

Getting Started

The Self-Training material provides exercises, solutions, recommended reading, related movies and references to the relevant pages in the demo applications. Work through the exercises to gain hands-on experience using ApplinX.

The Getting Started section in the ApplinX documentation provides you the basic information required in order to begin working with the Insurance application. This includes the ApplinX hardware and software prerequisites, ApplinX Windows installation as well as guidelines to running ApplinX Server, Administrator and Designer.

Refer to the Getting Started section in the ApplinX documentation (included in the ApplinX installation, or can be found on Software AG Empower Web).

Note:

This Self-Training material was written for ApplinX version 8.1, but is still applicable to later versions.
