Supported Version Interoperability for Software AG Products

This document lists combinations of products from different releases that are supported by Software AG. The supported combinations are the combinations that are most commonly used or requested.

Combinations that are not listed here are not supported and therefore should not be used. The only exception to this rule is a combination that is specifically described as supported in product documentation.

Note: Products from the same release always work together.

Table of Contents

Document ID: SAG-INTEROP-20200715

Cloud Products

Hybrid Integration

Cloud product (any release)	Interoperates with
webMethods.io Integration	Integration Server 9.12, 10.1, 10.3, 10.5
webMethods Integration Cloud	Integration Server 9.12, 10.1, 10.3, 10.5

On Premises Products

Core Products in 10.5 Release

Product in 10.5 Release	Interoperates with
API Gateway 10.5	CentraSite 10.1, 10.3
API Portal 10.5	API Gateway 10.1, 10.3
	Software AG Designer Service Development 10.1, 10.3
CloudStreams Server 10.5	Connector 9.10, 9.12, 10.1, 10.3
Software AG Designer Service Development 10.5	API Gateway 10.1, 10.3
	API Portal 10.1, 10.3
	Integration Server 9.7, 9.8, 9.9, 9.10, 9.12, 10.1, 10.3
Enterprise Gateway 10.5	(Internal) Integration Server 9.7, 9.8, 9.9, 9.10, 9.12, 10.1, 10.3
OneData 10.5	Integration Server 10.1, 10.3
	Universal Messaging 10.1, 10.3
Optimize 10.5	webMethods Broker 9.6 or later, Content Service Platform Server 8.2.5 and 9.0.1, and E-forms Server 8.2.5 and 9.0.1.
Trading Networks 10.5	API Gateway (API Management feature only) 10.1, 10.3
Universal Messaging server 10.5	Apama (using JMS client only, not connectivity plug-in) 9.12, 10.1, 10.3, 10.3.1
	Integration Server 9.12, 10.1, 10.3
	Integration Server (JMS messaging only) 9.9, 9.10
	Universal Messaging Java clients (except admin API) 9.9, 9.10, 9.12, 10.1, 10.3

Core Products in 10.3 Release

Product in 10.3 Release	Interoperates with
API Gateway 10.3	API Portal 10.5
API Portal 10.3	API Gateway 10.1
	Software AG Designer Service Development 10.1
CentraSite 10.3	API Gateway 10.5
CloudStreams Server 10.3	Connector 9.10, 9.12, 10.1
Software AG Designer Service Development 10.3	Integration Server 9.7, 9.8, 9.9, 9.10, 9.12, 10.1
Enterprise Gateway 10.3	(Internal) Integration Server 9.7, 9.8, 9.9, 9.10, 9.12, 10.1
Integration Server 10.3	OneData 10.5
	Universal Messaging server 10.5
Terracotta DB 10.3	webMethods Adapter for Terracotta DB 10.1 Fix 2
	Integration Server 10.1
Trading Networks 10.3	API Gateway, API Management feature: 10.1
Universal Messaging server 10.3	Apama (using JMS client only, not connectivity plug-in) 9.12, 10.1
	Integration Server 9.9*, 9.12, 10.1
	Integration Server (JMS messaging only) 9.9
	OneData 10.5
	Universal Messaging Java clients (except admin API) 9.9, 9.10, 9.12, 10.1

Core Products in 10.1 Release

Product in 10.1 Release	Interoperate with
API Gateway 10.1	API Portal 10.3, 10.5
	Trading Networks (API Management feature): 10.3
CentraSite 10.1	API Gateway 10.5
CloudStreams Server 10.1	Connector 9.10, 9.12
Software AG Designer Service Development 10.1	API Portal 10.3, 10.4
	Integration Server 9.7, 9.8, 9.9, 9.10, 9.12
Enterprise Gateway 10.1	(Internal) Integration Server 9.7, 9.8, 9.9, 9.10, 9.12
Integration Server 10.1	Software AG Designer Service Development 10.3
	OneData 10.5
	Universal Messaging server 10.3, 10.5
Universal Messaging server 10.1	Apama (using JMS client only, not connectivity plug-in) 9.12
	Integration Server 9.12
	Integration Server (JMS messaging only) 9.9
	OneData 10.5
	Universal Messaging Java clients (except admin API) 9.8, 9.9, 9.10, 9.12

Core Products in 9.12 Release

Product in 9.12 Release	Interoperates with
ActiveTransfer 9.8 in webMethods 9.12 release	Integration Server 9.8, 9.9, 9.10
CloudStreams Server 9.12	Connector 9.10
Software AG Designer Service Development 9.12	Integration Server 9.7, 9.8, 9.9, 9.10
Enterprise Gateway 9.12	(Internal) Integration Server 9.7, 9.8, 9.9, 9.10
Integration Server 9.12	Software AG Designer Service Development 10.1, 10.3
	Universal Messaging 10.1, 10.3, 10.5
	Universal Messaging server (JMS messaging only) 9.9*
Universal Messaging server 9.12	Integration Server 9.7*, 9.8*, 9.9*, 9.10*

