

Upgrade Verification Checklist

After you upgrade your environment using any of the upgrade paths described in the *Upgrading webMethods Products* guide, use this Upgrade Verification Checklist to ensure your environment upgraded successfully. The checklist is a series of questions that you answer. For information about where to find logs identified in the questions, see the *Upgrading webMethods Products* guide.

If you answer any question Yes, contact Software AG Global Support or the local GCS consultant in your organization for help with resolving the issue.

Important! Resolve all issues before releasing your upgraded environment for transaction processing.

Note: Depending on the upgrade path you performed, some of the questions might not apply.

Step	Product	Verification Questions	Yes	No	N/A
1	Installer	Does the installer log list any APP_ERROR or WARNING messages?			
2	Broker	Did you receive errors while upgrading Broker?			
		After upgrading Broker, do you receive any errors when you attempt to start the Broker Server or Broker?			
3	Integration Server	Does the Integration Server migration utility log file list any errors?			
		Did you receive errors while migrating the Integration Server database components?			
		Did you receive errors while migrating the clustered Integration Servers?			
		After upgrading Integration Server, do you receive any errors in the server log or error log when starting Integration Server?			
4	Trading Networks	Did you receive errors while using the Integration Server utility to migrate Trading Networks?			
		Did you receive errors while migrating the Trading Networks database components?			
		Did you receive errors while migrating the Trading Networks date and time stamps for migrated data?			

Step	Product	Verification Questions	Yes	No	N/A
5	My webMethods Server (MWS)	Does the My webMethods Server migration utility log file list any errors?			
		Did you receive errors while migrating the My webMethods Server database components?			
		Did you receive errors while migrating the clustered My webMethods Servers?			
		After upgrading My webMethods Server, do you receive any errors in the server log or error log when starting My webMethods Servers?			
6	Designer for Process, Service Development, Tasks and CAF Development, Business Rules and Continuous Query Design-time Data	Did you receive errors while importing the Designer preferences?			
		Did you receive errors while importing the Integration Server definitions?			
		Did you receive errors while importing the process models?			
		Did you receive errors while doing the Build and Upload of process models?			
		Did you receive errors while importing the Task and CAF projects?			
		Did you receive errors while publishing the Task and CAF projects to My webMethods Server?			
		Does any CAF project have a red cross in the Navigation panel of Designer? -OR- When using the Development perspective, are errors shown in the Problems tab even after 'Repair'?			
7	Process Runtime	Did you receive errors while migrating the Process Runtime database components?			
		Are there any errors in the My webMethods process instance monitoring page?			
		Do any process instances have a different state <i>after</i> migration than they did <i>before</i> migration?			

Step	Product	Verification Questions	Yes	No	N/A
8	Optimize	Did you receive errors while migrating the Optimize database components?			
		Did you receive errors while importing the Central Configuration System (CCS) environment?			
		Did you receive errors while deploying the CCS environment?			
		Did you receive any errors in the startup logs for the Infrastructure Data Collector, Analytic Engine, Prediction Engine, or Web Service Data Collector engine?			
9	Deployer	Did you receive errors while migrating the server aliases?			
		Did you receive errors while migrating the target groups?			
		Did you receive errors while migrating the deployment projects?			
		Did you receive errors while building the deployment projects?			
		Did you receive errors while deploying the deployment projects?			
10	CentraSite	Did you receive errors while verifying the CentraSite assets?			
11	Mediator	Did you receive errors while redeploying the virtual services from CentraSite to Mediator?			
12	System Management Hub	Did you receive errors while starting the new System Management Hub services?			
		Did you receive errors while starting the old System Management Hub services?			
		Are any relevant products that the System Management Hub supports/administers missing from the console?			
13	Blaze Rules	Did you receive errors while redeploying the Blaze rules to Integration Server?			
		Did you receive errors while deploying the rule maintenance applications (RMAs) to My webMethods Server?			

Step	Product	Verification Questions	Yes	No	N/A
14	ApplinX	Did you receive errors in the server error log when running ApplinX Server or when synchronizing the repository?			
		Did you receive errors in the Error log view in Eclipse when upgrading your Web application?			
		Did you receive errors when compiling the Web application?			
15	Reporting	Did you receive errors while migrating the Reporting database component?			
16	Universal Messaging	Did you receive any error while migrating the data directory for each realm server			
17	Business Events	Does the Business Events Migration Utility log file list any errors?			
18	Active Transfer	Did you receive any error while configuring ActiveTransfer after upgrade			
19	Adapters- webMethods JDBC, webMethods WebSphere MQ, webMethods PeopleSoft EnterpriseOne, webMethods SAP	Did you receive any error while configuring any of the Adapter and while connecting to Database using any of the Adapter after upgrade			
20	eStandards- webMethods Chem eStandards Module, webMethods ebXML Module, webMethods papiNet Module, and webMethods RosettaNet Module, webMethods FIX Module, webMethods SWIFT FIN Module and webMethods SWIFTNet Module	Did you receive any error while configuring any of the eStandards module after upgrade			

Step	Product	Verification Questions	Yes	No	N/A
21	Terracotta	If you have a single server, did you receive any error while starting the latest Terracotta Server Array after upgrade?			
		If you have a mirror group consisting of an active server and a mirror server, did you receive any error while starting the latest active server and mirror server after upgrade?			
22	Command Central	Did you receive errors while migrating Command Central Infrastructure?			
		Does the Command Central Migration Utility log file list any errors?			
23	Platform Manager	Did you receive errors while migrating Platform Manager Infrastructure?			
24	OneData	Did you receive any error while starting the latest OneData Server after upgrade?			
25	Asset Build Environment	Did you receive any error while running the latest Asset Build Environment after upgrade?
