

webMethods CloudStreams Development 9.10 Readme

April 2016

This file contains important information you must read before using webMethods CloudStreams Development 9.10. You can find system requirements, user documentation, and installation and upgrade instructions on the [Documentation website](#) or the [TECHcommunity website](#). At those locations, you can also find suite-related security and globalization information.

Included in this file is information about functionality that has been added, removed, deprecated, or changed for this product. Deprecated functionality continues to work and is supported by Software AG, but may be removed in a future release. Software AG recommends against using deprecated functionality in new projects.

1.0	Critical Information	2

11.0	Support	8

1.0 Critical Information

This section lists any critical issues for the current release that were known when this readme was published. For critical information found later, go to the Knowledge Center on the [Empower website](#).

- WCD-580
Problem with WSDL consumption if it needs to import XSDs.
For SOAP Connector development, the plugin has a problem with consuming the XSDs imported for a WSDL, if any.
Workaround: Create the Document Types from the Integration Server service and use the generated doctypes namespace in the connector Document Model.

- WCD-664
Plugin has the following CloudStreams Server connection issues:
 - Problem with the default server configuration when multiple servers are present.
 - New server connection will not reflect, unless the Designer is restarted.
 - Server deletion will not reflect, unless the Designer is restarted.Currently there is no workaround for this issue.

2.0 Known Issues

This section lists any issues for the current release that were known when this readme was published. For known issues found later, go to the Knowledge Center on the [Empower website](#).

- WCD-617
SSL connection configuration for CloudStreams Server is not functional.
Not able to connect to an Integration Server which is running on SSL port, because the Designer currently does not support SSL.
Currently there is no workaround for this issue.

3.0 Usage Notes

This section provides any additional information you need to work with the current release of this product.

4.0 Fixes Included in Each Release

This section lists the latest fix level that has been included in each release for each product component. A release is listed in this section only if changes occurred in that release. Go to the Knowledge Center on the [Empower website](#) for detailed information about fixes.

Release 9.10

- WCD_9.9_Fix2

Release 9.9

- WCD_9.8_Fix2

Release 9.8

- WCD_9.7_Fix1

Release 9.5

- WCD_9.0_SP1_Fix1.

5.0 Other Resolved Issues

This section lists the issues that were resolved in each release but were not part of the fixes listed in the previous section. A release is listed in this section only if changes occurred in that release.

Release 9.9

- WCD-716
For a cloud connector service, fields that have the recordList parameter populated, do not show up as documents.
While creating a cloud connector service, once an operation and object are selected, the next screen shows a list of fields. While choosing a field, if the field has the recordList parameter populated, it should show up as a Document. Currently these fields show up as String fields.
This issue is resolved.

- WCD-722
Null pointer exception appears when workspace gets refreshed.
Subsequent to creating a new connector using the CloudStreams Development perspective, when another connector is created or the workspace refreshed, a Null pointer exception is observed.
This issue is resolved.

- WCD-724
Errors that are related to creating or editing a Cloud Connector Service are not displayed in a dialog box.
While creating or editing a Cloud Connector Service, if there is any error, the error is logged only in the error logs and not displayed in a dialog box. As a result, the user is not informed about the problem.
This issue is resolved. The error information now appears in a dialog box.

Release 9.8

- WCD-555
SOAP Connector Validations.
The following validation issues are observed for SOAP Connectors:
 - Delete does not work after the mapping is configured.
 - Signature configuration is not validated.
 - Remove configuration submenu is enabled even if there is no configuration for mappings.
 - Help button is not working in the Signature Configuration Wizard.
 - Parameters are not validated.
 - Format Service Argument parameters are not validated.
 These issues are resolved.

- WCD-585
Sporadic behavior in WSDL consumption.
Exception observed when trying to consume a WSDL from an URL location.
CloudStreams plugin had a problem with consuming a WSDL through a URL location where it throws a parsing exception with the error message "WSDL file is not available in the *tmpService* folder of the Connector project".
This issue is resolved.

- WCD-612
Older connectors do not appear in the Integration Server Administration page even after a successful deployment from Designer.
The following errors are observed in the Integration Server error log:
*com.wm.app.b2b.server.ServiceException: java.io.FileNotFoundException:
C:\SoftwareAG\profiles\IS_default\workspace\temp\tempDocTypeDir\sqs.xsd (The system cannot find the file specified)
Caused by: com.wm.app.b2b.server.ServiceException: java.io.FileNotFoundException:*

C:\SoftwareAG\profiles\IS_default\workspace\temp\tempDocTypeDir\sqs.xsd (The system cannot find the file specified)

Caused by: java.io.FileNotFoundException:

C:\SoftwareAG\profiles\IS_default\workspace\temp\tempDocTypeDir\sqs.xsd (The system cannot find the file specified)

This issue is resolved.

- WCD-658
Deployment log does not have sufficient information.
While deploying a connector from the CloudStreams Development perspective in the Designer, the Deployment log does not display adequate information. The log displays information whether the deployment was successful or unsuccessful but not from which Integration Server it is being deployed.
This issue is resolved.
- WCD-624
“Add Parameters” option from the “Operation” menu gets disabled after the first parameter is added.
In a SOAP Connector, if parameters are added from the Operation context menu, the “Add Parameters” option gets disabled after adding the first parameter.
This issue is resolved.

6.0 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content. A release is listed in this section only if changes occurred in that release.

Release 9.8

- Software AG documentation is no longer available on the Software AG installer. You can access all Software AG documentation on the [Documentation website](#).

7.0 Terminology Changes

A release is listed in this section only if changes occurred in that release.

Release 9.8

Old Term	New Term
Group	Provider Group
Connector Package	Package
Plug-In Content	Connector Content

8.0 Added, Removed, Deprecated, or Changed Items

This section lists functionality, controls, portlets, properties, or other items that have been added, removed, deprecated, or changed. A release is listed in this section only if changes occurred in that release.

Release 9.10

Removed Item	Replacement, if any
Redundant fields in REST service interface	<p>Serialization type fields are removed from the Cloud Connector Service (REST) > Resource tab > Request Processing section.</p> <p>Parsing type fields are removed from the Cloud Connector Service (REST) > Resource tab > Response Processing section.</p>

Release 9.9

Added Item	Description
Publisher	An optional field "Publisher" is added for the CloudStreams Provider and CloudStreams Governance projects to obtain the publisher name.
Description	An optional field "Description" is added for the CloudStreams Provider and CloudStreams Governance projects to obtain the description.

Release 9.8

Added Item	Description
Display Name	Added an optional field “Display Name” for Services, Operations, and Resources. This value is used for displaying the name of the item (Service, Operation, or Resource) in a connector.
New Group Dialog	Added the “New Group” dialog for a connection group selection which shows all available connection groups.
Copy	Added the “Copy” menu item in the CloudStreams Connector view to copy the CloudStreams Provider Project into the system clipboard.
Paste	Added the “Paste” menu item in the CloudStreams Connector view to paste the CloudStreams Provider Project from the system clipboard.
Hide	Added an optional field “Hide” for Operations for the SOAP Connector development. The CloudStreams Server will hide the operations during the Cloud Connector Service creation/selection.

Release 9.7

Added Item	Description
Version Information	The version of the Designer has been included in the manifest of the CloudStreams Connector.

9.0 Added, Removed, Deprecated, or Changed Built-In Services

A release is listed in this section only if changes occurred in that release.

Release 9.5

Removed Service	Replacement, if any
pub..util:getSalesforceSessionId	None
