified using the following format {1}.</b>
<b>Explanation</b>	URI must be specified using the given format.

<b>EVSESEFI0009</b>	<b>Connection to HDFS succeeded.</b>
<b>Explanation</b>	Connection to HDFS succeeded.
<b>EVSESEFI0017</b>	<b>Connection to Hive server succeeded.</b>
<b>Explanation</b>	Connection to Hive server succeeded.
<b>EVSESEFI0022</b>	<b>Connection to Elasticsearch node succeeded:</b>
<b>Explanation</b>	Connection to specific Elasticsearch succeeded.
<b>EVSESEFW0010</b>	<b>Could not connect to Elasticsearch node:</b>
<b>Explanation</b>	Could not connect to the specified elasticsearch cluster node, index, host and port.
<b>EVSESEFW0011</b>	<b>Could not connect to Hive server:</b>
<b>Explanation</b>	Could not connect to the specified Hive server.
<b>EVSESEFW0012</b>	<b>Could not connect to HDFS:</b>
<b>Explanation</b>	Could not connect to the specified HDFS database, hive warehouse location.
<b>EVSESEFW0013</b>	<b>Cannot get JMX MBeanServer Connector for Runtime Component {0}.</b>
<b>Explanation</b>	Cannot get JMX MBeanServer Connector to the runtime component.
<b>EVSESEFW0014</b>	<b>JMX MBeanServer invocation exception to remote runtime component {0}.</b>
<b>Explanation</b>	JMX MBeanServer invocation exception to remote runtime component.
<b>EVSESEFW0015</b>	<b>Cannot get JMX Connector for remote runtime component</b>
<b>Explanation</b>	Cannot get JMX Connector for remote runtime component.
<b>EVSESEFW0023</b>	<b>Unable to validate the parameter due to the occurrence of one or more dynamic service configuration variables.</b>
<b>Explanation</b>	Parameters that contain dynamic service configuration variables can't be validated because the value of the parameter is unknown at the time of configuration.
<b>Action</b>	This is simply a warning.

<b>EVSESI172E0000</b>	<b>Process method called before provider has been started</b>
<b>Explanation</b>	This is a programatic initialization error. The storage providers start method was not called during initialization.
<b>EVSESI172E0001</b>	<b>Error initializing required internal resources</b>
<b>Explanation</b>	An error occurred during initialization of the various implementation classes for this storage provider.
<b>EVSESI172E0002</b>	<b>Error creating or accessing bulk indexer for event type: {0}</b>
<b>Explanation</b>	A bulk indexer instance could not be accessed or created for the specified event type.
<b>EVSESI172E0003</b>	<b>Error stopping resource {0} on provider shutdown</b>
<b>Explanation</b>	An internal resource threw an exception while stopping the storage provider.
<b>EVSESI172E0005</b>	<b>Failed to create Elasticsearch transport client connection to cluster {0}, index {1} on server {2} with user {3}.</b>
<b>Explanation</b>	The client could not establish a connection to the Elasticsearch cluster.
<b>EVSESI172E0006</b>	<b>Elasticsearch client manager not started for cluster {0}, index {1} on server {2} with user {3}</b>
<b>Explanation</b>	An attempt to get a connection was made before the client manager was started.
<b>EVSESI172E0007</b>	<b>Error stopping bulk indexer for type: {0}</b>
<b>Explanation</b>	The bulk indexer instance for the specified type threw an exception on shutdown.
<b>EVSESI172E0008</b>	<b>Error creating Elasticsearch bulk indexing request</b>
<b>Explanation</b>	An error occurred while formatting an Elasticsearch bulk indexing request for the current event batch
<b>EVSESI172E0009</b>	<b>Error executing Elasticsearch bulk indexing request</b>
<b>Explanation</b>	The Elasticsearch bulk indexing request for the specified event batch could not be executed.

---

<b>EVSESI172E0010</b>	<b>Error loading metadata for persistence error type; logging to local file</b>
<b>Explanation</b>	Metadata for the persistence error type couldn't be found or created. All messages will be logged to the local log file.
<b>EVSESI172E0011</b>	<b>Unable to write internal persistence error event; defaulting to log file:%n {0}</b>
<b>Explanation</b>	The logger could not persist the error event data to the data store. The error will be written to the default log file.
<b>EVSESI172E0012</b>	<b>Error storing internal persistence error event to Elasticsearch index.</b>
<b>Explanation</b>	The persistence error event could not be stored in elasticsearch due to an exception.
<b>EVSESI172E0013</b>	<b>Exception encountered during auto registration of event type: {0}</b>
<b>Explanation</b>	Storage could not be allocated for the specified event type due to an Elasticsearch error.
<b>EVSESI172E0014</b>	<b>Error getting Elasticsearch client for auto registration</b>
<b>Explanation</b>	An exception occurred when trying to access the Elasticsearch transport client
<b>EVSESI172E0015</b>	<b>An event type mapping already exists for the event type: {0}</b>
<b>Explanation</b>	Storage for the specified event type has already been allocated.
<b>EVSESI172E0016</b>	<b>Error checking for existing type in Elasticsearch index</b>
<b>Explanation</b>	An exception was thrown while checking Elasticsearch for a registered event type
<b>EVSESI172E0017</b>	<b>No acknowledgment received from Elasticsearch cluster after create index operation</b>
<b>Explanation</b>	The Elasticsearch node failed to acknowledge the status of the create index request.
<b>EVSESI172E0018</b>	<b>No acknowledgment received from Elasticsearch cluster after type mapping operation</b>
<b>Explanation</b>	The Elasticsearch node failed to acknowledge the status of the put type mapping request.

<b>EVSESI172E0019</b>	<b>An Elasticsearch exception occurred while creating the type mapping</b>
<b>Explanation</b>	The type mapping could not be added due to an exception thrown by the Elasticsearch client-server.
<b>EVSESI172E0020</b>	<b>Failed to initialize Elasticsearch schema parser implementation</b>
<b>Explanation</b>	The event type schema parser couldn't be initialized; no event type parsing is possible.
<b>EVSESI172E0021</b>	<b>Error creating schema parser with Event Type Store location: {0}</b>
<b>Explanation</b>	The EDA event type schema parser could not be initialized.
<b>EVSESI172E0022</b>	<b>Error parsing event schema with namespace {0} and event type {1}</b>
<b>Explanation</b>	The event type definition for the given namespace and event type could not be parsed.
<b>EVSESI172E0023</b>	<b>A valid namespace and event type are required to produce an Elasticsearch type mapping.</b>
<b>Explanation</b>	Event type information could not be found for the specified namespace and event type.
<b>EVSESI172E0024</b>	<b>The event persistence annotation is not recognized: {0}</b>
<b>Explanation</b>	An annotation specified in the event type definition is not known or supported.
<b>EVSESI172E0027</b>	<b>Error retrieving Elasticsearch client for metadata verification</b>
<b>Explanation</b>	A connection couldn't be established while trying to load metadata from index
<b>EVSESI172E0029</b>	<b>Error closing transport client connection to cluster {0}, index {1} on server {2} with user {3}</b>
<b>Explanation</b>	An error occurred disconnecting from the Elasticsearch cluster
<b>EVSESI172E0030</b>	<b>The event persistence annotation is not recognized: {0}</b>
<b>Explanation</b>	An annotation value was specified that is not supported by event persistence

---

<b>EVSESI172E0031</b>	<b>Error retrieving normalized type from component for event type: {0}</b>
<b>Explanation</b>	An exception was thrown by the component when generating the normalized type for the event type
<b>EVSESI172I0004</b>	<b>Elasticsearch transport client successfully connected to cluster {0}, index {1} on server {2} with user {3}</b>
<b>Explanation</b>	The connection to the Elasticsearch cluster was successful.
<b>EVSESI172I0028</b>	<b>Elasticsearch transport client successfully disconnected from cluster {0}, index {1} on server {2} with user {3}</b>
<b>Explanation</b>	The component has disconnected from the Elasticsearch cluster
<b>EVSESI172W0025</b>	<b>Task manager queue is full; The operation will be re-tried</b>
<b>Explanation</b>	The task queue is at it's maximum size. The operation is re-tried after a slight delay.
<b>EVSESI172W0026</b>	<b>Thread interrupted while waiting for task re-submission</b>
<b>Explanation</b>	The task manager thread was interrupted during re-submission delay. The operation will be re-tried immediately.
<b>EVSESI232E0000</b>	<b>Process method called before provider has been started</b>
<b>Explanation</b>	This is a programatic initialization error. The storage providers start method was not called during initialization.
<b>EVSESI232E0001</b>	<b>Error initializing required internal resources</b>
<b>Explanation</b>	An error occurred during initialization of the various implementation classes for this storage provider.
<b>EVSESI232E0002</b>	<b>Error creating or accessing bulk indexer for event type: {0}</b>
<b>Explanation</b>	A bulk indexer instance could not be accessed or created for the specified event type.
<b>EVSESI232E0003</b>	<b>Error stopping resource {0} on provider shutdown</b>
<b>Explanation</b>	An internal resource threw an exception while stopping the storage provider.

**EVSESI232E0005**    **Failed to create Elasticsearch transport client connection to cluster {0}, index {1} on server {2} with user {3}.**

**Explanation**        The client could not establish a connection to the Elasticsearch cluster.

**EVSESI232E0006**    **Elasticsearch client manager not started for cluster {0}, index {1} on server {2} with user {3}**

**Explanation**        An attempt to get a connection was made before the client manager was started.

**EVSESI232E0007**    **Error stopping bulk indexer for type: {0}**

**Explanation**        The bulk indexer instance for the specified type threw an exception on shutdown.

**EVSESI232E0008**    **Error creating Elasticsearch bulk indexing request**

**Explanation**        An error occurred while formatting an Elasticsearch bulk indexing request for the current event batch

**EVSESI232E0009**    **Error executing Elasticsearch bulk indexing request**

**Explanation**        The Elasticsearch bulk indexing request for the specified event batch could not be executed.

**EVSESI232E0010**    **Error loading metadata for persistence error type; logging to local file**

**Explanation**        Metadata for the persistence error type couldn't be found or created. All messages will be logged to the local log file.

**EVSESI232E0011**    **Unable to write internal persistence error event; defaulting to log file:%n {0}**

**Explanation**        The logger could not persist the error event data to the data store. The error will be written to the default log file.

**EVSESI232E0012**    **Error storing internal persistence error event to Elasticsearch index.**

**Explanation**        The persistence error event could not be stored in elasticsearch due to an exception.

**EVSESI232E0013**    **Exception encountered during auto registration of event type: {0}**

**Explanation**        Storage could not be allocated for the specified event type due to an Elasticsearch error.

---

<b>EVSESI232E0014</b>	<b>Error getting Elasticsearch client for auto registration</b>
<b>Explanation</b>	An exception occurred when trying to access the Elasticsearch transport client
<b>EVSESI232E0015</b>	<b>An event type mapping already exists for the event type: {0}</b>
<b>Explanation</b>	Storage for the specified event type has already been allocated.
<b>EVSESI232E0016</b>	<b>Error checking for existing type in Elasticsearch index</b>
<b>Explanation</b>	An exception was thrown while checking Elasticsearch for a registered event type
<b>EVSESI232E0017</b>	<b>No acknowledgment received from Elasticsearch cluster after create index operation</b>
<b>Explanation</b>	The Elasticsearch node failed to acknowledge the status of the create index request.
<b>EVSESI232E0018</b>	<b>No acknowledgment received from Elasticsearch cluster after type mapping operation</b>
<b>Explanation</b>	The Elasticsearch node failed to acknowledge the status of the put type mapping request.
<b>EVSESI232E0019</b>	<b>An Elasticsearch exception occurred while creating the type mapping</b>
<b>Explanation</b>	The type mapping could not be added due to an exception thrown by the Elasticsearch client-server.
<b>EVSESI232E0020</b>	<b>Failed to initialize Elasticsearch schema parser implementation</b>
<b>Explanation</b>	The event type definition for the given namespace and event type could not be parsed.
<b>EVSESI232E0021</b>	<b>Error creating schema parser with Event Type Store location: {0}</b>
<b>Explanation</b>	The EDA event type schema parser could not be initialized.
<b>EVSESI232E0022</b>	<b>Error parsing event schema with namespace {0} and event type {1}</b>
<b>Explanation</b>	Event type information could not be found for the specified namespace and event type.

**EVSESI232E0023**    **A valid namespace and event type are required to produce an Elasticsearch type mapping.**

**Explanation**    Event type information could not be found for the specified namespace and event type.

**EVSESI232E0024**    **The event persistence annotation is not recognized: {0}**

**Explanation**    An annotation specified in the event type definition is not known or supported.

**EVSESI232E0027**    **Error retrieving Elasticsearch client for metadata verification**

**Explanation**    A connection couldn't be established while trying to load metadata from index

**EVSESI232E0029**    **Error closing transport client connection to cluster {0}, index {1} on server {2} with user {3}**

**Explanation**    An error occurred when diconnecting from the Elasticsearch cluster

**EVSESI232E0030**    **The event persistence annotation is not recognized: {0}**

**Explanation**    An annotation value was specified that is not supported by event persistence

**EVSESI232E0031**    **Error retrieving normalized type from component for event type: {0}**

**Explanation**    An exception was thrown by the component when generating the normalized type for the event type

**EVSESI232E0032**    **Error generating cache key for resource**

**Explanation**    There was an error generating the cache key for the specified elasticsearch resource; verify variable values.

**EVSESI232E0033**    **Error creating and starting bulk indexer for event type: {0}**

**Explanation**    The bulk indexer for the stated type could not be created or started

**EVSESI232E0034**    **Validation of dynamic service configuration against provided values failed**

**Explanation**    A dynamic service configuration was provided but the variables are not present in the event.

---

<b>EVSESI232E0035</b>	<b>Validation of dynamic service configuration failed. Event can not be persisted: Header: {0} Body: {1}</b>
<b>Explanation</b>	The values required for using a dynamic configuration were not supplied in the event being processed.
<b>EVSESI232E0036</b>	<b>Error initialising internal resources for provider; operation will be re-tried. Exception repeated {0} times</b>
<b>Explanation</b>	Internal initialisation failed. The operation will be retried until successful or the component is restarted.
<b>EVSESI232E0037</b>	<b>Error creating bulk indexer for event type {0}; operation will be re-tried; Exception repeated {1} times</b>
<b>Explanation</b>	An indexer could not be created to process the specified event type. This could be due to a failure to connect to the cluster for the required metadata.
<b>EVSESI232E0038</b>	<b>Error creating Elasticsearch bulk indexing request; operation will be re-tried; Exception repeated {0} times</b>
<b>Explanation</b>	There was an error while creating the indexing request most likely due to a connectivity issue between the client and server
<b>EVSESI232E0039</b>	<b>Error executing Elasticsearch bulk indexing request; operation will be re-tried; Exception repeated {0} times</b>
<b>Explanation</b>	There was an error while creating the indexing request most likely due to a connectivity issue between the client and server
<b>EVSESI232E0040</b>	<b>An exception occurred while checking the cluster for the specified destination index: {0}</b>
<b>Explanation</b>	When the provider invoked the index exists call to Elasticsearch, the API threw an exception.
<b>Action</b>	Check the status of the Elasticsearch cluster.
<b>EVSESI232E0041</b>	<b>An Elasticsearch exception occurred while creating the specified destination index: {0}</b>
<b>Explanation</b>	When the provider invoked the create index call to Elasticsearch, the API threw an exception.
<b>Action</b>	Check the status of the Elasticsearch cluster

<b>EVSESI232E0042</b>	<b>An error occurred while attempting to determine if auto-registration is required for type: {0} in index: {1}</b>
<b>Explanation</b>	The service could not access or process the Elasticsearch type mapping in the given index.
<b>Action</b>	Check the health of the Elasticsearch cluster.
<b>EVSESI232I0004</b>	<b>Elasticsearch transport client successfully connected to cluster {0}, index {1} on server {2} with user {3}</b>
<b>Explanation</b>	The connection to the Elasticsearch cluster was successful.

EVSEVEE0019	<b>Elasticsearch transport client successfully connected to cluster {0}, index {1} on server {2} with user {3}</b>
EVSEVEE0020	<b>Failed to create Elasticsearch transport client connection to cluster {0}, index {1} on server {2} with user {3}</b>
EVSEVEE0021	<b>Not Compliant JMX MBean, cannot create MBean {0}.</b>
<b>Explanation</b>	Failed to create Elasticsearch JMX MBean
EVSEVEE0023	<b>An internal error occurred during schema processing operations</b>
<b>Explanation</b>	This error is most likely due to incorrect wiring of the ETS/XSD services
EVSEVEI0022	
EVSEVEW0016	<b>Task manager queue is full; The operation will be re-tried</b>
<b>Explanation</b>	The work queue has reached its maximum size.
EVSEVEW0018	<b>Thread interrupted while waiting for task re-submission</b>
EVSEVHE0000	<b>Hive table could not be found or created for Event Type {0}</b>
<b>Explanation</b>	Hive table could not be found or created in event store instance
EVSEVHE0001	<b>Error loading Hive table from event store instance</b>
<b>Explanation</b>	Error loading Hive table from event store instance
EVSEVHE0002	<b>Failed to generate HDFS URI ({0})</b>
<b>Explanation</b>	Failed to generate HDFS URI based on the configuration parameters.
<b>Action</b>	Inspect configuration parameters defined in Command Central's UI.
EVSEVHE0003	<b>Failed to generate Hive URI ({0})</b>
<b>Explanation</b>	Failed to generate Hive URI based on the configuration parameters set.
<b>Action</b>	Inspect the configuration parameters defined in Command Central's UI.

---

<b>EVSEVHE0004</b>	<b>Error creating HDFS Producer for Event Type: {0}</b>
<b>Explanation</b>	Error creating HDFS Producer
<b>EVSEVHE0005</b>	<b>Event could not be processed by HDFS producer</b>
<b>Explanation</b>	Event could not be processed by HDFS producer
<b>EVSEVHE0006</b>	<b>Unable to create or locate Hive persistence errors table; defaulting to log file</b>
<b>Explanation</b>	Unable to create or locate Hive persistence errors table
<b>EVSEVHE0007</b>	<b>Unable to write internal persistence error event; defaulting to log file</b>
<b>Explanation</b>	Unable to write internal persistence error event
<b>EVSEVHE0008</b>	<b>Synchronous Event processing is not supported by this component.</b>
<b>Explanation</b>	Event Persistence components only support asynchronous event processing.
<b>EVSEVHE0009</b>	<b>Consumers are not supported by the HDFS Endpoint</b>
<b>Explanation</b>	The EVP HDFS Component only supports producers for event persistence
<b>EVSEVHE0010</b>	<b>Error encountered during batch processing.</b>
<b>Explanation</b>	An error occurred during batch processing. Possible network connection failure.
<b>Action</b>	Check your network connection.
<b>EVSEVHE0011</b>	<b>Ping Hive Server {0} failed.</b>
<b>Explanation</b>	Hive Server is not available.
<b>EVSEVHE0012</b>	<b>Ping NameNode {0} failed.</b>
<b>Explanation</b>	Cannot access the NameNode.
<b>EVSEVHE0013</b>	<b>Not Compliant JMX MBean, cannot create MBean {0}.</b>
<b>Explanation</b>	Not Compliant JMX MBean.

<b>EVSEVHE0015</b>	<b>An internal error occurred during schema processing operations</b>
<b>Explanation</b>	This error is most likely due to incorrect wiring of the ETS/XSD services
<b>EVSEVHE0016</b>	<b>Error transforming event instance from native format to JSON format</b>
<b>Explanation</b>	The XML event could not be transformed to JSON possibly due to invalid content
<b>EVSEVHI0014</b>	<b>Successfully created Hadoop Connectivity JMX MBean {0}.</b>
<b>Explanation</b>	Hadoop Connectivity JMX MBean created.
<b>EVSEVJE0002</b>	<b>JDBC Database Type not supported: {0}</b>
<b>EVSEVJE0003</b>	<b>Error Starting JDBC Component ({0})</b>
<b>Explanation</b>	The EVP JDBC Component could not be started
<b>EVSEVJE0004</b>	<b>Error Stopping JDBC Component ({0})</b>
<b>Explanation</b>	An internal error occurred when stopping the JDBC Component
<b>EVSEVJE0005</b>	<b>Error creating JDBC Producer for event type: {0}</b>
<b>Explanation</b>	The EVP JDBC Endpoint could not create a Producer for the given event type.
<b>EVSEVJE0006</b>	<b>Consumers are not supported by the JDBC Endpoint</b>
<b>Explanation</b>	The EVP JDBC Component only supports producers for event persistence
<b>EVSEVJE0007</b>	<b>No metadata found for event type: {0}</b>
<b>Explanation</b>	No JDBC metadata was found for the given event type.
<b>EVSEVJE0008</b>	<b>Database exception while searching for event metadata!</b>
<b>Explanation</b>	The metadata lookup failed with a database exception.

<b>EVSEVJE0009</b>	<b>Unable to write internal persistence error event defaulting to log file %n%n{0}</b>
<b>Explanation</b>	The PersistenceError event could not be written to the store.
<b>EVSEVJE0011</b>	<b>Unexpected error during database rollback operation</b>
<b>Explanation</b>	The database system reported an exception while performing the rollback
<b>EVSEVJE0012</b>	<b>Error encountered during batch processing! Number of batched events: {0}</b>
<b>Explanation</b>	An error was reported while writing the events to the persistence store.
<b>EVSEVJE0013</b>	<b>Event could not be processed by producer</b>
<b>Explanation</b>	An error occurred during event processing by this producer.
<b>EVSEVJE0014</b>	<b>Synchronous Event processing is not supported by this component.</b>
<b>Explanation</b>	Event Persistence components only support asynchronous event processing.
<b>EVSEVJI0000</b>	<b>JDBC Connection Pool {0}{1} started with initial size of {2} and max size of {3}</b>
<b>EVSEVJI0001</b>	<b>JDBC Connection Pool closed</b>
<b>EVSEVJW0010</b>	<b>No metadata found for persistence error logger; defaulting to local log files!</b>
<b>Explanation</b>	The metadata for the internal persistence error event type was not found in the store.
<b>EVSEVPE0000</b>	<b>Error Connecting ParStream Server for host: {0}, port: {1} and user: {2}.</b>
<b>Explanation</b>	Error Connecting to ParStream Streaming Server.
<b>Action</b>	Please make sure that the database server is up and running.
<b>EVSEVPE0001</b>	<b>No metadata found for event type: {0}</b>
<b>EVSEVPE0002</b>	<b>AutoRegistration failed for Event Type with NameSpace {0} : EventType {1}</b>
<b>Explanation</b>	Check Database status and connection

<b>EVSEVPE0003</b>	<b>Database exception while searching for event metadata!</b>
<b>Explanation</b>	Database exception while searching for event metadata!
<b>EVSEVPE0004</b>	<b>Synchronous Event processing is not supported by this component.</b>
<b>Explanation</b>	Synchronous Event processing is not supported by this component.
<b>EVSEVPE0005</b>	<b>Error Starting ParStream Streaming Component for host: {0} and port: {1}</b>
<b>Explanation</b>	Error Starting ParStream Streaming Component for host: {0} and port: {1}
<b>EVSEVPE0006</b>	<b>Error Stopping ParStream Component for host: {0} and port: {1}</b>
<b>Explanation</b>	Error Stopping ParStream Component
<b>EVSEVPE0007</b>	<b>Unexpected error during database rollback operation</b>
<b>Explanation</b>	Unexpected error during database rollback operation
<b>EVSEVPE0008</b>	<b>Error encountered during batch processing! Number of batched events: {0}</b>
<b>Explanation</b>	Error encountered during batch processing!
<b>EVSEVPE0009</b>	<b>Unable to write internal persistence error event, defaulting to log file %n%n{0}</b>
<b>Explanation</b>	Unable to write internal persistence error event defaulting to log file.
<b>EVSEVPE0010</b>	<b>Cannot get metadata information for event namespace {0} and type {1}.</b>
<b>Explanation</b>	Cannot get metadata information for the event type.
<b>EVSEVPE0011</b>	<b>Error creating ParStream Producer for event type: {0}</b>
<b>Explanation</b>	Error creating ParStream Producer for event type.
<b>EVSEVPW0000</b>	<b>No metadata found for persistence error logger; defaulting to local log files!</b>
<b>Explanation</b>	No metadata found for persistence error logger; defaulting to local log files!

---

<b>EVSHQI530E0000</b>	<b>Hive query execution failed with unexpected exception</b>
<b>Explanation</b>	An unexpected exception occurred during the execution of the Hive query
<b>EVSHQI530E0001</b>	<b>Error transforming common query for explain plan</b>
<b>Explanation</b>	An error occurred when transforming the common query to native format for the explain plan
<b>EVSHQI530E0002</b>	<b>An unsupported encoding exception was thrown while generating explain message</b>
<b>Explanation</b>	The default encoding of utf-8 is required when creating the explain plan
<b>EVSHQI530E0003</b>	<b>Failed to close hive JDBC result set</b>
<b>Explanation</b>	An exception was thrown during the close method on the JDBC result set
<b>EVSHQI530E0004</b>	<b>Failed to close hive JDBC statement</b>
<b>Explanation</b>	An exception was thrown when closing the JDBC statement
<b>EVSHQI530E0007</b>	<b>The context did not contain the required parameters</b>
<b>Explanation</b>	The context parameters for the specified session were invalid.
<b>EVSHQI530E0008</b>	<b>Error creating Hive SQL query in the current session.</b>
<b>Explanation</b>	Could not create a JDBC connection and or Hive Query using the current session.
<b>EVSHQI530E0009</b>	<b>Full text query not supported by this implementation.</b>
<b>Explanation</b>	This query implementation does not support full text queries.
<b>EVSHQI530E0010</b>	<b>Error closing current Hive JDBC connection.</b>
<b>Explanation</b>	An exception was thrown when the close method of the connection was invoked.
<b>EVSHQI530E0011</b>	<b>Error initializing Hive JDBC connection.</b>
<b>Explanation</b>	An error occurred when creating the Hive JDBC connection

- EVSHQI530E0012 Error setting default database in Hive JDBC connection.**  
**Explanation** An exception was thrown when issuing the use database statement
- EVSHQI530E0013 Error closing active Hive JDBC statement.**  
**Explanation** An exception was thrown during the close invocation on the current JDBC statement.
- EVSHQI530E0014 Failed to position cursor at next event in the result stream**  
**Explanation** An error occurred when advancing the cursor in the result set.
- EVSHQI530E0015 The method {0} is unsupported in this implementation of ResultStream**  
**Explanation** Implementors of the result stream must implement the next method; the other positional methods are optional.
- EVSHQI530E0016 Error getting result at current cursor position from handler**  
**Explanation** An error occurred when retrieving the event data from the current cursor position.
- EVSHQI530E0017 Error closing Hive JDBC result set on close of result stream.**  
**Explanation** The JDBC result set could not be closed when closing the result stream.
- EVSHQI530E0018 Property '{0}' in group by expression must appear in select expression**  
**Explanation** A property specified in the group by clause is not present in the select list
- EVSHQI530E0019 Property '{0}' in select expression must appear in group by expression**  
**Explanation** A property in the select expression is not present in the group by clause
- EVSHQI530E0020 Property '{0}' in order by expression must appear in select and group by expression**  
**Explanation** A property specified in the order by expression is not present in the select expression
- EVSHQI530I0005 Inbound query in common syntax form:**  
**Explanation** Label for the explain plain

---

<b>EVSHQI530I0006</b>	<b>Outbound query in native form:</b>
<b>Explanation</b>	Explain plan label
<b>EVSHQIE0000</b>	<b>Unsupported date time format in string literal: {0}.</b>
<b>Explanation</b>	Unsupported date time format in string literal
<b>EVSHQIE0001</b>	<b>Hive query execution failed.</b>
<b>Explanation</b>	Hive query execution failed.
<b>EVSHQIE0002</b>	<b>Failed to close result set.</b>
<b>Explanation</b>	Failed to close result set.
<b>EVSHQIE0003</b>	<b>Failed to close statement.</b>
<b>Explanation</b>	Failed to close statement.
<b>EVSHQIE0004</b>	<b>HiveQuerySession initialize JDBC Connection failed.</b>
<b>Explanation</b>	HiveQuerySession initialize JDBC Connection failed.
<b>EVSHQIE0005</b>	<b>Close Connection failed.</b>
<b>Explanation</b>	Close Connection failed.
<b>EVSHQIE0007</b>	<b>Result cannot be formatted to JSON. format</b>
<b>Explanation</b>	Result cannot be formatted to JSON format.
<b>EVSHQIE0008</b>	<b>Failed get next result.</b>
<b>Explanation</b>	Failed get next result.
<b>EVSHQIE0009</b>	<b>Cannot create connection statement.</b>
<b>Explanation</b>	Cannot create connection statement.

<b>EVSHQIE0010</b>	<b>Failed to create {0}</b>
<b>EVSHQIE0011</b>	<b>Property "{0}" in group by expression must appear in select expression</b>
<b>Explanation</b>	Group by property is required to appear in select expression
<b>EVSHQIE0012</b>	<b>Property "{0}" in select expression must appear in group by expression</b>
<b>Explanation</b>	Property in select expression must appear in the group by expression
<b>EVSHQIE0013</b>	<b>Property "{0}" in order by expression must appear in select and group by expression</b>
<b>Explanation</b>	Property in order by expression must be included in the group by and select expression
<b>EVSHQIE0014</b>	<b>Full text query not supported by this implementation</b>
<b>Explanation</b>	This query implementation does provide full text search capabilities
<b>EVSHQIE0015</b>	<b>Error transforming query for explain plan</b>
<b>EVSHQIE0016</b>	<b>An unsupported encoding exception was thrown while generating explain message</b>
<b>EVSHQII0006</b>	<b>Method: {0} is not supported.</b>
<b>Explanation</b>	Method is not supported.
<b>EVSHQII0017</b>	<b>Inbound query in common syntax form:</b>
<b>EVSHQII0018</b>	<b>Outbound query in native form:</b>
<b>EVSHSI530E0000</b>	<b>Process method called before storage provider was started</b>
<b>Explanation</b>	The storage provider was not initialized and a call was made to process an event.
<b>EVSHSI530E0001</b>	<b>Error initializing required internal resources for provider</b>
<b>Explanation</b>	The required internal resources for the storage provider couldn't be initialized.

---

<b>EVSHSI530E0002</b>	<b>Error creating or accessing HDFS processor for event type: {0}</b>
<b>Explanation</b>	An HDFS processor for the given event type could not be accessed or instantiated.
<b>EVSHSI530E0003</b>	<b>Error stopping resource {0} on storage provider shutdown</b>
<b>Explanation</b>	An exception was through when stopping an internal resource on provider shutdown.
<b>EVSHSI530E0004</b>	<b>Error closing HDFS Writer instance on processor shutdown</b>
<b>Explanation</b>	The HDFS writer and stream threw an exception on close.
<b>EVSHSI530E0005</b>	<b>Unexpected error encountered during batch processing.</b>
<b>Explanation</b>	There was an HDFS or Hive error encountered during the processing of an event batch.
<b>EVSHSI530E0006</b>	<b>Error processing batch during execution of auto-write task.</b>
<b>Explanation</b>	An unexpected exception was thrown during batch processing.
<b>EVSHSI530E0007</b>	<b>Error processing batch during execution of on-demand task</b>
<b>Explanation</b>	An expected exception was thrown during batch processing
<b>EVSHSI530E0008</b>	<b>Error starting HDFS processor resource for event type: {0}</b>
<b>Explanation</b>	An error was thrown when initializing and starting the HDFS processor.
<b>EVSHSI530E0009</b>	<b>Error stopping HDFS processor for event type: {0}</b>
<b>Explanation</b>	An unexpected error occurred during the shutdown of the HDFS processor
<b>EVSHSI530E0010</b>	<b>Error creating HDFS processor for event type: '{0}'</b>
<b>Explanation</b>	An internal error occurred during the creation of the HDFS processor
<b>EVSHSI530E0011</b>	<b>Unsupported encoding error converting text event to byte stream</b>
<b>Explanation</b>	The event instance was formatted in an encoding other than the default of utf-8

- EVSHSI530E0012**    **Error streaming event data to HDFS output stream**  
**Explanation**        An error occurred while writing the event data to the HDFS file system.
- EVSHSI530E0013**    **Error flushing and closing the HDFS file stream**  
**Explanation**        The HDFS I/O stream could not be flushed and closed.
- EVSHSI530E0014**    **Error closing HDFS file system reference**  
**Explanation**        The HDFS file system reference throw an unexpected exception during the close method call
- EVSHSI530E0015**    **Error creating HDFS file system reference**  
**Explanation**        An unexpected exception was thrown when closing the HDFS file system.
- EVSHSI530E0016**    **Hive table could not be found or created for event type: {0}**  
**Explanation**        The Hive table does not exist and or could not be created by the Hive metadata manager
- EVSHSI530E0017**    **Error loading Hive table data or performing auto registration for event type: {0}**  
**Explanation**        An error accessing the Hive metadata or creating the Hive metadata for the specified event type occurred.
- EVSHSI530E0018**    **Unable to create or find Hive persistence error table; defaulting to log file:%n {0}**  
**Explanation**        The Hive metadata table for the event persistence error type could not be found or created. Errors will be logged to the error log.
- EVSHSI530E0019**    **Error retrieving root schema tree element children from parser**  
**Explanation**        The child nodes of the schema element tree root could not be accessed.
- EVSHSI530E0020**    **Error parsing schema for event type: {0} in namespace {1}**  
**Explanation**        The event type definition for the given event type and namespace could not be parsed by the schema parser.

---

<b>EVSHSI530E0021</b>	<b>Generated Hive event table name exceeds 255 character size limit: {0}</b>
<b>Explanation</b>	Table names in Hive are limited to 255 characters; The unique table name generated for the event type and namespace exceeded this limit.
<b>EVSHSI530E0022</b>	<b>Error creating Hive database table field definitions</b>
<b>Explanation</b>	An expected error occurred when parsing the schema tree and creating the database table and field definitions
<b>EVSHSI530E0023</b>	<b>Error creating Hive database table structure definition</b>
<b>Explanation</b>	An unexpected error occurred when generating the Hive table structure
<b>EVSHSI530E0024</b>	<b>Error creating Hive database table definition</b>
<b>Explanation</b>	An unexpected error occurred when generating the Hive metadata table definition.
<b>EVSHSI530E0025</b>	<b>Error filtering non-mappable nodes from root schema element tree</b>
<b>Explanation</b>	There are certain binary type properties supported in events; these are filtered out of the stored event. An unexpected error occurred when trying to filter these nodes.
<b>EVSHSI530E0027</b>	<b>Ping to Apache Hive Server {0} failed.</b>
<b>Explanation</b>	Could not ping an active hive server for metadata operations
<b>EVSHSI530E0028</b>	<b>Ping to Apache Hadoop Name Node {0} failed.</b>
<b>Explanation</b>	Failed to connect to primary name node for file system access.
<b>EVSHSI530E0031</b>	<b>Error disconnecting from Apache Hive database: {0} at host: {1} port: {2} and user: {3}</b>
<b>Explanation</b>	An error occurred when disconnecting from the hive database
<b>EVSHSI530E0034</b>	<b>Error retrieving normalized type from component for event type: {0}</b>
<b>Explanation</b>	An exception was thrown by the component when generating the normalized type for the event type

<b>EVSHSI530E0035</b>	<b>An exception was thrown whilst stopping an HDFS error event writer: {0}</b>
<b>Explanation</b>	During shutdown of the HDFS error logger an exception was thrown when closing the writer for the given target and event type.
<b>EVSHSI530E0036</b>	<b>Validation of dynamic service configuration against provided values failed</b>
<b>Explanation</b>	A dynamic service configuration was provided but the variables are not present in the event.
<b>EVSHSI530E0037</b>	<b>Unexpected exception encountered during batch processing; operation will be re-tried. Exception repeated {0} times</b>
<b>Explanation</b>	An exception occurred while writing the events to the HDFS file system. The operation will be re-tried until successful.
<b>EVSHSI530E0038</b>	<b>Unexpected exception on HDFS file system close call during hard reset</b>
<b>Explanation</b>	An exception was thrown when closing the file system reference after write exception.
<b>EVSHSI530E0039</b>	<b>Error initialising internal resources for provider; operation will be re-tried. Exception repeated {0} times</b>
<b>Explanation</b>	Internal initialisation failed. The operation will be retried until successful or the component is restarted.
<b>EVSHSI530E0040</b>	<b>Error creating processor for event type {0}; operation will be re-tried; Exception repeated {1} times</b>
<b>Explanation</b>	A processor could not be created to process the specified event type. This could be due to a failure to connect to Hive for the required metadata.
<b>EVSHSI530E0041</b>	<b>Validation of dynamic service configuration failed. Event can not be persisted: Header: {0} Body: {1}</b>
<b>Explanation</b>	The values required for using a dynamic configuration were not supplied in the event being processed.
<b>EVSHSI530I0026</b>	<b>Successfully created JMX MBean for Hadoop Connectivity: {0}</b>
<b>Explanation</b>	The monitoring MBean was successfully created

---

<b>EVSHSI530I0029</b>	<b>Connected to Apache Hive database: {0} at host: {1} port: {2} and user: {3}</b>
<b>Explanation</b>	Info message on connection to hive database
<b>EVSHSI530I0030</b>	<b>Disconnected from Apache Hive database: {0} at host: {1} port: {2} and user: {3}</b>
<b>Explanation</b>	Info message on database disconnect
<b>EVSHSI530I0032</b>	<b>Connected to Apache HDFS File System specified by URI: {0}</b>
<b>Explanation</b>	Info message logged on connect to HDFS file system
<b>EVSHSI530I0033</b>	<b>Disconnected from Apache HDFS File System specified by URI: {0}</b>
<b>Explanation</b>	Info message logged on disconnect from HDFS file system
<b>EVSJCOE0000</b>	<b>An invalid column index was passed into the accessor method: {0}</b>
<b>Explanation</b>	Column indices range from 1 to n. The client has passed an index into the accessor methods that is outside this range.
<b>EVSJCOE0001</b>	<b>An invalid column label was passed into the accessor method: {0}</b>
<b>Explanation</b>	The client has passed a column label into the accessor method that does not exist in this result set.
<b>EVSJCOE0002</b>	<b>The specified feature is not supported by this driver or data source: {0}</b>
<b>Explanation</b>	The invoked method is not supported by the driver or data source. Only a subset of the JDBC API are required to be supported.
<b>EVSJCOE0003</b>	<b>Column data at index or specified label is not integral: {0}</b>
<b>Explanation</b>	A numeric column accessor method was called but the value is not a numeric.
<b>EVSJCOE0004</b>	<b>Column data at index or for specified label is not a floating point number: {0}</b>
<b>Explanation</b>	A decimal column accessor method was called but the value is not a floating point number.

<b>EVSJDRE0000</b>	<b>No driver or data source implementation found for scheme: {0}</b>
<b>Explanation</b>	The driver implementation is dynamically loaded based on the scheme in the database URL. This message indicates that there is no implementation class for the specified schema.
<b>EVSJDRE0001</b>	<b>The specified feature is not supported by this driver or data source: {0}</b>
<b>Explanation</b>	The invoked method is not supported by the driver or data source. Only a subset of the JDBC API are required to be supported.
<b>EVSJDRE0002</b>	<b>Error loading dynamic library white list from resource: {0}</b>
<b>Explanation</b>	The resource containing a white list of dynamically loaded run-time libraries could not be loaded.
<b>EVSJDRE0003</b>	<b>Error creating class loader and loading white listed run-time libraries</b>
<b>Explanation</b>	There as an error when creating the classloader and loading the classes contained in the white listed libraries.
<b>EVSJDRE0004</b>	<b>Error creating instance of the driver or data source implementation class: {0}</b>
<b>Explanation</b>	The driver implementation class could not be instantiated using the custom class loader and dynamically loaded library classes.
<b>EVSJDRE0005</b>	<b>The driver or data source installation directory is a required property but has not been set.</b>
<b>Explanation</b>	The driver dynamically loads the implementation and run-time libraries based on the database URL. For this to function correctly the location of the driver installation must be provide.
<b>EVSJDRE0006</b>	<b>The databaseURL property has not been set for this data source</b>
<b>Explanation</b>	An attempt was made to retrieve a connection from the data source without setting the database location.
<b>EVSJDRE0007</b>	<b>No parameters found in JDBC URL query string: {0}</b>
<b>Explanation</b>	The JDBC URL contains a query string marker "?" but has no parameters.
<b>Action</b>	Correct the JDBC URL and ensure that the required parameters are specified correctly.

---

<b>EVSJDRE0008</b>	<b>The specified query parameter has no associated value: {0}</b>
<b>Explanation</b>	The JDBC URL contains a query string that includes one or more parameters with no associated values.
<b>Action</b>	Correct the JDBC URL and ensure that all query parameters have valid values.
<b>EVSJEDI232E0000</b>	<b>The specified feature is not supported by this driver or data source: {0}</b>
<b>Explanation</b>	The invoked method is not supported by the driver or data source. Only a subset of the JDBC API are required to be supported.
<b>EVSJEDI232E0001</b>	<b>This connection implementation provides no wrapper interfaces</b>
<b>Explanation</b>	The connection implementation does not support the unwrap feature declared in the Wrapper interface.
<b>EVSJEDI232E0002</b>	<b>The required properties for this data source have not be set prior to creating the connection</b>
<b>Explanation</b>	Prior to creating a connection through the data source the various setter methods should be invoked to initialize the data source.
<b>EVSJEDI232E0003</b>	<b>An error occurred when creating a connection to the Elasticsearch cluster.</b>
<b>Explanation</b>	The transport client could not be created during construction of the connection.
<b>Action</b>	Check the database URL and verify that the cluster is available
<b>EVSJEDI232E0004</b>	<b>Error converting Elasticsearch mapping metadata to JSON format</b>
<b>Explanation</b>	The Elasticsearch metadata response could not be marshalled into JSON format.
<b>EVSJEDI232E0005</b>	<b>An invalid column index was passed into the accessor method: {0}</b>
<b>Explanation</b>	Column indices range from 1 to n. The client has passed an index into the accessor methods that is outside this range.
<b>EVSJEDI232E0006</b>	<b>Column data at index or specified label is not integral: {0}</b>
<b>Explanation</b>	A numeric column accessor method was called but the value is not a numeric.

- EVSJEDI232E0007** **Column data at index or for specified label is not a floating point number: {0}**  
**Explanation** A decimal column accessor method was called but the value is not a floating point number.
- EVSJEDI232E0008** **An invalid column label was passed into the accessor method: {0}**  
**Explanation** The client has passed a column label into the accessor method that does not exist in this result set.
- EVSJEDI232E0009** **Column data at index or for specified label is not a valid timestamp: {0}**  
**Explanation** A timestamp column accessor method was called but the value is not a valid timestamp
- EVSJEDI232E0010** **Column data at index or for specified label is not a valid date: {0}**  
**Explanation** A date column accessor method was called but the value is not a valid date
- EVSJEDI232E0011** **Column data at index or for specified label is not a valid time field: {0}**  
**Explanation** A time column accessor method was called but the value is not a valid time field
- EVSJEDI232E0012** **No corresponding index exists for the specified catalog: {0}**  
**Explanation** There is a one to one relationship between the SQL catalog and Elasticsearch index in the persistence framework. A method taking a catalog parameter was called but no such index exists in the Elasticsearch cluster.
- EVSJEDI232E0013** **This driver or data source only supports SQL queries**  
**Explanation** The JDBC driver for Event Persistence is provided for basic queries against non-SQL data stores.
- EVSJEDI232E0014** **The specified column name "{0}" does not exist in table; available columns are: {1}**  
**Explanation** The SQL query specified an invalid column name in the column list, where clause, order by clause, or group by clause.  
**Action** Correct the SQL query statement.

---

<b>EVSJEDI232E0015</b>	<b>Error transforming SQL query into a native Elasticsearch request%n{0}</b>
<b>Explanation</b>	The SQL query could not be turned into an Elasticsearch search request.
<b>Action</b>	Verify the syntax of the issued query and revise as needed.
<b>EVSJEDI232E0016</b>	<b>Error executing native Elasticsearch search request%n{0}</b>
<b>Explanation</b>	An error occurred while executing the native Elasticsearch search request.
<b>Action</b>	Check that the cluster is available and in good health.
<b>EVSJEDI232E0017</b>	<b>The index represented by the specified catalog does not exist: {0}</b>
<b>Explanation</b>	An SQL query was issued but there is no corresponding index on the cluster
<b>Action</b>	Check your query and the available indices on the cluster.
<b>EVSJEDI232E0018</b>	<b>The type represented by the specified table does not exist: {0}</b>
<b>Explanation</b>	An SQL query was issued but there is no corresponding type available in the index.
<b>Action</b>	Check your query and the available indices on the cluster.
<b>EVSJEDI232E0019</b>	<b>Unexpected statement type found while trying to determine the appropriate query builder implementation</b>
<b>Explanation</b>	Different builder classes are used to transform the SQL query into various Elasticsearch search requests. The implementation is selected based on the presence of aggregate functions or column list expressions. In this case, neither was found.
<b>Action</b>	Check your SQL query syntax.
<b>EVSJEDI232E0020</b>	<b>Error incrementing result cursor or accessing query result data</b>
<b>Explanation</b>	The result cursor could not be advanced to the next position.
<b>Action</b>	This can occur if the cluster goes down and the client tries to access the next batch. Check the cluster health.
<b>EVSJEDI232E0021</b>	<b>Error setting fetch direction on forward only result set.</b>
<b>Explanation</b>	This jdbc driver provides forward only result sets. A client attempted to set a fetch direction other than forward.
<b>Action</b>	Correct the client logic.

**EVSJEDI232E0022** **An error has occurred because the response reference has not been set in response handler**

**Explanation** This is a programming error in the implementation logic; the response must be set before using the handler.

**Action** Correct the programming error.

**EVSJEDI232E0023** **No matching parameter marker found for given index: {0}**

**Explanation** The client invoked a set method on the prepared statement for which there was no marker. For example, setting parameter 2 on a statement with only one marker.

**Action** Correct the program logic.

**EVSJEDI232E0024** **No corresponding value found for the marker at parameter index: {0}**

**Explanation** A parameter marker was specified in the query but no value was set prior to executing the statement.

**Action** Correct the program logic by invoking the appropriate set method on the prepared statement.

**EVSJEDI232E0025** **The position {0} declared in the order by clause does not match a valid column or alias defined in the select statements column or aggregate list**

**Explanation** The order by clause specifies an integer position that does not match a value in the select expressions column list.

**Action** Review the statement and correct the column list expression or the order by clause.

**EVSJHDI530E0000** **The specified feature is not supported by this driver or data source: {0}**

**Explanation** The invoked method is not supported by the driver or data source. Only a subset of the JDBC API are required to be supported.

**EVSJHDI530E0001** **The required properties for this data source have not be set prior to creating the connection**

**Explanation** Prior to creating a connection through the data source the various setter methods should be invoked to initialize the data source.

**EVSJQIE0000** **Unsupported format in aggregation function: {0}.**

**Explanation** Unsupported format in aggregation function.

---

<b>EVSJQIE0001</b>	<b>Unsupported date time format in string literal: {0}.</b>
<b>Explanation</b>	Data and time format is invalid.
<b>EVSJQIE0002</b>	<b>Query execution failed.</b>
<b>Explanation</b>	Query execution failed.
<b>EVSJQIE0003</b>	<b>Failed close query result.</b>
<b>Explanation</b>	Failed close query result.
<b>EVSJQIE0004</b>	<b>Failed to close query statement.</b>
<b>Explanation</b>	Failed to close query statement.
<b>EVSJQIE0005</b>	<b>Failed to close query connection.</b>
<b>Explanation</b>	Failed to close query connection.
<b>EVSJQIE0006</b>	<b>Failed to close query result.</b>
<b>Explanation</b>	Failed to close query result.
<b>EVSJQIE0007</b>	<b>Failed to format the result to JSON.</b>
<b>Explanation</b>	Failed to format the result to JSON.
<b>EVSJQIE0008</b>	<b>Unsupported feature: {0}.</b>
<b>Explanation</b>	Feature is not supported.
<b>EVSJQIE0009</b>	<b>Failed to get next query result.</b>
<b>Explanation</b>	Failed to get next query result.
<b>EVSJQIE0010</b>	<b>Full text query not supported by this implementation</b>
<b>Explanation</b>	This query implementation does provide full text search capabilities

<b>EVSJQIE0011</b>	<b>Error transforming query for explain plan</b>
<b>EVSJQIE0012</b>	<b>An unsupported encoding exception was thrown while generating explain message</b>
<b>EVSJQII0013</b>	<b>Inbound query in common syntax form:</b>
<b>EVSJQII0014</b>	<b>Outbound query in native form:</b>
<b>EVSJQPE0000</b>	<b>Test Message</b>
<b>EVSJUTE0000</b>	<b>Invalid JDBC scheme: {0}</b>
<b>Explanation</b>	Invalid JDBC scheme.
<b>EVSPAIE0000</b>	<b>Failed to execute operations: {0}</b>
<b>Explanation</b>	Failed to execute operations: {0}
<b>EVSPAIE0001</b>	<b>ParStream Admin Session has not been started.</b>
<b>Explanation</b>	ParStream Admin Session has not been started.
<b>EVSPAIE0002</b>	<b>Failed to close JDBC connection statement.</b>
<b>Explanation</b>	Failed to close JDBC connection statement.
<b>EVSPAIE0003</b>	<b>Event type {0} with Namespace {1} has already registered.</b>
<b>Explanation</b>	Event type {0} with Namespace {1} has already registered.
<b>EVSPAIE0004</b>	<b>Not supported operation: {0}.</b>
<b>Explanation</b>	Not supported operation: {0}.
<b>EVSPAIE0005</b>	<b>Not Supported Encoding {0}.</b>
<b>Explanation</b>	Not Supported Encoding {0}.

---

<b>EVSPQIE0000</b>	<b>Metadata manager error encountered during create session call</b>
<b>Explanation</b>	Metadata manager couldn't be created; possibly due to invalid event type store location
<b>EVSPQIE0001</b>	<b>Error encountered when initializing metadata manager</b>
<b>Explanation</b>	Metadata manager couldn't be created; possibly due to invalid event type store location
<b>EVSPQIE0002</b>	<b>Unsupported date time format in string literal: {0}</b>
<b>Explanation</b>	Date and time format is invalid - See java.sql.Timestamp format
<b>EVSPQIE0003</b>	<b>Unsupported syntax in aggregate function clause: {0}</b>
<b>Explanation</b>	Unsupported syntax in aggregation function clause avg, min, max, sum or count
<b>EVSPQIE0004</b>	<b>Error creating the connection to the ParStream database</b>
<b>Explanation</b>	There was an error connecting to the ParStream server(s)
<b>EVSPQIE0005</b>	<b>An open query exists for this session</b>
<b>Explanation</b>	There is already a pending or active query for this session; execute or close the query
<b>EVSPQIE0006</b>	<b>Error closing the connection to the ParStream database</b>
<b>Explanation</b>	There was an error closing the connection to the database
<b>EVSPQIE0007</b>	<b>An open result stream exists for this query</b>
<b>Explanation</b>	There is an active result stream; process the results or close the result stream
<b>EVSPQIE0008</b>	<b>There was an error executing the current query</b>
<b>Explanation</b>	This could be due to a syntax error in the query or the ParStream database may be unavailable
<b>EVSPQIE0009</b>	<b>Unexpected exception when closing the query</b>
<b>Explanation</b>	An error was encountered when closing the query session

<b>EVSPQIE0010</b>	<b>Failed to position cursor at next event in the result stream</b>
<b>Explanation</b>	There was an error when moving the cursor position forward in the stream
<b>EVSPQIE0011</b>	<b>The method {0} is unsupported in this implementation of ResultStream</b>
<b>Explanation</b>	The only requirement on a ResultStream implementation is that they provide a forward cursor via the next method
<b>EVSPQIE0012</b>	<b>Failed to format the query result into a JSON document</b>
<b>Explanation</b>	There was an error when creating the JSON result from the database query
<b>EVSPQIE0013</b>	<b>Unexpected exception encountered when closing result stream</b>
<b>Explanation</b>	There was an error closing the result stream; this could be caused by a network or database issue
<b>EVSPQIE0014</b>	<b>Full text query not supported by this implementation</b>
<b>Explanation</b>	This query implementation does provide full text search capabilities
<b>EVSQUAE0000</b>	<b>No provider registered for scheme: {0}</b>
<b>Explanation</b>	No provider registered for scheme.
<b>EVSQUAE0001</b>	<b>EventStoreUser is not set.</b>
<b>Explanation</b>	EventStoreUser is not set.
<b>EVSQUAE0002</b>	<b>Where clause contains no valid expression</b>
<b>Explanation</b>	A where clause was added to the builder that contains no expression.
<b>EVSQUAE0003</b>	<b>Group by clause contains no valid properties</b>
<b>Explanation</b>	A group by was added to the builder but contains no event properties.
<b>EVSQUAE0004</b>	<b>Order by clause contains no valid properties</b>
<b>Explanation</b>	An order by clause was added to the builder but contains no properties

---

<b>EVSSAPE0000</b>	<b>No registered storage provider factory found for store type: {0} and version: {1}</b>
<b>Explanation</b>	As EVP storage implementation bundles are initialized they register their factories with the api. This indicates that there is no registered factory for the data store type and version.
<b>EVSSAPE0001</b>	<b>Error creating storage factory instance for store type: {0} and version: {1}</b>
<b>Explanation</b>	The implementation class for the storage provider could not be instantiated.
<b>EVSSAPE0002</b>	<b>Found variable {0} but no associated value was provided in the event</b>
<b>Explanation</b>	The service has been configured with variables but no value was included in the emitted event.
<b>EVSSAPE0003</b>	<b>Dynamic Service Configuration validation failed; no values found in map for the following variables: {0}</b>
<b>Explanation</b>	A variable was defined in the service configuration but no value was found in the event header.
<b>EVSSAPE0004</b>	<b>Error compiling regular expression for variable substitution on variable: {0}</b>
<b>Explanation</b>	The regular expression for substitution of the stated variable failed.
<b>EVSUTLE0000</b>	<b>Invalid JDBC scheme: {0}</b>
<b>Explanation</b>	Invalid JDBC scheme.
<b>EVSUTLE0001</b>	<b>Invalid or unexpected Event Store URI format: {0}</b>
<b>Explanation</b>	Invalid or unexpected Event Store URI format.

# 16

## Installer Messages

---

**CommandLineArgs.missingMaxLogSize** – You changed the default maximum log size using `-maxLogSize` but did not provide the new value for new log size. Provide the new value for the maximum log size, followed by either 'k' or 'm'.

**Explanation**            You changed the default maximum log size using `-maxLogSize` but did not provide the new value for log size.

**Action**                    Provide the new value for the maximum log size, followed by either 'k' or 'm'.

**DLInitFilesProgressPanel.cannotLoadJNI** – Unable to load resource {0}. Run the installer again with a 32-bit JDK instead of a 64-bit JDK.

**Explanation**            This message is displayed when the user uses 64-bit JDK to install an older version that did not support 64-bit JDK. The 64-bit library will be missing.

**Action**                    Run the installer again with a 32-bit JDK instead of a 64-bit JDK.

**DLInitFilesProgressPanel.unsupportedPlatformInternal** – The installer has requested files for {0} but no files are available for that operating system at {1}.

**DLInitFilesProgressPanel.unsupportedPlatformProduction** – The selected product release does not support the operating system {0} on which you are trying to install.

**Explanation**            The user is trying to install on a platform that not supported on the current install machine.

**Action**                    The user should select a different product suite that does support the current platform.

**DLJarsProgressPanel.errorImagePlatformAs400** – April 2011 and later Software AG Installers do not support creation of images for IBM AS/400 systems. The installer will now exit.

**DistManInstallMain.relaunchBadJavaHome** – The JDK located at {0} is version {1}, which only supports classes up to major.minor version {2}. You must execute the installer or uninstaller with a JDK that supports classes with a major.minor of at least {3}. You can use the `-javaHome` command line option to launch the uninstaller using a different JDK. The JDK located in {4} is not working; verify that the path is correct.

**Explanation** This message is displayed when the user gave the installer or uninstaller an alternate JDK to launch the installer or uninstaller, and the path was incorrect. See 'DistManInstallMain.relaunchNoJavaHome' for more details -- {4} is the location the user gave for the JDK installation.

**Action** The user should provide a proper JDK installation directory.

**DistManInstallMain.relaunchJavaHomeSetText** – The JDK located at {0} is version {1}, which only supports classes up to major.minor version {2}. However, you must execute the installer or uninstaller with a JDK that supports classes with a major.minor of at least {3}. Please provide a JDK installation directory that meets these requirements; the JDK located at {4} does not meet these requirements or does not exist.

**Explanation** This message displayed when the user provides an alternate JDK to execute the installer or uninstaller, and the given path is too old or is not a proper directory. {0} - the JDK that is running this client {1} - the current JDK version {2} the major.minor class version that this JDK supports {3} - the required major.minor {4} - the location the user gave as an alternate JDK to run the installer or uninstaller.

**Action** Supply a proper JDK directory.

**DistManInstallMain.relaunchJavaHomeText** – The JDK located at {0} is version {1}, which only supports classes up to major.minor version {2}. However, you must execute the installer or uninstaller with a JDK that supports classes with a major.minor of at least {3}. Download a JDK that meets these requirements. See the Using the Software AG Installer guide for details and instructions.

**Explanation** If the user tries to launch the installer or uninstaller with a JDK that is too old, this message will be shown. The user will be queried to supply an alternate location for a more recent JDK. {0} - location of the current JDK executing the installer or uninstaller {1} -- version of the current JDK {2} major.minor class version the current version of JDK supports, {3} -- the minimum that is required to execute the client classes.

**Action** Enter the newer JDK installation directory and the installer or uninstall will execute themselves again using that JDK.

---

**DistManInstallMain.relaunchNoJavaHome** – The JDK located at {0} is version {1}, which only supports classes up to major.minor version {2}. You must execute the installer or uninstaller with a JDK that supports classes with a major.minor of at least {3}. You can use the `-javaHome` command line option to launch the uninstaller using a different JDK.

