Software Requirements

- Operating Systems and Supported Platforms

- ApplinX Repository

- ApplinX for JSP Web Application

- ApplinX .NET Web Application

- Supported Browsers

Operating Systems and Supported Platforms

For details regarding supported platforms, refer to the *Release Notes*. For the most updated information refer to the Software AG Empower website at *https://empower.softwareag.com.*

ApplinX server is Java-based and can run on a Java Virtual Machine 1.8. ApplinX can run independently as an independent Java process (this is the default Windows/UNIX installation), or as a J2EE application under one of the following application servers:

- Apache Tomcat 7.0.27, 8.0.18

- Oracle WebLogic 12.1.3

- WildFly 9.0.1 (formerly JBoss)

- Microsoft IIS 7.5, 8, 8.5

When running ApplinX as a J2EE application, the ApplinX server needs to be deployed with the Deployment Manager for J2EE (refer to *Deploying with ApplinX* in the *Designing and Developing an Application* documentation. It is possible to run ApplinX as a standalone server.

ApplinX Repository

ApplinX uses an internal database as a repository, based on the H2 database. External databases used as repository are no longer supported and will be migrated to the internal DB configuration. If you are using the JDBC/ODBC bridge, you will need to migrate manually. See Migration of ApplinX Applications with External Database.

ApplinX for JSP Web Application

Developer's station:

- JDK 1.8

- Apache Tomcat 7.0.27, 8.0.18

- JSP IDE - we recommend using the latest version of Software AG Designer (based on Eclipse 4.5)

Server:

- JDK 1.8

- One of the following application servers:

    ○ Apache Tomcat 7.0.27, 8.0.18

    ○ WebLogic 10.3, 11g

    ○ WildFly 9.0.1

ApplinX .NET Web Application

Developer's station:

- Microsoft IIS 7.5, 8, 8.5

- Visual Studio 2008, 2010

- Microsoft Visual J# .NET Version 2.0 Redistributable Package - Second edition (when using VS 2008, 2010)

Server:

- Microsoft IIS 7.5, 8, 8.5

- Microsoft .NET Framework Version 2.0, 3.0, 3.5, 4.0 Redistributable Package

- Microsoft Visual J# .NET Version 2.0 Redistributable Package - Second edition

Note:
When creating an ApplinX .NET web application, view state is turned off by default (*web.config* file). If you want to use Net web controls in generated pages, ensure that you activate this option. Refer to the Microsoft ASP.NET documentation for further details.

Supported Browsers

- Microsoft Internet Explorer 11, Edge

- Mozilla Firefox: latest version provided by vendor when this version of ApplinX was released

- Google Chrome: latest version provided by vendor when this version of ApplinX was released

- Safari: latest version provided by vendor when this version of ApplinX was released