Core Products in 9.10 Release

Product in 9.10 Release	Interoperates with
ActiveTransfer 9.in webMethods 9.10 release	Integration Server 9.8, 9.9
Software AG Designer Service Development 9.10	Integration Server 9.7, 9.8, 9.9
Enterprise Gateway 9.10	(Internal) Integration Server 9.7, 9.8, 9.9
Integration Server 9.10	ActiveTransfer 9.8 in webMethods 9.12 release
	Software AG Designer Service Development 9.12, 10.1, 10.3
	Universal Messaging server 9.12*
	Universal Messaging server (JMS messaging only) 10.5
Universal Messaging server 9.10	Integration Server 9.8*

Core Products in 9.9 Release

Product in 9.9 Release	Interoperates with
ActiveTransfer 9.8 in webMethods 9.9 release	Integration Server 9.8
Software AG Designer Service Development 9.9	Integration Server 9.7, 9.8
Enterprise Gateway 9.9	(Internal) Integration Server 9.7, 9.8
Integration Server 9.9	ActiveTransfer 9.8 in webMethods 9.10 and webMethods 9.12 releases
	Software AG Designer Service Development 9.10, 9.12, 10.1, 10.3
	Universal Messaging server 9.12*, 10.3*
	Universal Messaging server (JMS messaging only) 10.1, 10.3, 10.5
Universal Messaging server 9.9	Integration Server 9.7*, 9.8*
	Integration Server (JMS messaging only) 9.12*

Core Products in 9.8 Release

Product in 9.8 Release	Interoperates with
Software AG Designer Service Development 9.8	Integration Server 9.7
Enterprise Gateway 9.8	(Internal) Integration Server 9.7
Integration Server 9.8	ActiveTransfer 9.8 in webMethods 9.9, webMethods 9.10, and webMethods 9.12 releases
	Software AG Designer Service Development 9.9, 9.10, 9.12, 10.1, 10.3
	Universal Messaging server 9.9*, 9.10*, 9.12*

Cross-Product Products and Tools

Product	Interoperability
BigMemory Max	Each release of BigMemory Max can interoperate with MashZone NextGen from the same Software AG release and earlier back to 9.9.
	Each release of BigMemory Max can interoperate with supported webMethods products from the same Software AG release and earlier back to 9.8.
	Each release of BigMemory Max 4.3.x can interoperate with any other release of BigMemory Max 4.3.x.
	BigMemory Max releases map to Software AG releases as follows: 4.3.8 = 10.5 4.3.6 = 10.3 4.3.4 = 10.1 4.3.3 = 9.12 4.3.2 = 9.10 4.3.1 = 9.9 4.3 = 9.8 See *Using BigMemory with webMethods Products* for information on webMethods products supported by BigMemory. See *BigMemory Compatibility with Other Software AG Products* for information on fixes to apply to BigMemory to support version interoperability.
Command Central	Each release of Command Central can install, patch, configure, manage, and upgrade supported Software AG products of the same release or earlier. Software AG recommends always using the latest version of Command Central so you can take advantage of the most up-to-date features. See *Software AG Command Central Feature Support Matrix* for information on Software AG products supported by Command Central.
Deployer	Each release of Deployer can deploy Software AG server assets for the same release or earlier to and from that release. For example, Deployer 10.5 can deploy Software AG server assets 9.9 to 9.9, 9.10 to 9.10, 9.12 to 9.12, and so on.

	Deployer does not deploy Software AG server assets across releases. For example, Deployer 10.5 does not deploy Software AG server assets from 9.9 to 10.5.
	See *webMethods Deployer User's Guide* for information on Software AG servers supported by Deployer.
Digital Event Services	Products that support Digital Event Services can exchange digital events with each other in Software AG releases 10.1 and later.

*Additional Tasks to Achieve Interoperability Between Integration Server and Universal Messaging

Combinations of Integration Server and Universal Messaging that are marked with an asterisk (*) in this document require additional work to achieve interoperability, as follows:

1. Go to the *Software AG_directory*/UniversalMessaging/lib directory and copy the Universal Messaging client jar files nAdminAPI.jar, nClient.jar, and nJMS.jar.

2. Go to the *Software AG_directory*/common/lib directory for the Integration Server installation and paste the client jar files into the directory.

3. Restart Integration Server.

Notes:

- Integration Server cannot use any features delivered in a later release of Universal Messaging. Integration Server can use only the features that existed in the equivalent release of Universal Messaging.

- If you install a fix that updates the client libraries in the Universal Messaging installation, repeat the steps above.

- Do not install any Universal Messaging Common Libraries fix to Integration Server. Doing so would overwrite the client jar files you copied from Universal Messaging installation.