**Explanation** This message is displayed when the user tries to execute the installer or uninstaller with a JDK version that is too old. This can happen, for example, if the user installs webMethods 6 (which includes JDK 1.3 or 1.3.1) and tries to run the uninstaller. The message parameters are {0} - Installation home directory for java, {2} major.minor version of the java the user used to run the installer or uninstaller {3} - the major.minor version that is required as an absolute minimum.

**Action** As long as the user is not using console mode and running the installer, the user can point the installer or uninstaller at a newer JDK installation; the installer or uninstaller will launch again using that JDK.

**InstallDirWizardPanel.cannotFindRegistryKeys** – The Software AG Uninstaller cannot find the proper registry keys for this installation and cannot continue.

**LockedFilesWizardPanel.explainText** – The installer has detected running processes that must be stopped before you can continue. First shut down the listed products; this might also automatically shut down other listed processes. Shut down products by stopping services or exiting applications. Do not use Task Manager. If you need shutdown instructions, see the product documentation.

**SAGEnvironmentManagerUnix.configFileNotReadable** – The installation user has no permissions to read the config file "{0}"! Change the permissions and try again or exit the current installation.

**Explanation** The message that pops up when the current installation user has no read permission for the config file '/etc/sagconf.xml' on Unix systems.

**ZipManager.errorLockedFile** – The process cannot access the file because another process has locked a portion of the file.

# 17

## Integration Server Messages

---

<b>0701.002E</b>	<b>Mobile application "{0}" version {1} is already registered.</b>
<b>Explanation</b>	A mobile application with this name and version already exists.
<b>Action</b>	Provide a different application name or version.
<b>0701.003E</b>	<b>Upload service "{0}" is not available.</b>
<b>Explanation</b>	The upload service supplied during mobile sync component creation does not exist in the specified namespace.
<b>Action</b>	Make sure the service exists within the specified namespace and that the namespace and service name are typed correctly.
<b>0701.004E</b>	<b>Download service "{0}" is not available.</b>
<b>Explanation</b>	The download service supplied during mobile sync component creation does not exist in the specified namespace.
<b>Action</b>	Make sure the service exists within the specified namespace and that the namespace and service name are typed correctly.
<b>0701.005E</b>	<b>Document type "{0}" is not available.</b>
<b>Explanation</b>	The business doc type supplied during mobile sync component creation does not exist in the specified namespace.
<b>Action</b>	Make sure the document type exists within the specified namespace and that the namespace and document type are typed correctly.

<b>0701.006E</b>	<b>Mobile sync component "{0}" is suspended and cannot be changed.</b>
<b>Explanation</b>	An attempt was made to edit the mobile sync component, but changes cannot be made to a mobile sync component when the component is suspended.
<b>Action</b>	Disable the mobile sync component and try to edit the component again.
<b>0701.007E</b>	<b>Mobile sync component "{0}" is associated with mobile application "{1}" version {2}. Remove association before deleting mobile sync component.</b>
<b>Explanation</b>	An attempt was made to delete a mobile sync component that is associated with a mobile application.
<b>Action</b>	Remove the association between the mobile sync component and the mobile application. In the Integration Server Administrator, navigate to the Solutions > Mobile Support > Mobile Apps screen, click the name of the application to edit its associations, and deselect the mobile sync component from the Mobile Sync Component Alias list. Then, try deleting the mobile sync component again.
<b>0701.008E</b>	<b>Error: {0}</b>
<b>Explanation</b>	Mobile Support encountered an error while validating the namespaces for the download service, upload service, or business doc type supplied during creation of a mobile sync component.
<b>Action</b>	Make sure that the service or doc type exists within the specified namespace and that the entry is typed correctly.
<b>0701.009E</b>	<b>Mobile application "{0}" version {1} was not found.</b>
<b>Explanation</b>	Mobile Support could not find the specified mobile application and version while retrieving, updating, or deleting the mobile application or processing a synchronization request.
<b>Action</b>	Specify a valid mobile application and version.
<b>0701.012E</b>	<b>Mobile sync component "{0}" could not be suspended. Error: {1}</b>
<b>Explanation</b>	Mobile Support could not suspend the mobile sync component for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.014E</b>	<b>Conflict resolution rule is not valid.</b>
<b>Explanation</b>	The conflict resolution rule specified during mobile sync component creation is not valid.
<b>Action</b>	Specify a conflict resolution rule of either "Client wins" or "Server wins".

---

<b>0701.015E</b>	<b>Mobile sync component "{0}" already exists.</b>
<b>Explanation</b>	Mobile Support could not create the mobile sync component because the specified alias already exists.
<b>Action</b>	Specify a different alias for the mobile sync component.
<b>0701.016E</b>	<b>Mobile sync component "{0}" was not found.</b>
<b>Explanation</b>	Mobile Support could not find the specified mobile sync component while retrieving, updating, enabling or disabling, or deleting the mobile sync component or associating a mobile application with the component.
<b>Action</b>	Specify the alias of an existing mobile sync component.
<b>0701.022E</b>	<b>Mobile sync component "{0}" could not be created. Error: {1}</b>
<b>Explanation</b>	Mobile Support could not create the mobile sync component for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.023E</b>	<b>Mobile sync component "{0}" could not be deleted. Error: {1}</b>
<b>Explanation</b>	Mobile Support could not delete the mobile sync component for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.024E</b>	<b>Mobile sync component "{0}" could not be updated. Error: {1}</b>
<b>Explanation</b>	Mobile Support could not update the mobile sync component for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.025E</b>	<b>Mobile sync component "{0}" could not be enabled. Error: {1}</b>
<b>Explanation</b>	Mobile Support could not enable the mobile sync component for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.026E</b>	<b>Mobile sync component "{0}" could not be disabled. Error: {1}</b>
<b>Explanation</b>	Mobile Support could not disable the mobile sync component for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.

<b>0701.027E</b>	<b>Mobile sync components could not be retrieved.</b>
<b>Explanation</b>	Mobile Support could not retrieve the list of mobile sync components.
<b>Action</b>	Check the server log for details about this error.
<b>0701.028E</b>	<b>Mobile sync component "{0}" could not be retrieved. Error: {1}</b>
<b>Explanation</b>	Mobile Support could not retrieve the mobile sync component for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.029E</b>	<b>Mobile sync component "{0}" could not be deleted or edited.</b>
<b>Explanation</b>	The mobile sync component cannot be deleted or edited because the component is still enabled.
<b>Action</b>	Disable the mobile sync component and try to edit or delete the component again.
<b>0701.030E</b>	<b>Upload service "{0}" is not implementing the "{1}" specification.</b>
<b>Explanation</b>	The upload service provided during mobile sync component creation is not implementing the Mobile Support upload specification.
<b>Action</b>	Edit the upload service to include a reference to the <code>wm.mobile.datasync.specs:uploadSpec</code> specification.
<b>0701.031E</b>	<b>Download service "{0}" is not implementing the "{1}" specification.</b>
<b>Explanation</b>	The download service provided during mobile sync component creation is not implementing the Mobile Support download specification.
<b>Action</b>	Edit the download service to include a reference to the <code>wm.mobile.datasync.specs:downloadSpec</code> specification.
<b>0701.032E</b>	<b>"{0}" is not a valid Integration Server service node.</b>
<b>Explanation</b>	The download or upload service specified during mobile sync component creation is not a valid Integration Server service node.
<b>Action</b>	Ensure that element specified for the download or upload service is an Integration Server flow service (that is, a node type of <code>NSService</code> ) and not another type of element.
<b>0701.033E</b>	<b>Mobile sync component state "{0}" is not valid.</b>
<b>Explanation</b>	Mobile Support detected that an external attempt was made to invoke a mobile sync component that is in a state other than "enabled," "disabled," or "suspended." As a result, Mobile Support has rejected the request to invoke the mobile sync component.
<b>Action</b>	No action is necessary.

---

<b>0701.034E</b>	<b>Mobile application "{0}" version {1} could not be created. Error: {2}</b>
<b>Explanation</b>	Mobile Support encountered an error while associating the mobile application with a mobile sync component.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.035E</b>	<b>Mobile application "{0}" version {1} could not be updated. Error: {2}</b>
<b>Explanation</b>	Mobile Support encountered an error while updating the mobile application.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.036E</b>	<b>Mobile application "{0}" version {1} could not be retrieved. Error: {2}</b>
<b>Explanation</b>	Mobile Support encountered an error while retrieving details about the association between the mobile application and a mobile sync component.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.037E</b>	<b>Mobile applications could not be retrieved. Error: {0}</b>
<b>Explanation</b>	Mobile Support encountered an error while retrieving details about the associations between mobile applications and mobile sync components.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>0701.038E</b>	<b>Mobile application "{0}" version {1} could not be removed. Error: {2}</b>
<b>Explanation</b>	Mobile Support encountered an error while removing the association between the mobile application and a mobile sync component.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.041E</b>	<b>Row identifier "{0}" is not present in business doc type "{1}".</b>
<b>Explanation</b>	The business doc type does not contain the specified row identifier.
<b>Action</b>	When specifying row identifiers during mobile sync component creation, be sure the row identifiers are present in the specified business doc type.
<b>0701.042E</b>	<b>Row identifier "{0}" must be a string or an object.</b>
<b>Explanation</b>	A row identifier was provided that is not a string or an object.
<b>Action</b>	When specifying row identifiers during mobile sync component creation, be sure the row identifiers are strings or objects.

<b>0701.043E</b>	<b>"{0}" is not a document type node.</b>
<b>Explanation</b>	A business doc type was provided that is not of type NSRecord.
<b>Action</b>	When specifying a business doc type during mobile sync component creation, be sure the business doc type is of type NSRecord.
<b>0701.044E</b>	<b>Mobile application "{0}" version {1} is not associated with the mobile sync component "{2}".</b>
<b>Explanation</b>	Mobile Support could not complete the synchronization operation because the mobile application is not associated with the specified mobile sync component.
<b>Action</b>	In Integration Server Administrator, go to the Mobile Support > Mobile App page and associate the mobile application with the specified mobile sync component.
<b>0701.045E</b>	<b>Mobile sync component "{0}" could not be suspended. Only enabled mobile sync components can be suspended.</b>
<b>Explanation</b>	An attempt was made to suspend the mobile sync component, but the attempt failed because the mobile sync component was not enabled.
<b>Action</b>	Ensure that the mobile sync component is enabled before attempting to suspend it.
<b>0701.046E</b>	<b>Requested mobile sync component "{0}" is not enabled.</b>
<b>Explanation</b>	Mobile Support could not process the synchronization request because the specified mobile sync component is not enabled.
<b>Action</b>	In Integration Server Administrator, go to the Mobile Support > Mobile Sync Components page and enable the mobile sync component. Then, resubmit the synchronization request.
<b>0701.047E</b>	<b>No mobile sync component was specified.</b>
<b>Explanation</b>	Mobile Support could not process the synchronization request because no mobile sync component was specified.
<b>Action</b>	Ensure that the synchronization request includes a mobile sync component alias and a mobile application name and version.
<b>0701.048E</b>	<b>Mobile sync component "{0}" cannot be suspended because it was configured to not store business data in the sync store.</b>
<b>Explanation</b>	Mobile Support could not suspend the specified mobile sync component because the Store Business Data check box was not selected in Integration Server Administrator when the mobile sync component was configured. When business objects are not stored in the sync store, mobile sync components can be disabled but not suspended.
<b>Action</b>	In Integration Server Administrator, on the Solutions > Mobile Support > Mobile Sync Components screen, disable the mobile sync component.

---

<b>0701.049E</b>	<b>Mobile sync component "{0}" cannot be refreshed because it was configured to not store business data in the sync store.</b>
<b>Explanation</b>	Mobile Support could not refresh the specified mobile sync component because the Store Business Data check box was not selected when the mobile sync component was configured. When business objects are not stored in the sync store, mobile sync components cannot be refreshed.
<b>Action</b>	In Integration Server Administrator, on the Solutions > Mobile Support > Mobile Sync Components > Edit Mobile Sync Component screen, select the Store Business Data check box. Then, disable and enable the mobile sync component.
<b>0701.057E</b>	<b>Error occurred while processing record "{0}".</b>
<b>Explanation</b>	Mobile Support encountered an error while processing the specified record.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>0701.068E</b>	<b>"{0}" is not locked by thread "{1}".</b>
<b>Explanation</b>	The thread attempted to unlock the specified record, but the record is not owned by the thread.
<b>Action</b>	Try the request again. If the issue recurs, contact Software AG Global Support.
<b>0701.069E</b>	<b>Thread "{0}" could not unlock record "{1}" because record is already unlocked.</b>
<b>Explanation</b>	The thread attempted to unlock the specified record, but the record was not locked.
<b>Action</b>	Try the request again. If the issue recurs, contact Software AG Global Support.
<b>0701.080E</b>	<b>Could not refresh mobile sync component "{0}". Mobile sync component is in "{1}" state.</b>
<b>Explanation</b>	Mobile Support could not refresh the mobile sync component because the component is not suspended.
<b>Action</b>	Suspend the mobile sync component.
<b>0701.093E</b>	<b>Error occurred while initializing sync store.</b>
<b>Explanation</b>	Mobile Support experienced an error while initializing the sync store.
<b>Action</b>	Check the server log for details and take appropriate corrective action.

<b>0701.095E</b>	<b>Validation Error occurred: {0}.</b>
<b>Explanation</b>	Mobile Support could not process the data row because the data that was submitted was not valid.
<b>Action</b>	Correct the validation error.
<b>0701.096E</b>	<b>Message "{0}" skipped. Unique ID is missing.</b>
<b>Explanation</b>	Mobile Support could not process the data row because the data does not contain row identifier(s).
<b>Action</b>	Supply one or more row identifiers.
<b>0701.097E</b>	<b>Unable to synchronize the mobile device. Exception: {0}</b>
<b>Explanation</b>	Mobile Support could not synchronize the mobile device for the reason specified.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>0701.112E</b>	<b>Unable to save the record associated with unique ID and mobile sync component of "{0}". Exception: {1}</b>
<b>Explanation</b>	Mobile Support could not save the record for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.113E</b>	<b>Unable to save record data. Exception: {0}</b>
<b>Explanation</b>	Mobile Support could not save the record data for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.114E</b>	<b>Unable to write record data. Exception: {0}</b>
<b>Explanation</b>	Mobile Support could not write the record data for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.117E</b>	<b>Unable to delete record associated with unique ID "{0}" and mobile sync component "{1}". Reason: {2}</b>
<b>Explanation</b>	Mobile Support could not delete the record for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.

<b>0701.118E</b>	<b>Unable to delete record associated with mobile sync component "{0}". Reason: {1}</b>
<b>Explanation</b>	Mobile Support could not delete the record for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.119E</b>	<b>Unable to get records from sync store. Reason: {0}</b>
<b>Explanation</b>	Mobile Support could not retrieve records from the sync store for the reason indicated.
<b>Action</b>	Check the reason detailed in the message and take appropriate corrective action.
<b>0701.121E</b>	<b>Unable to obtain connection from connection pool. Exception: {0}</b>
<b>Explanation</b>	Mobile Support could not obtain a connection from the connection pool for the reason indicated.
<b>Action</b>	In Integration Server Administrator, on the Settings > JDBC Pools screen, select the pool alias associated with the MobileSupport functional alias. On the Connection Aliases > Edit screen, increase the number of maximum connections.
<b>0701.122E</b>	<b>Unable to obtain database connection from connection pool for sync store.</b>
<b>Explanation</b>	Mobile Support could not obtain a connection to the database configured for the sync store.
<b>Action</b>	In Integration Server Administrator, on the Settings > JDBC Pools screen, test the connection from the MobileSupport functional alias to the database. Take appropriate corrective action to resolve any errors.
<b>0901.001E</b>	<b>Name cannot be null or empty.</b>
<b>Explanation</b>	While creating or updating an OData element, Name cannot be null or empty.
<b>Action</b>	Provide a valid Name for the OData element.
<b>0901.002E</b>	<b>The specified name is invalid. Ensure that the name does not exceed 480 characters, does not start with a number or "_" symbol, and that it contains no special characters other than "_".</b>
<b>Explanation</b>	Specified name is invalid because name can contain only alphanumeric characters and "\"_\" symbol. Name must start with an alphabet and not with a number or "\"_\" symbol.
<b>Action</b>	Provide a valid name that starts with an alphabet and contains only alphanumeric characters and "\"_\" symbol. For information about other supported unicode characters, see SimpleIdentifier in Common Schema Definition Language (CSDL) documentation.

<b>0901.003E</b>	<b>Length of the Name cannot exceed 480 characters.</b>
<b>Explanation</b>	The Name specified contains more than 480 characters.
<b>Action</b>	Ensure that the length of the Name does not exceed 480 characters.
<b>0901.004E</b>	<b>Cannot rename Complex Type name to "{0}". Complex Type name must be unique.</b>
<b>Explanation</b>	The Complex Type name could not be renamed because a Complex Type with the same name already exists.
<b>Action</b>	Enter a unique Name for the Complex Type.
<b>0901.005E</b>	<b>Cannot rename Entity Type name to "{0}". Entity Type name must be unique.</b>
<b>Explanation</b>	The Entity Type name could not be renamed because an Entity Type with the same name already exists.
<b>Action</b>	Enter a unique Name for the Entity Type.
<b>0901.006E</b>	<b>Cannot rename Property name to "{0}". Property name must be unique.</b>
<b>Explanation</b>	The Property name could not be renamed because a Property with the same name already exists.
<b>Action</b>	Enter a unique Name for the Complex Type.
<b>0901.007E</b>	<b>Cannot delete Complex Type because it is referred to by "{0}".</b>
<b>Explanation</b>	The Complex Type cannot be deleted because it is referred to by a Complex property.
<b>Action</b>	Ensure that all references to the Complex Type are removed before deleting it.
<b>0901.008E</b>	<b>A Property with the same name already exists in the Entity Type.</b>
<b>Explanation</b>	The new Property with the specified name cannot be added because another Property with the same name already exists in the Entity Type.
<b>Action</b>	Enter a unique Name for the new Property that you want to add.
<b>0901.009E</b>	<b>A Property with the same name already exists in the Complex Type.</b>
<b>Explanation</b>	The new Property with the specified name cannot be added because another Property with the same name already exists in the Complex Type.
<b>Action</b>	Enter a unique Name for the new Property that you want to add.

---

<b>0901.010E</b>	<b>An Entity Type with the same name already exists in the OData Service.</b>
<b>Explanation</b>	The new Entity Type cannot be created with the specified name because another Entity Type with the same name already exists in the OData Service.
<b>Action</b>	Enter a unique Name for the Entity Type that you want to add.
<b>0901.011E</b>	<b>A Complex Type with the same name already exists in the OData Service</b>
<b>Explanation</b>	The new Complex Type cannot be added with the specified name because another Complex Type with the same name already exists in the OData Service.
<b>Action</b>	Enter a unique Name for the Complex Type that you want to add.
<b>0901.012E</b>	<b>An Association with the same name already exists in the OData Service.</b>
<b>Explanation</b>	A new Association with the specified name cannot be created because another Association with the same name already exists in the OData Service.
<b>Action</b>	Enter a unique name for the Association that you want to add.
<b>0901.013E</b>	<b>Invalid index position "{0}"; Unable to move the OData element.</b>
<b>Explanation</b>	Unable to move the OData element to an invalid index position.
<b>Action</b>	Ensure that the element is moved to an index position within the same container.
<b>0901.014E</b>	<b>Invalid property. Property "{0}" does not exist and hence, cannot be moved.</b>
<b>Explanation</b>	The specified Property cannot be moved because it does not exist.
<b>Action</b>	Ensure that the Property you want to move is already added to the OData service.
<b>0901.015E</b>	<b>Cannot delete Entity Type because it is referred to by one of the Associations.</b>
<b>Explanation</b>	The Entity type cannot be deleted because it is referred to by one of the Associations.
<b>Action</b>	Ensure that all references to the Entity Type is removed before deleting it.
<b>0901.016E</b>	<b>Facet "{0}" is not applicable for Type "{1}"</b>
<b>Explanation</b>	The specified Facets property is not applicable for the selected Type.
<b>Action</b>	Ensure that only those Facets that apply to the selected Type are specified.

<b>1000.0042E</b>	<b>Error in parsing EDM simple type "{0}" while evaluating the filter query.</b>
<b>Explanation</b>	Error in parsing the literal value of the filter expression because the literal value is incorrect.
<b>Action</b>	Ensure that the correct literal value is given in the filter expression.
<b>1000.0043E</b>	<b>Error in parsing property "{0}" in the Entity Data Model (EDM) while evaluating the filter query.</b>
<b>Explanation</b>	Error in parsing the property value of the filter expression.
<b>Action</b>	Ensure that the correct property value is given in the Entity Data Model (EDM).
<b>1000.0044E</b>	<b>Error in evaluating the filter expression "{0}".</b>
<b>Explanation</b>	The syntax of the filter expression is incorrect.
<b>Action</b>	Ensure that the syntax of the filter expression is correct.
<b>1000.0047E</b>	<b>Internal server error for request "{0}" due to "{1}"</b>
<b>Explanation</b>	Validation error from Olingo.
<b>Action</b>	Refer to the error message text for more details and correct the URL specified.
<b>1000.0048E</b>	<b>OData request "{0}" failed with error code "{1}" reason "{2}"</b>
<b>Explanation</b>	Validation error from Olingo.
<b>Action</b>	Refer to the error message text for more details and correct the URL specified.
<b>1000.0049E</b>	<b>Entity type "{0}" not found in the entity data model.</b>
<b>Explanation</b>	The entity type specified in the OData request is incorrect, deleted, or not available in the entity type model.
<b>Action</b>	Ensure that the entity type that you specified exists in the entity data model.
<b>1000.0050E</b>	<b>Odata data request failed with the error "{0}"</b>
<b>Explanation</b>	Error in the OData handler because the request is malformed.
<b>Action</b>	See the information provided in the error message and correct the request URL.

---

<b>1000.0052E</b>	<b>Error in retrieving NSOdata service node from OData Context.</b>
<b>Explanation</b>	The OData service node in the OData context is null.
<b>Action</b>	Ensure that the path to the OData service node specified in the request URL is correct.
<b>12.31</b>	<b>Invalid SAML assertion. The trust/signature validation failed with exception: {0}</b>
<b>Explanation</b>	Integration Server received a SAML assertion that either failed during signature validation or it did not come from a trusted issuer.
<b>Action</b>	Review the request and work with the sender to correct the issues.
<b>12.45</b>	<b>Error in getting security token form SAML assertion. SAML Assertion is: {0}</b>
<b>12.46</b>	<b>No user mapped to this X509 certificate.</b>
<b>12.47</b>	<b>No X509 certificate chain found.</b>
<b>12.48</b>	<b>No PAM authentication module.</b>
<b>12.49</b>	<b>No PAM user found.</b>
<b>12.50</b>	<b>Basic authentication, no user found.</b>
<b>12.51</b>	<b>Digest authentication, no user found.</b>
<b>12.52</b>	<b>Default authentication, no user found.</b>
<b>12.53</b>	<b>Request {0} for subject {1} was rejected.</b>
<b>12.54</b>	<b>Using account {0} for {1} subject {2}.</b>

- 12.55            **Error initializing OpenID Provider: {0}: {1}**
  
- 12.56            **Error initializing OpenID Providers**
  
- 12.57            **Requesting delegatable kerberos token for user: {0}**
  
- 12.58            **Server logged in as user : {0} into KDC**
  
- 12.59            **Kerberos delegated credentials set for user: {0}**
  
- 12.60            **Found kerberos delegated credentials for user: {0} . Placed in Context**
  
- 12.61            **Logged in as {0} . Using delegated kerberos credentials of {1} to request for service principal**
  
- 12.62            **Obtained delegated kerberos token for user : {0}**
  
- 12.63            **Kerberos ticket is set in the HTTP header: {0}**
  
- 12.64            **Kerberos delegated credentials set for : {0}**
  
- 12.65            **Unable to initialize the set of external OAuth Authorization Servers**
  
- 12.9999...0    **{0}**
  
- 13.10            **Unable to register multipart coder {0} for service {1}. A coder is already registered with that service name.**
  
- 13.11            **Unable to deregister multipart coder for service {0}. There is no coder registered with that service name.**

---

13.5	Deregistering multipart content handler for service {0}.
13.6	Registering multipart coder {0} for service {1}.
13.7	Deregistering multipart coder for service {0}.
13.8	Unable to register multipart content handler {0} for service {1}. A content handler is already registered with that service name.
13.9	Unable to deregister multipart content handler for service {0}. There is no content handler registered with that service name.
14.59	OutboundPasswordManager could not find package: {2}
14.60	Master password updated for package: {0}
14.61	Package {2} is not enabled.
14.62	Package name cannot be null.
14.63	The value specified for the <code>watt.server.xml.encoding</code> parameter is not supported by your JVM. Integration Server might not be able to process the XML files.
147.4	Error while executing command {0}: {1}
149.25W	<b>Possible SQL injection threat for {0} database</b>
<b>Explanation</b>	Incoming request to Enterprise Gateway Server contains suspicious data (payload), which could possibly cause an SQL injection attack.
<b>Action</b>	Contact the Integration Server system administrator to inspect and validate the incoming request to avert an SQL injection attack.

<b>149.26W</b>	<b>Possible SQL injection threat detected with the incoming payload.</b>
<b>Explanation</b>	Incoming request to Enterprise Gateway Server contains suspicious payload, which could possibly cause an SQL injection attack.
<b>Action</b>	Contact the Integration Server system administrator to inspect and validate the incoming request to avert an SQL injection attack.
<b>154.1</b>	{0}
<b>155.9998</b>	Exception --> {0}
<b>163.1</b>	<b>JWT Token is not present. Send a Bearer token along with the request.</b>
<b>163.2</b>	<b>Unable to find user corresponding to the JWT Bearer token.</b>
<b>163.3</b>	<b>Verifying with truststore alias "{0}" and certificate alias "{1}".</b>
<b>163.4</b>	<b>Verified claim : "{0}".</b>
<b>163.5</b>	<b>User "{0}" found in the JWT Bearer token.</b>
<b>163.9999</b>	Exception --> {0}
<b>21.1001E</b>	<b>The on-premise service signature cannot be null or empty.</b>
<b>Explanation</b>	While creating an Integration Cloud connector service, the service signature cannot be null or empty.
<b>Action</b>	Ensure that service signature is not null or empty while invoking the service to generate an Integration Cloud connector.
<b>21.1002E</b>	<b>Package name cannot be null or empty.</b>
<b>Explanation</b>	While creating an Integration Live connector service, the package name cannot be null or empty.
<b>Action</b>	Ensure that you specify the package name while invoking the service to generate an Integration Live connector.

---

<b>21.1003E</b>	<b>The on-premise service name cannot be null or empty.</b>
<b>Explanation</b>	While creating an Integration Live connector service, the on-premise service name cannot be null or empty.
<b>Action</b>	Ensure that you specify an on-premise service name while invoking the service to generate an Integration Live connector.
<b>21.1004E</b>	<b>Connector service name cannot be null or empty.</b>
<b>Explanation</b>	While creating an Integration Live connector service, the connector service name cannot be null or empty.
<b>Action</b>	Ensure that the connector service name is not null or empty while invoking the service to generate an Integration Live connector.
<b>21.1005E</b>	<b>An error occurred while creating the webMethods Cloud connector service. Details: {0}</b>
<b>Explanation</b>	Unknown error occurred while creating the Integration Live connector service.
<b>Action</b>	Contact Software AG global support.
<b>21.1006E</b>	<b>Interface name cannot be null or empty.</b>
<b>Explanation</b>	While creating the Application folder structure, the Interface name cannot be null or empty.
<b>Action</b>	Ensure that you specify the Interface name while invoking the service to create the Application folder structure.
<b>21.1007E</b>	<b>Application name cannot be null or empty.</b>
<b>Explanation</b>	While creating the Application folder structure, the Application name cannot be null or empty.
<b>Action</b>	Ensure that you specify the application name while invoking the service to create the Application folder structure.
<b>21.1008E</b>	<b>An error occurred while creating the application interface. Details: {0}</b>
<b>Explanation</b>	Unknown error occurred while creating the application interface.
<b>Action</b>	Contact Software AG global support.

<b>21.2001E</b>	<b>An error occurred while connecting to the Universal Messaging Realm. Error: {0}</b>
<b>Explanation</b>	Integration Server encountered the specified error while connecting to the Universal Messaging Realm.
<b>Action</b>	Ensure that the Realm URL and that the port identified in the URL is active on the Universal Messaging Server. In addition, take the appropriate action based on the details shown in the message.
<b>21.2002E</b>	<b>User {0} is not authorized to perform administrative functions on the Universal Messaging Realm.</b>
<b>Explanation</b>	The specified user does not have the rights required to perform administrative functions.
<b>Action</b>	Log on with a user name that has the proper permissions to perform administrative functions.
<b>21.3E</b>	<b>No Git credentials were found for tenant {0} (user {1}). Cannot access the remote Git repository.</b>
<b>Explanation</b>	Integration Server is not provisioned with Git credentials for the tenant.
<b>Action</b>	Contact the system administrator.
<b>21.4E</b>	<b>Tenant {0} has no credentials. Cannot fetch tenant's package from repository.</b>
<b>Explanation</b>	Integration Server is not provisioned with GIT credentials for the tenant.
<b>Action</b>	Contact the system administrator.
<b>21.5E</b>	<b>The local Git repository does not exist for package {0}.</b>
<b>Explanation</b>	The specified package is not associated with a local Git repository.
<b>Action</b>	Contact the system administrator.
<b>21.6002E</b>	<b>Settings could not be saved because of the following error: {0}</b>
<b>Explanation</b>	The settings could not be saved because of the specified error.
<b>Action</b>	Take the appropriate action based on the details shown in the message.
<b>21.6003E</b>	<b>The following error occurred while saving settings: {0}. See the error log for the full stack trace.</b>
<b>Explanation</b>	Integration Server encountered the specified error while saving the settings.
<b>Action</b>	Review the server log for details and take appropriate corrective action.

---

<b>21.6004E</b>	<b>An error occurred while loading information from the webMethods Cloud environment.</b>
<b>Explanation</b>	Integration Server encountered an error while loading information from the webMethods Cloud environment.
<b>Action</b>	Review the server log for details and take appropriate corrective action.
<b>21.6005E</b>	<b>webMethods Cloud information was not loaded because the settings are not specified.</b>
<b>Explanation</b>	You must specify the settings on the Settings page to load webMethods Cloud information.
<b>Action</b>	Specify the settings on the Settings page.
<b>21.7E</b>	<b>An exception occurred during the Git operation for package {0}: {1}</b>
<b>Explanation</b>	Integration Server encountered the specified error during the Git operation.
<b>Action</b>	Contact the system administrator.
<b>21.7003E</b>	<b>Could not save application {0}. A service with Display Name {1} already exists</b>
<b>Explanation</b>	A service with the specified display name already exists within the application. The display name of each service in the application must be unique.
<b>Action</b>	Specify a unique display name for the service.
<b>21.7004E</b>	<b>Could not save application {0} because there are no services selected.</b>
<b>Explanation</b>	There are no services specified for the application. You must specify at least one service for an application to be valid.
<b>Action</b>	Specify one or more services for the application.
<b>21.7007E</b>	<b>The following error occurred while saving application {0}: {1}. See the error log for the full stack trace.</b>
<b>Explanation</b>	Integration Server encountered the specified error while saving the application.
<b>Action</b>	Review the error log and correct the error.
<b>21.7008E</b>	<b>The following error occurred while deleting application {0}: {1} See the error log for the full stack trace.</b>
<b>Explanation</b>	Integration Server encountered the specified error while deleting the application.
<b>Action</b>	Review the error log and correct the error.

<b>21.7009E</b>	<b>The application named {0} does not exist.</b>
<b>Explanation</b>	The application's name contains too many characters.
<b>Action</b>	Rename the application using no more than 32 characters.
<b>21.7009...0E</b>	<b>The application named {0} does not exist.</b>
<b>Explanation</b>	The application does not exist. It might have been deleted by another user.
<b>Action</b>	Retry the action. If the issue persists, contact your system administrator.
<b>21.7010E</b>	<b>An application named {0} already exists.</b>
<b>Explanation</b>	The application is not valid because another application with the specified name already exists.
<b>Action</b>	Specify a unique application name.
<b>21.7011E</b>	<b>Could not save application {0} because the Display Name field for one or more of the services is empty.</b>
<b>Explanation</b>	The Display Name field is not specified for one or more services selected for the application.
<b>Action</b>	Specify a valid Display Name for each service in the application.
<b>21.7012E</b>	<b>Application {0} could not be saved because the Name contains: {1}.</b>
<b>Explanation</b>	The application's name contains the specified illegal character, leading digit, or reserved word.
<b>Action</b>	Rename the application.
<b>21.7013E</b>	<b>Application {0} could not be saved because the service Display Name {1} contains: {2}</b>
<b>Explanation</b>	The Display Name field of a service in the application contains the specified illegal character, value, or reserved word.
<b>Action</b>	Remove the specified character, value, or word from the Display Name.
<b>21.7014E</b>	<b>The following error occurred while uploading application {0}: {1}. See the error log for the full stack trace.</b>
<b>Explanation</b>	The specified error occurred while uploading the application.
<b>Action</b>	Review the error log and correct the error.

---

<b>21.7016E</b>	<b>Application {0} could not be uploaded because of the following error: {1}</b>
<b>Explanation</b>	Integration Server encountered the specified error while uploading the application.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>21.7020E</b>	<b>Applications require that at least one account be selected before they can be uploaded.</b>
<b>Explanation</b>	Applications require that at least one connection be selected before it can be uploaded.
<b>Action</b>	Select a connection for the application.
<b>21.7021E</b>	<b>No accounts exist. Go to webMethods Cloud &gt; Accounts and create an account.</b>
<b>Explanation</b>	Applications require that at least one account be selected before being uploaded, but no accounts have been created.
<b>Action</b>	Go to webMethods Cloud > Accounts and create at least one account.
<b>21.7022E</b>	<b>The on-premise Integration Server could not upload the application because the service {0} does not exist.</b>
<b>Explanation</b>	The specified service does not exist.
<b>Action</b>	Confirm that the service exists on the system.
<b>21.8001E</b>	<b>Account with alias name {0} does not exist.</b>
<b>Explanation</b>	There is no account with the specified alias name on Integration Server.
<b>Action</b>	Check the alias name of the Integration Live account that you are attempting to use to ensure you have the correct name.
<b>21.8002E</b>	<b>Account with alias name {0} already exists.</b>
<b>Explanation</b>	The account is not valid because another account already uses the specified alias name.
<b>Action</b>	Specify an alias name for the account that is unique for the Integration Server.
<b>21.8003E</b>	<b>The Alias Name parameter is required.</b>
<b>Explanation</b>	The Alias Name parameter is required but is either missing or is null.
<b>Action</b>	Make sure the Alias Name parameter is specified and that the value is not null.

<b>21.8005E</b>	<b>The Tenant ID parameter is required.</b>
<b>Explanation</b>	The Tenant ID parameter is required but is either missing or is null.
<b>Action</b>	Make sure the Tenant ID parameter is specified and that the value is not null.
<b>21.8006E</b>	<b>The Run As User parameter is required.</b>
<b>Explanation</b>	The Run As User parameter is required but is either missing or is null.
<b>Action</b>	Make sure the Run As User parameter is specified and that the value is not null.
<b>21.8012E</b>	<b>Error while enabling the listener for account {0}.</b>
<b>Explanation</b>	Integration Server encountered an error while enabling the listener for the specified account.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>21.8013E</b>	<b>Error while disabling the listener for account {0}.</b>
<b>Explanation</b>	Integration Server encountered an error while disabling the listener for the specified account.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>21.8019E</b>	<b>Error sending response for request ID {1} to execute service {0}.</b>
<b>Explanation</b>	Integration Server encountered an error while sending a response to the request received from webMethods Cloud for the specified request ID.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>21.8021E</b>	<b>Error executing service {0} for request ID {1}.</b>
<b>Explanation</b>	Integration Server encountered an error while executing the specified service.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>21.8022E</b>	<b>Test of the account failed. Confirm that the parameters are correct and tenant is registered in webMethods Cloud.</b>
<b>Explanation</b>	The test of the account failed.
<b>Action</b>	Make sure that the information provided is correct and that the tenant is registered in webMethods Cloud.

---

<b>21.8024E</b>	<b>An error was encountered while executing service {0}. The response was not received within {1} milliseconds.</b>
<b>Explanation</b>	Integration Server did not receive a response from the service within the time allowed.
<b>Action</b>	Ensure that the on-premise Integration Server is connected to webMethods Cloud and that the account is enabled.
<b>21.8026E</b>	<b>The information for account {0} was not uploaded successfully on stage {1}. Check the Integration Server logs for more details. Error: {2}</b>
<b>Explanation</b>	Integration Server encountered the specified error while uploading the account.
<b>Action</b>	Check the server log for details and take appropriate corrective action.
<b>21.8027E</b>	<b>Service {0} is not shared by on-premise for application {1}.</b>
<b>Explanation</b>	The specified service is not shared by the on-premise Integration Server.
<b>Action</b>	Make sure that the service is assigned to the specified application.
<b>21.8029E</b>	<b>Invalid account {0} associated with the execution of service {1}.</b>
<b>Explanation</b>	The specified account is not associated with the application that shares the service.
<b>Action</b>	Ensure that the application that shares the service is associated with the specified account.
<b>21.8031E</b>	<b>Account {0} was not removed from stage {1}. Check the Integration Server logs for more details. Error: {2}</b>
<b>Explanation</b>	The specified account was not deleted from the stage.
<b>Action</b>	Check the server error log for more detailed information and take the appropriate corrective action.
<b>21.8032E</b>	<b>Invalid value {1} specified for the stage parameter of account {0}.</b>
<b>Explanation</b>	The account settings were not retrieved correctly from webMethods Cloud.
<b>Action</b>	Make sure that you obtained the correct account settings from webMethods Cloud.
<b>21.8033E</b>	<b>No account information is configured for webMethods Cloud.</b>
<b>Explanation</b>	You cannot upload or enable accounts or applications without first configuring the account settings.
<b>Action</b>	Specify the account settings and retry the operation.

<b>21.8034E</b>	<b>The webMethods Cloud account endpoint to which the on-premise Integration Server should send responses is not valid</b>
<b>Explanation</b>	You cannot upload or enable accounts or applications without first configuring the account settings.
<b>Action</b>	Specify the account settings and retry the operation.
<b>21.8035E</b>	<b>Invalid account settings. Make sure that webMethods Cloud settings are configured.</b>
<b>Explanation</b>	Integration Server cannot connect to webMethods Cloud because there are no settings configured for the webMethods Cloud.
<b>Action</b>	Configure a valid webMethods URL on the Settings screen of the Integration Server Administrator.
<b>21.8036E</b>	<b>Stage for the account is not configured on webMethods Cloud. Contact webMethods Cloud Administrator.</b>
<b>Explanation</b>	The stage specified for the account does not exist on Integration Cloud.
<b>Action</b>	Contact the webMethods Cloud administrator.
<b>21.8037E</b>	<b>Stage for the application is not configured on webMethods Cloud. Contact webMethods Cloud Administrator</b>
<b>Explanation</b>	The stage specified for the application does not exist on Integration Cloud.
<b>Action</b>	Contact the webMethods Cloud administrator.
<b>21.9003E</b>	<b>Cannot delete account {0} because it is in use by other applications.</b>
<b>Explanation</b>	The specified account is in use by other applications and cannot be deleted.
<b>Action</b>	Modify the application to use a different account, or leave the account active.
<b>21.9006E</b>	<b>Unable to connect to on-premise Integration Server for account {0}.</b>
<b>Explanation</b>	The specified account cannot be tested.
<b>Action</b>	Ensure that the specified account is enabled on the on-premise Integration Server.
<b>24.23</b>	<b>Central User Manager queried for group "{0}" of type {1} and returned "{2}".</b>

24.24	Central User Manager queried for user "{0}" and returned "{1}".
24.25	Central User Manager queried for membership. User "{0}" {1} a member of "{2}".
24.26	Central User Manager found user "{0}" in "{1}" of type {2}.
24.27	Central User Manager searched for group "{0}" and returned "{1}".
24.28	Central User Manager searched for user "{0}" and returned "{1}".
24.39E	<b>Error while creating Integration Live user groups, tenantID : {0}. Error message: {1}. Stack trace: {2}</b>
<b>Explanation</b>	An unexpected error occurred while creating Integration Live user groups.
<b>Action</b>	Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
24.41	<b>Integration Live Manager addUserInGroup(), --&gt; group "{0}" reterived from UserManager for group id "{1}".</b>
24.42	<b>Integration Live Manager addUserInGroup(), --&gt; user "{0}" added into group "{1}".</b>
24.43	<b>Integration Live Manager updateUserInGroup(), --&gt; before update user "{0}", saml security token "{1}".</b>
24.44	<b>Integration Live Manager updateUserInGroup(), --&gt; after update user "{0}", saml security token "{1}".</b>
24.45	<b>Integration Live Container UserManager addUser(), SagSecurityToken --&gt; {0}.</b>
24.46	<b>Integration Live Container UserManager addUser(), tenantID: {0}.</b>

- 24.47            **Integration Live Container UserManager addUser(), user already present--> {0} but it got updated using this Assertion.**
  
- 24.48            **Integration Live Container UserManager addUser(), user added--> {0}.**
  
- 24.49            **Integration Live Container UserManager removeUser(), user--> {0}.**
  
- 24.50            **Integration Live Container UserManager removeUser(), user removed successfully--> {0}.**
  
- 24.51            **Integration Live Container UserManager getUser(), user not found --> {0}.**
  
- 24.52            **Integration Live Container UserManager addUserInGroup(), --> group "{0}" retrieved from UserManager.**
  
- 24.53            **Integration Live Container UserManager addUserInGroup(), --> user "{0}" added into group "{1}".**
  
- 24.54            **Integration Live Container UserManager addUserInGroup(), --> group "{0}" is not found so not adding to user {1}.**
  
- 24.55            **Integration Live Container UserManager addUserInGroup(), --> role "{0}" retrieved from UserManager.**
  
- 24.56            **Integration Live Container UserManager addUserInGroup(), --> user "{0}" added into role "{1}".**
  
- 24.57            **Integration Live Container UserManager addUserInGroup(), --> role "{0}" is not found so not adding to user {1}**
  
- 24.58            **Integration Live Container UserManager getUser(), userID: {0}.**

24.59	Integration Live Container UserManager getUser(), user found --> {0}.
25.67	Integration Server could not initialize the cluster. Stopping Integration Server initialization. Use the server log and error log to diagnose and correct the problem.
28.62	Unable to load keystores and truststores for package {0}.
28.63	Error in un-loading keystores and truststores for package {0}
35.5	Number of lines to display must be a non negative number. {0}.

68.29	{0}
68.30	{0}
7.5	Access Denied. User "{0}" in tenant {1} does not have permissions to access assets in package {2}.
71.12	EPRT command refused. The EPRT address {0} does not match the original host address {1}.
72.19	Using default html encoding for input: "{0}"
72.20	Exception occurred while initializing encoder {0}. Reason: {1}
72.21	Initialization of encoder "{0}" failed
72.22	Performing "{0}" encoding for input: "{1}". Output is: "{2}"
72.23	Failed to initialize the bundle for encoder "{0}"
72.24	Initialization of encoder "{0}" completed
75.9998	Unable to extract the password associated with the alias: {0}

- 76.35            A valid encoding is not available in the XML header {0}. Proceeding with the encoding value specified in `watt.server.xml.encoding = {1}`.
- 88.9443        One or more required Headers "{0}" are not present in the SOAP response.
- 95.27            The audit logging database does not populate the `CHAR_OCTET_LENGTH` field in its metadata. Integration Server cannot determine the maximum number of bytes for the `WMSERVICEACTIVITYLOG.FULLMESSAGE` and `WMSERVICECUSTOMFLDS.STRINGVALUE` columns. If the data inserted into these columns need to be truncated, they will be truncated based on the number of characters rather than the number of bytes. This may lead to `SQLExceptions` while writing to the audit log. To avoid this, use the `ALTER TABLE` command on your database to increase the size of these columns.
- 95.28            Audit Logging: The {0} has entered fail-fast mode.
- 95.29            Audit Logging: The {0} has exited fail-fast mode.
- 95.34            Audit Logging: Error occurred while reconnecting to session for messaging connection alias {0}; will retry after {1} seconds. Error message: {2}
- 95.35            Audit Logging: Starting monitor for creating session with messaging connection alias {0}; retry interval is {1} seconds.
- 95.36            Audit Logging: Attempting to reconnect to session for messaging connection alias {0}.
- 95.41            Skipping {0} audit log data. It is larger than {1} MB, the limit defined by `watt.server.diagnostic.logFiles.maxMB`.
- 96.11            The `DataStoreDBListener` has been notified of `SQLException`. The JDBC connection to {0} is still valid. Returning it to the pool.

- 96.20            creation of JDBC connection failed with exception : {0}
  
- 96.21            JDBC Connection pool is currently in Fail-Fast mode for pool {0}:{1}
  
- 96.22            {0} threads are waiting to get the JDBC Connection for pool {1}:{2}
  
- 96.23            Connection pool size is {0}, Available pool size is {1} for pool {2}:{3}. The Maximum connection is {4}
  
- 96.24            Created a new JDBC Connection for pool {0}:{1}. Connection pool size is {2}.
  
- 96.25            Got Exception for pool {0}:{1}. Exception details: {2}
  
- 96.26            Enter Fail-Fast mode for pool {0}:{1}.
  
- 96.27            Exit Fail-Fast mode for pool {0}:{1}.
  
- 96.28            Re-initializing the pool {0}:{1}.
  
- 96.29            Removed the connection from pool {0}:{1}. Connection pool size is {2}. Available pool size is {3}.
  
- 96.30            Released the connection to pool {0}:{1}. Connection pool size is {2}. Available pool size is {3}.
  
- 96.8             JDBC Connection pool threshold {0}, {1} available for pool {2}:{3}
  
- 96.9             JDBC Connection pool waiting threads threshold {0}, {1} threads waiting for connection for pool {2}:{3}

**ALREADY\_MARKED\_ROLLBACK** – tran was rolled back because tran was marked for rollback

**ANNOTATION\_FIELD\_DUPLICATE\_NAME** – {0} - {1} appears more than once in the document type

**ANNOTATION\_FIELD\_ENV** – {0} - {1} envelope field is not allowed as an annotation field

**ANNOTATION\_FIELD\_INVALID\_NAME** – {0} - {1} is not a valid Digital Event Services field name

**ANNOTATION\_FIELD\_NOT\_FOUND** – {0} - {1} field not found in document type

**ANNOTATION\_FIELD\_NOT\_VALID** – {0} - {1} field is invalid type

**ANNOTATION\_NSR\_NOT\_PUBLISHABLE** – Document type is not publishable

**ANNOTATION\_NSR\_NOT\_SPECIFIED** – Document type not specified

**APLog.string(APLog.AP\_CONNECTION\_TEST\_FAILED)** – Test of CentraSite connection failed.

**Explanation** An attempt was made to connect to CentraSite, but a connection could not be made.  
**Action** Check the connection parameters in Integration Server Administrator. Check the error log in both Integration Server and CentraSite.

**ART.0114.0002E** **Unable to get adapter type information. Internal error.**

**Explanation** An error occurred while fetching the list of supported services for a particular adapter.  
**Action** This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0003E** **Unable to get information about adapter type {0}.**

**Explanation** An error occurred while retrieving a service's localized deployment values (adapter name, adapter version, adapter JCA version) from the specified adapter's metadata.  
**Action** This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0114.0004E</b>	<b>Error getting available packages.</b>
<b>Explanation</b>	An error occurred while retrieving a list of packages available for node creation.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0005E</b>	<b>Error(s) during Adapter Runtime startup.</b>
<b>Explanation</b>	An error occurred during the initialization of the com.wm.pkg.art.AdapterRuntimeGlobals class.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0006E</b>	<b>Unable to initialize transaction manager. Transaction manager already initialized.</b>
<b>Explanation</b>	WmART has attempted to initialize the Transaction Manager twice.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0007E</b>	<b>Unable to get managed connection factories for adapter type {0}.</b>
<b>Explanation</b>	WmART was unable to obtain a list of connection factories for the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0008E</b>	<b>Unable to get the description and display name for connection type "{0}" of adapter type "{1}".</b>
<b>Explanation</b>	An error occurred while getting the display name and description for the specified connection/listener in the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0009E</b>	<b>Error(s) while registering adapter type {0}.</b>
<b>Explanation</b>	An error occurred while loading the specified adapter.
<b>Action</b>	This might be due to a connection that failed to initialize properly. Ensure that the adapter's connections can communicate with their respective resources. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0114.0010E</b>	<b>Error(s) while unregistering adapter type {0}.</b>
<b>Explanation</b>	An error occurred while shutting down the specified adapter's connection resources.
<b>Action</b>	This might be due to problems in one or more connections. Ensure that all adapter connections shut down properly when the adapter was unloaded.
<b>ART.0114.0011E</b>	<b>Error occurred while Adapter Runtime was loading an adapter type. Missing required input, "{0}".</b>
<b>Explanation</b>	The class name of an adapter was not present as the first item in the pipeline given to com.wm.pkg.art.deployment.Service.registerAdapterType.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0012E</b>	<b>Error occurred while Adapter Runtime was loading an adapter type. Unexpected adapter type object "{0}" for input "{1}".</b>
<b>Explanation</b>	The class name of the object passed to com.wm.pkg.art.deployment.Service.registerAdapterType is not derived from WmAdapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0013E</b>	<b>Error occurred while Adapter Runtime was loading adapter type "{0}".</b>
<b>Explanation</b>	An error occurred while loading the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0014E</b>	<b>Error occurred while Adapter Runtime was unloading an adapter type. Missing required input, "{0}".</b>
<b>Explanation</b>	The class name of an adapter was not present as the first item in the pipeline given to com.wm.pkg.art.deployment.Service.unregisterAdapterType.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0015E**      **Error occurred while Adapter Runtime was unloading an adapter type. Unexpected adapter type object "{0}" for input "{1}".**

**Explanation**      The class name of the specified object passed to com.wm.pkg.art.deployment.Service.unregisterAdapterType is not derived from WmAdapter.

**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0016E**      **Error occurred while Adapter Runtime was unloading adapter type "{0}".**

**Explanation**      An error occurred while loading the specified adapter.

**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0017E**      **Error occurred while registering XidFactory for adapter type "{0}".**

**Explanation**      WmART was unable to locate the Transaction Manager or Transaction ID Factory class for the specified adapter.

**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0018E**      **Unable to get XidFactories for adapter type "{0}".**

**Explanation**      WmART was unable to locate the class loader while retrieving the Transaction ID Factory map for the specified adapter.

**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0019E**      **Unable to get XidFactory {0} for XAResource {1} in adapter type "{2}".**

**Explanation**      WmART was unable to determine the corresponding XidFactory class for the specified XAResource class while loading the adapter.

**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0114.0020E</b>	<b>Error occurred while loading online help system for adapter type "{0}".</b>
<b>Explanation</b>	An error occurred while WmART was attempting to fetch the path to the specified adapter's online help file.
<b>Action</b>	Ensure that a help page key exists in your AdapterResourceBundle for ADKGLOBAL.RESOURCEBUNDLEKEY_LISTRESOURCES, ADKGLOBAL.RESOURCEBUNDLEKEY_LISTCONNECTIONTYPES, ADKGLOBAL.RESOURCEBUNDLEKEY_LISTPOLLINGNOTIFICATIONS, ADKGLOBAL.RESOURCEBUNDLEKEY_LISTPOLLINGNOTIFICATIONDETAILS, and ADKGLOBAL.RESOURCEBUNDLEKEY_ABOUT.
<b>ART.0114.0021E</b>	<b>Error occurred while loading copyright for adapter type "{0}".</b>
<b>Explanation</b>	Failed to read a third-party copyright file for the specified adapter.
<b>Action</b>	If you have explicitly specified ADKGLOBALS.RESOURCEBUNDLEKEY_THIRDPARTYCOPYRIGHTURL in the adapter's resource bundle, ensure that the file this key references is in the pub directory in the adapter's directory tree. Also ensure that this file is readable by Integration Server.
<b>ART.0114.0022E</b>	<b>Error in {0}. Missing or invalid parameter: {1}.</b>
<b>Explanation</b>	A value was not specified for the parameter of the specified method.
<b>Action</b>	If you explicitly invoked the specified method, check your parameter values and resubmit. Otherwise, look in the error log for related errors.
<b>ART.0114.0030E</b>	<b>Unable to create node {0} in the namespace.</b>
<b>Explanation</b>	WmART failed to create the specified connection or listener node in the namespace.
<b>Action</b>	The connection/listener information you provided in Integration Server Administrator is invalid, or perhaps duplicates an existing connection/listener in the same namespace. Refer to adjacent log entries for specifics.
<b>ART.0114.0031E</b>	<b>Unable to update node {0}. Package not found.</b>
<b>Explanation</b>	WmART attempted to save changes to the specified namespace node, but could not determine its package.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

- ART.0114.0032E**      **Unable to update resource {0}.**  
**Explanation**      An error occurred when updating a value in the specified namespace.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0114.0033E**      **Invalid folder name {0}.**  
**Explanation**      While creating a new connection node, a null folder name was passed to `com.wm.pkg.art.util.ServiceHelper.checkInterfaceName`.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0114.0034E**      **Unable to create folder {0}.**  
**Explanation**      WmART was unable to create the specified folder in the adapter's namespace.  
**Action**              Ensure that the folder name conforms to naming conventions in your server's local file system, and that Integration Server has permissions to create folders under the packages folder. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0114.0035E**      **Unable to create record for {0}.**  
**Explanation**      An error occurred in `ServiceHelper.createRecordFromBean` while creating an `NSRecord` from the specified object. Adjacent log messages might contain additional details.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0114.0036E**      **Unable to create folder for service {0}.**  
**Explanation**      An error occurred in `ServiceHelper.registerService` while creating the file system infrastructure for the specified adapter service. Adjacent log messages might contain additional details.  
**Action**              Ensure that the local operating system access permissions within the Integration Server packages folder will allow WmART to create folders and files dynamically.

---

<b>ART.0114.0037E</b>	<b>Unable to create service {0}.</b>
<b>Explanation</b>	An error occurred in ServiceHelper.registerService while registering the adapter service. Adjacent log messages might contain additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0038E</b>	<b>Unable to create flow {0}.</b>
<b>Explanation</b>	An error occurred in ServiceHelper.createFlowService. Adjacent log messages might contain additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0040E</b>	<b>Unable to create interaction input record.</b>
<b>Explanation</b>	An error occurred in RecordFactoryBridgeImpl.createInputRecord while creating a mapped Record. Adjacent log messages might contain additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0041E</b>	<b>Unable to create input record. createMappedRecord() returned {0}.</b>
<b>Explanation</b>	A call to RecordFactory.createMappedRecord returned an object of the specified class rather than a WmRecord or IDataCodable object.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0042E</b>	<b>Unable to convert interaction output record into IData. Output record is {0}.</b>
<b>Explanation</b>	RecordFactoryBridgeImpl.createOutputData was passed an instance of the specified class rather than a WmRecord, IData, or IDataCodable instance.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0050E**      **Unable to convert string to specific data type. The data type is not specified or the string value is null.**

**Explanation**      While configuring a new connection or listener, WmART detected that the type or value of one of the connection's properties is null.

**Action**              Ensure that you enter values for all required properties. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0051E**      **Unable to convert string to specific data type. Unsupported data type {0}.**

**Explanation**      You omitted a value when configuring a connection or listener property from Integration Server Administrator.

**Action**              Reconfigure the connection/listener, entering valid values for all properties on the Integration Server Administrator page.

**ART.0114.0053E**      **Unable to convert string array to specific data type array. The data type is not specified.**

**Explanation**      While configuring a new connection or listener, WmART detected that the type of a property array is null.

**Action**              This condition indicates a coding error in the adapter or the Adapter Runtime (WmART) itself. Ensure that the adapter is handling connection and listener properties correctly. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

**ART.0114.0054E**      **Unable to convert string array to specific data type array. Unsupported data type {0}.**

**Explanation**      The Adapter Runtime (WmART) has detected a property array in a connection or listener that has an unsupported data type.

**Action**              Change your connection/listener to use only supported data types for all properties.

**ART.0114.0055E**      **Unable to convert string array to data type {0} array.**

**Explanation**      An unexpected property array conversion error has occurred while configuring a connection or listener.

**Action**              This might be due to invalid data in a property array on the Integration Server Administrator page, such as non-numeric data in a numeric property. Reconfigure the connection/listener to ensure that the entered data matches the expected data types for all properties.

---

<b>ART.0114.0056E</b>	<b>Unable to convert string array to primitive int array.</b>
<b>Explanation</b>	A value has been entered in a connection or listener property array that cannot be converted to a Java int type.
<b>Action</b>	Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
<b>ART.0114.0057E</b>	<b>Unable to convert string array to primitive long array.</b>
<b>Explanation</b>	A value has been entered in a connection or listener property array that cannot be converted to a Java long data type.
<b>Action</b>	Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
<b>ART.0114.0058E</b>	<b>Unable to convert string array to primitive float array.</b>
<b>Explanation</b>	A value has been entered in a connection or listener property array that cannot be converted to a Java float type.
<b>Action</b>	Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
<b>ART.0114.0059E</b>	<b>Unable to convert string array to primitive double array.</b>
<b>Explanation</b>	A value has been entered in a connection or listener property array that cannot be converted to a Java double type.
<b>Action</b>	Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
<b>ART.0114.0060E</b>	<b>Unable to convert string array to primitive boolean array.</b>
<b>Explanation</b>	A value has been entered in a connection or listener property array that cannot be converted to a Java Boolean type.
<b>Action</b>	Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
<b>ART.0114.0061E</b>	<b>Unable to convert string array to primitive short array.</b>
<b>Explanation</b>	A value has been entered in a connection or listener property array that cannot be converted to a Java short type.
<b>Action</b>	Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.

