

webMethods Database Component Configurator 10.4 Readme

April 2019

This is an innovation release. Innovation releases have a much shorter support cycle than standard releases. To learn more, please visit <http://empower.softwareag.com/innovationrelease/>.

This file contains important information you must read before using webMethods Database Component Configurator 10.4. You can find system requirements, user documentation, and installation and upgrade instructions on the [Documentation website](#) or the [TECHcommunity website](#). At those locations, you can also find suite-related security and globalization information.

Included in this file is information about functionality that has been added, removed, deprecated, or changed for this product. Deprecated functionality continues to work and is supported by Software AG, but may be removed in a future release. Software AG recommends against using deprecated functionality in new projects.

1.0	Critical Information.....	2

1.0 Critical Information

This section lists any critical issues for the current release that were known when this readme was published. For critical information found later, go to the Knowledge Center on the [Empower website](#).

2.0 Known Issues

3.0 Usage Notes

This section provides any additional information you need to work with the current release of this product.

4.0 Fixes Included in Each Release

This section lists the *latest fix level* that has been included in each release for each product component. A release is listed in this section only if changes occurred in that release. Go to the Knowledge Center on the [Empower website](#) for detailed information about fixes.

Release 10.4

- DC_10.3_DCC_Fix1
- DC_10.3_DBS_Fix3
- DC_10.1_DCC_Fix1
- DC_10.1_DBS_Fix10
- DC_9.12_DBS_Fix15
- DC_9.10_DBS_Fix11
- DC_9.9_DBS_Fix13
- DC_9.7_DBS_Fix18

Release 10.3

- DC_10.1_DBS_Fix7
- DC_9.12_DBS_Fix12
- DC_9.10_DBS_Fix10
- DC_9.8_DBS_Fix15
- DC_9.7_DBS_Fix16

Release 10.2

- DC_10.1_DBS_Fix6
- DC_9.12_DBS_Fix8
- DC_9.10_DBS_Fix9
- DC_9.9_DBS_Fix12
- DC_9.8_DBS_Fix14

Release 10.1

- DC_10.0_DBS_Fix2
- DC_9.12_DBS_Fix6
- DC_9.10_DBS_Fix7
- DC_9.9_DBS_Fix10
- DC_9.8_DBS_Fix12
- DC_9.7_DBS_Fix14

Release 10.0

- DC_9.9_DBS_Fix7
- DC_9.8_DBS_Fix11
- DC_9.7_DBS_Fix12
- DC_9.6_DBS_Fix13

Release 9.12

- DC_9.9_DBS_Fix5
- DC_9.8_DBS_Fix8
- DC_9.7_DBS_Fix10
- DC_9.6_DBS_Fix11

Release 9.10

- DC_9.9_DBS_Fix3
- DC_9.8_DBS_Fix6
- DC_9.7_DBS_Fix8
- DC_9.6_DBS_Fix9

5.0 Other Resolved Issues

This section lists the issues that were resolved in each release but were not part of the fixes listed in the previous section. A release is listed in this section only if changes occurred in that release.

Release 10.3

- PIE-52250
Migration fails on Common DB Configurator.
Migration fails on Common DB Configurator due to changes introduced in the DB script for an earlier version of Integration Server as part of PIE-52084.
This issue is resolved.
- OBE-10316
When you use webMethods Database Component Configurator to migrate the CentralConfiguration component from version 9.12 to the latest version, an error occurs and the migration fails.
The issue is resolved.
- OBE-10432
After migrating Optimize, the schema objects of the BAM_DIM_JOIN_TMP table might be different from the schema objects after a fresh installation. The issue occurs for Optimize environments that are configured to use a MySQL database.
The issue is resolved.
- OTN-18293
There was a performance degradation when an update was made to a Trading Partner Agreement that was in use. With this fix, the partner table is optimized by including a Database index.
This issue is resolved.
- OTN-18452
When using MySQL as an external database, importing a client certificate fails with an expiry date beyond 2038-01-19 UTC. This is because the datatype "Timestamp" associated with the MySQL table column of certificate expiry has an upper limit set to 2038-01-19 UTC. The issue is now resolved because the datatype for the column is changed to "DateTime" which has an upper expiry limit of year 9999.
The issue is resolved.

Release 10.1

- WDA-1031
Command Central bootstrapper installs Database Configurator 10.0 but the program group item displays 9.12.
This issue is resolved.

- WDA-1026
Desktop shortcut incorrectly displays the version as Database Component Configurator 9.12.
This issue is resolved.
- WDA-979
DCC 10.0 displays incorrect copyright year and version in the console.
This issue is resolved.
- WDA-918
In the Database Component Configurator, when a product is selected and then the mouse cursor is pointed to the radio button component, the selection is set back to “All”. Moving the mouse cursor without clicking the button should not change the selection.
This issue is resolved.
- WDA-976
Database Component Configurator version shows 9.12 instead of 10.0 in the Windows Start menu.
This issue is resolved.
- WDA-844
Incorrect Copyright year in the DCC “About” window.
The Copyright year in the DCC “About” window shows 2006 – 2015. It should be 2006 – 2016.
This issue is resolved.

Release 9.12

- WDA-844
Incorrect Copyright year in the DCC “About” window.
The Copyright year in the DCC “About” window shows 2006 – 2015. It should be 2006 – 2016.
This issue is resolved.

6.0 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content. A release is listed in this section only if changes occurred in that release.

7.0 Terminology Changes

A release is listed in this section only if changes occurred in that release.

8.0 Added, Removed, Deprecated, or Changed Items

This section lists functionality, controls, portlets, properties, or other items that have been added, removed, deprecated, or changed. A release is listed in this section only if changes occurred in that release.

Release 10.4

Changed Item	Description
Reliability and performance improvements	Database Component Configurator is rewritten in this release to improve the reliability and performance. The configurator now supports only command line mode and a graphical user interface is not available.

Release 10.1

Added Item	Description
Support for MySQL Community Edition	MySQL Community Edition is now supported with Database Component Configurator.

Changed Item	Description
Changed logging behavior	The logging behavior of Database Component Configurator has changed in this release. Now Database Component Configurator will generate only one log file named as <i>dcc.log</i> . Once the <i>dcc.log</i> file size crosses 10 MB, it will be renamed as <i>dcc.log.NUMBER</i> .

9.0 Copyright Information

Copyright © 2019 Software AG, Darmstadt, Germany and/or Software AG USA Inc., Reston, VA, USA, and/or its subsidiaries and/or its affiliates and/or their licensors.
