

Supported Upgrade Paths for Software AG Products On Premises

Old Release	New Release											
	9.5	9.6	9.7	9.8	9.9	9.10	9.12	10.1	10.3	10.5	10.7	10.11
8.2												
9.0												
9.5												
9.6												
9.7												
9.8												
9.9												
9.10												
9.12												
10.1												
10.3												
10.5												
10.7												
10.11												

blue = supported direct upgrade path from old release

If a direct upgrade path is not shown above, Software AG does not test or support that path. For example, Software AG does not test or support a direct upgrade path from 9.0 to 10.1 or later. You might still be able to perform such upgrades, but be advised that you would be doing so at your own risk.

If no direct upgrade path is supported, upgrade to the highest interim release possible and then upgrade to the target release. For example, to upgrade from 9.0 to 10.5, upgrade to 9.12 and then to 10.5. For instructions, use the upgrade guide(s) for the interim release(s) and then use the upgrade guide for the target release. Perform every step in every guide; for example, if an interim release's instructions require you to initialize a product, you must initialize the product at that time. Do not skip steps or wait to perform steps during upgrade to the target release.

Paths not shown above: 6.5 requires interim upgrade to 8.2. 7.1 and 8.0 require interim upgrade to 9.5.

There is no direct path from Presto 3.8 (webMethods release 9.7), Presto 3.8 (webMethods release 9.8), or MashZone NextGen 9.9 to MashZone Next Gen 9.12 or higher. Instead you must upgrade to MashZone NextGen 9.10 and then upgrade to the target release.