- ART.0114.0062E**      **Unable to convert string array to primitive char array.**  
**Explanation**      A value has been entered in a connection or listener property array that cannot be converted to a Java char type.  
**Action**              Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
- ART.0114.0063E**      **Unable to convert string array to Integer array.**  
**Explanation**      A value has been entered in a connection or listener property array that cannot be converted to a Java integer instance.  
**Action**              Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
- ART.0114.0064E**      **Unable to convert string array to Long array.**  
**Explanation**      A value has been entered in a connection or listener property array that cannot be converted to a Java long instance.  
**Action**              Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
- ART.0114.0065E**      **Unable to convert string array to Float array.**  
**Explanation**      A value has been entered in a connection or listener property array that cannot be converted to a Java float instance.  
**Action**              Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
- ART.0114.0066E**      **Unable to convert string array to Double array.**  
**Explanation**      A value has been entered in a connection or listener property array that cannot be converted to a Java double instance.  
**Action**              Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
- ART.0114.0067E**      **Unable to convert string array to Boolean array.**  
**Explanation**      A value has been entered in a connection or listener property array that cannot be converted to a Java Boolean instance.  
**Action**              Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.

---

<b>ART.0114.0068E</b>	<b>Unable to convert string array to Short array.</b>
<b>Explanation</b>	A value has been entered in a connection or listener property array that cannot be converted to a Java short instance.
<b>Action</b>	Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
<b>ART.0114.0069E</b>	<b>Unable to convert string array to Character array.</b>
<b>Explanation</b>	A value has been entered in a connection or listener property array that cannot be converted to a Java character instance.
<b>Action</b>	Reconfigure the connection/listener to ensure that the data entered conforms to the expected data types for all properties.
<b>ART.0114.0072E</b>	<b>Unable to set JavaBean properties.</b>
<b>Explanation</b>	WmART has detected an error while setting the properties on a listener or listener notification bean.
<b>Action</b>	Ensure that the adapter's listener and listener notification implementations adhere to the JavaBean standard.
<b>ART.0114.0073E</b>	<b>Unable to set property {0} to value {1} on class {1}.</b>
<b>Explanation</b>	WmART failed to set the specified property on the specified (bean) class because it could not introspect the class.
<b>Action</b>	Ensure that the adapter's service template implementations adhere to the JavaBean standard. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0074E</b>	<b>Property {0} not found in class {1}.</b>
<b>Explanation</b>	After introspecting the specified class, WmART failed to find the specified property in that class.
<b>Action</b>	Ensure that the adapter's service template implementations support the JavaBean standard. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0114.0075U</b>	<b>Unable to set property descriptor.</b>
<b>Explanation</b>	WmART failed to introspect an unspecified bean.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0076E</b>	<b>Unable to set {0} to {1} because property is not writable.</b>
<b>Explanation</b>	WmART was unable to locate the "set" method for the specified property on a bean class. The property appears to be read only.
<b>Action</b>	Ensure that the adapter's service template implementations support the JavaBean standard. To make the specified property writable, implement a "set" method for it.
<b>ART.0114.0077E</b>	<b>Error while setting property {0} of class {1} to {2}.</b>
<b>Explanation</b>	An error occurred while setting the specified property on the specified class instance.
<b>Action</b>	Ensure that the adapter's service template implementations support the JavaBean standard. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0078E</b>	<b>Unable to get JavaBean properties for {0}.</b>
<b>Explanation</b>	An error occurred while reading the properties from the specified bean class.
<b>Action</b>	Ensure that the adapter's service template implementations support the JavaBean standard. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0081E</b>	<b>Unable to create instance of {0}.</b>
<b>Explanation</b>	WmART was unable to create a new instance of the specified class.
<b>Action</b>	Ensure that the adapter's service and notification template implementation classes expose a default public constructor and are not abstract. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0082E</b>	<b>Unable to get JavaBean property {0} of class {1}.</b>
<b>Explanation</b>	WmART failed to determine or invoke the "get" method for the property in the specified class.
<b>Action</b>	Ensure that the adapter's service template implementations support the JavaBean standard. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0114.0083E</b>	<b>Exception encountered attempting to load fix information for adapter type {0}.</b>
<b>Explanation</b>	The Adapter Runtime (WmART) failed while attempting to load the installed update information for the adapter.
<b>Action</b>	This error is generated when an exception is caught during execution. Check the error logs for information on the original exception.
<b>ART.0114.0084E</b>	<b>Missing or invalid value. {0} is not a valid value for field {1}.</b>
<b>Explanation</b>	An error occurred while validating the common values for a connection pool. The common values are settings, such as, Minimum Pool Size, Maximum Pool Size, etc.
<b>Action</b>	Change the invalid value. Then attempt to save and enable your connection.
<b>ART.0114.0201E</b>	<b>Unable to introspect "{0}". This service introspects the parameters of connection only.</b>
<b>Explanation</b>	WmART failed to create a WmManagedConnectionFactory instance from the specified class name. The current WmART implementation does not allow this condition to occur.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0202E</b>	<b>Failure when introspecting the connection properties.</b>
<b>Explanation</b>	An error occurred while introspecting connection properties. Additional details are logged.
<b>Action</b>	Check adjacent log messages for specific error details. Correct any problems with your connection metadata. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0203E</b>	<b>Unable to introspect "{0}"</b>
<b>Explanation</b>	The Adapter Runtime (WmART) failed to create an instance of an adapter service, notification, or listener from the specified class name.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0114.0204E</b>	<b>Unable to introspect the parameters of service template.</b>
<b>Explanation</b>	An error occurred while attempting to introspect a template or listener. Additional details are logged.
<b>Action</b>	Ensure that the adapter's implementation .class files are installed properly under the packages folder. If you modify the .class files for the adapter while the Integration Server is running, you must reload that adapter.
<b>ART.0114.0205E</b>	<b>Unable to lookup the resource domain values.</b>
<b>Explanation</b>	This is a general processing error message. Details should appear in adjacent log messages.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0114.0206E</b>	<b>Connection alias was not specified in "{0}".</b>
<b>Explanation</b>	The connection, adapter, or listener could not be found in the request to the specified method.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0207E</b>	<b>The connection alias "{0}" does not support webMethods metadata extensions. The adapter could be a third-party adapter.</b>
<b>Explanation</b>	The specified connection alias is not derived from com.wm.adk.cci.connection.WmConnection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0208E</b>	<b>The connection alias "{0}" isn't configured or failed.</b>
<b>Explanation</b>	WmART failed to create a ConnectionDataNode instance based on the specified connection alias.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0114.0209E</b>	<b>Cannot get the connection instance of connectionAlias "{0}".</b>
<b>Explanation</b>	An error occurred while creating a WmConnection instance from the specified connection alias. Additional details are provided in adjacent log messages.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0213E</b>	<b>Cannot get the listener instance of listenerNode "{0}".</b>
<b>Explanation</b>	The method getListenerAdapterMetadata in com.wm.pkg.art.metadata.ConnectionMetadataService failed to locate and create a listener object for the specified listener node.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0216E</b>	<b>Unable to validate the resource domain value.</b>
<b>Explanation</b>	An error occurred while validating a resource domain. This is a general processing error message. Details should appear in adjacent log messages.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0114.0218E</b>	<b>Failure when introspecting the parameters of the notification listener.</b>
<b>Explanation</b>	WmART failed to lookup a resource domain. Additional details should appear in adjacent log messages.
<b>Action</b>	Ensure that the adapter's implementation(s) of WmNotification.fillWmTemplateDescriptor sets resource domains correctly.
<b>ART.0114.0219E</b>	<b>Failure when validating the resource domain "{0}". Null checkValues returned.</b>
<b>Explanation</b>	WmART was unable to locate internal check values for the specified resource domain.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0220E</b>	<b>Error occurred when closing the connection handle.</b>
<b>Explanation</b>	An error occurred when closing a connection. Additional details are logged.
<b>Action</b>	Ensure that the connection is configured properly and is able to communicate with the back-end resource. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

- ART.0114.0221E**      **No adapter type name specified in "{0}".**  
**Explanation**      The specified method in com.wm.pkg.art.metadata.ConnectionMetadataService failed to retrieve connection metadata because no adapter name was provided.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0114.0222E**      **No class name of WmManagedConnectionFactory specified in "{0}".**  
**Explanation**      The specified method in com.wm.pkg.art.metadata.ConnectionMetadataService failed to retrieve connection metadata because no connection factory class name was provided.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0114.0225E**      **Cannot get the connection handle of "{0}".**  
**Explanation**      WmART failed to create a WmConnection instance based on the specified connection alias.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0114.0226E**      **No class name of service template specified in "{0}".**  
**Explanation**      The specified method failed to retrieve metadata from an adapter template, notification template, or listener because no service class was provided in the request.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0114.0227E**      **No resource domain name specified in "{0}".**  
**Explanation**      The specified method failed because no resource domain was provided in the request.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0114.0228E</b>	<b>No statement specified in "{0}".</b>
<b>Explanation</b>	The specified method in <code>com.wm.pkg.art.metadata.InteractionMetadataService</code> failed because the <code>AdapterRuntimeGlobals.STATEMENT</code> value was not provided in the request.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0230E</b>	<b>Unable to get the list of service template metadata.</b>
<b>Explanation</b>	The method <code>getInteractionAdapterMetadataList</code> in <code>com.wm.pkg.art.metadata.InteractionMetadataService</code> failed because the list of service templates supported by a connection was not provided in the request.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0231E</b>	<b>Unable to get the list of notification template metadata.</b>
<b>Explanation</b>	An error occurred in <code>com.wm.pkg.art.metadata.InteractionMetadataService.getNotificationAdapterMetadataList</code> . This is a general processing error message. Details should appear in adjacent log messages.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0114.0232E</b>	<b>Unable to get the adapter type "{0}".</b>
<b>Explanation</b>	The method <code>getConnectionAdapterMetadata</code> in <code>com.wm.pkg.art.metadata.ConnectionMetadataService</code> was unable to create a <code>WmAdapterType</code> instance using the specified adapter name.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0233E</b>	<b>Unable to get the connection type "{0}".</b>
<b>Explanation</b>	The method <code>getConnectionAdapterMetadata</code> in <code>com.wm.pkg.art.metadata.ConnectionMetadataService</code> was unable to create a connection factory using the specified class name.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0114.0234E</b>	<b>Unable to get a connection for resource "{0}".</b>
<b>Explanation</b>	WmART failed to create a WmConnection instance based on the specified connection alias.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0235E</b>	<b>Error in {0}. Missing parameter: {1}.</b>
<b>Explanation</b>	The method in com.wm.pkg.art.metadata.InteractionMetadataService failed to retrieve notification metadata because the specified request parameter was missing.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0236E</b>	<b>The connectionAlias or listenerNodeName must be specified.</b>
<b>Explanation</b>	The method in com.wm.pkg.art.metadata.InteractionMetadataService failed to lookup/validate notification values because neither the connection node alias nor the listener node was provided in the request.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0237E</b>	<b>Value for parameter missing: {0}.</b>
<b>Explanation</b>	The operation input requires the metadata parameter listed in the message text, but the value was not provided.
<b>Action</b>	Add the metadata property and a value to the operation inputs and resubmit.
<b>ART.0114.0238E</b>	<b>Value for parameter {0} does not match data type {1}.</b>
<b>Explanation</b>	The value submitted with the operation input does not match the metadata parameter listed in the message text.
<b>Action</b>	Change the type of the value for the operation and resubmit.
<b>ART.0114.0239E</b>	<b>Number of fields does not match number of types in a record definition.</b>
<b>Explanation</b>	The operation input requires a field type and a field name for each output field specification.
<b>Action</b>	Ensure that the number of entries in the array of values for the field names and field types are equal and resubmit.

---

<b>ART.0114.0240E</b>	<b>Parameter missing: {0}.</b>
<b>Explanation</b>	The operation input is missing the required parameter listed in the message text.
<b>Action</b>	Ensure that the input contains an entry for the parameter and resubmit.
<b>ART.0114.0241E</b>	<b>Unrecognized parameter {0} specified.</b>
<b>Explanation</b>	The operation input contains the parameter listed in the message text, which is not defined for this template.
<b>Action</b>	Remove the parameter from the operation input and resubmit.
<b>ART.0114.0242E</b>	<b>Required parameter "{0}" is missing, or has no value.</b>
<b>Explanation</b>	The operation is missing a required parameter.
<b>Action</b>	Provide the missing parameter value, and resubmit the operation.
<b>ART.0114.0243E</b>	<b>Failed to run {0} service. Details provided in error log.</b>
<b>Explanation</b>	An exception was caught while executing the service.
<b>Action</b>	Look in the error log for details on the original exception.
<b>ART.0114.0244E</b>	<b>Resource domain "{0}" is not recognized by provider "{1}".</b>
<b>Explanation</b>	The specified resource domain is not registered for the template.
<b>Action</b>	This error should only be encountered while using the webMethods ADK for adapter development. If you are developing an adapter, ensure that the specified resource domain is registered for your template. If you are not developing an adapter, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0245E</b>	<b>Failed to update IO properties in template "{0}"</b>
<b>Explanation</b>	An exception was caught while updating IO properties in the specified template.
<b>Action</b>	Look in the error log for details on the original exception.
<b>ART.0114.0300</b>	<b>Unable to start transaction {0}.</b>
<b>Explanation</b>	An error occurred during the initiation of a transaction.
<b>Action</b>	Make sure that there is connectivity to the adapter backend, and that the connection associated with the transaction is enabled.

<b>ART.0114.0301E</b>	<b>Unable to commit transaction. A transaction name must be specified.</b>
<b>Explanation</b>	WmART failed to determine the name of a transaction.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0302E</b>	<b>Error while committing transaction {0}. The transaction in progress is {1}.</b>
<b>Explanation</b>	The transaction name does not match the specified connection state.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0303E</b>	<b>Unable to commit transaction.</b>
<b>Explanation</b>	An error occurred while committing a transaction.
<b>Action</b>	If the adapter uses a connection that supports LocalTransaction, ensure that it is implemented properly. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0304E</b>	<b>Unable to rollback transaction. A transaction name must be specified.</b>
<b>Explanation</b>	WmART failed to determine the name of a transaction.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0305E</b>	<b>Error while rolling back transaction {0}. The transaction in progress is {1}.</b>
<b>Explanation</b>	The specified transaction name does not match the specified connection state.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0306E</b>	<b>Unable to rollback transaction.</b>
<b>Explanation</b>	An error occurred while committing a transaction.
<b>Action</b>	If the adapter uses a connection that supports LocalTransaction, ensure that it is implemented properly. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0114.0307E</b>	<b>Retryable Error during commit transaction.</b>
<b>Explanation</b>	An unexpected system error occurred while committing a transaction. The transaction can be re-tried.
<b>Action</b>	Ensure that the back-end resource for the transaction can be reached from the server and is in a valid state. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0350E</b>	<b>Unable to set transaction timeout to {0} seconds.</b>
<b>Explanation</b>	WmART has detected that an XAResource failed to set the transaction timeout to the specified number of seconds.
<b>Action</b>	Verify that the back-end resource for the transaction can be reached from the server and is in a valid state. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0351E</b>	<b>Unable to create Transaction Manager.</b>
<b>Explanation</b>	WmTransactionManagerFactory failed to create a TransactionManager.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0352E</b>	<b>Unable to create Transaction Manager with transaction timeout set to {0} seconds.</b>
<b>Explanation</b>	WmTransactionManagerFactory failed to create a TransactionManager with the specified number of timeout seconds.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0353E</b>	<b>Unable to set transaction timeout. Invalid timeout value {0}.</b>
<b>Explanation</b>	com.wm.pkg.art.transaction.Service.setTransactionTimeout could not cast the specified object to type Integer.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0114.0700E</b>	<b>Errors occurred in cluster coordination repository access for {0}.</b>
<b>Explanation</b>	An exception was caught during processing.
<b>Action</b>	Look in the error log for details on the original exception.
<b>ART.0114.0701E</b>	<b>Unable to retrieve ART instance/session ID.</b>
<b>Explanation</b>	The Adapter Runtime (ART) session ID failed to initialize.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.0702E</b>	<b>Errors occurred attempting to stop {0}. See error log for details.</b>
<b>Explanation</b>	An exception was caught when attempting to stop the notification.
<b>Action</b>	Look in the error log for details on the original exception.
<b>ART.0114.0703E</b>	<b>Errors occurred attempting to confirm cluster member. See error log for details.</b>
<b>Explanation</b>	An exception was caught trying to validate Adapter Runtime (ART) cluster members.
<b>Action</b>	Look in the error log for details on the original exception.
<b>ART.0114.0704E</b>	<b>Internal Error-assert failed - node: {0}, detail:{1}.</b>
<b>Explanation</b>	An unexpected exception occurred during processing.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, error logs with the stack trace exposed, and the detail in this error message.
<b>ART.0114.0705E</b>	<b>Errors occurred attempting to start {0}. See error log for details.</b>
<b>Explanation</b>	An exception was caught when attempting to start the notification.
<b>Action</b>	Look in the error log for details on the original exception.
<b>ART.0114.0707E</b>	<b>"{0}" is an invalid setting for the cluster coordination mode of {1}. Valid values: {2}.</b>
<b>Explanation</b>	An unsupported mode was encountered.
<b>Action</b>	Change the mode to one of the supported settings, and restart the notification.

<b>ART.0114.0708E</b>	<b>{0} is an invalid setting for max process time of {1}. Value must be an number between {2} and {3}.</b>
<b>Explanation</b>	An invalid maximum process time was encountered for the notification.
<b>Action</b>	Change the maximum process time to a value within the specified range, and restart the notification.
<b>ART.0114.0709E</b>	<b>{0} is an invalid setting for max setup time of {1}. Value must be an number between {2} and {3}.</b>
<b>Explanation</b>	An invalid maximum setup time was encountered for the notification.
<b>Action</b>	Change the maximum setup time to a value within the specified range, and restart the notification.
<b>ART.0114.0710E</b>	<b>Adapter cluster properties files are not the same across the cluster. Please synchronize all cluster properties files and restart servers.</b>
<b>Explanation</b>	The Adapter Runtime encountered inconsistent cluster property files.
<b>Action</b>	Ensure the cluster property files are the same for the adapter on each clustered Integration Server.
<b>ART.0114.0711E</b>	<b>Notification {0} was unexpectedly removed from cluster.</b>
<b>Explanation</b>	Another instance of this notification erroneously determined that this current instance failed. The current instance was removed.
<b>Action</b>	Check the logs on other servers in the cluster. A log on one of the servers will include message 1405, which indicates that this instance was removed. Check clock synchronization and network connectivity between the two servers.
<b>ART.0114.0712E</b>	<b>Operation failed because notification {0} was unexpectedly removed from cluster.</b>
<b>Explanation</b>	Another instance of this notification erroneously determined that this current instance failed. The current instance was removed. Note that this error is similar to ART.0114.0711E; however, in this case the node was changing states.
<b>Action</b>	Check the logs on other servers in the cluster. A log on one of the servers will include message 1405, which indicates that this instance was removed. Check clock synchronization and network connectivity between the two servers.
<b>ART.0114.1004E</b>	<b>Parameter parsing error.</b>
<b>Explanation</b>	WmART attempted to encrypt or decrypt a null string value.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0114.1005E</b>	<b>Parameter parsing error.</b>
<b>Explanation</b>	WmART failed to encrypt a string value.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.1006E</b>	<b>Parameter parsing error.</b>
<b>Explanation</b>	WmART failed to decrypt a string value.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.1008D</b>	<b>Jar file {0} is not an update jar file. Unable to read the {1} entry.</b>
<b>Explanation</b>	This message applies to adapters that use update jar files to deliver updates. The update.cnf file is not readable in the update jar file.
<b>Action</b>	No action is required.
<b>ART.0114.1009D</b>	<b>Jar file {0} is not an update jar file. It does not contain the {1} entry.</b>
<b>Explanation</b>	This message applies to adapters that use update jar files to deliver updates. The update.cnf file is missing from the update jar file.
<b>Action</b>	No action is required.
<b>ART.0114.1010D</b>	<b>File {0} is not an update file. It is not a jar file.</b>
<b>Explanation</b>	This message applies to adapters that use update jar files to deliver updates. A file was found in the adapters update directory that is not a jar file.
<b>Action</b>	No action is required.
<b>ART.0114.1011D</b>	<b>Error initializing UpdateFile. Missing required parameter.</b>
<b>Explanation</b>	This message applies to adapters that use update jar files to deliver updates. A null value was supplied for the file name parameter. A value is required.
<b>Action</b>	No action is required.

---

<b>ART.0114.1012D</b>	<b>No updates found for adapter: {0}.</b>
<b>Explanation</b>	No installed updates were found for the adapter.
<b>Action</b>	No action is required.
<b>ART.0114.1013E</b>	<b>Unable to locate the package name for adapter: {0}.</b>
<b>Explanation</b>	The Integration Server package name for the adapter could not be determined.
<b>Action</b>	Ensure the adapter package depends on the WmART package, and reload the adapter package.
<b>ART.0114.1014W</b>	<b>Adapter {0} is missing required fix {1}.</b>
<b>Explanation</b>	This message applies to adapters that use update jar files to deliver updates. A fix required by the adapter was not found.
<b>Action</b>	Install the required fix, and reload the adapter.
<b>ART.0114.1015E</b>	<b>Error loading update jar file {0}. An exception was encountered loading the {1} file.</b>
<b>Explanation</b>	This message applies to adapters that use update jar files to deliver updates. An exception occurred trying to load the update.cnf file in the update jar.
<b>Action</b>	Look in the error log for details on the original exception.
<b>ART.0114.1016E</b>	<b>Error loading update jar file {0}. The {1} file is missing the required property updateName.</b>
<b>Explanation</b>	This message applies to adapters that use update jar files to deliver updates. The update.cnf file associated with the fix is missing a required value.
<b>Action</b>	Re-apply the fix, and reload the adapter.
<b>ART.0114.1017E</b>	<b>Error loading update jar file {0}. The update name contains the illegal character ';'.</b>
<b>Explanation</b>	This message applies to adapters that use update jar files to deliver updates. The fix name in the update.cnf file contains an illegal semicolon (;) character.
<b>Action</b>	Re-apply the fix, and reload the adapter.
<b>ART.0114.1018E</b>	<b>Error loading update information. The '{0}' tag is missing.</b>
<b>Explanation</b>	The fix name is missing.
<b>Action</b>	Re-apply the fix, and reload the adapter.

<b>ART.0114.1019E</b>	<b>Illegal value is set for page size in watt.art.page.size - "{0}".</b>
<b>Explanation</b>	An invalid value was specified for the watt.art.page.size parameter. This parameter must be a positive integer greater than or equal to 1.
<b>Action</b>	Set the value of watt.art.page.size to an integer greater than or equal to 1.
<b>ART.0114.1020</b>	<b>Error while storing/retrieving/removing the password for the connection "{0}".</b>
<b>Explanation</b>	An error occurred while storing, retrieving or removing the password for the connection from the Integration Server passman store. The error can occur when creating, updating, or deleting an adapter connection respectively.
<b>Action</b>	Make sure that the latest fix is installed on Integration Server. Try to restart Integration Server and perform the operation again. Also, make sure that the package containing the connection is imported properly into Integration Server.
<b>ART.0114.1103E</b>	<b>Facility {0} - {1} error. Log handler not found.</b>
<b>Explanation</b>	WmART failed to get a Log Handler from the Integration Server for the specified facility.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.1105E</b>	<b>No LogProducer for facility {0} - {1}.</b>
<b>Explanation</b>	WmART attempted to log a message, but no Log Producer exists for the specified facility.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.1106E</b>	<b>Facility {0} - {1} error. No facilities registered.</b>
<b>Explanation</b>	WmART failed to get the list of facility codes from the Log Handler.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.1112E</b>	<b>Unable to instantiate class {1} in adapter {0}. See error log for details.</b>
<b>Explanation</b>	An exception occurred trying to instantiate a template for the adapter.
<b>Action</b>	Ensure package dependencies are set correctly, and reload the adapter

<b>ART.0114.1113E</b>	<b>Class {0} is not a Service or Notification template class.</b>
<b>Explanation</b>	An invalid class was registered as a template.
<b>Action</b>	If you are using the webMethods ADK to develop an adapter, ensure your class is properly registered and coded to be a template. If this message is being issued from a webMethods adapter, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0114.1401W</b>	<b>Coordination data for {0} is invalid. Coordination will revert to a default state.</b>
<b>Explanation</b>	Coordination data in the repository was not valid. If the server was recently upgraded, this might simply represent a change in record formats, and the operation you are performing will automatically correct the data for you. If you have not recently upgraded or the problem persists, it is likely that the repository is corrupted.
<b>Action</b>	If you recently performed a server upgrade, no action is required. If you have not recently upgraded or the problem persists, check repository logs for errors.
<b>ART.0114.1405W</b>	<b>Processing for {0} on server {1} has timed-out or failed. Local instance will take over.</b>
<b>Explanation</b>	Remote failure detected.
<b>Action</b>	Check logs on indicated server for messages ART.0114.0711E or ART.0114.0712E. If the messages are in the log, refer to those error messages for a resolution. If the messages do not appear in the logs, no action is required.
<b>ART.0114.1407W</b>	<b>Illegal overlap occurred in node {0}. Please verify clock synchronization with cluster member '{1}'</b>
<b>Explanation</b>	An illegal overlap exception was detected.
<b>Action</b>	Ensure the clocks are synchronized for all Integration Servers in the cluster.
<b>ART.0114.1411E</b>	<b>Unable to access {0} file for adapter "{1}". Please check the file permissions. Running with default configuration.</b>
<b>Explanation</b>	The cluster property file could not be read.
<b>Action</b>	Ensure the cluster property file exists and is readable for the specified adapter.
<b>ART.0114.1412E</b>	<b>Unable to parse {0} file for adapter "{1}". Please correct file format. Running with default configuration.</b>
<b>Explanation</b>	The cluster property file could not be parsed.
<b>Action</b>	Validate the cluster property file format for the specified adapter.

**ART.0114.1415E**      **An internal error occurred while rendering cluster settings for adapter {0}. Updated settings will not be persisted.**

**Explanation**      The settings could not be saved to the cluster property file.

**Action**             Ensure the directory and the cluster file are writable.

**ART.0114.1416E**      **Error attempting to save cluster settings for adapter {0}. Error {1}**

**Explanation**      An exception occurred trying to save the cluster settings.

**Action**             Look in the error log for details on the original exception.

**ART.0114.1418W**      **Illegal overlap occurred in node {0}. Please increase setup timeout. Current setting: {1}, actual time: {2} seconds**

**Explanation**      The requested operation took longer than the allotted time; the operation had no other errors.

**Action**             Increase the node's timeout value as indicated by the actual time.

**ART.0114.1419W**      **Illegal overlap occurred in node {0}. Please increase execute timeout. Current setting: {1}, actual time: {2} seconds**

**Explanation**      A polling operation took longer than the allotted time; the polling operation had no other errors.

**Action**             Increase the node's timeout value as indicated by the actual time.

**ART.0114.3139E**      **EventType Definition doesnt exists in the EventTypeStore for notification : {0}.**

**Explanation**      Event Type Definition is not present in the same namespace for the notification in the Event Type Store.

**Action**             Create an event type definition for the notification and manually copy it to the Event Type Store.

**ART.0115.3202E**      **Listener error releasing connection for {0}. Error: {1}.**

**Explanation**      An error occurred while closing the connection associated with the specified listener.

**Action**             This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0115.3203E</b>	<b>Error creating listener object: Null argument on init call.</b>
<b>Explanation</b>	The method <code>WmNotificationListener.initListenerNodeProperties</code> was passed a null <code>ListenerNode</code> instance.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3204E</b>	<b>Error creating listener object: NSName null.</b>
<b>Explanation</b>	The method <code>WmNotificationListener.initListenerNodeProperties</code> was unable to derive the name of a listener node from the <code>ListenerNode</code> instance.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3207E</b>	<b>Illegal event type received: {0}.</b>
<b>Explanation</b>	The method <code>WmNotificationListener.doNotify</code> was passed the specified invalid event ID.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3208E</b>	<b>Error during listener event. Error: {0}.</b>
<b>Explanation</b>	An error occurred while processing a listener event. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3209E</b>	<b>Error creating listener object {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred creating the specified listener or initializing its properties.
<b>Action</b>	Ensure that the listener and its properties are configured correctly. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0115.3211E</b>	<b>Existing transaction rolled back before execution of {0}.</b>
<b>Explanation</b>	WmART detected an incomplete transaction for the specified listener prior to executing it. The transaction has been rolled back.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3212E</b>	<b>Listener error during execution of {0}. Error: {1} rolling back existing transaction.</b>
<b>Explanation</b>	WmART detected an incomplete transaction for the specified listener prior to executing it. WmART attempted to rollback the transaction, but failed. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3213E</b>	<b>Listener error during execution of {0}. Error: {1} checking transaction.</b>
<b>Explanation</b>	WmART failed to determine whether the specified listener has an open transaction. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3214E</b>	<b>Listener {0} not Found.</b>
<b>Explanation</b>	WmART failed to lookup the specified listener.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3215E</b>	<b>Unable to create listener {0}. Listener node already exists.</b>
<b>Explanation</b>	There was an attempt to create a duplicate listener node.
<b>Action</b>	Enter a new listener node name that is unique to its folder.
<b>ART.0115.3217E</b>	<b>Error creating listener object: {0}. Invalid package name: {1}.</b>
<b>Explanation</b>	ListenerManager.createListener failed to create an instance of the listener because it could not find the package name in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0115.3218E</b>	<b>Error creating listener object: {0}. Invalid node name.</b>
<b>Explanation</b>	ListenerManager.createListener failed to create an instance of the listener because the specified node name is missing or invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3219E</b>	<b>Error creating listener object: {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred while creating the listener. This might be due to an invalid listener node name. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3220E</b>	<b>Unable to get list of listener types supported by node {0}.</b>
<b>Explanation</b>	An error occurred in ListenerManager.queryListenerTemplatesSupported for the specified adapter. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3221E</b>	<b>Unable to get listener node properties {0}.</b>
<b>Explanation</b>	An error occurred while querying the specified listener's properties. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3223E</b>	<b>Unable to update listener {0}: Error: {1}.</b>
<b>Explanation</b>	An error occurred while updating the specified listener's properties. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0115.3225E</b>	<b>Unable to delete listener {0}: Error: {1}.</b>
<b>Explanation</b>	An error occurred while deleting the specified listener. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3226E</b>	<b>Unable to copy listener {0}: Error: {1}.</b>
<b>Explanation</b>	An error occurred while copying the specified listener. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3227E</b>	<b>Unable to copy listener. Error: Source nodeName is required.</b>
<b>Explanation</b>	The method ListenerManager.copyAdapterListener failed because the source listener node name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3228E</b>	<b>Unable to copy listener {0}. Error: newNodeName is required.</b>
<b>Explanation</b>	The method ListenerManager.copyAdapterListener failed because the destination listener node name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3229E</b>	<b>Unable to copy listener {0}. Error: publishableDocumentName is required.</b>
<b>Explanation</b>	The method ListenerManager.copyAdapterListener failed because the destination listener publishable document name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0115.3230E</b>	<b>Unable to copy listener {0}. Error: newPkg is required.</b>
<b>Explanation</b>	The method ListenerManager.copyAdapterListener failed because the destination listener node package name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3231E</b>	<b>Unable to copy listener {0} to {1}. Error: Unable to get source listener node.</b>
<b>Explanation</b>	The method ListenerManager.copyAdapterListener failed because the source listener node name is invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3232E</b>	<b>Unable to copy listener {0}. Error: New name already exists {1}.</b>
<b>Explanation</b>	The method ListenerManager.copyAdapterListener failed because the specified destination listener node name already exists in the package.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3235E</b>	<b>Unable to rename listener {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred while renaming the specified listener. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3236E</b>	<b>Unable to find listener {0}.</b>
<b>Explanation</b>	The method ListenerManager.queryListenerStatistics failed because it could not locate the specified listener node.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0115.3237E</b>	<b>Unable to get listener {0}. Error: Listener class name is not specified.</b>
<b>Explanation</b>	The method ListenerNode.getListener failed because it could not locate the WmConnectedListener implementation class name.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3238E</b>	<b>Error in Listener Callback:{0} notification {1}.</b>
<b>Explanation</b>	An error occurred while processing a listener notification event for the specified listener. If there is a callback name in the error message, it corresponds to the notification event.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3239E</b>	<b>Missing required parameter on service: {0}</b>
<b>Explanation</b>	The specified parameter is not present in the pipeline. This is an internal error.
<b>Action</b>	Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3240E</b>	<b>Unable to retrieve listener data. No listener name specified.</b>
<b>Explanation</b>	The method ARTAdmin.retrieveListenerData failed because no listener was present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3241E</b>	<b>Error retrieving listener: {0}. Error: {1}</b>
<b>Explanation</b>	An error occurred while retrieving information about the listener. Refer to the error text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0115.3242E</b>	<b>Unable to get listener properties for adapter: {0}, listener type: {1}.</b>
<b>Explanation</b>	An error occurred while retrieving properties of the listener in the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3243E</b>	<b>Error retrieving listeners. Missing parameter: {0}</b>
<b>Explanation</b>	The method ARTAdmin.retrieveListeners failed because the adapter name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3244E</b>	<b>Error setting listener status. Missing parameter: {0}</b>
<b>Explanation</b>	The method ARTAdmin.setListenerStatus failed because the listener name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3245E</b>	<b>Error retrieving listener types. Missing parameter: {0}</b>
<b>Explanation</b>	The method ARTAdmin.retrieveListenerTypes failed because the adapter name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3246E</b>	<b>Error retrieving listener types. Error: {0}</b>
<b>Explanation</b>	An error occurred while retrieving the listener types supported by an adapter. Refer to the error text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0115.3247E</b>	<b>Error deleting listener. Missing parameter: {0}</b>
<b>Explanation</b>	The method ARTAdmin.deleteListener failed because the listener name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3248E</b>	<b>Error deleting listener: {0}. Unable to find the node.</b>
<b>Explanation</b>	The method ARTAdmin.deleteListener failed because the specified listener node name is invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3249E</b>	<b>Error deleting listener: {0}.</b>
<b>Explanation</b>	An error occurred while deleting the specified listener. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3250E</b>	<b>Error setting properties for listener: {0}.</b>
<b>Explanation</b>	An error occurred while setting the properties of the specified listener. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3251E</b>	<b>Invalid listener node name: {0}.</b>
<b>Explanation</b>	The specified listener name is missing or invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0115.3252E</b>	<b>Unable to commit transaction for listener {0}. Error: {1}.</b>
<b>Explanation</b>	WmNotificationListener failed to commit a transaction for the specified listener. Refer to the error text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3253E</b>	<b>Listener {0} did not process notification.</b>
<b>Explanation</b>	The listener received a notification and was unable to find a listener notification to process it.
<b>Action</b>	Check to ensure that the listed listener has listener notifications registered with it and that at least one of them is enabled.
<b>ART.0115.3255E</b>	<b>Unable to start listener: {0}. Cannot retrieve connection from connection node: {1}</b>
<b>Explanation</b>	The listener requires a connection to start. The startup processing could not get a connection from the listed connection node.
<b>Action</b>	Check to ensure that the listed connection is enabled. If the connection is pooled, increase the maximum connections allowed in the pool.
<b>ART.0115.3256E</b>	<b>Unable to start listener: {0}. Error: {1}</b>
<b>Explanation</b>	An unexpected exception occurred while trying to enable a notification.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception.
<b>ART.0115.3257E</b>	<b>Exceeded max retries. Shutting down listener {0}. Error: {1}</b>
<b>Explanation</b>	A retryable error occurred while attempting to execute the listener. The maximum number of retries is exceeded.
<b>Action</b>	Check the Integration Server error log for details on the retryable exception. Correct the error and try to enable the listener.
<b>ART.0115.3258E</b>	<b>Fatal error in listener {0}. See error log for details</b>
<b>Explanation</b>	An unexpected exception occurred during listener operation.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception.

<b>ART.0115.3259E</b>	<b>Unable to enlist connection transactional resource</b>
<b>Explanation</b>	An unexpected exception occurred while trying to start a transaction within the listener.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception. If no related exceptions are found, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0115.3260E</b>	<b>Unable to commit transaction for listener {0}. Listener disabled</b>
<b>Explanation</b>	An unexpected exception occurred while trying to commit a transaction within the listener.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception.
<b>ART.0115.3261E</b>	<b>Connection Node {0} not enabled.</b>
<b>Explanation</b>	An error occurred while trying to retrieve a connection for the listener.
<b>Action</b>	Check to ensure the connection is enabled and restart the listener.
<b>ART.0115.3262E</b>	<b>Fatal error initiating transaction in listener {0}. See error log for details</b>
<b>Explanation</b>	An unexpected exception occurred while trying to start a transaction within the listener.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception.
<b>ART.0115.3263E</b>	<b>Connection error while retrieving metadata in listener {0}. See error log for details</b>
<b>Explanation</b>	An error occurred while trying to retrieve a connection for the listener.
<b>Action</b>	Check to ensure the connection is enabled. Check the Integration Server error log for more information about the connection error.
<b>ART.0115.3264E</b>	<b>Unable to stop listener: {0}. Error: {1}</b>
<b>Explanation</b>	An unexpected exception occurred while trying to stop the listener.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception.
<b>ART.0115.3265E</b>	<b>Errors occurred. {0} listeners were not suspended. See error log for details.</b>
<b>Explanation</b>	While attempting to suspend all listeners, some of the listeners reported errors.
<b>Action</b>	Look in the error log for details on the specific exceptions.

---

<b>ART.0115.3266E</b>	<b>Errors occurred. {0} listeners were not enabled. See error log for details.</b>
<b>Explanation</b>	While attempting to enable all suspended listeners, some of the listeners reported errors.
<b>Action</b>	Look in the error log for details on the specific exceptions.
<b>ART.0115.3267E</b>	<b>Cannot update adapter-defined settings in suspended listener {0}.</b>
<b>Explanation</b>	The user attempted to update adapter-defined settings for a listener; however, the listener is currently suspended.
<b>Action</b>	Disable the listener, and retry the operation.
<b>ART.0115.3268E</b>	<b>{0} is in an invalid state for requested operation.</b>
<b>Explanation</b>	The user attempted an operation on a listener; however, the listener was not in the proper state for the operation.
<b>Action</b>	Change the state of the listener to an acceptable state, and retry the operation.
<b>ART.0115.3269E</b>	<b>Unable to complete update. Setting connection for listener {0} is not supported.</b>
<b>Explanation</b>	The user attempted to change the connection associated with a listener; however, the listener does not require a connection.
<b>Action</b>	This operation is not supported.
<b>ART.0115.3270E</b>	<b>Unable to create listener. Setting connection for listener type {0} is not supported.</b>
<b>Explanation</b>	The user attempted to create a listener with a connection; however the listener does not require a connection.
<b>Action</b>	This operation is not supported.
<b>ART.0115.3271E</b>	<b>Unable to create listener. Must specify connection for listener type {0}.</b>
<b>Explanation</b>	A user attempted to create a listener that requires a connection; however no connection was specified.
<b>Action</b>	Specify a connection, and retry the operation.
<b>ART.0115.3272E</b>	<b>Unable to identify adapter for listener type {0}.</b>
<b>Explanation</b>	Integration Server cannot determine the adapter associated with the specified listener type.
<b>Action</b>	Ensure your package dependencies are set properly. Reload the adapter package, and retry the operation.

<b>ART.0115.3712E</b>	<b>Error during listener execution.</b>
<b>Explanation</b>	Either a fatal error has occurred while executing a listener, or the maximum number of non-fatal errors has been exceeded while executing a listener.
<b>Action</b>	Ensure that the connection from the listener to the back-end EIS is still valid, and that a communications path between them exists.
<b>ART.0115.3716W</b>	<b>Failed to retrieve connection for callback in listener {0}. Error: {1}</b>
<b>Explanation</b>	An error occurred while trying to retrieve a connection for the listener shutdown callback processing.
<b>Action</b>	Check to ensure the connection is enabled. Check the Integration Server error log for details on the unexpected exception.
<b>ART.0115.3717W</b>	<b>Failure in shutdown callback in listener {0}. Error: {1}</b>
<b>Explanation</b>	An error occurred during the listener shutdown callback processing.
<b>Action</b>	Details on the error are included in the message. The shutdown will attempt to continue.
<b>ART.0116.3001E</b>	<b>Notification error during execution of {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred while executing the specified notification. Refer to the text in the error message for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3002E</b>	<b>Notification error releasing connection for {0}. Error: {1}.</b>
<b>Explanation</b>	WmART failed to release the specified notification's connection back to the connection pool.
<b>Action</b>	For custom adapters, check the connection's implementation for possible blocking situations. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3003E</b>	<b>Error creating notification object: Null argument on init call.</b>
<b>Explanation</b>	The method WmNotification.initNotificationNodeProperties failed because it was passed a null NotificationNode object.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0116.3004E</b>	<b>Error creating notification object: NSName null.</b>
<b>Explanation</b>	The method WmNotification.initNotificationNodeProperties failed because it was unable to get the node name from the NotificationNode object.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3005E</b>	<b>Error creating notification object: {0}. Publishable Document name not set.</b>
<b>Explanation</b>	The method WmNotification.initNotificationNodeProperties failed because it was unable to get the publishable document node name for the specified notification.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3006E</b>	<b>Error creating notification object: {0}. UUID not set.</b>
<b>Explanation</b>	The method WmNotification.initNotificationNodeProperties failed because it was unable to get the specified notification's universal unique identifier (UUID) from the NotificationNode object.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3007E</b>	<b>Illegal event type received: {0}.</b>
<b>Explanation</b>	The method WmNotification.notifyEvent was passed the specified invalid event ID.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3008E</b>	<b>Error during notification event. Error: {0}.</b>
<b>Explanation</b>	An error occurred in the method WmNotification.notifyEvent. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0116.3009E</b>	<b>Error creating notification object {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred in the method NotificationNode.getNotification while creating the notification. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3010E</b>	<b>Error publishing notification {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred in the method WmAsynchronousNotification.publishToDispatcher while publishing a non-duplicate document from the specified notification. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3011E</b>	<b>Existing transaction rolled back before execution of {0}.</b>
<b>Explanation</b>	WmART detected an incomplete transaction for the notification prior to processing a notification event. The transaction has been rolled-back.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3012E</b>	<b>Notification error during execution of {0}. Error: {1} rolling back existing transaction.</b>
<b>Explanation</b>	WmART detected an incomplete transaction for the specified notification prior to processing a notification event. It attempted to rollback the transaction, but failed. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3013E</b>	<b>Notification error during execution of {0}. Error: {1} checking transaction.</b>
<b>Explanation</b>	WmART failed to determine whether the specified notification has an open transaction. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0116.3014E</b>	<b>Notification {0} not Found.</b>
<b>Explanation</b>	WmART failed to locate the specified notification.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3015E</b>	<b>Unable to create notification {0}. Notification node already exists.</b>
<b>Explanation</b>	WmART failed to create the specified notification because a notification with this name already exists.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3016E</b>	<b>Unable to create publishable document {0}. Error: {1}.</b>
<b>Explanation</b>	The method NotificationFactory.createPublishableDocument failed to create a document for the specified notification. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3018E</b>	<b>Error creating notification object: {0}. Invalid node name.</b>
<b>Explanation</b>	The specified notification node name is missing or improperly formatted.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3019E</b>	<b>Error creating notification object: {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred while creating the specified polling or listener notification. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3020E</b>	<b>Unable to get list of notification types supported by node {0}.</b>
<b>Explanation</b>	An error occurred in NotificationManager.queryNotificationTemplatesSupported for the specified adapter. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0116.3021E</b>	<b>Unable to get notification node properties {0}.</b>
<b>Explanation</b>	An error occurred while querying the specified notification's properties. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3022E</b>	<b>Unable to update notification {0}. Error: Notification must be disabled.</b>
<b>Explanation</b>	NotificationManager received a request to update the properties of an active notification.
<b>Action</b>	Disable the notification from Integration Server Administrator prior to updating it.
<b>ART.0116.3023E</b>	<b>Unable to update notification {0}.</b>
<b>Explanation</b>	An error occurred while updating the notification's properties. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3024E</b>	<b>Unable to delete notification {0}. Error: Notification must be disabled.</b>
<b>Explanation</b>	NotificationManager received a request to delete an active notification.
<b>Action</b>	Disable the notification from Integration Server Administrator prior to deleting it.
<b>ART.0116.3025E</b>	<b>Unable to delete notification {0}.</b>
<b>Explanation</b>	An error occurred while deleting the specified notification. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3026E</b>	<b>Unable to copy notification {0}.</b>
<b>Explanation</b>	An error occurred while copying the specified notification. See adjacent error messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0116.3027E</b>	<b>Unable to copy notification {0}. Error: nodeName is required.</b>
<b>Explanation</b>	The specified notification node name is missing or incorrectly formatted.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3031E</b>	<b>Unable to copy notification {0}. Error: Invalid node name {1}.</b>
<b>Explanation</b>	Notification Manager failed to validate the specified node name. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3032E</b>	<b>Unable to copy notification {0}. Error: New name already exists {1}.</b>
<b>Explanation</b>	The method NotificationManager.copyAdapterNotification failed because the specified destination notification node name already exists in the package.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3033E</b>	<b>Unable to copy notification {0}. Error: New document name already exists {1}.</b>
<b>Explanation</b>	The method NotificationManager.copyAdapterNotification failed because the specified new publishable document name already exists in the package.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3034E</b>	<b>Unable to rename notification {0}. Error: Notification must be disabled.</b>
<b>Explanation</b>	NotificationManager received a request to rename an active notification.
<b>Action</b>	Disable the notification from Integration Server Administrator prior to renaming it.
<b>ART.0116.3035E</b>	<b>Unable to rename notification {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred while renaming the notification. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0116.3036E</b>	<b>Unable to find notification {0}.</b>
<b>Explanation</b>	The method NotificationManager.queryNotificationStatistics failed because the specified notification could not be located in the namespace.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3037E</b>	<b>Unable to get notification {0}. Error: Notification class name is not specified.</b>
<b>Explanation</b>	The method NotificationNode.getNotification failed to determine the implementation class name for the specified notification.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3038E</b>	<b>Error in Notification Callback:{0} notification {1}.</b>
<b>Explanation</b>	An error occurred in method WmNotification.notifyEvent while processing the specified callback.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3039E</b>	<b>Missing required parameter on service: {0}</b>
<b>Explanation</b>	The method NotificationManager.queryNotificationTemplatesSupported failed because the adapter name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3040E</b>	<b>Error creating notification object: {0}. Missing parameter: {1}.</b>
<b>Explanation</b>	NotificationManager failed to create the notification because the specified parameter was not in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0116.3041E</b>	<b>Error creating notification object: {0}. Invalid Package Name {1}.</b>
<b>Explanation</b>	NotificationManager failed to create the notification because the specified package name is invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3042E</b>	<b>Error creating notification object: {0}. Invalid Service Name {1}.</b>
<b>Explanation</b>	NotificationManager failed to create the notification because the service name is missing, improperly formatted, or otherwise invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3043E</b>	<b>Error deleting notification object. Invalid node name: {0}.</b>
<b>Explanation</b>	The specified notification node name is missing or incorrectly formatted.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3044E</b>	<b>Error deleting notification object: {0}. Error: {1}.</b>
<b>Explanation</b>	NotificationManager failed to validate the specified node name. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3045E</b>	<b>Error deleting notification object: {0}. The specified node is not a Listener Notification node.</b>
<b>Explanation</b>	NotificationManager.deleteListenerNotification was called to delete the specified notification, which is a polling notification, not a listener notification.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0116.3046E</b>	<b>Unable to create document {0}. Error: {1}.</b>
<b>Explanation</b>	An error occurred while creating a document for the specified notification. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3047E</b>	<b>Unable to create notification {0}. Error deleting an existing record: {1}.</b>
<b>Explanation</b>	NotificationFactory failed to create the notification because it could not delete existing document records. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3048E</b>	<b>Unable to create notification {0}. The specified Listener does not exist: {1}.</b>
<b>Explanation</b>	NotificationManager.createListenerNotification failed to create the notification because it could not locate the corresponding listener node. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3049E</b>	<b>Unable to create notification {0}. The specified notification template is not synchronous: {1}.</b>
<b>Explanation</b>	NotificationFactory failed to create the notification because the underlying specified implementation class is not derived from WmSynchronousNotification. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3050E</b>	<b>Unable to create notification {0}. The specified notification template is not asynchronous: {1}.</b>
<b>Explanation</b>	NotificationFactory failed to create the specified notification because the underlying specified implementation class is not derived from WmAsynchronousNotification. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0116.3051E</b>	<b>Unable to query properties for {0}. Invalid node name.</b>
<b>Explanation</b>	The specified notification node name is missing or improperly formatted.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3052E</b>	<b>Unable to query properties for {0}. Error: {1}.</b>
<b>Explanation</b>	NotificationManager failed to validate the node name. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3053E</b>	<b>Unable to update notification {0}. Invalid node name.</b>
<b>Explanation</b>	The specified notification node name is missing or incorrectly formatted.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3054E</b>	<b>Unable to update notification {0}. Error: {1}.</b>
<b>Explanation</b>	NotificationManager failed to validate the node name. Refer to the error message text for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3055E</b>	<b>Error copying notification: {0}. Missing parameter: {1}.</b>
<b>Explanation</b>	NotificationManager failed to copy the notification because the specified parameter was not in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3056E</b>	<b>Error copying notification: {0}. Invalid Package Name {1}.</b>
<b>Explanation</b>	NotificationManager failed to copy the notification because the specified package name is invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0116.3057E</b>	<b>Error updating notification object: {0}. Missing parameter: {1}.</b>
<b>Explanation</b>	NotificationManager failed to update the notification because the specified parameter was not in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3058</b>	<b>Unable to copy notification {0}. Error: New node name is invalid {1}.</b>
<b>Explanation</b>	Invalid connection name specified.
<b>Action</b>	Remove any unsupported special characters from the connection name.
<b>ART.0116.3059</b>	<b>Error trying to enable notification {0}. Error: Listener not found {1}.</b>
<b>Explanation</b>	The error occurs when trying to enable or disable a listener notification, and the associated listener is not available.
<b>Action</b>	Make sure that the associated listener is not deleted. If the associated listener is deleted, create the listener again with the same name.
<b>ART.0116.3060E</b>	<b>Error setting notification schedule property {0}</b>
<b>Explanation</b>	An unexpected exception occurred while trying to set the schedule parameter listed in the message.
<b>Action</b>	Check the Integration Server error log for details about the unexpected exception.
<b>ART.0116.3061E</b>	<b>Unable to move notification. Error: Invalid node name {0}.</b>
<b>Explanation</b>	The name of the notification you are trying to move is invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3062E</b>	<b>Unable to move notification {0}. Error: Invalid Node Name Format.</b>
<b>Explanation</b>	The name of the notification listed in the message text is not in folder:nodename format.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0116.3063E</b>	<b>Error moving notification: {0}. Error: Missing parameter: {1}.</b>
<b>Explanation</b>	The move operation is missing the required parameter listed in the message text.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3064E</b>	<b>Error moving notification: {0}. Error: Invalid Package Name {1}.</b>
<b>Explanation</b>	The name of the destination package for the move operation is invalid on Integration Server.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3065E</b>	<b>Unable to move notification {0}. Error: Src/Dest Node names not the same.{1}</b>
<b>Explanation</b>	The notification node name was changed during the move operation.
<b>Action</b>	Only the package name and folder are allowed to change during a move operation, while the actual node name is not allowed to change. This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3066E</b>	<b>Unable to move notification {0}. Error: Notification must be disabled.</b>
<b>Explanation</b>	This notification cannot be moved because it is enabled. To move a notification, it first must be disabled.
<b>Action</b>	In Integration Server Administrator, disable the notification and retry the move operation.
<b>ART.0116.3067E</b>	<b>Unable to move notification {0}.</b>
<b>Explanation</b>	An unexpected exception occurred while trying to move a notification.
<b>Action</b>	Check the Integration Server error log for details about the unexpected exception.
<b>ART.0116.3068E</b>	<b>Unable to move notification {0}. Error: nodeName is required.</b>
<b>Explanation</b>	The node name specified for the move operation is either missing or invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0116.3069E</b>	<b>Unable to move notification {0}. Error: New node name is invalid {1}.</b>
<b>Explanation</b>	The new node name specified for the move operation is either missing or invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3100</b>	<b>Unable to obtain list of polling notifications for adapter type.</b>
<b>Explanation</b>	The adapter type passed is null or invalid while retrieving, suspending, or resuming the adapter notifications.
<b>Action</b>	Ensure that a valid adapter type is passed.
<b>ART.0116.3101E</b>	<b>Unable to obtain detailed information for polling notification.</b>
<b>Explanation</b>	The method ARTAdmin.retrievePollingNotificationData failed because the notification name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3102E</b>	<b>Unable to set status for polling notification.</b>
<b>Explanation</b>	The method ARTAdmin.forceNotificationDisable failed because the notification name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3103E</b>	<b>Unable to set schedule for polling notification.</b>
<b>Explanation</b>	The method ARTAdmin.setNotificationSchedule failed because the notification name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3104E</b>	<b>Unable to retrieve listener notification list. Missing parameter: {0}</b>
<b>Explanation</b>	The method ARTAdmin.retrieveListenerNotifications failed because the adapter name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0116.3105E</b>	<b>Unable to set notification status. Missing parameter: {0}</b>
<b>Explanation</b>	The method ARTAdmin.setNotificationStatus failed because the notification name was not present in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3106E</b>	<b>Unable to set notification status. Notification not found: {0}</b>
<b>Explanation</b>	The method ARTAdmin.setNotificationStatus failed because it was unable to locate the node for the specified notification.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3107E</b>	<b>Unable to set notification status for {0}. Error: {1}</b>
<b>Explanation</b>	The method ARTAdmin.setNotificationStatus failed because it was unable to enable or disable the specified listener notification.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3108E</b>	<b>Unable to publish notification. Message ID {0} exceeds maximum length of {1}.</b>
<b>Explanation</b>	The message ID specified by the adapter is longer than the allowed maximum length.
<b>Action</b>	Integration Server restricts the length of the message ID for a published document. Contact Software AG Global Support to see how to increase this setting. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0116.3115E</b>	<b>Errors occurred. {0} notifications reported errors while attempting to suspend. See error log for details.</b>
<b>Explanation</b>	While attempting to suspend all notifications, some of the notifications reported errors.
<b>Action</b>	Look in the error log for details on the specific exceptions.
<b>ART.0116.3116E</b>	<b>Errors occurred. {0} notifications were not enabled. See error log for details.</b>
<b>Explanation</b>	While attempting to enable all suspended notifications, some of the notifications reported errors.
<b>Action</b>	Look in the error log for details on the specific exceptions.

<b>ART.0116.3117E</b>	<b>Non-fatal errors encounter while disabling notification {0}. Details recorded in error log.</b>
<b>Explanation</b>	An exception was encountered during the disable callback for a notification.
<b>Action</b>	Look in the error log for details on the specific exception.
<b>ART.0116.3118E</b>	<b>Non-fatal errors encounter while suspending notification {0}. Details recorded in error log.</b>
<b>Explanation</b>	An exception was encountered during the suspend callback for a notification.
<b>Action</b>	Look in the error log for details on the specific exception.
<b>ART.0116.3119E</b>	<b>Non-fatal errors encounter while stopping notification {0}. Details recorded in error log.</b>
<b>Explanation</b>	An exception was encountered during the shutdown callback for a notification.
<b>Action</b>	Look in the error log for details on the specific exception.
<b>ART.0116.3120E</b>	<b>{0} is not a valid node type for this operation.</b>
<b>Explanation</b>	An attempt was made to change the connection associated with a polling notification; however, the specified node is not a polling notification node.
<b>Action</b>	Select a polling notification node, and retry the operation.
<b>ART.0116.3121E</b>	<b>{0} is in an invalid state for the requested operation.</b>
<b>Explanation</b>	An attempt was made to perform an operation on a notification; however, the notification was not in the correct state. Typically this occurs when you attempt to perform an update type of operation when the notification is not in a disabled or suspended state.
<b>Action</b>	Change the state of the notification to disabled or suspended, and retry the operation.
<b>ART.0116.3533</b>	<b>Error while executing Polling Notification {0}. Check if the notification is present in all clusters.</b>
<b>Explanation</b>	The error occurs when a polling notification does not exist on all nodes in an Integration Server cluster.
<b>Action</b>	Make sure that all clustered Integration Server nodes have the same set of adapter polling notifications.

