

webMethods Database Component Configurator 9.12 Readme

October 2016

This file contains important information you must read before using webMethods Database Component Configurator 9.12. You can find system requirements, user documentation, and installation and upgrade instructions on the [Documentation website](#) or the [TECHcommunity website](#). At those locations, you can also find suite-related security and globalization information.

Included in this file is information about functionality that has been added, removed, deprecated, or changed for this product. Deprecated functionality continues to work and is supported by Software AG, but may be removed in a future release. Software AG recommends against using deprecated functionality in new projects.

1.0 Critical Information

This section lists any critical issues for the current release that were known when this readme was published. For critical information found later, go to the Knowledge Center on the [Empower website](#).

2.0 Known Issues

This section lists any issues that were known for the current release when this readme was published. For known issues found later, go to the Knowledge Center on the [Empower website](#).

- WDA - 918
In the Database Component Configurator, when a product is selected and then the mouse cursor is pointed to the radio button component, the selection is set back to All. Moving the mouse cursor without clicking the button should not change the selection.
There is currently no workaround for this issue.

3.0 Usage Notes

This section provides any additional information you need to work with the current release of this product.

4.0 Fixes Included in Each Release

This section lists the latest fix level that has been included in each release for each product component. A release is listed in this section only if changes occurred in that release. Go to the Knowledge Center on the [Empower website](#) for detailed information about fixes.

Release 9.12

- DC_9.9_DBS_Fix5
- DC_9.8_DBS_Fix8
- DC_9.7_DBS_Fix10
- DC_9.6_DBS_Fix11

Release 9.10

- DC_9.9_DBS_Fix3

- DC_9.8_DBS_Fix6
- DC_9.7_DBS_Fix8
- DC_9.6_DBS_Fix9

Release 9.9

- DC_9.8_DBS_Fix2
- DC_9.7_DBS_Fix5
- DC_9.6_DBS_Fix6
- DC_8.2_SP2_DBS_Fix12

Release 9.8

- DC_9.6_DBS_Fix4
- DC_9.0_SP1_DBS_Fix5
- DC_8.2_SP2_DBS_Fix11

Release 9.7

- DC_9.6_DBS_Fix2
- DC_9.5_SP1_DBS_Fix4
- DC_9.5_SP1_DCC_Fix1
- DC_9.0_SP1_DBS_Fix4
- DC_8.2_SP2_DBS_Fix10

Release 9.6

- DC_9.5_SP1_DBS_Fix1
- DC_9.0_SP1_DCC_Fix1
- DC_9.0_SP1_DBS_Fix2
- DC_8.2_SP2_DBS_Fix8

Release 9.5

- DC_9.0_SP1_DBS_Fix1
- DC_8.2_SP2_DBS_Fix7

5.0 Other Resolved Issues

This section lists the issues that were resolved in each release but were not part of the fixes listed in the previous section. A release is listed in this section only if changes occurred in that release.

Release 9.12

- WDA-844
Incorrect Copyright year in the DCC “About” window.
The Copyright year in the DCC “About” window shows 2006 – 2015. It should be 2006 – 2016.
This issue is resolved.

Release 9.8

- WDA-768
Database Component Configurator does not work with SSO/NTLM authentication when it is installed on Microsoft Windows.
When you try to use the Authentication Method as NTLM to establish a connection to Microsoft SQL Server, Database Component Configurator fails with the following exception:
Authentication was requested but the required DDJDBCx64Auth05.dll was not found on the path specified by the java.library.path system property.
Workaround: Add the following statement in the setEnv.bat file available at
<Install_Dir>\common\db\bin:
set SSO=<Install_Dir>\common\bin
set JAVA_OPTS=%JAVA_OPTS% -Djava.library.path="%SSO%"
where <Install_Dir> is the installation directory.

Release 9.5

- WDA-317
Database component upgrades from 7.1.2.0 to 8.0.1.0 fail.
If you try to migrate database components using a PRODUCT option, for example, PRODUCT - Optimize, you receive the error "Optimize 7.1.2.0 not installed. Migration path may be wrong."
The workaround is to migrate individual database components. For instructions, see the webMethods Upgrade Guide. Do not use the PRODUCT options to migrate database components.

- WDA-693
The Database Component Configurator issues a `NullPointerException` when importing the configurations through the command line interface (CLI) on Linux/Unix.
The Database Component Configurator does not store passwords in exported configurations file, and while importing the configurations file, DCC issues a `NullPointerException` when it encounters a null value for the password.
This issue is resolved.

6.0 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content. A release is listed in this section only if changes occurred in that release.

Release 9.8

- Software AG documentation is no longer available on the Software AG installer. You can access all Software AG documentation on the [Documentation website](#).

7.0 Terminology Changes

A release is listed in this section only if changes occurred in that release.

8.0 Added, Removed, Deprecated, or Changed Items

This section lists functionality, controls, portlets, properties, or other items that have been added, removed, deprecated, or changed. A release is listed in this section only if changes occurred in that release.

9.0 Copyright Information
