

# Software AG System Management Hub 9.5 SP1 Readme

## November 2013

This file contains important information you must read before using System Management Hub 9.5 SP1. You can find additional information about System Management Hub 9.5 SP1 on the [Software AG Documentation website](#). In addition, the following suite-related information is also available at that location:

*webMethods Product Suite Release Notes*

*webMethods System Requirements*

*webMethods System Cache Specifications*

*Using the Software AG Installer*

*Installing webMethods Products*

*Using the Software AG Update Manager (fixes)*

*Upgrading webMethods Products*

Product Documentation

You can find the following information in the Products section of the [Empower website](#):

Security Information

Globalization Information

## [6.0 Support](#)

# 1.0 Critical Information

This section lists the critical issues that were known when this readme was published. For critical information found later, go to the Knowledge Center portion of the [Empower website](#).

None.

# 2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the Knowledge Center portion of the [Empower website](#).

None.

# 3.0 Usage Notes

This section highlights product limitations and changes to product behavior introduced in this release.

- The Migration Tool, when used in console mode, cannot migrate single users if the user name contains non-ASCII characters. In console mode it also cannot migrate all available users for a particular product if the name of the product contains non-ASCII characters. The migrating is not possible because the communication between the console and the program is byte oriented. The migration of a user, whose user name contains non-ASCII characters, is possible when migrating all users for the specified product, or all users for all products. The migration of users for a product, which name contains non-ASCII characters, is possible when all users for all products are selected for migration. The graphical version (the GUI mode) of the Migration Tool does not have problems with non-ASCII characters.
- Configure the following web browser settings:
  - Enable JavaScript.
  - Enable Cascading Style Sheets (CSS) processing
- Windows Start Menu  
The Windows start menu does not contain a shortcut to the System Management Hub 9.0 SP1 logon screen. Use the following URL to access the logon screen: `http://<MIL_NODE>:<port_number>/smh/login.htm`. <MIL\_NODE> is the host name of the MIL server, for example, "my\_pc.softwareag.com", or "localhost" on the local machine. The default Tomcat HTTP port is 10010. You cannot access the 9.0 SP1 version logon screen with an 8.2 version shortcut containing the old URL. In this case, you must change the port number in your link to the System Management Hub 9.0 SP1 default Tomcat HTTP port (10010).
- Using MIL Servers on Remote Machines  
You can use a remote or a local MIL server. See the System Management Hub documentation for the configuration details.

- For release information related to the security package distributed with System Management Hub, see the Software AG Security Infrastructure 9.0 SP1 readme.

## **4.0 Fixes and Enhancements**

This section describes the fixes and enhancements included in System Management Hub 9.5 SP1.

### ***4.1 Fixes and Service Packs Included in This Release***

This section lists the fixes and service packs for previous releases that have been included into the current release. If only some issues in a fix or service pack have been included, that partially included fix or service pack is not listed here, and those issues are listed separately in [Section 4.2 Resolved Issues](#). See the Knowledge Center section of the [Empower website](#) for more information about fixes and service packs.

None.

### ***4.2 Resolved Issues***

This section lists issues that were resolved in this release and that are not included in the fixes and service packs listed in [Section 4.1 Fixes and Service Packs Included in This Release](#). These issues might have been resolved in a fix or service pack that was not included in its entirety into this release, or they might have been resolved since the last fix or service pack was released.

### ***4.3 Enhancements***

For a detailed list of the enhancements included in System Management Hub 9.5 SP1, see the Release Notes available on the [Software AG Documentation website](#).

### ***4.4 Documentation Changes***

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

None.

### ***4.5 Terminology Changes***

This section lists terminology that has changed since the last full release of the product.

None.

### ***4.6 Added, Removed, Deprecated, or Changed Items***

This section lists product functionality that has been added, removed, deprecated, or changed since the last full

release of the product. Deprecated Built-In services and APIs are listed in the relevant sections that follow this one.

None.

## **4.7 Added, Removed, Deprecated, or Changed Built-In Services**

This section lists Built-In services that have been added, removed, deprecated, or changed since the last full release of the product.

None.

## **4.8 Added, Removed, Deprecated, or Changed APIs**

This section lists APIs that have been added, removed, deprecated, or changed since the last full release of the product.

None.