---

<b>ART.0117.4000E</b>	<b>Unable to invoke adapter service {0}. Unable to establish connection to connection {1}.</b>
<b>Explanation</b>	WmART failed to create or locate the connection object associated with the specified adapter service.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4001E</b>	<b>Unable to invoke adapter service {0}. Connection.createInteraction() returned null.</b>
<b>Explanation</b>	WmART failed to create a new instance of WmInteraction for the specified adapter service.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4002E</b>	<b>Unable to invoke adapter service {0}.</b>
<b>Explanation</b>	An error occurred while running the specified adapter service and processing its output. Additional information might appear in adjacent log messages.
<b>Action</b>	Determine whether the implementation of the adapter's WmAdapterService.execute method is throwing an exception at run time, and correct as needed.
<b>ART.0117.4005E</b>	<b>Connection not available.</b>
<b>Explanation</b>	WmART failed to locate the connection data node for the specified connection and adapter service. This message will always appear in conjunction with 117.4020.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4006E</b>	<b>Invalid adapter type {0}.</b>
<b>Explanation</b>	WmART failed to create an instance of the specified adapter service. This message will always appear in conjunction with 117.4021.
<b>Action</b>	Ensure that the implementation class for the adapter service is installed correctly in the package. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

- ART.0117.4007E**      **Unable to get record factory bridge.**  
**Explanation**      WmART failed to create or locate an input/output record factory bridge object.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0117.4008E**      **Unable to get connection factory from connection.**  
**Explanation**      WmART failed to locate the connection factory associated with a ConnectionResource.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0117.4009E**      **Unable to get record factory required for interaction input.**  
**Explanation**      An error occurred while locating a RecordFactory associated with a ConnectionFactory. Additional details might appear in adjacent log messages.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0117.4010E**      **Unable to get adapter record factory. ConnectionFactory.getRecordFactory() returned null.**  
**Explanation**      WmART failed to locate a RecordFactory associated with a ConnectionFactory.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0117.4011E**      **Unable to connect to resource {0}. The resource is already being used in a parent transaction.**  
**Explanation**      WmART attempted to create a new connection to the specified resource, but detected that the resource is currently enrolled in an ongoing transaction.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0117.4012E</b>	<b>Unable to run adapter service. Error occurred when connecting to resource {0}.</b>
<b>Explanation</b>	An error occurred while creating a new connection to the specified resource. Additional details might appear in adjacent log messages.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4013E</b>	<b>Internal Error: Unable to nest connection states.</b>
<b>Explanation</b>	WmART attempted to start a new transaction, but detected that a parent transaction already exists.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4014E</b>	<b>Error while starting nested transaction. The name {0} is already in use.</b>
<b>Explanation</b>	WmART attempted to start a new transaction, but detected that the specified transaction ID is already in use.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4015E</b>	<b>Error(s) occurred while closing adapter connections.</b>
<b>Explanation</b>	Error(s) occurred while closing one or more connections involved in a transaction. Separate log messages are listed for each connection.
<b>Action</b>	Ensure that all EIS resources used in the transaction can communicate with the adapter. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4018E</b>	<b>Error while closing transactions at service completion Error:{0}.</b>
<b>Explanation</b>	The specified error occurred while closing the connections involved in a successful transaction.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0117.4019E</b>	<b>Error while rolling back transaction Error:{0}.</b>
<b>Explanation</b>	The specified error occurred while closing the connections involved in a failed transaction.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4020E</b>	<b>Unable to invoke adapter service {0}. Connection resource {1} not found.</b>
<b>Explanation</b>	WmART failed to locate the connection data node for the specified connection and adapter service.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4021E</b>	<b>Unable to invoke adapter service {0}. Unable to get adapter service template.</b>
<b>Explanation</b>	WmART failed to create an instance of the specified adapter service.
<b>Action</b>	Ensure that the implementation class for the adapter service is installed correctly in the package. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4022E</b>	<b>Unable to invoke adapter service {0}. Unable to get connection state.</b>
<b>Explanation</b>	WmART failed to determine the connection state for the specified adapter service. This will prevent a resource connection from being created.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4023E</b>	<b>Unable to properly handle adapter connection error for connection {0}.</b>
<b>Explanation</b>	WmART was unable to successfully handle an error that occurred on the specified connection while executing a service.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0117.4024E</b>	<b>Unable to invoke adapter service {0}. An error occurred on connection {1}. Unable to recover from connection error.</b>
<b>Explanation</b>	An error occurred in the error handling logic while invoking the specified service. Additional details might appear in adjacent log messages.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4026E</b>	<b>Unable to rollback transaction Error:{0}.</b>
<b>Explanation</b>	The specified error occurred while marking a failed transaction for rollback.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4027E</b>	<b>Unable to create adapter service {0}. Invalid package name {1}.</b>
<b>Explanation</b>	WmART failed to create the specified adapter service because it could not locate the Package object for the specified package name.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4028E</b>	<b>Unable to create adapter service {0}. Invalid service name.</b>
<b>Explanation</b>	WmART failed to create the specified adapter service because the service node name is missing or invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4029E</b>	<b>Unable to create adapter service {0} with connection {1}. Connection not found.</b>
<b>Explanation</b>	WmART AdapterServiceManager failed to create the adapter service because it could not locate the ConnectionDataNode object for the connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

- ART.0117.4030E      Unable to create adapter service {0}.**  
**Explanation**      An error occurred while creating the specified adapter service. Additional details should appear in adjacent log messages.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0117.4032E      Unable to find adapter service {0}.**  
**Explanation**      WmART failed to locate the namespace node (NSNode) for the adapter service.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0117.4033E      Retryable Error while closing transactions at service completion Error:{0}.**  
**Explanation**      The specified retryable run-time exception occurred while completing a successful service invocation.  
**Action**              Ensure that all EIS resources used in the transaction can communicate with the adapter. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0117.4034E      Retryable Error(s) occurred while closing adapter connections.**  
**Explanation**      One or more retryable errors have occurred while closing connections used in a transaction. Additional log messages might be listed.  
**Action**              Ensure that all EIS resources used in the transaction can communicate with the adapter. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0117.4035E      Error while completing service listener Error:{0}.**  
**Explanation**      An error occurred while calling method `com.wm.pkg.art.transaction.ServiceListener.listenComplete`.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0117.4036E</b>	<b>Unable to commit transaction. Transaction state:{0} .</b>
<b>Explanation</b>	WmART was unable to commit a transaction because the transaction was in the specified, unexpected state.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0117.4037E</b>	<b>Unable to invoke adapter service {0}. Unable to create Input record.</b>
<b>Explanation</b>	An unexpected exception occurred during the adapter service execution.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception.
<b>ART.0117.4038E</b>	<b>Unable to delete adapter service {0}.</b>
<b>Explanation</b>	An unexpected exception occurred trying to delete the adapter service.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception.
<b>ART.0117.4039E</b>	<b>Unable to update adapter service {0}.</b>
<b>Explanation</b>	An unexpected exception occurred trying to update the adapter service.
<b>Action</b>	Check the Integration Server error log for details on the unexpected exception.
<b>ART.0117.4040E</b>	<b>Unable to create adapter service {0}. Adapter service node already exists.</b>
<b>Explanation</b>	It is illegal to create an adapter service with the same folder and node name.
<b>Action</b>	Use a different name for the adapter service and retry the create operation.
<b>ART.0117.4048E</b>	<b>Unable to update adapter service {0}.</b>
<b>Explanation</b>	An exception was encountered while attempting to update the adapter service.
<b>Action</b>	Check the Integration Server error log for details on the original exception.
<b>ART.0117.4049E</b>	<b>Unable to retrieve connection from resource {0}. See error log for details.</b>
<b>Explanation</b>	An exception was encountered while trying to retrieve a connection.
<b>Action</b>	Check the Integration Server error log for details on the original exception.

<b>ART.0118.5000E</b>	<b>Unable to retrieve and process connection properties from pipeline.</b>
<b>Explanation</b>	WmART failed to process a connection's properties. Additional log messages might be listed.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5001E</b>	<b>Error processing connection property {0}. Unable to get property name.</b>
<b>Explanation</b>	WmART failed to locate an expected connection property in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5002E</b>	<b>Error processing connection property {0}. Invalid value entered. The minimum string length is {1}.</b>
<b>Explanation</b>	The size of the specified connection property value is less than the specified minimum size.
<b>Action</b>	Reconfigure the connection from Integration Server Administrator using values that are within the constraints set by the connection.
<b>ART.0118.5003E</b>	<b>Error processing connection property {0}. Invalid value entered. The maximum string length is {1}.</b>
<b>Explanation</b>	The value of the specified property is not valid.
<b>Action</b>	Reconfigure the connection from Integration Server Administrator using values that are within the constraints set by the connection.
<b>ART.0118.5004E</b>	<b>Error processing connection property {0}.</b>
<b>Explanation</b>	An error occurred when converting a connection property value to its internal Java representation. Additional log messages might be listed.
<b>Action</b>	Reconfigure the connection from Integration Server Administrator ensuring that all data entered conforms to the underlying types in the connection class. If the problem persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0118.5005E</b>	<b>Unable to configure connection properties. Error occurred while processing connection properties.</b>
<b>Explanation</b>	This is a general processing error message. See adjacent log messages for details.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0118.5006E</b>	<b>Unable to get list of connections for adapter type: {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the list of configured connections for the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5007E</b>	<b>Unable to get list of connection types for adapter type: {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the list of connection factories for the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5008E</b>	<b>Unable to get properties for connection {0}.</b>
<b>Explanation</b>	An error occurred while retrieving the configuration details for a specific connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5009E</b>	<b>Unable to get connection properties for adapter: {0}, connection type: {1}.</b>
<b>Explanation</b>	An error occurred while retrieving the connection properties for the specified connection factory and adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5010E</b>	<b>Invalid connection name. The connection name must have a valid folder name and node name.</b>
<b>Explanation</b>	An invalid folder and/or connection name was entered on the Integration Server Administrator Configure Connection Type page.
<b>Action</b>	Re-enter the new connection type information making sure that the Folder Name and Connection Name fields have valid entries.

<b>ART.0118.5011E</b>	<b>Unable to create new connection {0}.</b>
<b>Explanation</b>	An error occurred while configuring a new connection type.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5012E</b>	<b>Unable to update connection {0}.</b>
<b>Explanation</b>	An error occurred while editing the connection type.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5013E</b>	<b>Unable to find connection {0}.</b>
<b>Explanation</b>	WmART was unable to locate the specified connection while deleting it.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5014E</b>	<b>Unable to delete connection {0}.</b>
<b>Explanation</b>	An error occurred while deleting a connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5015E</b>	<b>Unable to get connection manager properties.</b>
<b>Explanation</b>	An error occurred while getting a list of Connection Manager properties.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5016E</b>	<b>Unable to get configured values for connection manager.</b>
<b>Explanation</b>	An error occurred while processing Connection Manager property values.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0118.5017E</b>	<b>Error occurred while getting connection manager properties.</b>
<b>Explanation</b>	This is a general processing error message. See adjacent log messages for details.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0118.5018E</b>	<b>Error getting connection properties.</b>
<b>Explanation</b>	An error occurred while fetching connection property values.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5019E</b>	<b>Error getting connection metadata. Missing required parameter: adapterTypeName.</b>
<b>Explanation</b>	WmART was unable to determine the adapter type name while processing a connection's metadata.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5020E</b>	<b>Unable to process connection properties. Internal error.</b>
<b>Explanation</b>	WmART failed to set properties for a connection node. The expected connection form fields were not found in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5021E</b>	<b>Unable to process connection properties. Internal error.</b>
<b>Explanation</b>	WmART failed to get properties for a connection node. The expected connection form fields were not found in the pipeline.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5022E</b>	<b>Cannot create connection {0}. Adapter type {1} does not exist.</b>
<b>Explanation</b>	WmART failed to start the specified connection because it was unable to locate the specified adapter type.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0118.5023E</b>	<b>Unable to configure connection manager. No connection manager properties provided.</b>
<b>Explanation</b>	WmART was unable to validate Connection Manager properties because they were null.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5024E</b>	<b>Unable set connection {0} state to {1}. Invalid state specified.</b>
<b>Explanation</b>	WmART was unable to modify the connection's state because the intended state is missing or invalid.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5025E</b>	<b>Unable to enable connection {0}.</b>
<b>Explanation</b>	This is a general processing error message. See adjacent log messages for details.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0118.5026E</b>	<b>Unable to stop connection {0}.</b>
<b>Explanation</b>	This is a general processing error message. See adjacent log messages for details.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0118.5027E</b>	<b>Unable to enable connection {0}. Connection is already enabled or is being shutdown.</b>
<b>Explanation</b>	WmART is enabling a connection that is not currently in a disabled state.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5028E</b>	<b>Unable to shutdown connection{0}. Connection is already disabled or in the process of being shutdown.</b>
<b>Explanation</b>	WmART is attempting to shut down a connection that is not currently in an enabled state.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0118.5029E</b>	<b>Unable to disable connection {0}. Connection is already disabled.</b>
<b>Explanation</b>	WmART is attempting to disable a connection that is already disabled.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5030E</b>	<b>Unable to create connection {0}. Package {1} does not exist.</b>
<b>Explanation</b>	WmART was unable to create the connection node because it could not locate the specified package.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5031E</b>	<b>Unable to delete connection {0}. Internal error.</b>
<b>Explanation</b>	An error occurred while deleting the specified connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5032E</b>	<b>Unable to set connection resource properties. Internal error: ConnectionPropertiesBridge not found.</b>
<b>Explanation</b>	WmART failed to create a configured managed connection factory because it could not locate the WmConnectionPropertiesBridge instance needed to set its properties.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5033E</b>	<b>Error disabling connection resources.</b>
<b>Explanation</b>	An error occurred while stopping the connection resources. See adjacent log messages for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0118.5034E</b>	<b>Connection type {0} does not exist in adapter {1}.</b>
<b>Explanation</b>	WmART was unable to locate the specified connection factory in the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5035E</b>	<b>Unable to create connection {0}. Internal error occurred while creating connection factory of type {1}.</b>
<b>Explanation</b>	WmART was unable to create the specified connection factory for the connection. See adjacent log messages for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5036E</b>	<b>Unable to configure connection manager.</b>
<b>Explanation</b>	WmART was unable to create a Connection Manager. See adjacent log messages for more details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5037E</b>	<b>Cannot create ResourceAdapterMetaData object. CCI Connection Factory is not an instance of WmConnectionFactory.</b>
<b>Explanation</b>	The method ConnectionDataNodeManager.createCCIConnectionFactory could not get the ResourceAdapterMetaData object for a connection factory.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5040E</b>	<b>Unable to get adapter service templates for connection {0}.</b>
<b>Explanation</b>	WmART failed to locate any adapter service templates for the specified connection.
<b>Action</b>	Do not configure an adapter service with a connection for which no adapter service templates exist. Try another connection.

---

<b>ART.0118.5041E</b>	<b>Unable to get connection status for connection resource {0}.</b>
<b>Explanation</b>	WmART was unable to obtain connection state information for the specified connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5042E</b>	<b>Unable to enable connection resource {0}.</b>
<b>Explanation</b>	This is a general processing error message. See adjacent log messages for details.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0118.5043E</b>	<b>Unable to disable connection resource {0}.</b>
<b>Explanation</b>	This is a general processing error message. See adjacent log messages for details.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0118.5044E</b>	<b>Unable to shutdown connection resource {0}.</b>
<b>Explanation</b>	This is a general processing error message. See adjacent log messages for details.
<b>Action</b>	Refer to the Action column for the accompanying messages.
<b>ART.0118.5046E</b>	<b>Unable to get a connection to resource {0}. Resource not available.</b>
<b>Explanation</b>	WmART could not locate a connection factory for the specified connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5047E</b>	<b>Unable to get a connection to resource {0}. Internal error occurred while restarting connection.</b>
<b>Explanation</b>	An error occurred while creating the connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

- ART.0118.5048E**      **Unable to get adapter service templates for connection resource {0}.**  
**Explanation**      WmART failed to locate any adapter service templates for the connection.  
**Action**              Do not configure an adapter service with a connection for which no adapter service templates exist. Try another connection.
- ART.0118.5049E**      **Unable to reset adapter connection {0}. Connection {1} is not supported.**  
**Explanation**      The method `ConnectionResource.handleAdapterConnectionException` reports that the specified connection class is not derived from `WmConnection`.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0118.5050E**      **Unable to reset adapter connection {0}. Unable to configure connection manager.**  
**Explanation**      The method `ConnectionResource.handleAdapterConnectionException` was unable to locate the `ConnectionManager` or `ConnectionManagerPropertiesBridge` for this connection.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0118.5051E**      **Unable to reset adapter connection {0}. Adapter type {1} does not exist.**  
**Explanation**      The method `ConnectionResource.handleAdapterConnectionException` was unable to determine the adapter type for this connection.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- ART.0118.5052E**      **Unable to create connection. Connection resource {0} is restarting.**  
**Explanation**      The method `ConnectionResource.createConnection` has been called against a connection resource in the restarting state.  
**Action**              This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

---

<b>ART.0118.5053E</b>	<b>Unable to get a connection to resource {0}.</b>
<b>Explanation</b>	WmART failed to create a connection because it could not communicate with the back-end connection resource.
<b>Action</b>	Check independently that the target resource is communicating and that it can be reached from the connection. If the condition persists, contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5054E</b>	<b>Unable to reset adapter connection {0}.</b>
<b>Explanation</b>	An error occurred while trying to restart the specified connection. See adjacent log messages for additional details.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5055E</b>	<b>Unable to get adapter service templates for connection resource {0}.</b>
<b>Explanation</b>	The method ConnectionResourceState.getInteractionSpecsSupported failed to locate the ResourceAdapterMetaData associated with specified connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5056E</b>	<b>Unable to create connection for connection resource {0}, connection type {1}.</b>
<b>Explanation</b>	The method ConnectionResourceState.createConnection failed to get the Connection object for the specified connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5057E</b>	<b>Adapter Runtime was unable to initialize {0} connection resources for the adapter "{1}".</b>
<b>Explanation</b>	com.wm.pkg.art.ns.ConnectionDataNodeManager.startConnectionResources detected failures in starting connection nodes for the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.

<b>ART.0118.5058E</b>	<b>Adapter Runtime was unable to stop {0} connection resources for the adapter "{1}".</b>
<b>Explanation</b>	com.wm.pkg.art.ns.ConnectionDataNodeManager.stopConnectionResources detected failures in shutting down connection nodes for the specified adapter.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5059E</b>	<b>Adapter Runtime was unable to stop connection resources for the {0} adapter types.</b>
<b>Explanation</b>	com.wm.pkg.art.ns.ConnectionDataNodeManager.stopAllConnectionResources detected failures in shutting down connection nodes.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5060E</b>	<b>Unable get properties for connection resource {0}.</b>
<b>Explanation</b>	An error occurred while fetching the specified connection's properties.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5061E</b>	<b>Unable to configure Connection Manager: Poolable property not set.</b>
<b>Explanation</b>	WmART failed to determine whether a connection should be pooled.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5062E</b>	<b>Unable to find connection {0}: error {1}.</b>
<b>Explanation</b>	An error was encountered while validating the specified connection.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5063E</b>	<b>Unable to start connection {0}: after {1} attempt(s).</b>
<b>Explanation</b>	The startup of a connection pool has exceeded the maximum number of retries.
<b>Action</b>	Check the Integration Server error log for details on the retryable exception.

---

<b>ART.0118.5064E</b>	<b>Cannot reconfigure connection {0}: it must be disabled first.</b>
<b>Explanation</b>	To update a connection, it must be disabled.
<b>Action</b>	Disable the connection and retry the update operation.
<b>ART.0118.5065E</b>	<b>Cannot delete connection {0}: it must be disabled first.</b>
<b>Explanation</b>	To delete a connection, it must be disabled.
<b>Action</b>	Disable the connection and retry the delete operation.
<b>ART.0118.5066E</b>	<b>Exception encountered processing {0} connection callback method. The {1} operation will proceed.</b>
<b>Explanation</b>	An exception was encountered while executing the specified connection callback method.
<b>Action</b>	Look in the error log for details on the original exception. The callback processing did proceed even though the error was encountered.
<b>ART.0118.5067E</b>	<b>Unknown callback event type received on connection node: {0}</b>
<b>Explanation</b>	An unknown connection callback was made.
<b>Action</b>	This is an internal error. Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
<b>ART.0118.5068E</b>	<b>Exception encountered processing {0} connection callback method.</b>
<b>Explanation</b>	An exception was encountered while executing the specified connection callback method.
<b>Action</b>	Look in the error log for details on the original exception. When this error is received, the callback processing does not continue.
<b>ART.0118.5069E</b>	<b>Cannot create connection factory for connection {0}. Adapter type {1} does not exist.</b>
<b>Explanation</b>	The adapter associated with this connection is not registered.
<b>Action</b>	Verify the package dependencies are set correctly. Reload the adapter package, and retry the operation.

<b>ART.0118.5070E</b>	<b>Exception encountered creating the connection factory for connection {0}.</b>
<b>Explanation</b>	An exception was encountered creating the connection factory.
<b>Action</b>	Look in the error log for details on the original exception.
<b>ART.0118.5071W</b>	<b>A non-fatal exception was encountered attempting to unregister {0}. The operation will proceed. See the error log for more details.</b>
<b>Explanation</b>	An exception was encountered trying to unregister the connection node.
<b>Action</b>	Look in the error log for details on the original exception. The unregister processing continued.
<b>ART.0118.5072E</b>	<b>Adapter service {0} cannot use connection {1}. The adapter service and connection are from different adapters.</b>
<b>Explanation</b>	The user attempted to set the connection associated with an adapter service; however, the adapter service and connection were not from the same adapter.
<b>Action</b>	Retry the operation using a connection from the same adapter.
<b>ART.0118.5073E</b>	<b>Adapter service {0} cannot use connection {1}. The connection is already being used by a listener.</b>
<b>Explanation</b>	The user attempted to use a connection in an adapter service; however, the connection is already being used by a listener.
<b>Action</b>	Retry the operation using a connection that is not already being used by a listener.
<b>ART.0118.5074E</b>	<b>"{0}" is not a valid connection name for adapter {1}</b>
<b>Explanation</b>	The user attempted to use a connection in a polling notification or listener; however, the connection was not part of the same adapter.
<b>Action</b>	Retry the operation using a connection from the same adapter.
<b>ART.0118.5075E</b>	<b>Listener {0} cannot use connection {1}. The connection is already being used by an adapter service or polling notification.</b>
<b>Explanation</b>	The specified listener cannot use the specified connection because the connection is already being used by a polling notification or an adapter service.
<b>Action</b>	Retry the operation using a connection that is not being used by a polling notification or adapter service.

---

<b>ART.0118.5076E</b>	<b>Polling notification {0} cannot use connection {1}. The connection is already being used by a listener.</b>
<b>Explanation</b>	The user attempted to use a connection in a polling notification; however, the connection is already being used by a listener.
<b>Action</b>	Retry the operation using a connection that is not already being used by a listener.
<b>ART.0118.5077E</b>	<b>Adapter service {0} cannot use connection {1}. The connection does not support this adapter service template.</b>
<b>Explanation</b>	The user attempted to use a connection for an adapter service; however, the connection does not support the adapter service.
<b>Action</b>	Retry the operation using a connection that supports the adapter service.
<b>ART.0118.5078E</b>	<b>Minimum pool size must not be greater than maximum pool size.</b>
<b>Explanation</b>	The user attempted to set the minimum pool size to a value that is greater than the maximum pool size.
<b>Action</b>	Retry the operation specifying a minimum pool size that is lower than the maximum pool size.
<b>ART.0118.5079</b>	<b>Exception encountered while removing {0} connection from Connection cache.</b>
<b>Explanation</b>	An error occurred while invalidating a failed XA transaction.
<b>Action</b>	Make sure that there is connectivity to the adapter backend, and that the connection associated with the transaction is enabled. Check the server logs for transaction details.
<b>ART.0118.5080</b>	<b>Exception encountered while updating connection {0}.</b>
<b>Explanation</b>	An error occurred while updating a connection node from an old version to a new one.
<b>Action</b>	Make sure that the connection parameters are valid. Make sure that the user updating the connection has been assigned the appropriate ACL.
<b>ART.0118.5083</b>	<b>Invalid value {0} specified for {1} property, hence using default value as {2}</b>
<b>Explanation</b>	The value of the watt.art.connection.nodeVersion watt property is invalid. Hence, when creating the connection node, the specified node version is ignored and the default value for node version is used instead.
<b>Action</b>	Make sure the watt.art.connection.nodeVersion property has a valid value. For details, see the Integration Server administration guide.

**AUTH055**            **Did not add user(s) {0}. Password was empty.**

**Explanation**        The Password field requires a value.

**Action**              Enter a valid password.

**BAB.0002.0000E**    **Wrapped Exception:**

**Explanation**        A communication failure occurred between Integration Server and a client resulting in the exception.

**Action**              Verify that the communication parameters are correct. Check the setup for any network issues.

**BAB.0006.0001E**    **CommException: LinkServer closed**

**Explanation**        A client sent a request to Integration Server after a previous connection between the client and Integration Server was closed.

**Action**              Make sure that the client is not designed to send new requests to Integration Server when communication with the server is closed.

**BAD\_AUDIT\_DIRE**    **The value supplied for watt.server.audit.logDir does not identify an existing directory that Integration Server can write to. watt.server.audit.logDir was not changed.**

**Explanation**        The audit log directory was not changed because the watt.server.audit.logDir parameter refers to a directory that either does not exist or Integration Server does not have permission to write to.

**Action**              Specify a directory that exists on the server and that Integration Server can write to. You can specify the full path name, or a relative path in relation to the Integration Server.

**BAD\_SESSION\_ID**    **Invalid or expired session identifier.**

**BAF.0000.0001E**    **No file or properties specified**

**Explanation**        Integration Server encountered an internal error.

**Action**              Contact Software AG Global Support.

**BAF.0000.0002E**    **Illegal set\_mode: {2}**

**Explanation**        Integration Server encountered an internal error.

**Action**              Contact Software AG Global Support.

**BEHAVIOUR\_IS\_INVALID** – Behaviour should be one of client or server

**BROKER\_NOT\_REACHABLE** – Broker not connected.

**CACHE\_CACHE\_MANAGER\_NOT\_INITIALIZED** – Cache manager {0} is not loaded or initialized.

**CACHE\_CACHE\_NOT\_FOUND** – Cache {1} for cache manager {0} not found.

**CACHE\_CANNOT\_ACQUIRE\_READ\_LOCK** – Could not acquire a read lock for key {0} in cache {1} contained within the cache manager {2}.

**CACHE\_CANNOT\_ACQUIRE\_WRITE\_LOCK** – Could not acquire a write lock for key {0} in cache {1} contained within the cache manager {2}.

**CACHE\_INVALID\_INPUT** – Invalid value for input parameter {0}. Error:{1}.

**CACHE\_MISSING\_PARAM\_NAME** – Missing required parameter: {0}

**CANNOT\_CREATE\_FOREACH** – Cannot make the For Each from: {0} to: {1}

**CAN\_NOT\_RESUME** can not resume due to state:

**CAN\_NOT\_SUSPEND** can not suspend due to state:

**CLIENT\_HTTP\_EXP3** do not use: data.string, data.stream or data.mimeStream on a DELETE

**CLIENT\_HTTP\_KERBEROS\_DELEGATION\_NO\_CREDENTIALS** – Kerberos delegatable credentials do not exist.

**Explanation**            Delegatable credentials do not exist. Delegation is set to Kerberos without requesting for a delegatable token in the previous (parent) pub.client:http call.

**Action**                 Ensure that the delegation input in the pub.client:http is set only after the requestDelegatableToken is set to true in the previous (parent) pub.client:http call.

**CLIENT\_HTTP\_KERBEROS\_PRINCIPALPASSWORD\_DELEGATION\_BOTHREQ** – Either both Kerberos clientPrincipal and clientPassword must be supplied or both should be left blank.

**CLIENT\_HTTP\_KERBEROS\_SPNFORM\_DELEGATION\_FORMAT** – Kerberos service principal name form must be either username or hostbased.

**CLIENT\_HTTP\_KERBEROS\_SPN\_FORM\_DELEGATION\_BOTHREQ** – Either both Kerberos service principal name and service principal name form must be supplied or both should be left blank.

**CLIENT\_INPUT\_NOT\_BYTE\_ARRAY** – Input {0} must be a byte array

**CLIENT\_WEBSOCKET\_MISSING\_INPUT – {0} is a required input**

**CLIENT\_WEBSOCKET\_WRONG\_URL – url is required and must begin with ws or wss**

**CURRENT\_EVENT\_IS\_NOT\_A\_START\_ELEMENT – Current event is not a START\_ELEMENT**

**CURRENT\_STATE\_NOT\_START\_ELEMENT – Current state not START\_ELEMENT**

**CURRENT\_STATE\_NOT\_START\_ELEMENT\_END\_ELEMENT\_OR\_ENTITY\_REFERENCE – Current state not START\_ELEMENT, END\_ELEMENT or ENTITY\_REFERENCE**

**CURRENT\_STATE\_NOT\_START\_ELEMENT\_OR\_END\_ELEMENT – Current state not START\_ELEMENT or END\_ELEMENT**

**DEFAULT\_ILIVE\_TRUSTSTORE\_DESCRIPTION – Default truststore alias for webMethods Cloud.**

**DEPLOYER\_PACKAGE\_DISALLOW\_INSTALL\_ON\_ENABLED – Package"{0}" will not be deployed because deploying to an enabled package is disallowed**

**DEPLOYER\_PACKAGE\_NOT\_ENABLED – The deployed package {0} is disabled. Check the Integration Server logs for any errors that may have occurred during deployment. If the package contains Adapter or .NET assets for which variable substitution parameters were specified, you must perform the variable substitutions manually on the Integration Server for the changes to take effect.**

**DEPLOYER\_PACKAGE\_SERVICE\_EXECUTION\_CHECK – Package"{0}" will not be deployed because at least one of the Package services is in execution**

<b>DISABLEDE</b>	<b>Messaging Synchronizer has been disabled</b>
<b>Explanation</b>	The Broker Synchronizer has been disabled.
<b>Action</b>	Check the status of the Broker and the Broker Settings in Integration Server Administrator.

**DUPE\_EVENT\_TYPE\_NAME** – Document type {0} has failed to load. Duplicate Broker document type name {1} is also referenced by {2}

**DUP\_XID\_RESOURCE\_UPDT** – Failed attempt to store resource status={0} for xid={1}, resource={2}. XID not found.

**DUP\_XID\_START** Transaction start for xid={0} failed. Transaction for this xid has already been started.

**EDA\_EID\_ROOT\_NODE** Parameter xmldata must be XML with a root node element named "Event {http://namespaces.softwareag.com/EDA/Event}".

**EGDOS002E** Error occurred while updating global Denial of Service options for Enterprise Gateway rules. Details: {0}.

**Explanation** Enterprise Gateway Server could not update the global Denial of Service options for Enterprise Gateway rules for the reason indicated.

**Action** Ensure that the correct input parameters are provided to the service. Then, try to update the global Denial of Service options again.

**EGDOS006E** Error occurred while updating Denial of Service by IP address options for Enterprise Gateway rules. Details: {0}.

**Explanation** Enterprise Gateway Server could not update DoS by IP address options for Enterprise Gateway rules for the reason indicated.

**Action** Check the reason detailed in the message and take appropriate corrective action.

**EGMAPP02E** Error occurred while updating device types. Details: {0}.

**Explanation** Enterprise Gateway Server could not update the list of device types. Possible reasons are: The device name is too long (exceeds 255 characters) or contains special characters; the device type was deleted by another user while the current user tried to update the list; the device type is specified in one or more Enterprise Gateway rules; or there was a problem saving the device types to the Enterprise Gateway rules configuration file.

**Action** If you are adding a device type, use the correct format. If you are deleting a device type and the device type is used in one or more Enterprise Gateway rules, remove or change the condition in the mobile application protection filter where the device type is specified.

<b>EGMAPP04E</b>	<b>Error occurred while updating mobile applications. Details: {0}.</b>
<b>Explanation</b>	Enterprise Gateway Server could not update the list of mobile applications. Possible reasons are: The application name is too long (exceeds 255 characters) or contains special characters; the application was deleted by another user while the current user tried to update the list; the application is specified in one or more rules; or there was a problem saving the application to the Enterprise Gateway rules configuration file.
<b>Action</b>	If you are adding a mobile application, use the correct format. If you are deleting a mobile application and the application is used in one or more Enterprise Gateway rules, remove or change the condition in the mobile application protection filter where the application is specified.
<b>EGRULE002E</b>	<b>Enterprise Gateway rule could not be created. Details: {0}.</b>
<b>Explanation</b>	Enterprise Gateway Server could not create the Enterprise Gateway rule for the reason indicated.
<b>Action</b>	Ensure that the correct input parameters are provided to the rule creation service.
<b>EGRULE004E</b>	<b>Enterprise Gateway rule could not be updated. Details: {0}.</b>
<b>Explanation</b>	Enterprise Gateway Server could not update the Enterprise Gateway rule for the reason indicated.
<b>Action</b>	Ensure that the correct input parameters are provided to the rule update service.
<b>EGRULE006E</b>	<b>Enterprise Gateway rule could not be deleted. Details: {0}.</b>
<b>Explanation</b>	Enterprise Gateway Server could not delete the Enterprise Gateway rule for the reason indicated.
<b>Action</b>	Ensure that the correct input parameters are provided to the rule deletion service.
<b>EGRULE007E</b>	<b>A rule violation occurred for Enterprise Gateway rule "{0}". Filter: "{1}", message: "{2}", request IP: {3}, request URL: {4}, request time: {5}.</b>
<b>Explanation</b>	Enterprise Gateway Server could not process the request because an Enterprise Gateway rule violation occurred.
<b>Action</b>	Either change the rule filter settings or modify the request so a rule violation does not occur.
<b>EGRULE008E</b>	<b>A rule violation occurred for Enterprise Gateway rule "{0}". Request IP: {1}, request URL: {2}, request time: {3}.</b>
<b>Explanation</b>	Enterprise Gateway Server could not process the request because an Enterprise Gateway rule violation occurred.
<b>Action</b>	Either change the rule settings or modify the request so a rule violation does not occur.

**ELEMENT\_IS\_NOT\_A\_TEXT\_ONLY\_ONE** – Element is not a text-only one

**ELEMENT\_TEXT\_CONTENT\_MAY\_NOT\_CONTAIN\_START\_ELEMENT** – element text content may not contain START\_ELEMENT

**EMPTY\_KEYSTORE\_ALIAS** – Alias is not specified

**EMPTY\_KEYSTORE\_LOCATION** – Location is not specified

**EMPTY\_KEYSTORE\_PROVIDER** – Provider is not specified

**EMPTY\_KEYSTORE\_TYPE** – Type is not specified

**ERROR\_DRIVER\_CONTAINS\_INVALID\_CHARSI** – Driver alias definition cannot be created. Driver alias name contains one or more invalid characters.

**ERROR\_POOL\_CONTAINS\_INVALID\_CHARSI** – Pool alias cannot contain any of these characters:  
{0}

**ER\_SEND\_MISSING\_EVENT\_PARAM** – Missing required parameter: {0}

**EXCEPTION\_PARSING\_HELP\_CONTEXT\_FILE** – Exception occurred while parsing the file doc/OnlineHelp/context.xml from WmRoot package: {0}

**EXPECTED\_LOCAL\_NAME\_NOT\_MATCHING** – Expected local name '{0}'; current local name '{1}'

**EXPECTED\_NON\_NULL\_LOCAL\_NAME** – Expected non-null local name, but current token not a START\_ELEMENT, END\_ELEMENT or ENTITY\_REFERENCE (was {0})

**FAC+."+AUTO\_CREATE\_CONNECTION\_FACTORY** – Automatically creating JMS Connection Factory {0} for JMS connection alias {1}.

**FAC+."."+AUTO\_CREATE\_DESTINATION – Automatically creating JMS Destination {0} for JMS connection alias {1}.**

**FAC+."."+ERROR\_READING\_SJO\_FILE\_FOR\_CONNECTIONFACTORY – Error occurred during lookup for SonicMQ ConnectionFactory object from "{0}".**

**FAC+."."+ERROR\_READING\_SJO\_FILE\_FOR\_DESTINATION – Error occurred during lookup for SonicMQ Destination object from "{0}".**

**FAC+."."+EXCEPTION\_DURING\_HOT\_DEPLOYMENT – Exception {0} occurred while handling Hot Deployment notification for trigger {1}**

**FAC+."."+JMS\_STARTING – JMS subsystem is starting.**

**FAC+."."+PRODUCER\_RETRY\_FAILED – Producer Retry for destination {0} alias {1} failed after {2} attempt(s): {3}**

**FAC+."."+PRODUCER\_RETRY\_FAILED\_ATTEMPT – Producer Retry for destination {0} alias {1} failed retry attempt {2}: {3}**

**FAC+."."+PRODUCER\_RETRY\_INTERRUPT\_DISABLED – Producer Retry for destination {0} alias {1} has been interrupted because the alias is now disabled.**

**FAC+."."+PRODUCER\_RETRY\_INTERRUPT\_DISCONNECTED – Producer Retry for destination {0} alias {1} has been interrupted because the connection is closed.**

**FAC+."."+PRODUCER\_RETRY\_INTERRUPT\_SHUTDOWN – Producer Retry for destination {0} alias {1} has been interrupted because the server is shutting down.**

**FAC+."."+PRODUCER\_RETRY\_NOTRUN\_DISABLED – Producer Retry not attempted for destination {0} alias {1} because the alias is disabled: {2}**

**FAC+."."+PRODUCER\_RETRY\_NOTRUN\_DISCONNECTED – Producer Retry not attempted for destination {0} alias {1} because the connection is closed: {2}**

**FAC+."."+PRODUCER\_RETRY\_NOTRUN\_SHUTDOWN – Producer Retry not attempted for destination {0} alias {1} because the server is shutting down: {2}**

**FAC+."."+PRODUCER\_RETRY\_STARTED – Attempting Producer Retry for destination {0} alias {1}. Max Retry Attempts: {2}, Retry Interval: {3}, Error: {4}**

**FAC+."."+PRODUCER\_RETRY\_SUCCESS – Producer Retry for destination {0} alias {1} was successful after {2} attempt(s).**

**FAC+."."+REGISTER\_TRIGGER\_FOR\_HOT\_DEPLOYMENT – Registering trigger {0} for updates on Hot Deployment of dependent package**

**FAC+."."+RESUMING\_TRIGGER\_ON\_HOT\_DEPLOYMENT\_CANCEL – Resuming trigger {0} as the Hot Deployment of dependent package ended**

**FAC+."."+RESUMING\_TRIGGER\_ON\_HOT\_DEPLOYMENT\_END – Resuming trigger {0} as the Hot Deployment of dependent package ended**

**FAC+."."+SUSPENDING\_TRIGGER\_ON\_HOT\_DEPLOYMENT\_START – Suspending trigger {0} as the dependent package is under Hot Deployment**

**FAC+."."+UNABLE\_TO\_RESTART\_TRIGGER – Unable to re-start JMS Trigger {0}: {1}**

**FAC+."."+UNABLE\_TO\_START\_TRIGGER\_FIRST\_TIME – Unable to start JMS Trigger {0}: {1}**

**FAC+."."+UN\_REGISTER\_TRIGGER\_FOR\_HOT\_DEPLOYMENT – Unregistering trigger {0} for updates on Hot Deployment of dependent package**

**FAC\_LISTENER+ALIS3300 – MSGPREFIX\_LISTENER+"Unable to handle the state change event of the listener {0} acrosss the cluster"**

**Explanation** An error occurred while processing a state change event for a listener in the cluster.

**Action** Check the details for the error in the Integration Server error log.

**FAC\_LISTENER+ALIS3311 – MSGPREFIX\_LISTENER+"The cluster event can't be acted upon since the listener {0} is not present"**

**Explanation** The error occurs when a listener is not available on a cluster node because of incorrect cluster setup. The correct cluster setup requires copying the same package on all cluster nodes.

**Action** Check if the package containing the listener is loaded properly. Verify if the WmART package dependency is set properly.

**FAC\_LISTENER+ALIS3312 – MSGPREFIX\_LISTENER+"unable to activate the listener {0}. "**

**Explanation** When a listener becomes disabled on an active node, another node becomes active. The system returns the exception if an unexpected error occurs during that process.

**Action** Check the error log and try enabling the listener manually later on the node on which the failure occurred.

**FAC\_LISTENER+ALIS3313 – MSGPREFIX\_LISTENER+"Unable to perform the listener failover since the listener node {0} is not available."**

**Explanation** The error occurs during failover handling of a node when the active node is down, if the corresponding listener node is not available.

**Action** Check whether the package with the corresponding listener node is enabled and active. If not, try enabling the package.

**FAC\_LISTENER+ALIS3314 – MSGPREFIX\_LISTENER+"Unable to perform the listener failover due to an error while accessing the listener state cache."**

**Explanation** This error occurs during failover handling of a node when the active node is down, if the listener state is not accessible from the Terracotta cache.

**Action** If all nodes throw the same exception, try enabling the listener manually on any of the nodes.

**FAC\_LISTENER+ALIS3315 – MSGPREFIX\_LISTENER+"Unable to synchronize the listener {0} across the cluster since the shared cache isn't available."**

**Explanation** In a clustered environment, shared cache is used to synchronize the state of the listeners. The error occurs when the shared cache is not available.

**Action** Check the connection of the shared cache server to the specified Integration Server node.

**FAC\_NOTIFICATION+ANOT3132 – MSGPREFIX\_NOTIFICATION+"Unable to set Publish Event status. Missing parameter: {0}"**

**Explanation** The Notification name input parameter is missing.

**Action** Specify the notification name for which you want to set the Publish Event status.

**FAC\_NOTIFICATION+ANOT3133 – MSGPREFIX\_NOTIFICATION+"Unable to set Publish Event status. Notification not found: {0}"**

**Explanation** The specified notification does not exist.

**Action** Check if the notification with the specified name exists in the system.

**FAC\_NOTIFICATION+ANOT3136 – MSGPREFIX\_NOTIFICATION+"Notification 'Disable' request is not initiated by any user explicitly."**

**Explanation** The polling notification is not disabled explicitly by any user. It was disabled automatically due to an error.

**Action** Check the stack trace in the error log to find out the point at which the notification 'disable' operation was triggered.

**FASHHASH\_NOSUCHELEMENT – FastHashEnumerator**

**FFP.0001.9001E Child at index [{0}] is cannot be added to this row.**

**Explanation** The Integration Server encountered an internal error.

**Action** Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.

**FFP.0001.9002E Cannot add child**

**Explanation** The Integration Server encountered an internal error.

**Action** Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.

<b>FFP.0001.9003E</b>	<b>Cannot add child</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9004E</b>	<b>Cannot put a record inside another record</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9005E</b>	<b>Cannot add unknown type to a record</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9006E</b>	<b>Fields cannot have children</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9007E</b>	<b>Composites cannot contain composites</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.

---

<b>FFP.0001.9008E</b>	<b>Cannot add record to a composite</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9009E</b>	<b>Cannot add unknown type to a composite</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9010E</b>	<b>Cannot add child</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9011E</b>	<b>Cannot add children to detail view</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9012E</b>	<b>Cannot add children to detail view</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.

- FFP.0001.9013E      Cannot add child of type: {0}**  
**Explanation**      The Integration Server encountered an internal error.  
**Action**              Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.
- FFP.0001.9014E      The first child of the Record Usage must be the Record Definition**  
**Explanation**      The Integration Server encountered an internal error.  
**Action**              Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.
- FFP.0001.9015E      Cannot set the children of a usage node. The only child is the used node definition**  
**Explanation**      The Integration Server encountered an internal error.  
**Action**              Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
- FFP.0001.9016E      Node is not editable**  
**Explanation**      The Integration Server encountered an internal error.  
**Action**              Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
- FFP.0001.9017E      Cannot modify the children of a reference**  
**Explanation**      The Integration Server encountered an internal error.  
**Action**              Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.

---

<b>FFP.0001.9018E</b>	<b>Cannot add child. Child must be of type: {0}</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9019E</b>	<b>Cannot add node, node with name {0} already exists</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9020E</b>	<b>Cannot edit a broken link</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support. Keep the following information handy before contacting the Software AG Global Support: server and error logs, a copy of the Support Action Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FFP.0001.9021E</b>	<b>Server cannot be null</b>

<b>FPL.0001.0000E</b>	<b>Error processing Cleanup service: {0}</b>
<b>Explanation</b>	An error occurred during the execution of the user-specified cleanup service.
<b>Action</b>	Check the server error log for more detailed information. This error is most likely caused by an exception that occurred in the user-written, cleanup service, which is identified in the message.
<b>FPL.0001.0001E</b>	<b>Listener key not provided. Cleanup service not running</b>
<b>Explanation</b>	Internal Error
<b>Action</b>	Contact Software AG Global Support. Please have the following information available: server and error logs, a copy of the Support Information page from the Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FPL.0001.0002E</b>	<b>Cleanup service access denied. User {0} not allowed to run service {1}</b>
<b>Explanation</b>	The user specified in the message attempted to run the service specified in the message, but the user does not have the privileges required to run the service.
<b>Action</b>	Modify the "Run services as user" parameter on the file polling listener configuration page to specify a user that has the appropriate privileges. Make certain that the user you specify has the permissions to execute the processing service.
<b>FPL.0001.0003E</b>	<b>Error processing service: {0}</b>
<b>Explanation</b>	An error occurred during the execution of the user-specified cleanup service.
<b>Action</b>	Check the server error log for more detailed information. This error is most likely caused by an exception that occurred in the user-written cleanup service, which is identified in the message.

<b>FPL.0001.0004E</b>	<b>Could not delete file: {0} - {1}</b>
<b>Explanation</b>	An error occurred while attempting to delete the specified file.
<b>Action</b>	Check the file system to determine why the specified file has not been deleted. It might be necessary to delete the file manually.
<b>FPL.0001.0012E</b>	<b>Could not move source file {0} to working directory {1}</b>
<b>Explanation</b>	The system was unable to move the file from the monitoring directory to the working directory.
<b>Action</b>	On a Windows operating system this can be normal behavior because the operating system will not allow a file to be moved while the file is being written to. For Windows, this is an error if the file listed is never processed. On a non-Windows operating system, this error might occur because the source and destination directories are on different file systems. Specify the source and destination directories to be on the same file system.
<b>FPL.0001.0013E</b>	<b>Error processing monitoring file. {0}.</b>
<b>Explanation</b>	An error occurred during the execution of the user-specified processing service.
<b>Action</b>	Check the server error log for more detailed information. This error is most likely caused by an exception that occurred in the user-written cleanup service, which is identified in the message.
<b>FPL.0001.0014E</b>	<b>Error processing cleanup. {0}.</b>
<b>Explanation</b>	An error occurred during the execution of the user-specified cleanup service.
<b>Action</b>	Check the server error log for more detailed information. This error is most likely caused by an exception that occurred in the user-written cleanup service, which is identified in the message.
<b>FPL.0001.0020E</b>	<b>Could not get canonical path for monitoring directory: {0} - {1}</b>
<b>Explanation</b>	The system could not obtain the canonical path for the monitoring directory, which is identified in the message. The message also displays the reason.
<b>Action</b>	Take the appropriate action based on the reason for the error shown in the message.
<b>FPL.0001.0030E</b>	<b>Error processing file: {0}</b>
<b>Explanation</b>	An error occurred during the execution of the user-specified processing service.
<b>Action</b>	Check the server error log for more detailed information. This error is most likely caused by an exception that occurred in the user-written cleanup service, which is identified in the message.

---

<b>FPL.0001.0031E</b>	<b>Listener key not provided. File polling listener not running</b>
<b>Explanation</b>	Internal Error
<b>Action</b>	Contact Software AG Global Support. Please have the following information available: server and error logs, a copy of the Support Information page from Developer, and the contents of the packages\WmFlatFile\config directory.
<b>FPL.0001.0032E</b>	<b>File polling processing service access denied. User {0} not allowed to run service {1}</b>
<b>Explanation</b>	The specified user does not have privileges to run the specified service.
<b>Action</b>	Modify the "Run services as user" parameter in the file polling listener configuration page to specify a user that has the appropriate privileges. Make certain that the user you specify has the permissions to execute the processing service.
<b>FPL.0001.0033E</b>	<b>Error processing service: {0}</b>
<b>Explanation</b>	An error occurred during the execution of the user-specified processing service.
<b>Action</b>	Check the server error log for more detailed information. This error is most likely caused by an exception that occurred in the user-written cleanup service, which is identified in the message.
<b>FPL.0001.0034E</b>	<b>Could not move file to finished directory. {0}</b>
<b>Explanation</b>	The system was unable to move the file from the working directory to the finished directory.
<b>Action</b>	On a Windows operating system this can be normal behavior because the operating system will not allow a file to be moved while the file is being written to. For Windows, this is an error if the file listed is never processed. On a non-Windows operating system, this error might occur because the source and destination directories are on different file systems. Specify the source and destination directories to be on the same file system.
<b>FPL.0001.0035</b>	<b>File polling processing service indicated error - [{0}]</b>
<b>Explanation</b>	The processing service flagged an error to indicate there is an error.
<b>Action</b>	No action is required.
<b>FPL.0001.0036</b>	<b>File polling processing file: {0}</b>
<b>Explanation</b>	The indicated file is being processed.
<b>Action</b>	No action is required.

<b>FPL.0001.0037E</b>	<b>Could not rename file {0} to {1}.</b>
<b>Explanation</b>	The system was unable to move the file from the monitoring directory to the working directory.
<b>Action</b>	On a Windows operating system this can be normal behavior because the operating system will not allow a file to be moved while the file is being written to. For Windows, this is an error if the file listed is never processed. On a non-Windows operating system, this error might occur because the source and destination directories are on different file systems. Specify the source and destination directories to be on the same file system.
<b>FPL.0002.0001E</b>	<b>Invalid processing service: {0}</b>
<b>Explanation</b>	The specified processing service does not exist.
<b>Action</b>	Specify a service name that exists on the Integration Server.
<b>FPL.0002.0002</b>	<b>No such service: {0}</b>
<b>FPL.0002.0003E</b>	<b>Unknown content type: {0}</b>
<b>Explanation</b>	No content handler is defined for the given content type.
<b>Action</b>	Specify a content type for which a content handler has been defined or define a content handler for the specified content type. For more details, see the Javadoc for the class <code>com.wm.app.b2b.server.ServerAPI</code> .
<b>FPL.0002.0004E</b>	<b>Server Error: {0}</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Global Support. Please have the following information available: server and error logs, a copy of the Support Information page from the Developer, and the contents of the <code>packages\WmFlatFile\config</code> directory.
<b>FPL.0002.0005E</b>	<b>Invalid Cleanup service: {0}</b>
<b>Explanation</b>	The specified processing service does not exist.
<b>Action</b>	Specify a service name that exists on the Integration Server.
<b>FPL.0003.0001E</b>	<b>Must provide Monitoring Directory</b>
<b>Explanation</b>	No monitor directory was specified.
<b>Action</b>	Specify a monitor directory.

---

<b>FPL.0003.0004E</b>	<b>Monitoring Directory does not exist</b>
<b>Explanation</b>	The monitoring directory does not exist.
<b>Action</b>	Create the monitoring directory.
<b>FPL.0003.0005E</b>	<b>Working Directory does not exist</b>
<b>Explanation</b>	The working directory does not exist.
<b>Action</b>	Create the working directory.
<b>FPL.0003.0006E</b>	<b>Must provide User Name</b>
<b>Explanation</b>	The user did not specify a value for the input "Run services as user".
<b>Action</b>	Specify a user to run the service as.
<b>FPL.0003.0007E</b>	<b>Must provide Processing service</b>
<b>Explanation</b>	The processing service was not specified.
<b>Action</b>	Specify a processing service.
<b>FPL.0003.0008E</b>	<b>Invalid processing service {0}</b>
<b>Explanation</b>	The specified processing service does not exist.
<b>Action</b>	Specify a service name that exists on the webMethods Integration Server.
<b>FPL.0003.0009E</b>	<b>Monitor Directory {0} does not exist</b>
<b>Explanation</b>	The monitor directory does not exist.
<b>Action</b>	Create the monitor directory.
<b>FPL.0003.0010E</b>	<b>Completion Directory does not exist or can not be created</b>
<b>Explanation</b>	The completion directory does not exist or cannot be created.
<b>Action</b>	Determine whether the server has permissions to create the indicated directory, or create the directory manually.
<b>FPL.0003.0011E</b>	<b>Error Directory does not exist or can not be created</b>
<b>Explanation</b>	The error directory does not exist or cannot be created.
<b>Action</b>	Determine whether the server has permissions to create the indicated directory, or create the directory manually.

<b>FPL.0003.0012E</b>	<b>Invalid Cleanup service {0}</b>
<b>Explanation</b>	The specified clean up service does not exist.
<b>Action</b>	Specify a clean up service that exists on the webMethods Integration Server.
<b>FPL.0003.0013E</b>	<b>Invalid Working Directory</b>
<b>Explanation</b>	The specified working directory is the same as either the monitoring directory or the completion directory.
<b>Action</b>	Specify a working directory that is not the same as the completion or monitoring directories.
<b>FPL.0003.0015E</b>	<b>Invalid Error Directory</b>
<b>Explanation</b>	The specified error directory is the same as either the monitoring directory or the completion directory.
<b>Action</b>	Specify an error directory that is not the same as the completion or monitoring directories.
<b>FPP.0100.0001</b>	<b>No condition string defined for the conditional validator.</b>
<b>FPP.0100.0004</b>	<b>Internal Error: Unable to handle type: {0}.</b>
<b>FPP.0100.0005</b>	<b>Unable to handle recordIdentifier of type: {0}.</b>
<b>FPP.0100.0006</b>	<b>Code list validator contained no valid choices</b>
<b>FPP.0100.0007</b>	<b>Composite does not contain any subfields.</b>
<b>FPP.0100.0008</b>	<b>Cannot contain both a definition and a reference.</b>
<b>FPP.0100.0009</b>	<b>A &lt;RecordElement&gt; tag cannot have both a &lt;CompositeUsage&gt; and a &lt;FieldUsage&gt; tag</b>

---

FPP.0100.0010	A field can only have one validator
FPP.0100.0011	A field can only have one extractor
FPP.0100.0012	Too many record parsers defined. A <RecordParser> tag can only contain one record parser.
FPP.0100.0013	Too many record identifiers defined. A <RecordIdentifier> tag can only contain one record identifier.
FPP.0100.0014	Flat file schema must have a record identifier defined.
FPP.0100.0015	Flat file schema must have a record parser defined.
FPP.0100.0016	Value {0} must be integer greater than or equal to zero.
FPP.0100.0017	<MaxOccur> value must be either "Unlimited" or a positive integer greater than zero. `{0}` is not a valid value.
FPP.0100.0018	<Position> value must be either "NoPosition" or an integer. `{0}` is not a valid value.
FPP.0100.0019	<Area> must be either "NoArea" or a positive integer greater than zero. `{0}` is not a valid value.
FPP.0100.0020	Value {0} must be integer greater than or equal to one.
FPP.0100.0021	Either <{0}> or <{1}> is required.
FPP.0100.0022	The end position ({1}) must be greater than the start position ({0}).

- FPP.0100.0023**      **The flat file schema has no records defined.**
- FPP.0100.0024**      **This element contains a reference to the flat file dictionary {0}, which does not exist**
- FPP.0100.0025**      **The {0} entry called {1} in flat file dictionary {2} in package {3} could not be found**
- FPP.0100.0026**      **Record has no fields or composites defined**
- FPP.0100.0027**      **Must have a record delimiter defined when using delimited record parser**
- FPP.0100.0028**      **Must have a field delimiter defined when using Nth field extractors**
- FPP.0100.0029**      **Must have a subfield delimiter defined when using composite extractors**
- FPP.0100.0030**      **Element has no extractor defined**
- FPU.0002.0001**      **Unable to load resource bundle: {0}**
- FTP\_CMD\_ERR**      **Command {0} failed**
- IMPROPER\_URI\_AND\_XMLOBJECTID** – **The uri provided must be #{0} as [#idXmlObject] for an enveloping signature.**
- INCORRECT\_SIGNATURE\_TYPE** – **The signature cannot be both enveloped and detached.**
- INT\_XASTORE\_NULL** **The XA store could not be initialized.**
- INVALID\_ALLOW\_HOSTNAME** – **Invalid character/s found in host name, {0}, in IP Access Allow list.**

**INVALID\_CARDINALITY** – Invalid range "{0}" specified for cardinality.

**INVALID\_COPY\_MODE** Invalid Copy Mode "{0}".

**INVALID\_DES\_TRIGGER\_DUP\_DETECTION** – DES triggers do not support the duplicate document detection feature in this release.

**INVALID\_DES\_TRIGGER\_MULTI\_DEST** – DES triggers cannot specify more than one condition or more than one document type within a condition.

**INVALID\_DES\_TRIGGER\_SERIAL** – DES triggers do not support serial processing mode in this release.

**INVALID\_FIELD\_NAME\_UM** – Cannot create field "{0}" in publishable document type "{1}"; this field name is not valid for use with protocol buffer encoding. The Universal Messaging provider will transport the field contents, which will be visible to Integration Server clients only.

**INVALID\_FOR\_EACH\_COPY\_PATH** – Invalid Copy inside For Each.

**INVALID\_JOIN\_TYPE** Invalid Join type

**INVALID\_KEYSTORE\_ALIAS** – {0} alias is invalid. Only letters, numbers and underscores are allowed

**INVALID\_KEYSTORE\_LOCATION** – Location ({0}) does not exist

**INVALID\_KEYSTORE\_PROVIDER** – {0} is not a registered security provider

**INVALID\_KEYSTORE\_TYPE** – {0} is not a supported Keystore type

**INVALID\_TRIGGER\_MIXED\_ALIASES** – webMethods Messaging trigger {0} is invalid. All document types in the trigger must use the same alias.

**INVALID\_XML\_CHARACTER – The character {0} is not allowed in XML.**

**INVOKE\_IFCNAME\_MISSING – Service interface name required.**

**INVOKE\_SVCNAME\_MISSING – Service name required.**

**IS.0088.9446E      Access denied to use the web service endpoint alias {0}.**  
**Explanation**      User does not have permission to use the specified web service endpoint alias.  
**Action**              Using the Integration Server Administrator, examine the Execute ACL property of the web service endpoint alias. Make sure that the current user has the proper ACL to use the web service endpoint alias.

**ISC.0006.0004S      Error in SSL setup: {0}**  
**Explanation**      The server cannot configure SSL listener or SSL Sockets connections, most likely because of a problem with the SSL configuration settings.  
**Action**              Review the exception message in the log and correct the configuration.

**ISC.0006.0006I      SSL listener restricted to 128 bit or better encryption.**  
**Explanation**      Integration Server configuration properties watt.net.ssl.client.strongcipheronly or watt.net.ssl.server.strongcipheronly or both are set to "true".  
**Action**              No action is necessary. This message indicates that Integration Server is using strong encryption.

**ISC.0006.0013E      Peer certificate chain is not present**  
**Explanation**      Integration Server cannot retrieve the peer certificate chain from a client.  
**Action**              Update your client program so that it provides a valid peer certificate to Integration Server.

**ISC.0006.0014E      SSL handshake failed on port {0} because peer certificate is not in IS Certificate Map, transfer is terminated**  
**Explanation**      While trying to connect to Integration Server, a client presented a certificate that is not contained in the store of client certificates that are mapped to Integration Server users.  
**Action**              To import the client certificate to Integration Server and map it to a valid user, go to the Integration Server Administrator and click Security>Certificates>Configure Client Certificates. For additional information about certificate mapping, refer to the webMethods Integration Server documentation.

