

Supported Upgrade Paths for Software AG Products

Old (Source) Release	9.5	9.6	9.7	9.8	9.9	9.10	9.12	10.1	10.3	10.4*	10.5
8.2	Blue				Grey						
9.0	Blue							Grey			
9.5	Grey	Blue							Grey		
9.6	Grey		Blue						Grey		
9.7	Grey			Blue						Grey	
9.8	Grey				Blue					Grey	
9.9	Grey					Blue					
9.10	Grey						Blue				
9.12	Grey							Blue			
10.1	Grey								Blue		
10.3	Grey									Blue	
10.4*	Grey										Blue

blue = supported direct upgrade path from old release

* Innovation Release

If a direct upgrade path is not shown above, Software AG does not test or support that path. For example, Software AG neither tests nor supports direct upgrade from 9.0 to 10.0 or later. You might still be able to perform such upgrades, but be advised that you would be doing so at your own risk.

If a product had service packs within a release, you can only upgrade the product from the latest service pack.

For some old releases shown above, you cannot upgrade directly to the new release but rather must upgrade to an interim release and then upgrade to the target release. To take advantage of automation improvements, upgrade to the highest interim release possible. For example, to upgrade from 8.2 to 9.12, upgrade to interim release 9.8 and then to target release 9.12. For instructions, use the upgrade guide for the interim release and then use the upgrade guide for the target release.

There is no direct path from Presto 3.8 (webMethods release 9.7), Presto 3.8 (webMethods release 9.8), or MashZone NextGen 9.9 to MashZone Next Gen 9.12 or higher. Instead you must upgrade to MashZone NextGen 9.10 and then upgrade to the target release.

Releases not shown above: Possible interim releases for upgrade from 6.5 are 7.1 or 8.2. Possible interim releases for upgrade from 7.1 are 8.2, 9.0, or 9.5. Possible interim releases for upgrade from 8.0/8.1 are 8.2, 9.0, or 9.5.