---

<b>ISC.0006.0015E</b>	<b>Peer certificate chain is not trusted</b>
<b>Explanation</b>	While trying to connect to Integration Server, a client presented a certificate that is not trusted by Integration Server.
<b>Action</b>	Add the certificate to the trusted certificates directory for Integration Server. The name of this directory is specified on the Integration Server Administrator under Security>Certificates. For more information about trusted certificates, refer to the webMethods Integration Server documentation.
<b>ISC.0006.0016E</b>	<b>SSL handshake failed on port {0}, transfer is terminated</b>
<b>Explanation</b>	An IOException occurred during the SSL handshake portion of a client's attempt to connect to Integration Server at the indicated port.
<b>Action</b>	Check the server log and error log for possible causes for the error.
<b>ISC.0006.0017S</b>	<b>Error in adding trusted certificates: {0}</b>
<b>Explanation</b>	The Integration Server failed to add the specified CA certificate because it is not in the correct format. The CA certificate must be DER or PEM encoded.
<b>Action</b>	Check the certificate format. Configure CA certificates in DER or PEM format.
<b>ISC.0006.0018S</b>	<b>Error in initializing certificate chain verifier: {0}</b>
<b>Explanation</b>	An error occurred when Integration Server initialized the certificate chain verifier while setting up the specified secure listener.
<b>Action</b>	Check the server log and error log to determine the cause of the error.
<b>ISC.0006.0019W</b>	<b>Not including Cipher {0} because it is not a strong Cipher.</b>
<b>Explanation</b>	Integration Server generates this warning when either the watt.net.ssl.server.strongcipheronly or watt.net.ssl.client.strongcipheronly property is set to "true", and if any of the ciphers identified in either the watt.net.ssl.client.cipherSuiteList or watt.net.ssl.server.cipherSuiteList property are weak.
<b>Action</b>	To stop receiving this warning, remove the specified cipher from the watt.net.ssl.server.cipherSuiteList or watt.net.ssl.client.cipherSuiteList property.
<b>ISC.0006.0020W</b>	<b>Cipher ({0}) is not a valid CipherSuiteList.</b>
<b>Explanation</b>	A CipherSuite specified as a value to either the watt.net.ssl.client.cipherSuiteList or watt.net.ssl.server.cipherSuiteList property is not valid. The invalid CipherSuite is shown in the log message.  One of the CipherSuite that is specified as a value to either watt.net.ssl.client.cipherSuiteList or watt.net.ssl.server.cipherSuiteList property is not a valid CipherSuite. The invalid CipherSuite is shown in the log message.

<b>Action</b>	Remove the invalid CipherSuite.
<b>ISC.0009.0012E</b>	<b>Failed to create certificate: {0}</b>
<b>Explanation</b>	The certificate specified in the Configure Client Certificates settings has a bad X509Certificate format.
<b>Action</b>	Make sure that the .der file specified in Configure Client Certificates settings is valid.
<b>ISC.0009.0014E</b>	<b>A certificate with the same issuer, serial number and usage is already mapped to user {0}.</b>
<b>Explanation</b>	For a given usage type, only one user can be mapped to a certificate with the same issuer and serial number.
<b>Action</b>	To reassign this certificate to different user, edit the previously mapped certificate and change the user.
<b>ISC.0009.0015E</b>	<b>The certificate is already mapped to user {0}.</b>
<b>Explanation</b>	Integration Server failed to map the client certificate to the user because the client certificate is already mapped to the user specified.
<b>Action</b>	To reassign this certificate to different user, edit the previously mapped certificate and change the user.
<b>ISC.0009.0016E</b>	<b>The ISInternal functional alias is not configured properly on the JDBC Pools page. Assign a valid database pool and restart the Integration Server.</b>
<b>Explanation</b>	Integration Server failed to initialize client certificate mappings because it could not access the ISInternal JDBC Pool.
<b>Action</b>	Assign a valid database pool to ISInternal JDBC functional alias and restart the Integration Server.
<b>ISC.0009.0017W</b>	<b>Certification chain trust verification failed.</b>
<b>Explanation</b>	At least one of the certificates present in the certificate chain is not trusted by Integration Server.
<b>Action</b>	Check the certificate chain presented to Integration Server for trust verification.
<b>ISC.0009.9001E</b>	<b>Certificate chain broken: not linked properly</b>
<b>Explanation</b>	The certificate chain is out of order.
<b>Action</b>	Obtain a valid certificate chain.

---

<b>ISC.0009.9003E</b>	<b>Certificate contains an unsupported critical extension</b>
<b>Explanation</b>	When <code>watt.security.cert.wmChainVerifier.enforceExtensionsChecks</code> property is set to "true", Integration Server checks the presented certificate for unsupported critical extensions. If Integration Server finds a certificate containing unsupported critical extensions, it will reject the certificate and fail the request.
<b>Action</b>	If you enabled Integration Server to perform a certificate extensions check, advise your clients to use certificates that do not contain unsupported critical extensions. Whether Integration Server enforces a certificate check is configured on the <code>watt.security.cert.wmChainVerifier.enforceExtensionsChecks</code> configuration property.
<b>ISC.0009.9004E</b>	<b>Certificate issued to {0} has expired</b>
<b>Explanation</b>	Unless configured to ignore expired certificates, Integration Server will reject any expired certificates. Whether Integration Server ignores expired certificates is configured on the <code>watt.security.ssl.ignoreExpiredChains</code> configuration property.
<b>Action</b>	Review the server log to see which client's certificate has expired. That client should renew their certificates and resubmit the request with the valid certificate.
<b>ISC.0009.9102E</b>	<b>User does not exist for certificate : {0}.</b>
<b>Explanation</b>	The user associated with the imported client certificate in Integration Server has been deleted.
<b>Action</b>	Ensure that all imported client certificates in Integration Server are associated with a user. If you have deleted the user associated with a client certificate, you can take one of the following actions:  1) Modify the certificate mapping using Security > Certificates > Client Certificates > Details > Change Mapping in the Integration Server Administrator.  2) Add a user with the same name as the deleted user that was associated with the imported client certificate.
<b>ISC.0012.0040E</b>	<b>OSGi service for SAML authentication not initialized.</b>
<b>Explanation</b>	There was a problem while attempting to access Integration Server from the Command Central user interface.
<b>Action</b>	Check the logs located in the <code>Software_AG_directory/profiles/IS/logs</code> directory and make sure that no errors were encountered during the initialization of the OSGi service specified in the error message.

- ISC.0012.0041E**      **Unable to initialize SAML authentication module. Cannot get reference of the OSGi service {0}.**
- Explanation**      There was a problem while attempting to access Integration Server from the Command Central user interface.
- Action**            Check the logs located in the Software\_AG\_directory/profiles/IS/logs directory and make sure that no errors were encountered during the initialization of the OSGi service specified in the error message.
- 
- ISC.0012.0042E**      **Error while adding Integration Live user: {0}. Error message: {1}. Stack trace: {2}**
- Explanation**      An unexpected error occurred while adding an Integration Live user.
- Action**            Contact Software AG Global Support. Please have the following information available: system and setup specifics, journal logs, and error logs with the stack trace exposed.
- 
- ISC.0012.0044E**      **Unable to get SAML assertion from REST URL {0} because of exception: {1}**
- Explanation**      An error occurred while retrieving the SAML assertion from REST URL. Refer to the error message text for more details.
- Action**            Verify the REST URL and ensure that the REST service exists to generate SAML assertion.
- 
- ISC.0018.0001U**      **Unable to read MIME types file**
- Explanation**      During startup, Integration Server was unable to read the MIME types from the file "mime.types", which is located on the <IntegrationServer\_dir>\lib directory. The most likely reason is that this file is corrupted.
- Action**            Contact Software AG Global Support for a copy of this file.
- 
- ISC.0018.0002**      **Deleted group {0} was removed from {1} ACL lists**
- 
- ISC.0018.9301E**      **Unlocking thread is not owner**
- 
- ISC.0018.9401E**      **target directory does not exist**
- Explanation**      Directory specified to make the tar (zip) file does not exist in the file system.
- Action**            Ensure that the directory exists in the file system.

---

<b>ISC.0018.9402E</b>	<b>target is not a directory</b>
<b>Explanation</b>	Only directories can be zipped. The File name field do not contain the path to a directory.
<b>Action</b>	Ensure that the File name field contains the path to a directory.
<b>ISC.0018.9403E</b>	<b>extraction target is not a directory</b>
<b>Explanation</b>	File name specified to extract a tar file is not a directory. A tar file can be extracted only to a directory.
<b>Action</b>	Enter the directory to which the tar file is to be extracted.
<b>ISC.0018.9404E</b>	<b>field length exceeded: {0} &gt; {1} ({2})</b>
<b>Explanation</b>	Integration Server encountered an internal error while adding a file to tar file.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0018.9405E</b>	<b>expected {0} bytes but got {1}</b>
<b>Explanation</b>	While adding a file to a tar archive, the number of bytes added to the archive is less than the actual size of the file.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0018.9406E</b>	<b>No Tar Entry specified</b>
<b>Explanation</b>	No directory is provided for zipping.
<b>Action</b>	Ensure that a directory is provided for zipping.
<b>ISC.0018.9407E</b>	<b>data length is greater than entry specification: {0}</b>
<b>Explanation</b>	Integration Server encountered an internal error while adding a file to the tar file.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0037.0001</b>	<b>Unable to Initialize {0}</b>
<b>ISC.0037.0002</b>	<b>Unable to Shutdown {0}</b>

ISC.0037.0005	<b>Unable to reset job manager {0}</b>
ISC.0037.0006	<b>Unable to reset logfile {0}</b>
ISC.0037.0007	<b>Unable to reset logstream {0}</b>
ISC.0037.0012	<b>Unable to accept requests</b>
ISC.0037.9101E	<b>Guaranteed Delivery Disabled - Please correct error and reinitialize</b>
ISC.0042.0002E	<b>Unsupported Encoding: {0}</b>
<b>Explanation</b>	Integration Server did not recognize the encoding of the document. Therefore, the default encoding will be used.
<b>Action</b>	If Integration Server successfully uses the default encoding, no action is necessary. Otherwise, change the supplied document so that it has a valid encoding.
ISC.0042.9001	<b>Cannot uniquely identify the root element : Every element may be contained in at least one other element -- Try loading the DTD from a sample XML document having a DOCTYPE declaration.</b>
ISC.0042.9002	<b>Cannot uniquely identify the root element : Multiple elements are topmost elements ({0}) -- Try loading the DTD from a sample XML document having a DOCTYPE declaration.</b>
ISC.0042.9003	<b>&lt;{ELEMENT {0} {1}&gt; contains the following error at character {2} of the contentspec: {3}</b>
ISC.0042.9005U	<b>URI {0} not declared at node {1}</b>
<b>Explanation</b>	webMethods Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.

---

<b>ISC.0042.9006U</b>	<b>Node reference is null</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0042.9007U</b>	<b>Node is not XML</b>
<b>Explanation</b>	The pub.xml:getXMLNodeIterator service failed to execute because the node object supplied was not an XML node.
<b>Action</b>	Examine the service input and make sure the "node" parameter represents an XML node, not an HTML node.
<b>ISC.0042.9008U</b>	<b>Moving window mode is only available when iterating over XML nodes</b>
<b>Explanation</b>	The pub.xml:getXMLNodeIterator service failed to execute because the XML node supplied did not represent a whole XML document.
<b>Action</b>	Examine the service input and make sure the "node" parameter represents an entire XML document, not an element of an XML document.
<b>ISC.0042.9009U</b>	<b>Moving window mode is not available with SAX parsers</b>
<b>Explanation</b>	The pub.xml:getXMLNodeIterator service failed to execute because the moving window mode is not available with SAX parsers.
<b>Action</b>	Switch to the webMethods parser instead of the SAX parser.
<b>ISC.0042.9011U</b>	<b>SAX parsers do not expose enough DTD info; try selecting the expandDTD option</b>
<b>Explanation</b>	The pub.xml:loadXMLNode service failed to execute because it used a SAX parser. Integration Server does not support SAX parsers because they do not expose enough DTD information.
<b>Action</b>	Switch to the webMethods parser instead of the SAX parser.
<b>ISC.0042.9012U</b>	<b>First node of region not found in node parameter</b>
<b>Explanation</b>	The pub.web:createRegions service failed to execute because the "regions" parameter did not correctly specify the first node of the region.
<b>Action</b>	Examine the service input for the "regions" parameter and check the query specified for identifying the first node. Make sure the query specified will correctly identify the first node.

<b>ISC.0042.9013U</b>	<b>Last node of region not found in node parameter</b>
<b>Explanation</b>	The pub.web:createRegions service failed to execute because the "regions" parameter did not correctly specify the last node of the region.
<b>Action</b>	Examine the service input for the "regions" parameter and check the query specified for identifying the ending node. Make sure the query specified will correctly identify the ending node.
<b>ISC.0049.0001</b>	<b>Branch {0}: child {1} not found, default child not found for switch {2}</b>
<b>ISC.0049.0002</b>	<b>Branch {0}: child {1} not found, invoking default child {2}</b>
<b>ISC.0049.0010</b>	<b>Loop {0}: in-array {1} is not an array type.</b>
<b>ISC.0049.0012</b>	<b>Set: invalid encoding: {0}</b>
<b>ISC.0049.0013E</b>	<b>Set: {0}</b>
<b>Explanation</b>	While saving or loading a flow service, Integration Server encountered a problem with the base64 encoding of a Map operation.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0049.0015</b>	<b>Loop {0}: out-array is not the same length as in-array.</b>
<b>ISC.0049.0016</b>	<b>Flow timed-out at {0}</b>
<b>ISC.0049.0018</b>	<b>Branch {0}: no expressions evaluated true and no default child found</b>
<b>ISC.0049.0019</b>	<b>Branch {0}: no expressions evaluated true, but default child found</b>
<b>ISC.0049.9001E</b>	<b>FlowExit "{0}" -- no valid ancestor to exit from \$loop</b>
<b>Explanation</b>	In a flow service, the Exit operation failed because an ancestor loop was not found.
<b>Action</b>	Move the Exit operation to be a child of a Loop or Repeat step. Alternatively, set the exit-on property for the Exit operation to a value other than \$loop.

---

<b>ISC.0049.9002E</b>	<b>get: complex path is not supported</b>
<b>Explanation</b>	A flow service tried to perform a get operation on a complex path, but Integration Server does not support complex path types. This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0049.9003E</b>	<b>put: complex path is not supported</b>
<b>Explanation</b>	A flow service tried to perform a put operation on a complex path type, but Integration Server does not support complex path types. This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0049.9004E</b>	<b>delete: complex path is not supported</b>
<b>Explanation</b>	A flow service tried to perform a delete operation on a complex path, but Integration Server does not support complex path types. This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0049.9005E</b>	<b>Input validation for service "{0}" failed: "{1}"</b>
<b>Explanation</b>	During service execution, Integration Server detected that the contents of the pipeline did not conform to the defined input signature of the service.
<b>Action</b>	Ensure that the inputs in the pipeline match the input signature of the flow service, or disable input validation for this service.
<b>ISC.0049.9006E</b>	<b>Output validation for service "{0}" failed: "{1}"</b>
<b>Explanation</b>	Upon completion of a service, Integration Server detected that the contents of the pipeline did not conform to the defined output signature .
<b>Action</b>	Ensure that the outputs in the pipeline match the defined output signature or disable output validation for this service.
<b>ISC.0049.9007E</b>	<b>Failure creating input validator for "{0}"</b>
<b>Explanation</b>	During execution of a flow service, Integration Server determined that it could not create an input Validator from the parameters provided.
<b>Action</b>	Contact Software AG Global Support.

<b>ISC.0049.9008E</b>	<b>Failure creating output validator for "{0}"</b>
<b>Explanation</b>	During execution of a Flow service, Integration Server determined that it could not create an output Validator from the parameters provided. This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0049.9009E</b>	<b>Missing required property 'switch' at "{0}"</b>
<b>Explanation</b>	The Branch step has no switch property value.
<b>Action</b>	Specify the name of an pipeline object that is to be used as the switch value for the Branch step.
<b>ISC.0049.9010E</b>	<b>Service "{2}" invoking unknown service "{1}" at "{0}". The service may have been renamed, moved or disabled.</b>
<b>Explanation</b>	The failing flow service attempted to execute another service that could not be located or could not be executed. The most likely cause is that the target service has been removed or renamed.
<b>Action</b>	Determine the new name or location of the target service and modify the failing flow service to correctly identify the target service.
<b>ISC.0049.9011E</b>	<b>Missing required property 'in-array' at "{0}"</b>
<b>Explanation</b>	The Loop step has no input array property.
<b>Action</b>	Specify the name of a pipeline object to use as the input array.
<b>ISC.0049.9012E</b>	<b>Cannot define 'switch' and use label conditions at "{0}"</b>
<b>Explanation</b>	Integration Server tried to execute a Branch step, but the Branch properties were specified incorrectly. Specifically, the "evaluate labels" property was set to "true" while the "switch" property specified an expression. This is not a valid combination.
<b>Action</b>	Change the Branch step properties to either specify a switch value and set "evaluate-labels" to false, or do not specify a switch value and set "evaluate-labels" to true.
<b>ISC.0049.9013E</b>	<b>Timeout at "{0}"</b>
<b>Explanation</b>	A step in a flow service exceeded its timeout value before returning.
<b>Action</b>	This is desired behavior. Examine the underlying services that did not return in time to determine the cause of the timeout.

---

<b>ISC.0049.9014E</b>	<b>Scope "{0}" not found or invalid</b>
<b>Explanation</b>	At run time, Integration Server could not resolve the scope of the pipeline in a flow step. The scope resolved to an object that was not an IData.
<b>Action</b>	Make sure that the path in the scope property resolves to an IData object at run time.
<b>ISC.0049.9015E</b>	<b>FlowExit "{0}" - label not found: "{1}"</b>
<b>Explanation</b>	In a flow service, the Exit operation failed because it could not locate the label anywhere in the ancestry of the Exit step.
<b>Action</b>	Make sure that an ancestor flow step has a label that matches the one in the Exit step.
<b>ISC.0049.9016E</b>	<b>Invalid scope path</b>
<b>Explanation</b>	At run time, Integration Server could not resolve the pipeline scope specified for a flow step because the syntax of the scope property is not valid.
<b>Action</b>	Make sure that the path syntax of the scope property is valid.
<b>ISC.0049.9017E</b>	<b>(1) Illegal path from: "{0}"</b>
<b>Explanation</b>	In the pipeline, the map path for the source or destination is empty.
<b>Action</b>	If this error occurs while editing a flow service, save the flow service and then reload it.
<b>ISC.0049.9018E</b>	<b>The path has been used: {0}</b>
<b>Explanation</b>	More than one mapping operation is being performed on a pipeline object.
<b>Action</b>	Only one operation may be performed on a pipeline object in a Map step. Remove all but one of the map operations for the pipeline object, or ensure that only one operation is attempted at run time.
<b>ISC.0049.9019I</b>	<b>More than one copy into the path with different common parent(s).</b>
<b>Explanation</b>	When mapping data in the pipeline, under a single Map step, you tried to map from documents to two different document fields under a common parent. However, the source documents have different dimensions.
<b>Action</b>	Separate the data mapping into two different Map steps.

<b>ISC.0049.9022E</b>	<b>Data type does not match the path.</b>
<b>Explanation</b>	A pipeline mapping operation specifies a target type that does not match the source type at run time.
<b>Action</b>	Ensure that the source type at run time matches the target type specified by the map operation.
<b>ISC.0049.9024E</b>	<b>Cannot make the copy from: {0} to: {1}</b>
<b>Explanation</b>	While executing mapping in a flow step, Integration Server determined that it could not copy one field to another because the elements were of incompatible types.
<b>Action</b>	Make sure that the field types are compatible and have the same dimensions.
<b>ISC.0049.9025E</b>	<b>Invalid source path.</b>
<b>Explanation</b>	While trying to execute a map between fields, Integration Server determined that no source field was specified.
<b>Action</b>	In the pipeline, make sure that a source field is specified.
<b>ISC.0049.9026E</b>	<b>Invalid target path.</b>
<b>Explanation</b>	While trying to execute a map between fields, Integration Server determined that no target path was specified.
<b>Action</b>	In the pipeline, make sure that the map specifies a target destination.
<b>ISC.0049.9027E</b>	<b>Error at {0} - Transformers cannot loop over list elements</b>
<b>Explanation</b>	A Map step includes a link from an array variable in Pipeline In to a scalar input variable for a transformer.
<b>Action</b>	Do one of the following: - Remove the mapping between the array variable in Pipeline in and the scalar input variable for the transformer. - Change the service invoked by the transformer to accept arrays as data. - Create a flow service in which a LOOP step loops over the array variable. Then, (in the same flow service) invoke the service you originally wanted to use as a transformer, and make that Invoke step a child of the Loop. Finally, insert the resulting flow service as a transformer in the Map step.
<b>ISC.0049.9031E</b>	<b>Global Variable {0} does not exist.</b>
<b>Explanation</b>	The global variable that you assigned to a variable in the flow service does not exist in Integration Server.
<b>Action</b>	Ensure that global variable exists in IS, if it does not exist then contact IS Admin to add this Global Variable.

---

ISC.0050.0002	<b>Invalid pipeline mapping: Cannot map two pipeline variables into the same field.</b>
ISC.0050.0003	<b>Pipeline variable sources have different dimensions.</b>
ISC.0050.0004	<b>Copy failed: {0}; to={1}, from={2}</b>

ISC.0062.0012	<b>MakeRules.generateFlowFromDTD node parameter is null</b>
ISC.0062.0013	<b>MakeRules.generateFlowFromDTD no output signature</b>
ISC.0062.0014E	<b>QueryDocWithIdentity createFields type not supported:{0}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
ISC.0062.0015	<b>QueryDocWithIdentity createNsDecls type not supported:{0}</b>
ISC.0062.0016E	<b>queryXMLNode createFields type not supported:{0}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
ISC.0062.0017	<b>{0} createNsDecls type not supported:{1}</b>

<b>ISC.0062.0018U</b>	<b>DocumentToXMLString boundNode argument is null</b>
<b>Explanation</b>	The pub.xml:documentToXMLString service failed to execute because the required "document" parameter was missing. This parameter specifies the name of the document to be converted to XML.
<b>Action</b>	Examine the service input and make sure it specifies a value for the "document" parameter.
<b>ISC.0062.0019</b>	<b>ERROR unsupported type:{0} !!!!</b>
<b>ISC.0062.0022</b>	<b>Server encountered an unknown error: {0}</b>
<b>ISC.0062.0032</b>	<b>Invalid number format: {0}</b>
<b>ISC.0062.0033</b>	<b>Illegal parameter value. {0} is too many root elements in boundNode. Number attributes:{1}.</b>
<b>ISC.0062.0034</b>	<b>loadXMLNode called client.http pipe: {0}</b>
<b>ISC.0062.0036</b>	<b>Invalid port number {2} for {3}</b>
<b>ISC.0062.0037</b>	<b>loadXMLNode service encountered unsupported encoding: {0}</b>
<b>ISC.0062.9001U</b>	<b>boundNode parameter is null</b>
<b>Explanation</b>	The pub.xml:documentToXMLString service failed to execute because the required "document" parameter was missing.
<b>Action</b>	Examine the service input and make sure it contains the document to be converted in the form of an IData object.
<b>ISC.0062.9002U</b>	<b>Namespace prefix name "{0}" for uri {1} is not legal XML name</b>
<b>Explanation</b>	The pub.xml:documentToXMLString service failed to execute because it detected illegal characters in the namespace prefix of the document to be converted. Integration Server flags invalid characters in the namespace prefix only if the value for the "enforceLegalXML" parameter is set to "true".
<b>Action</b>	To resolve this error, do one of the following:  (1) Set the input for the "enforceLegalXML" parameter to "false". This causes the service to produce an XML fragment.

(2) Make sure the input for the "nsDecls" parameter specifies a namespace prefix that starts with a letter or the underscore "\_" character. In addition, it can only contain letters, digits, and the period ".", hyphen "-", and underscore "\_" characters.

<b>ISC.0062.9003U</b>	<b>Illegal parameter value. {0} is too many root elements in boundNode. Number attributes:{1}</b>
<b>Explanation</b>	The pub.xml:documentToXMLString service failed to execute because the document to be converted contains multiple root elements. Integration Server flags this condition only if the input for the "enforceLegalXML" parameter is set to true.
<b>Action</b>	Examine the service input and make sure the "enforceLegalXML" parameter is set to "false". This will cause the service to produce an XML fragment composed of the multiple elements that were not enclosed within a root element.
<b>ISC.0062.9004U</b>	<b>Attribute name "{0}" is not legal XML name</b>
<b>Explanation</b>	The pub.xml:documentToXMLString service failed to execute because the prefix that designates the keys that contain attributes contains illegal characters. Integration Server flags this condition only if the input for the "enforceLegalXML" parameter is set to true.
<b>Action</b>	To resolve this error, do one of the following:  (1) Set the input for the "enforceLegalXML" parameter to "false" . This will cause the service to produce an XML fragment.  (2) Make sure the input for the "attrPrefix" parameter starts with a letter or underscore "_" character. In addition, it can only contain letters, digits, and the period ".", hyphen "-", and underscore "_" characters.
<b>ISC.0062.9005U</b>	<b>Element name "{0}" is not legal XML name</b>
<b>Explanation</b>	The pub.xml:documentToXMLString service failed to execute because the document being converted contains illegal XML tag names. Integration Server flags this condition only if the input for the "enforceLegalXML" parameter is set to true.
<b>Action</b>	To resolve this error, do one of the following:  (1) Set the input for the "enforceLegalXML" parameter to "false". This causes the service to produce an XML fragment.  (2) Make sure the input for the "document" parameter starts with a letter or underscore "_" character. In addition, it can only contain letters, digits, and the period ".", hyphen "-", and underscore "_" characters.

<b>ISC.0062.9006U</b>	<b>Illegal parameter value. Document Type "{0}" not found.</b>
<b>Explanation</b>	The pub.xml:xmlNodeToDocument service failed to execute because the "documentTypeName" was specified, but the document it represents does not exist on the Integration Server namespace.
<b>Action</b>	Examine the service input and make sure the "documentTypeName" parameter specifies the fully qualified name of the document type. Remember that namespace element names are case-sensitive.
<b>ISC.0062.9007E</b>	<b>collect parameter must be null when using recordName parameter</b>
<b>ISC.0062.9008</b>	<b>MakeArrays parameter must be false when using recordName parameter</b>
<b>ISC.0062.9009</b>	<b>Arrays parameter must be null when using recordName parameter</b>
<b>ISC.0062.9010</b>	<b>Records parameter must be null when using recordName parameter</b>
<b>ISC.0062.9012</b>	<b>Internal error: no record generated by makeNSRecord</b>
<b>ISC.0062.9013</b>	<b>Internal error: no NSName generated</b>
<b>ISC.0062.9014</b>	<b>MakeRules.recursiveCollectRecordRefs found nested ContentParticleSet</b>
<b>ISC.0062.9015</b>	<b>MakeRules.findElementDef no element definitions found</b>
<b>ISC.0062.9016</b>	<b>MakeRules.findElementDef name "{0}" not found in DTD</b>
<b>ISC.0062.9017</b>	<b>XML node parameter is null</b>
<b>ISC.0062.9018</b>	<b>No NSRecord generated for package "{0}" Document Type "{1}"</b>

---

ISC.0062.9019	<b>XML node is null</b>
ISC.0062.9020	<b>Document Type "{0}" already exists.</b>
ISC.0062.9021U	<b>"object" is null</b>
<b>Explanation</b>	The object to be validated does not exist in the pipeline.
<b>Action</b>	Link an XML node or document variable to the object variable in Service In.
ISC.0062.9022U	<b>"{0}" - object does not exist</b>
<b>Explanation</b>	The document type or schema specified for the "conformsTo" parameter does not exist in the Integration Server namespace.
<b>Action</b>	Change the value of the "conformsTo" parameter to be a document type or schema that exists in the Integration Server namespace.
ISC.0062.9023U	<b>conformsTo parameter is null</b>
<b>Explanation</b>	While executing the pub.schema:validatePipeline service, the Integration Server determined that no value was specified for the "conformsTo" property, which is a required parameter. This parameter specifies the IS document or IS schema against which the Integration Server performs validation.
<b>Action</b>	Specify a value for the "conformsTo" parameter that is an IS document type or schema type that exists in the IS namespace.
ISC.0062.9024U	<b>Integration Server does not support this type of object in validation {0}</b>
<b>Explanation</b>	The object to be validated is not one of the types supported by validation.
<b>Action</b>	Currently, only XML, pipeline, and document (IData object) validation are supported.
ISC.0062.9025	<b>collect parameter must be null when using documentTypeName parameter</b>
ISC.0062.9026	<b>MakeArrays parameter must be false when using documentTypeName parameter</b>
ISC.0062.9027	<b>Arrays parameter must be null when using documentTypeName parameter</b>

- ISC.0062.9028** Documents parameter must be null when using documentTypeName parameter
- ISC.0062.9029** The schema domain of the conformsTo object must match the schemaDomain parameter
- ISC.0062.9137E** When node is an enhanced XML node, queryType must be XQL
- Explanation** The queryType input parameter is set to WQL but the node is an enhanced XML node. Only XQL can be used to query an enhanced XML node.
- Action** Set queryType to XQL and rewrite the query to use XQL instead of WQL.
- ISC.0063.0006** Generate Transaction Ids {0}

ISC.0064.0011W	<b>Invalid maxRedirects setting {0}</b>
<b>Explanation</b>	The watt.net.maxRedirects property is not valid. It must be an integer.
<b>Action</b>	Change the value of the watt.net.maxRedirects property to an integer.
ISC.0064.0012E	<b>Class not found: {0}</b>
<b>Explanation</b>	Integration Server encountered an internal error because it could not find a class in the namespace.
<b>Action</b>	Contact Software AG Global Support.
ISC.0064.0018E	<b>Unable to instantiate class: {0}</b>
<b>Explanation</b>	Integration Server encountered an internal error because it could not instantiate a class in the namespace.
<b>Action</b>	Contact Software AG Global Support.
ISC.0064.0029D	<b>Could not open Socket connection to proxy={0} Exception:{1}</b>
<b>Explanation</b>	An exception was encountered while making an FTP connection through a proxy server. See the exception for details.
<b>Action</b>	Check that the FTP proxy you are using is correctly configured on the Settings > Proxy Servers page of Integration Server Administrator.

<b>ISC.0064.0030W</b>	<b>The {0} property is not a valid integer: {1}.</b>
<b>Explanation</b>	An invalid value was specified for the property identified in the message. The value for this property must be an integer.
<b>Action</b>	Change the value of the property to an integer.
<b>ISC.0064.0031E</b>	<b>Unexpected NTLM message sequence. The expected message type is not NTLM Type 1 Message.</b>
<b>Explanation</b>	The provided NTLM authentication credentials are not valid.
<b>Action</b>	Provide valid NTLM authentication credentials.
<b>ISC.0064.9001E</b>	<b>Could not connect to ftp server: {0}</b>
<b>Explanation</b>	FTP server is not accessible.
<b>Action</b>	Ensure that the FTP server and port are valid. If FTP proxy is configured in Integration Server, ensure that the proxy settings are correct.
<b>ISC.0064.9002E</b>	<b>FTP host name or port number is not specified</b>
<b>Explanation</b>	FTP hostname cannot be null and port cannot be zero.
<b>Action</b>	Ensure that you provide valid values for FTP host and port fields.
<b>ISC.0064.9003</b>	<b>Fail to connect to FTP proxy: {0}+ port: {1}</b>
<b>ISC.0064.9004E</b>	<b>Fail to connect to FTP server: {0} port: {1}</b>
<b>Explanation</b>	Integration server is unable to access the FTP server.
<b>Action</b>	Ensure that the FTP host and port fields contain valid values. If FTP host and port fields contain valid values and if Integration Server is still unable to access FTP server, contact Software AG Global Support.
<b>ISC.0064.9005E</b>	<b>{0}</b>
<b>Explanation</b>	Credentials of the FTP user are invalid.
<b>Action</b>	Ensure that the FTP user, password, and account fields have correct and valid values. Set the log level of Network Services component (64) to 'trace' to get more details.

---

<b>ISC.0064.9006E</b>	{0}
<b>Explanation</b>	FTP proxy server that you have configured does not support the SITE command.
<b>Action</b>	Check the FTP proxy server configuration to ensure that the FTP proxy server supports the SITE command. Set the log level of Network Services component (64) to 'trace' to get more details.
<b>ISC.0064.9007E</b>	{0}
<b>Explanation</b>	FTP proxy server that you have configured does not support the OPEN command.
<b>Action</b>	Check the FTP proxy server configuration to ensure that the FTP proxy server supports the OPEN command. Set the log level of Network Services component (64) to 'trace' to get more details.
<b>ISC.0064.9008E</b>	<b>FTP PORT command failed</b>
<b>Explanation</b>	FTP server encountered an error while sending the PORT command.
<b>Action</b>	The following lists the actions you can take:  <ol style="list-style-type: none"><li>1. Ensure that the FTP server implements the PORT command.</li><li>2. Ensure that the user has the permission to execute the command.</li><li>3. If the problem still persists, contact Software AG Global Support. Set the log level of Network Services component (64) to 'trace' to get more details.</li></ol>
<b>ISC.0064.9009E</b>	<b>Invalid Data Channel</b>
<b>Explanation</b>	FTP client is not able to create a data port for listening. In FTP Active mode, client creates a port for data connection and FTP server opens a connection to the client data port.
<b>Action</b>	Ensure that the data port specified in the FTP client is available.  -OR-  Use FTP passive transfer mode.  Set the log level of Network Services component (64) to 'trace' to get more details.
<b>ISC.0064.9010E</b>	{0}
<b>Explanation</b>	FTP server is not able to connect to the data port of the client. The possible cause for this is that the data port might be blocked by a firewall on the client side.
<b>Action</b>	The following lists the actions you can take:  <ol style="list-style-type: none"><li>1. Check whether the client is behind a firewall. If yes, make sure that the firewall allows the connection from the server.</li><li>2. Use FTP passive transfer mode.</li></ol>

3. Increase the connection timeout of data port using `watt.net.ftpClientDataConnTimeout` property.

<b>ISC.0064.9012E</b>	<b>Socket close err. {0}</b>
<b>Explanation</b>	FTP server encountered an error while closing the FTP client socket.
<b>Action</b>	Contact Software AG support team.
<b>ISC.0064.9013E</b>	<b>{0}</b>
<b>Explanation</b>	FTP server is not accessible.
<b>Action</b>	Contact Software AG support team. Set the log level of Network Services component(64) to trace to get more details.
<b>ISC.0064.9014E</b>	<b>Content must be of type byte[], String or InputStream</b>
<b>Explanation</b>	The content type of the data sent to the FTP server is not of type byte array, string, or InputStream.
<b>Action</b>	Make sure that the data sent to the FTP server is of type byte array, string, or InputStream.
<b>ISC.0064.9015E</b>	<b>FTP AUTH command failed with error code {0}</b>
<b>Explanation</b>	An FTP client sent an AUTH command to establish an FTPS connection with the Integration Server, but the command failed with the indicated return code.
<b>Action</b>	Check your FTP documentation for the possible causes of the FTP return code. In addition, check the server log and error log for possible causes for the error.
<b>ISC.0064.9016E</b>	<b>FTP AUTH command failed with error {0}</b>
<b>Explanation</b>	An FTP client sent an AUTH command to establish an FTPS connection with the Integration Server, but the command failed.
<b>Action</b>	Check your FTP documentation for the possible causes of the FTP error message. In addition, check the server log and error log for possible causes for the error.
<b>ISC.0064.9017E</b>	<b>FTP PBSZ command failed with error code {0}</b>
<b>Explanation</b>	An FTP client sent a PBSZ command to establish a secure connection between the client and Integration Server, but the command failed with the indicated return code.
<b>Action</b>	Check your FTP documentation for the possible causes of the FTP error message. In addition, check the server log and error log for possible causes for the error.

<b>ISC.0064.9018E</b>	<b>FTP PROT command failed with error code {0}</b>
<b>Explanation</b>	An FTP client sent a PROT command to establish a secure connection between the client and Integration Server, but the command failed with the indicated return code.
<b>Action</b>	Check your FTP documentation for the possible causes of the FTP error message. In addition, check the server log and error log for possible causes for the error.
<b>ISC.0064.9019E</b>	<b>FTP EPRT command failed with error {0}</b>
<b>Explanation</b>	The FTP server returned an error for the EPRT command sent by the Integration Server FTP client.
<b>Action</b>	Ensure that the FTP server implements the EPRT command. Ensure that the user has the permission to execute the command. Set the log level of Network Services facility (facility number 64) to 'trace' to get more details. If the problem persists, contact Software AG Global Support.
<b>ISC.0072.0010</b>	<b>Index {0} out of bounds for key {1}</b>
<b>ISC.0072.0011</b>	<b>value missing name. key={0}</b>
<b>ISC.0072.0014</b>	<b>LoopToken.evalArray unknown array type:{0}</b>
<b>ISC.0072.0016</b>	<b>Exception:{0} executing included template.</b>
<b>ISC.0072.0017</b>	<b>IfVarToken.processArgs value:{0} index:{1} ret:{2}</b>
<b>ISC.0072.9001E</b>	<b>Unknown service: {0}</b>
<b>Explanation</b>	Integration Server encountered an internal error because it could not find a requested service in the namespace.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0072.9002E</b>	<b>Reporter died from IOException: {0}</b>
<b>Explanation</b>	The Reporter.createTemplateFromFile() class issued an error because it could not read the template from the supplied file.
<b>Action</b>	Examine the use of the Reporter class in your application and make sure that the application has proper Read access to the template file.

<b>ISC.0076.0001</b>	<b>BinCoder decode error creating IData {0}, using {1} instead. Excpt:{2}</b>
<b>ISC.0076.0002</b>	<b>BinCoder decode error creating IDataCodable {0}, using {1} instead. Excpt:{2}</b>
<b>ISC.0076.0003</b>	<b>BinCoder decode error creating Codable {0}. Excpt:{1}</b>
<b>ISC.0076.0004</b>	<b>BinCoder decode error creating as String {0}, s={1}. Excpt:{2}</b>
<b>ISC.0076.0005E</b>	<b>BinCoder decode error creating Java serialized object. Excpt:{0}</b>
<b>Explanation</b>	The java.io.ObjectInputStream.readObject() service encountered an error while trying to decode a Java serialized object. For a ClassNotFoundException, the most likely cause is that a client performing a remote invoke placed a class definition into the pipeline, but the class definition does not exist on the receiving Integration Server. For an InvalidClassException, the most likely cause is that the class definition on the Integration Server does not match the class definition placed in the pipeline by the client.
<b>Action</b>	Make sure that the originating client and the receiving Integration Server have the same class definitions. For other I/O exceptions, there might be corruption in the input stream; therefore, you should try the request again.
<b>ISC.0076.0006</b>	<b>BinCoder decode error creating array {0}</b>
<b>ISC.0076.0007</b>	<b>XMLCoder decode invalid data type: {0}</b>
<b>ISC.0076.0008E</b>	<b>XMLCoder decode exception: {0}</b>
<b>Explanation</b>	Integration Server threw an exception while decoding an IDataXML encoded document.
<b>Action</b>	The document is corrupt. Contact Software AG Global Support.
<b>ISC.0076.0009E</b>	<b>RPCBinCoder2 decode error for array class: {0}</b>
<b>Explanation</b>	Integration Server encountered an error while trying to decode an array of remote objects. Class definitions might be out of sync.
<b>Action</b>	Contact Software AG Global Support.

---

<b>ISC.0076.0010E</b>	<b>RPCBinCoder2 decode error for Codable class: {0}</b>
<b>Explanation</b>	Integration Server encountered an error while trying to decode a codable class. Class definitions might be out of synch.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.0011E</b>	<b>RPCBinCoder2 decode error for as_String class: {0}</b>
<b>Explanation</b>	Integration Server encountered an error while trying to decode an object that was encoded as a String.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.0012E</b>	<b>SOAP Encoding Registrar cannot register schema type {0}; schema type already exists.</b>
<b>Explanation</b>	The SOAP Encoding Registrar could not register the indicated schema type. This is a serious internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.0013E</b>	<b>SOAP Message Coder cannot encode output data; pipeline does not match output signature</b>
<b>Explanation</b>	The SOAP message coder could not XML-encode the results of a SOAP remote procedure call because a variable appeared in the pipeline more than once.
<b>Action</b>	Examine the target service to determine why it is not producing output values that match the output signature. Correct the service's signature and/or logic after identifying the source of the problem.
<b>ISC.0076.0014U</b>	<b>SOAP Message Coder failure; a RuntimeException was thrown in the SOAP Coder</b>
<b>Explanation</b>	The message coder encountered a serious internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.0015E</b>	<b>SOAP Message Coder cannot encode variable {0}; variable does not have a valid XML name</b>
<b>Explanation</b>	The message coder could not XML-encode the SOAP RPC request or response because the pipeline contained the variable <varName>, whose name is not a valid name for an XML element.
<b>Action</b>	This error often occurs because the variable name contains a colon (:). Change the name of <varName> to one that is also valid as an XML element name (or map <varName> to a new variable, and use that variable as your SOAP RPC input or output parameter).

<b>ISC.0076.0016</b>	<b>Soap Message Coder warning; unregistered coder for variable {0}, using String</b>
<b>ISC.0076.0017E</b>	<b>SOAP Message Coder error; no coder is registered for encoding style {0}</b>
<b>Explanation</b>	The message coder encountered a serious internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.0018</b>	<b>Soap Message Coder warning; unregistered coder for variable {0}, using BasicData</b>
<b>ISC.0076.0019E</b>	<b>SOAP Message Coder cannot decode message; encoding style {0} is not a registered style</b>
<b>Explanation</b>	The message coder could not decode the submitted XML because it does not support the specified encoding style.
<b>Action</b>	Check the incoming XML and verify that the encodingStyle attribute is specified correctly and that it specifies a style that Integration Server supports.
<b>ISC.0076.0020E</b>	<b>Soap Message Coder warning; invalid HREF found {0}</b>
<b>Explanation</b>	The message coder could not resolve the href pointing to reference. A null value was produced instead.
<b>Action</b>	Examine the incoming XML and make sure that the specified reference points to an element that exists in the body of the message.
<b>ISC.0076.0021E</b>	<b>SOAP Message Coder cannot decode message; arrayType attribute value {0} is malformed</b>
<b>Explanation</b>	The message coder could not decode an XML-encoded array because it cannot understand the value of the "arrayType" attribute.
<b>Action</b>	Check the incoming XML and make sure that the "arrayType" attribute is using the correct syntax. For example, make sure that it is not missing a "[" symbol.
<b>ISC.0076.0022E</b>	<b>SOAP Message Coder cannot decode message; cannot determine type of element {0}</b>
<b>Explanation</b>	The message coder could not decode the XML-encoded parameters it has received, because the simple element <elementName> has an unknown data type (for example, xsi:type="myDataType").
<b>Action</b>	Check the incoming XML and make sure the data type has been specified correctly. Also make sure that it is using the correct namespace.

<b>ISC.0076.0023E</b>	<b>SOAP Message Coder cannot decode message; unable to create array for arrayType attribute value {0}</b>
<b>Explanation</b>	The message coder could not decode an XML-encoded array because it could not allocate an array of the specified dimensions.
<b>Action</b>	Check the incoming XML and make sure that the arrayType attribute is specified correctly. For example, make sure that it does not specify a negative dimension or an invalid array size (e.g., too many dimensions or dimensions that are unrealistically large). If the array is unusually large or the server is extremely very low on memory, the possibility also exists that this error was the result of an out-of-memory condition.
<b>ISC.0076.0026E</b>	<b>Broker Coder cannot encode document; the document, document type or both are null values</b>
<b>Explanation</b>	While attempting to process a document from the Broker, Integration Server determined that the document, the document type, or both are null values. This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.0027E</b>	<b>Broker Coder cannot encode document; Broker document type name is missing</b>
<b>Explanation</b>	The subscribing Integration Server received a document from the Broker or a publishing Integration Server, but was unable to encode the document because the document type name was missing from the event subscription. There are three possible reasons: (1) the document to be encoded is corrupted (2) the document type is out of sync with the corresponding document type on the Broker (3) an internal error occurred.
<b>Action</b>	Examine the document to be encoded and synchronize the document type with the Broker. If the error persists after the synchronization, contact Software AG Global Support.
<b>ISC.0076.0028</b>	<b>Broker Coder cannot decode document; byte[] is in wire format version {0}. Latest supported format is version {1}</b>
<b>ISC.0076.0029</b>	<b>Broker Coder warning; multi-reference with sequence id {0} does not exist; using null value</b>
<b>ISC.0076.0030E</b>	<b>Broker Coder warning; cannot parse value {0}; using {1} instead</b>
<b>Explanation</b>	Integration Server was not able to parse the document. There are two possible reasons: (1) the document might be corrupted (2) the document type is out of sync with the corresponding document type on the Broker.
<b>Action</b>	Examine the document and make sure that it is not corrupted. Also, synchronize the document type with the corresponding Broker document type.

<b>ISC.0076.0031E</b>	<b>Broker Coder warning; cannot create an instance of {0}</b>
<b>Explanation</b>	Integration Server could not create an instance of the indicated class. This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.0032</b>	<b>Broker Coder cannot decode document; the document, document type or both are null values</b>
<b>ISC.0076.0033E</b>	<b>Broker Coder cannot decode document; the document does not conform to the document type, {0}</b>
<b>Explanation</b>	The subscribing Integration Server was not able to decode the incoming document from either the Broker or the publishing Integration Server because the document type on the local Integration Server is out of sync with the corresponding document types on the publishing Integration Server and the Broker.
<b>Action</b>	Synchronize the publishable document type on the subscribing Integration Server with the corresponding Broker document type.
<b>ISC.0076.0034</b>	<b>Priority Classloader could not load the class while decoding.Trying Global classloader.</b>
<b>ISC.0076.9001U</b>	<b>Unsupported RPC type: {0}</b>
<b>Explanation</b>	Integration Server RPC Bin Coder does not support the version specified in the input stream to be decoded. This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9002U</b>	<b>incorrect IDataXMLCoder file format: no element 'IDataXMLCoder' found</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9003U</b>	<b>encoding {0}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.

---

<b>ISC.0076.9004U</b>	<b>decoding: {0} ex:{1}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9005U</b>	<b>decoding: boolean ex:{0}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9006U</b>	<b>decoding: {0}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9007U</b>	<b>decoding: No null-arg create method in class: {0}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9008U</b>	<b>Unsupported RPC type: {0}</b>
<b>Explanation</b>	Integration Server RPC Bin Coder does not support the version specified in the input stream to be decoded. This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9009U</b>	<b>Root element is null</b>
<b>Explanation</b>	The flow.xml or node.ndf file is corrupt.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9010U</b>	<b>Sibling root element is null rootTag:{0} localName:{1} root:{2}</b>
<b>Explanation</b>	The XMLCoder class issued an error because the supplied XML input stream cannot be decoded.
<b>Action</b>	Examine the use of the XMLCoder class in your application and make sure that the XML input stream has the correct format and it only contains supported object types. If the error still occurs, use the setIgnoreInvalid() class to set the flag to false so that XMLCoder ignores the unsupported object type that it decodes.

<b>ISC.0076.9011U</b>	<b>illegal file format</b>
<b>Explanation</b>	The service pub.flow:restorePipelineFromFile failed to execute because the file containing the saved pipeline was not encoded with XMLCoder or IDataXMLCoder.
<b>Action</b>	Examine the file containing the saved pipeline and make sure it is not corrupt. If the file was saved using the pub.flow:savePipelineToFile service, and it is not corrupt, contact Software AG Global Support.
<b>ISC.0076.9012E</b>	<b>Invalid state. JSON input stream does not start with the "{" character.</b>
<b>Explanation</b>	The input stream does not contain valid JSON content. JSON content must begin with the "{" character.
<b>Action</b>	Add a "{" character to the beginning of the JSON content.
<b>ISC.0076.9013E</b>	<b>Invalid state. JSON Object in the input stream does not end with "}" character.</b>
<b>Explanation</b>	The JSON object in the input stream does not contain valid JSON content. The JSON object content must end with the "\"}\" character.
<b>Action</b>	Add a "\"}\" character to the end of the JSON object.
<b>ISC.0076.9014E</b>	<b>Invalid state. JSON input stream contains incorrect syntax.</b>
<b>Explanation</b>	The JSON input stream contains incorrect JSON syntax.
<b>Action</b>	Correct the errors in the JSON input stream.
<b>ISC.0076.9015E</b>	<b>Invalid state. JSON Object in the input stream does not start with "{" character.</b>
<b>Explanation</b>	The JSON object in the input stream does not contain valid JSON content. The JSON object content must begin with the "{" character.
<b>Action</b>	Add a "{" character to the beginning of the JSON object in the input stream.
<b>ISC.0076.9016E</b>	<b>Invalid state. Array in the JSON input stream does not end with "]" character.</b>
<b>Explanation</b>	The JSON array in the input stream does not contain valid JSON content. The JSON array must end with the "]" character.
<b>Action</b>	Add the "]" character from the end of the JSON array.
<b>ISC.0076.9017E</b>	<b>Numeric value ({0}) for field {1} is outside the range for integer values. Integers must be within the range of -2147483648 to 2147483647. Error:{2}</b>
<b>Explanation</b>	Integration Server encountered an invalid integer value while parsing a JSON object.
<b>Action</b>	Correct the value before parsing the JSON object.

---

<b>ISC.0076.9018E</b>	<b>Numeric value ({0}) for field {1} is outside the range for long numbers. Long numbers must be within the range of -9223372036854775808 to 9223372036854775807. Error:{2}</b>
<b>Explanation</b>	Integration Server encountered an invalid long number value while parsing a JSON object.
<b>Action</b>	Correct the value before parsing the JSON object.
<b>ISC.0076.9019E</b>	<b>Numeric value ({0}) for field {1} is outside the range for float values. Error:{2}</b>
<b>Explanation</b>	Integration Server encountered an invalid float value while parsing a JSON object.
<b>Action</b>	Correct the value before parsing the JSON object.
<b>ISC.0076.9020E</b>	<b>Numeric value ({0}) for field {1} is outside of the range for double values. Error:{2}</b>
<b>Explanation</b>	Integration Server encountered an invalid double value while parsing a JSON object.
<b>Action</b>	Correct the value before parsing the JSON object.
<b>ISC.0076.9101E</b>	<b>SOAP Encoding Registrar cannot register encoding style {0}; encoding style already exists.</b>
<b>Explanation</b>	Integration Server cannot register the specified encoding style because the encoding style is already registered.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9102E</b>	<b>SOAP Encoding Registrar cannot register Java type {0}; Java type already exists.</b>
<b>Explanation</b>	Integration Server cannot register the specified Java type because it already exists in the registry.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9103E</b>	<b>SOAP Encoding Registrar cannot register Schema type {0}; Schema type already exists.</b>
<b>Explanation</b>	Integration Server cannot register the specified Schema type because it already exists in the registry.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9104E</b>	<b>SOAP Encoding Registrar cannot unregister Java type {0}; doesn't exist in the registry</b>
<b>Explanation</b>	Integration Server cannot unregister the specified Java type because it does not exist in the registry.
<b>Action</b>	Contact Software AG Global Support.

<b>ISC.0076.9105E</b>	<b>SOAP Encoding Registrar cannot unregister Schema type {0}; doesn't exist in the registry</b>
<b>Explanation</b>	Integration Server cannot unregister the specified Schema type because it does not exist in the registry.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9202E</b>	<b>SOAP Message Coder failure; a RuntimeException was thrown in the SOAP Coder</b>
<b>Explanation</b>	The SOAP message contains an element that does not have a valid QName.
<b>Action</b>	Make sure the elements in the SOAP message have valid QNames.
<b>ISC.0076.9203E</b>	<b>SOAP Message Coder cannot decode message; Invalid number {0}</b>
<b>Explanation</b>	The message coder could not decode an XML-encoded array because one of its dimensions is set to a nonnumeric value.
<b>Action</b>	Check the incoming XML and make sure that the arrayType attribute specifies a positive integer. For example, make sure it has not been inadvertently set to a nonnumeric value such as "A".
<b>ISC.0076.9204E</b>	<b>SOAP Message Coder cannot encode output data; pipeline does not match output signature, duplicate variable {0} in pipeline</b>
<b>Explanation</b>	The message coder could not XML-encode the results of a SOAP remote procedure call because the specified variable appeared in the pipeline more than once.
<b>Action</b>	On the Integration Server, examine the target service to determine why it is not producing output values that match the output signature. Correct the service's signature and/or logic after identifying the source of the problem.
<b>ISC.0076.9205E</b>	<b>SOAP Message Coder cannot encode variable {0}; variable does not have a valid XML name</b>
<b>Explanation</b>	The message coder could not XML-encode the SOAP RPC request or response because the pipeline contained the specified variable, whose name is not a valid name for an XML element.
<b>Action</b>	This error often occurs because the variable name contains a colon (:). Change the name of specified variable to one that is also valid as an XML element name (or map the variable to a new variable, and use the target variable as your SOAP RPC input or output parameter).

---

<b>ISC.0076.9206E</b>	<b>SOAP Message Coder error; no coder is registered for encoding style {0}</b>
<b>Explanation</b>	Integration Server encountered a serious internal error when encoding the SOAP message.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9208E</b>	<b>SOAP Message Coder cannot decode message; cannot determine type of element {0}</b>
<b>Explanation</b>	The message coder could not decode the XML-encoded parameters it has received, because the specified element has an unknown data type (for example, <code>xsi:type="myDataType"</code> ).
<b>Action</b>	Check the incoming XML and make sure the data type has been specified correctly. Also make sure that it is using the correct namespace.
<b>ISC.0076.9209E</b>	<b>SOAP Message Coder cannot decode message; unable to create array for arrayType attribute value {0}</b>
<b>Explanation</b>	The message coder could not decode an XML-encoded array because it could not allocate an array of the specified dimensions.
<b>Action</b>	Check the incoming XML and make sure that the arrayType attribute is specified correctly. For example, make sure that it does not specify a negative dimension or an invalid array size (e.g., too many dimensions or dimensions that are unrealistically large). If the array is unusually large or the server is extremely very low on memory, the possibility also exists that this error was the result of an out-of-memory condition.
<b>ISC.0076.9210E</b>	<b>SOAP Message Coder cannot decode message; arrayType attribute value {0} is malformed</b>
<b>Explanation</b>	The message coder could not decode an XML-encoded array because it cannot understand the value of the arrayType attribute.
<b>Action</b>	Check the incoming XML and make sure that the arrayType attribute is using the correct syntax. For example, make sure that it is not missing a “[” symbol.
<b>ISC.0076.9211E</b>	<b>SOAP Message Coder cannot encode output data; pipeline does not match output signature, required variable {0} is missing</b>
<b>Explanation</b>	The message coder could not transform the results of a SOAP remote procedure call because the required variable varName was not in the pipeline.
<b>Action</b>	On Integration Server, examine the target service to determine why it is not producing the required output variables. Correct the service signature and/or logic after identifying the source of the problem.

**ISC.0076.9212E**      **SOAP Message Coder cannot encode output data; pipeline does not match output signature, extra variable {0} in pipeline**

**Explanation**      Integration Server encountered an error while processing an RPC/Encoded SOAP message. Either the SOAP message does not match the output signature of the service or the contents of the output pipeline produced by the service do not match the service signature.

**Action**            Do one or more of the following:

- Change the SOAP message response so that it matches the service output signature.
- Change the service output signature so that it matches the expected SOAP message response.
- Ensure that the service produces an output pipeline that matches the service signature.

**ISC.0076.9220E**      **{0} Coder: decoding error; illegal input parameter value(s)**

**Explanation**      One of the input parameters to the encode or decode method is null.

**Action**            Make sure that the input parameters passed to the encode or decode methods are not null.

**ISC.0076.9221E**      **{0} Coder: decoding error; can't get the SOAP Body from the SOAP Message**

**Explanation**      The SOAP body element cannot be retrieved from the SOAP message.

**Action**            Make sure that the SOAP message is valid and contains a SOAP body element.

**ISC.0076.9222E**      **{0} Coder: decoding error; can't convert SOAP Message to IS Document**

**Explanation**      Integration Server cannot convert a SOAP message to a document (IData) because of a decoding error.

**Action**            Contact Software AG Global Support.

**ISC.0076.9230E**      **{0} Coder: encoding error; can't create SOAP Message**

**Explanation**      Integration Server cannot create the SOAP message because an encoding error occurred.

**Action**            Contact Software AG Global Support.

<b>ISC.0076.9231E</b>	<b>{0} Coder: encoding error; can't add SOAP Body Element to SOAP Message</b>
<b>Explanation</b>	Integration Server cannot add the SOAP body element to the SOAP message because of an encoding error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9234E</b>	<b>{0} Coder: encoding error; can't convert IS Document to XML String</b>
<b>Explanation</b>	Integration Server cannot convert the document (IData) to an XML String because of an encoding error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0076.9236E</b>	<b>SOAP Message Coder cannot decode message; value "{0}" doesn't match expected pattern yyyy-MM-dd</b>
<b>Explanation</b>	The date pattern is invalid.
<b>Action</b>	Make sure that the date value uses the pattern yyyy-MM-dd.
<b>ISC.0077.0001E</b>	<b>Config set local host error. Excppt:{0}</b>
<b>Explanation</b>	During startup, Integration Server was not able to set local host information from the values specified on the "watt.net.localhost" property.
<b>Action</b>	Examine the value specified for property "watt.net.localhost". The value can either be a machine host name or a string representing the machine's IP address, such as "localhost" or "127.0.0.1".
<b>ISC.0077.0002</b>	<b>Unsupported email encoding {0} specified. Defaulting to {1}</b>
<b>ISC.0077.0003S</b>	<b>Cannot initialize password store with null manager</b>
<b>Explanation</b>	Initialization of the code that manages outbound passwords failed. The most likely cause is a problem with the outbound password configuration files.
<b>Action</b>	Make sure that the following outbound password configuration files reside on the Integration Server:  config/txnPassStore.dat  config/empw.dat  config/configPassman.cnf  config/passman.cnf  See the webMethods Integration Server documentation for information about these files and to determine whether you can restore them. If you cannot determine the source of the problem, contact Software AG Global Support.

<b>ISC.0077.0004S</b>	<b>Exception during {0}, type: {1}, msg: {2}</b>
<b>Explanation</b>	A problem occurred when Integration Server tried to store or retrieve an outbound password or retrieve an encryption code from the outbound password store.
<b>Action</b>	The outbound password data store, config/txnPassStore.dat, is probably corrupted. See the webMethods Integration Server documentation for information about this file and how to restore it and other outbound password configuration files. If you cannot determine the source of the problem, contact Software AG Global Support.
<b>ISC.0077.0005</b>	<b>Unable to {0}, password mgr is null</b>
<b>ISC.0077.0006E</b>	<b>System property "{0}" equals "{1}". This value is not valid. The default value of "{2}" will be used instead.</b>
<b>Explanation</b>	Integration Server detected an invalid value on the indicated configuration file property.
<b>Action</b>	Refer to the webMethods Integration Server documentation for a description of the property and its required or allowed values.
<b>ISC.0077.9001</b>	<b>Stream is already closed</b>
<b>ISC.0077.9003</b>	<b>Source directory does not exist</b>
<b>ISC.0077.9004</b>	<b>Source File not a directory</b>
<b>ISC.0077.9006E</b>	<b>Could not determine encoding of file {0}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0077.9007E</b>	<b>Invalid encoding, {0}, specified for file {1}</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0077.9009</b>	<b>Local name cannot be null</b>

---

ISC.0077.9010	<b>Local name cannot be an empty string.</b>
ISC.0077.9011	<b>Namespace name cannot be an empty string.</b>
ISC.0077.9012	<b>Invalid value {0} specified for local name.</b>
ISC.0077.9013U	<b>Document to XSD error: Field {0} cannot be represented in XML Schema. The field name contains a prefix but an XML Namespace property is not assigned to the field</b>
<b>Explanation</b>	The document type being used to generate a WSDL document contains a top-level variable whose name includes a prefix (that is, the name is in the format prefix:local name). This variable is not associated with an XML namespace.
<b>Action</b>	Do one of the following:  (1) Associate the variable with an XML namespace by specifying a value for the variable's XML Namespace property.  (2) Remove the prefix. Note that some protocols require the use of a prefix. Before removing the prefix, check the service signature's input and output requirements as documented for each protocol in the webMethods Integration Server documentation.
ISC.0077.9014U	<b>Document to XSD error: Field {0} cannot be represented in XML Schema. The field name does not conform to the XML NCName definition</b>
<b>Explanation</b>	The document type being used to generate a WSDL document contains field names that do not conform to the XML NCName definition.
<b>Action</b>	To resolve this error, rename the fields to conform to the QName lexical rules specified in <a href="http://www.w3.org/TR/REC-xml-names/#NT-QName">http://www.w3.org/TR/REC-xml-names/#NT-QName</a> and the XML namespace and local naming conventions specified in <a href="http://www.w3.org/TR/REC-xml-names/#NT-NCName">http://www.w3.org/TR/REC-xml-names/#NT-NCName</a> .
ISC.0077.9015E	<b>The amount of data needed is greater than the amount of data reserved.</b>
<b>Explanation</b>	A service needed to write a large amount of data to tspace, but the space the service reserved is not large enough to hold the data.
<b>Action</b>	Update your program to reserve more tspace. If your program does not reserve tspace directly, contact Software AG Global Support.

- ISC.0077.9016**      **Provided private key {0} is invalid.**
- ISC.0077.9017**      **Unable to read the key/certificate file(s) {0}.**
- ISC.0077.9018**      **Provided certificate(s) {0} is/are invalid.**
- ISC.0077.9022E**      **XOPObject content cannot be read more than once.**  
**Explanation**      You attempted to read the contents from an XOPObject. However, previous logic in either the same service or a previous service has already read the XOPObject. The XOPObject instance can only be read one time.  
**Action**              Update the service logic so that it reads an XOPObject only one time.
- ISC.0077.9023E**      **Error while parsing the "{0} {1}" XML string. Parser error: {2}; XML: {3}**  
**Explanation**      One of the reference parameters or metadata elements that you specified as message addressing property is not a valid XML string.  
**Action**              Ensure that the XML string that you specify as message addressing reference parameter or metadata element is correct.
- ISC.0077.9024E**      **Error while parsing the "{0} {1}" XML string. The XML that you specify should be namespace qualified. XML: {2}**  
**Explanation**      One of the reference parameters that you specified as the message addressing property is not a namespace qualified XML string.  
**Action**              Ensure that the XML string that you specify as message addressing reference parameter element is namespace qualified.
- ISC.0081.0002**      **Error registering universal name {0}, already registered to {1}**
- ISC.0081.0003**      **Registered universal name {0} on service {1}**
- ISC.0081.0004**      **Duplicate universalName {0} registered to a different service {1}, not this service {2}. Unregister failed.**

---

<b>ISC.0081.0005E</b>	<b>Could not create a unique ID for the trigger from the trigger's name.</b>
<b>Explanation</b>	Integration Server was unable to create a unique identifier for the trigger. This is an internal error.
<b>Action</b>	Try to recreate the trigger. If that fails, contact Software AG Global Support. Be prepared to provide logs and the version number and patch level for Integration Server and your operating system.
<b>ISC.0081.9001E</b>	<b>Node {0} does not exist</b>
<b>Explanation</b>	The specified element cannot be locked because it does not exist. The element might have already been deleted. Alternatively, another user might have been deleted the element at the same time an attempt to lock the element was made.
<b>Action</b>	Make sure that the element exists.
<b>ISC.0081.9002E</b>	<b>Cannot perform operation without Write ACL privileges on {0}</b>
<b>Explanation</b>	The specified element cannot be locked because the user attempting to lock the element does not have write permissions to the element. To lock an element, a user must be a member of the Write ACL assigned to the element.
<b>Action</b>	Make sure that the user has write access to the element before attempting to lock it
<b>ISC.0081.9003E</b>	<b>Unable to lock: {0}. It has been locked by user {1}.</b>
<b>Explanation</b>	The specified element cannot be locked because it is already locked by another user.
<b>Action</b>	Before locking an element, make sure it is not locked by another user.
<b>ISC.0081.9004E</b>	<b>universalName {0} is already registered</b>
<b>Explanation</b>	The specified universal name already exists and is assigned to another element.
<b>Action</b>	Specify a unique universal name that is not already used by another element.
<b>ISC.0081.9005E</b>	<b>Unknown content type: {0}</b>
<b>Explanation</b>	Integration Server cannot create an instance of the specified content type because Integration Server does not recognize or does not support the specified content type.
<b>Action</b>	Specify a content type supported by Integration Server.

<b>ISC.0081.9007E</b>	<b>Node exists</b>
<b>Explanation</b>	An element with this fully qualified name already exists on the Integration Server. Integration Server uses the following format for the fully qualified name: folder.subfolder1.subfolder2:element
<b>Action</b>	Specify an element name whose fully qualified name will be unique to the Integration Server.
<b>ISC.0081.9008E</b>	<b>Node '{0}' does not exist</b>
<b>Explanation</b>	A node (element) in the Integration Server namespace was not specified.
<b>Action</b>	Specify a node (element) in the Integration Server namespace.
<b>ISC.0081.9016E</b>	<b>Search expression {0} is not well-formed. Enter a valid regular expression or element name.</b>
<b>Explanation</b>	The regular expression syntax is not valid.
<b>Action</b>	Ensure that specified regular expression is valid and can be compiled into a valid pattern.
<b>ISC.0081.9164E</b>	<b>Exception occurred during generation of WSDL for service {0}: {1}</b>
<b>Explanation</b>	An error occurred while attempting to validate or generate WSDL for a Web service descriptor. The error text identifies the specific error details.
<b>Action</b>	Use the error details to correct the issue before attempting to save the Web service descriptor or request WSDL for the Web service descriptor.
<b>ISC.0081.9165E</b>	<b>Invalid WSDL. Attribute {0} must appear in element {1} at Operation: {2}, Binding: {3}</b>
<b>Explanation</b>	While creating a Web service descriptor from a WSDL document, Integration Server found an invalid WSDL attribute. Most likely it was a soap:fault definition that was missing the name attribute.
<b>Action</b>	Correct the WSDL document before attempting to create the Web service descriptor.
<b>ISC.0081.9166E</b>	<b>Invalid "use" detected in Operation {0} at Binding {1}</b>
<b>Explanation</b>	While consuming a WSDL document to create a Web service descriptor, Integration Server encountered an invalid value for the use= attribute. The only valid values for the use attribute are "literal" or "encoded".
<b>Action</b>	Correct the use attribute value in the WSDL document and then attempt to create the Web service descriptor.

---

<b>ISC.0081.9167E</b>	<b>Output signature of an RPC/Literal or a Document/Literal operation cannot have top-level fields that are named "*body" or that begin with the "@" symbol. Operation Name : {0}</b>
<b>Explanation</b>	The output signature of a service used as an operation in an RPC/Literal binder cannot have top-level fields named "*body" or top-level fields that begin with "@".
<b>Action</b>	Change the output signature of the service before attempting to use the service as an operation in an RPC/Literal binder.
<b>ISC.0081.9169e</b>	<b>Input signature of an RPC/Encoded operation cannot have fields named "*body" or that begin with the "@" symbol. Operation Name : {0}</b>
<b>Explanation</b>	A service used as an operation in an RPC/Encoded binder cannot contain fields named "*body" or fields with a name that starts with "@" symbol.
<b>Action</b>	Before using the service as an operation in an RPC/Encoded binder, change the service signature to remove or rename the fields named "*body" or fields with a name that start with "@" symbol.
<b>ISC.0081.9170</b>	<b>Output signature of an RPC/Encoded operation cannot have fields named "*body" or that begin with the "@" symbol. Operation Name : {0}</b>
<b>Explanation</b>	The output signature of a service used as an operation for an RPC/Encoded binder cannot contain a field named "*body" or a field with a name that starts with "@".
<b>Action</b>	Change the output signature of the service before using the service as an operation in an RPC/Encoded binder.
<b>ISC.0081.9171E</b>	<b>Request header of an RPC/Encoded operation cannot have fields named named "*body" or that begin with the "@" symbol. Operation Name : {0}, Header : {1}</b>
<b>Explanation</b>	An attempt was made to add a Request Header to an operation used in an RPC/Encoded binder but the document type being added either has a field named "*body" or a field name starting with "@". Neither is allowed in a Header for an operation in an RPC/Encoded binder.
<b>Action</b>	Remove the fields named "*body" and the fields that start with "a" from the document type. Or use a document type that meets the field name requirements to define the format of the Header.
<b>ISC.0081.9172E</b>	<b>Response header of an RPC/Encoded operation cannot have fields named "*body" or that begin with the "@" symbol. Operation Name : {0}, Header : {1}</b>
<b>Explanation</b>	An attempt was made to add a Response Header to an operation in an RPC/Encoded binder but the document type being added either has a field named "*body" or a field name starting with "@". Neither is allowed in a Header for an operation in an RPC/Encoded binder.
<b>Action</b>	Change the document type to meet the field name requirements or use a different document type that meets the requirements to define the format of the Header.

**ISC.0081.9173E      Fault for an RPC/Encoded operation cannot have fields named "\*body" or that begin with the "@" symbol. Operation Name : {0}, Fault : {1}**

**Explanation**      An attempt was made to add a Fault to an RPC/Encoded operation but the document type being added either has a field named \*body or a field name starting with @. Neither is allowed in a Fault for an RPC/Encoded operation.

**Action**             Edit the document type to remove the fields named \*body or those that begin with the "@" symbol and then add the Fault to the RPC/Encoded operation. Or, select a different document type to define the format of the Fault.

**ISC.0081.9174E      Input signature of an RPC/Literal operation cannot have a List field at the top level. Operation Name : {0} Field : {1}**

**Explanation**      The input signature of a service used as an operation in a RPC/Literal binder contains a List field at the top level. Services used as operations in RPC/Literal binders cannot have List fields at the top level of the service input signature.

**Action**             Remove the List field from the service input signature before attempting to use the service as an operation in a RPC Literal Binder.

**ISC.0081.9175E      Output signature of an RPC/Literal operation cannot have a List field at the top level. Operation Name : {0} Field : {1}**

**Explanation**      The output signature of a service used as an operation in an RPC/Literal binder contains a List field at the top level. Services used as operations in RPC/Literal binders cannot have signatures that use List fields at the top level.

**Action**             Correct the service output signature before attempting to use the service as an operation in a RPC/Literal binder

**ISC.0081.9176E      Input signature of an RPC/Literal or a Document/Literal operation cannot have a String Table field. Operation Name : {0} Field : {1}**

**Explanation**      A service with a String table in its service signature cannot be used as an operation for an RPC/Literal or Document/Literal binder.

**Action**             Change the service signature before attempting to use it as an operation in an RPC/Literal or Document/Literal binder.

**ISC.0081.9177E      Output signature of an RPC/Literal or a Document/Literal operation cannot have a String Table field. Operation Name : {0} Field : {1}**

**Explanation**      The output signature of a service used as an operation in an RPC/Literal or Document/Literal binder cannot contain a String table.

**Action**             Change the service output signature before attempting to use the service as an operation in an RPC/Literal or Document/Literal binder.

<b>ISC.0081.9178E</b>	<b>Input signature of an RPC/Literal operation cannot have identically named fields at the top level. Operation Name : {0} Field : {1}</b>
<b>Explanation</b>	A service used as an operation in a RPC/Literal binder has an input signature containing identically named fields at the top level. All top-level field names must be unique for services used as operations in an RPC/Literal binder.
<b>Action</b>	Change the service signature before attempting to use the service as an operation in an RPC/Literal binder.
<b>ISC.0081.9179E</b>	<b>Output signature of an RPC/Literal operation cannot have identically named fields at the top level. Operation Name : {0} Field : {1}</b>
<b>Explanation</b>	A service used as an operation in an RPC/Literal binder contains fields with duplicate names at the top level in the output signature. All top-level field names must be unique for operations in RPC/Literal binders.
<b>Action</b>	Change the output signature of the service before attempting to use the service as an operation in an RPC/Literal binder.
<b>ISC.0081.9180E</b>	<b>Unable to find {0}, needed to generate WSDL for operation {1}</b>
<b>Explanation</b>	A service first provider Web service descriptor uses an IS service as an operation, but that IS service no longer exists in the Integration Server namespace.
<b>Action</b>	Edit the Web service descriptor to use an existing IS service as the operation or recreate the missing IS service.
<b>ISC.0081.9181E</b>	<b>Cannot find document type {0} needed to generate WSDL</b>
<b>Explanation</b>	An internal error has occurred while attempting to validate a Web service descriptor or generate WSDL for the Web service descriptor. The specified document type is used within the definition of the Web service descriptor but it cannot be found in the Integration Server namespace.
<b>Action</b>	If the Web service descriptor was created from WSDL document, for example a consumer Web service descriptor or a WSDL first provider Web service descriptor, delete the Web service descriptor and recreate it. If the Web service descriptor is a service first provider Web service descriptor, manually create the missing document type, or correct the references to the document type from the Web service descriptor (for example update the signatures of service used as operations, update Header definitions, or update Fault definitions).
<b>ISC.0081.9182E</b>	<b>Invalid WSDL schema generated for the service signatures or the document types referred by the WSD "{0}". To view the generated WSDL change the logging level of Namespace(0081) to Trace. Error details: {1}</b>
<b>Explanation</b>	This is a generic message that Integration Server throws for all Xerces parser errors.
<b>Action</b>	If Xerces parser throws "Unique Particle Attribute" error, then a possible workaround for this issue is to set the value of the 'Allow unspecified fields' constraint of the variables in the IS doc type referred by the Web service descriptor to 'False'.

<b>ISC.0081.9194E</b>	<b>The header has a message part "{0}" defined by the type "{1}". Message parts in a header must be defined by the element attribute instead of the type attribute.</b>
<b>Explanation</b>	An attempt was made to set the Pre 8.2 compatibility mode property to false for a Web service descriptor, but the WSDL document used to create the Web service descriptor has Header parts defined using the type attribute. For the Web service descriptor to have the Pre 8.2 compatibility mode property set to false, the Header parts in the WSDL document must use the element attribute.
<b>Action</b>	If you want the Web service descriptor to have a Pre 8.2 compatibility mode property set to false, change the Header parts in WSDL document to use the element attribute and then use Designer recreate the Web service descriptor.
<b>ISC.0081.9195E, W</b>	<b>Invalid message part(s) defined in the wsdl: {0}</b>
<b>Explanation</b>	An invalid Message Part definition was found while consuming WSDL to create a Web service descriptor. The error message lists the specific error details .
<b>Action</b>	Use the error details in the message to correct the WSDL. Then, use the corrected WSDL document to create the Web service descriptor.
<b>ISC.0081.9197E</b>	<b>Cannot find SOAP-JMS trigger "{0}" specified in the provider Web service endpoint alias "{1}" assigned to binder "{2}" in the web service descriptor "{3}".</b>
<b>Explanation</b>	The Web service endpoint alias assigned to the provider Web service descriptor uses a SOAP-JMS trigger that cannot be found. The provider Web service endpoint alias for use with a JMS binder is not valid if the SOAP-JMS trigger specified in the alias cannot be found. The Web service descriptor cannot be saved if a valid Web service endpoint alias is not assigned to a binder that specifies JMS as the transport.
<b>Action</b>	Update the provider Web service endpoint alias to use a different SOAP-JMS trigger. Alternatively, assign a different valid provider Web service endpoint alias to the binder.
<b>ISC.0081.9198E</b>	<b>Cannot find provider Web service endpoint alias "{0}" assigned to binder "{1}" in the web service descriptor "{2}".</b>
<b>Explanation</b>	The Web service endpoint alias assigned to the provider Web service descriptor cannot be found. The Web service descriptor cannot be saved if a Web service endpoint alias is not assigned to a binder that specifies JMS as the transport.
<b>Action</b>	Assign a valid provider Web service endpoint alias to the binder.
<b>ISC.0081.9199W</b>	<b>MEP for operations {0} has changed from In-Only MEP to In-Out MEP. As a result, Integration Server will now execute the corresponding response handlers.</b>
<b>Explanation</b>	Changing the Pre-8.2 compatibility mode property of the Web service descriptor from false to true resulted in a change of the Message Exchange Pattern (MEP) for the specified operations to In-Out. At run time, Integration Server will execute response handler services for the specified operations.
<b>Action</b>	No action required.

---

<b>ISC.0081.9200W</b>	<b>MEP for operations {0} has changed from In-Out MEP to In-Only MEP. As a result, Integration Server will no longer execute the corresponding response handler services.</b>
<b>Explanation</b>	Because the specified operation has no defined output, changing the Pre-8.2 compatibility mode property of the Web service descriptor from true to false resulted in a change of the Message Exchange Pattern (MEP) for the specified operations to In-Only. At run time, Integration Server will no longer execute the response handler services for the specified operations.
<b>Action</b>	No action required.
<b>ISC.0081.9201W</b>	<b>MEP for operations {0} has changed from Robust In-Only MEP to In-Out MEP.</b>
<b>Explanation</b>	Changing the Pre-8.2 compatibility mode property of the Web service descriptor from false to true resulted in a change of the Message Exchange Pattern (MEP) for the specified operations to In-Out.
<b>Action</b>	No action required.
<b>ISC.0081.9203W</b>	<b>Invoke RefreshConnectors against the Web service descriptor to have the Web service connector's signature updated to reflect the change to the compatibility mode.</b>
<b>Explanation</b>	After changing the Pre-8.2 compatibility mode property for a consumer Web service descriptor, the Web service connectors need to be refreshed. If an operation does not have any defined output, refreshing the Web service connectors will update the output signature to reflect the compatibility mode change. If you changed the Pre-8.2 compatibility mode property to false, the Web service connector will no longer have any SOAP message-related output parameters. If you changed the Pre-8.2 compatibility mode property to true, the output signature will include an output parameter for a SOAP fault.
<b>Action</b>	Refresh the Web service connectors for this Web service descriptor.
<b>ISC.0081.9204E</b>	<b>Web service descriptor {0} is not available because the WS-Policy file with policy ID {1} attached to the WSD is not present in the policy repository.</b>
<b>Explanation</b>	The Web service descriptor is not available because the WS-Policy file attached to the Web service descriptor is deleted or moved from the policy repository.
<b>Action</b>	The following lists the actions you can take: 1) Ensure that the WS-Policy that is attached to the Web service descriptor resides in the policy repository. -OR- 2) Edit the Web service descriptor so that it no longer uses the deleted or moved WS-Policy file.

<b>ISC.0081.9207E</b>	<b>Invalid WSDL. wsdl:fault element named {0} must be present in operation {1} of port type {2}</b>
<b>Explanation</b>	The WSDL document used to create the WSDL first provider or consumer Web service descriptor does not contain wsdl:fault element in the wsdl:operation of the portType.
<b>Action</b>	Ensure that the WSDL contains the correct wsdl:fault element in the wsdl:operation of the portType. Contact Software AG Global Support for further assistance.
<b>ISC.0082.0001</b>	<b>Type {0} exists in schema {1}. Set {1} as owner schema.</b>
<b>ISC.0082.483E</b>	<b>"fractionDigits"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The fractionDigits facet is fixed for the type and cannot be changed
<b>Action</b>	Do not attempt to change the fractionDigits value for the type.
<b>ISC.0082.90007E</b>	<b>Missing Attribute Information Item</b>
<b>Explanation</b>	The attribute is declared as required but is missing from the instance document.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9001E</b>	<b>Error while parsing "{0}"</b>
<b>Explanation</b>	An unexpected error occurred while validating the instance document.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0082.9002E</b>	<b>Unable to retrieve root element</b>
<b>Explanation</b>	The instance document does not have a root element and cannot be validated.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9003E</b>	<b>Unable to locate a matching element declaration</b>
<b>Explanation</b>	The element in the instance document does not have an element declaration.
<b>Action</b>	Correct the instance document. Ensure that the element name is correctly spelled.
<b>ISC.0082.9004E</b>	<b>[attributes] property must be empty</b>
<b>Explanation</b>	The element is defined to be of simple type. No attributes may be present.
<b>Action</b>	Remove the attributes from the element in the instance document, or use an element that permits the attribute.

---

<b>ISC.0082.9005E</b>	<b>EII (s) are not allowed in [children] property</b>
<b>Explanation</b>	The element type does not allow child elements to be present in the content.
<b>Action</b>	Remove the child elements from the instance document, or use a type definition that permits the desired child elements.
<b>ISC.0082.9006E</b>	<b>Unable to locate a matching attribute declaration</b>
<b>Explanation</b>	Integration Server could not locate an attribute declaration for the attribute.
<b>Action</b>	Correct the instance document to reference an attribute for which there is a declaration or remove the attribute from the instance document.
<b>ISC.0082.9008E</b>	<b>Invalid value - does not match fixed value</b>
<b>Explanation</b>	The element declaration has a fixed value. Only that value may be present in the instance document.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9009E</b>	<b>Child element {0} at position {1} is unexpected</b>
<b>Explanation</b>	The instance document contains an element at the specified location that does not match what is expected.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9010E</b>	<b>Incomplete content - one or more child elements are expected</b>
<b>Explanation</b>	The instance element does not contain the expected child elements. Content is missing.
<b>Action</b>	Correct the instance document to contain the missing content.
<b>ISC.0082.9011E</b>	<b>Unable to locate attribute declaration</b>
<b>Explanation</b>	Integration Server could not locate a corresponding schema definition for the attribute.
<b>Action</b>	Ensure that a schema for the relevant namespace has been created and that it contains a declaration for the attribute.
<b>ISC.0082.9012E</b>	<b>Unable to locate type definition</b>
<b>Explanation</b>	Integration Server could not locate a corresponding schema definition for the type.
<b>Action</b>	Ensure that a schema for the relevant namespace has been created and that it contains a definition for the type.

<b>ISC.0082.9013E</b>	<b>Unable to locate type definition {0}</b>
<b>Explanation</b>	Integration Server could not locate a corresponding schema definition for the type.
<b>Action</b>	Ensure that a schema for the relevant namespace has been created and that it contains a definition for the type.
<b>ISC.0082.9014E</b>	<b>Unable to locate element declaration</b>
<b>Explanation</b>	Integration Server could not locate a corresponding schema definition for the element.
<b>Action</b>	Ensure that a schema for the relevant namespace has been created and that it contains a declaration for the element.
<b>ISC.0082.9015E</b>	<b>Ambiguous content model in schema - not LL(1)</b>
<b>Explanation</b>	The content model is ambiguous. The given set of particle can validate the same instance with more than one unique set of occurrence counts.
<b>Action</b>	A schema must not be ambiguous. It must be possible to validate an instance without looking ahead in the content model definition. Modify the schema so that the content model is not ambiguous.
<b>ISC.0082.9016E</b>	<b>Unable to resolve QName: {0}</b>
<b>Explanation</b>	The type reference cannot be resolved to a defined type.
<b>Action</b>	Specify a defined type.
<b>ISC.0082.9017E</b>	<b>{0} is not validly derived from {1}</b>
<b>Explanation</b>	The type specified in the instance document is not a valid subtype of the type specified in the schema element declaration.
<b>Action</b>	Correct the instance document by specifying a valid subtype.
<b>ISC.0082.9018E</b>	<b>{0} is an abstract type and cannot be used directly to validate content</b>
<b>Explanation</b>	An abstract type cannot be specified in an instance document.
<b>Action</b>	Specify a concrete type that has been derived from the abstract type.
<b>ISC.0082.9019E</b>	<b>{0} is an abstract element and cannot appear in an instance</b>
<b>Explanation</b>	The instance document contains an element that has been declared abstract in the schema. Abstract elements may not appear in an instance document.
<b>Action</b>	Remove the abstract designation rfrom the schema element definition or use a member of the abstract element's substitution group in the instance document.

---

<b>ISC.0082.9020E</b>	<b>{0} - xsi:type is used incorrectly (declared type is anonymous)</b>
<b>Explanation</b>	The element declaration does not reference a named type. It is not possible to specify a type in the instance document.
<b>Action</b>	Do not use a type specification for an element that has an anonymous type declaration.
<b>ISC.0082.9022E</b>	<b>The nillable value of {0} is false, hence xsi:nil cannot appear in an instance</b>
<b>Explanation</b>	The element declaration does not have the nillable attribute set to true. The element in the instance document may not have a nil attribute.
<b>Action</b>	Correct the instance document or modify the element declaration to have the nillable attribute set to true.
<b>ISC.0082.9023E</b>	<b>The value of xsi:nil is invalid</b>
<b>Explanation</b>	The instance document element contains a value for the nil attribute that is not valid. The nil attribute must have a value of true or false.
<b>Action</b>	Correct the instance document to specify a valid value for the nil attribute.
<b>ISC.0082.9024E</b>	<b>{0} cannot have content or child elements since xsi:nil is true</b>
<b>Explanation</b>	An element is marked nill in the instance document. The element cannot have any content.
<b>Action</b>	Correct the element in the instance document.
<b>ISC.0082.9026E</b>	<b>Undefined Object found</b>
<b>Explanation</b>	An unexpected object was found in the document.
<b>Action</b>	Correct the instance document by removing the unexpected object.
<b>ISC.0082.9027E</b>	<b>Dimension mismatch, List expected</b>
<b>Explanation</b>	The instance document contains a scalar value where an array is expected.
<b>Action</b>	Correct the input data.
<b>ISC.0082.9028E</b>	<b>Dimension mismatch, Single item expected</b>
<b>Explanation</b>	An array was encountered where a scalar item was expected.
<b>Action</b>	Correct the instance document to specify a scalar item instead of an array.

<b>ISC.0082.9029E</b>	<b>Dimension mismatch, Table expected</b>
<b>Explanation</b>	The instance document contained an object type other than String array of dimension two.
<b>Action</b>	Correct the instance document
<b>ISC.0082.9030E</b>	<b>Type mismatch, String expected</b>
<b>Explanation</b>	The instance document contained an object type other than String.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9031E</b>	<b>Type mismatch, Document expected</b>
<b>Explanation</b>	The document field was expected to reference another document but instead referenced some other data type.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9033E</b>	<b>Java type mismatch; expected {0}, got {1}</b>
<b>Explanation</b>	The field is declared to contain one of the supported Java wrapper types but the instance document contains some other data type.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9034E</b>	<b>Field is absent, field must exist</b>
<b>Explanation</b>	The specified element or attribute is required but is not present in the instance document.
<b>Action</b>	Correct the instance document to contain the required element or attribute.
<b>ISC.0082.9035E</b>	<b>Value cannot be null, allow null value is false</b>
<b>Explanation</b>	The field is declared to not contain nulls, but the instance document contains a null.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9036E</b>	<b>Duplicate root element {0} found</b>
<b>Explanation</b>	An instance document may contain only one root element.
<b>Action</b>	Correct the instance document so that it has only one root element.

---

<b>ISC.0082.9037E</b>	<b>Element [{0}] cannot have characters [{1}], because the type's content type is element-only</b>
<b>Explanation</b>	The element's type declaration does not permit text nodes to be present.
<b>Action</b>	Remove the embedded text from the instance document, or use an element type declaration that permits text.
<b>ISC.0082.9038E</b>	<b>Tag occurs too many times</b>
<b>Explanation</b>	The element occurs more times than permitted by the element declaration's maxOccurs attribute.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9039E</b>	<b>Tag occurs too few time</b>
<b>Explanation</b>	The element occurs fewer times than required by the element declaration's minOccurs attribute.
<b>Action</b>	Correct the instance document.
<b>ISC.0082.9101S</b>	<b>Document Type generation error: {0}</b>
<b>Explanation</b>	An internal failure has occurred.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0082.9102S</b>	<b>Integration Server says - {0}</b>
<b>Explanation</b>	An unexpected error has interrupted the conversion process.
<b>Action</b>	Retry the request. If the error recurs contact Software AG Global Support.
<b>ISC.0082.9104S</b>	<b>{0} - unable to locate the root element</b>
<b>Explanation</b>	An internal error has interrupted the conversion process.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0082.9105E</b>	<b>Cannot process multi-dimensional array {0}. The maximum supported dimensionality for arrays is 2.</b>
<b>Explanation</b>	Document types may not contain String arrays with dimension greater than two
<b>Action</b>	Do not use String arrays with dimension greater than two.

**ISC.0082.9106E**      **Complex type {0} is recursive. Recursive types are supported only when selecting the option "Generate complex types as document types"**

**Explanation**      It is not possible to expand a type inline if it has a recursive reference. The expansion become infinite.

**Action**             Use the Generate complex types as document types option.

**ISC.0082.9109E**      **Nested and repeating model groups are not yet supported by strict compliance for the {0} component**

**Explanation**      This version of Integration Server does not support strict conversion of schema content models that have nested or repeating model groups.

**Action**             Do not use the Strict conversion option. Use the Lax or None option instead.

**ISC.0082.9401E**      **Invalid: length**

**Explanation**      The length facet value must be a non-negative integer.

**Action**             Specify a valid value for the length facet.

**ISC.0082.9402E**      **Invalid: minLength**

**Explanation**      The minLength facet value must be a non-negative integer.

**Action**             Specify a valid facet value.

**ISC.0082.9403E**      **Invalid: maxLength**

**Explanation**      The maxLength facet value must be a non-negative integer.

**Action**             Specify a valid facet value.

**ISC.0082.9404E**      **Invalid: totalDigits**

**Explanation**      The totalDigits facet value must be a positive integer.

**Action**             Specify a valid facet value.

**ISC.0082.9405E**      **Invalid: fractionDigits**

**Explanation**      The fractionDigits facet value must be a non-negative integer.

**Action**             Specify a valid value for the fractionDigits facet.

---

<b>ISC.0082.9408E</b>	<b>maxLength is less than minLength</b>
<b>Explanation</b>	The maxLength facet value is less than the minLength facet value.
<b>Action</b>	Adjust the minLength or maxLength facet so that minLength is less than or equal to maxLength.
<b>ISC.0082.9410E</b>	<b>Invalid enumerated item: {0}. Length of value is not equal to specified length</b>
<b>Explanation</b>	The enumerated item length is not equal to the length required by its type.
<b>Action</b>	Specify a valid value for the type.
<b>ISC.0082.9411E</b>	<b>Invalid enumerated item: {0}. Value is shorter than minimum length</b>
<b>Explanation</b>	The enumerated item is shorter than the required length of its type.
<b>Action</b>	Specify a valid value for the type.
<b>ISC.0082.9412E</b>	<b>Invalid enumerated item: {0}. Value is longer than maximum length</b>
<b>Explanation</b>	The enumerated value is longer than the maximum length allowed by its type.
<b>Action</b>	Specify a valid value for the type.
<b>ISC.0082.9416E</b>	<b>Invalid: minExclusive</b>
<b>Explanation</b>	The minExclusive facet value exceeds the values permitted by the totalDigits or fractionDigits facets.
<b>Action</b>	Specify a valid facet value.
<b>ISC.0082.9417E</b>	<b>Invalid: maxInclusive</b>
<b>Explanation</b>	The maxInclusive facet value exceeds the values permitted by the totalDigits or fractionDigits facet.
<b>Action</b>	Specify a valid value for the maxInclusive facet.
<b>ISC.0082.9418E</b>	<b>Invalid: maxExclusive</b>
<b>Explanation</b>	The maxExclusive facet value exceeds the values permitted by the totalDigits or fractionDigits facets.
<b>Action</b>	Specify a valid value for the maxExclusive facet.

<b>ISC.0082.9425E</b>	<b>maxInclusive is less than minInclusive</b>
<b>Explanation</b>	The maxInclusive facet value is less than the minInclusive facet value.
<b>Action</b>	Change the value of the maxInclusive facet or the minInclusive facet.
<b>ISC.0082.9427E</b>	<b>maxExclusive is less than minExclusive</b>
<b>Explanation</b>	The maxExclusive facet value is less than the minExclusive facet value.
<b>Action</b>	Change the value of the maxExclusive facet or the minExclusive facet.
<b>ISC.0082.9428E</b>	<b>maxExclusive is less than minInclusive</b>
<b>Explanation</b>	The maxExclusive facet value is less than the minInclusive facet value.
<b>Action</b>	Change the value of the maxExclusive facet or the minInclusive facet.
<b>ISC.0082.9436E</b>	<b>maxInclusive is less than minExclusive</b>
<b>Explanation</b>	The maxInclusive facet value is less than the minExclusive facet value.
<b>Action</b>	Change the value of the maxInclusive facet or the minExclusive facet.
<b>ISC.0082.9438E</b>	<b>Invalid enumerated item: {0}</b>
<b>Explanation</b>	The enumeration is empty.
<b>Action</b>	Specify a value for the enumeration facet.
<b>ISC.0082.9440E</b>	<b>Invalid enumerated item ( Out of range ): {0}</b>
<b>Explanation</b>	The enumeration facet value is outside of the permitted value range of the type.
<b>Action</b>	Correct the enumeration facet value.
<b>ISC.0082.9441E</b>	<b>Invalid enumerated item ( Does not match pattern ): {0}</b>
<b>Explanation</b>	The enumeration value does not match the pattern facet for the type.
<b>Action</b>	Correct the enumeration value to match the pattern facet.
<b>ISC.0082.9442E</b>	<b>Invalid enumerated item. Length of value is not equal to specified length</b>
<b>Explanation</b>	The length of an enumeration value for a list must be equal to the length facet of the list.
<b>Action</b>	Specify a list enumeration facet with the correct length.

<b>ISC.0082.9443E</b>	<b>Invalid enumerated item. Value is shorter than minimum length</b>
<b>Explanation</b>	The length of an enumeration value for a list must be greater than or equal to the minLength facet of the list.
<b>Action</b>	Specify a list enumeration facet with the correct length.
<b>ISC.0082.9444E</b>	<b>Invalid enumerated item. Value is longer than maximum length</b>
<b>Explanation</b>	The length of an enumeration value for a list must be less than or equal to the maxLength facet of the list.
<b>Action</b>	Specify a list enumeration facet with the correct length.
<b>ISC.0082.9447E</b>	<b>Value does not conform to datatype</b>
<b>Explanation</b>	The value is not a valid instance of the type.
<b>Action</b>	If the error occurs during schema compilation, correct the value specification in the schema. If the error occurs during document validation, it indicates that validation successfully detected an invalid document.
<b>ISC.0082.9449E</b>	<b>"length"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The length facet for the list is outside of the permissible range. It must not be less than the minLength facet and it must not be greater than the maxLength facet.
<b>Action</b>	Specify a valid length facet.
<b>ISC.0082.9450E</b>	<b>"minLength"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The minLength facet value is either less than the minLength facet value or greater than the maxLength facet value of the base type
<b>Action</b>	Specify a minLength facet value that is within the range allowed by the base type.
<b>ISC.0082.9451E</b>	<b>"maxLength"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The maxLength facet value is either greater than the maxLnegth facet value or less than the minLength facet value of the base type.
<b>Action</b>	Specify a maxLength facet value that is within the range allowed by the base type.
<b>ISC.0082.9452E</b>	<b>"minInclusive"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The minInclusive facet value is either less than the minInclusive facet value or greater than the maxInclusive facet value of the base type.
<b>Action</b>	Specify a minInclusive facet value that is within the range allowed by the base type.

<b>ISC.0082.9453E</b>	<b>"minExclusive"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The minExclusive facet value is either less than the minExclusive facet value or greater than the maxExclusive facet value of the base type.
<b>Action</b>	Specify a minExclusive facet value that is within the range allowed by the base type.
<b>ISC.0082.9454E</b>	<b>"maxInclusive"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The maxInclusive facet value is less than the minInclusive facet value or greater than the maxInclusive facet value of the base type
<b>Action</b>	Specify a correct maxInclusive facet or remove it.
<b>ISC.0082.9455E</b>	<b>"maxExclusive"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The maxExclusive facet value is less than the minInclusive facet value or greater than the maxInclusive facet value of the base type.
<b>Action</b>	Specify a correct maxExclusive facet or remove it.
<b>ISC.0082.9457E</b>	<b>"totalDigits"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The totalDigits facet value is greater than the totalDigits facet value of the base type.
<b>Action</b>	Specify a totalDigits facet value that is within the range allowed by the base type.
<b>ISC.0082.9458E</b>	<b>"fractionDigits"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The fractionDigits facet of a derived type may not exceed the fractionDigits facet of the base type
<b>Action</b>	Correct the fractionDigits facet value so that it does not exceed the fractionDigits facet value of the base type.
<b>ISC.0082.9459E</b>	<b>"whiteSpace"+STR_OUT_OF_BOUND</b>
<b>Explanation</b>	The whiteSpace facet value is incompatible with the whiteSpace facet value of the base type
<b>Action</b>	The whiteSpace facet value must specify white space handling that is more restrictive than the base type facet.
<b>ISC.0082.9460E</b>	<b>No matching enumeration value</b>
<b>Explanation</b>	The element value in the instance document contains a token that is not specified in the element type's enumeration facet.
<b>Action</b>	None. Validation successfully detected an invalid document.

---

<b>ISC.0082.9463E</b>	<b>Length of value is not equal to specified length</b>
<b>Explanation</b>	The length of the element value in the instance document does not match the length specified by the element type's length facet.
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9464E</b>	<b>Value is shorter than minimum length</b>
<b>Explanation</b>	The instance document element value is shorter than the minLength facet for the element type, or the element contains a list with fewer items than the minLength facet of the list type.
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9465E</b>	<b>Value is longer than maximum length</b>
<b>Explanation</b>	The instance document element value is longer than the maxLength facet for the element type, or the element contains a list with more items than the maxLength facet of the list type.
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9466E</b>	<b>Datatype definition is missing</b>
<b>Explanation</b>	The list specification does not include a type definition for the items of the list.
<b>Action</b>	Specify an item type definition for the list.
<b>ISC.0082.9469E</b>	<b>Value does not match pattern(s)</b>
<b>Explanation</b>	The element value in the instance document does not match the element type's facet pattern.
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9471E</b>	<b>The year 0000 is prohibited</b>
<b>Explanation</b>	The facet value may not contain a year value of 0000.
<b>Action</b>	Do not use 0000.
<b>ISC.0082.9472E</b>	<b>totalDigits is less than fractionDigits</b>
<b>Explanation</b>	The fractionDigits facet value must be less than or equal to the totalDigits facet value.
<b>Action</b>	Adjust the fractionDigits or the totalDigits facet value.

<b>ISC.0082.9473E</b>	<b>Invalid facet type</b>
<b>Explanation</b>	An invalid facet is specified.
<b>Action</b>	Specify a valid facet.
<b>ISC.0082.9474E</b>	<b>The input has invalid characters</b>
<b>Explanation</b>	An invalid whitespace character is present in the instance document.
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9475E</b>	<b>"length"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The length of the list is fixed and cannot be changed.
<b>Action</b>	Remove the length facet.
<b>ISC.0082.9476E</b>	<b>"minLength"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The minLength facet of the base type is fixed; it cannot be customized.
<b>Action</b>	Remove the minLength facet from the type specification.
<b>ISC.0082.9477E</b>	<b>"maxLength"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The maxLength facet of the base type is fixed; it cannot be customized.
<b>Action</b>	Remove the maxLength facet from the type specification.
<b>ISC.0082.9478E</b>	<b>"minInclusive"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The minInclusive facet of the base type is fixed; it cannot be customized.
<b>Action</b>	Remove the minInclusive facet from the type specification.
<b>ISC.0082.9479E</b>	<b>"minExclusive"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The minExclusive facet of the base type is fixed; it cannot be customized.
<b>Action</b>	Remove the minExclusive facet from the type specification.
<b>ISC.0082.9480E</b>	<b>"maxInclusive"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The maxInclusive facet of the base type is fixed; it cannot be customized.
<b>Action</b>	Remove the maxInclusive facet from the type specification.

---

ISC.0082.9481E	<b>"maxExclusive"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The maxExclusive facet of the base type is fixed; it cannot be customized.
<b>Action</b>	Remove the maxExclusive facet from the type specification.
ISC.0082.9482E	<b>"totalDigits"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The totalDigits facet of the base type is fixed; it cannot be customized.
<b>Action</b>	Remove the totalDigits facet from the type specification.
ISC.0082.9484E	<b>"whiteSpace"+STR_BASE_FACET_FIXED</b>
<b>Explanation</b>	The whiteSpace facet of the base type is fixed; it cannot be customized.
<b>Action</b>	Remove the whiteSpace facet from the type specification.
ISC.0082.9485E	<b>This datatype cannot have this facet</b>
<b>Explanation</b>	The specified facet is not defined for the type on which it appears.
<b>Action</b>	Remove the facet from the type specification where it appears.
ISC.0082.9486E	<b>Cannot specify length with minLength or maxLength</b>
<b>Explanation</b>	The length facet cannot be specified along with the minLength or maxLength facets.
<b>Action</b>	Remove the length facet or the minLength and maxLength facets.
ISC.0082.9487E	<b>"Invalid enumerated item: {0}. "+STR_EXCEEDS_TOTAL_DIGIT</b>
<b>Explanation</b>	The enumerated item has more total digits than allowed by its type.
<b>Action</b>	Specify a valid value for the type.
ISC.0082.9488E	<b>"Invalid enumerated item: {0}. "+STR_EXCEEDS_FRACTION_DIGIT</b>
<b>Explanation</b>	The enumerated item has more fraction digits than allowed by its type.
<b>Action</b>	Specify a value that is valid for the type.
ISC.0082.9489E	<b>STR_EXCEEDS_TOTAL_DIGIT</b>
<b>Explanation</b>	The total digits in the instance item exceeds the total digits that is valid for the type.
<b>Action</b>	None. Validation has successfully detected an invalid document.

<b>ISC.0082.9490E</b>	<b>STR_EXCEEDS_FRACTION_DIGIT</b>
<b>Explanation</b>	The instance item exceeds the fraction digits allowed for its type
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9491E</b>	<b>Value is less than minInclusive</b>
<b>Explanation</b>	The element value in the instance document is less than the minInclusive facet for the element type.
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9492E</b>	<b>Value is less than or equal to minExclusive</b>
<b>Explanation</b>	The element value in the instance document is less than or equal to the minExclusive facet for the element type.
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9493E</b>	<b>Value is greater than maxInclusive</b>
<b>Explanation</b>	The element value in the instance document exceeds the value of the maxExclusive facet for the element type
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9494E</b>	<b>Value is greater than or equal to maxExclusive</b>
<b>Explanation</b>	The element value in the instance document exceeds or equals the value of the maxExclusive facet for the element type
<b>Action</b>	None. Validation successfully detected an invalid document.
<b>ISC.0082.9495E</b>	<b>"Length constraint cannot be customized." +STR_LENGTH_EXISTS</b>
<b>Explanation</b>	The base type already has a length facet; it is not possible to change the length facet.
<b>Action</b>	Remove the length facet from the type specification.
<b>ISC.0082.9496E</b>	<b>"Cannot specify minLength if length is specified." +STR_LENGTH_EXISTS</b>
<b>Explanation</b>	The length and minLength facets are mutually exclusive.
<b>Action</b>	Remove one of the facets from the type specification.

---

<b>ISC.0082.9497E</b>	<b>"Cannot specify maxLength if length is specified. "+STR_LENGTH_EXISTS</b>
<b>Explanation</b>	The maxLength and length facets are mutually exclusive.
<b>Action</b>	Remove one of the facets from the type specification.
<b>ISC.0082.9712E</b>	<b>Cannot specify both {0} and {1}</b>
<b>Explanation</b>	The schema properties are mutually exclusive. Only one can be specified.
<b>Action</b>	Decide which property is relevant and remove the other.
<b>ISC.0082.9723E</b>	<b>Xerces Java parser determined that the XML schema definition is invalid</b>
<b>Explanation</b>	<p>The Xerces Java parser determined that an XML schema definition is invalid. This can occur in the following situations:</p> <ul style="list-style-type: none"><li>- When creating an asset (IS schema, document type, or flow service) from an XML Schema definition.</li><li>- When creating a Web service descriptor from a WSDL document that contains a schema element or references an XML schema definition.</li><li>- When refreshing Web service connectors</li><li>- When executing a Web service connector</li><li>- When changing the IS schemas, document types, or service signatures associated with a Web service descriptor</li></ul>
<b>Action</b>	<p>Use the information returned by the Xerces Java parser to make the schema valid.</p> <p>Alternatively, if you do not want the Xerces Java parser to perform schema validation, do one of the following:</p> <ul style="list-style-type: none"><li>- When creating the asset, clear the Validate schema using Xerces check box</li><li>- For an existing Web service descriptor, set the Validate schema using Xerces property to False.</li></ul>
<b>ISC.0083.9001E</b>	<b>Requested type not available</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the Integration Server XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.

<b>ISC.0083.9002E</b>	<b>Tree type not supported</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the supplied query object supplied was not a valid XML Node object.
<b>Action</b>	Examine the service input and ensure it is a valid XML node object. You can invoke the pub.xml:xmlStringToXMLNode or pub.xml:loadXMLNode service to obtain the document and transform it to an XML node object before performing the query.
<b>ISC.0083.9003E</b>	<b>Expression is empty</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because no query expression was specified.
<b>Action</b>	Examine the logic and make sure that the query expression is not empty.
<b>ISC.0083.9004E</b>	<b>Node parameter is null</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XML Node to be queried was empty or missing.
<b>Action</b>	Examine the XML node object submitted for query and make sure it is not null.
<b>ISC.0083.9005E</b>	<b>"{0}" object type not currently supported.</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the document submitted was not an instance of an XML Node object. This service can obtain information from XML nodes only. Note: An XML node is a special representation of an XML document that can be consumed by the Integration Server. Most webMethods services that operate on XML documents require an XML node as input.
<b>Action</b>	Examine the document submitted and make sure that you have used pub.xml:xmlStringToXMLNode or pub.xml:loadXMLNode service to convert the document to an XML Node object before performing the query.
<b>ISC.0083.9006E</b>	<b>Regions are not supported on IData objects</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it tried to perform a region query on an IData object; the Integration Server does not support this type of query. Currently only XML node objects are supported for region queries. Note: An XML node is a special representation of an XML document that can be consumed by the Integration Server. Most webMethods services that operate on XML documents require an XML node as input.
<b>Action</b>	Do not attempt to query regions on IData objects.

<b>ISC.0083.9007E</b>	<b>Source not available for IData objects</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it tried to obtain information from a Document (an IData object) instead of an XML Node. This service can obtain information from XML Nodes only. Note: An XML node is a special representation of an XML document that can be consumed by the Integration Server. Most webMethods services that operate on XML documents require an XML node as input.
<b>Action</b>	Do not attempt to query the source from Documents (IData objects).
<b>ISC.0083.9008E</b>	<b>Recursion detected in IData at {0}; can't have recursion when query contains   or //</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it tried to perform a query on a recursive IData object, but the query contained " " (a union operator) or "/" (a path operator). These operators are not allowed when querying a recursive IData object.
<b>Action</b>	Do not attempt to query a recursive IData object when the query contains " " or "/".
<b>ISC.0083.9009</b>	<b>Illegal typecast in query expression</b>
<b>ISC.0083.9011</b>	<b>'true()' or 'false()' expected</b>
<b>ISC.0083.9012E</b>	<b>(' expected</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it specified an incorrect syntax. Specifically, the left-hand parenthesis "(" was missing after the "true" or "false" Boolean function.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax. There must be matching parentheses after any "true" or "false" functions, e.g., true(), false().
<b>ISC.0083.9013E</b>	<b>)' expected</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the right-hand parenthesis ")" was missing after the "true" or "false" Boolean function.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax. There must be matching parentheses after any "true" or "false" functions, e.g., true(), false().
<b>ISC.0083.9014E</b>	<b>Invalid boolean method: {0}</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the Integration Server XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.

<b>ISC.0083.9015E</b>	<b>Comparison requires an rvalue</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the right-hand operand was not present in the query. Left- and right-hand operands are required for a comparison query.
<b>Action</b>	Examine the query expression and make sure that both the left- and right-hand operands are supplied.
<b>ISC.0083.9016E</b>	<b>Comparison righthand operand evaluates to more than one value</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute a comparison query because the value of the right-hand operand was not a scalar.
<b>Action</b>	Examine the query expression and make sure the value of the right-hand operand is a scalar or a value that can be cast at runtime to a scalar.
<b>ISC.0083.9017E</b>	<b>Comparison operator is missing.</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute a comparison query because the expression contained \$any\$ or \$all\$, but no comparison operator. A comparison operator must be specified in an expression that contains \$any\$ or \$all\$.
<b>Action</b>	Examine the query expression and make sure it contains a comparison operator.
<b>ISC.0083.9018E</b>	<b>Only relative queries allowed inside filters.</b>
<b>Explanation</b>	The XQL query expression contains an absolute path inside the filter. For example, "book[/author]".
<b>Action</b>	Make sure that the XQL query expression contains a relative path inside the filter. For example, "book[author]".
<b>ISC.0083.9019U</b>	<b>'[' is not matched by ']'</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the left-hand square bracket "[" was specified but the right-hand square "]" bracket was missing. An expression that uses a filter operator or a subscript operator must contain matching parentheses.
<b>Action</b>	Examine the query expression and make sure it contains matching brackets "[ ]" .
<b>ISC.0083.9020E</b>	<b>Filter brackets may only select nodes or attributes</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because a subquery within the "[ ]" was not a node or attribute. A subquery must be a node or an attribute when a filter operation is used.
<b>Action</b>	Examine the query expression and make sure that the subquery contained within the "[ ]" is a node or attribute.

<b>ISC.0083.9021E</b>	<b>Invalid or missing term</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because a query expression using a filter operator specified an invalid term or no terms at all.
<b>Action</b>	Examine the query expression and make sure it specifies a valid term. Valid terms are: dot('.'), left parenthesis('('), at('@'), and wildcard('*').
<b>ISC.0083.9022E</b>	<b>'(' is not matched by ')'. Token "{0}" found.</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the query expression contained a left parenthesis "(" that was not matched by a right parenthesis ")", but rather by another character. The query expression must specify matching parentheses when a filter operator is used.
<b>Action</b>	Examine the query expression and make sure it contains matching parentheses "()".
<b>ISC.0083.9023E</b>	<b>'(' is not matched by ')'. End of query found.</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the query expression contained a left parenthesis "(" but no right parenthesis ")". A query expression must specify matching parentheses when a filter operator is used.
<b>Action</b>	Examine the query expression and make sure it contains matching parentheses "()".
<b>ISC.0083.9024E</b>	<b>Invalid or misplaced term "{0}"</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because an invalid character was specified in a query expression that contains a filter operator. Valid characters are dot ".", left and right parentheses "(" and ")", at "@", and wildcard "*".
<b>Action</b>	Examine the query expression and ensure that only valid characters are specified.
<b>ISC.0083.9025E</b>	<b>Invalid attribute name "{0}:"</b>
<b>Explanation</b>	The XQL query expression contains an invalid attribute name. This attribute belongs to a namespace. For example, "//@prefix:123".
<b>Action</b>	Make sure that the XQL query expression contains a valid attribute name. For example, "//@prefix:a123".
<b>ISC.0083.9026E</b>	<b>Invalid or missing attribute name</b>
<b>Explanation</b>	The XQL query expression contains an invalid or undefined attribute name. For example, "//@123" or "//@".
<b>Action</b>	Make sure that the XQL query expression contains a valid attribute name. For example, "//@a123".

<b>ISC.0083.9027E</b>	<b>attribute() takes a quoted string</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the optional parameter passed to attribute() function was not a quoted string.
<b>Action</b>	Examine the query expression and make sure that it uses the correct syntax and passes a quoted string to the attribute() function.
<b>ISC.0083.9028E</b>	<b>attribute() incorrect attribute name "{0}"</b>
<b>Explanation</b>	The XQL query expression contains an invalid attribute name inside the attribute(). For example, "//book/attribute('123')".
<b>Action</b>	Make sure that the XQL query expression contains a valid attribute name inside the attribute(). For example, "//book/attribute('a')".
<b>ISC.0083.9029</b>	<b>Only nodes have attributes</b>
<b>ISC.0083.9030E</b>	<b>count() takes a query parameter</b>
<b>Explanation</b>	The XQL query expression contains a parameter in the count(), which is not allowed. For example, "//book/count(1)".
<b>Action</b>	Make sure that the XQL query expression does not contain a parameter in the count(). For example, "//book/count()".
<b>ISC.0083.9031E</b>	<b>Type {0} can't be cast to Date</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the query engine returned a value that could not be cast as a date.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax and specifies the correct query.
<b>ISC.0083.9032E</b>	<b>date({0}){1}</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the parameter passed to the XQL date() function was not in a format that could be converted to a date.
<b>Action</b>	Examine the detailed error message and make sure that the string parameter passed to the XQL date() function can be converted to a date.
<b>ISC.0083.9033E</b>	<b>date(){0} Error offset:{1}</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the parameter passed to the XQL date() function could not be parsed.
<b>Action</b>	Examine the detailed error message and the position provided in it and make sure that the string parameter passed to the date() function in the query expression can be parsed to a date.

---

<b>ISC.0083.9034E</b>	<b>Invalid element name "{0}:"</b>
<b>Explanation</b>	The XQL query expression contains an invalid element name. This element belongs to a namespace. For example, "//a:1".
<b>Action</b>	Make sure that the XQL query expression contains a valid element name. For example, "//a:b".
<b>ISC.0083.9035</b>	<b>Invalid or missing element name</b>
<b>ISC.0083.9036E</b>	<b>element() takes a quoted string</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the optional parameter passed to XQL element() function was not a quoted string.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax and passes a quoted string to the element() function.
<b>ISC.0083.9037E</b>	<b>element() incorrect attribute name "{0}"</b>
<b>Explanation</b>	The XQL query expression contains an invalid parameter in element(). For example, "/book/element("1")".
<b>Action</b>	Make sure that the XQL query expression contains a valid parameter name in element(). For example, "/book/element("a")".
<b>ISC.0083.9038</b>	<b>Only nodes have child elements</b>
<b>ISC.0083.9039E</b>	<b>Type {0} can't be cast to Float</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it expected a float, but the value it received was not a float.
<b>Action</b>	Examine the query expression. Make sure it uses the correct syntax and specifies the query you intended.
<b>ISC.0083.9040E</b>	<b>id() takes a quoted string</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the optional parameter passed to XQL id() function was not a quoted string.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax and passes a quoted string to the XQL id() function.

- ISC.0083.9041E**      **Type {0} can't be cast to Integer**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because it expected an integer, but the value it received could not be cast as an integer.  
**Action**              Examine the query expression. Make sure it uses the correct syntax and specifies the query you intended.
- ISC.0083.9042E**      **name() takes a quoted string**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because the optional parameter passed to XQL name() function was not a quoted string.  
**Action**              Examine the query expression and make sure it uses the correct syntax and passes a quoted string to the XQL name() function.
- ISC.0083.9043E**      **name() requires a non-empty string**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because the parameter passed to the XQL name() function was empty.  
**Action**              Examine the query expression and make sure it uses the correct syntax and passes a non-empty quoted string to the name() function.
- ISC.0083.9044E**      **node() must be used relative to a node**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because it specified an incorrect syntax for the XQL node() function or tried to execute the function against a non-node object.  
**Action**              Examine the query expression and make sure it uses the correct syntax for the node() function and executes the function against a node.
- ISC.0083.9045E**      **region() must be used relative to a node**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because it specified an incorrect syntax for the XQL region() function or tried to execute the function against a non-node object.  
**Action**              Examine the query expression and make sure it uses the correct syntax for the region() function and executes the function against a node.
- ISC.0083.9046**      **Query parameters of region() must return nodes**

---

ISC.0083.9047	<b>region() can't have more than one region start node</b>
ISC.0083.9048	<b>region() can't have more than one region end node</b>
ISC.0083.9049E	<b>textnode() must be used relative to a node</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it specified an incorrect syntax for the XQL textnode() function or tried to execute the function against a non-node object.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax for the textnode() function and executes the function against a node.
ISC.0083.9050	<b>Function or method name expected</b>
ISC.0083.9051E	<b>'(' missing after function or method name</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because a left-hand parenthesis "(" was missing after the function or method name. The correct syntax is functionname() or methodname() .
<b>Action</b>	Examine the query expression and make sure that it uses the correct syntax for the function or method.
ISC.0083.9052E	<b>Query contains truncated invocation</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because an incomplete expression was provided for a function call. Specifically, the expression contained a left parenthesis "(" but the invocation parameter or right parenthesis ")" was missing. Examples: function() function(parameter
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax.
ISC.0083.9053E	<b>')' must terminate parameter list</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the right parenthesis ")" was missing from the parameter list that was passed to the XQL function.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax and includes the right parenthesis to terminate the parameter/parameter list.

<b>ISC.0083.9054E</b>	<b>missing function parameter</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the parameter required by the XQL function was not provided.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax and includes the required parameter.
<b>ISC.0083.9055E</b>	<b>Invalid number of parameters in function or method "{0}"</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because an invalid number of parameters were passed to the XQL function or method.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax and passes the correct number of parameters to the XQL function. See XQL Query Language at <a href="http://www.w3.org/TandS/QL/QL98/pp/xql.html">http://www.w3.org/TandS/QL/QL98/pp/xql.html</a> for method or function reference.
<b>ISC.0083.9056E</b>	<b>"{0}" is not a recognized function name</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because an invalid XQL function name was provided.
<b>Action</b>	Examine the query expression and make sure that it only uses the valid XQL functions. Integration Server currently supports the following pre-defined functions: attribute(), Boolean(), comment(), count(), date(), element(), float(), id(), integer(), name(), node(), not(), pi(), region(), textnode(), true(), false().
<b>ISC.0083.9057E</b>	<b>"{0}" is not a recognized method name</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because an invalid XQL method name was provided.
<b>Action</b>	Examine the query expression and make sure that it only uses the valid XQL methods. Integration Server currently supports the following pre-defined methods: basename(), count(), end(), index(), namespace(), nodename(), nodetype(), nodetypestring(), prefix(), regex(), regexinsensitive(), regexinsensitivematch(), regexmatch(), rawtext(), stringmatch(), source(), text(), value().
<b>ISC.0083.9058E</b>	<b>Methods may only be applied to nodes and attributes</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the Integration Server XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.

---

ISC.0083.9059	<b>regex() takes a quoted string</b>
ISC.0083.9060	<b>regexinsensitive() takes a quoted string</b>
ISC.0083.9061	<b>regexinsensitivematch() takes a quoted string</b>
ISC.0083.9062	<b>regexmatch() takes a quoted string</b>
ISC.0083.9063	<b>stringmatch() takes a quoted string</b>
ISC.0083.9064E	<b>Query contains extraneous terms</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because there was a syntax error in the expression. Specifically, there were extraneous terms in the expression.
<b>Action</b>	Examine the query expression and make sure it uses the correct syntax.
ISC.0083.9065E	<b>Cannot parse queries of type {0}</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
ISC.0083.9066E	<b>Left operand of / must be either a node or an attribute</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the query expression specified the unary child operator "/" but the value specified by the left-hand operand was not a node type or an attribute type.
<b>Action</b>	Examine the query expression and make sure the left-hand operand is a node or attribute.
ISC.0083.9067E	<b>Only relative queries allowed in relative paths.</b>
<b>Explanation</b>	The XQL query expression contains an absolute path inside another absolute path. For example, "/x/(/y)".
<b>Action</b>	Make sure that the XQL query expression does not contain an absolute path embedded inside another absolute path.

<b>ISC.0083.9068E</b>	<b>Left operand of // must be a node</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the query expression specified the unary child descendant operator "/" but the value specified by the left-hand operand was not a node.
<b>Action</b>	Examine the query expression and make sure the left-hand operand is a node.
<b>ISC.0083.9069E</b>	<b>Invalid subscript argument</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because no argument was supplied for the subscript operator or the argument supplied was not an integer.
<b>Action</b>	Examine the query expression and make sure that a valid integer is provided for the subscript operator.
<b>ISC.0083.9070E</b>	<b>Only values of the same type may be unioned</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute a union operation because the left-hand operand is not the same type as the right-hand operand.
<b>Action</b>	Examine the query expression and make sure that both operands are of the same type. Valid types are node, attribute, string, integer, float, and Boolean.
<b>ISC.0083.9071E</b>	<b>{0} and {1} types are not comparable</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute a comparison operation because the left-hand operand is not the same type as the right-hand operand.
<b>Action</b>	Examine the query expression and make sure that the left-hand operand and right-hand operand are of the same type. Valid types are node, attribute, string, integer, float, and Boolean.
<b>ISC.0083.9072E</b>	<b>The {0} relation is not defined on {1} types</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9073E</b>	<b>Unrecognized expression type "{0}"</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.

ISC.0083.9074	<b>generateQueryString Node doc is a required parameter. Must not be null.</b>
ISC.0083.9075	<b>generateQueryString String queryType is a required parameter. Must not be null.</b>
ISC.0083.9076E	<b>generateQueryString only supports WQL, XQLVALUES and XQL types. Unsupported type "{0}"</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because an expression attempted to evaluate an unsupported type. Integration Server currently only supports WQL,XQLVALUES and XQL.
<b>Action</b>	Contact Software AG Global Support.
ISC.0083.9077E	<b>Unknown TreeExpression type</b>
<b>Explanation</b>	Integration Server tried to process an unsupported type. This is an internal error. Currently only the WQL, XQLVALUES and XQL types are supported.
<b>Action</b>	Contact Software AG Global Support.
ISC.0083.9078E	<b>Cannot cast "{0}" to boolean</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it attempted to cast a string value to a Boolean type. The possible causes are: (1) the left-hand and right-hand operands specified with a comparison operator were not of the same type (2) the value returned by the query was of an unexpected type.
<b>Action</b>	Examine the query expression and make sure it specifies the correct syntax and performs the query you expected.
ISC.0083.9079E	<b>Cannot cast "{0}" to a float</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it attempted to cast a string value to a float. The possible causes are: (1) the left-hand and right-hand operands specified with a comparison operator were not of the same type (2) the value returned by the query was of an unexpected type.
<b>Action</b>	Examine the query expression and make sure it specifies the correct syntax and performs the query you expected.
ISC.0083.9080E	<b>Cannot cast "{0}" to an integer</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it attempted to cast a string value to an integer. The possible causes are: (1) The left-hand and right-hand operands specified with a comparison operator were not of the same type. (2) The value returned by the query was of an unexpected type.
<b>Action</b>	Examine the query expression and make sure it specifies the correct syntax and performs the query you expected.

<b>ISC.0083.9081E</b>	<b>Cannot cast "{0}" to a long</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because it attempted to cast a string value to a long type. The possible causes are: (1) the left-hand and right-hand operands specified with a comparison operator were not of the same type (2) the value returned by the query was of an unexpected type.
<b>Action</b>	Examine the query expression and make sure it specifies the correct syntax and performs the query you expected.
<b>ISC.0083.9082</b>	<b>IO error occurred while parsing a grove in a VARNAME expression: {0}</b>
<b>ISC.0083.9083E</b>	<b>XqlQuery.getStringWithIdentities: Query "{0}" does not yield strings:{1}</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9084E</b>	<b>XqlQuery.getString: Query "{0}" does not yield strings:{1}</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9085E</b>	<b>XqlQuery: Query yields unknown type</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9086E</b>	<b>XqlQuery.getNodeWithIdentities: Query "{0}" does not yield nodes</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9087E</b>	<b>XqlQuery.getNode: Query "{0}" does not yield nodes</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.

---

<b>ISC.0083.9088E</b>	<b>XqlQuery.getNodeArrayWithIdentities: Query "{0}" does not yield nodes</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9089E</b>	<b>XqlQuery.getNodeArray: Query "{0}" does not yield nodes</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9090E</b>	<b>XqlQuery.getIData: Query "{0}" does not yield nodes</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9091E</b>	<b>Query does not yield an IData instance as expected</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9092E</b>	<b>XqlQuery.getIDataArray: Query "{0}" does not yield nodes</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9093E</b>	<b>Query "{0}" does not yield only IData instances as expected</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISC.0083.9094E</b>	<b>Floating point numbers must begin with a digit</b>
<b>Explanation</b>	The pub.xml:queryXMLNode service failed to execute because an invalid query expression was provided. Specifically, a floating point number was provided in an incorrect format. A digit must immediately precede and follow the dot "." term. Examples of the correct format are "1.23" and "-0.99.". Examples of incorrect formats are ".99" and "1.".
<b>Action</b>	Examine the query expression and make sure that it uses the correct format for floating point numbers.

- ISC.0083.9095E      Unrecognized operator '{0}'**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because an expression contained an unrecognized operator.  
**Action**              Examine the query expression and make sure it only uses the valid operators specified in the XQL specification. For more information, see XQL Query Language at <http://www.w3.org/TandS/QL/QL98/pp/xql.html>.
- ISC.0083.9096E      Invalid number: "{0}"**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because the XQL query engine could not parse a numberString to an integer or a float because the string does not represent an integer or float number.  
**Action**              Examine the query expression and make sure that it uses the correct syntax. See XQL Query Language at <http://www.w3.org/TandS/QL/QL98/pp/xql.html> for more information.
- ISC.0083.9097        Missing terminal quote: {0}{1}**
- ISC.0083.9098E      "{0}" is not a recognized function or method name**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because an invalid XQL function or method was specified in the query expression.  
**Action**              Examine the query expression and make sure that you only use a set of pre-defined XQL function names or method names in the query. For a list of pre-defined functions and methods in XQL, see The XML Query Language (XQL) at <http://www.w3.org/TandS/QL/QL98/pp/xql.html>.
- ISC.0083.9099E      Method requires Node tree for query "{0}".**  
**Explanation**      The pub.xml:queryXMLNode service failed to execute because the XQL query engine encountered an internal error.  
**Action**              Contact Software AG Global Support.
- ISC.0083.9100        Queries on attributes are not supported by IData trees.**
- ISC.0083.9101        nsDecls and namespaces are not supported by IData trees.**

---

<b>ISC.0084.9004E</b>	<b>Access Denied</b>
<b>Explanation</b>	The user does not have permission to access an Integration Server resource. Review the server log to find the resource and the user who was denied access.
<b>Action</b>	If the user should have access to this resource, either add the user to the group that is in the Allowed list of the execute ACL of the resource, or add one of this user's groups to the Allowed list of the execute ACL of the resource.
<b>ISC.0084.9005E</b>	<b>Invalid Session ID or Session Expired</b>
<b>Explanation</b>	Whenever a client presents a Session ID that is no longer valid, Integration Server throws this exception and sets the 401 HTTP response code to force the client to re-authenticate.
<b>Action</b>	No action is necessary.
<b>ISC.0084.9006E</b>	<b>Server is not accepting new requests at this time</b>
<b>Explanation</b>	A client request was submitted during Integration Server shutdown. Integration Server does not accept requests during shutdown.
<b>Action</b>	Resubmit the request after Integration Server becomes available again.
<b>ISC.0084.9007E</b>	<b>Server has reached client limit</b>
<b>Explanation</b>	Integration Server was not able to create a session to service a client request. Integration Server sends this error with HTTP response code 503 to the client.
<b>Action</b>	Review the server log and error log to find possible causes of this error.
<b>ISC.0084.9102E</b>	<b>Resubmit data array cannot be null.</b>
<b>Explanation</b>	webMethods Monitor failed to resubmit the rejected document because the data array for resubmission was not supplied.
<b>Action</b>	Examine the document to be resubmitted and make sure that it is valid and not empty.
<b>ISC.0084.9103E</b>	<b>Resubmit data cannot be null.</b>
<b>Explanation</b>	webMethods Monitor failed to resubmit the rejected document because the data for resubmission was not supplied.
<b>Action</b>	Examine the document to be resubmitted and make sure that it is valid and not empty.

- ISC.0084.9104E      Auditcontexts cannot be null or empty.**  
**Explanation**      webMethods Monitor failed to resubmit the rejected document because the "auditContexts" field in the data was either null or empty.  
**Action**              Examine the document to be resubmitted and make sure that it is valid and that the "auditContexts " field is not missing.
- ISC.0084.9105E      Service name cannot be null or empty.**  
**Explanation**      webMethods Monitor failed to resubmit the rejected document because the "serviceName" field in the data was either null or empty.  
**Action**              Examine the document to be resubmitted and make sure that it is valid and that the "serviceName" field is not missing.
- ISC.0084.9106U      Service for resubmission does not exist on the server.**  
**Explanation**      webMethods Monitor failed to resubmit the rejected document because the service for resubmission does not exist on Integration Server.  
**Action**              Examine the document to be resubmitted and make sure that the name specified in the "serviceName" field is a valid service and exists on Integration Server.
- ISC.0084.9107E      Input pipeline cannot be null.**  
**Explanation**      webMethods Monitor failed to resubmit the rejected document because the "pipeline" field in the data was either null or empty.  
**Action**              Examine the document to be resubmitted and make sure that it is valid and that the "pipeline" field is not missing.
- ISC.0084.9108E      User name cannot be empty or null.**  
**Explanation**      webMethods Monitor failed to resubmit the rejected document because the "userName" field in the data was either null or empty.  
**Action**              Examine the document to be resubmitted and make sure that it is valid and that the "userName" field is not missing.
- ISC.0084.9109E      Access is denied to the user.**  
**Explanation**      The current user does not have permission to invoke the service that is being resubmitted.  
**Action**              To grant permission to the user, add the user to a group that is listed in the Execute ACL assigned to the service.

---

ISC.0086.9193	<b>FTP session key not specified</b>
ISC.0086.9198	<b>Missing content or filename</b>
ISC.0086.9199	<b>{0} is not a valid directory!</b>
ISC.0086.9200	<b>Private key data must be in a byte array (byte[]).</b>
ISC.0086.9201	<b>Certificate chain data must be an array of byte array (byte[][]).</b>
ISC.0086.9202	<b>Certificate at position {0} in array is not in any recognizable format</b>
ISC.0086.9203	<b>Not a valid long number</b>
ISC.0086.9204E	<b>"{0}" is required.</b>
<b>Explanation</b>	A required input value is missing.
<b>Action</b>	Supply the missing input value and re-execute the service.
ISC.0086.9205E	<b>If "{0}" is supplied, it must be zero (0) or greater.</b>
<b>Explanation</b>	The indicated input value is a negative number, but it must be zero or a positive number.
<b>Action</b>	For the specified parameter, enter a value of 0 or a positive integer. Alternatively, if the specified parameter is optional, delete the supplied value.
ISC.0086.9206E	<b>"offset" + "length" cannot exceed the size of "{0}".</b>
<b>Explanation</b>	The values specified for offset and length are invalid because they will cause Integration Server to write data from the stream past the end of the supplied buffer.
<b>Action</b>	Supply valid values for offset and length.
ISC.0086.9207E	<b>The mark method is not supported by the supplied InputStream.</b>
<b>Explanation</b>	A service invoked the pub.io:mark service to mark a location on a stream, but the supplied stream does not implement the mark and reset methods.
<b>Action</b>	If you are invoking a user-written service, either use a different kind of InputStream that implements the mark and reset methods, or do not invoke the pub.io:mark service. Otherwise, contact Software AG Global Support.

<b>ISC.0086.9208E</b>	<b>The reset method is not supported by the supplied InputStream.</b>
<b>Explanation</b>	A service invoked the pub.io:reset service to reset to a location on a stream, but the supplied stream does not implement the mark and reset methods.
<b>Action</b>	If you are invoking a user-written service, either use a different kind of InputStream that implements the mark and reset methods, or do not invoke the pub.io:reset service.
<b>ISC.0086.9209E</b>	<b>"{0}" must be greater than zero (0).</b>
<b>Explanation</b>	The input variable specified is negative or zero, but the value must be a positive number.
<b>Action</b>	Supply a value greater than zero for the indicated input parameter.
<b>ISC.0086.9210</b>	<b>User specified encoding "{0}" does not match content encoding received from remote server.</b>
<b>ISC.0086.9211</b>	<b>No LDAP credentials provided</b>
<b>ISC.0086.9212</b>	<b>{0} is a required input</b>

- ISC.0086.9282      **Unable to resolve the certificate to verify the signature.**
- ISC.0086.9283      **An invalid schema location pair was provided**
- ISC.0086.9284      **Folder{0} is not empty**  
**Explanation**      The specified folder must be empty.  
**Action**              Delete the contents of the specified folder or specify an empty folder.
- ISC.0086.9285      **Invalid folder name {0}. Error : {1}**  
**Explanation**      The specified folder name is invalid.  
**Action**              Specify a valid folder name.

---

<b>ISC.0086.9286</b>	<b>HSM based Keystore is not supported</b>
<b>ISC.0086.9289E</b>	<b>Applications cannot use an HTTP Status-Code of {0}</b>
<b>Explanation</b>	Only valid HTTP Status-Codes may be supplied.
<b>Action</b>	Supply a valid HTTP Status-Code.
<b>ISC.0086.9310E</b>	<b>Could not restore pipeline from file {0}.</b>
<b>Explanation</b>	The pub.flow:restorePipelineFromFile service failed because the specified pipeline file could not be found in the IntegrationServer_directory\pipeline directory.
<b>Action</b>	Make sure the specified pipeline file exists in the IntegrationServer_directory\pipeline directory, and then restore the pipeline.
<b>ISC.0086.9311E</b>	<b>Could not save pipeline to file {0}.</b>
<b>Explanation</b>	The pub.flow:savePipelineToFile service failed because the IntegrationServer_directory\pipeline directory could not be found or does not exist.
<b>Action</b>	Make sure the IntegrationServer_directory\pipeline directory exists, and then save the pipeline.
<b>ISC.0086.9318E</b>	<b>{0} must be "{1}" or "{2}".</b>
<b>Explanation</b>	The service failed because the specified input variable contains an invalid value. The values allowed for the input variable are listed in the message text.
<b>Action</b>	Enter a valid value for the input variable.
<b>ISC.0086.9319E</b>	<b>{0} must be "{1}", "{2}", "{3}" or "{4}".</b>
<b>Explanation</b>	The service failed because the specified input variable contains an invalid value. The values allowed for the input variable are listed in the message text.
<b>Action</b>	Enter a valid value for the input variable.
<b>ISC.0086.9320E</b>	<b>If {0} is supplied, {1} must also be supplied.</b>
<b>Explanation</b>	The service failed because the combination of input variables defined in the service is invalid. The message text lists the required input variable combinations.
<b>Action</b>	Provide a valid combination of input variables.

<b>ISC.0086.9321E</b>	<b>If {0} is "{1}", {2} must be supplied.</b>
<b>Explanation</b>	The service failed because the combination of input variables defined in the service is invalid. The message text lists the required input variable combinations.
<b>Action</b>	Provide a valid combination of input variables.
<b>ISC.0086.9322E</b>	<b>{0} must be "{1}", "{2}", "{3}" or "{4}" or "{5}".</b>
<b>Explanation</b>	The service failed because the specified input variable contains an invalid value. The values allowed for the input variable are listed in the message text.
<b>Action</b>	Enter a valid value for the input variable.
<b>ISC.0086.9323E</b>	<b>{0} must be "{1}", "{2}" or "{3}".</b>
<b>Explanation</b>	The service failed because the specified input variable contains an invalid value. The values allowed for the input variable are listed in the message text.
<b>Action</b>	Enter a valid value for the input variable.
<b>ISC.0086.9324E</b>	<b>If {0} is "{1}", {2} and {3} must be supplied.</b>
<b>Explanation</b>	The service failed because the combination of input variables defined in the service is invalid. The message text lists the required input variable combinations.
<b>Action</b>	Provide a valid combination of input variables.
<b>ISC.0088.0001U</b>	<b>SOAPException: {0}</b>
<b>Explanation</b>	The SOAP message handler could not process the message because an error occurred.
<b>Action</b>	Examine the details element in the SOAP exception message for information about the specific failure that occurred.
<b>ISC.0088.0002E</b>	<b>Failed registering SOAP Processor, missing parameter: {0}</b>
<b>Explanation</b>	Integration Server failed to add the specified SOAP processor to the processor registry using the pub.soap.processor:registerProcessor service.
<b>Action</b>	Examine the service input and make sure that the fully qualified service name is specified correctly for input parameter "svcName".
<b>ISC.0088.0003E</b>	<b>Failed registering SOAP Processor {0} as directive {1}; directive already registered</b>
<b>Explanation</b>	Integration Server failed to add the specified SOAP processor to the processor registry using the pub.soap.processor:registerProcessor service.
<b>Action</b>	Make sure that the "directive" parameter specifies the correct directive. (Directive names are case-sensitive.) In addition, make sure that the specified directive is not already registered in the SOAP Processor registry. Often, this error occurs because the registry already contains a processor registered to the specified directive.

---

<b>ISC.0088.0004E</b>	<b>Failed registering SOAP Processor {0} as directive {1}; unknown service {0}</b>
<b>Explanation</b>	Integration Server failed to add the specified SOAP processor to the processor registry using the pub.soap.processor:registerProcessor service.
<b>Action</b>	Examine the service input and make sure that the fully qualified service name is specified correctly for input parameter "svcName". (Service names are case-sensitive.) Often, this error occurs because the service does not exist on the Integration Server.
<b>ISC.0088.0005E</b>	<b>Failed unregistering SOAP Processor, missing parameter: {0}</b>
<b>Explanation</b>	The pub.soap.processor:unregisterProcessor service failed to execute because the "directive" parameter was not supplied.
<b>Action</b>	Examine the service input and make sure that the "directive" parameter specifies the correct directive. (Directive names are case-sensitive.) Often, this error occurs because the directive is not specified.
<b>ISC.0088.0006E</b>	<b>Failed unregistering SOAP Processor {0}; no such directive registered</b>
<b>Explanation</b>	Integration Server failed to remove the specified processor from the SOAP Processor registry using the pub.processor:unregisterProcessor service.
<b>Action</b>	Make sure that the "processorName" parameter specifies the correct directive. (Remember that directive names are case-sensitive.) In addition, make sure that the specified directive is currently registered in the SOAP Processor registry. It may have already been removed. Usually, this error occurs because the registry does not contain a processor registered to the specified directive.
<b>ISC.0088.0007E</b>	<b>Failed registering SOAP Processor {0} as directive {1}; invalid character(s) in directive</b>
<b>Explanation</b>	Integration Server failed to add the specified processor to the SOAP Processor registry using the pub.processor:registerProcessor service.
<b>Action</b>	Examine the service input and make sure that the value for the "directive" parameter only contains characters that are part of a Unicode identifier. See the description of the Java standard for the full range of Unicode values. Usually, this error occurs because the specified directive contains characters that are not part of a Unicode identifier.
<b>ISC.0088.0008</b>	<b>Failed registering JAX Handler {0}; Handler already registered</b>
<b>ISC.0088.0009</b>	<b>Failed initializing JAX Handler {0}; error {1}</b>

ISC.0088.0010	Failed destroying JAX Handler {0}; error {1}
ISC.0088.0011	Failed registering JAX Handler {0}, missing parameter {1}
ISC.0088.0012	Failed unregistering JAX Handler {0}; handler not registered
ISC.0088.0013	Failed unregistering JAX Handler {0}, missing parameter {1}
ISC.0088.0014	Failed listing JAX Handlers, missing parameter {0}
ISC.0088.0015	Failed finding JAX Handler {0}, missing parameter {1}
ISC.0088.0016	Failed finding JAX Handler {0}, handler not registered
ISC.0088.0017	Failed finding JAX Handler for header {0}:{1}
ISC.0088.0020	pub.client:soapClient SOAP request sent: {0}
ISC.0088.0022	pub.client:soapClient OutputValidationError - pipeline: {0} result: {1}
ISC.0088.0023	pub.client:soapClient InputValidationError - result: {0}
ISC.0088.0024	Encode input ({0}): {1}
ISC.0088.0026	Decode input ({0}): {1}
ISC.0088.0028E	<b>Service handler {0} could not be registered. A service handler by that name already exists</b>
<b>Explanation</b>	A service handler with the provided name already exists.
<b>Action</b>	Specify a unique name for the service handler.

---

<b>ISC.0088.0029E</b>	<b>Error initializing handler {0}. Error {1}</b>
<b>Explanation</b>	An error occurred while initializing the JAX-RPC header handler.
<b>Action</b>	The init() method of the JAX-RPC handler threw an error. Correct the error in init() method.
<b>ISC.0088.0030E</b>	<b>Error destroying service handler {0}. Error:{1}</b>
<b>Explanation</b>	An error occurred while destroying the JAX-RPC handler.
<b>Action</b>	The destroy() method of the JAX-RPC Handler has thrown an error. Correct the error in destroy() method.
<b>ISC.0088.0031E</b>	<b>Service handler {0} could not be registered. Missing required parameter {1}</b>
<b>Explanation</b>	A parameter required to register the service handler was not provided.
<b>Action</b>	Provide the missing parameter.
<b>ISC.0088.0032E</b>	<b>Service handler {0} could not be unregistered. A service handler by that name is not registered</b>
<b>Explanation</b>	The specified service handler is not registered.
<b>Action</b>	Provide the name of a registered service handler.
<b>ISC.0088.0033E</b>	<b>Service handler {0} could not be unregistered. Missing required parameter {1}</b>
<b>Explanation</b>	The service handler could not be unregistered because a required parameter is missing.
<b>Action</b>	Provide the missing parameter.
<b>ISC.0088.0034E</b>	<b>Registered service handlers could not be listed. Missing required parameter {0}</b>
<b>Explanation</b>	The list of registered service handlers could not be created because a required input parameter was not provided.
<b>Action</b>	Provide the missing input parameter.
<b>ISC.0088.0035E</b>	<b>Service handler {0} could not be found. Missing required parameter {1}</b>
<b>Explanation</b>	Service handler could not be found because a required input parameter was not provided.
<b>Action</b>	Provide the missing input parameter.

<b>ISC.0088.0036E</b>	<b>Service handler {0} could not be found. Service handler is not registered</b>
<b>Explanation</b>	A service handler with the provided name does not exist.
<b>Action</b>	Register a service handler with the provided name or specify the name of an existing registered service handler.
<b>ISC.0088.0037E</b>	<b>Could not find service handler for header {0}:{1}</b>
<b>Explanation</b>	The QName of the header does not correspond to a registered service handler.
<b>Action</b>	Verify that the QName of the header corresponds to a registered service handler or register a service handler for the provided universal name.
<b>ISC.0088.0038E</b>	<b>Error while processing asynchronous SOAP response received by the consumer Web service descriptor {0}. SOAP Message : {1}</b>
<b>Explanation</b>	Integration Server failed to process the asynchronous SOAP response directed to the consumer web service descriptor specified in the message.
<b>Action</b>	Check the server log and error log to find possible causes of this error and take corrective steps.
<b>ISC.0088.0039E</b>	<b>Error while processing asynchronous SOAP response received by the consumer Web service descriptor {0}.</b>
<b>Explanation</b>	Integration Server failed to process the asynchronous SOAP response directed to the consumer Web service descriptor specified in the message, possibly because the SOAP response is not well formed.
<b>Action</b>	Check the server log and error log to find possible causes of this error and take corrective steps.
<b>ISC.0088.0100</b>	<b>WS Security processing failed : Unable to convert SOAPMessage into a Document : {0}</b>
<b>ISC.0088.0101</b>	<b>WS Security processing failed : Unable to convert Document into a SOAPMessage : {0}</b>
<b>ISC.0088.0102</b>	<b>WS Security processing failed : A valid Document was not specified. Unable to create SOAPMessage</b>

ISC.0088.0112	WS Security processing failed : Error while operating on Keystore
ISC.0088.0113	WS Security processing failed : Unable to resolve partner certificate for encrypting the response
ISC.0088.0114	WS Security processing failed : Untrusted certificate chain
ISC.0088.0115	WS Security processing failed : Error during response encryption while retrieving partner certificate from the certificate mapper.

**ISC.0088.0116**      **WS Security processing failed : Invalid outbound security policy. Username token assertion not supported in the response**

**ISC.0088.0117**      **WS Security processing failed : Invalid outbound security policy. X509Authenticion token assertion not supported in the response**

**ISC.0088.0118**      **WS Security processing failed : Unable to resolve private key for signing or decrypting the message**

**ISC.0088.0119**      **WS Security processing failed : Unexepected error occurred while accessing the Keystore/Truststore**

**ISC.0088.0120**      **WS Security processing failed : Unable to resolve partner certificate for encrypting the request**

**ISC.0088.0200E**      **WS Security processing failed: Unable to retrieve {0} provider Web service endpoint alias named "{1}"**

**Explanation**      Integration server could not find the provider Web service endpoint alias with the type and name specified in the message.

**Action**              Create an appropriate provider Web service endpoint alias.

**ISC.0088.0201E**      **WS Security processing failed: Decryption of encrypted key failed because the key is encrypted with an unknown certificate.**

**Explanation**      Integration Server is unable to find a private key corresponding to the certificate used to encrypt the key.

**Action**              Configure an appropriate keystore in the WS Security Properties section of the appropriate consumer or provider Web service endpoint alias or by using the Decryption Key option under Security > Certificates in the Integration Server Administrator.

**ISC.0088.0202E**      **WS Security processing failed: Unable to resolve the private key required for signing the SOAP request.**

**Explanation**      Private key required for signing the SOAP request is not configured.

**Action**              Configure a keystore by adding the values in the WS Security Properties section of the appropriate consumer Web Service endpoint alias or by using the Signing Key option under Security > Certificates in the Integration Server Administrator.

---

<b>ISC.0088.0203E</b>	<b>WS Security processing failed: Unable to resolve the private key required for signing the SOAP response.</b>
<b>Explanation</b>	Private key required for signing the SOAP response is not configured.
<b>Action</b>	Configure a keystore by adding the values in the WS Security Properties section of the appropriate provider Web Service endpoint alias or by using the Signing Key option under Security > Certificates in the Integration Server Administrator.
<b>ISC.0088.0204E</b>	<b>WS Security processing failed: Invalid partner certificate passed into the Web service connector.</b>
<b>Explanation</b>	Value provided for auth/message/partnerCert field while executing the Web service connector is invalid.
<b>Action</b>	Provide a valid certificate for auth/message/partnerCert.
<b>ISC.0088.0205E</b>	<b>WS Security processing failed: Invalid partner certificate provided in the endpoint alias "{0}".</b>
<b>Explanation</b>	Partner certificate file provided in the endpoint alias mentioned in the message is invalid.
<b>Action</b>	Specify a valid partner certificate file in the endpoint alias mentioned in the message.
<b>ISC.0088.0206E</b>	<b>WS Security processing failed: Unable to resolve the private key required for decrypting the SOAP request.</b>
<b>Explanation</b>	Private key required for decrypting the SOAP request is not configured.
<b>Action</b>	Configure a keystore by adding the values in the WS Security Properties section of the appropriate provider Web service endpoint alias or by using the Decryption Key option under Security > Certificates in the Integration Server Administrator.
<b>ISC.0088.0207E</b>	<b>WS Security processing failed: Unable to resolve the private key required for decrypting the SOAP response.</b>
<b>Explanation</b>	Private key required for decrypting the SOAP response is not configured.
<b>Action</b>	Configure a keystore by adding the values in the WS Security Properties section of the appropriate consumer Web service endpoint alias or by using the Decryption Key option under Security > Certificates in the Integration Server Administrator.
<b>ISC.0088.0208E</b>	<b>WS Security processing failed: Decryption failed because the SOAP message is encrypted with an unknown certificate.</b>
<b>Explanation</b>	Integration server is unable to find a private key corresponding to the certificate used to encrypt the message.
<b>Action</b>	Configure an appropriate keystore in the WS Security Properties section of the appropriate consumer or provider Web service endpoint alias or by using the

Decryption Key option under Security > Certificates in the Integration Server Administrator.

**ISC.0088.0209E**      **WS Security processing failed: Signature verification failed because the certificate associated with the signing private key is unknown.**

**Explanation**      Integration server is unable to find a certificate corresponding to the private key used to sign the message.

**Action**      Ensure that the certificate corresponding to the private key used to sign the message is imported into the certificate mapper using Security > Certificates > Configure Client Certificates in the Integration Server Administrator.

**ISC.0088.0210E**      **WS Security processing failed: Error retrieving certificate from certificate mapper.**

**Explanation**      Integration Server failed to retrieve the certificate corresponding to the private key that was used to sign the message. Integration Server encountered an unexpected error when attempting to retrieve the certificate from the certificate mapper.

**Action**      Probable cause is that the embedded database of Integration Server that is used to store the certificates is corrupted. Contact Software AG Global Support.

**ISC.0088.0211W**      **WS Security processing failed: Binder for the SOAP action "{0}" in the Web service descriptor "{1}" not found. Integration Server will use server private keys and certificates for handling WS-Security.**

**Explanation**      Integration Server cannot find the binder for the specified SOAP action in the Web service descriptor. Integration Server is unable to use the private keys and certificates from the endpoint alias. As a result, Integration Server will use the server private keys and certificates.

**Action**      Ensure that the correct SOAP action is specified in the incoming SOAP request.

**ISC.0088.0212E**      **WS Security processing failed: HSM keystores are not supported.**

**Explanation**      The Integration Server WS-Security functionality does not support HSM keystores.

**Action**      Use a supported keystore type, for example, PKCS12 or JKS.

**ISC.0088.0213E**      **WS Security processing failed: Integration server only supports Username token with password type {0}, but received with password type {1}.**

**Explanation**      Incoming SOAP request has an unsupported password type in the Username token. Integration Server supports Username tokens with passwords of type:  
{<http://docs.oasis-open.org/wss/2004/01/oasis-200401-wss-username-token-profile-1.0>#PasswordText only.

**Action**      Ensure that the SOAP request the requester/client sends has a valid Username token.

---

<b>ISC.0088.0214E</b>	<b>WS Security processing failed: Unable to retrieve {0} consumer Web service endpoint alias named "{1}"</b>
<b>Explanation</b>	Integration server could not find the consumer Web service endpoint alias with the type and name specified in the message.
<b>Action</b>	Create an appropriate consumer Web service endpoint alias.
<b>ISC.0088.9129E</b>	<b>Invalid node: XML blocks must be in a container</b>
<b>ISC.0088.9131E</b>	<b>Invalid node: must be well-formed XML</b>
<b>ISC.0088.9142E</b>	<b>Invalid Body Entry. SOAP Body Entries must have a namespace name.</b>
<b>ISC.0088.9143E</b>	<b>Invalid Header Entry. SOAP Header Entries must have a namespace name.</b>
<b>ISC.0088.9165E</b>	<b>Soap Coder not found for a {0} SOAPMessage</b>
<b>ISC.0088.9167E</b>	<b>Service not found for soapAction = {0}</b>
<b>ISC.0088.9168E</b>	<b>SOAP Version Mismatch: SOAP Version "{0}" in request does not match the SOAP version "{1}" of the Web service.</b>
<b>ISC.0088.9169E</b>	<b>External WSDL URL does not exist for {0}, its a service first WSD.</b>
<b>ISC.0088.9170E</b>	<b>SOAP Version Mismatch: SOAP Version "{0}" in response does not match the SOAP version "{1}" of the Web service.</b>
<b>ISC.0088.9256E</b>	<b>Fault returned by invoked service</b>
<b>ISC.0088.9300E</b>	<b>Attachment Processing Failed: Can't get the size of the attachment due to an I/O Error</b>

**ISC.0088.9301E      Attachment Processing Failed: Can't retrieve the content due to an I/O Error**

**ISC.0088.9302E      Attachment Processing Failed: Attachment contains 'null' content**

**ISC.0088.9303E      Attachment Processing Failed: The value for Data Handler is 'null'**

**ISC.0088.9304E      Attachment Processing Failed: Data Handler contains 'null' Input Stream**

**ISC.0088.9320E      MTOM Attachments Processing Failed: Cannot convert SOAP Message to XOP Package; 'null' value for 'Web Service Descriptor'**

**Explanation**      The Web service descriptor identified by the part of request URL (for provider) or passed Web service descriptor name (for consumer) as parameter, does not exist.

**Action**             Correct the URL or correct the passed Web service descriptor name or create a proper Web service descriptor.

**ISC.0088.9321E      MTOM Attachments Processing Failed: Cannot convert SOAP Message to XOP Package; base64Binary encoded data is not in the Canonical Lexical form**

**Explanation**      Base64Binary encoded data is not in Canonical Lexical form; it contains line break characters or tabs.

**Action**             Convert the Base64Binary data into Canonical Lexical form.

**ISC.0088.9322E      MTOM Attachments Processing Failed: Cannot convert SOAP Message to XOP Package; invalid SOAP Message**

**Explanation**      The SOAP Message is invalid; either it is not well formed or it does not contain valid namespace declarations.

**Action**             Check the structure and content of the SOAP message.

**ISC.0088.9323      MTOM Attachments Processing Failed: Cannot convert SOAP Message to XOP Package; I/O Error occurred**

**Explanation**      Converting SOAP Message to XOP Package has been interrupted by another thread.

**Action**             Retry the action that caused it.

---

<b>ISC.0088.9324E</b>	<b>MTOM Attachments Processing Failed: Cannot convert XOP Package to SOAP Message; 'Content-Id' header field is missing in some of the attachments</b>
<b>Explanation</b>	One or more attachments does not contain the “Content-Id” field. This field is required to put the content of the attachment back into the SOAP message.
<b>Action</b>	Verify that the serialization of XOP Package to MIME stream had “Content-Id” present in the corresponding MIME part.
<b>ISC.0088.9325E</b>	<b>MTOM Attachments Processing Failed: Cannot serialize the XOP Message; unable to retrieve bytes from SOAP String using the SOAP Message Content Encoding</b>
<b>Explanation</b>	The conversion of SOAP String to byte array using the encoding specified for SOAP message has failed.
<b>Action</b>	Correct the content encoding specified for the SOAP message.
<b>ISC.0088.9326E</b>	<b>MTOM Attachments Processing Failed: Cannot serialize the XOP Message; MIME serialization has failed</b>
<b>Explanation</b>	Serialization of XOP Package to MIME Stream has failed.
<b>Action</b>	Verify the structure of SOAP Message is correct. Particularly the elements which contains base64Binary data.
<b>ISC.0088.9327E</b>	<b>MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; value of the 'Content-Type' header of the MIME message is not equal to 'multipart/related'</b>
<b>Explanation</b>	Value for the “Content-Type” header field of the MIME message is not equal to “multipart/related”.
<b>Action</b>	Verify that you have passed the correct value for “Content-Type” while serializing the MIME message.
<b>ISC.0088.9328E</b>	<b>MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; value of the 'type' parameter of the 'Content-Type' header of the MIME message is not equal to 'application/xop+xml'</b>
<b>Explanation</b>	Value for the “type parameter” of the “Content-type” header field of the MIME message is not equal to “application+xop+xml”.
<b>Action</b>	Verify that you have passed the correct value for “type” parameter while serializing the MIME message.

**ISC.0088.9329E**      **MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; value of the 'start-info' parameter of the 'Content-Type' header of the MIME message is not equal to 'application/soap+xml'**

**Explanation**      Value for the “start-info” parameter of the “Content-Type” header field of the MIME message is not equal to “application/soap+xml”.

**Action**            Check if you have passed the correct value for “start-info” parameter while serializing the MIME message otherwise pass the correct value for it.

**ISC.0088.9330E**      **MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; 'Content-Type' header of the Root MIME Part is invalid**

**Explanation**      Invalid content type for Root MIME part.

**Action**            Verify that you have passed the correct value for “Content-Type” header field of the Root MIME Part while serializing the MIME message.

**ISC.0088.9331E**      **MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; 'Content-Type' header of the Root MIME Part does not match with the 'type' parameter of the MIME message**

**Explanation**      The value of the “Content-Type” header of the Root MIME Part is not equal to the value of the “type” parameter of the “Content-Type” header of the MIME message.

**Action**            Verify that you have passed the correct value for these field(s)/parameter(s) while serializing the MIME message.

**ISC.0088.9332E**      **MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; value of 'type' parameter of the 'Content-Type' header of the Root MIME Part does not match with the value of the 'start-info' parameter of the MIME message**

**Explanation**      The value of the “type” parameter of the “Content-Type” header of the Root MIME Part is not equal to the value of the “start-info” parameter of the “Content-Type” header of the MIME Message.

**Action**            Verify that you have passed the correct value for these field(s)/parameter(s) while serializing the MIME.

**ISC.0088.9333E**      **MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; SOAP Message in the Root MIME part is not of version 1.2**

**Explanation**      The version of the SOAP Message not equal to 1.2.

**Action**            Send the SOAP 1.2 message.

---

<b>ISC.0088.9334E</b>	<b>MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; Root MIME Part contains invalid SOAP Message</b>
<b>Explanation</b>	The SOAP Message in the Root MIME Part is invalid; either it is not well formed or it does not contain valid namespace declarations.
<b>Action</b>	Check the structure and content of the SOAP message in the Root MIME Part.
<b>ISC.0088.9335E</b>	<b>MTOM Attachments Processing Failed: Cannot de-serialize the input MIME Stream; input stream is not a valid MIME stream</b>
<b>Explanation</b>	MIME Stream does not contain the valid data as per the MIME specifications.
<b>Action</b>	Verify that the MIME stream contains a valid MIME message.
<b>ISC.0088.9336E</b>	<b>Retrieving contents of the XOPObjct failed: "{0}"</b>
<b>Explanation</b>	You attempted to read the contents from an XOPObjct. However, previous logic in either the same service or a previous service has already read the XOPObjct. The XOPObjct instance can only be read one time.
<b>Action</b>	Update the service logic so that it reads an XOPObjct only one time.
<b>ISC.0088.9351E</b>	<b>Could not find Web Service Descriptor with name {0}</b>
<b>ISC.0088.9352E</b>	<b>Handler {1} not associated with Web Service Descriptor {0}</b>
<b>ISC.0088.9353E</b>	<b>Could not find policy with name {0}</b>
<b>ISC.0088.9354E</b>	<b>Missing required parameter : {0}</b>
<b>ISC.0088.9355E</b>	<b>First element of the SOAP-ENV:Body must have a QName</b>
<b>ISC.0088.9400E</b>	<b>Invalid BOOLEAN value {0} for variable {1}; must be true or false</b>
<b>ISC.0088.9432E</b>	<b>SOAP Header data does not conform to Header Record: {0}</b>

- ISC.0088.9433E**      **Access denied to Handler Service {0} in the Handler Chain**
- ISC.0088.9434E**      **Provided header data for the header named "{0}" exceeds the number of headers expected by Web Service Descriptor "{1}"**
- ISC.0088.9500E**      **Unable to determine SOAP version. Make sure that entry has a valid parent.**
- ISC.0088.9501E**      **Invalid namespace: {0}**
- ISC.0092.9117E**      **Invalid WSDL; URISyntaxException - Invalid URI found in the {0} attribute of the {1} element - BASE={2} URI={3}**
- Explanation**      The WSDL document used to create a WSDL first provider web service descriptor or a consumer web service descriptor contains a URI with invalid characters or syntax at the specified location.
- Action**      Correct the invalid URIs in the WSDL document and attempt to create the web service descriptor again.
- ISC.0092.9118E**      **Port "{0}" is not unique within service "{1}"**
- Explanation**      When creating a consumer Web service descriptor from a WSDL with the specified service, the service definition contains multiple ports that all have the same name.
- Action**      Update the WSDL so that the port name is unique within the service definition.
- ISC.0092.9119E**      **Schema definition not found for imported namespace(s):{0}**
- Explanation**      While creating a consumer Web service descriptor or a WSDL first provider Web service descriptor from a WSDL document, Integration Server determined that the WSDL document contained one or more `xsd:import` elements that did not specify the `schemaLocation` attribute. Consequently, the schema processor in Integration Server cannot locate the schema definition for the imported namespace and Web service descriptor creation fails. When this message appears at run time, the {0} in the message is replaced by the list of the imported namespaces for which a `schemaLocation` attribute is not specified.
- Action**      Correct the WSDL document by adding a valid `schemaLocation` attribute for each `xsd:import` element that did not specify a `schemaLocation`. The value of the `schemaLocation` attribute is a URI to the XML Schema definition for the imported namespace. Alternatively, modify the WSDL document by adding in inline schema definition for each namespace with a missing `schemaLocation` to the `wsdl:types` element in the WSDL document. Then attempt to create the Web service descriptor from the WSDL document.

---

<b>ISC.0107.9001E</b>	<b>Cannot create element "{0}"; a document type or schema with this name already exists on the Integration Server.</b>
<b>Explanation</b>	While trying to pull a document from the Broker, Integration Server determined that a record being referenced already existed on the Integration Server. As a result, synchronization could not continue.
<b>Action</b>	When synchronizing document types, clear the "Overwrite existing elements when importing referenced elements" check box.
<b>ISC.0107.9002</b>	<b>Cannot create field "{0}" in Broker document type for "{1}"; this field name is not valid on the Broker. The Broker will transport the field contents, which will be visible to Integration Server clients only.</b>
<b>ISC.0107.9003</b>	<b>Cannot retrieve "{0}"; document type with this name does not exist on the Integration Server.</b>
<b>ISC.0107.9004</b>	<b>Cannot make "{0}" unpublishable; it is not a publishable document type.</b>
<b>ISC.0107.9005</b>	<b>Cannot make "{0}" publishable; it is already a publishable document type.</b>
<b>ISC.0107.9006</b>	<b>Cannot create field "{0}" in Broker document type for "{1}"; recursive types cannot be represented on the Broker. The Broker will transport the field contents, which will be visible to Integration Server clients only.</b>
<b>ISC.0107.9007</b>	<b>Cannot make "{0}" publishable; it contains the field name '_env'.</b>
<b>ISC.0107.9008</b>	<b>Cannot make document type "{0}" publishable; this name is not valid.</b>
<b>ISC.0107.9009</b>	<b>Cannot make "{0}" publishable; the referenced document type "{1}" does not exist.</b>
<b>ISC.0107.9010</b>	<b>Cannot create field "{0}" in Broker document type for "{1}"; field with duplicate names are not permitted on the Broker.</b>

ISC.0107.9011	<b>SimpleType with the name "{0}" does not exist on the Integration Server.</b>
ISC.0107.9012	<b>Could not lock node "{0}"{1}</b>
ISC.0107.9013	<b>Could not create node "{0}". User "{1}" does not have write permission on folder "{2}".</b>
ISC.0124.9017E	<b>Document to XSD error: Field {0} cannot be represented in XML Schema. The field contains an XML Namespace property but the field name does not contain a prefix</b>
<b>Explanation</b>	A service for which a service first provider web service descriptor is being created uses an IS document type that contains a field with an assigned XML namespace property value. However, the field name does not include a prefix to associate with the XML namespace. That is, the field name is not in the format prefix:localName.
<b>Action</b>	Either add a prefix to the field name using the format prefix:localName or remove the value assigned to the XML namespace property. Important! Some protocols require the use of an XML namespace. Review the documentation for service signature requirements for service first provider web service descriptors.
ISC.0124.9019E	<b>Document to XSD error: Document type {0} cannot be represented in XML Schema. The document type is an XML document type.</b>
<b>Explanation</b>	Integration Server cannot create an XML Schema definition from an XML document type. Integration Server can create an XML Schema definition from an IS document type only. This error can appear whenever Integration Server creates an XML schema definition, such as when executing the pub.schema:createXSD service or when generating WSDL from a web service descriptor.
<b>Action</b>	Replace the XML document type with an IS document type.
ISC.0164.01Error	<b>Specified instance {0} is not a multiple of {1}.</b>
<b>Explanation</b>	The object instance in the JSON input is not a multiple of the value specified in the schema.
<b>Action</b>	Ensure that the object instance in the JSON input is a multiple of the value specified in the schema.
ISC.0164.02Error	<b>Specified numeric instance: {1} is greater than the allowed maximum value: {0}.</b>
<b>Explanation</b>	The value of the numeric instance in the JSON input is not less than or equal to the value specified in the schema.
<b>Action</b>	Reduce the specified value in the JSON input to be less than or equal to the maximum value allowed in the schema.

---

<b>ISC.0164.03Error</b>	<b>Specified numeric instance is not strictly less than the allowed maximum value: {0}.</b>
<b>Explanation</b>	The value of the numeric instance in the JSON input is greater than the value specified in the schema.
<b>Action</b>	Reduce the specified value in the JSON input to be strictly less than the maximum value allowed in the schema.
<b>ISC.0164.04Error</b>	<b>Specified numeric instance: {1} is less than the required minimum value: {0}.</b>
<b>Explanation</b>	The value of the numeric instance in the JSON input is not greater than or equal to the value specified in the schema.
<b>Action</b>	Change the specified value in the JSON input to be greater than or equal to the minimum value required in the schema.
<b>ISC.0164.05Error</b>	<b>Specified numeric instance is not strictly greater than the required minimum value: {0}.</b>
<b>Explanation</b>	The value of the numeric instance in the JSON input is less than the value specified in the schema.
<b>Action</b>	Change the specified value in the JSON input to be greater than the minimum value required in the schema.
<b>ISC.0164.06Error</b>	<b>Specified string: {0} of length: {1} is longer than the allowed maximum value: {2}.</b>
<b>Explanation</b>	The length of the string provided in the JSON input is greater than the value specified in the schema.
<b>Action</b>	Reduce the length of the string in the JSON input to be less than or equal to the maximum length specified in the schema.
<b>ISC.0164.07Error</b>	<b>Specified string: {0} of length: {1} is shorter than the required minimum value: {2}.</b>
<b>Explanation</b>	The length of the string provided in the JSON input is less than the value specified in the schema.
<b>Action</b>	Increase the length of the string in the JSON input to be greater than or equal to the minimum value specified in the schema.
<b>ISC.0164.08Error</b>	<b>Specified string: {0} does not match the ECMA 242 pattern: {1}.</b>
<b>Explanation</b>	The string provided in the JSON input does not match the pattern specified in the schema.
<b>Action</b>	Ensure that the input string matches the pattern specified in the schema.

<b>ISC.0164.10Error</b>	<b>Schema allows only {0} elements in an array, but the specified instance has {1} elements.</b>
<b>Explanation</b>	The array has elements other than those specified in the schema.
<b>Action</b>	Remove additional elements from the array to include only those that are specified in the schema.
<b>ISC.0164.11Error</b>	<b>Schema allows a maximum of {0} elements in an array, but the specified instance has {1} elements.</b>
<b>Explanation</b>	The specified array has more elements than the maximum allowed in the schema.
<b>Action</b>	Remove additional elements from the array to ensure that the total number of elements is less than or equal to the maximum allowed in the schema.
<b>ISC.0164.12Error</b>	<b>Schema requires a minimum of {0} elements in an array, but the specified instance has {1} elements.</b>
<b>Explanation</b>	The specified array has fewer elements than the minimum required in the schema.
<b>Action</b>	Add more elements to the array to ensure that the total number of elements is greater than or equal to the minimum required in the schema.
<b>ISC.0164.13Error</b>	<b>Array must not contain duplicate elements.</b>
<b>Explanation</b>	The specified array has duplicate elements.
<b>Action</b>	Remove duplicate elements from the array to ensure that it contains only unique elements.
<b>ISC.0164.15Error</b>	<b>Schema allows a maximum of {0} properties, but the specified object instance has {1} properties.</b>
<b>Explanation</b>	The specified object instance has more properties than the maximum allowed in the schema.
<b>Action</b>	Remove additional properties to ensure that the number of properties in the object instance is less than or equal to the maximum allowed value in the schema.
<b>ISC.0164.16Error</b>	<b>Schema requires a minimum of {0} properties, but the specified object instance has {1} properties.</b>
<b>Explanation</b>	The specified object instance has more properties than the minimum required in the schema.
<b>Action</b>	Add properties to ensure that the number of properties in the object instance is greater than or equal to the minimum required value in the schema.

---

<b>ISC.0164.17Error</b>	<b>Specified object instance must have the following required properties: {0}. The following properties are missing: {1}.</b>
<b>Explanation</b>	The object instance must have all the required properties specified in the schema.
<b>Action</b>	Add the required properties that are missing to the object instance.
<b>ISC.0164.20Error</b>	<b>Specified object instance has the following additional properties that the schema does not allow: {0}.</b>
<b>Explanation</b>	The object instance has properties other than those specified in the schema.
<b>Action</b>	Remove the additional properties from the object instance.
<b>ISC.0164.21Error</b>	<b>Property {0} is missing the following required property dependencies: {1}.</b>
<b>Explanation</b>	The JSON input does not contain dependency details for the specified property.
<b>Action</b>	Add the dependency for the specified property to the JSON input.
<b>ISC.0164.23Error</b>	<b>Specified instance value: {0} not found in enumeration with the following possible values: {1}.</b>
<b>Explanation</b>	The specified value is not among the possible enumeration values given in the schema.
<b>Action</b>	Make the required changes so that the specified values is among the possible enumeration values given in the schema.
<b>ISC.0164.25Error</b>	<b>Specified instance type: {0} does not match any of the allowed primitive types: {1}.</b>
<b>Explanation</b>	The specified input does not match any of the primitive types allowed in the schema.
<b>Action</b>	Change the input type to match the primitive types allowed in the schema.
<b>ISC.0164.26Error</b>	<b>Specified instance failed to match all the required schemas. Matched only {0} out of {1}.</b>
<b>Explanation</b>	The specified instance does not match all the schema instances.
<b>Action</b>	Change the input content so that it matches all the specified schema instances.
<b>ISC.0164.27Error</b>	<b>Specified instance failed to match at least one required schema out of {0}.</b>
<b>Explanation</b>	The specified instance does not match at least one of the schema instances.
<b>Action</b>	Change the input content so that it matches at least one of the specified schema instances.

<b>ISC.0164.28Error</b>	<b>Specified instance failed to match exactly one schema. Matched {0} out of {1}.</b>
<b>Explanation</b>	The specified instance matches more than one of the schema instances.
<b>Action</b>	Change the input content so that it matches exactly one of the specified schema instances.
<b>ISC.0164.29Error</b>	<b>Specified instance should not have matched the schema.</b>
<b>Explanation</b>	The specified instance matches the schema.
<b>Action</b>	Change the input content to not match the specified schema.
<b>ISC.81.9187W</b>	<b>JAX-RPC handlers are not supported when the Pre-8.2 compatibility mode is false. The following handlers will be ignored at run time: {0}</b>
<b>Explanation</b>	Integration Server only supports JAX-RPC handlers for use with Web service descriptors that run in pre-8.2 compatibility mode (i.e., when the Pre-8.2 compatibility mode property is true).
<b>Action</b>	To continue using the JAX-RPC handler, change the Web service descriptor to run in pre-8.2 compatibility mode. If you do not want to run the Web service descriptor in pre-8.2 compatibility mode, replace the JAX-RPC handler with a service handler that has the same behavior.
<b>ISC.81.9188W</b>	<b>Port type names of all the binders will be changed to "{0}". As a result, all bindings in the generated WSDL will use the same port type.</b>
<b>Explanation</b>	When a Web service descriptor's Pre-8.2 compatibility mode property is set to false, Integration Server generates WSDL with all the bindings referring to same port type. As a result, when you change the Pre-8.2 compatibility mode property from true to false, Integration Server changes the port type names of all the binders to (wsdName)_PortType, where (wsdName) is the Web service descriptor name.
<b>Action</b>	Depending on your web service client framework, you may need to regenerate or recreate existing Web service clients from the WSDL.
<b>ISC.81.9189E</b>	<b>All binders must have the same binding style and use when Pre-8.2 compatibility mode is false.</b>
<b>Explanation</b>	When a Web service descriptor's Pre-8.2 compatibility mode property is set to false, Integration Server does not allow the Web service descriptor to have binders that have different binding styles and use. Integration Server issues this message when either you are attempting to create a new binder for a Web service descriptor and the new binder has a different binding style or use from the existing binders, or when you are trying to consume a WSDL to create a Web service descriptor and WSDL has multiple bindings with different style and use.
<b>Action</b>	If you are trying to create a new binder for a Web service descriptor, use the same binding style and use as the existing binders. If you are trying to consume a WSDL that contains multiple bindings with different style and use, split the WSDL into multiple WSDLs that each use the same style and use.

<b>ISC.81.9190E</b>	<b>Multiple port types are not supported when Pre-8.2 compatibility mode is false.</b>
<b>Explanation</b>	The WSDL document used to create the Web service descriptor consists of multiple port types. When creating a Web service descriptor in Designer, Integration Server does not support multiple port types.
<b>Action</b>	Split the WSDL document that consists of multiple port types into multiple WSDL documents that each use a single port type. Then, create Web service descriptors from each WSDL document.
<b>ISC.81.9196W</b>	<b>MTOM streaming is not supported when the Pre-8.2 compatibility mode is true.</b>
<b>Explanation</b>	When the Pre-8.2 compatibility mode property of a Web service descriptor is set to true, Integration Server does not support MTOM streaming of attachments. Integration Server issues this message when you change the Pre-8.2 compatibility mode property from false to true and when at least one of the operation's input or output signature contains a field of type Object and the java wrapper type is set to com.wm.util.XOPObject.
<b>Action</b>	To continue using MTOM streaming, set the Pre-8.2 compatibility mode property of the Web service descriptor to false. If you want to run the Web service descriptor in pre-8.2 compatibility mode, ensure that the attachment size is not very large to avoid out of memory errors.
<b>ISC.88.9171E</b>	<b>Operation not found for soapAction = {0}</b>
<b>Explanation</b>	Integration Server could not find the operation for the SOAP action specified in the incoming SOAP request.
<b>Action</b>	Ensure that the correct SOAP action is specified in the incoming SOAP request. For a service first provider, if needed, you can edit the SOAP action to operation map present in the binder properties.
<b>ISC.88.9172E</b>	<b>Web service cannot be found for endpoint reference (EPR) = {0}</b>
<b>Explanation</b>	Integration Server could not find the Web service with the specified endpoint reference.
<b>Action</b>	Ensure that the Web service descriptor with the endpoint reference exists in the Integration Server.
<b>ISC.88.9173E</b>	<b>Operation can not be found for endpoint reference (EPR) = {0} and soapAction = {1}</b>
<b>Explanation</b>	Integration server could not find the operation in the Web service identified with the specified endpoint reference and SOAP action.
<b>Action</b>	Ensure that the operation with the specified SOAP action is present in the Web service descriptor identified by the endpoint reference.

<b>ISC.88.9357E</b>	<b>You cannot use this service against the specified Web service descriptor because its Pre-8.2 compatibility mode property is set to false.</b>
<b>Explanation</b>	Either pub.soap.utils.resetWSDEffectivePolicy or pub.soap.utils.setWSDEffectivePolicy services were specified with a Web service descriptor with Pre-8.2 compatibility mode property set to false. These services can only be used with Web service descriptors that are running in pre-8.2 compatibility mode (i.e., the Pre-8.2 compatibility mode property is set to true)
<b>Action</b>	Change the Web service descriptor's Pre-8.2 compatibility mode property to true.
<b>ISE.0093.9902E</b>	<b>Error occurred while invoking a service : {0}</b>
<b>Explanation</b>	The Integration Server encountered an internal error while invoking a service. More information about the error is provided in the error message.
<b>Action</b>	Contact Software AG Global Support.
<b>ISE.0093.9903E</b>	<b>Not implemented</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISE.0093.9904E</b>	<b>Unknown session: {0}</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISE.0093.9908E</b>	<b>Parameter {0} specified for method is invalid</b>
<b>Explanation</b>	The parameter that you specified is not valid.
<b>Action</b>	Specify a valid parameter.
<b>ISE.0093.9924E</b>	<b>FAILED</b>
<b>Explanation</b>	Integration Server is unable to retrieve the status of Repository Server V2.
<b>Action</b>	Ensure that the port and host information that you specified to retrieve the status of Repository Server V2 is correct.
<b>ISE.0093.9934E</b>	<b>Service {0} doesn't exist or was removed.</b>
<b>Explanation</b>	The service that you are trying to execute does not exist in Integration Server.
<b>Action</b>	Ensure that the service exists in Integration Server.

<b>ISE.0093.9935E</b>	<b>Package {0} doesn't exist or was removed.</b>
<b>Explanation</b>	The package that you are trying to access does not exist or is deleted.
<b>Action</b>	Ensure that the package you want to access exists in the IntegrationServer_directory\packages directory.
<b>ISE.0093.9936E</b>	<b>Port {0} doesn't exist or was removed.</b>
<b>Explanation</b>	The e-mail port that you are trying to access is not configured or enabled.
<b>Action</b>	Ensure that the e-mail port you want to access is configured and enabled.
<b>ISE.0093.9952E</b>	<b>Access was denied to resource {0}</b>
<b>Explanation</b>	The Integration Server encountered an internal error due to resource access.
<b>Action</b>	Contact Software AG Global Support.
<b>ISE.0093.9953E</b>	<b>A Java exception occurred {0}</b>
<b>Explanation</b>	Integration Server encountered an unexpected error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISE.0093.9954E</b>	<b>Resource {0} doesn't exist or was removed.</b>
<b>Explanation</b>	The Integration Server encountered an internal error due to resource access.
<b>Action</b>	Contact Software AG Global Support.
<b>ISKeyStoreBundle.getKeyForJournalLogger(DEFAULT_ILIVE_TRUSTSTORE_CREATION_ERROR)</b>	
<b>– Error: Truststore alias "DEFAULT_INTEGRATION_LIVE_TRUSTSTORE" cannot be created. Details: {0}</b>	
<b>ISP.0000.9101E</b>	<b>Unable to register NTLM Challenge Response Authentication handler</b>
<b>Explanation</b>	A handler was registered and then re-registered without first being unregistered.
<b>Action</b>	Register a handler only once. If you want to re-register a handler, first unregister it.
<b>ISP.0046.0001E</b>	<b>Could not initialize {0} Listener. Invalid port specified: {1}</b>
<b>Explanation</b>	While attempting to initialize a port, Integration Server detected that the port was improperly configured. Specifically, an invalid port number was specified for the port in the server.cnf, ports.cnf, or listeners.cnf file.
<b>Action</b>	Edit the appropriate configuration file and specify a port number from 1 through 65534 that is not already in use.

<b>ISP.0046.0006E</b>	<b>Cannot initialize {0} Listener on port {1}. No socket available.</b>
<b>Explanation</b>	While trying to initialize an HTTP listener, Integration Server determined that the socket associated with the requested port is already in use by another application. As a result, the requested port is unavailable.
<b>Action</b>	Specify a port that is not already in use, or disable the application that is using the requested port.
<b>ISP.0046.0007W</b>	<b>{0} Access denied. Connection disallowed {1}</b>
<b>ISP.0046.0019S</b>	<b>Unable to establish connection to Enterprise Gateway Server {0}:{1}. Exception: {2}.</b>
<b>Explanation</b>	The Internal Server could not establish a connection to Enterprise Gateway Server for the reason indicated.
<b>Action</b>	Ensure that the Enterprise Gateway registration port is enabled.
<b>ISP.0046.0020S</b>	<b>Unable to establish connection to Enterprise Gateway Server {0}:{1}. Internal Server was not authenticated on the Enterprise Gateway.</b>
<b>Explanation</b>	Internal Server authentication failed on the Enterprise Gateway.
<b>Action</b>	Ensure that the registration credentials specified during the creation of the Internal Server port are correct.
<b>ISP.0046.0024E</b>	<b>Unable to establish connection to Enterprise Gateway Server {0}:{1}. Internal Server version {2} does not support Enterprise Gateway version {3}</b>
<b>Explanation</b>	The version of Enterprise Gateway Server must be equal to or higher than the versions of Integration Servers acting as the Internal Server.
<b>Action</b>	Use the same or higher version of Enterprise Gateway Server.
<b>ISP.0046.0025E</b>	<b>Rejected a connection from Internal Server {0} on port {1}. Enterprise Gateway version {2} does not support Internal Server version {3}</b>
<b>Explanation</b>	The version of Enterprise Gateway Server must be equal to or higher than the versions of Integration Servers acting as the Internal Server.
<b>Action</b>	Use the same or higher version of Enterprise Gateway Server.
<b>ISP.0047.0001E</b>	<b>47.1 obsolete</b>
<b>Explanation</b>	While attempting to initialize a port, Integration Server detected that the port was improperly configured. Specifically, an invalid port number was specified for the port in the server.cnf, ports.cnf, or listeners.cnf file.
<b>Action</b>	Edit the appropriate configuration file and specify a port number from 1 through 65534 that is not already in use.

---

ISP.0047.0002	Resuming HTTPS Listener on port {0}
ISP.0047.0003	Starting HTTPS Listener on port {0}
ISP.0047.0005	Stopping HTTPS Listener on port {0}
ISP.0047.0008	Could not start HTTPS Listener on port {0}. No SSL support available.
ISP.0047.0009	Error in SSL setup: {0}
ISP.0047.0010	Certificate Authority was recognized
ISP.0047.0011	Certificate Authority was not recognized {0}
ISP.0047.0012	Client does not have a digital certificate
ISP.0047.0013	Access denied to host {0}
ISP.0047.0014	Error in SSL Setup: {0}
ISP.0047.0015	Error in SSL setup: Not all certificate fingerprints were loaded
ISP.0047.0016	The required client certificate was not provided by {0}
ISP.0047.0017	Could not start HTTPS listener on port {0}
ISP.0047.0018E	Aborting connection from {0}: {1}
<b>Explanation</b>	Integration Server encountered a problem while trying to establish a secure connection with the client at the indicated address.
<b>Action</b>	Make sure the client properly supports SSL connections.

<b>ISP.0047.0019E</b>	<b>SSL listener restricted to 128 bit or better encryption:</b>
<b>Explanation</b>	Integration Server configuration property <code>watt.net.ssl.server.strongcipheronly</code> is set to "true", but the list of ciphers includes weak ciphers. Integration Server displays these weak ciphers in subsequent messages.
<b>Action</b>	Either use only strong ciphers, or set <code>watt.net.ssl.server.strongcipheronly</code> to "false".
<b>ISP.0047.0020E</b>	<b>cipher {0} = {1} ({2} bit)</b>
<b>Explanation</b>	Integration Server configuration property <code>watt.net.ssl.server.strongcipheronly</code> is set to "true", but the list of ciphers includes the weak ciphers displayed by this message.
<b>Action</b>	Either use only strong ciphers, or set <code>watt.net.ssl.server.strongcipheronly</code> to "false".
<b>ISP.0047.0021E</b>	<b>Aborting connection request on {0} port {1}, a certificate map does not exist for {2}</b>
<b>Explanation</b>	A client presented a certificate to Integration Server, but the certificate has not been mapped to a user on Integration Server. For a certificate to be mapped to a user, the certificate must have been previously stored on Integration Server and associated with that user.
<b>Action</b>	Use the Server Administrator interface to import the certificate to Integration Server and map it to the appropriate user.
<b>ISP.0047.0022</b>	<b>Access denied to host: Hostname verification failed. The CN "{0}" in the subject DN of the certificate does not match the hostname "{1}".</b>
<b>ISP.0047.0023</b>	<b>Aborting connection, Server Certificate purpose verification failed</b>
<b>ISP.0047.9998U</b>	<b>Exception --&gt; {0}</b>
<b>Explanation</b>	Integration Server encountered an error. This message contains the exception produced by the server.
<b>Action</b>	Examine the error message to determine the problem.
<b>ISP.0057.0001I</b>	<b>Delete operation completed</b>
<b>ISP.0061.0001</b>	<b>Access denied to remote server {0} for user {1}</b>

- ISP.0068.0018      Could not start listener threads: {0}
- ISP.0068.0020      Could not get message with uid {0}
- ISP.0068.0021      Could not process message with uid {0}
- ISP.0068.0022      Could not send reply message to {0}. Check email address and smtp settings.

<b>ISP.0068.0023</b>	<b>Received reply message. Not processing</b>
<b>ISP.0068.0024</b>	<b>The connection to the IMAP server {0} for user {1} was temporarily lost. Some messages may not have been processed.</b>
<b>ISP.0068.0025</b>	<b>No content handler for content type {0}. Service {1} called without content handler.</b>
<b>ISP.0068.0026</b>	<b>Content type: {0} Subject: {1}</b>
<b>ISP.0068.0027</b>	<b>{0} lost connection to {1} server {2}</b>
<b>ISP.0068.0028</b>	<b>{0} reconnected to {1} server {2}</b>
<b>ISP.0068.9001E</b>	<b>Skipping processing reply email message</b>
<b>Explanation</b>	The subject line of the e-mail received on the e-mail port starts with "Re:". Hence, it is treated as a reply message and its processing is skipped.
<b>Action</b>	Investigate why the subject line of the e-mail starts with "Re:". Usually, this is an indicator of a reply message.
<b>ISP.0068.9002E</b>	<b>Skipping processing returned email message</b>
<b>Explanation</b>	The subject line of the e-mail received on the e-mail port starts with "Returned". Hence, it is treated as a message that is returned by the recipient and its processing is skipped.
<b>Action</b>	Avoid the error and process the returned messages by setting the extended property "watt.server.email.processReturnedEmails" to true.
<b>ISP.0068.9003E</b>	<b>Invalid service: {0}</b>
<b>Explanation</b>	Integration Server received a message on the e-mail port listener, but the service specified to perform the message processing is invalid. The service that Integration Server selects to execute message processing depends on how the server is configured. Integration Server searches for the value in the locations listed below in order of precedence:
	- The Global Service field on the Email Client Configuration screen on the Server Administrator.
	- The e-mail message from the e-mail client.
	- The Default Service field on the Email Client Configuration screen on the Server Administrator.

The problem is often that the service name is specified in the wrong case (service names are case sensitive). Other causes could be that no service was specified at all or the service is not in its specified location.

**Action** Make sure the service name is specified correctly and exists in the location specified.

**ISP.0068.9004E** **No such service: {0}**

**Explanation** The Integration Server FTP listener encountered an internal error.

**Action** Contact Software AG Global Support.

**ISP.0068.9005E** **Unknown content type: {0}**

**Explanation** The Integration Server does not support the MIME type specified.

**Action** Only use the MIME types supported by the Integration Server.

**ISP.0068.9006E** **Server Error: {0}**

**Explanation** An unexpected error occurred when invoking the service.

**Action** If the exception details provided as part of the message does not give any hint, contact Software AG Global Support.

**ISP.0068.9101E** **Invalid header {0}**

**Explanation** The header specified is invalid.

**Action** Ensure that a valid header is provided. Keep the following points in mind when specifying a header:

1. Header name should not contain spaces.
2. Header value should not be empty.
3. Header name and value should not be the same.

**ISP.0068.9102E** **Invalid TO field: {0}**

**Explanation** Either the recipient e-mail address is not provided in the "to" field or the address provided is invalid.

**Action** Enter a valid e-mail address in the "to" field. Refer to "pub.client:smtp" service in webMethods Integration Server documentation for further details.

---

<b>ISP.0068.9103E</b>	<b>Invalid CC field: {0}</b>
<b>Explanation</b>	The e-mail address entered in the "cc" field is invalid.
<b>Action</b>	Enter a valid e-mail address in the "cc" field. Refer to "pub.client:smtp" service in webMethods Integration Server documentation for further details.
<b>ISP.0068.9104E</b>	<b>Invalid BCC field: {0}</b>
<b>Explanation</b>	The e-mail address entered in the "bcc" field is invalid.
<b>Action</b>	Enter a valid e-mail address in the "bcc" field. Refer to "pub.client:smtp" service in webMethods Integration Server documentation for further details.
<b>ISP.0068.9106E</b>	<b>No filename nor content included in the attachment!</b>
<b>Explanation</b>	Content or filename is not provided in the attachments field.
<b>Action</b>	Provide either the content or the filename in the attachments field. Refer to "pub.client:smtp" service in webMethods Integration Server documentation for further details.
<b>ISP.0068.9108E</b>	<b>charset {0} is not valid</b>
<b>Explanation</b>	Character set encoding specified for the body or attachment is invalid.
<b>Action</b>	Ensure that the Character set encoding specified is valid. Refer to "pub.client:smtp" service in webMethods Integration Server documentation for further details.
<b>ISP.0068.9110E</b>	<b>Invalid MAILHOST field: {0}</b>
<b>Explanation</b>	No value is provided for the mailhost parameter of the pub.client:smtp service.
<b>Action</b>	Provide a valid value for the mailhost parameter of the pub.client:smtp service. Refer to "pub.client:smtp" service in webMethods Integration Server documentation for further details.
<b>ISP.0068.9111E</b>	<b>Invalid Message Recipient: {0}</b>
<b>Explanation</b>	Either the recipient e-mail address is not provided in the "to" field or the address provided is invalid.
<b>Action</b>	Enter a valid e-mail address in the "to" field. Refer to "pub.client:smtp" service in webMethods Integration Server documentation for further details.

ISP.0071.0001	Could not initialize FTP Listener. Invalid port specified: {0}
ISP.0071.0002	Suspending FTP(S) Listener on port {0}
ISP.0071.0003	Can not build data channel, the exception is {0}, the message is {1}
ISP.0071.0004	The port range specified for passive data connections to FTP(S) listeners is invalid: please specify both "watt.net.ftpPassivePort.min" and "watt.net.ftpPassivePort.max" values
ISP.0071.0005	The port range specified for passive data connections to FTP(S) listeners is invalid: "watt.net.ftpPassivePort.min" value is not a number
ISP.0071.0006	The port range specified for passive data connections to FTP(S) listeners is invalid: "watt.net.ftpPassivePort.max" value is not a number
ISP.0071.0007	The port range specified for passive data connections to FTP(S) listeners is invalid: "watt.net.ftpPassivePort.min" and "watt.net.ftpPassivePort.max" values are not within 1-65534 range
ISP.0071.0008	The port range specified for passive data connections to FTP(S) listeners is invalid: "watt.net.ftpPassivePort.min" value is greater than "watt.net.ftpPassivePort.max" value
ISP.0071.0009	All ports within the port range specified for passive data connections to FTP(S) listeners are in use
ISP.0071.0010E	PORT command refused. The PORT address {0} does not match the original host address {1}.
<b>Explanation</b>	In FTP active mode, the PORT command specifying the IP address does not match the client IP address in the control connection. Possible reason for this could be that your FTP client is compromised.
<b>Action</b>	Contact your network security team to take necessary action in case your FTP client is compromised.

---

<b>ISP.0071.0011E</b>	<b>Cannot build data connection: client address {0} does not match the original host address {1}.</b>
<b>Explanation</b>	In FTP passive mode, the client address associated with the control port does not match the client address in the data port connection. Possible reason for this could be that your FTP client is compromised.
<b>Action</b>	Contact your network security team to take necessary actions in case your FTP client is compromised.
<b>ISP.0071.9001E</b>	<b>Cannot build data connection: use PORT or PASV first</b>
<b>Explanation</b>	The Integration Server failed to connect to a port on the FTP client because the FTP client did not provide valid port information.
<b>Action</b>	Check the Integration Server configuration and restart the server. If the problem persists, contact Software AG Global Support.
<b>ISP.0071.9002E</b>	<b>{0}: cannot create</b>
<b>Explanation</b>	An FTP client application connected to an FTP port on the Integration Server and tried to create a remote directory on the FTP server, but the "mkdir" command failed.
<b>Action</b>	Make sure the directory name was specified correctly. Also, examine the remote file system and make sure that you have permission to create the directory there.
<b>ISP.0071.9003E</b>	<b>{0}: cannot delete</b>
<b>Explanation</b>	An FTP client application connected to an FTP port on the Integration Server and tried to delete a file on the FTP server, but the "delete" command failed.
<b>Action</b>	Make sure the file name was specified correctly and that the file exists on the remote server. Also, examine the remote file system and make sure that you have permission to delete the file from the remote file system.
<b>ISP.0071.9004E</b>	<b>Cannot rename File to {0}</b>
<b>Explanation</b>	An FTP client application connected to an FTP port on the Integration Server and tried to rename a file on the FTP server, but the "rename" command failed.
<b>Action</b>	Make sure the old and new file names were specified correctly. Also, examine the remote file system and make sure that you have write permission to both the old and new file names.

<b>ISP.0071.9005U</b>	<b>Unable to make dir {0}</b>
<b>Explanation</b>	An FTP client application connected to an FTP port on the Integration Server and tried to create a remote directory on the FTP server, but the "mkdir" command failed.
<b>Action</b>	Make sure the directory name is specified correctly. Also, examine the remote file system and make sure that you have the appropriate permissions to create the directory there.
<b>ISP.0071.9006U</b>	<b>Unable to delete {0}</b>
<b>Explanation</b>	An FTP client application connected to an FTP port on the Integration Server and tried to delete a file on the FTP server, but the "delete" command failed.
<b>Action</b>	Make sure the file name is specified correctly and that the file exists. Also, examine the remote file system and make sure that you have permission to delete the file.
<b>ISP.0071.9007U</b>	<b>Unable to rename to {0}</b>
<b>Explanation</b>	An FTP client application connected to an FTP port on the Integration Server and tried to rename a file on the FTP server, but the "rename" command failed.
<b>Action</b>	Make sure the old and new file names are specified correctly. Also, examine the remote file system and make sure that you have write permission to both the old and new file names.
<b>ISP.0071.9008E</b>	<b>Cannot write</b>
<b>Explanation</b>	Integration Server failed to put the file in the folder directory. The file must be in the service directory for processing.
<b>Action</b>	Put the file in the service directory.
<b>ISP.0071.9009E</b>	<b>Invalid transaction name. Not in the form 'tid[;mime.type][;encoding]'.</b>
<b>Explanation</b>	The MIME type specified in the FTP request is incorrect. It should be in the form of 'tid[;mime.type][;encoding]'.
<b>Action</b>	Make sure to provide the name in the correct format.
<b>ISP.0071.9010U</b>	<b>Unable to determine mime type</b>
<b>Explanation</b>	Integration Server does not support the MIME type specified.
<b>Action</b>	Only use the MIME types supported by Integration Server. Refer to the webMethods Integration Server documentation for more information.

---

<b>ISP.0071.9011E</b>	<b>Cannot read</b>
<b>Explanation</b>	Ensure that the specified file exists in the FTP server.
<b>Action</b>	The Integration Server failed to read the specified file from the FTP server.
<b>ISP.0071.9012U</b>	<b>No such service: {0}</b>
<b>Explanation</b>	The Integration Server FTP listener encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISP.0071.9013U</b>	<b>Unknown content type: {0}</b>
<b>Explanation</b>	The Integration Server does not support the MIME type specified.
<b>Action</b>	Only use the MIME types supported by the Integration Server. Refer to the webMethods Integration Server documentation for more information.
<b>ISP.0071.9014U</b>	<b>Server Error: {0}</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISP.0071.9015E</b>	<b>Cannot publish STOR complete event</b>
<b>Explanation</b>	The Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISP.0071.9016E</b>	<b>Cannot build data connection: client address {0} does not match the original host address {1}.</b>
<b>Explanation</b>	In FTP passive mode, the client address associated with the control port does not match the client address in the data port connection. Possible reason for this could be that your FTP client is compromised.
<b>Action</b>	Contact your network security team to take necessary action in case your FTP client is compromised.
<b>ISP.0085.9001E</b>	<b>Issuer DN must be provided</b>
<b>Explanation</b>	The certificate is incomplete. It must include an Issuer DN.
<b>Action</b>	Supply a certificate that includes an Issuer DN.

<b>ISP.0085.9002E</b>	<b>Serial number must be provided</b>
<b>Explanation</b>	The certificate is incomplete. It must contain a serial number.
<b>Action</b>	Supply a certificate that includes a serial number.
<b>ISP.0085.9004E</b>	<b>data provided for certificate not in expected format</b>
<b>Explanation</b>	Only X509Certificates may be used to identify Integration Server clients.
<b>Action</b>	Supply a valid X509Certificate.
<b>ISP.0085.9005E</b>	<b>No map entry exists for the specified information</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISP.0085.9006E</b>	<b>Certificate's file name is required</b>
<b>Explanation</b>	Certificate Path is empty.
<b>Action</b>	Supply the fully qualified file name for a certificate file.
<b>ISP.0085.9007E</b>	<b>Specified certificate file does not exist</b>
<b>Explanation</b>	The Certificate Path field refers to a non-existent file.
<b>Action</b>	Supply the fully qualified file name of a certificate file.
<b>ISP.0085.9008E</b>	<b>Specified certificate file is empty</b>
<b>Explanation</b>	The Certificate Path field refers to an empty file.
<b>Action</b>	Supply the fully qualified file name of a certificate file.
<b>ISP.0085.9009E</b>	<b>Attempted to update a non-existent entry</b>
<b>Explanation</b>	Internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISP.0085.9010E</b>	<b>{0} is not a valid user</b>
<b>Explanation</b>	The supplied user name does not identify a user on this Integration Server.
<b>Action</b>	Supply a valid user.

ISP.0085.9076	<b>class not in package</b>
ISP.0085.9077	<b>node is not in a package</b>
ISP.0085.9078E	<b>node belongs to invalid package</b>
<b>Explanation</b>	An application tried to create a service, but the package name specified to contain the service was missing or invalid.
<b>Action</b>	Examine the service input and make sure a valid package name is provided.
ISP.0085.9079E	<b>not a valid folder name</b>
<b>Explanation</b>	An application tried to create a new service, but the folder name was missing or invalid.
<b>Action</b>	Examine the service input and verify that a valid folder name is provided.
ISP.0085.9080	<b>node name already in use</b>
ISP.0085.9081	<b>folder node "{0}" in path "{1}" doesn't exist</b>
ISP.0085.9082	<b>folder node "{0}" exists in package</b>

---

ISP.0085.9083	<b>unsupported node type: {0}</b>
ISP.0085.9084	<b>Unable to lock: {0}. It has been locked by user {1}.</b>
ISP.0085.9085	<b>Unable to modify; node {0} is locked by another user.</b>
ISP.0085.9086	<b>Unable to perform the required operation. The destination folder has locked services which share a common Java source file.</b>
ISP.0085.9087	<b>Required parameter 'package' is missing</b>
ISP.0085.9088E	<b>Invalid package version {0}, the accepted format is #.#.#.###</b>
<b>Explanation</b>	The supplied package version is an invalid version number. The correct format is "x.y" or "x.y.z" (x, y, z all must be digits from 0-9, e.g. 2.0, 4.0.1 etc.).
<b>Action</b>	Examine the service input and make sure a valid package version is provided.
ISP.0085.9089E	<b>Not allowed to add unknown package(s) {0} to dependency list</b>
<b>Explanation</b>	The package that was added to another package's dependency list does not exist on Integration Server.
<b>Action</b>	Specify the package name again, this time specifying a package that exists on Integration Server and is enabled.
ISP.0085.9093	<b>Port must be numeric</b>
ISP.0085.9094E	<b>Invalid Folder/Service Name</b>
<b>Explanation</b>	The service, folder, or provider Web service descriptor that was added to a port's access list does not exist on Integration Server.
<b>Action</b>	Enter the name of the service, folder, or Web service descriptor again, making sure to specify one that exists on Integration Server.
ISP.0085.9095	<b>Unable to add service to this port</b>

<b>ISP.0085.9100E</b>	<b>No password specified</b>
<b>Explanation</b>	The alias created for a remote server omitted the remote server's password.
<b>Action</b>	Enter a valid password in the password field.
<b>ISP.0085.9101E</b>	<b>Missing one or more required parameters: \$alias, \$service</b>
<b>Explanation</b>	The pub.remote:invoke service failed to execute because one or both of the required "\$alias" or "\$service" parameters were not supplied.
<b>Action</b>	Examine the service input and ensure that both the parameters are specified.
<b>ISP.0085.9102E</b>	<b>No such remote server: {0}</b>
<b>Explanation</b>	The pub.remote:invoke service failed to execute because an invalid server alias was provided.
<b>Action</b>	From the Settings>Remote Servers page of the Server Administrator examine the Remote Servers List and make sure an alias exists for the remote server. If not, create one before invoking the pub.remote:invoke service again.
<b>ISP.0085.9103E</b>	<b>User session required to invoke a protected remote server</b>
<b>Explanation</b>	Integration Server encountered a serious internal error because the user session object that invokes the service on the remote server is null.
<b>Action</b>	Contact Software AG Global Support.
<b>ISP.0085.9104E</b>	<b>Access denied to invoke on remote server {0}</b>
<b>Explanation</b>	The pub.remote:invoke service failed to invoke the service on the remote server because the current user does not have the proper ACL.
<b>Action</b>	Using the Integration Server Administrator, examine the remote server alias properties as well as the service's Execute ACL setting on the remote server. Make sure that the current user has the proper ACL to invoke the service.
<b>ISP.0085.9105E</b>	<b>User session required to invoke a remote server with SESSION scope</b>
<b>Explanation</b>	Integration Server encountered a serious internal error because the user session object that invokes the service on the remote server is null.
<b>Action</b>	Contact Software AG Global Support.

---

ISP.0085.9106	<b>Missing required parameter: \$jobID</b>
ISP.0085.9108	<b>No such job: {0}</b>
ISP.0085.9110	<b>No such service is currently loaded {0}</b>
ISP.0085.9113E	<b>Invalid Date format.Date must be in YYYY/MM/DD format.</b>
<b>Explanation</b>	When attempting to schedule a one-time task, an invalid date or time format was specified.
<b>Action</b>	Enter the date and/or time again, this time using the correct format.
ISP.0085.9114	<b>You specified a date/time in the past</b>
ISP.0085.9115	<b>Invalid Time format.Time must be in HH:MM:SS format</b>
ISP.0085.9116E	<b>Interval must be a positive integer {0}</b>
<b>Explanation</b>	A repeating task could not be scheduled because the specified interval is not valid.
<b>Action</b>	Specify the interval again, this time specifying a positive integer.
ISP.0085.9117E	<b>Invalid task type: {0}</b>
<b>Explanation</b>	The WmRoot service wm.server.schedule:createUserTask failed to execute because an invalid task type was supplied. Valid task types are: "once", "repeat", and "complex".
<b>Action</b>	Examine the service input and ensure that the "type" parameter specifies a valid task type.
ISP.0085.9118	<b>Unknown service type: {0}</b>
ISP.0085.9119	<b>{0} is missing or package is disabled</b>
ISP.0085.9120	<b>Templates directory for package {0} could not be created</b>

- ISP.0085.9121**      **Template file exists but is not writable**
- ISP.0085.9123U**      **nobody to send message to**  
**Explanation**      Integration Server failed to invoke a service on the remote server using the e-mail port because the "to" parameter was not supplied.  
**Action**              Examine the logic to make sure that it passes the correct input to the "to" parameter when invoking services remotely using the e-mail listener.
- ISP.0085.9124U**      **no attachment**  
**Explanation**      Integration Server failed to invoke a service on the remote server using the e-mail port because the "attachments" parameter was not supplied.  
**Action**              Examine the logic to make sure that it passes the correct input to the "attachments" parameter when invoking services remotely using the e-mail listener.
- ISP.0085.9125U**      **attachments must be of type Values[]**  
**Explanation**      Integration Server failed to invoke a service on the remote server using the e-mail port because the input for the "attachments" parameter was not of Values[] type.  
**Action**              Examine the logic to make sure that it passes the correct Values[] input to the "attachments" parameter when invoking services remotely using the e-mail listener.
- ISP.0085.9126E**      **Invalid attachment file {0}**  
**Explanation**      Integration Server failed to invoke a service on the remote server using the e-mail port because the file attachment specified in the "filename" parameter does not exist in the system.  
**Action**              Examine the logic to make sure that it passes a valid file to the "filename" parameter and make sure that it exists in the file system.
- ISP.0085.9127**      **No filename nor content included in the attachment!**
- ISP.0085.9129**      **An error was encountered removing {0}**
- ISP.0085.9131E**      **Not allowed to add empty package version, the accepted format is \*.\***  
**Explanation**      The package dependency list does not specify a version for the package.  
**Action**              Enter a valid package version in the format "x.y" or "x.y.z" (x, y, z all must be digits from 0-9, e.g. 2.0, 4.0.1 etc.).

---

ISP.0085.9132	<b>Unable to perform operation. {0} has entities locked by another user. Please unlock these entities before performing this operation</b>
ISP.0085.9133	<b>A required parameter {0} was not supplied</b>
ISP.0085.9135	<b>The Universal Name {0} is already defined for {1} in the registry</b>
ISP.0085.9136	<b>The Universal Name {0} is already defined as a Service or Document</b>
ISP.0085.9139E	<b>Cannot {0} changes because the file(s) representing {1} may have been changed to 'Read-Only'. To {0} changes, change the following file(s) from 'Read-Only' to 'Read/Write' either manually or through a source control system: {2}</b>
<b>Explanation</b>	Integration Server could not compile the Java or C service, possibly because the files have changed to Read-Only.
<b>Action</b>	Examine the file permissions and change the file permission from Read-Only to Read/Write, either manually or through a source control system.
ISP.0085.9140	<b>Unable to lock: {0}. It might be locked by another user.</b>
ISP.0085.9141E	<b>The Universal Name {0} contains an invalid character</b>
<b>Explanation</b>	This is an internal error.
<b>Action</b>	Contact Software AG Global Support.
ISP.0085.9145E	<b>Invalid input</b>
<b>Explanation</b>	A WmRoot service failed to execute because the service input is not of the type required by the service.
<b>Action</b>	Examine the error stack trace to determine the exception that was thrown and the service that threw it. For example, the service may require an IData object, but the supplied input was not an instance of IData.
ISP.0085.9146	<b>Cannot schedule service. Input has unsupported datatypes</b>

<b>ISP.0085.9147E</b>	<b>Missing required parameter: 'header'</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact wSoftware AG Global Support.
<b>ISP.0085.9148E</b>	<b>'header' must be of type IData</b>
<b>Explanation</b>	Integration Server encountered an internal error.
<b>Action</b>	Contact Software AG Global Support.
<b>ISP.0085.9149</b>	<b>Cannot perform operation without Read ACL privileges on {0}</b>
<b>ISP.0085.9150</b>	<b>Cannot perform operation without List ACL on package {0}</b>
<b>ISP.0085.9151</b>	<b>Cannot set Execute ACL {1} on {0}. You do not have permission to access the {1} ACL.</b>

<b>Explanation</b>	The artifacts associated with the specified checkpoint ID could not be deleted due to the reason specified in the Integration Server log.
<b>Action</b>	Check the Integration Server log for details.
<b>ISP.0085.9364I</b>	<b>There are no assets for the specified checkpoint ID: {0}. Deployer cannot activate checkpoint.</b>
<b>ISP.0085.9365E</b>	<b>Extraction of assets for checkpoint ID {0} failed for the composite {1}. For more information, see the Integration Server logs.</b>
<b>Explanation</b>	Assets for the specified checkpoint ID could not be extracted due to the reason specified in the Integration Server log.
<b>Action</b>	Check the Integration Server log for details.
<b>ISP.0085.9370I</b>	<b>There are no assets for the specified deployment ID: {0}. Deployer cannot activate deployment.</b>
<b>ISP.0085.9372E</b>	<b>Checkpoint operation for the checkpoint ID {0} was not successful. For more information, see the Integration Server logs.</b>
<b>Explanation</b>	The checkpoint operation failed due to the reason specified in the Integration Server log.
<b>Action</b>	Check the Integration Server log for details.
<b>ISP.0085.9375E</b>	<b>Checkpoint activation for the checkpoint ID {0} was not successful. For more information, see the Integration Server logs.</b>
<b>Explanation</b>	The checkpoint could not be created due to the reason specified in the Integration Server log.
<b>Action</b>	Check the Integration Server log for details.

**ISP.0085.9376E**      **Checkpoint activation for the checkpoint ID {0} failed with an exception. For more information, see the Integration Server logs.**

**Explanation**      The checkpoint activation failed due to the reason specified in the Integration Server logs.

**Action**              See the Integration Server logs for more information.

**ISP.0085.9384E**      **Missing required parameter: {0}**

**Explanation**      A required parameter was not supplied.

**Action**              Supply a value for the missing parameter and execute the service again.

**ISP.0090.0006**      **recursive IData reference key:'{0}'**

**ISP.0090.0007**      **{0} recursive IDataCodable reference key:'{1}'**

**ISP.0091.0001**      **{0} in {1} minutes or as soon as idle**

**ISP.0091.0002**      **Pending shutdown/restart request has been canceled**

**ISP.0091.0003**      **Grace period has expired. Server is shutting down.**

**ISP.0091.0004**      **Grace period has expired. Server is restarting.**

**ISP.0108.0008W**      **Encryption and Signing key pairs have been updated: {0}**

**Explanation**      The encryption certificate in the user's profile is not synchronized with the one in the JNDI directory. In this case, the signing and encryption key pairs are updated and this warning message is displayed.

**Action**              Ensure that the encryption certificates are synchronized with those available in the JNDI directory.

**ISP.0108.0009W**      **Could not check profile "{0}" for key pair update: {1}**

**Explanation**      When the encryption certificates in the user's profile are not synchronized with those available in the JNDI directory, the signing and encryption key pairs are updated. This warning message is displayed when there are errors when accessing the LDAP directory while updating the key value pairs.

**Action**              Contact Software AG Global Support.

---

<b>ISP.0147.0006E</b>	<b>Error while closing sftp session: Details: {0}</b>
<b>Explanation</b>	The session key that you specified has expired.
<b>Action</b>	Ensure that the session corresponding to this session key exists and has not expired.
<b>ISP.0147.0007E</b>	<b>Error in sftp session sweeper thread. Details: {0}</b>
<b>Explanation</b>	Integration Server encountered an error in the SFTP session sweeper thread.
<b>Action</b>	Read through the details provided in the error message and take corrective steps.
<b>ISS.0001.0001</b>	<b>All licenses have been consumed.</b>
<b>ISS.0001.0002</b>	<b>{0} License key expired or invalid.</b>
<b>ISS.0001.0003</b>	<b>{0} License will expire in {1} days.</b>
<b>ISS.0001.0004</b>	<b>Integration Server will shutdown in 30 minutes, unless a valid license key is provided.</b>
<b>ISS.0001.0005</b>	<b>Unable to load package {0} due to invalid license for package {1}.</b>
<b>ISS.0001.0006</b>	<b>Could not add {0} as dependent package due to invalid license.</b>
<b>ISS.0001.0007</b>	<b>Could not load {0} because one of the dependent package is not loaded.</b>
<b>ISS.0001.0008</b>	<b>{0} Functionality disabled due to license restrictions.</b>
<b>ISS.0001.0009</b>	<b>License key file is read-only. License settings cannot take effect until you make the file read/write.</b>
<b>ISS.0001.0010</b>	<b>The license key is not valid with this version of Integration Server. License key is version {0} and Integration Server is version {1}.</b>

<b>ISS.0001.0011U</b>	<b>The Integration Server is not licensed by the current license key.</b>
<b>Explanation</b>	Integration Server has reached its client limit. Your license for Integration Server allows only a certain number of sessions to be used at a time. Integration Server issues this message when the number of users trying to use the server exceeds the number specified in the license.
<b>Action</b>	Check the number of licensed sessions specified in your Integration Server license. Consider upgrading the license to obtain more user "seats" if the number of users requiring access to your Integration Server has increased.
<b>ISS.0002.0002E</b>	<b>Error loading LDAP settings: {0}</b>
<b>Explanation</b>	Integration Server encountered an IOException while reading the ldap.cnf file.
<b>Action</b>	Check to make sure that the operating system user that is running Integration Server has permission to read and write to the ldap.cnf file. In addition, make sure that the ldap.cnf file is a valid XML file and has not been corrupted in some way. As a last resort, delete the ldap.cnf file and reconfigure the LDAP settings from the Server Administrator.
<b>ISS.0002.0003E</b>	<b>Error saving LDAP settings: {0}</b>
<b>Explanation</b>	An IOException occurred while Integration Server was writing the ldap.cnf file.
<b>Action</b>	Check to make sure that the operating system user that is running Integration Server has permission to read and write to the ldap.cnf file and to the server config directory. In addition, make sure that there is sufficient disk space and quota space for creating and writing a new file.
<b>ISS.0002.0005W</b>	<b>LDAP User Manager enabled, but no LDAP directories are configured</b>
<b>Explanation</b>	The Integration Server is attempting to perform operations that require a connection to an LDAP server, but the Integration Server is only partially configured to use LDAP. Specifically, the configuration does not include a list of LDAP directories to which the Integration Server can connect.
<b>Action</b>	Use the Integration Server Administrator to configure the Integration Server to connect to one or more LDAP directories. For more information about working with LDAP, refer to the webMethods Integration Server documentation.
<b>ISS.0002.0007W</b>	<b>Query returned multiple DN's for a single user with filter ({0}={1})</b>
<b>Explanation</b>	The values specified in the Query DN field on the LDAP directory settings screen are not sufficient to uniquely identify a user. Integration Server uses this field to build a query to send to the LDAP server so that the LDAP server can authenticate the user.
<b>Action</b>	Make sure that the user root, user property, and user names specified on the Query DN field are not ambiguous.

---

<b>ISS.0002.0008E</b>	<b>Could not get a connection from the pool in the time allowed</b>
<b>Explanation</b>	Integration Server was unable to connect to the LDAP server because the request to obtain a connection timed out. This error can occur if the LDAP directory server is slow, is under high load, or is experiencing high latency, and there are insufficient connections in the connection pool to meet demand.
<b>Action</b>	This error is probably transient. It is usually sufficient to wait a few seconds and try the operation again (for example logging in, executing a service) when the load has decreased and resources have become available. If the problem persists, then from the LDAP Directory Settings page of the Server Administrator, try increasing the size of the LDAP connection pool. Also check to make sure the LDAP directory server is properly configured and that the network is able to handle the load being placed on it by the application.
<b>ISS.0002.0009E</b>	<b>Unable to open a connection to {0}</b>
<b>Explanation</b>	The Integration Server was unable to open a connection to the indicated LDAP directory server.
<b>Action</b>	To resolve this issue, do the following: <ul style="list-style-type: none"><li>- Make sure the LDAP server is running and that the Integration Server has permission to connect to it.</li><li>- Make sure that the connection parameters specified on the LDAP Settings screen of the Server Administrator are properly configured.</li><li>- If you are using SSL, make sure that the directory URL specified on the LDAP Settings screen specifies an SSL port on the LDAP server and that both the Integration Server and LDAP server support SSL.</li><li>- If you are specifying credentials, make sure the principal specified on the LDAP Settings screen of the Server Administrator is correct and that the password matches. This error can also occur if the Integration Server cannot establish a connection to the LDAP server within the configured time limit because of a problem such as network latency. For more information about connecting the Integration Server to an LDAP server, see the webMethods Integration Server documentation.</li></ul>
<b>ISS.0002.0010E</b>	<b>Error querying for user {0}: {1}</b>
<b>Explanation</b>	During a user log in, the Integration Server encountered an error while performing a query to obtain the user's Distinguished Name.
<b>Action</b>	In the Server Administrator, on the LDAP Settings screen for the LDAP directory, ensure that the user root and user properties are set correctly.

<b>ISS.0002.0013W</b>	<b>Found group {0}, but it contained no attribute {1}</b>
<b>Explanation</b>	During ACL mapping, Integration Server determined that the value specified in the group attribute field does match the attribute values of the group that Integration Server found.
<b>Action</b>	Make sure the group name attribute field contains a valid group name attribute.
<b>ISS.0002.0014E</b>	<b>Error querying for groups on {0} with root {1} and filter {2}: {3}</b>
<b>Explanation</b>	Integration Server encountered an error when looking for LDAP groups to map to an Integration Server ACL.
<b>Action</b>	If the text of the exception indicates a connection issue, try performing the mapping later. Otherwise, check the values specified for group name, filter, and group name attribute on the Map Groups to ACLs screen.
<b>ISS.0002.0015E</b>	<b>Unable to create ACL mapping: LDAP User Manager not initialized</b>
<b>Explanation</b>	An attempt to map an LDAP group to an ACL failed because the LDAP User Manager function of the Integration Server is not running. This error occurs when one user disables LDAP while another user is trying to perform ACL mapping.
<b>Action</b>	Use the Integration Server Administrator to check the External User Management Configuration screens for possible configuration problems. In addition, try checking the server and error logs for messages about problems with the LDAP manager. For information about using the Integration Server with an external directory, refer to the webMethods Integration Server documentation.
<b>ISS.0002.0016E</b>	<b>Unable to create ACL mapping: ACL {0} not found</b>
<b>Explanation</b>	An attempt to map an LDAP group to an ACL failed because the ACL specified on the Map Groups to ACLs screen does not exist. This error occurs if one user deletes the ACL in question when another user is trying to map an LDAP group to it.
<b>Action</b>	Determine why the other user changed the Integration Server configuration then reconfigure the Integration Server to use LDAP, if appropriate. For information about using the Integration Server with an external directory, refer to the webMethods Integration Server documentation.
<b>ISS.0002.0017E</b>	<b>Unable to retrieve password for handle {0}: {1}</b>
<b>Explanation</b>	The Integration Server is trying to connect to an LDAP server. As part of connecting, the Integration Server needs to send a password to the LDAP server. This error occurs when the Integration Server cannot find the password it stored for this purpose. A likely cause is that the ldap.cnf file was moved from one system to another, but the stored outbound passwords were not.
<b>Action</b>	Make sure the Outbound Password Manager is properly configured, and that its files are readable by the Integration Server process. If the Outbound Password Manager is set up correctly, and the error still occurs, go to the LDAP Configuration screen of the Server Administrator and reenter the existing password.

---

<b>ISS.0002.0018E</b>	<b>Unable to store password for handle {0}: {1}</b>
<b>Explanation</b>	The Integration Server was unable to store the password needed to connect to an LDAP server. The Integration Server must supply passwords to many of the applications it connects to. It stores these outbound passwords in encrypted form on the Integration Server. This error occurs when an administrator enters or changes the password, but the Integration Server cannot subsequently store it.
<b>Action</b>	Check to see if the Integration Server is properly configured to handle outbound passwords. Make sure that the following outbound password configuration files reside on the Integration Server and are readable and writable: config/txnPassStore.dat, config/empw.dat, config/configPassman.cnf and config/passman.cnf. Refer to the webMethods Integration Server documentation for more information.
<b>ISS.0002.0019E</b>	<b>Unable to delete password for handle {0}: {1}</b>
<b>Explanation</b>	An administrator updated the Integration Server configuration so that it no longer connects to an LDAP server. As part of this process, the Integration Server tried to delete the password it uses to connect to the LDAP server, but was unable to. The Integration Server deletes the LDAP server from the configuration, but the password remains, in encrypted form, on the Integration Server. The most likely cause is that the files used to store outbound passwords on the Integration Server are read-only.
<b>Action</b>	Refer to the webMethods Integration Server documentation for more information about outbound passwords and the files used to store them. Then try to determine why the files are in read-only mode.
<b>ISS.0002.0020E</b>	<b>Unable to check password: LDAP User Manager not initialized</b>
<b>Explanation</b>	The Integration Server tried to check the password of an LDAP user but could not because the LDAP user manager is not running. This error occurs when one user updates the Integration Server configuration to disable LDAP directory use while another user is trying to perform an LDAP operation.
<b>Action</b>	Determine why the other user changed the Integration Server configuration. Then, reconfigure the Integration Server to use LDAP, if appropriate. For information about using the Integration Server with an external directory, refer to the webMethods Integration Server documentation.
<b>ISS.0002.0021E</b>	<b>Unable to check group membership: LDAP User Manager not initialized</b>
<b>Explanation</b>	The Integration Server tried to find members of an LDAP group but could not because the LDAP user manager is not running. This error occurs when one user updates the Integration Server configuration to disable LDAP directory use while another user is trying to perform an LDAP operation.
<b>Action</b>	Determine why the other user changed the Integration Server configuration. Then, reconfigure the Integration Server to use LDAP, if appropriate. For information about using the Integration Server with an external directory, refer to the webMethods Integration Server documentation.

<b>ISS.0002.0023E</b>	<b>Error initializing a connection to {0}: {1}</b>
<b>Explanation</b>	The Integration Server encountered an exception while trying to connect to the indicated LDAP server.
<b>Action</b>	Check the following:  - Make sure the LDAP directory server is running and that the Integration Server has permission to access it.  - Make sure the parameters on the External User Management Configuration screens of the Server Administrator have been properly set.
<b>ISS.0002.0024W</b>	<b>Error closing connection to {0}: {1}</b>
<b>Explanation</b>	Integration Server encountered an exception while trying to connect to the indicated LDAP server. Integration Server will clean up the connection.
<b>Action</b>	No action is required.
<b>ISS.0002.0030E</b>	<b>While attempting automatic LDAP configuration, some invalid settings were found. It is necessary to complete the configuration manually.</b>
<b>Explanation</b>	When you upgrade from Integration Server release 6.1 or earlier to Integration Server release 6.5 or later, the upgrade process tries to automatically configure the external user management facilities in your new Integration Server based on these settings in your old Integration Server. To determine the old configuration settings, the upgrade process looks for the following properties:  watt.server.ldap.server  watt.server.ldap.attr.userId  watt.server.ldap.attr.member  This error indicates that the upgrade process was unable to find one of these properties. The automatic configuration does not continue.
<b>Action</b>	Go to the Security > Users and Groups > External User Management Configuration screen of the Server Administrator and configure the Integration Server to use an external LDAP directory. For additional information, refer to the webMethods Integration Server documentation.
<b>ISS.0002.0034E</b>	<b>Invalid credentials connecting to {0} as {1}</b>
<b>Explanation</b>	The Integration Server encountered an Authentication Exception because the indicated user could not log in to the indicated LDAP server.
<b>Action</b>	This error can occur for a number of reasons. Make sure that the DN of the user is valid, the credentials (i.e. password) specified are valid, and the user account is enabled.

---

<b>ISS.0002.0035E</b>	<b>Invalid credentials connecting to {0} as {1}: {2}</b>
<b>Explanation</b>	The Integration Server encountered an Authentication Exception because the indicated user could not log in to the indicated LDAP server. The last part of the message <errorMessage> includes extra information provided by the LDAP server about the error. You can use this data to audit authentication errors when the Integration Server connects to Microsoft Active Directory.
<b>Action</b>	This error can occur for a number of reasons. Check to make sure that the DN of the user is valid, the credentials (i.e. password) specified are valid, and the user account is enabled. Note: The errorMessage portion of this error displays only if the watt.server.ldap.extendedMessages property in the server.cnf file is set to true. If you do not find the extended message useful, you can disable extended messaging by setting this property to false.
<b>ISS.0002.0040E</b>	<b>Error querying for users : {0}</b>
<b>Explanation</b>	Error while listing users from the LDAP server, a runtime exception occurred while querying users for the provided search criteria.
<b>Action</b>	Ensure that the search criteria is defined properly, the LDAP server is configured properly, and it is running.
<b>ISS.0002.0041E</b>	<b>Error querying for users : {0}</b>
<b>Explanation</b>	Some errors occurred while searching for a particular group, or a search string in the LDAP Server.
<b>Action</b>	Ensure that the search criteria is defined properly, the LDAP server is configured properly, and it is running.
<b>ISS.0002.0042W</b>	<b>Bailing out query as {0} is null or empty.</b>
<b>Explanation</b>	While listing users from the LDAP server, either the directory name suffix or directory name prefix returned from the server is null or empty.
<b>Action</b>	Ensure that the LDAP configuration is correct and the LDAP server is not disconnected.
<b>ISS.0002.0044E</b>	<b>Error querying for user(s) on {0} with search root {2}: {3}</b>
<b>Explanation</b>	Error while listing users from the LDAP server, a runtime exception occurred while querying users for the provided search criteria.
<b>Action</b>	Ensure that the search criteria is defined properly, the LDAP server is configured properly, and it is running.

<b>ISS.0002.0045W</b>	<b>Found No Group on quering on {0} with root {1} and filter {2}</b>
<b>Explanation</b>	No group is found in the LDAP server for the search criteria.
<b>Action</b>	Refine the search query to get the required result.
<b>ISS.0002.0046E</b>	<b>Selected group {0} does not exist.</b>
<b>Explanation</b>	The Integration Server group associated with the LDAP configuration is deleted.
<b>Action</b>	Ensure that the group selected while configuring LDAP exists. If the group does not exist, you can take one of the following actions:  1) Modify the LDAP configuration to specify another group.  2) Add a group with the same name as the deleted group that was associated with the LDAP configuration.
<b>ISS.0002.9001E</b>	<b>LDAP User Manager not initialized</b>
<b>Explanation</b>	A user is trying to execute an operation on the LDAP server but LDAP user manager is not initialized.
<b>Action</b>	Check the LDAP settings.
<b>ISS.0002.9002E</b>	<b>Error saving new ACL Mappings: {0}</b>
<b>Explanation</b>	A runtime exception occurred while adding new mappings to the LDAP Server.
<b>Action</b>	Ensure that the mapping strings are correct (they should be in the following format - name; dn), the LDAP server is configured properly and it is running.
<b>ISS.0003.9001</b>	<b>Transformation: Required argument "{0}" missing.</b>
<b>ISS.0003.9002</b>	<b>Transformation: No XML source provided</b>
<b>ISS.0003.9003</b>	<b>Transformation: No result type specified</b>
<b>ISS.0003.9004</b>	<b>Transformation: No result filename specified</b>

<b>ISS.0003.9005</b>	<b>Transformation: No result system ID specified</b>
<b>ISS.0003.9006</b>	<b>Transformation: PipedInputStreamException - {0}</b>
<b>ISS.0003.9007</b>	<b>Transformation: HTTPS URL error - {0}</b>
<b>ISS.0003.9008</b>	<b>Transformation: HTTPS URL error - Response returned with HTTP protocol error {0}.</b>
<b>ISS.0003.9009</b>	<b>XSLT Samples: No XSLT input paramters provided</b>
<b>ISS.0003.9010</b>	<b>XSLT Service: No valid input provided</b>
<b>ISS.0003.9011</b>	<b>XSLT Service: No associated .xsl file for this service</b>
<b>ISS.0006.0030E</b>	<b>Unable to set javax.net.ssl.keyStore: Keystore location could not be retrieved from {0}.</b>
<b>Explanation</b>	Integration Server could not set the javax.net.ssl.keyStore system property because Integration Sever could not retrieve the keystore location from the keystore file. Integration Server looks in the keystore file associated with the specified keystore alias. At run time, the {0} in the error message is replaced with the name of the keystore alias assigned to the watt.sever.ssl.keyStoreAlias parameter.
<b>Action</b>	Make sure the keystore alias assigned to the watt.server.ssl.keyStoreAlias parameter contains the correct keystore details including the correct location of the keystore file.
<b>ISS.0006.0031E</b>	<b>Unable to set javax.net.ssl.keyStorePassword: Keystore password could not be retrieved from {0}.</b>
<b>Explanation</b>	Integration Server could not set the javax.net.ssl.keyStorePassword system property because Integration Server could not retrieve the password from the keystore file. Integration Server looks in the keystore file associated with the specified keystore alias. At run time, the {0} in the error message is replaced with the name of the keystore alias assigned to the watt.server.ssl.keyStoreAlias parameter.
<b>Action</b>	Make sure the keystore alias assigned to the watt.server.ssl.keyStoreAlias parameter contains the correct keystore details including the correct password for accessing the keystore file.

<b>ISS.0006.0032E</b>	<b>Unable to set javax.net.ssl.trustStore: Truststore location could not be retrieved from {0}.</b>
<b>Explanation</b>	Integration Server could not set the value of the javax.net.ssl.trustStore system property because Integration Server could not retrieve the truststore location from the truststore file. Integration Server looks in the truststore file associated with the specified truststore alias. At run time, the {0} in the error message is replaced with the name of the truststore alias assigned to the watt.server.ssl.trustStoreAlias parameter.
<b>Action</b>	Make sure the truststore alias assigned to the watt.server.ssl.trustStoreAlias parameter contains the correct truststore details including the correct location of the truststore file.
<b>ISS.0006.0033E</b>	<b>Unable to set javax.net.ssl.trustStorePassword: Truststore password could not be retrieved from {0}.</b>
<b>Explanation</b>	Integration Server could not set the javax.net.ssl.trustStorePassword system property because Integration Server could not retrieve the password for the truststore. Integration Server looks in the truststore file associated with the specified truststore alias. At run time, the {0} in the error message is replaced with the name of the truststore alias assigned to the watt.server.ssl.keyStoreAlias parameter.
<b>Action</b>	Make sure the truststore alias assigned to the watt.server.ssl.trustStoreAlias parameter contains the correct truststore details including the correct password for accessing the truststore file.
<b>ISS.0006.0034E</b>	<b>Error setting javax.net.ssl properties: {0}</b>
<b>Explanation</b>	The javax.net.ssl system properties cannot be set because the keystore and/or truststore is invalid.
<b>Action</b>	Use the exception included in the error message to determine why the javax.net.ssl properties could not be set. Actions to be taken might include the following:- Making sure the keystore or truststore file is valid and contains the correct information. - Making sure that the keystore alias assigned to watt.server.ssl.keyStoreAlias contains the correct details for the keystore. - Making sure that the truststore alias assigned to watt.server.ssl.trustStoreAlias contains the correct details for the truststore.If the keystore file is invalid, create a new keystore, keystore alias, truststore, and truststore alias. Use the new keystore alias as the value of watt.server.ssl.keyStoreAlias. Use the new truststore alias as the value of watt.server.ssl.trustStoreAlias.If the truststore file is invalid, create a new truststore and truststore alias and use the new alias as the value of watt.server.ssl.trustStoreAlias.

<b>ISS.0007.0001E</b>	<b>Access Denied. User "{0}" does not have permissions to invoke service: {1}.</b>
<b>Explanation</b>	The user does not have permission to invoke an Integration Server resource. Read through the details provided in the server log to find the user name and the name of the service.
<b>Action</b>	To grant permission to the user, either add the user to a group that is listed in the Execute ACL assigned to the service, or add one of this user's groups to the Execute ACL assigned to the service.
<b>ISS.0007.0002E</b>	<b>Access Denied. No permissions to invoke service ({0}) on port "{1}".</b>
<b>Explanation</b>	The Access Mode for the specified port is configured to Deny by Default. With this configuration, the port only allows the services explicitly listed in the Allow List. The identified service is not in the Allow List of the identified port.
<b>Action</b>	If this service should be allowed on this port, add the service to the Allowed Services list of the port.
<b>ISS.0010.8050</b>	<b>Error while connecting to the remote authorization server using the remote server alias "{0}". Error details: {1}</b>
<b>Explanation</b>	Integration Server cannot connect to the specified remote OAuth authorization server.
<b>Action</b>	Edit the remote server alias and ensure that all the parameters are specified correctly. If needed, run a test of the remote server alias.
<b>ISS.0010.9016E</b>	<b>The cache manager required for OAuth operations is not available. Verify that the cache manager initialized successfully and then restart Integration Server</b>
<b>Explanation</b>	During the initialization of Cache Managers an error was encountered.
<b>Action</b>	Examine the Integration Server Error logs and Server logs for details about the error. Use the information in the logs to correct the error and then restart Integration Server.
<b>ISS.0012.0014E</b>	<b>Unable to initialize JAAS login context. JAAS configuration file in use: {0}. Error message: {1}. Stack trace: {2}</b>
<b>Explanation</b>	Integration Server uses IntegrationServer/config/is_jaas.cnf file for its JAAS configuration. If there is any problem loading this file, Integration Server throws this exception.
<b>Action</b>	The entries found in a JAAS configuration file should follow the JAAS syntax. If you made any changes to the IntegrationServer/config/is_jaas.cnf, review your changes and make sure there are no syntax errors in the file.

<b>ISS.0012.0016E</b>	<b>Initialization of X509ValidatorModule failed with exception: {0}.</b>
<b>Explanation</b>	The X509ValidatorModule defined in the IntegrationServer/config/is_jaas.cnf file is incorrect.
<b>Action</b>	Review the Integration Server error log for the actual exception. Refer to the webMethods Integration Server documentation for information about how to use this module and correct any errors found.
<b>ISS.0012.0017E</b>	<b>Authentication failed because the X.509 certificate path validation has failed.</b>
<b>Explanation</b>	The X509ValidatorModule is enabled in the IntegrationServer/config/is_jaas.cnf file. As a result, Integration Server performed certificate path validation using the information provided, but the client certificates failed the certificate path validation.
<b>Action</b>	Make sure that the truststore used by the X509ValidatorModule contains the intermediary certificates as well.
<b>ISS.0012.0020E</b>	<b>Authentication failed because the X.509 certificate has been revoked.</b>
